A.1. About the University Bulletins

The Office of the University Registrar is responsible for compiling, producing, and maintaining the bulletin for each school at Duke University. The content for the bulletins is established by the schools in conjunction with the Duke University Bulletins Policy.

The information in this bulletin applies to the academic year 2025-2026 and is accurate and current, to the greatest extent possible, as of August 2025. All bulletins are published online and serve as static documents for historical records of the university. The university reserves the right to change programs of study, academic requirements, teaching staff, the calendar, and other matters described herein without prior notice, in accordance with established procedures.

Duke University Registrar: Frank Blalark, Assistant Vice Provost and University Registrar

Coordinating Editor: Maggie Douglas

Publications Coordinator: Patrina W. Hemingway

Bulletin School Coordinators:

- Divinity School: Deborah Hackney, Katherine Smith, and Jessica Williams
- Fuqua School of Business: B. Tate
- The Graduate School: Scott Behm and Matthew Jones
- School of Law: Frances Curran and Monica Roberson
- School of Medicine: Marcie Ellis and Cierra Harris

A.2. University Mission & History

In this section:

- [A.2.a. Mission Statement](#)
- [A.2.b. Duke University: A Brief Narrative History](#)

[A.2. University Mission & History](#)

A.2.a. Mission Statement

Approved by the Duke University Board of Trustees October 1, 1994, and revised February 23, 2001, the Mission Statement for Duke University reads as follows:

"James B. Duke's founding Indenture of Duke University directed the members of the University to 'provide real leadership in the educational world' by choosing individuals of 'outstanding character, ability, and vision' to serve as its officers, trustees and faculty; by carefully selecting students of 'character, determination and application;' and by pursuing those areas of teaching and scholarship that would 'most help to develop our resources, increase our wisdom, and promote human happiness.'

"To these ends, the mission of Duke University is to provide a superior liberal education to undergraduate students, attending not only to their intellectual growth but also to their development as adults committed to high ethical standards and full participation as leaders in their communities; to prepare future members of the learned professions for lives of skilled and ethical service by providing excellent graduate and professional education; to advance the frontiers of knowledge and contribute boldly to the international community of scholarship; to promote an intellectual environment built on a commitment to free and open inquiry; to help those who suffer, cure disease, and promote health, through sophisticated medical research and thoughtful patient care; to provide wide-ranging educational opportunities, on and beyond our campuses, for traditional students, active professionals and life-long learners using the power of information technologies; and to promote a deep appreciation for the range of human difference and potential, a sense of the obligations and rewards of citizenship, and a commitment to learning, freedom and truth.

"By pursuing these objectives with vision and integrity, Duke University seeks to engage the mind, elevate the spirit, and stimulate the best effort of all who are associated with the University; to contribute in diverse ways to the local community, the state, the nation and the world; and to attain and maintain a place of real leadership in all that we do."

A.2. University Mission & History

A.2.b. Duke University: A Brief Narrative History

Duke University traces its origins to a small school that opened in 1838 in Randolph County, North Carolina. Originally a preparatory school for young men called the Union Institute Academy, it was then chartered as a teaching college named Normal College by the state of North Carolina in 1851. The school underwent another transformation in 1859 when it turned to the Methodist Church for financial support. Reflecting the new partnership, the school's name changed to Trinity College.

From 1842 to 1882, Braxton Craven served as the principal and then president of the institution, overseeing its transition from a tiny schoolhouse to a full-fledged college. Shortly before his death, he helped to establish the Cherokee Industrial School at Trinity College, one of numerous schools established in the United States to "westernize" indigenous students, in this case boys and young men from the Eastern Band of the Cherokee. The School at Trinity lasted only a few years. It is worth noting that Craven enslaved several Black people prior to the Civil War, and that a number of other faculty and trustees were also enslavers.

John F. Crowell, Trinity College's president from 1887-1894, suggested that moving the college to an urban setting would attract more students, faculty, and financial support. With Crowell's encouragement, the trustees agreed to move the college, and after a spirited competition among regional cities, Trinity opened in Durham in 1892. Local tobacco magnates Washington Duke and Julian S. Carr assisted in providing land and money to Trinity. In 1897, at Washington Duke's request, the school began admitting women as regular students, making it an early co-educational institution. Carr's support for Trinity College was recognized with a building named in his honor in 1930. His name was removed in 2018 in light of his virulent white supremacist beliefs and actions.

Trinity prospered in its new location, and in 1924 the school was again transformed through philanthropy. Washington Duke's son James Buchanan Duke established the Duke Endowment, and the charitable foundation infused the college with funds. The trustees changed Trinity College's name to Duke University as a memorial to his father. The new funds supported the construction of a new campus, designed in a Gothic style by the Philadelphia architectural firm of Horace Trumbauer. The chief designer of West Campus, as well as the re-envisioned East Campus, was Julian Abele, a Black architect whose role in creating the architecture of Duke University was largely overlooked during his lifetime. In 2016, the main quad on West Campus was renamed Abele Quad in his honor.

President William P. Few (1910-1940) oversaw this metamorphosis of a small college into a complex university. In 1930, the Trinity College site (today's East Campus) became the Woman's College, while the West Campus served as the grounds for the all-male Trinity College. In 1972, Trinity College merged both colleges of men and women into what is now known as Trinity College of Arts and Sciences. Other schools include the School of Religion and Graduate School founded in 1926, the School of Medicine and hospital in 1930, and the School of Nursing in 1931. Originally established in 1904, the Law School reorganized in 1930. In 1938, what is today's Nicholas School of the Environment opened, and in 1939 the university formed what is now known as the Pratt School of Engineering. The last of James B. Duke's desires for the university was fulfilled when what is now the Fuqua School of Business, opened in 1969. The Sanford School of Public Policy became Duke's tenth school in 2005. The school was named for President Terry Sanford, formerly the governor of North Carolina, who supported a number of initiatives in the 1970s and 1980s to build Duke's reputation for excellence, growing the university's national and international profile.

Long a segregated institution, Duke first admitted Black graduate and professional students in 1961 and Black undergraduates in 1963. In 1968, a major student protest known as the Vigil demanded pay increases and better treatment of hourly workers, most of whom were Black. In 1969, Black students protested in what is now known as the Allen Building Takeover, demanding improved services and treatment for Black students. The protest resulted in the formation of what is now called the Department of African and African American Studies.

Faculty at Duke produce influential scholarship across a wide range of disciplines and professions. Two Duke faculty members have received the Nobel Prize in Chemistry: Professor Robert Lefkowitz in 2012 and Professor Paul Modrich in 2015. Duke researchers have mapped the human chromosome and led research into the treatment of HIV and AIDS. Duke faculty also research pressing social issues, producing high-impact scholarship on such topics as

election districting and public health. Faculty authors have written books of award-winning nonfiction, fiction, and poetry, and have won awards ranging from the National Book Award to the Pulitzer Prize. Fifty Duke faculty are members of the American Academy of Arts and Sciences. Duke students have many opportunities to work with leading faculty in labs and on projects, ensuring hands-on experience during their course of study.

Duke has a number of notable athletic achievements. Best known is the men's basketball team, coached by Mike Krzyzewski from 1980 to 2022. The team has earned 5 national championships. The women's golf team holds the record at Duke for most national championships, at 7. Duke football has been played since the 1880s, when President Crowell coached the team himself. During the 1930s and 1940s, the football team competed in and won a number of bowl games, earning the nickname "Iron Dukes." The Rose Bowl game of 1942 was played in Durham due to wartime concerns on the West Coast and remains the only Rose Bowl played outside of Pasadena, California.

International programs have expanded over the last several decades, bringing international students to Duke in Durham and expanding international opportunities for Duke students. In 2005, Duke partnered with the National University of Singapore and opened the Duke-NUS Medical School. In 2014, graduate programs at Duke Kunshan University began, followed by undergraduate programs in 2018. DKU is a partnership between Duke and Wuhan University in Kunshan, China.

The university has changed in many ways since its founding, and like other historically white schools it continues to confront issues of racism, sexism, and other inclusion and equity challenges. Students of color and international students now represent more than 50% of the student body. Duke's hometown of Durham has also grown and changed, and Duke and Durham collaborate on topics ranging from community service to downtown development.

Ever evolving, Duke University strives to meet the stated aims of the university: "to foster a lively relationship between knowledge and faith; to advance learning in all lines of truth; to defend scholarship against all false notions and ideals; to develop a love of freedom and truth; to promote a respectful spirit of dialogue and understanding; to discourage all partisan and sectarian strife; and to further the advancement of knowledge in service to society."

Updated September 21, 2020. Learn more from [University Archives](#).

A.3. University Leadership & Faculty

Full leadership profiles for those listed in this section are available at duke.edu/about/leadership.

In this section:

- [A.3.a. Executive Leadership](#)
- [A.3.b. Academic Leadership](#)
- [A.3.c. University Administration](#)
- [A.3.d. The Faculty](#)

A.3. University Leadership & Faculty

A.3.a. Executive Leadership

Vincent E. Price, President

Craig Albanese, CEO, Duke University Health System

Daniel Ennis, Executive Vice President

Alec Gallimore, Provost

Mary E. Klotman, Executive Vice President for Health Affairs, Duke University

A.3. University Leadership & Faculty

A.3.b. Academic Leadership

Deans of Schools and Colleges

Kerry Abrams, James B. Duke and Benjamin N. Duke Dean, School of Law

Suzanne Barbour, Dean, Graduate School

Lori Benneer, Stanback Dean, Nicholas School of the Environment

Gary Bennett, Dean, Trinity College of Arts and Sciences

Edgardo Colón-Emeric, Dean, Divinity School

Mary E. Klotman, Dean, School of Medicine

Jerome P. Lynch, Dean, Pratt School of Engineering

Mary Frances Luce, Interim Dean, Fuqua School of Business

Manoj Mohanan, Interim Dean, Sanford School of Public Policy

Micheal Relf, Dean, School of Nursing

Vice Provosts

Lee Baker, Vice Provost for Undergraduate Education (effective October 1)

Edward Balleisen, Vice Provost for Interdisciplinary Studies

Abbas Benmamoun, Vice Provost for Faculty Advancement

David Bowersox, Vice Provost for Finance & Administration

Mary Pat McMahon, Vice Provost/Vice President of Student Affairs

Mohamed Noor, Executive Vice Provost

Noah Pickus, Associate Provost

Deborah F. Rutter, Vice Provost for the Arts

Joseph Salem, Rita DiGiallonardo Holloway University Librarian and Vice Provost for Library Affairs, & Interim Vice Provost for Learning Innovation & Lifetime Education and Digital Education

Toddi Steelman, Vice President and Vice Provost for Climate and Sustainability

A.3. University Leadership & Faculty

A.3.c. University Administration

Maggie Epps, Secretary to the Board of Trustees and Chief of Staff to the President

Tracy Futhey, Vice President for Information Technology and Chief Information Officer

Leigh P. Goller, Chief Audit, Risk and Compliance Officer

Kimberly Hewitt, Vice President for Institutional Equity and Chief Diversity Officer

David L. Kennedy, Vice President for Alumni Engagement and Development

Nina E. King, Vice President and Director of Athletics

Jennifer Lodge, Vice President for Research & Innovation

Antwan Lofton, Vice President of Human Resources & Chief Human Resources Officer

John J. Noonan, Vice President for Facilities

Rachel L. Satterfield, Vice President for Finance and Treasurer

Chris Simmons, Vice President for Government Relations

Kim Taylor, Vice President and General Counsel

Frank Tramble, Vice President for Communications, Marketing and Public Affairs

Neal Triplett, President, DUMAC

Stelfanie Williams, Vice President for Community Affairs

A.3. University Leadership & Faculty

A.3.d. The Faculty

Duke faculty are chosen from among the most competitive selection processes in the country, having demonstrated excellence in their fields of research.

Profiles of Duke's faculty members are available via Scholars@Duke.

A.4. University Policies

In this section

- [A.4.a. Accreditation](#)
- [A.4.b. Clery Act](#)
- [A.4.c. Duke's Commitment to Inclusive Excellence](#)
- [A.4.d. Duke Community Standard](#)
- [A.4.e. Family Educational Rights & Privacy Act \(FERPA\)](#)
- [A.4.f. Nondiscrimination Statement](#)

A.4. University Policies

A.4.a. Accreditation

Duke University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, doctorate, and professional degrees. Contact SACSCOC at sacscoc.org or call (404) 679-4500 for questions about the accreditation of Duke University.

A.4. University Policies

A.4.b. Clery Act

Information that the university is required to make available under the federal Clery Act is available by visiting the Records Division, Duke University Police Department, 502 Oregon Street, Durham, NC 27708, or by calling (919) 684-4602. See police.duke.edu/news-stats/clery for more details.

A.4.c. Duke's Commitment to Inclusive Excellence

Duke aspires to create a community built on collaboration, innovation, creativity, and belonging. Our collective success depends on the robust exchange of ideas—an exchange that is best when the rich diversity of our perspectives, backgrounds, and experiences flourishes. To achieve this exchange, it is essential that all members of the community feel secure and welcome, that the contributions of all individuals are respected, and that all voices are heard. All members of our community have a responsibility to uphold these values.

Find more details at provost.duke.edu/about.

A.4.d. Duke Community Standard

Duke University is a community dedicated to scholarship, leadership, and service and to the principles of honesty, fairness, respect, and accountability. Citizens of this community commit to reflect upon and uphold these principles in all academic and nonacademic endeavors, and to protect and promote a culture of integrity.

To uphold the Duke Community Standard:

- I will not lie, cheat, or steal in my academic endeavors;
- I will conduct myself honorably in all my endeavors; and
- I will act if the Standard is compromised.

Students' Obligation to Act with Respect to the Duke Community Standard

The Duke Community Standard (DCS) stresses the commitment that students share with all members of the community to enhance the climate for honesty, fairness, respect, and accountability at Duke University. Students affirm their commitment to foster this climate by signing a pledge that includes taking constructive action if they witness or know about behavior they perceive to be inconsistent with the DCS, which may include violation of university policies. Although there are no disciplinary sanctions associated with the failure to act, students are nonetheless expected to take action to do something as a responsibility of membership in the Duke community.

The university recognizes that it is not always easy to act in these situations, but several alternatives are available to suit a student's level of comfort and confidence. These alternatives are not mutually exclusive.

- Speaking directly with the individual exhibiting the behavior, both to gain clarity about the situation and to inform the individual about the concern.
- Publicly calling attention to the behavior as it is occurring.
- For incidents involving social behaviors, alerting residence hall, Student Affairs, or other university staff. The information provided will give staff an opportunity to address the matter informally or through appropriate formal channels.
- For cases involving academic integrity, alerting the instructor that cheating may be occurring in the course. This alert can be in any form, including anonymous notification, and the reporting student will not be identified. The information provided will allow the faculty member to consider corrective measures, in consultation with the Office of Student Conduct and Community Standards, and to address the topic with the class or suspected student(s).
- Directly alerting staff in the Office of Student Conduct and Community Standards at (919) 684-6938 or conduct@duke.edu, who will confer with the faculty member involved, if an academic issue, or with the reporting student(s), strategizing next steps. Maintaining the confidentiality of the source is possible, but may limit the extent of action that can be taken.

For current regulations, refer to dukecommunitystandard.students.duke.edu.

Multiple Submissions of a Term Paper

Students who wish (under unusual circumstances) to submit a single paper for credit in more than one course must receive prior written permission from each course instructor. The student must indicate the multiple submission on the title page of the paper.

A.4.e. Family Educational Rights & Privacy Act (FERPA)

The Family Educational Rights & Privacy Act (FERPA), 20 U.S.C § 1232g; 34 CFR Part 99, is a federal law that guides the release of students' education records, of which disciplinary records are a part.

Duke University adheres to a policy of compliance with the Family Educational Rights and Privacy Act. The policy (1) permits students to inspect their education records, (2) limits disclosure to others of personally identifiable information from education records without students' prior written consent, and (3) provides students the opportunity to seek correction of their education records where appropriate.

For additional information about FERPA, see studentprivacy.ed.gov/ferpa. For Duke's full FERPA policy, visit registrar.duke.edu/student-resources/family-educational-rights-and-privacy-act-ferpa.

A.4.f. Nondiscrimination Statement

Duke is committed to encouraging and sustaining a learning and work community that is free from prohibited discrimination and harassment. Duke does not discriminate on the basis of age, color, disability, ethnicity, gender, gender identity, gender expression, genetic information, national origin, race, religion, sex (including pregnancy and pregnancy-related conditions), sexual orientation, or military status, in the administration of its educational policies, admission policies, financial aid, employment, or any other institution program or activity.

Duke has designated the Vice President for Institutional Equity and Chief Diversity Officer as the individual responsible for the coordination and administration of its nondiscrimination and harassment policies.

Questions or comments about harassment or discrimination can be directed to one of the following administrators in the Office for Institutional Equity.

Discrimination in Duke's programs and activities:

Cynthia Clinton, AVP Harassment and Discrimination Prevention and Compliance
Title IX Coordinator
Office for Institutional Equity
114 S. Buchanan Blvd., Bay 8
Durham, NC 27708
(919) 684-8222

Sex discrimination in educational programs or activities:

Adrienne Allison, Deputy Title IX Coordinator for Students, Compliance Investigator
Office for Institutional Equity
114 S. Buchanan Blvd., Bay 8
Durham, NC 27708
(919) 684-8222

The complete text of Duke's Policy on Prohibited Discrimination, Harassment, and Related Misconduct and appropriate complaint procedures, may be found by visiting the [Office for Institutional Equity's website](#). Additional information and resources are available through the [U.S. Department of Education Office for Civil Rights](#), or call 1-800-421-3481.

A.5. University Resources

In this section:

- [A.5.a. Academic Resources](#)
- [A.5.b. Continuing Studies Programs](#)
- [A.5.c. Student Disability Access Office \(SDAO\)](#)

A.5.a. Academic Resources

Libraries

The [Duke University Libraries](#) are the shared center of the university's intellectual life. The William R. Perkins Library, Bostock Library, and Rubenstein Rare Book & Manuscript Library comprise the main West Campus library complex, which is joined by Lilly and Music libraries on East Campus and the separately administered libraries serving the schools of [Business](#), [Divinity](#), [Law](#), and [Medicine](#). Together they form one of the nation's top ten private university library systems.

Institutes, Initiatives & Centers

The university institutes, initiatives and centers complement the widespread interdisciplinarity found in every school at Duke. They serve as crucial incubators of innovations in research, teaching and community engagement. Find a complete list of institutes, initiatives, and centers at interdisciplinary.duke.edu/university-institutes-initiatives-centers.

Interinstitutional Agreement with Neighboring Universities

Under a plan of cooperation—the interinstitutional agreement among Duke University and The University of North Carolina at Chapel Hill, North Carolina State University, North Carolina Central University, The University of North Carolina at Charlotte, and The University of North Carolina at Greensboro—a student regularly enrolled in Duke University as a degree-seeking student and paying full fees may enroll for one approved course each semester at one of the institutions in the cooperative program unless an equivalent course is offered at Duke in the same academic term. Credit so earned is not defined as transfer credit since grades in courses taken under the interinstitutional agreement are entered on the official record and used in determining the grade point average. Additional information is available at registrar.duke.edu/registration/interinstitutional-registration.

Technology Resources

- The Office of Information Technology (oit.duke.edu)
- Computing and Networking (wireless.duke.edu)
- Printing and Labs (oit.duke.edu/services-tools/printers-labs)
- Support and Training (oit.duke.edu/services-tools/support-training)

A.5. University Resources

A.5.b. Continuing Studies Programs

Duke University offers a variety of pre- and post-college learning opportunities for learners across a wide variety of ages, backgrounds, and geographies. Overseen by [Duke Learning Innovation & Lifetime Education](#) (LILE), Duke's continuing students programs provide many opportunities for academic achievement, professional development and personal enrichment. Information about all programs listed below is available at learnmore.duke.edu.

For-Credit Academic Study

Admission to the Continuing Studies Program is discretionary. For consideration for admission, applicants to the Continuing Studies Program must meet at least one of the following two criteria:

- Earned a bachelor's degree from a college or university accredited by a national or regional accrediting body recognized by the Department of Education.
- Age 25 or older, and intend to initiate or complete academic study in a Duke University academic program.

Students are given academic counseling by LILE, and are subject to the regulations set forth for degree candidates, unless explicitly noted otherwise. A junior or senior who is currently enrolled at an external college or university who wishes to pursue an academic discipline unique to Duke University, may apply at learnmore.duke.edu/academics/undergraduate for admission as a nondegree, full-time visiting student for one or two semesters. Students with unique circumstances should contact LILE at learnmore@duke.edu.

Minimum GPA Requirement

Successful applicants are expected to have earned a minimum 3.0 GPA in their most recent program.

Applicants who fail to meet the minimum GPA requirement are subject to additional review and may be admitted on a provisional basis. As part of the additional review, the following will be taken under consideration:

- The applicant has not been enrolled as a full-time student in the last 4 years, and
- The applicant demonstrates the ability to successfully complete college level coursework by earning a passing grade (B or better) in a minimum of 4 courses during the last 2 years.

As part of a provisional admission, a student must earn a minimum 3.0 GPA in the semester immediately following the provisional admission.

Withdrawal

If a student enrolled in a Duke University program withdraws from the program, or is no longer in good academic standing, they must wait two academic terms before re-applying to any Duke program, including any continuing studies programs (see the Satisfactory Continuation Requirements outlined in the Bulletin of Undergraduate Instruction).

Semester Continuation Requirements

Semester continuation requires that you earn a passing grade (C-or better) in a minimum number of courses to remain in good standing. Students who receive at least one failing grade (D, D-, F) are subject to academic probation or academic dismissal.

Academic Probation	Earned D or D-in at least one course Earned F in one course, and C-or better in at least two courses
Academic Dismissal	Earned F in at least one course

Students placed on academic probation must acknowledge their probationary status in writing to the Academic Dean for Continuing Studies students, in order to continue into the next academic term. They are also expected to seek assistance from campus resources and have their course selection approved by their academic dean. In the probationary term they must earn grades of C or better in all courses to continue. Students who withdraw from all courses must wait two semesters to submit a request to return to study.

Program and application information is available at learnmore.duke.edu/academics/undergraduate. Application deadlines: August 1 for the fall semester, December 1 for the spring semester, April 15 for Term 1 of the summer session, and June 1 for Term 2 of the summer session.

Professional Certificate Programs

Professional Certificates are designed with the needs of working adults in mind, with classes offered in the evening and on weekends. Current programs offered include business and finance, human resources, legal, management, Six Sigma, technology solutions, and more.

Nonprofit Management Program

Learners interested in the nonprofit sector or in community development are invited to explore the noncredit course offerings of this program. Taught by experts and practitioners, these short courses offer instruction concerning financial and resource management, management of personnel and volunteers, leadership development, fundraising, planning and evaluation, board development/governance, and media relations.

Osher Lifelong Learning Institute (OLLI) at Duke

OLLI at Duke began in 1977 as the Duke Institute for Learning in Retirement. Since 2004 the membership organization has been a member of the Osher Lifelong Learning Network, a group of more than 120 institutes across the country dedicated to meeting the needs of older learners and extending the demographic served by traditional universities. OLLI sponsors noncredit course offerings in the fall, winter, and spring as well as special interest groups and volunteer opportunities.

Pre-College

Duke Pre-College programs offer academic enrichment opportunities for academically-motivated middle and high school students in the summer. Current offerings include residential summer camps on Duke's campus and at the Duke Marine Lab, online courses, a coding camp, and community days for local students to experience learning at Duke.

A.5. University Resources

A.5.c. Student Disability Access Office (SDAO)

The Student Disability Access Office (SDAO) is the office on campus that has been charged with and is committed to providing educational opportunities for students with disabilities in compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990 (ADA), and the ADA Amendments Act of 2008.

Core Functions of SDAO

- To establish services for equitable access on campus through partnership with students with disabilities.
- To manage, coordinate, implement and evaluate accommodation and service programs.
- To serve as a resource to students, faculty, and staff regarding access to academic and campus services
- To provide resource and referral information to the campus community at Duke and prospective students and their families.

SDAO works with each student individually to establish academic accommodations including adjustments, auxiliary aids and services for the purpose of mitigating barriers to students' access to campus facilities, programs, and activities.

For more information, visit access.duke.edu/students.

A.6. Campus Life, Activities & Support

In this section:

- DuWell (studentaffairs.duke.edu/duwell)
- Student Health (studentaffairs.duke.edu/studenthealth)

A.6. Campus Life, Activities & Support

A.6.d. QuadEx

QuadEx is a campus-wide initiative designed to foster belonging, engagement, and well-being among students. Rooted in an inclusive living and learning model, it builds on Duke's history, values, and spirit to enrich the social, residential, and intellectual experience of undergraduates. By integrating resources and structure, QuadEx strengthens on-campus communities, deepens intellectual exploration, and supports student well-being and growth. Visit quadex.duke.edu for more information.

A.7. Academic Calendar

Summer 2025

- February 17 (M) Registration begins for all summer sessions
- May 14 (W) Summer Term 1 classes begin
- May 16 (F) Drop/Add for Term 1 ends (11:59 PM)
- May 26 (M) Memorial Day holiday. No classes are held
- June 11 (W) Last day to withdraw with W from Term 1 classes (undergraduates only)
- June 19 (Th) Juneteenth holiday. No classes are held
- June 23 (M) Term 1 classes end
- June 24 (T) Reading period (until 7:00 PM); Term 1 final examinations begin (7:00 PM)
- June 26 (Th) Term 1 final examinations end
- June 30 (M) Summer Term 2 classes begin
- July 2 (W) Drop/Add for Term 2 ends (11:59 PM)
- July 4 (F) Independence Day holiday. No classes are held
- July 28 (M) Last day to withdraw with W from Term 2 classes (undergraduates only)
- August 8 (F) Term 2 classes end
- August 9 (Sa) Reading period (until 7:00 PM); Term 2 final examinations begin (7:00 PM)
- August 11 (M) Term 2 final examinations end (10:00 PM)

Fall 2025

- August 16 (Sa) New undergraduate student move-in day
- August 17-22 (Su-F) New undergraduate student orientation
- August 24 (Su) First-Year Convocation
- August 25 (M) Fall semester classes begin (8:30 AM); Drop/Add continues
- September 1 (M) Labor Day. No classes are held
- September 5 (F) Drop/Add ends (11:59 PM)
- September 25-28 (Th-Su) Founders' Weekend. Classes are held Thursday and Friday
- October 10 (F) Fall break begins (7:00 PM)
- October 15 (W) Classes resume (8:30 AM)
- October 20 (M) Shopping carts open for Spring 2026
- October 29 (W) Registration begins for Spring 2026
- November 7 (F) Last day to withdraw with W from Fall 2025 classes (undergraduates only)
- November 25 (T) Thanksgiving recess begins (10:30 PM)
- December 1 (M) Undergraduate classes resume (8:30 AM)
- December 5 (F) Undergraduate classes end
- December 6-9 (Sa-T) Undergraduate reading period
- December 10 (W) Final examinations begin (9:00 AM)
- December 15 (M) Final examinations end (10:00 PM)

Spring 2026

- January 7 (W) Spring semester begins (8:30 AM). A Monday class schedule is followed. Drop/Add continues
- January 19 (M) Martin Luther King Jr. Day holiday. No classes are held
- January 21 (W) Drop/Add ends (11:59 PM)
- February 9 (M) Shopping Carts open for Summer 2026
- February 16 (M) Registration begins for Summer 2026
- March 6 (F) Spring recess begins (7:00 PM)
- March 16 (M) Classes resume (8:30 AM)
- March 23 (M) Shopping Carts open for Fall 2026
- March 25 (W) Last day to withdraw with W from Spring 2026 classes (undergraduates only)
- April 1 (W) Registration begins for Fall 2026; Summer registration continues
- April 22 (W) Undergraduate classes end
- April 23-26 (Th-Su) Undergraduate reading period
- April 27 (M) Final examinations begin
- May 2 (Sa) Final examinations end (10:00 PM)
- May 8 (F) Commencement begins
- May 10 (Su) Graduation exercises; Conferring of degrees

Summer 2026

- May 13 (W) Summer Term 1 classes begin
- May 15 (F) Drop/Add for Term 1 ends (11:59 PM)
- May 25 (M) Memorial Day holiday. No classes are held
- June 10 (W) Last day to withdraw with W from Term 1 classes (undergraduates only)
- June 19 (F) Juneteenth holiday. No classes are held
- June 22 (M) Term 1 classes end
- June 23 (T) Reading period (until 7:00 PM); Term 1 final examinations begin (7:00 PM)
- June 25 (Th) Term 1 final examinations end
- June 29 (M) Summer Term 2 classes begin
- July 1 (W) Drop/Add for Term 2 ends (11:59 PM)
- July 3 (F) Independence Day holiday. No classes are held
- July 27 (M) Last day to withdraw with W from Term 2 classes (undergraduates only)
- August 7 (F) Term 2 classes end
- August 8 (Sa) Reading period (until 7:00 PM); Term 2 final examinations begin (7:00 PM)
- August 10 (M) Term 2 final examinations end (10:00 PM)

B. Undergraduate Instruction

In this section:

- [B.1. The Undergraduate College & School](#)
- [B.2. Undergraduate Administration & Leadership](#)
- [B.3. Trinity College Degree Requirements](#)
- [B.4. Pratt School Degree Requirements](#)
- [B.5. Academic Guidance & Support](#)
- [B.6. Study Abroad/Away](#)
- [B.7. Special Programs](#)

B.1. The Undergraduate College & School

In this section:

- [B.1.a. Trinity College of Arts & Sciences](#)
- [B.1.b. Edmund T. Pratt Jr. School of Engineering](#)
- [B.1.c. History](#)

Undergraduate students in the Trinity College of Arts & Sciences and the Pratt School of Engineering take advantage of the rich resources available across the schools and institutes that make Duke such a distinguished research university. Undergraduates learn, engage, and connect with committed professors and mentors whose innovative research is recognized around the world. Trinity and Pratt students interact with these faculty members not only in the classroom and the laboratory, but in a variety of settings, both formal and informal. This gives students the opportunity to exchange ideas with professors, graduate students, and broader communities.

Duke students are empowered to learn, expected to change, and encouraged to lead. A Duke education is based on the understanding that students grow intellectually and personally through successive experiences that are often transformative. Duke provides undergraduates with rewarding learning experiences during which they generate, evaluate, integrate, and apply knowledge; develop fluency across cultures; learn to value diversity and difference; and become active and ethical agents of change in their communities and in the world.

One of Duke's core values is applying knowledge in the service of society. With the schools of the arts and sciences, environment, engineering, and public policy each offering undergraduate instruction, students can approach real-world problems from different fields of inquiry. Duke also offers many service and learning opportunities such as Global Education, DukeEngage, student organizations, and research opportunities that involve students directly with the many major challenges confronting society.

B.1. The Undergraduate College & School

B.1.a. Trinity College of Arts & Sciences

Trinity is Duke's liberal arts college. Steeped in academic tradition and infused with a sense of dynamic engagement, the college embraces the enduring philosophy of teaching and learning that empowers students with a broad base of knowledge and a strong sense of values and ethics. The college enriches the liberal arts tradition with robust opportunities to participate in independent research as well as civic and global engagement.

Trinity College provides students with the opportunity to connect directly with the scholarship of Duke's faculty. Faculty mentors guide undergraduates in their research, much of it at the cutting edge of scholarship in the arts and humanities, natural sciences, and social sciences. In fact, undergraduates are integral to the production of knowledge as well as artistic productions.

Trinity students learn to communicate persuasively, bring meaning to information, discern competing claims, and develop a capacity for reasoning, analysis, and empathy. Students join academic conversations grounded in values of integrity, freedom of inquiry and expression, respect for diversity and difference, and reliance on reason and evidence.

Trinity College's 700+ faculty members teach in thirty-eight departments and programs. Many teach and collaborate across traditional disciplinary boundaries, which create distinctive interdisciplinary opportunities for students to learn without limits. The innovative course of study Trinity College students pursue encourages inquiry in and outside the classroom, laboratory, and studio. Global education, service learning, internships, and research opportunities complement classroom instruction to infuse students with the excitement of discovery and the opportunity to use knowledge in the service of society.

B.1. The Undergraduate College & School

B.1.b. Edmund T. Pratt Jr. School of Engineering

The undergraduate engineering program at Duke University is designed both for students who intend to become professional engineers and for those who desire a modern, general education based on the problems and the promises of a technological society. The environment in which students are educated is as important in shaping their future as their classroom experiences. In the Pratt School of Engineering this environment has two major components: one is modern technology derived from the research and design activities of faculty and students in the school; the other is the liberal arts environment of the total university, with its humanitarian, social, and scientific emphases.

Engineering is not a homogeneous discipline; it requires many special talents. Some faculty members in the Pratt School of Engineering are designers; they are goal-oriented, concerned with teaching students how to solve problems, how to synthesize relevant information and ideas, and apply them in a creative, feasible design. Other engineering faculty members function more typically as scientists; they are method-oriented, using the techniques of their discipline in their teaching and research to investigate various natural and artificial phenomena.

B.1. The Undergraduate College & School

B.1.c. History

Duke University was created in 1924 by James Buchanan Duke as a memorial to his father, Washington Duke. The Dukes, a Durham family that built a worldwide financial empire in the manufacture of tobacco products and developed electricity production in the Carolinas, had long been interested in Trinity College. Trinity traced its roots to 1838 in nearby Randolph County when local Methodist and Quaker communities opened Union Institute. That school, whose name changed to Trinity College, moved to Durham in 1892, where Benjamin Newton Duke served as a primary benefactor and link with the Duke family until his death in 1929.

Women entered Trinity College as regular students in 1892, and Washington Duke's gift to the school's endowment in 1896 required that it would treat women "on an equal footing with men" by creating an on-campus residence for them. In December 1924, the provisions of indenture by Benjamin's brother, James B. Duke, created the family philanthropic foundation, The Duke Endowment, which provided for the expansion of Trinity College into Duke University. Duke maintains a historic affiliation with the United Methodist Church.

As a result of the Duke gift, Trinity underwent both physical and academic expansion. The original Durham campus became known as East Campus when it was rebuilt in stately Georgian architecture. The Philadelphia architectural firm of Horace Trumbauer and Julian Abele, the firm's chief designer in the 1920s, played a central role in the creation of East and West Campuses. West Campus, Gothic in style and dominated by the soaring 210-foot tower of Duke

Chapel, opened in 1930. East Campus served as the home of the Woman's College of Duke University until 1972, when the men's and women's undergraduate colleges merged. In 1963, the first five Black undergraduates enrolled at Duke. In 1995, East Campus became the home for all first-year students. In 2016, the main quad on West was named after Abele, an African American architect whose contributions were not widely known on campus until the mid-1980s.

Engineering courses were first taught intermittently starting in 1882. Engineering became a permanent department in 1910, an undergraduate College of Engineering in 1939, and a School of Engineering in 1966 after the addition of graduate courses. The school was renamed the Edmund T. Pratt Jr. School of Engineering in 1999. Academic expansion of the university throughout its history has included the establishment of other graduate and professional schools, as well. The first divinity degree was awarded in 1927, the first PhD in 1928, and the first MD in 1932. The School of Law, founded in 1904, was reorganized in 1930. The following year, the undergraduate School of Nursing was established, transforming in 1985 to a graduate school. The School of Forestry, which was founded in 1938, became the School of Forestry and Environmental Studies in 1974 and was renamed the Nicholas School of the Environment in 1995. The business school was established in 1969 and renamed The Fuqua School of Business in 1980. In 2009, the Sanford School of Public Policy became Duke University's tenth school. All undergraduates now enroll in either the Trinity College of Arts & Sciences or the Pratt School of Engineering.

Today, Duke is a global leader. It consists of a community of learners from around the nation and world, including more than 6,700 undergraduates and 10,000 graduate and professional students. Students come from diverse geographic, racial, and socioeconomic backgrounds. The Class of 2027, with only a 6 percent acceptance rate, is composed of 13 percent international students and 55 percent female students. Self-reported race and ethnicity numbers for the class show 13 percent identify as Black, 35 percent as Asian, 13 percent as Latino, 1 percent as Indigenous, 53 percent as White; 5% elected not to report race or ethnicity. Figures add up to more than 100 percent because 7% of students identified as more than one race or ethnicity. Also, more than 50 percent of undergraduate students receive some form of financial aid, which includes need-based aid, athletic aid, and merit aid. About 12 percent are "first-generation" or the first in their family who will graduate from a four-year university. Approximately 17% were eligible for Pell grants.

About half of Duke undergraduates study abroad, many in Duke-run programs. The Duke-NUS Medical School in Singapore was established in 2005 as a strategic collaboration between Duke University and NUS. In 2014, Duke partnered with Wuhan University in China to open Duke Kunshan University, with the goal of creating a world-class liberal arts and research university. In 2018, Duke Kunshan fully launched its four-year undergraduate degree program. In recent years, DKU classes have been drawn from 25+ countries, including a strong representation from China and the United States.

B.3. Trinity College of Arts & Sciences Degree Requirements

In this section:

- [B.3.a. General Education Requirements](#)
- [B.3.b. Major Requirement](#)
- [B.3.c. 34.0 Course Credits Requirement for Trinity](#)
- [B.3.d. Residence Requirement for Trinity](#)
- [B.3.e. Minors, Certificates, and Combination Programs](#)

Starting in academic year 2025-2026, students in Trinity College follow the Arts & Sciences Curriculum. Trinity College of Arts & Sciences Curriculum is meant to encourage breadth as well as depth and provide structure as well as choice. It reflects Duke's desire to dedicate its unique resources to preparing its students for the challenging and rapidly changing global environment. The curriculum provides a liberal arts education that asks students to engage in a wide variety of subjects: arts and humanities, interpretive and social sciences, natural, and quantitative sciences. It supports a cross-cultural and interdisciplinary approach to knowledge and fosters the development of students' abilities to read and think critically and in historically and ethically informed ways, to communicate lucidly and effectively, and to undertake and evaluate independent research.

The curriculum has two components: the general education requirements and the major requirements. Trinity students must complete 34.0 course credits to meet these requirements. Requirements of the curriculum are listed and explained more fully in the following sections. Students who receive an S (Satisfactory) grade will receive credit toward general education requirements, including curriculum codes, and the course will count toward the required credits for graduation and continuation. It is the student's responsibility to check with each department or program to investigate whether an S grade can count toward the major, minor, or certificate.

B.3. Trinity College Degree Requirements

B.3.a. General Education Requirements

The general education requirements include the First-Year Experience, Liberal Arts categories, and Language and Writing, all of which are described in more detail in the following sections. Since a course may have several intellectual goals and intended learning outcomes, it may simultaneously satisfy more than one general education requirement, as well as requirements of a major, minor, or certificate program.

First-Year Experience

Students have two options to fulfill their First-Year Experience requirement by joining either the Constellations or FOCUS programs. Both Constellations and FOCUS provide the keys to a transformational educational experience as students engage in deep learning through multidisciplinary approaches to specific topics, themes, and disciplines in groups of related courses. FOCUS and Constellations courses are open only to first-year students, supporting community building as soon as students arrive on campus. Both Constellations and FOCUS courses meet a range of requirements, including majors, minors, certificates, and the Arts and Sciences Curriculum requirements. Both FOCUS and Constellations students take the same number of classes as part of their First-Year Experience.

Students starting their first year in the fall must complete the full First-Year Experience requirement. One of these courses is Writing 120, which must be taken in the assigned semester.

Students starting their first year in the Spring must complete an abridged First-Year Experience, comprising two courses, one of which is Writing 120. Both courses are taken in the Spring (starting semester).

Students must also participate in the required experiential activities associated with their First-Year Experience.

Failing to complete their First-Year Experience may result in Academic Warning and Probation. The mechanism to complete this requirement will be at the discretion of the Director of First-Year Experience in Trinity College.

Constellations

Constellations are multidisciplinary first-year experiences designed to build communities among first-year students. They comprise interconnected courses that explore a topic from multiple perspectives and feature small-group learning. Once matched with a Constellation over the summer before their first year, students delve into a central question in three courses in their first year: one in the fall, another in the spring, and their Writing 120 in one of the two semesters. Additionally, each Constellation also offers at least one experiential component per semester.

Constellations are year-long and they range in size, with 6-10 courses offered in each Constellation, allowing students additional choices in course selection. Participation in Constellations does not require an application, however students have the opportunity to express preferences for Constellations they are interested in over the summer before their first year.

More information on the Constellations program as well as current Constellations may be found on the program website at trinity.duke.edu/constellations. Questions may be directed to the program director at constellations@duke.edu.

FOCUS

The Focus Program creates an intellectual community involving faculty and first-year students embedded in a living-learning context during the fall semester. Once placed into a cluster, students take two courses in the fall and their Writing 120 course in the spring. Additionally, FOCUS clusters include a weekly dinner during the fall semester, as well as additional co-curricular opportunities.

FOCUS takes place during the fall semester of the first year, and participants of each FOCUS cluster live in the same residence hall together with other first-year students in order to integrate academic and residential life. FOCUS classes are small seminars, interrelated, and mutually reinforcing; they provide opportunities for discussion and individualized research. Participation in FOCUS requires an application; admissions are reviewed on a rolling basis.

More information on the FOCUS program as well as current FOCUS clusters may be found on the program website at focus.duke.edu. Questions may be directed to the program director at focus@duke.edu.

Liberal Arts Categories

12.0 course credits. Historically, the ways in which knowledge has been organized reflect both differences in subject matter and methods of discovery. This delineation is dynamic, marked by increasing differentiation and an array of academic disciplines. Disciplines have traditionally been grouped into three divisions: humanities, social sciences, and natural sciences. Duke has chosen to divide the humanities and natural sciences further to assure that undergraduates engage the full range of substantive concerns and approaches there. Thus, the curriculum adopts the following division of courses into the six areas of knowledge listed below.

- **Creating & Engaging with Arts (CE):** Courses in this area involve the production, performance and/or experience of artistic creativity. Students develop cognitive, affective and corporeal capacities through the process and production of knowledge via the creative arts; explore through practice the aesthetic forms that arise across cultures and communities; and formulate insights about human creativity by making art and reflecting on how values and meanings are expressed through arts practice.
- **Humanistic Inquiry (HI):** Courses in this area interpret literary and aesthetic expressions that span geographical locations, historical periods and cultures. Students analyze works and practices; engage with philosophies, religions and intellectual traditions; investigate communication practices and media; and gain skills in research methods associated with humanistic inquiry.

- **Interpreting Institutions, Justice & Power (IJ):** Courses in this area investigate the events, ideas, and practices that shape human societies. Students examine institutions, cultural traditions, religious systems and the historical and current events that shape these large-scale features of societies; examine the structures that underlie inequality, power and societal change; and apply a diverse set of qualitative and quantitative scholarly practices.
- **Investigating the Natural World (NW):** Courses in this area investigate and develop models for physical and biological processes. Students develop foundational knowledge about the causes of natural phenomena; explore the structure and temporal evolution of physical and biological systems; apply experimental, analytical and computational methods; and learn the power and limits of scientific explanations.
- **Quantitative & Computational Reasoning (QC):** Courses in this area involve mathematical reasoning, statistical analysis and computational methods. Students engage in formal, inductive and deductive reasoning; apply statistical modeling and inference methods; learn tools and techniques for data analysis; develop algorithms to solve problems; design, develop and analyze computational systems; and interpret claims based on computational models and simulations.
- **Social & Behavioral Analysis (SB):** Courses in this area examine human individual behaviors, group dynamics and societies. Students explore thought processes, decisions, beliefs, emotions and motivations; examine how individuals develop over the life course and in response to experiences; and study the development and expression of identities, the establishment of social structures and political institutions, and the dynamics of economic systems.

Because Duke believes that engagement with each category is essential, not optional, for an informed and educated person in the twenty-first century, students must satisfactorily complete 2.0 course credits in each area. Courses may receive up to two Liberal Arts category codes, but each course counts only once toward the Liberal Arts Categories requirement. The only exceptions to this are the Century Courses, which will be offered starting in Fall 2026. Up to two Century Courses may each fulfill two of the twelve Liberal Arts categories requirements, either in the same category or in different categories. Century Courses do not have prerequisites and are open to all undergraduate students. Independent study courses do not carry Liberal Arts designations.

Language (LG)

2.0 to 3.0 course credits. Duke has set internationalization as an institutional priority to prepare students to live in an increasingly diverse and interdependent world. Instruction in languages provides much more than simple exposure to another culture; it promotes a deeper immersion in patterns of thinking that shape societies and their people. It fits well with our fundamental values: appreciating perspectives that are very different from one's own, stepping outside of a local environment, building connections to other people, and providing a sense of humility when dealing with a complex, multicultural world.

To satisfy the language competency requirement students must complete one of the following:

- three courses in a single language sequence, or
- two courses at the 300-level or higher, or
- one course at the 300-level or higher and two courses in another sequence.

For students who begin the study of a language at Duke at the elementary level (first or second semester) course and intend to complete the requirement in that language, the successful completion of three full sequential courses in the same language that carry the LG designation is required.

Students who plan to continue studying a language they have started prior to starting at Duke should review the placement guidelines [here](#) and consult with the language program director in that language.

Students are strongly encouraged to register for a course designated with a Language (LG) code as early as possible and *no later than* the first semester of their sophomore year. Independent study courses do not carry Language (LG) designations.

Writing (WR)

3.0 course credits, including Writing 120 in the first year and two writing-intensive (WR) courses in the disciplines, at least one of which must be taken after the first year. Effective writing is central to both learning and communication. To function successfully in the world, students need to be able to write clearly and effectively. To accomplish this, they need to have a sustained engagement with writing throughout their undergraduate career. Thus, students must take at least 3.0 course credits' worth of writing courses at Duke:

- Writing 120 in their first year, and
- two writing-intensive courses (WR) in the disciplines, at least one of which must be taken after their first year.

Through the latter type of courses, students become familiar with the various modes and genres of writing used within an academic discipline, participate in multiple rounds of drafting and feedback, and learn how the conventions and expectations for writing differ among the disciplines.

Independent Study courses do not carry a Writing (WR) designation. A maximum of one Research Independent Study may count toward the requirement of writing-intensive courses (WR) in the disciplines.

Courses taken outside of Duke

Advanced Placement credits, international placement credits, and prematriculation credits for college courses taken elsewhere before matriculation in the first-year class at Duke cannot satisfy Liberal Arts Categories, Language, or Writing requirements.

Interinstitutional courses may be considered for approval to satisfy Liberal Arts Categories, Language, or Writing requirements.

Transfer credits taken after matriculation at Duke may or may not apply to the general education requirements and are evaluated by various faculty decision makers. Limits for how many post-matriculation transfer credits can apply to the general education are as follows:

- Liberal Arts – One credit per Liberal Arts Category may be fulfilled with postmatriculation transfer credit.
- Language (LG) – Up to two individually arranged transfer credits may count towards the Language requirement AND at least 1 credit must be completed at Duke. An exception is made for language courses (with the LG codes) taken while studying abroad. In this case, the full language requirement may be fulfilled through immersive study abroad transfer courses that are taken as part of a university-approved study away term.
- Writing (WR) – One writing credit may be fulfilled with post-matriculation transfer credit.

B.3. Trinity College Degree Requirements

B.3.b. Major Requirement

For the major, students can choose to follow Program I or Program II pathways, both of which provide a variety of approaches to obtaining a liberal arts education. Both programs lead to the Bachelor of Arts (AB) or Bachelor of Science (BS) degree, and both involve completing 34.0 course credits to satisfy the requirements for the degree.

Only one undergraduate degree may be earned; however, a notation of a second major will appear on the transcript. A student may not declare more than two majors. Majors offered within each degree are listed at trinity.duke.edu/undergraduate/majors-minors.

Program I

The requirements for majors in the department or program in which a student wishes to obtain a bachelor's degree are described in the Programs section.

Students are expected to acquire some mastery of a particular discipline or interdisciplinary area as well as to achieve a breadth of intellectual experience. They, therefore, complete a departmental major, a program major, or an interdepartmental major. Majors, including interdepartmental majors, are designed to give students breadth and depth in a particular discipline or interdisciplinary area. The courses required for majors are specified by the department or academic program, and include a progression from lower to upper level courses. Departmental and program majors require a minimum of ten courses; interdepartmental majors require a minimum of fourteen courses. The courses for a departmental major may include introductory or basic prerequisite courses and higher-level courses in the major department or in the major department and related departments. The total number of courses that a department/program may require at any level in the major and related departments may not exceed 17.0 course credits for the bachelor of arts degree and 19.0 course credits for the bachelor of science degree. At least half the courses for a student's major field must be taken at Duke, although individual departments and programs offering majors may require that a greater proportion be taken at Duke. Although no more than two D grades can count toward the 34.0-course-credit requirement, courses in which D grades are earned satisfy major, minor, and certificate requirements. Students are responsible for meeting the requirements of a major as stated in the bulletin for the year in which they matriculated in Trinity College; however, they have the option of meeting requirements in the major changed subsequent to the students' matriculation. A student who declares and completes the requirements for two majors may have both listed on the official record. A maximum of two majors may be recorded on a student's record. Majors offered within each degree are listed at trinity.duke.edu/undergraduate/majors-minors.

Declaration of Major

All students enter Trinity College without a major. Students may declare a major after completing their first year and must declare a major no later than the last day of class prior to the mid-semester break of their fourth semester. Students who do not declare their major may be prevented from registering for classes for their fifth semester and from participating in study abroad programs.

Students who have declared a major and wish to change, add, or delete a major, minor, or certificate may do so through their DukeHub account. Seniors who have completed the Intention to Graduate Form, which is distributed via email during the fall of the senior year, can change a major, minor, or certificate at trinity.duke.edu/undergraduate/academic-policies/notification-intent-to-graduate. Seniors who have not received or completed the Intention to Graduate Form can change a major, minor, or certificate by emailing trinity_graduation@duke.edu from a duke.edu email address.

Restrictions on Majors, Minors, and Certificates

A student in Trinity College must declare one major and may declare a second (although not a third) major. The combined number of majors, minors, and certificate programs may not exceed three. Thus, a student may declare as a maximum: two majors and either a minor or a certificate program; a major and two minors; a major and two certificate programs; or a major, a minor, and a certificate program.

Interdepartmental Major

A student may pursue an interdepartmental major in two Trinity College departments or programs that offer a major. The student works with an advisor in each department to adopt an existing interdepartmental major or to design a new one. The major must be approved by the directors of undergraduate studies in both departments who define a course of study covering core features of each discipline, such as theory, methodology, and research techniques. The criteria must include at least fourteen courses split evenly between the departments. At least four of the seven courses required by each department are to be taught within the department. All courses must be among those normally accepted for a major in the two departments. The directors of undergraduate studies in the two departments must agree to an initial list of courses that the student will take in the two departments and jointly approve any subsequent changes to that course of study. Students proposing an interdepartmental major must present a descriptive title for the major and a rationale for how the program of study will help them realize their intellectual goals. The Dean of Special Academic Programs must also give final approval for the proposal.

The directors of undergraduate studies in two Trinity College departments or programs that offer a major may also propose an interdepartmental major (IDM). The proposed IDM will define a course of study covering core features of each discipline, such as theory, methodology, and research techniques.

Additional information about IDMs can be found at trinity.duke.edu/undergraduate/academic-policies/majors-minors-certificates-interdepartmental-major.

Program II

Nature and Purpose. Students in Trinity College who believe that their intellectual interests and talents would be better served outside the regular curriculum options under Program I are encouraged to consider Program II. Students admitted into Program II follow individualized degree programs to explore a topic, question, or theme not available as a course of study within Program I. As degree candidates in Program II, students separate themselves from the requirements and options of Program I, including the requirement for a major and the options of multiple majors and minors.

Program II typically best serves the needs of students who find that their intellectual interests cross departmental boundaries or who perceive areas of learning in clusters other than those of the current departmental units of the university. Program II graduates have gone on to graduate and professional schools around the country and to satisfying positions in many areas of employment. They have won important awards, including Rhodes and Fulbright scholarships, and have received national recognition for career success. Among the many topics for Program II have been architectural design, bioethics, dramatic literacy, the epic in music and literature, planetary and evolutionary biology, and US national security. Full information is available on the Program II website at program2.duke.edu.

Admission. If interested in Program II, students should first attend an information session, and confer with the Dean for Special Academic Programs. Students will select a regular rank faculty advisor in one of the departments or programs of Trinity College; with approval of the director of undergraduate studies, that department or program will become the sponsor for the student. Application to Program II requires students to propose a topic, question, or theme for the degree program and to plan a special curriculum adapted to their interests and talents. The student and faculty advisor together assess the student's background, interests, and ambitions and evaluate the resources at the university, or outside it, to support those ambitions.

The curricular program proposed by a Program II candidate must address the student's specific interests and offer a coherent plan for learning rather than a sampler of interesting courses. It should incorporate the depth and breadth of study expected of a liberal education at Trinity College. This is achieved in Program II through carefully selected interdisciplinary coursework focused on the student's theme. Programs may be proposed for either the bachelor of arts or the bachelor of science degree; in the latter case, the sponsoring department must offer a Program I major within the BS degree option. The program must be approved by the sponsoring department or program and also by the committee on Program II of the Faculty Council of Arts and Sciences.

Upon endorsement by the Program II Committee, the program becomes an obligation assumed by the student. Until formally accepted into Program II, a student should register for courses to satisfy the curricular requirements for Program I. Students who withdraw from Program II for any reason assume all requirements of Program I. Students will be accepted into Program II only after their first year at Duke; they are ineligible for admission after the midpoint of their junior year. Further information may be obtained from the Academic Advising Center and from the Dean for Special Academic Programs.

General Requirements. Apart from the requirements arising from the approved plan of work, a Program II student must satisfy certain general requirements to satisfy the requirements for the degree: 34.0 course credits for graduation; curricular breadth; the regulations on military science, house, professional school, and physical activity and dance courses; and residence, although the regulation relating to the last eight courses may be adjusted to suit the student's approved plan of work. Graduation with Distinction is available for qualified students in Program II. See the section [Graduation & Honors](#).

B.3. Trinity College Degree Requirements

B.3.c. 34.0 Course Credits Requirement for Trinity

There are specific requirements concerning course credits at Trinity College of Arts & Sciences. Thirty-four (34.0) course credits are required for graduation, at least 24.0 of which must be Duke-originated courses. Duke-originated courses are defined as courses taught by Duke or Duke-affiliated faculty, offered through Duke University, and subject to the approval processes of Duke's schools. Duke-originated courses include some Duke Kunshan University courses and the Duke-originated courses offered in Duke-In study abroad/away programs.

Of the 34.0 course credits required for graduation, a maximum of 2.0 course credits passed with a D grade (D, D+, D-) can be used toward the 34.0 course credits requirement. (Courses for which a D grade is earned do, however, satisfy all other requirements.) The 34.0 course credits may include

1. no more than 1.0 course credit in physical education activity courses (i.e., two half-credit activity courses, including military science physical activity courses),
2. no more than 1.0 course credits in house courses (i.e., two half-credit courses),
3. no more than 4.0 course credits in military science,
4. no more than 4.0 course credits electively taken on a Satisfactory/Unsatisfactory grading basis (not including courses offered only on that basis),
5. no more than 4.0 interinstitutional course credits, and
6. no more than 6.0 course credits for courses taught by the graduate and professional schools. These courses include all courses offered by the schools of business, law, divinity, nursing, and all graduate courses numbered 700 and above. These courses are generally not open to undergraduates and require special permission to enroll. The credit hour system used for these courses converts into 1.0 units for the undergraduate record and enrollment purposes. Therefore, the limit of 6.0 credits refers to 6.0 undergraduate units. Independent Study may not be taken in a professional school, unless listed as a course in the Duke University Bulletin of Undergraduate Instruction or offered through a Trinity College of Arts & Sciences department or program. (See policies in the [Independent Study](#) section.)

For limitations on transfer credit and Advanced Placement credit, see [Credit for Courses Taken Elsewhere \(Entrance & Transfer Credit\)](#).

B.3. Trinity College Degree Requirements

B.3.d. Residence Requirement for Trinity

Undergraduates in Trinity are expected to complete either the bachelor of arts (AB) or the bachelor of science (BS) degree in eight semesters of enrollment. This period may be extended for one semester by a student's academic dean in exceptional circumstances. Very rarely, a student will be granted a tenth semester of study by an academic dean. Students are not permitted to complete more than ten undergraduate semesters at Duke.

For purposes of establishing the length of residence of a student admitted in transfer, the semesters completed at the institution previously attended are counted as semesters of residence at Duke.

For the minimum residence period, at least seventeen courses must be satisfactorily completed at Duke. If only seventeen courses are taken at Duke, they must include the student's last eight courses.

B.3. Trinity College Degree Requirements

B.3.e. Minors, Certificates, and Combination Programs

Minors

Minors are available, though not required. The courses required for a minor are specified by the department/academic program. Minors require a minimum of five courses. Further information about specific minors is available on their program pages in this bulletin. Students may not major and minor in the same department/program with the exception of four departments in which multiple majors or concentrations are possible: (1) Asian and Middle Eastern studies, (2) Art, Art History, and Visual Studies, (3) Classical Studies, and (4) Studies. As a rule, a majority of the courses satisfying a minor must be taken at Duke. It is the student's responsibility to check with each department or program to investigate whether they require a greater proportion to be taken at Duke for their minor.

Certificates

A certificate program is a course of study that affords a distinctive, usually interdisciplinary, approach to a subject that is not available within any single academic unit. All certificate programs have a required introductory course as well as a required culminating capstone course. There are two versions of certificate programs: the traditional certificate, consisting primarily of academic coursework (minimum six courses), and the experiential certificate, consisting of a combination of coursework (minimum four courses) and immersive co-curricular experiences. Eligible undergraduates electing to satisfy the requirements of a traditional certificate program may use, for that purpose, no more than two courses that are also used to satisfy the requirements of any major, minor, or other certificate program; for experiential certificates, no more than one course may be used to satisfy the requirements of any other major, minor, or certificate program. Individual programs may prohibit such double counting or restrict it to one course. A majority of the courses taken to satisfy a certificate must be taken at Duke, although individual programs may require that a greater proportion be taken at Duke. More complete descriptions of these certificate programs appear in the [Certificates](#) section.

Certificates are available to students pursuing Program I. Students pursuing Program II must obtain approval from the Program II committee.

Restrictions on Minors and Certificates

The combined number of majors, minors, and certificate programs may not exceed three. Thus, a student may declare as a maximum: two majors and either a minor or a certificate program; a major and two minors; a major and two certificate programs; or a major, a minor, and a certificate program.

Combination Programs with Duke Professional Schools

There are programs available that allow a student to combine the undergraduate experience with the beginning of a second degree. The format and length of the program and how it dovetails with undergraduate work varies across programs.

A student interested in attending the Nicholas School of the Environment may (upon meeting certain requirements), combine their senior year in Trinity College of Arts & Sciences with the first year in the professional school. This is known as the Nicholas School 3/2 Program. To qualify the student must:

1. successfully complete 26.0 course credits in Trinity College
2. fulfill all degree requirements in Trinity College except for eight elective courses
3. obtain approval from the appropriate liaison Academic Dean at Trinity College
4. be admitted to the professional school

If the student's application to the professional school is accepted, the student essentially takes a leave of absence from Trinity College to enroll in the professional school for what would have been the fourth year of undergraduate study and the student begins work on the professional degree. Upon successful completion of the work in the first year of the professional school, the baccalaureate degree is awarded to the student. The undergraduate record notes the student's enrollment in the combination program, the name of the professional school, the date of graduation from Trinity College, and the undergraduate degree awarded. However, it does not include courses taken in the professional school. Contact Dean Claire Siburt (cps7@duke.edu) for questions regarding the Nicholas School 3/2 Program.

B.4. Pratt School of Engineering Degree Requirements

In this section:

- [B.4.a. General Requirements](#)
- [B.4.b. Residence Requirement for Pratt](#)
- [B.4.c. Grade Requirement for Graduation](#)
- [B.4.d. The Pratt First-Year Curriculum](#)
- [B.4.e. Majors, Minors & Certificates](#)
- [B.4.f. 4+1 Bachelor/Master Programs](#)
- [B.4.g. Pratt-Specific Academic Policies](#)

Duke University offers the Edmund T. Pratt Jr. School of Engineering programs of study which lead to the degree of bachelor of science in engineering. Five programs are accredited by the Engineering Accreditation Commission of ABET, abet.org. These programs are biomedical engineering, civil engineering, environmental engineering, electrical and computer engineering, and mechanical engineering. These accredited programs, as well as minors in energy engineering, electrical & computer engineering, machine learning & artificial intelligence, software engineering, and special programs of study in interdisciplinary fields, are offered by the departments of biomedical engineering, civil and environmental engineering, electrical and computer engineering, and mechanical engineering and materials science.

B.4. Pratt School Degree Requirements

B.4.a. General Requirements

For graduation with a bachelor of science in engineering degree, a student must successfully complete a minimum of 34.0 course credits. These 34.0 course credits (c.c.) must include the following:

GENERAL REQUIREMENTS*		
Writing	1.0 c.c.	This requirement is met by completing WRITING 120.
Mathematics	5.0 c.c.	This requirement is typically met by completing MATH 111L, 112L, 218D-2, 219, and 353.**
Natural Science	3.0 c.c.	This requirement is met by completing CHEM 101DL, PHYSICS 151L, and PHYSICS 152L.***
Mathematics or Natural Science	1.0 c.c.	The department administering the major field of study will specify this requirement.
Liberal Arts	5.0 c.c.	This requirement is met by completion of 5 full-credit (1.0 c.c.) courses from a set of Liberal Arts categories that includes Creating & Engaging with Art (CE), Humanistic Inquiry (HI), Interpreting Institutions, Justice & Power (IJ), Social & Behavioral Analysis (SB), and Language (LG). The courses used to fulfill this requirement must: 1) carry at least one code of CE, HI, IJ, SB, or LG and cannot otherwise count towards the requirements of the Pratt major; 2) cumulatively cover at least four of the five codes (CE, HI, IJ, SB, LG); 3) be taken post-matriculation; and 4) be taken on a graded basis, unless the course is only offered on a mandatory Satisfactory/Unsatisfactory grading basis. For courses only offered on an S/U grading basis, up to two such S/U-only courses may contribute (course and/or code) to the Liberal Arts requirement.
Digital Computation	1.0 c.c.	Students are expected to have acquired digital-computer programming capability before their sophomore year. The programming capability may be satisfied by passing EGR 105L.
Engineering Design & Communication	1.0 c.c.	This requirement is met by completing EGR 101L.
Engineering and Applied Sciences	4.0 c.c.	This requirement is met by completion of one course from four of the following seven areas: digital systems, electrical science, information and computer science, mechanics (solid and fluid), materials science, systems analysis, and thermal science and transfer processes. The department administering the major field of study will specify this requirement.
Departmental Specifications	13.0 c.c.	The department administering the major field of study will specify this requirement. In general, it will consist of both required courses and electives to be planned in consultation with the departmental advisor. Including the 4.0 credits in engineering and applied sciences listed under general requirements, a minimum of 13.0 credits in engineering work are required. Individual departmental requirements can be found in the Pratt School of Engineering section of the Programs by Department.
Total Minimum Requirement	34.0 c.c.	

Notes on the above table:

*Free electives are included in the 13.0 course credits listed under departmental requirements. Depending on the major, no more than 1.0 course credit in physical education activity and 1.0 course credit in music activity can be used to meet bachelor of science in engineering degree requirements. House courses may not be used to meet BSE requirements. A maximum of 2.0 course credits of junior or senior level air science, military science, or naval science coursework may be counted in satisfying the minimum requirements of 34.0 course credits for a BSE degree. These courses must be included in the 13.0 course credits listed under departmental requirements. All other courses completed in air, military, or naval science are taken in addition to the minimum program.

**Students placing out of any of these classes must take a suitable substitute. AP credit can be used as a substitute for MATH 111L and MATH 112L.

***Students entering with AP, IPC, or PMC credits for both PHYSICS 25 and 26 are required to take a Physics course after matriculation (see Pratt Undergraduate Policies & Procedures: [Degree Requirements, Engineering](#) for approved options), or waive credit for PHYSICS 26 and take PHYSICS 152L, or waive both Physics pre-matriculation credits and take PHYSICS 151L and PHYSICS 152L.

B.4. Pratt School Degree Requirements

B.4.b. Residence Requirement for Pratt

At least 17.0 course credits must be completed satisfactorily at Duke. This must include the work of the final two semesters, with the following exceptions: the student who has completed more than four full semesters of work at Duke may take up to the last two courses elsewhere. The courses taken elsewhere must be approved in advance by the student’s major advisor and academic dean.

B.4. Pratt School Degree Requirements

B.4.c. Grade Requirement for Graduation

Of the 34.0 course credits which fulfill the specified categories in the bachelor of science in engineering degree requirements, 32.0 or their equivalent in number must be passed with grades of S, C-, or better.

B.4. Pratt School Degree Requirements

B.4.d. The Pratt First-Year Curriculum

The first year of study in the Pratt School of Engineering is largely common to all engineering students, with seven of the eight first-year courses being required by all engineering majors. The first-year curriculum offers

- a general education in the fundamentals of mathematics, physics, and chemistry, on which the science and practice of engineering are based;
- instruction in modern engineering problem solving skills, including the use of digital technology for both computational and laboratory applications; and
- instruction to build skills in effective academic writing, through satisfaction of the university writing requirement.

Students predisposed toward a particular Pratt major use the eighth course to begin fulfilling degree requirements for that major as indicated below, while undecided students are encouraged to use this eighth course to aid in their subsequent selection of a major. The general layout for the curriculum is as follows (assuming no AP credit):

FIRST SEMESTER	COURSES	SECOND SEMESTER	COURSES
MATH 111L	1.0	MATH 112L	1.0
CHEM 101DL	1.0	PHYSICS 151L	1.0
EGR 105L	1.0	WRITING 120	1.0
EGR 101L	1.0	Technical Course	1.0
Total	4.0	Total	4.0

In the event that Entrance credit (PMC/AP/IPC) is granted for one or more of the above courses, substitutions of upper-level technical requirements can be made or other curricular interests may be pursued (including first-year Focus Programs or initiation of a Trinity second major, minor, or certificate program).

The first-year technical course should be selected according to the student’s intended major:

INTENDED MAJOR	SUGGESTED TECHNICAL COURSE
Biomedical Engineering	BIOLOGY 201L
Civil Engineering	CEE 132L
Electrical and Computer Engineering	ECE 110L
Environmental Engineering	CEE 132L
Mechanical Engineering	EGR 121L
Undecided	Select from all above

B.4. Pratt School Degree Requirements

B.4.e. Majors, Minors & Certificates

Declaration of Major

Pratt students declare a major over the summer after their first year. Declaration of major is accomplished via the student's DukeHub account.

A student may change their major after the initial declaration. However, they should consult their academic dean to discuss implications to course schedules and/or intended graduation dates. Students who have declared a major and wish to change, add, or delete a major, minor, or certificate may do so through their DukeHub account.

Seniors in their final two semesters before graduating should email prattdom@duke.edu with the plan information they are requesting to change.

Second Major

If a student fulfills the requirements for two engineering majors or an engineering major and an arts and sciences major, this will be noted on their official record.

The director of undergraduate study for each major must certify that all major requirements have been met. In Pratt, each major must identify at least nine technical courses fundamental to the discipline of that major that are different from those of the other major. Each major must have at least five of these technical courses fundamental to the discipline that are not used to satisfy the requirement of the other major (free electives excluded). Any of the other fundamental courses may be counted for both majors if the directors of undergraduate study agree they have equivalent technical content. The remaining requirements for each major may be satisfied by taking additional courses associated with the approved academic unit, cross-listed courses, or upon agreement of the directors of undergraduate study, other courses with approved content.

The student may declare a second major by completing the online Declaration of Major form. It is highly recommended that the student meets with the director of undergraduate studies in the second major to review the requirements for that major. The completion of the requirements for the major in this department must be confirmed no later than the time of registration for the final semester.

Minors

Four engineering minors are offered at the Pratt School of Engineering. The Energy Engineering minor is only open to students with an engineering major. The Electrical & Computer Engineering minor, the Software Engineering minor, and the Machine Learning & Artificial Intelligence minor are open to engineering and non-engineering majors. More information can be found on the program pages for these minors.

A minimum of five technical courses are required for a minor. Courses that are used to fulfill the student's primary major are excluded from the additional courses counted for the minor; this exclusion also applies to courses with content substantially equivalent to courses in the student's primary major. As an exception, at most one upper-level elective course cross-listed with the student's primary major may be counted toward the minor.

If the minor area of study does not otherwise exist as a primary major, then the five technical courses counted for the minor are excluded from courses used to fulfill the student's major; this exclusion also applies to courses with content substantially equivalent to courses in the student's major. As an exception, at most one upper-level elective course cross-listed with the student's primary major may count toward the minor if topically relevant. At least three of the minor courses must be upper-level courses.

For all minors, introductory-level courses intended as an early educational experience may not be used to fulfill the minor requirement, unless such courses contain substantial technical content that is a prerequisite for later courses, and that material is not otherwise covered in the student's primary major. No more than one semester of independent study, supervised by an advisor in the unit offering the minor, may be used for the minimum five-course minor requirement.

IDEAS (Interdisciplinary Engineering & Applied Science) Program

Through the Interdisciplinary Engineering & Applied Science (IDEAS) program, a student can explore intellectual goals and objectives that cannot be accommodated by the programs offered in the Biomedical, Civil and Environmental, Electrical and Computer, or Mechanical Engineering and Materials Science departments. The proposed IDEAS major must satisfy the general requirements for the BSE degree at Duke. A student can customize their IDEAS major by selecting a pre-approved template or proposing their own individualized program of study.

IDEAS majors are non-ABET-accredited majors that are interdisciplinary in scope and include engineering and applied science. These majors are proposed by the student, approved by a faculty committee, and result in a bachelor of science in engineering degree. Programs with a broad foundation in the engineering sciences also may be developed under this program by those who intend to enter non-engineering professions. Although not individually accredited, these programs satisfy the national general engineering accreditation criteria.

Any Pratt student, in consultation with their advisor or another faculty member, may propose a unique combination of courses designed to meet particular career objectives. A proposal must be submitted to the Associate Dean for Undergraduate Education of the Pratt School of Engineering and the Engineering Faculty Council for approval; it may be submitted as early as the second semester of the first year and must be submitted before the beginning of the junior year. Refer to the [IDEAS website](#) for detailed instructions on preparing and submitting an IDEAS proposal.

If a student applies and has an IDEAS major approved, they may not declare any additional majors or minors in Pratt or in Trinity. The student may, however, elect to complete an undergraduate certificate program with elective courses if, in the IDEAS Committee's judgment, the certificate is unrelated to the IDEAS major theme.

Certificate Programs in Engineering

Pratt offers several [certificate programs](#) that are open to any undergraduate student. These include certificates in Aerospace Engineering, Architectural Engineering, Global Development Engineering, Materials Science & Engineering, and Robotics & Automation.

B.4. Pratt School Degree Requirements

B.4.f. 4+1 Bachelor/Master Programs

Bachelor of Science in Engineering/Master of Science Program

This 4+1 program provides students with an opportunity to plan a coordinated five-year program of studies in the Pratt School of Engineering leading to both the bachelor of science in engineering and master of science degrees. Application for admission to this integrated program may be made during the senior year. Provisional admission to The Graduate School may be granted when the student enrolls for the semester during which the bachelor of science in engineering degree requirements will be completed. Graduate-level courses during this period which are in excess of bachelor of science in engineering requirements may be credited toward fulfillment of the master of science degree requirements.

Bachelor of Science in Engineering/Master of Engineering Program

This 4+1 program provides students with an opportunity to plan a coordinated five-year program of studies in the Pratt School of Engineering leading to both the bachelor of science in engineering and master of engineering degrees. Application for admission to this program may be made as early as the spring of the junior year or as late as the spring of the senior year. Although admitted to the master of engineering program while undergraduates, 4+1 students will remain in undergraduate status for four years and will become a master of engineering students in the fifth year. Graduate-level credits, where a grade of B or better was earned and which are in excess of the bachelor of science in engineering requirements, may be transferred toward fulfillment of the master of engineering degree requirements.

Bachelor of Science/Master of Engineering Management

This 4+1 program provides students with an opportunity to plan a coordinated five-year program of studies in the Pratt School of Engineering leading to both the bachelor of science in engineering and master of engineering management degrees. This program offers engineering students exposure to both business and law as well as advanced engineering and requires completion of an engineering internship, four graduate-level engineering courses, three business courses, and one law course. Specific program requirements and application forms may be obtained from the master of engineering management program office in The Wilkinson Center for Engineering Management, 3120 Fitzpatrick Center (CIEMAS).

B.4. Pratt School Degree Requirements

B.4.g. Pratt-Specific Academic Policies

Some of the academic policies described in following sections will differ for Pratt students relative to their counterparts enrolled in the Trinity College of Arts & Sciences. In particular, the following policies vary slightly between undergraduate schools:

- Forfeiture of Precollege Credit
- Transfer Credits Taken After Matriculation at Duke
- Repetition of Courses
- Declaration of Major
- Annual Continuation Requirements

B.5. Academic Guidance & Support

In this section:

- [B.5.a. Deans & Advisors](#)
- [B.5.b. Directors of Undergraduate Studies](#)
- [B.5.c. Academic Resources](#)

B.5. Academic Guidance & Support

B.5.a. Deans & Advisors

Academic Deans

Academic Deans play many roles in undergraduate education. Primarily, they

1. monitor students' academic progress toward graduation,
2. arbitrate and track academic policy exceptions, and
3. support students of concern.

Students have the same academic dean for the duration of their academic career at Duke. Students consult with their academic dean concerning graduation requirements, personal or medical problems that affect academic work, and general oversight of progress to the degree.

Advising

At Duke, students are supported by a network of advisors who help them find the academic path that is right for them. Central to this network is their academic advisor. The advisor's role goes beyond helping a student choose classes and understand requirements to include helping the student think about their overall educational and personal goals, as well as possible majors, careers and interesting co-curricular opportunities.

In addition to their academic advisor, students can consult with pre-professional advisors, faculty, peer success leaders, and their academic dean. Good advising can also be informal and often occurs in conversation with members of the faculty. Students have a responsibility to understand and meet the requirements for the curriculum under which they are studying and should seek advice as appropriate. Students will benefit from using the wide range of advising resources that are available to them.

B.5. Academic Guidance & Support

B.5.b. Directors of Undergraduate Studies

The director of undergraduate studies (DUS) is the departmental or program officer responsible for coordinating and overseeing the undergraduate curriculum and courses of instruction. The DUS authorizes transfer credits and certifies that each student has met the requirements for the major or minor at the point of graduation. Students can consult with their major academic advisor or the DUS regarding whether and how courses can count toward the requirements of the major.

B.5. Academic Guidance & Support

B.5.c. Academic Resources

Academic Resource Center

Being a Duke student can be inspiring, rewarding, and demanding. There are challenging classes and many exciting opportunities in and out of the classroom. The Academic Resource Center (ARC) offers resources to maximize students' capabilities so they can cultivate successful academic experiences at Duke. ARC services are free to all Duke undergraduate students, in any year, studying in any discipline.

- **Learning Consultations** give students an opportunity to meet one-on-one with a professional staff member to enhance their academic skills and learn strategies tailored to how they learn and to their specific courses. Consultations can address many of the challenges students may face, including time management; procrastination and motivation; how to balance study, work, and co-curricular activities; effective note-taking; exam preparation; and more.
- **Peer Tutoring** involves small groups of 2-5 students in the same course who meet weekly with a Peer Tutor to receive additional support for course content questions while being part of a community of fellow learners.
- **STEM Advancement through Group Engagement (SAGE)** learning communities provide opportunities for students to enhance their course experience, build community, and develop scholarship and leadership skills in certain STEM courses. Students work in small groups facilitated by upper-level undergraduate students. Currently, SAGE learning communities support many introductory STEM courses. See the ARC website for the current course list.
- **Study Connect** facilitates connecting students with their classmates to form course study groups. Students can also find other students for general study groups, the GRE and MCAT.
- **LD/ADHD Support** for students with learning and attention challenges provides course specific and tailored learning strategies through learning consultations and ADHD coaching.

For more information, call the ARC at (919) 684-5917, visit arc.duke.edu, or email ARC@duke.edu.

Duke Testing Center

The Duke Testing Center provides a secure, comfortable, and minimally distractive testing environment for Duke undergraduates who qualify and are enrolled in a course with an instructor who uses the Testing Center. Students who qualify include those granted testing accommodations by the Student Disability Access Office, or who need to complete make-up exams due to an approved absence. Students will schedule in advance to take their Duke course exams in the proctored environment at the Center. For more information about the Testing Center, visit testingcenter.duke.edu.

Undergraduate Research

Duke University encourages connections between the academic experience and the research endeavors of its faculty scholars and investigators. More than half of Duke undergraduate students complete faculty-mentored research projects in both individual and collaborative settings, working with professors from every department across campus. The **Undergraduate Research Support (URS) Office** in Trinity College promotes student involvement in research by working closely with Trinity academic departments and by providing financial support for research engagements in many disciplines. The office provides research assistantships and grants through the academic year, research grants and fellowships for the summer, and travel grants for presentations at professional conferences. The URS Office also organizes symposia of undergraduate research and it administers summer research programs. For detailed information, visit undergraduateresearch.duke.edu.

Graduate and Professional School Advising

Students planning to enter a graduate or professional school should consult published information from the relevant advising programs or offices at advising.duke.edu/preprofessional-advising. For specific information regarding courses and curriculum choices, students should seek input from their faculty advisors and pregraduate or preprofessional advisors where appropriate.

- Engineering — for careers in engineering, consult the associate dean of Pratt School of Engineering or the director of graduate studies in one of the engineering departments
- Pregraduate — contact Director of Undergraduate Studies in department of interested area of study
- [Prehealth](#) — for careers in medicine, dentistry, veterinary medicine and other health care fields
- [Pre-Law](#) — for careers in law

B.6. Study Abroad/Away

In this section:

- [B.6.a. Global Education Office for Undergraduates \(GEO\)](#)
- [B.6.b. Domestic Exchange Programs](#)

B.6. Study Abroad/Away

B.6.a. Global Education Office for Undergraduates (GEO)

During the academic year or summer, a Duke student may earn Duke or study abroad/away transfer credit, depending on the program type, for approved work completed (1) on a Duke-administered program; (2) at an approved foreign university; or (3) on an approved program abroad that is sponsored by another US college or university. No credit will be awarded for college coursework completed on a study abroad program undertaken prior to matriculation at Duke.

A student who wishes to receive credit for study abroad/away should take into account the following criteria established by the faculty and administered by the Global Education Committee for Undergraduates:

- For Trinity, a scholastic grade point average of at least 2.7 for semester or academic year study abroad/away—a student lacking this average may request a GPA waiver from their academic dean if there are unusual circumstances; for Pratt, a minimum scholastic grade point average of 3.0.
- Pre-departure approval of the program and courses by the Global Education Committee and the Global Education Office for Undergraduates (GEO).
- Confirmation of eligibility to study off campus from the Office of Student Conduct and the student's academic dean.
- Approval by the appropriate directors of undergraduate studies for the courses to be taken abroad/away.

A student on academic or disciplinary probation or one who does not meet academic continuation requirements will not be permitted to study abroad/away, regardless of the student's acceptance to a program.

Generally, there are two types of study abroad/away programs available to Duke undergraduates: Duke-administered and Duke-approved programs. Duke-administered programs have varying degrees of academic and logistical oversight from Duke; offer a mixture of Duke credits and study abroad/away transfer credits, depending on the program; and charge Duke tuition, a program fee, and a housing fee (when applicable). Duke-approved programs are administered by other US institutions or foreign universities; offer study abroad transfer credits that do not compute in the Duke GPA, but are eligible for credit toward certain curricular requirements at Duke; and charge tuition and fees entirely apart from Duke. For Duke-approved programs, Duke charges a per semester Study Abroad Fee (see the section *Fees for Study Abroad* in [Tuition & Fees](#) for details about fees charged for Duke-approved study abroad programs).

Students in Duke-administered and Duke-approved programs are expected to enroll in the equivalent of 4.0 Duke course credits each semester. No underloads and no overloads are permitted. To receive the maximum amount of transfer credit at Duke—generally 4.0 course credits for a full semester, 8.0 course credits for a full academic year, 2.0 course credits for a summer—students on Duke-approved programs are expected to take a full, normal course load, as defined by the GEO and the Duke University Registrar. Students should confirm the required course load for each program with GEO advisors.

Study abroad/away transfer credit will be awarded for work satisfactorily completed in Duke-administered and Duke-approved programs abroad in accordance with GEO policies and procedures found at globaled.duke.edu/about/forms-policies. Study abroad/away transfer credit courses may, upon evaluation, carry Arts & Sciences Curricular codes. Please see each degree requirement section for limitations on how transfer credits can be used for fulfilling curricular requirements.

Students should consult the section on [Graduation & Honors](#) or their academic dean to determine the eligibility of study abroad courses for honors such as the Dean's List. Seniors planning to spend their final semester studying off campus may face postponed graduation because study abroad/away semester dates may differ from Duke's, and transcripts may be delayed.

Duke-Administered Semester Study Abroad/Away Programs

Duke currently administers a number of its study abroad/away programs. In these programs, Duke faculty and/or academic departments are involved in the academic design and implementation of the programs, and the courses receive Duke credit, as courses on campus do, unless otherwise noted. Information on these programs is available from GEO at globaled.duke.edu/programs/duke-in-programs.

B.6.b. Domestic Exchange Programs

Trinity College has exchange programs with two domestic institutions: Howard University in Washington, DC, and Spelman College in Atlanta, Georgia. Duke students may study for a semester at either institution, while students from these institutions enroll for the same period at Duke. Students may enroll in a wide variety of courses at either Howard University or Spelman College for which they will receive transfer credit at Duke. Transfer credits earned under this exchange program do not count against the maximum allowable domestic or study abroad transfer credits.

B.7. Special Programs

Bass Connections

Bass Connections brings together faculty, graduate students, and undergraduate students to tackle complex societal challenges in interdisciplinary research teams. The program exemplifies Duke's commitment to interdisciplinary research and teaching as a vital part of the university's mission.

Through Bass Connections project teams, courses, and summer programs, students and faculty engage in interdisciplinary, collaborative research focused on societal challenges, often in partnership with external organizations. Many participants choose to take their research further through grants and other opportunities within Duke and beyond.

- **Project Teams.** Interdisciplinary research teams tackle complex societal challenges over two semesters (some teams add a summer component). Students can receive course credit during the academic year and funding during the summer. For more information, visit bassconnections.duke.edu/project-teams.
- **One-Semester Courses.** Numerous courses highlight interdisciplinary thinking, collaborative assignments, and interaction with community partners. For more information, visit bassconnections.duke.edu/courses.
- **Summer Programs.** Students spend six to ten weeks immersed in mentored research through a range of summer programs, including Data+ and the Global Health Student Research Training program. For more information, visit bassconnections.duke.edu/summer-programs.
- **Student Research Awards.** Students may apply for funding for student-driven research projects, collaborative or individual. For more information, visit bassconnections.duke.edu/student-research-awards.

Reserve Officer Training Corps

Duke University and the military services cooperate in offering officer education programs to provide opportunities for students to earn a commission in the United States Air Force, Space Force, Army, Navy, or Marine Corps. These programs are described below, and detailed information on scholarships, entrance requirements, and commissioning requirements is available from the offices of the Department of Aerospace Studies (Air Force and Space Force), the Department of Military Science (Army), and the Department of Naval Science (Navy and Marine Corps). Courses offered in these departments are described on the [Courses](#) page.

The Air Force Reserve Officer Training Corps (AFROTC)

The Air Force Reserve Officer Training Corps (AFROTC) functions as the Department of Aerospace Studies at Duke University. AFROTC's mission is "Develop Leaders of Character for tomorrow's Air Force and Space Force." AFROTC offers students the unique opportunity to earn a commission as a Second Lieutenant in the United States Air Force or Space Force upon successful completion of the program and graduation. AFROTC selects, educates, trains, and commissions college men and women through a three-year to four-year curriculum. The program consists of both the General Military Course (GMC), a course sequence normally taken during the freshman and sophomore years, and the Professional Officer Course (POC) taken during the junior and senior years. The GMC program is open to freshman and sophomore students who meet AFROTC selective military eligibility requirements.

Students who complete the GMC program may compete for selective entry into the POC. Becoming a POC requires successful completion of a 13-day intensive leadership program. Field Training is generally offered the summer between sophomore and junior years. Also, during summer breaks, students are given the opportunity to volunteer for Air Force sponsored advanced training programs and internships in a variety of different areas.

Students may compete for various types and lengths of scholarships. These scholarships pay up to full tuition, a monthly tax-free stipend of \$300-\$500, and an annual book allowance of \$900. All members of the POC receive the tax-free stipend even if not on scholarship. Upon program completion and graduation, students are commissioned and assigned to active duty units within the United States Air Force and Space Force for a service commitment of at least four years.

For further information, visit afrotc.duke.edu.

The Army Reserve Officers' Training Corps (AROTC)

Army ROTC provides students of strong character with an opportunity to develop themselves as scholars/athletes/leaders and earn a commission as an Army Officer. Two programs are available, the three- or four-year progression program and the two-year lateral entry program.

The three- or four-year program consists of the Basic Course (first-year and sophomore year) and the Advanced Course (junior and senior years). Students who enroll at the start of their sophomore year have the option to compress the Basic Course into one year. Direct entry into the Advanced Course (a two-year program) is possible by attending four weeks of training at Fort Knox, Kentucky, during the summer before the student's junior year. Students may also be allowed direct entry into the Advanced Course if they have completed Basic Training through the Active Army, Army Reserve, or Army National Guard.

Students wishing to register for the two-year program should confer with the Department of Military Science before March of their sophomore year to sign up for summer training and maintain eligibility to compete for a two-year scholarship. There is currently one mandatory summer training requirement: Advanced Camp at Fort Knox, which takes place over a five-week period between the junior and senior years. All uniforms, equipment, and texts are provided.

Detailed information on Army ROTC is available at arotc.duke.edu.

The Naval Reserve Officer Training Corps (NROTC)

The Department of Naval Science offers students the opportunity to become Navy and Marine Corps officers upon graduation. Selected students will receive up to four years of tuition, fees, uniforms, and textbooks at government expense under the auspices of the Scholarship Program. In addition, scholarship students receive subsistence pay and summer active duty pay of approximately \$3,000 a year. Each summer they participate in four weeks of training either aboard a ship or a shore facility to augment their academic studies. A minimum of five years of active duty service is required upon graduation.

A two-year program is available to rising juniors. Students wishing to join the two-year program must meet with the Department of Naval Science no later than March 1 of their sophomore year in order to qualify for the summer training and two-year scholarship, which covers full tuition, fees, uniforms, and textbooks.

Non-scholarship students wishing to join the NROTC Battalion may be enrolled in the College Program at any time before the spring semester of their junior year. They take the same courses and wear the same uniforms, but attend the university at their own expense. Uniforms and Naval Science textbooks are provided by the government.

College Program students may compete for scholarship status through academic performance, demonstrated aptitude for military service, and nomination by the professor of Naval Science. Students in either program may qualify for a commission in the United States Marine Corps through the Marine Corps Option Program.

For further information on the NROTC program, visit nrotc.duke.edu.

Service-Learning and Community-Engaged Courses (SLCE)

Service-learning and community-engaged (SLCE) courses incorporate collaborations with local community partners and translate theory into real-world experience. By exploring the rich diversity of our local and global communities, SLCE courses provide students with opportunities to engage effectively with communities on issues such as the environment, socioeconomic inequities, public policy, health, immigration, education, and more.

Service-learning courses require a commitment to engage in a service project determined by the needs of the community partner. Community-engaged classes may or may not require a service-component, but provide opportunities to interact with community members, organizations, and events.

All SLCE courses support students in developing a wide range of skills, from cross-cultural awareness and critical thinking to problem-solving and leadership skills. The courses also help students discover the specific ways they want to be agents of change in the world. To learn more about Duke Service-Learning, go to servicelearning.duke.edu.

 - Compliance with Academic Regulations
 - Exclusion of Disruptive Students from a Course
- C.1.i. Graduation & Honors
 - Notification of Intention to Graduate
 - Graduation and Commencement
 - Academic Recognition and Honors

C.1. General Academic Policies

C.1.a. Academic & Financial Obligations

Students are expected to meet academic requirements and financial obligations, as specified in the school bulletin, to remain in good standing. Failure to meet these requirements and to abide by the rules and regulations of Duke University may result in summary dismissal. All undergraduate students that matriculate into Trinity College for the academic year 2025-2026 will be expected to complete the requirements for the Arts & Science Curriculum launched in the summer of 2025. This applies to first year students and transfer students. If a student matriculated to Trinity College before the summer of 2025, they should refer to the bulletin for the academic year in which they began.

C.1. General Academic Policies

C.1.b. Degrees & Academic Credit

Duke University offers in Trinity College of Arts & Sciences the degrees of bachelor of arts and bachelor of science, and in Pratt School of Engineering the degree of bachelor of science in engineering. Within the curriculum of each college or school, students have the major responsibility for designing and maintaining a course program appropriate to their background and goals. They are assisted by faculty advisors, departmental directors of undergraduate studies, and academic deans. Students must accept personal responsibility for understanding and meeting the requirements of the curriculum. Credit toward a degree is earned in units called course credits, which ordinarily consist of three to four hours of instruction each week of the fall or spring semester or the equivalent total number of course credits in a summer term. Double (2.0) course credits, half (0.5) course credits, and quarter (0.25) course credits are also recognized.

C.1. General Academic Policies

C.1.c. Course Numbering

Introductory-level courses are numbered 100 to 199; mid- to advanced-level courses are numbered 200 and above; courses numbered from 400 to 499 are primarily for seniors; courses numbered from 500 to 699 are graduate-level courses open to advanced undergraduate students. Special Topics courses may be repeated (if the subtitles of the courses are different), subject to any limitation set forth in the course description in this bulletin.

CATALOG NUMBER	COURSE TYPE
0-99	• Advanced Placement credit • House courses • Registrar/department special purpose
100-199	• Introductory-level undergraduate courses • Basic skills/activity courses • Foundation courses • Focus Program courses • First-year writing courses
200-399	Undergraduate courses above introductory level
400-499	Advanced undergraduate courses (senior seminars, capstone courses, honors thesis courses)
500-699	Graduate courses open to advanced undergraduates
700-999	Graduate-only courses (not open to undergraduates)
SUFFIX	COURSE TYPE
A	Course taught away from Duke's Durham campus, e.g., study abroad or domestic away programs
CN	Constellation course (first-year students only)
D	Course has a discussion section (for a larger class)
FS	FOCUS course (first-year students only)
L	Course includes laboratory experience
P	Preceptorial (small class)
S	Seminar (small class)
T	Tutorial (small class)

C.1. General Academic Policies

C.1.d. Class Attendance & Missed Work

Responsibility for class attendance rests with individual students, and since regular and punctual class attendance is expected, students must accept the consequences of failure to attend. Instructors may refer students to their Advisor or Academic Dean when students accumulate excessive numbers of absences. If an instructor is concerned about a student, they are encouraged to submit a Duke Reach report.

Absences from class and missed work may be excused in five circumstances: 1) significant illness, 2) personal instances of distress or emergency, 3) religious observance, 4) varsity athletic participation, and 5) required court or legal appearances. Excessive absences across any of these categories may impact a student's ability to meet learning objectives and performance in the course.

Detailed information about the policy and the notification procedure is available at trinity.duke.edu/undergraduate/academic-policies/class-attendance-and-missed-work for students in Trinity College, or pratt.duke.edu/life/resources/policies/#illness for students in the Pratt School of Engineering.

Missed work associated with any other absence is not covered by this policy. In courses where a defined number of absences is permitted, students should make judicious use of them and save them for unavoidable circumstances. Students are encouraged to discuss any absence, planned or unexpected, with their instructor to determine whether make-up is possible. The nature of the make-up, if any, is to be determined by the faculty member in accordance with their attendance policy as outlined in the course syllabus.

C.1. General Academic Policies

C.1.e. Changes in Status

Withdrawal and Return

Students who wish to withdraw from the college must give official notification to the [Time Away Office](#). Notification must be received prior to the beginning of classes in any term, or tuition will be due on a pro-rata basis. (See the section *Fall and Spring Refunds* in [Financial Policies](#).) For students withdrawing on their initiative after the beginning of classes and up to the first day of the last four weeks of regular classes in the fall or spring term, or before the last two weeks of regular classes in a summer term, a W is assigned in lieu of a regular grade for each course. After these dates, an F grade is recorded unless withdrawal is caused by an emergency beyond the control of the student, in which case a W is assigned as part of the time away process. Withdrawals from the university during a semester will not be approved after the last day of classes.

Students may be involuntarily withdrawn for academic reasons, financial reasons, violation of academic regulations, disciplinary reasons, as well as administratively. Their withdrawal will be noted accordingly on the official academic record. Students with a dismissal pending are not in “good standing” and therefore are ineligible to undertake coursework scheduled to be taught during the pending dismissal period. Students who received an I or X grade during a semester in which they experienced a voluntary or involuntary time away from Duke, may, at the discretion of their Academic Dean, be required to complete the outstanding work prior to returning to school.

Students who are placed on academic probation after returning to Duke may not be eligible to participate in particular university programs such as, but not limited to, study abroad and DukeEngage.

Return requests are made to the appropriate school or college through the Time Away Office. Each request is reviewed by the Time Away Office. A return decision is made based on information shared by the student on the return request form, information shared by relevant providers, and general readiness to return. Students who are returned must meet residential requirements. All returning students are eligible to live in on-campus housing unless they have been deemed ineligible due to a university sanction.

Return requests must be completed by October 1 for enrollment in the spring, by April 1 for enrollment in the summer, and by June 1 for enrollment in the fall. For more information, visit the [Time Away Office](#) website.

Leave of Absence

Personal leave is planned and must be requested before the semester starts by submitting a Time Away Inquiry Form to the Time Away Office. A personal leave of absence is not granted for a term in which classes have begun.

A medical leave is a voluntary time away that occurs during the course of the semester when a student's medical situation is causing them to pause their academic work to focus on their health. Students must submit a Time Away Inquiry Form and the required documentation from their medical provider. If a student does not currently have a medical provider, the Time Away Office will help them connect with a provider. The Time Away Office will review the documentation and meet with the student to review the treatment recommendations established by the student's provider. After the student has reviewed the recommendations, they will decide if they want to move forward with the medical time away. If the student wants to move forward, the Time Away Office will notify relevant university offices and professors and process the required documentation. The deadline for requesting a medical time away and submitting the provider form is by 5:00 pm on the last day of class of that term.

Students who request a medical leave of absence for a current term and submit their leave request prior to the last day of classes will be assigned W in lieu of a regular grade for each course. A medical leave of absence will not be retroactively granted for a term for which the last day of classes has already occurred.

Registration information will be provided by the university registrar to all students who are approved to return from a time away. All returning students must register prior to the first day of classes for the term of intended enrollment. Students returning from time away and desiring housing on campus will be connected with housing during the return process. Detailed information about requesting and returning from a leave of absence is provided on the Time Away Office website. Students returning to Trinity College of Arts & Sciences or the Pratt School of Engineering should visit the [Time Away Office](#) website.

Students who undertake independent study under Duke supervision and for Duke credit are not on leave of absence even if studying elsewhere. Students register at Duke as nonresident students and pay the appropriate fees or tuition at Duke. This policy also applies to Duke programs conducted away from the Durham campus.

Transfer between Duke University Schools

Students in good standing may be considered for transfer from one Duke undergraduate school or college to another, upon completion of the transfer process found at pratt.duke.edu/life/resources/policies. The review of requests to transfer involves consideration of a student's general academic standing and relative standing in the group of students applying for transfer. The school or college to which transfer is sought will give academic counseling to a student as soon as the intention to apply for transfer is known, although no commitment will be implied. A student may apply to transfer at any time prior to receiving a baccalaureate degree, and transfers may become effective as early as the completion of the first semester. A student transferring to Trinity College of Arts & Sciences from Pratt School of Engineering, prior to receiving a baccalaureate degree, may not use more than six professional school credits toward the bachelor of arts or bachelor of science degree. If admitted to either Trinity College or Pratt School of Engineering after having earned a baccalaureate degree at another institution, a student must complete in the new school/college a total of seventeen additional courses and fulfill degree requirements in order to be eligible for a second undergraduate degree at Duke.

Transfer from Duke to Another Institution

Students who enroll at Duke and subsequently transfer to another institution as degree-seeking students, will be eligible to request a return to Duke in future semesters. Former Trinity College students cannot transfer more than the equivalent of two domestic transfer credits back to Duke. Former Pratt School of Engineering students cannot transfer more than the equivalent of 4.0 course credits back to Duke. For both Trinity and Pratt students, any transfer credits will count toward the maximum allowable transfer credits from another institution as stipulated under the policy [Transfer Credit for Courses Taken After Matriculation at Duke](#). Students considering transferring to another institution should discuss this with their academic dean in the early stages of their planning. Students must submit a Time Away Inquiry Form to begin the transfer process. The Time Away Office will assist students through the process and complete all necessary documentation.

Full-Time and Part-Time Degree Status

Candidates for degrees must enroll in a normal course load (i.e., at least 4.0 course credits) each semester unless they are eligible and have received permission from their advisor or academic dean to be enrolled in fewer than 4.0 course credits (see [Course Load](#)). Students who intend to change from full-time to part-time status must request permission from their academic dean. Except for extraordinary circumstances, such permission is given only to students for the final semester of their senior year. Students must submit their online request for part-time status by the last day of classes in the semester that immediately precedes their final semester of enrollment at Duke. Part-time students may register for no less than 1.0 and no more than 2.75 course credits. Part-time students may be denied university housing. Degree candidates who matriculated through continuing education or are employees should confer with their academic dean about course load requirements.

Nondegree to Degree Status

A nondegree student must apply to the Office of Undergraduate Admissions for admission to degree candidacy.

Undergraduate Status

An undergraduate student admitted to Trinity College or Pratt School of Engineering officially becomes a Duke undergraduate student at the point of matriculation and is accorded all the rights, privileges, and responsibilities of a Duke student at that time. When an undergraduate has completed all of the requirements of the bachelor's degree and is no longer enrolled in coursework toward the degree, the student ceases to be a Duke undergraduate student in the strict sense of the word. Their rights and privileges are then defined by the [Duke Alumni Association](#). (This definition also applies to nondegree-seeking visiting students during the period of their enrollment at Duke.)

C.1. General Academic Policies

C.1.f. Continuation

Students must achieve a satisfactory record of academic performance each term and make satisfactory progress toward graduation each year to continue at Duke University. Students who fail to meet the minimum requirements to continue will be dismissed from the university for at least two semesters. (A summer session may be counted as a semester.) Those desiring to return after the dismissal period may submit a petition to return to the [Time Away Office](#). If after returning the student fails again to meet minimum continuation requirements, the student will be dismissed for six terms, which includes the combination of consecutive summer, fall, and spring terms. Students admitted to degree programs from continuing education should consult their academic dean concerning continuation.

Satisfactory Performance Each Term (Semester Continuation Requirements)

A student who does not receive a passing grade in all courses must meet the following minimum requirements or be withdrawn from the college.

In the Fall or Spring Semester

(1) In the first semester of enrollment at Duke, a student must pass at least 2.0 course credits; (2) after the first semester at Duke, a student must pass at least 3.0 course credits; (3) a student enrolled in an underload after the first semester at Duke must earn all passing grades. Students may not carry an underload without the permission of their academic dean. For the purposes of continuation, incomplete work in any course is considered a failure to achieve satisfactory performance in that course. Therefore, where continuation is in question, incomplete work in any course must be completed with a passing grade in time for final grades to be submitted to the Office of the University Registrar no later than the weekday preceding the first day of classes of the spring semester, or one week prior to the first day of classes of the second term of the summer session, as appropriate. In the case of incomplete work in the spring semester, this requirement applies whether or not the student plans to attend one or more terms of the summer session. The student, however, may not enroll in a summer term at Duke unless the requirement of satisfactory performance each semester has been satisfied.

In the Summer Session

To continue enrollment at Duke in the fall, a student enrolled at Duke in any previous semester must not fail more than one full course taken during that summer. For purposes of continuation, incomplete work is considered a failure to achieve a satisfactory performance in that course. Therefore, when eligibility to continue from the summer session to the fall is in question, incomplete courses must be satisfactorily completed in time for a passing grade to be submitted to the Office of the University Registrar no later than the business day preceding the first day of fall classes.

Any student excluded under the provisions of these regulations may on request have the case reviewed by the lead academic dean of their respective school, Trinity College of Arts & Sciences or the Pratt School of Engineering.

Satisfactory Progress toward Graduation (Annual Continuation Requirements)

Each year prior to the beginning of fall term classes, a student must have made satisfactory progress toward fulfillment of curricular requirements to be eligible to continue in the college; i.e., a certain number of courses must have been passed at Duke according to the following schedule:

TO BE ELIGIBLE TO CONTINUE TO THE:	A STUDENT MUST HAVE PASSED:
2nd semester at Duke	2.0 course credits at Duke
3rd semester at Duke	6.0 course credits at Duke
4th semester at Duke	10.0 course credits at Duke
5th semester at Duke	Pratt: 13.0 course credits at Duke Trinity: 14.0 course credits at Duke
6th semester at Duke	Pratt: 17.0 course credits at Duke Trinity: 19.0 course credits at Duke
7th semester at Duke	Pratt: 22.0 course credits at Duke Trinity: 22.0 course credits at Duke, plus two additional course credits*
8th semester at Duke	Pratt: 26.0 course credits at Duke Trinity: 26.0 course credits at Duke, plus two additional course credits*
*The additional courses in 7th and 8th semesters may be earned through placement and/or transferred courses.	
The Pratt School of Engineering will count up to four post-matriculation transfer course credits (in addition to study abroad) for students entering the 7th or 8th semester of Annual Continuation Requirements.	

For students who have interrupted their university studies, the continuation requirement must still be satisfied before the beginning of each fall term. For such students, the number of courses needed to satisfy the continuation requirement is determined from the table above, based on which semester they will enter in the fall term.

Courses taken in the summer term at Duke may be used to meet this requirement. Except as noted, Advanced Placement may not be used to satisfy annual continuation; however, they are counted toward graduation requirements. No more than two courses completed with D grades, 1.0 total course credit of PE; 1.0 course credit of activity courses (no house courses); 2.0 course credits of military science (junior/senior year only); and 6.0 course credits of professional or graduate school courses may be counted toward fulfilling this annual continuation requirement.

C.1. General Academic Policies

C.1.g. Academic Warning & Probation

A student whose academic performance satisfies continuation requirements, but whose record indicates marginal scholarship, will be subject either to academic warning or academic probation. Failure to clear probationary status in the semester of probation will result in a student's dismissal for academic reasons. Students admitted to degree programs from continuing education should consult their academic deans concerning warning and probation.

In determining whether a student should be placed on academic warning, probation, or dismissed for academic reasons, a grade of U earned in a course, whether that course is offered only S/U or the student elects to take it on the S/U basis, is considered equivalent to a grade of F.

Academic Warning

A student who receives a single grade of F while enrolled in four or more courses or a second (or more) D will be issued an academic warning by the academic dean.

Academic Probation

For a student enrolled in 4.0 or more course credits, the following grades will result in academic probation for the succeeding semester: during the first semester of the first year, grades including DD, DF, or FF; during any subsequent semester, grades including DDD, DF or FF (as long as the student has passed 3.0 other course credits); and during two consecutive semesters, grades including DDDD, DDDF, or DDFF. For a student enrolled in an authorized underload (i.e., fewer than 4.0 course credits), the following academic performance will result in academic probation: during the first semester of the first year, grades of DD or F; during any subsequent semester, grades including DDD or DF (as long as 3.0 course credits have been passed in that semester); and during two consecutive semesters, grades including DDDD, DDDF, or DDFF. In a case where probation may be in question because of an incomplete grade, the student will be notified by the dean of the need to have the incomplete replaced by a satisfactory grade to avoid probation.

The probation status will be reflected on those academic records used for internal purposes only. Students placed on academic probation must acknowledge their probationary status in writing to their academic dean to continue in the college. They are also expected to seek assistance from campus resources, have their course selection approved by their academic deans, and meet periodically with them. They may not study abroad during the probation period. Students are expected to clear their probationary status during the semester of probation. In order to do so, they must enroll in four full-credit courses, of which no more than one may be taken on a Satisfactory/Unsatisfactory basis. Grades of C-, S, or better must be earned in each course, or a C average must be achieved in that semester.

Probationary status cannot be cleared in a semester in which students seek permission and are allowed to withdraw to an underload. In such cases, the probationary status continues through the next semester of enrollment or in both terms of the summer session. Students on probation, whether in a normal load or an underload, are required to meet continuation requirements. Students whose probationary status for the reason of an underload continues to a second semester must adhere to the conditions and standards previously outlined for clearing probation. Failure to do so will result in academic dismissal.

Academic Warning and Probation Related to Arts & Science Curriculum Expectations

Under the Arts & Science Curriculum launched in the summer of 2025, students are expected participate in curricular features such as the First Year Experience at certain times of their Duke journey. Failure to do so may result in Academic Warning and Probation and will be administered by Trinity College. The student will be notified of such occurrence and will follow the expectations of Academic Probation outlined above.

C.1. General Academic Policies

C.1.h. Resolution of Academic Concerns

Trinity College provides formal educational opportunities for its students under the assumption that successful transmission and accumulation of knowledge and intellectual understanding depend on the mutual efforts of teachers and students. Ideally, the college offers a range of learning experiences in which students strive to learn enough to be able to test their ideas against those of the faculty, and faculty, through the preparation of course materials and the freshness of viewpoints of their students, discover nuances in their disciplines.

Sometimes, however, student-faculty interrelationships in certain courses give rise to concerns that, for whatever reason, can inhibit successful teaching and learning. When this occurs, students often need assistance in resolving the issues.

The faculty and administration of Trinity College attempt to be genuinely responsive to all such matters and a student should not hesitate to seek assistance from faculty and administrative officers in resolving academic concerns.

Questions about course content, an instructor's methods of presentation, the level of discourse, criteria for evaluation of students, or administrative procedures in a course should be directed to the instructor of the course. (See the following section, Undergraduate Grade Review Procedure, when concerned about a grade.) If a student believes that productive discussion with the instructor is not possible, courtesy requires that the instructor be informed before the student refers questions about the course to the director of undergraduate studies or, in their absence, to the chair of the department. If a student's concern involves a departmental policy rather than an individual course, the student should first confer with the director of undergraduate studies in the department. A list of the names, addresses, and telephone numbers of the various directors of undergraduate studies can be found in the University Directory. Staff members in the department offices can assist in arranging appointments with the directors. When necessary, directors of undergraduate studies may refer students to the department chair.

Students in doubt about how to proceed in discussing a particular problem, or who seek a resolution of a problem, are encouraged to confer with their academic dean in Trinity College or Pratt School of Engineering.

In those exceptional cases where a problem remains unresolved through informal discussion, a formal procedure of appeal to the Dean of Undergraduate Education in Trinity College or the Senior Associate Dean for Undergraduate Education at Pratt School of Engineering is available. A student may initiate this more formal appeal procedure by bringing their problems with assurance of confidentiality, if requested, to the attention of the senior associate dean of Trinity College or the senior associate dean for education at Pratt School of Engineering, who will request information about the nature of the issue and about the earlier efforts made to deal with it. If the problem concerns a specific course, it should be directed to the appropriate senior associate dean in the college or school in which the course is taught.

Undergraduate Grade Review Procedure

A student who questions a final grade received in a course should first discuss the matter with the instructor within thirty days of receiving the grade. After meeting with the instructor, if the student still believes the instructor has assigned an inaccurate or unjustified grade, the student should discuss the matter with the director of undergraduate studies in the department or program concerned. If no satisfactory resolution is reached, the student may make a formal complaint to the director of undergraduate studies in the department or program concerned. The formal complaint must be submitted to the director of undergraduate studies prior to the first day of classes for the semester immediately following the recording of the grade.

The director of undergraduate studies will present the case to the chair of the department or program director, and the two of them will review the case with the instructor involved. If the chair or the director of undergraduate studies agrees with the instructor that there are no legitimate grounds on which to change the grade, the grade stands as recorded. If the director of undergraduate studies and chair believe there are grounds to consider a change and the instructor is unwilling to change the grade, the director of undergraduate studies will notify the student that they may request a review of the case by writing to the dean of undergraduate education in Trinity College of Arts and Sciences or in the Pratt School of Engineering, depending on which college or school offered the course in question. A written request must be submitted before the end of the Drop/Add period of the semester following that in which the instructor recorded the grade.

The dean will review the case and decide whether there are grounds to convene an ad hoc Committee for Review of Grade. If the dean decides there are no grounds, then the grade is not changed.

If the dean decides that there are grounds to proceed, the dean will charge and convene an ad hoc Committee for Review of Grade. The committee shall consist of the dean and two regular rank faculty members from the same division but not the same department (or from different departments in Pratt School of Engineering). The two faculty members of the committee are to be nominated by the appropriate faculty council, either the Executive Committee of the Arts and Sciences Council or the Engineering Faculty Council. This committee will then evaluate and review the case, and the dean may initiate a grade change if that is the recommendation of the committee.

Compliance with Academic Regulations

Under no circumstances may students ignore official rules and requirements, as this is a breach of the Duke Community Standard and a "failure to comply" as described in [The Duke Community Standard in Practice: A Guide for Undergraduates](#). Students who ignore official rules and requirements will at the least have their registration for the next academic semester blocked by their academic dean until after the close of the last window of that registration period. They could also be subject to involuntary withdrawal for a period of two semesters and/or referred to the Undergraduate Student Conduct Board for possible disciplinary action.

Exclusion of Disruptive Students from a Course

The successful conduct of courses depends upon a basic spirit of mutual respect and cooperation among the participants. If a student disrupts a class in such a way that it seriously compromises the educational experience of the course for other students or prevents the instructor from accomplishing the goals of the course as outlined in the syllabus, the instructor may ask the student to leave the class meeting.

The instructor and the student are then expected to meet to discuss and prepare in writing the conditions under which the student may return to the course. If the disruptive behavior continues, the instructor may report the matter to the student's academic dean. The academic dean will investigate the matter to determine whether the student should be referred to the Office of Student Conduct for consideration of formal charges of violation of university policies including "[Classroom Disruption](#)," "Disorderly Conduct," and/or "Failure to Comply." If probable cause resulting in further judicial action is not found, the matter is to be referred to the student's academic dean who will make a decision concerning the status of the student in the course.

If the student or the faculty member wishes to appeal the decision of the academic dean, an appeal is to be directed to the lead dean of Trinity College, the academic appellate officer for the college. The decision of the lead dean in such a case is final. If the student is permanently excluded from the course, a notation of W will be recorded on the student's academic record.

C.1. General Academic Policies

C.1.i. Graduation & Honors

Notification of Intention to Graduate

The Intent to Graduate Form submitted by students in Trinity College of Arts & Sciences and Pratt School of Engineering is an official notification that they expect to have completed all requirements for the degree and to receive the diploma on a particular graduation date. They will be confirmed for that specific graduation if basic requirements, i.e., general education and one major, have been completed. Duke confers only one undergraduate degree to a student, that which is confirmed by the department of the first major. Students wishing to change expected graduation terms to complete additional requirements for second majors, minors, or certificates, must notify their Academic Dean by the end of the final exam period. It is the responsibility of students to submit the form on or before established deadlines. For students in Trinity College and Pratt School of Engineering, information regarding the location and date of availability of the online diploma form is sent to prospective graduates at their Duke email address.

Graduation and Commencement

Commencement exercises are held once a year in May when degrees are conferred upon and diplomas are issued to those who have completed degree requirements by the end of the spring term. Students who complete requirements by the end of the summer term or by the end of the fall term receive diplomas dated September 1 and December 30, respectively. Students who are within 4.0 course credits of graduation at the end of the spring term may request to participate in the annual commencement exercises.

Academic Recognition and Honors

In determining a student's eligibility for academic recognition and honors, only grades earned in Duke courses, including those earned in Duke Study Abroad programs and courses covered by the interinstitutional agreement are considered.

Dean's List accords recognition of academic excellence achieved during each semester. To be eligible for this honor, undergraduates in Trinity College of Arts & Sciences must earn a grade point average for a semester that places them in the highest third of undergraduates in their respective college and in addition must (1) complete at least 4.0 course credits, including at most two academic half courses (excluding dance performance/technique, physical education activity, music activity, and house courses) for a regularly assigned grade (i.e., no Satisfactory/Unsatisfactory courses); and (2) receive no incomplete or failing grades. Undergraduates who in addition earn semester grade point averages that place them in the highest ten percent of undergraduates in their respective college will receive the Dean's List with Distinction honor, while the remainder of those placing in the highest one third will receive the Dean's List honor as noted above.

In the Pratt School of Engineering, undergraduates must earn a grade point average placing them in the highest one third of their class and in addition must: (1) complete at least 4.0 course credits, including at most two academic half courses (excluding dance performance/technique, physical education activity, music activity, and house courses) for a regularly assigned grade (i.e., no Satisfactory/Unsatisfactory courses); and (2) receive no incomplete or failing grades. Undergraduates who in addition earn grade point averages that place them in the highest ten percent of their class also will receive the Dean's List with Distinction honor, while the remainder of those placing in the highest one third will receive the Dean's List honor as noted above.

Graduation with Distinction accords recognition to students who achieve excellence in their major area of study as determined by the departments and who demonstrate excellence on the basis of a thesis or other substantive scholarly project not anchored in a major but rather in a certificate program, a minor, or any other elective field of study. In Trinity College all academic units offering a major have eligibility requirements and procedures leading to Graduation with Distinction, as does Program II. Some may offer a double honors option, that is, honors in two academic units for a single thesis, though this is expressly precluded in the case of students pursuing Graduation with Distinction based on a project not associated with a major. Graduation with Distinction is separate and distinct from Latin Honors (see below). Interested students should consult the relevant directors of undergraduate study or Program II dean for information about specific requirements of and eligibility for Graduation with Distinction. In general, students seeking to graduate with distinction will participate during their junior and/or senior years in a seminar and/or a directed course of reading, laboratory research, or independent study that results in substantive written work. Each student's overall achievement in the major or Program II, including the written work, is assessed by a faculty committee. Graduation with Distinction may be awarded at one of three levels: highest distinction, high distinction, or distinction, though not all academic units offer all levels.

In the Pratt School of Engineering, students in biomedical engineering, civil and environmental engineering, electrical and computer engineering, and mechanical engineering must have a 3.5 grade point average and complete a significant independent study project during their senior year. The results of the research project must be summarized in a formal written report and defended in an oral presentation before a committee of faculty members. Departmental requirements for an oral presentation and written report may vary.

Latin Honors by Overall Academic Achievement accords recognition for academic excellence achieved over the duration of an entire undergraduate career. The Latin Honors program recognizes academic excellence achieved over the duration of an entire undergraduate career. Unlike the Dean's List honor, which recognizes academic excellence achieved over the short term (one semester), eligibility for the three categories of Latin Honors (summa cum laude, magna cum laude, and cum laude) is based on the cumulative grade point average for all coursework at Duke. The bachelor's degree will be awarded summa cum laude to no more than the top five percent of the graduating class; it will be awarded magna cum laude to no more than the next ten percent of the graduating class; and it will be awarded cum laude to no more than the next ten percent of the graduating class. Thus, about 25 percent of each graduating class will receive Latin Honors. Latin honors cutoffs are based on the spring academic term for spring graduates, or the preceding spring academic term for summer and fall graduates.

Other Honors

Trinity College of Arts & Sciences and the Pratt School of Engineering officially recognize the following national academic honor societies, each of which has a long and distinguished reputation at Duke and throughout the United States. Because the past several years have seen a proliferation of academic societies in America, undergraduates at Duke should be careful to scrutinize invitations to join national honor societies with which they are unfamiliar.

Phi Beta Kappa, the national academic honor society founded at William and Mary on December 5, 1776, elects undergraduate students in Trinity College and the Pratt School of Engineering each spring. Eligibility for election is determined not by the university but by the bylaws of the local chapter (Beta of North Carolina) on the basis of outstanding academic achievement and good moral character. Reviews of the academic record of all prospective candidates are conducted in the junior and senior years as well as up to one year after graduation. The academic record must not contain an unresolved incomplete (I). For early election, students must have completed at least eighteen but fewer than twenty-four graded courses taken at Duke. Regular election requires at least twenty-four graded courses taken at Duke. Those who have earned their undergraduate degree at Duke will be considered for deferred election in the first spring after they have received their degree; deferred election also considers those who have graduated magna cum laude and who have been awarded Graduation with Distinction in their first or second major. Additional information is available on the Office of University Scholars and Fellows website at undergrad.duke.edu/office-university-scholars-fellows. The total number of persons elected annually is limited by chapter bylaw to no more than ten percent of the graduating class, of whom no more than one percent can be selected by early election. Eligibility requires a course of study with a breadth that characterizes a liberal education. The Program I curriculum meets those expectations; Program II and engineering students must demonstrate comparable breadth in order to be eligible. Inquiries concerning distribution requirements for students in the Pratt School of Engineering should be directed to Professor Michael Gustafson, Department of Electrical and Computer Engineering. All other inquiries may be directed to the Secretary of Phi Beta Kappa, care of The Office of University Scholars and Fellows at phi-beta-kappa@duke.edu.

Tau Beta Pi. Elections to the national engineering honor society, Tau Beta Pi, are held in the fall and spring. Eligibility is determined on the basis of distinguished scholarship and exemplary character. Engineering students whose academic standing is in the upper eighth of the junior class or the upper fifth of the senior class have earned consideration by their local chapter.

C.2. Courses & Registration

In this section:

- [C.2.a. Course Load](#)
- [C.2.b. Eligibility for Courses](#)
- [C.2.c. Registration](#)
- [C.2.d. Final Examinations](#)
- [C.2.e. Course Audit](#)
- [C.2.f. Independent Study](#)
- [C.2.g. Academic Internships](#)
- [C.2.h. Interinstitutional Agreements](#)

- [C.2.i. Concurrent Enrollment](#)

C.2. Courses & Registration

C.2.a. Course Load

Students are reminded that it is their responsibility to be certain that their course load conforms with academic requirements. In fall and spring terms, students must enroll in at least 4.0 course credits. In their first semester, students are limited to a maximum of 4.5 course credits, 4.0 of which must be in full-credit courses. After their first semester, students can enroll in a maximum of 5.5 course credits per semester without special permission from their academic dean. With permission of their Quad Advisor (sophomore) or academic dean (juniors and seniors), a student can enroll in a maximum of 6.0 course credits. During the same period, students in the Pratt School of Engineering may register for up to 5.0 course credits, and up to 5.5 or 6.0 course credits with the approval of their academic dean. In no case will students be allowed to register for more than 6.0 course credits. Students should note that an additional 2.0 course credits are needed beyond the standard four courses for eight semesters in order to earn 34.0 course credits required for graduation.

Students may make a request to their Quad Advisor or Academic Dean to be in an underload (defined as a course load between 3.0 and 3.75 course credits) twice during their time at Duke. That is, the number of semesters a student may be in an underload may not exceed two semesters. Seniors may request an underload, including part-time status, for the last semester (see the section *Full-Time and Part-Time Degree Status* on the page [Changes in Status](#)). Students must be enrolled in at least 3.0 course credits per semester in order to be considered full-time status for loan deferment and athletic eligibility purposes.

The maximum course program for any session of the summer term is two courses, one of which may be a laboratory course. Students at Pratt School of Engineering may enroll in two laboratory courses. With permission of their academic dean, a student may enroll in an additional 0.25 or 0.5 credit course provided that it is a physical education activity or technique/performance activity course.

Students may not register for two courses officially listed as meeting at the same time or overlapping times.

C.2. Courses & Registration

C.2.b. Eligibility for Courses

Graduate-Level Courses

The rules established by The Graduate School provide that sophomores who have declared a major, juniors, and seniors may enroll in a 500- to 600-level (graduate-level, open to advanced undergraduates) course. Undeclared sophomores wishing to enroll in a 500- to 600-level course must secure the permission of the instructor of the course and their academic dean. Undergraduates are normally not allowed to enroll in 700-900-level courses. Under exceptional circumstances, however, permission to do so may be granted to a junior or senior, provided the instructor, the director of graduate studies, their academic dean, and the dean of The Graduate School give their signed permission.

Prerequisite Requirements

Students are responsible for ensuring that they have the stated prerequisites for a course. DukeHub prevents registration for some, but not all, courses when the prerequisite is not fulfilled. Students must check the course description to determine if they have taken the necessary prerequisites before enrolling in the course.

Course Sequencing

In certain subjects, such as the sciences, mathematics, and languages (particularly at the introductory and intermediate levels), some lower-level courses must be taken in sequence because the content presented at one level is necessary for successful work at the next level. Given this circumstance, it follows that students who complete a higher-level course in a sequence may not subsequently enroll in a lower one in that sequence. Information about course eligibility is often contained in the official description of the course (see the [Courses](#) page). Students may direct additional questions about course sequencing to their academic dean or to the director of undergraduate studies of the department in question.

Repeating Courses

No course may be repeated for credit or a grade if a C- or higher has been earned previously, except where noted in the course description. Furthermore, a course taken at another institution with a grade of C- or above and not transferred to Duke may not be repeated at Duke. If it is determined such a course has been taken elsewhere and repeated at Duke, the Duke course will be removed from the academic record. A course previously passed at another educational institution, however, may be audited at Duke. Physical education activity courses may be repeated, but only one full credit of these courses counts toward graduation.

Students who receive a D-, D, or D+ in any course in Trinity College are allowed to repeat the course only at Duke and with the permission of their academic dean. The original grade, as well as the grade earned in the repeated course, appear on the transcript, the latter identified as a repeat; both grades count in the grade point average, but the credit for only one counts toward the required number of courses for continuation and the 34.0 course credits required for graduation. Course repeat request forms are available online at trinity.duke.edu/undergraduate/academic-policies/repeat-course.

An engineering student who has earned a grade of D-, D, or D+ in a required mathematics, science, or a required engineering course may, with permission of their advisor, director of undergraduate studies, and academic dean, repeat the course. Both grades will remain on the student's record. Only one credit may be counted toward satisfying continuation requirements and toward fulfilling graduation requirements.

Placement for Courses

For information about placement, students should refer to the placement guidelines on the website of the relevant department, or consult with the relevant program director. Information about mathematics placement is available [here](#), and information about physics placement is available [here](#).

Placement in Languages. Students may consult the placement guidelines linked below for information about placement in French, German, Latin, and Spanish.

- French (romancestudies.duke.edu/undergraduate/languages/french)
- German (german.duke.edu/undergraduate/language-program/placement)
- Latin (classicalstudies.duke.edu/undergraduate/placement-latin-greek)
- Spanish (romancestudies.duke.edu/undergraduate/languages/spanish#spanishplacement)

In French and Spanish, students must receive permission from the relevant language program director to enroll in a course one level below their placement. Without permission, no credit will be allowed for courses two levels below the achievement score. No credit will be given for French 101 or Spanish 101 to students who have completed more than two years of French or Spanish in high school without permission from the relevant language program director.

Students who wish to continue in any language other than French, German, Latin, or Spanish should consult with the appropriate director of undergraduate studies or language coordinators. Many departments offer a written examination and oral interview, which are used in conjunction with other criteria for placing students at the appropriate level.

C.2. Courses & Registration

C.2.c. Registration

Students who fail to register for the fall or spring semester are administratively withdrawn and must apply for readmission if they wish to return. Those students who have not paid any fees owed to or fines imposed by the university (such as laboratory fees, library fines, and parking fines) by the date specified for registration for the following term will not be permitted to register for the following term until such fees and fines have been paid in full, notwithstanding the fact that the student may have paid in full the tuition for the following term.

Course Changes after Classes Begin

Fall and Spring Terms. During the Drop/Add period, changes may be made in course schedules through DukeHub. Students may drop and add courses during the first week of classes in the fall and spring terms at their discretion; during the second week of the semester, they may drop courses at their discretion, but a permission number provided by the appropriate instructor or department is required for adding a course. After the Drop/Add period, no course may be added; also, a course may not be changed to or from the audit basis.

Students have until the withdrawal deadline (usually set four weeks before the end of courses) to request to switch a course to a Satisfactory/Unsatisfactory grading basis. First and second year students should will file a request with their advisor. Once approved, this decision will not be reversed. An S grade earned in a course may not be converted subsequently to a letter grade, and the course may not be retaken.

To withdraw from a course, first- and second-year students must obtain permission from their advisor. After the Drop/Add period, students permitted to withdraw receive a designation of W on their academic record. Coursework discontinued without the dean's permission will result in a grade of F. When students note errors in their course schedules, they should immediately consult with their academic deans during the schedule correction period that occurs immediately after Drop/Add ends.

Summer Terms. Courses may be added before or during the first three days of the term. After the third day of the term, no course may be added. Prior to the first day of the term, students may drop a course or courses for which they have registered without penalty. With the permission of the academic dean, students with compelling reasons may withdraw from a course through the twentieth day of a regular term (sixteenth day at the Marine Laboratory); and a designation of W will be recorded on their academic record. Coursework discontinued without the approval of the dean will result in a grade of F. (See also *Refund Policy* in [Financial Policies](#).)

C.2. Courses & Registration

C.2.d. Final Examinations

The times and places of final examinations for the fall and spring terms are officially scheduled by the University Schedule Committee, generally according to the day and hour of the regular course meeting; changes may not be made to the schedule without the approval of the committee. If a final examination is to be given in a course, it will be given at the time scheduled by the University Schedule Committee. Take-home examinations are due at the regularly scheduled hour of an examination, based on the time period of the class. In courses in which final examinations are not scheduled, an exam that substitutes for a final examination may not be given in the last week of classes. Hourly tests may be given in the last week of classes, whether or not a final examination is administered during the exam period. In the summer session, final examinations are held on the last two days of each term and may not be scheduled within the last three days before the examination period. Final examinations for short courses are held on the last day of the course.

No later than the end of the first week of classes of the fall and spring terms, the instructor is required to announce plans for the final examination exercise. Unless departmental policy stipulates otherwise, the form of the final exercise is determined by the instructor. However, a final written examination may not exceed three hours in length and a final take-home examination may not require more than three hours in the actual writing.

C.2.e. Course Audit

Students who audit a course are not required to submit daily work or take examinations, but are expected to attend class sessions. They do not receive credit for the course. With the written consent of the instructor, a full-time degree student is allowed to audit one or more courses in addition to the normal program. Students must register for audit courses by submitting a signed permission note from the instructor to the Office of the University Registrar. The prohibition against registering for two courses meeting at the same time applies. After the Drop/Add period in any term, no student classified as an auditor in a particular course may take the course for credit, and no student taking a course for credit may be reclassified as an auditor. Physical education activity, studio art, applied music, and dance technique/performance courses may not be audited. In the fall or spring term, a part-time degree student may audit courses by payment for each course audited. A student in a summer term carrying less than a full program for credit may secure permission to audit (above exceptions apply) but is required to pay an audit fee for the course. A student may not repeat for credit any course previously audited. Undergraduates who have been dismissed, suspended, or placed on a leave of absence may not audit or enroll in a course for credit at Duke.

Courses may be audited by faculty members, staff, alumni, employees, and their spouses, as well as spouses of currently enrolled students, members of the Osher Lifelong Learning Institute at Duke, and other members of the Triangle community. Undergraduates who are currently separated from Duke for any reason, may not audit or enroll in courses through Learning Innovation and Lifetime Education. Formal application is not necessary, though a Personal Information Form is required. Written permission from the instructor must also be obtained. The Personal Information Form and additional information about auditing by community members can be found at learnmore.duke.edu/academics/auditing.

C.2.f. Independent Study

Independent study enables a student to pursue course credit and individual interests under the supervision of a faculty member. Independent study is of two types: Independent Study (non-research) and Research Independent Study. Both require approval of the instructor involved as well as the director of undergraduate studies in the relevant department or program; student-faculty meetings at least once every two weeks during the fall or spring semester and once each week during the summer semester; completion of a final product to be completed during the semester for which a student is registered for the course; and evaluation by the instructor of the work, including the final product, associated with the independent study. The independent study form for the Trinity College is available at trinity.duke.edu/undergraduate/academic-policies/independent-study and for the Pratt School of Engineering is available at pratt.duke.edu/academics/undergrad/research.

Courses entitled Independent Study are individual non-research directed study in a field of special interest on a previously approved topic taken under the supervision of a faculty member and resulting in an academic and/or artistic product. Such independent study courses do not bear a Research (R) code and do not satisfy any general education requirement aside from the 34.0-course-credit requirement. Courses entitled Research Independent Study are individual research in a field of special interest under the supervision of a faculty member, the central goal of which is a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. One research independent study may be submitted and approved for a Writing (W) code in addition to the R code designation, but no other curriculum code designations are permitted for research independent study courses. Students who wish to request a W code for one research independent study course must take the appropriate form to courserequests@duke.edu by the end of the Drop/Add period of the semester they are enrolled in the course. The request form is available at trinity.duke.edu/undergraduate/academic-policies/research-independent-study-w-code.

For students in the Pratt School of Engineering, up to two Independent Study courses completed in their junior and/or senior year, may count as upper-level advanced electives within their major. Independent Study courses completed as a first- or second-year student, do not satisfy any general education requirement aside from counting towards the 34.0-course-credit requirement.

C.2.g. Academic Internships

At Trinity College, internship courses carry zero credits. To receive credit related to an internship, students must enroll in an independent study or companion course in which the student distills from the internship a certifiable academic experience that qualifies for course credit. Academic courses related to internships must be offered under the auspices of an academic unit in Trinity College.

The Pratt School of Engineering does not give course credit for internships.

C.2.h. Interinstitutional Agreements

Under a plan of cooperation—the interinstitutional agreement among Duke University and The University of North Carolina at Chapel Hill, North Carolina State University, North Carolina Central University, The University of North Carolina at Charlotte, and The University of North Carolina at Greensboro—a student regularly enrolled in Duke University as a degree-seeking student and paying full fees may enroll for one approved course each semester at one of the institutions in the cooperative program unless an equivalent course is offered at Duke in the same academic term. Under the same conditions, one

interinstitutional course per summer may be taken at a neighboring institution participating in this agreement provided that the student is concurrently enrolled at Duke for one full course credit. The student pays any special fees required of students at the host institution. This agreement does not apply to contract programs such as the American Dance Festival or to study abroad programs.

Approval forms for courses to be taken at these neighboring institutions may be obtained from the Office of the University Registrar website at registrar.duke.edu/registration/interinstitutional-registration/duke-students-visiting-other-campus. Only those courses not offered at Duke will be approved. Approval must be obtained at Duke from the director of undergraduate studies of the subject of the course and the academic dean. Credit so earned is not defined as transfer credit since grades in courses taken under the interinstitutional agreement are entered on the official record and used in determining the grade point average. Interinstitutional courses may be eligible to be used to fulfill Arts & Science Curriculum and Pratt Curriculum requirements. This assignment is determined by the relevant DUS in collaboration with the Trinity Courses Committee and the academic dean. The application of and the limitations for interinstitutional courses to the Pratt should be discussed with the academic dean.

Courses taken at The University of North Carolina at Chapel Hill by Duke students in the Robertson Scholarship Program (a joint scholarship program for students at Duke and The University of North Carolina at Chapel Hill) are interinstitutional courses. However, the restriction on the number of courses and the kind of courses (i.e., those not offered at Duke) permitted does not always apply. Robertson Scholars should refer to program materials for specific regulations.

C.2. Courses & Registration

C.2.i. Concurrent Enrollment

A student enrolled at Duke may not enroll concurrently in any other school or college, except under the interinstitutional agreement with neighboring schools. Students participating in one of Duke's domestic exchange programs may not concurrently enroll in another university under the interinstitutional agreement.

C.3. Grading and Grade Requirements

In this section:

- [C.3.a. Grades](#)
 - Passing Grades
 - Failing & Unsatisfactory Grades
 - Satisfactory/Unsatisfactory (S/U) Grades
 - Grade Point Average (GPA)
 - W and WA Designations
- [C.3.b. Incomplete Coursework](#)
- [C.3.c. Missed Final Examinations](#)

C.3. Grading & Grade Requirements

C.3.a. Grades

Final grades on academic work are provided to students via DukeHub after the examinations at the end of each term.

Midterm advisory grades for first-year students are issued in the fall and spring and are provided to students via DukeHub.

Passing Grades

Passing grades are A, exceptional; B, superior; C, satisfactory; S, satisfactory (see *Satisfactory/Unsatisfactory (S/U) Grades* below); and D, low pass. These grades (except S) may be modified by a plus or minus. A Z grade may be assigned for the satisfactory completion of the first term of a two-course sequence, and the final grade for both courses is assigned at the end of the second course of the sequence.

Although the D grade represents a low pass, no more than two courses passed with D grades may be counted among those required for year-to-year continuation or among the 34.0 course credits required for graduation. Courses for which a D grade is earned, however, satisfy other requirements. For information on repeating a course with a D grade, see [Eligibility for Courses](#).

Failing & Unsatisfactory Grades

A grade of F or U (see *Satisfactory/Unsatisfactory (S/U) Grades* below) indicates that the student has failed to meet the requirements for the course. The grade is recorded on the student's record. If the student registers for the course again, a second entry of the course and the new grade earned is made on the record, but the first entry is not removed. All grades that appear on the record, with the exception of S and U, are included in the calculation of the cumulative grade point average.

Satisfactory/Unsatisfactory (S/U) Grades

A student may register for grading on a Satisfactory/Unsatisfactory (S/U) basis in one course each semester and summer session, although only four courses taken on this basis may be counted toward the 34.0 course credits required for graduation. The limit of four does not apply to courses that are designated as mandatory S/U grading basis. A grade of S will be awarded if the student has earned the equivalent of a letter grade of C- or better, while a U will be awarded for the equivalent of a D+ or worse grade. Neither an S nor a U will be factored into the grade point average. Students who receive a U will receive no credit for the course and will be ineligible for Dean's List in that semester.

Students who receive an S will receive credit towards general education requirements, including curriculum codes, and the course will count toward the requirement for 34.0 course credits and continuation requirements. No other degree requirements (major, minor, or certificate, including prerequisites) may be met by a course passed under the S/U option, unless by permission of the director of undergraduate studies of the department or program. Taking a course on the S/U basis may make one ineligible for the Dean's List (see [Graduation & Honors](#)). Students studying abroad or on domestic study away programs may not receive credit for courses taken on an S/U or Pass/Fail basis.

Students who wish to take a course on an S/U basis must follow the procedure set by Academic Deans and Quad Advisors. The course cannot be listed as Graded Only in DukeHub. Students have until the withdrawal deadline (usually set four weeks before the end of courses) to switch the grading basis for a course to an S/U basis. Students must enroll in a course on a graded basis and may be allowed to switch to an S/U basis before the deadline by filing a request with the Office of the University Registrar. Students are advised to wait to switch to S/U grading until they are certain. An S grade earned in a course may not be converted subsequently to a letter grade, and the course may not be retaken.

Students who, via accommodation by the Student Disabilities Access Office (SDAO), register for 3.0 course credits per semester may take a maximum of one S/U course per semester.

Grade Point Average (GPA)

The grade point average is based on grades earned in courses offering credit at Duke and may be calculated based on the following numerical equivalencies to the grading system:

A+	4.0	C+	2.3
A	4.0	C	2.0
A-	3.7	C-	1.7
B+	3.3	D+	1.3
B	3.0	D	1.0
B-	2.7	D-	1.0
		F	0

With S/U courses, neither S nor U are calculated into the grade point average. The semester and cumulative grade point averages are determined at the end of each semester and displayed for students on the academic history reports made available to them via DukeHub.

W and WA Designations

The designation W is recorded when a student officially withdraws from a course after the Drop/Add period. (See the section *Course Changes after Classes Begin in Registration*.) WA indicates withdrawal from an audited course. Both are permanent marks on the transcript.

C.3. Grading & Grade Requirements

C.3.b. Incomplete Coursework

If, because of illness, emergency, or reasonable cause, a student cannot complete work for a course, the student may request in writing to their instructor the assignment of an "I" (incomplete) for the course. (Forms are available at trinity.duke.edu/undergraduate/academic-policies/courses-incomplete-course-work; Pratt students must see their Academic Dean for a form.) If the request is approved by the instructor in the course and by the student's academic dean, then the student must satisfactorily complete the work by the last class day of the fifth week of the subsequent regular semester except when an earlier deadline has been established by the instructor or the academic dean. An earlier deadline will be established when there is a question of the student's ability to meet continuation requirements, or the professor decides an earlier deadline date is appropriate. An "I" assigned in the fall, spring, or summer terms must be resolved in the succeeding spring or fall term, respectively. If the "I" is not completed by the deadline, it will convert to an F grade.

If a student whose work is incomplete is also absent from the final examination, an "X" is assigned for the course (see [Missed Final Examinations](#)).

A student not enrolled in the university or studying away during the semester following receipt of an "I" or "X" will have until the end of the fifth week of classes of the next semester (fall or spring) of matriculation to clear the "I" or "X" unless an earlier due date is established by the instructor and/or the academic dean. Students may not complete work in a course after graduation. (For this reason, students in their final term at Duke are not eligible for incomplete grades.) Once recorded, a notation of the "I" or "X" will remain permanently on the student's record, even after the final grade is assigned for the course. In addition, an "I" or "X" cancels eligibility for Dean's List and Dean's List with Distinction. Finally, students who receive an "I" or "X" during a semester in which they experience a voluntary or involuntary separation from Duke may, at the discretion of their academic dean, be required to complete the outstanding work prior to returning to school.

For purposes of determining satisfactory progress each term and toward graduation, incomplete work in a course indicated by a grade of I or X is not presumed to be satisfactory performance in that course. Furthermore, an incomplete (I grade) or X grade during the academic year cancels eligibility for semester honors in the term the I or X grade was issued; i.e., Dean's List and Dean's List with Distinction.

C.3. Grading & Grade Requirements

C.3.c. Missed Final Examinations

If a student is absent from a final examination, the instructor will submit an "X" instead of a final grade unless the student's grade in the class is failing, in which case the instructor may submit an F. The student must present an acceptable explanation for the absence to the appropriate academic dean within 48 hours after the scheduled time of the examination. Because end-of-the-semester travel arrangements are not the basis for changing a final examination, students are advised to consult the final examination schedule when making such arrangements. Deferral of a final examination will not be authorized by the academic dean if it is ascertained that the student has a history of excessive absences or failure to complete coursework in a timely fashion in the course in question. The "X" is converted to an F if the academic dean does not approve the absence. If the absence is excused by an academic dean, the student arranges with the academic dean and the instructor for a makeup examination to be given at the earliest possible time. It should be noted that uncleared grades of "X" may have significant ramifications regarding continuation in the university. An excused "X" not cleared by the end of the fifth week of the following semester is converted to an F. Once recorded, a notation of the "X" will remain permanently on the student's record, even after the final grade is assigned for the course. A student not enrolled in the university or studying away during that following semester has until the end of the fifth week of the next semester of enrollment to clear the "X" unless an earlier deadline has been established by the instructor and/or the academic dean.

A student not enrolled in the university or studying away during the semester following receipt of an "I" or "X" will have until the end of the fifth week of classes of the next semester (fall or spring) of matriculation to clear the "I" or "X" unless an earlier due date is established by the instructor and/or the academic dean. Students may not complete work in a course after graduation. (For this reason, students in their final term at Duke are not eligible for incomplete grades.) Once recorded, a notation of the "I" or "X" will remain permanently on the student's record, even after the final grade is assigned for the course. In addition, an "I" or "X" cancels eligibility for Dean's List and Dean's List with Distinction. Finally, students who receive an "I" or "X" during a semester in which they experience a voluntary or involuntary separation from Duke may, at the discretion of their academic dean, be required to complete the outstanding work prior to returning to school.

For purposes of determining satisfactory progress each term and toward graduation, incomplete work in a course indicated by a grade of I or X is not presumed to be satisfactory performance in that course. Furthermore, an incomplete (I grade) or X grade during the academic year cancels eligibility for semester honors in the term the I or X grade was issued; i.e., Dean's List and Dean's List with Distinction.

C.4. Credit for Courses Taken Elsewhere (Entrance & Transfer Credit)

In this section:

- [C.4.a. Entrance Credit](#)
- [C.4.b. Transfer Credit for College Students Transferring to Duke](#)
- [C.4.c. Transfer Credit for Courses Taken After Matriculation at Duke](#)

C.4. Credit for Courses Taken Elsewhere (Entrance & Transfer Credit)

C.4.a. Entrance Credit

Types of Credits and Limits

A limited amount of course credit may be awarded in Trinity College of Arts & Sciences on the basis of precollege examination and/or credits earned of the following three types: Advanced Placement (AP), international placement credit (IPC), and prematriculation college credit (PMC). Trinity College will record on students' permanent Duke records courses of these three types completed prior to their matriculation at Duke. The three types of precollege work are regarded as equivalent and may be used for placement into higher-level coursework and to satisfy departmental major and minor requirements in Trinity to the extent allowed by the individual departments. It should be noted that Trinity College students may be granted a maximum of two credits toward the degree requirement of 34.0 course credits for any combination of AP, IPC, or PMC credits.

Pratt students may count multiple Entrance credits to satisfy departmental major and minor requirements in Pratt and Trinity to the extent allowed by the individual department. Pratt students may be granted a maximum of four PMC credits to count towards their 34.0 course credit requirements.

Acceleration Credits for Trinity Students

Up to six additional Entrance credits may be awarded for acceleration toward the Trinity degree. These are called Acceleration credits. Acceleration is defined as completing the requirements for the bachelor's degree one or two semesters earlier than the original expected graduation date. Specifically, the two allowed Entrance credits, as well as up to two Acceleration credits, may be included in the graduation total for students graduating in seven consecutive semesters. The two allowed Entrance credits, as well as up to six Acceleration credits, may be included in the graduation total for students graduating in six consecutive semesters. Students may not use Acceleration credits in order to compensate for time taken away from their studies due to a leave of absence, voluntary or involuntary withdrawal from the university, or a period of practice-oriented education that does not include credit-bearing coursework taken to satisfy graduation requirements.

Application to General Education Requirements

Entrance credits (AP, IPC, and PMC credits) may not be used to satisfy Arts & Science Curriculum General Education requirements.

Entrance credits (AP, IPC, and PMC credits) may not be used to satisfy the Engineering Design & Communication, Digital Computation, Writing, or Liberal Arts requirements of the Pratt BSE degree.

Forfeiture of Entrance Credit Awarded

Students who successfully complete a course at Duke for which they received entrance credit may not use that or any higher entrance credit in that subject to satisfy degree requirements. The entrance credit work will remain on the Duke transcript. A Trinity College student who enrolls in a course for which entrance credit was awarded and who subsequently fails or withdraws from the course after the Drop/Add deadline will be allowed to apply the entrance credit toward graduation requirements according to the policy governing use of such credits (see above). A Pratt School of Engineering student enrolled in a course for which entrance credit was awarded and who subsequently fails or withdraws from the course after the Drop/Add period will not be allowed to use the entrance credit nor any higher credit in that subject to satisfying degree requirements.

Prematriculation credit (PMC)

College-level courses taken elsewhere before matriculation at Duke may be considered for prematriculation credit (PMC) provided they meet each of the following criteria:

- was taken after the commencement of the junior year of high school
- yielded a grade of B- or better
- was not used to meet high school diploma requirements
- was taken on the college campus in competition with degree candidates of the college
- was taught by a regular member of the college faculty and part of the regular curriculum of the college
- was not taken on a study abroad program completed before matriculation at Duke
- was not a precalculus or English composition course

A formal review of courses meeting these criteria will proceed after an official transcript of all college courses taken and documentation pertaining to these criteria are received by the University Registrar. (See also the section on entrance credit on this page for a discussion of the number of prematriculation credits that can transfer and how they may be used at Duke.)

Test-Based Credit (AP/IB/IPC)

College Board Advanced Placement Program (AP) Examinations

A score of four or five on College Board Advanced Placement Program Examinations, taken prior to matriculation in college, is the basis for consideration of placement in advanced courses in some departments. Departmental policies regarding Advanced Placement may vary. Approval of the director of undergraduate studies or supervisor of first-year instruction in the appropriate department is required before final placement is made. Scores must be submitted directly from the appropriate testing service to the Office of the University Registrar.

Advanced Placement courses completed with a score of four or five will be recorded on a student's permanent Duke record. Students may use all of these courses for placement into higher-level courses and to satisfy departmental major and minor requirements at Duke to the extent allowed by individual departments.

International Placement Credit (IPC)

Duke University recognizes the International Baccalaureate Program; the French Baccalaureate; the British, Hong Kong, or Singapore A-Level Examinations; the Cambridge pre-U; the Caribbean Advance Proficiency Examination; the German Abitur; the Swiss Federal Maturity Certificate; the All India Senior School Certificate Examination; the Indian School Certificate examination; and the Israeli Matriculation Certificate. Scores acceptable for consideration are determined by the faculty and evaluated by the university registrar. Course equivalents for these programs may be recorded on a student's permanent Duke record for placement and credit according to the same policy governing the use of AP and prematriculation credits (see above).

C.4. Credit for Courses Taken Elsewhere (Entrance & Transfer Credit)

C.4.b. Transfer Credit for College Students Transferring to Duke

College students transferring from a degree program in another accredited institution may be granted credit for up to 17.0 course credits, towards the 34 credits required to graduate. The transfer credits awarded for these courses are displayed on the transcript with "TR" as the grade. They do not factor into a student's Duke GPA.

Courses accepted for transfer credit in this circumstance may be counted toward a major, minor, or certificate program if approved by the relevant academic unit. A minimum of half of any major, minor, or certificate must be completed at Duke.

Advising, curricular expectations, and the credit evaluation process for transfer students is college/school specific. For questions about the transfer credit evaluation process (for transfer students that have been offered admission to Duke), the student should contact the appropriate Dean in each college.

Arts and Science Curriculum Expectations for Transfer Students

All transfer students entering Trinity College for the Academic Year 2025-2026 will adhere to the Arts & Science Curriculum launched in summer 2025 and documented in this 2025-2026 Undergraduate Bulletin. Below are the specific curricular expectations for transfer students. These expectations are designed to:

- provide transfer students with the opportunity to fully engage in the Duke educational experience and cultivate the values of community, curiosity, and humility.
- honor the fact that transfer students have already begun their college journeys and enter Duke at various stages of their undergraduate careers.
- capitalize on the diverse and valuable experiences transfer students bring to Duke.
- account for the fact that transfer students have a shorter time at Duke than someone starting in their first year.

All transfer students will complete coursework across the Liberal Arts Categories, in Language, and in Writing during their time at Duke. Transfer students will not participate in the First-Year Experience (Focus or Constellations). Instead, there are specialized opportunities for transfer students to build community and jump start their academic engagement with faculty across campus and within the majors. All transfer students must complete at least half of any major, minor, or certificate at Duke. Only one major is required for graduation.

Transfer Students entering Duke with at least two years of full-time college enrollment (entering nominally as juniors) are required to complete the following coursework during their time at Duke:

- At least 1.0 credit in each of the SIX Liberal Arts Categories
 - One Century Course may be used to complete at most 2 Liberal Arts credits (not offered until Fall 2026).
- At least 1.0 credit of Language at any level
- At least 1.0 credit of Writing (Writing 120 requirement is waived)

Transfer Students entering Duke after one year of full-time college enrollment (entering nominally as sophomores) are required to complete the following coursework during their time at Duke:

- At least 1.0 credit in each of the SIX Liberal Arts Categories AND 3.0 additional credits across the Liberal Arts Categories
 - Two Century Courses may be used to complete at most 4 Liberal Arts credits.
- Complete a language pathway
 - One approved transfer course may be applied to the chosen pathway
- 1.0 credit of Writing 120 AND at least 2.0 additional Writing credits
 - Prior coursework will be evaluated to determine if Writing 120 can be waived. If Writing 120 is required, the transfer student will enroll in the course during their assigned semester.
 - At most one approved transfer course may be applied to the Writing requirement; at least 2.0 Writing credits must be taken at Duke.

C.4. Credit for Courses Taken Elsewhere (Entrance & Transfer Credit)

C.4.c. Transfer Credit for Courses Taken After Matriculation at Duke

There are two ways that a Duke student may apply courses taken elsewhere to their Duke degree by way of transfer after they have begun their full-time studies at Duke. These post-matriculation transfer credits differ in how they are arranged, approved, and limited for their application to the Duke degree. For information about how post-matriculation transfer credit applies to degree requirements, see [Trinity College Degree Requirements](#) and [Pratt School Degree Requirements](#).

Individually Arranged Courses

After matriculation as a full-time degree-seeking student at Duke, a student in Trinity College may receive transfer credit for no more than two courses taken at another accredited four-year institution, whether in the summer, while withdrawn from Trinity, or while on leave of absence for personal, medical, or financial reasons. A student in the Pratt School of Engineering is limited to four of these types of transfer courses. Students who are withdrawn involuntarily from Duke due to an academic dismissal, may request credit transfer for up to two course credits. This maximum for the period of time during an academic dismissal is included in the ultimate total allowed by each school (2 total for Trinity; 4 total for Pratt).

Students must have these courses preapproved by the relevant DUS to the course subject and the appropriate college specific Dean. These courses will only be added to the student's Duke record and applied to the student's Duke degree after the course is complete, all requirements are met, and a final official transcript is reviewed. These courses are not covered by Duke financial aid.

Courses Taken Through a Study Abroad/Study Away Term Facilitated by the Global Education Office (GEO)

In cases that involve transferring study abroad credits, a student in Trinity or Pratt may transfer up to four credits for one semester or eight credits for a full academic year of study. Two more credits may be possible for summer study abroad experiences. For Pratt students, the transferred credits may include a maximum of 2 engineering courses. In no instance, however, may a student transfer more than ten courses when combining study abroad and the allowable number of individually arranged transfer courses.

Students work with the Global Education Office to plan their term(s) abroad and sign a study away agreement for fall and spring terms. This collaborative, multistep process involves having courses preapproved by the relevant DUS to the subject; specialized advising that is specific to the student and the location by the GEO staff; and consultations with the student's advisor, dean, and financial aid counselor as needed. Placeholders will be added to the student's record while they are participating under a study away agreement. To be eligible for credit, non-Duke summer study abroad programs must be on GEO's approved list or approved through GEO's petition process. The specific transfer courses will only be added to the student's Duke record and applied to the student's Duke degree after the course is complete, all requirements are met, and a final official transcript is reviewed.

General Policies for All Post-Matriculation Transfer Credits

Only those courses taken in which grades of C- or better have been earned are acceptable for transfer credit; courses taken at other institutions with P/F grading or the equivalent are not accepted for transfer credit.

No credit is given for work completed by correspondence, and courses taken online are not eligible for transfer credit. Credit for no more than 2.0 course credits is allowed for extension courses.

The course credit unit of credit awarded at Duke for satisfactorily completed courses cannot be directly equated with semester-hour or quarter-hour credits. Credit equivalency is determined by the University Registrar.

Courses for which there is no equivalent at Duke may be given a 100 or a 300 number, lower to upper level.

All courses approved for transfer are listed on the student's permanent record at Duke, but grades earned are not recorded. Once the limit of transferred credit has been reached, no additional transferred work will be displayed on the record or used as a substitute for a previously transferred course. Further information is available from the Office of the University Registrar.

Approval forms for Duke students taking courses at institutions other than Duke may be obtained online or from the offices of the academic deans for each school/college. Students wishing to transfer credit for study at another accredited college while on leave or during the summer must obtain approval *prior* to taking the courses. Trinity students wishing to receive the Language (LG code) credit for transfer coursework taken while studying abroad must seek approval from the appropriate DUS or language program coordinator *prior* to their travel, however approval may require evaluation of course materials submitted by the student after the course is taken abroad.

C.5. Tuition & Financial Information

In this section:

- C.5.a. Tuition & Fees
 - Estimated Expenses
 - Fees for Courses
 - Fees for Study Abroad
 - Part-Time & Auditing Students
 - Summer Estimated Expenses
- C.5.b. Financial Policies

 - Employment
 - Loans
 - Scholarships

C.5. Tuition & Financial Information

C.5.a. Tuition & Fees

The average first-year undergraduate student can plan on a budget of approximately \$97,967 plus transportation costs. Information describing in detail the various forms of financial aid available at Duke may be obtained from the Karsh Office of Undergraduate Financial Support website at financialaid.duke.edu. The figures in this section are projections and are subject to change. Additional charges may apply.

Estimated Expenses, 2025-2026

EXPENSE	ESTIMATED COST (TWO SEMESTERS, FALL & SPRING)
Tuition & Required Fees	
Tuition (Trinity and Pratt)	\$70,625
First Time Registration (one-time fee)	\$180
Student Activity Fee	\$321
Student Services Fee	\$813
Recreation Fee	\$389
Health Fee	\$1,007
Insurance (fall term only)	TBD
Post Office Box Rental	\$82
Engineering Government Dues	\$60
Housing	
Single - A/C	\$14,412
Double - A/C	\$10,910
Triple - A/C	\$9,730
Edens Private Bedrooms	\$17,916
Residential Programming Fee	\$115
Food*	
Plan A	\$5,714
Plan B	\$6,848
Plan C	\$7,582
Plan D	\$8,136
Plan E	\$8,876
Plan F (non-residential)	\$1,872
Plan I (first-year students)	\$9,186
Plan J (Swift Apartments)	\$4,042
Food Fee	\$200
Estimate of Other Expenses**	
Books, Course Materials, Supplies, & Equipment	\$536
Miscellaneous Personal Expenses***	\$3,274
Transportation (domestic)	\$582-\$1,318, depending on home address

***Food.** Dining plans will be taxed at the combined state and Durham county rate of 7.5% (6.75% for students at the Duke Marine Lab in Beaufort). All undergraduate students residing on campus must participate in a dining plan. First-year undergraduate students residing on East Campus must participate in the First-Year Dining Plan (Plan I). Nonresident students are not required to enroll in a dining plan but may choose to participate. Find additional dining plan information at students.duke.edu/living/dining/plans-points.

****Estimate of Other Expenses.** These expenses are not billed, and actual costs will vary by student.

*****Miscellaneous Personal Expenses** include items like laundry, clothing, snacks, personal care items, etc.

Fees for Courses

Additional fees are charged for certain physical education activities, field trips, and applied music courses. Applied music fees are:

half-hour lessons	\$411
one-hour lessons	\$822
group instruction classes	\$205

For other specific charges, consult the Bursar's Office. For students receiving need-based financial aid, all fees are paid in full.

Fees for Study Abroad

Students who register to study abroad in programs administered by institutions other than Duke University will pay the tuition and fees of the administering institution. There will be a fee of \$4,580 per semester, payable to Duke University, to maintain a student’s enrollment at Duke. Students receiving financial aid will receive aid based on revised costs from the administering institution.

Part-Time & Auditing Students

In the regular academic year, students who, with permission, register for no more than 2.5 courses in a semester will be classified as part-time students. Part-time students will be charged tuition at the rate of:

full course	\$8,784
half course	\$4,392
quarter course	\$2,197
audit full course	\$535

Registration for more than 2.5 courses requires payment of full tuition. Students in nondegree programs who are being considered for admission to degree programs, as designated by the Office of Continuing Studies, pay fees by the course whether the course load is one, two, or three courses.

With the consent of the appropriate instructor and the director of continuing studies, graduates of Duke, Duke employees, members of the Osher Lifelong Learning Institute (OLLI), and qualified members of the local community may audit undergraduate courses for the above payment per course.

Summer Estimated Expenses, 2025

EXPENSE	SUMMER 2025 (PER TERM)
Tuition & Required Fees	
regular or non-science lab course	\$2,970
science course with a lab	\$3,800
each half-course	\$1,485
each quarter-course	\$745
Transcript Fee (one-time fee)	\$120
Student Services Fee	\$146.50
Health Fee*	\$175
Housing	
Single	\$2,541
Double	\$1,922
Food**	
Small	\$804
Medium	\$1,138
Large	\$1,511

***Health Fee.** Online only students may email waiver-request@dm.duke.edu to request to waiver of the student health fee.

****Food.** All students living on campus must have a meal plan. Summer Contract Fee (\$25) and tax not included in rates above.

C.5. Tuition & Financial Information

C.5.b. Financial Policies

Fall & Spring Student Bills

The Bursar’s Office prepares students’ bills for [tuition and fees](#). Tuition and fees are due before the start of each term. Please consult the Bursar’s Office website for a complete billing schedule (finance.duke.edu/bursar). Students applying for financial aid should complete that process by the assigned due date.

Bills are available electronically on DukeHub, and students will receive a bill via email. Students may view bills and up-to-date student account history on DukeHub. Email bills will also be sent to anyone the student has designated as a guest with access to view online bills.

Payment

Students are encouraged to pay by e-check, a fast and convenient method for paying their bills. To pay by e-check, visit DukeHub or finance.duke.edu/bursar and click the DukePay icon. Payment also may be mailed to the address listed on the bill.

Payment Plan

Duke partners with Nelnet to provide a payment plan for current term charges. For additional information please visit mycollegepaymentplan.com/duke or finance.duke.edu/bursar.

Additional reference information regarding student accounts is available at finance.duke.edu/bursar. Students may also contact the Bursar's Office for questions regarding their student account. Email bursar@duke.edu, call (919) 684-3531, or fax (919) 684-3091.

Restrictions on Past Due Accounts

As noted above, tuition and fees are due before the start of each term. If a student's account becomes past due, a late payment penalty charge (not to exceed 1.25 percent of the past due balance from the prior bill) will be assessed on subsequent bills. If the account remains unpaid, a student will not be allowed to register for future semesters and may be administratively withdrawn from Duke. As long as the account is past due, a student will not have academic credits certified or receive a diploma at graduation. If the account remains outstanding after a student departs from Duke, it may be referred to a collection agency and reported to a credit bureau.

Summer Student Bills

The Bursar's Office will prepare bills in April, May, and June for current Duke students enrolled for Summer Session. April and May bills are due on the twelfth of the following month. June bills are due on the first business day of August. Please consult the Bursar's Office website for a complete billing schedule (finance.duke.edu/bursar). Students will receive bill notifications via their Duke email account and also may view their bills on DukeHub. Email bills will also be sent to anyone the student has designated as a guest with access to view online bills.

Problems meeting these deadlines should be discussed with the Bursar's Office prior to the start of the term. Failure to meet deadlines may have implications for fall enrollment.

The Summer Session Office will enclose a statement of charges with the confirmation of registration letter sent to all visiting students and Duke graduates. Payment for term charges will be due on the designated due dates.

The Summer Session Office will enclose a statement of charges with the confirmation of registration letter sent to all visiting students and Duke graduates. Payment for term charges will be due on the designated due dates. Summer Session retains the right to withdraw students from classes if they never attend, have not paid tuition and fees, or if they have failed to clear with the Bursar's Office, by the end of the Drop/Add period. Attendance in classes after the first three days of the term obligates the student to the full tuition and fees for the course.

Students who, subsequent to withdrawal, clear with the Bursar's Office prior to the midpoint of the particular term may, with written permission of their academic dean, be reinstated in their classes as originally registered and receive regular grades. The administrative withdrawal fee will stand and the student will be liable for full tuition and fees.

Refund Policy

Tuition and mandatory fees are required to be paid in full, regardless of:

- The method of instruction and/or mode of academic delivery;
- Any changes to instructional content, schedule, or duration of the semester;
- Any inability to access Duke University-maintained facilities; and
- Any disruption to or cancellation of activities, events, services, or programs during the academic year.

For the avoidance of doubt, and as has been the Policy of Duke University in the past, tuition and mandatory fees will not be refunded in whole or in part for any reason, except as provided for under the Refund Policy. By paying the tuition and mandatory fees, the student and anyone paying tuition on their behalf acknowledges and accepts these terms.

Fall and Spring Refunds

In the case of withdrawal from the university, tuition will be reduced according to the following schedule:

TIME OF WITHDRAWAL	AMOUNT REFUNDED
Before classes begin	Full amount
During first or second week	80%
During third, fourth, or fifth week	60%
During sixth week	20%
After sixth week	None

Grants or loans will be restored to those funds on the same pro rata basis and will not be refunded or carried forward. In the event of death, a full tuition, fees, and residence hall refund will be granted. In case of a call to military service, a full semester's tuition, the full purchase price of textbooks from the university's bookstore, and the pro rata amount of the room charge will be refunded. The outstanding balance of the food service plan will be refunded in case of military service or death.

In the case of dropping special fee courses (e.g., music, art, golf), or of part-time students dropping audit courses, a full refund will be granted to students during the Drop/Add period. Students changing status to part-time are required to request permission at the time of preregistration; therefore, no refunds are granted during the Drop/Add period or subsequently for changes that involve carrying less than a full-time load.

Because Duke University participates in the Title IV federal aid programs, it follows federal guidelines with respect to the refund and repayment of these funds. All first-time students who withdraw within 60 percent of the enrollment period will have their charges and financial aid adjusted according to the federal regulations. Additional information regarding this procedure may be obtained from the Office of Financial Aid.

Summer Administrative Withdrawal Charges and Refunds

Drop or Administrative Withdrawal Charges. Students who will not be attending a summer term or course for which they have registered must officially drop the course(s) prior to the beginning of the term whether or not they have paid tuition and fees. (See *Course Changes after Class Begin* in Registration.) Students who fail to drop the course(s) prior to the beginning of the term will be charged \$150 per course.

Refunds (Except Study Abroad Programs). Students who will not be attending a summer term or course for which tuition and fees have been paid are eligible for refunds according to the following policy: There is a financial obligation of full tuition and fees if the student withdraws from a course(s) or withdraws from the term after the third day. Full tuition and fees are refunded if the student officially drops a course(s) or withdraws from the term before the first day.

C.5. Tuition & Financial Information

C.5.c. Financial Support

Duke University is strongly committed to its program of financial support and, for the four years of undergraduate enrollment, will meet 100 percent of the demonstrated need of each eligible admitted US citizen or eligible noncitizen. The university's financial support program includes both merit and need-based scholarships, work-study, and all federal grant and loan programs.

Students needing assistance are strongly encouraged to apply for funding at the same time as for admission. Students awarded support funding will be notified at the same time they are offered admission, assuming all required documentation has been received.

It is the intention of the Karsh Office of Undergraduate Financial Support to set each award at a level consistent with a family's ability to meet the costs of attending Duke University. This will be done by taking into consideration the contribution that can reasonably be expected from the student and the family.

Financial Support for Entering First-Year Students

Candidates should initiate their application for financial support concurrently with their application for admission. Instructions outlining the specific requirements and deadline dates will accompany application materials. To receive institutional funds, two forms must be submitted, the Free Application for Federal Student Aid (FAFSA) to the federal processor and the PROFILE application to the College Board's Scholarship Service (CSS). Students applying for federal loans and grants, not Duke University aid, must complete only the FAFSA. If a student's parents are divorced or separated, both parents must submit the PROFILE and one parent must submit the FAFSA. Students may be asked to submit copies of their and their parents' federal income tax returns (all forms, schedules, statements, and W2s must be included).

International students interested in obtaining need-based financial aid must apply for financial support at the time of admission to be eligible to receive need-based aid in any year of undergraduate study. To apply, students will be asked to complete either an institutional aid application or the International CSS Profile online. A Statement of Foreign Earnings for both parents or a copy of the most recently completed tax return for both parents must be submitted with the application. For further information about financial assistance for international students, visit their website at financialaid.duke.edu/apply-aid.

Renewal of Financial Support after the First Year

Each year, domestic students must file an application for renewal of need-based financial aid. All students must complete a new Free Application for Federal Student Aid (FAFSA), and students may also be asked to complete a new PROFILE form and submit a copy of all pages, including schedules and attachments, of the parents' and student's federal income tax return. Students will be notified electronically of the documents necessary to receive their financial aid renewal. The deadline for the receipt of all application materials by the Karsh Office of Undergraduate Financial Support is January 2. All qualified students may receive need-based aid for up to nine semesters (eight semesters of fall and spring plus two summer terms).

To have financial aid renewed, a student must meet the requirements outlined in Duke's policy for Satisfactory Academic Progress for Financial Aid. Students not qualifying for financial aid due to their inability to meet these requirements may appeal directly to the Karsh Office of Undergraduate Financial Support. Students holding merit scholarships are required to maintain an average considerably higher than the minimum required for need-based financial aid recipients. Specific details regarding retention standards will be provided to scholarship winners.

Summer School Financial Support

Financial support is available for a total of two summer sessions but only for Duke programs. No financial support is available for non-Duke summer programs. Students may choose to attend two summer sessions as part of a ninth semester of aid eligibility. Interested students can obtain more information about summer financial support, budgets, and eligibility at financialaid.duke.edu/making-most-your-aid/summer-study.

Tuition Plans

Many families finance a college education with the assistance of an insured tuition payment plan regardless of whether they receive financial assistance from Duke. The university is pleased to offer a five-month interest-free payment plan each semester through Nelnet. An application fee will apply. More information can be obtained from the Bursar's Office or by visiting duke.afford.com.

Types of Financial Support

Gift scholarships or grants, long-term loans, and employment are integral parts of the financial support program, and some portion of the financial support offered an undergraduate is normally in each of these forms.

The work-study opportunity and loan(s) offered as financial aid are considered to be the self-help portion of the award. The majority of aid offers at Duke include both loans and work study in addition to grant funds. This combination of university grant funds and opportunities for work and loan financing enables Duke to extend its resources to a larger number of deserving students.

Employment

Most financial aid recipients are offered work study as part of their aid package. All students interested in working during the school year should review the jobs posted at duke.studentemployment.ngwebsolutions.com. All earnings are paid directly to the student for hours worked.

Additional information about how work study works, types of work study, and how to apply can be found at financialaid.duke.edu/work-study.

Loans

The loan programs that are available to students through Duke University are listed below.

The Federal Direct Loan is available to students who may borrow up to \$5,500 as first-year students, \$6,500 as sophomores, and \$7,500 as juniors and seniors. Interest rates are set annually by the Department of Education and published on its website. Students who demonstrate need by filing the Free Application for Federal Student Aid (FAFSA) may qualify for a Direct Subsidized Loan, and interest does not accrue while the student is enrolled at least half-time in an accredited degree program for Direct Subsidized Loans. Students not demonstrating need, according to the FAFSA, or those having borrowed the full subsidized amount already, may borrow through the Unsubsidized Loan program. Interest on unsubsidized loans accrues while the student is in school, and the student may choose to capitalize on the interest or pay it as it accrues. Repayment for both loans begins six months after the student is no longer enrolled at least half-time as a degree candidate at an accredited institution.

The Federal Direct Parent Loan for Undergraduate Students (PLUS) allows qualified parents to borrow up to the cost of education minus other financial aid. The proceeds from this loan may only be used to pay the current year's costs of attendance. The interest rate is fixed and published annually by the Department of Education, and repayment of this loan begins within sixty days after the first disbursement for the academic year. Borrowers who have a student enrolled at least half-time may be eligible for deferment of payment. Federally mandated credit checks are required for all PLUS applicants.

Scholarships

Duke has a number of scholarships based on merit that are available from personal endowments and corporations. Most are intended for entering first-year students and require no separate application. These scholarships may be based on achievement in a particular field or on an outstanding overall record.

The Office of University Scholars and Fellows is the home for Duke's merit scholarship programs. Scholarship holders may apply for need-based aid for any need not met by their scholarship. The scholars are chosen by faculty-driven committees on the basis of the Duke application. All the scholarships in these programs are renewable for eight semesters of undergraduate study for those students meeting the following academic standards: renewable merit scholarships will be continued for first-year students who complete the first year of studies with a 3.0 average or higher. Scholars are allowed one underload and must be enrolled in four full academic credits every other semester. Upper-class students must complete each academic year with a 3.2 average or higher. Students failing to meet the required average will be put "on review." Thereafter, students on review must receive a 3.2 average each year to keep the scholarship or fellowship. If a scholar is ineligible to return to Duke for academic reasons, or is suspended or dismissed for disciplinary reasons, they will lose the scholarship. Visit ousf.duke.edu for more information.

C.6. Admissions

Principles of Selection

James B. Duke, in his Indenture of Trust, requested that "great care and discrimination be exercised in admitting as students only those whose previous record shows a character, determination, and application evincing a wholesome and real ambition for life." Therefore, in considering prospective students, Duke University looks beyond the basic characteristics of academic competence possessed by the majority of applicants. It seeks, regardless of race, color, religion, national and ethnic origin, gender, handicap, sexual orientation, or age, not only evidence of intellectual promise and maturity of judgment, but also a sense of life beyond the classroom. Often, this is expressed in the form of special talents and accomplishments; it is seen consistently in a student's determination to make creative use of the opportunities and challenges posed by Duke University.

Requirements for Application

As there are occasional changes in admission policies or procedures after the printing deadline for the Bulletin of Undergraduate Instruction, candidates are urged to consult the Duke Admissions website at admissions.duke.edu for specific admissions information, dates, and policies.

Degree Status

Although there are no inflexible requirements as to subject matter, students are urged to choose a broad and challenging high school program. Candidates for admission should present a minimum of four years of English and at least three of mathematics, natural sciences, a foreign language, and social studies. Applicants to Pratt School of Engineering are strongly advised to take four years of mathematics and four years of science, including physics. Calculus is a prerequisite for admission to Pratt School of Engineering.

Duke University has a test-optional policy for students applying for first-year or transfer admission. Applications will be equally considered regardless of whether or not students submit SAT or ACT scores. Duke University will continue to consider self-reported and/or official scores from the SAT and ACT, English proficiency tests, Advanced Placement tests, International Baccalaureate exams, and A-level and other similar national exams from students who choose to submit them. Duke will accept self-reported scores for purposes of assessing an application; scores sent from testing agencies will be required only from those students who enroll at Duke.

Nondegree Status

Summer Session. Persons who are or were at the time of leaving their home institutions in good standing in accredited colleges or universities may be admitted for summer study only by the director of the summer session. Duke students who are on leave or who have been involuntarily withdrawn from the university are not eligible to enroll in courses during the summer session or fall and spring terms.

Continuing Studies. Admission as a continuing studies student at Duke is limited to adults who live in the Triangle area; Duke graduates; persons who will be moving into the area and plan to reside here for a substantial period of time, for family and work reasons; and visiting college students desiring a course of study particular to Duke. These students are given academic counseling by the Office of Continuing Studies; they are subject to most of the regulations set forth for degree candidates. Duke students who are on leave or who have been involuntarily withdrawn from the university are not eligible to enroll as nondegree students through the Office of Continuing Studies. Because these students oftentimes are prohibited from being on the Duke campus, they should also understand that they may not enroll in any noncredit classes that meet on Duke's campus.

Application Procedures

Degree Status

Information regarding applying for admission may be obtained online at the Duke Admissions website at admissions.duke.edu. A nonrefundable processing fee that is determined annually must accompany the first part of the application. First-year students may apply using the Common Application. Transfer students may apply using the Coalition Application or the Duke Transfer Application. The Common Application (commonapp.org) and the Coalition Application (coalitionforcollegeaccess.org) are available online.

A personal interview is not required for admission, but it provides an opportunity to learn more about an applicant's strengths and goals. All interviews are conducted by alumni volunteers. Students who submit their Common Application by the Early Decision deadline (November 1) or the Regular Decision priority interview deadline (December 20) will be contacted by alumni on a first-come, first-served basis. While Duke makes every effort to interview all applicants who submit applications by these deadlines, interviews are not guaranteed.

Regular Decision. Candidates who wish to enter Duke as first-year students must submit a completed application no later than January 2 of the year in which they intend to enroll. Decisions are provided by the university in late March, and accepted candidates are expected to reserve a place in the class by May 1.

Early Decision. The Early Decision plan is designed to provide well-qualified students who know Duke is their first choice a means of indicating that commitment to the university and notification of a decision early enough to eliminate the necessity of applying to several colleges.

Candidates who apply for Early Decision are required to sign a statement confirming their commitment to enroll at Duke if they are admitted in the Early Decision process. Under this agreement, applicants are required to withdraw all applications to other colleges and universities once they learn of their admission to Duke. Students applying to Duke under Early Decision may not apply to any school whose conditions of application conflict with those outlined in Duke's Early Decision agreement. However, Early Decision applicants are still able to apply to other schools whose conditions of application do not conflict with Duke's, provided they enroll at Duke if admitted. Duke reserves the right to withdraw the applications of students accepted to other schools under binding Early Decision plans. Secondary school counselors and parents are also asked to sign the Early Decision agreement. Students who are denied admission under the Early Decision program may not reapply for admission under the Regular Decision program.

Students applying for Early Decision must submit a completed application by November 1. Applicants are notified of their status—admit, defer, or deny—by mid-December. Admitted students are expected to respond by January 6. The credentials of candidates who are deferred are considered along with candidates for Regular Decision. Deferred students are no longer bound by the Early Decision agreement and are free to accept offers of admission from other colleges and universities.

Midyear Admission. A midyear (January) admission program has not been offered to first-year students for a number of years and there are no current plans to reinstate one.

Transfer Admission. A limited number of transfer seats may be available, and the number will vary from year to year. Prospective transfer students should refer to the Duke Admissions website at admissions.duke.edu for the most up-to-date information on the transfer process. Duke considers transfer applicants intending to enter Duke as sophomores or juniors. All students entering the Trinity College of Arts & Sciences must meet the college's curriculum requirements in addition to the requirements of their selected major. For most transfer students, this will require up to six semesters at Duke to complete.

Candidates must submit completed application forms, official transcripts of all work completed at other accredited colleges, high school records, scores on the SAT or ACT, and employment records if there has been an extended period of employment since graduation from secondary school. See [Transfer Credit for College Students Transferring to Duke](#).

Transfer applicants submit a completed application by March 15, learn of their decisions in mid-May, and must respond to the university by June 1.

Nondegree Status

Summer Session. General information, registration forms, and schedules of courses may be obtained from the office's website (summersession.duke.edu) or by calling (919) 684-6259. An application fee is required.

Continuing Education. Applications may be obtained from the Office of Continuing Studies and must be returned to that office, accompanied by the application fee, by August 1 for the fall semester, by December 1 for the spring semester, by April 15 for Summer Session Term 1, and by June 1 for Summer Session Term 2.

A certain grade point average over four courses must be attained before a nondegree student may apply for degree candidacy. More detailed information on nondegree coursework through continuing education is available from the Office of Continuing Studies by calling (919) 684-5375.

Readmission of Former Students. All undergraduate students (including those of The Pratt School of Engineering) applying to return to Duke from a leave of absence, withdrawal, dismissal, or suspension must apply directly to the Office of Student Returns located in Trinity College Office of the Academic Deans. Students on leave of absence or who have been dismissed are not eligible to enroll in classes through the Office of Continuing Studies. For additional information, visit the [Time Away Office](#) website. Also, see [Changes in Status](#).

African & African American Studies (AB)

Program Code: U-AFRI-AB

Degree Designation: Bachelor of Arts

Department: African & African American Studies Program

Website: aaas.duke.edu/undergraduate/major-minor

Program Summary

The Department of African & African American Studies offers undergraduate degrees that equip students with bodies of knowledge that emerge from studying the histories, cultures, and social realities of African and African American peoples, and others of African descent across the diaspora. Mastering this knowledge will also produce a broad-based interdisciplinary learning experience that contributes to an intellectual, personal, and social maturation process. Students may choose to focus on Africa or the Americas.

The program offers work leading to Graduation with Distinction. See the section on honors in this bulletin and contact the director of undergraduate studies if you are interested in pursuing this.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Introductory Courses (2 units)**
 - AAAS 102
 - AAAS 103
- **Senior Seminar (1 unit)**
 - AAAS 499S
- **Area of Focus (3 units)**
 - Any 3 AAAS courses 200-level or above
 - Must select either Americas Focus or Africa Focus
 - Must satisfy the following Areas of Knowledge across the three-course selection
 - Arts, Literatures, and Performance (ALP)
 - Civilizations (CZ)
 - Social Sciences (SS)
- **Electives (4 units)**
 - Any AAAS courses 200-level and above

Ancient Religion and Society, Interdepartmental (AB)

Program Code: U-IRLSO-AB

Degree Designation: Bachelor of Arts

Department: Classical Studies Department, Religious Studies Department

Website: religiousstudies.duke.edu/undergraduate/interdepartmental-major

Program Summary

This interdepartmental major (IDM) between Religious Studies and Classical Studies is for anyone interested in the many ways that religion shaped history, society, and thought in the ancient Mediterranean, particularly within the Greek and Roman traditions. In this cultural context, a rich variety of Greco-Roman religious cults and ritual practices intersected with Judaism, Christianity, and (eventually) Islam, as well as with myth, magic, and other expressions of humanity's relationship to notions of the divine. Just as students in Religious Studies often look to Classical Studies for social and cultural background, so too Classicists attend to the fundamental role played by religion in their understanding of the Greco-Roman world.

In this IDM, both disciplines work together to provide essential content, context, methodologies, and skills, and to yield the kind of insight into religious experiences and traditions that is beyond the reach of either discipline alone. The IDM differs significantly from a Religious Studies major in its emphasis on the socio-cultural and political and intellectual histories of Greece and Rome, the optional focus on an ancient language as a fundamental for the major, and the focus on Greek and Roman literature and material culture. The IDM differs significantly from a Classical Studies major in its emphasis on religious traditions and the themes and methodologies that characterize the contemporary study of religion.

Core parts of the research and coursework in a Religious Studies Department involve texts, buildings, and artifacts, particularly those in the Jewish and Christian traditions, that reside in an ancient historical, social, intellectual, and literary culture that is usually considered the focus of a Classical Studies Department. Likewise, the classical era (especially the Hellenistic and Imperial periods) contains hugely important texts and archeological remains, again

mostly but not exclusively Jewish and Christian, that are downplayed or even ignored in preference to literary or non-religious narratives. In the 1st and 2nd centuries CE, for example, Classicists look to the likes of Tacitus, Pliny, Martial, Plutarch, Lucian, Galen, Dio, Aristides, Fronto, and the Greek novels, while scholars of religion focus on writings such as the Pauline letters, the gospels, Justin Martyr, Ignatius, Irenaeus, Clement, Philo, the novelistic Joseph and Aseneth and Acts, Apocalypses and other early Christian Apocrypha. Yet these all existed in the same time, and many in the same place! Recent developments in ancient Mediterranean studies are increasingly focusing on this problem, or rather opportunity, and this major is then a way for a student to travel down a leading-edge path through this interdisciplinary study of the ancient world.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Required Course (1 unit)**
 - RELIGION 101
- **Religious Studies Courses (6 units)**
 - Any 6 RELIGION courses
 - Must include at least 5 courses 200-level and above
 - Must include at least 1 course on a religious tradition outside the Mediterranean
 - A comprehensive list of courses is available on the [departmental website](#)
- **Classical Studies Courses (7 units)**
 - Any 7 Classical Studies courses
 - Must include at least 5 courses 200-level and above
 - Must include either CLST 284 and CLST 284, or 2 units of classical Greek or Latin 250-level and above
 - Must include at least 2 courses that focus on Classical Civilization as it relates to ethics, myth, religions, or socio-cultural components broadly foundational for the study of religion
 - A comprehensive list of courses is available on the [departmental website](#)

One course must be a small-group learning experience. This may be the CLST capstone course, or an independent study or honors project in either department.

Art History (AB)

Program Code: U-ART-AB

Degree Designation: Bachelor of Arts

Department: Art & Art History Department

Website: aahvs.duke.edu/undergraduate/majors/art-history

Program Summary

Art history is the study of works of art in the context of the broader social, political, and intellectual cultures of which they are a part. Studying art history develops your ability to evaluate and organize information, visual as well as verbal; it also enhances your creative imagination, precise observation, clear expression, and critical judgment. As a student of art history, you will acquire a sophisticated understanding of the theory and practice of artistic production and reception.

A major or second major in art history provides you with the training for teaching, museum and gallery work, art publishing and advertising; the major also provides an appropriate background for graduate training in architecture. An art historian's emphasis is on careful observation, the ordering of diverse sorts of information, expository writing, and scholarly research makes it a good general preparation for any profession.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

Three concentrations are available. Choose one.

Architecture Concentration

- **Required Course (1 unit)**
 - ARTSVIS 199
- **Upper-Level Art History Course (1 unit)**
 - ARTHIST 491
 - ARTHIST 493
 - Any ARTHIST course 500-level and above
- **Visual Arts Elective (1 unit)**
 - Any ARTSVIS course 100-level and above

- **Math, Physics, and Engineering Elective (3 units)**
 - Any 3 MATH, PHYSICS, or EGR courses 100-level and above
 - Recommended courses include MATH 111L, 112L, and 212; PHYSICS 141L or 142L; and CEE 311 or 411
- **Art History Electives (7 units)**
 - Must include coursework in at least 4 geographic areas: Africa/Middle East, Americas, Asia/Pacific, Europe/Mediterranean, transcultural
 - Must include coursework in at least 3 time periods: prehistoric-1200, 1200-1800, 1800-present, transtemporal
 - A comprehensive list of elective courses is available to students in the degree audit system.

Art History Concentration

- **Required Courses (4 units)**
 - Any 100-level ARTHIST foundations course
 - Any 100-level practice-based ARTSVIS course
 - Any 2 ARTHIST courses 400-level and above
- **Electives (7 units)**
 - Must include coursework in at least 4 geographic areas: Africa/Middle East, Americas, Asia/Pacific, Europe/Mediterranean, transcultural
 - Must include coursework in at least 3 time periods: prehistoric-1200, 1200-1800, 1800-present, transtemporal
 - A comprehensive list of elective courses is available to students in the degree audit system.

Museum Theory and Practice Concentration

- **Required Courses (3 units)**
 - ARTHIST 310
 - Any 100-level ARTHIST course
 - Any 100-level ARTSVIS course
- **Core Path Courses (3 units)**
 - At least 3 ARTHIST core path courses
 - Must include at least 1 of the following:
 - ARTHIST 220
 - ARTHIST 221S
 - Must include at least 1 of the following:
 - ARTHIST 222S
 - ARTHIST 311
 - ARTHIST 455S
- **Electives (7 units)**
 - Must include coursework in at least 4 geographic areas: Africa/Middle East, Americas, Asia/Pacific, Europe/Mediterranean, transcultural
 - Must include coursework in at least 3 time periods: prehistoric-1200, 1200-1800, 1800-present, transtemporal
 - A comprehensive list of elective courses is available to students in the degree audit system.

Art History and Visual Arts (AB)

Program Code: U-AHVA-AB

Degree Designation: Bachelor of Arts

Department: Art & Art History Department

Website: aahvs.duke.edu/undergraduate/majors/art-history-visual-arts

Program Summary

Art history is the study of works of art in the context of the broader social, political, and intellectual cultures of which they are a part. Studying art history develops the ability to evaluate and organize information, visual as well as verbal; it also enhances the faculties of creative imagination, precise observation, clear expression, and critical judgment. Students of art history acquire a sophisticated understanding of the theory and practice of artistic production and reception. A major or second major in art history provides basic training for those interested in teaching, museum and gallery work, art publishing, and advertising; the major also furnishes an appropriate background for graduate training in architecture. Art history's emphasis on careful observation, the ordering of diverse sorts of information, expository writing, and scholarly research makes it a good general preparation for any profession.

Studio art courses offer directed experiences in the practice of the visual arts, enhancing the understanding of art both within the history of culture and as an individual human achievement. Department offerings emphasize the analysis and articulation of visual concepts and processes as they relate to a broader education in the humanities and sciences.

In addition to offering students the opportunity to major in Art History or Visual Art, for those interested in studying both the history and practice of Art, a joint major is offered. This major, consisting of fourteen courses, condenses some of the course work needed in the individual majors, providing the student with a deeper understanding and a strong implementation of how practice and history can be joined together in unique interdisciplinary ways. Following the established course requirements in each major, students enroll in a broad range of Art History and studio courses culminating in advanced independent work and capstone experiences.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (3 units)**
 - ARTSVIS 199
 - Any 100-level ARTHIST course
 - ARTSVIS 496S or ARTHIST 495S
- **Art History Electives (6 units)**
 - Any 6 ARTHIST courses 200-level and above
 - Must represent at least 4 geographic areas: Africa/Middle East, Americas, Asia/Pacific, Europe/Mediterranean, transcultural
 - Must represent at least 3 time periods: prehistoric-1200, 1200-1800, 1800-present
 - Must include 1 ARTHIST seminar course 400-level and above
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Visual Arts Electives (5 units)**
 - Any 5 ARTSVIS courses 200-level and above
 - Must represent at least 3 media: computational media, cinematic arts (film/video), drawing, graphic design, painting, photography, printmaking, sculpture

Asian and Middle Eastern Studies (AB)

Program Code: U-AMES-AB

Degree Designation: Bachelor of Arts

Department: Asian & Middle Eastern Studies

Website: asianmideast.duke.edu/undergraduate/major-minors

Program Summary

The Department of Asian & Middle Eastern Studies explores the cultures of the cities, nations, and regions of East Asia, the Indian Subcontinent, and the Middle East within the framework of the humanities. It provides students with an understanding of the languages, histories, cultural practices, and perspectives of these regions to prepare them for professional work or advanced graduate studies in the international arenas. The curriculum is designed to develop reflective, critical thinking and conceptually grounded understanding of the contemporary cultures of Asia and the Middle East within a global, geopolitical context. The coursework for the major provides an intellectual training that includes the study of languages and of cultural practices as well as of critical frameworks for the analysis of cultural perspectives. The concentration of the major is determined by the language of study: Arabic, Chinese, Hebrew, Hindi, Japanese, Korean, or Turkish. Majors will be advised by AMES regular-ranked faculty.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Gateway Course (1 unit)**
 - AMES 195S
- **Regional and Thematic Pathways (3 units)**
 - Any AMES course 100-level and above in a chosen [pathway](#)
- **Language Concentration (1-2 units)**
 - Two 300-level courses or one 400-level course in a language concentration
 - Language concentrations: Arabic, Chinese, Hebrew, Hindi, Japanese, Korean, or Turkish
- **Senior Portfolio**
 - The portfolio includes research papers, papers in AMES languages, creative works, and publications when applicable.

Language Courses. Students may take up to six language classes altogether, not necessarily in one language. Students whose competence in a language exceeds the most advanced language course offered by the department may substitute language courses with literature/culture courses at the 100 level or above. 100-level language courses do not count toward the major.

Study Abroad. Study abroad should be an integral part of the student's experience will be study abroad; while not a requirement of the major, it is strongly encouraged. Students should discuss this option as early as possible with their major advisor. Students who study abroad may transfer up to five language credits and up to two literature and culture credits, but no more than five credits altogether, toward their major in Asian & Middle Eastern Studies.

Departmental Graduation with Distinction

Majors with grade point averages of 3.5 or higher in the major may apply in their junior year to the director of undergraduate studies for Graduation with Distinction (see the section on honors in this bulletin). Students working on their honors thesis will take AMES 493 Research Independent Study with their advisor in the fall semester and two departmental honors seminars, one in the fall semester (AMES 498S [0.5 credit]) and one in the spring semester (AMES 499S). Students will have an oral defense of their theses at the end of their final semester. In order to graduate with honors, the student must obtain at least an A in the honors seminars.

Biology (AB)

Program Code: U-BIO-AB

Degree Designation: Bachelor of Arts

Department: Biology Department

Website: biology.duke.edu/undergraduate/majors-minor/major-requirements

Program Summary

The biology major and minor and biology courses in a variety of areas are offered by the Department of Biology. Additional courses in the biological sciences are offered by the departments of evolutionary anthropology, chemistry, and psychology and neuroscience in Trinity College of Arts & Sciences; by the basic sciences departments in the School of Medicine; and by the Pratt School of Engineering and the Nicholas School of the Environment.

The bachelor of arts and the bachelor of science degrees are offered with a major in biology or in an individually designed interdepartmental concentration approved by the director of undergraduate studies in biology. Information may be obtained in the office of the director of undergraduate studies.

This degree program is a more flexible program than the B.S. and is useful for students with significant interests outside of the sciences.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Co-requisites (2-3 units)**
 - Chemistry: at least 1 of CHEM 101DL, CHEM 110DL, or CHEM 21
 - Math or Statistics: at least 1 of MATH 105L & 106L, MATH 111L, MATH 121, MATH 21, or any STA course 101 or above
- **Gateway (2 units)**
 - BIOLOGY 201L
 - BIOLOGY 202L
- **Electives (8 units)**
 - Must include at least 2 courses with a lab component; one independent study may count toward this requirement.
 - Must include at least 1 course in each area: Biological Structure and Function, Ecology, and Organismal Diversity.
 - Must include at least one capstone course at the 400-level or above.
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Concentrations**
 - Students may elect to complete requirements in specified areas of concentration. More information about concentrations is available at biology.duke.edu/undergraduate/major/concentrations.

Areas of Concentration

Students may elect to complete requirements in specified areas of concentration. Currently, available areas of concentration for the Biology bachelor of arts program are anatomy, physiology, and biomechanics; ecology; evolutionary biology; genomics; marine biology; and plant biology. For information on areas of concentration, see the area advisor in the relevant department.

Departmental Graduation with Distinction

Biology majors who achieve excellence in both their studies and a research-based thesis may apply for Graduation with Distinction in biology. Students may apply if they have a grade point average of 3.0 or above in biology courses, not including independent study, at the time of application. The award of distinction requires the maintenance of this grade point average and completion of an original research project, usually carried out as an independent study in biology or as an interdisciplinary study that focuses on biology. The application for distinction must be endorsed by the student's research supervisor. Distinction will be awarded by a three-member faculty committee based on an oral poster presentation and the written thesis. See the director of undergraduate studies for more details.

Biology (BS)

Program Code: U-BIO-BS

Degree Designation: Bachelor of Science

Department: Biology Department

Website: biology.duke.edu/undergraduate/majors-minor/major-requirements

Program Summary

The Department of Biology offers a major and minor and biology courses in a variety of areas. Additional courses in the biological sciences are offered by the departments of evolutionary anthropology, chemistry, and psychology and neuroscience in Trinity College of Arts & Sciences; by the basic sciences departments in the School of Medicine; and by the Pratt School of Engineering and the Nicholas School of the Environment.

The bachelor of arts and the bachelor of science degrees are offered with a major in biology or in an individually designed interdepartmental concentration approved by the director of undergraduate studies in biology. Information may be obtained in the office of the director of undergraduate studies.

This is typically the program in biology for students contemplating a career in biological or biomedical sciences and health professions.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Co-requisites (5-7 units)**
 - Chemistry: CHEM 201DL and at least 1 of CHEM 101DL, CHEM 110DL, or CHEM 21
 - Math I: at least 1 of MATH 105L & 106L, MATH 111L, MATH 121, MATH 21
 - Math II or Statistics: at least 1 of MATH 112L, MATH 122L, or MATH 22, or any STA course 101 or above, or PSY 204L & 205L
 - Physics: at least 1 of PHYSICS 107L, PHYSICS 108L, PHYSICS 121DL, PHYSICS 122DL, PHYSICS 141L, PHYSICS 142L, PHYSICS 151L, PHYSICS 161D, PHYSICS 25, or PHYSICS 26
- **Gateway (2 units)**
 - BIOLOGY 201L
 - BIOLOGY 202L
- **Area Courses (3 units)**
 - Must include at least 1 course in each area: Biological Structure and Function, Ecology, and Organismal Diversity.
 - A comprehensive list of courses is available to students in the degree audit system.
- **Electives (5 units)**
 - Must include at least 2 courses with an approved lab component; one independent study may count toward this requirement.
 - Must include at least one capstone course at the 400-level or above.
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Concentrations**
 - Students may elect to complete requirements in specified areas of concentration. More information about concentrations is available at biology.duke.edu/undergraduate/major/concentrations.

Areas of Concentration

Students may elect to complete requirements in specified areas of concentration. Currently, available areas of concentration in the biology major are anatomy, physiology, and biomechanics; animal behavior; biochemistry; cell and molecular biology; ecology; evolutionary biology; genetics; genomics; marine biology; neurobiology; pharmacology; and plant biology. For information on areas of concentration see the area advisor for the relevant concentration.

Departmental Graduation with Distinction

Biology majors who achieve excellence in both their studies and a research-based thesis may apply for Graduation with Distinction in biology. Students may apply if they have a grade point average of 3.0 or above in biology courses, not including independent study, at the time of application. The award of distinction requires the maintenance of this grade point average and completion of an original research project, usually carried out as an independent study in biology or as an interdisciplinary study that focuses on biology. The application for distinction must be endorsed by the student's research supervisor. Distinction will be awarded by a three-member faculty committee based on an oral poster presentation and the written thesis. See the director of undergraduate studies for more details.

Biomedical Engineering (BSE)

Program Code: U-BME-BSE

Degree Designation: Bachelor of Science in Engineering

Department: Pratt School of Engineering, Biomedical Engineering Department

Website: bme.duke.edu/undergrad

Program Summary

The biomedical engineering program is accredited by the Engineering Accreditation Commission of ABET. Our Program Educational Objectives are the following. We expect that after graduation, graduates of our program will be on track to become leaders in corporate, professional, and academic communities. In particular, they will:

- advance in their careers in biomedical engineering or related areas of industry, academia, and medicine;
- engage in lifelong learning, for example, by enrolling in graduate or professional degree programs or receiving advanced training for professional advancement;
- utilize their engineering experience in creating new knowledge or enabling technologies for improvement of human health and health care; and
- understand the social and ethical implications of their work.

Biomedical engineering is the discipline in which the physical, mathematical, and engineering sciences and associated technology are applied to biology and medicine. The program is flexible to match the student's interests; options exist for double majors. Each student selects one of four areas of interest in which to obtain depth in their education. The areas of interest are matched to the laboratories and expertise of the faculty in the department; these include, biomechanics and biomaterials, electrobiology, imaging and measurement systems; and molecular, cellular, and tissue engineering. Design experience is integrated throughout the curriculum and includes capstone design courses. Many students gain valuable design experience in the course of independent study projects within the research laboratories of the biomedical engineering department.

The biomechanics laboratories use advanced experimental test facilities, data acquisition technologies, computer simulations and theoretical modeling in the study of cells, tissues, and biological structures. The mechanisms of injury, aging, degeneration, and mechanical signal transduction are studied in a variety of biological systems, including biological fluids, the cervical and lumbar spines, diarthrodial joints, and the heart.

Electrobiology laboratories use large-scale computer modeling, scientific visualization, and experimental data acquisition and analysis to increase basic understanding of normal and abnormal electrical activity in the brain, peripheral nerves, and heart tissue. Other projects involve the study of the effects of externally applied electric fields and radio frequency energy on activity in excitable tissue.

The ultrasound imaging laboratories develop medical imaging methods that leverage the inherent acoustic and mechanical contrast of tissues to improve image quality and provide novel diagnostic information to clinicians. The laboratories are equipped with a variety of state-of-the-art clinical and research-dedicated ultrasound imaging systems, electronics, and acoustic output characterization tools, as well as acoustic and transducer modeling software.

The biophotonics group develops novel photonics technologies for biological and medical applications. Research areas include optical imaging techniques, advanced spectroscopy methods, plasmonics applications, and new microscopy modalities. Applications span from cell and developmental biology to clinical diagnostics and imaging methods.

Molecular, cellular and tissue engineering is concerned with the regulation of the external and internal environment of the cell for control of biosynthesis and degradation activities, as well as determination of the factors responsible for differentiation of cells into tissues with varying functional requirements. The groups in this program investigate biomaterials, material property characterizations, surface modifications, cell cultures, and the mechanics of biofluids, tissues, and cells. Applications include the development of novel biosensors and drug delivery systems, new techniques for enhanced biological transport, and improved techniques for stimulated repair or inhibited degradation of biological tissues.

Instruction in all these areas is offered at the undergraduate as well as graduate and postdoctoral levels, and opportunities for undergraduate student research are available in most of the biomedical engineering laboratories. The courses offered by the Department of Biomedical Engineering are listed below. Some biomedical engineering courses require students to have a suitable laptop computer with wireless capabilities.

Course Designators:

- (AC) Satisfies an Area Core Class
- (DR) Satisfies the Design requirement
- (GE) Satisfies a Biomedical Engineering General Elective
- (BB) Satisfies a Biomechanics and Biomaterials Advanced Elective
- (EL) Satisfies an Electrobiology Advanced Elective
- (IM) Satisfies an Imaging and Measurement Systems Advanced Elective
- (MC) Satisfies a Molecular, Cellular and Tissue Engineering Advanced Elective

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 34 units total to earn a BSE degree.

- **BME Core (8 units)**
 - BIOLOGY 201L
 - EGR 201L
 - ECE 110L
 - BME 244L
 - BME 260L

- BME 271D
- BME 354L
- BME 221L or ME 221L
- **Area Core Courses (2 units)**
 - BME 301L
 - BME 302L
 - BME 303L
 - BME 305L, BME 306L, or BME 307
 - BME 390L with the topic BME DATA SCIENCE
- **Advanced Electives (5 units)**
 - Must include at least 2 Advanced Elective courses from the same Area of Focus as one of the Area Core Courses taken
 - Must include 1 additional Advanced Elective course
 - Must include 1 Design Elective course
 - Must include 1 additional BME course 200-level and above
 - A comprehensive list of elective courses is available to students in the degree audit system.

The BME Undergraduate Program Handbook (available at bme.duke.edu/undergrad/curriculum) provides information about study abroad; premed planning; dual majors in electrical and computer engineering, civil engineering, and mechanical engineering; and course sequences that incorporate all general requirements and departmental requirements comprising the accredited biomedical engineering major.

Biophysics (AB)

Program Code: U-BPHY-AB

Degree Designation: Bachelor of Arts

Department: Physics Department

Website: physics.duke.edu/undergraduate/biophysics-major

Program Summary

Biophysics is the study of quantitative biological questions using insights, concepts, theory, and experimental techniques from physics, as well as knowledge from biology, chemistry, mathematics, and computer science. The major is a good choice for students who like biology and who enjoy thinking quantitatively. The major prepares students for graduate school in biophysics, diverse areas of biology like cell biology, neuroscience, physiology, and health professions like medicine, veterinary school, and dentistry. (But if a student anticipates applying to graduate school in physics, he or she should consider the Physics major as an alternative.) This major is administered in close cooperation with the departments of biology and chemistry.

A BS in biophysics is also available. Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (6 units)**
 - CHEM 101DL
 - MATH 122L
 - MATH 212
 - MATH 216
 - PHYSICS 161D
 - PHYSICS 162D
- **Required Courses (3 units)**
 - BIOLOGY 201L
 - PHYSICS 414
 - PHYSICS 415
- **Biology (1 unit)**
 - BIOLOGY 202L
 - BIOLOGY 220
- **Quantum and Thermal Physics (2-2.5 units)**
 - Option 1
 - PHYSICS 264L
 - PHYSICS 363
 - Option 2
 - CHEM 310
 - CHEM 311

- CHEM 310L or CHEM 311L
- **Physics (1 unit)**
 - PHYSICS 361
 - PHYSICS 362D
 - PHYSICS 464
 - PHYSICS 513
- **Elective (1 unit)**
 - A comprehensive list of elective courses is available to students in the degree audit system.

Biophysics (BS)

Program Code: U-BPHY-BS

Degree Designation: Bachelor of Science

Department: Physics Department

Website: physics.duke.edu/undergraduate/biophysics-major

Program Summary

Biophysics is the study of quantitative biological questions using insights, concepts, theory, and experimental techniques from physics, as well as knowledge from biology, chemistry, mathematics, and computer science. The major is a good choice for students who like biology and who enjoy thinking quantitatively. The major prepares students for graduate school in biophysics, diverse areas of biology like cell biology, neuroscience, physiology, and health professions like medicine, veterinary school, and dentistry. (But if a student anticipates applying to graduate school in physics, they should consider the Physics major as an alternative.) This major is administered in close cooperation with the departments of biology and chemistry.

An AB in biophysics is also available. Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 18 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (8 units)**
 - CHEM 101DL
 - MATH 122L
 - MATH 212
 - MATH 216
 - MATH 221
 - MATH 356
 - PHYSICS 161D
 - PHYSICS 162D
- **Required Courses (3 units)**
 - BIOLOGY 201L
 - PHYSICS 414
 - PHYSICS 415
- **Biology (1 unit)**

Brazilian and Global Portuguese Studies (AB)

Program Code: U-BPST-AB

Degree Designation: Bachelor of Arts

Department: Romance Studies Department

Website: romancestudies.duke.edu/brazilian-global-portuguese-major

Program Summary

Students majoring in Brazilian and Global Portuguese studies will acquire competency in spoken and written Portuguese, as well as familiarity with the literature and culture of Brazil and Portuguese-speaking regions.

A minor in this program is also available. Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Courses in Portuguese (6 units)**
 - Any 6 PORTUGUE courses at the 200-level and above with the (LG) Language attribute
- **Additional Courses (4 units)**
 - Any 4 PORTUGUE courses at the 200-level and above

At least 8 courses must be at the 300-level or above. Courses below the 300-level are restricted to PORTUGUE 203 or 203A, and 204. Duke-approved courses taught in Portuguese in study abroad programs may also count.

Study abroad information. Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Duke-Administered Summer Programs
 - Duke in Brazil: Two courses may be counted.
- Non-Duke-Administered Semester Programs: A maximum of two courses per semester may be counted toward the core-course requirement.
- Non-Duke-Administered Summer Programs: One course may be counted toward the core-course requirement.

Departmental Graduation with Distinction

Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further information may be obtained from the director of undergraduate studies or the assistant to the director.

Chemistry (AB)

Program Code: U-CHEM-AB

Degree Designation: Bachelor of Arts

Department: Chemistry Department

Website: chem.duke.edu/undergraduate/ab

Program Summary

The study of chemistry provides a fascinating and intellectually stimulating foray into the molecular underpinnings of the world around us, and through independent study, an opportunity to participate first hand in cutting edge research that spans a wide range of disciplines in the molecular sciences.

The Chemistry AB major allows greater flexibility than the BS in scheduling and course selection. Students with interests in a second major or in advanced work in a professional school (e.g. medical, dental, veterinary, business, or law) following graduation should consider this program. Students with an interest in employment in the chemical or a related industry, or in advanced study in chemistry or a related science (e.g. Biochemistry or Pharmacology) may also consider this program, although they are encouraged to augment their program with additional upper-level chemistry courses.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (4-5 units)**
 - Chemistry: CHEM 101DL, or CHEM 110DL, or CHEM 21
 - Math: MATH 111L & MATH 112L, or MATH 122L, or MATH 21 & 22
 - Physics: PHYSICS 121L & 122DL, or PHYSICS 151L & 152L, or PHYSICS 161D & 162D

- **Major Core (7 units)**
 - CHEM 201DL
 - CHEM 202D & 202L
 - CHEM 210D & 210L, or CHEM 20, or CHEM 21
 - CHEM 301 & 301L, or CHEM 310 & 310L & 311
 - CHEM 401 & 401L
- **Options, No Concentration (3 units; choose 1 option)**
 - Any 3 units from BIOCHEM 301, BIOCHEM 302, CHEM 302, CHEM 393, CHEM 394, CHEM 410, or CHEM 500-level and above
 - Physics Emphasis
 - CHEM 302, or CHEM 311
 - 2 of the following courses
 - PHYSICS 264L
 - PHYSICS 361
 - PHYSICS 362D
 - Mathematics Emphasis
 - CHEM 302, or CHEM 311
 - MATH 221 & 356, or MATH 216 & 353
 - Biology Emphasis
 - BIOCHEM 301
 - 2 of the following courses
 - BIOLOGY 201L, or BIOLOGY 203L
 - BIOLOGY 220
 - BIOLOGY 223
 - BIOLOGY 329L, or BIOLOGY 329D
 - BIOLOGY 515
 - BIOLOGY 520S

In certain cases, substitutions may be made for courses outside the chemistry department with consent of the director of undergraduate studies.

Concentrations

The chemistry department offers both an AB and a BS degree in chemistry with concentrations in the following four areas. Certification of these concentrations is designated on the official transcript.

- Biochemistry, in cooperation with the Department of Biochemistry in the School of Medicine
- Chemical biology
- Environmental chemistry, in conjunction with the Nicholas School of the Environment
- Pharmacology, in conjunction with the Department of Pharmacology in the School of Medicine

In addition to the Prerequisites and Major Core requirements above, students must complete the following concentration requirements:

- **Biochemistry Concentration (5 units)**
 - BIOLOGY 201L, or BIOLOGY 203L
 - BIOCHEM 301
 - BIOCHEM 302
 - CHEM 393 & 394, or BIOLOGY 293 & 294, or BIOCHEM 593 & 594
- **Chemical Biology Concentration (5 units)**
 - BIOLOGY 201L, or BIOLOGY 203L, or BIOCHEM 301
 - Any 2 of the following:
 - CHEM 511
 - CHEM 517
 - CHEM 518
 - CHEM 536
 - CHEM 393
 - CHEM 394
- **Environmental Chemistry Concentration (5 units)**
 - BIOLOGY 201L, or BIOLOGY 203L
 - ENVIRON 360
 - Any of the following:
 - ENVIRON 239
 - ENVIRON 540

- ENVIRON 542
 - CEE 565
 - CEE 667
- CHEM 393 & 394, or ENVIRON 393 & 394, or CEE 393 & 394
- **Pharmacology Concentration (5 units)**
 - BIOLOGY 201L, or BIOLOGY 203L
 - PHARM 350
 - PHARM 360
 - CHEM 393 & 394, or PHARM 393 & 394

Departmental Graduation with Distinction

The department offers a program for Graduation with Distinction in chemistry. Selection for the honor by the Chemistry Department Undergraduate Awards Committee is based on fulfilling the following requirements: at least a B average in chemistry courses at the time of application and at graduation, satisfactory completion of at least two courses of research independent study in chemistry (or in an approved chemistry-related area), enrollment and participation in Chemistry 295 (Introduction to Research Independent Study) and Chemistry 496 (Graduation with Distinction in Chemistry), submission of a high quality research thesis based upon the results of independent study, nomination for the honor by the research advisor, presentation of a poster on the research project, and an oral defense of the research thesis.

Chemistry (BS)

Program Code: U-CHEM-BS

Degree Designation: Bachelor of Science

Department: Chemistry Department

Website: chem.duke.edu/undergraduate/bs

Program Summary

The study of chemistry provides a fascinating and intellectually stimulating foray into the molecular underpinnings of the world around us, and through independent study, an opportunity to participate first hand in cutting edge research that spans a wide range of disciplines in the molecular sciences.

The BS degree program is recommended for students planning to undertake graduate study in Chemistry or a related science (e.g. Biochemistry or Pharmacology) or for those contemplating employment in the chemical industry following graduation.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (4-5 units)**
 - Chemistry: CHEM 101DL, or CHEM 110DL, or CHEM 21
 - Math 1: MATH 111L & MATH 112L, or MATH 122L, or MATH 21 & 22
 - Physics: PHYSICS 121L & 122L, or PHYSICS 151L & 152L, or PHYSICS 161D & 162D
- **Major Core (6.5 units)**
 - CHEM 201DL
 - CHEM 202D & 202L
 - CHEM 210D & 210L (CHEM 20 or 21 may also count)
 - CHEM 401 & 401L
 - CHEM 410
- **Additional Courses, No Concentration (7.5 units)**
 - MATH 212
 - CHEM 310 & 310L
 - CHEM 311 & 311L
 - CHEM 393
 - CHEM 394
 - CHEM 420L
 - BIOLOGY 201L, or BIOCHEM 301, or any CHEM course 500-level and above

Concentrations

The chemistry department offers both an AB and a BS degree in chemistry with concentrations in the following four areas. Certification of these concentrations is designated on the official transcript.

- Biochemistry, in cooperation with the Department of Biochemistry in the School of Medicine

- Chemical biology
- Environmental chemistry, in conjunction with the Nicholas School of the Environment
- Pharmacology, in conjunction with the Department of Pharmacology in the School of Medicine

In addition to the Prerequisites and Major Core requirements above, students must complete the following concentration requirements:

- **Biochemistry Concentration (7.5 units)**
 - BIOLOGY 201L, or BIOLOGY 203L
 - CHEM 301 & 301L & 302, or CHEM 310 & 310L & 311
 - BIOCHEM 301
 - BIOCHEM 302
 - CHEM 393 & 394, or BIOLOGY 293 & 294, or BIOCHEM 593 & 594
- **Chemical Biology Concentration (7.5 units)**
 - BIOLOGY 201L, or BIOLOGY 203L, or BIOCHEM 301
 - CHEM 301 & 301L & 302, or CHEM 310 & 310L & 311
 - Any 2 of the following:
 - CHEM 511
 - CHEM 517
 - CHEM 518
 - CHEM 536
 - CHEM 393
 - CHEM 394
- **Environmental Chemistry Concentration (7.5 units)**
 - BIOLOGY 201L, or BIOLOGY 203L, or BIOCHEM 301
 - CHEM 301 & 301L & 302, or CHEM 310 & 310L & 311
 - ENVIRON 360
 - Any of the following:
 - ENVIRON 239
 - ENVIRON 540
 - ENVIRON 542
 - CEE 565
 - CEE 667
 - CHEM 393 & 394, or ENVIRON 393 & 394, or CEE 393 & 394
- **Pharmacology Concentration (7.5 units)**
 - BIOLOGY 201L, or BIOLOGY 203L, or BIOCHEM 301
 - CHEM 301 & 301L & 302, or CHEM 310 & 310L & 311
 - PHARM 350
 - PHARM 360
 - CHEM 393 & 394, or PHARM 393 & 394

Departmental Graduation with Distinction

The department offers a program for Graduation with Distinction in chemistry. Selection for the honor by the Chemistry Department Undergraduate Awards Committee is based on fulfilling the following requirements: at least a B average in chemistry courses at the time of application and at graduation, satisfactory completion of at least two courses of research independent study in chemistry (or in an approved chemistry-related area), enrollment and participation in Chemistry 295 (Introduction to Research Independent Study) and Chemistry 496 (Graduation with Distinction in Chemistry), submission of a high-quality research thesis based upon the results of independent study, nomination for the honor by the research advisor, presentation of a poster on the research project, and an oral defense of the research thesis.

Civil Engineering (BSE)

Program Code: U-CE-BSE

Degree Designation: Bachelor of Science in Engineering

Department: Pratt School of Engineering, Civil & Environmental Engineering Department

Website: cee.duke.edu/undergrad/degrees/ce-planning

Program Summary

The infrastructure that makes up what we refer to as civilization is, for the most part, the work of civil and environmental engineers. Improving, or even maintaining, the quality of life is ever more challenging as urban problems in the industrialized nations of the world intensify, while rapid urbanization in many developing countries creates other opportunities and obligations for the civil and environmental engineer. The planning, design, construction, and maintenance of necessary facilities, in an era of increasingly scarce monetary and other resources, demand civil and environmental engineers dedicated

to work for the public good and prepared to seek more efficient and effective solutions based on current technology. The challenges faced by civil and environmental engineers vary widely in nature, size, and scope, and encompass both the public and private sectors. Examples include high-rise buildings and long-span bridges; concert halls and museums; hazardous waste disposal facilities; orbital structures; water supply and treatment facilities; tunnels; dams; seaports, airports, and offshore structures.

The mission of the undergraduate program in the Department of Civil and Environmental Engineering at Duke University is to provide an education that prepares graduates to solve technical problems, to pursue lifelong learning in their field, to assume leadership roles in their chosen careers, and to recognize their professional and personal obligations to the broader society and culture. The program is designed to provide a holistic educational experience where engineering sciences and design are combined with humanities and social sciences to provide the foundation for the critical thinking and skills that allow graduates to enjoy the benefits of a liberal education.

The alumni of the civil engineering (CE) program are expected to exhibit the following behaviors:

- conceive, communicate, and contribute to effective and sustainable solutions to professional, multi-disciplinary challenges (in, for example, engineering design, project management, consulting, finance, and academia) by utilizing fundamental principles of mathematics, science, and engineering, and employing engineering methods and judgment as needed;
- seek and engage in professional development, including advanced degrees and professional licensure, to enhance their capabilities and personal fulfillment;
- be leaders in their professional and personal communities while responding ethically and boldly when confronted with modern societal and environmental challenges.

The civil engineering program is built upon the expertise and experience of the faculty of the Civil and Environmental Engineering department and is supported by commensurate laboratory and instructional facilities. The civil and environmental engineering professors are committed to providing quality classroom instruction, advising, and laboratory experiences in settings that encourage student-faculty interactions as well as student-student interactions. The faculty conducts research of national and international consequence, and undergraduates have ample opportunities to be involved in such research, through undertaking independent study projects and/or by working as research assistants. The research facilities in the department, including laboratory equipment and instrumentation as well as computer resources, are comparable to those found in other major universities.

Graduates of the civil engineering program are able to select from a wide range of career paths. Recent graduates have pursued advanced study in engineering, business, law, and architecture, while others have accepted positions with major corporations and federal, state, and local government agencies as design engineers and project managers.

The civil engineering (CE) degree program is accredited by the Engineering Accreditation Commission of ABET.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 34 units total to earn a BSE degree.

- **Foundation Courses (7-7.5 units)**
 - EGR 201L
 - CEE 251L (CEE 201L may also count)
 - EGR 244L
 - CEE 132L (CEE 205 and an additional CEE elective may also count)
 - CEE 301L
 - CEE 302L
 - CEE 351 (EGR 305 may also count)
- **Track (4 units; select 1 track)**
 - Structural Engineering and Mechanics track
 - CEE 421L
 - CEE 422L
 - CEE 423L
 - CEE 429
 - Environmental Engineering track
 - CEE 461L
 - CEE 462L
 - CEE 463L
 - CEE 469
- **Natural Science Elective (1 unit)**
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Engineering and Applied Science Elective (1 unit)**
 - A comprehensive list of elective courses is available to students in the degree audit system.

- **Major Electives (3 units)**
 - Any 3 CEE courses 300-level and above
- **Free Electives (2 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.

A sample semester-by-semester sequencing of the requirements for the major is available online at cee.duke.edu/undergrad/degrees/ce-planning. Students planning to attend graduate school are strongly advised to use the unrestricted electives to take at least one additional civil and environmental engineering elective, with at least one of them at the 500-level, or higher.

Classical Civilization (AB)

Program Code: U-CLST-AB

Degree Designation: Bachelor of Arts

Department: Classical Studies Department

Website: classicalstudies.duke.edu/undergraduate/majors/classical-civilization

Program Summary

Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - CLST 181S, or CLST 201S, or CLST 283
 - CLST 182S, or CLST 202, or CLST 284
 - Students may satisfy this requirement with 2 courses in GREEK or LATIN believe the 250-level
- **Electives (7 units)**
 - Any 7 classical studies courses 200-level and above
 - Must include a course in at least 3 of the following areas:
 - Art and archaeology
 - History
 - Literature (in translation: 200-level and above; in the original language: 250-level and above)
 - Philosophy
- **Capstone (1 unit)**
 - CLST 480S
- **Senior Dossier**

Double majors in classical languages and classical civilization may count no more than two courses toward both majors.

Departmental Graduation with Distinction

Graduation with Distinction is available to majors. Eligible students must have a 3.5 grade point average in the major (3.3 overall) at the beginning of their project and must maintain these through completion. In the context of a research independent study (CLST/GREEK/LATIN 493) the candidate writes a major research paper. A committee of three faculty members votes whether to award Distinction, High Distinction, or Highest Distinction for the work. Majors interested in applying shall consult the director of undergraduate studies by the spring of their junior year.

Classical Languages (AB)

Program Code: U-CLLA-AB

Degree Designation: Bachelor of Arts

Department: Classical Studies Department

Website: classicalstudies.duke.edu/undergraduate/major/classical-languages

Program Summary

Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

The requirements of the major convey the disciplinary coherence of the field, yet are flexible enough to allow students to develop their own interests as they progress through their course of study.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Greek and Latin (8 units)**
 - Any 8 GREEK or LATIN courses
 - Must include at least 6 courses numbered 250 and above (200-level independent studies do not count)
 - Must demonstrate knowledge of both Greek and Latin through the second year
- **Classical Studies (1 unit)**
 - Any CLST course 200-level and above
- **Capstone (1 unit)**
 - CLST 480S
- **Senior Dossier**

Double majors in classical languages and classical civilization may count no more than two courses toward both majors.

Departmental Graduation with Distinction

Graduation with Distinction is available to majors. Eligible students must have a 3.5 grade point average in the major (3.3 overall) at the beginning of their project and must maintain this through completion. In the context of a research independent study (CLST/GREEK/LATIN 493) the candidate writes a major research paper. A committee of three faculty members votes whether to award Distinction, High Distinction, or Highest Distinction for the work. Majors interested in applying shall consult the director of undergraduate studies by the spring of their junior year.

Computational Media, Interdepartmental (AB)

Program Code: U-IVMCS-AB

Degree Designation: Bachelor of Arts

Department: Art & Art History Department, Computer Science Department

Website: cmac.duke.edu/undergraduate

Program Summary

The Departments of Art, Art History & Visual Studies and Computer Science sponsor an interdepartmental major and minor in Computational Media. The interdepartmental major is designed for students who want to combine deep theoretical and critical engagement with art, computation, and culture with substantive engagement with core computer science concepts and principles, undertaken alongside hands-on experience with computational media practice. Students interested in areas such as digital humanities, digital media and algorithmic arts, computer interface and experience design, game studies, digital storytelling and data journalism, information aesthetics, computational media ethics, global media studies and related topics will find the program of interest. The major also encourages participation in collaborative, interdisciplinary projects through the required Technical Project Experience, which may be fulfilled through coursework or participation in a variety of related programs such as Data+, Story+, Bass Connections, Code+, CS+ or another approved project experience.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (3 units)**
 - Computer Science: COMPSCI 101L, or COMPSCI 103L, or COMPSCI 116
 - Math 1: MATH 21, or MATH 111L
 - Math 2: MATH 22, or MATH 112L, or any 100-level STA course
- **Required Courses (8 units)**
 - COMPSCI 201
 - COMPSCI 230, or COMPSCI 330

- COMPSCI 210D, or COMPSCI 250D
- VMS 202D
- VMS 327S, or VMS 328S
- Any COMPSCI systems course
 - A comprehensive list of courses is available to students in the degree audit system.
- Any 2 VMS practices courses
 - A comprehensive list of courses is available to students in the degree audit system.
- **Electives (6 units)**
 - Any 3 COMPSCI courses 200-level and above (at most 1 independent study may count)
 - Any 3 CMS, ISS, or VMS courses 200-level and above (at most 1 independent study may count)
- **Technical Project**

Computer Science (AB)

Program Code: U-CPS-AB

Degree Designation: Bachelor of Arts

Department: Computer Science Department

Website: cs.duke.edu/undergrad/ba

Program Summary

The Department of Computer Science provides courses on the concepts of computing and computers, their capabilities, and uses. In most courses students make extensive use of the available computing facilities. Students who wish to take a single introductory course as part of their general education usually elect Computer Science 94, 101, 102 or 116.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (3 units)**
 - Intro Course: COMPSCI 101L, or COMPSCI 102L, or COMPSCI 116
 - Math: MATH 111L & 112L (MATH 21 & 22 and other equivalents may also count)
- **Required Courses (4 units)**
 - COMPSCI 201
 - COMPSCI 230, or COMPSCI 231D, or COMPSCI 232
 - COMPSCI 210D, or COMPSCI 250D
 - COMPSCI 330
- **Systems (1 unit)**
 - COMPSCI 310 or 510
 - COMPSCI 316 or 516
 - COMPSCI 345
 - COMPSCI 350L or 550
 - COMPSCI 351 or 581
 - COMPSCI 356 or 514
 - COMPSCI 512
- **Electives (3 units)**
 - Any 3 courses in COMPSCI, ECE, MATH, or STA 200-level and above
 - Must include 1 COMPSCI course 200-level and above, excluding independent study
 - May include at most 1 [social and policy oriented computing course](#)
 - A comprehensive list of elective courses is available to students in the degree audit system.

Areas of Concentration

Students may elect to complete requirements in specified areas of concentration. Currently, there is one [area of concentration for the computer science AB major](#): software engineering and design.

Departmental Graduation with Distinction

A program for Graduation with Distinction in computer science is available. Candidates for a degree with Distinction, High Distinction, or Highest Distinction must apply to the director of undergraduate studies and meet the following criteria. Candidates for Graduation with Distinction must have a grade point average of 3.0 or higher in computer science courses numbered above 200. Candidates must complete a substantial project, representing at least one year's work and including at least one independent study, under the guidance of a faculty member in computer science who oversees and endorses the

project. The project should represent a significant intellectual endeavor including the writing of a report. A presentation of the project must be made to a committee of three faculty members, two of whom will normally be from computer science although for interdisciplinary projects this restriction can be relaxed. Graduation with High or Highest Distinction is awarded at the discretion of the faculty committee in consultation with the director of undergraduate studies. Graduation with High or Highest Distinction is typically awarded for projects that are of publishable quality. In addition, candidates for a degree with high or highest distinction should have a grade point average of 3.5 or higher in those computer science courses related to the area of research; these courses must include at least one course at the 500 level.

Computer Science (BS)

Program Code: U-CPS-BS

Degree Designation: Bachelor of Science

Department: Computer Science Department

Website: cs.duke.edu/undergrad/bs

Program Summary

The Department of Computer Science provides courses on the concepts of computing and computers, their capabilities, and uses. In most courses students make extensive use of the available computing facilities. Students who wish to take a single introductory course as part of their general education usually elect Computer Science 94, 101, 102 or 116.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 15 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (3 units)**
 - Intro Course: COMPSCI 101L, or COMPSCI 102L, or COMPSCI 116
 - Math: MATH 111L & 112L (MATH 21 & 22 and other equivalents may also count)
- **Required Courses (4 units)**
 - COMPSCI 201
 - COMPSCI 230, or COMPSCI 231D, or COMPSCI 232
 - COMPSCI 210D, or COMPSCI 250D
 - COMPSCI 330
- **Systems (1 unit)**
 - COMPSCI 310 or 510
 - COMPSCI 316 or 516
 - COMPSCI 345
 - COMPSCI 350L or 550
 - COMPSCI 351 or 581
 - COMPSCI 356 or 514
 - COMPSCI 512
- **Statistics (1-2 units)**
 - Any STA course 111 and above
 - BME 244L
 - ECON 104D
 - PSY 204L & 205L
- **Math (1 unit)**
 - MATH 202
 - MATH 216
 - MATH 218D
 - MATH 221
- **Electives (5 units)**
 - Any 5 courses in COMPSCI, ECE, MATH, or STA 200-level and above
 - Must include 3 COMPSCI course 200-level and above, excluding independent study
 - May include at most 1 [social and policy oriented computing course](#)
 - A comprehensive list of elective courses is available to students in the degree audit system.

Areas of Concentration

Students may elect to complete requirements in specified areas of concentration. Currently, available [areas of concentration for the computer science BS major](#) are software systems, data science, and artificial intelligence and machine learning.

Departmental Graduation with Distinction

A program for Graduation with Distinction in computer science is available. Candidates for a degree with Distinction, High Distinction, or Highest Distinction must apply to the director of undergraduate studies and meet the following criteria. Candidates for Graduation with Distinction must have a grade point average of 3.0 or higher in computer science courses numbered above 200. Candidates must complete a substantial project, representing at least one year's work and including at least one independent study, under the guidance of a faculty member in computer science who oversees and endorses the project. The project should represent a significant intellectual endeavor including the writing of a report. A presentation of the project must be made to a committee of three faculty members, two of whom will normally be from computer science although for interdisciplinary projects this restriction can be relaxed. Graduation with High or Highest Distinction is awarded at the discretion of the faculty committee in consultation with the director of undergraduate studies. Graduation with High or Highest Distinction is typically awarded for projects that are of publishable quality. In addition, candidates for a degree with high or highest distinction should have a grade point average of 3.5 or higher in those computer science courses related to the area of research; these courses must include at least one course at the 500 level.

Cultural Anthropology (AB)

Program Code: U-CA-AB

Degree Designation: Bachelor of Arts

Department: Cultural Anthropology Department

Website: culturalanthropology.duke.edu/undergraduate/degree-options

Program Summary

Cultural anthropology is a comparative discipline that studies human social life across the world's diverse peoples and cultures. Cultural anthropology is the science of contemporary life: it emphasizes how power, identity, inequality, and social justice shape everyday life and global processes. It uniquely bridges the social sciences and the humanities with its holistic approach. Cultural anthropologists at Duke conduct research on a wide range of urgent issues, including racism, digital media, science and technology, ethnic identities, environment and climate change, health and medicine, music and performance, gender and sexuality, economic inequality, migration, sports, religion and myth, food politics, human rights, Indigenous sovereignty, and design. What unites these varied topics is a research method called ethnography. Ethnography is an empirical social research method focused on an engaged and community-based inquiry into everyday practices and how people make sense of them. It can involve participant observation, interviews, life histories, and action-oriented research, and is a widely applicable career skill. Ethnography reveals local solutions to global challenges.

The department offers a wide range of courses that introduce the discipline's core concepts and topics and that train students in ethnographic thinking, research, ethics, writing, and application. Courses in cultural anthropology often draw on in-depth case studies from different world areas to explore a specific topic. Faculty integrate their ethnographic fieldwork into courses, and the Department has special strengths in Africa and the African diaspora, Latin America, the Middle East, East Asia, South Asia, the United States, and Native North America.

Cultural Anthropology majors can take a broad approach to their studies and select courses that cover many topics, places, and communities. Should they choose, they can select courses that allow them to concentrate on a particular area of the world or a particular topic. They are encouraged to conduct original, independent ethnographic research, or to build a portfolio of course or project work that supports their professional aims.

Cultural Anthropology students have multiple career options owing to the program's flexible and rigorous training. Majors often pursue graduate studies in law, medicine, public policy, social work, and business. They work in journalism, tech, design, consulting, and international development and in government, corporate, and non-profit sectors with a global or multicultural focus. All of these opportunities value the skills of social analysis and the understanding of cultural diversity that cultural anthropology training emphasizes.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Foundation Courses (3 units)**
 - CULANTH 101 or 101D
 - CULANTH 301
 - CULANTH 302
- **Additional Courses (7 units)**
 - Any 6 CULANTH courses 100-level and above
 - Any CULANTH course 300-level and above

Students must take at least five of their ten courses with instructors whose primary appointment is in the Department of Cultural Anthropology. The Senior Seminar sequence counts toward this requirement. Three courses may be counted toward the Cultural Anthropology major from study abroad or transfer institutions. Students seeking Cultural Anthropology approval for a study abroad class need to send the full syllabus to the DUS for approval. Independent studies done abroad will not be counted. Cultural Anthropology majors are strongly encouraged to complete CULANTH 101 and either CULANTH 301 or CULANTH 302 before a study-away semester.

Departmental Graduation with Distinction

The department offers an intensive and personalized Graduation with Distinction program to qualified seniors, who research and write a senior thesis on a topic of their own choice in close collaboration with members of the cultural anthropology faculty. Admission to the program requires a 3.0-grade point average overall and a 3.3 grade point average in the major, both of which must be maintained to graduation for the student to be eligible for distinction. Qualified juniors will be notified each year by the Director of Undergraduate Studies about their eligibility. To pursue distinction, students must then enroll in the senior seminar, CULANTH 498S in the fall of their senior year, where they will learn about research methods and prepare a thesis. In the spring of their senior year, students must take a Distinction Independent Study, CULANTH 499S. Credit for CULANTH 498S and CULANTH 499S is given for a passing grade whether or not the student is awarded a distinction. The thesis can be based on original fieldwork on a topic of the student's choice, archival or library research, media analysis, or some combination of various anthropological methods. The student also forms a supervisory committee for the thesis during the fall of the senior year. It should consist of three faculty members who offer the student advice and support in preparing the thesis. At least two of the members must be faculty from the cultural anthropology department. Due in April of the senior year, the thesis must be judged of at least B+ quality by the supervisory committee to receive the distinction. In addition, the student must pass an oral examination on the thesis, which is given on its completion by the supervisory committee, and present their findings to the public. Students who fulfill the above requirements graduate with distinction in cultural anthropology. A typical sequence would be: select a research topic and conduct research in the summer before senior year; take the senior seminar in fall; form a supervisory committee; take a Distinction Independent Study in the spring; complete the research and writing by April and submit the final draft to the supervisory committee; schedule the oral defense for some time in early or mid-April; and defend the thesis in an oral examination given by the supervisory committee.

Dance (AB)

Program Code: U-DANCE-AB

Degree Designation: Bachelor of Arts

Department: Dance Department

Website: danceprogram.duke.edu/undergraduate/major

Program Summary

The Duke University Dance Program offers a major and minor in dance. The program focuses on dance as an integral part of the human experience and a medium for rigorous intellectual creativity. We aim to engage students in the profound potential for dance as embodied knowledge in the service of society. The Dance Program curriculum is designed to encourage the exploration of dance from interdisciplinary perspectives: historical, cultural, aesthetic, literary, technological, musical, scientific, and creative.

The Dance Program welcomes all students, regardless of the extent of their experience in dance. The curriculum provides opportunities to encounter dance traditions and movement experimentation as processes for discovery, communication, inquiry, and discourse. Students already deeply engaged in specific dance forms can explore and further enhance their physical, performance, and creative capacities. Students will experience dance as a mode of personal development and leadership and as a transformative force for social action. As the landscape of dance continues to evolve, Duke Dance Program students will gain the knowledge and skills to impact the nature and function of dance in contemporary society and reimagine the future of performance. They will move into action, agency, and sustainability with tools to transform relationships locally and globally.

Students may enroll in a summer session with the American Dance Festival. One course credit earned at the American Dance Festival may be counted toward the major or minor requirements.

The Duke in New York Arts Program allows students the opportunity to pursue the study of the arts in New York City in the fall semester of their junior or senior year. Appropriate courses taken at New York University may fulfill a requirement of the major or minor.

A minor in dance is also available. Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (3 units)**
 - DANCE 101
 - DANCE 487S
 - DANCE 489T, or DANCE 499S
- **Movement and Performance Courses (2 units)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Other Dance Courses (5 units)**
 - Any 5 DANCE courses 100-level and above
 - Partial-credit courses may not count toward this requirement

Only two performance course credits can be applied to the dance major requirements.

Data Science: Math+CS, Interdepartmental (BS)

Program Code: U-IDASC-BS

Degree Designation: Bachelor of Science

Department: Computer Science Department, Mathematics Department

Website: cs.duke.edu/undergrad/idm/mathematics

Program Summary

The Departments of Mathematics and Computer Science have collaboratively mapped out a data science pathway for an IDM (interdepartmental major) between the two departments. This pathway makes it easier for you to identify courses relevant to a career in data science, and to plan and optimize your program of study accordingly.

This IDM is intended for students interested in data science and its mathematical foundations, but not necessarily all the lower-level computational aspects. An IDM in STA+CS on Data Science is also available.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 12 units total to complete the major. At least 34 units total to earn a degree.

- **Required Computer Science Courses (4 units)**
 - COMPSCI 201
 - COMPSCI 210D, or COMPSCI 250D
 - COMPSCI 330
 - COMPSCI 370D, or COMPSCI 371, or COMPSCI 570, or COMPSCI 671D
- **Required Math Courses (4 units)**
 - MATH 221
 - MATH 230, or MATH 340
 - MATH 401, or MATH 431, or MATH 501, or MATH 531
 - MATH 403, or MATH 465, or MATH 412
- **Electives (4 units)**
 - Must include at least 3 COMPSCI courses
 - A comprehensive list of elective courses is available to students in the degree audit system.
 - Must include at least 1 MATH course
 - A comprehensive list of elective courses is available to students in the degree audit system.

Data Science: STA+CS, Interdepartmental (BS)

Program Code: U-IDATA-BS

Degree Designation: Bachelor of Science

Department: Computer Science Department, Statistical Science

Website: cs.duke.edu/undergrad/idm/statistics

Program Summary

The Departments of [Statistical Science](#) and [Computer Science](#) have collaboratively mapped out a data science pathway for an interdepartmental major (IDM) between the two departments. This pathway makes it easier for you to identify courses relevant to a career in data science, and to plan and optimize your program of study accordingly.

This IDM is intended for students interested in data science, particularly its underpinning statistical techniques, but not necessarily its lower-level computational aspects. An IDM in Math+CS on Data Science is also available.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (5 units)**
 - Calculus I: MATH 21, or MATH 106L, or MATH 111L
 - Calculus II: MATH 22, or MATH 112L, or MATH 122L
 - Computer Science: COMPSCI 101L, or COMPSCI 102L, or COMPSCI 116
 - Multivariable Calculus: MATH 202, or MATH 212, or MATH 219, or MATH 222
 - Linear Algebra: MATH 216, or MATH 218, or MATH 218D, or MATH 221

- **Required Computer Science Courses (4 units)**
 - COMPSCI 201
 - COMPSCI 210D, or COMPSCI 250D
 - COMPSCI 330
 - COMPSCI 370D, or COMPSCI 371, or COMPSCI 570, or COMPSCI 671D
- **Required Statistics Courses (5 units)**
 - STA 199L
 - STA 210L, or STA 221L
 - STA 240L, or STA 230, or STA 231
 - STA 360L
 - STA 432
- **Electives (5 units)**
 - Must include at least 3 COMPSCI courses
 - A comprehensive list of elective courses is available to students in the degree audit system.
 - Must include at least 2 STA courses
 - A comprehensive list of elective courses is available to students in the degree audit system.

Earth and Climate Sciences (AB)

Program Code: U-ECS-AB

Degree Designation: Bachelor of Arts

Department: Earth and Climate Sciences

Website: nicholas.duke.edu/academics/undergraduate-programs/earth-climate-sciences

Program Summary

The Earth and Climate Science major is for students interested in the science of how planet Earth works, and creating scientific solutions to earth and environmental challenges such as climate change, water use, sustainable development of mineral resources, clean energy production, as well understanding Earth's long geological and biological evolution.

The Division of Earth and Climate Sciences offers introductory and advanced courses in climatology, coastal processes, geology, water sciences, hydrology, geomorphology, physical oceanography, petrology, geological history, and energy. The majors are administered by the Nicholas School of the Environment. Additional information about the division can be found on the divisional website.

A bachelor of arts degree is offered for students who wish to understand local and global earth and climate sciences in support of careers in government, environmental sciences, policy or economics, environmental law, and environmental health.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Corequisites (2 units)**
 - Biology: BIOLOGY 201L, or BIOLOGY 202L, or BIOLOGY 207
 - Chemistry: CHEM 21, or CHEM 101DL, or CHEM 110DL, or CHEM 201DL, or CHEM 210D
 - Computer Science or Engineering: COMPSCI 101L, or EGR 103L
 - Math: MATH 111L, or MATH 112L
 - Physics: PHYSICS 121L, or PHYSICS 141L, or PHYSICS 142L
 - Statistics: STA 101L, or STA 199L
- **Gateway Course (1 unit)**
 - ECS 101
 - ECS 103
- **Experiential Course (1 unit)**
 - ECS 210S
 - ECS 212S
- **Electives (7 units)**
 - Must include at least 1 Science and Society course
 - Must include courses across the earth and climate sciences subject areas, or field courses
 - A comprehensive list of elective courses is available to students in the degree audit system.

Graduation with Distinction

The Division of Earth and Climate Sciences through Trinity College offers Graduation with Distinction through the successful completion of a student research project. A candidate for Graduation with a Distinction in Earth and Climate Sciences must have a grade point average of 3.2 in the major at the beginning of the project to qualify for nomination. The student will apply for consideration for Graduation with Distinction by the beginning of their senior academic year by submitting an application to the director of undergraduate studies describing the project. The student must identify a faculty advisor who has agreed to oversee the project. The student will normally do the work as part of research independent study courses (Earth and Climate Sciences 393, 394) completed during one academic year. The project will consist of an original piece of scientific research, which will be summarized by a written report in the style of a scientific publication. The student will also give a poster presentation to students and faculty of the division before the end of classes of the student's final semester. The decision on granting Graduation with Distinction will be made by a vote of the student's project committee, with a majority in favor needed for Graduation with Distinction.

Earth and Climate Sciences (BS)

Program Code: U-ECS-BS

Degree Designation: Bachelor of Science

Department: Earth and Climate Sciences

Website: nicholas.duke.edu/academics/undergraduate-programs/earth-climate-sciences

Program Summary

The Earth and Climate Science major is for students interested in the science of how planet Earth works, and creating scientific solutions to earth and environmental challenges such as climate change, water use, sustainable development of mineral resources, clean energy production, as well understanding Earth's long geological and biological evolution.

The Division of Earth and Climate Sciences offers introductory and advanced courses in climatology, coastal processes, geology, water sciences, hydrology, geomorphology, physical oceanography, petrology, geological history, and energy. The majors are administered by the Nicholas School of the Environment. Additional information about the division can be found on the divisional website.

A bachelor of science degree is offered for students interested in pursuing further studies or professional work in earth and climate sciences and related fields, or for students who intend to apply their scientific and analytic training to other professional careers, such as business, consulting, law, or medicine.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 16 units total to complete the major. At least 34 units total to earn a degree.

- **Corequisites (5 units)**
 - At least 1 course from each of the following areas:
 - Chemistry: CHEM 21, or CHEM 101DL, or CHEM 110DL
 - Math: MATH 21, or MATH 111L
 - Physics: PHYSICS 25, or PHYSICS 121L, or PHYSICS 141L
 - At least 2 courses from any of the following:
 - Biology: BIOLOGY 201L, or BIOLOGY 202L, or BIOLOGY 207
 - Chemistry: CHEM 201DL, or CHEM 210D
 - Computer Science or Engineering: COMPSCI 101L, or EGR 103L
 - Math: MATH 112L
 - Physics: PHYSICS 142L
 - Statistics: STA 101L, or STA 199L
- **Gateway Course (1 unit)**
 - ECS 101
 - ECS 103
- **Experiential Course (1 unit)**
 - ECS 210S
 - ECS 212S
- **Field Course (1 unit)**
 - ECS 226S
 - ECS 287A
 - ECS 288A
 - ECS 401
 - ECS 402S
 - ECS 403
 - ECS 410S

- **Electives (7 units)**
 - Must include at least 1 Earth Science Area course
 - Must include at least 1 Climate Science Area course
 - A comprehensive list of elective courses is available to students in the degree audit system.

Graduation with Distinction

The Division of Earth and Climate Sciences through Trinity College offers Graduation with Distinction through the successful completion of a student research project. A candidate for Graduation with a Distinction in Earth and Climate Sciences must have a grade point average of 3.2 in the major at the beginning of the project to qualify for nomination. The student will apply for consideration for Graduation with Distinction by the beginning of their senior academic year by submitting an application to the director of undergraduate studies describing the project. The student must identify a faculty advisor who has agreed to oversee the project. The student will normally do the work as part of research independent study courses (Earth and Climate Sciences 393, 394) completed during one academic year. The project will consist of an original piece of scientific research, which will be summarized by a written report in the style of a scientific publication. The student will also give a poster presentation to students and faculty of the division before the end of classes of the student's final semester. The decision on granting Graduation with Distinction will be made by a vote of the student's project committee, with a majority in favor needed for Graduation with Distinction.

Economics (AB)

Program Code: U-ECON-AB

Degree Designation: Bachelor of Arts

Department: Economics Department

Website: econ.duke.edu/undergraduate/ba-economics

Program Summary

Economics courses develop the critical and analytical skills essential for understanding economics and institutions, in both their contemporary and historical settings. Although no particular vocational or professional goal is emphasized, these courses provide the academic background necessary for positions in industry or the non-profit sector, for work in many branches of government service, for law school, and for graduate study in business administration, economics, and the social sciences.

Students who contemplate graduate study in economics should strongly consider the BS instead of the AB degree. A minor is also available.

The Department of Economics maintains online resources to guide economics majors and minors at econ.duke.edu/undergraduate.

Go to Programs by Department to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

- **Math Requirement (1 unit)**
 - MATH 21
 - MATH 105L and 106L
 - MATH 111L
- **Core Economic Courses (5 units)**
 - ECON 101D
 - ECON 104D
 - ECON 201D
 - ECON 204D
 - ECON 210D
- **Upper-Level Electives (5 units)**
 - Must include at least 1 Applied Economics Course
 - Must include at least 4 ECON or FECON courses 300-400-level
 - At least 1 elective course must be 300-level
 - At least 1 elective course must be 400-level

Departmental Graduation with Distinction

Awarding of Distinction. A student will be awarded distinction upon graduation if they have satisfied all of the following requirements:

- A minimum grade point average of 3.3 in the major and 3.3 overall;
- Completion of five electives commensurate with an undergraduate AB or BS degree; and
- The honors committee determines that the honors thesis qualifies for Graduation with Distinction.

Awarding of High Distinction.

A student will be awarded High Distinction upon graduation if they have satisfied all the requirements for Distinction and their honors thesis is selected by our honors committee from among nominated theses.

Awarding of Research Distinction.

If the honors committee determines that a student's thesis qualifies for distinction, but the student's GPA does not meet the standards for Graduation with Distinction, the Economics Department will recognize the student with a Research Distinction in the departmental graduation program.

Honors Thesis. An honors thesis is a research paper representing a degree of research and critical thinking sufficiently complex and sophisticated as to require two to three semesters' worth of work. The thesis is planned, researched, drafted, and revised over the course of two to three semesters, using research tools and techniques employed in economics research. The thesis is not a term paper summarizing existing research. Rather, the thesis represents novel economic research undertaken by undergraduates under guidance of faculty.

Honors Seminars (ECON 495S and ECON 496S). The department offers a two-semester research workshop sequence for students interested in writing an honors thesis. Students are expected to take both ECON 495 and 496 but they can be taken in either order. Required core courses are prerequisites for both Honors Seminars. We strongly encourage students to begin the sequence in the spring of their junior year, but it is also possible to begin in the fall of their senior year.

If a student has been working with a faculty member on a research project possibly through a course or through work as a research assistant, they can - with the approval of this faculty member alternatively register for ECON 394 (Research Independent Study) and then ECON 493 (Honors Research Independent Study).

A student may start in an Honors Seminar (495 or 496) and then finish their second semester with Econ 493 with the approval of the faculty member offering to oversee the student's completion of the honors study.

Students do not have to qualify for Graduation with Distinction to enroll in ECON 495, ECON 496, ECON 394, or ECON 493.

ECON 495, ECON 496, ECON 394, and ECON 493 all qualify as electives for the major. Still, completion of any one or any two of these courses does not guarantee Graduation with Distinction. The honors committee determines if the honors thesis qualifies for Graduation with Distinction.

Economics (BS)

Program Code: U-ECON-BS

Degree Designation: Bachelor of Science

Department: Economics Department

Website: econ.duke.edu/undergraduate/bs-economics

Program Summary

Economics courses develop the critical and analytical skills essential for understanding economics and institutions, in both their contemporary and historical settings. Although no particular vocational or professional goal is emphasized, these courses provide the academic background necessary for positions in industry or the non-profit sector, for work in many branches of government service, for law school, and for graduate study in business administration, economics, and the social sciences.

Students who contemplate graduate study in economics are urged to develop skills in intermediate calculus (MATH 212), linear algebra (MATH 221), differential equations (MATH 356), and advanced calculus (MATH 431).

The undergraduate degree in economics signifies achievement of proficiency in quantitative skills and experience in applying these to economics.

The Department of Economics maintains online resources to guide economics majors and minors at econ.duke.edu/undergraduate.

Go to Programs by Department to view all related programs.

Academic Requirements

At least 12 units total to complete the major. At least 34 units total to earn a degree.

- **Math Requirement (1 unit)**
 - MATH 202
 - MATH 212
 - MATH 219
 - MATH 222
- **Core Economic Courses (6 units)**
 - ECON 101D
 - ECON 104D
 - ECON 201D
 - ECON 204D
 - ECON 205D
 - ECON 210D

- **Upper-Level Electives (5 units)**
 - Must include at least 4 ECON or FECON courses 300-400-level
 - At least 1 elective course must be 300-level
 - At least 1 elective course must be 400-level

For the BS Degree with Concentration in Financial Economics

The economics department also offers a BS degree with a concentration in financial economics. Certification of this concentration is designated on the official transcript. Students who wish to pursue this designation must complete the requirements for the BS degree with the addition of the following requirements.

- FECON 372
- At least 2 elective courses from the following options:
 - FECON courses 300-level and above (may also satisfy BS elective requirements)
 - FMKT courses 200-level and above
 - FINTECH 520, 533, 534, 536, 550, 552, 564
 - ENERGY 620

Departmental Graduation with Distinction

Awarding of Distinction. A student will be awarded distinction upon graduation if they have satisfied all of the following requirements:

- A minimum grade point average of 3.3 in the major and 3.3 overall;
- Completion of five electives commensurate with an undergraduate AB or BS degree; and
- The honors committee determines that the honors thesis qualifies for Graduation with Distinction.

Awarding of High Distinction.

A student will be awarded High Distinction upon graduation if they have satisfied all the requirements for Distinction and their honors thesis is selected by our honors committee from among nominated theses.

Awarding of Research Distinction.

If the honors committee determines that a student's thesis qualifies for distinction, but the student's GPA does not meet the standards for Graduation with Distinction, the Economics Department will recognize the student with a Research Distinction in the departmental graduation program.

Honors Thesis. An honors thesis is a research paper representing a degree of research and critical thinking sufficiently complex and sophisticated as to require two to three semesters' worth of work. The thesis is planned, researched, drafted, and revised over the course of two to three semesters, using research tools and techniques employed in economics research. The thesis is not a term paper summarizing existing research. Rather, the thesis represents novel economic research undertaken by undergraduates under guidance of faculty.

Honors Seminars (ECON 495S and ECON 496S). The department offers a two-semester research workshop sequence for students interested in writing an honors thesis. Students are expected to take both ECON 495 and 496 but they can be taken in either order. Required core courses are prerequisites for both Honors Seminars. We strongly encourage students to begin the sequence in the spring of their junior year, but it is also possible to begin in the fall of their senior year.

If a student has been working with a faculty member on a research project possibly through a course or through work as a research assistant, they can - with the approval of this faculty member - alternatively register for Economics 394 (Research Independent Study) and then ECON 493 (Honors Research Independent Study).

A student may start in an Honors Seminar (495 or 496) and then finish their second semester with ECON 493 with the approval of the faculty member offering to oversee the student's completion of the honors study.

Students do not have to qualify for Graduation with Distinction to enroll in ECON 495, ECON 496, ECON 394, or ECON 493.

ECON 495, ECON 496, ECON 394, and ECON 493 all qualify as electives for the major. Still, completion of any one or any two of these courses does not guarantee Graduation with Distinction. The honors committee determines if the honors thesis qualifies for Graduation with Distinction.

Electrical and Computer Engineering (BSE)

Program Code: U-ECE-BSE

Degree Designation: Bachelor of Science in Engineering

Department: Pratt School of Engineering, Electrical & Computer Engineering Department

Website: ece.duke.edu/undergrad/degrees/planning

Program Summary

The educational mission of the Department of Electrical and Computer Engineering is to graduate electrical and computer engineers who embody excellence in a broad sense. We expect our graduates to advance within industry positions or in graduate study, or to carry the attributes of an engineering education into other disciplines. The electrical and computer engineering program of study must include mathematics and basic sciences, fundamentals,

and applications in several engineering sciences, and team-based experience in the process of design, where theory is applied in the context of real needs and limitations, and where judgment must be exercised. Our electrical and computer engineering graduates should be able to think critically when solving problems and managing tasks and communicate effectively in multidisciplinary professional environments. To be a responsible member of the engineering profession, each graduate must be aware of social, ethical, environmental, and economic factors and constraints on engineering activity, and must understand the importance of these matters in a global context. We aspire to have our graduates exhibit intellectual depth and creativity, uphold high ethical standards, and show a commitment to the betterment of society through service and professional work.

To this end, the specific program educational objectives that we look for in our graduates are that they

- advance professionally in their chosen field;
- contribute to their professional community and society; and
- engage in lifelong learning in professional and personal endeavors.

The electrical and computer engineering (ECE) program is fully accredited by the Engineering Commission of ABET and leads to a bachelor of science in engineering (BSE) degree. The ECE curriculum provides a solid foundation in mathematics, physical and life sciences, computer science, and humanities and social sciences that complements a set of twelve theme-based ECE courses.

The Department of Electrical and Computer Engineering has designed its curriculum based on the theme of integrated sensing and information processing (ISIP). The ISIP theme capitalizes on the collective research expertise of the ECE faculty and provides a coherent, overarching framework that links principles of ECE to each other and real-world engineering problems. The cornerstone of the ECE curriculum is the first course fundamentals of electrical and computer engineering, which has been designed to provide students with a holistic view of ECE by introducing concepts spanning how to interface sensors and systems with the physical world, how to transfer/transmit energy/information, and how to extract, manipulate, analyze, and interpret information. The integrated design challenge in this first course introduces students to team problem solving and motivates in-depth study of ECE concepts in subsequent terms. Each of the four follow-on core courses focuses on a specific subfield of ECE (digital systems, microelectronics, sensing and waves, signals, and systems), and integrates lateral and vertical connections to other courses through the use of thematic examples. Following the five core courses are seven ECE technical electives that include a culminating engineering design course where teams of students address a significant real-world problem or opportunity.

The ECE curriculum emphasizes creative problem solving through open-ended design challenges in many courses. Working in teams, students collaborate to utilize and develop their individual and collective technical, management, and leadership skills to design, simulate, build, and test components and systems to meet a set of specifications, often defined by industry standards.

Students have the option to pursue two or more areas of concentration, depending on personal interests. The upper-level technical electives, which extend the breadth and depth of the ECE core curriculum, provide a firm foundation for future technical accomplishment and for effective problem-solving in the diverse fields that our graduates pursue.

The flexibility of the ECE curriculum enables students and their faculty advisors to tailor a unique educational experience for every student. This may include a semester abroad; a second major, minor, or certificate program; and/or a research experience with a faculty member. The most popular second majors are computer science and biomedical engineering. Other popular second majors include mathematics, economics, and physics. Interests such as pre-medicine, pre-law, art, music, psychology, and social sciences can be accommodated through individually designed programs. Students are encouraged to take more than the minimum required courses in the sciences and the liberal arts, as is fitting at an engineering school in a university with a strong liberal arts tradition.

A minor in ECE is also available. Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 34 units total to earn a BSE degree.

- **Foundation Courses (6 units)**
 - COMPSI 201
 - ECE 110L
 - ECE 230L
 - ECE 250D
 - ECE 270DL
 - ECE 280L
- **Statistics Course (1 unit)**
 - ECE 555
 - STA 130L
 - EGR 238L
 - STA 230
 - STA 231
 - ECE 380
 - STA 240L
 - MATH 231

- **Electives (7 units)**

- Must include 4 ECE concentration courses, representing at least 2 concentration areas with at least 2 courses in the same area
 - Concentration areas: computer engineering and digital systems; signal processing, communications, and control systems; solid-state devices and integrated circuits; engineering physics; and photonics
- Must include at least 1 ECE course 300-level and above
- Must include at least 1 ECE Extension Elective course 300-level and above
- Must include at least 1 design elective
- A comprehensive list of elective courses is available to students in the degree audit system.

A sample semester-by-semester sequencing of the requirements for the major is available online at ece.duke.edu/undergrad/degrees/planning.

English (AB)

Program Code: U-ENGL-AB

Degree Designation: Bachelor of Arts

Department: English Department

Website: english.duke.edu/undergraduate/major

Program Summary

The English major is designed to convey to students a broad knowledge of English, American, and Anglophone literature, a sophisticated habit of critically engaging literary and cultural texts, a shared understanding of major problems, trends, and methods of literary and cultural analysis, and the ability to pose questions and organize knowledge in productive and original ways. While offering students clear direction on how to profit most from their study within the English department, the major also seeks to encourage students to assume an enduring habit of questioning and intellectual self-articulation. Each of the four areas of requirement for completion of the major thus invites students, in consultation with their advisor, to devise a coherent, challenging, and intellectually distinctive plan of study.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Gateway (1 unit)**
 - ENGLISH 101S
- **Area Study Courses (4 units)**
 - At least 2 courses in Area I: Medieval and Early Modern
 - At least 1 course in Area II: 18th and 19th Century
 - At least 1 course in Area III: Modern and Contemporary
 - A comprehensive list of courses is available to students in the degree audit system.
- **Criticism, Theory, or Methodology (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Diversity (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **English Electives (3 units)**
 - Any 3 ENGLISH courses 200-level and above (ENGLISH 313A and ENGLISH 313A-1 do not count)

Additional Recommendations

- Students should take at least one course focused on minority literatures or Anglophone literatures from beyond the United States and Great Britain. The department offers courses in African, Asian, Caribbean, diasporic, and ethnic literatures (e.g., African American, Asian American) that will broaden students' perspectives on English as a global language.
- Students planning to enter graduate study in an English department should take additional courses from the early as well as later and modern periods. If eligible, they should also apply for the Distinction Program. Aspiring graduate students should consult their advisor.
- The department recommends that students majoring in English complete at least two years of college-level study, or the equivalent, of a foreign language. Students contemplating graduate work in English should note that many master's programs require examination in one foreign language and that doctoral programs commonly require examination in two. Students interested in linguistics are strongly urged to study at least one non-Indo-European language.

Teacher Certification

Each year a number of Duke English majors earn certificates as secondary school teachers. For more information, visit educationprogram.duke.edu/undergraduate/secondary-teacher-license.

Departmental Graduation with Distinction

The English department offers its majors two options to earn distinction: the Critical Thesis option or the Creative Writing Thesis option.

- **Structure.** Either two independent studies or a “home seminar” and one independent study. (This may be fall/spring or spring/fall.) Under most circumstances, a completed length of forty to seventy pages.
- **Coursework.** The distinction courses count toward the major. Students must complete eleven total courses to graduate with distinction in the major instead of the standard ten.
- **Application.** For critical theses: to apply students must have completed, by the beginning of the senior year, at least five 200-level or above English courses and must have a GPA of at least 3.5 in English courses. For creative theses: Students must have completed at least two Creative Writing courses (no later than the beginning of their senior year). If students have only completed two courses, they must enroll in a third course during the first semester of thesis writing. Students must also have a GPA of at least 3.5 in English and Creative Writing courses.
- Students submit an application that includes a writing sample of about ten pages from an English course, a project description and basic bibliography (critical theses only; one page single-spaced). Applications must be submitted to the director of undergraduate studies. Applications are due November 15 for a spring-to-fall option and April 15 for a fall-to-spring option.
- **Evaluation Procedure.** Upon approval by the instructor, the completed thesis is submitted to the director of undergraduate studies by December 1 (for a spring-to-fall project) or March 31 (for a fall-to-spring project) of the senior year for evaluation by the director of undergraduate studies, the thesis advisor, and one other faculty member.
- **Levels of Distinction.** Two levels: Distinction or High Distinction (or No Distinction). Levels of distinction are based on the quality of the completed work. Students who have done satisfactory work in the seminar or independent study but whose thesis is denied distinction will simply receive graded credit for their seminars and/or independent studies. Whereas the standard major in English asks for a total of ten courses, students pursuing honors in English will take nine courses plus either two independent studies or a “home seminar” to be followed by an independent study.

Environmental Engineering (BSE)

Program Code: U-ENVE-BSE

Degree Designation: Bachelor of Science in Engineering

Department: Pratt School of Engineering, Civil & Environmental Engineering Department

Website: cee.duke.edu/undergrad/degrees/enve-planning

Program Summary

The environmental engineering degree program, launched in Fall 2013, is highly interdisciplinary and brings together topics as diverse as chemistry, the life sciences, economics, fluid mechanics, and public health engineering. The degree responds to the needs of students looking for such an interdisciplinary engineering degree that prepares them to work as environmental engineers, graduate work in environmental engineering, or for advanced study in environmental law, medicine, public health, or global sanitation.

The infrastructure that makes up what we refer to as civilization is, for the most part, the work of civil and environmental engineers. Improving, or even maintaining, the quality of life is ever more challenging as urban problems in the industrialized nations of the world intensify, while rapid urbanization in many developing countries creates other opportunities and obligations for the civil and environmental engineer. The planning, design, construction, and maintenance of necessary facilities, in an era of increasingly scarce monetary and other resources, demand civil and environmental engineers dedicated to work for the public good and prepared to seek more efficient and effective solutions based on current technology. The challenges faced by civil and environmental engineers vary widely in nature, size, and scope, and encompass both the public and private sectors. Examples include high-rise buildings and long-span bridges; concert halls and museums; hazardous waste disposal facilities; orbital structures; water supply and treatment facilities; tunnels; dams; seaports, airports, and offshore structures.

The mission of the undergraduate program in the Department of Civil and Environmental Engineering at Duke University is to provide an education that prepares graduates to solve technical problems, to pursue lifelong learning in their field, to assume leadership roles in their chosen careers, and to recognize their professional and personal obligations to the broader society and culture. The program is designed to provide a holistic educational experience where engineering sciences and design are combined with humanities and social sciences to provide the foundation for the critical thinking and skills that allow graduates to enjoy the benefits of a liberal education.

The alumni of the environmental engineering (EnvE) programs are expected to exhibit the following behaviors:

- conceive, communicate, and contribute to effective and sustainable solutions to professional, multi-disciplinary challenges (in, for example, engineering design, project management, consulting, finance, and academia) by utilizing fundamental principles of mathematics, science, and engineering, and employing engineering methods and judgment as needed;
- seek and engage in professional development, including advanced degrees and professional licensure, to enhance their capabilities and personal fulfillment;
- be leaders in their professional and personal communities while responding ethically and boldly when confronted with modern societal and environmental challenges.

The environmental engineering program is built upon the expertise and experience of the faculty of the Civil and Environmental Engineering department and is supported by commensurate laboratory and instructional facilities. The civil and environmental engineering professors are committed to providing quality classroom instruction, advising, and laboratory experiences in settings that encourage student-faculty as well as student-student interactions. The faculty conducts research of national and international consequence, and undergraduates have ample opportunities to be involved in such research, through undertaking independent study projects and/or by working as research assistants. The research facilities in the department, including laboratory equipment and instrumentation as well as computer resources, are comparable to those found in other major universities.

Graduates of the environmental engineering program are able to select from a wide range of career paths. Recent graduates have pursued advanced study in environmental engineering, while others have accepted positions with major corporations and federal, state, and local government agencies as design engineers and project managers.

The environmental engineering (EnvE) degree program is accredited by the Engineering Accreditation Commission of ABET.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 34 units total to earn a BSE degree.

- **Biology Course (1 unit)**
 - BIOLOGY 201L
 - BIOLOGY 202L
 - BIOLOGY 212
 - BIOLOGY 203L
- **Introduction to Civil Engineering (1 unit)**
 - CEE 132L (CEE 204 and any CEE course 300-level and above may also count)
- **Required Courses (11 units)**
 - EGR 201L
 - EGR 244L
 - CEE 251L (CEE 201L may also count)
 - CEE 301L
 - CEE 351 (EGR 305 may also count)
 - CEE 461L
 - CEE 462L
 - CEE 463L
 - CEE 469
 - CEE 560
 - ME 331L
- **Electives (5 units)**
 - At least 1 earth science course
 - At least 2 upper-level environmental courses
 - At least 2 free electives
 - A comprehensive list of elective courses is available to students in the degree audit system.

A sample semester-by-semester sequencing of the requirements for the major is available online at cee.duke.edu/undergrad/degrees/enve-planning.

Environmental Sciences (BS)

Program Code: U-ENVS-BS

Degree Designation: Bachelor of Science

Department: Nicholas School of Environment

Website: nicholas.duke.edu/academics/undergraduate-programs/environmental-sciences-policy

Program Summary

The undergraduate major in environmental sciences is offered as a bachelor of science degree to students interested in a scientific perspective on environmental issues. The major is designed to expose students to the breadth of environmental sciences, while engaging students to develop depth in a focus area. This major is designed for students with career objectives in environmental sciences, industry, or management that require a strong scientific background, or for students intending to pursue graduate degrees in environmental sciences. The major also merges well with pre-health requirements. The corequisites for the BS degree stress a firm foundation in the physical and life sciences, and mathematics. The gateway course focuses on local, regional, and global case studies taught by interdisciplinary teams of faculty. The major requirements include five core courses selected from five categories (Environmental Health, Ecology, Environmental Physical Sciences, Environmental Social Science, and Environmental Tools and Skills) and three focus area

courses (one of which can be a core course). Students are required to participate in a relevant field experience or internship and many students choose to fulfill this requirement through study abroad, a semester at Duke Marine Lab, or the Stanback Internship Program. The department encourages all students to pursue independent research with Nicholas School faculty members.

Go to [Programs by Department](#) to view all related programs.

Advising in Environmental Sciences and Policy

Advisors are assigned based on students' general areas of interest. Students present a proposed plan of study to their advisors that explains the rationale for their chosen area of concentration within their focused study. The program encourages close relationships between faculty and students with convergent interests.

Academic Requirements

At least 17 units total to complete the major. At least 34 units total to earn a degree.

- **Corequisites (7 units)**
 - Biology: BIOLOGY 201L, or BIOLOGY 202L, or BIOLOGY 203L
 - Calculus: MATH 111L and MATH 112L, or MATH 122L
 - Chemistry I: CHEM 20, or CHEM 21, or CHEM 101DL, or CHEM 110DL
 - Chemistry II: CHEM 201DL, or CHEM 210DL
 - Environmental Sciences: ENVIRON 20, or ENVIRON 102
 - Physics: PHYSICS 121L, or PHYSICS 151L
 - Statistics: STA 101L, or STA 102L, or STA 199L, or SOCIOL 333
- **Gateway (1 unit)**
 - ENVIRON 201
- **Core (5 units)**
 - Any 1 course from each of the following areas:
 - Environmental Health
 - Ecology
 - Environmental Physical Sciences
 - Environmental Social Sciences
 - Environmental Tools/Skills
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Focus Area (3 units)**
 - Any 3 courses within a focus area
 - At least 1 course 500-level and above
 - Focus areas will be chosen under the direction of the student's major advisor.
- **Capstone (1 unit)**
 - ENVIRON 495
 - ENVIRON 545 and ENVIRON 546
 - Participation in Graduation with Distinction may satisfy this requirement.
- **Field Experience or Internship**

Graduation with Distinction

The environmental sciences and policy and environmental sciences both offer a Graduation with Distinction option. Interested students with a 3.0 grade point average overall and 3.2 grade point average in the environmental sciences/policy major should apply by the beginning of their senior year. The application should include a written request to the director of undergraduate studies describing the proposed research project, and identifying a primary faculty advisor who has agreed to supervise the research. Students are required to take one independent research study as part of the Graduation with Distinction process. Students will write a substantial paper describing their completed research, which is evaluated by the faculty advisor, and will make an oral presentation to students and faculty of the program before the end of classes of the student's final semester. For additional information and an application form, visit nicholas.duke.edu/academics/undergraduate-programs/graduation-distinction.

Environmental Sciences and Policy (AB)

Program Code: U-ENVS-AB

Degree Designation: Bachelor of Arts

Department: Nicholas School of Environment

Website: nicholas.duke.edu/academics/undergraduate-programs/environmental-sciences-policy

Program Summary

The undergraduate major in environmental science and policy is offered as a bachelor of arts degree to students interested in the interdisciplinary study of environmental issues. The major draws from the breadth of perspectives from, science, policy, and humanities while engaging students in an in-depth study in natural or social sciences. This major is designed for students with career objectives such as environmental law, policy, science, management, or planning that require in-depth understanding of environmental issues that cross disciplinary boundaries. The corequisites for the AB degree stress a firm foundation in basic natural, environmental, and social science areas. The gateway course focuses on local, regional, and global case studies taught by interdisciplinary teams of faculty. The major requirements include three topical courses selected from three categories (Environmental Humanities, Environmental Sciences, and Environmental Policy) and three additional focus area courses. Students are required to participate in a relevant field experience or internship and many students choose to fulfill this requirement through study abroad, a semester at Duke Marine Lab, or the Stanback Internship Program. The department encourages all students to pursue independent research with Nicholas School faculty members.

Evolutionary Anthropology (AB)

Program Code: U-EVANT-AB

Degree Designation: Bachelor of Arts

Department: Evolutionary Anthropology

Website: evolutionaryanthropology.duke.edu/undergraduate/degree-programs/major

Program Summary

Evolutionary Anthropology is an interdisciplinary department centering on the origin and evolution of human beings and their close biological relatives. The department and its course offerings cover a variety of research areas including primate behavior, ecology, cognition and genetics; primate and human disease ecology; human genetics, energetics, and physiology; paleoanthropology; and functional and comparative anatomy. Opportunities for independent research exist in departmental laboratories, including the Canine Cognition Center and the Primate Locomotion Lab. Additional research opportunities can be found at the Duke Lemur Center and the Lemur Center's Museum of Natural History.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

- **Corequisite (1 unit)**
 - BIOLOGY 202L
 - BIOLOGY 203L
- **Introduction to Evolutionary Anthropology (1 unit)**
 - EVANTH 101, or EVANTH 101D
- **Evanth Elective Courses (5 units)**
 - Any 5 EVANTH courses 200-level and above
 - Must include at least 1 Anatomy and Paleoanthropology course
 - Must include at least 1 Behavior, Ecology & Cognition course
 - Must include at least 1 lab/field experience course
 - Must include at least 1 EVANTH capstone course 400-level and above
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Additional Electives (4 units)**
 - Any 4 EVANTH courses 200-level and above
 - A list of preapproved electives in related departments is available to students in the degree audit system.

Areas of Concentration

Students may elect to complete courses representing an in-depth study of a given area within Evolutionary Anthropology. There are currently three area concentrations available: 1) anatomy and paleoanthropology; 2) behavior, ecology, and cognition; and 3) human biology. Concentrations require that three of the five courses in Evolutionary Anthropology (as required by the major) be taken in the area of concentration. Preapproved courses for each area can be found in the Handbook for Majors.

Departmental Graduation with Distinction

To qualify for the Graduation with Distinction program, students must have a GPA of 3.0 overall and 3.5 within evolutionary anthropology. To earn distinction, students typically spend one year conducting independent research with a faculty mentor and writing a substantial senior thesis. Students must be enrolled in an independent study course within evolutionary anthropology. Exceptions must be approved by the director of undergraduate studies. Students must submit a brief (one- to two-paragraph) description of the honors project, the names of the faculty comprising the examination committee, and the signature of the student's faculty mentor to the director of undergraduate studies by the end of the first week of classes of the student's next-to-last semester (e.g., fall semester for May graduates). The examination committee should consist of three faculty members, at least two of whom are in the Department of Evolutionary Anthropology.

Evolutionary Anthropology (BS)

Program Code: U-EVANT-BS

Degree Designation: Bachelor of Science

Department: Evolutionary Anthropology

Website: evolutionaryanthropology.duke.edu/undergraduate/degree-programs/major

Program Summary

Evolutionary Anthropology is an interdisciplinary department centering on the origin and evolution of human beings and their close biological relatives. The department and its course offerings cover a variety of research areas including primate behavior, ecology, cognition, and genetics; primate and human disease ecology; human genetics, energetics, and physiology; paleoanthropology; and functional and comparative anatomy. Additional research opportunities can be found at the Duke Lemur Center and the Lemur Center's Museum of Natural History.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 15 units total to complete the major. At least 34 units total to earn a degree.

- **Corequisites (6 units)**
 - Biology: BIOLOGY 201L and 202L, or BIOLOGY 203L
 - Chemistry I: CHEM 21, or CHEM 101DL, or CHEM 110DL
 - Chemistry II: CHEM 201DL
 - Math: MATH 21, or MATH 22, or MATH 105L and 106L, or MATH 111L
 - Physics: PHYSICS 25, or PHYSICS 26, or PHYSICS 121L, or PHYSICS 141L
 - Statistics: PSY 204L and 205L, or STA 20, or any 100-level STA course
- **Introduction to Evolutionary Anthropology (1 unit)**
 - EVANTH 101, or EVANTH 101D
- **Evanth Elective Courses (5 units)**
 - Any 5 EVANTH courses 200-level and above
 - Must include at least 1 Anatomy and Paleoanthropology course
 - Must include at least 1 Behavior, Ecology & Cognition course
 - Must include at least 1 lab/field experience course
 - Must include at least 1 EVANTH capstone course 400-level and above
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Additional Electives (3 units)**
 - Any 3 EVANTH courses 200-level and above
 - A list of preapproved electives in related departments is available to students in the degree audit system.

Areas of Concentration

Students may elect to complete courses representing an in-depth study of a given area within evolutionary anthropology. There are currently three area concentrations available: 1) anatomy and paleoanthropology; 2) behavior, ecology, and cognition; and 3) human biology. Concentrations require that three of the five courses in evolutionary anthropology (as required by the major) be taken in the area of concentration. Preapproved courses for each area can be found in the Handbook for Majors.

Departmental Graduation with Distinction

To qualify for the Graduation with Distinction program, students must have a GPA of 3.0 overall and 3.5 within evolutionary anthropology. To earn the distinction, students typically spend one year conducting independent research with a faculty mentor and writing a substantial senior thesis. Students must be enrolled in an independent study course within evolutionary anthropology. Exceptions must be approved by the director of undergraduate studies. Students must submit a brief (one- to two-paragraph) description of the honors project, the names of the faculty comprising the examination committee, and the signature of the student's faculty mentor to the director of undergraduate studies by the end of the first week of classes of the student's next-to-last semester (e.g., fall semester for May graduates). The examination committee should consist of three faculty members, at least two of whom are in the Department of Evolutionary Anthropology.

French Studies (AB)

Program Code: U-FREN-AB

Degree Designation: Bachelor of Arts

Department: Romance Studies Department

Website: romancestudies.duke.edu/undergraduate/majors/french-francophone-studies

Program Summary

Students majoring in French will acquire a considerable degree of competence in the written and spoken language as well as knowledge of the literature and culture of France and the French-speaking world.

The department offers a wide array of courses in language, literature, and culture, and strongly encourages interdisciplinary work in French through courses emphasizing the relation between literature, the arts, history, and society. A major in French is an excellent portal to a variety of careers in the humanities, the economic world, government, and science, and to a lifetime of global awareness and cultural reflection. An honors thesis option is available, including the possibility for theses interweaving two fields for students pursuing double or second majors. Students interested in majoring in French should consult the director of undergraduate studies.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **French Courses (10 units)**
 - Must include at least 8 courses 300-level and above taught in French (FRENCH 203 and FRENCH 204 may also count)
 - Must include at least 3 FRENCH courses 400-level and above
 - May include up to 2 ROMST or non-departmental courses with French-related content

Study abroad information. Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Department-Administered Programs
 - Duke in France: All courses may be counted toward the major, as long as the courses are approved by the Director of Undergraduate Studies. Courses may cover a variety of topics related to Francophone or Romance Studies. Courses with unrelated content, such as biology or math taught in French, will not be granted.
- Duke-Administered Summer Programs
 - Duke in Aix-en-Provence: French 212A counts as two courses toward the major.
 - Duke in Paris: Two courses may be counted toward the major.
 - Duke in Provence: One course may be counted.
- Non-Duke-Administered Semester Programs: A maximum of two courses per semester may be counted toward the major.
- Non-Duke-Administered Summer Programs: One course may be counted toward the core-course requirement.

Departmental Graduation with Distinction

Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further information may be obtained from the director of undergraduate studies or the assistant to the director.

Gender, Sexuality, and Feminist Studies (AB)

Program Code: U-GSF-AB

Degree Designation: Bachelor of Arts

Department: Gender, Sexuality, and Feminist Studies

Website: gendersexualityfeminist.duke.edu/undergraduate/major-minors-requirements

Program Summary

The Department of Gender, Sexuality, and Feminist Studies at Duke University is part of a historical educational enterprise dedicated to the study of identity as a complex social phenomenon.

Since its founding in 1983, the endeavor, whose name has changed as ideas in the field have changed, has continuously explored new research that considers gender and sexuality in relation to race, class, nation, and other axes of difference or inequality. In the classrooms as in our research, we reach across knowledge divisions between historical, political, economic, cultural, representational, technological, and scientific analysis to offer students innovative methods and theories that broaden the reach of their studies and their understanding of everyday life and the world.

Gender, Sexuality, and Feminist Studies (GSF) examines gendered and sexual identities, relations, practices, dynamics and institutions on multiple scales. Our approach is interdisciplinary, intersectional, and transnational. Specifically, the courses and training we offer help students employ a variety of research and reading methodologies drawn from traditional disciplines and the now expansive archives of feminist and sexuality scholarship; examine gender and sexuality in relation to other systems of hierarchy; and are not limited to the study of gender and sexuality in the US. A key part of Gender, Sexuality and Feminist Studies involves teaching students to connect personal experiences with the social systems that produce and shape them, while being intellectually sensitive to historical, cultural, political, and geographic settings. Our courses and assignments prioritize expansion of students' critical reading and thinking skills, participation capacities, and writing and creative abilities. The department is particularly known for training students in feminist theory across the curriculum and through many events that include invited guests. In addition, we host a Feminist Connections social event each term for undergraduates and faculty to interact.

For additional information on the department, visit the website at gendersexualityfeminist.duke.edu.

Go to [Programs by Department](#) to view all related programs.

Advising

Upon declaring the Gender, Sexuality & Feminist Studies major, a student will be asked their [GSF primary faculty](#) advisor preference, if any, and will be assigned that advisor if other considerations allow. The Assistant to the Director of Undergraduate Studies will introduce the student and faculty advisor to each other in an email. *All GSF majors must complete and regularly update the major form with the assistance of their GSF faculty advisor before they are cleared for registration each term.* For additional information, visit the GSF advising webpage: gendersexualityfeminist.duke.edu/undergraduate/current-students/advising.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - GSF 299S
 - GSF 499S
- **GSF-Housed Courses (5 units)**
 - Must include at least 1 GSF course numbered 100-199
 - Must include at least 1 GSF course numbered 200-298
 - Must include at least 3 GSF courses 300-level and above
- **Electives (3 units)**
 - Any 3 GSF courses
 - May include 1 Constellations course, a FOCUS course, or a First Year Seminar

See the GSF webpage for other information, including the required GSF major form: gendersexualityfeminist.duke.edu/undergraduate/major-minors-requirements.

Student-Originated IDMs with GSF. In addition to meeting Trinity College requirements for an [Interdepartmental Major](#) (Program I), GSF IDM students are required to complete GSF 299S (Feminist Theory), GSF 499S (Senior Seminar), and a minimum of 3 additional [GSF-Housed](#) courses numbered 300 or higher; the remaining 2 of 7 total courses in GSF are to be completed from among GSF-Housed or [Cross-listed](#) courses numbered 200 or higher.

Students may apply to count toward the GSF portion of the IDM *up to one transfer or study abroad* course by submitting the full syllabus to the Director of Undergraduate Studies, who will evaluate it against GSF course criteria; may apply to count toward elective credit in the GSF portion of the IDM a course offered in another department by submitting the syllabus, which will be evaluated against GSF course criteria; and **must complete a GSF IDM major form** (contact the Assistant to the DUS for the form) *and* update it with the GSF faculty advisor **every term** during the pre-registration period.

Departmental Graduation with Distinction

Graduation with Distinction is a term that accords recognition to students who have excelled in Gender, Sexuality and Feminist Studies coursework and a completed GSF thesis project developed over the final year and a half of study. Pursuing Graduation with Distinction in GSF is separate from graduating with Latin Honors from Duke University. GSF majors pursue Graduation with Distinction because writing a thesis project offers an opportunity to individually study in depth a topic that a student began to explore in earlier [GSF-housed](#) coursework and to develop a mentoring relationship with faculty members who supervise and guide the student.

Declared GSF majors interested in pursuing an intensive research project under the guidance of GSF faculty are encouraged to enroll in relevant [GSF-housed courses](#) and contact [potential supervising faculty members](#) for an honors project between spring of sophomore year and spring of junior year. GSF majors apply to the [honors program](#) in spring of junior year.

A GSF major pursuing Graduation with Distinction is expected to complete the 10-course major from the array of [GSF-housed](#) and [GSF cross-listed](#) courses, or petitioned transfer, Duke, and study away courses that meet department criteria. They are in addition expected to complete two Honors Independent Study courses in fall and spring of senior year ([GSF 493](#) and [GSF 494](#)). A declared major on track to complete major requirements and under advisement of a GSF faculty advisor who has extenuating circumstances may be allowed to count one GSF Honors Independent Study course toward the 10-course major requirements with permission of the DUS. For detailed expectations and schedule, visit the GSF honors webpage: gendersexualityfeminist.duke.edu/undergraduate/current-students/graduation-distinction.

German (AB)

Program Code: U-GER-AB

Degree Designation: Bachelor of Arts

Department: German Studies

Website: german.duke.edu/undergraduate/major-minor

Program Summary

Students majoring in German develop language skills, become knowledgeable about the literature and culture of German-speaking areas, and acquire analytic and interpretive abilities. The combination of language skills with the ability to navigate across cultures is excellent preparation for a variety of professions in business, government, engineering, law, education, and academia. Double (second) majors are also encouraged and supported. Numerous opportunities are available, including Global Education programs, interdepartmental majors, Fulbright and German Academic Exchange Service (DAAD) scholarships, independent research and independent studies, and internships, both before and after graduation. Students interested in a major should consult the director of undergraduate studies.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **German Courses (9 units)**
 - Any 9 GERMAN courses 200-level and above
 - Must include at least 8 courses taught in German
 - Must include at least 1 GERMAN course 320-level and above taught at Duke
 - Must include at least 1 GERMAN course 400-level and above taught at Duke
- **Advanced German Course (1 unit)**
 - GERMAN 305S
 - GERMAN 306S
 - GERMAN 303AS
 - GERMAN 312AS
 - GERMAN 319AS

All Duke in Berlin courses taught in German at the 200-level and above, semester and summer, may count toward the major as courses taught in German.

Departmental Graduation with Distinction

Qualified students (see the section on honors in this bulletin) may apply or be invited to apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Further information may be obtained from the director of undergraduate studies.

Global Culture & Theory in the Literature Program (AB)

Program Code: U-LIT-AB

Degree Designation: Bachelor of Arts

Department: The Program in Literature

Website: literature.duke.edu/undergraduate/major

Program Summary

The Literature Program's major and minor in Global Culture & Theory draws broadly on the resources of the humanities to address the ethical, cultural, social, and political complexities of events that take place in our world. Our courses study literature, film, media and the arts to do so.

As the hub of interdisciplinary humanities, the Global Culture & Theory major offers students the opportunity to engage comprehensively with areas of inquiry normally separated by disciplinary forms. Whether the focus is on Fascist culture or Virginia Woolf, digital architecture or recent geopolitical upheavals in the Middle East, the major is concerned with deepening our understanding of the events that have shaped and continue to shape our lives. Given the rapid acceleration in the production of culture, and the apparently seamless transposition of culture into capital, our major is committed to the idea that the humanities may be the only place where broad and non-instrumental examination of the scope and nature of cultural change not only remains possible but continues to be actively encouraged.

Global Culture & Theory major thus explores the range of humanistic inquiry, including critical theory, literary studies, race and gender studies and queer theory, philosophy, political theory, visual culture, film, new media and sound studies. It is committed to the notion that the humanities produce a distinct kind of positive knowledge, one different from the sciences. The broad scope of our program provides students with the knowledge base and the analytical skills needed to make choices as responsible global citizens.

To that end, we offer courses that deal with important conceptual discussions in theory, philosophy, psychoanalysis, neuroscience, film, media, literature and Artificial Intelligence and offer seminars that give students an in-depth look into the work of individual thinkers and writers such as Simone de Beauvoir, Sigmund Freud, Jacques Lacan, Theodor Adorno, Walter Benjamin, Michel Foucault, Karl Marx, and Roland Barthes. The courses we offer also concern contemporary social movements, (such as Black Lives Matter, the Umbrella Movement and #YoSoy123), and delve into questions of Latin American and Caribbean identity. They engage in the study of a range of international cinemas and Hollywood classics, such as the works of Alfred Hitchcock.

Our core faculty work comparatively in and across different cultural contexts, diverse geographical and geopolitical locations, and distinct media forms to offer courses in nine general areas:

- critical and social theory and the history of philosophy

- modern literature and contemporary theories and philosophies of language and literature
- visual culture, global cinema and film theory
- media studies, internet culture and artificial intelligence in the digital age
- sound, music and jazz studies
- political and decolonial theory, Marxism, poststructuralism, and postcolonial studies
- psychoanalysis, science studies, cognitive neuroscience, and the history of psychiatry
- comparative race studies in a transnational frame
- feminism, gender, queer and trans-theory, and sexuality studies.

Global Culture & Theory in the Literature Program also offers a film and media concentration, providing students the opportunity to pursue a flexible curriculum in Global Culture & Theory with a focus on film and media issues. The film and media concentration is intended to work together with Duke's Cinematic Arts program.

Our majors are active thinkers. The student-run *Society for Modern Thought* and literary journal *OTHER* provide extracurricular opportunities for collaborative work beyond the classroom, allowing students to expand and apply the skills they learn as Literature majors to creative and practical endeavors.

Our graduates have gone on to careers in law, medicine, information technology, public policy, teaching, academic administration, journalism, publishing, and the creative cultural industries. Many have advanced to top graduate programs in the humanities, arts, and social sciences.

For more information, visit literature.duke.edu.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - LIT 201
 - LIT 301S
- **Core Courses (4 units)**
 - Any 4 courses taught by instructors with primary, secondary, or joint appointments in Literature
 - A comprehensive list of courses is available to students in the degree audit system.
- **Elective Courses (3 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Senior Culminating Experience (1 unit)**
 - LIT 393
 - Any graduate-level LIT course
 - Completion of honors thesis track (LIT 495 and LIT 496 and panel defense)

Concentration in Film and Media

In addition to the required courses and senior culminating experience, students must complete the following:

- LIT 316, or LIT 317
- 3 courses focusing on the study of film and/or media taught by instructors with primary, secondary, or joint appointments in Literature
- 3 courses from humanities fields, with DUS review and approval
- 6 additional courses: at least 3 must focus on the study of film and/or media and must be taught by instructors who have primary, secondary, or joint appointments in *The Program in Literature**. 3 electives from humanities fields, with DUS review and approval.

All courses must have a letter grade to count toward any major/minor requirements in Global Culture & Theory.

Departmental Graduation with Distinction

To receive Graduation with Distinction students must satisfy university GPA requirements and submit an application by the beginning of the spring semester of their junior year. They must have a minimum overall GPA of 3.0, a GPA of 3.5 in the major, and an honors thesis grade of B+ or above. Students accepted into the distinction program must take the honors seminar sequence (LIT 495 and 496). A final grade will be issued at the end of the spring term. (A grade of "Z" will be issued at the end of the fall term.) Students must write an honors thesis (60 pages minimum) and submit it by the official submission date noted on a written and signed departmental agreement. Students will defend the thesis before a three-member committee consisting of the thesis advisor, the director of undergraduate studies, and a third reader chosen from among the members of the literature faculty and affiliated faculty. The committee determines the grade for the thesis, which becomes the grade of the honors seminar sequence. The two honors seminars do not count toward the ten literature courses required for the major.

Global Health (AB2)

Program Code: U-GLHL-AB2

Plan Type: Second Major

Department: Global Health

Website: globalhealth.duke.edu/programs/undergraduate-programs

Program Summary

Global health is an area of study, research, and practice that emphasizes improving health outcomes and reducing health disparities for people across the world. It draws on a wide range of disciplines, integrates population-based strategies and individual-level clinical care, fosters interdisciplinary collaboration, and addresses transnational health issues and their underlying determinants. The Program in Global Health engages knowledge from the sciences, social sciences, and humanities to best address the complexity of global health challenges.

The mission of the global health major is to educate the next generation of scholars and leaders whose work will advance health and reduce health inequities worldwide. The major prepares students to tackle global health challenges through both disciplinary and interdisciplinary approaches. Offered exclusively as a co-major, the global health major must be completed alongside another undergraduate major at Duke. It includes six components—core, foundations, statistics, electives, experiential learning, and a senior seminar. Students are required to complete eleven courses and fulfill an experiential learning requirement, in addition to the requirements of their co-major, as detailed below.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (3 units)**
 - GLHLTH 101
 - GLHLTH 371
 - GLHLTH 499
- **Ethics Course (1 unit)**
 - GLHLTH 210
 - GLHLTH 373
 - GLHLTH 341
 - GLHLTH 241
 - GLHLTH 345
- **Statistics Course (1 unit)**
 - Any STA course, or BIOLOGY 304, or BME 244L, or ECON 208D, or MATH 230, or PSY 204L and 205L, or SOCIOL 333
- **Foundations Courses (3 units)**
 - 1 course from 3 of the following 4 foundation domains. See globalhealth.duke.edu for eligible courses.
 - Arts and Humanities in Global Health
 - Global Health Systems and Policy
 - Natural Science in Global Health
 - Social Sciences in Global Health
- **Electives (3 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Experiential Learning Activity**
 - See globalhealth.duke.edu for more details on requirements and eligible experiences.

Graduation with Distinction

The Graduation with Distinction program recognizes students who successfully complete a substantive written project evaluated by a committee of three faculty members. Students majoring in global health may pursue the following tracks leading to Graduation with Distinction:

- Graduation with distinction in global health
- Graduation with distinction in global health and the non-global health major through a double honors thesis
- Graduation with distinction in the non-global health major

Students interested in graduating with distinction in global health may pursue a double honors thesis to integrate what they have learned in the two majors. Students must complete their thesis under the mentorship of a Duke Global Health Institute (DGHI) core faculty member who has experience guiding undergraduate student research. Students who meet the eligibility requirements must submit an application form by the last day of Drop/Add of the fall semester of their senior year.

History (AB)

Program Code: U-HIST-AB

Degree Designation: Bachelor of Arts

Department: History Department

Website: history.duke.edu/undergraduate/major

Program Summary

History offers all students within the university an opportunity to investigate the past, gain perspective on the present, and improve their critical faculties. There are three broad objectives for those who major in history as a discipline. First, it offers students broad exposure to the histories of our own and other societies, to the recent and the more distant past, and to the variety of approaches to the study of history. Second, it allows the in-depth study of the history of a particular time and place or a particular type of history. Breadth of knowledge is achieved through the distribution requirements for coursework across geographic areas and in pre-modern as well as modern history. Depth is achieved through the requirement that students identify a concentration. Third, it develops the skills of historical thinking necessary for better understanding our own and other human societies and teaches majors to gather and interpret evidence and how to fashion and compellingly convey arguments grounded in that evidence.

Taken as a whole our curriculum will prepare majors to:

- **Understand history as a discipline.** This involves developing knowledge within a chosen area of concentration, realizing that historical interpretations change over time, and seeing the ways in which historians find layered, complex causes and connections in human affairs.
- **Build critical and analytic skills.** This involves learning to define research questions and to frame them as part of ongoing scholarly conversations. You will also learn to establish what contexts matter in answering those research questions, how to find a variety of relevant evidence – from speeches to visual materials to court records and beyond – and how to analyze it effectively to help refine and answer the questions posed.
- **Enhance their skills in written and oral communication.** This involves communicating and writing with clarity and cogency and understanding that, in History, content (what something says) cannot be separated from form (how it is said).

Our curriculum is structured around an area of thematic concentration and book-ended by two hands-on seminars: a Gateway Seminar that introduces students to the fundamentals of historical research and analysis, and a Capstone Seminar that gives students the opportunity to demonstrate what they have learned in their time as a History major.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Gateway Seminar (1 unit)**
 - A comprehensive list of gateway seminar courses is available to students in the degree audit system.
- **Pre-Modern Courses (2 units)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Geographic Areas (3 units)**
 - At least 1 course from any 3 of the following geographic areas:
 - Africa & Middle East
 - Asia
 - Europe & Russia
 - Global Comparative
 - Latin American Caribbean
 - United States & Canada
 - A comprehensive list of courses is available to students in the degree audit system.
- **Primary Concentration (4 units)**
 - At least 4 courses from any 1 of the following concentrations:
 - Africa and Middle East
 - Asia
 - Business and Economic Cultures
 - Emotions & The Psychology of Self
 - Europe and Russia
 - Global and Comparative
 - Human Rights and Social Movements
 - Latin America and Caribbean
 - Law and Governance
 - Medicine, Science & Technology
 - Race and Ethnicity

- United States and Canada
- War, Military, and Society
- Women, Gender, and Sexuality
- A comprehensive list of courses is available to students in the degree audit system.
- **Capstone (1 unit)**
 - A comprehensive list of capstone courses is available to students in the degree audit system.

Courses can fulfill two or more requirements. The ten courses may include up to three courses cross-listed as history courses regardless of the department through which the student enrolls; the remaining seven must be “core courses” [as identified on the departmental website](#).

Advanced Placement (AP) and International Baccalaureate (IB) courses do not count as one of the ten required courses for the history major. One History course taken abroad or at another college may be counted towards the major if approved by the DUS.

Honors Thesis and Graduation with Distinction

Students pursuing distinction normally apply for a year-long senior honors seminar (HISTORY 495S/496S) in March of the junior year. In special circumstances, students may also prepare a thesis outside this sequence. Either way, most students begin their thesis research during the summer before the senior year, and all students pursuing distinction work closely with a faculty thesis advisor, usually through an independent study each semester.

Thesis writers are expected to produce a well-written research essay substantially engaged with primary sources and engaged with ongoing historiographic conversations. Most theses run 80-120 pages.

Upon its completion, the thesis will be evaluated by a committee of at least three faculty to determine the honors level of the thesis: Distinction, High Distinction, or Highest Distinction. The department also recognizes senior theses with two prizes: the William T. Laprade Prize for most outstanding thesis, and the Raymond Gavins prize, awarded to an outstanding thesis in African-American history, the history of Civil Rights movements, and/or the history of the US South. Both prizes are accompanied by a \$250 cash award.

Students will also have the opportunity to archive their thesis work in the Duke University Library.

Interdisciplinary Program in Engineering (IDEAS) (BSE)

Program Code: U-IDC-BSE

Degree Designation: Bachelor of Science in Engineering

Department: Pratt School of Engineering

Website: pratt.duke.edu/undergrad/students/policies/3512

Program Summary

Through IDEAS: Interdisciplinary Engineering & Applied Science, undergraduates propose their own curricula, or use approved curricula, to create specialized major for a Bachelor of Science in Engineering (BSE) degree.

To participate, engineering students (in consultation with an independent study advisor and appropriate faculty members) propose unique combinations of courses designed to meet their career objectives.

To guide students while creating their proposals, a [General Curriculum template](#) and three [Approved Curricula templates](#) can be found on the IDEAS website.

IDEAS curricula are *not* specifically accredited by the Engineering Accreditation Commission of ABET, but do satisfy the national general engineering [accreditation criteria](#).

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

Students must submit proposals to the Engineering Faculty Council, through Pratt's Associate Dean for Undergraduate Education, for approval. A proposal may be submitted as early as the second semester of the first year, but must be submitted before the junior year.

Minimum Requirements

Although not individually accredited, these programs satisfy the national general engineering accreditation criteria. At the Pratt School of Engineering, the term "national general engineering accreditation criteria" corresponds to 34 courses:

- **Writing 120**
- **9 Courses in Mathematics and the Natural Sciences**
 - At least one (1) Physics Course must be taken post-matriculation
 - Engineering Track Course prerequisites may satisfy Natural Science requirements
- **13 Courses in Engineering**
 - EGR 101L Engineering Design & Communication
 - EGR 105L Computing for Engineers
 - Students with Advanced Placement (AP) credit in Computer Science may substitute COMPSCI 201

- 4 Engineering Track Core Courses
- 3 Engineering Track Electives
 - 5 or more Track Core and Track Electives must be at or above 300 level
 - 3 or more Track Core and Track Electives must be at or above 400 level
- 2 Engineering Science Electives
- 2 Independent Study, Capstone Design, or Equivalent Courses comprising a Culminating Engineering Design Experience (see national general engineering [accreditation criteria](#)).
- **1 Open Track Elective**
 - Not necessarily an engineering course
- **5 Liberal Arts Courses**
 - Must take five courses that each carry at least one code of CE, HI, IJ, SB, or LG and that do not otherwise count towards the requirements of the major.
 - Must cumulatively cover at least 4 of 5 codes: CE, HI, IJ, SB, LG
 - Must be satisfied by taking courses post-matriculation.
 - Must be taken on a graded basis, unless the course is only offered on a mandatory Satisfactory/Unsatisfactory grading basis. For courses only offered on an S/U grading basis, up to two such S/U-only courses may contribute (course and/or code) to the Liberal Arts requirement.
- **5 or More Free Electives**
 - AP credit may not be applied toward free elective courses

Curricula and Templates

While it is not required, students may use—and are strongly encouraged to use—the [Approved Curricula](#) and templates provided on the IDEAS site.

International Comparative Studies (AB)

Program Code: U-ICS-AB

Degree Designation: Bachelor of Arts

Department: International Comparative Studies

Website: internationalcomparative.duke.edu/academics

Program Summary

The International Comparative Studies Program offers a bachelor of arts degree to students interested in an interdisciplinary individualized major focused on global and transnational studies. The ICS Program mission is to prepare lifelong learners who can live, work, and engage with people and problems in a complex, diverse, and interconnected world. ICS majors gain knowledge in the culture(s), history, politics, and language of one geographic region of the world through region-focused and language coursework. This multidimensional study of a particular part of the world is complemented by coursework with global breadth. Well over 75 percent of ICS majors complete some of their coursework in study away programs. Core courses, individualized advising, and research mentoring encourage ICS students to formulate and address questions through a combination of disciplinary approaches.

The most up-to-date listings of approved global, regional, and research methods courses is available on the ICS website at internationalcomparative.duke.edu/courses.

The ICS major is divided into five course categories: (1) Core courses are taught by ICS faculty members and include the required gateway course (taken in first or second year), the required capstone seminar (taken in senior year), and the selective two-semester senior year honors thesis sequence. (2) Region courses focus on a particular geographic area of the world. (3) Global courses focus on global and transnational studies. (4) ICS language requirement courses build expertise in a language related to a student's region focus. (Note: the ICS language requirement is distinct from Trinity College's foreign language requirement, and in some cases may not be fulfilled exclusively by the courses ICS students take for the major.) (5) Research Methods courses teach key ways of constructing knowledge in the humanities and social sciences, ethical and political issues in research design, and ways of co-designing, presenting, and sharing research with different communities.

Grants and Awards

Duke students who are not graduating seniors are eligible to apply for research funding provided by several units on campus. For more information, visit the Undergraduate Research Support Office website at undergraduateresearch.duke.edu. In addition, rising seniors accepted into the ICS Distinction Program may apply for a summer travel grant to advance language learning and/or to conduct field research, funded by the Scott Lee Stephenson Memorial Fund. The author of an exceptional distinction project is recognized with the ICS Distinguished Thesis Award. Additionally, up to four Capstone Research (Book) Prizes are awarded to seniors who produce superb research in an ICS capstone seminar.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Core (2 units)**
 - ICS 195

- ICS 489S (ICS 495S may also count for students participating in the Honors program)
- **Region Courses (4 units)**
 - At least 4 courses from any one region: Africa, China and East Asia, Europe, Latin America and the Caribbean, Middle East, Russia and Central Asia, South Asia
 - A comprehensive list of courses is available to students in the degree audit system.
- **Global Courses (4 units)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Language Courses (4 units)**
 - At least 4 courses from one non-English language used by a group in part or all of the geographic region concentration
 - May substitute 1 research methods course for a language course

Further information can be found at internationalcomparative.duke.edu/academics/requirements.

Graduation with Distinction in ICS

ICS offers a two-semester seminar sequence to support ICS majors wishing to graduate with distinction in the major. Students complete this work in our honors program via a two-semester seminar sequence (International Comparative Studies 495S and International Comparative Studies 496S), taken fall and spring of senior year. Each student chooses a qualified Duke faculty member to serve as a research supervisor. Each student is also guided by the seminar instructor and a graduate student writing “coach” through a multi-stage writing process. Under most circumstances, the product is a completed thesis of seventy to one hundred pages on a topic relevant to ICS’s focus in global and transnational studies. Students may work in, with, and through different mediums, but all are required to complete a research-based and interdisciplinary piece of writing and to submit the final project in electronic form. Further details on the application process, including specific deadlines, are available on the ICS website.

Successful completion of International Comparative Studies 495S in fall term fulfills the major requirement for International Comparative Studies 489S, the senior capstone course. Students must complete eleven non-Foreign Language courses to graduate with distinction in the major instead of the standard ten. A student who has completed and done satisfactory work in ICS 495, but whose thesis is not completed or is denied distinction will receive graded credit for coursework.

Further details on deadlines, schedules, and expectations for Graduation with Distinction in ICS are available on the ICS website at internationalcomparative.duke.edu/academics/honors

Italian Studies (AB)

Program Code: U-ITAL-AB

Degree Designation: Bachelor of Arts

Department: Romance Studies Department

Website: romancestudies.duke.edu/undergraduate/majors/italian-studies

Program Summary

The Italian studies major offers two concentrations: Italian studies and Italian and European studies.

Students majoring in Italian develop language skills in their social and cultural contexts. The combination of linguistic and cultural competency is excellent preparation for a variety of professional careers in business, government, the humanities, and science. Double (second) majors are encouraged and supported. Numerous opportunities are available, including programs of study abroad, work study, interdisciplinary programs, and Fulbright. Students interested in majoring in Italian should consult the director of undergraduate studies.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Italian and European Studies Concentration Option (10 units)**
 - Must include at least 8 courses 300-level and above
 - Must include at least 5 courses taught in Italian, or taken concurrently with an Italian preceptorial or tutorial
 - Must include 1 course each from at least 2 of the following areas: Medieval, Renaissance, Modern/Contemporary, Linguistics
 - A comprehensive list of courses is available to students in the degree audit system.
 - May include up to 5 related courses on any Italian and/or European topic may be taken in or outside the department and not in the language of the major
- **Italian Studies Concentration Option (10 units)**
 - Must include at least 8 courses 300-level and above
 - Must include at least 6 courses taught in Italian, or taken concurrently with an Italian preceptorial or tutorial
 - Must include 1 course each from at least 2 of the following areas: Medieval, Renaissance, Modern/Contemporary, Linguistics
 - A comprehensive list of courses is available to students in the degree audit system.

- May include up to 4 courses focused on Italian content taught in English, such as courses in Romance Studies or cross-listed course offered by other departments or programs

Study abroad information. Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Department-Administered Programs
 - In English (Duke in Florence & Duke in Venice): A maximum of three courses per semester may be counted as related courses.
- Duke-Administered Summer Programs
 - In the language (Duke in Bologna): Two courses may be counted toward the core-course requirement.
 - In English (Duke in Venice): One course may be counted toward the core-course requirement.
- Non-Duke-Administered Semester Programs in Italy
 - All courses taught entirely in Italian: A maximum of two courses per semester may count toward the core-course requirement and a maximum of one may count as a related course.
 - Not all courses taught in Italian: A maximum of two courses per semester may count toward the core-course requirement.
- Non-Duke-Administered Summer Programs
 - Courses taught in Italian: One course may be counted toward the core-course requirement.

Departmental Graduation with Distinction

Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further information may be obtained from the director of undergraduate studies or the assistant to the director.

Linguistics (AB)

Program Code: U-LING-AB

Degree Designation: Bachelor of Arts

Department: Linguistics Department

Website: linguisticsprogram.duke.edu/major

Program Summary

From the earliest philosophers to modern neuroscientists, researchers from a wide range of disciplines have explored a diverse range of issues concerning the human capacity for language and the diversity of the world's languages. Linguists work at the intersection of these issues and define linguistics as the science of language and languages. During the past 150 years, linguists have developed a variety of theoretical paradigms to describe and explain language history, dialect variation, cross-cultural similarities and differences, the neurological processing and production of language, and the evolutionary emergence of language.

The linguistics major at Duke is unusual in its range of theoretical approaches coupled to the study of languages of the world. The required courses for the major stress empirical methods and the global database; the theory courses expose the student to the perspectives offered by historical and comparative linguistics, structural linguistics, generative linguistics, sociolinguistics, semiotics, discourse analysis, philosophy, cognitive linguistics, and psycholinguistics. The major maintains the traditional and mainstream body of linguistic inquiry and, at the same time, encourages exploration of the most recent developments in language study that issue from cultural and literary theory and the biological sciences.

The major is composed of ten courses, eight of which must be at the 200 level or above. The courses combine empirical methods with theory. They are devised to provide depth and breadth in linguistic theory, the different schools of linguistics, the history and development of linguistic thought, and the interdisciplinary aspects of linguistics in the context of languages and cultures. Majors must take Linguistics 201 and 202, which define the fundamental questions of linguistic theory in the context of the world's languages; and in the junior or senior year the capstone course Linguistics 450S, which adds cohesion to the major. For depth, the student is required to take three courses from the list of theory courses, which provide the necessary theoretical and empirical constructs for the study of linguistics. In addition, two courses are required in one of the concentrations in a specific area of linguistics. All majors are required to take at least two foreign language courses at or above the 300 level. Students may petition to add courses to the list of courses that count toward the theory and disciplinary areas below (II and III).

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Intro Courses (2 units)**
 - LINGUIST 202
 - LINGUIST 201, or LINGUIST 203

- **Capstone (1 unit)**
 - LINGUIST 450S
 - LINGUIST 595
- **Theory (3 units)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Language (2 units)**
 - 2 courses in a single language 300-level and above: Arabic, Chinese, French, German, Greek, Hebrew, Hindi, Italian, Japanese, Korean, Latin, Polish, Portuguese, Russian, Spanish
- **Disciplinary Area (2 units)**
 - 2 courses from any 1 of the following areas: Asian and Middle Eastern Studies, Computer Science, Cultural Anthropology, English, German, Italian, Neuroscience, Philosophy, Psychology, Romance Studies, Slavic and Eurasian Studies, Spanish

Departmental Graduation with Distinction

The linguistics program offers work leading to Graduation with Distinction. See the program chair.

Procedure for Selection of Students. An overall GPA of 3.3 and GPA of 3.5 in the major are required. The process for admission to the Graduation with Distinction program is initiated by the submission of a research proposal to a faculty advisor by the end of the second semester of the junior year.

Expected Product. The central requirement is an honors thesis prepared by the student under faculty supervision. The thesis generally consists of three to five chapters with an extensive bibliography.

Evaluation Procedure. Completion of the thesis, its evaluation, and its defense before a three-member faculty committee warrants Graduation with Distinction.

Levels of Distinction. The honors thesis committee will decide to grant distinction and at what level (Distinction, High Distinction, Highest Distinction) based on the quality of the completed work.

Special Courses Required. The program consists of two courses:

1. LINGUIST 493: Taken in the fall semester of the senior year, this course is devoted to development of the honors thesis and includes close supervision of the writing stage of the project by a faculty member selected by the student.
2. LINGUIST 450S or 595: Required for all linguistics majors.

Additional research independent study courses may be taken. Independent study courses are above and beyond the ten courses required for the major.

Linguistics and Computer Science, Interdepartmental (AB)

Program Code: U-ILGCS-AB

Degree Designation: Bachelor of Arts

Department: Computer Science Department, Linguistics Department

Website: cs.duke.edu/undergrad/idm/linguistics

Program Summary

In recent years, we have been witnessing exciting advances in the intersection of computing and linguistics, as well as growing interest in these disciplines among undergraduate students at Duke. We are happy to offer an inter-departmental major (IDM) that allows students to pursue their joint interests in Computer Science and Linguistics.

We expect student interests to be diverse, some interested more in computer science, while others may be more interested in theoretical linguistics, neurolinguistics, or sociolinguistics. There is no one-size-fit-all. The requirements below accommodate all of these interests. We have also annotated specific courses with their relevance to different tracks, and developed example semester-by-semester course plans for these tracks. Because of the rapid developments in the field, course offerings related to this IDM will likely continue to evolve in the coming years. We will continue to revise the course plan to reflect any such changes.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (3 units)**
 - Computer Science: COMPSCI 101L, or COMPSCI 103L, or COMPSCI 116
 - Math 1: MATH 21, or MATH 111L
 - Math 2: MATH 22, or MATH 112L, or any 100-level STA course
- **Required Courses (10 units)**
 - COMPSCI 201
 - COMPSCI 230

- COMPSCI 330, or COMPSCI 334
- COMPSCI 210D, or COMPSCI 250D, or COMPSCI 310, or COMPSCI 351
- COMPSCI 370D, or COMPSCI 371
- LINGUIST 201, or LINGUIST 203
- LINGUIST 202
- LINGUIST 305S, or LINGUIST 306S, or LINGUIST 337S, or LINGUIST 396S, or LINGUIST 409S, or LINGUIST 451, or LINGUIST 480S
- LINGUIST 216FS, or LINGUIST 216S, or LINGUIST 336S, or LINGUIST 473S, or LINGUIST 510, or LINGUIST 595
- LINGUIST 450S, or LINGUIST 595
- **Electives (4 units)**
 - Must include at least 2 COMPSCI courses 200-level and above
 - Must include at least 2 LINGUIST courses 200-level and above

Marine Science and Conservation (AB)

Program Code: U-MSC-AB

Degree Designation: Bachelor of Arts

Department: Marine Science & Conservation

Website: nicholas.duke.edu/academics/undergraduate-programs/marine-science-conservation

Program Summary

The Bachelor of Arts and Bachelor of Science degrees are offered with a major in Marine Science and Conservation, or in an individually designed interdepartmental concentration approved by the Director of Undergraduate Studies in Marine Science and Conservation. Information may be obtained in the office of the Director of Undergraduate Studies. These degree programs are offered through Duke University's Marine Laboratory in Beaufort, North Carolina. Course offerings are available in Durham and Beaufort. Full programmatic details are available on our [website](#).

The Marine Science and Conservation majors and minor are offered through the Division of Marine Science and Conservation in the Nicholas School of the Environment. The majority of the Division of Marine Science and Conservation faculty are resident at the Marine Laboratory in Beaufort, NC. Additional courses in marine science are offered in Biology and Global Health in the Trinity College of Arts and Sciences; in the Divisions of Environmental Science and Policy and Earth and Climate Science in the Nicholas School of the Environment; and in the Pratt School of Engineering.

The Duke University Marine Lab provides students with a unique experiential opportunity to live and study in Beaufort for a full academic semester (fall or spring) or during two summer terms. The program emphasizes small class sizes, independent research projects, and integrated classroom, laboratory, and field experiences. Students have daily access to the surrounding marine environment and to modern scientific equipment including a shared-use molecular laboratory, and the Marine Robotics and Remote Sensing (MARSS) Lab.

Residential undergraduate courses are offered year-round (fall, spring, and summer sessions I and II) at the Duke Marine Lab. Fall and spring course options include travel courses which offer students opportunities for extended travel with Duke faculty to locations which could include Australia, Belize, Canada, Puerto Rico or the US Virgin Islands. Small class size and an island setting facilitate rewarding student-faculty interactions.

This AB degree is designed to be a general liberal arts major, and targets students interested in studying social science, policy, and governance related to oceans.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Co-requisites (4 units)**
 - Complete any 3 of the following Sciences areas:
 - Chemistry I: CHEM 101DL, or CHEM 110DL
 - Chemistry II: CHEM 201DL, or CHEM 210DL
 - Biology: BIOLOGY 201L, or BIOLOGY 202L, or BIOLOGY 203L
 - Physics: PHYSICS 121L, or PHYSICS 151L, or PHYSICS 161D
 - Economics: ENVIRON 155, or ECON 101D & 201D, or PUBPOL 155D & 303D
 - Math and Statistics: MATH 111L & 112L, or MATH 222L, or STA 101L, or STA 102L, or STA 199L
- **Gateway (1 unit)**
 - MARSCI 201
- **Core (3 units)**
 - MARSCI 202
 - MARSCI 203
 - MARSCI 204A
- **Capstone (1 unit)**
 - MARSCI 350S

- Graduation with Distinction
- **Electives (5 units)**
 - Any 5 MARSCI courses numbered 205 and above

Graduation with Distinction in Marine Science and Conservation

The Marine Science and Conservation degree offers a Graduation with Distinction option. Interested students with a 3.0 grade point average overall and a 3.2 grade point average in the Marine Science and Conservation major should apply by the beginning of their senior year. The application should include a written request to the Director of Undergraduate Studies describing the research project and identifying the faculty advisor who has agreed to supervise the research. At least one research independent study is required as part of the Graduation with Distinction process, although more than one is encouraged. The student will write a thesis describing their research. The thesis will be evaluated by the faculty advisor. The student will also present their results to fellow students and faculty before the end of their final semester.

Marine Science and Conservation (BS)

Program Code: U-MSC-BS

Degree Designation: Bachelor of Science

Department: Marine Science & Conservation

Website: nicholas.duke.edu/academics/undergraduate-programs/marine-science-conservation

Program Summary

The Bachelor of Arts and Bachelor of Science degrees are offered with a major in Marine Science and Conservation, or in an individually designed interdepartmental concentration approved by the Director of Undergraduate Studies in Marine Science and Conservation. Information may be obtained in the office of the Director of Undergraduate Studies. These degree programs are offered through Duke University's Marine Laboratory in Beaufort, North Carolina. The student will write a thesis describing their research. The thesis will be evaluated by the faculty advisor. The student will also present their results to fellow students and faculty before the end of their final semester.

Mathematics (AB)

Program Code: U-MATH-AB

Degree Designation: Bachelor of Arts

Department: Mathematics Department

Website: math.duke.edu/undergraduate/major

Program Summary

The Department of Mathematics offers both the AB degree and the BS degree. Students who plan to attend graduate school in mathematics or the sciences should consider working toward the BS degree, which requires at least eight courses in mathematics numbered Mathematics 230 or above. The AB degree requires at least seven courses in mathematics numbered Mathematics 230 or above. At least half of the major/minor courses numbered above 212 should be taken at Duke. In particular, Mathematics 401 (or 501) and 431 (or 531) should be taken at Duke.

The director of undergraduate studies can be consulted for additional information and advice on course selection. The Handbook for Mathematics Majors and Minors, published by the department, can be used as a guide in developing a coherent program of study consistent with professional goals.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (4 units)**
 - Calculus I: MATH 21, or MATH 105L & 106L, or MATH 111L, or MATH 121
 - Calculus II: MATH 22, or MATH 112L, or MATH 122L
 - Multivariable Calculus: MATH 212, or MATH 219, or MATH 222
 - Linear Algebra: MATH 221, or MATH 218D & 240, 242, or 245
- **Algebra (1 unit)**
 - MATH 401
 - MATH 501
- **Real Analysis (1 unit)**
 - MATH 431
 - MATH 531
- **Additional Math Courses (5 units)**
 - Any 5 MATH courses numbered 226 and above
 - Must include at least 3 MATH courses 300-level and above

Departmental Graduation with Distinction

The department offers a program for Graduation with Distinction in mathematics. See the Handbook for Mathematics Majors and Minors and also the section on honors in this bulletin.

Mathematics (BS)

Program Code: U-MATH-BS

Degree Designation: Bachelor of Science

Department: Mathematics Department

Website: math.duke.edu/undergraduate/major

Program Summary

The Department of Mathematics offers both the AB degree and the BS degree. Students who plan to attend graduate school in mathematics or the sciences should consider working toward the BS degree, which requires at least eight courses in mathematics numbered Mathematics 230 or above. The AB degree requires at least seven courses in mathematics numbered Mathematics 230 or above. At least half of the major/minor courses numbered above 212 should be taken at Duke. In particular, Mathematics 401 (or 501) and 431 (or 531) should be taken at Duke.

The director of undergraduate studies can be consulted for additional information and advice on course selection. The Handbook for Mathematics Majors and Minors, published by the department, can be used as a guide in developing a coherent program of study consistent with professional goals.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (4 units)**
 - Calculus I: MATH 21, or MATH 105L & 106L, or MATH 111L, or MATH 121
 - Calculus II: MATH 22, or MATH 112L, or MATH 122L
 - Multivariable Calculus: MATH 212, or MATH 219, or MATH 222
 - Linear Algebra: MATH 221, or MATH 218D & 240, 242, or 245
- **Algebra (1 unit)**
 - MATH 401
 - MATH 501
- **Real Analysis (1 unit)**
 - MATH 431
 - MATH 531
- **Require course (1 unit)**
 - Any 1 course from the following: MATH 333, 342, 411, 412, 421, 502, 532, 541, 581
- **Additional Math Courses (5 units)**
 - Any 5 MATH courses numbered 226 and above
 - Must include at least 3 MATH courses 300-level and above
- **Science Courses (2 units)**
 - 2 courses from any 1 of the following areas:
 - Biology: BIOLOGY 201L & 202L, or BIOLOGY 203L & 215, or BIOLOGY 201L or 203L and 1 of: BIOLOGY 209, 329D, or 460
 - Chemistry: CHEM 201DL and 1 of: CHEM 21, 101DL, or 110DL
 - Computer Science: COMPSCI 330 and 1 of: COMPSCI 334 or 335
 - Economics: ECON 205D & 210D
 - Physics: 1 of: PHYSICS 25, 141L, 151L, or 161D, and 1 of: PHYSICS 26, 142L, 152L, 162D
 - Statistical Science: STA 210L & 360L

Departmental Graduation with Distinction

The department offers a program for Graduation with Distinction in mathematics. See the Handbook for Mathematics Majors and Minors and also the section on honors in this bulletin.

Mechanical Engineering (BSE)

Program Code: U-ME-BSE

Degree Designation: Bachelor of Science in Engineering

Department: Pratt School of Engineering, Mechanical Engineering & Materials Science Department

Website: mems.duke.edu/undergrad/degrees/planning

Program Summary

The mechanical engineering program is accredited by the Engineering Accreditation Commission of ABET.

Mechanical engineers are concerned with the optimum use of materials, energy, time, and individual effort to serve societal needs through the design of machines, structures, devices, and mechanical, thermal, and electro-dynamic systems, and through better understanding of dynamic processes involving these systems. They have a wide involvement in many industries including aerospace, automotive, energy and power generation, biomechanical and biomedical engineering, construction, electronics, manufacturing, national defense, and transportation systems. Within these industries, the engineer might specialize in the design, analysis, automation, operation, or marketing of systems or services. The individual's contribution may lie anywhere in the spectrum from highly theoretical to imminently practical, and often involves leadership as an engineering manager or organization executive.

Because mechanical engineers in industry and research engage in such a great variety of activities, their education must be broadly based. Our goal is to graduate mechanical engineers who embody excellence in a broad sense. We expect our graduates to move to industry positions or on to graduate study, or to carry the attributes of an engineering education into other disciplines. The mechanical engineering program of study must include mathematics and basic sciences, fundamentals and applications in several engineering sciences, and team-based experience in the process of design, where theory is applied in the context of real needs and limitations, and where judgment must be exercised. Our mechanical engineering graduates should be able to think critically when solving problems and managing tasks and communicate effectively in multidisciplinary professional environments. To be a responsible member of the engineering profession, each graduate must be aware of social, ethical, environmental, and economic factors and constraints on engineering activity, and must understand the importance of these matters in a global context. We aspire to have our graduates exhibit intellectual depth and creativity, uphold high ethical standards, and show a commitment to the betterment of society through service and professional work.

Our specific Program Educational Objectives are to prepare our graduates to:

- Identify and address significant needs and challenges in engineering and society, and effectively communicate solutions
- Advance in professional careers that may encompass a broad range of endeavors, both technical and non-technical
- Exhibit intellectual depth and creativity in employment, advanced education and research
- Uphold high ethical standards and show a commitment to the betterment of society through service and professional work

The curriculum capitalizes on the exceptional abilities of our highly select students to cultivate the learning, thinking, and problem-solving abilities needed to adapt, to develop, and to exercise responsible leadership through times of rapid change. The program provides firm preparation in the essential engineering topics while allowing wide flexibility for students to pursue their own specialized interests. The overall program requirements are summarized following the list of courses.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 34 units total to earn a BSE degree.

- **Natural Science Course (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Engineering Courses (4 units)**
 - EGR 121L
 - EGR 201L
 - EGR 224L (ECE 110L & 280L may also count)
 - EGR 244L
- **Mechanical Engineering Courses (8 units)**
 - ME 221L
 - ME 321L
 - ME 331L
 - ME 336L
 - ME 344L
 - ME 421L
 - ME 424L
 - ME 431L
- **Technical Electives (2 units)**
 - Any 2 ME courses 400-level and above (ME 391, 392, or 394 may also count)
- **General Electives (3 units)**
 - Any 3 courses
 - Must include at least 2 courses 200-level and above

The MEMS Undergraduate Program Handbook (available on the departmental website at mems.duke.edu/undergrad/degrees/planning) provides examples of course sequences that incorporate all general requirements and departmental requirements comprising the accredited mechanical engineering major. In addition, a downloadable MEMS Curriculum Flow Chart and MEMS Annotated Check Sheet are also available on the website, and provide precise summaries of the curriculum requirements and prerequisite structure.

Usually students intending to study abroad should plan to travel in the fall semester of their junior year. Typically these students are expected to take two courses abroad that are approved as equivalent to required mechanical engineering courses and/or mechanical engineering electives. Students should consult their advisor, the Office of Global Education, and the mechanical engineering and material science director of undergraduate studies.

Options for a certificate in aerospace engineering, a certificate in energy and the environment, a minor in energy engineering, a minor or second major in electrical and computer engineering, or a second major in biomedical engineering are described in the MEMS Undergraduate Program Handbook (available at mems.duke.edu/undergrad/degrees/planning). Mechanical engineering and material science adheres strictly to the Pratt major and minor requirements described in the front portion of this bulletin. Students interested in second majors and minors with departments in Trinity College should seek information from the department of interest.

Medieval and Renaissance Studies (AB)

Program Code: U-MDVL-AB

Degree Designation: Bachelor of Arts

Department: Medieval and Renaissance Studies Program

Website: cms.trinity.duke.edu/undergraduate/major-and-minor

Program Summary

The Program in Medieval and Renaissance Studies is designed to provide the student with a well-rounded understanding of the historical, cultural, and social forces that shaped the medieval and Renaissance periods. The program is divided into four areas of study: fine arts (art and music); history; language and literature (English, French, German, Greek, Italian, Latin, and Spanish); and philosophy and religion.

The major requires ten courses, two requirements and eight elective distribution courses taken in the following four areas of study: history; fine arts (art and music); language and literature (English, French, German, Greek, Italian, Latin, and Spanish); philosophy and religion.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - Participate in the Medieval and Renaissance Focus Program
 - Complete 2 courses that satisfy the [Medieval and Renaissance Cultures](#) requirement
- **Electives (8 units)**
 - Must be distributed across the following four areas of study ([Fine Arts](#), [History](#), [Language and Literature](#), [Religion and Philosophy](#)) in either of the following ways:
 - 3-3-2-0, or three courses in two of the four areas of study and two courses in a third area
 - 3-3-1-1, or three courses in two of the four areas of study and one course in each of the other two areas

Graduation with Distinction

Majors are encouraged to pursue honors work in an area of special interest.

Procedure for Selection of Students. The student should apply to the director of undergraduate studies or program coordinator during the junior year and must maintain a minimum GPA of 3.5 in the Medieval and Renaissance Studies major.

Expected Product. A written thesis based on at least one independent study (MEDREN 491, 493) with a Medieval and Renaissance studies faculty member who directs the thesis.

Evaluation Procedure. Evaluation by a committee of three Medieval and Renaissance Studies faculty members appointed by the director of undergraduate studies, one of whom must be the thesis director.

Levels of Distinction. Recommendation from the review committee for distinction, high distinction, and highest distinction based on the quality of the thesis and on performance in the major program.

Special Courses. The Medieval and Renaissance Studies independent study courses (MEDREN 491, 493) may count toward the major. The thesis may be written in conjunction with independent study work in either the junior or senior year.

Music (AB)

Program Code: U-MUS-AB

Degree Designation: Bachelor of Arts

Department: Music Department

Website: music.duke.edu/undergraduate/major

Program Summary

Music is among the most ancient of human pursuits and has long been viewed as a crucial part of education. As a discipline, it has its own logic and grammar in the understanding of which the mind is stretched and tested. Students at Duke encounter a variety of approaches to music that encompass the many ways that we create, perform, and comprehend it.

Courses fall into three broad categories: theory and composition; literature, history, and ethnomusicology; and applied music (performance). Within these are included many kinds of instruction, such as lessons in performance and composition; theory; history, and literature lectures and seminars; electronic music classes; ensembles; practical laboratory work (such as ear-training or Listening Lab), coaching sessions in chamber music; and classes in improvisation. Students' musical activity can vary widely across the spectrum. Almost every student has some personal involvement with music, and the courses aim to further that involvement, whether it is a simple hobby or a compelling interest.

The requirements present a balanced selection of courses in music theory, history, literature, and performance, and are a means of preparing graduates for further professional training in the art of music. The music major can also be an attractive pursuit for the well-rounded undergraduate planning a career in another field. A sequence of three courses seeks to develop the student's fluency in music theory and another four semesters offer a survey of Western music history. Students pick three further courses from a range of musical styles, including jazz, world music, rock, and other electives. As they progress through the major curriculum, students develop their practical musicianship and performance skills through music theory labs, applied lessons, and participation in music department ensembles.

Go to [Programs by Department](#) to view all related programs.

Applied Music

Provided they qualify by audition, students may enroll in private instruction and participate in ensembles. Auditions must be arranged with the instructor prior to registration. For more audition details, visit music.duke.edu/lessons/auditions-schedule. Enrollment in an applied music course does not guarantee permission to enroll in the instructor's class or ensemble the following semester; in some cases, another audition may be required. Those students who wish to study privately but do not qualify for university-level instruction should consider group lessons or contact department faculty for recommendations for local instructors. All applied music courses may be repeated for credit, but no more than two ensembles may be taken concurrently.

Academic Requirements

At least 11.5 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisite (1 unit)**
 - MUSIC 261
- **Core (6 units)**
 - MUSIC 255S
 - MUSIC 256S
 - MUSIC 257
 - MUSIC 258
 - MUSIC 361
 - MUSIC 461
- **Ensemble (1 unit)**
 - 2 semesters in a departmental ensemble (excluding MUSIC 210-3)
 - A comprehensive list of ensemble courses is available to students in the degree audit system.
- **Applied Music (.5 units)**
 - 2 semesters of study in an instrument or voice
- **Electives (3 units)**
 - Any 3 MUSIC courses numbered 214 and above (1 of MUSIC 130, 137, 140, 143, or 144 may also count)

Students majoring in Music must complete the core requirements for a letter grade. For a list of Music courses offered, please refer to music.duke.edu/courses.

Concentration in Performance

In addition to the Prerequisite, Core, and Ensemble requirements above, students must complete the following requirements:

- **Applied Music (4 units)**
 - At least 5 semesters of individual applied instruction: MUSIC 103-108, 203-208, or 401
 - Must include at least 2 semesters of MUSIC 401, culminating in a full recital
- **Elective (1 unit)**
 - 1 additional music elective approved by the director of undergraduate studies

Waiver of Music Major Requirements

A request for waiver of any requirement for the music major, together with supporting documentation where appropriate, should be submitted to the Director of Undergraduate Studies. After reviewing the request, the DUS may decide that the student needs to take a departmental examination in the area before a final decision can be made. Waived courses earn no credit towards the 34-course graduation requirement, nor will grades for them appear on your transcript.

Departmental Graduation with Distinction

Music Majors who have earned a minimum 3.5 GPA in music courses may undertake work leading to departmental Graduation with Distinction. The candidate must apply to the Director of Undergraduate Studies by March 20 of the junior year. The project is normally a yearlong endeavor involving an independent study (MUSIC 393), two semesters of advanced study in performance or composition, or an appropriate graduate seminar each semester of the senior year. It must culminate in (a) a substantial paper (historical, analytical, or theoretical); (b) a full-length recital with a shorter paper or composition; or (c) a major composition with a shorter paper or half-length recital. The final project must be completed by March 31 of the senior year and be approved by a faculty committee. For more information, visit music.duke.edu/undergraduate/graduation-with-distinction.

Neuroscience (AB)

Program Code: U-NEUR-AB

Degree Designation: Bachelor of Arts

Department: Neuroscience

Website: psychandneuro.duke.edu/undergraduate/neuroscience/requirements

Program Summary

Like the inner workings of the brain itself, neuroscience synthesizes discovery from diverse sources of knowledge. The undergraduate curriculum in neuroscience reflects this interdisciplinary perspective and challenges students to explore knowledge across levels of analysis: from the molecular and cellular level, through the level of neural circuits within which cells are organized and interconnected, and toward the level of behavior where the functions of neural circuits and systems, including human cognition, are manifested. A comprehensive understanding of neuroscience requires knowledge of each level and integrative learning across levels.

The principal strength of this program is that it provides rich opportunities for undergraduate students to study brain science with faculty from diverse disciplines who bring their complementary perspectives and expertise to the classroom and laboratory. Thus, the undergraduate curriculum in neuroscience is truly a joint, interdisciplinary major/minor that draws faculty and courses from several departments, chiefly the Department of Psychology and Neuroscience in the Trinity College of Arts & Sciences. Students may also elect to pursue faculty-mentored research and scholarship wherever brain science discovery happens at Duke, including the Duke University School of Medicine. Indeed, the broad impact of neuroscience discovery now extends beyond the academic disciplines in the natural sciences to spaces where neuroscientists collaborate and regularly interact with experts in ethics, law, business, social sciences, philosophy, engineering, the fine arts and performing arts, and the humanities. Accordingly, our neuroscience curriculum reflects this broad interdisciplinary platform for discovery and learning, with a rich offering of coursework and experiences that reflect the exciting growth of neuroscience and its increasing relevance to human flourishing, the diverse challenges facing society, and the health and wellness of all life.

Thus, the mission of the Undergraduate Studies in Neuroscience program is to *educate* learners in the liberal arts and sciences with a character-forming, value-driven, transdisciplinary understanding of Neuroscience and its impact on health and society; and to *inspire* student-investigators by integrating learners into a community of discovery on the frontiers of knowledge in the brain sciences so that they *flourish* in their well-being, discovery, life-long learning, and service to society.

The Bachelor of Arts degree in neuroscience encourages broad, interdisciplinary exploration and scholarship where neuroscience intersects and engages disparate disciplinary domains of knowledge beyond the life and natural sciences.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

The Bachelor of Arts in Neuroscience program requires 11 courses: three corequisite courses and eight courses in the major (designated with the subject code, NEUROSCI), three of which are required foundational courses and five of which are elective courses. No more than two of the eight Neuroscience courses required for the major may be used to satisfy the requirements of another major, minor, or certificate.

- **Corequisites (3 units)**
 - Biology: BIOLOGY 201L or BIOLOGY 202L (BIOLOGY 20 or BIOLOGY 21 may also count)
 - Chemistry: CHEM 101DL or CHEM 110DL (CHEM 20 or CHEM 21 may also count)
 - Any 1 of the following Computer Science or Statistical Science courses
 - Computer Science: NEUROSCI 103L, COMPSCI 101L, COMPSCI 102L, EGR 103L
 - Statistical Science: BIOLOGY 304, ECON 104D, PSY 201L, PSY 205, STA 230, or STA 231, or any 100-level STA course
- **Foundational Courses (3 units)**
 - NEUROSCI 206L
 - NEUROSCI 217D
 - NEUROSCI 223
- **Neuroscience Electives (5 units)**
 - Any 5 NEUROSCI courses
 - At least 2 electives must be Intersection Courses.
 - A comprehensive list of elective courses is available to students in the degree audit system.

Corequisite details. To support productive studies in Neuroscience, entry-level coursework is required in the disciplines of biology, chemistry, and statistical science, data science, or computer science. Corequisites may be completed concurrently with Neuroscience courses in the major. For these disciplines, the same guidelines detailed above for the BS degree apply to the AB degree, with the exception that there are no corequisites in mathematics and physics for the AB major in Neuroscience.

Foundational Course details. There are three foundational courses in the major in neuroscience that reflect the different levels of inquiry described above. NEUROSCI 206L (Introduction to Systems Neuroscience) is a laboratory course that surveys the neural systems that give rise to perception and bodily action, including relevant neuroanatomical pathways and computational approaches to understanding nervous systems. NEUROSCI 223 (Introduction to Neurobiology), which focuses on cellular processes and synaptic mechanisms of neural signaling and developmental neurobiology; and Neuroscience 217/217D (Introduction to Cognitive Neuroscience), which focuses on cognition and the brain basis of behavior. NEUROSCI 206L, 223, and 217/217D may be taken in any order.

Neuroscience Elective details. Neuroscience majors are required to explore the breadth and depth of the field by fulfilling five elective course requirements in neuroscience, with no more than two electives at the 100 level or below. Furthermore, for the AB degree, students must complete two (or more) intersection courses that explore the broader impact of neuroscience on society or the dialogue between the brain sciences and other disciplines, as listed on the program website (e.g., NEUROSCI 289 Music and the Brain). To complete the elective requirements for the AB degree, students may choose from a variety of seminars, small lectures, and laboratory offerings that are drawn from a dynamic list of more than fifty courses offered by multiple departments in Trinity College, as well as departments in the School of Medicine and the Pratt School of Engineering. Research or independent scholarship is not required of the Bachelor of Arts degree; however, if elected, only two Independent Scholarship or Research Independent Study courses may count. Similarly, a laboratory or methods course is not required. See the Psychology and Neuroscience website for the current list of elective offerings in each course category.

Graduation with Distinction in Neuroscience

Neuroscience majors with a GPA of 3.5 or above in neuroscience courses (not including corequisites), may apply for Graduation with Distinction in neuroscience. They must also maintain at least this level of performance throughout the remainder of their neuroscience studies at Duke. Candidates for distinction will conduct and complete an original research project carried out as two terms of research independent study in neuroscience. A substantial paper (thesis), usually based on empirical research and written in publication style, and a scientific poster are required. In addition, an oral defense of the thesis will be evaluated by a committee comprising three members. One member of the committee (either the research mentor or one of the two additional committee members) must be a neuroscience faculty member from an Arts and Sciences department or be a faculty member who teaches regularly in undergraduate neuroscience. One member of the committee can be a postdoctoral fellow or an advanced graduate student who has completed their preliminary exam. The director(s) of undergraduate studies and the associate director (if applicable) are available as committee members and should be consulted if there is a question about committee membership.

Candidates for Graduation with Distinction in Neuroscience are expected to participate in a monthly series of non-credited workshops on scientific literacy, research ethics, scientific communications, thesis writing, and “works-in-progress” presentations that will be coordinated by the director and associate director of undergraduate studies, Neuroscience faculty, and the subject librarian for Neuroscience. Candidates will attend 75% or more of these workshops across the fall and spring semesters.

Evaluation of the candidate for distinction is based on the written thesis, an oral poster presentation and the oral examination before an evaluation committee. The evaluation committee will then decide whether the overall performance of the candidate qualifies for Graduation with Distinction in neuroscience (only one distinction level is recognized). Finally, Graduation with Distinction in neuroscience research projects will be presented as scientific posters in April during an undergraduate research forum.

Interdepartmental Major (IDM) with Neuroscience

Like the inner workings of the brain itself, neuroscience synthesizes discovery from diverse sources of knowledge. The undergraduate curriculum in neuroscience reflects this interdisciplinary perspective and challenges students to explore knowledge across levels of analysis: from the molecular and cellular level, through the level of neural circuits within which cells are organized and interconnected, and toward the level of behavior where the functions of neural circuits and systems, including human cognition, are manifested. A comprehensive understanding of neuroscience requires knowledge of each level and integrative learning across levels.

Similarly, Neuroscience may be constructed as a component of an interdepartmental major (IDM). Currently, Neuroscience allows for student-originated IDMs, which are individualized programs proposed by a student. When students craft their IDM proposal, all Trinity College guidelines must be followed (see appropriate Trinity College webpage).

Requirements for IDM with Neuroscience. Inclusive of all Trinity College requirements for a student-generated IDM, a proposal involving Neuroscience must include each of the following features.

- The three foundational courses: NEUROSCI 206L, NEUROSCI 217/217D and NEUROSCI 223, which may be taken in any sequence.
- Four Neuroscience electives, including two or more intersection courses.
- While working through the Neuroscience courses listed above, a subset of corequisite requirements for the Neuroscience major are necessary, with a total of three corequisite courses for the Bachelor of Arts IDM plan. If both departments represented in the IDM proposal require corequisites, then any overlapping corequisite courses may be shared between departments at the discretion of the directors of undergraduate studies. Before completing the Trinity College Interdepartmental Major Proposal form, students must discuss the development of their plan with the directors of undergraduate studies of both majors.

Neuroscience (BS)

Program Code: U-NEUR-BS

Degree Designation: Bachelor of Science

Department: Neuroscience

Website: psychandneuro.duke.edu/undergraduate/neuroscience/requirements

Program Summary

Like the inner workings of the brain itself, neuroscience synthesizes discovery from diverse sources of knowledge. The undergraduate curriculum in neuroscience reflects this interdisciplinary perspective and challenges students to explore knowledge across levels of analysis: from the molecular and cellular level, through the level of neural circuits within which cells are organized and interconnected, and toward the level of behavior where the functions of neural circuits and systems, including human cognition, are manifested. A comprehensive understanding of neuroscience requires knowledge of each level and integrative learning across levels.

The principal strength of this program is that it provides rich opportunities for undergraduate students to study brain science with faculty from diverse disciplines who bring their complementary perspectives and expertise to the classroom and laboratory. Thus, the undergraduate curriculum in neuroscience is truly a joint, interdisciplinary major/minor that draws faculty and courses from several departments, chiefly the Department of Psychology and Neuroscience in the Trinity College of Arts & Sciences. Students may also elect to pursue faculty-mentored research and scholarship wherever brain science discovery happens at Duke, including the Duke University School of Medicine. Indeed, the broad impact of neuroscience discovery now extends beyond the academic disciplines in the natural sciences to spaces where neuroscientists collaborate and regularly interact with experts in ethics, law, business, social sciences, philosophy, engineering, the fine arts and performing arts, and the humanities. Accordingly, our neuroscience curriculum reflects this broad interdisciplinary platform for discovery and learning, with a rich offering of coursework and experiences that reflect the exciting growth of neuroscience and its increasing relevance to human flourishing, the diverse challenges facing society, and the health and wellness of all life.

Thus, the mission of the Undergraduate Studies in Neuroscience program is to *educate* learners in the liberal arts and sciences with a character-forming, value-driven, transdisciplinary understanding of Neuroscience and its impact on health and society; and to *inspire* student-investigators by integrating learners into a community of discovery on the frontiers of knowledge in the brain sciences so that they *flourish* in their well-being, discovery, life-long learning, and service to society.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 14 units total to complete the major. At least 34 units total to earn a degree.

The Bachelor of Science in Neuroscience program requires 14 courses: seven corequisite courses and seven courses in the major (designated with the subject code, NEUROSCI), three of which are required foundational courses and four of which are elective courses. No more than two of the seven Neuroscience courses may be used to satisfy the requirements of another major, minor, or certificate.

- **Corequisites (7-9 units)**
 - Biology: BIOLOGY 201L or BIOLOGY 202L (BIOLOGY 20 or BIOLOGY 21 may also count)
 - Chemistry: CHEM 101DL or CHEM 110DL (CHEM 20 or CHEM 21 may also count)
 - Computer Science: NEUROSCI 103L, COMPSCI 101L, COMPSCI 102L, or EGR 103L
 - Math: MATH 105L & 106L, or MATH 111L (MATH 21 or MATH 22 may also count)
 - Physics: PHYSICS 107L & 108L, or PHYSICS 121L & 122DL, or PHYSICS 151L & 152L, or PHYSICS 161D, 162D, 164L, & 165L
 - Statistical Science: BIOLOGY 304, ECON 104D, PSY 201L, PSY 205, STA 230, or STA 231, or any 100-level STA course
- **Foundational Courses (3 units)**
 - NEUROSCI 206L
 - NEUROSCI 217D
 - NEUROSCI 223
- **Neuroscience Electives (4 units)**
 - Any 4 NEUROSCI courses
 - Must include at least 1 independent study, research independent study, or 300-level laboratory or methods course
 - A comprehensive list of elective courses is available to students in the degree audit system.

Corequisite details. To support productive studies and research in Neuroscience, entry-level coursework is required in the disciplines of biology, chemistry, computer science, mathematics, physics, and statistical or data science. Corequisites may be completed concurrently with Neuroscience courses in the major. College Board Advanced Placement Test credit may be used to satisfy corequisites (see website for details). Summer courses taken away from Duke may satisfy corequisites, provided that the DUS in Neuroscience has pre-approved the course(s) prior to enrollment.

Foundational Course details. There are three foundational courses in the major in neuroscience that reflect the different levels of inquiry described above. NEUROSCI 206L (Introduction to Systems Neuroscience) is a laboratory course that surveys the neural systems that give rise to perception and bodily action, including relevant neuroanatomical pathways and computational approaches to understanding nervous systems. NEUROSCI 223 (Introduction

to Neurobiology) focuses on cellular processes and synaptic mechanisms of neural signaling and developmental neurobiology. NEUROSCI 217 or 217D (Introduction to Cognitive Neuroscience) focuses on cognition and the brain basis of behavior. NEUROSCI 206L, 223, and 217/217D may be taken in any order.

Neuroscience Elective details. Neuroscience majors are required to explore the breadth and depth of the field by fulfilling four elective course requirements in neuroscience, with no more than two electives at the 100 level or below. For the Bachelor of Science degree, no more than one elective may count from a set of neuroscience courses that explore the intersection of the brain sciences and other disciplines (e.g., NEUROSCI 289 (Music and the Brain); see website for complete list of intersection courses). One elective must be an Independent Scholarship or Research Independent Study course, or a laboratory or methods course >300. Only two Independent Scholarship or Research Independent Study courses may count. Seminar, small lecture, and laboratory elective offerings are drawn from a dynamic list of approximately fifty courses that are offered by multiple departments in Trinity College, as well as departments in the School of Medicine and the Pratt School of Engineering. See the Psychology and Neuroscience website for the current list of elective offerings in each course category.

For the BS2 Degree for BME Majors in the Pratt School of Engineering

All of the requirements for the BS degree listed above must be met with the following changes:

- BME 301L/NEUROSCI 301L (Bioelectricity) is required and will satisfy the laboratory/methods requirement.
- BME Majors pursuing a Second Major (BS2) in Neuroscience should take a BME-recommended Statistics course.
- Of the additional neuroscience electives, no more than two electives may be cross-listed between neuroscience and biomedical engineering.

Graduation with Distinction in Neuroscience

Neuroscience majors with a GPA of 3.5 or above in neuroscience courses (not including corequisites), may apply for Graduation with Distinction in neuroscience. They must also maintain at least this level of performance throughout the remainder of their neuroscience studies at Duke. Candidates for distinction will conduct and complete an original research project carried out as two terms of research independent study in neuroscience. A substantial paper (thesis), usually based on empirical research and written in publication style, and a scientific poster are required. In addition, an oral defense of the thesis will be evaluated by a committee comprising three members. One member of the committee (either the research mentor or one of the two additional committee members) must be a neuroscience faculty member from an Arts and Sciences department or be a faculty member who teaches regularly in undergraduate neuroscience. One member of the committee can be a postdoctoral fellow or an advanced graduate student who has completed their preliminary exam. The director(s) of undergraduate studies and the associate director (if applicable) are available as committee members and should be consulted if there is a question about committee membership.

Candidates for Graduation with Distinction in Neuroscience are expected to participate in a monthly series of non-credited workshops on scientific literacy, research ethics, scientific communications, thesis writing, and “works-in-progress” presentations that will be coordinated by the director and associate director of undergraduate studies, Neuroscience faculty, and the subject librarian for Neuroscience. Candidates will attend 75% or more of these workshops across the fall and spring semesters.

Evaluation of the candidate for distinction is based on the written thesis, an oral poster presentation, and the oral examination before an evaluation committee. The evaluation committee will then decide whether the overall performance of the candidate qualifies for Graduation with Distinction in neuroscience (only one distinction level is recognized). Finally, Graduation with Distinction in neuroscience research projects will be presented as scientific posters in April during an undergraduate research forum.

Interdepartmental Major (IDM) with Neuroscience

Like the inner workings of the brain itself, neuroscience synthesizes discovery from diverse sources of knowledge. The undergraduate curriculum in neuroscience reflects this interdisciplinary perspective and challenges students to explore knowledge across levels of analysis: from the molecular and cellular level, through the level of neural circuits within which cells are organized and interconnected, and toward the level of behavior where the functions of neural circuits and systems, including human cognition, are manifested. A comprehensive understanding of neuroscience requires knowledge of each level and integrative learning across levels.

Similarly, Neuroscience may be constructed as a component of an interdepartmental major (IDM). Currently, Neuroscience allows for student-originated IDMs, which are individualized programs proposed by a student. When students craft their IDM proposal, all Trinity College guidelines must be followed (see appropriate Trinity College webpage).

Requirements for IDM with Neuroscience. Inclusive of all Trinity College requirements for a student-generated IDM, a proposal involving Neuroscience must include each of the following features.

- The three foundational courses: NEUROSCI 206L, NEUROSCI 217/217D, and NEUROSCI 223, which may be taken in any sequence.
- One Neuroscience methods or laboratory course, or one Independent Scholarship or Research Independent Study course.
- Two Neuroscience electives, with no more than one intersection course.
- While working through the Neuroscience courses listed above, a subset of corequisite requirements for the Neuroscience major are necessary, with a total of five corequisite courses for the Bachelor of Science IDM plan. If both departments represented in the IDM proposal require corequisites, then any overlapping corequisite courses may be shared between departments at the discretion of the directors of undergraduate studies. Before completing the Trinity College Interdepartmental Major Proposal form, students must discuss the development of their plan with the directors of undergraduate studies of both majors.

Philosophy (AB)

Program Code: U-PHIL-AB

Degree Designation: Bachelor of Arts

Department: Philosophy Department

Website: philosophy.duke.edu/undergraduate/major-minor

Program Summary

The undergraduate program in the Department of Philosophy acquaints students with the content and structure of philosophical theory in various areas. Classes encourage discussion so that students can engage actively in the philosophical examination of problems.

Course offerings fall into two general categories: the systematic and the historical. In a systematic treatment, the organization of a course reflects the problems presented by the subject matter of that course, as in logic, ethics, and metaphysics. Historical courses direct attention more to the order of development in the thought of a particular philosopher (Plato, Aristotle, Kant) or in a historical period. In all courses, reading the works of philosophers acquaints the students with important and influential contributions to the definition and solution of philosophical issues.

The problems raised in philosophy about various fields of the arts and sciences involve questions that these particular disciplines typically neglect. In consideration of such problems, students will acquire some understanding and perspective of the major areas of human intellectual endeavor. Philosophical comprehension is in this way an essential part of a complete education.

Philosophy provides a sound preparation for the demands of many professions. For example, the precision of argument and broad acquaintance with intellectual traditions emphasized in philosophy form an excellent basis for the study of law.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - PHIL 201
 - PHIL 203
- **Value Theory (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Metaphysics, Epistemology, Philosophy of Mind or Philosophy of Science (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Logic (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Seminar (1 unit)**
 - Any PHIL course 500-level and above
- **Electives (4 units)**
 - Any 5 PHIL courses 100-level and above

Eight courses must be at the 200-level and above. Only one course from among Philosophy 101, 103S, and 104S may be taken for credit. These courses are not open to juniors and seniors.

Departmental Graduation with Distinction

The department offers work leading to Graduation with Distinction. See the section on honors in this bulletin.

Physics (AB)

Program Code: U-PHYS-AB

Degree Designation: Bachelor of Arts

Department: Physics Department

Website: physics.duke.edu/undergraduate/physics-major-minor/ba-degree

Program Summary

Physics offers its majors a chance to learn about many extraordinary insights that the human race has discovered in its effort to understand the universe. Examples include what are the properties of matter and light, what are the concise remarkable laws that govern the properties of matter and light, how does complex structure emerge from the interactions of simpler pieces, and how physical laws and insights can be used to solve a great diversity of basic and applied problems. The analytical and experimental insights that a physics or biophysics major gains are valuable to the study of all areas of science and engineering. The Department of Physics also offers courses for students with a casual interest in science who wish to learn about what physicists have discovered about nature and how physicists think about nature.

By the time they graduate, physics majors are well prepared for graduate work in physics, engineering, and in other science disciplines; for the study of medicine; and for employment in commercial and industrial organizations as well as in governmental laboratories. Students planning to major in physics should take PHYSICS 161D, 162D, 164L, and 165L during their first year if possible; those with qualifying advanced placement credit can substitute PHYSICS 163D for PHYSICS 161D and 162D. Students should also arrange to complete the mathematics requirements by the end of their sophomore year.

An optional concentration in astrophysics allows students to immerse themselves in contemporary issues such as the nature of dark matter and dark energy, the evolution of the early universe, and the structures, from galaxies to stars, that characterize it today.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

- **Fundamental of Physics Courses (2 units)**
 - PHYSICS 161D (PHYSICS 141L, or PHYSICS 151L may also count)
 - PHYSICS 162D (PHYSICS 142L, or PHYSICS 152L may also count)
- **Introductory Labs (1 unit)**
 - PHYSICS 164L
 - PHYSICS 165L
- **Required Courses (5 units)**
 - PHYSICS 264L
 - PHYSICS 363
 - 2 of the following:
 - PHYSICS 361
 - PHYSICS 362D
 - PHYSICS 464
 - PHYSICS 513
 - 1 of the following:
 - PHYSICS 271L
 - PHYSICS 417S
- **Required Math Courses (2 units)**
 - Multivariable Calculus: MATH 212, or MATH 219, or MATH 222
 - Linear Algebra: MATH 218D, or MATH 221
- **Elective (1 unit)**
 - Any PHYSICS course 200-level and above

Concentration in Astrophysics

In addition to the physics major requirements, students must complete the following requirements:

- **Required Courses (3 units)**
 - PHYSICS 305
 - PHYSICS 555
 - PHYSICS 556
- **Elective (1 unit)**
 - MATH 575
 - PHYSICS 346
 - PHYSICS 505
 - PHYSICS 522
 - PHYSICS 622
 - PHYSICS 655

Courses for the astrophysics concentration may also satisfy the elective requirements for the major.

Departmental Graduation with Distinction

The department offers students many possibilities to do physics research, and this research may lead to Graduation with Distinction. Consult with the director of undergraduate studies during or before the junior year and see the section on honors in this bulletin.

Physics (BS)

Program Code: U-PHYS-BS

Degree Designation: Bachelor of Science

Department: Physics Department

Website: physics.duke.edu/undergraduate/physics-major-minor/bs-degree

Program Summary

Physics offers its majors a chance to learn about many extraordinary insights that the human race has discovered in its effort to understand the universe. Examples include what are the properties of matter and light, what are the concise remarkable laws that govern the properties of matter and light, how does complex structure emerge from the interactions of simpler pieces, and how physical laws and insights can be used to solve a great diversity of basic and applied problems. The analytical and experimental insights that a physics or biophysics major gains are valuable to the study of all areas of science and engineering. The Department of Physics also offers courses for students with a casual interest in science who wish to learn about what physicists have discovered about nature and how physicists think about nature.

By the time they graduate, physics majors are well prepared for graduate work in physics, engineering, and in other science disciplines; for the study of medicine; and for employment in commercial and industrial organizations as well as in governmental laboratories.  - Linear Algebra: MATH 218D, or MATH 221
 - Differential Equations: MATH 353, or MATH 356
- **Elective (2 units)**
 - Any 2 PHYSICS courses 200-level and above
 - Must include at least 1 course 300-level and above

Concentration in Astrophysics

In addition to the physics major requirements, students must complete the following requirements:

- **Required Courses (3 units)**
 - PHYSICS 305
 - PHYSICS 555
 - PHYSICS 556
- **Elective (1 unit)**
 - MATH 575
 - PHYSICS 346
 - PHYSICS 505
 - PHYSICS 522
 - PHYSICS 622

- PHYSICS 655

Courses for the astrophysics concentration may also satisfy the elective requirements for the major.

Departmental Graduation with Distinction

The department offers students many possibilities to do physics research, and this research may lead to Graduation with Distinction. Consult with the director of undergraduate studies during or before the junior year and see the section on honors in this bulletin.

Political Science (AB)

Program Code: U-POLI-AB

Degree Designation: Bachelor of Arts

Department: Political Science Department

Website: polisci.duke.edu/undergraduate/offerings/requirements

Program Summary

Political science aims at a systematic and rigorous understanding of politics, both in explaining political phenomena and in exploring their ethical and normative dimensions. The discipline covers a broad range of subjects, from authoritarian to democratic politics, from local governance to international relations, from formal rules and institutions to the psychology and behavior of individuals who participate in political processes. Political scientists make use of data ranging from ancient texts, to satellite images, to surveys, to millions of Facebook posts, and analyze them with a diverse set of methods and tools, including qualitative and quantitative approaches.

Our undergraduate curriculum is designed to give you a sophisticated understanding of political processes, critical and independent thinking, writing and communication skills, and an analytical skill set. Our majors are highly successful, and pursue careers in diverse fields, including non-governmental and public interest organizations, think tanks, consulting, journalism, communications, local, state, and federal government, polling firms, finance, and business management. Many also go on to pursue graduate study in law, political science, public administration, or business administration.

Interdepartmental Major. The Department does not normally accept applications for Interdepartmental Majors.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Gateway Course (1 unit)**
 - POLSCI 175 (POLSCI 175FS, 180FS, or 275 may also count)
- **Statistics (1 unit)**
 - STA 198L
 - STA 199L
 - ECON 104D
- **Concentration (8-9 units)**
 - Select 1 of the following concentrations: American Politics, International Relations, Law and Political Theory, Decision Theory & Data Science, Political Economy
 - **American Politics**
 - POLSCI 114, or POLSCI 116D
 - 4 concentration electives
 - 2 POLSCI electives outside the concentration
 - 1 concentration capstone course
 - A comprehensive list of courses is available to students in the degree audit system.
 - **International Relations**
 - POLSCI 160D
 - 4 concentration electives
 - 2 POLSCI electives outside the concentration
 - 1 concentration capstone course
 - A comprehensive list of courses is available to students in the degree audit system.
 - **Law and Political Theory**
 - POLSCI 211, or POLSCI 384
 - 4 concentration electives
 - 2 POLSCI electives outside the concentration
 - 1 concentration capstone course
 - A comprehensive list of courses is available to students in the degree audit system.

- **Data Theory & Decision Science**

- DECS 101
- MATH 112L
- COMPSCI 101L, or COMPSCI 201
- NEUROSCI 101, or NEUROSCI 102, or NEUROSCI 217, or NEUROSCI 223
- Any 1 game theory/formal decision theory course
 - ECON 201
 - POLSCI 217
 - POLSCI 631L
- Any 1 data analysis course
 - COMPSCI 216
 - ECON 204D
 - POLSCI 189FS
 - POLSCI 538
 - STA 210
 - STA 221L
- 2 concentration electives
- 1 concentration capstone course
- A comprehensive list of courses is available to students in the degree audit system.

- **Political Economy**

- POLSCI 145
- ECON 101, or ECON 201
- 4 concentration electives
- 2 POLSCI electives outside the concentration
- 1 concentration capstone course
- A comprehensive list of courses is available to students in the degree audit system.

Departmental Graduation with Distinction

The department offers students majoring in political science an opportunity to achieve Graduation with Distinction in political science by the submission of an original research paper.

To be eligible for honors, students must have:

- taken four courses in the subfield of your proposed research;
- completed STA 198/199 or higher (STA 210 or the equivalent is recommended), the political theory requirement (POLSCI 175), and a minimum of six courses in political science;
- the statistics requirement may be waived if students are pursuing honors in the area of political theory; or
- have a minimum undergraduate GPA of 3.3, and a major GPA of 3.5; this GPA must be maintained until graduation.

The goal of honors in political science is an original research paper of journal length (approximately 50 pages), which will be submitted to the Honors Thesis Committee by December 15 and March 1 of each year. The key criterion is that the paper must feature original research, and be conducted at a level that satisfies professional standards.

The Honors Thesis Committee will, in most cases, either accept or reject the paper for honors and the paper will be read by a minimum of two members of the committee. A revision may be requested by the committee (to be conducted by the student in the spring semester and due by April 1). If at all possible, students should start working on their honors research the spring of the junior year and over that summer.

Students may begin their honors research by producing a quality, journal-level paper in:

- a 400-, 500-, or 600-level political science seminar; or
- an independent study.

Often, the student will need to polish the paper during or after these options before submitting it to the Honors Thesis Committee. It is strongly suggested that the student submit a draft of the thesis before March 1.

Psychology (AB)

Program Code: U-PSY-AB

Degree Designation: Bachelor of Arts

Department: Psychology & Neuroscience

Website: psychandneuro.duke.edu/undergraduate/psychology/requirements

Program Summary

The study of behavior and its determinants lies at the heart of understanding numerous systems ranging from the biological to the economic and social. Psychology majors and minors apply their understanding of human behavior to varied professional fields including mental and physical health care, research, education, policy, law, finance, consulting, marketing, and business management. Understanding of psychological concepts is also helpful for fields relating to engineering and data analysis.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (3 units)**
 - PSY 101
 - PSY 204L
 - PSY 205L
- **Breadth (3 units)**
 - Any 3 courses from the following lists
 - Must include at least 1 biological or cognitive course:
 - PSY 102
 - PSY 106
 - PSY 107
 - Must include at least 1 abnormal or developmental course:
 - PSY 103
 - PSY 104
 - PSY 105
- **Seminar (1 unit)**
 - Any PSY seminar course 200-level and above
- **Electives (4 units)**
 - 4 PSY courses meeting the following criteria:
 - Must include at least 1 course 300-level and above (independent study courses, research independent study courses, and PSY 496 may not count)
 - May include at most 2 independent study or research independent study courses
 - May include at most 1 of the following: PSY 232, UNIV 101, or UNIV 104
 - May include at most 1 core survey course numbered 102-107

PSY 89S and FOCUS courses do not count toward the psychology AB major.

Graduation with Distinction Program

The Graduation with Distinction program is based on a special project that requires original empirical research, usually developed through completion of Research Independent Study courses. With approval from the Director of Undergraduate Studies, a critical analysis of a problem in the field based on an extensive literature review may be substituted for an empirical research study. The project is to be summarized in a carefully written thesis to be the subject of an oral examination. The opportunity to write a thesis and qualify for Graduation with Distinction is open only to those majoring in Psychology. Applicants must have an overall GPA of 3.0 and a GPA in Psychology of 3.5, without rounding, by graduation. Neither Independent Study classes in Psychology, nor Research Independent Study classes in Psychology, nor the Distinction Thesis Workshop, are included when calculating the GPA.

An application to the Graduation with Distinction program should be submitted by the last day of regular class registration for the term in which the thesis will be defended (for a fall defense, Fall registration in April; for a spring defense, Spring registration in November). The application must include names of the three people who will serve on the student's committee. The committee chair generally holds a Primary or Joint Graduate Training Faculty appointment in Psychology & Neuroscience. (Other faculty in P&N may be able to serve as chairs with special approval from the Director of Undergraduate Studies or with another faculty member serving as the chair of record.) The second committee member may hold a Primary, Joint, or Secondary appointment in P&N. The final committee member may be another faculty member in P&N, a post-doc or graduate student in P&N, a faculty member from another department at Duke, or a faculty member from another institution. (A current list of faculty with Primary, Joint, and Secondary appointments may be found under the People tab at psychandneuro.duke.edu.)

Students interested in applying for Graduation with Distinction will register for two Research Independent Study courses (PSY 393, 394, 493, 494). (Usually these courses will be taken consecutively, but this is not required.) Students must register for the first Research Independent Study before submitting their application for Graduation with Distinction. Ordinarily, the same faculty member will serve as a given student's mentor both semesters. Candidates for Graduation with Distinction must also enroll in PSY 496, the Distinction Thesis Workshop, a full-credit course focusing on the conduct of psychological research, ethics in research, professional development, and especially scientific writing, in order to prepare a quality thesis. PSY 496 is only offered in the spring. Near the end of the final semester, candidates provide an electronic version of the thesis to their committee members and convene the committee

for an oral examination. At the end of the oral exam, the committee decides whether the overall performance qualifies for Graduation with Distinction. An exceptional thesis combined with outstanding performance in Psychology may qualify a student for nomination for the Zener Award. Graduation with Distinction research projects are presented at a poster session hosted by the Psychology program during the final week of class.

Psychology (BS)

Program Code: U-PSY-BS

Degree Designation: Bachelor of Science

Department: Psychology & Neuroscience

Website: psychandneuro.duke.edu/undergraduate/psychology/requirements

Program Summary

The study of behavior and its determinants lies at the heart of understanding numerous systems ranging from the biological to the economic and social. Psychology majors and minors apply their understanding of human behavior to varied professional fields including mental and physical health care, research, education, policy, law, finance, consulting, marketing, and business management. Understanding of psychological concepts is also helpful for fields relating to engineering and data analysis.

At the end of the oral exam, the committee decides whether the overall performance qualifies for Graduation with Distinction. An exceptional thesis combined with outstanding performance in Psychology may qualify a student for nomination for the Zener Award. Graduation with Distinction research projects are presented at a poster session hosted by the Psychology program during the last week of class.

Public Policy (AB)

Program Code: U-PPS-AB

Degree Designation: Bachelor of Arts

Department: School of Public Policy

Website: sanford.duke.edu/academics/undergraduate-program

Program Summary

The Sanford School of Public Policy educates the next generation of policy professionals in a time when the skill set needed to succeed is changing and government needs professionals more than ever. Our mission is to improve lives and communities by researching the most pressing public policy issues and preparing students for lives of leadership, civic engagement, and public service. Information about the bachelor of arts in public policy is available at sanford.duke.edu/academics/undergraduate-program.

The public policy major offers many exciting opportunities. We teach courses in a broad array of areas, including education and social policy, health and population, environment and energy, international development, global governance and security, civil society, and leadership and ethics.

Rigorous coursework provides students with skills in political and economic analysis, knowledge about how to lead people and organizations, and a strong ethical foundation for decision-making. As a liberal arts major, public policy majors will enhance skills in political and economic analysis, articulate more concisely and clearly through critical analyzations, consider the implications of actions to make strong and ethical decisions, and participate in a policy-oriented internship. In addition, students are urged to participate actively in programs sponsored by the Sanford School of Public Policy to supplement the material covered in class.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 11 units total to complete the major. At least 34 units total to earn a degree.

- **Core Courses (6 units)**
 - STA 199L (ECON 104D, or STA 101L, 102L, 111L, 130L or 198L may also count)
 - PUBPOL 155D
 - PUBPOL 301
 - PUBPOL 302D (PUBPOL 330 may also count)
 - PUBPOL 303D (ECON 201 may also count)
 - PUBPOL 304
- **History Elective (1 unit)**
 - Any history course taught by public policy faculty
 - Any history course including a public policy component, as designated by the public policy director of undergraduate studies
- **Electives (4 units)**
 - Any 4 PUBPOL courses numbered 160 and above
 - Must include at least 1 PUBPOL course numbered 401 and above
- **Internship**

No more than two transfer credits may count toward the major. PUBPOL 155D is offered as a satisfactory/unsatisfactory (S/U) course; all other public policy courses must be taken for credit.

Internship Program

The internship is a culmination of the core coursework and gives students a chance to see how the skills from these classes apply in a real-world context. It also gives students the opportunity to gain exposure to different parts of the policy field and helps them prepare for their eventual job search.

All undergraduate students majoring in public policy, Program II, and interdepartmental majors must complete their required internship during the summer after their sophomore or junior year. Students must complete a minimum of 350 internship experience hours to successfully meet the criteria of the requirement. Students have two (2) options to complete their internship during the academic year (fall/spring): Duke in DC Spring Semester Program OR Two (2) consecutive AY semesters of the same Bass Connections project.

For students to qualify to do their internship, they must have completed at least 3 of the following 6 required courses: STA 199L, PUBPOL 155D, 301, 302D (GLHLTH 210), 303D, or 304. From this list of courses, at least one course needs to be PUBPOL 155, 301 or 302.

The internship application process takes place during the fall and spring semesters prior to the internship under the guidance, assistance, and approval of the Public Policy Internship Office. Students whose internships are not pre-approved by the internship office run the risk of not receiving credit for their internships. Upon completion of the internship, students are required to submit internship experience evaluation forms.

Public policy majors are strongly encouraged to take advanced follow-up coursework that builds upon the knowledge gained from their internship experiences.

More information on the internship requirement can be found at sanford.duke.edu/career-services/undergraduate-career-services.

Departmental Graduation with Distinction

For graduation with departmental distinction, students are required to complete an honors seminar or independent study project and produce an honors research project. To be awarded Distinction in Public Policy, a student must receive no less than an A- on the research paper as determined by the honors program director and have at least a 3.70 average in the following subset of public policy courses: PUBPOL 155D, 301, 302D, and 303D.

If a student is judged to have done a clearly superior research project, as evidenced by a grade of A or A+ as determined by the honors program director, and if the 3.70 or higher average in the above subset of courses is attained, the Highest Distinction in Public Policy is awarded. The proposed program of research must be approved in advance by the director of undergraduate studies. More details on the honors program can be found at sanford.duke.edu/academics/undergraduate-program/current-students/honors-program.

Accelerated MPP

The 4+1 Accelerated Master of Public Policy track is an opportunity for Duke Undergraduate public policy majors to complete both their undergraduate and master's degrees in five years.

Majors who are able to pursue graduate-level coursework during their senior year are eligible to apply in the spring of their junior year. Students will complete the entire 51 graduate credits required for traditional two-year MPP students. This is a continuous enrollment program so students may not take a leave of absence between the undergraduate and graduate degrees.

Requirements:

1. Must be a Duke University undergraduate public policy major.
2. Must have a 3.5 GPA in the public policy major and overall (must maintain through junior year).
3. Must meet with the Director of Undergraduate Studies and the Director of Graduate Studies (MPP) prior to applying.
4. Must have three letters of recommendation – we suggest two faculty and one internship/professional.
5. Complete the online MPP application.

Religion (AB)

Program Code: U-REL-AB

Degree Designation: Bachelor of Arts

Department: Religious Studies Department

Website: religiousstudies.duke.edu/undergraduate/ba

Program Summary

The Department of Religious Studies explores the social organization and impact of religion in ancient and modern cultures through critical theory, literary and visual studies. Our students come to understand the basics of different belief systems; the history of religion; the related philosophies; interpretations of ancient texts; the material practices involved; and how religion intersects with journalism, culture, business, and contemporary politics. This not only gives them a sense of their place as an individual in our global society, but also offers perspective to navigate any career they choose to pursue. Course numbers designate topic and subject area rather than sequence.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - RELIGION 101
 - RELIGION 102
- **Electives (8 units)**
 - Must include at least 6 RELIGION core courses
 - A comprehensive list of elective courses is available to students in the degree audit system.
 - Must satisfy the following and be approved by a religious studies advisor
 - address more than one religious tradition
 - explore the global and historical diversity of religions
 - reflect more than one approach to the study of religion (historical, anthropological, philosophical, sociological, etc.)

Foreign Languages

To prepare for graduate or professional study of religion, the department recommends that students complete at least four courses in college-level study, or the equivalent, of a modern foreign language. Master of arts and doctor of philosophy programs often require examination in one or two modern foreign languages. Those planning to study religious traditions whose documents are in a language other than English should begin appropriate language study as part of their undergraduate preparation.

Departmental Graduation with Distinction

The Department of Religious Studies has a program for Graduation with Distinction. This program is intended for the outstanding religious studies major whose grade point average is at least 3.5 in religious studies (and 3.3 overall) and who has demonstrated the desire and talent to pursue independent research. The student, under the supervision of an advisor, will produce an honors thesis of exceptional quality. The main advisor is normally a faculty member in the department already familiar with the student's work.

Romance Studies (AB)

Program Code: U-ROM-AB

Degree Designation: Bachelor of Arts

Department: Romance Studies Department

Website: romancestudies.duke.edu/undergraduate/majors/romance

Program Summary

The Romance studies major at Duke involves advanced study in two of the department's language/culture sections in an international and experiential learning mode. This major consists of foreign language study at the major level, departmental language courses only, within two departmental fields, such as two continental fields, for example peninsular Spanish and Italian; two fields encompassing the diversity of cultures and engagement in the "developing" and the "developed" worlds, such Creole and French; or in geographically proximate postcolonial spaces such as lusophone (Portuguese-speaking) and francophone Africa, or Spanish and Portuguese-speaking environments in South America. The course requirements are paired with international/experiential learning requirements.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Core (10 units)**
 - 5 language courses 300-level and above in each of 2 of the following fields:
 - French (FRENCH 204 may also count)
 - Italian (ITALIAN 203, 204, and 213 may also count)
 - Portuguese (PORTUGUE 203 and 204 may also count)
 - Spanish
- **International/Experiential**
 - Complete 2 of the following, approved by the director of undergraduate studies:
 - Study abroad (up to 2 programs)
 - DukeEngage, service learning, or another approved experiential program
 - Research experience
 - Honor's thesis
 - Certificate

Students with unusual depth of study in Creole or Portuguese may petition the Romance studies faculty to unite one of the above sequences of five FL departmental courses with a combination of three courses and a required thesis (involving two semesters of independent study courses) in Creole or Portuguese.

Departmental Graduation with Distinction

Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further information may be obtained from the director of undergraduate studies or the assistant to the director.

Russian (AB)

Program Code: U-RUS-AB

Degree Designation: Bachelor of Arts

Department: Slavic and Eurasian Studies

Website: slaviceurasian.duke.edu/undergraduate/major/russian

Program Summary

The Department of Slavic and Eurasian Studies has a strong commitment to increasing the language proficiency of its students regardless of their level at matriculation, to facilitate deep knowledge of the cultural context of each language represented, to help students develop their own scholarly interests and research abilities, and to acquaint students with trends in literary, linguistic, and cultural theory. Areas of specialization include nineteenth- and twentieth-century Russian and Soviet literature, Polish language and literature, semiotics, gender studies, film and media studies, legal and business Russian language, translation, Slavic linguistics, contemporary Russian and Polish literature, scientific and scholarly Russian language, stylistics, and Russian and Polish cultural history. Languages taught include Russian, Polish, and Ukrainian.

Resources for study include a state-of-the-art language laboratory with video facilities and a humanities computing facility, reception of daily Russian television programming, and an exchange program with St. Petersburg University. The department offers several Focus seminars and maintains a cooperative relationship with Duke programs in Linguistics, Global Cultural Studies in Literature, Gender, Sexuality, and Feminist Studies, and Cultural Anthropology; the Center for Slavic, Eurasian and East European Studies; and related programs at The University of North Carolina at Chapel Hill.

The department offers work leading to Graduation with Distinction. See the section on honors in this bulletin and the departmental director of undergraduate studies.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (6 units)**
 - RUSSIAN 203
 - RUSSIAN 204
 - RUSSIAN 301S
 - RUSSIAN 302S
 - RUSSIAN 401
 - RUSSIAN 402
- **Additional Courses (4 units)**
 - Any 4 departmental courses
 - Must include at least 2 courses 200-level and above
 - Must include at least 3 courses primarily focused on works of Russian culture (oral and written poetry and prose, drama, music, film, visual arts)

Slavic and Eurasian Studies (AB)

Program Code: U-SES-AB

Degree Designation: Bachelor of Arts

Department: Slavic and Eurasian Studies

Website: slaviceurasian.duke.edu/undergraduate/major/slavic-eurasian-studies

Program Summary

The Department of Slavic and Eurasian Studies has a strong commitment to increasing the language proficiency of its students regardless of their level at matriculation, to facilitate deep knowledge of the cultural context of each language represented, to help students develop their own scholarly interests and research abilities, and to acquaint students with trends in literary, linguistic, and cultural theory. Areas of specialization include nineteenth- and twentieth-

century Russian and Soviet literature, Polish language and literature, semiotics, gender studies, film and media studies, legal and business Russian language, translation, Slavic linguistics, contemporary Russian and Polish literature, scientific and scholarly Russian language, stylistics, and Russian and Polish cultural history. Languages taught include Russian, Polish, and Ukrainian.

Resources for study include a state-of-the-art language laboratory with video facilities and a humanities computing facility, reception of daily Russian television programming, and an exchange program with St. Petersburg University. The department offers several Focus seminars and maintains a cooperative relationship with Duke programs in Linguistics, Global Cultural Studies in Literature, Gender, Sexuality, and Feminist Studies, and Cultural Anthropology; the Center for Slavic, Eurasian and East European Studies; and related programs at The University of North Carolina at Chapel Hill.

The Slavic and Eurasian studies major is designed to enable students to gain knowledge about Slavic and Eurasian languages and cultures as well as the interrelated histories and contemporary interactions between these cultures.

The department offers work leading to Graduation with Distinction. See the section on honors in this bulletin and the departmental director of undergraduate studies.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Content Elective Courses (4 units)**
 - Any 4 courses on Slavic and Eurasian Studies topics
 - May include at most 2 courses on an exclusively Slavic topic
- **Language Courses (4 units)**
 - Any 4 departmental language courses, with approval from the director of undergraduate studies
- **Capstone (1 unit)**
 - SES 423S

Eight major courses must be at the 200-level and above. To determine if specific courses meet the requirements for the major, students should consult with the director of undergraduate studies in the Slavic and Eurasian Studies department. Students are encouraged to study abroad in a country that is related to the geographical area covered by the major.

Sociology (AB)

Program Code: U-SOC-AB

Degree Designation: Bachelor of Arts

Department: Sociology Department

Website: sociology.duke.edu/undergraduate/major

Program Summary

Sociology is an exciting field of scientific study that explores how societies are organized, change, and affect individuals and groups. Sociologists use diverse empirical methods to answer questions about social life, such as: What impact does racial segregation have on students' educational outcomes? Who gets sick and why? How do social networks affect business profits? What are the social causes of criminal behavior? And how can we harness big data to understand political divides?

Duke Sociology prides itself on creating an engaging curriculum that develops students' analytic and communication skills, provides in-depth knowledge of multiple research practices and substantive areas, and hones tools needed for a wide variety of professions. Sociology majors and minors apply their understanding of social problems and institutions in careers in medicine, education, business, law, non-profit, research, the arts, and government.

The department fosters active involvement in the learning process through seminars, fieldwork, independent study, service learning, collaborative projects, and its Honors Program. Duke Sociology's signature strengths include race and inequality, medical sociology, sociology of work and organizations, computational social science, and sociology of law, crime and justice.

Go to [Programs by Department](#) to view all related programs.

Program Learning Outcomes

Undergraduates in the program should be able to:

- Explain how social networks, institutions, and culture shape individual lives
- Evaluate systems of structured inequalities
- Apply sociological theories to novel contexts
- Answer social science questions using qualitative and quantitative data analyses
- Communicate ideas clearly and persuasively in written, visual, and oral format

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (4 units)**
 - SOCIOL 110
 - SOCIOL 332
 - SOCIOL 333, or any STA course 100-level and above
 - SOCIOL 338
- **Senior Research Experience (1 unit)**
 - SOCIOL 393
 - SOCIOL 495S, and SOCIOL 496S
 - SOCIOL 490S
 - SOCIOL 495S, and SOCIOL 496S
- **Electives (5 units)**
 - Any 5 SOCIOL courses 200-level and above

Concentrations

Students who major in sociology have the option of declaring a concentration in one of the following three areas:

- **Medical Sociology:** study of social and structural determinants of health and healthcare
- **Sociology of Crime, Law, and Justice:** study of legal processes and systems of punishment
- **Sociology of Work and Organizations:** study of jobs, labor markets, and careers

To complete an optional concentration, majors must take four or more courses in the sub-discipline. The department's website provides an updated list of available courses for each concentration. Additionally, capstone courses (SOCIOL 393, 490, 495S, 496S) that complete research in the concentration can count as one of the four required concentration courses for that area.

Departmental Graduation with Distinction

The department offers work leading to Graduation with Distinction through the Honors Thesis Program. This is a two-semester course sequence (SOCIOL 495S and 496S) that is available to seniors with at least a 3.5 GPA and an endorsement of a sociology faculty member. Prior to enrolling in the Honors Program, students must complete SOCIOL 332 (Methods); completion of SOCIOL 333 (Statistics) is strongly encouraged.

Honors students conduct original research that results in substantive papers in the format of academic journal articles. In a supportive community of faculty advisors and peer researchers, students navigate the nonlinear research process. Weekly workshops guide students in translating abstract ideas into answerable sociological questions, situating topics among existing literature, using appropriate methods to analyze data, and communicating empirical results. In April, students share their work through posters and oral presentations at the annual Sociology Honors Symposium.

Spanish (AB)

Program Code: U-SPAN-AB

Degree Designation: Bachelor of Arts

Department: Romance Studies Department

Website: romancestudies.duke.edu/undergraduate/majors/spanish-latin-american-studies

Program Summary

Did you know that Spanish is the second largest world language as a vehicle of international communication and the third as an international language of politics, economics and culture? Or that about 330 million people in the world speak Spanish as their first language? Or that Spanish is the official language in 21 countries and is expected to be the first language of 50% of the population of the United States within 50 years? Our department sponsors summer study abroad programs (Duke in Spain, Duke in Chile, Duke in Costa Rica, and Duke Intensive Spanish in Alicante) and one semester/year study abroad program (Duke in Madrid). We encourage students to plan early in order to attain an advanced level in Spanish and to work into their study plans the possibility of studying abroad in a Spanish-speaking country.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Survey Courses (2 units)**
 - SPANISH 332
 - SPANISH 333
 - SPANISH 334
 - SPANISH 335

- SPANISH 336
- **Additional Electives (8 units)**
 - Any 8 SPANISH courses 300-level and above
 - Must include at least 5 units taught in Spanish
 - Must include at least 3 units 400-level and above

Study abroad information. Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Department-Administered Programs
 - Duke in Madrid: All courses may be counted toward the major. Credit distribution may vary according to students' needs, with a maximum of three courses counting toward the core course requirement. For students remaining a second semester, two additional courses may be counted as core courses; the rest may be counted as related courses.
 - Duke in Madrid-Intermediate: SPANISH 314A counts as one course credit.
- Duke-Administered Summer Programs
 - Duke in Chile: SPANISH 315A counts as one course credit.
 - Duke in Costa Rica: SPANISH 306A counts as one course credit.
 - Duke in Spain: SPANISH 439SA counts as two course credits.
- Non-Duke-Administered Semester Programs: A maximum of two courses per semester may be counted toward the core-course requirement.
- Non-Duke-Administered Summer Programs: One course may be counted toward the core-course requirement.

Departmental Graduation with Distinction

Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further information may be obtained from the director of undergraduate studies or the assistant to the director.

Statistical Science (AB)

Program Code: U-STA-AB

Degree Designation: Bachelor of Arts

Department: Statistical Science

Website: stat.duke.edu/undergraduate/major

Program Summary

The growth in digital data sources, powerful computation, and artificial intelligence has sparked a revolution in how scientists across all disciplines do research, how policy-makers and government consider evidence-based policy, and how industry looks to create value. The Department of Statistical Science is helping to lead this revolution through our research, teaching, and service. In its teaching and research, the department's faculty members emphasize modern statistical methods involving computationally intensive stochastic modeling, coupled with interdisciplinary applications in many fields. The department also offers courses in basic statistical and data science methods and advanced mathematical statistics.

The major in statistical science provides students with exposure to a broad range of statistical methods using tools from mathematical and computational sciences. Developing skills and expertise in problem articulation and solving, and the ability to appreciate and accommodate uncertainty in decision-making are central goals. Graduating students are well prepared and competitive for beginning careers in data science, analytics, business, technology, finance, law, medicine, and other fields, as well as for graduate study in statistical science and allied disciplines. The statistical science major is structured to teach students about the discipline of statistics and provide them with an opportunity to develop a substantial undergraduate research experience.

As part of the course of study, majors in statistical science can complete a research project under the supervision of a faculty member. These projects can involve the analysis of complex data, the development of new methods or theories, or the extension and evaluation of existing techniques. The Director of Undergraduate Studies can facilitate linking majors to a research mentor, who works with students to develop and complete the research project. Students can earn credit for their research by taking STA 393 or 493.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 12 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (4 units)**
 - Calculus I: MATH 21, or MATH 105L & 106L, or MATH 111L
 - Calculus II: MATH 22, or MATH 112L, or MATH 122L
 - Multivariable calculus: MATH 202, or MATH 212, or MATH 219, or MATH 222
 - Linear algebra: MATH 216, or MATH 218D, or MATH 221

- **Core Courses (6 units)**
 - STA 221L (STA 201L & 211 may also count)
 - STA 240L (STA 230, or STA 231, or MATH 228L may also count)
 - STA 323D
 - STA 332
 - STA 402L (STA 360L may also count)
 - STA 440L
- **Electives (2 units)**
 - Any 2 STA courses numbered 241 and above (STA 198L and STA 199L may also count)

Policies

- Up to one independent study in statistical science can be used toward the major with prior approval of the Director of Undergraduate Studies.
- Transfer credit for up to one core or two elective courses can be used toward the major.
- A maximum of two grades of D+, D, or D- can be counted toward the degree.

Statistical Science (BS)

Program Code: U-STA-BS

Degree Designation: Bachelor of Science

Department: Statistical Science

Website: stat.duke.edu/undergraduate/major

Program Summary

The growth in digital data sources, powerful computation, and artificial intelligence has sparked a revolution in how scientists across all disciplines do research, how policy-makers and government consider evidence-based policy, and how industry looks to create value. The Department of Statistical Science is helping to lead this revolution through our research, teaching, and service. In its teaching and research, the department's faculty members emphasize modern statistical methods involving computationally intensive stochastic modeling, coupled with interdisciplinary applications in many fields. The department also offers courses in basic statistical and data science methods and advanced mathematical statistics.

The major in statistical science provides students with exposure to a broad range of statistical methods using tools from mathematical and computational sciences. Developing skills and expertise in problem articulation and solving, and the ability to appreciate and accommodate uncertainty in decision-making are central goals. Graduating students are well prepared and competitive for beginning careers in data science, analytics, business, technology, finance, law, medicine, and other fields, as well as for graduate study in statistical science and allied disciplines. The statistical science major is structured to teach students about the discipline of statistics and provide them with an opportunity to develop a substantial undergraduate research experience.

As part of the course of study, majors in statistical science can complete a research project under the supervision of a faculty member. These projects can involve the analysis of complex data, the development of new methods or theories, or the extension and evaluation of existing techniques. The Director of Undergraduate Studies can facilitate linking majors to a research mentor, who works with students to develop and complete the research project. Students can earn credit for their research by taking STA 393 or 493.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 13 units total to complete the major. At least 34 units total to earn a degree.

- **Prerequisites (4 units)**
 - Calculus I: MATH 21, or MATH 105L & 106L, or MATH 111L
 - Calculus II: MATH 22, or MATH 112L, or MATH 122L
 - Multivariable calculus: MATH 202, or MATH 212, or MATH 219, or MATH 222
 - Linear algebra: MATH 216, or MATH 218D, or MATH 221
- **Core Courses (6 units)**
 - STA 221L (STA 201L & 211 may also count)
 - STA 240L (STA 230, or STA 231 may also count)
 - STA 323D
 - STA 332
 - STA 402L (STA 360L may also count)
 - STA 440L
- **Electives (3 units)**
 - Any 2 STA courses numbered 241 and above (STA 198L and STA 199L may also count)
 - May include up to 1 course from another quantitative department, with approval

Prerequisites

- **Linear algebra:** MATH 218 - Matrices and Vector Spaces (good option for many students) or MATH 221 - Linear Algebra and Applications (required for Math majors, preferred for Statistical Science students thinking about graduate study in statistics or mathematics).
 - The Concentration in Mathematical Statistics requires MATH 221, and the Concentration in Data Science requires MATH 218 or MATH 221. MATH 216 - Linear Algebra and Differential Equations also satisfies the linear algebra requirement; however, some students may find this course less engaging than MATH 218 or MATH 221.
- **Multivariable calculus:** MATH 219 - Multivariable Calculus, or MATH 212 - Multivariable Calculus, or MATH 222 - Advanced Multivariable Calculus, or MATH 202 - Multivariable Calculus for Economics.
 - The Concentration in Mathematical Statistics requires MATH 212, MATH 219, or MATH 222.

Concentrations

Students may elect to complete requirements in specified areas of concentration. Available areas of concentration in the statistical science major (BS) are data science and mathematical statistics. These concentrations are subsets of the major with specific choices of prerequisites and major courses.

- The **Concentration in Data Science** can be completed through the following course selection as part of the major:
 - The linear algebra prerequisite must be MATH 218 or MATH 221
 - Of the 3 electives:
 - At least 2 must come a list of Data Science courses, with at least 1 of the 2 from a subgroup of Data Science focused courses
 - Optionally, one of the electives can be an advanced COMPSCI course with pre-approval by the DUS
- The **Concentration in Mathematical Statistics** can be completed through the following course selection as part of the major:
 - The linear algebra prerequisite must be MATH 221
 - The multivariable calculus prerequisite must be MATH 212, MATH 219, or MATH 222
 - One of the electives must be either MATH 431 or MATH 531

Policies

- Up to one independent study in statistical science can be used toward the major with prior approval of the Director of Undergraduate Studies.
- Transfer credit for up to one core or two elective courses can be used toward the major.
- A maximum of two grades of D+, D, or D- can be counted toward the degree.

Theater Studies (AB)

Program Code: U-THEA-AB

Degree Designation: Bachelor of Arts

Department: Theater Studies

Website: theaterstudies.duke.edu/academics/major

Program Summary

The Department of Theater Studies offers students a variety of opportunities to study and practice theater, combining respect for history with immersion in contemporary issues, and intellectual engagement with creative expression. The faculty views theater as a form of human expression, shaped by social, economic, technological, personal, and artistic forces.

The major in theater studies offers students instruction in both 1) the relationship of theater to the cultures that produce and consume it through the study of dramatic literature, theater history, and performance studies; and 2) the collaborative theater arts (dramatic writing, acting, design, directing, production and theater technology), with a particular interest in the ways in which these two areas inform each other. While the theater studies major offers students preparation for graduate study, advanced theater training, or entry-level work in theater and related professions, it also offers a basic understanding and appreciation of the literature, history, and practice of theater for a student who desires a liberal arts education.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 10 units total to complete the major. At least 34 units total to earn a degree.

- **Gateway (1 unit)**
 - THEATRST 145S
 - THEATRST 187S
 - THEATRST 209
- **Area Studies Courses (6 units)**
 - Any 1 course from Area 1: Acting, Directing
 - Any 3 courses from Area 2: Dramatic Literature, Performance Studies, Theater History
 - Any 1 course from Area 3: Design, Theater Technology

- Any 1 course from Area 4: Dramatic Writing
- A comprehensive list of courses is available to students in the degree audit system.
- **Electives (3 units)**
 - Any 3 THEATRST courses 200-level and above

Departmental Graduation with Distinction

Students with at least a 3.5 average in their theater studies courses are eligible to apply for a project. Students must complete eleven courses in total to graduate with distinction in the major instead of the standard ten. All distinction courses count toward the major. Interested students should acquire the full policy for Graduation with Distinction in theater studies and an application form from the theater studies office. The student's proposed project needs the approval of the project supervisor and the director of undergraduate studies. All projects must be approved by March of the student's junior year.

A student may pursue a project in writing, directing, design, acting, dramatic literature, theater history, or performance studies. All projects must have a research and a substantial written component. They may also have a production component. Students are required to take either a research independent study or a home seminar in the fall and the Senior Colloquium in the spring.

The student's written work and production project will be reviewed by a committee (approved by the director of undergraduate studies) composed of the project supervisor, the director of undergraduate studies, and a third faculty member in theater studies or a related field. A meeting of the committee and the student to evaluate the project will be part of the evaluation process. The committee will decide whether the student receives distinction and what level of distinction the student will receive. See the Policy for Graduation with Distinction in theater studies for specific prerequisites.

Visual and Media Studies (AB)

Program Code: U-VIS-AB

Degree Designation: Bachelor of Arts

Department: Art & Art History Department

Website: aahvs.duke.edu/undergraduate/majors/visual-media-studies

Program Summary

Visual & Media Studies concerns all aspects of the production, circulation, and reception of visual images in culture, science, and society. Studies in visual culture engage you in the analysis of the effectiveness of the signs and symbols that give meaning to images, providing access to how visual meaning is socially, politically, and culturally constructed and received.

Visual Studies enable you to interpret the representations that shape the visual constructs of a particular society, to consider how systems of visual code differ from culture to culture, and the think through how the symbolic constructions of life organize how one sees, understands, and participates in natural and social environments. Most importantly, establishing a clear connection between the theory and the practice of visibility is the foundation of Visual & Media Studies.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 13 units total to complete the major. At least 34 units total to earn a degree.

- **Required Courses (3 units)**
 - VMS 220D
 - VMS 327S
 - VMS 499, or an approved seminar 400-level and above
- **Electives (10 units)**
 - Must include at least 2 media history or art history courses
 - Must include at least 2 arts practice and/or digital media production courses 200-level and above
 - Must include at least 3 core VMS courses taught by department faculty
 - May include up to 3 crosslisted courses in another department

The visual and media studies major requires thirteen courses, at least eight of which must be at the 200 level or above. Courses required for the major include VMS 202D (Introduction to Visual Culture), VMS 327S (Theories of Visual and Media Studies), and the capstone course VMS 499S (Visual and Media Studies Capstone) or an approved upper-level seminar, as well as ten additional courses to be divided as follows: two courses in visual and media history or art history; two courses in visual and media practice; three visual and media studies electives taught by faculty in AAHVS; and three previously approved crosslisted courses in another department.

The requirements and prerequisites for the major can be satisfied by courses taken at other institutions or abroad, but no more than two courses taken away from Duke may count toward the major. Further courses are available for credit at North Carolina State University and The University of North Carolina at Chapel Hill.

Concentration in Cinematic Arts

The concentration allows students deep engagement and mentoring in a range of approaches within the cinematic arts; from film/video production and digital imaging to the myriad ways in which time-based media can become an element of mixed media works and installation art; building on our distinctive strengths in film production and studies on campus. The concentration enables students to extend and focus their study within multiple fields of practice, film history, and theory.

- **Required Courses (2 units)**
 - VMS 202D, or CINE 201
 - CINE 499S
- **Visual and Media Theory (1 unit)**
 - CINE 203S
 - CINE 204S
 - VMS 327S
- **Cinematic Arts Practice (4 units)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Film Studies (2 units)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Electives (4 units)**
 - Any 4 ARTHIST, ARTSVIS, CINE, or VMS courses 100-level and above

Visual Arts (AB)

Program Code: U-ARTV-AB

Degree Designation: Bachelor of Arts

Department: Art & Art History Department

Website: aahvs.duke.edu/undergraduate/majors/visual-arts

Program Summary

Visual arts courses provide you with practical experience in painting, photography, drawing, digital imaging, interface design, book art, figure drawing, modeling and simulation, sculpture, and more. The major will enhance your understanding of art both within the history of culture and as individual human achievement. Lower-level courses emphasize the fundamentals of drawing, color, and form; upper-level courses encourage the students to develop a more individual conceptual approach and style, within the context of historical precedents and traditions.

A major in visual arts prepares you for further training as an artist, teacher, or architect, as well as in related fields such as advertising or design. Department offerings emphasize the analysis and articulation of visual concepts and processes as they relate to a broader education in the humanities and sciences.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 12 units total to complete the major. At least 34 units total to earn a degree.

- **Introductory Visual Arts (3 units)**
 - Any 3 100-level ARTSVIS courses
- **Advanced and Capstone Courses (2 units)**
 - ARTSVIS 496S
 - ARTSVIS 497S
- **Upper-Level Visual Arts Electives (4 units)**
 - Any 4 ARTSVIS courses 200-level and above
- **Art History and Visual & Media Studies Electives (3 units)**
 - Must include at least 1 ARTHIST course 100-level and above
 - Must include at least 1 VMS course 100-level and above
 - Must include at least 1 ARTHIST or VMS course 200-level and above

African & African American Studies Minor

Program Code: U-AFRI-MIN

Plan Type: Minor

Department: African & African American Studies Program

Website: aaas.duke.edu/undergraduate/major-minor

Program Summary

The Department of African & African American Studies offers undergraduate degrees that equip students with bodies of knowledge that emerge from studying the histories, cultures, and social realities of African and African American peoples, and others of African descent across the diaspora. Mastering this knowledge will also produce a broad-based interdisciplinary learning experience that contributes to an intellectual, personal, and social maturation process.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Introductory Courses (2 units)**
 - AAAS 102
 - AAAS 103
- **Electives (3 units)**
 - Any 3 AAAS courses 200-level or above
 - Must represent both Americas Focus or Africa Focus across the three-course selection
 - Must satisfy the following Areas of Knowledge across the three-course selection
 - Arts, Literatures, and Performance (ALP)
 - Civilizations (CZ)
 - Social Sciences (SS)

Art History Minor

Program Code: U-ART-MIN

Plan Type: Minor

Department: Art & Art History Department

Website: aahvs.duke.edu/undergraduate/minors/art-history

Program Summary

Art history is the study of works of art in the context of the broader social, political, and intellectual cultures of which they are a part. Studying art history develops the ability to evaluate and organize information, visual as well as verbal; it also enhances the faculties of creative imagination, precise observation, clear expression, and critical judgment. Students of art history acquire a sophisticated understanding of the theory and practice of artistic production and reception.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- Any 5 ARTHIST courses at the 200-level or above

Two transfer courses may count toward the requirements for the minor; courses taken Satisfactory/Unsatisfactory or Advanced Placement credits do not count toward the minor.

Asian American and Diaspora Studies Minor

Program Code: U-AADS-MIN

Plan Type: Minor

Department: Asian American and Diaspora Studies

Website: asianamericanstudies.duke.edu

Program Summary

The Asian American & Diaspora Studies Program (AADS) is an interdisciplinary academic program with a minor degree program dedicated to the studies of Asian America and the Asian diaspora. The program offers a curriculum that enriches the understanding of the long-neglected history, rich cultural heritage, and present position of Asian Americans and the Asian diaspora through pedagogy, public outreach, and programming.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Introductory Course (1 unit)**
 - AADS 198
 - AADS 201
- **Electives (4 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.

Asian and Middle Eastern Studies Minor

Program Code: U-AMES-MIN

Plan Type: Minor

Department: Asian & Middle Eastern Studies

Website: asianmideast.duke.edu/undergraduate/major-minors

Program Summary

A minor is offered to students interested in the study of language, literature, culture, and history of a particular region of Asia and the Middle East. The concentration of the minor is determined by the language of study: Arabic, Chinese, Hebrew, Hindi, Japanese, Korean, or Turkish.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

Two pathways available. Choose one.

- **Language Pathway to minor (5 units)**
 - at least 3 courses in one AMES language at the 200-level or above
 - at least 1 AMES literature/culture course at the 100-level or above
- **Literature and Culture Pathway to minor (5 units)**
 - at least 2 language courses in one AMES language at the 200-level or above
 - at least 2 AMES literature/culture courses at the 200-level or above

Study Abroad. Students who study abroad may transfer up to four language credits, but no literature and culture credits, toward the minor in Asian and Middle Eastern studies.

Biology Minor

Program Code: U-BIO-MIN

Plan Type: Minor

Department: Biology Department

Website: biology.duke.edu/undergraduate/minor

Program Summary

The biology major and minor and biology courses in a variety of areas are offered by the Department of Biology. Additional courses in the biological sciences are offered by the departments of evolutionary anthropology, chemistry, and psychology and neuroscience in Trinity College of Arts & Sciences; by the basic sciences departments in the School of Medicine; and by the Pratt School of Engineering and the Nicholas School of the Environment.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- Any 5 BIOLOGY courses at the 200-level and above
 - May include at most 1 approved independent study or tutorial course.
 - May include at most 1 course of a basic biological character in related departments.
 - A comprehensive list of elective courses is available to students in the degree audit system.

Brazilian and Global Portuguese Studies Minor

Program Code: U-BPST-MIN

Plan Type: Minor

Department: Romance Studies Department

Website: romancestudies.duke.edu/content/brazilian-global-portuguese-minor

Program Summary

Students minoring in Brazilian and Global Portuguese studies will acquire competency in spoken and written Portuguese, as well as familiarity with the literature and culture of Brazil and Portuguese-speaking regions.

A major in this program is also available. Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the minor. At least 34 units total to earn a degree.

- **Courses in Portuguese (3 units)**
 - Any 3 PORTUGUE courses at the 200-level and above with the (LG) Language attribute
- **Additional Courses (3 units)**
 - Any 3 PORTUGUE courses at the 200-level and above

At least 4 courses must be at the 300-level or above. Courses below the 300-level are restricted to PORTUGUE 203 or 203A, and 204. Duke-approved courses taught in Portuguese in study abroad programs may also count.

Study abroad information. Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Duke-Administered Summer Programs
 - Duke-in-Brazil: One course may be counted.
- Non-Duke-Administered Semester Programs: One course per semester may be counted.
- Non-Duke-Administered Summer Programs: One course may be counted.

Chemistry Minor

Program Code: U-CHEM-MIN

Plan Type: Minor

Department: Chemistry Department

Website: chem.duke.edu/undergraduate/minor

Program Summary

The study of Chemistry provides a fascinating and intellectually stimulating foray into the molecular underpinnings of the world around us, and through independent study, an opportunity to participate firsthand in cutting-edge research that spans a wide range of disciplines in the molecular sciences.

The chemistry minor is designed for students who do not wish to major in the field, but do wish to invest significant time in chemistry courses.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Intro Course (1 unit)**
 - CHEM 101DL
 - CHEM 110DL
 - CHEM 21
- **Electives (4 units)**
 - BIOCHEM 301
 - BIOCHEM 302
 - CHEM 20
 - CHEM 201DL
 - CHEM 202D
 - CHEM 202L
 - CHEM 210D
 - ENVIRON 540
 - ENVIRON 542

- PHARM 350
- PHARM 360
- PHARM 533
- Any CHEM course 211 and above

In certain cases, substitutions may be made for courses outside the chemistry department with the consent of the director of undergraduate studies.

Cinematic Arts Minor

Program Code: U-CINE-MIN

Plan Type: Minor

Department: Art & Art History Department

Website: aahvs.duke.edu/undergraduate/minors/cinematic-arts

Program Summary

The cinematic arts minor allows engagement in a range of approaches within film studies, moving image history, theory, and practices — from film/video production, and digital imaging to the myriad ways in which time-based media can become an element of mixed media works and installation art in historical and contemporary contexts.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- Any 5 CINE courses 200-level and above

Classical Archaeology Minor

Program Code: U-CLAR-MIN

Plan Type: Minor

Department: Classical Studies Department

Website: classicalstudies.duke.edu/undergraduate/minors

Program Summary

Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- Any 5 CLST courses in ancient art and archaeology
 - At least 3 courses must be taught by a primary or secondary member of the Department of Classical Studies
 - At least 3 courses must be at or above the 200-level

No courses used to fulfill the requirements of one minor may be used for another, or for the majors in classical languages or classical civilization.

Classical Civilizations Minor

Program Code: U-CLCZ-MIN

Plan Type: Minor

Department: Classical Studies Department

Website: classicalstudies.duke.edu/undergraduate/minors

Program Summary

Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- Any 5 CLST courses
 - At least 3 courses must be taught by a primary or secondary member of the Department of Classical Studies
 - At least 3 courses must be at or above the 200-level in at least 2 areas: literature, history, art and archaeology, and philosophy

No courses used to fulfill the requirements of one minor may be used for another, or for the majors in classical languages or classical civilization.

Computational Biology and Bioinformatics Minor

Program Code: U-CPSB-MIN

Plan Type: Minor

Department: Computer Science Department

Website: cs.duke.edu/undergrad/minor

Program Summary

The Department of Computer Science provides courses on the concepts of computing and computers, their capabilities, and their uses. In most courses, students make extensive use of the available computing facilities. Students who wish to take a single introductory course as part of their general education usually elect COMPSCI 94, 101, 102, or 116.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Prerequisites (2 units)**
 - Math: MATH 111L
 - Statistics: BIOLOGY 204, or MATH 112L, or MATH 122L, or any STA course 101 and above
- **Required Courses (2 units)**
 - COMPSCI 201
 - COMPSCI 260
- **Computer Science Course (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Biology Courses (2 units)**
 - BIOLOGY 201L, or BIOLOGY 203L
 - 1 additional biology course. A comprehensive list of courses is available to students in the degree audit system.

Computational Media Minor

Program Code: U-CMAC-MIN

Plan Type: Minor

Department: Art & Art History Department, Computer Science Department

Website: cmac.duke.edu/undergraduate/requirements

Program Summary

Computational Media, Arts & Cultures (CMAC) represents a collection of related activities at Duke University. Originating in the Department of Art, Art History & Visual Studies and the Mellon-supported Visual Studies Initiative, CMAC has evolved to include various graduate programs and collaborative research initiatives.

Students interested in areas such as digital humanities, digital media and algorithmic arts, computer interface and experience design, game studies, digital storytelling and data journalism, information aesthetics, computational media ethics, global media studies and related topics will find the program of interest.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Practice Courses (2 units)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Thematic Courses (2 units)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Quantitative Computer Science Course (1 unit)**
 - Any COMPSCI course 200-level and above, excluding COMPSCI 240, 247S, 255, and 342

Two transfer courses may count toward the requirements for the minor; courses taken Satisfactory/ Unsatisfactory or Advanced Placement credits do not count toward the minor.

Computer Science Minor

Program Code: U-CPS-MIN

Plan Type: Minor

Department: Computer Science Department

Website: cs.duke.edu/undergrad/minor

Program Summary

The Department of Computer Science provides courses on the concepts of computing and computers, their capabilities, and uses. In most courses students make extensive use of the available computing facilities.  - COMPSCI 101L
 - COMPSCI 102L
 - COMPSCI 116
- **Required Courses (2 units)**
 - COMPSCI 201
 - COMPSCI 210D, or COMPSCI 250D
- **Electives (3 units)**
 - Any 3 COMPSCI courses 200-level and above
 - May include at most 1 independent study course
 - May include at most 1 [social and policy oriented computing course](#)

Computer Science Artificial Intelligence Minor

Program Code: U-CPSAI-M

Plan Type: Minor

Department: Computer Science Department

Program Summary

The minor in computer science artificial intelligence prepares students to understand artificial intelligence (AI) within a broader context, and to wisely consider its growing social, cultural, and ethical impact.

This interdisciplinary minor builds bridges with a number of departments across Trinity. It offers students not majoring in computer science solid technical grounding in AI, machine learning (ML), computer science, mathematics, and statistics. It also asks students to explore the cognitive, ethical, historical, legal, linguistic, neuroscientific, philosophical, policy, or social aspects of AI.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Prerequisites (5 units)**
 - COMPSCI 101L
 - COMPSCI 230, or COMPSCI 232
 - MATH 212
 - MATH 216, or MATH 218, or MATH 221
 - MATH 230, or MATH 340
- **Required Courses (3 units)**
 - COMPSCI 201
 - COMPSCI 370D or 570
 - COMPSCI 371D, 571D, or 671D
- **Electives (2 units)**
 - At least 1 course must be outside COMPSCI, MATH, STA, or ECE
 - A comprehensive list of elective courses is available to students in the degree audit system.

Students may not receive this minor in addition to another major or minor offered by Computer Science.

Creative Writing Minor

Program Code: U-WRTG-MIN

Plan Type: Minor

Department: English Department

Website: english.duke.edu/undergraduate/minor-creative-writing

Program Summary

The English Department is home to the creative writing faculty at Duke. We offer introductory, intermediate, and advanced courses in fiction, poetry, and creative nonfiction, including specialized courses on topics that intersect with disciplines beyond English—Playwriting, Writing Across Borders, and Writing about Research. Our creative writing faculty are widely-published novelists, poets, playwrights, and essayists who have received many honors, including the National Book Award, a Guggenheim Fellowship, the Whiting Award, a McDowell Colony Fellowship, and the PEN/Hemingway Award. Creative writing workshops are intimate seminar courses where students can explore various genres at once or hone their craft in a single genre of writing. The department also offers opportunities for students to work directly with Blackburn Visiting Writers. In addition to The Blackburn Reading Series, which brings distinguished contemporary authors to campus each year, we host various readings and opportunities to interact with writers and offer annual undergraduate creative writing contests in fiction, poetry, and creative nonfiction.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Creative Writing Courses (4 units)**
 - A comprehensive list of courses is available to students in the degree audit system.
 - Must include at least 1 upper-level course numbered 320 and above
- **English Literature Course (1 unit)**
 - Any ENGLISH courses 200-level and above (creative writing courses and ENGLISH 313A do not count)

For English majors, two courses will be allowed to overlap. Only one of the five courses may be taken at an institution other than Duke. Advanced Placement credits and courses taken on a Satisfactory/Unsatisfactory grading basis may not be used.

Cultural Anthropology Minor

Program Code: U-CA-MIN

Plan Type: Minor

Department: Cultural Anthropology Department

Website: culturalanthropology.duke.edu/undergraduate/degree-options

Program Summary

Cultural anthropology is a comparative discipline that studies human social life across the world's diverse peoples and cultures. Cultural anthropology is the science of contemporary life: it emphasizes how power, identity, inequality, and social justice shape everyday life and global processes. It uniquely bridges the social sciences and the humanities with its holistic approach. Cultural anthropologists at Duke conduct research on a wide range of urgent issues,

including racism, digital media, science and technology, ethnic identities, environment and climate change, health and medicine, music and performance, gender and sexuality, economic inequality, migration, sports, religion and myth, food politics, human rights, Indigenous sovereignty, and design. What unites these varied topics is a research method called ethnography. Ethnography is an empirical social research method focused on an engaged and community-based inquiry into everyday practices and how people make sense of them. It can involve participant observation, interviews, life histories, and action-oriented research, and is a widely applicable career skill. Ethnography reveals local solutions to global challenges.

The department offers a wide range of courses that introduce the discipline's core concepts and topics and that train students in ethnographic thinking, research, ethics, writing, and application. Courses in cultural anthropology often draw on in-depth case studies from different world areas to explore a specific topic. Faculty integrate their ethnographic fieldwork into courses, and the Department has special strengths in Africa and the African diaspora, Latin America, the Middle East, East Asia, South Asia, the United States, and Native North America.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Foundation Course (1 unit)**
 - CULANTH 101 or 101D
- **Additional Courses (4 units)**
 - Any 3 CULANTH courses 100-level and above
 - Any CULANTH course at any level

Dance Minor

Program Code: U-DAN-MIN

Plan Type: Minor

Department: Dance Department

Website: danceprogram.duke.edu/undergraduate/minor

Program Summary

The Duke University Dance Program focuses on dance as an integral part of the human experience and a medium for rigorous intellectual creativity. Our aim is to engage students in the profound potential for dance as embodied knowledge in the service of society. The Dance Program curriculum is designed to encourage the exploration of dance from interdisciplinary perspectives: historical, cultural, aesthetic, literary, technological, musical, scientific, and creative.

The Dance Program welcomes all students, regardless of the extent of their experience in dance. The curriculum provides opportunities to encounter dance traditions and movement experimentation as processes for discovery, communication, inquiry, and discourse. Students already deeply engaged in specific dance forms can explore and further enhance their physical, performance, and creative capacities. Students will experience dance as a mode for personal development and leadership and as a transformative force for social action. As the landscape of dance continues to evolve, Duke Dance Program students will gain the knowledge and skills to impact the nature and function of dance in contemporary society and reimagine the future of performance. They will move into action, agency, and sustainability with tools that can transform relationships locally and globally.

Students are encouraged to enroll in a summer session with the American Dance Festival. One course credit earned at the American Dance Festival may be counted toward the requirements of the minor.

Through the Duke in New York Arts Program, a student has the opportunity in the fall semester of the junior or senior year to pursue the study of the arts in New York City. Appropriate courses taken at New York University may fulfill a requirement of the minor.

A major in dance is also available. Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Course (1 unit)**
 - DANCE 101
- **Dance Courses (5 units)**
 - Any 5 DANCE courses 100-level and above

Earth and Climate Sciences Minor

Program Code: U-ECS-MIN

Plan Type: Minor

Department: Earth and Climate Sciences

Website: nicholas.duke.edu/academics/undergraduate-programs/earth-climate-sciences

Program Summary

The Earth and Climate Science minor is for students interested in the science of how planet Earth works, and creating scientific solutions to earth and environmental challenges such as climate change, water use, sustainable development of mineral resources, clean energy production, as well understanding Earth's long geological and biological evolution.

The Division of Earth and Climate Sciences offers introductory and advanced courses in climatology, coastal processes, geology, water sciences, hydrology, geomorphology, physical oceanography, petrology, geological history, and energy. The minor is administered by the Nicholas School of the Environment.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Gateway Course (1 unit)**
 - ECS 101
 - ECS 103
- **ECS Courses (4 units)**
 - Any 4 ECS courses 200-level and above

Economics Minor

Program Code: U-ECON-MIN

Plan Type: Minor

Department: Economics Department

Website: econ.duke.edu/undergraduate/minor/economics

Program Summary

Economics courses develop the critical and analytical skills essential for understanding economics and institutions, in both their contemporary and historical settings. Although no particular vocational or professional goal is emphasized, these courses provide the academic background necessary for positions in industry, for work in many branches of government service, for law school, and for graduate study in business administration, economics, and the social sciences.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Core Courses (2 units)**
 - ECON 101D
 - ECON 201D
- **Electives (3 units)**
 - Any ECON or FECON course 200-level and above
 - At least 2 courses must be 300-level and above (ECON 204D, 205D, and 210D may also count)
 - May not include ECON 500-549

Education Minor

Program Code: U-EDUC-MIN

Plan Type: Minor

Department: Education Department

Website: educationprogram.duke.edu/undergraduate/minor

Program Summary

The minor in education is designed to provide students who are majoring in arts and sciences disciplines with opportunities to combine coursework in their majors with academic and field-based experiences focused on the complex social, psychological, economic, scientific, technological, historical, political, and cultural issues that impact education, schooling, teaching, and learning throughout the lifespan.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Core Courses (2 units)**
 - EDUC 101
 - EDUC 240
- **Electives (3 units)**
 - Any 3 EDUC courses 200-level and above (EDUC Focus courses may also count)

Only one of the five courses may be taken at an institution other than Duke.

University Teacher Preparation Programs

The Duke University Teacher Preparation Programs offer secondary teacher licensure programs at both the undergraduate and master's levels and an elementary licensure program at the undergraduate level. A common conceptual framework—preparing knowledgeable and skilled instructors who conduct themselves professionally and ethically as they practice reflective teaching—links the Teacher Preparation Programs. As students complete the general education requirements of Trinity College and of a selected major, they may also fulfill the requirements of an approved Duke Teacher Preparation Program and become licensed to teach. Licensure by the Duke-approved program is authorized through the State Board of Education in North Carolina and is reciprocal with most states. A license to teach along with an undergraduate degree is required by most public school systems and recommended by many independent schools. Duke University is accredited by the North Carolina Department of Public Instruction (DPI) and the Council for the Accreditation of Educator Preparation and has reciprocal approval for initial licensure with most of the fifty states. Title II data is available upon request.

Brief descriptions of two undergraduate programs based on bachelor of arts or bachelor of science degrees (secondary school teaching and elementary teaching) follow. The Master of Arts in Teaching Program is also available.

Secondary School Teaching. The Program in Education offers secondary school teacher licensure programs in English, mathematics, social studies, and science. Prospective teachers are advised to consult with the academic advisors in their majors and the secondary program director concerning their interest in teaching and this licensure program.

Interested undergraduate students may apply to the secondary school teaching program beginning in the sophomore year. Students are accepted by competitive criteria into a program that includes education courses with field experiences in local schools and an intensive senior spring semester teaching practicum. During the practicum, students teach high school classes in their respective disciplines under the supervision of an experienced mentor teacher and a university professor.

Upon successful completion of the senior year spring semester practicum and the four-year Trinity College undergraduate degree, students earn a teaching license and a minor in education.

Elementary School Teaching. Undergraduate students who plan to teach young children (kindergarten through sixth grade) may become eligible for licensure to teach while at Duke in addition to completing any academic major offered by Trinity College. The Elementary School Teaching Program provides students with opportunities to examine critical issues in public education and engage with K-6 schools through supervised field experiences in diverse classroom settings. The senior spring capstone semester includes a student teaching practicum in a local public school in Durham in addition to courses on curriculum design and implementation.

Interested undergraduate students may apply to the Elementary School Teaching Program beginning in the sophomore year. Students are selected by competitive criteria for participation in the program.

Upon successful completion of the senior year spring semester practicum and the four-year Trinity College undergraduate degree, students earn a teaching license and a minor in education.

Electrical and Computer Engineering Minor

Program Code: U-ECE-MIN

Plan Type: Minor

Department: Pratt School of Engineering, Electrical & Computer Engineering Department

Website: ece.duke.edu/undergrad/degrees/minor/ece

Program Summary

The educational mission of the Department of Electrical and Computer Engineering is to graduate electrical and computer engineers who embody excellence in a broad sense. We expect our graduates to advance within industry positions or in graduate study, or to carry the attributes of an engineering education into other disciplines. The electrical and computer engineering program of study must include mathematics and basic sciences, fundamentals, and applications in several engineering sciences, and team-based experience in the process of design, where theory is applied in the context of real needs and limitations, and where judgment must be exercised. Our electrical and computer engineering graduates should be able to think critically when solving problems and managing tasks and communicate effectively in multidisciplinary professional environments. To be a responsible member of the

engineering profession, each graduate must be aware of social, ethical, environmental, and economic factors and constraints on engineering activity, and must understand the importance of these matters in a global context. We aspire to have our graduates exhibit intellectual depth and creativity, uphold high ethical standards, and show a commitment to the betterment of society through service and professional work.

To this end, the specific program educational objectives that we look for in our graduates are that they

- advance professionally in their chosen field;
- contribute to their professional community and society; and
- engage in lifelong learning in professional and personal endeavors.

The electrical and computer engineering (ECE) program is fully accredited by the Engineering Commission of ABET and leads to a [bachelor of science in engineering \(BSE\)](#) degree. The ECE curriculum provides a solid foundation in mathematics, physical and life sciences, computer science, and humanities and social sciences that complements a set of twelve theme-based ECE courses.

The Department of Electrical and Computer Engineering has designed its curriculum based on the theme of integrated sensing and information processing (ISIP). The ISIP theme capitalizes on the collective research expertise of the ECE faculty and provides a coherent, overarching framework that links principles of ECE to each other and real-world engineering problems. The cornerstone of the ECE curriculum is the first course fundamentals of electrical and computer engineering, which has been designed to provide students with a holistic view of ECE by introducing concepts spanning how to interface sensors and systems with the physical world, how to transfer/transmit energy/information, and how to extract, manipulate, analyze, and interpret information. The integrated design challenge in this first course introduces students to team problem-solving and motivates the in-depth study of ECE concepts in subsequent terms. Each of the four follow-on core courses focuses on a specific subfield of ECE (digital systems, microelectronics, sensing and waves, signals, and systems), and integrates lateral and vertical connections to other courses through the use of thematic examples. Following the five core courses are seven ECE technical electives that include a culminating engineering design course where teams of students address a significant real-world problem or opportunity.

The ECE curriculum emphasizes creative problem-solving through open-ended design challenges in many courses. Working in teams, students collaborate to utilize and develop their individual and collective technical, management, and leadership skills to design, simulate, build, and test components and systems to meet a set of specifications, often defined by industry standards.

Students have the option to pursue two or more areas of concentration, depending on personal interests. The upper-level technical electives, which extend the breadth and depth of the ECE core curriculum, provide a firm foundation for future technical accomplishment and for effective problem-solving in the diverse fields that our graduates pursue.

The flexibility of the ECE curriculum enables students and their faculty advisors to tailor a unique educational experience for every student. This may include a semester abroad; a second major, minor, or certificate program; and/or a research experience with a faculty member. The most popular second majors are computer science and biomedical engineering. Other popular second majors include mathematics, economics, and physics. Interests such as pre-medicine, pre-law, art, music, psychology, and social sciences can be accommodated through individually designed programs. Students are encouraged to take more than the minimum required courses in the sciences and the liberal arts, as is fitting at an engineering school in a university with a strong liberal arts tradition.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Core Courses (3 units)**
 - ECE 110L
 - ECE 230L
 - ECE 250D
 - ECE 270DL
 - ECE 280L
- **Upper-Level Courses (2 units)**
 - Any 2 ECE courses 300-level and above
 - May include at most 1 independent study
 - May not include courses used toward the major
 - May not include courses with content substantially equivalent to courses in the major

Energy Engineering Minor

Program Code: U-ENE-MIN

Plan Type: Minor

Department: Pratt School of Engineering, School of Engineering

Website: pratt.duke.edu/academics/undergrad/majors-minors/energy

Program Summary

The energy engineering minor at Duke adds breadth, depth, and diversity to enrolled students' educational experience by providing rigorous exposure to the fundamentals of energy engineering. The program's objective is to prepare graduates to:

- engage in engineering careers in diverse areas with particular emphasis on energy-related matters;
- pursue graduate education and research in energy engineering or energy-related fields; and
- integrate energy concepts in their primary engineering discipline and/or optimize the use of energy within their professional pursuits and in society.

Go to [Programs by Department](#) to view all related programs.

Eligibility

All Duke engineering undergraduates are eligible to participate in the energy engineering program and qualify for the minor. Completion of the minor is noted on the student's academic transcript.

Academic Requirements

At least 6 units total to complete the minor. At least 34 units total to earn a degree.

- **Core Course (1 unit)**
 - ENRGYEGR 310
 - ME 461
- **Energy Engineering Areas (4 units)**
 - Must include at least 1 course in Generation and Delivery
 - Must include at least 1 course in Conversation and Efficiency
 - A comprehensive list of courses is available to students in the degree audit system.
- **Capstone (1 unit)**
 - EGR 424L

English Minor

Program Code: U-ENGL-MIN

Plan Type: Minor

Department: English Department

Website: english.duke.edu/undergraduate/minor-english

Program Summary

Duke's English Department offers a major and minor in English and a minor in creative writing. The program is designed to:

- convey broad historical knowledge of English, American, and other Anglophone literatures,
- cultivate a sophisticated habit of critically engaging literary and cultural texts,
- create a shared understanding of major problems, trends, and methods of literary and cultural analysis, and
- develop your ability to pose questions and organize knowledge in productive and original ways.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Seminar (1 unit)**
 - Any ENGLISH seminar course 200-level and above
- **Electives (4 units)**
 - Any 4 ENGLISH courses 200-level and above (ENGLISH 101S may also count)

Environmental Sciences and Policy Minor

Program Code: U-ENVS-MIN

Plan Type: Minor

Department: Nicholas School of Environment

Website: nicholas.duke.edu/academics/undergraduate-programs/environmental-sciences-policy

Program Summary

If you're passionate about the environment, love interdisciplinary learning, and want to use the skills and knowledge you acquire at Duke to blaze new and better approaches to climate change and other environmental issues, these are the majors/minors for you.

The minor in Environmental Sciences and Policy allows students to demonstrate an environmental science knowledge in addition to their own major. The minor consists of five courses.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Core Course (1 unit)**
 - ENVIRON 201
- **Electives (4 units)**
 - Any 4 ECS or ENVIRON courses 200-level and above

Evolutionary Anthropology Minor

Program Code: U-EVAN-MIN

Plan Type: Minor

Department: Evolutionary Anthropology

Website: evolutionaryanthropology.duke.edu/undergraduate/degree-programs/minor

Program Summary

Evolutionary Anthropology is an interdisciplinary department centering on the origin and evolution of human beings and their close biological relatives. The department and its course offerings cover a variety of research areas including primate behavior, ecology, cognition and genetics; primate and human disease ecology; human genetics, energetics, and physiology; paleoanthropology; and functional and comparative anatomy. Opportunities for independent research exist in departmental laboratories, including the Canine Cognition Center and the Primate Locomotion Lab. Additional research opportunities can be found at the Duke Lemur Center and the Lemur Center's Museum of Natural History.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Introduction to Evolutionary Anthropology (1 unit)**
 - EVANTH 101, or EVANTH 101D
- **Anatomy and Paleoanthropology (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Behavior, Ecology & Cognition (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Electives (2 units)**
 - Any 2 EVANTH courses 200-level and above

Financial Economics Minor

Program Code: U-ECOFIN-M

Plan Type: Minor

Department: Economics Department

Website: econ.duke.edu/undergraduate/minor/finance

Program Summary

Economics courses develop the critical and analytical skills essential for understanding economics and institutions, in both their contemporary and historical settings. Although no particular vocational or professional goal is emphasized, these courses provide the academic background necessary for positions in industry, for work in many branches of government service, for law school, and for graduate study in business administration, economics, and the social sciences.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- Prerequisites (2 units)
 - Statistics: BME 244L, or ECON 104D, or STA 111, or STA 130L, or STA 210, or STA 210L, or STA 230, or STA 240L, or STA 432
 - Math: MATH 202D, or MATH 212, or MATH 216, or MATH 219, or MATH 222
- Core (3 units)
 - ECON 101D
 - ECON 201D
 - FECON 372
- Electives (2 units)
 - Any 2 courses FECON 300-level and above, or FMKT 200-level and above, or from a selected list of courses
 - A comprehensive list of elective courses is available to students in the degree audit system.

French Studies Minor

Program Code: U-FREN-MIN

Plan Type: Minor

Department: Romance Studies Department

Website: romancestudies.duke.edu/content/french-studies-minor

Program Summary

Students minoring in French will acquire a considerable degree of competence in the written and spoken language as well as knowledge of the literature and culture of France and the French-speaking world.

The department offers a wide array of courses in language, literature, and culture, and strongly encourages interdisciplinary work in French through courses emphasizing the relation between literature, the arts, history, and society.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Minor Courses (5 units)**
 - Any 5 FRENCH courses 300-level and above (FRENCH 204 may also count)

Study abroad information. Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Department-Administered Programs
 - Duke in France: A maximum of two courses with French course numbers at or above the 300-level per semester may be counted.
- Duke-Administered Summer Programs
 - Duke in Aix-en-Provence: French 212A counts as one course toward the minor.
 - Duke in Paris: Two courses may be counted toward the minor.
 - Duke in Provence: One course may be counted.
- Non-Duke-Administered Semester Programs: One course per semester may be counted.
- Non-Duke-Administered Summer Programs: One course may be counted.

Gender, Sexuality, and Feminist Studies Minor

Program Code: U-GSF-MIN

Plan Type: Minor

Department: Gender, Sexuality, and Fem Stu

Website: gendersexualityfeminist.duke.edu/undergraduate/major-minors-requirements

Program Summary

The Department of Gender, Sexuality, and Feminist Studies at Duke University is part of a historical educational enterprise dedicated to the study of identity as a complex social phenomenon.

Since its founding in 1983, the GSF endeavor, whose name has changed as ideas in the field have changed, has continuously explored new research that considers gender and sexuality in relation to race, class, nation and other axes of difference or inequality. In the classrooms as in our research, we reach across knowledge divisions between historical, political, economic, cultural, representational, technological, and scientific analysis to offer students innovative methods and theories that broaden the reach of their studies and their understanding of everyday life and the world.

Gender, Sexuality, and Feminist Studies (GSF) examines gendered and sexual identities, relations, practices, dynamics, and institutions on multiple scales. Our approach is interdisciplinary, intersectional, and transnational. Specifically, our wide-ranging courses and training help students employ a variety of research and reading methodologies drawn from traditional disciplines and the now expansive archives of feminist and sexuality scholarship; examine gender and sexuality in relation to other systems of hierarchy; and are not limited to the study of gender and sexuality in the US. A key part of Gender, Sexuality and Feminist Studies involves teaching students to connect personal experiences with the social systems that produce and shape them, while being intellectually sensitive to the historical, cultural, political, and geographic setting. Our courses and assignments prioritize expansion of students' critical reading and thinking skills, participation capacities, and writing and creative abilities. The department is particularly known for training students in feminist theory across the curriculum and through many events that include invited guests. In addition, we host a Feminist Connections social event each term for undergraduates and faculty to interact.

For additional information on the department, visit the website at gendersexualityfeminist.duke.edu.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Course (1 unit)**
 - GSF 299S
- **GSF-Housed Courses (3 units)**
 - Must include at least 1 GSF course numbered 100-199
 - Must include at least 2 GSF course 200-level and above (GSF 499S may not count)
- **Elective (1 unit)**
 - Any 1 GSF course 200-level and above (GSF 499S may not count)

See the GSF webpage for other information, including the required GSF minor form: gendersexualityfeminist.duke.edu/undergraduate/major-minors-requirements.

German Minor

Program Code: U-GER-MIN

Plan Type: Minor

Department: German Studies

Website: german.duke.edu/undergraduate/major-minor

Program Summary

Students majoring in German develop language skills, become knowledgeable about the literature and culture of German-speaking areas, and acquire analytic and interpretive abilities. The combination of language skills with the ability to navigate across cultures is excellent preparation for a variety of professions in business, government, engineering, law, education, and academia. Double (second) majors are also encouraged and supported. Numerous opportunities are available, including Global Education programs, interdepartmental majors, Fulbright and German Academic Exchange Service (DAAD) scholarships, independent research and independent studies, and internships, both before and after graduation. Students interested in a major should consult the director of undergraduate studies.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **German Courses (5 units)**
 - Any 5 GERMAN courses 200-level and above
 - Must include at least 4 courses taught in German

All Duke in Berlin courses taught in German at the 200-level and above, semester and summer, may count toward the minor as courses taught in German.

Global Culture & Theory Minor in the Literature Program

Program Code: U-LIT-MIN

Plan Type: Minor

Department: The Program in Literature

Website: literature.duke.edu/undergraduate/minor

Program Summary

The Global Culture & Theory minor in The Program in Literature offers Duke students an opportunity to complement their major field of concentration—whether it be computer science, neuroscience, environmental studies, economics, music, or mathematics—with a suite of courses designed to thematize the larger cultural contexts of their scholarly interests.

For more information, visit literature.duke.edu.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Course (1 unit)**
 - LIT 201
- **Core Courses (3 units)**
 - Any 3 courses taught by instructors with primary, secondary, or joint appointments in Literature
 - A comprehensive list of courses is available to students in the degree audit system.
- **Elective Course (1 unit)**
 - A comprehensive list of elective courses is available to students in the degree audit system.

Global Health Minor

Program Code: U-GLHL-MIN

Plan Type: Minor

Department: Global Health

Website: globalhealth.duke.edu/programs/undergraduate-programs

Program Summary

The global health minor is designed for students who want to explore pressing health challenges around the world and understand how their own field of study can contribute to solutions. The minor equips students with frameworks to think critically about the social, environmental, political, and economic forces that shape health outcomes globally. Through interdisciplinary coursework and applied learning opportunities, students gain tools to analyze complex health problems and consider how their disciplinary perspectives - from engineering to public policy to the humanities - can help improve health in diverse settings.

Open to students across all majors, the global health minor complements a wide range of academic paths.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Course (1 unit)**
 - GLHLTH 101
- **Ethics Course (1 unit)**
 - GLHLTH 210
 - GLHLTH 241
 - GLHLTH 341
 - GLHLTH 345
 - GLHLTH 373
- **Electives (3 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.

Greek Minor

Program Code: U-GRK-MIN

Plan Type: Minor

Department: Classical Studies Department

Website: classicalstudies.duke.edu/undergraduate/minors

Program Summary

Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Greek Courses (5 units)**
 - Any 5 GREEK courses
 - Must include at least 3 GREEK courses 250-level and above (GREEK 291 does not count)

History Minor

Program Code: U-HIST-MIN

Plan Type: Minor

Department: History Department

Website: history.duke.edu/undergraduate/minor

Program Summary

The history minor allows students specializing in another department or program to enrich their studies with an historical perspective. History courses provide an opportunity to investigate the past, gain perspective on the present, and improve their critical faculties. History provides an integrating principle for the entire learning process, and students of history gain a sense of human development, an understanding of fundamental and lasting social processes, and a feeling for human interrelatedness. History courses train the mind by improving skills in the rigorous analysis of evidence as well as helping you to communicate effectively and with imagination. Those who graduate with a major or minor in history are to be found in all walks of life and all fields of the economy, society, and culture.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Any 5 HISTORY courses (5 units)**
 - Must include at least 3 courses 200-level and above
 - Must include at least 4 Core History Courses as identified on the departmental website or approved by DUS

One transfer credit may be used to meet the requirements for a minor. Advanced Placement (AP) and International Baccalaureate (IB) credits cannot be used to fulfill your minor requirements. One S/U-graded course may count toward the requirements for the minor (assuming a "Satisfactory" grade).

Inequality Studies Minor

Program Code: U-HIST-INE

Plan Type: Minor

Department: History Department

Website: history.duke.edu/inequality-studies-minor

Program Summary

The Inequality Studies minor is a joint collaboration between the Samuel DuBois Cook Center on Social Equity and the Department of History. The minor is a way for students to advance their understanding of the causes and consequences of inequality and pursue research around issues of social equity across a range of social science methods. The minor can be completed independent of, or alongside, a major in History. Inequality Studies minors, in fact, come from across departments in both the sciences and humanities.

Academic Requirements

At least 6 units total to complete the minor. At least 34 units total to earn a degree.

- **Core (3 units)**
 - HISTORY 288
 - HISTORY 323

- PUBPOL 435
- **Gateway (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.
- **Inequality Studies Elective Courses (2 units)**
 - Must include at least 1 course 200-level and above
 - Must include at least 1 course 300-level and above
 - A comprehensive list of elective courses is available [here](#), or to students in the degree audit system.

Courses taken S/U and AP credits do not count toward the minor. For History majors who want to minor in Inequality Studies, three minor electives are allowed to overlap with the requirements for the major. For Sociology majors who want to minor in Inequality Studies, two minor electives are allowed to overlap with the requirements for the major.

Questions? Email the Director of the Inequality Studies Minor, [Adam Hollowell](#).

Italian Studies Minor

Program Code: U-ITAL-MIN

Plan Type: Minor

Department: Romance Studies Department

Website: romancestudies.duke.edu/undergraduate/minors/italian-studies

Program Summary

Students minoring in Italian develop language skills in their social and cultural contexts.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the minor. At least 34 units total to earn a degree.

- **Any 6 ITALIAN courses (6 units)**
 - Must include at least 4 courses 300-level and above
 - Must include at least 3 courses taught in Italian, or taken concurrently with an Italian preceptorial or tutorial
 - Must include 1 course from 1 of the following areas: Medieval, Renaissance, Modern/Contemporary, Linguistics
 - A comprehensive list of courses is available to students in the degree audit system.

Study abroad information. Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Department-Administered Programs
 - In English (Duke in Florence & Duke in Venice): A maximum of one course may be counted toward the core-course requirement.
- Duke-Administered Summer Programs
 - In the language (Duke in Bologna): Two courses may be counted.
 - In English (Duke in Venice): One course may be counted toward the core-course requirement.
- Non-Duke-Administered Semester Programs in Italy
 - All courses taught entirely in Italian: A maximum of two courses per semester may be counted.
 - Not all courses taught in Italian: A maximum of one course per semester may be counted.
- Non-Duke-Administered Summer Programs
 - Courses taught in Italian: One course may be counted.

Journalism and Media Minor

Program Code: U-JAM-MIN

Plant Type: Minor

Department: DeWitt Wallace Center for Media & Democracy

Website: dewitt.sanford.duke.edu/academicprograms/jam

Program Summary

The Journalism and Media minor is administered by the DeWitt Wallace Center for Media & Democracy in the Sanford School of Public Policy. The minor offers students interested in the intersection of media, journalism, and democracy an opportunity to advance their understanding of the complex and ever-evolving media and information environment and ways in which this environment is affecting politics, culture, and public policy. The minor provides professional and analytical skills for students interested in journalism-related career paths, as well as for students interested in career paths related to media, technology, public affairs, and public policy. Journalism and Media Studies minors come from across departments in both the sciences and humanities.

There is no major available in Journalism and Media (JAM).

Academic Requirements

At least 6 units total to complete the minor. At least 34 units total to earn a degree.

- **Core (1 unit)**
 - JAM 371
- **Journalism & Media Practicum Course (1 unit)**
 - JAM 363
 - JAM 364S
 - JAM 365S
 - JAM 367S
- **Media & Democracy Course (1 unit)**
 - Courses are identified each semester on the departmental [courselist](#)
- **Electives (3 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Internship**

Latin Minor

Program Code: U-LAT-MIN

Plan Type: Minor

Department: Classical Studies Department

Website: classicalstudies.duke.edu/undergraduate/minors

Program Summary

Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Latin Courses (5 units)**
 - Any 5 LATIN courses
 - Must include at least 3 LATIN courses 250 and above (LATIN 291 does not count)

Linguistics Minor

Program Code: U-LING-MIN

Plan Type: Minor

Department: Linguistics Department

Website: linguisticsprogram.duke.edu/minor

Program Summary

From the earliest philosophers to modern neuroscientists, researchers from a wide range of disciplines have explored a diverse range of issues concerning the human capacity for language and the diversity of the world's languages. Linguists work at the intersection of these issues and define linguistics as the science of language and languages. During the past 150 years, linguists have developed a variety of theoretical paradigms to describe and explain language history, dialect variation, cross-cultural similarities and differences, the neurological processing and production of language, and the evolutionary emergence of language.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Linguistics Courses (5 units)**
 - Any 5 LINGUIST courses

- Must include at least 3 LINGUIST courses 200-level and above
- LINGUIST 201 and LINGUIST 202 are recommended

Machine Learning and Artificial Intelligence Minor

Program Code: U-ECE-MLAI

Plan Type: Minor

Department: Pratt School of Engineering, Electrical & Computer Engineering Department

Website: ece.duke.edu/undergrad/degrees/minor/ml-ai

Program Summary

The Minor in Machine Learning & Artificial Intelligence provides undergraduates with an understanding of the core concepts of ML and AI, as well as a rigorous and coherent exposure to both fundamental theories and applications.

The Minor in Machine Learning & Artificial Intelligence requires the completion of a minimum of five (5) technical courses.

This education offering is an outgrowth of Duke ECE's [global research leadership](#) in AI and machine learning.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Fundamental Courses (3 units)**
 - ECE 480
 - ECE 580
 - ECE 682D, or ECE 687D
- **Electives (2 units)**
 - ECE 585
 - ECE 588
 - ECE 661
 - ECE 684
 - ECE 685D
 - COMPSCI 527
 - MATH 412
 - MATH 465
 - STA 340
 - STA 360

Minor requirement details. Courses that are used to fulfill the student's primary major may not be double-counted toward the minor. Courses with content substantially equivalent to courses in the student's primary major may not be counted toward the minor. Students with credit for any of the Fundamental Courses (e.g., exact or equivalent course taken to satisfy a requirement of the primary major) may substitute additional Upper-Level Focus courses from the approved list above. The Director of Undergraduate Studies in ECE must approve such exceptions. At most one independent study course (approved the DUS in ECE) may be used to fulfill one of the upper-level elective requirements.

Prerequisites. It is expected that a student pursuing a Minor in Machine Learning & Artificial Intelligence will satisfy all prerequisites for each course selected for their minor program. This will typically involve completion of courses in math, statistics, and computer science, which are prerequisites for the fundamental and elective courses. Specifically, the following prerequisite knowledge is assumed:

- Mid-level programming course (e.g., COMPSCI 201)
- Linear algebra (e.g., MATH 216, 218, 221)
- Introductory statistics (e.g., EGR 238L, ECE 380, ECE 555, STA/MATH 230, STA 240L)

Exceptions may be granted by the Director of Undergraduate Studies in ECE, for example, if a student's preparation is deemed equivalent to the prerequisite.

Marine Science and Conservation Minor

Program Code: U-MSC-MIN

Plan Type: Minor

Department: Marine Science & Conservation

Website: nicholas.duke.edu/academics/undergraduate-programs/marine-science-conservation

Program Summary

The Marine Science and Conservation majors and minor are offered through the Division of Marine Science and Conservation in the Nicholas School of the Environment. The majority of the Division of Marine Science and Conservation faculty are resident at the Marine Laboratory in Beaufort, NC. Additional courses in marine science are offered in the Trinity College of Arts and Sciences and in the Divisions of Environmental Science and Policy and Earth and Climate Science in the Nicholas School of the Environment, and the Pratt School of Engineering.

The Duke University Marine Lab provides students with a unique experiential opportunity to live and study in Beaufort for a full academic semester (fall or spring) or during two summer terms. The program emphasizes small class sizes, independent research projects, and integrated classroom, laboratory, and field experiences. Students have daily access to the surrounding marine environment and to modern scientific equipment including a shared-use molecular laboratory, and the Marine Robotics and Remote Sensing (MARSS) Lab.

Residential undergraduate courses are offered year-round (fall, spring, and summer sessions I and II) at the Duke Marine Lab. Fall and spring courses include travel courses which offer students opportunities for extended travel with Duke faculty to Mexico, Puerto Rico, Singapore, the US Virgin Islands, or other domestic or international locations. Small class size and an island setting facilitate rewarding student-faculty interactions.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Gateway (1 unit)**
 - MARSCI 201
- **Core (1 unit)**
 - MARSCI 202
 - MARSCI 203
 - MARSCI 204A
- **Electives (3 units)**
 - Any 3 MARSCI courses numbered 205 and above

Mathematics Minor

Program Code: U-MATH-MIN

Plan Type: Minor

Department: Mathematics Department

Website: math.duke.edu/undergraduate/minor

Program Summary

The director of undergraduate studies can be consulted for additional information and advice on course selection. The Handbook for Mathematics Majors and Minors, published by the department, can be used as a guide in developing a coherent program of study consistent with professional goals.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Prerequisites (1 unit)**
 - MATH 212
 - MATH 219
 - MATH 222
- **Required Course (1 unit)**
 - MATH 230, 333, 340, 401, 411, 421, 431, 451S, or 487, or any MATH course 500-level and above
- **Additional Minor Courses (4 units)**
 - Any 4 MATH courses numbered 213 and above (MATH 112L, 122, 219, and 222 do not count)

Medical Sociology Minor

Program Code: U-MEDSOC-M

Plan Type: Minor

Department: Sociology Department

Website: sociology.duke.edu/undergraduate/minors

Program Summary

Medical sociology is the study of social and cultural causes and consequences of health and illness. Major areas of investigation include doctor/patient relationships, the unequal distribution of health, cross-cultural understandings of well-being, the socioeconomics of healthcare, and public health policies. The medical sociology minor prepares students for careers in medicine, research, and public health, as well as the behavioral and social science portions of the Medical College Admission Test (MCAT).

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Core (1 unit)**
 - SOCIOL 250
 - SOCIOL 361
- **Electives (4 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.
 - Additional courses may count with approval from the director of undergraduate studies.

Medieval and Renaissance Studies Minor

Program Code: U-MDVL-MIN

Plan Type: Minor

Department: Medieval and Renaissance Studies Program

Website: cmrs.trinity.duke.edu/undergraduate/major-and-minor

Program Summary

The Program in Medieval and Renaissance Studies is designed to provide the student with a well-rounded understanding of the historical, cultural, and social forces that shaped the medieval and Renaissance periods. The program is divided into four areas of study: fine arts (art and music); history; language and literature (English, French, German, Greek, Italian, Latin, and Spanish); and philosophy and religion.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - Participate in the Medieval and Renaissance Focus Program
 - Complete 2 courses that satisfy the [Medieval and Renaissance Cultures](#) requirement
- **Electives (3 units)**
 - Any 3 courses taken in any distribution suiting the student's interests in consultation with a Medieval and Renaissance Studies advisor

Music Minor

Program Code: U-MUS-MIN

Plan Type: Minor

Department: Music Department

Website: music.duke.edu/undergraduate/minor

Program Summary

Music is among the most ancient of human pursuits and has long been viewed as a crucial part of education. As a discipline, it has its own logic and grammar in the understanding of which the mind is stretched and tested. Students at Duke encounter a variety of approaches to music that encompass the many ways that we create, perform, and comprehend it.

The Score-focused Music Minor serves students who are engaged in music making, widely and broadly conceived, or who are invested listeners and would like to develop their critical thinking about music, improve their listening and analytical skills, expose themselves to a range of practices, styles, and ideas about music, and explore avenues towards the professional world of music. Score-focused Music Minor is designed to complement Listening-focused Music Minor which caters to students who are focused on aural practices. For Score-focused Music Minor, students will pursue aspects of theory, history, and performance, and supplement with courses in their field of interest. Reading music notation is a requirement for Score-focused Music Minor.

Courses fall into three broad categories: theory and composition, literature, history, and ethnomusicology, and applied music (performance). Within these are included many kinds of instruction, such as lessons in performance and composition; theory; history and literature lectures and seminars; electronic music classes; ensembles; practical laboratory work (such as ear-training or Listening Lab), coaching sessions in chamber music; and classes in improvisation. Students' musical activity can vary widely across the spectrum. Almost every student has some personal involvement with music, and the courses aim to further that involvement, whether it is a simple hobby or a compelling interest.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5.5 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Course (1 unit)**
 - MUSIC 261
- **Music History (1 unit)**
 - MUSIC 255S
 - MUSIC 256S
 - MUSIC 257
 - MUSIC 258
- **Performance (.5 units)**
 - 2 semester courses in performance from among: MUSIC 101-108, 203-213, 318, 319, 401, 418 (excluding MUSIC 210-3)
- **Electives (3 units)**
 - Any 3 MUSIC courses numbered 214 and above (1 of MUSIC 130, 137, 140, 143, or 144 may also count)

Students minoring in Music must complete the core requirements for a letter grade. For a list of Music courses offered, please refer to music.duke.edu/courses.

Waiver of Music Minor Requirements

A request for waiver of any requirement for the music minor, together with supporting documentation where appropriate, should be submitted to the Director of Undergraduate Studies (DUS). After reviewing the request, the DUS may decide that the student needs to take a departmental examination in the area before a final decision can be made. Waived courses earn no credit towards the 34-course graduation requirement, nor will grades for them appear on your transcript.

Graduation with Distinction in Music Performance for Non-Majors

Candidates for distinction in music performance for non-majors apply to the Director of Undergraduate Studies by April 1 of their junior year and are admitted to the program by a faculty committee (the thesis advisor must be a regular rank Music department faculty member) on the basis of recent live recordings. During the senior year the student will enroll in MUSIC 401 (Advanced Study in Performance) both semesters. A distinction in musical performance project consists of (a) a full recital supported by a high-quality audio or video recording as documentation of the event; and (b) a written component, either in the form of an analytical paper or another organized commentary on the recital. One semester of research independent study (MUSIC 393) is required in preparation of the written component. To be awarded distinction a student must maintain a GPA of 3.5 in the core music department courses, and a 3.3 GPA overall. For more information, consult the music department website at music.duke.edu/undergraduate/graduation-with-distinction.

Music Minor: Listening-Focused

Program Code: U-MUSL-MIN

Plan Type: Minor

Department: Music Department

Website: music.duke.edu/minor-music-listening-focused

Program Summary

Music is among the most ancient of human pursuits and has long been viewed as a crucial part of education. As a discipline, it has its own logic and grammar in the understanding of which the mind is stretched and tested. Students at Duke encounter a variety of approaches to music that encompass the many ways that we create, perform, and comprehend it.

The Listening-focused Music Minor hopes to serve students who are engaged in music making, widely and broadly conceived, or who are invested listeners and would like to develop their critical thinking about music, improve their listening skills, expose themselves to a range of sounds and ideas about music, and explore avenues towards the professional world of musical entertainment. The Listening-focused Music Minor is designed to complement the Score-focused Music Minor which caters to students who read music notation. For the Listening-focused Music Minor, students may draw on Duke's student-initiated music-making opportunities, Durham's music offerings, or the Department's ensembles and lessons. Reading music notation is not a requirement for the Listening-focused Music Minor. However, the Listening-focused Music Minor is also available to students with notation skills who wish to expand the scope of their knowledge beyond their particular canonical expertise or to put their interests in dialogue with other musical histories or styles.

Attending to music—playing together, listening, dancing, talking—is a major preoccupation of student social life. The Score-focused Music Minor accommodates students' diverse musical interests and skills.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5.5 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Course (1 unit)**
 - MUSIC 163L
- **Course Cluster (4 units)**
 - Any 4 MUSIC courses 100-level and above
 - Must include at least 1 MUSIC course numbered 214 and above (excluding MUSIC 401)
- **Artistic Practice (.5 units)**
 - 2 semesters of MUSIC 114T, taken concurrently with an approved artistic practice (ensembles, lessons, sound production, composition, other)

Students minoring in Music must complete the core requirements for a letter grade. For a list of Music courses offered, please refer to music.duke.edu/courses.

Waiver of Music Minor Requirements

A request for waiver of any requirement for the music minor, together with supporting documentation where appropriate, should be submitted to the Director of Undergraduate Studies. After reviewing the request, the DUS may decide that the student needs to take a departmental examination in the area before a final decision can be made. Waived courses earn no credit towards the 34-course graduation requirement, nor will grades for them appear on your transcript.

Musical Theater Minor

Program Code: U-MUSTHE-M

Plan Type: Minor

Department: Theater Studies

Website: theaterstudies.duke.edu/academics/major

Program Summary

The Department of Theater Studies offers students a variety of opportunities to study and practice theater, combining respect for history with immersion in contemporary issues, and intellectual engagement with creative expression. The faculty views theater as a form of human expression, shaped by social, economic, technological, personal, and artistic forces.

The musical theater minor is offered to students specifically interested in developing artistic and critical skills in the field of musical theater. Courses are offered that focus on performing, writing, and directing musical theater—as well as on the history and theory of the genre.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - THEATRST 109
 - THEATRST 201S
- **Musical Theater Practice (2 units)**
 - THEATRST 211
 - THEATRST 212
 - THEATRST 215
 - THEATRST 241
 - THEATRST 255S
 - THEATRST 347S
- **Additional Course (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.

Neuroscience Minor

Program Code: U-NEUR-MIN

Plan Type: Minor

Department: Neuroscience

Website: psychandneuro.duke.edu/undergraduate/neuroscience/requirements

Program Summary

Like the inner workings of the brain itself, neuroscience synthesizes discovery from diverse sources of knowledge. The undergraduate curriculum in neuroscience reflects this interdisciplinary perspective and challenges students to explore knowledge across levels of analysis: from the molecular and cellular level, through the level of neural circuits within which cells are organized and interconnected, and toward the level of behavior where the functions of neural circuits and systems, including human cognition, are manifested. A comprehensive understanding of neuroscience requires knowledge of each level and integrative learning across levels.

The principal strength of this program is that it provides rich opportunities for undergraduate students to study brain science with faculty from diverse disciplines who bring their complementary perspectives and expertise to the classroom and laboratory. Thus, the undergraduate curriculum in neuroscience is truly a joint, interdisciplinary major/minor that draws faculty and courses from several departments, chiefly the Department of Psychology and Neuroscience in the Trinity College of Arts & Sciences. Students may also elect to pursue faculty-mentored research and scholarship wherever brain science discovery happens at Duke, including the Duke University School of Medicine. Indeed, the broad impact of neuroscience discovery now extends beyond the academic disciplines in the natural sciences to spaces where neuroscientists collaborate and regularly interact with experts in ethics, law, business, social sciences, philosophy, engineering, the fine arts and performing arts, and the humanities. Accordingly, our neuroscience curriculum reflects this broad interdisciplinary platform for discovery and learning, with a rich offering of coursework and experiences that reflect the exciting growth of neuroscience and its increasing relevance to human flourishing, the diverse challenges facing society, and the health and wellness of all life.

Thus, the mission of the Undergraduate Studies in Neuroscience program is to *educate* learners in the liberal arts and sciences with a character-forming, value-driven, transdisciplinary understanding of Neuroscience and its impact on health and society; and to *inspire* student-investigators by integrating learners into a community of discovery on the frontiers of knowledge in the brain sciences so that they *flourish* in their well-being, discovery, life-long learning, and service to society.

The Minor in Neuroscience encourages students to acquire a sufficient foundation for studies in the field that align with their interests and aspirations for discovery in the brain sciences.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Foundational Courses (2 units)**
 - NEUROSCI 206L
 - NEUROSCI 217D
 - NEUROSCI 223
- **Electives (3 units)**
 - Any 3 NEUROSCI courses 200-level and above

Minor in Neuroscience details. The Minor in Neuroscience for students in Trinity College requires a minimum of five neuroscience courses: two (of three) foundational courses, and three elective courses. Four of the courses must be 200-level or higher. No more than two of the five courses required for the minor may be used to satisfy the requirements of another major, minor, or certificate.

Philosophy Minor

Program Code: U-PHIL-MIN

Plan Type: Minor

Department: Philosophy Department

Website: philosophy.duke.edu/undergraduate/major-minor

Program Summary

The undergraduate program in the Department of Philosophy acquaints students with the content and structure of philosophical theory in various areas. Classes encourage discussion so that students can engage actively in the philosophical examination of problems.

Course offerings fall into two general categories: the systematic and the historical. In a systematic treatment, the organization of a course reflects the problems presented by the subject matter of that course, as in logic, ethics, and metaphysics. Historical courses direct attention more to the order of development in the thought of a particular philosopher (Plato, Aristotle, Kant) or in a historical period. In all courses, reading of the works of philosophers acquaints the students with the important and influential contributions to the definition and solution of philosophical issues.

The problems raised in philosophy about various fields of the arts and sciences involve questions that these particular disciplines typically neglect. In consideration of such problems, students will acquire some understanding and perspective of the major areas of human intellectual endeavor. Philosophical comprehension is in this way an essential part of a complete education.

Philosophy provides a sound preparation for the demands of many professions. For example, the precision of argument and broad acquaintance with intellectual traditions emphasized in philosophy form an excellent basis for the study of law.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Philosophy Courses (5 units)**
 - Any 5 PHIL courses
 - Must include at least 3 PHIL courses 200-level and above

Photography Minor

Program Code: U-PHTG-MIN

Plan Type: Minor

Department: Art & Art History Department

Website: aahvs.duke.edu/undergraduate/minors/photography

Program Summary

Visual competence and media literacy are central to critical thinking in the twenty-first century. The historical study of art, architecture, and visual culture provides the understanding and the language necessary for analyzing images, objects, and buildings and for recognizing and theorizing their social impact. The making of art develops the ability to think critically and visually, resolve spatial problems, and apply concepts to the creation of images, objects, multimedia installations, actions, and a variety of new socially interactive relations in culture. Visual studies enable understanding of the role of images in everything from the fine arts and the psychology of perception to popular culture and the media (advertising, television, photography, film, video, the Internet, and computer imagining), as well as in all professional and social contexts from the courtroom and hospital to the lecture hall and street.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Photography Courses (5 units)**
 - Any 5 PHOTO courses 200-level and above

Physics Minor

Program Code: U-PHYS-MIN

Plan Type: Minor

Department: Physics Department

Website: physics.duke.edu/undergraduate/physics-major-minor/minor

Program Summary

The undergraduate program in physics gives you an opportunity to explore how modern science is unraveling some of the mysteries that have held humankind in awe since the earliest of times. It is designed to acquaint you with the fundamental aspects of our description of nature and to develop analytic and laboratory skills.

The physics minor is intended as a pathway for students to build educational depth in physics as a broad field or in subdiscipline as a way to augment another major.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Fundamental of Physics Courses (2 units)**
 - PHYSICS 161D (PHYSICS 141L, or PHYSICS 151L may also count)
 - PHYSICS 162D (PHYSICS 142L, or PHYSICS 152L may also count)
- **Required Course (1 unit)**
 - PHYSICS 264L

- **Electives (2 units)**
 - Any 2 PHYSICS courses 200-level and above

Political Science Minor

Program Code: U-POLI-MIN

Plan Type: Minor

Department: Political Science Department

Website: polisci.duke.edu/undergraduate/offerings/requirements

Program Summary

Courses in political science for undergraduates are offered in six subfields: political institutions; political economy; security, peace and conflict; political behavior and identity; political methodology; and political philosophy. More information on courses and subfields is found at polisci.duke.edu/undergraduate.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Political Science Courses (5 units)**
 - Any 5 POLSCI courses
 - Must include at least 2 POLSCI courses 300-level and above

Psychology Minor

Program Code: U-PSY-MIN

Plan Type: Minor

Department: Psychology & Neuroscience

Website: psychandneuro.duke.edu/undergraduate/psychology/requirements

Program Summary

The study of behavior and its determinants lies at the heart of understanding numerous systems ranging from the biological to the economic and social. Psychology majors and minors apply their understanding of human behavior to varied professional fields including mental and physical health care, research, education, policy, law, finance, consulting, marketing, and business management. Understanding of psychological concepts is also helpful for fields relating to engineering and data analysis.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Courses (1 unit)**
 - PSY 101
- **Biological or Cognitive Course (1 unit)**
 - PSY 102
 - PSY 106
 - PSY 107
- **Abnormal or Developmental Course (1 unit)**
 - PSY 103
 - PSY 104
 - PSY 105
- **Electives (2 units)**
 - 2 PSY courses meeting the following criteria:
 - Must include at least 1 course 200-level and above
 - May include at most 1 of the following: PSY 232, UNIV 101, or UNIV 104

PSY 89S and FOCUS courses do not count toward the psychology minor.

Religion Minor

Program Code: U-REL-MIN

Plan Type: Minor

Department: Religious Studies Department

Website: religiousstudies.duke.edu/undergraduate/minor

Program Summary

The Department of Religious Studies explores the social organization and impact of religion in ancient and modern cultures through critical theory, literary and visual studies. Our students come to understand the basics of different belief systems; the history of religion; the related philosophies; interpretations of ancient texts; the material practices involved; and how religion intersects with journalism, culture, business, and contemporary politics. This not only gives them a sense of their place as an individual in our global society, but also offers perspective to navigate any career they choose to pursue. Course numbers designate topic and subject area rather than sequence.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Religion Courses (5 units)**
 - Any 5 RELIGION courses 100-level and above
 - Must include at least 1 RELIGION course 200-level and above
 - Must include at least 4 RELIGION core courses
 - A comprehensive list of elective courses is available to students in the degree audit system.

Russian Minor

Program Code: U-RUS-MIN

Plan Type: Minor

Department: Slavic and Eurasian Studies

Website: slaviceurasian.duke.edu/undergraduate/minor/russian-culture-language

Program Summary

The Department of Slavic and Eurasian Studies has a strong commitment to increasing the language proficiency of its students regardless of their level at matriculation, to facilitate deep knowledge of the cultural context of each language represented, to help students develop their own scholarly interests and research abilities, and to acquaint students with trends in literary, linguistic, and cultural theory. Areas of specialization include nineteenth- and twentieth-century Russian and Soviet literature, Polish language and literature, semiotics, gender studies, film and media studies, legal and business Russian language, translation, Slavic linguistics, contemporary Russian and Polish literature, scientific and scholarly Russian language, stylistics, and Russian and Polish cultural history. Languages taught include Russian, Polish, and Ukrainian.

Resources for study include a state-of-the-art language laboratory with video facilities and a humanities computing facility, reception of daily Russian television programming, and an exchange program with St. Petersburg University. The department offers several Focus seminars and maintains a cooperative relationship with Duke programs in Linguistics, Global Cultural Studies in Literature, Gender, Sexuality, and Feminist Studies, and Cultural Anthropology; the Center for Slavic, Eurasian and East European Studies; and related programs at The University of North Carolina at Chapel Hill.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Russian Courses (5 units)**
 - Any 5 departmental courses
 - Must include at least 3 courses 200-level and above
 - Must include at least 2 Russian language courses

Russian and East European Literature in Translation Minor

Program Code: U-RLT-MIN

Plan Type: Minor

Department: Slavic and Eurasian Studies

Website: slaviceurasian.duke.edu/undergraduate/minor/russian-literature-translation

Program Summary

The Department of Slavic and Eurasian Studies has a strong commitment to increasing the language proficiency of its students regardless of their level at matriculation, to facilitate deep knowledge of the cultural context of each language represented, to help students develop their own scholarly interests and research abilities, and to acquaint students with trends in literary, linguistic, and cultural theory. Areas of specialization include nineteenth- and twentieth-century Russian and Soviet literature, Polish language and literature, semiotics, gender studies, film and media studies, legal and business Russian language, translation, Slavic linguistics, contemporary Russian and Polish literature, scientific and scholarly Russian language, stylistics, and Russian and Polish cultural history. Languages taught include Russian, Polish, and Ukrainian.

Resources for study include a state-of-the-art language laboratory with video facilities and a humanities computing facility, reception of daily Russian television programming, and an exchange program with St. Petersburg University. The department offers several Focus seminars and maintains a cooperative relationship with Duke programs in Linguistics, Global Cultural Studies in Literature, Gender, Sexuality, and Feminist Studies, and Cultural Anthropology; the Center for Slavic, Eurasian and East European Studies; and related programs at The University of North Carolina at Chapel Hill.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Required Courses (5 units)**
 - Any 5 courses approved by the director of undergraduate studies
 - Must include at least 3 courses 200-level and above

Sociology Minor

Program Code: U-SOC-MIN

Plan Type: Minor

Department: Sociology Department

Website: sociology.duke.edu/undergraduate/minors

Program Summary

Sociology is an exciting field of scientific study that explores how societies are organized, change, and affect individuals and groups. Sociologists use diverse empirical methods to answer questions about social life, such as: What impact does racial segregation have on students' educational outcomes? Who gets sick and why? How do social networks affect business profits? What are the social causes of criminal behavior? And how can we harness big data to understand political divides?

Duke Sociology prides itself on creating an engaging curriculum that develops students' analytic and communication skills, provides in-depth knowledge of multiple research practices and substantive areas, and hones tools needed for a wide variety of professions. Sociology majors and minors apply their understanding of social problems and institutions in careers in medicine, education, business, law, non-profit, research, the arts, and government.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Sociology Courses (5 units)**
 - Any 5 SOCIOL courses
 - Must include at least 4 courses 200-level and above

Software Engineering Minor

Program Code: U-SWE-MIN

Plan Type: Minor

Department: School of Engineering

Website: ece.duke.edu/academics/undergrad/minors/#sw

Program Summary

Operated through Duke Engineering's [Department of Electrical & Computer Engineering \(ECE\)](#), the software engineering minor provides a roadmap to select five courses for students to dive deeply and broadly into software engineering topics. The minor is open to students across all disciplines at Duke.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Fundamental Courses (3 units)**
 - 1 software engineering foundation course (ECE 351)
 - 1 HCI/UX course (ECE 653, or ECE 657, or another approved HCI/UX course)
 - 1 systems course (ECE 353, or ECE 356, or ECE 553, or ECE 560, or ECE 566)
- **Upper-Level Focus Courses (2 units)**
 - A comprehensive list of courses is available to students in the degree audit system.

Spanish Minor

Program Code: U-SPAN-MIN

Plan Type: Minor

Department: Romance Studies Department

Website: romancestudies.duke.edu/spanish-studies-minor

Program Summary

Did you know that Spanish is the second largest world language as a vehicle of international communication and the third as an international language of politics, economics and culture? Or that about 330 million people in the world speak Spanish as their first language? Or that Spanish is the official language in 21 countries and is expected to be the first language of 50% of the population of the United States within 50 years? Our department sponsors summer study abroad programs (Duke in Spain, Duke in Chile, Duke in Costa Rica, and Duke Intensive Spanish in Alicante) and one semester/year study abroad program (Duke in Madrid). We encourage students to plan early in order to attain an advanced level in Spanish and to work into their study plans the possibility of studying abroad in a Spanish-speaking country.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Survey Courses (1 unit)**
 - SPANISH 332
 - SPANISH 333
 - SPANISH 334
 - SPANISH 335
 - SPANISH 336
- **Additional Electives (4 units)**
 - Any 4 SPANISH courses 300-level and above taught in Spanish
 - Must include at least 2 units 400-level and above

Study abroad information. Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Department-Administered Programs
 - Duke in Madrid: A maximum of two courses may be counted.
 - Duke in Madrid-Intermediate: SPANISH 314A counts as one course credit.
- Duke-Administered Summer Programs
 - Duke in Chile: SPANISH 315A counts as one course credit.
 - Duke in Costa Rica: SPANISH 306A counts as one course credit.
 - Duke in Spain: SPANISH 439SA counts as two course credits.
- Non-Duke-Administered Semester Programs: One course per semester may be counted.
- Non-Duke-Administered Summer Programs: One course may be counted.

Statistical Science Minor

Program Code: U-STA-MIN

Plan Type: Minor

Department: Statistical Science

Website: stat.duke.edu/undergraduate/minor

Program Summary

The growth in digital data sources, powerful computation, and artificial intelligence has sparked a revolution in how scientists across all disciplines do research, how policy-makers and government consider evidence-based policy, and how industry looks to create value. The Department of Statistical Science is helping to lead this revolution through our research, teaching, and service. In its teaching and research, the department's faculty members emphasize modern statistical methods involving computationally intensive stochastic modeling, coupled with interdisciplinary applications in many fields. The department also offers courses in basic statistical and data science methods and advanced mathematical statistics.

The minor is designed to provide students in other disciplines with opportunities for exposure and skill development in advanced statistical methods. These are useful for conducting research in applied subjects, and they are appealing to employers and graduate schools seeking students with quantitative skills. The minor is flexible, so that students from most majors can find a path to the minor that serves their needs.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Prerequisites (3 units)**
 - Calculus I: MATH 21, or MATH 105L & 106L, or MATH 111L
 - Calculus II: MATH 22, or MATH 112L, or MATH 122L
 - Multivariable calculus: MATH 202, or MATH 212, or MATH 219, or MATH 222
- **Core Courses (3 units)**
 - STA 210L, or STA 221L
 - STA 240L, or STA 230, or STA 231, or MATH 231
 - STA 332, or STA 360L, or STA 402L
- **Electives (2 units)**
 - Any 2 STA courses numbered 100-level and above
 - Must include at least 1 STA course 200-level and above

Policies

- Up to one independent study in statistical science can be used toward the minor with prior approval of the Director of Undergraduate Studies.
- Transfer credit for up to one core or two elective courses can be used toward the minor.
- A maximum of two grades of D+, D, or D- can be counted toward the degree.

Theater Studies Minor

Program Code: U-THEA-MIN

Plan Type: Minor

Department: Theater Studies

Website: theaterstudies.duke.edu/academics/major

Program Summary

The Department of Theater Studies offers students a variety of opportunities to study and practice theater, combining respect for history with immersion in contemporary issues, and intellectual engagement with creative expression. The faculty views theater as a form of human expression, shaped by social, economic, technological, personal, and artistic forces.

Courses are designed to offer minors and nonmajors the opportunity to deepen their understanding and appreciation of the theater. Guiding the work of the faculty is the belief that the theater is a collaborative art form that reaches out to other disciplines.

Courses in acting, directing, design, technical theater, dramatic literature, theater history, and performance studies are complemented by productions of plays, past and present. This combination of academic coursework and production experience is a hallmark of the department's approach.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Gateway (1 unit)**
 - THEATRST 187S
- **Electives (4 units)**
 - Any 4 THEATRST courses 100-level and above

Visual and Media Studies Minor

Program Code: U-VIS-MIN

Plan Type: Minor

Department: Art & Art History Department

Website: aahvs.duke.edu/undergraduate/minors/visual-media-studies

Program Summary

Visual & Media Studies concerns all aspects of the production, circulation, and reception of visual images in culture, science, and society. Studies in visual culture engage you in the analysis of the effectiveness of the signs and symbols that give meaning to images, providing access to how visual meaning is socially, politically, and culturally constructed and received.

Visual Studies enable you to interpret the representations that shape the visual constructs of a particular society, to consider how systems of visual code differ from culture to culture, and think through how the symbolic constructions of life organize how one sees, understands, and participates in natural and social environments. Most importantly, establishing a clear connection between the theory and the practice of visibility is the foundation of Visual & Media Studies.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Visual and Media Studies Courses (5 units)**
 - Any 5 VMS courses 200-level and above

Two transfer courses may count toward the requirements for the minor; courses taken Satisfactory/Unsatisfactory do not count toward the minor.

Visual Arts Minor

Program Code: U-ARTV-MIN

Plan Type: Minor

Department: Art & Art History Department

Website: aahvs.duke.edu/undergraduate/minors/visual-arts

Program Summary

Visual arts courses provide practical experience in painting, photography, drawing, digital imaging, interface design, book art, figure drawing, modeling and simulation, sculpture, and more. Department offerings emphasize analyzing and articulating visual concepts and processes as they relate to a broader education in the humanities and sciences. Lower-level courses focus on the fundamentals of drawing, color, and form, while upper-level courses encourage students to develop a more individual conceptual approach and style within the context of historical precedents and traditions

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- Visual Arts Courses (5 units)
 - Any 5 ARTSVIS courses 200-level and above

Two transfer courses may count toward the requirements for the minor; courses taken Satisfactory/Unsatisfactory or Advanced Placement credits do not count toward the minor.

Writing and Rhetoric Minor

Program Code: U-WRRH-MIN

Plan Type: Minor

Department: Thompson Writing Program

Website: twp.duke.edu/writing-minor

Program Summary

The minor in Writing and Rhetoric provides extended inquiry and practice in the ethics, habits of mind, promises, and complexities of writing, speaking, and rhetorics. The minor invites students to explore and build capacities with the nuances of communication across difference, disciplinary contexts, modalities, and interpersonal interactions and contexts. This minor also allows students to tailor pathways to complement students' academic interests.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 5 units total to complete the minor. At least 34 units total to earn a degree.

- **Core (1 unit)**
 - WRITING 201S
 - WRITING 202S
 - WRITING 203S
- **Electives (4 units)**
 - Must include at least 3 WRITING courses 200-level and above
 - Must include at least 2 writing intensive WR courses
 - May include at most 1 WRITING course numbered 102 and above
 - May include at most 1 course originating in another department, with approval

Aerospace Engineering Certificate

Program Code: U-AEREGR-C

Plan Type: Certificate

Department: Pratt School of Engineering, Mechanical Engineering & Materials Science Department

Website: mems.duke.edu/undergrad/degrees/certificates

Program Summary

The objective of this multidisciplinary program is to educate students in the engineering principles related to the conceptualization, design, analysis, and performance of aerospace vehicles and systems. This certificate program is available only to students enrolled in the Pratt School of Engineering.

The certificate program focuses on upper class courses. All engineering undergraduates are eligible to participate in the program and qualify for certification. Mechanical engineering is the host department; however, there is flexibility for majors in other departments to meet the program standards while maintaining program focus and quality. Two courses already required for the primary major are permitted.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 7 units total to complete the certificate. At least 34 units total to earn a degree.

- **Core Courses (2 units)**
 - ME 336L or CEE 301L
 - ME 344L
 - ME 431L
- **Required Course (1 unit)**
 - ME 472
- **Core Aerospace Electives (1 unit)**
 - ME 473
 - ME 536
 - ME 571
- **Electives (2 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Arts and Sciences Course in History, Public Policy, or Economics (1 unit)**

Architectural Engineering Certificate

Program Code: U-ARC-C

Plan Type: Certificate

Department: Pratt School of Engineering, School of Engineering

Website: cee.duke.edu/undergrad/degrees/certificates/architectural-engineering

Program Summary

The objective of this interdisciplinary program is to provide students with an understanding of the relationships between the design elements of buildings and construction processes.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Required Courses (4 units)**
 - CEE 311
 - CEE 411
 - CEE 422L
 - CEE 423L
- **Modern or Contemporary Architecture (1 unit)**
 - ARTHIST 103D
 - ARTHIST 285D
 - ARTHIST 286D
- **Electives (1 unit)**
 - A comprehensive list of elective courses is available to students in the degree audit system.

Carceral Studies Certificate

Program Code: U-CARC-C

Plan Type: Certificate

Department: Ethics & Society

Website: kenan.ethics.duke.edu/prison-engagement-initiative/carceral-studies-certificate

Program Summary

Mass incarceration is one of the most pressing issues of our day. The United States, home to only about 5% of the global population, houses nearly 25% of the world's prisoners. This alarming statistic reflects a systemic issue that extends far beyond the walls of correctional facilities. Mass incarceration has its roots in decades of policy decisions, social inequalities, and systemic biases that have disproportionately affected marginalized communities. It is something that touches each of us in one way or another. Almost half of Americans have had an immediate family member spend one night in jail. All of us, at some point in our lives, will have to make challenging decisions about when and whether to involve law enforcement when encountering an interpersonal problem. It is impossible to be a responsible citizen of the United States, much less someone involved in any way in the legal system, without understanding the nature and scope of the American carceral system.

Including a Gateway, Incarceration Nation, and a final Capstone in Carceral Studies, students will take a total of six undergraduate courses. Students will be encouraged to seek justice-related DukeEngage placements, internship and volunteer experiences, which can be counted as an elective course if approved in advance by the Certificate Director(s). Study abroad courses may also count so long as they are approved in advance.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Gateway Course (1 unit)**
 - SOCIOL 128CN
 - SOCIOL 228
- **Four Electives (4 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Capstone Seminar (1 unit)**
 - The Capstone class will be offered starting in the 2026–2027 academic year.

Child Policy Research Certificate

Program Code: U-CPRS-C

Plan Type: Certificate

Department: Child Policy Research

Website: childandfamilypolicy.duke.edu/education/child-policy-research-certificate

Program Summary

The goal of the certificate in child policy research is to provide undergraduates with the opportunity to engage in interdisciplinary inquiry to solve problems facing today's children and families. Because of the complexity of these problems, the certificate allows students the opportunity to study issues by incorporating the perspectives of numerous disciplines, including psychology, sociology, public policy, economics, and education. The certificate emphasizes engagement in empirical research; each student will work closely with a faculty member to produce an original research paper. Examples of

research topics that may be pursued with this certificate include social and economic inequalities in schooling, the pervasiveness of gang violence in high schools, or the long-term consequences of childhood obesity. The certificate program culminates in a capstone seminar, in which students build upon the research experience by exploring real-world implications and translating their scholarship to policy solutions.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Core Courses (4 units)**
 - CHILDPOL 250S
 - CHILDPOL 393
 - CHILDPOL 495S
 - 1 methodology course
 - CHILDPOL 590S
 - PSY 204L
 - PSY 309
- **Electives (2 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.

Two courses that are counted toward this certificate may also be used to satisfy the requirements of any major, minor, or other certificate program. Three of the courses that count toward the certificate may originate in a single department or program. More information is available at childandfamilypolicy.duke.edu/students/child-policy-research-certificate. The certificate director is available to provide additional information and guidance. Contact katie.rosanbalm@duke.edu.

Decision Sciences Certificate

Program Code: U-DECS-C

Plan Type: Certificate

Department: Decision Sciences

Website: decisionsciences.trinity.duke.edu/overview

Program Summary

The Decision Sciences Certificate focuses on how humans make decisions in a variety of contexts, including economic, political, and social choices. If you are interested in behavioral economics, game theory, machine learning, or neuroeconomics, this certificate will provide an interdisciplinary appreciation of how these separate fields approach decision-making. This will enable communication and collaboration across disciplinary boundaries and will allow you to engage in research with a broader perspective than that provided by any single major.

The goal of the curriculum is to provide a shared methodological and substantive framework that will allow students to participate in the interdisciplinary study of decision-making. Our expectation, though, is that students will arrive from and return to different departments and conduct research in their home departments. The cohorts produced by the certificate will provide these students with support and criticism from a variety of perspectives, however, and the hope is that this will result in stronger student research.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 8 units total to complete the certificate. At least 34 units total to earn a degree.

- **Foundations Course (1 unit)**
 - MATH 112L (MATH 22 may also count)
 - Any STA course 101 and above
- **Required Courses (3 units)**

Digital Intelligence Certificate

Program Code: U-DQ-C

Plan Type: Certificate

Department: Science & Society

Website: scienceandsociety.duke.edu/learn/undergraduate-programs/ss-certificate/digital-intelligence

Program Summary

The Digital Intelligence Certificate is an undergraduate, interdisciplinary course of study that equips students to develop foundational knowledge in computational technologies and their relationship to society. The certificate is targeted at all Duke students.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - SCISOC 256
 - SCISOC 498S
- **Electives (4 units)**
 - Must represent all elective areas: computational thinking; ethics and policy; representations, translation & communication; computation in practice
 - A comprehensive list of elective courses is available to students in the degree audit system.

Certificate details. Together, the core and electives will provide students with a broad understanding of emerging computational and data technology as well as the policy and ethics issues they raise. The capstone course will provide students a way to integrate what they have learned across the different core and elective areas, with a culminating project and a course that helps them learn to present the findings in a compelling and accessible way.

Before enrolling in the Capstone course, students must participate in a substantial, summer-long or semester-long experiential research project, also known as their Capstone Project. This can be accomplished either through participation in existing Duke programs such as Applied Ethics+, Climate+, Code+, CS+, Data+, Math+, DukeEngage, or through a substantial independent project, equivalent to a semester in length, developed in consultation with Certificate faculty and supervised by a faculty mentor.

Documentary Studies Certificate

Program Code: U-DOCST-C

Plan Type: Certificate

Department: Documentary Studies

Website: documentarystudies.duke.edu/undergraduate-certificate-documentary-studies

Program Summary

The goal of this interdisciplinary program is to introduce, broaden, and enhance the technical skills and the theoretical and ethical awareness of students who specialize in one or more of the following modes of community-based fieldwork: photography, oral history, audio, filmmaking, folklore, and ethnographic writing. Courses in this area are offered through the Center for Documentary Studies, and the departments of African and African American studies, art, cultural anthropology, arts of the moving image, history, and public policy studies. The Center for Documentary Studies also houses a number

of documentary projects that address issues of literacy, collaborative photography, oral history, and farm worker advocacy that students will be exposed to through their affiliation with this program. A major goal of this program is to connect student experience and creativity to community life. Documentary studies courses teach an arts-and-humanities-based fieldwork research methodology.

Achievement of the program's goal is facilitated by an integrated curriculum of required and elective courses that allow students to specialize in one or more areas of documentary work, and to complete a major documentary project under the guidance of participating faculty members. An active advisory procedure assists students in planning fieldwork projects and other learning opportunities. A certificate is available for students who complete program requirements. Participation in documentary studies courses, with the exception of the capstone course, is available to all undergraduates whether or not they seek the certificate.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - DOCST 101
 - DOCST 480S
- **Electives (4 units)**
 - Any 4 DOCST courses 100-level and above

Energy and the Environment Certificate

Program Code: U-ENRENV-C

Plan Type: Certificate

Department: Pratt School of Engineering, School of Engineering, Environmental Sciences

Website: nicholas.duke.edu/academics/certificate-programs/certificate-energy-environment

Program Summary

The undergraduate certificate in energy and the environment is designed to provide Duke undergraduates in both Trinity and Pratt with an understanding of the breadth of issues that confront our society in its need for clean, affordable, and reliable energy. An expertise in energy will expand the student's career options in the private, nonprofit, government, and academic sectors. In addition to integrative core and capstone courses, the certificate will expose students to the three key disciplines in the study of energy and the environment: markets and policy; environmental impacts and resources; and energy technology. The goal of the certificate is to develop innovative thinkers and leaders who understand the energy system as a whole and the important interconnections among policy, markets, technology, and the environment. Energy use is a multifaceted problem that draws upon the perspectives and expertise of a variety of disciplines; the certificate in energy and the environment is therefore similarly interdisciplinary.

Beyond traditional coursework, the certificate in energy and the environment will offer a variety of activities intended to provide students with a real-world perspective and hands-on experiences. These include field trips, guest speakers such as visiting executives and practitioners, research opportunities, and internships. Additional information may be obtained from the Nicholas Institute for Energy, Environment & Sustainability.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Core (1 unit)**
 - ENVIRON 231
- **Elective Courses (4 units)**
 - At least 1 course in Markets and Policy area
 - At least 1 course in Environment area
 - At least 1 course in Energy Science and Technology area
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Capstone (1 unit)**
 - ENERGY 395
 - ENERGY 396
 - EGR 424L

Ethics & Society Certificate

Program Code: U-ETHIC-C

Plan Type: Certificate

Department: Ethics & Society

Website: kenan.ethics.duke.edu/ethics-society-certificate

Program Summary

The goal of the undergraduate Ethics & Society Certificate is to provide students with an opportunity to pursue a rigorous cross-disciplinary study of ethics. Such a course of study requires familiarity with systematic ethical theories and traditions of moral wisdom and reflection, an understanding of how ethical issues have been framed across history and cultures, experience delving into ethical issues through literature and the arts, and insights into how ethical challenges are being conceptualized and negotiated in practice by policymakers, researchers, doctors, journalists, and others. Ethics cannot be isolated within one or two disciplines. It is an inherently cross-disciplinary inquiry that needs to draw on tools, methods, and contexts from multiple disciplines.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 4 units total to complete the certificate. At least 34 units total to earn a degree.

- **Cornerstone Course (1 unit)**
 - ETHICS 101
- **Capstone Seminar (1 unit)**
 - ETHICS 497S
- **Electives (4 units)**
 - At least 1 course in Philosophical Ethics
 - At least 1 course in Cross-Cultural Ethical Traditions
 - At least 1 course in either Ethics in Historical Perspective or Ethics in Literature and the Arts
 - A comprehensive list of elective courses is available to students in the degree audit system.
 - In the experiential pathway, students may replace 2 elective courses with experiences.
 - At least 1 faculty-mentored research experience amounting to at least 150 hours
 - At least 1 community-based field experience of at least 300 hours

See the ethics and society certificate program website for more information and additional certificate sequencing requirements and restrictions at kenan.ethics.duke.edu/ethics-society-certificate.

Global Development Engineering Certificate

Program Code: U-GBLDEV-C

Plan Type: Certificate

Department: Pratt School of Engineering, Civil & Environmental Engineering Department

Website: cee.duke.edu/undergrad/degrees/certificates/global-development

Program Summary

Global development engineering is focused on specific knowledge and skills related to planning, design, construction, and operation of engineered systems in under-resourced settings using appropriate technology to address issues of social justice and leveraging technological advances to benefit all of humanity, but especially marginalized populations. Duke's certificate in global development engineering seeks to prepare engineers and other international development professionals for careers in the field of sustainable international development partnering with marginalized or disadvantaged people groups to address both technical and more structural issues related to poverty, wealth inequality, health access, and economic empowerment.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

- **Introductory Course (1 unit)**
 - BME 230L
 - CEE 132L
 - ENVIRON 231
 - GLHLTH 101
- **Global Competency (3 units)**
 - At least 1 course from each of the following areas:
 - Language and Culture

- Ethics
 - Policy and Economics
- A comprehensive list of courses is available to students in the degree audit system.
- **Technical Tracks (2 units)**
 - At least 2 courses from one of the following tracks:
 - Water
 - Energy
 - Appropriate Technology
 - A comprehensive list of courses is available to students in the degree audit system.
- **Design and Implementation Capstone (1 unit)**
 - BME 462L
 - CEE 315-20
 - CEE 315-60
 - EGR 424L
- **Experiential Component**

Health Policy Certificate

Program Code: U-HLTHPL-C

Plan Type: Certificate

Department: Duke-Margolis Institute for Health Policy

Website: healthpolicy.duke.edu/undergraduate-students

Program Summary

Developed jointly by Duke-Margolis Institute for Health Policy and the Sanford School of Public Policy, this thematic certificate will provide undergraduate students with a cohesive program to study the policy foundations of the US health systems and health care. The program will be built on the Institute's strong interdisciplinary approach and include an introductory course on US health care systems, offer a range of health policy electives across campus, will include a large focus on the ability of policy to perpetuate and disrupt health inequities, and culminate in a capstone seminar. In addition, two substantial thematic experiences in health policy will be required. Students earning the certificate will gain health policy knowledge to apply in their careers and lived experiences.

More information is available at (healthpolicy.duke.edu). The certificate director is available to provide additional information and guidance. Contact the Faculty Director by email at beth.gifford@duke.edu.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 4 units total to complete the certificate. At least 34 units total to earn a degree.

- **Introductory Course (1 unit)**
 - HLTHPOL 165
- **Electives (2 units)**
 - May be drawn from a list of pre-approved electives or may be selected from outside this list with the approval of the Faculty Director
 - Neither of the two electives may count toward the certificate if it is taken before the introductory course
- **Co-Curricular Experiences**
 - 150-Hour Learning Experience
 - 300-Hour Learning Experience
 - E-Portfolio
- **Capstone (1 unit)**
 - HLTHPOL 480

Sequencing is an important feature of the certificate. Students should declare their intention to pursue this certificate as early as possible, but no later than the drop/add deadline in the fall of their junior year. Also, neither of the two electives may count toward the certificate if it is taken before the introductory course. Finally, the capstone course may not be taken until the introductory course, two elective courses, and the two learning experiences are completed.

Human Rights Certificate

Program Code: U-HMNRGT-C

Plan Type: Certificate

Department: Human Rights Program – Franklin Humanities Institute

Website: humanrights.fhi.duke.edu/human-rights-certificate

Program Summary

The goal of the undergraduate certificate in human rights is to provide students with an opportunity to pursue a rigorous interdisciplinary study of human rights. We will help cultivate life-long learners and engaged citizens who have a deep and nuanced understanding of human rights. This course of study requires foundational study in human rights history, theory, and policy issues, with particular attention to how the intellectual debates around rights translate into action in an increasingly globalized, interconnected world. Human rights cannot be isolated into one or even a few disciplines and its study must draw on the concepts and lived experience of scholars, practitioners, journalists and communities struggling to defend their rights.

Including a Gateway, Introduction to Human Rights, and a final Capstone in Human Rights, students will take a total of six undergraduate courses. Students will be encouraged to seek rights-related DukeEngage placements, internship and volunteer experiences, and to include study abroad courses as part of their certificate plan, so long as these courses have received prior approval from Duke and the Certificate Director. These elements will enrich a student's experience in the Capstone.

The certificate includes 1) a structured and interdisciplinary set of courses; 2) analytical, empirical, and applied elements; 3) education in the history and current practice of human rights in the United States and abroad; 4) exposure to key thinkers and debates about and within human rights, including the critique of human rights; 5) skills development in research and writing; 6) the application of knowledge toward real-world solutions; and 7) in-depth mentored research with faculty working in human rights.

Sequencing is a critical element in the study of human rights. Students are encouraged to enroll as soon as possible but no later than the end of Drop/Add in the fall of their junior year. Enrollment takes place after a student prepares a declaration of interest submitted to the Certificate Director.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Core (2 units)**
 - RIGHTS 104
 - RIGHTS 470S
- **Electives (4 units)**
 - Any 4 RIGHTS courses

Innovation and Entrepreneurship Certificate

Program Code: U-IECP-C

Plan Type: Certificate

Department: Innovation and Entrepreneurship

Website: entrepreneurship.duke.edu/education/undergrad-certificate

Program Summary

The goal of the undergraduate certificate in Innovation and Entrepreneurship is to provide students with a pathway to pursue a rigorous cross-disciplinary study of innovation and entrepreneurship that will be complementary to any major and enable students to be innovative and entrepreneurial in their pursuit of knowledge in service to society. The certificate requires an in-depth course of study examining the theories of innovation and entrepreneurship, coupled with hands-on practice in both areas. Innovation and entrepreneurship are, by their very nature, areas of cross-disciplinary inquiry, so the certificate will also draw on theory, contexts, and methods from across the disciplines.

The certificate builds on the already-existing emphasis of knowledge in service to society that is taking place within students' majors and co-curricular activities, to further enhance students' abilities to explore the complex problems being faced by our world and to develop innovative methods to address those problems. Cultivating such an innovative and entrepreneurial spirit will involve students developing the capacities of creativity, technical competencies, courage and resilience, reflection, and collaboration, acquired through a comprehensive undertaking of research, inquiry, experimentation, and experiential learning.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 4 units total to complete the certificate. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - I&E 352
 - I&E 499
- **Electives (2 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Co-Curricular Experiences**
 - 150-Hour Learning Experience
 - 300-Hour Learning Experience

- E-Portfolio

Sequencing is an important feature of the certificate. Students are required to apply to the certificate by the end of the add/drop period in the fall of their junior year. Successful application to the program includes four components: a) identification of the four courses and two thematically-related experiences the student plans to undertake; b) written essay outlining the logic and rationale for the pathway the student selected; c) written essay justifying the student's desire to pursue the certificate; and d) review, advisory input, and approval of the student's application by the Innovation and Entrepreneurship Certificate Admissions Committee.

Jewish Studies Certificate

Program Code: U-JEWIST-C

Plan Type: Certificate

Department: Jewish Studies

Website: jewishstudies.duke.edu/academics/undergraduate-studies

Program Summary

This program is sponsored by the interdisciplinary Duke Center for Jewish Studies. Participating departments and programs include Asian & Middle Eastern Studies, Classical Studies, International Comparative Studies, Cultural Anthropology, English, German Studies, History, Medieval and Renaissance Studies, Political Science, Religious Studies, and Gender, Sexuality, and Feminist Studies. A full range of courses is available in classical and modern Hebrew. Also, relevant courses in Jewish studies may be taken at The University of North Carolina at Chapel Hill.

The certificate program offers students the flexibility to design, with the aid of a faculty advisor, a curriculum that meets individual interests and talents.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Required Course (1 unit)**
 - JEWISHST 164S
- **Capstone Course (1 unit)**
 - JEWISHST 393
 - JEWISHST 394
- **Electives (4 units)**
 - Any 4 JEWISHST courses 100-level and above

Latino Studies Global South Certificate

Program Code: U-LSGS-C

Plan Type: Certificate

Department: Latino Studies Global South

Website: latinostudies.duke.edu/certificate

Program Summary

The undergraduate certificate in Latino/a studies in the Global South is administered by the Program in Latino/a Studies in the Global South. This interdisciplinary certificate is designed to provide students with comparative, historical, and cultural knowledge of peoples of Latin American descent living in the United States (and moving transnationally); understanding of the concepts of Hispanics/Latino/as, *latinidad* and *hispanidad*, and the Global South (and Global North); and insight into the construction and assertion of Latino/a identities, involving convergences and divergences, over space and time. This certificate program allows students to draw on both the strength and scope of Duke's offerings in Latino/a studies as well as complementary courses offered at The University of North Carolina at Chapel Hill, which offers an interdisciplinary minor in Latino/a studies.

In addition to offering courses and a certificate after completion of the requirements, the Program in Latino/a Studies in the global South offers a variety of supplemental educational opportunities, including lectures and events involving prominent scholars, artists, writers, musicians, and performers; financial assistance for student-organized academic discussions; conference awards; advising; and a resource room. Students are invited to use the Latino/a Studies Resource Room (Friedl Building 124) for study sessions and meetings with faculty, students, staff, and community members. Resources available in this room include encyclopedias, texts, novels, scholarly journals, videos, and music. Students may also take advantage of events, lectures, and an annual film festival hosted by the Center for Latin American and Caribbean Studies, which include Latino/a Studies content. Students may enroll in Spanish Service Learning courses as well as Duke-approved study away programs and DukeEngage programs that focus on Latino/a populations in the United States and/or that take place in various countries within Latin America.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Gateway (1 unit)**
 - LSGS 201
- **Electives (4 units)**
 - Any 4 courses from the [sample list](#), or other courses with at least 50% of course content on Latino/as or Latino/a Studies with approval from the program director
 - Must include at least 3 courses 200-level and above
 - Must include at least 1 humanities course
 - Must include at least 1 social science course
- **Capstone (1 unit)**
 - LSGS 495S

In meeting the total requirements, a minimum of three departments must be represented, with no more than half of the courses originating in a single academic unit. Students may count toward this certificate no more than two courses that are being used to fulfill the requirements of any major, minor, or other certificate.

Markets and Management Certificate

Program Code: U-MMST-C

Plan Type: Certificate

Department: Markets & Management

Website: markets.duke.edu

Program Summary

The Markets and Management Studies Program at Duke is designed to meet the needs of Duke undergraduates who wish to study business issues and functions in preparation for careers in business and management, banking, consulting, government, the nonprofit sector, and related graduate fields. Courses in the program emphasize three integrated themes: (1) globalization and organizational innovations in the world economy; (2) the social determinants and consequences of new or changing technologies; and (3) the effect of cross-cultural and institutional factors on management and entrepreneurship.

Go to [Programs by Department](#) to view all related programs.

Course of Study

Organizational studies in the social sciences provide an innovative, liberal arts approach to business education. The markets and management studies program is rooted in sociology, but it also includes studies in a variety of disciplines—economics, history, political science, public policy studies, ethics, and management science. Each course in the program deals in some way with the impact of different organizational forms on managing human resources, coordinating work, integrating technology, and using business networks in an increasingly competitive global economy. The four overarching learning objectives of the program are bridging theory and research, teamwork, communication skills, and active learning.

Program Enrollment

Only sophomores and juniors who have officially declared their major may enroll in the program. Enrollment must be done via the Markets and Management Studies website.

Academic Requirements

At least 7 units total to complete the certificate. At least 34 units total to earn a degree.

- **Gateway (1 unit)**
 - MMS 197
 - SOCIOL 258
- **Core (1 unit)**
 - A comprehensive list of core courses is available to students in the degree audit system.
- **Capstone (1 unit)**
 - MMS 450
- **Electives (4 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.

No more than three courses may originate in a single department (including MMS). No more than two courses that are counted toward the markets and management studies certificate may also satisfy the requirements of any major, minor, or other certificate program.

Materials Science and Engineering Certificate

Program Code: U-MSE-C

Plan Type: Certificate

Department: Pratt School of Engineering, Mechanical Engineering & Materials Science Department

Website: mems.duke.edu/undergrad/degrees/certificates/materials-science-engineering

Program Summary

Harvesting solar and thermal energy economically, enabling improved batteries and quantum computing, developing improved medical treatments all require new materials with specific properties.

Earn Duke's Certificate in Materials Science & Engineering to learn the scientific and engineering principles related to the fundamental structures, properties, and technological applications of materials. Expert faculty teach from multiple disciplines, such as the Departments of Mechanical Engineering & Materials Science, Electrical & Computer Engineering, Biomedical Engineering, Chemistry, and Physics. In addition, through a course selected from History, Public Policy, or Economics, learn about the role of technology in science, public policy and the economy.

Upper-level undergraduate students enrolled in both the Pratt School of Engineering and the Trinity College of Arts & Sciences are eligible to complete this certificate. Each student is assigned an academic advisor affiliated with the program. A student's academic transcript will note the successful completion of the certificate.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 7 units total to complete the certificate. At least 34 units total to earn a degree.

- **Centerpiece Courses (2 units)**
 - ME 221L (BME 221L, CHEM 548, or PHYSICS 516 may also count)
 - ME 412, or ME 490
- **Electives (4 units)**
 - A comprehensive list of elective courses is available to students in the degree audit system.
- **Humanities or Social Science Course (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.

Philosophy, Politics and Economics Certificate

Program Code: U-PPE-C

Plan Type: Certificate

Department: Political Science Department

Website: sites.duke.edu/dukeppe

Program Summary

The interdisciplinary Philosophy, Politics, and Economics Program at Duke is designed to enable students to secure an understanding of the common foundations and the intersection of methods employed in normative inquiry by the three disciplines that make up the program. Political philosophy and political economy face similar questions and exploit common resources, and the alternative answers they provide to these questions are grounded in competing philosophical theories. Students intending to major in any of the three disciplines, or for that matter in any other discipline with an impact on public institutions and civil society, national, and international governance, and economic development, will find the certificate's program of studies valuable.

The certificate in the Philosophy, Politics, and Economics Program is composed of six courses, including two cross-listed courses, one that functions as a gateway to the certificate program, a second that figures as its capstone, and four other classes in economics, philosophy, and political science.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Gateway (1 unit)**
 - ECON 361
- **Core Courses (4 units)**
 - Any 4 courses from the following core disciplines: Political Science, Philosophy, and Economics
 - Must include at least 1 course from each group
 - A comprehensive list of courses is available to students in the degree audit system.
- **Capstone (1 unit)**
 - POLSCI 449S

Robotics and Automation Certificate

Program Code: U-ROBOT-C

Plan Type: Certificate

Department: Pratt School of Engineering, Mechanical Engineering & Materials Science Department

Website: mems.duke.edu/academics/certificates/robotics-undergrad

Program Summary

Robotics is an exciting and rapidly expanding field at the crossroads of mechanical engineering, electrical engineering, biomedical engineering and computer science. With the help of architects and designers, these intelligent machines have learned to infer, reason and act in the real world.

Using large amounts of data, researchers in the field have made it possible for robots to learn from their experiences and improve their performance.

To safely and effectively integrate intelligent machines into our environment, robots must be taught to adapt and respond to unpredictable situations, as well as interact collaboratively with each other and humans.

These systems will soon be able to replace humans in dangerous environments and tedious jobs, boost their situational awareness, and assist them in difficult or repetitive tasks — further enhancing human capabilities.

Go to [Programs by Department](#) to view all related programs.

Academic Requirements

At least 7 units total to complete the certificate. At least 34 units total to earn a degree.

- **Required Courses (2 units)**
 - ECE 383
 - ME 555, with topic ROBOT STUDIO
- **Machine Learning Course (1 unit)**
 - BME 548L
 - COMPSCI 371
 - ECE 580
 - ME 555, with topic DATA DRIVEN DYNAMIC SYSTEMS or ROBOT LEARNING
- **Control and Dynamics Course (1 unit)**
 - EGR 244L
 - ME 344L
 - ME 555, with topic MODEL PREDICTIVE CONTROL
- **Additional Technical Course (1 unit)**
 - COMPSCI 527
 - ECE 461
 - ECE 496
 - ECE 588
 - ME 555, with topic INTRO MED ROBOTICS SURG TECH
 - Any machine learning course or control and dynamic course listed above
- **Ethics Course (1 unit)**
 - ME 555, with topic ETHICS IN ROBOTICS & AUTOMATN
- **Humanities and Social Sciences (1 unit)**
 - A comprehensive list of courses is available to students in the degree audit system.

Two of the technical courses can be required courses in home department.

Other courses in areas related to Robotics are also permissible subject to approval of the Robotics and Automation Certificate Program Coordinator. New courses may also be created.

Science and the Public Certificate

Program Code: U-GSP-C

Plan Type: Certificate

Department: Science & Society

Website: scienceandsociety.duke.edu/learn/undergraduate-programs/ss-certificate/science-and-the-public

Program Summary

The Science & Society Certificate Program is an undergraduate, interdisciplinary course of study that integrates science with its relationship to society. The interdisciplinary curriculum enables students to understand the social, legal, historical, and policy issues stemming from research and technological advances in both basic and applied science.

Students in the Certificate in Science and the Public analyze how science works in practice, how it is disseminated to the public, and what becomes of it as it makes its way out into the world.

Academic Requirements

At least 6 units total to complete the certificate. At least 34 units total to earn a degree.

- **Core Course (1 unit)**
 - SCISOC 257S
 - SCISOC 499S
- **Research Experiences (2 units)**
 - 2 research independent studies
 - 1 research independent study plus 1 summer research experience
- **Electives (3 units)**
 - A comprehensive list of elective courses is available [here](#), or to students in the degree audit system.

Certificate information. At least one elective and at least one research experience must have a science component, and at least one elective must have an ethics, law, social science, and/or policy component. No more than three courses may originate in any one department; only two courses may be used to satisfy the requirements for any major, minor, or other certificate; and at least half of the courses must be taken at Duke.

Duke Kunshan University Dual-Degree Program

Duke Kunshan University

Duke Kunshan University (Duke Kunshan) is a US-China partnership of Duke University (Duke), Wuhan University, and the Municipality of Kunshan in Jiangsu province to create a world-class liberal arts and research university offering a range of academic programs for students from China and throughout the world. A nonprofit, joint-venture institution, Duke Kunshan University was granted accreditation approval by China's Ministry of Education (MOE) in September 2013. Duke Kunshan welcomed its inaugural class of graduate students in August 2014 and launched the dual-degree undergraduate program in August 2018.

Duke Kunshan University Mission Statement

Duke Kunshan is a highly selective research-oriented, liberal arts and sciences university located in China, whose primary mission is to enable students from around the world to lead purposeful and productive lives. By delivering the highest quality undergraduate and graduate education that is truly interdisciplinary, Duke Kunshan prepares students for professional, intellectual, and societal leadership roles across the globe. The core of the educational offering is a four-year undergraduate dual-degree program featuring an integrated and multi-disciplinary curriculum, with an effective blend of Chinese, American, and global techniques and values and a culture of academic excellence and freedom. World-class faculty pursue knowledge in service to society, involving students in innovative scholarship and research programs. As a premier US-China joint-venture university, Duke Kunshan embraces the integration of global, national, and local traditions of thought and experience and promotes cross-cultural understanding and cross-border collaborations.

Duke Kunshan Animating Principles

Duke Kunshan aspires to provide a twenty-first century liberal arts education that helps students develop a sense of social responsibility and global citizenship, as well as strong and transferable intellectual and practical skills such as communication, analytical and problem-solving skills, and a demonstrated ability to apply knowledge and skills in real-world settings.

The overarching goals are embedded in the seven animating principles that are expressed throughout the curriculum:

1. **Rooted Globalism:** To cultivate informed and engaged citizens who are knowledgeable about each other's histories, traditions of thought, and affiliations; and skilled in navigating among local, national, and global identities and commitments.
2. **Collaborative Problem-Solving:** To instill the habits of collaboration and the ability to synthesize disparate insights in solving complex challenges.
3. **Research and Practice:** To enhance the ability to forge links between theory and practice in the many-sided and rapidly changing world of human needs.
4. **Lucid Communication:** To develop the ability to communicate effectively, both orally and in writing, and to listen attentively to different viewpoints in coming to mature judgments.
5. **Independence and Creativity:** To nurture free inquiry, deep reflection, and a drive to ask interesting questions and find compelling answers.
6. **Wise Leadership:** To shape thinkers and doers who possess the moral compass to guide communities and institutions toward a common good and who have the wisdom and technical competence to deal effectively with complexity.

7. **A Purposeful Life:** To form reflective scholars who test their core beliefs, who connect their course of study to big questions of meaning, and who build the capacity for lifelong learning and exploration.

Duke Kunshan is accredited by the MOE. Duke is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) in the United States to award baccalaureate, master's, and doctorate degrees. Duke Kunshan is not accredited by SACSCOC and the accreditation of Duke does not extend to or include Duke Kunshan or its students.

Kunshan City

Kunshan, located in the southeastern part of Jiangsu province, is a satellite city in the greater Suzhou region and adjacent to Shanghai municipality, two of the largest and most developed metropolitan areas in China. Kunshan is regarded as one of the most economically successful county-level administrations in China. It was ranked first in the "25 Best County-level Cities in China" study by Forbes China for the sixth year running in 2014. With an immigrant population larger than the number of its permanent residents, Kunshan is the winner of the UN-HABITAT Scroll of Honor Award 2010 along with Singapore and Vienna, the most prestigious award given by the United Nations in recognition of work carried out in the field of human settlements development, for its innovative approach to granting migrants the right to essential services in the city. It also carries titles and awards such as National Hygiene City, Excellent Tourism City of China, and National Garden City, as well as the National Model City of Environment Protection and National Model Zone of Ecology.

Kunshan is culturally significant as the origin of Kunshan Diao, the melody which ultimately evolved into Kunqu Opera, one of China's oldest extant theater arts, which has been listed as one of the World Intangible Culture Heritages by UNESCO. In history, famous figures include Zu Chongzhi, Gong Xian, Gu Yanwu, Gui Youguang, and Zhu Bailu.

The Duke Office of Duke Kunshan University Relations

The Duke Office of Duke Kunshan University Relations works in close collaboration with Duke and DKU stakeholders to develop and support initiatives across our institutions, including:

- Developing strategy for the Duke-DKU relationship,
- Creating and implementing programs for undergraduate and graduate students,
- Facilitating opportunities for faculty to teach and engage in research at Duke and DKU,
- And providing administrative, financial, human resources, and logistical support for all Duke-DKU initiatives.

The Duke Office of Duke Kunshan University Relations is located on the second floor of the Flowers Building on Duke's West Campus. Students can reach the office by using the information below or by contacting a staff member directly.

Mailing Address

Duke Office of Duke Kunshan University Relations Box 90036
Durham, NC 27708

Physical Address

Office of Duke Kunshan University Programs 404 Chapel Drive
Flowers Building, Suite 214 Durham, NC 27708

Email: dkurelations@duke.edu

Duke Kunshan University Dual-Degree Program (K-IDST)

Admissions

Admissions

Per Duke's Collaboration Agreement with Duke Kunshan University (Duke Kunshan) for the dual-degree framework, Duke collaborated with Duke Kunshan to establish and approve standards for admissions that are consistent with those at Duke now and in the future, while also meeting China's Ministry of Education requirements.

Duke Kunshan strives to attract a high caliber, diverse and talented group of students from around the world.

The admission criteria are similar to those at Duke University. While academic excellence and accomplishments, broadly defined, are important factors for admissions consideration, Duke Kunshan highly values a student's 'adventurous' spirit, global orientation, ability to overcome obstacles, and potential to positively impact the campus and community life.

International Student Admissions

Early Decision. The application deadline is in early November. International applications are reviewed by an Admissions Committee and select applicants are invited for online interviews in late November. Admission offers are released in December.

Regular Decision. The application deadline is in early January. International applications are reviewed by an Admissions Committee. Select applicants are invited for online interviews between January and March. Admission offers are released in March.

Financial Aid Application. Students who want to be considered for financial aid are required to complete a CSS Profile application with their admissions application. Students applying to Duke and Duke Kunshan are required to prepare separate CSS Profile applications for each institution.

Chinese Student Admissions. Applicants with Chinese citizenship may submit an application in round one (early January) or round two (mid-February). Selected applicants are invited to participate in a one-day Campus Day event on weekends in March and April, during which the applicants take a written English test and an interview conducted in English. Shortlisted applicants are notified of their status in April and final offers are made once Gaokao scores (for Chinese mainland students) or other equivalent tests (for Chinese students in Hong Kong, Macau, and Taiwan) are announced in June and July.

How to Apply

International students applying to Duke Kunshan University must complete the Common Application. Duke Kunshan does not charge an application fee. Students who wish to apply to both Duke University and Duke Kunshan University, may use the Duke University application and select YES to the question that asks if they would like to share their application with Duke Kunshan. On the application, international students select a decision plan (Early Decision or Regular Decision), which determines when their applications for admission are due and when they will be notified of an admission decision. Students can select only one of the decision plans when submitting an application, and those who have selected an Early Decision will not be considered during the Regular Decision cycle if an admissions decision is made during the Early Decision round. The Duke Kunshan University CEEB code is 16406.

Applicants with Chinese citizenship apply through Slate (Duke Kunshan's custom application portal) by either round's deadline. Applicants from the Chinese mainland must take the Gaokao test regardless of their high school location or curriculum. Applicants from Hong Kong, Macau, and Taiwan should take the "Hong Kong, Macao, and Taiwan Joint Examination" or Taiwan's General Scholastic Ability Test.

Students enrolled at Duke University are not eligible for the dual-degree program.

For information on tuition, financial support, as well as more in-depth information about Duke Kunshan University, visit dukekunshan.edu.cn/en/admissions.

Duke Kunshan University Dual-Degree Program (K-IDST)

Standards and Policies

Standards and Policies

In general, students participating in the dual-degree program are subject to academic procedures, standards, and policies of the institution the student is enrolled at the time. While enrolled in courses on the Duke campus, Duke instruction courses, or participating in a Duke-In study abroad program, students are subject to the majority of Duke's Trinity College of Arts & Sciences academic policies and procedures. However, the following policies and procedures directly related to transfer, registration restrictions, and application of academic credits were modified to better suit the unique nature of the dual-degree academic program.

Academic Concerns of Students

Teaching and learning is based on collaboration between instructors and students. Occasionally, however, the student-faculty dynamic in a course can inhibit successful teaching and learning. When this occurs, students often need assistance in resolving the issue, and should not hesitate to seek assistance from faculty and administrative officers in resolving problems.

Students who have questions about the content of a course taken on the Duke campus or as a part of a Duke-In study abroad academic program, about an instructor's methods of presentation of material, the level of discourse, criteria for evaluation of students, or administrative procedures in the course, should contact the course instructor. Even if a student doubts that a productive discussion with the instructor is possible, they are best positioned to address student concerns and are often the best first point of contact before a matter is referred to the director of undergraduate studies or, in their absence, to the chair of the department. Students should be able to resolve most course-related academic concerns through direct consultation with the instructor.

However, in exceptional cases in which a problem remains unresolved after informal discussions have taken place, students can appeal the matter to the senior associate dean of Trinity College or the senior associate dean for education at the Pratt School of Engineering. The senior associate dean will request information about the nature of the issue and about the earlier efforts students have made to resolve them. If the problem concerns a specific course, it should be directed to the senior associate dean of the college or school in which the course is taught.

- If a student concern involves a departmental policy rather than an individual course, students should confer with the director of undergraduate studies in the department. When necessary, the director of undergraduate studies can refer a student to the department chair. Students can also contact their academic dean if they are in doubt about how to proceed with a matter of concern.
- If a student's concern involves a Duke instruction course or academic policy on the Duke Kunshan campus, students should refer to the relevant Duke Kunshan academic policies.

Finally, if a student's academic concern arises from a poor course grade submitted by an instructor at the end of the semester for a course taken at Duke or as part of a Duke-In study abroad academic program, there is a separate procedure established for handling grade complaints.

Courses: Course Load at Duke

Students are admitted to full-time study and responsible to make certain that their course load conforms to academic requirements, including the requirement to enroll in at least 4.0 course credits during a semester at Duke, except when expressly authorized to enroll in an underload by their academic dean. This policy is strictly enforced.

Normal Load. A normal course load is defined as four (4.0) course credits and, as noted above, students are expected to enroll in at least this many course credits each semester.

Overload. Dual-degree students are free to enroll in a course overload of 4.5 course credits.

Underload. Dual-degree students are not eligible for an underload.

Courses: Repeating

Students in the dual-degree program should generally follow the course repeating policy in Trinity. An exception for the dual-degree program is that students may repeat a course taken at Duke at Duke Kunshan with approval.

Courses: Satisfactory/Unsatisfactory Grading Option

Students in the dual-degree program follow the Trinity policy on course grading and the satisfactory/unsatisfactory (S/U) option and DKU Study Away policy when enrolling in courses at Duke and follow the Duke Kunshan policy on course grading and the credit/no credit (CR/NC) option when enrolling in courses at Duke Kunshan. Students are not allowed to change a letter grade of a course taken at Duke to CR/NC when they return to Duke Kunshan.

Credit: Limitations and Restrictions

There are specific requirements concerning course credits in the dual-degree program and how these course credits apply to graduation requirements.

1. 34.0 Duke course credits are required for graduation.
2. At least 25% of the 34.0 Duke credits (8.5 Duke course credits) must be Duke-originated courses, defined as courses offered through Duke University or taught by Duke or Duke-affiliated faculty, and all are subject to the approval processes by relevant Duke course committees. Duke-originated courses include those taught at Duke University, the Duke University Marine Laboratory, Duke Kunshan University, and Duke-originated courses that are offered in Duke-In study away programs.
3. Up to 75% of the 34.0 Duke course credits may be non-Duke originated course credits and can include any combination of the following:
 - Two pre-matriculation credits, i.e., AP, International Placement Credit (IPC), and pre-matriculation Course Credit (PMC). If a student has more than two AP/IPC/PMC credits, Duke will record all of them on the Duke transcript and the student may use all for placement into higher-level coursework and to satisfy departmental major or minor requirements to the extent allowed by the individual department, but only 2.0 credits will count toward the 34.0 credits needed for graduation. If a student intends to graduate early, they may apply additional AP/IPC/PMC credits toward the 34.0 credits required for graduation, but the student is still subject to the required number of Duke-originated courses taken post-matriculation.
 - Two institutional transfer credits arranged by the student on their own at another accredited, four-year university or college in the United States or abroad.
 - Ten study away/abroad transfer credits that students take through an approved study away/abroad program. However, the maximum number of credits when combining institutional and study abroad transfer credits cannot exceed ten.
 - Ten of the 34.0 Duke credits may be non-Duke- or non-DKU-originated credits and can include any combination of the above.
 - Transfer credits the student takes through Duke Kunshan.

Summer Session and Policies

Students are allowed to enroll in Duke Summer Session and register for one, two, or three courses as long as students do not exceed 2.5 course credits in one term. However, students may not register for more than one natural science laboratory course in any one term. Students on a J-1 visa are required to enroll in 2.0 course credits in the six-week term. Contact the Duke Visa Services office with any questions about requirements for maintaining visa status. For additional information on Trinity's summer session policies, see trinity.duke.edu/undergraduate/academic-policies/summer-sessions-and-policies.

Transfer Credit

After matriculation, dual-degree undergraduates may receive a limited amount of transfer credit for courses taken at other approved degree-granting institutions. Credit may be earned in two ways:

1. Through direct non-Duke instruction courses at Duke Kunshan.
2. Through a limited amount of institutional enrollment, where students are not engaged in a Duke-approved study abroad program and instead enroll on their own at another four-year college or university in or outside of the United States. This type of transfer credit is subject to approval from the relevant academic dean at Duke.

Graduation: Requirements

Duke/Duke Kunshan dual-degree undergraduates may earn one of two Duke degrees:

- Bachelor of Arts (AB)
- Bachelor of Science (BS)

The Duke Kunshan University curriculum is designed to meet the requirements outlined for both the Duke and Duke Kunshan undergraduate degrees. A total of 136.0 Duke Kunshan credits is required for graduation with a Duke Kunshan bachelor's degree and 34.0 Duke course credits (1.0 Duke course credit is equivalent to 4.0 Duke Kunshan credits) is required for graduation with a Duke bachelor's degree. At least 25 percent of the credit hours required for the undergraduate degree must be completed through Duke-originated courses.

To meet the 136.0 credit requirement, students need to take elective courses. The curriculum is designed to enable a wide range of flexibility for students. Some may elect to use their full range of electives to go wide and broad while others may elect to dive deep into their areas of disciplinary study.

There are additional credit-bearing requirements for the Duke Kunshan degree for students from the Chinese mainland, Hong Kong, Macau, and Taiwan per Chinese Ministry of Education requirements. The details of these requirements are listed in Duke Kunshan University's Undergraduate Bulletin.

Duke University and Duke Kunshan University each confer separate degrees on candidates recommended by the faculty of the interdisciplinary majors and approved by the trustees (or other top-level governing body) at each respective academic institution.

Leave of Absence: Medical or Personal

While studying at Duke, students in the dual-degree program may request a medical or personal leave. If a student is contemplating a medical leave, consult with their academic dean as soon as possible. The academic dean will work with the dean of undergraduate studies at Duke Kunshan to process the request. A student must resubmit a Duke Kunshan University Study at Duke program application to return for study at Duke.

Withdrawal: Voluntary

While studying at Duke, students may choose to withdraw for health or financial issues, or personal reasons. To withdraw, students must meet with their academic dean, and their academic dean will work with the dean of undergraduate studies at Duke Kunshan to process the request. A student must resubmit a Duke Kunshan University Study at Duke program application to return for study at Duke.

Withdrawal: Disciplinary Suspension

While studying at Duke, if a student violates university expectations as outlined in [The Duke Community Standard in Practice: A Guide for Undergraduates](#), the student may be subject to suspension (an involuntary withdrawal or dismissal from the university for a specified number of semesters) or permanent expulsion. If a student is found responsible for a conduct violation that leads to a suspension from the university, the Office of Student Conduct will notify the student and the academic dean of that decision. The student's academic dean will work with the dean of undergraduate studies at Duke Kunshan to withdraw the student from both Duke and Duke Kunshan, close the student's student record, and notify the advisors, instructors, and all appropriate offices. The withdrawal will be entered on the student record.

Duke Kunshan University Dual-Degree Program (K-IDST)

Curriculum Components

Curriculum Components

The Duke Kunshan curriculum begins from liberal arts principles and is imbued with the hallmarks of a Duke education blended with Chinese tradition: interdisciplinary approaches, engagement with research questions, problem-based and team-based learning, and opportunities for students to craft individual pathways and deepen their intellectual engagement over time. It is a kind of education that builds critical and problem-solving skills, simultaneously conferring a broad base of knowledge and fostering the ability to interrogate that knowledge and apply it flexibly. It is also deeply cross-cultural in its orientation: Duke Kunshan gives all participants the continual experience of learning to see from multiple points of view and to work together across cultural boundaries—a crucial skill for the future.

A Liberal Arts College Experience

The small-scale residential setting at Duke Kunshan offers significant opportunities for innovative and integrated forms of learning, an especially close connection between faculty and students, and the intermixing of students with different interests. In addition, Duke Kunshan offers creative alignment between its undergraduate curriculum and selected areas of research strength at Duke Kunshan and at Duke University.

The Kunshan Campus

The Duke Kunshan Campus is located in the newly developed west side of Kunshan. It is approximately a twenty-minute drive to the city center of Kunshan. All undergraduate students are required to live on campus all four years. On campus includes main campus as well as any buildings offsite that are owned, leased, or operated by the University. Graduate students may live off campus after approval from Residence Life.

The Duke Kunshan campus features the academic buildings, Conference Center, Community Center, Recreation Center, WD Research Institute, a library, Administration Building, student residences, faculty and staff residences, and the services building.

A complete list of campus-based resources can be found in the Duke Kunshan University Student Handbook.

Innovation Building

Over three stories, the building houses laboratories set up with cutting-edge equipment, classrooms, faculty offices, and conference rooms.

Library Resources

The Duke Kunshan Library is currently located on the first and second floors of the Academic Building. It operates in collaboration with Duke University Libraries (DUL) on the Durham campus and supports the research, instruction, and learning needs of Duke Kunshan faculty, staff, and students.

The Duke Kunshan Library website (dukekunshan.edu.cn/en/academics/library) provides access to the library's resources and services provided by the Duke Kunshan Library.

Additional Resources

The Duke Kunshan campus offers a vast number of academic support services, amenities, housing, and other campus-based resources. A complete list of campus-based resources can be found in the Duke Kunshan University Student Handbook.

Curriculum Overview

In line with the definition of dual-degree agreements as defined by the Southern Association of College and Schools Commission on Colleges, students who complete Duke Kunshan University's four-year undergraduate curriculum will receive two degrees, one from Duke University (accredited by the Southern Association of Colleges and Schools Commission of Colleges), and one from Duke Kunshan University (approved by the Ministry of Education of China), and will be alumni of both institutions. All students must fulfill the requirements for both Duke University and Duke Kunshan University degrees.

The undergraduate academic program at Duke Kunshan is organized into three divisions, rather than by traditional academic departments:

1. Natural Sciences
2. Arts and Humanities
3. Social Sciences

Students take foundational courses in their division as well as broad, integrated interdisciplinary courses and disciplinary courses to gain specific expertise for their major. Depending on division and language proficiency, eight to thirteen of students' courses are electives. These courses enable them to deepen their interests or explore more broadly.

Students can choose their majors based on their interests by combining different forms of specialized training with their overall integrated plan of study. This structure allows students to follow a unique academic path that suits their intellectual drive.

For a complete list of majors offered at Duke Kunshan University, visit ugstudies.dukekunshan.edu.cn/academics/majors.

To meet Duke Kunshan's rigorous academic requirements for graduation, all students must complete the Common Core and language course requirements as well as demonstrate proficiency in communication skills.

Curriculum Components

1. **Common Core (3 courses).** These courses create a common platform for cross-cultural engagement, ensuring that all students share the same experience. They focus on the big questions, critical challenges, and issues with which all students must be prepared to engage. Students take one course each year for the first three years.
 - **China in the World** focuses on historical and contemporary commercial, intellectual, and scientific exchanges between China and other nations.
 - **Global Challenges in Science, Technology, and Health**, which addresses key developments in fields such as biotechnology, nanotechnology, and information technology, highlights the global environmental challenges of our time, and teaches strategies for critically evaluating scientific claims.
 - **Ethics, Citizenship, and the Examined Life** examines traditional Asian and Western ideals and contemporary analyses of morality, pluralism, and democracy.
2. **Language (2-4 courses depending on proficiency).** One of Duke Kunshan University's goals is for students to graduate with strong skills in multiple languages, especially English and Chinese. To this end, all students are required to take 2-4 foreign language courses appropriate to their needs.
3. **Communication (Writing, Speaking, and Listening).** In the twenty-first century, success in both career and civic life requires the ability to communicate effectively. To ensure that Duke Kunshan students develop these abilities, guided practice in writing, speaking, and listening will be a component in the majority of courses.
4. **The Semester Term.** The semester is divided into two intensive 7-week sessions. Students typically take two courses in each session. Classes are held Monday-Thursday. Fridays and mini-sessions falling between the 7-week sessions are intended for experiential learning including field trips, internships, and civic engagement.
5. **Mini-Term Courses.** All students are required to take one ungraded mini-term course. These are intensive courses that typically last a week and provide focused exposure to a single topic about which a student might have curiosity but no experience.
6. **Signature Work.** Signature Work has two major components. First, students will identify three thematically-linked courses at DKU or Duke, drawing from their interdisciplinary courses, disciplinary course, or electives. Second, students will take 8 credits of Capstone courses one-on-one with their Mentor, during which they will complete much of the actual work of their Signature Work projects.
7. **Research.** All undergraduate students have opportunities to participate directly in advanced academic research. Advisors and faculty mentors help match students to research projects that are complementary to their areas of study.

Duke Instruction Courses at Duke Kunshan University

Duke Kunshan students have the opportunity to take classes from Duke faculty on the Kunshan campus. The Duke Instruction coursework appears on both the Duke Kunshan transcript and the Duke transcript. The Duke transcript will reflect the Duke course and the corresponding grade for the particular term completed. The list below represents the current Duke instruction courses at Duke Kunshan.

Major and Degree Requirements

Major and Degree Requirements

Duke/Duke Kunshan University dual-degree undergraduate majors foster learning communities of students and faculty whose intellectual interactions revolve around two groups:

1. Interdisciplinary study, which laterally spans a variety of disciplines. The big questions at the core of each interdisciplinary community will probe a variety of disciplines, voices, viewpoints, and expertise.
2. Disciplinary study, which is akin to, or even entirely aligned with, a traditional vertical discipline. This community provides discipline-specific training in methods, knowledge, and skills.

The dual structure is also flexible to accommodate a variety of student goals and outcomes. Some students might choose to pursue a less deep path in the disciplinary study while focusing more on developing broad expertise in the questions underlying the interdisciplinary study—and in that case, the outcome can be a powerful integrative education for students whose goal is not graduate school or specialized study. This approach allows for a highly integrative, team-based approach to problem-solving and knowledge acquisition. For students oriented toward graduate study, the integrative and outward-looking approach in the interdisciplinary study broadens and enriches their deeper specialist expertise. Our expectation is that a student with deep expertise who also has interacted in a significant, deep way with an interdisciplinary group focused on big questions will be more, not less, appealing to graduate schools or other specialty pursuits. For certain disciplines, students oriented towards graduate school may also need to use some electives, guided independent studies, online courses, and study abroad courses to deepen expertise beyond the seven courses required for disciplinary study.

Curricular and Credit Requirements

The Duke Kunshan University curriculum is designed to meet the requirements outlined for both the Duke and Duke Kunshan undergraduate degrees. A total of 136 Duke Kunshan credits is required for graduation with a Duke Kunshan bachelor’s degree and 34 course credits (1 Duke course credit is equivalent to 4 Duke Kunshan credits) is required for graduation with a Duke bachelor’s degree. At least 25 percent of the credit hours required for an undergraduate degree must be completed through Duke University courses.

To meet the 136-credit requirement, students need to take elective courses. The curriculum is designed to enable a wide range of flexibility for students. Some may elect to use their full range of electives to go wide and broad while others may elect to dive deep into their areas of disciplinary study.

There are additional credit-bearing requirements for the Duke Kunshan degree or students from mainland China, Hong Kong, Macau, and Taiwan per Chinese Ministry of Education requirements. The details of these requirements are listed in Part 3: The Curriculum of the Duke Kunshan Undergraduate Bulletin.

Duke University and Duke Kunshan University each confer separate degrees on candidates recommended by the faculty of the interdisciplinary majors and approved by the trustees (or other top-level governing body) at each respective academic institution.

These components are reflected in specific requirements:

General Education	3 common core courses
	2-4 language courses depending on proficiency
	3 electives as distributional requirements
	1 Quantitative Reasoning course
Major	16-19 courses (foundation, interdisciplinary, disciplinary, and signature work)
	Interdisciplinary BA: All subplan requirements that map to the BA degree
	Interdisciplinary BS: All subplan requirements that map to the BS degree
Electives	8-13 courses depending on division and language proficiency, which include the three electives as distributional requirements and a Quantitative Reasoning course in General Education

Courses required for each major include **Divisional Foundation courses, Interdisciplinary Studies courses, Disciplinary Studies courses, and Signature Work**. The detailed course requirement for each major is listed in Part 9: Majors of the Duke Kunshan Undergraduate Bulletin. Students are responsible for meeting the requirements of a major as stated in the bulletin for the year in which they matriculated; however, they have the option of meeting requirements in the major changed subsequent to the students’ matriculation.

Divisional Foundation Courses

Divisional Foundation courses provide opportunities to develop knowledge and skills essential to advanced work in each division. Each set of Divisional Foundation courses also provides instruction and guided practice in specialized communication skills.

Interdisciplinary Studies Courses

Interdisciplinary courses are characterized by distinct curricular pathways spanning several traditional disciplines. These are broad but defined areas of study that encourage integrative and multidisciplinary habits of inquiry and knowledge acquisition. The interdisciplinary component of a major serves as a primary definition of the student's academic community. It requires 4 to 7 courses and might be problem-focused, comparative and cross-cultural, or innovatively fused within or across divisions. In the social sciences and the arts and humanities communities, students in their third and/or fourth years will undertake advanced seminars that enable them to integrate their studies from more specialized areas.

Disciplinary Studies Courses

Students will also develop a disciplinary study, which will often map to the tools and methods of a traditional discipline and further enable students to be competitive for graduate school or other advanced work.

Signature Work

Duke Kunshan University graduates will have experience addressing complex problems outside the classroom as well as within, developing these skills through Signature Work. Signature Work encourages students to seek creative alignments between curricular pathways and to engage in experiential learning that leads to the creation of knowledge and products for the scholarly, private sector, and public audiences.

Signature Work calls for each student to identify one or more questions, problems, or issues that are of particular importance to themselves and to society, and to investigate these through a combination of curricular and related co-curricular experiences. Students develop guided pathways, identify questions, and undertake projects early in their academic careers. During the sophomore year, students work with their advisors and faculty mentors to begin identifying the major questions, problems, or issues on which they would like to work, and to develop a pathway that includes three thematically linked courses drawn from students' interdisciplinary studies, disciplinary studies or electives, and two capstone courses in which a student creates a substantial scholarly or creative signature product. The signature product will vary across fields and disciplines, but will always include substantial writing, reflection on learning, and publicly visible results.

Dual-Degree Major and Degree Comparisons

Undergraduate dual-degree majors at Duke Kunshan University map to a single major (Interdisciplinary Studies), and either a bachelor of arts or science degree. While the interdisciplinary and disciplinary academic content areas are listed as "majors" at Duke Kunshan, they are listed as tracks and areas of focus at Duke. The following chart illustrates how Duke and Duke Kunshan University majors map between institutions.

DUKE UNIVERSITY	DUKE KUNSHAN UNIVERSITY
Interdisciplinary Studies – Bachelor of Arts	Arts and Media/Arts – Bachelor of Fine Arts
	Arts and Media/Media – Bachelor of Fine Arts
	Behavioral Science/Economics – Bachelor of Economics
	Computation and Design/Digital Media – Bachelor of Fine Arts
	Computation and Design/Social Policy – Bachelor of Law
	Cultures and Movements/Cultural Anthropology – Bachelor of Arts
	Cultures and Movements/Religious Studies – Bachelor of History
	Cultures and Movements/Sociology – Bachelor of Arts
	Cultures and Movements/World History – Bachelor of Arts
	Cultures and Societies/Cultural Anthropology – Bachelor of Arts
	Cultures and Societies/Sociology – Bachelor of Arts
	Environmental Science/Public Policy – Bachelor of Science
	Ethics and Leadership/Philosophy – Bachelor of History
	Ethics and Leadership/Public Policy – Bachelor of Law

AAAS145 - Hip-Hop/Rap Music Appreciation

Course Description

This course explores the development of Hip-Hop and Rap music from an inner-city expression of music into a worldwide social and cultural movement. Rap, considered popular music at the beginning of the 21st century, has a huge influence on mainstream culture. Students will have a unique opportunity to develop and/or enhance their knowledge and comprehension of this popular and influential genre.

AAAS146 - Motown and American Soul Music

Course Description

During the 1960's, in Detroit, Michigan, a landmark in music was established: The Motown Sound. This aural kaleidoscope of high quality, dynamic song creation was established through a confluence of talent and hard work by people whose names now line the halls of fame for popular music. Some of these luminaries include Berry Gordy, Diana Ross, Stevie Wonder, Marvin Gaye, and Holland-Dozier-Holland. This course will investigate the societal and musical factors that gave rise to such a distinctive aesthetic, also framing this phenomenon as a point of comparison to a range of commercial music styles, including Philly Soul, Southern Soul, RnB, and current musical trends.

AAAS147 - Global History of the Prison

Course Description

This is an introductory lecture class on the global history of incarceration. It studies the emergence of the prison as a penal institution in various forms: the medieval debtors' prison, industrial poorhouses, colonial prison and detention camps, and the modern prison industrial complex. Special focus is dedicated to the relationship between incarceration and race in a global context. Over the course of the semester, students will work on multimedia projects on a special topic related to prison history.

AAAS154S - Gateway Seminar: Comparative Slavery

Course Description

This course takes a comparative approach to the history of slavery as it unfolded across different regions of the world from the fifteenth to the nineteenth centuries. It embraces a transnational perspective centering not only on the Atlantic world (including North America, the Caribbean, Latin America, Europe and West Africa), but also on the Indian Ocean, from Madagascar to India and to Indonesia.

AAAS171 - Anthropologists in the Workplace: Applied Anthropology

Course Description

This course sets out to introduce students to some of the applications of anthropological theory and ethnographic method in contemporary institutional settings with the aim of familiarizing students with how anthropologists go about their work in complex organizational settings. Focusing on ethnographic method, as a powerful research tool, the course looks to both a series of use cases and an extensive literature of organizational management, user, and consumer experience. Students will have the opportunity to engage with anthropologists working in complex organizational contexts as well as business. Prior courses in Cultural Anthropology recommended but not required.

AAAS172S - Gateway: Eyewitness to Slavery

Course Description

How do historians of slavery do their work? Helping students answer this question is the primary goal of this Gateway Seminar. We will study eyewitness accounts of people who lived during the era of slavery and wrote about it to include enslaved people, enslavers, politicians, ministers, physicians, travelers, slave traders, free black people, and merchants. We will read selected seminal books and articles as an introduction to the historiography, that is, what historians have written about slavery and how they differ in their interpretations? Through this work, the seminar helps build students' skills in research and writing.

AAAS176CNS - Afro-Global Struggles

Course Description

What does it mean to struggle for freedom? More specifically, what have Afro Diasporic freedom struggles entailed? This course introduces students to anticolonial and abolitionist traditions of resistance from South Africa to the United States, from the Old to the New Worlds. The seminar also attends to contemporary decolonial movement work in and beyond the university via primary archival materials, secondary published work, and film investigating the connections between literature, music, poetry, political writings, and even dance. Course requirements include attendance and participation, discussion posts, and a final submission (essay or creative project).

AAAS180S - Gateway Seminar: The History of the U.S. South

Course Description

This course examines the history of the South from the colonial era to the present. The first part traces the rise of the plantation economy based on human bondage, the slaves' wars and other abolition movements, the Civil War, emancipation, and the destruction of the most powerful slaveholding society in the Atlantic world. The second part traces postwar efforts to build a democratic South, the rise of the Jim Crow system of segregation and disfranchisement, class struggles, the civil rights and abolition movements of the twentieth and twenty-first centuries, and southern culture. Students will acquire analytical and research skills using primary documents.

AAAS182S - The Law in Slavery and Freedom

Course Description

This course focuses on the relationship between slavery, race, and the law. It explores the dimensions and variability of the formal law of slavery, how it addressed the category of slave, codified the powers of slaveholders, and interacted with politics and culture to shape the institution of slavery and the making of the ideology of race. We will study primary documents such as trial transcripts, appellate opinions, treatises, codes, first-person narratives, and secondary work by legal scholars and historians. The course supports the development of skills in critical inquiry, research, and writing leading to the production of a final project based in original research.

AAAS188 - Black Music and the Soul of America

Course Description

This course traces the deep and pervasive impact African Americans have had on music in the United States. Musicians include Louis Armstrong, Bessie Smith, James Brown, Aretha Franklin, John Coltrane, Marian Anderson, Sam Cooke, Olly Wilson, Duke Ellington, Florence Price, William Grant Still, Alicia Keys, Kirk Franklin, and Megan Thee Stallion. The course demonstrates musical, cultural and political connections between these different streams of music and American society. Students will discover the myriad ways that the very soul of America has been conditioned by the practices of Black music.

AAAS195FS - Liberating Archives: Remaking History through the Arts**Course Description**

This Focus course examines how Black writers and other artists approach archives, historical documents, and data to seed new works in dialog with the past. The idea of a historical record poses a particular problem for African and Black diasporic peoples whose histories have been omitted, erased, and distorted by racist ideologies. In response, artists imagine alternative formats and uses of 'the archive' conceived broadly. We will study works that use databases of fugitive slave ads, oral histories, and colonial photographs as instigation for poetry, music, and visual arts.

AAAS201 - Race, Film, and Religion

Course Description

In this course, we will examine how cinema both constructs and reproduces anti-black racism and how cinema works to liberate blackness from the strictures of racial domination. We will watch films from the past three decades that provide an opportunity to interrogate the relationship between race, gender, and sexuality. These films will also enable us to think about how cinema introduces unconventional notions of the sacred, a process that involves affect, desire, and imagination. Films that we watch may include: Moonlight, Medicine for Melancholy, Black Panther, Daughters of the Dust, Get Out, US, Pariah, and Selma.

AAAS221SL - Capoeira: Practice and Culture

Course Description

Lecture/lab course introducing the movement, music and culture of capoeira, an Afro-Brazilian martial art that combines dance, self-defense and acrobatics. Created by male African slaves in Brazil several hundred years ago, viewed as a social threat and outlawed in the 19th century, celebrated as an element of national identity in the 20th century, today capoeira is rapidly crossing national, racial and gender borders as it becomes a popular global practice. Studio classes twice a week focus on the basic movements, percussive music and call-and-response singing. Seminar once a week focuses on the historical, cultural and socio-political dynamics that shape capoeira in Brazil and beyond.

Course Description

The purpose of this course is to critically examine psychological concepts, theories, and methods from perspectives grounded in 'the Black experience.' We will examine psychological phenomena and issues that specifically emerge in the social and historical context of African-descended peoples living in the African Diaspora (primarily, the United States) and we will reflect on a variety of psychological topics (e.g., self & identity, motivation, language, racism) through African and Black-centered lenses. Throughout the course, we will deconstruct, challenge, and revisit various assumptions about the psychologies of people racialized as Black. Prerequisite: PSY 101 or PSY 11 or AAAS 102 or AAAS 103.

AAAS225S - Documenting Black Experiences

Course Description

Explores how Black experiences have been documented and how crucial stories woven from real life get told. Students engage wide ranging contemporary and historical materials, including nonfiction, memoir, fiction, documentary and dramatic film, theater, poetry and music. Our aspirations are historical, but with an understanding that academic history, though irreplaceable, barely touches the range of storytelling that makes Black lives not only matter but transform the spaces in which they unfold. Our explorations are political, but in the largest sense—how Black power comes from making higher truth a tool, a weapon and a way of being.

AAAS228S - Fictions That Mark the Moment

Course Description

Course is an engagement with novels from spectacular moments of history, an imagination of the future, a response to narrative conventions of realism and thinking with and against the grain of social understandings. Look at examples of historical, speculative, postcolonial, experimental, science, magical realist fictions and theoretical work. Will consider the means by which narratives produce or rely on ethical beliefs and arguments within the specifics of their world-making as well as the ethical problems presented by relations of power within the particular histories of the texts' various moments.

AAAS229S - Performing African Diaspora

Course Description

The Black cultural contributions of globally popular performance genres such as salsa, capoeira and kizomba often remain unrecognized. The objectives of this class are: 1) to understand the historical, cultural and political forces that created the African Diaspora and its rich tapestry of dances. 2) to question our assumptions that knowledge is only produced through the mind; knowledge is also produced and transmitted through moving bodies. To meet these objectives, the course will be a combination of seminar and studio: in seminar we will engage readings in anthropology, dance and performances studies about specific dances which we will then learn in studio.

AAAS235S - Performing Brazil

Course Description

Introduces the history and culture of Brazil through the lens of performance. The course explores the way performance arts (dance, music, carnival, theatre, sports) are celebrated as expressions of the African, Indigenous and European roots of Brazilian culture, yet also subjected to race, gender, sexuality and class discrimination. Readings, films, seminar discussions and studio workshops give students understanding of the social forces that shape Brazil; and a critical appreciation for the ways in which performance can both re-inscribe stereotypes and social injustice, and be an avenue for transgressive expressions, political protest, and liberatory practices.

AAAS236S - China and Africa: Similarities, Differences, and Interconnections

Course Description

China, Africa, and their diasporas have similarities and differences, many of them the products of interconnections or overlapping experiences. Through the lenses of history, art, politics, and economics, this anthropology seminar compares these two culture complexes and highlights the hybrid and creative results of their interaction, with the special goal of correcting existing misunderstandings and facilitating thoughtful cooperation in the future. While the professor will orient the discussion around current anthropological methods of critical analysis, the seminar format will require the professor and all of the students to build on and contribute to each other's understanding of the topic.

AAAS239 - Racial Attitudes, Racial Prejudice, and Racial Politics**Course Description**

This course brings together the theories and strategies for perspective taking of two disciplines, Music and Political Science, to unravel some of our most complicated questions around race and inequality in the US. We will (a) focus on how institutions and people have defined 'race' and codified racial categories over time; (b) investigate how people have grappled with, challenged, or exacerbated racial inequalities through the arts; and (c) explore how racial politics are shaped by culture, and vice versa. By reviewing works from social science, humanities, and artists; modeling modes of communication; and addressing conflict and appropriation through active music making, we will analyze racism as a centripetal force in American society. No prior musical experience necessary.

AAAS246 - Sociology of Racism in America

Course Description

Examines social history of major racial groups in the US and relationships to contemporary standing. Discusses central concepts sociologists use to analyze racial matters. Central theme: 'racism' is not mere 'prejudice,' 'ignorance,' or 'intolerance,' but a comprehensive historical system of racial domination organized around the logic of white supremacy. Discussion of 'whiteness' in the USA—how whiteness emerged as a social category, an identity based on experiences of variety of European 'peoples;' how it dominated the racial structure of the US since the 17th century, how wealth has been distributed along racial lines, racialization of Asians and Latinos, and color blind racism.

AAAS248 - Hip Hop, Futurism, and the End of the World**Course Description**

In this course, we will explore the intersections between hip hop, black futurity, science-fiction, and visions of the end of the world. We will focus on hip hop artists who draw themes from fantasy and speculative fiction to both re-make sense of the present and to imagine a radically different future. We will explore how these artists invent personas, identify with the alien, invoke space ships from other planets, and blur the line between human and non-human. While the course underscores themes of futurity and possibility, we will also examine how these themes respond to enduring conditions of racial, gender, and sexual oppression. Artists we will focus on include: Outkast, Janelle Monae, Erykah Badu, and MF Doom.

AAAS256 - Race in the 20th Century U.S.

Course Description

Increasingly, our world today acknowledges that race is less about biological features and more about social rules and ideas. So why does race remain so important in the twenty-first century? This course combines ideas from history, public policy, sociology, and political science to examine how ideas of race have changed over from 1877, following the end of Reconstruction, to the present. While we might think of ideas like 'white,' 'Black,' 'Asian American,' or 'Hispanic' as concrete, easily definable categories, all of these categories and their social impact changed significantly over the course of a century.

AAAS264 - Latin American Wars of Independence

Course Description

This course covers the conspiracies, uprisings, and wars that led to the independence of Haiti and the Latin American colonies of Spain and Portugal between 1780 and the 1898 withdrawal of Spain from Cuba. It focuses on the key military and political leaders of anti-colonial struggles conducted on a continental scale from the islands of the Caribbean to the Andean highlands and beyond. Military strategy and political tactics were decisively shaped by modern debates about the meaning of freedom in terms of slavery and national self-determination. No prior knowledge of Latin America and the Caribbean required.

AAAS265S - Representing Breast Cancer: Feminist Literature, Art, and Film**Course Description**

Analyzes representations of breast cancer in feminist literature, art, and film. Drawing on health feminism, feminist medical ethics, and disability studies, explores what those representations tell us about the intersections among gender, race, class, sexuality, and ability in both the Global North and South. Sets artistic representations of breast cancer against the hyper-sexualization of breasts in capitalism's visual cultures and the spectacles of breast cancer activism. Shows how literature, art, and film can reveal health care's material conditions as well as breast cancer's psychic complexities.

AAAS269 - Black Gods and Monarchs: Priests and Practices of the Afro-Atlantic Religions

Course Description

Surveys the spiritual, political and economic experience of those who worship African gods—West and Central Africans, Cubans, Brazilians, Haitians, and North Americans. The gods as sources of power, organization and healing amid local political dominance of Muslims and Christians and seismic expansion of international capitalism. West African Yoruba religion, West-Central African Kongo religion, Brazilian Candomblé and Umbanda, Cuban Santería and Palo Mayombe, Haitian Vodou, and African American Pentecostalism are examined as belief systems, and contextualized to the trans-Atlantic slave trade, long-distance commerce and pilgrimage by free people.

AAAS272 - Environmental Justice: The Making of a Modern Movement

Course Description

This class puts the rise of the environmental justice movement in historical context. Students will be introduced to EJ through its foundational texts. Subsequent modules will then look at: how EJ critiqued the earlier environmentalism movement, longer scale historical processes of imperialism, capitalism, and racial formation at the roots of inequitable environmental health, and real-world case studies that show how these historical processes have come together and how the movement has matured since the 1980s. By the end of the course students will understand how EJ work has evolved and become a topic of global concern.

AAAS283S - Death, Burial, and Justice in the Americas**Course Description**

This interdisciplinary course explores the phenomenon of necroviolence: attacks on the dignity, integrity, and memory of the dead. Cases come from the United States, Latin America, and Canada. Topics include the rights of the dead, cultural attitudes towards the dead, and the 'ambiguous loss' experienced by loved ones of the disappeared. We also explore the activism of family members, volunteer cemetery reclamation groups, and forensic scientists who exhume mass graves to identify bodies. Students will interact with guest speakers, spend time in a local African American cemetery with ties to Duke, and do community work and research on behalf of the marginalized dead.

AAAS289 - Race, Sport & Education: Duke Basketball

Course Description

This course uses Duke's athletic history, present, and future to explore how Black intelligence is recognized or not recognized and the value of Black athletes' intellectual capacity in college athletics over time. We will do this primarily, but not exclusively, through CB Claiborne's story. We will discuss the role of race-based slavery on the emergence of Black education in America leading up to Duke's Athletic integration in 1965 and the emergence of Duke Basketball as a global brand, including five men's national champions, 'one-and-done' during the Coach K era until the present with new Name, Image & Likeness (NIL) legislation. This course may include travel to sites within Durham and on-campus such as the Duke Homestead State Historical Site.

AAAS304S - Black Politics

Course Description

Course focuses on the evolution, nature, and role of African-Americans within the American political system. The concern is with African Americans as actors, creators and initiators in the political process. Beginning with an exploration of the historical antecedents of blackness in America, we will explore how the black experience in America has shaped the American political system (specifically public opinion, political institutions, political behavior, and salient public policy debates) and how black Americans have come to understand their position within the American political system.

AAAS309S - Carceral Geographies: Explaining Mass Incarceration in the U.S.

Course Description

How did the United States come to have the largest incarcerated population in the world and why are people across the nation calling for an end to over policing and mass incarceration, some even for the abolition of prison? What is abolition and how have the enduring legacies of colonialism impacted contemporary processes that sustain the carceral state? How has local, state, and federal legislation influenced prison expansion? These questions are at the heart of carceral geographic inquiry and this course is designed to explore and explain the socio-spatial articulations of carcerality through critical engagement with a range of social-geographic and political-economic theory.

AAAS313S - Race and Medicine

Course Description

This course looks critically at the role of race in modern medicine from historical and present-day perspectives. Race is central to any critical analysis of medicine--from the origins of gynecology and enslaved women, to tropical medicine and American empire, to contraceptive trials in Puerto Rico, to anti-Asian hate crimes in the advent of COVID-19. Through focused case studies, we will explore the racialized subject as intersecting with other categories of difference in medicine, such as sex, gender and sexuality. In parallel, we will ask how medicine has been used as a system of power and knowledge to create racial categories themselves.

AAAS316S - Apartheid South Africa and Struggles for Democracy

Course Description

Working through an array of diverse organizations – including the African National Congress, the Pan African Congress, the Black Consciousness Movement, a host of liberal organizations, the churches, the trade union federations, and countless more - South Africans fought against apartheid from its inception. In 1994 they achieved a multi-racial democracy led by President Nelson Mandela. This seminar explores key themes in post-World War II South African history, paying special attention to the plethora of anti-apartheid struggles, while analyzing the tenets of apartheid policies.

AAAS324S - How to Change the World: Black Literature and Politics**Course Description**

For centuries Black writers have engaged in an artistic and creative project dedicated to establishing a more just and equitable society. This class aims to explore how such writers as Frederick Douglass and Harriet Jacobs crafted texts deliberately aimed at changing the world. We then extend our study of this literary tradition to our contemporary moment to consider how twenty-first century Black authors like Toni Morrison, Ta-Nehisi Coates and Jesmyn Ward have produced texts in order to bring attention to persistent inequalities, many derived from the legacy of slavery.

AAAS326S - Race and Memory in the Americas

Course Description

This course confronts this relationship between memory and narrative and their role in addressing the trauma of colonization and the slave trade in its many iterations within Latino, Latin American and at times West African literature. Often pairing the readings with prominent UNESCO-sponsored memorials or other landmarks, this course endeavors to have students question how a transnational Americas remembers itself through narrative and memorialization, despite colonization, imperialism, neoliberalism, and heteronormative hegemonies. Taught in Spanish.

AAAS327S - Brazil, Race, Sex, and the Body

Course Description

The approach of the course will be interdisciplinary, drawing upon works from anthropology, literature, history, and film. Topics will include colonialism and enslavement, abolition, nationalism, social activism, and popular culture. We will also consider how Brazilian social relations differ from or conform to other racialized patterns in other nation-states in the Americas. Particular attention will be placed on the impact of the interrelationship between race, gender, class, and nation on the lives of Black Brazilians.

AAAS328 - How to Study Inequality

Course Description

The course examines social science research methods as they pertain to inequalities of race, gender, ability, and class. Students will learn to approach interdisciplinary social science research from the perspective of inequality studies and to deploy quantitative, archival, and qualitative methods with appropriate consideration of social inequality. Work will include consideration of diverse research paradigms, ethical dilemmas in the field, and theories and methods to undertake systematic modes of inquiry. It is a required course for the minor in Inequality Studies.

AAAS334S - Documenting Resistance on Film: The Poor People's Campaign from 1968 to Today

Course Description

This documentary course explores the rich archival landscape and contemporary reverberations of the 1968 Poor People's Campaign, a transformative social movement that radically challenged economic inequality and systemic poverty across racial lines in the United States. Students will develop their research and filmmaking skills through hands-on engagement with historical materials and documentary techniques in order to explore the role of cultural production in movement spaces. Working independently and collaboratively, students will analyze how archives shape our understanding of history, study contemporary creative approaches to documentary, and learn practical skills for film production.

AAAS340S - African Cities, African Urbanization

Course Description

If the predominant mode of development in African cities is informal and unplanned giving rise to new modes of life, livelihood, and leisure beyond the organizing infrastructures of formal architecture and design in reality, the new African urbanism seems to give rise to two distinct conditions of life--the one crisis and the other ingenuity. Concerned to think through the gendered forms of labor arising from rapid urban growth taking place without conventional facilities, infrastructures and technologies, 'African Cities, African Urbanization' turns to the ethnography of informal settlement; to women's relationships to informality; to the ways in which productive and reproductive labor play their part in urban formation and deformation in African cities.

AAAS344S - History Wars

Course Description

What does it mean when people in the present call for a 'reckoning' with history? What is behind the calls for erecting or tearing down monuments to the past? Academic historians have their own interpretations and arguments about the past and its meaning. But politicians, teachers, activists, influencers, and everyday folks also contest what we talk about when we research, write, and teach history—from the centrality of enslavement and colonialism in the making of America to how systemic inequality is built and structured over time to the very question of whose voice, and life, matters. This seminar will engage the substance of these contested histories and the way people have conscripted these histories to their own social and political concerns.

AAAS355S - Black Feminism and Fashion

Course Description

Black feminist perspectives on clothing and fashion. Explores traditions in which Black artists and writers make clothing a primary theme. Presenting photographic, painted, and literary portrayals by and of Black people across the diaspora, and bringing together the study of visual culture, material culture, and literary studies, reveals fashion and clothing as aesthetic practices of everyday life that defy the objectifying effects of racism and sexism. Engages with scholarship that explores slavery's and colonialism's impact on gender and sexuality and examines how artists and writers work within and against those impacts to document the self-fashioning in Black cultural life.

AAAS376S - Love, Sex, Madness in Caribbean Fiction and Film**Course Description**

This course explores the themes of love, sex, and madness as the lenses through which Caribbean writers and filmmakers have challenged traditional ideas of citizenship, family, gender roles, and political power. What, for example, is the connection between a dictatorship in Haiti and women's sexual desire? How does the figure of 'the mad Creole woman' challenge masculinist constructions of national identity in the early years of independence in Africa? How might the love between a mother and child be read as an act of anti-colonial resistance? We will examine these questions through novels, short stories, and films. Recommended prerequisite: French 204 or equivalent.

AAAS387 - Moral Panics, Spectacle, and Everyday Life: Social Anxieties and Minorities

Course Description

Moral panic refers to the way a social order becomes hyper aware of activities of groups, objects, or circumstances posing a menace to accepted values. Course explores how everyday life is managed, intensified, and altered by moral panics' spectacle. Sexual deviance, drugs, popular culture, disease, witch hunts, gender fears, etc., are not only creations of pre-existing fears, they make various kinds of sense in specific moments. They are how people recognize themselves and new challenges to that self. From those challenges they try to police others; they are public consensus-building events and the means by which we identity our fears and desires.

AAAS397S - African Cities, Development, and Climate Change

Course Description

The displacement of sizeable urban populations as a consequence of climate change renders African cities sites of two contending conditions: the one is a prevailing sense of crisis; the other, in the form of a response, is to attend to the prevailing conditions of crisis. African cities are poised to mobilize not only extant forms of cultural ingenuity, but technological ingenuity too. Students will explore African city life from megalopolises like Cairo to threatened UNESCO world heritage sites like Saint-Louis, Senegal. The course reimagines terms such as 'development,' 'employment,' 'infrastructure,' 'sustainability,' and 'citizenship.'

AAAS399 - Black Religion, Anguish, and Liberation

Course Description

In this course, we will study the relationship between race, religion, and politics in the context of black strivings for liberation in the Americas, the trans-Atlantic, and so forth. We will examine how struggles against anti-black violence have been inspired by criticisms and re-interpretations of prevailing religious ideas and practices in addition to the creation of new conceptions of the sacred. We will focus on two different contexts/movements – anti-slavery/abolitionist movements and mid 20th century black freedom/decolonial struggles —considering in each case how religion is both an object of critique and a source of empowerment, agency, and resistance.

AAAS402S - South Africa and the World

Course Description

Throughout the 20th century, South Africa had the largest economy and military on the African continent. Its strategic geographic position and mineral wealth in gold and uranium made it an important ally for the largest economies in the world. The Cold War enhanced its significance. However, in the second half of the twentieth century, its policies of apartheid rendered it an international pariah. This course examines the ways in which countries, international institutions, and millions of 'ordinary' people shaped the course of South African history. How did South Africa interact with the broader world, and how did the world try to affect South Africa's policies of white supremacy?

AAAS405S - Black Thought and Creativity to 1865

Course Description

How did people of African descent express themselves in the context of slavery? What did they write about? What kinds of items did they create? This course will explore the cultural, intellectual, and aesthetic knowledge produced by people of African descent before 1865 and how these works continue to shape conceptions of liberation in contemporary Black life. Students will engage materials by Black thinkers, artists, activists, and critics, from the nineteenth to the twenty-first century, who use creativity to ruminate on freedom and black liberation in diverse media, including autobiography, painting, speech, photography, performance and food culture.

AAAS406S - South African Life Histories

Course Description

South Africa presented the world with one of the great moral challenges of the 20th century. We will explore its history through the lens of biography and autobiography. The country underwent major transformations -- rapid industrialization, segregation, the rise and fall of apartheid, and the emergence of democracy. How did individuals experience these social changes? In what ways do individual lives illuminate these larger social processes? Protagonists include a prophetess, political artists and writers, exiles, and celebrated figures. Topics cover how segregation and apartheid affected people's daily lives, opposition to white supremacy, and the personal impact of the AIDS's epidemic.

AAAS411D - Black (In) Translation

Course Description

Examines the meanings of Blackness as it moves through the Atlantic world from 18th century to present. Readings explore theories of race and representation, and ways that translation conveys, shapes, and disrupts ideas about Blackness as cultural identity, lived experience, political claim. Course materials include works of literature, history, anthropology, and film. Taught in English, though, students enrolled under foreign language discussion sections will do reading, writing, research, and discussion in the language, requiring 2 years of foreign language study for language credit for the major or minor.

AAAS413 - Race and Language

Course Description

This course focuses on the study of language & race—both as a social-scientific category & as a lived identity. While African-American Vernacular English (or AAVE) or Black English will feature prominently, this course will also bring in examples from other speech varieties & their respective social contexts for the purpose of having a more general conception of language and race. No background in Linguistics is required, as many crucial features of the study of Linguistics will be introduced and incorporated into analytically interesting issues, including the problem of classification of languages (in relation to the social contingent origin of classification).

AAAS430 - Music History and Politics in Contemporary Africa

Course Description

The objective of the course is to analyze the social, political and cultural dynamics of post-independence African states through the musical archive. The course will analyze the role that music has played in the construction of national identities in post-colonial African states, but also in social, political and cultural dynamics of contemporary Africa. From High-life in Ghana to Congolese rumba, Afrobeats in Nigeria, reggae, Hip Hop and Raï, it will show how music has accompanied societal and political evolutions of African nations. The course will think of music as a landscape and analyze the musical circulation, as a space for the constitution of African societal modernities. In English.

AAAS431S - Capstone Seminar: Slavery and Capitalism

Course Description

Was American slavery efficient? Was it profitable? Was slavery capitalist or its opposite? Historians have debated these questions for nearly a century. More recently, they have been flashpoints in political battles over how U.S. history is taught. In this course we will trace the emergence of slavery and its relationship to the rise of capitalism in United States and broader Atlantic world economy. We will examine the instruments of credit, debt, and investment that financed human bondage and created slavery's linkages to capitalism, with special attention to why scholars in this field have disagreed so often. This course is a capstone to the History major, but is open to all students.

AAAS450S - The Global Caribbean

Course Description

The course introduces students to the Caribbean as a transnational space that reflects the global dynamics associated with flows of bodies via migration, labor, and goods all of which have undergirded the birth and evolution of the (primarily) Atlantic world economy. The Global Caribbean will have a historical sociological bent that frames the region as the first modern colonial space which has served as a template for other projects of colonial and postcolonial development elsewhere in the world. Emphasis will be on the way that freedoms and unfreedoms operate in the Caribbean and elsewhere. Discussions of how knowledge has conditioned the representation of the region will be entertained.

AADS120CN - Asian Foodways in Migration

Course Description

Course examines the foodways and food cultures of East Asia and global Asian diasporic communities. Why does food define us, beyond basic survival? What can food tell us about individuals, communities, and cultural flows across space and time? Topics include: food as environmental and bodily processes; food as language, history, cultural memory, religious practice, identity and national markers; food as history of plenitude and hunger; the discourse of food as danger (from foreignness to cannibalism to zoonotic contagion). Course aims to introduce different disciplinary approaches and methodologies through the focus on foodways. No prior study of Asian languages or cultures is required. Part of 'How do Asian cultural heritages circulate?' first-year Constellation.

AADS254S - Unsettling Modernity: Korea, Empire, Diaspora

Course Description

Korean history from the late 19th century to the present. Examines how colonialisms, cold war divisions, and transnational migrations have shaped modern Korean identities both on the Korean Peninsula and in the diaspora. Challenges dominant narratives of modernization by centering marginalized perspectives and exploring key moments in modern Korean history: Japanese colonial rule, liberation and division, the Korean War, ideologies of 'self-reliance' in North and South Korea, South Korea's role in the Vietnam War, and democracy in neoliberal South Korea. Engages transnational Korean literature, history, theory, and visual media to reassess the nation-state as a construct shaped by colonial and Cold War structures.

AADS309 - Chinese Im/migration: Chinese Migrant Labor and Immigration to the US

Course Description

Comparative examination of contemporary China's 'floating population' of migrant labor, and of Chinese immigration abroad (particularly to the US). Focus on cultural representation of these phenomena (particularly literary, cinematic, and artistic works), but sociological, anthropological, economic, and political perspectives will also be considered. Topics include cultural alienation, marginalization, and assimilation; education and health care; labor and commodification; gender and ethnicity; narratives of modernization and development; together with the ethical, social, and political implications of migration.

AADS313S - Race and Medicine

Course Description

This course looks critically at the role of race in modern medicine from historical and present-day perspectives. Race is central to any critical analysis of medicine--from the origins of gynecology and enslaved women, to tropical medicine and American empire, to contraceptive trials in Puerto Rico, to anti-Asian hate crimes in the advent of COVID-19. Through focused case studies, we will explore the racialized subject as intersecting with other categories of difference in medicine, such as sex, gender and sexuality. In parallel, we will ask how medicine has been used as a system of power and knowledge to create racial categories themselves.

AADS335 - Chinatowns: A Cultural History

Course Description

Explores the intersection of space and ethnicity through the myriad ways Chinatown has circulated as memory, fantasy, narrative, myth, in the dominant cultural imagination, and how lived realities of overseas Chinese communities, Asian American history, and changing conceptions of 'Chineseness' have productively engaged with real and phantom Chinatowns. Research will emphasize multi-disciplinary approaches, such as urban history, architecture, ethnography, economics; or engagement in a creative project.

AADS337S - Decolonization: Histories, Meanings, Struggles

Course Description

This course explores decolonization as an historical event, a category of theoretical analysis, and a series of contemporary social movements. Course material will introduce students to the history of decolonization as both idea and event, putting global anti-colonial movements of the twentieth century into conversation with contemporary struggles for the decolonization of occupied land, institutions, and epistemologies. This interdisciplinary course draws on work in history, geography, anthropology, women's studies, and postcolonial and decolonial Studies. Students will also read and research manifestos, memoirs, archival documents, documentary films, oral histories, and museum exhibits.

AADS382S - Intimacies: Sexuality, Nation, and the State

Course Description

A deep dive into the theoretical concept of intimacy, this seminar touches upon the racial, sensorial, and sexual life of nations and the state. Through discussions about citizenship, religion, migration, political economy, belonging, community, and activism, we consider what it means for bodies to exist in relation not only to other bodies, but also within the larger body of the nation-state. We examine theoretical writing alongside film, performance and installation art, law, and pop culture, bringing sexuality to bear on indigenous genocide, the Antebellum South, anti-immigration and miscegenation law, US militarism in Asia and the Pacific, LGBTQ rights, and political scandal.

AADS452 - Contemporary Chinese Dance in the Diaspora

Course Description

'Contemporary Chinese Dance in the Diaspora' is a studio and seminar combined course designed to introduce students to Chinese dance techniques within contemporary dance practices. Each class will commence with a comprehensive dance technique session, followed by discussions centered on readings, films, and documented dance performances. Through these activities, the course provides an opportunity to explore how dance facilitates dialogue about identity formation and cultural belonging while also serving as a powerful platform for political activism within diasporic communities.

AMES107 - Introduction to East Asian Cultures: Narrating East Asia through Word and Image

Course Description

The study of East Asia makes sense not necessarily as a study of shared canons or of 'civilizational origins' or, shared 'Asian values': rather, modern East Asia can be productively studied in terms of shared historical, political, cultural concerns; the influx of new ideologies; the processes of 'becoming modern'; and of course, the positioning of East Asian area studies in the academy and the larger world. In this introductory course, we will be looking at 'Global East Asia' and its diasporas through all manners of storytelling, focusing on word-image narratives: Asian traditions of manga, manhwa, manhwa, as well as graphic novels.

AMES120CN - Asian Foodways in Migration

Course Description

Course examines the foodways and food cultures of East Asia and global Asian diasporic communities. Why does food define us, beyond basic survival? What can food tell us about individuals, communities, and cultural flows across space and time? Topics include: food as environmental and bodily processes; food as language, history, cultural memory, religious practice, identity and national markers; food as history of plenitude and hunger; the discourse of food as danger (from foreignness to cannibalism to zoonotic contagion). Course aims to introduce different disciplinary approaches and methodologies through the focus on foodways. No prior study of Asian languages or cultures is required. Part of 'How do Asian cultural heritages circulate?' first-year Constellation.

AMES146 - Korean Popular Music (K-pop)

Course Description

This course investigates the history, production, reception, and circulation of Korean popular music (K-pop). The course is designed in three modules: the first module offers a critical overview of the history of Korean popular music from 1900 to the present; the second module focuses on the political economy of K-pop; the third module investigates various social issues concerning K-pop, including gender politics, cultural appropriation, visual and aural aesthetics, fandom culture, use of technology, etc. Students will engage with both scholarly articles and popular sources, as well as music videos and albums. Knowledge of the Korean language can be helpful but is not required.

AMES148CN - Global Palestine

Course Description

Why is Palestine addressed as complicated in dominant Western popular and scholarly historical accounts? How are gender and sexuality used to argue for settler-colonialism? How have Palestinians situated their collective project since the early twentieth century? Why is Palestine a focus of solidarity among Indigenous and other peoples around the world? The course grounds students in an understanding of Global Palestine using original documents, scholarship, and creative sources, and includes guests. Evaluation is based on preparation, attendance and participation, individual and team analytical writing and creative projects, and respect for the dignity and worth of every class member.

AMES155CNS - The Cultural Cold War: Voices From Below

Course Description

The Cold War was marked by ongoing rivalry between the United States of America and the Soviet Union, though its hot wars were fought across the decolonizing world. Placing literary and aesthetic cultures at the center of Cold War battles, this course introduces Cold War cultural interventions in Asia, Africa, and Latin America and how they shaped popular understandings of literary autonomy, freedom of speech, ideology, and propaganda. Through sampling declassified documents from CIA archives, little magazines, cartoons, films, novels, and short stories, students will learn how the Cold War generated competing approaches to literature and art.

AMES206FS - Clash of Civilizations: In the Heart of Europe**Course Description**

This course focuses on the battle between barbarian invaders, established communities, and new religions in the Middle Ages. What became Spain and Portugal were battlegrounds between faiths old and new, a clash of civilizations between Christianity, Judaism, and Islam that would inform future global conflicts. We explore the history of this confrontation at the crossroad of civilizations—between East and West, Africa and Europe—and its effect on our worldview today. A common culture was forged in science, mathematics, music, literature, philosophy, and mysticism, a shared legacy shaping world history and the current world order. Part of the 'Geopolitics and Culture' Focus Cluster.

AMES207 - Silk Roads and China, Ancient and Medieval Transformations

Course Description

The Silk Roads are the oldest and longest routes of cultural communication and economic exchange connecting Asia, Europe and Africa. In use since the days of Alexander the Great, the Roads and its rail networks now extend from China to England, connecting 70 countries and forming a vital system. This course introduces the ancient to early modern histories, cultures, and religions of the Silk Roads anchored in four themes: Alexander's empire; life in medieval cities of Chang'an, Baghdad and Constantinople; Silk Roads religions and the interactions of Buddhism, Christianity, Judaism and Islam; and the Mongol empire visited through the travels of Marco Polo.

AMES222 - Indian Cinema & Social Change

Course Description

Considers the transnational purchase, aesthetic, and civic sensibilities of Indian cinema focusing on Hindi-language films. Review begins with emergence of Indian cinema in 1890s, then considers how social change became a driving force during anti-colonial resistance and nationalist reform. Course focuses on the post-independence (1947-) period, when social justice activism enters the mainframe of 'Bollywood' film. Core inquiry centers on how the cinematic imaginary of India perceives faultlines in Indian society and expresses its social voice. Themes include caste, gender, sanitation, poverty, successfulness, religious fundamentalism, ageism, and sexuality.

AMES254S - Unsettling Modernity: Korea, Empire, Diaspora

Course Description

Korean history from the late 19th century to the present. Examines how colonialisms, cold war divisions, and transnational migrations have shaped modern Korean identities both on the Korean Peninsula and in the diaspora. Challenges dominant narratives of modernization by centering marginalized perspectives and exploring key moments in modern Korean history: Japanese colonial rule, liberation and division, the Korean War, ideologies of 'self-reliance' in North and South Korea, South Korea's role in the Vietnam War, and democracy in neoliberal South Korea. Engages transnational Korean literature, history, theory, and visual media to reassess the nation-state as a construct shaped by colonial and Cold War structures.

AMES255 - Religion and the Novel in Modern India

Course Description

Indian writing in English, especially the novel, provides a unique understanding of religion in the world's largest democracy. The novel has come of age in India, seen innovations and has influenced world literature. Indian and Indian-origin novelists have been Booker and Pulitzer winners, Commonwealth awardees, and Sahitya Akademi laureates. Course will examine how the Indian novel in English understands and mediates tradition and modernity, selfhood and society in a deeply diverse culture. Includes novels written during the twilight of British colonial rule, the Partition, and contemporary decades of rapid globalization and diasporic change.

AMES257 - Understanding Chinese Religions

Course Description

In this course, we examine the major religious traditions in China today – Confucianism, Buddhism, Daoism, Christianity, Islam, and other religious traditions – through both historical and ethnographic case studies. By focusing on rituals and beliefs related to everyday life experiences, we gain an understanding of Chinese religions through both historical contexts and contemporary developments. We also consider what it means to be religious in East Asia in the 21st century. Students in this course are encouraged to think comparatively, to write analytically, and to learn how to discuss accounts of religious life with a sociological as well as historical imagination.

AMES265 - The Transnational Realities of an Ancient Tradition**Course Description**

This course traces the global development of Confucianism as religious, political, and cultural traditions from the eighteenth century to the twentieth-first century. Confucianism has taken a strong hold in East Asia for centuries, and it has also been having significant impact in Southeast Asia, especially in Vietnam, Singapore, Indonesia, and Malaysia, and today in North America as well. By examining textual, historical, and ethnographic data, this course focuses on the most recent developments of Confucianism as a religious and ritual tradition in diverse societies, while taking into account its cultural and political impact on global modernity.

AMES267 - Spiritual But Not Religious**Course Description**

This course address one of the most pressing questions in the study of religion today: What does it mean to be 'spiritual but not religious'? This is a question that frequently appears in survey research; about a quarter of U.S. adults 'now say they think of themselves as spiritual but not religious' (Pew). In this course, we address the big questions about how to define 'religion' and 'spirituality,' and we use empirical data to acquire a new understanding of the lived experience of people who are 'spiritual but not religious,' not only in the United States, but also in Asia and other parts of the world.

AMES276 - Introduction to Asian American and Diaspora Studies

Course Description

What does it mean to be Asian American? Asian American Studies is an interdisciplinary field that draws on social sciences, humanities, and the arts to explore the historical and contemporary experiences of Asian Americans in the western hemisphere. This course provides students with an introduction to this dynamic and growing field of study, taking race, gender, immigration, diaspora, class, labor, and sexuality as primary subjects of the field. The course also historicizes Asian American racialization to better understand the structural forces that have shaped Asian American lives and the ways that writers, scholars, and activists have responded to and resisted these forces.

AMES312S - Asian Religions in Film: Knowledge of the Other

Course Description

Through analyzing films and historical cases, this course asks fundamental questions about religion in global age: How do we understand religions that seem very different from our own? How do we relate to people from different religious traditions, often treated as the 'Other'? To answer these questions, we address various conceptualizations of the so-called 'Other.' Hegel, de Beauvoir, Said, and Iwamura lead the way in theoretical discussion, touching on issues in philosophy, feminist theory, and postcolonial theory. Films are examined to show the diverse ways Asian religions are lived and transformed in encounters with the West. This course aims to reach a new understanding of not only Asian religions, but also of religion itself as ever-changing categories of knowledge and experience.

AMES326A - Religion, Security and Global Citizenship in the Arab World

Course Description

Examine how the Arab world is embodied in the global or world system of the 21st century. Learn the specific accents that inform its citizens and shape its prospects locally, regionally and internationally. Examine how the major Abrahamic traditions - Judaism, Christianity and Islam - had their historical origins in the eastern Mediterranean world, and how they continue to have adherents that populate the region and challenge the modern notion of citizenship. Explore how the current uprising reflects the challenges of reconciling local aspirations with global forces. STUDY ABROAD: Duke in the Arab World Summer 2012

AMES403S - Cairo - A Global History

Course Description

This class helps students to get familiar with the history of Egypt and the larger Middle East through the story of the city of Cairo, the largest Arab and Muslim metropolis, and the second largest in Africa. We explore not only the various historical layers of this city, but we also learn about the approach of urban history, including the crucial questions of globalization, urban revolts, and the environment in the past two hundred years and until today. In this way, the class is a methodological enquiry into how we can describe change in urban life with the tools of history, art history, anthropology, and sociology.

AMES410S - Trauma and Space in Asia

Course Description

Space and Trauma across Asia. Introduces theoretical framework of 'trauma discourse;' examines how the experience of space in Asia broadly defined has shaped historical traumas, which have marked the transition from colonialism to postcolonialism. Focus on Israel/Palestine, India/Pakistan, China/Taiwan, Japan/Korea; examine how critical terms originating in one historico-geographical context are translated across geographical boundaries.

AMES411S - Imperialism and Islamism

Course Description

This course draws on transnational material to gain perspectives on the conflict between the US and its Islamist opponents. Its central concern is Islam's transnational past and relations of European empires to that past. It is guided by a transnational perspective framing specific case studies, original source material and arguments on the nature of global Islamist politics and on the US as an imperial power. Students will strengthen skills in global anthropological and historical analysis, using the conflict between the US and its Islamist opponents as a case study.

AMES426S - France-Asia: Cultural Transfers and Translations in a Globalized Context

Course Description

This class explores the dynamic contemporary Franco-Asian dialogue with a specific focus on China, Japan, Vietnam, Laos and Cambodia. Seeking to go beyond the East-West divide, the seminar investigates the current stakes of this dialogue, given its growing complexity after 1945. It examines the postcolonial legacy of France's occupation of Indochina, and how East Asia has also often been viewed as an 'Other,' serving to crystallize French anxieties over political and cultural power. It uses an interdisciplinary perspective encompassing novels, cinema, dance, visual arts, and critical theory to trace a web of exchanges in a globalized context. Taught in French.

ARTHIST103D - Introduction to the History of Architecture

Course Description

The survey provides a panorama of architectural production from Antiquity to the present with a global perspective. The objective is to insure knowledge of architectural production, related historiography, contemporary debate, and scholarship. The reading materials are organized chronologically to facilitate the students' approach to the field of architectural history. A thematic approach will inform the lectures, where notions of practice, techniques, spread of knowledge and models among others, are considered in relation to specific case studies.

ARTHIST143CNS - The Archaeology of Death: Ritual and Social Structure in the Ancient World

Course Description

Historically contextualized study of how the dead 'lived' in the ancient Roman world, in funerary practices and traditions. Topics may include: funerary rituals; ritual distinctions between the space of the living and dead around cities and in the countryside; ancestor cult; monumental and not-so-monumental tombs; grave offerings and grave assemblages; public personae and funerary iconography tied to gender, age, and occupation. Course will compare death-practices between ancient Rome and other regions and periods.

ARTHIST175S - An Archaeology of Inequality: Ancient Rome in Ten Objects

Course Description

Introduction to the study of social structure in Ancient Rome with an emphasis on 'invisible Romans': groups that receive less attention in textual sources (women, slaves, children, outcasts, differently abled people, foreigners). Ten objects are used as prompts for storytelling and for an archaeological investigation of the material traces of non-elite Romans. We discuss the concept of 'object biography' developed by anthropologist Igor Kopytoff and visit the Nasher Museum of Art for hands-on activities with Roman artifacts.

ARTHIST196 - Etruscans: Myth, Archaeology and Civilization

Course Description

The Etruscans were a pre-Indo-European population living in the Italic peninsula in the first millennium BCE. One of the most important and fascinating civilizations of the ancient world, which deeply influenced the Classical world and the Mediterranean basin. The class involves archaeological studies and comparative analyses of pre-urban and urban settlements, the necropoleis, art, art history, iconography and archaeological remains of the Etruscan and pre-Roman Italic world. Use of digital technologies for the study of Etruscan cities and landscape with a specific focus on the Etruscan city of Vulci. Not open to students who have taken Classical Studies 198.

ARTHIST203A - The Arts, Culture, and Performance of New York

Course Description

This course introduces its participants to New York through its rich artistic, cultural, and performance offerings—drawn from art, dance, film, music, literature, and theater. Visiting all five boroughs, they contemplate how the identities of New Yorkers—informed by the city and by ability, class, ethnicity, gender, race, and sexuality—are performed in the theater of everyday life: in parks, streets, subways, and especially the city's diverse neighborhoods and restaurants.

ARTHIST227 - Medieval Castles of Europe

Course Description

This course will examine the transition of Western Europe into a fortified landscape from the mid-11th century until the advent of large-scale artillery in the mid-15th century. In addition to tracking technological and stylistic changes over time, this course will identify the discrete elements of fortification that were combined into a variety of castle plans. Natural resources and physical topography will emerge as central factors in the choice of site and design for medieval castles. As a way of investigating these topics, students will digitally reconstruct a historical or imagined castle in 3D graphics at a specific place and time covered in the course.

Course Description

Japanese visual culture from the end of the sixteenth century to the contemporary period encompassing the country's unification under Tokugawa rule and later emergence on the world stage through painting, sculpture, architecture, ceramics, decorative arts, photography, and print media. The relationship between artistic production and Japanese sociopolitical development seen through the critical issues of religion, region, gender, class, and nationalism. Ethical questions surrounding the establishment of the Japanese colonial empire in Asia, the Pacific War, the atomic bombings of Hiroshima and Nagasaki, the internment of Japanese-Americans in the United States, and the American Occupation of Japan.

ARTHIST234 - Japanese Architecture

Course Description

A survey of major architectural traditions of Japan. Sites ranging from prehistoric tombs and dwellings to contemporary design work of architects such as Isozaki Arata and Ando Tadao. Focus on the development of various architectural typologies: Buddhist temples, Shinto shrines, tea ceremony structures, garden design, imperial and shogunal palaces, fortified castles, modern institutional structures, and private residences. Japanese architectural practices compared with other Asian and Euro-American building traditions. Aesthetic, structural, historical, social, and religious issues considered.

ARTHIST235 - Introduction to Modern Realism

Course Description

A survey of modern realism. Beginning with Manet in France, the course looks at how realism evolved across media from the 1860s-1960s. It explores how realism came to complement and oppose trends in avant-garde art. Drawing upon works from the United States, Europe, Latin America, and the Russian Empire/USSR we will seek to understand how modernity and modernism influenced realism and will place particular emphasis on the politics of realist aesthetics. Areas of inquiry will include Social Realism, Socialist Realism, Mexican Muralism, Third Reich realisms, and world-building realism. This course offers students a foundational understanding of realism in modern art and visual culture.

ARTHIST236 - Visual Culture in Late Antiquity

Course Description

The Mediterranean world transformed entirely in Late Antiquity: It saw mass migrations, the rise of new religions, and the disintegration and reorganization of vast empires. This lecture course explores the equally dramatic transformations in the visual cultures of the late antique world with a focus on the dynamic relationships among art, architecture, and socio-political change.

ARTHIST238S - Science Fiction Film

Course Description

This class will study science fiction film from 1950 to the present. Discussions will be organized around the relationship between scientific and technological innovation and social and geopolitical transformation: how, for example, the threats of nuclear war and the exhaustion of environmental resources, discoveries in virology and genetics, and the innovations in cybernetics and artificial intelligence all intersect with decolonization and global development, race relations, and new social and geopolitical configurations. We will explore how science fiction film registers and responds to the uncertainties of a changing world: to changing conceptions of the human and of life.

ARTHIST245S - Women in Visual Arts, 1400-1800: Theory and History**Course Description**

Through lectures, discussion and individual projects, this course considers the roles women have played in the Early Modern art world as makers, buyers, patrons, donors, critics, and art collectors. It also takes up issues of gender, of race, of masculinity as well as femininity. A central theme of this class is how debates about the so-called Woman Question, which was essentially an ongoing quarrel about the nature and social role of women, shaped the representations and experiences of women of different classes and conditions. Our focus will be on visual representations, as well as period writing of and by women.

ARTHIST251 - Art and Christianity: A History of Christian Visual Culture

Course Description

This course is an introduction to the history of Christian visual culture from the early Middle Ages to the present. Beginning with controversies concerning the nature of images and their role in Christian worship, the course moves through successive eras of Christian history, focusing on Western Europe in the medieval and early modern eras, then following Christianity around the globe in the colonial period, ending with examination of modern European and American art that draws in different ways from the history of Christian ideas and practices. Readings and discussion in class focus on objects such as reliquaries, paintings, architectural settings, illustrated books, and prints.

ARTHIST257 - Seven Wonders: Monuments and Cultures of the Ancient Mediterranean

Course Description

Study of the 'Seven Wonders' of the ancient world: the Great Pyramids, the Hanging Gardens of Babylon, the Temple of Artemis at Ephesus, the Mausoleum at Halicarnassus, the Statue of Zeus at Olympia, the Colossus of Rhodes, and the Lighthouse of Alexandria. Course explores the meaning of these monuments to the societies that produced them, with attention to their chronological and geographical specificity. Topics include: how archaeologists approach ancient monuments; what these monuments tell us about the human experience and about life in the past; who precisely they bear witness to; and how the study of such monuments helps us to understand our own present.

ARTHIST265 - Drawing Foundations in Early Modern Europe

Course Description

Through classroom lectures, museum visits, and studio practice, this course studies the place of drawing since its early modern theorization in the visual arts and in the artistic practice. Drawings can be records of visual observation, or of a speculative thought process; ways of working out ideas, and of presenting plans; they also achieve the status of independent art objects. Students will gain familiarity with drawing as an artistic medium related to major questions about art and society, while also learning fundamental and practical drawing skills that will give deeper insights into theory.

ARTHIST284 - The Political History of Modern Architecture: From Revolution through Neoliberalism

Course Description

Given the needs for labor, materials, and legal permissions, architects in the modern period by definition intersect with interests of power. This course explores the role of political institutions and ideologies in the history of modern architecture. While the course focuses on European and North American examples, we will also include key case studies of non-Euroamerican architecture and politics. The course provides a foundational knowledge of the history of modern architecture as well as how political institutions and ideologies have influenced that development.

ARTHIST312 - Internship in New York

Course Description

Immersion in the professional art world through apprenticeship to a sponsoring artist or organization. Students spend fifteen hours per week at the internship and write a substantive paper containing significant analysis and interpretation of the relation of the students' sponsoring institution to the art form of activity as a whole, the system of production and consumption surrounding that art form or activity, and the sponsor's organizational framework, operating mechanics, and role in the creation, preservation, or interpretation of the art form or activity. Open only to students admitted to the Duke in New York Arts Program. Does not count toward the major. Consent of instructor required.

ARTHIST315 - Mapping History with Geographic Information Systems

Course Description

Beginner/intermediate Geographic Information System (GIS) course designed to help students learn how to investigate history spatially. Emphasizes perspectives, procedures, and tools that are relevant to applications of GIS in Art History and Humanistic disciplines. Designed as a hybrid lecture/lab format in which direct instruction is supplemented by hands on learning labs using ArcGIS software and real-world spatial data. The main skills students will gain are: integration of spatial and tabular data, geoprocessing, data visualization, creating features, editing features, vector and raster integration, spatial analysis, georeferencing.

ARTHIST317 - The Body in Art in Early Modern Europe: Power and Limits of Corporeal Representations

Course Description

This course studies the artistic representations of the human body in many guises: aesthetic, political, social, cultural, and erotic. It analyses the different strategies artists deployed to develop rhetorics of the body both physical and emotional. It considers different media (including painting, sculpture, drawings, prints, architecture, and gardens) and major theoretical frameworks (including feminist theory, phenomenology, social theory and somaesthetics). This course considers the body dynamically through composition, as object of investigation, as locus of meaning and through social understanding. Lectures and discussions are complimented by corporeal performances and improvisations.

ARTHIST319 - Introduction to Russian Culture through Art

Course Description

This course focuses on the art and visual culture of the Russian Empire and Soviet State/post-Soviet state. Emphasis is placed on the connections between art and politics from the social realist painting of the nineteenth century Wanders through modernism and the avant-garde (Futurism, Suprematism, Constructivism, and Socialist Realism), to contemporary Russian art's response to global crises, including the war in Ukraine. We will look beyond Moscow and St. Petersburg toward other regions critical to the development of culture, including Kyiv and Kazan. The course offers a foundational understanding of modern Russian/Soviet/post-Soviet culture through the lens of the visual arts.

ARTHIST335S - Photo Fever: Curating Photo Exhibitions

Course Description

Curation of photography exhibitions and engagement with public audiences. Project-based course explores ways photo- and image-based artists, journalists, scholars, policymakers, and activists use photography to convey personal expression and shape public opinion around contemporary social and political issues. Through field trips to museums and alternative venues, students gain theoretical and practical guidance on presenting photography work to the public, in-person and virtually. Development of editorial publications, programming, and media strategies. Students curate photo exhibitions in campus and community venues.

ARTHIST337 - The Art of Gardens: Hanging Gardens of Babylon to Duke Gardens

Course Description

This course explores the history of garden and landscape design through a series of case studies beginning with ancient gardens of the Mediterranean and Near East and ending with the Sarah P. Duke gardens. Students will explore how landscapes were shaped to meet the aesthetic, agricultural, and social needs of a range of different cultures and time periods. Among the themes explored are the tension between the natural environment and human intervention and the religious, philosophical, and cultural significance of garden design. The class will culminate in a detailed study of Duke gardens, in which students will digitally map and conduct research into a portion of the gardens.

ARTHIST339 - Chicago: Architecture, Urbanism, Politics

Course Description

Building has often been at the center of major social, economic and political struggles of the modern era. This course will analyze the development of architecture and urbanism in Chicago, from its incorporation to the present day, in relation to these historical struggles. Focusing particularly on the concept of place and space, the course will give the student an overview of building in Chicago and analyze in detail the theories and practices which govern urban planning up to our own times. Select sections of the course will particularly emphasize Chicago 1920-1975, and how questions of class and race intersect with a political economy of architecture.

ARTHIST417S - Art & Democracy: Madrid/Barcelona/Valencia/Bilbao

Course Description

Beyond the poster, mural and graffiti, was there a painterly art in the pre-digital age that found a fitting place on the street and the square, the citizen venues where direct democracy and the people's rights first emerged? Is there an ethically responsive and socially responsible praxis which may yield visual works of enduring value without sacrificing the humanistic imperative of communicability? Since the 1950s such questions concerned Spanish artists in all styles (Tapiés, Genoves, Ibarrola, Equipo Cronica). Like Goya before them, these painters tried to help their society transition from political tyranny to more inclusive forms of participation. Prerequisite: Advanced reading knowledge of Spanish.

ARTHIST426S - France-Asia: Cultural Transfers and Translations in a Globalized Context

Course Description

This class explores the dynamic contemporary Franco-Asian dialogue with a specific focus on China, Japan, Vietnam, Laos and Cambodia. Seeking to go beyond the East-West divide, the seminar investigates the current stakes of this dialogue, given its growing complexity after 1945. It examines the postcolonial legacy of France's occupation of Indochina, and how East Asia has also often been viewed as an 'Other,' serving to crystallize French anxieties over political and cultural power. It uses an interdisciplinary perspective encompassing novels, cinema, dance, visual arts, and critical theory to trace a web of exchanges in a globalized context. Taught in French.

ARTHIST433S - Photography in the Americas: War, Tourism, Art, and Protest**Course Description**

Since it emerged in the 19th century until today, the camera has framed our way of seeing and understanding the world. In this course, students accompany the camera in its path through major events in the Americas—North, South, and Central—and examine the profound connections between them. We discuss photography as a weapon of war, a souvenir for tourists, an instrument of protest, an illustration of history, a journalistic and ethnographic tool, and an artistic medium. Key developments in photographic processes, from half tone printing to digital imaging, offer opportunities to reflect on the relationship between visual culture and technology, and art and politics. Course Description

This course examines the activities of avant-garde networks in and around the USSR. These include the October Association, TatLEF, and the International Bureau of Revolutionary Artists (MBRKh). We will explore the role of avant-garde art schools in network development, including VKhUTEMAS and the Mezhyhirya Art and Technical School near Kyiv. We will examine how the networks formed, their objects and pedagogies, their influence on visual politics, and on international networks of leftist artists. We look at the powerful influence of these networks on anti-imperial/anti-racist modernisms. The course offers an understanding of network practices within the politics of the interwar avant-garde

ARTHIST454SL - Digital Art History II: New Representational Technologies Advanced

Course Description

Team-based research and study in material culture and visual arts expressed by using new visual technologies to record, interrogate, and communicate complex sets of visual and physical data from urban and/or archaeological sites. More advanced techniques for presentation and interpretation of visual material through a series of interpretive and reconstructive technologies. Use test cases (archaeological site or urban/architectural site) to further develop techniques of interpretation and representation. Public facing presentation of data and results of research is aim of final team-based project. Prerequisite: Art History 354SL/Visual and Media Studies 365SL.

ARTHIST461S - Art & Environment in the Islamic World

Course Description

The Islamic world spans a vast array of landscapes and climates that each present unique challenges to their human occupants. This seminar explores how artists, architects, patrons, and urban planners in the Islamic world related to these diverse environments and their many nonhuman inhabitants. Investigating the intersections of archaeology, art and architectural history, climate history, eco-criticism, environmental history, garden and landscape studies, manuscript studies, and legal and religious studies the class centers on case studies from areas including Pre-Islamic Arabia, the Umayyad Levant, Abbasid Iraq, Umayyad Iberia, Norman Sicily, Mamluk Egypt, Nasrid Granada, and Mughal India.

ARTHIST475S - Queer Theories of Experience & Art**Course Description**

This seminar applies phenomenology to writing and thinking about art. Beginning with primary debates concerning how things present themselves to perception (Husserl, Heidegger, Shapiro, Merleau-Ponty, Beauvoir, Sartre), the course then considers poetic extrapolations (Fanon, Focillon, Bachelard), culminating in contemporary accounts (Nesbit, Salamon, Wainwright, and Ahmed) that interrogate phenomenology's basic precepts while employing its methods to address art in relation to bodily experience, identity, sexual orientation, and social context. Short exercises and a final paper provide students with the opportunity to work through these ideas in light of their own interests and research.

ARTHIST476S - Modern Spectacles 1790 - Present**Course Description**

Drawing on landscape painting, theater, carnival, and scientific demonstration, modern spectacles immerse viewers in a particularly European imaginary of identity and otherness. This seminar addresses three periods: 19th-century boulevard spectacles (magic lantern, panorama, etc.); 20th-century habitat dioramas that present species and cultures in place and time; and contemporary installations that seek to recreate the 'spectacle experience' with new tools. Case studies are discussed in relation to themes that traverse period, including colonialism, magic, anti-modernism, urban lighting, and the experience of time. Students will participate in the weekly seminar, as well as writing and presenting an original research paper in the final weeks of the course.

ARTHIST487S - Gentrification and the Urban Landscape

Course Description

Gentrification is reshaping cities globally in the early twenty-first century. This course focuses on the contribution of urban topography—the built landscape—to social injustice, systemic racism and communal violence. It does so by documenting and assessing urban spaces (private and public structures, monuments, parks, graveyards, apartment buildings) that collude in gentrification. By investigating the physical interventions being made in the city, as well as the financial instruments and political tactics deployed in their production, we seek to identify strategies by which gentrification can be recognized, assessed and resisted. Durham is our laboratory.

ARTSVIS203 - Introduction to Architectural Design

Course Description

Introduction to architectural design: space making with emphasis on process, abstraction, and modes of representation. Drawing conventions, orthographic projection, model building, rendering, digital technologies as forms of visual inquiry. Tectonics, space, scale, and material as ensemble parts of project presentations to represent ideas as well as artifacts. Final projects on building program and architectural issues: threshold, view, entry. Instructor consent required.

ARTSVIS204S - Medicine and the Vision of Documentary Photography

Course Description

The intersection of healthcare and documentary photography. Explore work of established photographers engaged with healthcare topics. Produce semester-long documentary photography project and 5-10 page documentary essay on healthcare related topic. Students must have or quickly develop proficiency in the use of a digital SLR camera and Adobe Lightroom. Course materials include photographs, articles, and books. Class sessions combine critique of student work, discussion of course materials, and discussion of ethical questions involved in documentary representation of healthcare-related topics.

ARTSVIS222S - The Photographic Portfolio

Course Description

Students actively seek specific photographic territory to explore and build a body of work. The resulting images are extensively work-shopped for sequencing. Particular emphasis on the making of high quality prints. Semester culminates in the production of finished portfolios in three formats: a printed form, a digital form, and an exhibition or installation form. Each student's evolving body of work to be informed by relevant precedents from the history of photography. These are brought into discussions of the work as the semester progresses, with an emphasis on examining bodies of photographic work that communicate something larger than a single idea. Instructor consent required.

ARTSVIS228 - Arts Policy, Leadership, and Engagement

Course Description

This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.

ARTSVIS263S - Representing Breast Cancer: Feminist Literature, Art, and Film**Course Description**

Analyzes representations of breast cancer in feminist literature, art, and film. Drawing on health feminism, feminist medical ethics, and disability studies, explores what those representations tell us about the intersections among gender, race, class, sexuality, and ability in both the Global North and South. Sets artistic representations of breast cancer against the hyper-sexualization of breasts in capitalism's visual cultures and the spectacles of breast cancer activism. Shows how literature, art, and film can reveal health care's material conditions as well as breast cancer's psychic complexities.

ARTSVIS306S - Creative Cartography: Art and Science, Culture and Nature

Course Description

Students will learn how maps and map-making have always existed in a contentious position between art and science, and between culture and nature. The course will combine discussions of readings on critical cartography, data visualization, and Historical GIS (HGIS) with hands-on tutorials using ArcGIS, Adobe Illustrator, and analog drawing. Labs and final projects will emphasize how the form of a map (and all its inherent presumptions of accuracy, reality, and precision) can be manipulated to make art that tells new stories about people, places and things that run counter to dominant narratives. Prior experience with vector-based design software and/or GIS is recommended, but not required.

ARTSVIS318S - Photo Workshop

Course Description

Examines historical and contemporary photographic artists for whom a particular photographic technique is essential to the creation of their work. Investigates strategies of intentional lighting. Explores techniques most suited to the documentation of individual student's chosen subject matter and create a cohesive body of work by semester's end employing that strategy. May use digital or analog equipment. No textbooks are required, though students will need to budget a comparable amount for supplies. Instructor consent required. Prerequisite (any one of): DOCST 115S, 119S; ARTSVIS 115S, 119S; VMS 115S; or equivalent experience.

ARTSVIS333S - Creative Non-Fiction Cinema—Representing The Real

Course Description

The possibilities and contradictions of documentary practices are our starting point for an investigation of historic film and video works that use formally inventive strategies to represent, re-think, interrogate, or effect reality. Students will engage in video production processes, exploring issues such as power relations between maker, subject and viewer, the ability and limits of an image to act as evidence, flows between ethnographic practice and colonial ideologies, and the truth-telling possibilities of fictional invention. Students will screen, read, write, discuss, and complete conceptually focused production exercises using video, photography, text, and/or sound. No prior experience needed.

ARTSVIS335S - Photo Fever: Curating Photo Exhibitions

Course Description

Curation of photography exhibitions and engagement with public audiences. Project-based course explores ways photo- and image-based artists, journalists, scholars, policymakers, and activists use photography to convey personal expression and shape public opinion around contemporary social and political issues. Through field trips to museums and alternative venues, students gain theoretical and practical guidance on presenting photography work to the public, in-person and virtually. Development of editorial publications, programming, and media strategies. Students curate photo exhibitions in campus and community venues.

ARTSVIS353S - Black Feminism and Fashion

Course Description

Black feminist perspectives on clothing and fashion. Explores traditions in which Black artists and writers make clothing a primary theme. Presenting photographic, painted, and literary portrayals by and of Black people across the diaspora, and bringing together the study of visual culture, material culture, and literary studies, reveals fashion and clothing as aesthetic practices of everyday life that defy the objectifying effects of racism and sexism. Engages with scholarship that explores slavery's and colonialism's impact on gender and sexuality and examines how artists and writers work within and against those impacts to document the self-fashioning in Black cultural life.

ARTSVIS368S - The View Camera: Black and White Large Format Photography

Course Description

Advanced, production-based photography course introduces students to the 4 x 5 large format view camera and its role in the documentary tradition. Learn to operate a view camera and attendant processes and materials to develop black and white sheet film and make silver gelatin contact prints from 4 x 5 negatives. Begins with focus on black and white negatives and contact prints. After demonstration of proficiency, students may optionally work in color film. Students produce a final portfolio of prints from their work throughout the semester. Class meetings consist of lectures, demonstrations, darkroom work, and critique of both process and final images.

ARTSVIS371S - The Choreographic Mind: Order, Disorder, Organization, Relations

Course Description

Practice-based studio work, discussions, and readings in current cultural theory, contemporary philosophy, and political discourse. Introduces choreography as a creative act of structuring movement; interrogates culturally dominant as well as subversive modes of ordering; examines the wider social and political context and consequences of various forms of artificially created structures. The students' radically subjective creativity, artistic experimentation, awareness, perception and expression is cultivated in order to understand and challenge the status quo and to create 'relational artefacts' through choreographic craft.

ARTSVIS383S - The Nature Film: History and Practice

Course Description

Traces the genealogy of the nature film from scientific 'animal locomotion studies' of the 19th-century to the proliferation of viewing options today. Film and television have emerged as the primary story-telling media of this past century. So too, for many viewers, have they become the main source of encounters with the natural world. Through hands-on exercises, screenings, readings and production assignments, students will explore the established narrative conventions and cinematographic techniques that have been employed in films about nature.

BIOETHIC282 - Science, Ethics, & Democracy

Course Description

Examines relationships between scientific knowledge, ethics, & formation of public policies in a democratic society. Science influences public policy & public policy shapes scientific enterprise. How can citizens reliably identify genuine scientific expertise? If scientific expertise conflicts with religious views of some citizens, can public policy rely on scientific expertise without violating principles of religious toleration? What are ethical rules of public deliberation—must citizens appeal only to reasons accessible from secular viewpoints? To what extent should science goals be shaped by scientific community versus democratic processes?

BIOLOGY111CN - The Quest for a Fountain of Youth: The What, Why and How of Human Aging

Course Description

This course will focus on advancements in our understanding of aging and how these insights are changing our perceptions of the inevitability of decline at the end of the human lifespan. Focus on research in cellular and molecular mechanisms of aging in model organisms and applications to human aging. Topics including natural selection and aging, centenarians and longevity genes, calorie restriction, the epigenome and aging. Ethical questions such as the value of doubling human life span and equal access to innovations will be addressed. Class time will be a mix of lectures, student-led presentations and writing assignments.

BIOLOGY128FS - Evolutionary Genomics: Who Are We, Where Have We Been, and Where Are We Going?

Course Description

We are now more than a decade into the genomics revolution that generated data allowing us to gaze into our past, present, and future in ways that were beyond imagining when Darwin's theory of Natural Selection was first introduced. The unification of genomic data, bioinformatics, and evolutionary theory has transformed our understanding of human history, our place within the Tree of Life, and the impact that our species is having on those with whom we share the planet. This course will use the primary literature to familiarize students with the multifaceted power of genomics, with a slant towards examining human history and disease from an evolutionary perspective. Open only to students in the Focus Program.

GENOME128FS EVOLUTIONARY GENOMICS

General Education Curriculum Codes

STS - (STS) Science, Technology, and Society, NS - (NS) Natural Sciences

BIOLOGY138FS - Evolution, Ecology, and Genomics of Symbiotic Interactions

Course Description

Symbiotic interactions are the norm rather than the exception in the natural world, yet species are usually seen and studied independently from each other. Here we explore the symbiotic connectivity among microbes and their hosts, ranging from parasitism to mutualism, by addressing questions at the junction of evolutionary biology, ecology, and genomics. Multidisciplinary research on microbiome model systems often translate to major medical advancements. One main goal of this course is for students to experience how scientists do, and think about, research. Readings will focus on primary research articles.

BIOLOGY153 - Climate, Coffee, and Coronavirus: Why Ecology Matters to Human Health

Course Description

This course explores interactions between organisms and their environments that impact human health. We will examine the effects of climate change and human population growth on our food supply, water availability, the spread of disease, and ecosystem services. Case studies will be used to illustrate the scientific process, to evaluate supporting evidence, and to investigate ethical issues. For nonmajors. Not open to students who have taken Biology 209-1 or Biology 209S-1.

BIOLOGY159 - The Future of the Oceans: From Science to Policy

Course Description

The ocean covers two-thirds of the planet, forming the backbone of healthy ecosystems and many growing economies worldwide. Despite this importance, we know far less about the oceans than terrestrial environments. This course provides an overview of why the oceans matter, including the many ways people use and depend on the oceans. We will discuss the major issues that threaten our oceans, and students will explore emerging solutions to these challenges of changing ocean use using market-based, scientific, and policy approaches. Course will include an optional weekend field trip to the Duke Marine Lab in Beaufort.

BIOLOGY208FS - Computing on the Genome: An Introduction to Genomics and Bioinformatics

Course Description

This course will provide an introduction to key concepts in the genome sciences, using tools and concepts from computational biology and bioinformatics. Topics to be covered include genome structure, function, variation, and evolution. Students will learn computational and statistical methods for describing and quantifying various aspects of genome biology and will apply these tools to real world data. Recommended prerequisite: familiarity with molecular biology concepts such as DNA replication, transcription, and translation. No prior programming experience is required. Open only to Focus Program students.

BIOLOGY213D - Cell Signaling and Diseases

Course Description

During the past several decades, exploration in basic research has yielded extensive knowledge about the numerous and intricate signaling processes involved in the development and maintenance of a functional organism. In order to demonstrate the importance and processes of cellular communication, this course will focus on cell signaling mechanisms and diseases resulting from their malfunction, such as cancer, stroke, and neuron degeneration (including Parkinson's disease, Alzheimer's disease, Huntington's disease, and Amyotrophic lateral sclerosis). Students will be exposed to current literature and cutting edge knowledge. Recommended prerequisite: Biology 201L or 203L.

BIOLOGY216 - Life's Purpose

Course Description

The aim of this course is to familiarize students with how teleology and notions of purpose have influenced, and continue to influence, various areas of biology and philosophy. Is there purpose in the world, or is the idea of a goal-directed purpose a bankrupt notion that refuses to go away? To consider this question we will examine the roots of teleological explanations in ancient thinking, objections to it that arose during the modern period, how Darwin's theory changed the landscape, and then we will consider some of the current debates regarding teleology as they impact contemporary philosophy and science. Transformative Ideas course, open to sophomores only.

BIOLOGY271 - Marine Biology and Ecology: Fantastic Sea Creatures and Where to Find Them

Course Description

Broad foundational knowledge of marine biology with an emphasis on ecology and evolution of marine organisms. Core areas include biodiversity, adaptations to marine environments, population & community ecology, ecosystem processes and services, and human forcing in marine systems. Survey of biodiversity in marine systems spanning microbes to marine mammals, emphasizing taxonomy, habitats and evolutionary history. Explore how marine communities interact with the physical environment to generate ecosystems and accompanying services spanning coastal/estuarine, blue water, and the deep sea. Examine population dynamics, population interactions and the consequences of those interactions.

BIOLOGY306SLA - Evolutionary and Ecological Genetics/Genomics of Marine Mammals**Course Description**

Current sequencing technologies have revolutionized the fields of molecular, evolutionary, and ecological genetics. The ability to generate an entire genome worth of sequence data in a single instrument run allows us to study whole genomes in a variety of non-model organisms. We will use the genomes of marine mammals to explore the field of genomics. We will begin with basic genomics (i.e. Genome-101), sequencing technologies and bioinformatics, and explore conservation, ecological and evolutionary genetics of marine mammals using literature and publicly available datasets. Biology 201L is recommended but not required. Offered at the Duke University Marine Lab in Beaufort.

BIOLOGY375A - Biology and Conservation of Sea Turtles

Course Description

Essential biology of sea turtles (evolution, anatomy, physiology, behavior, life history, population dynamics) and their conservation needs; emphasis on their role in marine ecosystem structure and function. Basic ecological concepts integrated with related topics including the conservation and management of endangered species, the contributions of technology to the management of migratory marine species, the role of research in national and international law and policy, and the veterinary aspects of conservation. Taught in Beaufort at Duke Marine Lab. Prerequisite: introductory biology.

BIOLOGY422L - Experiments in Animal Models of Human Neurodegenerative Disease

Course Description

This course will bring students into a basic research setting to directly contribute to our understanding of the molecular and cellular underpinnings of neurodegenerative disease. Classic experimental approaches in the lab (fruit fly genetics, molecular techniques, dissection, immunocytochemistry, microscopy) will be paired with short lectures, literature-based discussions, and data presentations. Students should, through firsthand experience, gain an appreciation for 1) the life cycle of basic research, 2) the utility, challenges, and caveats of various approaches to understanding disease, and 3) the elegance and relevance of gene and cell function across organisms. Recommended prerequisite: Biology 201L or 203L.

BIOLOGY424S - The Biological, Chemical, and Physical Bases of Cell Shape and Cell Shape Changes

Course Description

Cell shape and shape change are fundamental features of biological development and homeostasis. We investigate the intimate relationship between cellular structure and function at molecular, sub-cellular, cellular and tissue length scales. We study a range of cell types, from the very simple (e.g., red blood cells) to those that are structurally complex (e.g., epithelia, muscle and nerve). We integrate information from studies in vivo, in vitro, in cell free systems and on purified proteins. We learn from a combination of readings (reviews and primary literature), lectures, discussions and presentations by students. Prerequisite: Biology 201L/LA or 203L.

Grading Basis

BIOLOGY435S - The Gut Microbiome: Implications For Host Evolution and Ecology

Course Description

The gut microbiome is everywhere these days, but do you wonder why and how? This course uses active learning focused on the evolution and ecology of the gut microbiome. Students will gain familiarity with the hologenome theory of evolution, comparative gut morphology, nutritional ecology, dysbiosis, and common microbiome methods. Students will practice reading primary literature, asking questions of real data, interpreting results, writing and revising a scientific paper, and using science communication. Course goals are to demystify the process of basic gut microbiome science and emphasize microbial roles in animal lives. This course fulfills the 'Ecology Requirement' for the Biology major.

BIOLOGY445A - Climate Change in the Marine Environment

Course Description

Exploration of climate change science focusing on marine ecosystems and inhabitants - specifically ocean acidification, warming and sea level rise. Factors causing climate change, and how those vary spatially, focusing on sensitive polar ecosystems and marine mammal populations. Critical examination of climate change modeling using EdGCM (research-grade Global Climate Model), focusing on how scientists use models, observations/theory to predict climate, and assumptions/uncertainty implicit in modeling. Discussion of potential human impacts including consequences of sea level rise and potential increases in disease due to climate change. Taught in Beaufort at Duke Marine Lab.

BIOLOGY454S - Physiological Genetics of Disease

Course Description

An exploration of how we have come to understand the relationships between genes and traits, with a focus on traits of biomedical importance. We explore how physiological systems biology can be used to understand the causal pathways by which genes affect traits. Examples will be taken largely from the biomedical literature with a focus on genetic diseases and the roles of genetic background and environment in determining how (and why) genes affect traits. Readings and class participation, short papers and oral presentations on research projects. Recommended prerequisite: Biology 203L or 201L and 202L and Mathematics 112L.

BIOLOGY209-1 - The Ecology of Human Health

Course Description

Humans are the dominant species on Earth and ecology is key to understanding the multiple feedbacks through which their activities affect human health. Fundamental principles of ecology, from population to ecosystem levels, will be examined through the lens of human health. Topics include human population growth and carrying capacity, why we age, infectious disease dynamics, the microbiome and human health, sustainable agriculture and food security, sustainable harvest of wild foods, dynamics of pollutants in food webs, ecosystem services to humans, and human impacts of climate change.

BIOLOGY209-2 - Ecology for a Changing Planet

Course Description

Human activities are fundamentally altering our landscapes and our atmosphere. The science of ecology is central to our ability to sustain populations of organisms, regional and global biodiversity, and the provision of critical ecosystem services. Course emphasizes critical analysis of ecological data and the design and interpretation of ecological experiments and models. Students will become well equipped to evaluate environmental science as it is reported in the popular press. Not open to students who have credit for Biology 209D-2, 209S-1, or 209-1.

BIOLOGY263-1 - Biological Responses to Climate Change

Course Description

Climate change is happening now. This course will focus on how organisms, populations, and biological communities are expected to respond to climate change. While reading the primary literature, we will discuss evidence for effects of climate change on organisms, how to experimentally test for potential effects of climate change, and the ecological and evolutionary mechanisms that organisms have--or do not have--that enable them to respond to climate change. Non-W version of Biology 263. Not available to students who have taken Biology 263. Recommended prerequisite: Bio 202L or Bio 203L.

BME195FS - Medical Instrumentation in the Developing World (GE)

Course Description

Medical devices have revolutionized healthcare in the developed world. Yet, this technology revolution has failed to reach the developing world. Compared to the estimated 1.5 million medical devices introduced in the developed world in the last 50 years, only a few dozen pieces of medical equipment have been specifically designed to be appropriate and affordable for resource poor settings. We will examine and discuss the factors that make the research, design & development, introduction & marketing, maintenance and use of medical devices in resource poor settings uniquely challenging conditions. Focus students only.

BME221A - Biomaterials

Course Description

This course provides an introduction to Materials Science, with an emphasis on the materials and applications relevant to Biomedical Engineering. The course emphasizes the relationships between the structure and properties of materials, with a focus on their mechanical, biological, and surface properties. Electrical, optical, and thermal properties will also be touched upon. Classes of materials to be addressed include metals, polymers, ceramics, gels, and composites. The course will close with an introduction to biocompatibility and the foreign body response. The course will be taught in Berlin, Germany.

BME244L - Quantitative Physiology with Biostatistical Applications

Course Description

An examination of the importance of mass and energy balances, transport processes, mechanics, energetics, and electrical activity in physiological systems. Lectures cover cellular physiology, cardiovascular system, nervous system, muscle physiology, and renal physiology. Labs complement lecture topics and introduce statistical methods related to the measurement and analysis of physiological data. Statistical topics include: descriptive statistics; hypothesis testing; correlation, regression, and goodness of fit; ANOVA and post-hoc tests; power analysis and experimental design. Prerequisite: Engineering 103L or Computer Science 201 and co-/prerequisite: (Biology 201L or Biology 203L) and (Mathematics 212, 216, 218D-2, 219, 221, 222 or 353).

BME405L - Biotech Design I (GE, MC)

Course Description

This course is the first semester of a two semester biochemical engineering design course sequence on biotechnology. It is a team focused project based course. Student teams take on real world problems and evaluate the commercial and technical potential of biotechnological solutions. The first semester course is primarily conceptual (on paper) design which students can then build and test in the second semester design course, Biotech Design II. Previous projects have included the design of diagnostics, small molecule and protein drugs, cell based therapies, CRISPR based therapeutics as well as novel bioprocesses. Prerequisites: BME 260L (GE, MC) and senior standing.

Grading Basis

BME432L - Biomechanics and Vehicle Safety Engineering (DR)

Course Description

Design course dealing with contemporary issues in the biomechanics of injury and motor vehicle safety engineering. Covers international standards for safety in vehicle design. Topics also include: airbag and belt systems, structural vehicle components, accident reconstruction, the biomechanics of injury, anthropomorphic test devices, and injury risk assessment metrics. Problem-based approach where students work as teams on a current engineering problem in dummy design or injury mitigation technology. The teams set design specifications, evaluate the designs use finite element analysis and fabricate the final product using rapid prototyping. Prerequisite: BME 302L; senior standing.

Grading Basis

Graded

Course Typically Offered

BRAINSOC395 - Bass Connections in Brain and Society: Interdisciplinary Team Projects

Course Description

Teams of undergraduate and graduate/professional students work with faculty to identify, explore and develop solutions to important, strategic issues where brain science impacts and is informed by society. Teams may also include postdoctoral fellows, visiting fellows and researchers, community partners, and other experts from business, government, and the non-profit sector. The work may run in parallel with or contribute to ongoing, faculty-initiated research. Teams will participate in seminars, lectures, laboratory-based research, field work, and/or other learning experiences relevant to the project. Requires substantive paper or product containing significant analysis and interpretation. Enrollment requires prior acceptance into an associated Bass Connections in Brain and Society project team. Only students admitted into a project team will be given consent for enrollment.

CEE132L - Engineering the Planet

Course Description

Four broad disciplines within civil and environmental engineering will be explored and over-arching experiential projects will apply theory and practice to real-world design problems. The course will examine the societal context of these disciplines and their contributions to and impacts on the built environment. Specifically, the course will examine air, water, land use, shelter, systems, and energy and students will be challenged with issues of economics, social impact, green engineering, sustainable design and building practices.

Grading Basis

CEE201L - Uncertainty Design and Optimization

Course Description

Principles of design as a creative and iterative process involving problem statements, incomplete information, conservative assumptions, constraining regulations, and uncertain operating environments. Parameterization of costs and constraints and formulation of constrained optimization problems. Analytical and numerical solutions to constrained optimization problems. Evaluation of design solutions via sensitivity and risk analysis. Application to design problems in civil and environmental engineering. Prerequisite: Engineering 201L.

Grading Basis

Graded

Course Typically Offered

Spring Only

Units**Min Units:**

1

Max Units:

CEE351 - Engineering Economics, Risk, and Decision-Making

Course Description

Introduction to quantitative methods of engineering economic analysis, probabilistic modeling, and decision-making under risk and uncertainty. Application of cost-benefit analysis, net present value calculations, supply-demand analysis, cost and production function assessment, and social welfare analysis. Non-monetary and multi-attribute evaluations are also covered, as well as risk assessment, Bayesian updating, Monte Carlo simulation, risk attitudes, and expected utility calculations. Application areas include finance, environmental protection, climate change management, infrastructure design, and business planning. Prerequisite: CEE 201L or CEE 251L.

Grading Basis

Graded

Course Typically Offered

Fall Only

Units

Min Units:

1

Max Units:

1

CEE365 - Hydrologic and Environmental Data Analysis

Course Description

Focus on development of quantitative approaches used to interpret observations on hydrological and environmental processes across space and time, with application to case studies in water science. In this course, we will (1) generate knowledge of fundamental processes in aquatic ecosystems as they relate to contemporary issues, (2) apply data science skills to datasets in the water resources field, and (3) quantitatively explore a topic in aquatic science through an in-depth course project. Recommended prerequisite: prior experience with computational software (R preferred; Stata, MATLAB, and/or GIS acceptable). Instructor consent required.

CELLBIO451 - Introductory Human Physiology

Course Description

Focus on human organ-system physiology; cellular physiology; basic concepts and principles underlying the physiologic function of each organ system and their integration to maintain homeostasis; application of physiologic principles to interpret clinical aspects of failure of these systems; organ systems include: nervous, musculoskeletal, cardiovascular, respiratory, gastrointestinal, urinary, endocrine, and reproductive. Online course.

CESC201 - Introduction to Engaged Citizenship and Social Change**Course Description**

Introduction to key concepts, theories, and critiques of civic engagement and social change, with a focus on competing notions of democratic citizenship. Examination of voluntarism, philanthropy, community service, political participation, social activism and other forms of community engagement. Critical reflection on ethical issues related to community engagement and social change, including critiques of progressivism and service. Students will also be asked to apply these various approaches to pressing social issues of our time, such as income inequality, environmental justice, education reform and gender and race equality.

CESC283 - Ethics in an Unjust World

Course Description

The course considers the question, 'How can we fix poverty?' It begins by exploring the nature of poverty through a variety of descriptive metaphors (for example, poverty as a 'trap' or a 'disease'). It then considers the word 'we,' and in doing so introduces several basic understandings of ethics (deontology, utilitarianism, virtue ethics, etc.) Finally it considers the word 'fix' and offers three models for responding to poverty: working for, working with, and being with. Each model explores several examples of good practice followed by critical reflection as students engage with opportunities in Durham displaying each approach.

CESC401S - The Adventure of Citizenship: Lives of Civic Engagement

Course Description

What does it mean to be a citizen and live a civic life? In this course students will integrate academic content with their own community based experiences to understand and critique their understandings of civic engagement and social change. Students will reflect on their Duke experience and begin to chart their post Duke futures. They will gain knowledge of the historical context of democratic citizenship, understanding of the relationship between theory and practice, and familiarity with the contestations of civic engagement that emerge from considerations of race, class, and gender. Students will undertake independent projects to study those who have lived civic lives.

CHEM110DL - Honors Chemistry: Core Concepts in Context

Course Description

Emphasizes core concepts required for organic chemistry, including atomic and molecular structure, chemical equilibrium with applications to acids and bases, thermodynamics, chemical kinetics, and reaction mechanisms. Strong emphasis on applications of these concepts in context of large, interdisciplinary scientific challenge, e.g. in cancer biology or nanoscience. Laboratory illustrates experimental applications of these core concepts. Students may not receive credit for both CHEM 101DL and 110DL. Students should have an AP score of 4 (CHEM 20) or 5 (CHEM 21) to register.

CHEM131CNS - Therapeutics Molecules and Sustaining Health

Course Description

An exploration of therapeutic molecules and sustainable approaches to development of medical care, medicines, vaccines, and healthful practices will be undergirded by discussion of both historical innovations and current events in public health. Molecules of medicine will be evaluated at a molecular level through in-class activities. The body's ability to differentiate between even subtle differences in molecular structure, such as the different actions in the human body of a pair of enantiomers, will be explored. Topics will range from finding new medicines to combat resistant pathogens to promotion of good health through the molecules we eat. No prior knowledge of chemistry is required.

CHEM132 - Colorful Chemistry: from Venetian Glass to Paints, Fabrics, & Fireworks

Course Description

Participants in this introductory-level course will explore the chemistry of color from a sustainability standpoint within the context of the rich history of innovation in colorants and macromolecular materials. No prior experience with chemistry is needed. The physical basis of color will be introduced, and models and theories for color will be described. Students will investigate how fireworks, glass, fabrics, paints, plastics, etc. are made in a range of colors and explore the similarities and differences in materials and colors at the atomic and molecular levels. The course will also endeavor to build student awareness about sustainability concepts and challenges within these industries.

CHILDPOL325S - Equity in Early Childhood Programs and Policies

Course Description

This course will explore contemporary theories and empirical research that address issues of equity and early childhood development from birth to age 8. We will examine factors related to individuals and systems (e.g., child care, public health, housing, workforce, social services) that impact early childhood development. Students will critically consider the developmental science that has informed early childhood policies and programs; the social, political and economic forces that shape the study of young children and contributed to developmental trajectories that benefit some children while disadvantaging others; the changing roles of families; and the implications of these policies.

CHILDPOL495S - Multidisciplinary Approaches to Contemporary Children's Issues

Course Description

In this course, you will learn to translate your scholarship into policy-relevant writing and actions. Students must have completed or be in the process of completing an independent research project on a topic related to children, families, or education. You will translate knowledge gained from your independent research project into several products for diverse audiences, including practitioners and policymakers. You will learn to present your academic scholarship in oral, academic, lay-public, and professional forums. Capstone course required for the Child Policy Research certificate program. Consent of Director of that certificate program required.

CINE139 - The Hollywood Musical: Singing and Dancing the American Dream

Course Description

Beyond its unapologetic praise of spectacularity and entertainment, what makes the Hollywood film musical a quintessential American genre? Since its origins, the Hollywood musical has been channelling various ideologies in its modes of performance and production; it has offered a space to address specific anxieties of the American society: modernity vs. nostalgia, representations of gender, ethnicity, class, and the low/high divide in arts. Emphasis will be given on its performative aspects, the relationship between choreography and song, the changing representations of the dancing body, musical styles, sexual objectification and the star persona.

CINE207S - Documentary and Policy: How Documentary Influences Policy

Course Description

Examines documentaries as catalysts for change in local, state, and federal laws and regulations, with special attention to relationships between film and organizations with political influence. Looks at how documentaries have altered public sentiment and political outcomes. Uses case studies of documentary films (essay-style, journalistic, information-driven films; narrative, story-driven films; propaganda; art films; and hybrids of all of the above). Explores the question of how a film achieves influence: for example, with a high-profile theatrical and/or television release, by utilization as an educational tool, or by 'going viral' to become part of a public conversation.

CINE216 - Cinematic Authorship

Course Description

Theories of authorship continue to generate heated debates. What is at stake in these debates and for whom? This course will consider both the historical and contemporary debates around the controversial notion of authorship as it relates to signature and style. Drawing on film and media theory, literary theory, and philosophy, we will examine how artists explore and challenge the romantic conflation of the author as a stylistic innovator, site of influence, collaborator, and iconoclast. Throughout the semester we will ask: What is an author? What is the impact of stylistic innovation in media culture? And, why does authorship matter?

CINE259 - Indian Cinema & Social Change

Course Description

Considers the transnational purchase, aesthetic, and civic sensibilities of Indian cinema focusing on Hindi-language films. Review begins with emergence of Indian cinema in 1890s, then considers how social change became a driving force during anti-colonial resistance and nationalist reform. Course focuses on the post-independence (1947-) period, when social justice activism enters the mainframe of 'Bollywood' film. Core inquiry centers on how the cinematic imaginary of India perceives faultlines in Indian society and expresses its social voice. Themes include caste, gender, sanitation, poverty, successfulness, religious fundamentalism, ageism, and sexuality.

CINE280AS - Studies in the United States Culture Industries

Course Description

A survey of the major professions in the arts, media, and entertainment industries, featuring prominent speakers from fields such as studio and independent film and television, screenwriting, directing, producing, financing, acting, artist representation, journalism, marketing, animation, and music. Students apply theory and analysis to projects currently in production, observing live tapings, rehearsals, and screenings. Real-world case studies to examine how and why stories chosen for production shape and are shaped by societal values and discourse, domestic and global economies, and the greater world of the arts and media. Only offered on Duke in LA program.

CINE281S - How to Write a Horror Movie

Course Description

Great horror movies are substantial works of art that go beyond jump-scares to confront society's most intractable problems – like racism, in the brilliant 'Get Out'. In 'How To Write A Horror Movie', students will study genre classics, while writing weekly short scenes – to be read aloud in class – that address basic elements of screenplay-writing, the mid-semester goal being the script for a short horror film. Students will also keep a journal of story-ideas, one of which they will develop – in the second half of the semester - as a feature-length screenplay, completing a rough draft of at least 80 pages, with successive portions of these scripts to be discussed in class.

CINE283A - Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)

Course Description

This course explores the complexities of global Los Angeles by focusing on issues that especially impact its marginalized communities. For the service-learning component, students volunteer at least 20 hours during the semester at nonprofit organizations engaged in the pursuit of social justice. This experience provides an opportunity to observe, participate in and reflect on the day-to-day implementation of social action, policy and organizing initiatives. As part of the volunteer commitment and in lieu of a final paper, students produce a documentary media project that communicates goals identified by and in collaboration with the community partner.

CINE284S - Russian Language and Culture through Film

Course Description

Study of Russian cultural paradigms and constructs of self and other as demonstrated in Russia and Soviet films, primarily from 1960s to the present. Special attention given to the analysis of linguistic constructs and their cultural semantic content as well as comparative analyses of Soviet and Russian culture and Russian and European/American culture. Film and computer technology, as well as access to these technologies and their implementation, are a central part of the cultural context. Prerequisite: Russian 301S or equivalent or consent of instructor.

CINE289S - Understanding Mediation

Course Description

Examines experience as always mediated. How does text mediate expression, or language mediate subjectivity? How do images mediate power, or sounds mediate resistance? How does computation mediate agency, or networks mediate thought? But also, how do nations mediate globalization, or oil mediate energy? And how do bodies mediate liveness, or the environment mediate history? Moves from particular media forms and examples (language, literature, the fine and performing arts, audiovisual media, computational media) to focus on key theoretical concepts and debates of critical theory from twentieth and twenty-first centuries. Crosses national boundaries to understand mediation from global perspective.

CINE304S - Ready for Prime Time: Writing the Dramatic TV Episode

Course Description

Some of the best dramatic writing today can now be found on television. This class will focus on one commercial prime-time drama, past or present. Beginning with a deep immersion into the world of that show—watching all of Season One—students break into groups, coming up with their own long stories to advance the plots. Each student will pitch a story for their particular version of 'Season Two'—developing an outline, tracking their storylines with the other members of their group, and finally writing a draft of an hour-long TV episode. Each student will write his or her own script—but will need to share notes, thoughts and feedback with their fellow writers.

CINE367S - Acting for the Camera On Location

Course Description

Acting for the Camera on Location is a rigorous workshop-based course designed to introduce students to the practical and performative demands of screen acting. The course aims to give students a working knowledge of current industry standards, practical tools for integrating the technical demands of taping along with craft, as well as hands-on methods to approaching camera work. Class material consists of acting exercises, scenes, and monologues from various styles with a continued focus on truthful acting and practiced spontaneity on camera while on location.

CINE374S - Watchdog News and Storytelling: Changing Forms of Accountability Journalism

Course Description

Focus on evolving styles of explanatory reporting and investigative journalism. Practice fundamental research and writing techniques that journalists use to reveal complex issues and hold powerful institutions and people accountable. Identify sources, develop interviewing skills, and tap public records. Analyze stories that can serve as engaging models for your assignments, such as fact-checks, solutions-focused articles, and first-person accounts that turn the reporting process into a narrative device. Learn about editorial rules and writing conventions, including their ethical underpinnings and the role of objective methods. Talk with guest journalists about their experiences.

CINE378S - 'Bollywood' Dance, Music and National Identity

Course Description

Dance and Music are quintessential to Hindi Cinema, which is often nicknamed as 'Bollywood.' Over the last century, Hindi cinema has garnered what has emerged as a unique form of dance genre that subsumes, reconstitutes and remixes the traditional, modern, contemporary and global movement vocabularies as an aid to highlight and extend the narrative plot of the film. In the past few decades, Hindi cinema has incorporated Indian diasporic cultural identities alluring an unprecedented global reception. This course will focus on 'Bollywood' dance and music genres and ways in which they promote the allure for a revitalized national identity, a global cultural presence, and network associations with the Indian diaspora as well.

CINE419 - Spanish Cinema from the Transition to the Present

Course Description

Overview of Spanish cinema, from transition to our present days. Having undergone dramatic transformation in past years, Spanish film offers privileged area to study main features, novelties, contradictions, and tensions. Analyzes two chronological phases: the mid 70s to late 80s, characterized by intense cinematic negotiation with immediate past that unveils cracks and violences of normalizing erasure proposed from the political institutions; and the 90s until the present, a period marked by Spanish film's entrance in the global market, with its identitarian reassessment and emphasis in new pressing issues such as immigration, memory, and gender violence.

CINE425S - Advanced Writing for Stage and Screen

Course Description

'Advanced Writing for Stage and Screen' will look at the strengths of three dramatic art-forms - playwriting, screen and TV writing - and the particular challenge they share: the concept of 'dramatic action' which provides the 'motor' for a dramatic work. Initial writing exercises will explore these dramatic-writing forms, in conjunction with the study of representative plays, films and TV series. Final projects - a play, screenplay or TV pilot - will be discussed and critiqued in class as they progress, prior to a final rewrite. Prerequisite for this course is one previous dramatic writing course - either playwriting or screenwriting.

CINE429S - Historical Documentary Production

Course Description

Course examines how archival footage and photographs are used in historical documentaries about struggles for social equity in America. Iconic films will be reviewed to assess editors' strategies for employing archival material in documentaries on the labor movement, civil rights movement, anti-Vietnam war movement, and early lesbian and gay rights movement. Students will then conduct research for film footage and photographs and learn practical steps needed to acquire rights to use the material. During the second half of the semester, students will be guided in the production and editing of their own short historical documentary.

CINE433S - Science, Technology, and Art

Course Description

This course introduces students to some of the key works of twentieth-century German literature and cinema with a focus on the developments in sciences and technology. How did authors and filmmakers respond to the challenges posed by modern sciences and technological developments? How did they capture the shocking experience of modernity in their works? To what extent did the new technological media alter the way they understood aesthetics? What is the relationship between modernist and avant-garde experimentations in literature, cinema and theater, and technology? Conducted in German.

CLST141 - Age of Warriors: Pre-Roman and Italian Archaeology

Course Description

Classical archaeology is often centered on Roman and Greek civilizations, but can overlook other exciting, formative struggles. What were the earliest civilizations peopling the Italian peninsula in the first millennium BCE? This was an age of conflicts, battles, social change and dramatic events involving individuals and ethnic groups. It was an age of warriors and wars, weapons and armies, contending for the political and religious power of city-states, nations and territories. Among them, the Etruscan civilization was the one able to deeply influence the Roman and other Italic societies for several generations.

CLST199 - Archaeology of Migration: Greeks, Roman, Egyptians, Etruscans

Course Description

Since before recorded history massive migrations have moved people throughout the world, creating hybrid identities and new societies and destroying old ones. This course examines migration in the Mediterranean among classical Greeks, Romans, Etruscans and Egyptians in the first millennium BCE. We explore historical factors, such as famine, overpopulation, and violent conquest and enslavement, and we consider recognized and unacknowledged consequences. After introduction to mapping technologies, we end by mapping various ancient migrations and their effects. Taught online.

CLST208 - Ancient Myth

Course Description

Myths are humanity's longest-lasting and most powerful stories. They shape our understanding of transitions and crises, and explore the boundaries between right and wrong, life and death, and the natural and the supernatural. They can also be playful, exuberant, and highly entertaining. This course introduces students to the myths of Greece and Rome, with comparative material drawn from the Hebrew Bible and other ancient texts. Throughout the course we will also think about the role of mythology today, and the way we use stories to come to terms with ourselves and our world.

CLST210 - The Good Life: Religion, Philosophy, and Life's Ultimate Concerns

Course Description

What does it look like for a human life to go well? What leads to human flourishing or 'happiness' or 'success'? What is freedom? Love? Justice? What is the basis for ethics? What is our relationship to the natural world? What is the significance of death? How do our beliefs (or lack thereof) about God or the gods shape how we view the world? We will examine how philosophical or religious traditions around the globe have answered life's biggest questions. Traditions may include Confucianism, Islam, Christianity, Stoicism, Judaism, Buddhism, Hinduism, scientific naturalism, expressive individualism, and utilitarianism. Part of the Transformative Ideas Sophomore Program.

CLST211 - How to Live and How to Die: Death, Dying, and the Afterlife from Confucius to Cryonics

Course Description

Death is one of the only completely universal human experiences, yet we resist talking about it in our everyday lives. In this course, we will investigate some of the biggest questions and issues surrounding death. We will first examine the different ways that philosophical and religious traditions have conceived of death and problems that these conceptions may raise. In the second half of our course we will focus on how death affects our actions and choices in life. How does the prospect of impermanence shape the way we live? Are there causes that are worth dying for? How should we prepare for death? Should we use new technologies to extend our lives and 'cheat' death?

CLST214 - Medicine and Human Flourishing

Course Description

This course examines the nature, ends, and practice of medicine as it relates to the human condition. How can medicine foster human flourishing and well-being—individual and social—against the experience of injury, pain, and suffering? Beginning with ancient Greece and its Hippocratic corpus, students explore answers to this question within a variety of historical and contemporary contexts. Taught by an interdisciplinary team of scholars that includes medical professionals, the course highlights the importance and professional relevance of posing big questions about personal meaning and human values at stake in the practice of medicine.

CLST222 - The Age of Nero: History, Art, and Literature

Course Description

The Age of Nero: History, Literature, and Art. Study of the history, literature, and art of one of the best documented, if misunderstood, periods of Roman history, with a view to separating fact from fiction, and understanding why Nero became one of history's greatest villains and whether his reputation is justified. Focus on: what makes for a 'bad' political leader; who gets to decide how history is told; how power, politics, and art intersect; how and why Nero's story resonates with us today.

CLST230S - Augustine's City of God

Course Description

Study of the literary form and argument of Augustine's epoch-making City of God: a rhetorical tour de force of consummate artistry and stunning originality and scope; and a political, religious, and moral critique of ancient Rome within a comparative, cross-cultural analytical framework that vindicates an alternative vision of society rooted in the Christian scriptures. City of God provides a remarkable example of sophisticated literary construction, rhetorical prowess, cross-cultural examination, and moral reflection. We focus on these four facets of a celebrated synthesis that breaks new ground in historiography, political science, and moral theory.

CLST241 - Etruscans: Myth, Archaeology and Civilization

Course Description

The Etruscans were a pre-Indo-European population living in the Italic peninsula in the first millennium BCE. One of the most important and fascinating civilizations of the ancient world, which deeply influenced the Classical world and the Mediterranean basin. The class involves archaeological studies and comparative analyses of pre-urban and urban settlements, the necropoleis, art, art history, iconography and archaeological remains of the Etruscan and pre-Roman Italic world. Use of digital technologies for the study of Etruscan cities and landscape with a specific focus on the Etruscan city of Vulci. Not open to students who have taken Classical Studies 198.

CLST252 - Loot: Who owns the past?

Course Description

What does looting reveal about the nature of human creativity, ideals, and values? Who owns the past? Or, better, who decides who owns the past? Finally, how does ownership of the past shape the present—and the future? This course is a study of cultural heritage theft from antiquity until today with attention to the materiality, temporality, geography, ethics, aesthetics, economics, and politics of plunder and its display. This is a Transformative Ideas Course.

CLST276S - Contemporary Nationalism and Classical Political Theory

Course Description

Ancient Greece and Rome offered competing visions of politics based on republics and the cosmopolitan idea of humans as world-citizens. In light of classical political theory and the resurgence of nationalism in current politics, we will consider the following questions: Should politics be based on concern for the individual or the nation? Do we have stronger duties to our nations and fellow citizens than to the rest of the world? If so, can we ignore other countries and focus on our own problems? Should foreign policy further the goals of nation-states or focus on global justice? Are nation-states necessary? How should we address the environment, immigration, and economic globalization?

CLST277 - How to Rule the World: Empire and Global Governance from Greece to America

Course Description

From Babylon and Persia to Greece and Rome, empires have risen and fallen, but they always seem to make a comeback. Their defenders point to the stability they bring to a chaotic world. Their detractors point to the harsh rule required to maintain them. This course will explore arguments for and against empire, drawing on history, philosophy, and political theory, with a special focus on the Greeks and Romans. Then, in light of the parallel problems of empire and global governance, we will ask what lessons we can learn for the practice of international affairs today. Contemporary topics will include global institutions, foreign intervention, East Asia policy, and NATO and Eastern Europe.

CLST350 - Art of the Meal: Alcohol and Feasting in the Ancient World

Course Description

Commensality--the act of eating and drinking together--is a fundamental part of human social life, no matter the time or place. This course examines the wide variety of evidence from the ancient world for feasting activities, and especially the production and consumption of alcoholic beverages, in text, visual and material culture. Readings in anthropological theory and archaeological and ethnographic case studies are used to explore human relationships to food and alcohol in different social contexts, and their use in the construction of cultural similarity and difference, group identities, and social hierarchies. With special emphasis on the ancient Mediterranean and Middle East.

CLST357 - Roman Coinage: The Materiality of an Ancient Economy

Course Description

The scholarly study of Roman coinage, focusing on historical trends from the late Republic to the early Empire, 3rd c. BCE-2nd c. CE. Topics of particular attention will be: introduction of coinage in Rome and the provinces; historically contextualizing the making, using, and losing of money (how and why coins are produced, exchanged, buried, counterfeited, even used in religious rituals). Coins as works of art—but common, widely circulating works of art produced by governments, often used to spread propaganda about state goals or national identity.

CMAC110S - Intro to Digital Culture: Media Theory, Politics, Aesthetics**Course Description**

What is digital culture today? In the 90s digital culture studied how the internet transformed our interactions. In the 00s digital culture is driven by social media platforms (from youtube to tiktok), data profiling and recommendation algorithms. We visit iconic places through our constantly updating city apps. Our identity profiles are fashioned by social media influencers. We match with new friends and become followers. We know that biases of race, class, gender and sexuality are internal to search algorithms. Everyday decisions, behaviours, and desires are linked to our smart media. This course explores how digital media affect our subjectivity, our body, social and collective actions, political power and control.

CMAC252 - Learning to Fail

Course Description

Most people spend their lives afraid of failing. Yet, many of the world's most successful people failed numerous times on their paths toward success. The underlying question of this class is if failing is as antithetical to learning as we're taught to believe. To explore this question, we will test ways of using failure as a strategy for learning. We will experiment with failure to learn how it can make us better as we develop our skills as innovators, specifically focusing on the earliest stage of creativity: ideation. We will use failure through experimentation as a technique for problem definition and needs discovery which, in turn, will help us validate the quality of our ideas.

CMAC253 - Social Marketing: From Literary Celebrities to Instagram Influencers

Course Description

Typical Duke students spend hours each day using social media. You've surely heard the platforms described as 'revolutionary,' and you've also heard them described as 'time wasters.' What you probably haven't thought about is how similar they are to previous 'revolutionary' communications technologies like novels, newspapers, and even language itself. This course explores ways in which studying the masters of previous 'social' media technologies—the Shakespeares, Whitmans, and Eliots of the world—can help us understand how influencers on digital social media leverage the same platforms you use every day to market themselves, build their brands, and grow their audiences.

CMAC255 - Humanities Text Mining and Meaning

Course Description

The digital text has led to new forms of research and is receiving increasing attention from artificial intelligence (AI). The application of machine learning to text, known as text mining, presents unique intellectual challenges that require major contributions from the humanities. This course introduces students to the interdisciplinary domain of text mining through a humanities-based media-theoretic framework. Students will first learn text data prep skills and practices fundamental to meaningful analysis. The semester will later introduce unsupervised machine learning and topic modeling, and culminate in a group project. Not recommended for advanced CS students.

CMAC266 - Media History: Old and New

Course Description

Development of various media forms in historical and social contexts. Impact of old 'new' media on established art, commerce, education, politics, entertainment from 19th c. on. Changing ideas about authenticity, authority, agency, reception, identity, and power relating to emerging media forms, production, circulation. Overlaps, disjunctures, convergences, persistences and antiquations via case studies and examples. Technologies include print publishing, photography, audio recording, film, telegraph, maps, exhibitions, architecture and installations alongside contemporary web, multimedia, database, game, virtual reality, and telepresence systems. Final rich media research project required.

CMAC270S - Constructing Immersive Virtual Worlds

Course Description

Theory, practice, and creation of 3D virtual worlds. Hands-on design and development of online collaborative simulation environments. Introduction to graphics workflow for creating virtual world media assets. Critical exploration of state-of-the-art virtual world technologies; 3D graphics, chat, voice, video, and mixed reality systems. Topics include: history/culture of virtual worlds, identity and avatars; behavioral norms; self-organizing cultures; user-generated content, virtual world economies; architectural scalability.

CMAC310S - Archives As Data: Structuring Information for Humanities Scholarship

Course Description

A discursive and hands-on engagement with questions of how archival materials can be transformed into data, why scholars may engage archives as data, what kinds of ethical concerns arise when archives are understood as data, and how to critique archival data scholarship. Drawing on library and information sciences and humanities scholarship, learn to combine archival theories with theories of data structuring when developing research questions. Gather and structure data from many types of archival materials representing a range of cultures and communities housed in Duke's David M. Rubenstein Rare Book & Manuscript Library. Perform humanistic analyses via both digital and analog methods.

CMAC315 - Mapping History with Geographic Information Systems

Course Description

Beginner/intermediate Geographic Information System (GIS) course designed to help students learn how to investigate history spatially. Emphasizes perspectives, procedures, and tools that are relevant to applications of GIS in Art History and Humanistic disciplines. Designed as a hybrid lecture/lab format in which direct instruction is supplemented by hands on learning labs using ArcGIS software and real-world spatial data. The main skills students will gain are: integration of spatial and tabular data, geoprocessing, data visualization, creating features, editing features, vector and raster integration, spatial analysis, georeferencing.

CMAC330S - Tradigital; Mixed Material Processes for Traditional & Digital Design and Art

Course Description

Class explores digital and traditional materials, methods & processes; historical, cultural and applied & entangled development through seminar and applied projects, experimental critical making. Material processes include 3-d printing, traditional modeling, analog photography, print making, moving film, animation. Projects employ tools and process w/ focus on experimental and alternative processes combining digital, traditional media. Emphasis on critical design, integrative conceptual design processes, incorporating historical and cultural understanding of processes as material. Previous art courses not required. Advanced students encouraged to develop personal projects or portfolio work.

COMPSCI93 - History of Computing, Cryptography, and Robotic Devices

Course Description

Introduction to the history of many diverse devices invented for computation, cryptography, and robotics. These technologies include a wide variety of ingenious devices, including purely mechanical devices, hybrid devices, as well as purely electrical devices. The history includes many fascinating inventors including Babbage and Turing. This history begins in the Greek period and spans many historical periods, to the modern times. By use of models and simulators, students will learn the basics of the operation and programming of various historical mechanical computers, robots and cryptographic devices. Students will do projects on historical devices and/or device inventors.

COMPSCI201 - Data Structures and Algorithms

Course Description

Analysis, use, and design of data structures and algorithms using an object-oriented language like Java to solve computational problems. Emphasis on abstraction including interfaces and abstract data types for lists, trees, sets, tables/maps, and graphs. Implementation and evaluation of programming techniques including recursion. Intuitive and rigorous analysis of algorithms. Prerequisite: Computer Science 101, 102, or 116, or Engineering 103L, or equivalent.

COMPSCI207 - Introduction to Mobile Application Development in iOS

Course Description

This class explores the world of mobile applications development based on Apple's iOS operating system and Swift programming language. The class will work on Mac computers running Xcode, the integrated development environment, to develop applications for iPhone/iPad devices. The class covers fundamentals essential to understanding all aspects of app development from concept to deployment on the App Store. Students required to present their project proposals and deliver a fully functional mobile application as a final project. Prerequisite: Computer Science 201. Computer Science 250 preferred. Instructor Thomas

COMPSCI226 - User Research Methods in Human-Centered Computing

Course Description

This course serves as an introduction to a wide range of user-centered research study design methods and quantitative and qualitative data analysis techniques that students can use to capture users' perceived and real attitudes and behaviors toward technologies and policies. The course is most suitable for students who have some programming, algorithms, and data analysis background (e.g., an undergraduate computer programming course, such as Computer Science 201). In addition, having statistical knowledge and experience using statistical analysis tools, including R, Python, and STATA, is encouraged but not required.

COMPSCI247S - Human Flourishing in a Digital Age**Course Description**

The digital age has enhanced human life in many ways: communication is faster, medicine is better, and our knowledge of the world is deeper. But it has also changed the nature of work, society, and our sense of well-being, and raised fundamental questions about the meaning and purpose of human life. This course asks what it means for humans to flourish in a digital age. It considers how new technologies through the centuries have impacted human flourishing, making certain aspects easier and others harder, and perhaps even altering our conception of what flourishing looks like. Our ultimate goal is to ponder together how we should practically live in today's digital age. For sophomores only.

COMPSCI354 - Foundations of Blockchains

Course Description

Blockchains form a key infrastructure for decentralizing trust from a single entity to multiple different entities. Many fields such as finance, supply chain industry, and the design of a central bank digital currencies today are considering the use of blockchains to decentralize trust. At a high level, blockchain consists of stack of three key layers: 1) Consensus - agreement among parties 2) Scalability, and 3) Application layer. In this course, we will learn about the foundations that enable each of these layers. Prerequisite: Computer Science 230 Discrete Math; Computer Science 210 Computer Systems or Computer Science 250 Computer Architecture. Computer Science 330 Algorithms is helpful but not required.

COMPSCI376 - Computational Approaches to Human Language

Course Description

Natural Language Processing (NLP) has emerged as the cornerstone of generative artificial intelligence, bringing attention to a once niche domain. NLP applications are everywhere because language is everywhere. In this course we will explore and discuss a range of techniques designed to help machines perform tasks involving human language. This course follows the evolution of NLP from statistical approaches to deep learning based NLP, including a focus on large language transformer models. We will discuss modern developments and trends in NLP and LLMs. Students will learn about real world applications of NLP technologies and the complexities, ethics, and challenges faced in deploying them in enterprise scenarios.

COMPSCI378A - Applied Conversational AI: Build Your Own Chatbot

Course Description

In this Computer Science course, you will study conversational agents. You will learn about the history and different types of chatbots, their status quo and applications, and the challenges associated with building a powerful conversational agent. You will build your own chatbots using an open-source framework, evaluate its performance, and improve it by contributing your own software components. Over the course of the semester, we will meet both creators and customers of conversational agents throughout Berlin, one of Europe's tech startup capitals. Prerequisites: CompSci 201, Python programming, knowledge of databases. Knowledge of Natural Language Processing is a plus, but not required.

COMPSCI474 - Data Science Competition

Course Description

In this course, students enter a data science competition. They learn any skills necessary to gain insight (data sleuthing). This may include classical machine learning algorithms, time series analysis or point processes, multi-armed bandits, creating a new custom machine learning technique, handling imbalanced data, techniques for tuning parameters, any of a broad array of other techniques, or domain knowledge in another field. Students will work in teams, and during class they will have the opportunity to discuss possible stumbling blocks. Prerequisites: CS 671 (or STA 671D or ECE 687D - Theory and Algorithms for Machine Learning), STA 622 (Statistical Data Mining), Math 466 (Mathematics of Machine Learning), STA 231 (Advanced Introduction to Probability), STA 470S (Introduction to Statistical Consulting) or STA 440 (Case Studies in the Practice of Statistics)

CREOLE101 - Elementary Creole I

Course Description

An introduction to the essential elements of Haitian Creole or Kreyòl language and aspects of Haitian culture. The first of the two-semester sequence of elementary Haitian Creole or Kreyòl, the course provides practice in understanding, speaking, reading, and writing the language, culturally contextualized through units on health care, Haitian women's rights issues, and unpaid child servants (restavèk). Students will acquire enough vocabulary and idioms to be able to interact with Haitians. Taught in Haitian Creole. No prerequisite.

CULANTH103FS - Human Rights: Back to The Future, Looking at Roots and Current Reality of Human Rights

Course Description

This Focus course introduces students to a brief history of rights as a way to ground our exploration of current human rights challenges and what rights may be envisioned in the future. Rights have never been static. Recent changes in how we see rights include the right to truth in post-conflict societies and animal rights. We'll explore how cutting-edge thinkers contribute to an expanded horizon of rights. We will be engaging with activists, scholars, and artists. Open only to students in the Focus Program.

CULANTH114FS - Making Your Case: Global Advocacy for Humanitarian Causes

Course Description

This course equips students with public speaking skills and cultural awareness in the pursuit of effective advocacy for humanitarian causes. At the heart of students' initiative for advocacy lie three questions: 1) Does it improve the human condition? 2) Will it cause no harm and 3) Is it ethical? Centered on the skill of researching an area of humanitarian need, and presenting an initiative of advocacy through effective communication skills, it stresses the critical importance of cultural and ethical considerations in both the analysis of humanitarian challenges, and processes through which these pressing issues can be addressed in the quest of advocating for change.

CULANTH172 - The Anthropology of Design and User Experience (UX) Research

Course Description

The field of design and the burgeoning field of User Experience (UX) research has recently applied the methods anthropologists have used for over a century. The methods of cultural anthropology are distinctly aligned to ask questions about motivations, beliefs, values, and relationships within cultural systems through direct participant observation, surveys, focus groups, and archival research. Privileging critical listening, empathy, and perspective-taking, we try to discern why people do what they do, and apply these questions to human-centered design.

CULANTH175S - An Archaeology of Inequality: Ancient Rome in Ten Objects

Course Description

Introduction to the study of social structure in Ancient Rome with an emphasis on 'invisible Romans': groups that receive less attention in textual sources (women, slaves, children, outcasts, differently abled people, foreigners). Ten objects are used as prompts for storytelling and for an archaeological investigation of the material traces of non-elite Romans. We discuss the concept of 'object biography' developed by anthropologist Igor Kopytoff and visit the Nasher Museum of Art for hands-on activities with Roman artifacts.

CULANTH176CNS - Afro-Global Struggles

Course Description

What does it mean to struggle for freedom? More specifically, what have Afro Diasporic freedom struggles entailed? This course introduces students to anticolonial and abolitionist traditions of resistance from South Africa to the United States, from the Old to the New Worlds. The seminar also attends to contemporary decolonial movement work in and beyond the university via primary archival materials, secondary published work, and film investigating the connections between literature, music, poetry, political writings, and even dance. Course requirements include attendance and participation, discussion posts, and a final submission (essay or creative project).

CULANTH206SA - Duke in New York: New York, New York

Course Description

New York City is an idea as much as a real place. New York is always on the go. In this course, we focus on the people, places, and institutions that make and remake New York. We traverse each of New York's five boroughs, paying attention to the movements of people, culture, and food within them as well as attend to the social dynamics of geography and gentrification. Paralleling the evolution of the city's neighborhoods and ethnic enclaves is the establishment of its globally-known institutions. Experiencing the interplay of individuals and institutions allows us to examine life in the city through the lens of what geographer Ruth Wilson Gilmore terms an 'infrastructure of feeling.'

CULANTH211 - Anthropology of Disability

Course Description

This course establishes ways to think about disability beyond medical definitions. It introduces the field of disability studies through a survey of canonical texts and core concepts of disability justice and critical studies of care. A foundation of disability studies and the course's guiding premise is that disability is not something inherently 'wrong' with individuals, but rather is shaped by society. Through ethnographies as well as films and memoirs, we will examine disability across global cultural and historical locations, and will address the traffic between disability and society across differences such as race, gender, and sexuality.

CULANTH217S - Language & Identity: How We Construct Identities and Reproduce Social Hierarchies Through Language

Course Description

Language is a central and pervasive feature of human identity through which we portray ourselves and negotiate social identities. With such practices we re/produce values, norms, social hierarchies, and the privilege these entail. Using examples from media, literature, and ethnographic data we will explore how speakers negotiate social identities through language and how ideas about it inform our understanding and interpretation of society and speakers within it. Topics include language, racism, gender, sexuality, class, ethnicity and ways that language and discourse construct and maintain a sense of belonging, otherness, truth, and value. Not open to students who have taken Romance Studies 207FS.

CULANTH221SL - Capoeira: Practice and Culture

Course Description

Lecture/lab course introducing the movement, music and culture of capoeira, an Afro-Brazilian martial art that combines dance, self-defense and acrobatics. Created by male African slaves in Brazil several hundred years ago, viewed as a social threat and outlawed in the 19th century, celebrated as an element of national identity in the 20th century, today capoeira is rapidly crossing national, racial and gender borders as it becomes a popular global practice. Studio classes twice a week focus on the basic movements, percussive music and call-and-response singing. Seminar once a week focuses on the historical, cultural and socio-political dynamics that shape capoeira in Brazil and beyond.

CULANTH222SA - Sound in Social Life

Course Description

Focus on sound in NYC, to consider sonic environments as socially cultivated and listening as a cultural practice, shaped by acoustic space. Includes study of music, recorded soundscapes (films, games, installations), built and ecological environments (parks, subways, streets, institutions, clubs, neighborhoods), the politics of soundmaking, and the history and use of sound technology (sound production, reproduction, reception, acoustic materials). Considers noise ordinances in relation to public life, the representation of public life in sound, the shaping of city living practices by its acoustic architecture, and creative responses in sound as urban activist projects. Offered through the Duke in New York program.

CULANTH223S - Global Stories, Local Issues

Course Description

What stories are there to tell about often overlooked objects and people and places? How can we research and share those stories with generosity and integrity? In every corner of our lives—the stickers on our computers, the plates at a local restaurant, the wood in our guitars—there is a story to be told that connects our individual experiences to broader, often global, phenomena. Participants will learn and use methods of ethnography and archival research to connect their experiences and their observations about a place, community, or thing to larger stories about culture and society, and they will practice writing about their research in engaging and broadly accessible ways.

CULANTH224S - Muslim Women Across the Ages

Course Description

This course explores the diverse realities of Muslim women's lives, from the origins of Islam to the present, through autobiographical and biographical accounts situated in their social, economic, political, and cultural contexts. The women we will encounter through textual and audiovisual materials represent a wide range of personal backgrounds, including scholars, mystics, merchants, philanthropists, poets, slavegirls, feminists, and Islamists. We will metaphorically travel across the globe and time to understand the multifarious facets of Muslim women's lived experiences.

CULANTH226S - Performing African Diaspora

Course Description

The Black cultural contributions of globally popular performance genres such as salsa, capoeira and kizomba often remain unrecognized. The objectives of this class are: 1) to understand the historical, cultural and political forces that created the African Diaspora and its rich tapestry of dances. 2) to question our assumptions that knowledge is only produced through the mind; knowledge is also produced and transmitted through moving bodies. To meet these objectives, the course will be a combination of seminar and studio: in seminar we will engage readings in anthropology, dance and performances studies about specific dances which we will then learn in studio.

CULANTH228FS - Human Rights on Camera

Course Description

This course studies the interplay between cameras and human rights; how media technologies are used by activists and human rights workers to amplify grievances. Focus on cases studies where state violence was captured on camera: the Rodney King beating; the Abu Ghraib torture images; the Syrian revolution; and the Black Lives Matter movement. How are legal assessments impacted by visual aesthetics? How much faith do we have in the power of cameras to deliver justice? Readings in foundational theoretical texts about media, technology, and visibility. Open only to students in the Focus Program.

CULANTH230 - Southern Voices: Activism and Progressive Movements in the US South

Course Description

This course explores the lesser known, often hidden, and dismissed works of activism in the US South, primarily through an ethnographic lens. While many know key moments of the Civil Rights movement, much equity and justice work today has its roots in large Southern post-Reconstruction efforts and conflicts. Interdisciplinary lectures will examine a wide variety of movements including labor, health, music, sports, food, education, religion, and media representations. The trajectories of these movements will be contextualized over time in order to understand current regional grassroots and policy actions as well as impacts on national policies.

CULANTH237 - K-Pop, Idols, and Fandom

Course Description

This course explores the complex relationship between Korean popular music (K-Pop) idols and the complex global online (anti-)fandoms that have formed around these industry entertainers. Through a critical analysis of K-Pop music videos, and documentaries, this course examines the historical roots of idol culture in South Korea, the current state of the K-Pop industry, fan behaviors, and the global expansion of K-Pop fandom to understand how these dynamics shape both the industry and the idols themselves. This course nuances concerns about what drives one to become an idol and what it means to be a fan by engaging in moral and ethical debates surrounding the emerging Western consumption of a predatory music genre with its own complex relationship to global music flows.

CULANTH238S - China and Africa: Similarities, Differences, and Interconnections

Course Description

China, Africa, and their diasporas have similarities and differences, many of them the products of interconnections or overlapping experiences. Through the lenses of history, art, politics, and economics, this anthropology seminar compares these two culture complexes and highlights the hybrid and creative results of their interaction, with the special goal of correcting existing misunderstandings and facilitating thoughtful cooperation in the future. While the professor will orient the discussion around current anthropological methods of critical analysis, the seminar format will require the professor and all of the students to build on and contribute to each other's understanding of the topic.

CULANTH262S - Documenting Black Experiences

Course Description

Explores how Black experiences have been documented and how crucial stories woven from real life get told. Students engage wide ranging contemporary and historical materials, including nonfiction, memoir, fiction, documentary and dramatic film, theater, poetry and music. Our aspirations are historical, but with an understanding that academic history, though irreplaceable, barely touches the range of storytelling that makes Black lives not only matter but transform the spaces in which they unfold. Our explorations are political, but in the largest sense—how Black power comes from making higher truth a tool, a weapon and a way of being.

CULANTH269 - Black Gods and Monarchs: Priests and Practices of the Afro-Atlantic Religions

Course Description

Surveys the spiritual, political and economic experience of those who worship African gods—West and Central Africans, Cubans, Brazilians, Haitians, and North Americans. The gods as sources of power, organization and healing amid local political dominance of Muslims and Christians and seismic expansion of international capitalism. West African Yoruba religion, West-Central African Kongo religion, Brazilian Candomblé and Umbanda, Cuban Santería and Palo Mayombe, Haitian Vodou, and African American Pentecostalism are examined as belief systems, and contextualized to the trans-Atlantic slave trade, long-distance commerce and pilgrimage by free people.

CULANTH273 - Amazon.com and the Cybereconomy

Course Description

This course will introduce students to the complexities and controversies around the meteoric growth of the digital economy, with a focus on the biggest company of them all, Amazon. We will examine questions that range from labor conditions and consumerism to data harvesting, algorithmic marketing, and monopoly concerns. By drawing on insights from cultural anthropology, economics, history, and other disciplines, the course will give students a new understanding of how e-commerce is changing the structure of our economy, society, and everyday lives. Students will do an individual research project on some aspect of Amazon for a final project.

CULANTH278 - Sex/Gender - Nature/Nurture: Intersections of Biology and Society

Course Description

Debates about sexuality, sex, and gender hinge on radically different ideas about relative effects of biological forces vs. social forces, or nature vs. nurture. Course changes terms of arguments about sexuality and gender and nature/nurture. Explores how nature/nurture emerged as scientific and popular debate. Evaluates new developments in science and cultural fields that are now reconsidering how biology and environments interact. Showcases debates about how sex and sexuality are formed through interplay of genetic information, hormones, material bodies, and social environments.

CULANTH280S - Ethics of Ethnography: In the Field and on the Page

Course Description

Inquiry into the practical and ethical considerations of ethnography as both a research method and a writing genre. Students learn to identify rhetorical strategies of ethnographic texts and interrogate the moral, political, and ethical issues in representing the 'other.' Frequent workshops guide students through individual research on the intersection of 'race' and some aspect of Durham's social or historical context. Students develop observation and interviewing skills, conduct fieldwork in Durham, and work through several drafts of their own ethnographies, while learning to give and receive feedback. Prerequisite: WRITING 101 or WRITING 120. Open only to DukeImmerse students. Instructor consent required.

CULANTH283S - Istanbul: Religion, Politics and Cosmopolitanism

Course Description

Istanbul is the only city in the world located on two continents. Byzantine, Ottoman, and Turkish cultural legacies allow the city to be read as a 'palimpsest', a multi-layered urban text of multiple, even contradictory meanings. Istanbul is an ideal site to explore imperial history, Islam and Christianity, migration, East/West relations, and cosmopolitanism. Through interdisciplinary sources in history, culture, theory, and politics, students will examine a variety of urban, architectural and social spaces including churches, mosques, public squares, and ethnic neighborhoods. Taught in English.

CULANTH284 - Ritual, Performance, and Religion

Course Description

Exposes students to theories of ritual and performance (Turner, Schechner, Grimes, Geertz, Paden) in religious and non-religious contexts; compares contexts as a way of understanding common structures and what differentiates the religious/non-religious. Guest lecturers (from religion, dance, theater, psychology, English, visual and media studies, cultural anthropology) expose students to a range of approaches to specific kinds of ritual and performance. Possibly involves both class and individual trips to local religious events and performances for field work exercises.

CULANTH285S - Death, Burial, and Justice in the Americas

Course Description

This interdisciplinary course explores the phenomenon of necroviolence: attacks on the dignity, integrity, and memory of the dead. Cases come from the United States, Latin America, and Canada. Topics include the rights of the dead, cultural attitudes towards the dead, and the 'ambiguous loss' experienced by loved ones of the disappeared. We also explore the activism of family members, volunteer cemetery reclamation groups, and forensic scientists who exhume mass graves to identify bodies. Students will interact with guest speakers, spend time in a local African American cemetery with ties to Duke, and do community work and research on behalf of the marginalized dead.

CULANTH295S - Anthropology of Childhood**Course Description**

What does it mean to be—and to raise—a child? This course begins with the premise that childhood has existed, and continues to exist, in myriad forms. Using the tools of anthropology we will ask a series of questions: how do definitions of childhood and childrearing vary across history and culture? How do children's daily lives differ from place to place and how are race, class and gender linked to discourses and experiences of childhood and childrearing? What role does education – formal and informal – play in shaping childhood? Furthermore, how do children stand in as symbols of broader political and cultural concerns?

CULANTH298S - Global Humanitarianism

Course Description

This course explores humanitarianism as both a global phenomenon and a western model for engaging with the world. It examines the cultural and political conditions that make it possible for some people to be saviors and others to require saving. It focuses on the ways humanitarian interventions are increasingly as much about alleviating poverty and supporting political change, as about responding to crises caused by health epidemics, conflict or war, and environmental disasters. We will pay close attention to the impacts of humanitarian interventions good and bad, while critically exploring how local agendas and conditions shape and respond to these programs.

CULANTH308S - Imagining Human Rights: Science Fiction, Culture, and the Creation of Rights

Course Description

This course engages students in the intersection of speculative fiction and the history of ideas about human rights and what it means to be human. Using interdisciplinary tools, including history, anthropology, and public policy, students will explore created worlds and new ways of thinking about what rights humans—and other beings—have, how those rights are proposed, and what happens when those rights are contested. The course focuses on how the imaginary influences or presages the real, allowing us to experiment with what-ifs. Students will work in Duke's Locus Archives of primary documents on 20th-century science fiction spanning writers from China, the USSR., and Japan.

CULANTH312 - War and Public Health in Africa

Course Description

An inquiry into the nature of contemporary war in sub-Saharan Africa and its human cost. Uses public health as a parameter to assess the impact of organized collective violence on people's lives. Link between war and public health established and measured with respect to civilian deaths, gender based violence, physical and psychological trauma, mental disorders, malnutrition and famine, and the spread of epidemic diseases, inter alia HIV/AIDS. Special attention is paid to rape as 'a weapon of war', to the trafficking of human beings in war zones, the child soldier phenomenon, and to death counts as a vector of humanitarian or political advocacy.

CULANTH313S - Race and Medicine

Course Description

This course looks critically at the role of race in modern medicine from historical and present-day perspectives. Race is central to any critical analysis of medicine--from the origins of gynecology and enslaved women, to tropical medicine and American empire, to contraceptive trials in Puerto Rico, to anti-Asian hate crimes in the advent of COVID-19. Through focused case studies, we will explore the racialized subject as intersecting with other categories of difference in medicine, such as sex, gender and sexuality. In parallel, we will ask how medicine has been used as a system of power and knowledge to create racial categories themselves.

CULANTH314 - What is Critical Theory? An Introduction

Course Description

This course is an introduction to fundamental texts and concepts in the history of critical theory. We will be expanding the scope of our examination well beyond the remit of the Frankfurt School, to which the term 'critical theory' is often linked and look at key texts in the history of political philosophy, social theory, linguistics and language philosophy, gender studies, critical race theory, and postcolonialism. All our readings will be primary literature from what might be dubbed a 'critical theory cannon' and is intended to introduce students in the humanities and qualitative social sciences to essential and foundational materials.

CULANTH330S - Narratives of Migration

Course Description

Stories of migration captivate us because they touch on universally important themes: home, family, belonging, identity, pain, loss. In this course, we will explore narratives, or stories, of migration, as told by refugees and immigrants from across the world, through different media: written, spoken, photographed, and constructed digitally on social media. This course approaches narratives of migration primarily from the perspective of sociocultural linguistics and discourse analysis, but we will refer to other scholarly traditions as well. This is a Service-Learning course: students will engage in a mentoring relationship with an immigrant student in a Durham high school.

CULANTH331S - Black Durham: Discovering Durham's Hallowed Ground through Arts

Course Description

Study of Durham's hallowed grounds and sites of struggle, with a deep focus on the African American experience. Investigation of histories, both celebrated and troubled, that have built the present-day community surrounding Duke University. Exploration of the city's tumultuous and rich past from slavery to Black Wall St and onward through the lens of past and present visual and performing artists, leading to new collaborations with these artists. Sites and stories will include Pauli Murray House, Stagville, Civil Rights history in Durham, the Booker T. Spicely murder and more. Using interpretive and historical methods, students will research Durham's stories, ultimately helping to construct a roadmap for future community collaborations that recover local history through the arts.

CULANTH335 - The History of Hip-Hop

Course Description

What began as a localized activity designed to provide a safe haven for Black and Latino youth in New York City, has become a global brand that has had a documented impact on the cultural, political and economic realities of youth throughout the globe. This course will examine the organic social and cultural foundations of hip-hop, as well as the key aesthetic innovators/innovations, and the debates that have arisen over hip-hop's increased influence.

CULANTH337S - African Cities, African Urbanization

Course Description

If the predominant mode of development in African cities is informal and unplanned giving rise to new modes of life, livelihood, and leisure beyond the organizing infrastructures of formal architecture and design in reality, the new African urbanism seems to give rise to two distinct conditions of life--the one crisis and the other ingenuity. Concerned to think through the gendered forms of labor arising from rapid urban growth taking place without conventional facilities, infrastructures and technologies, 'African Cities, African Urbanization' turns to the ethnography of informal settlement; to women's relationships to informality; to the ways in which productive and reproductive labor play their part in urban formation and deformation in African cities.

CULANTH341 - Life and Death: Global Perspectives**Course Description**

Anthropological investigation of customs, practices, and beliefs that get activated when people (and other living beings) die. What constitutes life as in when does it start, what determines well-being, how is it measured; and what constitutes death as in a good versus bad death, by what medical definition, and according to what rituals and beliefs. Comparative inquiry into such questions as why brain-death is not accepted in some cultures and why people in some places prefer to die rather than live after an amputation. Topics will include organ transplants, gang warfare, cancer, and warzones from China and Botswana to Mexico and the United States.

CULANTH342 - Displacements: Migration and Human Trafficking

Course Description

Examination of the meaning of migration in the global world through cross-disciplinary texts and visual media. Situates the phenomenon of human trafficking within the context of these general movements focusing on the risks involved when people endanger their lives to find a better and more strategic position in the world. Explores how these experiences should be interpreted, and how processes and the politics of race, space and place are a condition and/or outcome of these movements. Investigates and considers ways to resolve some of the problems associated with such movements.

CULANTH346S - The Connection between Human Rights, Memory and How Societies Create Memorials

Course Description

This seminar introduces students to multiple approaches to why and how to create memory, with a focus on contributing to a project underway at Catawba Trail Farm. We are particularly interested in how to tell difficult stories of slavery, segregation, and inequality through new sites and interpretive plans. Students will conduct interviews and archival research in coordination with a Bass Connections project, 'Making Meaning at Historic Places' and the Catawba Trail Farm, a non-profit organization that builds community and addresses food insecurity through community gardening. As part of their community-building efforts, the leaders of this project are interested in reclaiming the history of the enslaved people who lived and worked on this property outside Durham.

CULANTH348S - War

Course Description

This course seeks to critically understand a fundamental aspect of the increasingly interconnected global present through examining the question war. It will draw on works from different disciplines (anthropology, history, critical theory, fiction, political science, American studies), and we will constantly move across them, as it seeks to examine how war is conceptualized by different intellectual traditions and theoretical approaches and is experienced by multiple actors. In doing so, it will focus primarily, but not exclusively on the connections between US and the Arab World.

CULANTH351 - Art of the Meal: Alcohol and Feasting in the Ancient World

Course Description

Commensality--the act of eating and drinking together--is a fundamental part of human social life, no matter the time or place. This course examines the wide variety of evidence from the ancient world for feasting activities, and especially the production and consumption of alcoholic beverages, in text, visual and material culture. Readings in anthropological theory and archaeological and ethnographic case studies are used to explore human relationships to food and alcohol in different social contexts, and their use in the construction of cultural similarity and difference, group identities, and social hierarchies. With special emphasis on the ancient Mediterranean and Middle East.

CULANTH352A - From Enlightenment Culture to Popular Culture

Course Description

Course constructs a sociological history of French (and partially European) culture by routinely using the city of Paris as an example. Analyzes conflicts inherited by contemporary culture in highlighting major moments that have defined it since pre-revolutionary era. Focuses on theoretical issues raised by each period, and the manner in which sociologists and critical theorists addressed them--from opposition of nature and culture just as it plays out for the pre-romantics, to the criticism of mass-culture by post-modern theorists. Sessions will be chronological, and will introduce and cover principle problems of social sciences. Taught in French through the Duke in France Program.

CULANTH361S - African Cities, Development, and Climate Change

Course Description

The displacement of sizeable urban populations as a consequence of climate change renders African cities sites of two contending conditions: the one is a prevailing sense of crisis; the other, in the form of a response, is to attend to the prevailing conditions of crisis. African cities are poised to mobilize not only extant forms of cultural ingenuity, but technological ingenuity too. Students will explore African city life from megalopolises like Cairo to threatened UNESCO world heritage sites like Saint-Louis, Senegal. The course reimagines terms such as 'development,' 'employment,' 'infrastructure,' 'sustainability,' and 'citizenship.'

CULANTH369S - Soundscapes of Migration: Music and Migration in Paris from the Interwar Years to the Present

Course Description

This class studies migration through the prism of music, focusing on Paris as a node of networks of musical migration. It analyzes how the metropolis has been a site of musical encounters, as well as a recipient, catalyzer, and disseminator of migrating musical practices. It studies music as a transnational and diasporic cultural process. Although our musical journey will be structured chronologically, its frontiers will encompass the soundscapes of the capital's peripheries. The range of music considered will be varied: from the Eastern European classical repertoire and African American Jazz to contemporary Rap, through Algerian Raï and Arab-Andalusian popular music. Taught in French.

CULANTH372S - Language and/in the Media

Course Description

The relationships between language and media have long been a socio-political concern. Plato was suspicious of the 'new' media of writing; at the end of the Middle Ages, the printing press meant Bibles written in the vernacular could weaken the power of the established church in Europe; today, fake news and online aggression are on the rise, potentially changing the outcomes of democratic elections. Innovations in media give rise to changes in both language practices and social, cultural, and political relations. This course looks at these issues from contemporary sociolinguistic and sociological perspectives, focusing on how linguistic resources are used to create and contest meanings.

CULANTH402 - The Problem of Evil: God, Evil, Suffering, Sin, Meaning of Life, and Philosophy of Religion

Course Description

'The problem of evil' as the challenge of reconciling the existence of an absolutely perfect being (Omnipotent, Omniscient, and omnibenevolent God) with the existence of sin and suffering has one of the greatest problems of intellectual history from ancient to modern times. The problem of evil effects the 'meaning of life' deeply, so it is not exclusive to the monotheists, and involves atheists as well. This is an introduction to the problem of evil, and explores its major issues and concepts: the logical problem of evil, the evidential problem of evil, soul-making theodicy, natural law theodicy, process theodicy, anti-theodicy, free will defense, reformed epistemology, and skeptical theism.

CULANTH403S - Cairo - A Global History

Course Description

This class helps students to get familiar with the history of Egypt and the larger Middle East through the story of the city of Cairo, the largest Arab and Muslim metropolis, and the second largest in Africa. We explore not only the various historical layers of this city, but we also learn about the approach of urban history, including the crucial questions of globalization, urban revolts, and the environment in the past two hundred years and until today. In this way, the class is a methodological enquiry into how we can describe change in urban life with the tools of history, art history, anthropology, and sociology.

CULANTH404S - Ethics of Hope

Course Description

Hope involves the expectation or desire for good things to happen. Yet, does this set up people for despair when hopes get dashed or have no possibility of realization? Or, is the conjuring of something better—somewhere, sometime—what enables life to be sustained in the face of difficulties or just the daily grind of making do? In this class we raise the issue of the ethics, politics, and tactics of hope, drawing on philosophy, feminism, and anthropology.

CULANTH405S - Media and Conflict

Course Description

Focus on the role of media in the context of colonialism, war and conflict across various historical periods. Attentive to the ways that media technologies have been employed both as tools of power and vehicles of protest and resistance. Theoretical readings are paired with a set of international case studies -- e.g. colonial atrocity archives, #BlackLivesMatter, Syrian civil war, the Abu Ghraib torture scandal, the Israeli military occupation, drone strikes -- that enable us to test the applicability of theoretical discussions to contemporary case studies. Readings in Butler, Kaplan, Sontag, Stein and Kuntsman, Virilio and others.

CULANTH406S - South African Life Histories

Course Description

South Africa presented the world with one of the great moral challenges of the 20th century. We will explore its history through the lens of biography and autobiography. The country underwent major transformations -- rapid industrialization, segregation, the rise and fall of apartheid, and the emergence of democracy. How did individuals experience these social changes? In what ways do individual lives illuminate these larger social processes? Protagonists include a prophetess, political artists and writers, exiles, and celebrated figures. Topics cover how segregation and apartheid affected people's daily lives, opposition to white supremacy, and the personal impact of the AIDS's epidemic.

CULANTH411S - Imperialism and Islamism

Course Description

This course draws on transnational material to gain perspectives on the conflict between the US and its Islamist opponents. Its central concern is Islam's transnational past and relations of European empires to that past. It is guided by a transnational perspective framing specific case studies, original source material and arguments on the nature of global Islamist politics and on the US as an imperial power. Students will strengthen skills in global anthropological and historical analysis, using the conflict between the US and its Islamist opponents as a case study.

CULANTH416A - Cultural Lab: Walk, Think, Experiment Now

Course Description

This Duke in Madrid course parts from the present, from what is happening culture-wise today, to offer a wider perspective on cultural systems and creative processes in our recent history. Most class sessions will take place outside the classroom and will have a participative character. One of the central concepts of this course is transversality, which allows the student to organize more dynamic and active comprehension networks than what is usually offered by courses in this field of study. Nevertheless, students will always have a base point to focus their direction of study related to the modules within the course: art, literature, architecture, politics, creation, theatre, technology.

CULANTH426S - France-Asia: Cultural Transfers and Translations in a Globalized Context

Course Description

This class explores the dynamic contemporary Franco-Asian dialogue with a specific focus on China, Japan, Vietnam, Laos and Cambodia. Seeking to go beyond the East-West divide, the seminar investigates the current stakes of this dialogue, given its growing complexity after 1945. It examines the postcolonial legacy of France's occupation of Indochina, and how East Asia has also often been viewed as an 'Other,' serving to crystallize French anxieties over political and cultural power. It uses an interdisciplinary perspective encompassing novels, cinema, dance, visual arts, and critical theory to trace a web of exchanges in a globalized context. Taught in French.

CULANTH431 - Anthropologie Economique

Course Description

Taught in French, this course is based on the achievements of anthropology to identify the foundations of economic practice as well as the theoretical problems it poses. Whether it is the market, credit or investment, economic institutions and practices are historical inventions. A better understanding of these requires analyzing the process by which the universe, which we call 'economy', was constituted. It is about reintegrating economic behavior into human behavior. An economy that positively affects living things and meets the needs of human communities must rethink the foundations of the theory of value and exchange.

DANCE125S - American Musicals

Course Description

What is it about musicals that made them a uniquely American theatrical form? In this course, we will investigate how musicals represent what it means to be American. Musical theatre history is American history, indebted to and reflective of critical histories of appropriation, capitalism, immigration, and popular entertainment. Musicals seduce us in song and dance; it is easy to ignore the substance beneath the sequins. We will study the texts and historical contexts of musicals over the past century, from Shuffle Along, and Oklahoma!, to A Chorus Line, and Hamilton. Musicals reveal shifting notions of what 'American' means as they stage ability, ethnicity, gender, race, and sexuality.

DANCE135 - Experimental Sculpture and Installation Art

Course Description

This course explores ideas surrounding the creation of experimental sculpture. Employs non-traditional methods: 'readymades,' non-traditional materials, conceptual processes, digital interaction and fabrication techniques (rapid prototyping), mixed media including video, and projection technologies. Content of work driven by individual student interests—sustainability, the anthropocene, feminism, social and political commentary, and/or more formal, abstract sculptural relations. Instructor consent required.

DANCE152 - Dance Improvisation

Course Description

Introductory dance studio course exploring states of presence, perception, awareness, and responsiveness to one's self and environment through movement improvisation. Utilizing techniques of improvisation across cultural traditions in dance, students experiment with music visualization, contact improvisation, sensory stimuli (visual, aural, kinesthetic) and steer embodied perceptions toward the creation of movement in the moment. The course aim is to practice and develop freedom in one's personal movement vocabulary within and beyond the realm of dance. Students of all abilities and backgrounds are welcome. No formal dance experience required.

DANCE199FS - Knowing Through Performance

Course Description

Inquiry into the concept of 'performance' broadly construed; not only as it refers to 'staged' performances, but as social ritual and as self-representation, situated in cultural context. Writing experiments aimed at capturing the ephemerality of live performance, with attention to how meaning is enacted through movement, sound, lighting, rhythm, voice, emotion, and audience interaction. Regular writers' workshops and attendance of theater, dance, and musical performances. Students compose critical reviews and a research project on a performance genre, an artist's approach, or other related topic of their choosing.
