DANCE202 - Arts Policy, Leadership, and Engagement

Course Description

This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.

DANCE203A - The Arts, Culture, and Performance of New York

Course Description

This course introduces its participants to New York through its rich artistic, cultural, and performance offerings—drawn from art, dance, film, music, literature, and theater. Visiting all five boroughs, they contemplate how the identities of New Yorkers—informed by the city and by ability, class, ethnicity, gender, race, and sexuality—are performed in the theater of everyday life: in parks, streets, subways, and especially the city's diverse neighborhoods and restaurants.

DANCE205A - Internship in New York

Course Description

Participants in this course are immersed in the professional work of New York's arts, culture, and performance industries through apprenticeship to a sponsoring artist, institution, or organization. Participants work fifteen hours per week at their internship and meet arts professionals from within and beyond Duke's alumni network. They also meet regularly with their supervising professor. In combination, this work experience, networking opportunity, and academic reflection help interns develop their professional capabilities, refine their interpersonal and workplace skills, and prepare for future work in creative industries.

DANCE205S - Advanced Dance Composition

Course Description

Focuses on developing your creative voice in movement and choreography. Open to dancers of any style. Continuation of the basic movement, choreographic devices and forms explored in Dance 105S. Explores the use of props, sets, lighting and costuming, and the relationship of music to dance. Choreographing and directing ensembles. Improvisation, choreographic tools, inter-disciplinary projects, site specific work, and lots of individual attention to guide students through the creative process. Prerequisite: Dance 105S.

DANCE210 - Contemporary Dance

Course Description

This course is for students who are familiar with dance fundamentals. Dancers will learn contemporary and modern dance techniques that emphasize musical expression, rhythm, fluidity, lyricism, coordination, and artistic expression. Class includes moving across the floor, the basics of floor work (Flying Low) and evolves into advanced inversions, strength building, improvisation, and extended dance phrases that develop the relationship between artistic exploration and dynamics, textures, and musicality. This course encourages refining and exploring contemporary dance to develop the dancer's artistry and physical self-awareness.

DANCE211 - Musical Theater Workshop: Performance

Course Description

Students will develop the three primary skills of musical theater performance (acting, dancing, and singing) in this workshop. Students will also try their hand at choreography, direction, and dramaturgy as we collaboratively stage scenes and songs from musicals throughout the semester. We will analyze what makes musical theatre performance successful as we work to hone your own abilities and talents together. Each student will receive a mixture of individual and group coaching every week. The course will culminate in a student-led performance. Come prepared to move and to sing each week. All levels welcome.

DANCE219S - Production Management for Theater

Course Description

What does it mean to successfully manage an artistic endeavor? How does management affect whether or not a project is successful? How can artist managers be more sensitive and responsive to the needs of their fellow collaborators? This course explores theater from the perspective of the production manager. While our focus will be theater, we'll also discuss how to apply skills such as scheduling, budgeting, writing contracts, and personnel negotiation across the performing and cinematic arts.

DANCE225S - Ballet Forces: Dancing the State

Course Description

Exploration of ballet as an art form, entangled in questions of commerce, race, aesthetics, embodied practice, creative achievement. Historical trends of theatrical dance, and fields of engagement that produced ballet as a practice are examined. Questions of pedagogy and access, qualities of performance across geographies and eras, biographical depictions of influential figures. Theoretical grounding established for how ballet arrives entangled in circles of enduring social influence.

DANCE226S - Performing African Diaspora

Course Description

The Black cultural contributions of globally popular performance genres such as salsa, capoeira and kizomba often remain unrecognized. The objectives of this class are: 1) to understand the historical, cultural and political forces that created the African Diaspora and its rich tapestry of dances. 2) to question our assumptions that knowledge is only produced through the mind; knowledge is also produced and transmitted through moving bodies. To meet these objectives, the course will be a combination of seminar and studio: in seminar we will engage readings in anthropology, dance and performances studies about specific dances which we will then learn in studio.

DANCE233S - Performing Brazil

Course Description

Introduces the history and culture of Brazil through the lens of performance. The course explores the way performance arts (dance, music, carnival, theatre, sports) are celebrated as expressions of the African, Indigenous and European roots of Brazilian culture, yet also subjected to race, gender, sexuality and class discrimination. Readings, films, seminar discussions and studio workshops give students understanding of the social forces that shape Brazil; and a critical appreciation for the ways in which performance can both re-inscribe stereotypes and social injustice, and be an avenue for transgressive expressions, political protest, and liberatory practices.

DANCE235SL - Capoeira: Practice and Culture

Course Description

Lecture/lab course introducing the movement, music and culture of capoeira, an Afro-Brazilian martial art that combines dance, self-defense and acrobatics. Created by male African slaves in Brazil several hundred years ago, viewed as a social threat and outlawed in the 19th century, celebrated as an element of national identity in the 20th century, today capoeira is rapidly crossing national, racial and gender borders as it becomes a popular global practice. Studio classes twice a week focus on the basic movements, percussive music and call-and-response singing. Seminar once a week focuses on the historical, cultural and socio-political dynamics that shape capoeira in Brazil and beyond.

DANCE251AS - Duke in London: Arts

Course Description

This course surveys London as a site of dynamic cultural production, whose participation in the global marketplace of artistic commodities reveals the city's restlessly transnational, cosmopolitan character. Studying local institutions, students are introduced to the complex relationship among art, state, and the global cultural marketplace; studying a multiracial and multiethnic community, they become familiar with theories of globalization, neoliberalism, and cosmopolitanism, as well as migration and so-called national identity. Students also participate in excursions including dance, opera, and theatre productions and visits to museums and other sites of cultural importance.

DANCE301 - Arts Activism & Everyday Technology

Course Description

In the last decade, smartphones and social media have been utilized to expose societal inequity and injustice. This course explores the intersection of arts activism and digital activism, both of which sprout from a desire to effect change. In Arts Activism & Everyday Technology, students integrate their social media savvy and passion for exerting influence into a formalized generative art practice (using dance, film, photography, drama, music, visual art, creative writing, and digital media design) addressing a topical issue. Students study past and present artist-activists, research an area of interest and use their smartphones to create a culminating interdisciplinary digital exhibition.

DANCE317 - The Body in Art in Early Modern Europe: Power and Limits of Corporeal Representations

Course Description

This course studies the artistic representations of the human body in many guises: aesthetic, political, social, cultural, and erotic. It analyses the different strategies artists deployed to develop rhetorics of the body both physical and emotional. It considers different media (including painting, sculpture, drawings, prints, architecture, and gardens) and major theoretical frameworks (including feminist theory, phenomenology, social theory and somaesthetics). This course considers the body dynamically through composition, as object of investigation, as locus of meaning and through social understanding. Lectures and discussions are complimented by corporeal performances and improvisations.

DANCE318S - Movement in Question: Introduction to Critical Dance Studies

Course Description

This writing-intensive seminar casts students as a research team engaging in multiple ways with the interdisciplinary field of critical dance studies. Students read and analyze foundational texts and theories, develop capacity to interpretively analyze movement, and practically engage in embodied activities that make gaps between textual representation and embodiment visible. This holistic approach throws movement into question and centralizes dance as a critical way of making the social world. Final Research Projects include conventional academic papers or choreographed performances that engage issues raised in the course. Zero dance experience required. All physical abilities welcomed.

DANCE338S - Ballet History: Black Presence

Course Description

Ballet History: Black Presence examines the exclusion of Black ballet artists from the historical canon. The course content spans from 1930 to 2020, investigating the events, individuals, institutions, and artistic artifacts involving Black artists, placing them into the narrative of ballet history. It focuses on the social, political, economic, and aesthetic factors that inform artistic production and canonical inclusion based on race and nationality, interrogating the perception that ballet is an exclusively European cultural artform. The course discusses the influence of West African, Caribbean, European, South American, and American Blacks on the development of the ballet profession.

DANCE368 - Gender in Dance and Theatre

Course Description

Ways in which gender and sexuality are conceptualized in selected performance cultures. Interprets these historically constituted social formations through an examination of the diverse cultural constructions of gender meanings, representations and ideologies as interpreted and expressed in dance and theatre. Symbolic meanings of gender in relation to forms of social life and theatrical experience. The Devadasi in India, the concept of the male embodied Onnagata, and the notion of the female embodied Otokoyaku in the dance-theatre of Japan.

DANCE370S - The Choreographic Mind: Order, Disorder, Organization, Relations

Course Description

Practice-based studio work, discussions, and readings in current cultural theory, contemporary philosophy, and political discourse. Introduces choreography as a creative act of structuring movement; interrogates culturally dominant as well as subversive modes of ordering; examines the wider social and political context and consequences of various forms of artificially created structures. The students' radically subjective creativity, artistic experimentation, awareness, perception and expression is cultivated in order to understand and challenge the status quo and to create 'relational artefacts' through choreographic craft.

DANCE371 - Artists in Healthcare: Collaborations and Complexities**Course Description**

The economically over-burdened US health care system and extended life expectancies for older adults offer a unique opportunity for working artists—not arts therapists—to intervene in the rapidly expanding field of integrative art and health. Rather than study health outcomes as indicators of 'success,' we centralize creative practice as our axis of inquiry. Course readings, interviews, and field visits to a Durham-based intervention highlight power imbalances and cultural sensitivities in hospitals, clinical care, assisted living, and nonprofit community care contexts. Culminates in student driven case studies of local arts work and workarounds.

DANCE375 - Music for Dancers**Course Description**

Exploration of the elements of music, music structures, and their relationship to movement and dance. Practical emphasis on rhythmic fundamentals, rhythm notation, musicality, mindful listening, and how they apply to choreography/composition and dance class. In-class movement, rhythm, and listening exercises, both solo and in groups, along with written and creative assignments, using drums, voice, body percussion and digital audio. The goal of this course is to provide musical training for dance/movement artists. Requirements: no musical training required to take the class, however, students should be able to create/choreograph/improvise movement phrases.

DANCE378S - 'Bollywood' Dance, Music and National Identity

Course Description

Dance and Music are quintessential to Hindi Cinema, which is often nicknamed as 'Bollywood.' Over the last century, Hindi cinema has garnered what has emerged as a unique form of dance genre that subsumes, reconstitutes and remixes the traditional, modern, contemporary and global movement vocabularies as an aid to highlight and extend the narrative plot of the film. In the past few decades, Hindi cinema has incorporated Indian diasporic cultural identities alluring an unprecedented global reception. This course will focus on 'Bollywood' dance and music genres and ways in which they promote the allure for a revitalized national identity, a global cultural presence, and network associations with the Indian diaspora as well.

DANCE403S - Pedagogies of Dance

Course Description

Preparation of serious, experienced dancers to teach dance technique, performance and other embodied pedagogies to adults/young adults in a college or community setting. Students will critically analyze pedagogical readings from a range of approaches/philosophical platforms. Contemporary analyses of embodied pedagogy will help interrogate questions of agency, power dynamics in the teacher/student relationship, and personal blind spots as characterized by bell hooks. Students will engage in teaching practice, self- and peer- critique, and create tools of self-analysis concerning their teaching and its effect. Prerequisites: DANCE 101 and one intermediate- or advanced-level dance technique course.

DANCE452 - Contemporary Chinese Dance in the Diaspora

Course Description

'Contemporary Chinese Dance in the Diaspora' is a studio and seminar combined course designed to introduce students to Chinese dance techniques within contemporary dance practices. Each class will commence with a comprehensive dance technique session, followed by discussions centered on readings, films, and documented dance performances. Through these activities, the course provides an opportunity to explore how dance facilitates dialogue about identity formation and cultural belonging while also serving as a powerful platform for political activism within diasporic communities.

DANCE462 - The Performance and Practice of Speculative Human Order

Course Description

In response to global ecological crises, this class seeks and enacts alternative poetics of human relations based on expanded individual awareness. The course entails a weekly studio practice of embodied strategies to develop new sensibilities and experiences in moving and relating to others. Students will be active performers/participants in the creation of a 'social choreographic situation' engaging a specific community or a broader public at the end of the term. At times deeply experimental; interdisciplinary discussions, critical thinking, reading, and reflections form an integral part of the class. No previous or specific movement practice is required.

DANCE482 - Social Justice Choreography

Course Description

Social Justice Choreography is a process and project-oriented course that asks students to ponder the questions of what a choreography of social justice is and how dance can enact social changes. Students will study both theories and practices of integrating dance-making with social activism. They will also learn from and have direct conversations with a number of established choreographers in the US whose works address a range of different contemporary social issues and topics, such as mass incarceration, systemic racism, patriarchy, disability, immigration, etc. Students will work towards a final project in which they will create a dance piece on a social issue of their choice.

General Education Curriculum Codes

SB - (SB) Social & Behavioral Analysis: A&S Curriculum, SS - (SS) Social Sciences

DECSCI189FS - Introduction to Machine Learning and Computational Models in the Social Sciences

Course Description

Our goal as social scientists is to build models of the world and provide advice to policy makers. Given that human actors are often strategic and the games they play are complex, building and testing these models is difficult and distinct from common examples of machine learning. A task that is often used to motivate introductions to machine learning is teaching a model to recognize hand-written characters using MNIST data (<https://www.tensorflow.org/datasets/catalog/mnist>). Our task is harder: we must build models that involve forecasting human behavior ranging from votes in a legislature to changes in stock prices.

DECSCI201 - Discovering Game Theory: Social Complexity and Strategic Interdependence

Course Description

Strategy is all around you: In sports, the economy, law, politics, and your own social interactions. In this course, you will explore one of the foundational tools that social scientists use to analyze the complexity of strategic interactions: Game Theory. To do so, the course employs a highly interactive learning environment, in which you and your peers engage in strategic interactions that illustrate fundamental social dilemmas. In taking this course, you will gain a new analytical perspective into the complexity of social phenomena, and develop a solid foundation for additional course work in social science.

DECSCI207 - National Security Simulation: The Arctic, Climate Change and Great Power Competition

Course Description

Students will participate in a national security simulation in which they will have an assigned role as a state or non-state actor and work with teams to develop policy responses to a security crisis that changes and develops over time. The simulation this semester will involve security issues that arise due to the climate change in the Arctic that has opened up sea lanes and other resources that are generating competition for advantage among multiple nations. Participants will be required to grapple with a complex information environment that is polluted with misinformation, manipulation and deception. Instructional weeks on the substantive security issues the simulation addresses will be interspersed with gameplay. No prior experience in national security is required.

DECSCI235 - Risk

Course Description

Simply put, risk is 'the possibility of something bad happening.' Defined in this way, increased attentiveness to risk has the potential to be paralyzing because it is present in nearly every aspect of human existence. This course, organized by the Duke Center on Risk, capitalizes on this ubiquity by bringing together ideas and approaches from all corners of the university. A unifying perspective is the recognition that risk involves elements of both chance ('possibility') and value ('something bad'). Therefore, students will learn the languages of probability and economics within the cultural settings of public policy, law, engineering, business, and medicine.

DOCST137FS - Minor Utopias: Everyday Approaches to a Better World

Course Description

This FOCUS seminar begins with a consideration of small-scale endeavors by ordinary people to create communities that reflect their values. After spending first half of the semester learning about past efforts to create minor utopias, students will research examples of minor utopias that interest them. Finally, the seminar will work together to develop shared framework for a minor utopia, addressing questions such as: how resources will be developed and shared, how care will be provided to those who need it, how the community's values will be communicated and enforced, and how the community will address violations of those norms.

DOCST152CNS - Visualizing Minor Stories: Archives, Museums, Histories

Course Description

Explores local/ global archives to document distant, marginal or invisible histories. Guided research in Duke's collections and other museums, galleries, and digital collections. Examines injustice, liberation, and empowerment through knowledge production. Trace historical divisions and produce related research and creative projects. Variable topics like travel and missionary writings; wartime and military records of American wars in Asia and the Middle East; Afro-Asian solidarity; global and American civil rights; imperialism and the global cold war, global diasporas including Asian/American and other minority movements. Explore variable forms: oral histories, film and photography, digital exhibitions, and creative works.

DOCST159S - Gateway Seminar: What Did Your Grandparents Do? A Global Exploration of Individual Life Histories

Course Description

This course will focus on the stories of individuals and their experiences of the great historical events of the 20th century. Students will read from a wide variety of oral histories, memoirs, biographies and primary source materials such as diaries and letters, with an emphasis on the lives of relatively unknown figures such as farmers, merchants and housewives. The goal will be to both understand and connect imaginatively with the life experiences of the people who lived history rather than those who made it. Students will also explore the diverse stories of their own families and related networks.

DOCST179FS - Documenting Youth Movements for Environment and Racial Justice Since 2010

Course Description

Immersion in the dangerous and contentious recent history of youth activism in environmental and racial justice movements worldwide. Using oral history, archival research methods, and cultural production, students explore methods for researching documenting and creating narratives of youth social activism. Historical and contemporary youth campaigns explored in this course include those to protect land, soil, air and people from pollutants in Black, Indigenous, and Global South communities. All of these movements have expanded the legal, narrative, and practical understanding of environmental and human rights in US and global frameworks.

DOCST222S - The Photographic Portfolio

Course Description

Students actively seek specific photographic territory to explore and build a body of work. The resulting images are extensively work-shopped for sequencing. Particular emphasis on the making of high quality prints. Semester culminates in the production of finished portfolios in three formats: a printed form, a digital form, and an exhibition or installation form. Each student's evolving body of work to be informed by relevant precedents from the history of photography. These are brought into discussions of the work as the semester progresses, with an emphasis on examining bodies of photographic work that communicate something larger than a single idea. Instructor consent required.

DOCST223S - Global Stories, Local Issues

Course Description

What stories are there to tell about often overlooked objects and people and places? How can we research and share those stories with generosity and integrity? In every corner of our lives—the stickers on our computers, the plates at a local restaurant, the wood in our guitars—there is a story to be told that connects our individual experiences to broader, often global, phenomena. Participants will learn and use methods of ethnography and archival research to connect their experiences and their observations about a place, community, or thing to larger stories about culture and society, and they will practice writing about their research in engaging and broadly accessible ways.

DOCST256S - Climate, Culture and Identity

Course Description

This course focuses on some of the transformations that climate change is bringing - not just to human livelihoods and to the non-human world, but to the very definition of the human. In an era defined by the overwhelming influence of homo sapiens on the planet, historic distinctions between nature and culture are starting to blur and fall apart. What role can feminist and queer theory play in helping us to understand these changes to human identity? What can gender studies contribute to techno-scientific understandings of a global warming? We'll take on these and many other questions through readings in literature and theory, and experiential learning with the Duke Campus Farm.

DOCST272S - Documentary and Policy: How Documentary Influences Policy

Course Description

Examines documentaries as catalysts for change in local, state, and federal laws and regulations, with special attention to relationships between film and organizations with political influence. Looks at how documentaries have altered public sentiment and political outcomes. Uses case studies of documentary films (essay-style, journalistic, information-driven films; narrative, story-driven films; propaganda; art films; and hybrids of all of the above). Explores the question of how a film achieves influence: for example, with a high-profile theatrical and/or television release, by utilization as an educational tool, or by 'going viral' to become part of a public conversation.

DOCST273S - Filming Freedom Movements: Movies, Music, Monuments, Memory

Course Description

This class is a cross-disciplinary exploration of a series of questions about what societies choose to commemorate, what they stay silent about, what they try to repress, and how this changes over time. What impact does this have on public policy and cultural debate? Using a cross-cultural examination of four societies, we will draw on methods from the arts, art history, history, documentary, policy, cultural studies, critical race theory, sound studies, Indigenous studies, and feminist theory.

DOCST274 - The Middle East Through Film

Course Description

Film as access into the region through a series of direct as well as poetic connections woven across films viewed, filmmakers featured, lectures, discussions, and texts read. By means of the integration of course components and students' weekly responses, an understanding of the region is developed by way of inquiry into and rigorous engagement with cultural production. From feature length films to shorts, the breadth of the work we will engage with includes documentaries, dramas, and less traditional forms. A substantial midterm paper, and a final project to be in the form of one of three potential possibilities subject to approval of proposal: a paper, a talk, a short film.

DOCST275S - Gender and Media

Course Description

The aim of this course is to critically analyze media culture and communication landscapes from a feminist and gender studies perspective. We will address a wide range of media innovations and their histories, unpacking and critically questioning them through the insights offered by feminist, queer, and intersectional analytical tools. To each, we will examine historical, ethical, sociological, theoretical, literary or film perspectives. What roles do media spaces play in our everyday lives and how do our politics and self-understandings inform and reflect burgeoning platforms? This course will consider these questions in terms of US media cultures and its interconnected global frameworks.

DOCST289S - Black Durham: Discovering Durham's Hallowed Ground through Arts

Course Description

Study of Durham's hallowed grounds and sites of struggle, with a deep focus on the African American experience. Investigation of histories, both celebrated and troubled, that have built the present-day community surrounding Duke University. Exploration of the city's tumultuous and rich past from slavery to Black Wall St and onward through the lens of past and present visual and performing artists, leading to new collaborations with these artists. Sites and stories will include Pauli Murray House, Stagville, Civil Rights history in Durham, the Booker T. Spicely murder and more. Using interpretive and historical methods, students will research Durham's stories, ultimately helping to construct a roadmap for future community collaborations that recover local history through the arts.

DOCST305S - Black Geographies: Borders, Boundaries & Blackness in the U.S.

Course Description

What are Black geographies, and how are they produced? What relationships exist between race and place-making (or placelessness)? How is race articulated through the production of space? How have Black geographies shifted across time and space, and what will they look like in the future? Focusing on the United States, students will have an opportunity to build their understanding of the historical and contemporary processes that reproduce US Black geographies, such as Black middle-class and affluent neighborhoods, predominantly Black rural prison towns, and concentrated urban poverty.

DOCST309S - Carceral Geographies: Explaining Mass Incarceration in the U.S.

Course Description

How did the United States come to have the largest incarcerated population in the world and why are people across the nation calling for an end to over policing and mass incarceration, some even for the abolition of prison? What is abolition and how have the enduring legacies of colonialism impacted contemporary processes that sustain the carceral state? How has local, state, and federal legislation influenced prison expansion? These questions are at the heart of carceral geographic inquiry and this course is designed to explore and explain the socio-spatial articulations of carcerality through critical engagement with a range of social-geographic and political-economic theory.

DOCST325S - Documenting Resistance on Film: The Poor People's Campaign from 1968 to Today

Course Description

This documentary course explores the rich archival landscape and contemporary reverberations of the 1968 Poor People's Campaign, a transformative social movement that radically challenged economic inequality and systemic poverty across racial lines in the United States. Students will develop their research and filmmaking skills through hands-on engagement with historical materials and documentary techniques in order to explore the role of cultural production in movement spaces. Working independently and collaboratively, students will analyze how archives shape our understanding of history, study contemporary creative approaches to documentary, and learn practical skills for film production.

DOCST327S - Migrations

Course Description

Climate refugees, exiles of war, economic migrants, expatriates seeking new opportunities, along with others compelled to flee their current circumstances and look for a new life, are moving across borders. Combine these movers with the billions of religious pilgrims, adventure travelers, and tourists, and we find a movement of humanity en masse in greater numbers than ever in the history of humanity. Combining literature on pilgrimage with travel memoirs and essays on travel, films on the act of walking, and multimedia explorations of refugee journeys, immigrant life, and border crossings, this course seeks to make sense of our unprecedented era of migration.

DOCST331S - Documenting US Women's Health Post-Roe v. Wade

Course Description

The overturning of Roe v. Wade in June 2022 led to the deaths of two women in South Carolina. One woman died from sepsis following self-instrumentation, and the second died after giving birth to a healthy baby. She began to hemorrhage; hospital administrators were afraid that the 'D&C' she needed to survive was too close to the abortion procedure. A physician team at Duke University Hospitals, led by Dr. Beverly Clark, began to see similar cases in North Carolina. The aim of this course is to document—in real time—the political and ethical dimensions of the situation that healthcare providers now find themselves in as they attempt to provide women the nationwide medical 'standard of care.'

DOCST338S - Media and Indigenous Experiences

Course Description

This course examines the relationship between media and Indigenous Peoples in American history. Course content focuses on the following: First, critical analysis of representations of Indigenous Peoples, politics, issues, and cultures in historical and contemporary mainstream media, including television, Hollywood films, popular music, and news media. Second, the ways media has been used by Indigenous media producers as a social and political platform to engage the non-Indigenous American public on Indigenous issues. Environmental issues and land rights issues play a large role in content of media examined in this course.

DOCST350S - Documenting Black Experiences

Course Description

Explores how Black experiences have been documented and how crucial stories woven from real life get told. Students engage wide ranging contemporary and historical materials, including nonfiction, memoir, fiction, documentary and dramatic film, theater, poetry and music. Our aspirations are historical, but with an understanding that academic history, though irreplaceable, barely touches the range of storytelling that makes Black lives not only matter but transform the spaces in which they unfold. Our explorations are political, but in the largest sense—how Black power comes from making higher truth a tool, a weapon and a way of being.

DOCST354S - Web Design and Narrative: Artists, Documentarians, Art Historians, and Entrepreneurs

Course Description

Professional practices course for students in creative fields without a computer science background: for artists and documentarians to create robust web-based portfolios; for art historians to showcase curatorial and scholarly projects; for entrepreneurs to demonstrate ideas, concepts, and products to the public. Develop customized, individual websites using CMS platforms. Hone and workshop artistic/curatorial/product statements. Develop teaching philosophies, exhibition imagery, and video documentation of artistic, curatorial, or product talks. Publish a blog magazine on arts and innovation topics. Guest speakers visit the course on a regular basis to review the students' work.

DOCST358S - Understanding Mediation

Course Description

Examines experience as always mediated. How does text mediate expression, or language mediate subjectivity? How do images mediate power, or sounds mediate resistance? How does computation mediate agency, or networks mediate thought? But also, how do nations mediate globalization, or oil mediate energy? And how do bodies mediate liveness, or the environment mediate history? Moves from particular media forms and examples (language, literature, the fine and performing arts, audiovisual media, computational media) to focus on key theoretical concepts and debates of critical theory from twentieth and twenty-first centuries. Crosses national boundaries to understand mediation from global perspective.

DOCST359A - Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)

Course Description

This course explores the complexities of global Los Angeles by focusing on issues that especially impact its marginalized communities. For the service-learning component, students volunteer at least 20 hours during the semester at nonprofit organizations engaged in the pursuit of social justice. This experience provides an opportunity to observe, participate in and reflect on the day-to-day implementation of social action, policy and organizing initiatives. As part of the volunteer commitment and in lieu of a final paper, students produce a documentary media project that communicates goals identified by and in collaboration with the community partner.

DOCST365S - The Documentary Turn: Southern Culture

Course Description

Traces the convergence of traditional 20th c. documentary narrative (oral history, photography, film, and ethnography) with emergent 21st c. technologies (digital platforms, crowd-sourced communications, viral information) that expand and test definitions of documentary practice. Course looks for unexpected outcomes and future possibilities at the intersections of analog and digital practice. Focus is on the cultures of the American South with an understanding of that region as mapped within a global imaginary. Requirements include experimental documentary project that combines storytelling (visual/literary), performance (theater/dance/music) or investigative research (oral/archival).

DOCST368S - The View Camera: Black and White Large Format Photography

Course Description

Advanced, production-based photography course introduces students to the 4 x 5 large format view camera and its role in the documentary tradition. Learn to operate a view camera and attendant processes and materials to develop black and white sheet film and make silver gelatin contact prints from 4 x 5 negatives. Begins with focus on black and white negatives and contact prints. After demonstration of proficiency, students may optionally work in color film. Students produce a final portfolio of prints from their work throughout the semester. Class meetings consist of lectures, demonstrations, darkroom work, and critique of both process and final images.

DOCST369 - Podcasting in A Changing Media Landscape: The Art, Craft and Ethics of An Emerging Medium

Course Description

Podcasting has exploded in recent years, with hundreds of thousands of shows in production and more than a fifth of Americans listening to podcasts at least weekly. This course will provide a hands-on introduction to the craft of podcasting, combined with critical reflection on various podcast forms. Students will consider the role of podcasts in the changing media equation, including the role of podcasts in local news. They will gain practice with the basics of podcast creation and will apply these lessons by creating podcast episodes focusing on the people, places, and issues of Durham, N.C.

DOCST370S - The Environment in Literature, Law, and Science

Course Description

This class explores changing concepts of 'environment' and 'nature' in lit, law & policy, & science. Using the Duke Campus Farm, the campus, & surrounding areas, we trace those changes across historical periods and cultures, culminating in a consideration of the dismantling of Black Durham (red lining, 147) & the emergence of the Environmental Justice Movement (in Warren County, NC). We explore how those concepts are constructed through science, law & policy, & cultural forms, how those concepts shape our lived experience, & how an understanding of that process might lead to more productive debates in science, law & policy, & ethics, and to constructive social and environmental change.

DOCST383S - The Nature Film: History and Practice

Course Description

Traces the genealogy of the nature film from scientific 'animal locomotion studies' of the 19th-century to the proliferation of viewing options today. Film and television have emerged as the primary story-telling media of this past century. So too, for many viewers, have they become the main source of encounters with the natural world. Through hands-on exercises, screenings, readings and production assignments, students will explore the established narrative conventions and cinematographic techniques that have been employed in films about nature.

DOCST476S - Archiving and Visualizing Asia: Politics and Poetics of Knowledge Production

Course Description

Engages students in the practices and theories of archiving, documenting and curating marginal histories. Hands-on research in the archives of Duke's Rubenstein Special Collections and elsewhere. Examines histories of movements and encounters between the 'West' and 'Asia.' Teaches original archival research and documentary methods through guided excavations in digital, audiovisual, and material resources. Directed readings and special guest lectures guide students on how to think critically on the theories and praxis of knowledge production, collection, documentation, circulation, and consumption. Students curate projects for final research assignment.

ECE110L - Fundamentals of Electrical and Computer Engineering

Course Description

Students learn core ECE concepts, providing a foundation on which subsequent courses build. Concepts include techniques for analyzing linear circuits, semiconductor and photonic devices, frequency representation, filtering, combinational and sequential logic. Central to the course is an extensive design challenge that requires students to integrate knowledge across topics while honing practical design and project management skills. Course culminates in an exciting competition in which teams of robots race to overcome challenging obstacles using sensor data acquisition and processing. Prerequisite/corequisite: (Engineering 103L or Engineering 105L or Computer Science 201) and (Mathematics 112L or 22 or equivalent).

ECE365 - Rainforest Engineering

Course Description

An open-format project-based class for student team design with a focus on rainforests and related environments. Engages students in cross-disciplinary team challenges that teach them to work together with other students of differing backgrounds and skills. Design challenges are similar to the XPRIZE contests, or the NAE Grand Challenges. Prerequisite: Electrical and Computer Engineering 230L or 250D or 270DL or 280L or Mechanical Engineering 221L or Engineering 244L or Environment 102.

ECE366A - Drones in Marine Biology, Ecology, and Conservation

Course Description

Lecture-based version of Environment 335LA. Includes a full overview of past and emerging applications for ecology and biology of marine species and coastal habitats, with in-depth discussion on future of drone applications in coastal biological and ecological research. Comprehensive exploration of current drone technologies, including detection of target species, payloads, aeronautical concepts, rules and regulations, mission planning, aircraft design, maintenance, data collection, management and analysis. Lab components tailored to student interests: active participation in megafaunal or environmental research and data analysis; building, operating and maintaining aircraft, programming for manual and autonomous flight. Taught in Beaufort at Duke Marine Lab.

ECE380 - Introduction to Random Signals and Noise

Course Description

Introduction to probability and random processes with example applications to processing data with uncertainty. Probability, conditional probability, discrete & continuous random variables, expected values, characteristic functions, multiple random variables. Intro to random processes, random discrete-time signals, power spectrum, autocorrelation, analysis of linear systems driven by wide-sense stationary random processes. Gaussian random processes, band limited white Gaussian noise. Intro to binary hypothesis testing, Bayesian signal detection, applications involving uncertain & random signals & noise. Prerequisite: ECE 280L, Math 212 or 219.

Grading Basis

Course Typically Offered

Spring Only

Units**Min Units:**

1

Max Units:

1

ECE381 - Fundamentals of Digital Signal Processing

Course Description

An introduction to theory and applications of digital signal processing. Concepts, analytical tools and design techniques to process signals in digital form. Signal sampling and reconstruction, discrete-time transforms including the z-transform, discrete-time Fourier transform, and discrete Fourier transform. Discrete systems including the analysis and design of FIR and IIR filters. Introduction to applications of digital signal processing such as image processing, and optimal detection of signals in noise. Discrete system simulations using MATLAB. Prerequisite: Electrical and Computer Engineering 280L.

Grading Basis

Graded

Course Typically Offered

Fall Only

Units**Min Units:**

1

Max Units:

1

ECE382L - Control of Dynamic Systems

Course Description

Model dynamic systems, characterize time and frequency domain response with respect to particular inputs. Characterize systems in terms of rise-time, settling-time, bandwidth. Identify the difference between stable and unstable system. Apply feedback control to modify response of dynamic systems. Develop methods of designing compensators for single-input, single-output, and multiple-input, multiple-output dynamic systems. Introduces optimal control theory, the linear quadratic regulator problem, the linear quadratic Gaussian problem. Gain a physical understanding of role of feedback control in modifying the dynamics of a system. Prerequisite: (Engineering 224L or ECE 280L) and Mathematics 216. Not open to students who have taken ECE 382.

ECE420 - Introduction to Quantum Engineering

Course Description

Quantum mechanics was discovered at the beginning of the 20th century and has had a profound effect on the development of modern technology. This course is about the potential for quantum technologies in the 21st century. The focus of the course this semester will be a survey of quantum computation, a field that promises to revolutionize the way we compute by using the dynamics of quantum mechanics. Topics include quantum circuits, introduction to quantum algorithms, hardware, and architectures. Prerequisite: ECE 270DL and ECE 280L and one of (Math 216, 218D-1, 218D-2, or 221). Not open to students who have taken ECE 520.

Grading Basis

ECE431 - Power Electronic Circuits for Energy Conversion

Course Description

Efficient conversion of electrical energy is critical for electric and hybrid vehicles, wind and solar energy, power grids, computers, medical devices, and portables. This course teaches analysis and design of power electronic circuits for energy conversion, including circuit operation (converter topologies, steady-state modeling, switch realization), converter control (ac modeling, small-signal transfer functions, feedback), and magnetics (inductors, transformers). The course shares lectures with ECE/Energy Engineering 531, but has fewer assignments. Prerequisite: ECE 230L or Engineering 224L or graduate student standing. Not open to students who have taken ECE 531 or Energy Engineering 531.

ECE458 - Engineering Software for Maintainability

Course Description

Students will refine their ability to engineer software, with a focus on maintainability. Teams complete a large programming project whose requirements undergo evolutions during the semester. Prior to each evolution, teams submit their code for the current requirements and a written document analyzing their current design and reflecting on how past design choices impacted their most recent work. Teams must consider appropriate engineering standards and realistic constraints. Prerequisite: ECE 230L, 250D, 270DL, and 280L and (CompSci 308 or 307D or Instructor Permission) and (Math 353 or 356) and (STA 130L or Math 230 or Math 231 or ECE 555 or ECE 380 or STA 240L or EGR 238L or Math340) and (Physics 152L or 26) and (Chem 101DL or 20 or 21).

ECE480 - Applied Probability for Statistical Learning

Course Description

This course discusses topics in Bayesian probability and its application to foundations of statistical learning. The primary objectives of the course are to provide a mathematically rigorous foundation in Bayesian probability and inference, develop strong intuition for Bayesian constructs, provide a foundation in statistical learning, and to show how Bayesian methods are fundamental to a variety of modern statistical learning techniques. Topics include probabilistic reasoning, Bayesian inference, linear models, mixture models, and model selection. Prerequisite: (Mathematics 216, 218, or 221) and (Statistical Science 130L, Statistical Science 240L, Mathematics 230, Mathematics 340, ECE 380, ECE 555, or EGR 238L) and (EGR 103L, Computer Science 101L, or Computer Science 201).

ECE483 - Introduction to Digital Communication Systems

Course Description

Introduction to the design and analysis of modern digital communication systems. Communication channel characterization. Baseband and passband modulation techniques. Optimal demodulation techniques with performance comparisons. Key information-theoretic concepts including entropy and channel capacity. Channel-coding techniques based on block, convolutional and Trellis codes. Equalization techniques. Applications to design of digital telephone modems, compact discs and digital wireless communication systems. Prerequisite: ECE 280L and one of (Statistical Science 130L or Statistical Science 240L or Mathematics 230 or or Mathematics 340 or ECE 380 or ECE 555 or Engineering 238L).

ECE110L9 - Fundamentals of Electrical and Computer Engineering - Lab

Course Description

Students learn core ECE concepts, providing a foundation on which subsequent courses build. Concepts include techniques for analyzing linear circuits, semiconductor and photonic devices, frequency representation, filtering, combinational and sequential logic. Central to the course is an extensive design challenge that requires students to integrate knowledge across topics while honing practical design and project management skills. Course culminates in an exciting competition in which teams of robots race to overcome challenging obstacles using sensor data acquisition and processing.

ECE270L9 - Fields and Waves: Fundamentals of Information Propagation (Lab)

Course Description

Introduces the concept of fields—a mathematical description of physical quantities that vary from place to place (and potentially from time to time)—and explores the mathematical and physical reasons that oscillatory behavior is so ubiquitous across engineering and physics. Introduces the mathematical foundations, followed by specific examples in electrical circuits, electromagnetic waves, quantum mechanics, and acoustics as well as the connection to Fourier analysis methods. Intended to facilitate subsequent study in any area involving wave phenomena, including analog and microwave circuits, electromagnetics, optics, and quantum mechanics. Prerequisite: Physics 152L or 26, Mathematics 212 or 222, and ECE 110L.

Grading Basis

ECON113FS - Thinking Through Models

Course Description

Models of agents, behaviors, mechanisms and markets are essential to the way economists think about and describe the world. This course examines several of the models that have been most crucial to the development of economic thought from the early nineteenth century through to the present. Students will learn to understand how economists have used models as tools of inquiry and prediction, assess the functional elements of these models and consider how accurately they map on to the empirical phenomena they describe. Open only to students in the Focus Program.

ECON120S - Union Activism

Course Description

This course examines the past and present of U. S. union activism. This labor movement has been in prolonged decline in this country, but shown signs of revitalization as the gap between the earnings and opportunities for working people and the wealthy has grown larger than ever before. Readings and guest speakers will give students of rich view of labor organizing, with some written assignments. All students will gain hands-on experience by doing volunteer work with local labor movements. We will combine reflection about the history, problems, difficulties, and success of unionization through both our classroom and activist work.

ECON122S - Gateway: Eyewitness to Slavery

Course Description

How do historians of slavery do their work? Helping students answer this question is the primary goal of this Gateway Seminar. We will study eyewitness accounts of people who lived during the era of slavery and wrote about it to include enslaved people, enslavers, politicians, ministers, physicians, travelers, slave traders, free black people, and merchants. We will read selected seminal books and articles as an introduction to the historiography, that is, what historians have written about slavery and how they differ in their interpretations? Through this work, the seminar helps build students' skills in research and writing.

ECON224 - Neoclassical Economics and Its Opponents: What Even Is 'Mainstream'?**Course Description**

Why do economics departments teach the theories they teach today? And how do these theories impact the real world? This course surveys the historical development of the economics discipline with a focus on those schools of thought that contested what is now mainstream economics. After a brief history of neoclassical economics, we will examine a few of its challengers: institutional economics, Keynesianism, and behavioral economics. We will discuss how their theories differ from neoclassicism, and their influence on US economic policy at several moments in the twentieth century. Course focuses on understanding theory by reading works by influential economists throughout the history of economics.

ECON231SA - Economics of Green Germany

Course Description

Comprehensive overview of the Energiewende - Germany's effort to reshape its energy system, the industry, and building sectors into a nuclear-free, low-carbon economy. Application of a range of analytical methods - including economic assessment tools, legal analyses and political science - to shed light on different facets of the Energiewende, and to help understand the public and academic debates around it. The course thus offers different angles - looking at the economics of the Energiewende, as well as the technological, social, ethical, legal and political implications. ECON235 - Risk

Course Description

Simply put, risk is 'the possibility of something bad happening.' Defined in this way, increased attentiveness to risk has the potential to be paralyzing because it is present in nearly every aspect of human existence. This course, organized by the Duke Center on Risk, capitalizes on this ubiquity by bringing together ideas and approaches from all corners of the university. A unifying perspective is the recognition that risk involves elements of both chance ('possibility') and value ('something bad'). Therefore, students will learn the languages of probability and economics within the cultural settings of public policy, law, engineering, business, and medicine.

ECON246 - Arts Policy, Leadership, and Engagement

Course Description

This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.

ECON261 - Discovering Game Theory: Social Complexity and Strategic Interdependence

Course Description

Strategy is all around you: In sports, the economy, law, politics, and your own social interactions. In this course, you will explore one of the foundational tools that social scientists use to analyze the complexity of strategic interactions: Game Theory. To do so, the course employs a highly interactive learning environment, in which you and your peers engage in strategic interactions that illustrate fundamental social dilemmas. In taking this course, you will gain a new analytical perspective into the complexity of social phenomena, and develop a solid foundation for additional course work in social science.

ECON306 - Economic History and Modernization of the Islamic Middle East

Course Description

Economic development of the Middle East from the rise of Islam to the present. Transformation of the region from an economically advanced area into part of the underdeveloped world. Role of religion in economic successes and failures. Obstacles to development today. Topics: Islamic economic institutions, economic roles of Islamic law, innovation and change, political economy of modernization, interactions with other regions, economic consequences of Islamism. Prerequisite: Economics 101 or 21 and 22 or instructor consent.

ECON310 - Economic Analysis of Law

Course Description

Law and Economics has had a profound influence on modern legal analysis, with its effects being felt in legal theory, court decisions, the law school classroom, and regulatory policy. This course provides an introduction to the economic analysis of legal rules and decision making, including criminal law, torts, property, contracts, and legal procedure. Particular attention is given to how economic thinking confirms and challenges various aspects of traditional legal reasoning, including what is meant by justice. Prerequisite: Economics 201D.

ECON327SA - Economics of Environmental and Climate Policy

Course Description

This course focuses on the relationship between economics and the environment, aiming to equip students with the knowledge and skills necessary to understand, analyze, and address pressing environmental challenges. The course will highlight the relationship between economic activity and its environmental impact through a European and German lens. Since many environmental issues are often the result of or stand in conflict with economic interests, this course also reflects on the ethical implications of human behaviors and their relationship to environmental policy. Students enrolling in this course should have completed Economics 101, Environment 155 or Statistics 199L.

ECON330S - Capstone Seminar: Slavery and Capitalism

Course Description

Was American slavery efficient? Was it profitable? Was slavery capitalist or its opposite? Historians have debated these questions for nearly a century. More recently, they have been flashpoints in political battles over how U.S. history is taught. In this course we will trace the emergence of slavery and its relationship to the rise of capitalism in United States and broader Atlantic world economy. We will examine the instruments of credit, debt, and investment that financed human bondage and created slavery's linkages to capitalism, with special attention to why scholars in this field have disagreed so often. This course is a capstone to the History major, but is open to all students.

ECON332 - Modern Topics in Labor Economics

Course Description

Why do we have a welfare system? What are the implications of artificial intelligence and robotics for jobs? How can we justify the existence of minimum wage? What is the effect of immigration of the outcomes of natives? Why are female workers consistently paid less than their male counterparts? We will study how labor economists think about these topics. The course will provide some basic tools of economic analysis and important institutional background regarding the US and international economies. The class will consist of lectures and debates on the interplay between labor and public policies, including the ethical dimensions of these controversial issues. Prerequisite: Economics 201D.

ECON362 - Discovering Game Theory: Social Complexity and Strategic Interdependence

Course Description

Strategy is all around you: In sports, the economy, law, politics, and your own social interactions. In this course, you will explore one of the foundational tools that social scientists use to analyze the complexity of strategic interactions: Game Theory. To do so, the course employs a highly interactive learning environment, in which you and your peers engage in strategic interactions that illustrate fundamental social dilemmas. In taking this course, you will gain a new analytical perspective into the complexity of social phenomena, and develop a solid foundation for additional course work in social science.

ECON432S - Environmental Justice: The Economics of Race, Place, and Pollution

Course Description

Minorities, people of color, and low-income households bear a disproportionate burden from environmental pollution. Since the Clinton Administration, addressing environmental injustice has been among the policy objectives of the EPA. Course examines how environmental injustices may arise out of discriminatory behavior and/or market forces founded on individual, firm, and government incentives. We begin with the theoretical framework used to document and explain disproportionate exposures, then review existing empirical evidence through case studies and evaluate competing explanations for injustice using an economics framework. Prerequisite: Economics 201D and Economics 204D or 208D.

ECON436 - Global Inequality Research

Course Description

Engagement of vertically integrated research teams in projects exploring racial and ethnic disparities exhibited and expressed in six arenas, employment, wealth, health, political participation, education, and arts and culture. Each team will produce a major paper that will qualify for submission to a refereed journal in the area (relevant to the focus of the study). Course is not open to students who have taken Public Policy 645 or 645S.

ECON442 - Development Economics: Theory, Evidence and Policy

Course Description

This course studies the past, present and future of economic development. We begin by briefly learning about patterns of economic development through time and across countries. We then study a selection of specific development policy challenges chosen from conflict, education, health, governance, infrastructure, international aid, labor markets, and trade. We emphasize learning the tools that economists use to study economic development: statistical analysis of large datasets, economic models, and historical case studies. Prerequisite: Economics 201D and (204D or 208D).

ECON443 - Empirical Methods in Gender and Family Economics

Course Description

Explores topics in economics of gender, an exciting and active field in current economics research. Focus on theoretical models of labor and marriage markets as well as empirical applications. Students will apply economic tools to these topics. They will find, analyze and interpret publicly available data, and develop skills to think critically about gender issues and evaluate policy interventions. Some main topics include: gender gaps in wages and employment; education, majors and occupation choices; effects of parenthood; risk aversion, competitiveness, social norms; marriage and divorce, fertility, household specialization; the role of governments and firms. Prerequisite: Economics 204D.

ECON444 - Equality of Opportunity: Theory, Evidence, and Policy

Course Description

Recent evidence highlights the potential for early interventions in mitigating inequality of opportunity. This course introduces students to the economics of such interventions. The course covers the datasets, quantitative tools, and theoretical frameworks that economists employ to answer policy-relevant questions impacting the lives of children. Topics of interest include the role of K–12 public education on intergenerational mobility, the causal effects of foster care, and the long-run economic consequences of early-life circumstances and government transfer payments. Recommended prerequisite: ECON 204D.

ECON445 - Economics of Crime

Course Description

In the United States there is widespread interest across the political spectrum in reforming criminal justice policies. Social scientists have responded to this phenomenon with a flurry of research attempting to understand the circumstances that led to the creation of this new, expansive criminal justice system and its consequences. This course considers empirical research from economics literature on a variety of topics related to the criminal justice system. STATA or R required. Prerequisite: Economics 204D.

ECON446 - Economics of Global Health

Course Description

Examines reciprocal relationships between income, poverty and health across countries with focus on identifying effect of health on development. Addresses structural problems in delivery and quality of healthcare that arise from cultural as well as economic causes. Attention given to challenges of healthcare financing, and tension between high-tech care and basic care in developing countries. Students examine empirical evidence from interventions affecting health including infant mortality reduction programs. Focus on issues of poverty alleviation and the promise of foreign aid. Prerequisites: (Economics 201 or Public Policy 303D) and (Economics 204D or 208D or Public Policy 604), or instructor consent.

ECON454 - How to Use Data to Design Better Macro Policies

Course Description

Recent increases in computational power and the availability of 'big data' have been transformational in empirical macroeconomics and macro policy. This course shows how large datasets and macro theory can be used to understand and make progress on some of the most important social and economic problems of our time. Topics include debt forgiveness and student debt, trends in inequality and market power, and how to address financial fragility (UI/minimum wage/UBI). For each class, we will read and discuss empirical papers on each topic, learn the relevant econometric techniques needed to understand them and then discuss how to best interpret this evidence using relevant macro theory.

ECON458 - Economics of Gun Violence

Course Description

This course examines evidence from the recent empirical economics literature on the determinants and impacts of gun violence in the U.S. Topics studied include the effects of various gun policies, gun prevalence, and mass shootings on outcomes such as gun-related injuries and deaths, violent crime, mental health, and gun sales, as well as other idiosyncratic determinants of gun demand. Course content consists entirely of published journal articles that utilize econometric methods taught in Econ 204. Students will demonstrate their ability to understand and interpret applied research in this area through evaluative summaries delivered via group presentations and written assessments along with several exams. Paired with ECON 658. Prerequisite: Economics 204D or Economics 208D.

ECON461 - How Markets Work: Theory, Evidence and Empirical Tools

Course Description

Uses theoretical models & empirical tools to understand how markets work and implications for public policy/firm strategy. Introduces main theoretical models and empirical techniques used to study range of markets, applying these methods to understand issues/markets in detail. Topics may include auctions, mergers/antitrust policy, collusion, dynamic pricing of new products, price discrimination, insurance markets and advertising. Students will read/evaluate research papers and complete empirical problem sets, highlighting areas suitable for future research. Prerequisite: Economics 204D or 208D.

ECON468 - Political Economics: Collective Decisions and Individual Values

Course Description

This course offers a theoretical introduction to collective decision making. The first part of the course surveys classic results in social choice theory. We address the extent to which a group of diverse individuals can have a coherent collective preference. The second part turns to models of electoral competition, political accountability, and political influence (such lobbying and special interests, agenda setting, and vote buying). The last part of the course focuses on (mis)information in collective processes. Do mass elections aggregate citizens dispersed information? What are the electoral effects of media bias? Is political persuasion a concern? Prerequisite: Economics 201D.

ECS205 - The Future of the Oceans: From Science to Policy

Course Description

The ocean covers two-thirds of the planet, forming the backbone of healthy ecosystems and many growing economies worldwide. Despite this importance, we know far less about the oceans than terrestrial environments. This course provides an overview of why the oceans matter, including the many ways people use and depend on the oceans. We will discuss the major issues that threaten our oceans, and students will explore emerging solutions to these challenges of changing ocean use using market-based, scientific, and policy approaches. Course will include an optional weekend field trip to the Duke Marine Lab in Beaufort.

ECS220 - Water Sciences: Principles and Challenges

Course Description

Fundamental principles and challenges in water sciences on local, regional and global scales. Topics include the global hydrological cycle, impact of climate change on water availability, principles of surface water and groundwater flow, fundamentals of water quality, the energy-water nexus, and scientific and technological approaches used to trace pollutants and remediate contamination. Relationships between human activities (anthropogenic effects) and naturally occurring processes that affect local and global water availability and quality. Emphasis on cutting edge water research and human and environmental impacts. Recommended prerequisite: Earth and Ocean Sciences 101, Environment 102, or equivalents, and introductory chemistry.

ECS226DS - Field Methods in Earth and Environmental Sciences

Course Description

Introduction to basic field methods used in the earth and environmental sciences. Field investigations focus on topics such as groundwater and surface water movements, soil chemistry and identification, topographic and geologic mapping, the atmosphere/soil interface, and plant identification and distributions. Design of a field investigation, collection of data to address a specific goal, and interpretation and reporting of the results. Emphasis on learning to report field results in the format of scientific publications. Visits to five local field sites. Open only to juniors and seniors.

ECS231 - Energy and the Environment

Course Description

Overview of the challenges confronting humanity as a consequence of our reliance on energy. Challenges include dwindling supplies, rising demand and environmental degradation. Realistic responses require an understanding of the complexity of the energy system, including energy resources, uses, and impacts, in the context of social, political and economic imperatives. Lectures will be augmented by presentations from guest speakers from industry, government and non-profit organizations.

ECS240 - Earth and Environmental Chemistry

Course Description

This course covers the chemistry of the Earth across a range of temporal and spatial scales. Beginning with the formation of the Earth, we will walk through planetary differentiation into core, mantle, and crust; evaluate evidence for the development of plate tectonics and its impact on crustal composition; become familiar with the chemistry of Earth's surface environments ranging from the atmosphere to oceans, rivers, lakes, and soils. Students will become well acquainted with mineral equilibria, acid-base and redox reactions, biogeochemical cycles, and human impacts on environmental chemistry.

ECS273LA - Biological Oceanography

Course Description

Discusses patterns of abundance, diversity and activity of organisms in major ocean ecosystems. Identifies major physical, chemical and ecological processes that affect these patterns, and analyzes impact of biology on ecosystems. Uses a 'flipped' classroom for enhanced development of quantitative skills to measure these patterns, emphasizing hands-on data collection and analyses, multiple field trips aboard DUMML research vessels, and participatory activities to demonstrate core concepts in biological oceanography. Taught at Duke Marine Lab. Spring section requires travel. Recommended intro bio or AP Bio credit. Instructor consent required, visit DUMML website for details.

ECS318 - Snow, Glaciers, and Climate Change

Course Description

Introduction to the role of ice and snow in the Earth's climate system and rapid changes occurring to the cryosphere due to climate change. Course will focus on the major components of the global cryosphere, namely snowpack, glaciers and ice sheets, permafrost, and sea ice. We will study the physical processes that affect the role of ice in the Earth system and the technologies and observation techniques used to understand the cryosphere and its relationship with climate. Course topics will also include socioeconomic implications of ice loss, the potential of geoengineering to mitigate these changes, and how climate change and ice are portrayed in popular media.

ECS351L - Geospatial Data Science

Course Description

This course introduces students to the foundations of modern geospatial data science. In the first part of the course, students will learn how to analyze vector, raster, and network data in Python and train a basic machine learning model to make predictions. Next, students will learn other important aspects of data science including data access and visualization. In the final part of the course, we will discuss some general principles for effective project management (e.g. directory structure, version control, GitHub, etc.). A key part of this course is the group project which provides students with an opportunity to collaboratively apply their newly developed skills to topics of interest. This course will be best suited for students who already have some experience with programming.

EDUC102 - Introduction to College Teaching**Course Description**

This course is designed to prepare undergraduate students to teach their own half-credit house courses. This course will teach students how to design syllabi, create effective assignments/assessments, provide high-quality feedback as well as teaching them how to implement active learning strategies in the classroom. Furthermore, students will learn to design and implement foster inclusivity and equity in the classroom. This course also serves as a platform to for community-building and ongoing conversation among student instructors. This creates 'community of practice' in which you will be able to connect with your peers about best practices and challenges in the classroom.

This course prepares undergraduates to teach half-credit house courses. Students learn to design syllabi, create assignments, provide feedback, and implement active learning and inclusivity in the classroom. It also fosters a community of practice for student instructors to share best practices and challenges. Mandatory for new instructors and recommended for current ones, the course is half-credit, offered every semester. It includes 18 contact hours across 12 sessions, plus four weekly hours of outside work. Taught weekly, it aims for two sections to maximize flexibility. Mostly face-to-face, it allows 1-2 asynchronous sessions for special circumstances.

EDUC111FS - Pursuit of Equality: Rethinking Schools - Lens of Social Justice**Course Description**

In 1954 the Supreme Court case Brown versus the Board of Education forever changed American schools by ending segregation and creating educational equity. Or did it? Are today's schools any more inclusive or socially just than schools were 50 years ago? Examination of ways schools may or may not perpetuate and reproduce social inequities. Focus on recent efforts to imagine and create socially-just schools. Discussion of our ethical responsibilities as civically engaged citizens to work towards educational equality and provide support of schools that are inclusive, culturally responsive, and democratic. Required service-learning experience working with children in a Durham public school.

EDUC115FS - Culture, Language, and Purposeful Discomfort in American Classrooms**Course Description**

Examine linguistic features that participants in schools throughout America use to negotiate classroom culture. Focus on verbal and nonverbal communication through lens of historical and current primary sources that give voice to a range of American experiences. Consider how teachers' and students' willingness to listen, reflect, and be curious can foster discourses that thoughtfully address potentially uncomfortable topics. Explore objectivity, subjectivity, authority, and agency. Engage middle schoolers in examining research-based evidence on how our smartphone and social media use shapes discursive interactions; and affects emotions, information processing, and constructive communication.

EDUC117FS - Race and Language**Course Description**

We will examine the relationship between race and language by interrogating texts in medical ethics, gleaning from them wider lessons for navigating prior controversies at the juncture of racial and social difference and medicine (for instance, phrenology and eugenics). We will also examine features of medical and scientific practice that overlap with the study of language, such as contract, disclosure, survey design and policymaking, and how the medical profession and medical practice work to correct past mistakes in interactions with different communities of race.

EDUC122CNS - The Art and Practice of Storytelling for Change

Course Description

Are you an aspiring educator, journalist, dramatist, social media manager or community organizer? All these positions and more require an understanding of how to utilize the power of storytelling. This course is designed to bring historical events, figures, cultures, communities, and contemporary issues to life through the sharing of personal narrative. For centuries storytelling has been the building blocks of human communication. Effective storytelling can mobilize, can heal, can incite action and bridge divides. Students will investigate the ways in which storytelling can mediate the examination of sensitive topics, support advocacy and reform efforts, and elevate the perspective of those groups who have systematically been marginalized. We will explore the ethics and practice of using personal narratives to inspire more multidimensional world views that stimulate deeper understanding of complex issues. By mining those matters of the heart, we breath humanity into topics we care about in ways where other forms of communication fall short.

EDUC189FS - Assessing Higher Education: Using Evidence to Guide Policy, Curricula, Pedagogy

Course Description

This course examines assessment in higher education – its traditions, contexts, and practices. Understanding assessment as more than tests and grades, students will examine Duke's mission, strategic plan, and departmental objectives. They will create plans to evaluate the success of those aspirations, then determine how evidence should be used to guide educational practices. Students, teachers, and many others in our communities and across the country, seek information about the impacts of educational systems, curricula, and pedagogies. This course develops the knowledge and analytic skills to engage in critical inquiry about the state of higher education in the U.S.

EDUC215 - Sociology of Racism in America

Course Description

Examines social history of major racial groups in the US and relationships to contemporary standing. Discusses central concepts sociologists use to analyze racial matters. Central theme: 'racism' is not mere 'prejudice,' 'ignorance,' or 'intolerance,' but a comprehensive historical system of racial domination organized around the logic of white supremacy. Discussion of 'whiteness' in the USA—how whiteness emerged as a social category, an identity based on experiences of variety of European 'peoples;' how it dominated the racial structure of the US since the 17th century, how wealth has been distributed along racial lines, racialization of Asians and Latinos, and color blind racism.

EDUC262 - Designing Transformative Learning

Course Description

The term 'open source' is frequently used to denote software source code that is freely available, modifiable, and shareable. However, the term has much wider applicability and relevance. The core values of open source--open knowledge and access to information, collaboration and community, transparency and meritocracy, inclusion and diversity, and iterative creation and adaptability--have profound implications for 21st century learning. In this learner-centered, project-based course, students will research the intersection of open source concepts, technology, and education innovation and share their knowledge across public-facing open-access media.

EDUC287 - Race, Sport & Education: Duke Basketball

Course Description

This course uses Duke's athletic history, present, and future to explore how Black intelligence is recognized or not recognized and the value of Black athletes' intellectual capacity in college athletics over time. We will do this primarily, but not exclusively, through CB Claiborne's story. We will discuss the role of race-based slavery on the emergence of Black education in America leading up to Duke's Athletic integration in 1965 and the emergence of Duke Basketball as a global brand, including five men's national champions, 'one-and-done' during the Coach K era until the present with new Name, Image & Likeness (NIL) legislation. This course may include travel to sites within Durham and on-campus such as the Duke Homestead State Historical Site.

EDUC303S - De/Re/Segregation in Education: A Case of Back to the Future?

Course Description

Course traces timeline of segregation, desegregation, integration and resegregation in education in the United States, from policies and practices first enacted at this nation's birth through current policies and practices that challenge our commitments to opportunity, equality, and equity. Course invites students to study historical and contemporary practices in education, comparing segregation and resegregation as moments in the education history of the US, taking recent developments in North Carolina education policy and practice as cases to enrich understanding. Students engage in a minimum of 20 hours of planned service activities.

EDUC330S - Black Durham: Discovering Durham's Hallowed Ground through Arts

Course Description

Study of Durham's hallowed grounds and sites of struggle, with a deep focus on the African American experience. Investigation of histories, both celebrated and troubled, that have built the present-day community surrounding Duke University. Exploration of the city's tumultuous and rich past from slavery to Black Wall St and onward through the lens of past and present visual and performing artists, leading to new collaborations with these artists. Sites and stories will include Pauli Murray House, Stagville, Civil Rights history in Durham, the Booker T. Spicely murder and more. Using interpretive and historical methods, students will research Durham's stories, ultimately helping to construct a roadmap for future community collaborations that recover local history through the arts.

EDUC401S - The Adventure of Citizenship: Lives of Civic Engagement

Course Description

What does it mean to be a citizen and live a civic life? In this course students will integrate academic content with their own community based experiences to understand and critique their understandings of civic engagement and social change. Students will reflect on their Duke experience and begin to chart their post Duke futures. They will gain knowledge of the historical context of democratic citizenship, understanding of the relationship between theory and practice, and familiarity with the contestations of civic engagement that emerge from considerations of race, class, and gender. Students will undertake independent projects to study those who have lived civic lives.

Max Units:

0.5

EGR103L - Computational Methods in Engineering

Course Description

Introduction to computer methods and algorithms for analysis and solution of engineering problems using numerical methods in a workstation environment. Topics include; numerical integration, roots of equations, simultaneous equation solving, finite difference methods, matrix analysis, linear programming, dynamic programming, and heuristic solutions used in engineering practice. This course does not require any prior knowledge of computer programming.

QS - (QS) Quantitative Studies

EGR105L - Computing for Engineers

Course Description

Introduction to computational thinking, modeling, and programming to solve authentic engineering problems. Students will learn to visualize data; as well as a design, test, and deliver solutions with an industry-standard computational tools. Topics include: devising an algorithm and writing, documenting, testing, and debugging code. Course emphasizes both strategic collaboration and individual resourcefulness in seeking solutions. Primary computational language used in this class is Python. No prior knowledge of computer programming is required. Open to Pratt first-year students. Others, by permission only.

EGR121L - Engineering Innovation

Course Description

Introduces first years to the process of team-based creative conceptualization, visualization prototyping, and product realization. Students use computer-aided design tools to create custom circuit boards and computer numerically controlled (CNC) machined components to produce prototype systems. Design concepts are introduced and supported through hands-on assignments.

EGR238L - Fundamentals of Data Analysis and Decision Science

Course Description

This course provides a mathematically rigorous and broad foundation for key concepts in probability and statistics, as well as the application of probability and statistics to the mathematical modeling of non-deterministic systems. The main motivation of the course is to show how these concepts are fundamental to a variety of current data analysis techniques, and to demonstrate applications of these techniques in situations relevant to all engineering majors. Prerequisite: (Mathematics 216, 218, or 221) and (Engineering 103L or Computer Science 101L).

Grading Basis

EGR283 - Product Management

Course Description

When creating transformative technology-based products, the essential component to success and positive impact on society is the central role of humans. This course explores this intersection of the humanities and technology. Products are created in interdisciplinary teams through leadership, communication, experimentation, and critical thinking. Product managers must understand diverse cultures and customers. Concepts covered include needs finding, ethical product development, market opportunity analysis, strategy, road mapping, competitive analysis, and life cycle management. Learning takes place using a mix of individual and team-based assignments, presentations, and projects.

EGR424L - Energy and Environment Design

Course Description

An integrative design course addressing both creative and practical aspects of the design of systems related to energy and the environment. Development of the creative design process, including problem formulation and needs analysis, feasibility, legal, economic and human factors, environmental impacts, energy efficiency, aesthetics, safety, and design optimization. Application of design methods through a collaborative design project involving students from the Pratt School of Engineering and Trinity College. Open only to students pursuing the undergraduate certificate in Energy and Environment.

Prerequisites: Civil Engineering 160L, Environment 330 and Mechanical Engineering 461.

ENERGY112CN - Nuclear Energy & Society

Course Description

Although controversial, nuclear energy promises to contribute to the stability and security of low-carbon power systems. This course explores the history of commercial nuclear power through group discussions, hand-on activities, and collaborative research. Broadly speaking, it will impart three skills. First, you will learn to explain energy as not only the ability to 'make us go' but also a set of relationships between people. Second, you will learn to interpret technical systems as not only engineering feats but also social constructs. Third, you will learn to analyze technological failures as not only individual but also organizational events i.e., the results of culture. Taken altogether, these skills will equip you for pursuits ranging from advanced courses to competitive internships.

ENERGY178FS - Energy Policy for a Changing World

Course Description

Energy use is essential to all aspects of modern life and a significant determinant of economic and social opportunity throughout the world. Yet energy use can also have detrimental effects on the environment and society—climate change being the most grave example. This course will explore how public policies affect the way that energy is produced and used and how policies can be designed to advance a more accessible, affordable, reliable and clean energy system. It will draw on material from multiple disciplines to gain a deeper understanding of the array of factors affecting our current energy system. Focus program students only.

ENERGY188FS - History of Energy Use and Power Generation

Course Description

The use of energy throughout human history is explored, starting from the beginnings of humanity to modern power generation. This course will consider the development of different energy sources over time, the history of energy conversion and storage technologies, and the establishment of modern thermal sciences. A major focus is the investigation of how these developments affected societal, economic, military, and technological change and growth. Understanding the historical trends related to energy use and power generation will allow for better informed prediction of humanity's energy future. Open only to students in the Focus program.

ENERGY310 - Introduction to Energy Generation, Delivery, Conversion and Efficiency

Course Description

An overall introduction to energy issues as they related to generation, delivery, conversion and efficiency. Topics include efficiencies of both new and established energy generation and conversion methods, electricity generation by fossil fuels, nuclear, solar, wind and hydropower and alternative energy technologies. Other topics include space heating and cooling by traditional methods and by solar, transportation energy in automobiles, mass transit and freight. Topics are evaluated quantitatively by modeling and using principles of fluid mechanics, thermodynamics and heat transfer. The environmental consequences of energy choices on local, national and global scales, including toxic emissions, greenhouse gases and resource depletion are also discussed in integrated throughout the course. Prerequisite: Mechanical Engineering 331L, or Mechanical Engineering 512, or Physics 311, or similar thermodynamics, or consent of instructor. Course is not open to students who have taken Mechanical Engineering 461.

ENERGY364 - Green Germany: World Leader in Environmental Policy

Course Description

Exploration of Germany's leading global role in developing and implementing 'green' technologies and environmental policies. Analyzes Germany's current and past policies on energy, agriculture, and pollution control. Examines policies in context by studying German ideas about nature, history of German environmentalism, and by looking at Green Germany in European and global perspective. Discusses extent ethics can or ought to influence debates about global climate change and its ramifications. Readings include scholarly studies, exemplary policies, and groundbreaking ecological texts.

ENERGY383 - Engineering the Global Middle East

Course Description

This class is a global techno-environmental history, with a special emphasis on the modern Middle East. We will interrogate the many ways in which the transformation of nature and transfer of technologies has rearranged political relations within and between states in the last two hundred years. We shall survey the social history of technology, of engineering, infrastructural developments, urbanization, and energy resources. Students in this course will learn how to do research through the lenses of environmental history and science and technology studies using the methods of microhistory.

ENGLISH160 - Fantasy: The Borders of Genre, Medium, and Culture

Course Description

Fantasy as a genre has captured the attention of artists, writers, musicians, filmmakers, and videogame developers. Students will read, view, and play different fantasy narratives from ancient mythology to the Middle Ages, the 19th Century, and finally modern mediums. Focusing on themes of power, identity, and othering, students will explore how the mercurial genre of fantasy shifts through time and medium while commenting on the political and cultural world in which it originates. Taught in English.

ENGLISH165CNS - The Cultural Cold War: Voices From Below

Course Description

The Cold War was marked by ongoing rivalry between the United States of America and the Soviet Union, though its hot wars were fought across the decolonizing world. Placing literary and aesthetic cultures at the center of Cold War battles, this course introduces Cold War cultural interventions in Asia, Africa, and Latin America and how they shaped popular understandings of literary autonomy, freedom of speech, ideology, and propaganda. Through sampling declassified documents from CIA archives, little magazines, cartoons, films, novels, and short stories, students will learn how the Cold War generated competing approaches to literature and art.

ENGLISH187A - Reading Theater in New York

Course Description

Theater is a live art in which one assembly of people tells a story to another: the audience. This course introduces this art from two, interwoven perspectives. First we consider the scripts as artifacts of the past. We uncover the acting, directing, and design conventions that originally animated the scripts; the spaces for which they were intended; the audiences for whom they were performed. Then we consider the scripts as blueprints for the present with the guidance of guest artists in New York (some from Duke's alumni network) and site visits to theaters and rehearsal rooms. We see productions all plays, which are chosen from that season's offerings in New York.

ENGLISH198FS - Performing Science: Experimentation, Collaboration, and Artistry

Course Description

Combines a historical survey of science-themed plays with an examination of sci+arts initiatives such as the University of Western Australia's Symbiotica; the Art & Science Laboratory in New Mexico; and the UK's Centre for Performance Science. Central course questions: How can performing arts improve public awareness and knowledge about complex scientific ideas and research? What points of view and methods of research do artists bring to scientific inquiry and vice-versa? We will pay particular attention to secondary schools, contemporary art installations, and science museums as public laboratories for experimental, embodied collaborations across the two disciplines. Open only to students in the Focus Program. Department consent required.

ENGLISH212S - Writing Across Borders

Course Description

This is a creative nonfiction writing course focused on the concept of crossing myriad borders. What kinds of borders should an ethical, empathetic person attempt to cross in writing, in life? Are there borders that should remain uncrossed? Students who have participated in—or plan to participate in—a study or work abroad program may wish to focus their inquiry on geographical border crossing and the questions that raises such as: how does one write critically—or sympathetically—about a culture outside one's own without being arrogant or elitist? How much can any non-native expect to understand about a country—or culture—not their own?

ENGLISH212SA - Writing the City: New York As Subject and Source of Literary Production

Course Description

New York City is both the location of literary production and the subject of literary efforts. This course examines New York from both angles. We will be visiting publishing houses, magazines, and agents. We will talk to working writers, bookstore owners, and movie producers. We will also be reading books set in New York for whom the city itself serves as a character. Finally, we will attempt to write the city, both as a non-fiction subject and as a fictional one.

ENGLISH215S - Laboratory of Ongoing Catastrophe: Contemporary Russophone Writing

Course Description

This course is both a deep exploration and a creative journey into contemporary Russian literature born out of the catastrophic realities of war, repression, and societal upheaval. Students will immerse themselves in poetry, prose, plays, reportage, diaries, manifestos, and letters to uncover how writers document crises and create a voice for those silenced. Beyond analysis, this is a laboratory space to experiment with your own creative responses to the themes explored. Each week, we'll examine literary works, discuss the cultural and historical contexts that shape them, and engage in writing workshops designed to ignite your imagination. Together, we will explore literature not only as a mirror to broken reality but also as a form of resistance and a tool for survival.

ENGLISH223S - How to Write a Horror Movie

Course Description

Great horror movies are substantial works of art that go beyond jump-scares to confront society's most intractable problems – like racism, in the brilliant 'Get Out'. In 'How To Write A Horror Movie', students will study genre classics, while writing weekly short scenes – to be read aloud in class – that address basic elements of screenplay-writing, the mid-semester goal being the script for a short horror film. Students will also keep a journal of story-ideas, one of which they will develop – in the second half of the semester - as a feature-length screenplay, completing a rough draft of at least 80 pages, with successive portions of these scripts to be discussed in class.

ENGLISH224S - Ready for Prime Time: Writing the Dramatic TV Episode

Course Description

Some of the best dramatic writing today can now be found on television. This class will focus on one commercial prime-time drama, past or present. Beginning with a deep immersion into the world of that show—watching all of Season One—students break into groups, coming up with their own long stories to advance the plots. Each student will pitch a story for their particular version of 'Season Two'—developing an outline, tracking their storylines with the other members of their group, and finally writing a draft of an hour-long TV episode. Each student will write his or her own script—but will need to share notes, thoughts and feedback with their fellow writers.

Course Description

This course explores past pandemics as a way to think about how to best live through COVID-19 and prevent or minimize future pandemics. Through examining literature and film, we will analyze the psychosocial dimensions of pandemic. We will read a variety of texts including: histories, fiction (Bulgakov, Porter, Tolstoy, Colson Whitehead); short essays; and films (e.g., Contagion, Outbreak). How do science, medicine, and society interact in a time of pandemic? How do pandemics reveal social inequities, and how could we use this knowledge to decrease disparities? And why do people turn to the humanities and arts in times of pandemic?

ENGLISH244 - Modern European Short Fiction

Course Description

Comprehensive examination of several important works of modern European short fiction by authors such as Kafka, Woolf, Svevo, Sartre, Joyce, Proust, Mann, Schnitzler, Gogol, and Calvino. While stories will be contextualized historically, culturally, and geographically, course is organized into thematic units, including animals, home, punishment, and love, to facilitate comparative analysis. Students engage critically with concepts such as identity, trauma, genre, and narrative form.

ENGLISH254 - From History to Fantasy: Medieval Religions in Film & Fiction**Course Description**

Explores the intersection of modern popular culture and medieval religious culture. Deep dive into how modern creators of mass entertainment use common notions of medieval faith, power, race, sexualities and violence to capture and hold our interest, teach us lessons about ourselves, and sell products. How do our ideas of faith, sexuality, race and power inspire or constrain the fiction we create about the past? What impact does this have on consumers? Monks, nuns, knights, crusades, secret societies, suffragists, alt-right, plague. Modern novels, commentaries, history, medieval texts, neurobiology, TV, films, ads, games, memes, clubs. Read, discuss, write, research.

ENGLISH258 - Religion and the Novel in Modern India

Course Description

Indian writing in English, especially the novel, provides a unique understanding of religion in the world's largest democracy. The novel has come of age in India, seen innovations and has influenced world literature. Indian and Indian-origin novelists have been Booker and Pulitzer winners, Commonwealth awardees, and Sahitya Akademi laureates. Course will examine how the Indian novel in English understands and mediates tradition and modernity, selfhood and society in a deeply diverse culture. Includes novels written during the twilight of British colonial rule, the Partition, and contemporary decades of rapid globalization and diasporic change.

ENGLISH264S - Modern American Drama

Course Description

While the playwright names—Eugene O'Neill, Tennessee Williams, Edward Albee—may be familiar, do American playgoers know how weird these artists' works can be? This survey course tracks some of twentieth- and twenty-first century's most recognizable dramas, focusing on the theatre's potential for formal innovation as well as social commentary. Plays include Williams's *A Streetcar Named Desire*, Arthur Miller's *Death of a Salesman*, Anna Deavere-Smith's *Twilight Los Angeles, 1992*, Tony Kushner's *Angels in America*, and Annie Baker's *The Flick*. Evaluation will be based on online response posts, two formal essays, one oral presentation, and class participation. No prerequisites necessary.

ENGLISH266S - American Crime: Fiction and Film

Course Description

Public drunkenness, prostitution, sex trafficking, arson, homicide: these are just a handful of the crimes that became increasingly prevalent in the long-nineteenth-century U.S. We examine many of the novels, stories, and films that reflected a culture of never-ending vice. Whether studying urban dens of sin or the often lawless Western frontier, we engage debates regarding gender, immigration, Native American removal, and slavery. Texts include short fiction by Edgar Allan Poe, Stephen Crane, Charles Chesnutt, and Annie Proulx; films include *12 Years a Slave*, *Gangs of New York*, and *True Grit*. Evaluation: 75% writing (weekly response posts, medium-length formal papers), 25% participation. No tech in class.

ENGLISH269S - Classics of American Literature, 1820-1860**Course Description**

What makes a 'classic' of American literature? Why do a handful of texts endure while others have fallen by the wayside? By reading a variety of well-known texts from early American literature, we pose-and attempt to answer-these questions. Supplemental readings illuminate pivotal political debates, social movements, gender struggles, and ethnic clashes from 1820 to 1860. Texts include Nathaniel Hawthorne's The Scarlet Letter, Walt Whitman's Leaves of Grass, and Harriet Beecher Stowe's Uncle Tom's Cabin, as well as works by Dickinson, Melville, Douglass, and Poe. Films will include Sleepy Hollow (1999) and 12 Years a Slave (2013).

ENGLISH273AS - Duke in London: Arts

Course Description

This course surveys London as a site of dynamic cultural production, whose participation in the global marketplace of artistic commodities reveals the city's restlessly transnational, cosmopolitan character. Studying local institutions, students are introduced to the complex relationship among art, state, and the global cultural marketplace; studying a multiracial and multiethnic community, they become familiar with theories of globalization, neoliberalism, and cosmopolitanism, as well as migration and so-called national identity. Students also participate in excursions including dance, opera, and theatre productions and visits to museums and other sites of cultural importance.

ENGLISH275 - Introduction to Asian American and Diaspora Studies

Course Description

What does it mean to be Asian American? Asian American Studies is an interdisciplinary field that draws on social sciences, humanities, and the arts to explore the historical and contemporary experiences of Asian Americans in the western hemisphere. This course provides students with an introduction to this dynamic and growing field of study, taking race, gender, immigration, diaspora, class, labor, and sexuality as primary subjects of the field. The course also historicizes Asian American racialization to better understand the structural forces that have shaped Asian American lives and the ways that writers, scholars, and activists have responded to and resisted these forces.

ENGLISH278S - Transformative Ideas: Power, Theater, and Politics

Course Description

What is power? How is it created, transferred, or lost within a polity? What happens when one entity seizes power from another? Must violence always be at the center of that event, or can shared culture animate the accumulation and maintenance of power in a society? This Transformative Ideas seminar examines how insights in political theory and theater studies have addressed these questions. Concepts include ambition; sovereignty; violence and coercion; collectivism, especially nationalism; and rhetoric. Key writers include Aristotle; Plato; Machiavelli; Sophocles; Shakespeare; Weber; Arendt; Douglass; Soyinka; Alfred Jarry; Caryl Churchill; June Jordan, and Lynn Nottage.

ENGLISH299 - Hip Hop, Futurism, and the End of the World

Course Description

In this course, we will explore the intersections between hip hop, black futurity, science-fiction, and visions of the end of the world. We will focus on hip hop artists who draw themes from fantasy and speculative fiction to both re-make sense of the present and to imagine a radically different future. We will explore how these artists invent personas, identify with the alien, invoke space ships from other planets, and blur the line between human and non-human. While the course underscores themes of futurity and possibility, we will also examine how these themes respond to enduring conditions of racial, gender, and sexual oppression. Artists we will focus on include: Outkast, Janelle Monae, Erykah Badu, and MF Doom.

ENGLISH301S - Imagining Human Rights: Science Fiction, Culture, and the Creation of Rights

Course Description

This course engages students in the intersection of speculative fiction and the history of ideas about human rights and what it means to be human. Using interdisciplinary tools, including history, anthropology, and public policy, students will explore created worlds and new ways of thinking about what rights humans—and other beings—have, how those rights are proposed, and what happens when those rights are contested. The course focuses on how the imaginary influences or presages the real, allowing us to experiment with what-ifs. Students will work in Duke's Locus Archives of primary documents on 20th-century science fiction spanning writers from China, the USSR., and Japan.

Course Description

It is often said that literature encourages ethical reflection, and even that it somehow fortifies our disposition to behave in ethical ways. This class will consider a different possibility, that literature, or narrative more generally, often represents or provokes circumstances of extreme moral uncertainty. Such uncertainty, sometimes focused in a moment of decision and sometimes arising from a clash of perspectives, can gather around characters, narrators, authors, and even readers. We will be focusing on a few works of literary and cinematic art, ranging from the Book of Genesis to Ian McEwan's Atonement, in which moral issues emerge with particular urgency and complexity.

ENGLISH327S - 9/11 and The Global Novel

Course Description

Reading 9/11— the destruction of the World Trade towers in New York and the subsequent 'war on terror', through its representation in novels from South Asia, Middle East and their diaspora. Alternate genealogies of 9/11 within the larger history of the global cold war. Close attention to the novel form alongside debates in novel theory and world literature. Comparing representations of 9/11 in novels from South Asia with those in the Western media to ask questions grounded in political and critical theory. No language requirements. Class discussions/reading responses, mid-term presentation, and final paper developed over the semester.

ENGLISH330 - The Seven Deadly Sins: Representing Vice and Virtue in Christian Tradition

Course Description

This course will trace the motif of the seven deadly sins in Western tradition, exploring two methods of understanding human psychology and behavior: the philosophical school of virtue ethics, which provides an account of how our actions and habits shape our characters and identities, and the artistic technique of allegory, which externalizes our inner life in vivid, sometimes shocking images, characters, and stories. Readings are drawn from philosophy (Aristotle, Aquinas), literature (Dante, Chaucer, Spenser), art (Giotto, Bosch), and present-day pop culture. Course assignments include both analytical essays and creative projects.

ENGLISH353S - Black Feminism and Fashion

Course Description

Black feminist perspectives on clothing and fashion. Explores traditions in which Black artists and writers make clothing a primary theme. Presenting photographic, painted, and literary portrayals by and of Black people across the diaspora, and bringing together the study of visual culture, material culture, and literary studies, reveals fashion and clothing as aesthetic practices of everyday life that defy the objectifying effects of racism and sexism. Engages with scholarship that explores slavery's and colonialism's impact on gender and sexuality and examines how artists and writers work within and against those impacts to document the self-fashioning in Black cultural life.

ENGLISH360S - The Environment in Literature, Law, and Science

Course Description

This class explores changing concepts of 'environment' and 'nature' in lit, law & policy, & science. Using the Duke Campus Farm, the campus, & surrounding areas, we trace those changes across historical periods and cultures, culminating in a consideration of the dismantling of Black Durham (red lining, 147) & the emergence of the Environmental Justice Movement (in Warren County, NC). We explore how those concepts are constructed through science, law & policy, & cultural forms, how those concepts shape our lived experience, & how an understanding of that process might lead to more productive debates in science, law & policy, & ethics, and to constructive social and environmental change.

ENGLISH362D - What Is Beauty?

Course Description

Exploration of Western theories of beauty from Plato to the present. What do we mean when we call something beautiful? Does beauty belong to an object or an observer's mind? Is art or nature the best example of beauty? The class also examines the intertwining of modern theories of beauty with theories of race; analyzes the gender and power dynamics of theories of beauty; and asks about the relationship of aesthetics to society, politics, and biology. Readings include authors such as Plato, Burke, G.E. Lessing, Kant, Schiller, Charles Darwin, George Eliot, Nietzsche, W.E.B. DuBois, Arthur Danto, Elaine Scarry, Alice Walker, and Semir Zeki. ENGLISH365S - Modern Drama: 1940-2000

Course Description

In this course, we analyze key texts from the history of modern dramatic literature starting in 1940 and proceeding to the end of the twentieth century. Starting with the 'non-Aristotelian' drama of Bertolt Brecht, we trace the rapid evolution of dramatic forms that characterized playwriting in Europe, England, and then the United States. We will analyze not only the scripts but also various productions of each of these significant plays by significant playwrights, ranging from Bertolt Brecht and Samuel Beckett to Tony Kushner and Sarah Kane.

ENGLISH375S - Contemporary American Drama

Course Description

How does an artform like dramatic literature theorize concepts like 'contemporary' or 'American'? This course studies contemporary drama to explore how we might understand our current moment beyond chronology and Americanness beyond national distinctiveness. For instance, did the 'contemporary' begin with 9/11, the Great Recession, or our current political upheavals? Does 'American' signify a set of affects, histories, and discourses that are shared by some but not others? To pursue these and other queries, we will read works by Lynn Nottage, Ayad Akhtar, Sarah Ruhl, Matthew Lopez, among others. We plan for at least one trip to see performances in New York City, conditions permitting.

ENGLISH382S - Mapping Jewish Modernism

Course Description

Students research Jewish modernism through questions of geography and movement, pointing to the many places where modern Jewish art has been created and the experiences of migration, exile, diaspora, and resettlement that shaped this work. We discuss the varieties of ways that different art forms, including literature, theater, music, art, film, architecture, and dance, can be mapped. We analyze mapping in terms of the movements of people (artists, authors, and directors), of objects (paintings, literature, performances, and films), and within the works themselves. Work with the Rubenstein Library will lead to projects that contribute to an exhibit in Perkins Library and a digital site.

ENGLISH385S - Fiction/Reality/Autofiction: The Existential Turn in Contemporary Literature

Course Description

Inspired by Marcel Proust and W. G. Sebald, and working alongside Annie Ernaux, contemporary writers such as Karl Ove Knausgård, Rachel Cusk, Jenny Offill, and Teju Cole undermine traditional divides between fiction, memoir, and essay-writing, and challenge our understanding of what a novel is. Some critics have named this new trend 'autofiction.' Is that a good label? Does the new 'reality hunger' entail new ideas about subjectivity and identity? How does it relate to realism, and modernism. What is 'existential' about it? We will read contemporary literature from different countries alongside theories of language and reality, realism, modernism, the novel, and reading.

ENGLISH386S - Science Fiction Film

Course Description

This class will study science fiction film from 1950 to the present. Discussions will be organized around the relationship between scientific and technological innovation and social and geopolitical transformation: how, for example, the threats of nuclear war and the exhaustion of environmental resources, discoveries in virology and genetics, and the innovations in cybernetics and artificial intelligence all intersect with decolonization and global development, race relations, and new social and geopolitical configurations. We will explore how science fiction film registers and responds to the uncertainties of a changing world: to changing conceptions of the human and of life.

ENGLISH388S - Hitchcock: Master of Suspense

Course Description

This course is designed for advanced undergraduates interested in cinema, film theory, critical theory, narrative, and representation. The course offers a broad, accessible introduction to some of the topical issues debated by scholars in the humanities and social sciences, including practices of looking, crime and criminal behavior, troubled personalities, identity theft, romantic coupling, anonymous urban living, the middle-class family, and America during the Cold War period.

ENGLISH389S - American Independent Cinema

Course Description

Examination of the emergence, establishment, and transformations of American indie film. Addresses main genres, key films and prominent directors by looking at the aesthetic characteristics of indie films, as well as the social and institutional contexts (primarily its relationship to Hollywood cinema) that led to the creation and important impact of this filmmaking practice. Topics include Midnight Movies of the 70s, New American Cinema, Trash Cinema, Art Cinema, Black Indie Cinema, New Queer Cinema, Generation X, Smart Cinema, Neo Noir, and the Pulp Fiction success story.

ENGLISH392S - Autobiographical Writing: The Power and the Pitfalls of 'Me'

Course Description

This course explores autobiographical writing, primarily through students' writing and workshoping of essays, opinion pieces and snippets of memoir that the instructor and class discuss and critique, but also through reading a diverse group of past and current practitioners. While students will be able to steer their own efforts toward the manner of first-person writing in which they have the most interest, they will be expected to engage in study and execution of standard forms, such the opinion column. Students will benefit from instructor's experience writing memoirs and first-person opinion columns. Prerequisites: Journalism & Media 364S, 366S, or 367S.

ENGLISH397S - Narratives of Migration

Course Description

Stories of migration captivate us because they touch on universally important themes: home, family, belonging, identity, pain, loss. In this course, we will explore narratives, or stories, of migration, as told by refugees and immigrants from across the world, through different media: written, spoken, photographed, and constructed digitally on social media. This course approaches narratives of migration primarily from the perspective of sociocultural linguistics and discourse analysis, but we will refer to other scholarly traditions as well. This is a Service-Learning course: students will engage in a mentoring relationship with an immigrant student in a Durham high school.

ENGLISH409D - Black (In) Translation

Course Description

Examines the meanings of Blackness as it moves through the Atlantic world from 18th century to present. Readings explore theories of race and representation, and ways that translation conveys, shapes, and disrupts ideas about Blackness as cultural identity, lived experience, political claim. Course materials include works of literature, history, anthropology, and film. Taught in English, though, students enrolled under foreign language discussion sections will do reading, writing, research, and discussion in the language, requiring 2 years of foreign language study for language credit for the major or minor.

ENGLISH422S - Advanced Writing for Stage and Screen

Course Description

'Advanced Writing for Stage and Screen' will look at the strengths of three dramatic art-forms - playwriting, screen and TV writing - and the particular challenge they share: the concept of 'dramatic action' which provides the 'motor' for a dramatic work. Initial writing exercises will explore these dramatic-writing forms, in conjunction with the study of representative plays, films and TV series. Final projects - a play, screenplay or TV pilot - will be discussed and critiqued in class as they progress, prior to a final rewrite. Prerequisite for this course is one previous dramatic writing course - either playwriting or screenwriting.

ENGLISH460S - Weil, Beauvoir, Murdoch: Three Women Philosophers in Mid-Twentieth Century Europe

Course Description

Simone Weil (1909-44), Simone de Beauvoir (1908-86), and Iris Murdoch (1919-99) are towering figures in the history of European philosophy. Yet they have all, in different ways, become somewhat marginal to the philosophical mainstream. All three wrote on ethics. Weil wrote on labor, society, affliction, and grace. Beauvoir wrote novels, memoirs, and *The Second Sex*, a groundbreaking feminist analysis of women's situation. Inspired by Weil, Murdoch wrote about attention and the good and became one of the UK's leading novelists. The course will introduce students to their writing across genres, and situate their work about their respective national traditions.

ENGLISH480S - Understanding Mediation

Course Description

Examines experience as always mediated. How does text mediate expression, or language mediate subjectivity? How do images mediate power, or sounds mediate resistance? How does computation mediate agency, or networks mediate thought? But also, how do nations mediate globalization, or oil mediate energy? And how do bodies mediate liveness, or the environment mediate history? Moves from particular media forms and examples (language, literature, the fine and performing arts, audiovisual media, computational media) to focus on key theoretical concepts and debates of critical theory from twentieth and twenty-first centuries. Crosses national boundaries to understand mediation from global perspective.

ENGLISH316S-1 - Playmaking for Writers: Collaboration from Page to Stage**Course Description**

Dramatic writing for stage, screen or film, is not meant to be read, like a novel or poem, it's meant to be performed. In this class, student writers explore the 'liveness' of dramatic writing in collaboration with actors and directors. Starting with writing exercises that aim at the core concept of 'dramatic action', students' progress to self-generated works. Semester ends with public presentation of student work as brought to the stage by the companion section for actors and directors. Prerequisite: one previous dramatic writing course in playwriting, TV writing, or screenwriting.

ENRGYEGR310 - Introduction to Energy Generation, Delivery, Conversion and Efficiency

Course Description

An overall introduction to energy issues as they related to generation, delivery, conversion and efficiency. Topics include efficiencies of both new and established energy generation and conversion methods, electricity generation by fossil fuels, nuclear, solar, wind and hydropower and alternative energy technologies. Other topics include space heating and cooling by traditional methods and by solar, transportation energy in automobiles, mass transit and freight. Topics are evaluated quantitatively by modeling and using principles of fluid mechanics, thermodynamics and heat transfer. The environmental consequences of energy choices on local, national and global scales, including toxic emissions, greenhouse gases and resource depletion are also discussed in integrated throughout the course. Prerequisite: Mechanical Engineering 331L, or Mechanical Engineering 512, or Physics 311, or similar thermodynamics, or consent of instructor. Course is not open to students who have taken Mechanical Engineering 461.

ENVIRON107 - Climate Change Now

Course Description

Readings and case studies in sustainable development, social entrepreneurship, and other attempts to address natural resource limitations, economic inequality, and social justice. Focuses on the problems that sustainability is intended to solve, competing definitions and values. Includes perspectives from development experts, for- and non-profit sector innovators, anthropologists and other social scientists.

ENVIRON131S - Gateway Seminar: Extraction: Humans and the Underground Earth

Course Description

Human societies depend on harnessing the resources of the underground earth. Subterranean aquifers shaped the world's food system. Gold deposits made currency and incited global wars. And fossil fuels now represent frontiers of planetary catastrophe, as buried carbon threatens life on earth. This course explores the often forgotten but indispensable role of the underground in making the modern world. Using the lens of 'extraction' – the taking of resources from beneath the earth – and drawing from historians, artists, environmentalists, geologists, journalists, and science fiction, we will develop global perspectives on the meaning and transformation of the underground from 1800 to today.

ENVIRON144A - The Ecological Side of Spain: How the Climate, Biology and Territory Define Our Society

Course Description

This Duke in Madrid course aims to give a perspective that combines geography, biology, anthropology, and sociology in a joint vision of Spain as a natural space, and how this configuration is reflected in diverse creative environments: the cinema, literature, photography, or art from both past and present. Ecology, territory, the rural world, primary economic activity, and nature will guide us in our journey that, acknowledging Spain's biogeographical and climatic plurality, will take us from the paleolithic paintings in northwest Cantabria and their intimacy with nature to diverse stops in the Spanish context and the interaction of these stops with the environment and society.

ENVIRON147 - Israel/Palestine: Comparative Approaches to Rights and Justice

Course Description

Introduction to the Israel/Palestine conflict, studied through an interdisciplinary lens, including scholarship from the fields of anthropology, environmental studies, history, geography and cultural studies. Themes include: competing nationalisms, environmental politics and resource management, peace building, refugees and displacement, humanitarian crises and challenges, representational politics. Range of primary sources will be used including human rights reports and testimonials, natural resource policies, feature and documentary film, memoirs, political treatises, and maps.

ENVIRON148FS - Genomics of Host-Microbe Interactions: The Symbiotic Web

Course Description

Genomic insights into the astonishingly diverse microbial world, including microbes that interact with hosts in beneficial and harmful ways. Dominance of microbes in our own bodies, which contain 10 times more bacterial cells than human cells and 150 times more bacterial genes than human genes. Understanding how microbial interactions have impacted life's history, genome evolution, ecology, and human health. Factors that dictate trajectories toward parasitism versus mutualism, how microbial symbionts respond to environmental change, molecular and cellular mechanisms of homeostasis. Readings will focus on primary articles. Open only to students in the Focus Program.

ENVIRON155 - Principles of Economics and the Environment

Course Description

Teaches basic economic literacy and introduces environmental and natural resource issues through the lens of economics. Analyzes incentives and decisions of individuals, firms, and governments and how they interact with the natural environment. Examples include a consumer deciding to purchase organic produce, a firm deciding to install pollution control technology, a government choosing to regulate a carcinogenic chemical, and group of nations deciding to regulate greenhouse gas emissions. Stresses command of economic reasoning and analytical tools as ways to understand why people and governments do what they do and how policies might better address the needs of society.

ENVIRON180S - Dynamics of Environmental & Climate Justice: Movements, Countermovements, & Institutional Response

Course Description

This course examines the contentious politics of the environmental justice and climate justice movements. We explore how these movements and their opposition work to shape political opportunities and responses. We will consider the substantive concerns of the environmental justice movement, the climate justice movement, their methods, and the scales at which they operate (local, national, global). Social movements of political significance will generate opposition. So, we will consider the countermovements that challenge both justice movements. These topics will be explored using a range of materials as well as through field observations of movement activities and other events. FOCUS program students only.

ENVIRON213S - Ecology and the Human Good: Sustainability, Community, Nature, and Belonging

Course Description

This course examines the complex network of relationships that support flourishing human communities. How do our interactions with each other and the natural world enhance or undermine our ability to grow and live together? How does the structure of human communities shape our relationship with nature? What is the proper role of markets and technological innovation in our quest for a sustainable and flourishing future world? Through an interdisciplinary lens, we will examine topics including sustainable agriculture, community formation, friendship, climate migration, environmental ethics, food, conservation, the politics of belonging and citizenship. This course is part of the Transformative Ideas Sophomore Program.

ENVIRON228S - Food and Fuel for a Growing Population: Nuts and Bolts of Plant Growth and Production

Course Description

Covers primary physiological processes from subcellular to whole plant that affect plant growth in a changing environment. Processes include photosynthesis, respiration, water relations, nutrient and carbohydrate allocation, signaling, and stress responses to various biotic and abiotic factors for a range of plant species adapted to different environments. Applications include plant improvement for food and biofuel production, management of plant growth in response to global change. Offered through the DukeImmerse program. Will include travel to farms in NC locally, to the mountains, and to the coast. Recommended prerequisite: Biology 201L, 202L, or 203L. Instructor consent required.

ENVIRON276 - Denial, Faith, Reason: Sustainability and Survival

Course Description

This course investigates both theory and history of the concept of sustainability, and explores its various economic and political manifestations over time. What are the historical roots of the sustainability debate? What aspects of life do various concepts of sustainability entail, and how do they inform modern ethics? What, in the end, does the history of political economics teach us about the possibility of sustainable development?

ENVIRON278L - Comparative Physiology of Marine Animals

Course Description

Physiology of marine animals with emphasis on comparisons between marine vertebrates and humans. Focus on physiological processes including gas exchange, circulation, osmoregulation, metabolism, thermoregulation, endocrine, neural control and sensory systems. Lectures and laboratories illustrate the methodology, analysis techniques, and written reporting of physiological research. Taught fall, spring, and summer. Recommended prerequisite: AP biology, introductory biology, or consent of the instructor.

ENVIRON281 - Environmental Justice: The Making of a Modern Movement**Course Description**

This class puts the rise of the environmental justice movement in historical context. Students will be introduced to EJ through its foundational texts. Subsequent modules will then look at: how EJ critiqued the earlier environmentalism movement, longer scale historical processes of imperialism, capitalism, and racial formation at the roots of inequitable environmental health, and real-world case studies that show how these historical processes have come together and how the movement has matured since the 1980s. By the end of the course students will understand how EJ work has evolved and become a topic of global concern.

ENVIRON295 - Inventing the Environment: Ideas of Nature in Literature and History of Science

Course Description

Course will explore western conceptions of nature in the modern period. We will ask: How have differing views of nature represented new definitions of the human? How have perspectives on nature changed historically in tandem with other cultural developments? What does it mean to have ethical responsibilities towards natural entities? How are ideas of the environment formed, critiqued, and changed through imaginative and investigative practices such as those of science and literature? Views of the environment considered will include: resource, generative force, sacred space, ecological process, home, and apocalyptic wasteland. We will read diverse thinkers such as: Darwin, Blake, Thoreau, Humboldt, Goethe, Kafka, Theodor Storm, Haeckel, Lynn Margolis, and Octavia Butler.

ENVIRON299S - Climate, Science, and Society: The Long History of Anthropogenic Climate Change

Course Description

This class will approach the history of climate chronologically. The first part focuses on adaptation, resilience, and destruction as societies around the world faced changing climates. This will give us a better understanding of how historians and scientists work together to reconstruct past climates. The second part covers the rise of climate science in the nineteenth and early twentieth centuries. During the final weeks, we will focus on the past sixty years of climate science, exploring how scientists have improved their knowledge of the changing climate, the relationship between environmentalism and climate activism, climate change denialism, and climate justice.

ENVIRON303SA - Ocean Justice

Course Description

This course will focus on issues of environmental justice that pertain to the oceans across multiple scales. Introduction to diverse perspectives how people around the world think about the oceans as potential source of resources & as important social and historical spaces. We will critically evaluate what those perspectives mean for conceptualizing environmental justice in and around oceans. We will evaluate ocean-related justice concerns posed by timely issues like global biodiversity negotiations, sea level rise/disasters, the blue economy, fisheries/aquaculture, and marine protected areas. Students will conduct a specific ocean case study to understand the potential justice implications. Taught in Beaufort at the Duke Marine Lab.

ENVIRON317 - The National Parks in American Life

Course Description

This course will introduce students to the history and evolution of the national park system in the United States. Beginning with 19th century parks, it will explore the emergence of the park idea, evolving notions of conservation, indigenous displacement, establishment of the National Park Service in 1916, and the 20th and 21st-century expansion of the national park system to include both scenic or 'natural' and cultural and historical parks. The course will consider the relationship of the parks to American historical narratives; to tourism and recreation initiatives; and to environmental movements and science. Students will have the opportunity to investigate the history of one park of their choosing.

ENVIRON332S - Environmental Justice: The Economics of Race, Place, and Pollution

Course Description

Minorities, people of color, and low-income households bear a disproportionate burden from environmental pollution. Since the Clinton Administration, addressing environmental injustice has been among the policy objectives of the EPA. Course examines how environmental injustices may arise out of discriminatory behavior and/or market forces founded on individual, firm, and government incentives. We begin with the theoretical framework used to document and explain disproportionate exposures, then review existing empirical evidence through case studies and evaluate competing explanations for injustice using an economics framework. Course Description

Advanced undergraduate seminar on comparative energy crises and natural resource management. Uses case studies of fossil fuel, nuclear, and renewable energy resources drawn from anthropology, natural sciences, and even business economic readings. Appropriate for students interested in global politics, economic development, human rights, or environmental issues.

ENVIRON348 - Global Environmental Politics

Course Description

This course examines the international community's responses to various global environmental problems. Because many environmental problems cross national borders, solutions require some form of global governance such as state-led mechanisms in the form of international environmental regimes. The course will thus explore how and why states both succeed and fail to negotiate international governance mechanisms. The course will also examine why some international environmental regimes are more effective than others and why states choose to comply with environmental regimes.

ENVIRON360 - Environmental Health: Pollutant Chemistry and Toxicology

Course Description

The course provides an overview of chemical pollutants and their impacts on ecological and human health. The course provides an overview of chemical pollutants and their impacts on ecological and human health. Topics include: chemical pollutant classes, their sources and the chemical properties that impact their fate and transport in the environment. Molecular, cellular and organismal responses following exposure to pollutants, using cases studies. Pollutant impacts on human health will be discussed and cover areas such as cancer, cardiovascular health, fertility and brain development. Prerequisites: Biology 201L, 202L, or 203L and Chemistry 101DL. Recommended prerequisite: Chemistry 201DL.

ENVIRON366 - Green Germany: World Leader in Environmental Policy**Course Description**

Exploration of Germany's leading global role in developing and implementing 'green' technologies and environmental policies. Analyzes Germany's current and past policies on energy, agriculture, and pollution control. Examines policies in context by studying German ideas about nature, history of German environmentalism, and by looking at Green Germany in European and global perspective. Discusses extent ethics can or ought to influence debates about global climate change and its ramifications. Readings include scholarly studies, exemplary policies, and groundbreaking ecological texts.

ENVIRON380 - The Calculus of Sustainability - Lessons from Complex Societies

Course Description

Sustainability research asks to what extent our planet, with a finite environmental resource base, can accommodate the faster than exponentially growing human population. The concept of carrying capacity contains many resource limitations originating from available water, energy, and ecosystem services. The course covers the calculus behind these limitations beginning from models of population growth, proceeding to the 'Doomsday Equation' and human-biosphere interactions. Dynamical systems will be used to enlighten linkages between humans and the Earth's carrying capacity, renewable versus non-renewable resources, peak-oil, peak-water, and peak-grain. Prerequisite: (Mathematics 105L and 106L) or Mathematics 111L.

Grading Basis

ENVIRON385S - The Environment in Literature, Law, and Science

Course Description

This class explores changing concepts of 'environment' and 'nature' in lit, law & policy, & science. Using the Duke Campus Farm, the campus, & surrounding areas, we trace those changes across historical periods and cultures, culminating in a consideration of the dismantling of Black Durham (red lining, 147) & the emergence of the Environmental Justice Movement (in Warren County, NC). We explore how those concepts are constructed through science, law & policy, & cultural forms, how those concepts shape our lived experience, & how an understanding of that process might lead to more productive debates in science, law & policy, & ethics, and to constructive social and environmental change.

ENVIRON464 - Mathematics of Dynamical Systems Describing Complex Environmental Phenomena: A Modern Crystal Ball?

Course Description

Environmental problems require construction of and solutions to systems of equations for relations between rates and states of variables. Covers construction and use of differential equations and corollary analytical tools. Differential equations used to explain concepts as stability, resilience, and equilibria (e.g. climate, ecosystems, conservation efforts). Computer-aided software (MATHEMATICA and Matlab) used to solve analytically and numerically such equations. Case studies illustrate the mathematical tools derived in dynamical systems (e.g. bifurcations and catastrophe theory, boom-bust, crashes). Prerequisite: Mathematics 111L or equivalent and Physics 141L or equivalent.

ENVIRON470S - Capstone: Research in Human Rights

Course Description

A primary learning objective is to have students connect the intellectual themes and scholarly knowledge they have developed in the Gateway, Introduction to Human Rights, and the electives they have taken toward the Human Rights Certificate. The course integrates co-curricular rights-related experiences (through DukeEngage, DukeImmerse, internships and volunteer placements). The capstone culminates in a final project. Students may work in teams toward a final project so long as each student's work is evaluated separately and at a high standard. Prerequisite: Cultural Anthropology 104D. Consent of director of undergraduate studies required.

ENVIRON476A - Data and Time Series Analysis in Marine Sciences

Course Description

This course is designed for students in marine and environmental science disciplines to learn data analysis skills, including analysis techniques and their implementation using MATLAB or R. Topics include: discrete sampling issues, data outlier and rejection tests, interpolation and gridding, error and propagation of uncertainty, coordinate rotations and principal axes, curve fits, regression, bootstrapping, filtering, spectral and harmonic analysis, spatial analyses. Other topics may be included or substituted depending on student interests. The course is structured as mix of weekly lectures and linked workshops applying methods to marine and environmental data sets. Taught in Beaufort at Duke Marine Lab. Instructor consent is required.

ENVIRON496 - Advanced Research in Environmental Sciences and Policy

Course Description

Advanced research in Environmental Sciences and Policy leading to Graduation with Distinction. Weekly one-hour seminars to guide student's independent research towards thesis. Topics include background context through efficient library searches of literature, hypothesis testing, research design, data analysis, and proposal writing. Students write a proposal including a comprehensive literature review, methods description, and preliminary results demonstrating methods' feasibility. Student peer-review used to explore various topics. Students are expected to work with a faculty mentor conducting original research in a research independent study.

ETHICS102CNS - Finding Yourself and Creating Your Voice: Speech and Resilience for a Complicated World

Course Description

'Finding (and Creating) Your Voice' in the legal system involves being able to not only recognize all sides of an issue, but ultimately, to also articulate a position/argument that is persuasive. This voice might also be one that involves the ability to mediate and/or negotiate an outcome. These skills require an understanding of how the law deals with speech and how telling a compelling story is at the heart of 'practicing' within the legal system. In addition, one's effectiveness in finding and creating a voice is also directly connected to one's overall self-awareness, resilience, courage, curiosity, creativity, capacity to listen and leadership style, among other factors. In this course, students will have the opportunity to gain a better understanding of how the law handles speech, with a focus on the 1st Amendment to the US Constitution. This understanding will be undergirded by a consideration of (and ultimately a greater appreciation for) the difference between what can legally be said versus what 'should' be said in a particular situation. Students will be invited to practice how to civilly and compassionately disagree with someone, particularly a peer, while identifying and exploring their personal values, reconciling these values with how they find, create and use their voice at Duke and beyond.

ETHICS143CNS - 'Singing the Same Song' : A Global Perspective on the Experience of Illness

Course Description

'When I go to see my diabetes doctor, I feel that he and I are singing the same song.' This comment from a South African man battling chronic illness underlines the wonderful potential of the patient-provider relationship. We will be using the doctor-patient relationship and the patient experience as a lens to understand the place of illness and empathy in human existence. We will explore concepts of culture and global health. How does culture affect all of us? How might members of marginalized groups in the US and citizens of low and middle income countries experience the processes of illness and healing. Along the way, we will all be learning about ourselves, how it feels to express and receive empathy, and how the simple act of being curious make us better people.

ETHICS180FS - Sex, Pleasure, and Justice: Reproductive Utopias

Course Description

While the US recognizes young people for achievements in music, sports, and technology, their contributions to politics—especially those creating a more just nation—are often downplayed. Despite significant innovations for justice in the 20th and 21st centuries led by those under 30 to destroy Jim Crow, legalize contraception, and stop police brutality, we do not have great documentation of these youth leaders. Today's reproductive justice activists advocate for decolonizing sexuality and providing accurate, stigma-free care. Students in this course will use oral history and archival research to document how activists drive innovations in reproductive justice, exploring campaigns against forced sterilization, for gender affirming care, and access to both birth justice and abortion care.

ETHICS193S - Dynamics of Environmental & Climate Justice: Movements, Countermovements, & Institutional Response

Course Description

This course examines the contentious politics of the environmental justice and climate justice movements. We explore how these movements and their opposition work to shape political opportunities and responses. We will consider the substantive concerns of the environmental justice movement, the climate justice movement, their methods, and the scales at which they operate (local, national, global). Social movements of political significance will generate opposition. So, we will consider the countermovements that challenge both justice movements. These topics will be explored using a range of materials as well as through field observations of movement activities and other events. FOCUS program students only.

ETHICS195S - Human Rights and Legal Redress: Seeking Justice through Human Rights

Course Description

In this course, students will analyze through case studies the issues that confront the implementation of human rights ethics down through the layers separated by geography and culture to local implementation and enforcement. They will acquire an understanding of the international, regional and local human rights conventions and structures which propose, cultivate and enforce the ethical norms of the international human rights regime. This class addresses questions including: in what respects do enforcement options differ from place to place? When, where and under what circumstances is the human rights apparatus most effective in providing redress for rights violations? And, what are the alternatives to the human rights approach to justice?

ETHICS201 - Introduction to Engaged Citizenship and Social Change

Course Description

Introduction to key concepts, theories, and critiques of civic engagement and social change, with a focus on competing notions of democratic citizenship. Examination of voluntarism, philanthropy, community service, political participation, social activism and other forms of community engagement. Critical reflection on ethical issues related to community engagement and social change, including critiques of progressivism and service. Students will also be asked to apply these various approaches to pressing social issues of our time, such as income inequality, environmental justice, education reform and gender and race equality.

ETHICS202 - Conservatism

Course Description

Social or 'moral' conservatives are rare birds in the modern university. Who are these people and why do they think as they do? This course will explore the historical and intellectual foundations of this branch of conservatism in the Western world. Topics will include religion and politics, views of 'modernity' and liberalism, the value of tradition, human nature and purpose, social justice, marriage, sexuality, abortion, family, natural law, the sanctity of human life, religious freedom, constitutional law, the basis of rights, free markets, and conservatism in higher education. Authors will include philosophers, theologians, and political theorists. Lively discussion will be encouraged.

ETHICS203 - How to Think in an Age of Political Polarization

Course Description

Americans today live in a time of deep political polarization, intellectual isolation, and intense partisanship. We rarely have genuine and open interactions with those with whom we disagree; when we do, we often do so on the assumption that they are not just wrong but are irrational and immoral. This class aims to explore this phenomenon in its sociological, political, ethical, and psychological dimensions. What are the causes, costs, and remedies of our polarization? Can friendships exist across ideological divides? Students are asked to openly discuss controversial political topics, while attempting to cultivate intellectual virtues and build a community of trust amid disagreement.

Course Description

Interdisciplinary exploration of arts and science related to stress, identity, and wellness. Multi-dimensional focus fusing science, theory, art, literature, and performance to understand structural causes of stress, their physiological effects, and how stressors impact our identities and community ethics. Through text analysis and experience, students explore how arts of wellness, including yoga, mindfulness, and art therapies, impact stress, identity, and ethics. Course texts include literary and discourse theory, social science, neuroscience, and primary texts related to stress, identity, and wellness, including nonfiction, fiction, poetry, art, music, performance.

ETHICS208 - Men and Women: Theory, Politics, and Life Together

Course Description

Much is said today about toxic masculinity, but what does healthy masculinity look like? There is a lively conversation about the possibility of providing a definition for the term 'woman', yet public discourse surrounding women's rights persists. This discussion-based seminar will explore femininity, masculinity, and what it means to be a good man or woman. Topics will include the transition from childhood to man/womanhood, aggression, the pay gap, gender and work in a modern economy, dating, marriage, parenthood, the household, the 'masculinity crisis' in the west, female autonomy and the legacy of the women's liberation movement, and the changing politics of the sexes in America today.

ETHICS210 - The Good Life: Religion, Philosophy, and Life's Ultimate Concerns

Course Description

What does it look like for a human life to go well? What leads to human flourishing or 'happiness' or 'success'? What is freedom? Love? Justice? What is the basis for ethics? What is our relationship to the natural world? What is the significance of death? How do our beliefs (or lack thereof) about God or the gods shape how we view the world? We will examine how philosophical or religious traditions around the globe have answered life's biggest questions. Traditions may include Confucianism, Islam, Christianity, Stoicism, Judaism, Buddhism, Hinduism, scientific naturalism, expressive individualism, and utilitarianism. Part of the Transformative Ideas Sophomore Program.

ETHICS211 - Experiments in Ethical Living

Course Description

This course is required for Kenan LLC participants. It focuses on aspects of living that fall into the background of professional life: sleep, food, mental health, interpersonal relating, and practices of consumption/waste. Assigned readings cover topics related to the concept of 'social reproduction,' and interdisciplinary studies on the above-named themes. Weekly peer- and instructor-designed 'experiments in living' accompany readings, paired with writing assignments, group reflections, and analytic discussions. The course goal is to help students experientially develop awareness and living practices, while keeping open the question of 'ethical living' within the built environment.

ETHICS212S - Ecology and the Human Good: Sustainability, Community, Nature, and Belonging

Course Description

This course examines the complex network of relationships that support flourishing human communities. How do our interactions with each other and the natural world enhance or undermine our ability to grow and live together? How does the structure of human communities shape our relationship with nature? What is the proper role of markets and technological innovation in our quest for a sustainable and flourishing future world? Through an interdisciplinary lens, we will examine topics including sustainable agriculture, community formation, friendship, climate migration, environmental ethics, food, conservation, the politics of belonging and citizenship. This course is part of the Transformative Ideas Sophomore Program.

ETHICS214 - Medicine and Human Flourishing

Course Description

This course examines the nature, ends, and practice of medicine as it relates to the human condition. How can medicine foster human flourishing and well-being—individual and social—against the experience of injury, pain, and suffering? Beginning with ancient Greece and its Hippocratic corpus, students explore answers to this question within a variety of historical and contemporary contexts. Taught by an interdisciplinary team of scholars that includes medical professionals, the course highlights the importance and professional relevance of posing big questions about personal meaning and human values at stake in the practice of medicine.

ETHICS215 - Resettling Refugees in Durham

Course Description

This service-learning course partners students with locally resettled refugee families to identify social problems in the community and work toward solutions for addressing them. Students will work one-on-one with refugees to complete coursework and/or projects for the service-learning component of this course. By working with refugees, Duke students develop a better awareness of global issues present at a local level. End products of this course vary by semester. Students have worked to help produce films, gallery exhibits, and other public pieces relaying the refugee experience. This course is part of the MASTERY/SuWA refugee mentorship program.

ETHICS245S - Contemporary Nationalism and Classical Political Theory

Course Description

Ancient Greece and Rome offered competing visions of politics based on republics and the cosmopolitan idea of humans as world-citizens. In light of classical political theory and the resurgence of nationalism in current politics, we will consider the following questions: Should politics be based on concern for the individual or the nation? Do we have stronger duties to our nations and fellow citizens than to the rest of the world? If so, can we ignore other countries and focus on our own problems? Should foreign policy further the goals of nation-states or focus on global justice? Are nation-states necessary? How should we address the environment, immigration, and economic globalization?

ETHICS247S - Human Flourishing in a Digital Age

Course Description

The digital age has enhanced human life in many ways: communication is faster, medicine is better, and our knowledge of the world is deeper. But it has also changed the nature of work, society, and our sense of well-being, and raised fundamental questions about the meaning and purpose of human life. This course asks what it means for humans to flourish in a digital age. It considers how new technologies through the centuries have impacted human flourishing, making certain aspects easier and others harder, and perhaps even altering our conception of what flourishing looks like. Our ultimate goal is to ponder together how we should practically live in today's digital age. For sophomores only.

ETHICS267S - Global Cold War

Course Description

Traditional narratives of the Cold War focus on a bi-polar series of conflicts that pit the United States against the Soviet Union in a good-versus-evil battle for global political and military supremacy. This course destabilizes this account of a process that affected every continent on earth – and even reached into space – over the period of more than half a century. It explores the Cold War from East-West, North-South, global, and interstellar perspectives. In addition to political and military issues, the course will also discuss the Cold War in social, cultural, intellectual, and economic spheres.

ETHICS268S - Gender and Human Rights: Global Perspectives**Course Description**

Challenges to women's human rights are plentiful. They include gender-based violence and poverty, as well as access to health care, education, and political participation. This course will evaluate the efficacy of the UN Convention on the Elimination of All Forms of Discrimination Against Women and other instruments and organizations of the human rights system in addressing violations of women's human rights in different countries, societies and civilizations, including the U.S. While the human rights of women, transgender and other gender-nonconforming people around the world will be the primary focus, these cannot be separated from conceptions of patriarchy and masculinity across cultures.

ETHICS281S - Science and Society

Course Description

Science and technology are inseparable from the people that engage in them and are influenced by them. In this course we will ask questions such as: what is science? How do scientists go about doing it? Where does science get its authority? What are the responsibilities of scientists to the public? What are the ethical, legal, and political considerations that should accompany scientific development? We will read classic and contemporary texts concerning these issues, and students will develop their critical and philosophical abilities in order to assess and contribute to these debates. Reserved for Sophomores Only.

ETHICS283S - The Democratic Mission of American Higher Education

Course Description

This seminar will explore the purposes of American higher education, with a focus on the origins of higher education in this country and important period of institutional evolution. We will interrogate the relationship between democracy and higher education in two ways. First, by understanding how democracy provides the necessary conditions for higher education to pursue its core mission. Second, by looking at how higher education promotes democratic values. The course will pay particular attention to post WWII American higher education, with a focus on important contemporary debates on higher education issues.

ETHICS286 - Women Writers of the Church: Speaking Truth to Power

Course Description

Meet extraordinary Christian women in their own words. From a martyr who composed her testimony hours before her execution to nuns who advised kings and popes, from activists who rewrote the laws of nations to a prisoner who documented human rights offenses with her own blood, these women spoke boldly for truth and justice under difficult conditions, inspired by their common faith in Jesus. Each class session will feature selections from one writer's works and letters, using her life as a window into the age in which she lived. We will thus develop an understanding of Christianity that is global, historical, and committed to the perspectives of those who lack power.

ETHICS287 - Religion and Science

Course Description

The diverse interactions of religion and science from the Renaissance to the present. The profound transformation of premodern science by seventeenth-century revolutions and nineteenth-century discoveries; in turn, the transformation of society, including religion, by modern science. Some consideration of physics and astronomy, but major focus on the impact of Darwinian anti-teleology and modern biology, especially animal studies, on 'natural theology' and traditional arguments from design. Thinkers to be considered include Francis Bacon, Montaigne, Spinoza, Thomas Huxley, Albert Einstein, and E. O. Wilson. Topics include evolution, human consciousness, human identity, and the human-animal boundary.

ETHICS288S - Ethical Dimensions of Environmental Policy

Course Description

Uses case studies from different arenas of environmental policy (e.g., climate and clean air, water and waste, forests, oceans, energy) to surface normative assumptions often implicit in policy design and implementation. Links ethics to ethos (beliefs, aspirations, and spirit of a community or culture) to suggest that policies are not only pragmatic guidelines for decision-making and action, but also fundamental declarations concerning the character of human flourishing and the shape of the natural world, which is why environmental policies are often so contentious. Seeks to help students understand this aspect of environmental policy and to negotiate these deep-seated ethical conflicts.

ETHICS302 - Constitutional Law in the American Political Tradition

Course Description

The Constitution plays a preeminent role in U.S. political history and public discourse. Yet what does it mean for a government or policy to be constitutional—and why do we care so much? This course studies the concept of constitutionalism in the American political tradition. Why does the Constitution play such a significant role in American politics? What philosophical, moral, economic, and political considerations shaped our Constitution—and what might have been left out? What rights does the U.S. Constitution guarantee? How has our understanding of the Constitution—and its role in our republic—shifted over time?

ETHICS320S - Narrative and Moral Crisis

Course Description

It is often said that literature encourages ethical reflection, and even that it somehow fortifies our disposition to behave in ethical ways. This class will consider a different possibility, that literature, or narrative more generally, often represents or provokes circumstances of extreme moral uncertainty. Such uncertainty, sometimes focused in a moment of decision and sometimes arising from a clash of perspectives, can gather around characters, narrators, authors, and even readers. We will be focusing on a few works of literary and cinematic art, ranging from the Book of Genesis to Ian McEwan's Atonement, in which moral issues emerge with particular urgency and complexity.

ETHICS325 - How to Live and How to Die: Death, Dying, and the Afterlife from Confucius to Cryonics

Course Description

Death is one of the only completely universal human experiences, yet we resist talking about it in our everyday lives. In this course, we will investigate some of the biggest questions and issues surrounding death. We will first examine the different ways that philosophical and religious traditions have conceived of death and problems that these conceptions may raise. In the second half of our course we will focus on how death affects our actions and choices in life. How does the prospect of impermanence shape the way we live? Are there causes that are worth dying for? How should we prepare for death? Should we use new technologies to extend our lives and 'cheat' death?

ETHICS365 - How to Rule the World: Empire and Global Governance from Greece to America

Course Description

From Babylon and Persia to Greece and Rome, empires have risen and fallen, but they always seem to make a comeback. Their defenders point to the stability they bring to a chaotic world. Their detractors point to the harsh rule required to maintain them. This course will explore arguments for and against empire, drawing on history, philosophy, and political theory, with a special focus on the Greeks and Romans. Then, in light of the parallel problems of empire and global governance, we will ask what lessons we can learn for the practice of international affairs today. Contemporary topics will include global institutions, foreign intervention, East Asia policy, and NATO and Eastern Europe.

ETHICS374S - Watchdog News and Storytelling: Changing Forms of Accountability Journalism

Course Description

Focus on evolving styles of explanatory reporting and investigative journalism. Practice fundamental research and writing techniques that journalists use to reveal complex issues and hold powerful institutions and people accountable. Identify sources, develop interviewing skills, and tap public records. Analyze stories that can serve as engaging models for your assignments, such as fact-checks, solutions-focused articles, and first-person accounts that turn the reporting process into a narrative device. Learn about editorial rules and writing conventions, including their ethical underpinnings and the role of objective methods. Talk with guest journalists about their experiences.

ETHICS381S - Vocation: Christian Origins, Contemporary Practice

Course Description

This course guides students in exploring the concept of vocation and their own sense of purpose. We'll trace the intellectual history of vocation from its Christian origins in vowed religious orders through its expansion in the Protestant Reformation to modern secular ideals of following your passion and doing what you love. We'll address major domains in which a person may feel called by God: explicitly religious ways of life like those of a nun, pastor, or missionary; fields of work such as medicine, education, and business; relationships such as marriage, singleness, and parenthood; and conditions such as disability, persecution, and injustice. A capstone project gathers, applies, and critically evaluates religious and philosophical resources relevant to students' own callings.

ETHICS387 - Reimagining the World Together: Why Friendship Matters for Our Future

Course Description

Explores friendship and why it matters in the frenzied world of 'likes' and 'swipes.' The average Facebook user has 155 friends. Instagram added a 'Close Friends' feature to distinguish friends from followers. Social media has weakened our sense of friendship. Still, Facebook users say that, of those 155 friends, they would trust only four in a crisis. Pursues the importance of friendship, not only as a place of private refuge but as a relationship of trust that facilitates insight and innovation and that has public purchase. Classes center on conversations between pairs of friends who bring their friendship, their work, and their imaginations to bear on the shape of the world in the future.

ETHICS401S - The Adventure of Citizenship: Lives of Civic Engagement

Course Description

What does it mean to be a citizen and live a civic life? In this course students will integrate academic content with their own community based experiences to understand and critique their understandings of civic engagement and social change. Students will reflect on their Duke experience and begin to chart their post Duke futures. They will gain knowledge of the historical context of democratic citizenship, understanding of the relationship between theory and practice, and familiarity with the contestations of civic engagement that emerge from considerations of race, class, and gender. Students will undertake independent projects to study those who have lived civic lives.

ETHICS402 - The Problem of Evil: God, Evil, Suffering, Sin, Meaning of Life, and Philosophy of Religion

Course Description

'The problem of evil' as the challenge of reconciling the existence of an absolutely perfect being (Omnipotent, Omniscient, and omnibenevolent God) with the existence of sin and suffering has one of the greatest problems of intellectual history from ancient to modern times. The problem of evil effects the 'meaning of life' deeply, so it is not exclusive to the monotheists, and involves atheists as well. This is an introduction to the problem of evil, and explores its major issues and concepts: the logical problem of evil, the evidential problem of evil, soul-making theodicy, natural law theodicy, process theodicy, anti-theodicy, free will defense, reformed epistemology, and skeptical theism.

ETHICS403 - Philosophy of Religion

Course Description

Philosophy of religion is a critical examination of metaphysics and rational justification for religious claims, as well as philosophical exploration of faith, religious experience, and the distinctive features of religious discourse. The course explores the nature of God's attributes; arguments for God's existence; the problem of evil; religious epistemology; religious language; God, science, and naturalism; faith and revelation; morality and religion; death and afterlife; miracles; and religious diversity. We compare the advantages and disadvantages of four methods of practicing the philosophy of religion: analytic, Wittgensteinian, continental, and feminist.

ETHICS404S - Ethics of Hope

Course Description

Hope involves the expectation or desire for good things to happen. Yet, does this set up people for despair when hopes get dashed or have no possibility of realization? Or, is the conjuring of something better—somewhere, sometime—what enables life to be sustained in the face of difficulties or just the daily grind of making do? In this class we raise the issue of the ethics, politics, and tactics of hope, drawing on philosophy, feminism, and anthropology.

ETHICS450S - What Should I Do With My Life? The Art of Choosing Well

Course Description

How can you make choices that lead to a good life? What does 'a good life' even mean? This seminar offers you an opportunity to ponder, critique, and reflectively engage diverse perspectives on the question of what it means to live well, and to develop a personal and practical vision for how you can live a flourishing life. Readings, written assignments, exercises, and discussions will invite you to critically examine the values that have shaped your path and who you've become thus far; consider what it means to live a good life in its various facets (such as meaning, purpose, work, achievement, purpose, community, and character); and articulate the kind of life you want to live now and after graduation.

ETHICS487S - Designing Ethics: Exploring the Integration of Ethics into Engineering Curricula

Course Description

Many engineering challenges contain thorny moral questions, yet ethical considerations are often secondary to the technical aspects of engineering curricula. In fact, nationwide ethics is rarely addressed in standard engineering disciplinary courses at Duke or elsewhere. This course seeks provide a blueprint and testing ground for addressing this gap. Students will work to research best practices from the educational and private sectors. Incorporating those insights with a study of the landscape of Engineering design education at Duke, students will design interventions that may be deployed in Duke Engineering classes. Instructor consent required.

EVANTH285 - Evolutionary Medicine and Global Health

Course Description

Covers evolutionary approaches to understand human health at a global scale. Integration of evolutionary thinking and medical science provides new insights to a wide array of medical issues including obesity, cancer, allergies, and mental illness. Evolutionary perspectives reveal why some pathogens are more harmful than others, shed light on the origins and spread of infectious diseases in humans, and help in controlling antibiotic resistance. Evolutionary approaches provide insights as to why we age and provide solutions to alleviate human health problems that often differ from modern medical practice. Course will place these perspectives in the context of global health challenges.

EVANTH330 - Human Evolutionary Physiology

Course Description

In this course we investigate human physiology using a systems-based and evolutionary approach. The primary course objective is to understand how the human body functions and how evolution has shaped our physiology. We also examine how our physiology responds to local environments (diet, climate, stress, etc.) in ways that affect our health and contribute to human diversity. For each system (cardiopulmonary, immune, nervous, digestive, reproductive, musculoskeletal, etc.) we examine the anatomy involved and its integrated physiological functioning. Recommended prerequisite: Evolutionary Anthropology 101 or introductory biology.

EVANTH341 - Primate Sexuality

Course Description

A comparative and integrative study of primate sex and reproduction. The material is presented in three sections: the first focuses on primate social organization, mating systems, and reproductive strategies; the second focuses on the endocrine system and behavioral endocrinology, and; the third focuses on sexual differentiation of morphology, brain and behavior. In each section, this course places human sexuality within the broader context of the primate order. Prerequisites: Evolutionary Anthropology 101D or Biology 202L or 203L.

EVANTH360S - Psychology of Cooperation

Course Description

Human cooperation is unique in the animal kingdom in terms of both its scale and its complexity. This course will delve deeper into this key phenomenon, examining the psychology of cooperative interactions through biological, evolutionary, cross-cultural, and developmental lenses. Students will explore topics related to how cooperation has evolved, the role of culture in shaping cooperative behavior, how these behaviors develop, and the mechanisms that both support and threaten cooperation.

EVANTH385D - Primate Disease Ecology and Global Health

Course Description

Covers concepts of disease ecology, with specific application to primates, human evolution, and global health. Explores the epidemiology and evolution of infectious diseases through the primary literature, focusing on infectious diseases of wild primates, humans, and other mammals. Students learn about the diversity of infectious diseases found in humans, and the basics of epidemiology, disease evolution and emergence, and primate behavioral ecology. Students also gain experience in thinking critically about scientific research, identifying interesting research questions, and communicating science to others. Prerequisite: Evolutionary Anthropology 101/101D or introductory-level biology.

(R) Research

EVANTH401S - Evolutionary Anthropology Capstone**Course Description**

Advanced approaches to topics central to evolutionary anthropology. The seminar course will help students synthesize the knowledge they acquired in their coursework in the major. The course will focus on three areas: evolutionary biology, human evolution, and why evolutionary anthropology matters for society. Specific topics covered include: science vs. pseudoscience, evolutionary forces, nonhuman primates as models for human ecology and behavior, human adaptation and migration, health, and human environmental impact. Students will apply what they have learned to 'current events' and discuss various career paths. Recommended prerequisite Evolutionary Anthropology 101.

FECON375 - Monetary Policy in the Modern Economy

Course Description

In this class, students will learn about the role of monetary policy in today's economy. Monetary policy is of utmost importance in managing short-term fluctuations in the economy and maintaining price stability. Monetary policy set by central banks transmits through the economy to influence the spending and borrowing decisions of households and businesses. The banking and broader financial markets are key for the transmission of monetary policy. The Federal Reserve and other major central banks, such as the European Central Bank and the Bank of England, have enormous influence around the world.

FMKT334S - Private Equity Buyouts

Course Description

Students work in small teams to identify an LBO target via an investment screen. Teams conduct the investment analysis and due diligence based on publicly available information. This includes: building LBO model, sources and uses of funds, capitalization table, and justification of inputs. Course content provided both by the instructor and guest speakers, homework assignments and student presentations based on the deliverables. The majority of this course involves team-based assignments with a few individual assignments.

FMKT340S - Introduction to Sustainable Investing

Course Description

Course provides a thorough introduction to this newly popular investment strategy, primarily focusing on public equity markets. Discusses theoretical underpinnings of sustainable investing, addresses how company's business practices matter to society as a whole. Reviews the origins and development of sustainable investing over the last fifty years, defines key concepts and terms in the field and discusses investment case for sustainability. Students will learn about the many ways to invest sustainably and the research needed as part of the investment process. Course concludes with a discussion of the mainstreaming of sustainable investing, the backlash to it and greenwashing.

FRENCH167CNS - Unruly Bodies: Narratives of Dissent

Course Description

Through literature, film, and contemporary art, students will examine global bodies as narratives of unruliness. What happens to bodies on the margins? How does policy account for bodies that defy borders and definitions? Which bodies offer dissenting expressions against institutions of power? Global case studies include: clandestine migration, border enforcement, food insecurity/malnutrition/obesity, the HIV/AIDS epidemic, nuclear testing and its environmental consequences, activist art, Indigenous land sovereignty, mental health awareness, the #BlackLivesMatter and the #MeToo movements, and transgender bodily autonomy. All case studies will be available, read, and discussed in English translation. No knowledge of French is required.

FRENCH301S - Finding Your Voice in French: The Power of Writing

Course Description

Develop your authorial voice in French. Whether you want to make readers laugh or cry, how can you use nuance, word choice, a sense of language rhythm to create impact? Study a multitude of texts for inspiration, from Nobel Prize winners to those who rebel and write, or sing, from the margins, using and creating language in powerful and innovative ways. Write in many forms--children's stories, poetry, persuasive speech, essays, literary fiction--expanding the space for self-expression and the power and possibilities of your own multilingualism. Close reading, discussion of craft, journaling and creative writing, workshoping, peer feedback, revision. Prerequisite: French 204, AP score of 5, or equivalent.

FRENCH306S - Reading Literature in French

Course Description

What is literature? Why read literature today? And how do we talk about what we read? This seminar offers an initiation to literature in French from the Enlightenment to the digital age. It introduces a wide range of critical and theoretical tools to study literature and its uses, and aims at developing writing and argumentation across a range of literary genres (theater, essay, novel, poetry...). This seminar explores how most urgent political and philosophical issues of the ages can be read through and unraveled within literary texts. Authors studied may include Montesquieu, Diderot, Balzac, Baudelaire, Flaubert, Sartre, Césaire, Michaux, Duras, Fanon, Perec, and Modiano.

FRENCH332S - Short Stories for Long Lives

Course Description

This course has 2 starting points: 1) Acquiring another language enables writers to express what often can't be said otherwise. 2) Fiction enables you to write anything true. Major writers are the guides, including Djébar, Marie de France, Hébert, Diop, Balzac, as well as up-and-coming writers. Their works crisscross many times world-wide and are organized to trace the phases defining human life. What – and whom do people desire? How do they work? Why are they caught in conflict? These key questions culminate in a debate on the Vivre-Ensemble – living together – in Algeria, Belgium, France, Lebanon, Québec. French 332 offers an initiation into cultural criticism in French.

FRENCH352A - From Enlightenment Culture to Popular Culture

Course Description

Course constructs a sociological history of French (and partially European) culture by routinely using the city of Paris as an example. Analyzes conflicts inherited by contemporary culture in highlighting major moments that have defined it since pre-revolutionary era. Focuses on theoretical issues raised by each period, and the manner in which sociologists and critical theorists addressed them--from opposition of nature and culture just as it plays out for the pre-romantics, to the criticism of mass-culture by post-modern theorists. Sessions will be chronological, and will introduce and cover principle problems of social sciences. Taught in French through the Duke in France Program.

FRENCH353A - History of Psychology in France and Europe

Course Description

This course aims to open students to the place psychology holds and how it is presented culturally and socially, as well as exposing them to French psychological practices. To do so, we will identify historical and conceptual landmarks concerning contemporary psychology in France and Europe. Students will focus on the birth and life of psychology, from its 18th-century beginnings to its current applications in France. Such movements as physiology, associationism, psychoanalysis, Gestalt, cognitivism, and social psychology will be scrutinized through readings, lectures, and co-curricular outings to those places in Paris where psychology is put into practice. Taught at Duke in France.

FRENCH366S - Versailles and the Arts

Course Description

Taught in French, this course examines the political, cultural, and artistic history of Versailles in the 17th and 18th centuries, emphasizing its role in the history of music. It analyzes the ways in which the Sun-King achieved the unification and centralization of the French nation through certain artistic politics which likewise set the scene for musical institutions. This seminar therefore seeks to investigate how these artists' creations articulated evolving ideas around the court, the monarchy, the State, and the private and public spheres, while exploring their resonances in present art and literature.

FRENCH367S - Soundscapes of Migration: Music and Migration in Paris from the Interwar Years to the Present

Course Description

This class studies migration through the prism of music, focusing on Paris as a node of networks of musical migration. It analyzes how the metropolis has been a site of musical encounters, as well as a recipient, catalyzer, and disseminator of migrating musical practices. It studies music as a transnational and diasporic cultural process. Although our musical journey will be structured chronologically, its frontiers will encompass the soundscapes of the capital's peripheries. The range of music considered will be varied: from the Eastern European classical repertoire and African American Jazz to contemporary Rap, through Algerian Raï and Arab-Andalusian popular music. Taught in French.

FRENCH371S - Haiti to New Orleans: 19th Century Literary Migrations

Course Description

Former slaves in the Haitian Revolution (1791-1804) defeated French colonialism and founded a free republic. Some Creole planters fled to Cuba with former slaves, but were expelled in 1809 and migrated to Louisiana. We will study 19th century enmeshed literatures, cultures, and languages of Haitian-descended and Haitian-influenced cultures in Louisiana, reading literature by Roquigny, Mercier, and Augustin, and studying Creole and Cajun identities, slave insurrections, native american relationships, plantation and urban cultures, 'placage' and libertinage, ritual cultures from voodoo to Jewish New Orleans, music, mardi gras, and healing traditions. Course taught in French.

FRENCH375S - Love, Sex, Madness in Caribbean Fiction and Film

Course Description

This course explores the themes of love, sex, and madness as the lenses through which Caribbean writers and filmmakers have challenged traditional ideas of citizenship, family, gender roles, and political power. What, for example, is the connection between a dictatorship in Haiti and women's sexual desire? How does the figure of 'the mad Creole woman' challenge masculinist constructions of national identity in the early years of independence in Africa? How might the love between a mother and child be read as an act of anti-colonial resistance? We will examine these questions through novels, short stories, and films. Recommended prerequisite: French 204 or equivalent.

FRENCH411 - Biography, Life Writing, Autofiction

Course Description

History and art of the life story, examining biography as it drives research and contemporary writing. From Montaigne to Rousseau, the biopic to the lives of troubadours, we will study modes, media and social functions: portrait, caricature, meditation, fragments, selfies. The subjects: famous or anonymous people; those who are not human, landscapes, the sea—even inanimate objects. The accounts of radical change or metamorphosis, personal epiphanies, self-conscious reflection. The aims of depicting lives as they unfold. Texts include Foucault, Augustine, Flora Tristan, Pascal, Ferraoun. Critical readings will be coupled with creative work culminating in a research project around your life.

FRENCH426S - France-Asia: Cultural Transfers and Translations in a Globalized Context

Course Description

This class explores the dynamic contemporary Franco-Asian dialogue with a specific focus on China, Japan, Vietnam, Laos and Cambodia. Seeking to go beyond the East-West divide, the seminar investigates the current stakes of this dialogue, given its growing complexity after 1945. It examines the postcolonial legacy of France's occupation of Indochina, and how East Asia has also often been viewed as an 'Other,' serving to crystallize French anxieties over political and cultural power. It uses an interdisciplinary perspective encompassing novels, cinema, dance, visual arts, and critical theory to trace a web of exchanges in a globalized context. Taught in French.

FRENCH427S - Banlieues and Peripheries in French Contemporary Literature and Cinema

Course Description

This seminar explores figurations of banlieues and peripheries in contemporary French literature and cinema, and how they are inherently intertwined with a deep renewal of realist aesthetics. We will study the recent tendency to approach margins as metonymic and conflicted geopolitical configurations, articulating issues of gender, class and race. We will examine a constellation of recent films and narratives that can be anticipatory and expressive of the French social discontent in all its complexity, from the banlieues riots to the yellow vest movement.

FRENCH428S - Reading Contemporary Literature in French for the 'Choix Goncourt' Prize

Course Description

Why read literature today? And how do we talk about what we read? This seminar offers a unique opportunity to participate in the Choix Goncourt Prize in the U.S, and learn how to be a literary critic. Students will engage in dialogue with contemporary authors, acquire theoretical and critical literary tools, and learn the best practices of being part of a selecting literary committee. It is intended for those who want to deepen their knowledge of literature and culture, sharpen their critical spirit, and improve their skills in reading and writing French. One student will be designated as delegate and travel to NYC to attend the Prize ceremony at the Albertine bookshop. Taught in French.

FRENCH430 - Music History and Politics in Contemporary Africa

Course Description

The objective of the course is to analyze the social, political and cultural dynamics of post-independence African states through the musical archive. The course will analyze the role that music has played in the construction of national identities in post-colonial African states, but also in social, political and cultural dynamics of contemporary Africa. From High-life in Ghana to Congolese rumba, Afrobeats in Nigeria, reggae, Hip Hop and Raï, it will show how music has accompanied societal and political evolutions of African nations. The course will think of music as a landscape and analyze the musical circulation, as a space for the constitution of African societal modernities. In English.

FRENCH431 - Anthropologie Economique

Course Description

Taught in French, this course is based on the achievements of anthropology to identify the foundations of economic practice as well as the theoretical problems it poses. Whether it is the market, credit or investment, economic institutions and practices are historical inventions. A better understanding of these requires analyzing the process by which the universe, which we call 'economy', was constituted. It is about reintegrating economic behavior into human behavior. An economy that positively affects living things and meets the needs of human communities must rethink the foundations of the theory of value and exchange.

FRENCH432S - Francophone African Literature

Course Description

This course provides an overview of contemporary French-speaking African literature. During the 1950s, it emerged as a major genre for expressing the identity and emancipation concerns of the African continent and configured a space of discourse. Since the 'era of the African novel' post independence, the genre has evolved both aesthetically and thematically. Recent decades have seen the emergence of a postcolonial literature of great vitality, and creativity. The worldwide recognition of African literary production, particularly in French, is well established. What does this postcolonial African literature have to say? How does it fit into the current renewal of imaginary worlds?

FRENCH204S-1 - Terre, Savoir, Être (Advanced Intermediate French Language & Culture)

Course Description

From the French concept of terroir to Tahitian fenua, this course will use Global French voices to explore how cultures conceive of land, knowledge, and being as integral to each other. We will explore how those concepts inform our identities and communities through a strong emphasis on experiential learning, including community engagement, and work with local artists, fromagers and farmers. Meanwhile, we will further develop communication skills in French, reviewing grammar and vocabulary and learning to express ourselves and understand others in increasingly complex and abstract ways. Pre-requisite: FR203, AP French 4, or equivalent. Not open to students who have already taken FR204.

FRENCH270T-3 - Voices in Global Health: French Tutorial

Course Description

Through practical and theoretical discussions around case studies, visual texts, and interviews in the target language, Voices in Global Health examines emerging health challenges at the local and global level. Through the experiences and knowledge shared from our guest speakers, we will explore the underlying health behaviors and cultural beliefs while producing culturally appropriate health interventions. Tutorials meet weekly for 75-minutes. Prerequisite: 4 semesters of language (French 204) or equivalent – heritage and native speakers are welcome to enroll. Satisfactory/Unsatisfactory. Community-engaged course.

GENOME128FS - Evolutionary Genomics: Who Are We, Where Have We Been, and Where Are We Going?

Course Description

We are now more than a decade into the genomics revolution that generated data allowing us to gaze into our past, present, and future in ways that were beyond imagining when Darwin's theory of Natural Selection was first introduced. The unification of genomic data, bioinformatics, and evolutionary theory has transformed our understanding of human history, our place within the Tree of Life, and the impact that our species is having on those with whom we share the planet. This course will use the primary literature to familiarize students with the multifaceted power of genomics, with a slant towards examining human history and disease from an evolutionary perspective. Open only to students in the Focus Program.

GENOME222FS - Genetics and Epigenetics: The Codes that Control Our Genomes

Course Description

Many inherited cellular and physiological traits in humans are not due to changes in DNA sequence, but instead are shaped by factors such as age, diet, or environment. This course will examine sequence-independent regulation of the human genome, non-genetic diseases, environmental factors that control the epigenome, and multi-generational inheritance of epigenetic information (how grandparental experiences shape descendants' genomes). Course readings will be drawn from the primary literature (historical and current) and will be anchored on human genetics, although model systems (yeast, *Drosophila*, plants) will also be discussed. Only open to students in the Focus Program. Department consent required. Prerequisite: AP Biology or equivalent.

GERMAN295 - Inventing the Environment: Ideas of Nature in Literature and History of Science

Course Description

Course will explore western conceptions of nature in the modern period. We will ask: How have differing views of nature represented new definitions of the human? How have perspectives on nature changed historically in tandem with other cultural developments? What does it mean to have ethical responsibilities towards natural entities? How are ideas of the environment formed, critiqued, and changed through imaginative and investigative practices such as those of science and literature? Views of the environment considered will include: resource, generative force, sacred space, ecological process, home, and apocalyptic wasteland. We will read diverse thinkers such as: Darwin, Blake, Thoreau, Humboldt, Goethe, Kafka, Theodor Storm, Haeckel, Lynn Margolis, and Octavia Butler.

GERMAN327SA - Economics of Environmental and Climate Policy

Course Description

This course focuses on the relationship between economics and the environment, aiming to equip students with the knowledge and skills necessary to understand, analyze, and address pressing environmental challenges. The course will highlight the relationship between economic activity and its environmental impact through a European and German lens. Since many environmental issues are often the result of or stand in conflict with economic interests, this course also reflects on the ethical implications of human behaviors and their relationship to environmental policy. Students enrolling in this course should have completed Economics 101, Environment 155 or Statistics 199L.

GERMAN330 - Portals: Art of Jumping Worlds

Course Description

A portal is a special kind of doorway—one that opens onto other worlds, times, or mental states. This course investigates the function of world-hopping in several different genres and media from ancient times until today, with a focus on its contemporary significance. Examples taken from fantasy, science fiction, mythology, the fairytale, magical realism, video games, film, television, and graphic novels will help us pose questions like: How does the portal operate as a plot device? What kinds of philosophical problems does it raise? How does it relate to the technological concept of the interface? Do portals exist? If so in what sense? All readings in English.

GERMAN332S - Creative Writing in German: The Writer's Craft

Course Description

In this course, students explore contemporary German poetry as both cultural object and creative endeavor while regularly writing and revising their own poems and translations. Readings include poems by living German poets and translators, as well as interviews with poets and translators, blog posts on major German literary websites, and essays. Students will receive feedback on their poetic and interpretive work from both peers and professors, and revision of writing is a key aspect of the course. This course is taught entirely in German, and the majority of texts are in German. Recommended prerequisite: German 204 or equivalent. Not open to native speakers of German.

GERMAN335S - Modern German Theater and Drama

Course Description

Introduction to some major works of theater and drama of German-speaking central Europe, especially as they attempt to address contemporary social issues. Emphasis primarily on 20th century theater and drama. Authors include Bertolt Brecht, Friedrich Dürrenmatt, Peter Weiss, Peter Handke, Elfriede Jelinek and others whose experiments with dramatic form have drawn international attention. Discussions will explore the relationships between texts and their various theatrical performances on the stage and screen, as well between dramatic form and social-historical context. Final project may include performance of scenes from different plays. Taught in German.

GERMAN345S - Nature in the German Tradition

Course Description

The concept of nature in all its complexity--as environment, agent, inspiration, and threat--runs through the history of German thought like a particularly slippery red thread. From the nature poetry and philosophy of the German Romantics, which accompanies the emergence of biology, earth science, and chemistry as academic disciplines, to the climate activism and apocalypse narratives of the 20th and 21st centuries, the question of what nature actually is, and of what it has to do with us humans, gets posed again and again to radically varying effect. The course will explore this tradition via stories, poems, films, and philosophical texts. Reading, writing, and discussion in German.

GERMAN360D - What Is Beauty?

Course Description

Exploration of Western theories of beauty from Plato to the present. What do we mean when we call something beautiful? Does beauty belong to an object or an observer's mind? Is art or nature the best example of beauty? The class also examines the intertwining of modern theories of beauty with theories of race; analyzes the gender and power dynamics of theories of beauty; and asks about the relationship of aesthetics to society, politics, and biology. Readings include authors such as Plato, Burke, G.E. Lessing, Kant, Schiller, Charles Darwin, George Eliot, Nietzsche, W.E.B. DuBois, Arthur Danto, Elaine Scarry, Alice Walker, and Semir Zeki. GERMAN378S - Svevo and World Literature

Course Description

Italo Svevo wrote some of the most important modern Italian novels, like 'Zenos Conscience,' and was promoted by James Joyce. This class examines Svevo in his various contexts, including Italian, Austrian, German, Jewish, Triestine, European, and Modernist, to understand the strengths and weaknesses of classifications according to language, religious or cultural background, nation, education, and literary movement. By reading Svevo in the company of authors, such as Pirandello, Proust, Woolf, Kafka, and Shakespeare, as well as thinkers like Freud and Darwin, students will explore Svevos work in detail, while also investigating ideas of influence, literary connections, and world literature.

GERMAN381S - Mapping Jewish Modernism

Course Description

Students research Jewish modernism through questions of geography and movement, pointing to the many places where modern Jewish art has been created and the experiences of migration, exile, diaspora, and resettlement that shaped this work. We discuss the varieties of ways that different art forms, including literature, theater, music, art, film, architecture, and dance, can be mapped. We analyze mapping in terms of the movements of people (artists, authors, and directors), of objects (paintings, literature, performances, and films), and within the works themselves. Work with the Rubenstein Library will lead to projects that contribute to an exhibit in Perkins Library and a digital site.

GERMAN425S - German Underworlds

Course Description

This course will investigate German theories about what lies beneath: is it hell or the subterranean foundations that keep our world from collapsing? A product of nature or culture? The origin of art or the death of all that is human? And should we go looking for it under mountains, or at the center of the modern city? We will take our examples from the German literature, film, and philosophy of the nineteenth and early twentieth centuries, and we will use them to pose questions about the role of unseen depths in the history of German thought.

GERMAN432S - Modern German-Jewish Culture: Vienna, Prague, Berlin

Course Description

Explores the outsized intellectual and cultural output of Jews in pre-WWII Europe. The birth of psychoanalysis and the fallout of Jewish assimilation in Vienna. The legendary Golem figure and the writings of Franz Kafka and his circle in Prague. Avant-garde Jewish artists, writers, and filmmakers in Weimar Berlin. Each unit examines specific historical contexts and broader artistic movements. Topics include secularization and conversion; hybrid identities; emigration to Palestine and the U.S.; antisemitism and rising fascism; and 'authentic' Jewishness in Eastern Europe. Taught entirely in German. Recommended prerequisite: a 300-level German course or equivalent.

GERMAN433S - Science, Technology, and Art

Course Description

This course introduces students to some of the key works of twentieth-century German literature and cinema with a focus on the developments in sciences and technology. How did authors and filmmakers respond to the challenges posed by modern sciences and technological developments? How did they capture the shocking experience of modernity in their works? To what extent did the new technological media alter the way they understood aesthetics? What is the relationship between modernist and avant-garde experimentations in literature, cinema and theater, and technology? Conducted in German.

GERMAN443S - Captured! Stories of Entrapment in the 20th and 21st Centuries

Course Description

Stories of self-seclusion and entrapment, from artist hermits to doomsday preppers. What are the social and psychological effects of enclosure, what creative potential does it hold, and why are we so drawn to these narratives? When do they lead to escape and liberation, and when do they end in scenes of explosive self-destruction? Stories by Franz Kafka, Ilse Aichinger, and Thomas Bernhard; films by Werner Herzog and Michael Haneke; theoretical texts by Schopenhauer and Freud; discussions of self-seclusion via social media in the contemporary world. Readings and discussions in German. Recommended prerequisite: German 320 or above, or equivalent.

GERMAN445S - The Uncanny German Canon from Goethe to Kafka

Course Description

Investigation of classic uncanny German literature from the late eighteenth to early twentieth centuries. Uncanny elements from ghosts and Doppelgänger to artificial life persisted across the literary movements of Romanticism, Realism, and Modernism. The course will explore this literature and also theories of the uncanny including Freud's psychoanalytic approach, Todorov's structuralist approach, and recent cultural-historical and post-colonial approaches. Authors may include: Goethe, Tieck, the Grimms, E.T.A. Hoffmann, Chamisso, Eichendorff, von Droste-Hülshoff, Storm, and Kafka. Prerequisite: German 306 or above or equivalent knowledge of German.

GERMAN450S - Ethics and Literature: The Modern German Tradition

Course Description

We shall read literary texts (short stories, novellas, plays) from the nineteenth and twentieth centuries with the goal of understanding how literature might provide—or render problematic—moral insight. How does literature represent and question moral psychology and judgment, action, and responsibility? Do literary structures inhabit our moral self-understanding, for instance: character, will and choice, and narrative coherence? Taught entirely in German. Recommended prerequisite: advanced proficiency (one course beyond 305/306).

GLHLTH140FS - On Suffering: How Science and Stories Shape Us

Course Description

By studying written and oral storytelling (including news articles, research reports, case histories, speeches, etc.), this course explores arguments for, and critiques of, appealing to stories in the face of suffering—personal and environmental—and starts articulating theological and ethical implications of 'being an engaged witness in the world.' We will listen to historical and contemporary voices that have shaped our views of the world, explore characteristics of pseudoscientific movements that make us squirm, and dig into the apparent and real differences between scientific, experiential, and theological reasoning. Open only to students in the Focus Program. Department consent required.

GLHLTH142 - History of Chinese Medicine

Course Description

This course introduces students to the history of medicine through the study of medical practices and beliefs in China. Paying close attention to socio-historical context, we will explore how those beliefs formed, how the practices have changed over time, and in particular how the introduction of Western medicine and then scientific biomedicine forced fundamental changes in Chinese medicine over the course of the twentieth century. This course also introduces students to the discipline of History, and students will work in close consultation with the professor to produce a unique research paper. History majors should take a Gateway Seminar first, but there are no official prerequisites.

GLHLTH143CNS - 'Singing the Same Song' : A Global Perspective on the Experience of Illness

Course Description

'When I go to see my diabetes doctor, I feel that he and I are singing the same song.' This comment from a South African man battling chronic illness underlines the wonderful potential of the patient-provider relationship. We will be using the doctor-patient relationship and the patient experience as a lens to understand the place of illness and empathy in human existence. We will explore concepts of culture and global health. How does culture affect all of us? How might members of marginalized groups in the US and citizens of low and middle income countries experience the processes of illness and healing. Along the way, we will all be learning about ourselves, how it feels to express and receive empathy, and how the simple act of being curious make us better people.

GLHLTH186FS - Health System Development, a Global Perspective: Identifying Core Elements of Equitable Healthcare

Course Description

Health systems worldwide all have the same goal: produce health in their population that is equitably distributed. Yet, when examining how different countries set up their health systems, different mechanisms are discovered to accomplish the same goal. Given this diversity of approaches, the answer to the question of 'What are the core elements of an equitable healthcare system AND how do you implement those elements?' can be elusive. This course is offered within the Focus Program as part of the Global Health: Problems and Paradigms cluster. There are no prerequisites and no previous background in health, global health, or health systems is required.

GLHLTH187FS - Effectively Addressing Modern Pandemics of Disease: What Did We Do Wrong to Get So Sick?

Course Description

This course will explore Western disease and its root causes. At the same time, students will investigate what modern medicine has done to address the issues, and will discuss the effectiveness and magnitude of that effort. For each case study, students will determine what might have gone wrong, how could it have been done differently, and what forces might be at play that have prevented effective action. The pharmaceutical paradigm that currently governs both modern medicine and biomedical research will be carefully examined. Students will be encouraged to envision and critically examine potential alternatives. Open only to students in the Focus Program.

GLHLTH189FS - 'To Boldly Go!' Global Health and the Ethics of Engagement

Course Description

For the 'Science and Religion in Public Life' Focus Cluster, this seminar helps students think ethically about assumptions and language in Global Health. The title comes from Gene Roddenberry's built world of Star Trek. We use his world to examine cross-cultural engagement. How has culture and power in the U.S. framed interactions with and control of people inside the U.S. and in other countries? This includes the framing of people carrying disease to women whose bodies represent a threat to social order. Students analyze historical documents and images from popular culture and write weekly close analyses. No exams. Writing intensive.

GLHLTH196FS - Patient and Research Participant Activism and Advocacy

Course Description

In the 1960s, patients appropriated the language and tactics of the civil rights movement to advance clinical and research agendas. Today patient activism is evolving, leading to new solutions, dilemmas, and organizational structures. This course will examine patient and research participant activism and the ways it challenges conventional notions of expertise, amateurism, 'human subjects protections,' and minimization of risk. Students will bring the tools of journalism, anthropology, humanities scholarship, public policy and community engagement/citizen science to bear on ethical and policy questions. Open only to students in the Science & the Public Focus Program cluster. Department consent required.

GLHLTH203 - History of Global Health

Course Description

The course begins with the development of ancient medicine in Europe & China, and continues into the rise of biomedicine (e.g. laboratory science & microbiology) in the 19th and 20th centuries. Particular diseases illustrate important themes, such as the role of warfare in medical developments, the creation of international policy to control disease, and how non-Western societies intersected biomedicine. We trace global circulations of people and commodities to show how international agencies, charities and governing bodies have spread both disease and the means to fight it. Medicine has always been a global undertaking, and its history prepares us to address emerging health crises.

Explore feminist projects and approaches that cross a variety of borders. Under what conditions is solidarity across difference and inequality possible? This seminar examines this and other questions using relevant theories, film, and scholarship. Topics include activism, human rights, development, capitalism, war/militarization, racism, embodiment, and health. Assigned readings and films largely focus on the Global South but situate the Global North within circuits and relationships. The professor guides each student in preparing an original research paper on a relevant topic of interest to the student.

GLHLTH210 - Global Health Ethics: Policy Choice as Value Conflict

Course Description

The primary foci of this course are: the ethics of engagement with marginalized/stigmatized populations; understanding the influence of power dynamics; and understanding the ways in which policies create structures that limit abilities. Students explore the roots of their personal value systems and those of others, in an effort to understand causes of conflict and ethical missteps in global health engagement. Involves reading texts and coming to class ready to engage in conversations and activities related to the learning objectives. Weekly 5-question quizzes help to ensure that students come to class prepared to engage with the material.

GLHLTH211 - Anthropology of Disability

Course Description

This course establishes ways to think about disability beyond medical definitions. It introduces the field of disability studies through a survey of canonical texts and core concepts of disability justice and critical studies of care. A foundation of disability studies and the course's guiding premise is that disability is not something inherently 'wrong' with individuals, but rather is shaped by society. Through ethnographies as well as films and memoirs, we will examine disability across global cultural and historical locations, and will address the traffic between disability and society across differences such as race, gender, and sexuality.

GLHLTH215 - Case Studies in Global Sexual and Reproductive Health

Course Description

Through the examination of weekly case studies, students will explore the complexity of working in the field of global sexual and reproductive health and the ways in which various health and social science disciplines can be integrated in the development of effective health programs. Session topics will include family planning, maternity care, gender-based violence, abortion, and HIV/AIDS. Using examples from the US and low-and middle-income countries, students will identify key focus areas in sexual and reproductive health, technical and programmatic challenges and successful interventions. Recommended prerequisite: Global Health 212.

GLHLTH235 - Drugs, Chemicals, and Health: Histories of Substances in Economies, Environments, and Bodies

Course Description

This course asks how we might think historically about synthetic chemicals, natural alternatives, and the benefits and hazards they pose to human health, society, and environments. Combining cultural, political, and economic history with interdisciplinary environmental history and science & technology studies, we will follow historical 'biographies' and 'genealogies' of drugs and chemicals through economies, environments, and bodies, from cellular to planetary scales, comparing and connecting different global settings (including North Carolina). Focal substances may include aluminum, antiretrovirals, DDT, gold, indigo, mercury, nicotine, quinine, and opioids.

GLHLTH238 - Medicine and Human Flourishing

Course Description

This course examines the nature, ends, and practice of medicine as it relates to the human condition. How can medicine foster human flourishing and well-being—individual and social—against the experience of injury, pain, and suffering? Beginning with ancient Greece and its Hippocratic corpus, students explore answers to this question within a variety of historical and contemporary contexts. Taught by an interdisciplinary team of scholars that includes medical professionals, the course highlights the importance and professional relevance of posing big questions about personal meaning and human values at stake in the practice of medicine.

GLHLTH240S - Asian American & Diaspora Psychology: Mental Health, Microaggressions, and the Model Minority Myth

Course Description

This course serves as an introductory exploration into the psychological experiences of Asian American and diaspora individuals, families, and communities. It offers a broad overview of the historical, sociopolitical, and cultural influences that shape the behavior and well-being of this vastly diverse population. Drawing upon psychological theories and empirical research as guiding frameworks, the course will consider the values and meanings shaped by culture, ethnicity, and race that affect cognition, emotion, development, self-concept, and relationships that ultimately impact individual and collective mental health and well-being.

GLHLTH248S - Ethical Dimensions of Environmental Policy

Course Description

Uses case studies from different arenas of environmental policy (e.g., climate and clean air, water and waste, forests, oceans, energy) to surface normative assumptions often implicit in policy design and implementation. Links ethics to ethos (beliefs, aspirations, and spirit of a community or culture) to suggest that policies are not only pragmatic guidelines for decision-making and action, but also fundamental declarations concerning the character of human flourishing and the shape of the natural world, which is why environmental policies are often so contentious. Seeks to help students understand this aspect of environmental policy and to negotiate these deep-seated ethical conflicts.

GLHLTH260 - Novel Coronavirus: Epidemics and Response in the Age of Global Interdependence

Course Description

The novel coronavirus outbreak has placed global health onto the front pages of newspapers worldwide. However, the daily news cycle is hardly the best way to digest issues that require a contextual understanding of epidemiology, virology, history, sociology, political science, and health humanities. This course will use the outbreak as a starting point for a multidisciplinary and interdisciplinary analysis that brings together diverse methodologies to gain a broader understanding of the crisis, its origins, and how to address it. Students will engage in intercultural discussions and develop skills in problem solving and information literacy through readings, weekly class activities, and a culminating group project. Leading experts from various fields will engage the class in live, interactive participatory sessions.

GLHLTH265S - Writing for Global Audiences – Theories and Applications of Comparative Rhetoric

Course Description

This course examines how writing practices and communication strategies are shaped by cultural differences, focusing on how writers construct, adapt, and negotiate voice and identity for global audiences. We will analyze rhetorical traditions through non-Eurocentric theories—spanning cultural, geographical, and non-human perspectives—via rigorous reading, case studies, and discussion. By examining real-world examples like protest writings, we will explore methodologies for effective global communication. We will refine rhetorical knowledge through collaborative learning, honing adaptive, ethical, and sophisticated writing practices that meet the expectations of diverse global audiences.

GLHLTH278S - Literatures and Films of Pandemic

Course Description

This course explores past pandemics as a way to think about how to best live through COVID-19 and prevent or minimize future pandemics. Through examining literature and film, we will analyze the psychosocial dimensions of pandemic. We will read a variety of texts including: histories, fiction (Bulgakov, Porter, Tolstoy, Colson Whitehead); short essays; and films (e.g., Contagion, Outbreak). How do science, medicine, and society interact in a time of pandemic? How do pandemics reveal social inequities, and how could we use this knowledge to decrease disparities? And why do people turn to the humanities and arts in times of pandemic?

Course Description

The humanities help us learn more about the global experiences of people living with illness and disability. Using a global health humanities approach, we study illness and disability through biography, poetry, blogs, and art created by patients, families, friends, doctors, and caregivers. We look beyond data to find meaning through documentaries, theories of representation, and illness narratives. We explore different illness experiences, such as HIV/AIDS and Ebola; different disabilities, such as physical and cognitive; different gender identities and ages; and different locations, such as South Africa, West Africa, Papua New Guinea, Brazil, Haiti, and rural and urban USA.

GLHLTH304 - Evolutionary Medicine and Global Health

Course Description

Covers evolutionary approaches to understand human health at a global scale. Integration of evolutionary thinking and medical science provides new insights to a wide array of medical issues including obesity, cancer, allergies, and mental illness. Evolutionary perspectives reveal why some pathogens are more harmful than others, shed light on the origins and spread of infectious diseases in humans, and help in controlling antibiotic resistance. Evolutionary approaches provide insights as to why we age and provide solutions to alleviate human health problems that often differ from modern medical practice. Course will place these perspectives in the context of global health challenges.

GLHLTH309DA - Oceans in Human and Environmental Health

Course Description

Focus on the concept of 'One Health' that the health of the environment and the people who live in it are linked. The basis (from a biological perspective) of threats facing the marine environment and interactions between environmental and human health and their role in global health disparities. For example, in discussing fisheries and aquaculture, the course will cover environmental impacts of these extractive industries and their importance in human and societal well-being. This course will embrace immersive field experiences in North Carolina that will contextualize classroom learning and develop connections with practitioners and residents. Taught in Beaufort at Duke Marine Lab.

GLHLTH312 - War and Public Health in Africa

Course Description

An inquiry into the nature of contemporary war in sub-Saharan Africa and its human cost. Uses public health as a parameter to assess the impact of organized collective violence on people's lives. Link between war and public health established and measured with respect to civilian deaths, gender based violence, physical and psychological trauma, mental disorders, malnutrition and famine, and the spread of epidemic diseases, inter alia HIV/AIDS. Special attention is paid to rape as 'a weapon of war', to the trafficking of human beings in war zones, the child soldier phenomenon, and to death counts as a vector of humanitarian or political advocacy.

GLHLTH313S - Race and Medicine

Course Description

This course looks critically at the role of race in modern medicine from historical and present-day perspectives. Race is central to any critical analysis of medicine--from the origins of gynecology and enslaved women, to tropical medicine and American empire, to contraceptive trials in Puerto Rico, to anti-Asian hate crimes in the advent of COVID-19. Through focused case studies, we will explore the racialized subject as intersecting with other categories of difference in medicine, such as sex, gender and sexuality. In parallel, we will ask how medicine has been used as a system of power and knowledge to create racial categories themselves.

GLHLTH315D - Primate Disease Ecology and Global Health

Course Description

Covers concepts of disease ecology, with specific application to primates, human evolution, and global health. Explores the epidemiology and evolution of infectious diseases through the primary literature, focusing on infectious diseases of wild primates, humans, and other mammals. Students learn about the diversity of infectious diseases found in humans, and the basics of epidemiology, disease evolution and emergence, and primate behavioral ecology. Students also gain experience in thinking critically about scientific research, identifying interesting research questions, and communicating science to others. Prerequisite: Evolutionary Anthropology 101/101D or introductory-level biology.

Course Description

Planetary health focuses on human health impacts of anthropogenic disruptions of Earth's natural systems. Examines interplay of human activity, environmental changes, human health impacts, and policy interventions. Topics include climate change, loss of biodiversity, urbanization, global pollution, and changing food systems. Uses a social justice perspective to understand which communities and populations are most vulnerable to disruptions of natural systems. Examines evidence on effective policy responses. Explores real world case studies and solutions.

GLHLTH331S - Documenting US Women's Health Post-Roe v. Wade

Course Description

The overturning of Roe v. Wade in June 2022 led to the deaths of two women in South Carolina. One woman died from sepsis following self-instrumentation, and the second died after giving birth to a healthy baby. She began to hemorrhage; hospital administrators were afraid that the 'D&C' she needed to survive was too close to the abortion procedure. A physician team at Duke University Hospitals, led by Dr. Beverly Clark, began to see similar cases in North Carolina. The aim of this course is to document—in real time—the political and ethical dimensions of the situation that healthcare providers now find themselves in as they attempt to provide women the nationwide medical 'standard of care.'

GLHLTH335 - Economics of Global Health

Course Description

Examines reciprocal relationships between income, poverty and health across countries with focus on identifying effect of health on development. Addresses structural problems in delivery and quality of healthcare that arise from cultural as well as economic causes. Attention given to challenges of healthcare financing, and tension between high-tech care and basic care in developing countries. Students examine empirical evidence from interventions affecting health including infant mortality reduction programs. Focus on issues of poverty alleviation and the promise of foreign aid. Prerequisites: (Economics 201 or Public Policy 303D) and (Economics 204D or 208D or Public Policy 604), or instructor consent.

GLHLTH350A - Mobility, Health and Healthcare Systems

Course Description

This Duke in Madrid course reflects on the relation among health as a collective process, with healthcare systems as one element of a whole ecology of care, where global and urban structures determine both people's health and the organization of healthcare systems. Drawing on contemporary situations (pre-covid, covid, and post-covid) and diverse contexts (primarily European, but also North American and Latin American), we will explore the social components of health and how inequality (class, race, gender) affects the health of individuals and groups of population by exploring the role of the state, the market, and other actors (humanitarian, activist actors) in health provision.

GLHLTH353 - Life and Death: Global Perspectives

Course Description

Anthropological investigation of customs, practices, and beliefs that get activated when people (and other living beings) die. What constitutes life as in when does it start, what determines well-being, how is it measured; and what constitutes death as in a good versus bad death, by what medical definition, and according to what rituals and beliefs. Comparative inquiry into such questions as why brain-death is not accepted in some cultures and why people in some places prefer to die rather than live after an amputation. Topics will include organ transplants, gang warfare, cancer, and warzones from China and Botswana to Mexico and the United States.

GLHLTH362 - Understanding the Causes and Spread of Human Disease: Global Health Epidemiology

Course Description

How do we identify the causes and spread of diseases, such as Covid, Zika or Ebola? How do we estimate the effects of social, behavioral, environmental and biological factors, on the risk of disease? In this highly participatory, team-based course, students will learn how to answer these questions using concepts and methods from the field of epidemiology. Each week we will tackle a distinct global health problem by reading relevant popular press and scientific articles, with supplemental reading in our textbook. We will then complete team-based exercises to study these global health issues, including how to conduct an outbreak investigation, how to perform disease surveillance, and how to design studies to identify disease risk factors.

GLHLTH387 - Reimagining the World Together: Why Friendship Matters for Our Future**Course Description**

Explores friendship and why it matters in the frenzied world of 'likes' and 'swipes.' The average Facebook user has 155 friends. Instagram added a 'Close Friends' feature to distinguish friends from followers. Social media has weakened our sense of friendship. Still, Facebook users say that, of those 155 friends, they would trust only four in a crisis. Pursues the importance of friendship, not only as a place of private refuge but as a relationship of trust that facilitates insight and innovation and that has public purchase. Classes center on conversations between pairs of friends who bring their friendship, their work, and their imaginations to bear on the shape of the world in the future.

GSF101S - Gateway Seminar: Gender and Everyday Life**Course Description**

What is gender? How does it impact your everyday life? Designed to introduce students to the study of gender, sexuality, and feminism, this course will explore these questions by focusing on settings in which gender shapes how we live, work, consume, see ourselves, forge identities, relate to others, navigate institutions, and make ethical decisions. Students' reflections on their own experiences and understanding of gender will be a consistent theme. How does gender define the social spaces we move through and inhabit? How does gender structure the various social institutions that shape our lives? In every part of the course, gender will be connected to race, sexuality, class, and nation.

GSF181CNS - Sex, Bodies, and Power

Course Description

In our world, bodies and sexual acts have become linked to political power in terms of pleasure, reproduction, identity, and even basic bodily functions such as urination and defecation. How has something so basic as one's body become so closely associated with power? Sex, Bodies, and Power engages in an interdisciplinary examination of written and visual texts to examine the way bodies have been linked to sex and power. How do we understand our own bodies? How do we develop sexual fantasies, and how are those fantasies regulated by the state and other actors and institutions? Do bodies and sex become regulated differently depending on race, ethnicity, nationality, and gender? How does this change in different times and places? How is all of this altered by global pandemics, anti-racist movements, reproductive justice, and queer embodiment? What does it mean to engage in a historical analysis of these questions?

GSF191FS - Intersections of the Sexual Brain**Course Description**

Understanding how the human brain and environment interconnect evolved dramatically with recent advances in neuroscience research methods. Students analyze such interconnections and the impact on societal theories of human sexuality. Students assess influential factors such as ethnicity/race, culture, and religion, all diversely represented in contemporary America. Students read and discuss scientific and popular articles with historical context and explore the consequences of scientific observations on the personal, societal and political levels. Students develop written and oral communication skills and work collaboratively with fellow peers. Open only to Focus Program students.

GSF195 - Critical Approaches to Global Issues**Course Description**

Introduction to critical transnational studies through several disciplinary approaches. Examines capitalism and neo-liberal globalization and their relationships to culture, politics, economics, and other social forms and outcomes; considers transnationalism 'from below'; addresses linear and Western-centric thinking about progress and modernity; focuses a historical lens on political discourses, institutions, and projects to understand them contextually; demonstrates how cultures and identities are dynamically constituted in interaction with historical, material, political, and situational factors; considers how different inequalities and contestations inflect most social formations.

GSF201 - Race, Film, and Religion

Course Description

In this course, we will examine how cinema both constructs and reproduces anti-black racism and how cinema works to liberate blackness from the strictures of racial domination. We will watch films from the past three decades that provide an opportunity to interrogate the relationship between race, gender, and sexuality. These films will also enable us to think about how cinema introduces unconventional notions of the sacred, a process that involves affect, desire, and imagination. Films that we watch may include: Moonlight, Medicine for Melancholy, Black Panther, Daughters of the Dust, Get Out, US, Pariah, and Selma.

GSF203 - Introduction to Asian American and Diaspora Studies

Course Description

What does it mean to be Asian American? Asian American Studies is an interdisciplinary field that draws on social sciences, humanities, and the arts to explore the historical and contemporary experiences of Asian Americans in the western hemisphere. This course provides students with an introduction to this dynamic and growing field of study, taking race, gender, immigration, diaspora, class, labor, and sexuality as primary subjects of the field. The course also historicizes Asian American racialization to better understand the structural forces that have shaped Asian American lives and the ways that writers, scholars, and activists have responded to and resisted these forces.

GSF233S - Documenting US Women's Health Post-Roe v. Wade

Course Description

The overturning of Roe v. Wade in June 2022 led to the deaths of two women in South Carolina. One woman died from sepsis following self-instrumentation, and the second died after giving birth to a healthy baby. She began to hemorrhage; hospital administrators were afraid that the 'D&C' she needed to survive was too close to the abortion procedure. A physician team at Duke University Hospitals, led by Dr. Beverly Clark, began to see similar cases in North Carolina. The aim of this course is to document—in real time—the political and ethical dimensions of the situation that healthcare providers now find themselves in as they attempt to provide women the nationwide medical 'standard of care.'

GSF236S - Selena: Music, Media, and the Mexican American Experience

Course Description

How did singer Selena Quintanilla impact the world and why does she remain as such an important cultural fixture for Mexican-American communities? This class explores the life, music, and legacy of Selena Quintanilla. We will discuss how Selena used music to navigate a complex Mexican-American identity. Focusing on intersectional feminism, sexuality, iconicity, and fandom, we will learn about Selena's music throughout the years and consider how these themes are interpreted and complicated across borders. Course materials engage readings from pop music studies, gender, sexuality, and feminist studies, Latinx studies and include a range of films, audio recordings, and podcasts.

GSF239 - Women, Gender, and Sexuality in U.S. History

Course Description

Major questions relating to women and women's place in society over the course of U.S. history, broadly defined, from the colonial period to the present: How did different groups of women see themselves as women? How did views of women's sexuality change? How did men's and women's relationships and roles change? How did women understand their connections to the larger society? How did race, ethnicity, and class shape all those issues? Course uses a variety of materials, including novels, movies, images, and music to explore the ethical contours of women's lives in the past, following change over time to better understand women's position today.

GSF241S - Bodies at Work

Course Description

This course traces the dynamic relationship between bodies and economies over the course of American history. If disability has been defined as the inability to work, then an exploration of disability necessitates an exploration of capitalism. Moving between disability studies and labor history, students will develop the conceptual tools necessary to understand capitalism through the lens of disability, while also generating new ways to think about disability via critical histories of capitalism. We will also look at how disabled people have pushed back, envisioning new ways of valuing bodies beyond productivity.

GSF245S - Women in Visual Arts, 1400-1800: Theory and History

Course Description

Through lectures, discussion and individual projects, this course considers the roles women have played in the Early Modern art world as makers, buyers, patrons, donors, critics, and art collectors. It also takes up issues of gender, of race, of masculinity as well as femininity. A central theme of this class is how debates about the so-called Woman Question, which was essentially an ongoing quarrel about the nature and social role of women, shaped the representations and experiences of women of different classes and conditions. Our focus will be on visual representations, as well as period writing of and by women.

GSF250S - Queer Theater, Straight Plays

Course Description

If, as scholar D.A. Miller argues, musicals are 'a somehow gay genre, the only one that mass culture ever produced,' where does that leave queer plays? This course surveys US queer theater from the early twentieth century to today. We will study how theater, identity, and LGBTQ+ political movements intersect. We will read plays both well-known and obscure to see how queer writers skirted censors through coding and camp before Stonewall, how Gay Liberation made coming out possible in the 1970s, and how HIV/AIDS impacted theater. Queer theater's expansiveness since the 1990s in the age of equality continues to challenge, subvert, and reinforce norms and push boundaries.

GSF251FS - Bio-Lit: The Science of Renaissance Sex and Gender

Course Description

What is a woman? What is a man? Did Renaissance minds consider other options? Could women be intellectuals? Were male bodies necessary for reproduction? What taboos about sex and power were almost too scandalous even for the elites? Much as it does today, talk of sex and gender sparked hot debate throughout Renaissance Europe. Between the fourteenth and seventeenth centuries, bodies were sites of fascination and dread. This course studies 'Bio-Lit' (literature about life and the body), drawing on examples of epic and lyric poetry, medical treatises, recipe books, experiment logs, cosmetic how-to guides, paintings, and early opera. Offered as part of the FOCUS program.

GSF256S - Climate, Culture and Identity

Course Description

This course focuses on some of the transformations that climate change is bringing - not just to human livelihoods and to the non-human world, but to the very definition of the human. In an era defined by the overwhelming influence of homo sapiens on the planet, historic distinctions between nature and culture are starting to blur and fall apart. What role can feminist and queer theory play in helping us to understand these changes to human identity? What can gender studies contribute to techno-scientific understandings of a global warming? We'll take on these and many other questions through readings in literature and theory, and experiential learning with the Duke Campus Farm.

GSF258S - Women and Power in the Renaissance

Course Description

Explores the intellectual, social, and political history of women in Renaissance Europe. Despite the overwhelmingly patriarchal nature of early modern society, many women wrote treatises, dialogues, and poetry in which they argued for a broader role for women. Students will examine these primary texts (some by famous figures, others by much less well-known writers) within the context of a burgeoning social history that has provided a more nuanced view of gender relations and power in this period.

GSF259S - Brazil, Race, Sex, and the Body

Course Description

The approach of the course will be interdisciplinary, drawing upon works from anthropology, literature, history, and film. Topics will include colonialism and enslavement, abolition, nationalism, social activism, and popular culture. We will also consider how Brazilian social relations differ from or conform to other racialized patterns in other nation-states in the Americas. Particular attention will be placed on the impact of the interrelationship between race, gender, class, and nation on the lives of Black Brazilians.

GSF261 - From History to Fantasy: Medieval Religions in Film & Fiction

Course Description

Explores the intersection of modern popular culture and medieval religious culture. Deep dive into how modern creators of mass entertainment use common notions of medieval faith, power, race, sexualities and violence to capture and hold our interest, teach us lessons about ourselves, and sell products. How do our ideas of faith, sexuality, race and power inspire or constrain the fiction we create about the past? What impact does this have on consumers? Monks, nuns, knights, crusades, secret societies, suffragists, alt-right, plague. Modern novels, commentaries, history, medieval texts, neurobiology, TV, films, ads, games, memes, clubs. Read, discuss, write, research.

GSF263S - Representing Breast Cancer: Feminist Literature, Art, and Film

Course Description

Analyzes representations of breast cancer in feminist literature, art, and film. Drawing on health feminism, feminist medical ethics, and disability studies, explores what those representations tell us about the intersections among gender, race, class, sexuality, and ability in both the Global North and South. Sets artistic representations of breast cancer against the hyper-sexualization of breasts in capitalism's visual cultures and the spectacles of breast cancer activism. Shows how literature, art, and film can reveal health care's material conditions as well as breast cancer's psychic complexities.

GSF265S - Digital Feminism

Course Description

The aim of this course is to critically analyze digital culture from a feminist and gender studies perspective. We will address topics related to digital innovation and its history, unpacking and questioning them through the insights offered by genders studies analytical tools. Subjects such as the rise of the Silicon Valley, gaming culture, social media, algorithms, Artificial Intelligence, extraction of data applied to biotechnology, macroeconomic development of IT platforms and the impact of technology on ecology will be discussed starting from a current event or debate, to which we will give a historical, ethical, sociological, theoretical, literary or cinematographic perspective.

GSF267S - Pícaras and Outlaws: Global South Feminisms

Course Description

The term 'pícaras' or 'rogue outlaw' was designed to regulate and criminalize the bodies of women transgressing boundaries. This course uses the term to delve into the heroic histories of some of the the most prominent women voices across the Global South and the various ways they challenge normalized and heteronormative structures of society. From a Cuban slave revolt leader, or the 17th century colonial 'Memoire of Basque Transvestite in the New World,' to the seminal Borderlands=La Frontera, prominent African Feminist theorists, and pop culture film Real Women Have Curves, we will read and engage in some of the most daring accounts of women power throughout the ages.

GSF269SA - Gender and Immigration between Europe and the Middle East**Course Description**

Investigates the gendered experience of immigration and its implications for changing the culture both at home and in the hosting countries. Between the traditions of the country of origin and acculturation to the new home, women and LGBTQ communities are the most vulnerable facing gender-based discrimination and violence. Nonetheless, immigration also offers the opportunity to cross the borders of binaries, such as femininity and masculinity, which can be empowering and liberating. This seminar is offered as part of the Middle East in Europe: Berlin/Istanbul study abroad program.

GSF273S - Gender and Media

Course Description

The aim of this course is to critically analyze media culture and communication landscapes from a feminist and gender studies perspective. We will address a wide range of media innovations and their histories, unpacking and critically questioning them through the insights offered by feminist, queer, and intersectional analytical tools. To each, we will examine historical, ethical, sociological, theoretical, literary or film perspectives. What roles do media spaces play in our everyday lives and how do our politics and self-understandings inform and reflect burgeoning platforms? This course will consider these questions in terms of US media cultures and its interconnected global frameworks.

GSF278 - Sex/Gender - Nature/Nurture: Intersections of Biology and Society

Course Description

Debates about sexuality, sex, and gender hinge on radically different ideas about relative effects of biological forces vs. social forces, or nature vs. nurture. Course changes terms of arguments about sexuality and gender and nature/nurture. Explores how nature/nurture emerged as scientific and popular debate. Evaluates new developments in science and cultural fields that are now reconsidering how biology and environments interact. Showcases debates about how sex and sexuality are formed through interplay of genetic information, hormones, material bodies, and social environments.

GSF285S - Love, Sex, Madness in Caribbean Fiction and Film

Course Description

This course explores the themes of love, sex, and madness as the lenses through which Caribbean writers and filmmakers have challenged traditional ideas of citizenship, family, gender roles, and political power. What, for example, is the connection between a dictatorship in Haiti and women's sexual desire? How does the figure of 'the mad Creole woman' challenge masculinist constructions of national identity in the early years of independence in Africa? How might the love between a mother and child be read as an act of anti-colonial resistance? We will examine these questions through novels, short stories, and films. Recommended prerequisite: French 204 or equivalent.

GSF295 - Hip Hop, Futurism, and the End of the World**Course Description**

In this course, we will explore the intersections between hip hop, black futurity, science-fiction, and visions of the end of the world. We will focus on hip hop artists who draw themes from fantasy and speculative fiction to both re-make sense of the present and to imagine a radically different future. We will explore how these artists invent personas, identify with the alien, invoke space ships from other planets, and blur the line between human and non-human. While the course underscores themes of futurity and possibility, we will also examine how these themes respond to enduring conditions of racial, gender, and sexual oppression. Artists we will focus on include: Outkast, Janelle Monae, Erykah Badu, and MF Doom.

GSF298S - Global Humanitarianism

Course Description

This course explores humanitarianism as both a global phenomenon and a western model for engaging with the world. It examines the cultural and political conditions that make it possible for some people to be saviors and others to require saving. It focuses on the ways humanitarian interventions are increasingly as much about alleviating poverty and supporting political change, as about responding to crises caused by health epidemics, conflict or war, and environmental disasters. We will pay close attention to the impacts of humanitarian interventions good and bad, while critically exploring how local agendas and conditions shape and respond to these programs.

GSF313S - Race and Medicine

Course Description

This course looks critically at the role of race in modern medicine from historical and present-day perspectives. Race is central to any critical analysis of medicine--from the origins of gynecology and enslaved women, to tropical medicine and American empire, to contraceptive trials in Puerto Rico, to anti-Asian hate crimes in the advent of COVID-19. Through focused case studies, we will explore the racialized subject as intersecting with other categories of difference in medicine, such as sex, gender and sexuality. In parallel, we will ask how medicine has been used as a system of power and knowledge to create racial categories themselves.

GSF325S - Understanding Mediation

Course Description

Examines experience as always mediated. How does text mediate expression, or language mediate subjectivity? How do images mediate power, or sounds mediate resistance? How does computation mediate agency, or networks mediate thought? But also, how do nations mediate globalization, or oil mediate energy? And how do bodies mediate liveness, or the environment mediate history? Moves from particular media forms and examples (language, literature, the fine and performing arts, audiovisual media, computational media) to focus on key theoretical concepts and debates of critical theory from twentieth and twenty-first centuries. Crosses national boundaries to understand mediation from global perspective.

GSF335S - Decolonization: Histories, Meanings, Struggles

Course Description

This course explores decolonization as an historical event, a category of theoretical analysis, and a series of contemporary social movements. Course material will introduce students to the history of decolonization as both idea and event, putting global anti-colonial movements of the twentieth century into conversation with contemporary struggles for the decolonization of occupied land, institutions, and epistemologies. This interdisciplinary course draws on work in history, geography, anthropology, women's studies, and postcolonial and decolonial Studies. Students will also read and research manifestos, memoirs, archival documents, documentary films, oral histories, and museum exhibits.

GSF340S - African Cities, African Urbanization

Course Description

If the predominant mode of development in African cities is informal and unplanned giving rise to new modes of life, livelihood, and leisure beyond the organizing infrastructures of formal architecture and design in reality, the new African urbanism seems to give rise to two distinct conditions of life--the one crisis and the other ingenuity. Concerned to think through the gendered forms of labor arising from rapid urban growth taking place without conventional facilities, infrastructures and technologies, 'African Cities, African Urbanization' turns to the ethnography of informal settlement; to women's relationships to informality; to the ways in which productive and reproductive labor play their part in urban formation and deformation in African cities.

GSF350 - Brains, Everywhere

Course Description

Over the last three decades we have witnessed the speedy rise of the 'neurosciences,' an historical event characterized by some 'neuro-cultures' and 'neuro-subjects.' In this course we will track this history and ask what change in meaning might 'neuro' effect in the disciplines that were previously 'neuro'-free. If there is a neuro-turn in the humanities and social sciences, what is it that's 'turning'? We will consider the centrality of brain research in these discussions to ask questions about the meaning of 'personhood/subjectivity,' 'human/post human,' 'mind/body,' 'self/ego,' and 'emotion/affect.'

GSF355S - Black Feminism and Fashion

Course Description

Black feminist perspectives on clothing and fashion. Explores traditions in which Black artists and writers make clothing a primary theme. Presenting photographic, painted, and literary portrayals by and of Black people across the diaspora, and bringing together the study of visual culture, material culture, and literary studies, reveals fashion and clothing as aesthetic practices of everyday life that defy the objectifying effects of racism and sexism. Engages with scholarship that explores slavery's and colonialism's impact on gender and sexuality and examines how artists and writers work within and against those impacts to document the self-fashioning in Black cultural life.

GSF387 - Moral Panics, Spectacle, and Everyday Life: Social Anxieties and Minorities

Course Description

Moral panic refers to the way a social order becomes hyper aware of activities of groups, objects, or circumstances posing a menace to accepted values. Course explores how everyday life is managed, intensified, and altered by moral panics' spectacle. Sexual deviance, drugs, popular culture, disease, witch hunts, gender fears, etc., are not only creations of pre-existing fears, they make various kinds of sense in specific moments. They are how people recognize themselves and new challenges to that self. From those challenges they try to police others; they are public consensus-building events and the means by which we identity our fears and desires.

GSF402S - James Baldwin and Toni Morrison

Course Description

This course will examine the novels and essays of James Baldwin and Toni Morrison, focusing on a range of topics: blackness, gender, sexuality, the relationship between race, religion, and nation, and the relationship between anguish and hope. While considering the differences between these authors, we will explore how Baldwin and Morrison converge on a set of ethical and existential themes and concerns. In particular, the course will focus on a shared 'ethics of haunting,' a sense that a better future relies on our capacity to remember, mourn, and be unsettled by forms of racial and gendered violence that mark the past and present.

GSF460S - Weil, Beauvoir, Murdoch: Three Women Philosophers in Mid-Twentieth Century Europe

Course Description

Simone Weil (1909-44), Simone de Beauvoir (1908-86), and Iris Murdoch (1919-99) are towering figures in the history of European philosophy. Yet they have all, in different ways, become somewhat marginal to the philosophical mainstream. All three wrote on ethics. Weil wrote on labor, society, affliction, and grace. Beauvoir wrote novels, memoirs, and *The Second Sex*, a groundbreaking feminist analysis of women's situation. Inspired by Weil, Murdoch wrote about attention and the good and became one of the UKs leading novelists. The course will introduce students to their writing across genres, and situate their work about their respective national traditions.

HISTORY101 - Introduction to Global History

Course Description

Explore problems in the history of globalization. Learn how contemporary problems and opportunities of globalization reflect long-term processes marked by patterns, interruptions, and continuities even within radical change. Asia, Europe and Africa have been interconnected since the Bronze Age. Trade, microbes, political power and religions formed then, as today, the principal matrix in which interdependence and conflict developed. In what ways is the environmental and climate crisis today different from that of the Little Ice Age? Can technology continue to allow humans to conquer nature so we that may keep expanding resources on an exhausted earth? What alternatives exist globally?

HISTORY106 - Science and the Modern World: Introduction to the History of Science

Course Description

This course surveys the history of science from the sixteenth century through the present day. It addresses science not just as a body of knowledge and methods but as a cultural activity that has shaped and been shaped by modern global history. Topics will range across physical sciences, life sciences, earth and environmental sciences, and social sciences. This course takes a global perspective, with emphasis on parallels, differences, and interconnections among ways of knowing nature in different places and times, as well as the role of specific materials, environments, technologies, and practical problems in the development of modern science.

HISTORY111FS - History of Global Health

Course Description

Medicine has long been a global undertaking, and knowing its history prepares us to address emerging health crises. This Focus course begins with the coronavirus pandemic and the first major infectious disease epidemics that emerged from increased trade and warfare: plague and smallpox. Critical analysis of colonial medicine reveals reasons for ongoing inequalities in global health today. We analyze smallpox, cholera and schistosomiasis eradication programs and consider the importance of basic hygiene and safe childbirth. The core text examines the role of stigma in global health today. Your work will include an individual research paper on a topic you choose.

HISTORY112 - Sexual Pleasure in the Modern World

Course Description

Interdisciplinary study of ways societies around the globe have understood sexual pleasure. Investigates ethics of the manners in which people have explored sexual pleasure and ways that such pleasure relates to creation of the modern person. Emphasizes effects of colonialism and development of race in relation to sexuality. Includes an extensive discussion of pornography, sexual fantasy, orgasm and virtual sex, asking how sexual pleasure relates to histories of danger and violence.

HISTORY113 - Introduction to the History of Medicine

Course Description

Covers the history of western medicine from Ancient Greece to the 21st century. Students will engage with primary and secondary sources that expose the varied understandings of health, disease causation, and treatment that have prevailed over time. As an introductory course with no prerequisites, this class welcomes all students with an interest in history, health, and disease, while assuming no prior medical or scientific knowledge. It illuminates the trajectory of western medicine from the humors of Hippocrates to the genetic medicine of today.

HISTORY120 - History of American Democracy

Course Description

This course explores the sweep of US political history. In the process, it encourages participants to think critically about what 'democracy' is, how it works, and what its vulnerabilities are. We look at the history of electoral politics in the United States, exploring the ways in which politicians have both empowered and disempowered voters. We examine grass-roots efforts to gain greater power in shaping common life—and attempts to suppress those efforts. Throughout, we explore how people's concepts of 'democracy' have clashed and changed, and we examine how past conflicts have given rise to the political crises and opportunities of our own time.

HISTORY130D - American Dreams and American Realities

Course Description

Examines the role of such myths as 'rags to riches,' 'beacon to the world,' 'the frontier' and 'foreign devil' in defining the American character and determining hopes, fears, dreams, and actions throughout American History. Attention given to the surface consistency of these myths as accepted by each immigrant group versus the shifting content of the myths as they change to reflect the hopes and values of each of these groups.

HISTORY131S - Gateway Seminar: Extraction: Humans and the Underground Earth

Course Description

Human societies depend on harnessing the resources of the underground earth. Subterranean aquifers shaped the world's food system. Gold deposits made currency and incited global wars. And fossil fuels now represent frontiers of planetary catastrophe, as buried carbon threatens life on earth. This course explores the often forgotten but indispensable role of the underground in making the modern world. Using the lens of 'extraction' – the taking of resources from beneath the earth – and drawing from historians, artists, environmentalists, geologists, journalists, and science fiction, we will develop global perspectives on the meaning and transformation of the underground from 1800 to today.

HISTORY132S - An Archaeology of Inequality: Ancient Rome in Ten Objects

Course Description

Introduction to the study of social structure in Ancient Rome with an emphasis on 'invisible Romans': groups that receive less attention in textual sources (women, slaves, children, outcasts, differently abled people, foreigners). Ten objects are used as prompts for storytelling and for an archaeological investigation of the material traces of non-elite Romans. We discuss the concept of 'object biography' developed by anthropologist Igor Kopytoff and visit the Nasher Museum of Art for hands-on activities with Roman artifacts.

HISTORY135 - Silk Roads and China, Ancient and Medieval Transformations

Course Description

The Silk Roads are the oldest and longest routes of cultural communication and economic exchange connecting Asia, Europe and Africa. In use since the days of Alexander the Great, the Roads and its rail networks now extend from China to England, connecting 70 countries and forming a vital system. This course introduces the ancient to early modern histories, cultures, and religions of the Silk Roads anchored in four themes: Alexander's empire; life in medieval cities of Chang'an, Baghdad and Constantinople; Silk Roads religions and the interactions of Buddhism, Christianity, Judaism and Islam; and the Mongol empire visited through the travels of Marco Polo.

HISTORY137FS - Minor Utopias: Everyday Approaches to a Better World

Course Description

This FOCUS seminar begins with a consideration of small-scale endeavors by ordinary people to create communities that reflect their values. After spending first half of the semester learning about past efforts to create minor utopias, students will research examples of minor utopias that interest them. Finally, the seminar will work together to develop shared framework for a minor utopia, addressing questions such as: how resources will be developed and shared, how care will be provided to those who need it, how the community's values will be communicated and enforced, and how the community will address violations of those norms.

HISTORY138 - From Stalin to Putin: The Art of Dictatorship

Course Description

When the Soviet Union ceased to exist, many believed that Russia's history of autocratic rule might finally end. Today Russia under Putin appears to be retreating from democracy. Putin's rule is routinely compared to a dictatorship. The Soviet most notorious dictator, Stalin is being rehabilitated by the Russian establishment. This course traces the history of modern Russian politics from Stalin to Putin and examines how such completely ordinary individuals managed to amass the kind of power that is best described dictatorial. It examines the complex evolution of communist and post-Soviet leadership. The course is comparative and draws on Nazi Germany and Fascist Italy as case studies.

HISTORY139S - Gateway Seminar. Germany in the World

Course Description

Explores the changing place of modern Germany in the world, with a focus on the aspirations, views, and agendas that have driven German engagements with the world in times of peace and war. How was it possible that this nation-state's profound engagement with the world resulted in relentless pursuits of war, empire, and genocide by mid-twentieth century, and how did the post-war Germanies chart new paths since the late 1940s? In answering these questions, the seminar will also provide an introduction into History as a craft and field of knowledge.

HISTORY143S - Gateway Seminar: The History of the U.S. South

Course Description

This course examines the history of the South from the colonial era to the present. The first part traces the rise of the plantation economy based on human bondage, the slaves' wars and other abolition movements, the Civil War, emancipation, and the destruction of the most powerful slaveholding society in the Atlantic world. The second part traces postwar efforts to build a democratic South, the rise of the Jim Crow system of segregation and disfranchisement, class struggles, the civil rights and abolition movements of the twentieth and twenty-first centuries, and southern culture. Students will acquire analytical and research skills using primary documents.

HISTORY144CNS - Photography and History: Dictatorship & Resistance in Latin America

Course Description

This seminar explores the power of photographic images as 20th century Latin America suffered from and resisted dictatorships and fought for democracy. It opens with the world's first fully photographed and filmed revolution in Mexico (1910-17), and then investigates photographic practice in Cuba, Chile, & Brazil after 1945. While used as a tool of oppression, photographic images will also be explored as vital weapons against human rights violations and fuel for popular democratic insurgencies. This course offers freshmen a chance to share the excitement of research in action, on learning with rather than teaching at, as they improve their skill in 'reading' and contextualizing images while debating what truths, if any, a photographer can communicate, how, and under what circumstances?

HISTORY145CNS - Indigenous Storytelling and Histories of Place

Course Description

More than antiquated stories confined to the archival record, Indigenous storytelling provides living communities today with avenues to communicate directly with ancestors to co-create abundant futures. Expressed through genealogical relationships to lands, waters, and peoples, Native communities cultivate abundance through providing care and mutual aid to each other and their environments. The course provides a framework for observing abundance created by historical and present Indigenous communities through engaged readings of critical texts and embodied practices of storytelling through art. By rejecting models of scarcity and loss of knowledge and power projected by five centuries of colonization, students will build a practical toolkit for creating abundance in everyday life.

HISTORY146S - American Histories

Course Description

Through works of nonfiction, fiction, film, and memoir, this course will explore themes—freedom, family, displacement, violence, and memory that cut across US history and human experience. We will tease out the various strands of culture, class, geography, and identity that shape US history. Even more, we will analyze how writers—historians and otherwise—draw on the entangled past to make sense of the world or highlight its mystery. As a final assignment, students will produce their own piece of historical writing, rooted in original research.

HISTORY181CNS - Sex, Bodies, and Power

Course Description

In our world, bodies and sexual acts have become linked to political power in terms of pleasure, reproduction, identity, and even basic bodily functions such as urination and defecation. How has something so basic as one's body become so closely associated with power? Sex, Bodies, and Power engages in an interdisciplinary examination of written and visual texts to examine the way bodies have been linked to sex and power. How do we understand our own bodies? How do we develop sexual fantasies, and how are those fantasies regulated by the state and other actors and institutions? Do bodies and sex become regulated differently depending on race, ethnicity, nationality, and gender? How does this change in different times and places? How is all of this altered by global pandemics, anti-racist movements, reproductive justice, and queer embodiment? What does it mean to engage in a historical analysis of these questions?

HISTORY182S - The Law in Slavery and Freedom

Course Description

This course focuses on the relationship between slavery, race, and the law. It explores the dimensions and variability of the formal law of slavery, how it addressed the category of slave, codified the powers of slaveholders, and interacted with politics and culture to shape the institution of slavery and the making of the ideology of race. We will study primary documents such as trial transcripts, appellate opinions, treatises, codes, first-person narratives, and secondary work by legal scholars and historians. The course supports the development of skills in critical inquiry, research, and writing leading to the production of a final project based in original research.

HISTORY185S - Gateway Seminar: Disease in History

Course Description

Using primary sources students will explore the impact, management and changing definitions of disease in various pre-modern societies. We look at disease in the context of encounters, environmental change and state formation between 100 and 1700CE. Not just understood as a biological phenomenon, disease can also work as signifying system, creating status hierarchies and highlighting particular social and political anxieties. Through the study of five or six historical epidemics, students will learn how to create historical resources out of medical sources.

HISTORY196S - Imagining Human Rights: Science Fiction, Culture, and the Creation of Rights

Course Description

This course engages students in the intersection of speculative fiction and the history of ideas about human rights and what it means to be human. Using interdisciplinary tools, including history, anthropology, and public policy, students will explore created worlds and new ways of thinking about what rights humans—and other beings—have, how those rights are proposed, and what happens when those rights are contested. The course focuses on how the imaginary influences or presages the real, allowing us to experiment with what-ifs. Students will work in Duke's Locus Archives of primary documents on 20th-century science fiction spanning writers from China, the USSR., and Japan.

HISTORY203 - History of Global Health

Course Description

The course begins with the development of ancient medicine in Europe & China, and continues into the rise of biomedicine (e.g. laboratory science & microbiology) in the 19th and 20th centuries. Particular diseases illustrate important themes, such as the role of warfare in medical developments, the creation of international policy to control disease, and how non-Western societies intersected biomedicine. We trace global circulations of people and commodities to show how international agencies, charities and governing bodies have spread both disease and the means to fight it. Medicine has always been a global undertaking, and its history prepares us to address emerging health crises.

HISTORY204S - Histories of the Future: Hope in the Past and Present

Course Description

This class, offered in the Transformative Ideas Program, explores the ways in which people have imagined the future from Antiquity to the present. We begin with a study of the prophetic traditions in Judaism, Christianity, and Islam and the spread of apocalyptic ideas in medieval and Renaissance Europe. Then, we turn to the emergence of the Idea of Progress in the Enlightenment and beyond before tracing the interplay of apocalypticism and progressivism down to the contemporary period. Historically these visions of the future – one religious and one predominantly secular – have played a major role in shaping the human capacity for hope. But what can we do at present? Neither narrative exercises the hold it once did. Where – in a moment of global crises – do we turn for hope? x

HISTORY205 - Wars of Empire: Europe's Small Wars of the 19th and Early 20th Centuries

Course Description

The 19th and early 20th century wars through which the modern European empires 'pacified' the regions they conquered were considered 'Small Wars': conflicts that were imbalanced, with well-trained and equipped troops on one side, and what one theorist called 'savages and semi-civilized races' on the other. In these clashes, 'civilized' Europe was expected to easily triumph, but Europe's great empires consistently found themselves challenged and thwarted by the indigenous forces on the battlefields of Asia and Africa. This course will look at examples from the histories of the British, French, Italian, and Russian Empires, discussing both the military and imperial contexts of these struggles.

HISTORY224 - 9/11 and Its Aftermath: How Bin Laden Changed America and the World

Course Description

Course will examine the impact of the 9/11 attacks and the response to these attacks on America and the World. Study the historical, political, and sociological forces that gave rise to Al Qaeda, and it's ideology. Course will chart and assess the response to the attacks by the United States and its allies, including military actions, U.S. foreign policy, intelligence collection, law enforcement policy, and homeland security. Address thematic issues such as the impact of attacks on American history, politics, foreign policy, culture, and national cohesion.

HISTORY225S - Muslim Women Across the Ages

Course Description

This course explores the diverse realities of Muslim women's lives, from the origins of Islam to the present, through autobiographical and biographical accounts situated in their social, economic, political, and cultural contexts. The women we will encounter through textual and audiovisual materials represent a wide range of personal backgrounds, including scholars, mystics, merchants, philanthropists, poets, slavegirls, feminists, and Islamists. We will metaphorically travel across the globe and time to understand the multifarious facets of Muslim women's lived experiences.

HISTORY231 - Ancient Athletics

Course Description

The athletic festivals of the ancient Greeks and Romans are among the most enduring legacies of the Classical world, and provide a particularly accessible introduction to the study of antiquity. Through examination of literary and historiographical sources (in translation) and of the material remains at the ancient sites, this course introduces students to the origins and development of the major athletic contests (especially the Olympic Games), the methods and practicalities of ancient training, and the changing role of athletics in ancient and modern education, religion, and politics. We end with a survey of the modern Olympic movement, from the nineteenth century to the present.

HISTORY237 - Russia in the World: From Cold War to Putin's Wars

Course Description

Traces evolution of Russian Federation foreign policy from the collapse of the Soviet Union at the beginning of the 1990s to the 2022 war in Ukraine. Examines elements of Russian grand strategy: military, economic (especially oil and gas), and diplomatic tools. Explores the role of one individual, President Vladimir Putin, in shaping policy in an increasingly autocratic state. Focuses on Russia's relations with its neighbors, former allies, Europe, and the wider world, including the United States. Identifies linkages between domestic politics and events and foreign policy. Assignments focus on translating historical knowledge into actionable policy advice to meet current challenges.

HISTORY239 - History of Chinese Medicine

Course Description

This course introduces students to the history of medicine through the study of medical practices and beliefs in China. Paying close attention to socio-historical context, we will explore how those beliefs formed, how the practices have changed over time, and in particular how the introduction of Western medicine and then scientific biomedicine forced fundamental changes in Chinese medicine over the course of the twentieth century. This course also introduces students to the discipline of History, and students will work in close consultation with the professor to produce a unique research paper. History majors should take a Gateway Seminar first, but there are no official prerequisites.

HISTORY243S - Cross-Cultural Encounters

Course Description

The dynamics of cross-cultural interaction have actively shaped the world for many centuries now. This class explores some of the religious, social, and economic forces that fostered increasingly global contacts in history. In particular, it examines how centrally located and cosmopolitan Muslims played a critical role in connecting people of far-flung regions, cultures, and religions with one another. It surveys the myriad encounters of Muslims, Buddhists, Confucianists, Hindus, Jews, Christians and more across Afro-Eurasia and into the Americas. How did religious networks, processes and events foster historic exchanges of ideas, practices, and commodities across the world?

HISTORY244 - From History to Fantasy: Medieval Religions in Film & Fiction

Course Description

Explores the intersection of modern popular culture and medieval religious culture. Deep dive into how modern creators of mass entertainment use common notions of medieval faith, power, race, sexualities and violence to capture and hold our interest, teach us lessons about ourselves, and sell products. How do our ideas of faith, sexuality, race and power inspire or constrain the fiction we create about the past? What impact does this have on consumers? Monks, nuns, knights, crusades, secret societies, suffragists, alt-right, plague. Modern novels, commentaries, history, medieval texts, neurobiology, TV, films, ads, games, memes, clubs. Read, discuss, write, research.

HISTORY245 - Race in the 20th Century U.S.

Course Description

Increasingly, our world today acknowledges that race is less about biological features and more about social rules and ideas. So why does race remain so important in the twenty-first century? This course combines ideas from history, public policy, sociology, and political science to examine how ideas of race have changed over from 1877, following the end of Reconstruction, to the present. While we might think of ideas like 'white,' 'Black,' 'Asian American,' or 'Hispanic' as concrete, easily definable categories, all of these categories and their social impact changed significantly over the course of a century.

HISTORY252S - Unsettling Modernity: Korea, Empire, Diaspora

Course Description

Korean history from the late 19th century to the present. Examines how colonialisms, cold war divisions, and transnational migrations have shaped modern Korean identities both on the Korean Peninsula and in the diaspora. Challenges dominant narratives of modernization by centering marginalized perspectives and exploring key moments in modern Korean history: Japanese colonial rule, liberation and division, the Korean War, ideologies of 'self-reliance' in North and South Korea, South Korea's role in the Vietnam War, and democracy in neoliberal South Korea. Engages transnational Korean literature, history, theory, and visual media to reassess the nation-state as a construct shaped by colonial and Cold War structures.

HISTORY258S - Women and Power in the Renaissance

Course Description

Explores the intellectual, social, and political history of women in Renaissance Europe. Despite the overwhelmingly patriarchal nature of early modern society, many women wrote treatises, dialogues, and poetry in which they argued for a broader role for women. Students will examine these primary texts (some by famous figures, others by much less well-known writers) within the context of a burgeoning social history that has provided a more nuanced view of gender relations and power in this period.

HISTORY264 - Latin American Wars of Independence

Course Description

This course covers the conspiracies, uprisings, and wars that led to the independence of Haiti and the Latin American colonies of Spain and Portugal between 1780 and the 1898 withdrawal of Spain from Cuba. It focuses on the key military and political leaders of anti-colonial struggles conducted on a continental scale from the islands of the Caribbean to the Andean highlands and beyond. Military strategy and political tactics were decisively shaped by modern debates about the meaning of freedom in terms of slavery and national self-determination. No prior knowledge of Latin America and the Caribbean required.

HISTORY266 - The Good Life: Religion, Philosophy, and Life's Ultimate Concerns

Course Description

What does it look like for a human life to go well? What leads to human flourishing or 'happiness' or 'success'? What is freedom? Love? Justice? What is the basis for ethics? What is our relationship to the natural world? What is the significance of death? How do our beliefs (or lack thereof) about God or the gods shape how we view the world? We will examine how philosophical or religious traditions around the globe have answered life's biggest questions. Traditions may include Confucianism, Islam, Christianity, Stoicism, Judaism, Buddhism, Hinduism, scientific naturalism, expressive individualism, and utilitarianism. Part of the Transformative Ideas Sophomore Program.

HISTORY267S - Global Cold War

Course Description

Traditional narratives of the Cold War focus on a bi-polar series of conflicts that pit the United States against the Soviet Union in a good-versus-evil battle for global political and military supremacy. This course destabilizes this account of a process that affected every continent on earth – and even reached into space – over the period of more than half a century. It explores the Cold War from East-West, North-South, global, and interstellar perspectives. In addition to political and military issues, the course will also discuss the Cold War in social, cultural, intellectual, and economic spheres.

HISTORY273 - Inventing the Environment: Ideas of Nature in Literature and History of Science

Course Description

Course will explore western conceptions of nature in the modern period. We will ask: How have differing views of nature represented new definitions of the human? How have perspectives on nature changed historically in tandem with other cultural developments? What does it mean to have ethical responsibilities towards natural entities? How are ideas of the environment formed, critiqued, and changed through imaginative and investigative practices such as those of science and literature? Views of the environment considered will include: resource, generative force, sacred space, ecological process, home, and apocalyptic wasteland. We will read diverse thinkers such as: Darwin, Blake, Thoreau, Humboldt, Goethe, Kafka, Theodor Storm, Haeckel, Lynn Margolis, and Octavia Butler.

HISTORY274 - Introduction to Asian American and Diaspora Studies

Course Description

What does it mean to be Asian American? Asian American Studies is an interdisciplinary field that draws on social sciences, humanities, and the arts to explore the historical and contemporary experiences of Asian Americans in the western hemisphere. This course provides students with an introduction to this dynamic and growing field of study, taking race, gender, immigration, diaspora, class, labor, and sexuality as primary subjects of the field. The course also historicizes Asian American racialization to better understand the structural forces that have shaped Asian American lives and the ways that writers, scholars, and activists have responded to and resisted these forces.

HISTORY281 - Russia in World War II

Course Description

Nowhere else was World War II as bloody and destructive as it was in Eastern Europe, and of all nations it was the Soviet Union that paid the highest price for victory. The scale of death and destruction is hard to comprehend even today. How Soviet society, its economy and military prepared for the upcoming war, mobilized and persevered during the conflict, and ended up storming Berlin in 1945 is explored in this course. Questions of socialist economy at war, technological innovation, and gender dimensions of modern war and warfare form core topics of the course.

HISTORY291S - From Ottoman Empire to the Modern Middle East

Course Description

Major cultural, political and historical issues in the transition from the late Ottoman Empire to the Modern Middle East. Emphasis on Ottoman legacies in the 20th century. Readings and discussions analyze end of empire through colonial intervention, WWI, the caliphate, political violence, cultural revolution, national self-determination, coups, post-colonial states, and Islamist mobilization. Interdisciplinary focus on cultural texts, including film, popular culture and literature. Thematic discussions on women/gender, identity- and state-formation, historiography, and hierarchies of race and religion.

HISTORY292 - Environmental Justice: The Making of a Modern Movement

Course Description

This class puts the rise of the environmental justice movement in historical context. Students will be introduced to EJ through its foundational texts. Subsequent modules will then look at: how EJ critiqued the earlier environmentalism movement, longer scale historical processes of imperialism, capitalism, and racial formation at the roots of inequitable environmental health, and real-world case studies that show how these historical processes have come together and how the movement has matured since the 1980s. By the end of the course students will understand how EJ work has evolved and become a topic of global concern.

HISTORY294S - Art of Renaissance Politics

Course Description

This course examines the thought of three of the most influential political writers of the Renaissance: Machiavelli, Francesco Guicciardini, and Benvenuto Cellini. Their ideas shaped the formation of the early modern state. It examines the background to their ideas in Renaissance Florence and the crisis of the republican tradition leading to Medici rule. Readings focus on the original texts of these writers, including (but not limited to) Machiavelli's PRINCE, Guicciardini's MAXIMS AND REFLECTIONS, and Cellini's PERSEUS.

HISTORY295S - The History of Gardening in North America, 1607-Present**Course Description**

The History of Gardening in North America, 1607 to the Present, examines the complex ways peoples across the North American continent have cultivated plants, insects, and animals from the beginning of English colonization to the present. It offers a narrative of the role of gardening in human history as well as an exploration of how gardens have incubated sweeping transformations in the history of non-human nature far beyond the garden plot. By examining gardens as both projections of human needs, desires, and aspirations, as well as landscapes of unexpected transformation and conflict, the course offers an accounting of a long and complex 'conversation' between humans and the soil, insects, and animals that have constituted and created gardens.

HISTORY296S - Race and Society: South Africa and the US, 1890-present**Course Description**

Scholars, pundits and historical actors have long drawn parallels between the United States & South Africa-two countries founded on the premises of racial inequality. This course explores the machinations of race from the quickening of industrial development to present. We will consider the benefits and pitfalls of thinking comparatively. Topics include segregation, transatlantic cultural exchanges, living apartheid and Jim Crow, government surveillance of political opponents, the American anti-apartheid movement, mass incarceration and privatization of prisons, memory and the struggles for social change as well as the persistence of racial inequality in two country's contemporary societies.

HISTORY299S - Climate, Science, and Society: The Long History of Anthropogenic Climate Change

Course Description

This class will approach the history of climate chronologically. The first part focuses on adaptation, resilience, and destruction as societies around the world faced changing climates. This will give us a better understanding of how historians and scientists work together to reconstruct past climates. The second part covers the rise of climate science in the nineteenth and early twentieth centuries. During the final weeks, we will focus on the past sixty years of climate science, exploring how scientists have improved their knowledge of the changing climate, the relationship between environmentalism and climate activism, climate change denialism, and climate justice.

HISTORY304S - History Lab: Archival Methods

Course Description

This course teaches students historical skills at the highest levels. An excellent preparation for History majors, it is also aimed at any student who wants to learn how to do serious, team-based research. Students will work with Duke's archival collections at Rubenstein Library on team-based research projects. Rather than focusing on a particular historical subject, this course emphasizes the skills and methods of the historian: close reading, project management, and archival exploration. Students will also be introduced to intellectual and technological tools that might include database construction, citation management, or web design.

HISTORY320 - Sports and American Culture

Course Description

For over a century, sports have occupied a central role in American life. More than 'just games,' sports have been deployed in the form of meaningful spectacle, exerting a social impact beyond fields and courts. This course addresses the intersection of sports and American society since the nineteenth century, focusing on such themes as nationalism, race, gender, capitalism, and globalization. Through a cultural studies approach, we will better understand how ideas, power, and capital flow through sports to broad audiences. In the process, we will extensively discuss and debate the political dynamics that have long pervaded the sports world.

HISTORY331S - Illiberal Nondemocracies: Focus on Eastern Europe and Asia

Course Description

As of 2016, only 11% of the countries in the world are liberal democracies. Some insight about how illiberal regimes function is a must to understand what is going on in the world. In this course, we explore illiberal and/or nondemocratic regimes of Eastern Europe and Asia—a perfect laboratory for the subject. We develop nuanced ideas about key concepts such as elections, representation, party rule, dictatorship, populism, patronalism, authoritarianism, and totalitarianism as well as the dilemmas of freedom, security, corruption, and development. We study the regimes of countries such as Hungary, Russia, Turkey, China and follow the news to see how political regimes evolve in real time.

HISTORY334S - The University as a Culture: A Survivor's Guide

Course Description

The university generates some of the most influential forms of knowledge in the world, yet we seldom examine the historically specific cultural, social, political, and economic conditions under which knowledge is produced in the laboratories, classrooms, offices, dormitories, Greek-letter societies, and sports complexes that are the infrastructure of the academy. This course will employ readings from a range of disciplines, as well as the investigative and interpretive methods of cultural anthropology, to examine the taken-for-granted context of university life.

HISTORY334SA - Frontier City Berlin: Facing History's Great Challenges

Course Description

This course deals with some of the great challenges and conflicts of the 20th and 21st century, such as capitalism vs. communism; authoritarian vs. democratic governance, and focuses on Berlin as a city at the forefront of historic struggles. In particular, it treats Berlin as the site of the first socialist revolution in a highly industrialized nation (1918/19); the rise of fascism amidst an advanced urban culture, the legacy of world war and totalitarian rule; the Cold War division of Berlin; the fall of communism and the crises of capitalism; and the search for an environmentally sustainable future. Offered in English in the Duke-in-Berlin summer program.

HISTORY335 - The History of Hip-Hop

Course Description

What began as a localized activity designed to provide a safe haven for Black and Latino youth in New York City, has become a global brand that has had a documented impact on the cultural, political and economic realities of youth throughout the globe. This course will examine the organic social and cultural foundations of hip-hop, as well as the key aesthetic innovators/innovations, and the debates that have arisen over hip-hop's increased influence.

HISTORY337S - Don Quixote for Beginners

Course Description

This course introduces students to the overlapping realities and worlds that the novel encompasses to explore, through don Quixote's knightly ambitions of justice, love, and freedom, the similarities, and differences we see between ourselves and others, in a changing world where chivalry ideals, popular culture, history, and uprooted lives, and early capitalism dialogue to each other. Multiple characters raise questions about escapism, social justice, borders, and exile linking the present and the past.

HISTORY338S - Peasants in Russian Revolutionary and Counter-Revolutionary Thought and Literature

Course Description

This course offers a history of Russian social thought through the lens of literary representation. It focuses on the analysis and interpretation of creative texts in the context of debates about the peasantry as a force of change or stasis. Bringing together history and literature, this course engages cross-cultural inquiry on several levels. Familiarizing students with Russia's political and cultural past, it also introduces them to the cultural differences of class in one of the most hotly debated contexts for the topic: pre-revolutionary Russia. Students are asked to analyze literature while also learning of its historical background. Taught in English.

HISTORY344 - History of U.S. Social Movements

Course Description

Examines the social movements that have shaped U.S. history, starting with the American Revolution itself and covering others including the anti-slavery movement, women's rights, Populism, Socialism, the Ku Klux Klan, the labor movement, the Black Freedom Movement and broader New Left, lesbian and gay liberation, and the recent conservative movement, focusing on the ethical issues arguments they raised, and how new civil, political, and social rights were created through social movement organizing. Lectures and readings explore why these movements arose, what they achieved, why many opposed them, and what we can learn about American history writ large from their experiences.

HISTORY349S - History Wars

Course Description

What does it mean when people in the present call for a 'reckoning' with history? What is behind the calls for erecting or tearing down monuments to the past? Academic historians have their own interpretations and arguments about the past and its meaning. But politicians, teachers, activists, influencers, and everyday folks also contest what we talk about when we research, write, and teach history—from the centrality of enslavement and colonialism in the making of America to how systemic inequality is built and structured over time to the very question of whose voice, and life, matters. This seminar will engage the substance of these contested histories and the way people have conscripted these histories to their own social and political concerns.

HISTORY350S - The Connection between Human Rights, Memory and How Societies Create Memorials

Course Description

This seminar introduces students to multiple approaches to why and how to create memory, with a focus on contributing to a project underway at Catawba Trail Farm. We are particularly interested in how to tell difficult stories of slavery, segregation, and inequality through new sites and interpretive plans. Students will conduct interviews and archival research in coordination with a Bass Connections project, 'Making Meaning at Historic Places' and the Catawba Trail Farm, a non-profit organization that builds community and addresses food insecurity through community gardening. As part of their community-building efforts, the leaders of this project are interested in reclaiming the history of the enslaved people who lived and worked on this property outside Durham.

Course Description

Examination of the Franco-African relationship over time, from the four 'communes' in Senegal to the present, through a political but also broader cultural lens. France's colonial doctrine and practices, African resistance and collaboration, 'la francophonie' and the postcolonial 'Françafrique' are analyzed as well as collective imaginaries on either side and how they shaped each other in literature, film, the social sciences or everyday life. The course is taught in English but a preceptorial class in French is offered in addition so that students can meet the requirement for their major or minor in French. Newcomers to Africa are welcome.

HISTORY373 - American Indian History Since 1806

Course Description

Examines images and realities of North American Indian cultures and history from early 19th century through present day. Focus on American Indian responses to Anglo-American nation building and encroachment, radical decline of Indian populations over the 19th century and complex survival strategies initiated by American Indians in the face of decimation, Anglo-American attempts at religious and cultural conversion; and Indian response and resistance, and demographic and political revitalization of Indian peoples in the 20th century.

HISTORY374 - Women, Gender, and Sexuality in U.S. History

Course Description

Major questions relating to women and women's place in society over the course of U.S. history, broadly defined, from the colonial period to the present: How did different groups of women see themselves as women? How did views of women's sexuality change? How did men's and women's relationships and roles change? How did women understand their connections to the larger society? How did race, ethnicity, and class shape all those issues? Course uses a variety of materials, including novels, movies, images, and music to explore the ethical contours of women's lives in the past, following change over time to better understand women's position today.

HISTORY383 - Engineering the Global Middle East

Course Description

This class is a global techno-environmental history, with a special emphasis on the modern Middle East. We will interrogate the many ways in which the transformation of nature and transfer of technologies has rearranged political relations within and between states in the last two hundred years. We shall survey the social history of technology, of engineering, infrastructural developments, urbanization, and energy resources. Students in this course will learn how to do research through the lenses of environmental history and science and technology studies using the methods of microhistory.

HISTORY384 - The People's Republic of China, 1949-Present

Course Description

This course begins its examination of the People's Republic of China (PRC) and the Communist Party of China (CPC) through multifaceted analyses of the first Party Chairman, Mao Zedong. We will first allow ourselves to be seduced by the richly detailed accounts of this fascinating man. We will then take a step back to observe that, in order to understand Mao, we must understand the society and culture in which he lived. This movement from Mao to the masses gives shape to the fundamental question of this class: what is the relationship between the individual and the social collective? Students are encouraged, but not required, to take History 223 as prerequisite.

HISTORY386S - Apartheid South Africa and Struggles for Democracy

Course Description

Working through an array of diverse organizations – including the African National Congress, the Pan African Congress, the Black Consciousness Movement, a host of liberal organizations, the churches, the trade union federations, and countless more - South Africans fought against apartheid from its inception. In 1994 they achieved a multi-racial democracy led by President Nelson Mandela. This seminar explores key themes in post-World War II South African history, paying special attention to the plethora of anti-apartheid struggles, while analyzing the tenets of apartheid policies.

HISTORY387S - History Through Fiction

Course Description

This course is a seminar studying historical principles through classic works of fiction. Through reading the great novels of our time, and by writing their own creative fiction, students will confront some of the most profound challenges of the historian: what, precisely, is the cause of historical change? How do individual stories and dramas relate to grander historical processes? This course is reading and writing intensive. Students will read novels from various cultures around the world, including Nigeria, antebellum US, South Africa, Korea, the Dominican Republic, and India. Students will also work on their own creative fiction pieces that speak to their moment in time.

HISTORY397S - Istanbul: Religion, Politics and Cosmopolitanism**Course Description**

Istanbul is the only city in the world located on two continents. Byzantine, Ottoman, and Turkish cultural legacies allow the city to be read as a 'palimpsest', a multi-layered urban text of multiple, even contradictory meanings. Istanbul is an ideal site to explore imperial history, Islam and Christianity, migration, East/West relations, and cosmopolitanism. Through interdisciplinary sources in history, culture, theory, and politics, students will examine a variety of urban, architectural and social spaces including churches, mosques, public squares, and ethnic neighborhoods. Taught in English.

HISTORY402S - Cairo - A Global History

Course Description

This class helps students to get familiar with the history of Egypt and the larger Middle East through the story of the city of Cairo, the largest Arab and Muslim metropolis, and the second largest in Africa. We explore not only the various historical layers of this city, but we also learn about the approach of urban history, including the crucial questions of globalization, urban revolts, and the environment in the past two hundred years and until today. In this way, the class is a methodological enquiry into how we can describe change in urban life with the tools of history, art history, anthropology, and sociology.

HISTORY403S - Capstone: Medieval Trials & Ordeals

Course Description

Using a case study approach, students in this class will examine the history and records of three famous medieval trials: a trial in ninth-century Italy when a pope put his dead predecessor's corpse on the stand; the legendary trial by combat between Sir Lancelot and Gawain to prove the innocence of Queen Guinevere; and the inquisition trial of Joan of Arc. These episodes provide insights into the fundamentals of medieval culture: ideas about truth, honor, fairness, gender roles, the permeable boundaries between the living and the dead - and of course the evolution of law and government in Europe. Students read trial transcripts as primary sources while also learning about the worlds that produced them.

HISTORY405 - What Machiavelli Really Says

Course Description

Everyone knows what 'Machiavellian' means, but what does Machiavelli really say? Reading his classical political texts, 'The Prince,' the 'Discourses on Livy,' and 'The Art of War' in the company of his literary works, including 'Mandragola,' we will examine how Machiavelli's ideas about power, deception, language, ethics, and representation emerged from his reading of Plato, Livy, Ovid, and Dante, while also exploring the reception and consequences of his ideas. Just as Machiavelli searched history for answers to his own political situation, our guiding question cannot help but be 'What would Machiavelli do?'

HISTORY416S - The Geopolitics of Islamophobia from Bosnia to Xinjiang

Course Description

Comparative study of geopolitical attitudes toward Muslim minorities in and majority Muslim nations of the greater Middle East beginning with the Ottomans and including Bosnia, Chechnya, Iran, Afghanistan and/or Xinjiang. These polities have histories of colonialism, contested Islamic and secular state traditions, and experiences of anti-Muslim racism, religious and ethnic conflict and political violence. Theoretical analysis of historiography, Islamophobia, gender, identity, and policy. Discussion of US, European, and regional geopolitical interests through cultural texts including literature and film. This course does not fulfill the History capstone requirement.

HISTORY420 - Biography, Life Writing, Autofiction

Course Description

History and art of the life story, examining biography as it drives research and contemporary writing. From Montaigne to Rousseau, the biopic to the lives of troubadours, we will study modes, media and social functions: portrait, caricature, meditation, fragments, selfies. The subjects: famous or anonymous people; those who are not human, landscapes, the sea—even inanimate objects. The accounts of radical change or metamorphosis, personal epiphanies, self-conscious reflection. The aims of depicting lives as they unfold. Texts include Foucault, Augustine, Flora Tristan, Pascal, Ferraroun. Critical readings will be coupled with creative work culminating in a research project around your life.

HISTORY424S - Cuzco: Local and Imperial

Course Description

Cuzco is a city in the Andes with a rich past that not only originates with the prominence of the Inca Empire, but also with its closeness to Aymara and Amazonian cultures. Its archeological record and history together with the prevalence of Quechua, Aymara and Spanish are tied to the city's pre-Columbian, colonial and contemporary cultural practices. The question that we will work through by engaging with readings and visual material is how a space or place—a city—creates its history and significance with the passage of time.

HISTORY425S - Atlantic Constellations: Migration, Exile, Second Slavery

Course Description

This seminar explores the collective identities of Afro-descendant slaves in the Americas as well as migrant and exiled Spaniards away from the homeland. We will consider three main themes: 1) chattel or second slavery in Cuba, and, secondarily, in the U.S. and/or Brazil; 2) Ibero-Atlantic diasporas since the mid-nineteenth century, including so-called white slavery; and 3) the career of María Zambrano, an expatriate intellectual who turned her banishment from Spain in 1939 into the enabling condition of her radical revision of Western philosophy and the ethics of exile. Prerequisite: 300-level or above Spanish course that meets foreign language (FL) requirement.

HISTORY430S - Capstone Seminar: Slavery and Capitalism

Course Description

Was American slavery efficient? Was it profitable? Was slavery capitalist or its opposite? Historians have debated these questions for nearly a century. More recently, they have been flashpoints in political battles over how U.S. history is taught. In this course we will trace the emergence of slavery and its relationship to the rise of capitalism in United States and broader Atlantic world economy. We will examine the instruments of credit, debt, and investment that financed human bondage and created slavery's linkages to capitalism, with special attention to why scholars in this field have disagreed so often. This course is a capstone to the History major, but is open to all students.

HISTORY431S - History of Acting

Course Description

This course surveys major acting traditions from around the world. Readings provide historical and theoretical perspectives on acting, and assignments require students to engage with the topic as researchers. Students will learn about various philosophical and artistic understandings of embodiment and about the political and societal roles actors have played throughout history. Students will work on research projects and will be required to write a research paper. (Does not fulfill the capstone requirement for History).

HISTORY435S - Francophone Oceania: Beyond the Postcard Paradise

Course Description

Centuries before Europeans entered the Pacific, the sea was open to anyone who could navigate a way through. Of critical importance to Oceanian communities and scholarship today is the project of remembering the stories, knowledges, travel routes, and ecologies that have crisscrossed the aqueous landscapes of this 'other' side of the globe. This course is a survey of the literature, modern history, and aesthetics that inform the field of contemporary Francophone Oceanian Studies. Major concepts in Indigenous philosophy, European imperialism, racial politics, gender and sexuality, maritime knowledges, and nuclear colonialism will be studied. Conducted in French.

HISTORY438S - Race & Conservatism in the Twentieth Century U.S.

Course Description

This course looks at the history of race and modern conservatism in the United States. Students will learn about the history of conservative leaders, politicians, and grassroots activists starting in the civil rights era and ending with the January 6th insurrection. This class focuses on how the Republican Party, and conservatives more broadly, have dealt with questions of race in this period. Students will look at a multiracial conservative history that includes the voices of non-white members of the GOP and conservative movements. Students will spend a significant amount of time in the course researching and writing original historical papers connected to the themes of the course.

HISTORY444S - Imperialism and Islamism

Course Description

This course draws on transnational material to gain perspectives on the conflict between the US and its Islamist opponents. Its central concern is Islam's transnational past and relations of European empires to that past. It is guided by a transnational perspective framing specific case studies, original source material and arguments on the nature of global Islamist politics and on the US as an imperial power. Students will strengthen skills in global anthropological and historical analysis, using the conflict between the US and its Islamist opponents as a case study.

HISTORY445S - Modern German-Jewish Culture: Vienna, Prague, Berlin

Course Description

Explores the outsized intellectual and cultural output of Jews in pre-WWII Europe. The birth of psychoanalysis and the fallout of Jewish assimilation in Vienna. The legendary Golem figure and the writings of Franz Kafka and his circle in Prague. Avant-garde Jewish artists, writers, and filmmakers in Weimar Berlin. Each unit examines specific historical contexts and broader artistic movements. Topics include secularization and conversion; hybrid identities; emigration to Palestine and the U.S.; antisemitism and rising fascism; and 'authentic' Jewishness in Eastern Europe. Taught entirely in German. Recommended prerequisite: a 300-level German course or equivalent.

HISTORY447S - South Africa and the World

Course Description

Throughout the 20th century, South Africa had the largest economy and military on the African continent. Its strategic geographic position and mineral wealth in gold and uranium made it an important ally for the largest economies in the world. The Cold War enhanced its significance. However, in the second half of the twentieth century, its policies of apartheid rendered it an international pariah. This course examines the ways in which countries, international institutions, and millions of 'ordinary' people shaped the course of South African history. How did South Africa interact with the broader world, and how did the world try to affect South Africa's policies of white supremacy?

HISTORY448S - Archiving and Visualizing Asia: Politics and Poetics of Knowledge Production

Course Description

Engages students in the practices and theories of archiving, documenting and curating marginal histories. Hands-on research in the archives of Duke's Rubenstein Special Collections and elsewhere. Examines histories of movements and encounters between the 'West' and 'Asia.' Teaches original archival research and documentary methods through guided excavations in digital, audiovisual, and material resources. Directed readings and special guest lectures guide students on how to think critically on the theories and praxis of knowledge production, collection, documentation, circulation, and consumption. Students curate projects for final research assignment.

HISTORY450S - South African Life Histories

Course Description

South Africa presented the world with one of the great moral challenges of the 20th century. We will explore its history through the lens of biography and autobiography. The country underwent major transformations -- rapid industrialization, segregation, the rise and fall of apartheid, and the emergence of democracy. How did individuals experience these social changes? In what ways do individual lives illuminate these larger social processes? Protagonists include a prophetess, political artists and writers, exiles, and celebrated figures. Topics cover how segregation and apartheid affected people's daily lives, opposition to white supremacy, and the personal impact of the AIDS's epidemic.

HISTORY472S - Capstone Seminar: Russia in World War II

Course Description

Nowhere else was World War II as bloody and destructive as it was in Eastern Europe, and of all nations it was the Soviet Union that paid the highest price for victory. The scale of death and destruction is hard to comprehend even today. How Soviet society, its economy and military prepared for the upcoming war, mobilized and persevered during the conflict, and ended up storming Berlin in 1945 is explored in this course. Questions of socialist economy at war, technological innovation, and gender dimensions of modern war and warfare form core topics of the course.

HLTHPOL203 - History of Global Health

Course Description

The course begins with the development of ancient medicine in Europe & China, and continues into the rise of biomedicine (e.g. laboratory science & microbiology) in the 19th and 20th centuries. Particular diseases illustrate important themes, such as the role of warfare in medical developments, the creation of international policy to control disease, and how non-Western societies intersected biomedicine. We trace global circulations of people and commodities to show how international agencies, charities and governing bodies have spread both disease and the means to fight it. Medicine has always been a global undertaking, and its history prepares us to address emerging health crises.

Course Description

In-depth examination of how to close the gap between evidence and practical policy making as a way to improve global health. How global health policies are shaped; identifying key actors and their power; understanding/influencing the processes that drive large scale change in global health; exploring ways in which health issues reach the top of the agenda; analyzing how decisions are made by policy makers; implementing policies from the 'top down' and 'bottom up.' The interplay between the different worlds of research and policy. Practical tools for becoming a policy broker, skilled in transforming evidence to action. Real world case studies. Case-based competition.

HLTHPOL335 - Economics of Global Health**Course Description**

Examines reciprocal relationships between income, poverty and health across countries with focus on identifying effect of health on development. Addresses structural problems in delivery and quality of healthcare that arise from cultural as well as economic causes. Attention given to challenges of healthcare financing, and tension between high-tech care and basic care in developing countries. Students examine empirical evidence from interventions affecting health including infant mortality reduction programs. Focus on issues of poverty alleviation and the promise of foreign aid. Prerequisites: (Economics 201 or Public Policy 303D) and (Economics 204D or 208D or Public Policy 604), or instructor consent.

HLTHPOL341 - Life and Death: Global Perspectives**Course Description**

Anthropological investigation of customs, practices, and beliefs that get activated when people (and other living beings) die. What constitutes life as in when does it start, what determines well-being, how is it measured; and what constitutes death as in a good versus bad death, by what medical definition, and according to what rituals and beliefs. Comparative inquiry into such questions as why brain-death is not accepted in some cultures and why people in some places prefer to die rather than live after an amputation. Topics will include organ transplants, gang warfare, cancer, and warzones from China and Botswana to Mexico and the United States.

I&E110 - Design Your Duke Journey

Course Description

Design Your Duke Journey (+Career!) is an interactive course that applies a design-thinking framework and mindset to career exploration and development. Students will learn to get curious, try stuff out and talk to people through experiential activities in and out of the classroom, self-reflection, readings and discussion. The intended goal is that students will learn how design thinking can help them explore options and opportunities, and at the same time, wrestle with the 'wicked' problem of: How do I know if I'm on the right track, if I don't know exactly what the destination is? This class is best suited for first-year or sophomore undergraduate students.

I&E140 - Create, Innovate, Act: Creativity, Innovation, and Social Action

Course Description

Introductory course for first and second year undergraduates. This course bridges sciences, arts, and humanities, with focus on experiential knowledge and engagement with the everyday. Combines methods from broad range of areas based on creative inquiry and innovation. Students chose particular areas, or combination thereof, discussing their own research, inventions, artworks, compositions, performances, new media, or activist interventions. Specific skills developed at specialized maker spaces, labs, and studios. With exception of guest presentations, lectures delivered in video format to maximize class time production. Guest speakers include artists, activists, innovators, entrepreneurs, curators, and scholars.

I&E171 - Anthropologists in the Workplace: Applied Anthropology

Course Description

This course sets out to introduce students to some of the applications of anthropological theory and ethnographic method in contemporary institutional settings with the aim of familiarizing students with how anthropologists go about their work in complex organizational settings. Focusing on ethnographic method, as a powerful research tool, the course looks to both a series of use cases and an extensive literature of organizational management, user, and consumer experience. Students will have the opportunity to engage with anthropologists working in complex organizational contexts as well as business. Prior courses in Cultural Anthropology recommended but not required.

I&E172 - The Anthropology of Design and User Experience (UX) Research

Course Description

The field of design and the burgeoning field of User Experience (UX) research has recently applied the methods anthropologists have used for over a century. The methods of cultural anthropology are distinctly aligned to ask questions about motivations, beliefs, values, and relationships within cultural systems through direct participant observation, surveys, focus groups, and archival research. Privileging critical listening, empathy, and perspective-taking, we try to discern why people do what they do, and apply these questions to human-centered design.

I&E230 - Arts Policy, Leadership, and Engagement

Course Description

This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.

I&E250 - Building Global Audiences

Course Description

Marketing and publicity are so important to audience building that, 20 years ago, expanding beyond local audiences usually couldn't be accomplished without huge advertising budgets. However, thanks to the Internet, you can build a global audience from your dorm room. This class explores how. Learn about social media, search engine optimization, virality, content marketing, growth hacking, and other digital audience building strategies. They're difficult to learn and time consuming to execute, so expect to struggle. We'll learn as much from our failures as we will from our successes as we discover what it takes to cultivate global awareness for an idea without ever leaving Durham.

I&E252 - Learning to Fail

Course Description

Most people spend their lives afraid of failing. Yet, many of the world's most successful people failed numerous times on their paths toward success. The underlying question of this class is if failing is as antithetical to learning as we're taught to believe. To explore this question, we will test ways of using failure as a strategy for learning. We will experiment with failure to learn how it can make us better as we develop our skills as innovators, specifically focusing on the earliest stage of creativity: ideation. We will use failure through experimentation as a technique for problem definition and needs discovery which, in turn, will help us validate the quality of our ideas.

I&E253 - Social Marketing: From Literary Celebrities to Instagram Influencers

Course Description

Typical Duke students spend hours each day using social media. You've surely heard the platforms described as 'revolutionary,' and you've also heard them described as 'time wasters.' What you probably haven't thought about is how similar they are to previous 'revolutionary' communications technologies like novels, newspapers, and even language itself. This course explores ways in which studying the masters of previous 'social' media technologies—the Shakespeares, Whitmans, and Eliots of the world—can help us understand how influencers on digital social media leverage the same platforms you use every day to market themselves, build their brands, and grow their audiences.

I&E272S - Documentary and Policy: How Documentary Influences Policy

Course Description

Examines documentaries as catalysts for change in local, state, and federal laws and regulations, with special attention to relationships between film and organizations with political influence. Looks at how documentaries have altered public sentiment and political outcomes. Uses case studies of documentary films (essay-style, journalistic, information-driven films; narrative, story-driven films; propaganda; art films; and hybrids of all of the above). Explores the question of how a film achieves influence: for example, with a high-profile theatrical and/or television release, by utilization as an educational tool, or by 'going viral' to become part of a public conversation.

I&E273S - Electronic Music for TV and Movies

Course Description

Experiential, project-based course focusing on writing electronic music for TV and film. Students will score multiple scenes from movies and TV shows. They will learn entire composition/production process: sketching initial ideas from images; creating workflow in the DAW, using MIDI and FX to enhance dramatic/emotional components scenes; mixing complete audio tracks; delivering final stems to dub stage for dialogue and foley. Students will finish course with portfolio of work useful to apply for professional opportunities in commercial film industry. Course will also include career-building guidance for aspiring film composers. Instructors are Duke faculty composer John Supko and Emmy-nominated freelance film composer Karam Salem. Suitable for beginners as well as more advanced students.

I&E275 - Innovation & Entrepreneurship at the Intersection of Media, Entertainment and Technology

Course Description

The class will jump into the middle of the change and innovation happening at the intersection of Media, Entertainment and Technology. We will look at how we make, distribute and consume Media and Entertainment. We will focus on entrepreneurs and innovative companies and creators revolutionizing Media and Entertainment, as well as thought leaders and leading companies in the space. The class will feature Cases, articles, speakers, in class discussion along with a term long project.

I&E281 - Basics of Technology Commercialization

Course Description

This course covers assessment, development, and translation for a range of technical areas, such as pharmaceuticals, computer science, energy, and medical devices. The course is organized around the basic elements of taking technology from conception to development and commercialization, including understanding technology, developing a plan to get to market, and assessing the potential market. Combines lecture, case assignments, and discussion of real technology development opportunities.

I&E283 - Product Management

Course Description

When creating transformative technology-based products, the essential component to success and positive impact on society is the central role of humans. This course explores this intersection of the humanities and technology. Products are created in interdisciplinary teams through leadership, communication, experimentation, and critical thinking. Product managers must understand diverse cultures and customers. Concepts covered include needs finding, ethical product development, market opportunity analysis, strategy, road mapping, competitive analysis, and life cycle management. Learning takes place using a mix of individual and team-based assignments, presentations, and projects.

I&E295S - Arts Entrepreneurship

Course Description

Student teams work on specific arts-based entrepreneurial projects. Teams comprised of students from different backgrounds (arts, engineering, economics, computer science). Goals include creating business plan and launching ventures in areas of the arts. Structure an adaptation of Fuqua Program for Entrepreneurs. Ideal projects have real/positive impact on society. Students learn to situate artistic creativity within projects that meet societal need. Students from any background welcome to apply for enrollment. Must have interest in arts or working with artists in entrepreneurial context. Admission by permission of instructors.

I&E299S - Innovating For Social Impact- Leading with Purpose

Course Description

Innovating for Social Impact will explore the ever-evolving intersection between the public sector, private sector, non-profit organizations, and individuals in tackling the world's most pressing challenges. Experiential and interactive, this class will take a hands-on, service-oriented approach to learning about issues that are impacting people here locally, and around the globe, and the innovative solutions that are helping to drive progress. Through an examination of our role in the world as leaders, we will think deeply about our moral character - diving into our personal values, wrestling with hard questions, and creating individual leadership maps that help to guide how we want to show up in the world.

I&E350 - Customer Empathy & Brand Experience Design

Course Description

Before Dollar Shave Club, we went to Target to save on Gillette. We still buy traditional brands at traditional stores. But a host of these disruptors are cutting out the middleman while redefining brick-and-mortar retail. Amazon now gets us whatever we want, whenever and wherever we want it. Dollar Shave Club quickly amassed 3 million subscribers. These 'direct-to-consumer' brands control every customer interaction. These brands become as much about that experience as about the product itself. This requires customer empathy. Armed with these insights, we can create brands that reframe peoples' category expectations and, in best cases, enhance their lives.

I&E359A - Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)

Course Description

This course explores the complexities of global Los Angeles by focusing on issues that especially impact its marginalized communities. For the service-learning component, students volunteer at least 20 hours during the semester at nonprofit organizations engaged in the pursuit of social justice. This experience provides an opportunity to observe, participate in and reflect on the day-to-day implementation of social action, policy and organizing initiatives. As part of the volunteer commitment and in lieu of a final paper, students produce a documentary media project that communicates goals identified by and in collaboration with the community partner.

I&E360 - Entrepreneurial Finance

Course Description

This course covers key topics for venture investors and startup founders working with venture capital. Students will gain a solid understanding of the structure of venture capital funds, the role of risk versus return, and capital staging. The course also addresses the impact of dilution, expected returns, and important considerations around control and ownership. Additionally, students will explore essential terms that influence control, while developing a clear understanding of how business strategy aligns with financing decisions. This prepares students to navigate venture capital from both investor and founder perspectives.

I&E385 - New Ventures Discover

Course Description

This course is designed to lead you to a eureka moment by teaching you how to explore the world around you for problems worth solving. Instead of jumping directly into problem solving and solution development—which can often be wasteful without a clear understanding of a given market and customer need—this course focuses on research, exploration, and discovery. It asks students to set aside pre-conceived notions, avoiding some of their own blind spots, in order to do the necessary work of collecting data about market and learning to assess it as objectively as possible. This course is ideal for anyone who wants to excel at finding white space for new innovation and entrepreneurial action.

ICS116FS - Clash of Civilizations: In the Heart of Europe

Course Description

This course focuses on the battle between barbarian invaders, established communities, and new religions in the Middle Ages. What became Spain and Portugal were battlegrounds between faiths old and new, a clash of civilizations between Christianity, Judaism, and Islam that would inform future global conflicts. We explore the history of this confrontation at the crossroad of civilizations—between East and West, Africa and Europe—and its effect on our worldview today. A common culture was forged in science, mathematics, music, literature, philosophy, and mysticism, a shared legacy shaping world history and the current world order. Part of the 'Geopolitics and Culture' Focus Cluster.

ICS118 - Science and the Modern World: Introduction to the History of Science

Course Description

This course surveys the history of science from the sixteenth century through the present day. It addresses science not just as a body of knowledge and methods but as a cultural activity that has shaped and been shaped by modern global history. Topics will range across physical sciences, life sciences, earth and environmental sciences, and social sciences. This course takes a global perspective, with emphasis on parallels, differences, and interconnections among ways of knowing nature in different places and times, as well as the role of specific materials, environments, technologies, and practical problems in the development of modern science.

ICS119FS - Human Rights: Back to The Future, Looking at Roots and Current Reality of Human Rights

Course Description

This Focus course introduces students to a brief history of rights as a way to ground our exploration of current human rights challenges and what rights may be envisioned in the future. Rights have never been static. Recent changes in how we see rights include the right to truth in post-conflict societies and animal rights. We'll explore how cutting-edge thinkers contribute to an expanded horizon of rights. We will be engaging with activists, scholars, and artists. Open only to students in the Focus Program.

ICS120 - American Indian Nations Today

Course Description

This course is an introduction to the tremendous diversity of contemporary American Indian sovereign nations' and their citizens' experiences in the territory now known as the United States. American Indian Nations Today addresses the complexities of contemporary Native Nation topics by providing context for understanding the distinct political, legal, economic, social, and cultural institutions of Native Nations today. These topics and issues are analyzed from individual, local, and national Native and non-Native perspectives through readings, media, and occasional guest speakers.

ICS121 - Introduction to Contemporary Latin America

Course Description

This is an introductory, interdisciplinary survey course on modern Latin America focusing on contemporary social issues especially from the past five years. Each week will be dedicated to a different social problematic, including: political indigeneity; the legacy of African slavery; feminism and femicide; drug wars; migration and border issues; student movements; neoliberalism and resource struggles; and ecological contestation. Weekly meetings are driven by reading discussion, with context provided in lectures. You will conduct independent research in at least one group presentation and one final project. Required for students seeking the certificate in Latin American Studies.

ICS125FS - Languages, Margins, Borders: Representations, Practices, and Policies

Course Description

Examines the relationships between language and contemporary migration patterns that, directly or indirectly, affect millions of people across the globe, focusing especially on migration flows related to humanitarian challenges. Divided into three key themes, it analyzes the representation of migrants and migration in media and culture; language practices of migrants, including translanguaging and language learning; and policies towards migrants and their languages that pertain to governance in linguistically diverse societies. Interdisciplinary in approach, readings are drawn from linguistic anthropology and sociolinguistics, as well as political sociology and public policy studies.

ICS127CN - Asian Foodways in Migration

Course Description

Course examines the foodways and food cultures of East Asia and global Asian diasporic communities. Why does food define us, beyond basic survival? What can food tell us about individuals, communities, and cultural flows across space and time? Topics include: food as environmental and bodily processes; food as language, history, cultural memory, religious practice, identity and national markers; food as history of plenitude and hunger; the discourse of food as danger (from foreignness to cannibalism to zoonotic contagion). Course aims to introduce different disciplinary approaches and methodologies through the focus on foodways. No prior study of Asian languages or cultures is required. Part of 'How do Asian cultural heritages circulate?' first-year Constellation.

ICS131S - Gateway Seminar: Extraction: Humans and the Underground Earth

Course Description

Human societies depend on harnessing the resources of the underground earth. Subterranean aquifers shaped the world's food system. Gold deposits made currency and incited global wars. And fossil fuels now represent frontiers of planetary catastrophe, as buried carbon threatens life on earth. This course explores the often forgotten but indispensable role of the underground in making the modern world. Using the lens of 'extraction' – the taking of resources from beneath the earth – and drawing from historians, artists, environmentalists, geologists, journalists, and science fiction, we will develop global perspectives on the meaning and transformation of the underground from 1800 to today.

ICS144 - Introduction to East Asian Cultures: Narrating East Asia through Word and Image

Course Description

The study of East Asia makes sense not necessarily as a study of shared canons or of 'civilizational origins' or, shared 'Asian values': rather, modern East Asia can be productively studied in terms of shared historical, political, cultural concerns; the influx of new ideologies; the processes of 'becoming modern'; and of course, the positioning of East Asian area studies in the academy and the larger world. In this introductory course, we will be looking at 'Global East Asia' and its diasporas through all manners of storytelling, focusing on word-image narratives: Asian traditions of manga, manhwa, manhwa, as well as graphic novels.

Course Description

Focuses on selected anti-Judaic and antisemitic episodes from ancient antiquity through modern times, paying attention to both antisemitic texts and events. It evaluates competing theoretical frameworks for understanding antisemitism as ethnic, racial, religious and cultural phenomenon. Can antisemitism be understood as part of the history of racism or of other forms of ethnic hatred? Why were Jews so often target of hatred? How did both Jews and antisemites view their relations with each other? How do historians understand them? If there is limited continuity among antisemitic episodes, how can the prevalence and repetitiveness of antisemitism be explained?

ICS206 - Pigging Out: The Cultural Politics of Food

Course Description

Examines cultural influences of food while linking class, geography, and ethnicity to food practices. Investigates link between overeating and cheap food, under-eating and expensive food; discrepancy between cost and quality; changing diets in US and elsewhere; current debates regarding food production, specifically in the U.S., Americas, Africa and Asia. Discussion of Cargill companies' restrictions on spread of their hybrid grains; questionable agricultural practices, e.g. animal cruelty, overuse of pesticides, condition of migrants. Environmental policies examined in relation to pursuit of such industrial agricultural practices. Will include hands-on experiments with food preparation and tasting.

ICS235S - Writing for Global Audiences – Theories and Applications of Comparative Rhetoric

Course Description

This course examines how writing practices and communication strategies are shaped by cultural differences, focusing on how writers construct, adapt, and negotiate voice and identity for global audiences. We will analyze rhetorical traditions through non-Eurocentric theories—spanning cultural, geographical, and non-human perspectives—via rigorous reading, case studies, and discussion. By examining real-world examples like protest writings, we will explore methodologies for effective global communication. We will refine rhetorical knowledge through collaborative learning, honing adaptive, ethical, and sophisticated writing practices that meet the expectations of diverse global audiences.

ICS240 - What Is Europe?

Course Description

Exploration of the idea of Europe as a political, moral, and cultural identity. Examines the construction of such identity throughout history, ending with today's European Union, at a moment in which integration of 'Eastern' countries such as Turkey or Russia remains a hotly debated issue. Consistent attention devoted to literary, cinematic and artistic works which attempt to imagine a European Culture, as well as the evolution of aesthetics, and literary and art history.

ICS249S - Istanbul: Religion, Politics and Cosmopolitanism

Course Description

Istanbul is the only city in the world located on two continents. Byzantine, Ottoman, and Turkish cultural legacies allow the city to be read as a 'palimpsest', a multi-layered urban text of multiple, even contradictory meanings. Istanbul is an ideal site to explore imperial history, Islam and Christianity, migration, East/West relations, and cosmopolitanism. Through interdisciplinary sources in history, culture, theory, and politics, students will examine a variety of urban, architectural and social spaces including churches, mosques, public squares, and ethnic neighborhoods. Taught in English.

ICS250 - Love and Loneliness: What's Happening to Relationships in the Twenty-First Century?

Course Description

Long-standing ties to other—whether of kinship, marriage, or community—have long been considered to be fundamental to the human condition. But in an age of dissipated and shifting social worlds, the relationships we form with others are radically changing in the twenty-first century. The class will critically examine the ideals, premises, and obstacles for forming intimacy with others through such cases as hook-ups, solitary death, solo weddings, domestic violence, human/non-human attachments, and migrancy.

ICS251S - Literatures and Films of Pandemic

Course Description

This course explores past pandemics as a way to think about how to best live through COVID-19 and prevent or minimize future pandemics. Through examining literature and film, we will analyze the psychosocial dimensions of pandemic. We will read a variety of texts including: histories, fiction (Bulgakov, Porter, Tolstoy, Colson Whitehead); short essays; and films (e.g., Contagion, Outbreak). How do science, medicine, and society interact in a time of pandemic? How do pandemics reveal social inequities, and how could we use this knowledge to decrease disparities? And why do people turn to the humanities and arts in times of pandemic?

ICS260S - Global Stories, Local Issues

Course Description

What stories are there to tell about often overlooked objects and people and places? How can we research and share those stories with generosity and integrity? In every corner of our lives—the stickers on our computers, the plates at a local restaurant, the wood in our guitars—there is a story to be told that connects our individual experiences to broader, often global, phenomena. Participants will learn and use methods of ethnography and archival research to connect their experiences and their observations about a place, community, or thing to larger stories about culture and society, and they will practice writing about their research in engaging and broadly accessible ways.

ICS281 - K-Pop, Idols, and Fandom

Course Description

This course explores the complex relationship between Korean popular music (K-Pop) idols and the complex global online (anti-)fandoms that have formed around these industry entertainers. Through a critical analysis of K-Pop music videos, and documentaries, this course examines the historical roots of idol culture in South Korea, the current state of the K-Pop industry, fan behaviors, and the global expansion of K-Pop fandom to understand how these dynamics shape both the industry and the idols themselves. This course nuances concerns about what drives one to become an idol and what it means to be a fan by engaging in moral and ethical debates surrounding the emerging Western consumption of a predatory music genre with its own complex relationship to global music flows.

Course Description

The humanities help us learn more about the global experiences of people living with illness and disability. Using a global health humanities approach, we study illness and disability through biography, poetry, blogs, and art created by patients, families, friends, doctors, and caregivers. We look beyond data to find meaning through documentaries, theories of representation, and illness narratives. We explore different illness experiences, such as HIV/AIDS and Ebola; different disabilities, such as physical and cognitive; different gender identities and ages; and different locations, such as South Africa, West Africa, Papua New Guinea, Brazil, Haiti, and rural and urban USA.

ICS297S - Cross-Cultural Encounters

Course Description

The dynamics of cross-cultural interaction have actively shaped the world for many centuries now. This class explores some of the religious, social, and economic forces that fostered increasingly global contacts in history. In particular, it examines how centrally located and cosmopolitan Muslims played a critical role in connecting people of far-flung regions, cultures, and religions with one another. It surveys the myriad encounters of Muslims, Buddhists, Confucianists, Hindus, Jews, Christians and more across Afro-Eurasia and into the Americas. How did religious networks, processes and events foster historic exchanges of ideas, practices, and commodities across the world?

ICS299 - Ethics of Global Infectious Disease Control

Course Description

Examination of the role of ethical decision-making when controlling infectious disease epidemics. Applies classic public health ethics of balancing individual liberty vs. public good to the new global health context of emerging infectious diseases such as HIV/AIDS, Ebola, and SARS, plus re-emerging infectious diseases such as multidrug-resistant TB, polio, and cholera. Explores questions of resource allocation, mandatory or voluntary prevention measures, and ethical obligations of health care workers vs. responsibilities of individuals in the context of new global public health. Prior global health coursework recommended.

ICS308 - Development and Africa

Course Description

Addresses the vexed issue of economic development in Africa - its many failures, its occasional successes - from the early colonial period to the present. Focuses especially on the transition from the 1960s 'modernizing' moment to the millennium projects and humanitarian aid of the present. Will read the works of development experts, World Bank executives, anthropologists and historians, asking why this massively financed project has experienced such failure and exploring what can be done.

ICS310S - Imagining Human Rights: Science Fiction, Culture, and the Creation of Rights

Course Description

This course engages students in the intersection of speculative fiction and the history of ideas about human rights and what it means to be human. Using interdisciplinary tools, including history, anthropology, and public policy, students will explore created worlds and new ways of thinking about what rights humans—and other beings—have, how those rights are proposed, and what happens when those rights are contested. The course focuses on how the imaginary influences or presages the real, allowing us to experiment with what-ifs. Students will work in Duke's Locus Archives of primary documents on 20th-century science fiction spanning writers from China, the USSR., and Japan.

ICS318 - Visualizing the Caribbean

Course Description

Art (paintings, installations, performance art) and film on the Caribbean offer vantage points for analyzing alternative ways through which the region has been thought, imagined and produced. They are periodized semiotic productions that feed into and are marked by perspectives that are at once global, national, and even personal. Considering the constitutive contexts of these productions and performances, we will attempt to glean the diverse perspectives, and the way these have influenced sociocultural policy and offer alternative interpretations of diasporic lifeways of Caribbean people.

ICS330S - Narratives of Migration

Course Description

Stories of migration captivate us because they touch on universally important themes: home, family, belonging, identity, pain, loss. In this course, we will explore narratives, or stories, of migration, as told by refugees and immigrants from across the world, through different media: written, spoken, photographed, and constructed digitally on social media. This course approaches narratives of migration primarily from the perspective of sociocultural linguistics and discourse analysis, but we will refer to other scholarly traditions as well. This is a Service-Learning course: students will engage in a mentoring relationship with an immigrant student in a Durham high school.

ICS341S - African Cities, African Urbanization

Course Description

If the predominant mode of development in African cities is informal and unplanned giving rise to new modes of life, livelihood, and leisure beyond the organizing infrastructures of formal architecture and design in reality, the new African urbanism seems to give rise to two distinct conditions of life--the one crisis and the other ingenuity. Concerned to think through the gendered forms of labor arising from rapid urban growth taking place without conventional facilities, infrastructures and technologies, 'African Cities, African Urbanization' turns to the ethnography of informal settlement; to women's relationships to informality; to the ways in which productive and reproductive labor play their part in urban formation and deformation in African cities.

ICS343S - War

Course Description

This course seeks to critically understand a fundamental aspect of the increasingly interconnected global present through examining the question war. It will draw on works from different disciplines (anthropology, history, critical theory, fiction, political science, American studies), and we will constantly move across them, as it seeks to examine how war is conceptualized by different intellectual traditions and theoretical approaches and is experienced by multiple actors. In doing so, it will focus primarily, but not exclusively on the connections between US and the Arab World.

Course Description

Documentary approach to the world of food using fieldwork research. Topics of food and its preparation examined through deep stories of how food is raised, prepared, and presented in order to explore how the myriad ways in which what we eat reveal key biographical, economic, religious, and other truths about our cultures. Introduces students to the history of food writing and the concept of food in general as a nonverbal tool of communication. Photography, audio, and documentary writing employed.

ICS345S - Turkish Cultural History through the Novels of Orhan Pamuk

Course Description

An introduction into Turkish history (including the Ottoman Empire) through a comparative study of the historical novels and nonfiction of Nobel Laureate Orhan Pamuk. Addresses Pamuk's role as an intellectual-author who mediates between Islamic culture, secular modernity, the Turkish national tradition and an international canon of literature. Political implications of Sufism, cultural revolution, Orientalism, and post-colonialism. Secondary focus on representations of cosmopolitan Istanbul, political Islam and the military coup. ICS346S - Illiberal Nondemocracies: Focus on Eastern Europe and Asia

Course Description

As of 2016, only 11% of the countries in the world are liberal democracies. Some insight about how illiberal regimes function is a must to understand what is going on in the world. In this course, we explore illiberal and/or nondemocratic regimes of Eastern Europe and Asia—a perfect laboratory for the subject. We develop nuanced ideas about key concepts such as elections, representation, party rule, dictatorship, populism, patronalism, authoritarianism, and totalitarianism as well as the dilemmas of freedom, security, corruption, and development. We study the regimes of countries such as Hungary, Russia, Turkey, China and follow the news to see how political regimes evolve in real time.

ICS347S - Islam, Medicine, and Healing

Course Description

This course explores the global history of Islamic medicine and healing through the intersections of religion and medicine in multiple contexts. It investigates how questions of health, healing, and illness have been addressed across premodern patterns, colonial and post-colonial transitions, up to the present. Students will examine how different approaches to spirituality, law, and science congeal and compete in relation to the human body, animals, food, pharmaceuticals, medicine, and hospitals. Through considering traditional healing practices to contemporary bioethics, this class analyzes how religion and medicine have been constituted, lived, and experienced around the world.

ICS353 - Life and Death: Global Perspectives

Course Description

Anthropological investigation of customs, practices, and beliefs that get activated when people (and other living beings) die. What constitutes life as in when does it start, what determines well-being, how is it measured; and what constitutes death as in a good versus bad death, by what medical definition, and according to what rituals and beliefs. Comparative inquiry into such questions as why brain-death is not accepted in some cultures and why people in some places prefer to die rather than live after an amputation. Topics will include organ transplants, gang warfare, cancer, and warzones from China and Botswana to Mexico and the United States.

ICS371 - Reimagining the World Together: Why Friendship Matters for Our Future

Course Description

Explores friendship and why it matters in the frenzied world of 'likes' and 'swipes.' The average Facebook user has 155 friends. Instagram added a 'Close Friends' feature to distinguish friends from followers. Social media has weakened our sense of friendship. Still, Facebook users say that, of those 155 friends, they would trust only four in a crisis. Pursues the importance of friendship, not only as a place of private refuge but as a relationship of trust that facilitates insight and innovation and that has public purchase. Classes center on conversations between pairs of friends who bring their friendship, their work, and their imaginations to bear on the shape of the world in the future.

ICS376S - Language & Identity: How We Construct Identities and Reproduce Social Hierarchies Through Language

Course Description

Language is a central and pervasive feature of human identity through which we portray ourselves and negotiate social identities. With such practices we re/produce values, norms, social hierarchies, and the privilege these entail. Using examples from media, literature, and ethnographic data we will explore how speakers negotiate social identities through language and how ideas about it inform our understanding and interpretation of society and speakers within it. Topics include language, racism, gender, sexuality, class, ethnicity and ways that language and discourse construct and maintain a sense of belonging, otherness, truth, and value. Not open to students who have taken Romance Studies 207FS.

ICS397 - Global Health Ethics: Policy Choice as Value Conflict

Course Description

The primary foci of this course are: the ethics of engagement with marginalized/stigmatized populations; understanding the influence of power dynamics; and understanding the ways in which policies create structures that limit abilities. Students explore the roots of their personal value systems and those of others, in an effort to understand causes of conflict and ethical missteps in global health engagement. Involves reading texts and coming to class ready to engage in conversations and activities related to the learning objectives. Weekly 5-question quizzes help to ensure that students come to class prepared to engage with the material.

ICS398S - Global Humanitarianism

Course Description

This course explores humanitarianism as both a global phenomenon and a western model for engaging with the world. It examines the cultural and political conditions that make it possible for some people to be saviors and others to require saving. It focuses on the ways humanitarian interventions are increasingly as much about alleviating poverty and supporting political change, as about responding to crises caused by health epidemics, conflict or war, and environmental disasters. We will pay close attention to the impacts of humanitarian interventions good and bad, while critically exploring how local agendas and conditions shape and respond to these programs.

ICS413S - France-Asia: Cultural Transfers and Translations in a Globalized Context

Course Description

This class explores the dynamic contemporary Franco-Asian dialogue with a specific focus on China, Japan, Vietnam, Laos and Cambodia. Seeking to go beyond the East-West divide, the seminar investigates the current stakes of this dialogue, given its growing complexity after 1945. It examines the postcolonial legacy of France's occupation of Indochina, and how East Asia has also often been viewed as an 'Other,' serving to crystallize French anxieties over political and cultural power. It uses an interdisciplinary perspective encompassing novels, cinema, dance, visual arts, and critical theory to trace a web of exchanges in a globalized context. Taught in French.

ICS418S - The Global Caribbean

Course Description

The course introduces students to the Caribbean as a transnational space that reflects the global dynamics associated with flows of bodies via migration, labor, and goods all of which have undergirded the birth and evolution of the (primarily) Atlantic world economy. The Global Caribbean will have a historical sociological bent that frames the region as the first modern colonial space which has served as a template for other projects of colonial and postcolonial development elsewhere in the world. Emphasis will be on the way that freedoms and unfreedoms operate in the Caribbean and elsewhere. Discussions of how knowledge has conditioned the representation of the region will be entertained.

ICS434S - South Africa and the World

Course Description

Throughout the 20th century, South Africa had the largest economy and military on the African continent. Its strategic geographic position and mineral wealth in gold and uranium made it an important ally for the largest economies in the world. The Cold War enhanced its significance. However, in the second half of the twentieth century, its policies of apartheid rendered it an international pariah. This course examines the ways in which countries, international institutions, and millions of 'ordinary' people shaped the course of South African history. How did South Africa interact with the broader world, and how did the world try to affect South Africa's policies of white supremacy?

ICS436S - Imperialism and Islamism

Course Description

This course draws on transnational material to gain perspectives on the conflict between the US and its Islamist opponents. Its central concern is Islam's transnational past and relations of European empires to that past. It is guided by a transnational perspective framing specific case studies, original source material and arguments on the nature of global Islamist politics and on the US as an imperial power. Students will strengthen skills in global anthropological and historical analysis, using the conflict between the US and its Islamist opponents as a case study.

ICS438S - Race & Conservatism in the Twentieth Century U.S.

Course Description

This course looks at the history of race and modern conservatism in the United States. Students will learn about the history of conservative leaders, politicians, and grassroots activists starting in the civil rights era and ending with the January 6th insurrection. This class focuses on how the Republican Party, and conservatives more broadly, have dealt with questions of race in this period. Students will look at a multiracial conservative history that includes the voices of non-white members of the GOP and conservative movements. Students will spend a significant amount of time in the course researching and writing original historical papers connected to the themes of the course.

ICS459S - Photography in the Americas: War, Tourism, Art, and Protest

Course Description

Since it emerged in the 19th century until today, the camera has framed our way of seeing and understanding the world. In this course, students accompany the camera in its path through major events in the Americas—North, South, and Central—and examine the profound connections between them. We discuss photography as a weapon of war, a souvenir for tourists, an instrument of protest, an illustration of history, a journalistic and ethnographic tool, and an artistic medium. Key developments in photographic processes, from half tone printing to digital imaging, offer opportunities to reflect on the relationship between visual culture and technology, and art and politics. Taught in Spanish.

ICS211S-1 - South African Past and Present

Course Description

Explores the history of modern South Africa from the beginning of the mineral revolution in the 1860s to the post-apartheid present. We will cover mining-centered industrialization, the emergence of Afrikaner and African nationalism, segregationist ideology, and the construction of apartheid. We will examine the plethora of anti-apartheid struggles, and the regional and wide-ranging global efforts to end apartheid and usher in democracy. The establishment and promise of multi-party democracy, the AIDS epidemic, and the reemergence of social movements are all topics we will consider and we will conclude by reflecting on the place of South Africa as a regional, continental, and world power.

ICS211S-2 - Apartheid South Africa and Struggles for Democracy

Course Description

Working through an array of diverse organizations – including the African National Congress, the Pan African Congress, the Black Consciousness Movement, a host of liberal organizations, the churches, the trade union federations, and countless more - South Africans fought against apartheid from its inception. In 1994 they achieved a multi-racial democracy led by President Nelson Mandela. This seminar explores key themes in post-World War II South African history, paying special attention to the plethora of anti-apartheid struggles, while analyzing the tenets of apartheid policies.

ISS240L - Fundamentals of Web-Based Multimedia Communications

Course Description

Laboratory version of Information Science + Studies 240. Multimedia information systems, including presentation media, hypermedia, graphics, animation, sound, video, and integrated authoring techniques; underlying technologies that make them possible. Practice in the design innovation, programming, and assessment of web-based digital multimedia information systems. Intended for students in non-technical disciplines. Engineering or Computer Science students should take Engineering 206 or Computer Science 408.

ISS241L - Web Project Design and Development

Course Description

Follow-on to ISS 240/240L. Students should be experienced with basic HTML and CSS. Information and graphic design; use-case development; readings and group critiques. Continued work with HTML, CSS, HTML5, Javascript. Introduction to PHP, MySQL and/or other server-based authoring techniques. Creation and templating of blogs, wikis, and content management systems. Web 2.0 and 3.0 technology implementation. Embedded media and objects. Intellectual property and fair use. User testing. Short exercises, group work, individual semester project, and public site launch. Instructor consent required.

ISS250 - Building Global Audiences

Course Description

Marketing and publicity are so important to audience building that, 20 years ago, expanding beyond local audiences usually couldn't be accomplished without huge advertising budgets. However, thanks to the Internet, you can build a global audience from your dorm room. This class explores how. Learn about social media, search engine optimization, virality, content marketing, growth hacking, and other digital audience building strategies. They're difficult to learn and time consuming to execute, so expect to struggle. We'll learn as much from our failures as we will from our successes as we discover what it takes to cultivate global awareness for an idea without ever leaving Durham.

ISS252 - Learning to Fail

Course Description

Most people spend their lives afraid of failing. Yet, many of the world's most successful people failed numerous times on their paths toward success. The underlying question of this class is if failing is as antithetical to learning as we're taught to believe. To explore this question, we will test ways of using failure as a strategy for learning. We will experiment with failure to learn how it can make us better as we develop our skills as innovators, specifically focusing on the earliest stage of creativity: ideation. We will use failure through experimentation as a technique for problem definition and needs discovery which, in turn, will help us validate the quality of our ideas.

ISS253 - Social Marketing: From Literary Celebrities to Instagram Influencers

Course Description

Typical Duke students spend hours each day using social media. You've surely heard the platforms described as 'revolutionary,' and you've also heard them described as 'time wasters.' What you probably haven't thought about is how similar they are to previous 'revolutionary' communications technologies like novels, newspapers, and even language itself. This course explores ways in which studying the masters of previous 'social' media technologies—the Shakespeares, Whitmans, and Eliots of the world—can help us understand how influencers on digital social media leverage the same platforms you use every day to market themselves, build their brands, and grow their audiences.

ISS255 - Humanities Text Mining and Meaning

Course Description

The digital text has led to new forms of research and is receiving increasing attention from artificial intelligence (AI). The application of machine learning to text, known as text mining, presents unique intellectual challenges that require major contributions from the humanities. This course introduces students to the interdisciplinary domain of text mining through a humanities-based media-theoretic framework. Students will first learn text data prep skills and practices fundamental to meaningful analysis. The semester will later introduce unsupervised machine learning and topic modeling, and culminate in a group project. Not recommended for advanced CS students.

ISS262 - Designing Transformative Learning

Course Description

The term 'open source' is frequently used to denote software source code that is freely available, modifiable, and shareable. However, the term has much wider applicability and relevance. The core values of open source--open knowledge and access to information, collaboration and community, transparency and meritocracy, inclusion and diversity, and iterative creation and adaptability--have profound implications for 21st century learning. In this learner-centered, project-based course, students will research the intersection of open source concepts, technology, and education innovation and share their knowledge across public-facing open-access media.

ISS304S - Introduction to Digital Culture: Media Theory, Politics, Aesthetics

Course Description

What is digital culture today? In the first two decades of the 00s, digital culture has become more directly related to the emergence of social media platforms (from Youtube to Instagram, from Snapchat to Tiktok). Digital culture is now shaped by artificial intelligence. We make new friends through dating apps and by becoming followers. We know that biases of race, class, gender and sexuality are embedded in everyday search algorithms. This course welcomes students to participate in these emerging discussions and experiment with new ideas that are shaping digital culture today.

ISS306S - Creative Cartography: Art and Science, Culture and Nature

Course Description

Students will learn how maps and map-making have always existed in a contentious position between art and science, and between culture and nature. The course will combine discussions of readings on critical cartography, data visualization, and Historical GIS (HGIS) with hands-on tutorials using ArcGIS, Adobe Illustrator, and analog drawing. Labs and final projects will emphasize how the form of a map (and all its inherent presumptions of accuracy, reality, and precision) can be manipulated to make art that tells new stories about people, places and things that run counter to dominant narratives. Prior experience with vector-based design software and/or GIS is recommended, but not required.

ISS310S - Archives As Data: Structuring Information for Humanities Scholarship

Course Description

A discursive and hands-on engagement with questions of how archival materials can be transformed into data, why scholars may engage archives as data, what kinds of ethical concerns arise when archives are understood as data, and how to critique archival data scholarship. Drawing on library and information sciences and humanities scholarship, learn to combine archival theories with theories of data structuring when developing research questions. Gather and structure data from many types of archival materials representing a range of cultures and communities housed in Duke's David M. Rubenstein Rare Book & Manuscript Library. Perform humanistic analyses via both digital and analog methods.

ISS313L - Advanced Data Visualization

Course Description

This course is all about the art and science of visualizing data. Learn about the what (types of visualizations, tools to produce them), the how (start with a design, pre-process the data, map it to graphical attributes, make strategic decisions about visual encoding, post-process for readability and visual appeal), and the why (the theory behind the grammar of graphics). Evaluate the clarity, effectiveness, and honesty of visualization choices and improve (your and others') visualizations through an iterative design process. Discuss the role of statistical graphics in modeling and inference. Do it all in R, reproducibly, and using a variety of modern data visualization packages. Prerequisite: Prerequisite: Statistical Science 198L or (198L-1 and 198L-2) or 199L or (199L-1 and 199L-2) or 210L.

ISS321 - Sample & Remix: Contemporary Cultural Production Across Arts & Media

Course Description

Sampling & remixing of previous works is a major mode of contemporary cultural production cutting across media and cultural practices. This course analyzes its genealogy, technological underpinnings, legal presuppositions and aesthetic consequences. Tensions between copy and copyright, between claims to originality and mechanical reproduction characterize this contemporary regime, now deployed globally. Its cultural implications will be distinguished from related modes of making art and meaning (imitation, citation, collage, montage...) and tracked through various objects: popular and avant-garde cinema; videogames, ready-mades and Pop Art; Hip-Hop and Electro; literature and DJ culture.

Course Description

What is a woman? What is a man? Did Renaissance minds consider other options? Could women be intellectuals? Were male bodies necessary for reproduction? What taboos about sex and power were almost too scandalous even for the elites? Much as it does today, talk of sex and gender sparked hot debate throughout Renaissance Europe. Between the fourteenth and seventeenth centuries, bodies were sites of fascination and dread. This course studies 'Bio-Lit' (literature about life and the body), drawing on examples of epic and lyric poetry, medical treatises, recipe books, experiment logs, cosmetic how-to guides, paintings, and early opera. Offered as part of the FOCUS program.

ITALIAN225 - The Problem of Love in Western Literature

Course Description

Love causes problems. It can inspire passion or madness; foster alliances, destroy friendships, provoke war, broker peace. It impacts communities and raises fundamental questions about life. Exploring amorous discourse from two millennia –Plato's erotic ascent, Virgil's deceived Dido, Ovid's rules of seduction, Boccaccio's legitimization of female desire, Michelangelo's homoerotic poetry, Leonardo's sublimated impulses, Foscolo's tragic obsession, comic uncertainties of Svevo's modern lovers, and love from afar in Montale—we will see what changes, what persists, and ultimately come to understand what we mean when we talk about love today.

ITALIAN256 - Italian Baroque Art

Course Description

This course will trace the development of the Italian baroque in architecture, sculpture and painting. It will consider a variety of themes relevant to Baroque artistic production, including religious influences on the art of the period, namely the Reformation and the Catholic Counter Reformation; economic influences; central versus peripheral locations; issues of gender and sexuality; patronage; architectural site and meaning; urban planning and transformation; the artist, his workshop and rivalries; decoding the myths of artistic genius; and seventeenth-century primary sources.

ITALIAN305S - Italy in the Age of Fake News: Media, Populism and Disinformation in global Perspective

Course Description

The role of 'fake news' in shaping the information ecosystem can be hardly underestimated. While debates about fake news tends to be framed around the U.S. national context, the goal of this class is to answer the question: 'what is disinformation?' by using Italy as a case study. The strong presence of populist movements and Italy's complex media ecosystem makes it an important laboratory to understand how disinformation rises and spreads in a specific social context. While this class will focus on media and disinformation in Italy, it will also analyze how this disinformation is deeply intertwined with related discourses and practices in other countries and languages.

ITALIAN340SA - Divas: Screens, Stages, and Italian Celebrity

Course Description

Italy is spectacular. But what (or even who) constitutes its fame? Historically, divas first emerged on the Italian stage before anywhere else in Europe, transforming into iconic figures of awe, outrage, admiration, scandal, wonder, and celebrity. From the prima donna of early Italian theater to the rise of the Baroque castrato, and the heroines of nineteenth-century opera to the icons of post-war Neorealism, divas have shaped the representations of Italian identity for centuries. This course is media-immersed with materials drawn from the history of theater, music, opera, film, and art. Course topics evolve in tandem with the site visits during the program to various cities, theaters, museums, libraries, and outdoor spaces. Course conducted in English through the Duke in Bologna program.

ITALIAN343S - The Acoustic Image in the Renaissance

Course Description

Examines the dynamics between Renaissance voice, sound, and the body. Navigates the intersections between literary and performance histories. Studies the crossroads of personal and collective identity, issues of gender relations, factors of agency and exclusion, and the instruments of power that govern vocal expression. Readings and listenings include works by Homer, Ovid, Sappho, Petrarch, Costa, Monteverdi, Behn, Lope de Vega, Corneille, and others. Thematic units featured: voice in theory, the autobiographical pen, the political chorus, and performing the resilient body. Questions discussed: Who is allowed a voice? What do voices measure? What voices get heard? And who listens?

ITALIAN377S - Language & Identity: How We Construct Identities and Reproduce Social Hierarchies Through Language

Course Description

Language is a central and pervasive feature of human identity through which we portray ourselves and negotiate social identities. With such practices we re/produce values, norms, social hierarchies, and the privilege these entail. Using examples from media, literature, and ethnographic data we will explore how speakers negotiate social identities through language and how ideas about it inform our understanding and interpretation of society and speakers within it. Topics include language, racism, gender, sexuality, class, ethnicity and ways that language and discourse construct and maintain a sense of belonging, otherness, truth, and value. Not open to students who have taken Romance Studies 207FS.

ITALIAN378S - Svevo and World Literature

Course Description

Italo Svevo wrote some of the most important modern Italian novels, like 'Zenos Conscience,' and was promoted by James Joyce. This class examines Svevo in his various contexts, including Italian, Austrian, German, Jewish, Triestine, European, and Modernist, to understand the strengths and weaknesses of classifications according to language, religious or cultural background, nation, education, and literary movement. By reading Svevo in the company of authors, such as Pirandello, Proust, Woolf, Kafka, and Shakespeare, as well as thinkers like Freud and Darwin, students will explore Svevos work in detail, while also investigating ideas of influence, literary connections, and world literature.

ITALIAN381S - Mapping Jewish Modernism

Course Description

Students research Jewish modernism through questions of geography and movement, pointing to the many places where modern Jewish art has been created and the experiences of migration, exile, diaspora, and resettlement that shaped this work. We discuss the varieties of ways that different art forms, including literature, theater, music, art, film, architecture, and dance, can be mapped. We analyze mapping in terms of the movements of people (artists, authors, and directors), of objects (paintings, literature, performances, and films), and within the works themselves. Work with the Rubenstein Library will lead to projects that contribute to an exhibit in Perkins Library and a digital site.

ITALIAN385 - Mafia at the Movies

Course Description

A study of the mafia, and by extension, of Italy's 'dark heart,' in its historical, social, economic, cultural, and political dimensions, as represented in a wide range of Italian and American films and television productions, from documentary to comedy. Course will also consider possibilities and limits inherent to cinema in representing, and influencing cultural and social realities. Taught in English, Italian majors and minors should inquire with the professor about the possibility of concurrently enrolling in a tutorial for credit towards the language requirement for the major or minor.

ITALIAN483 - What Machiavelli Really Says

Course Description

Everyone knows what 'Machiavellian' means, but what does Machiavelli really say? Reading his classical political texts, 'The Prince,' the 'Discourses on Livy,' and 'The Art of War' in the company of his literary works, including 'Mandragola,' we will examine how Machiavelli's ideas about power, deception, language, ethics, and representation emerged from his reading of Plato, Livy, Ovid, and Dante, while also exploring the reception and consequences of his ideas. Just as Machiavelli searched history for answers to his own political situation, our guiding question cannot help but be 'What would Machiavelli do?'

JAM101CNS - Information, Technology, Ethics and Policy

Course Description

This is a course about the politics, policy and ethical dilemmas surrounding information and technology. The course will explore technology; not only about how to use technology nor even simply how people, groups or organizations use technology, but how politicians, policymakers, economists, citizens and society watchers talk about, worry about and understand technology. The class will explore digital equity and the ethical dilemmas society confronts by technology's use and misuse. It will also examine other technologies: phones, networks, etc., as well as uses, artificial intelligence, social media and more.

JAM368S - Race and The Media

Course Description

The need for media coverage more finely attuned to race and prejudice is crucial. Instead of informing audiences, many of the fastest-growing news programs and media platforms are invoking and exploiting old prejudices and deeply-rooted fears to compete for increasingly narrow audiences. Using the same tactics employed to mobilize political parties, they employ coded messages and demonize opposing groups as their audience shares soar and website traffic ticks up. This course dissects the powerful ways modern media feed fears, prejudices, and hate.

JAM392A-10 - The Arts, Culture, and Performance of New York

Course Description

This course introduces its participants to New York through its rich artistic, cultural, and performance offerings—drawn from art, dance, film, music, literature, and theater. Visiting all five boroughs, they contemplate how the identities of New Yorkers—informed by the city and by ability, class, ethnicity, gender, race, and sexuality—are performed in the theater of everyday life: in parks, streets, subways, and especially the city's diverse neighborhoods and restaurants.

JAM392SA-30 - Duke in New York: New York, New York

Course Description

New York City is an idea as much as a real place. New York is always on the go. In this course, we focus on the people, places, and institutions that make and remake New York. We traverse each of New York's five boroughs, paying attention to the movements of people, culture, and food within them as well as attend to the social dynamics of geography and gentrification. Paralleling the evolution of the city's neighborhoods and ethnic enclaves is the establishment of its globally-known institutions. Experiencing the interplay of individuals and institutions allows us to examine life in the city through the lens of what geographer Ruth Wilson Gilmore terms an 'infrastructure of feeling.'

JEWISHST156 - Scripture: Judaism, Christianity, and Islam

Course Description

Judaism, Christianity, and Islam are characterized as religions of the book. Their sacred texts are foundational to the faiths they represent. In spite of shared histories, overlapping contents, and parallel perspectives, their Sacred Scriptures diverge in key points of content, interpretation, and uses by their communities. In this course, students will be introduced to the history, contours, and content of the Hebrew Bible/Old Testament, the New Testament, and the Qur'an and hadith, exploring issues of scripture and authority, texts and manuscripts, translation and interpretation, performance, canonicity, ethical issues, and contemporary use.

JEWISHST164S - Gateway Seminar - Antisemitism: Ethnicity, Race, Religion, Culture

Course Description

Focuses on selected anti-Judaic and antisemitic episodes from ancient antiquity through modern times, paying attention to both antisemitic texts and events. It evaluates competing theoretical frameworks for understanding antisemitism as ethnic, racial, religious and cultural phenomenon. Can antisemitism be understood as part of the history of racism or of other forms of ethnic hatred? Why were Jews so often target of hatred? How did both Jews and antisemites view their relations with each other? How do historians understand them? If there is limited continuity among antisemitic episodes, how can the prevalence and repetitiveness of antisemitism be explained?

JEWISHST206FS - Clash of Civilizations: In the Heart of Europe

Course Description

This course focuses on the battle between barbarian invaders, established communities, and new religions in the Middle Ages. What became Spain and Portugal were battlegrounds between faiths old and new, a clash of civilizations between Christianity, Judaism, and Islam that would inform future global conflicts. We explore the history of this confrontation at the crossroad of civilizations—between East and West, Africa and Europe—and its effect on our worldview today. A common culture was forged in science, mathematics, music, literature, philosophy, and mysticism, a shared legacy shaping world history and the current world order. Part of the 'Geopolitics and Culture' Focus Cluster.

JEWISHST210 - The Good Life: Religion, Philosophy, and Life's Ultimate Concerns

Course Description

What does it look like for a human life to go well? What leads to human flourishing or 'happiness' or 'success'? What is freedom? Love? Justice? What is the basis for ethics? What is our relationship to the natural world? What is the significance of death? How do our beliefs (or lack thereof) about God or the gods shape how we view the world? We will examine how philosophical or religious traditions around the globe have answered life's biggest questions. Traditions may include Confucianism, Islam, Christianity, Stoicism, Judaism, Buddhism, Hinduism, scientific naturalism, expressive individualism, and utilitarianism. Part of the Transformative Ideas Sophomore Program.

JEWISHST215S - Hinduism and Judaism: Culture, Religion, and Identity

Course Description

Using interdisciplinary comparative frameworks, this course will study how two major world religions, Hinduism and Judaism, create a dynamic cosmos that brings abiding meaning to the daily lives of millions of believers. Explores concepts such as 'ritual' and 'myth' by examining Jewish and Hindu materials from early to modern times. The broader aims of the course are to understand how each tradition imagines time, space, and matter, and to explore how claims about the sacred are transformed in modernity. Ultimately, it aims to inspire reflection on how religion, identity and culture function in the modern world.

JEWISHST337 - America from Abroad: Literature and Cinema

Course Description

This course explores the portrayals of America, especially the United States, from authors and directors who are not American and who often have never even seen America. We will read short stories, novels, and graphic novels and watch films. What do these works from other parts of the world have to say about dreams, race, love, immigration, and space in America? We will discuss imaginary Americas in order to understand these important works within their contexts, to examine how foreign representations of America have contributed to our idea of America, and to consider what imagined Americas suggest about us here in North Carolina.

JEWISHST361 - The End of The World: Apocalyptic Arguments from Antiquity to the Present Day

Course Description

Traces end-time arguments, predictions, and prophecies from the second-century BCE until the present day. Why are prophecies of doom so compelling? Why must time come to a stop? What happens after the world's end? Who decides? Close study of the role of apocalyptic eschatology in Judaism, Christianity, and Islam across time and place provides a lens for interpreting more recent apocalyptic movements, texts, claims, and artistic productions.

JEWISHST378S - Svevo and World Literature

Course Description

Italo Svevo wrote some of the most important modern Italian novels, like 'Zenos Conscience,' and was promoted by James Joyce. This class examines Svevo in his various contexts, including Italian, Austrian, German, Jewish, Triestine, European, and Modernist, to understand the strengths and weaknesses of classifications according to language, religious or cultural background, nation, education, and literary movement. By reading Svevo in the company of authors, such as Pirandello, Proust, Woolf, Kafka, and Shakespeare, as well as thinkers like Freud and Darwin, students will explore Svevos work in detail, while also investigating ideas of influence, literary connections, and world literature.

JEWISHST381S - Mapping Jewish Modernism

Course Description

Students research Jewish modernism through questions of geography and movement, pointing to the many places where modern Jewish art has been created and the experiences of migration, exile, diaspora, and resettlement that shaped this work. We discuss the varieties of ways that different art forms, including literature, theater, music, art, film, architecture, and dance, can be mapped. We analyze mapping in terms of the movements of people (artists, authors, and directors), of objects (paintings, literature, performances, and films), and within the works themselves. Work with the Rubenstein Library will lead to projects that contribute to an exhibit in Perkins Library and a digital site.

JEWISHST383S - Jewish Italy and its Literatures: The Most Ancient Minority

Course Description

Jews in Italy are often referred to as 'the most ancient minority' or 'the most ancient of minorities' because of their continuous presence in Italy, from pre-Christian times to today. This course examines the wealth of literature, art, and culture that they have produced and inspired. We will discuss a range of works, from antiquity to modern day Italy, to analyze Jewish Italy and its representations. We will scrutinize representations of the ghetto, Jewish learning, antisemitism, family life, memory, and the Holocaust.

JEWISHST393 - Jewish Studies Capstone I

Course Description

This course gives students the opportunity to apply and extend what they have learned in their Jewish Studies courses in pursuing their own research project under faculty supervision. A proposal for directed research should include a detailed outline of the research problem, a brief description of the state of the field, and a bibliography. The capstone should result in a substantive, well-written research paper or an equivalent final product. The supervising faculty will typically be a Jewish Studies faculty but the Director may approve exceptions. Students pursuing GWD in Jewish Studies typically take 393 in the fall and 394 in the spring. Funding for undergraduate research is prioritized for students enrolled in a capstone.

JEWISHST432S - Modern German-Jewish Culture: Vienna, Prague, Berlin

Course Description

Explores the outsized intellectual and cultural output of Jews in pre-WWII Europe. The birth of psychoanalysis and the fallout of Jewish assimilation in Vienna. The legendary Golem figure and the writings of Franz Kafka and his circle in Prague. Avant-garde Jewish artists, writers, and filmmakers in Weimar Berlin. Each unit examines specific historical contexts and broader artistic movements. Topics include secularization and conversion; hybrid identities; emigration to Palestine and the U.S.; antisemitism and rising fascism; and 'authentic' Jewishness in Eastern Europe. Taught entirely in German. Recommended prerequisite: a 300-level German course or equivalent.
