General Education Curriculum Codes

FL - (FL) Foreign Language, LG - (LG) Language: A&S Curriculum

KOREAN102 - Elementary Korean

Course Description

Develops fluency and broadens interactional skills for everyday communication in diverse social settings while consolidating linguistic foundation and conversational routines. Builds skills for reading and responding to complex sentences and simple informational texts. Prerequisite: Korean 101 or equivalent (knowledge of Hangul and listening and speaking ability to exchange rudimentary information in service and familiar settings). Students with equivalent preparation to the prerequisite course should contact instructor for a permission number.

KOREAN203 - Intermediate Korean

Course Description

Develops skills for reading and responding to narrative and descriptive texts, advances conversational fluency, and cultivates socio-linguistic and cultural awareness for interaction involving different social relationships. Popular media as well as folktales are introduced for exposure to authentic language use and for discussion of evolving cultural norms and perspectives. Recommended prerequisite: Korean 102 or equivalent (ability to manage face-to-face service encounters and everyday conversation and to comprehend complex sentences and simple multi-sentence texts). Students with equivalent preparation to the prerequisite course should contact instructor for a permission number.

KOREAN204 - Intermediate Korean

Course Description

Expands the scope of reading and discussion to a range of text types including expository texts. Develops skills for communicating meaning with increased accuracy and complexity. Students explore topics such as cityscape, pre-modern history, and environmental issues through course readings and materials and in student interest-driven projects. Prerequisite: Korean 203 or equivalent (ability to speak on familiar topics fluently, to read and understand simple stories and to write eligible sentences). Students with equivalent preparation to the prerequisite course should contact instructor for a permission number.

KOREAN303 - Literacy and speech register in Korean

Course Description

Develops literacy skills for students highly fluent in conversational Korean but lacking in experience with written genres and broad social and academic discourses. Diversifies vocabulary knowledge and strengthens grammatical control through reading and discussing texts ranging from traditional folktales to contemporary multimedia materials. Students with requisite background should contact instructor for a permission number.

KOREAN306S - Advanced Korean

Course Description

Builds interpretive and presentational skills for communication on complex topics and develops solid understanding of the current issues of South Korean society in the perspective of social justice. Course reading and materials introduce on-going debates (e.g. military conscription, immigration, and education system) and analyze how various media texts (e.g. newspaper reports and columns, TV news and programs, alternative media, organization websites, documentaries and feature films) treat the issues. Prerequisite: Korean 207, Korean 305 or equivalent (fluency in speaking, listening, reading narratives and descriptive texts and ability to write multi-sentence texts).

KOREAN455S - Korean Politics and Society: Academic Reading and Writing

Course Description

Surveys the modern history of Korea through the prisms of music, investigating how the development of modern music in Korea, including the establishment and evolution of musical institutions and the changes in musical styles of Korean composers, is tied to the notion of national identity. Class materials are drawn from media and academic publications in Korean and written assignments guide students to develop skills in academic written communication. This class is designed for advanced students who have completed a fourth-year course in Korean or international students schooled in Korea. Students with requisite background should contact instructor for a permission number.

KOREAN273T-2 - Voices in Music : Korean

Course Description

Voices in Music explores how language and culture impact the production and reception of music in Korean-speaking communities. Texts include compositions, lyrics, music videos, interviews, visual texts, and documentaries, allowing students to examine music from multiple perspectives in Korean. Discussions will include ethnomusicology, representations of culture and identity, performance, and the music industry. Tutorials are taught in Korean. Recommended prerequisite: 4 semesters-level of language study (KOREAN 204) or equivalent.

LATAMER121 - Introduction to Contemporary Latin America

Course Description

This is an introductory, interdisciplinary survey course on modern Latin America focusing on contemporary social issues especially from the past five years. Each week will be dedicated to a different social problematic, including: political indigeneity; the legacy of African slavery; feminism and femicide; drug wars; migration and border issues; student movements; neoliberalism and resource struggles; and ecological contestation. Weekly meetings are driven by reading discussion, with context provided in lectures. You will conduct independent research in at least one group presentation and one final project. Required for students seeking the certificate in Latin American Studies.

LATAMER122 - History of Latinxs in the United States

Course Description

This introductory course will cover the social, cultural, and political histories of Latino/as in the United States from 1848 to the present including the Treaty of Guadalupe Hidalgo, the Great Depression, WWI/WWII, the creation of Latino/a civil rights organizations, and the civil wars and free trade agreements of the 1980s and 1990s that have spurred so much of contemporary migration. Themes include colonialism and conquest, sexuality and gender, race and ethnicity, transnationalism and migration, social inequality and practices of resistance. This class will highlight the diversity of the Latino/a experience—focusing on the history of Afro-Latino/as, queer Latino/as, and undocumented Latino/as.

LATAMER283S - Death, Burial, and Justice in the Americas

Course Description

This interdisciplinary course explores the phenomenon of necroviolence: attacks on the dignity, integrity, and memory of the dead. Cases come from the United States, Latin America, and Canada. Topics include the rights of the dead, cultural attitudes towards the dead, and the 'ambiguous loss' experienced by loved ones of the disappeared. We also explore the activism of family members, volunteer cemetery reclamation groups, and forensic scientists who exhume mass graves to identify bodies. Students will interact with guest speakers, spend time in a local African American cemetery with ties to Duke, and do community work and research on behalf of the marginalized dead.

LATAMER320S - Social Movements and Social Media

Course Description

Examines uses and abuses of social media by social movements. Interested in a broader historical study of mediating technologies and oppositional public sphere, course considers the uses of cameras, phones, cassette players, radio, and social media platforms, but also books, bodies, art, fashion, and automobiles as oppositional technologies. Studies political and ethical uses of technologies in social unrest. Investigates impact of technologies on social movements and social transformations in contemporary history. Student driven case studies will highlight contemporary engagement with social media by networked social movements.

LATAMER321 - Visualizing the Caribbean

Course Description

Art (paintings, installations, performance art) and film on the Caribbean offer vantage points for analyzing alternative ways through which the region has been thought, imagined and produced. They are periodized semiotic productions that feed into and are marked by perspectives that are at once global, national, and even personal. Considering the constitutive contexts of these productions and performances, we will attempt to glean the diverse perspectives, and the way these have influenced sociocultural policy and offer alternative interpretations of diasporic lifeways of Caribbean people.

LATAMER335S - Brazil and Lusophone Africa

Course Description

This seminar examines three historical components of the South Atlantic in terms of history, culture, and contemporary political and economic consequences. European colonialism in Africa and Brazil constitutes the baseline for this exploration, but the long and tardy nature of Portuguese colonialism in Africa in comparison with other European colonial powers, especially in its post-World War II manifestations, is our starting point. We will examine the last stages of Portuguese colonialism in Lusophone Africa, the African liberation movements and the efforts to forge new transnational relations among Portugal, Lusophone Africa and Brazil.

LATAMER341S - Perspectives on the Amazon

Course Description

The Amazon has been a source of awe to outsiders at least since the first Europeans navigated the Amazon River in 1542. While early explorers searched the forest for a mythic city of gold, contemporary travelers, scientists, and concerned citizens look to the Amazon as the key to our endangered future. Focusing on a variety of textual and visual representations, we will deal with major themes in the history of the Amazon and consider the ways in which this vast and widely depicted region eludes representation, holding entirely different and contending meanings to distinct socio-cultural groups. Our sources include works by indigenous thinkers and cultural producers.

LATAMER343 - Displacements: Migration and Human Trafficking

Course Description

Examination of the meaning of migration in the global world through cross-disciplinary texts and visual media. Situates the phenomenon of human trafficking within the context of these general movements focusing on the risks involved when people endanger their lives to find a better and more strategic position in the world. Explores how these experiences should be interpreted, and how processes and the politics of race, space and place are a condition and/or outcome of these movements. Investigates and considers ways to resolve some of the problems associated with such movements.

LATAMER438SA - Global Madrid

Course Description

Focusing on Madrid's porous LatinX landscape, this course draws comparative perspectives across countries and cultures. Madrid's demographic growth, at least since the late-1980s, includes migrants from Bolivia, Colombia, the Dominican Republic, Ecuador, Honduras, Paraguay, Peru, and Venezuela. Rather than drawing clear-cut 'authenticating' distinctions between LatinX and 'the rest,' this seminar places Latin and X--LatinX--in dialogue with the Iberian Peninsula and Spanish-speaking 'communities' alongside sociocultural imaginaries that enmesh Spaniards, Latin Americans, Latino/a/Xs, and beyond. Taught at Duke in Madrid.

LATAMER450S - The Global Caribbean

Course Description

The course introduces students to the Caribbean as a transnational space that reflects the global dynamics associated with flows of bodies via migration, labor, and goods all of which have undergirded the birth and evolution of the (primarily) Atlantic world economy. The Global Caribbean will have a historical sociological bent that frames the region as the first modern colonial space which has served as a template for other projects of colonial and postcolonial development elsewhere in the world. Emphasis will be on the way that freedoms and unfreedoms operate in the Caribbean and elsewhere. Discussions of how knowledge has conditioned the representation of the region will be entertained.

LATAMER471S - Capstone Seminar: Latin American Left Turns: A New Politics for the 21st Century?

Course Description

Examination of issues surrounding the upsurge of leftist governments elected by the popular vote in the wake of the perceived failures of neoliberalism and the Washington consensus of 1989. Looks at ways Washington has had to come to terms with an unexpected revival on the left that threatens U.S. hegemony while offering an alternative path to achieve national development, distribution of wealth, and recognition of diversity and pluralism. Students will examine these issues from multiple viewpoints and develop projects based on choosing specific research foci within the general enterprise of what these government share in common and how they differ.

LATAMER480S - Applied Latin American Studies: Cultivating Impactful Futures

Course Description

Focuses on building meaningful, long-term applications of Latin American Studies. Individualized projects developed based on students' academic disciplines, interests, and professional goals. Identifies how knowledge, culture, and language can be applied beyond graduation. Visiting presentations include scholars/professionals with expertise in fields such as human rights, language justice, global health, environment/energy, and international relations, and students will explore thematic intersections with their project. Fulfills the Latin American Studies Certificate Capstone Seminar requirement. Recommended prerequisites: Introduction to Contemporary Latin America or comparable coursework if approved.

LINGUIST125FS - Languages, Margins, Borders: Representations, Practices, and Policies

Course Description

Examines the relationships between language and contemporary migration patterns that, directly or indirectly, affect millions of people across the globe, focusing especially on migration flows related to humanitarian challenges. Divided into three key themes, it analyzes the representation of migrants and migration in media and culture; language practices of migrants, including translanguaging and language learning; and policies towards migrants and their languages that pertain to governance in linguistically diverse societies. Interdisciplinary in approach, readings are drawn from linguistic anthropology and sociolinguistics, as well as political sociology and public policy studies.

LINGUIST299S - World Englishes: From Colonization to Globalization

Course Description

Whether in media, academia, or science and technology, English is the globally-dominant language of the 21st century, but this status was not achieved by accident. This mixed lecture- and seminar-based course examines how the story of English, from colonization to globalization, shapes and is shaped by interlocking social, political, economic, and cultural contexts that have evolved over the past five hundred years. Taking a big-picture view from critical sociolinguistics, we look at how Englishes – in the plural – have been imposed, resisted, and reimagined over time and in different parts of the world, focusing particularly on musical, literary, and other cultural forms. No prior knowledge of linguistics is required.

LINGUIST320S - El poder de las palabras: el impacto del lenguaje en la sociedad

Course Description

This course explores the influence of language in society through critical discourse analysis. Students will examine how discourse shapes, reinforces, and challenges power structures, social inequality, and identities. By analyzing a range of real-world texts and contexts, students will learn to uncover the often hidden ways in which language can legitimize or disrupt social hierarchies and cultural norms. They will also gain tools to critically evaluate both explicit and implicit messages in discourse, empowering them to recognize the role of language in social change and reflect on their own responsibilities as language users in shaping societal values and beliefs.

LINGUIST372S - Language and/in the Media

Course Description

The relationships between language and media have long been a socio-political concern. Plato was suspicious of the 'new' media of writing; at the end of the Middle Ages, the printing press meant Bibles written in the vernacular could weaken the power of the established church in Europe; today, fake news and online aggression are on the rise, potentially changing the outcomes of democratic elections. Innovations in media give rise to changes in both language practices and social, cultural, and political relations. This course looks at these issues from contemporary sociolinguistic and sociological perspectives, focusing on how linguistic resources are used to create and contest meanings.

LINGUIST377S - Language & Identity: How We Construct Identities and Reproduce Social Hierarchies Through Language

Course Description

Language is a central and pervasive feature of human identity through which we portray ourselves and negotiate social identities. With such practices we re/produce values, norms, social hierarchies, and the privilege these entail. Using examples from media, literature, and ethnographic data we will explore how speakers negotiate social identities through language and how ideas about it inform our understanding and interpretation of society and speakers within it. Topics include language, racism, gender, sexuality, class, ethnicity and ways that language and discourse construct and maintain a sense of belonging, otherness, truth, and value. Not open to students who have taken Romance Studies 207FS.

LINGUIST397S - Narratives of Migration

Course Description

Stories of migration captivate us because they touch on universally important themes: home, family, belonging, identity, pain, loss. In this course, we will explore narratives, or stories, of migration, as told by refugees and immigrants from across the world, through different media: written, spoken, photographed, and constructed digitally on social media. This course approaches narratives of migration primarily from the perspective of sociocultural linguistics and discourse analysis, but we will refer to other scholarly traditions as well. This is a Service-Learning course: students will engage in a mentoring relationship with an immigrant student in a Durham high school.

LINGUIST413 - Language and Aging

Course Description

This course will examine language acquisition, maintenance and loss across the life cycle. Research will include experiments and data collection with healthy subjects and in pathology (including different aphasia and dementias). Special foci include cognitive neurolinguistic approaches to understanding acquisition and maintenance of languages (first, second, third, etc.) across different age groups, bi- and multilingualism in aging, hypotheses about cognitive reserve, use of imaging in understanding languages in the healthy and pathological brain, and developing new protocols for future research.

LINGUIST450S - Junior/Senior Seminar in Linguistics

Course Description

Theory and methods of comparative linguistics. Diachronic and synchronic approaches to the study of comparative linguistics in phonology, morphology, morphophonemics, syntax, and lexical categories in the context of the world's languages. Both Indo-European and non- Indo-European languages included. Topics include theories of reconstruction, languages in contact, abductive processes, and questions of linguistic typology. Major research paper required.

LINGUIST451 - Language and Society

Course Description

Course examines language as a social practice, focusing on different aspects of its role in social life. Topics addressed include: language and social identity, such as ethnicity, social class, age, and gender; variation in language, including dialects, accents, and registers; multilingualism and language contact; new languages such as pidgins and creoles; language, culture, and intercultural communication; language and ideology; language in education and in the media. Through the discussion of these topics and homework including reading and small research projects, students are introduced to key concepts, theories, and methods in sociolinguistics and linguistic anthropology.

LINGUIST471S - Language and Politics: Global Perspectives

Course Description

We will never speak a single language, or agree on the best way to organize society and politics for 'the good life.' How do macro-politics affect the language(s) we choose to speak? What public policy initiatives can be deployed so that language is an accessible resource for all? Are there such things as language rights, and how can they be distributed and defended? These questions are not just academic, but essential to understanding the world(s) that we inhabit. This course takes a global and historical approach to the politics of language, examining the relationships between language, society, and the state.

LINGUIST472 - Linguistic Theory-Based Approaches to Large Language Models

Course Description

Emergence of models of natural language processing provides new opportunities for linguistic theoretical approaches to provide disciplinary perspectives to the toolbox of these models, how they interact with linguistic theories in the context of generating & utilization of text, narrative & dialogue in AI. Focus on principal linguistic theories -generative grammar, sociolinguistics, speech act theory, cognitive linguistics, functional linguistics, cognitive neurolinguistics. BARD, Llama 2, BERT, Chat GPT, GPT-NEO used in examining large language models. Role of humans in labeling data, understanding domains, multilingual perspectives.

LINGUIST480S - Critical Discourse Analysis: Theory and Method

Course Description

Presents key theories and methodologies of critical discourse analysis (CDA) through substantive practice in analyzing language and discourse in real-world texts, with a focus on understanding ethical implications of how people, events and issues are represented. Theoretical frameworks from e.g. Foucault and Laclau & Mouffe are examined in the context of linguistic approaches from e.g. Saussure, Halliday and Blommaert. Primarily aimed at junior/senior Linguistics majors but open to upper-class/graduate students majoring in allied humanities/social science fields. Some knowledge of language/linguistics is helpful, though not necessary.

LINGUIST498 - Cyber Law: Law, Language, and Computers

Course Description

Cyber law refers to the legal principles that govern the creation, use of computers, software, and computer networks, or that relate to the transfer, use, and storage of electronic information. In this course we will analyze the key legal principles concerning: ownership of the designs of integrated circuits and computer software; crimes involving the use of computers; protection of electronic data, with particular concern for the protection of privacy interests; freedom of expression on the internet. There will be several over-arching meta-themes in this course, and other related themes. This course is designed for students with little or no familiarity with the American legal system.

LIT110S - Intro to Digital Culture: Media Theory, Politics, Aesthetics

Course Description

What is digital culture today? In the 90s digital culture studied how the internet transformed our interactions. In the 00s digital culture is driven by social media platforms (from youtube to tiktok), data profiling and recommendation algorithms. We visit iconic places through our constantly updating city apps. Our identity profiles are fashioned by social media influencers. We match with new friends and become followers. We know that biases of race, class, gender and sexuality are internal to search algorithms. Everyday decisions, behaviours, and desires are linked to our smart media. This course explores how digital media affect our subjectivity, our body, social and collective actions, political power and control.

LIT155CNS - The Cultural Cold War: Voices From Below

Course Description

The Cold War was marked by ongoing rivalry between the United States of America and the Soviet Union, though its hot wars were fought across the decolonizing world. Placing literary and aesthetic cultures at the center of Cold War battles, this course introduces Cold War cultural interventions in Asia, Africa, and Latin America and how they shaped popular understandings of literary autonomy, freedom of speech, ideology, and propaganda. Through sampling declassified documents from CIA archives, little magazines, cartoons, films, novels, and short stories, students will learn how the Cold War generated competing approaches to literature and art.

LIT165FS - Virtual Realities: Collective Dreams from Plato to Cyberspace

Course Description

What is 'virtual reality'? If something is real, isn't it also always actual, and if virtual, only almost or nearly real? What strange, hybrid no-mans-land lies midway between truth and illusion, and how can we learn to navigate inside this space? The puzzle is an old one, even if the technology we call VR is new. In this discussion-intensive course, we will read, watch, and play our way through some of the most powerful attempts to understand humanity's penchant for collective dreaming: from Plato's allegory of the cave, to the immersive spectacles of baroque theater, to the ghostly realms of gothic literature and modern film, to the invention of cyberspace and parallel universe games.

LIT210 - Robots and Monsters: Unruly Hu

Course Description

What if humans had the power to create intelligent life. What would they do with that power? What would such creatures be like? These questions have captivated the imagination of storytellers for thousands of years. Prometheus stole the power to create life from the Greek gods. The Rabbi of Prague brought a clay creature to life with magical incantations. Frankenstein accomplished it with science on the operating table. And computer programmers try to build such creatures with AI technology. In stories, the end is always the same: the creature gets out of control, it threatens its creator and needs to be subdued. In this course, we will read stories of human effort to bring to life their own creations. We will discuss the literary features of such fantastical creations as the Golem, Frankenstein's monster, Androids and AI. Over the semester we will come to appreciate the human desires and fantasies associated with this figure, and ask what these robots and monsters can tell us about our own humanity.

LIT218 - Cinematic Authorship

Course Description

Theories of authorship continue to generate heated debates. What is at stake in these debates and for whom? This course will consider both the historical and contemporary debates around the controversial notion of authorship as it relates to signature and style. Drawing on film and media theory, literary theory, and philosophy, we will examine how artists explore and challenge the romantic conflation of the author as a stylistic innovator, site of influence, collaborator, and iconoclast. Throughout the semester we will ask: What is an author? What is the impact of stylistic innovation in media culture? And, why does authorship matter?

LIT219S - The Pursuit of Happiness

Course Description

What is the good life, and what does it mean to pursue happiness? With life seemingly caught between an undesirable present that endures and a desired future that feels improbable, this course grapples with tensions that arise when our drive to the 'good life' fails to materialize in what it promises. By critically analyzing how socioeconomic factors construct and maintain the social imaginary of a happy life in a multitude of cultural contexts, this course addresses the both the risks and pleasures that humans across the globe experience as they keep resilient in their life pursuits.

LIT230A - Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)

Course Description

This course explores the complexities of global Los Angeles by focusing on issues that especially impact its marginalized communities. For the service-learning component, students volunteer at least 20 hours during the semester at nonprofit organizations engaged in the pursuit of social justice. This experience provides an opportunity to observe, participate in and reflect on the day-to-day implementation of social action, policy and organizing initiatives. As part of the volunteer commitment and in lieu of a final paper, students produce a documentary media project that communicates goals identified by and in collaboration with the community partner.

LIT237 - K-Pop, Idols, and Fandom

Course Description

This course explores the complex relationship between Korean popular music (K-Pop) idols and the complex global online (anti-)fandoms that have formed around these industry entertainers. Through a critical analysis of K-Pop music videos, and documentaries, this course examines the historical roots of idol culture in South Korea, the current state of the K-Pop industry, fan behaviors, and the global expansion of K-Pop fandom to understand how these dynamics shape both the industry and the idols themselves. This course nuances concerns about what drives one to become an idol and what it means to be a fan by engaging in moral and ethical debates surrounding the emerging Western consumption of a predatory music genre with its own complex relationship to global music flows.

LIT254S - Unsettling Modernity: Korea, Empire, Diaspora

Course Description

Korean history from the late 19th century to the present. Examines how colonialisms, cold war divisions, and transnational migrations have shaped modern Korean identities both on the Korean Peninsula and in the diaspora. Challenges dominant narratives of modernization by centering marginalized perspectives and exploring key moments in modern Korean history: Japanese colonial rule, liberation and division, the Korean War, ideologies of 'self-reliance' in North and South Korea, South Korea's role in the Vietnam War, and democracy in neoliberal South Korea. Engages transnational Korean literature, history, theory, and visual media to reassess the nation-state as a construct shaped by colonial and Cold War structures.

LIT275S - Introduction to Asian American and Diaspora Studies

Course Description

To what extent does Asian American invisibility betray a constitutive role in U.S. history? After reviewing the rise of Asian American as a category and of Asian American studies as a field, this course will chart the shifting place of Asians in the modernizing of America by reading literary and cultural texts with ethnic historiography and criticism focused on im/migration, empire's wars, and interracial diaspora and the future. In providing a critical history of Asian America, this course expands the field's foundational concerns toward a transpacific and hemispheric Asia/America while exploring minor adoptions and resistances of America, including of its aesthetic and social movements.

LIT278S - Literatures and Films of Pandemic

Course Description

This course explores past pandemics as a way to think about how to best live through COVID-19 and prevent or minimize future pandemics. Through examining literature and film, we will analyze the psychosocial dimensions of pandemic. We will read a variety of texts including: histories, fiction (Bulgakov, Porter, Tolstoy, Colson Whitehead); short essays; and films (e.g., Contagion, Outbreak). How do science, medicine, and society interact in a time of pandemic? How do pandemics reveal social inequities, and how could we use this knowledge to decrease disparities? And why do people turn to the humanities and arts in times of pandemic?

LIT281 - Horror: Monsters, Vampires, and Ghosts in Film and Literature

Course Description

Why do we experience pleasure in reading horror stories? Why do we keep dreaming about unexpected and incomprehensible threats to our lives? In this course, we will examine a wide array of texts and films that combine elements of the supernatural with the feelings of dread and anxiety in order to investigate what tales about monsters, ghosts, doubles and imaginary enemies within our very selves can teach us about the human psyche, history and aesthetics. We will interpret the readings and the films in their historical context and will compare diverse approaches including genre theory, biographical, media-historical, political, and psychoanalytic perspectives. All readings and discussions in English.

LIT282S - Modernism and the Arts

Course Description

This course places international modernism in an intermedial perspective, presenting it as a broad conversation among international artists across various art forms. In addition to reading major literary works by writers such as Baudelaire, Mallarmé, Joyce, Eliot, Kafka, Woolf, Wat, Babel, Rilke, Anand, Césaire, Lu Hsun, students will enhance their understanding of modernism through exposure to other art forms, such as painting (Matisse, Picasso, Marc, Kandinsky, Chagall, Schoenberg), sculpture (Rodin, Brancusi, Giacometti), music (Schumann, Debussy, Stravinsky, Schoenberg, Berg, Gershwin), and film (Buñuel, Dali, Eisenstein, Vertov, Carné, Godard, Ruttman, Cavalcanti, Vigo).

LIT303S - Fiction/Reality/Autofiction: The Existential Turn in Contemporary Literature

Course Description

Inspired by Marcel Proust and W. G. Sebald, and working alongside Annie Ernaux, contemporary writers such as Karl Ove Knausgård, Rachel Cusk, Jenny Offill, and Teju Cole undermine traditional divides between fiction, memoir, and essay-writing, and challenge our understanding of what a novel is. Some critics have named this new trend 'autofiction.' Is that a good label? Does the new 'reality hunger' entail new ideas about subjectivity and identity? How does it relate to realism, and modernism. What is 'existential' about it? We will read contemporary literature from different countries alongside theories of language and reality, realism, modernism, the novel, and reading.

LIT304S - Introduction to Digital Culture: Media Theory, Politics, Aesthetics

Course Description

What is digital culture today? In the first two decades of the 00s, digital culture has become more directly related to the emergence of social media platforms (from Youtube to Instagram, from Snapchat to Tiktok). Digital culture is now shaped by artificial intelligence. We make new friends through dating apps and by becoming followers. We know that biases of race, class, gender and sexuality are embedded in everyday search algorithms. This course welcomes students to participate in these emerging discussions and experiment with new ideas that are shaping digital culture today.

LIT305 - Portals: Art of Jumping Worlds

Course Description

A portal is a special kind of doorway—one that opens onto other worlds, times, or mental states. This course investigates the function of world-hopping in several different genres and media from ancient times until today, with a focus on its contemporary significance. Examples taken from fantasy, science fiction, mythology, the fairytale, magical realism, video games, film, television, and graphic novels will help us pose questions like: How does the portal operate as a plot device? What kinds of philosophical problems does it raise? How does it relate to the technological concept of the interface? Do portals exist? If so in what sense? All readings in English.

LIT306S - Reading Literature in French

Course Description

What is literature? Why read literature today? And how do we talk about what we read? This seminar offers an initiation to literature in French from the Enlightenment to the digital age. It introduces a wide range of critical and theoretical tools to study literature and its uses, and aims at developing writing and argumentation across a range of literary genres (theater, essay, novel, poetry...). This seminar explores how most urgent political and philosophical issues of the ages can be read through and unraveled within literary texts. Authors studied may include Montesquieu, Diderot, Balzac, Baudelaire, Flaubert, Sartre, Césaire, Michaux, Duras, Fanon, Perec, and Modiano.

LIT314 - What is Critical Theory? An Introduction

Course Description

This course is an introduction to fundamental texts and concepts in the history of critical theory. We will be expanding the scope of our examination well beyond the remit of the Frankfurt School, to which the term 'critical theory' is often linked and look at key texts in the history of political philosophy, social theory, linguistics and language philosophy, gender studies, critical race theory, and postcolonialism. All our readings will be primary literature from what might be dubbed a 'critical theory cannon' and is intended to introduce students in the humanities and qualitative social sciences to essential and foundational materials.

LIT321 - Sample & Remix: Contemporary Cultural Production Across Arts & Media

Course Description

Sampling & remixing of previous works is a major mode of contemporary cultural production cutting across media and cultural practices. This course analyzes its genealogy, technological underpinnings, legal presuppositions and aesthetic consequences. Tensions between copy and copyright, between claims to originality and mechanical reproduction characterize this contemporary regime, now deployed globally. Its cultural implications will be distinguished from related modes of making art and meaning (imitation, citation, collage, montage...) and tracked through various objects: popular and avant-garde cinema; videogames, ready-mades and Pop Art; Hip-Hop and Electro; literature and DJ culture.

LIT325S - Understanding Mediation

Course Description

Examines experience as always mediated. How does text mediate expression, or language mediate subjectivity? How do images mediate power, or sounds mediate resistance? How does computation mediate agency, or networks mediate thought? But also, how do nations mediate globalization, or oil mediate energy? And how do bodies mediate liveness, or the environment mediate history? Moves from particular media forms and examples (language, literature, the fine and performing arts, audiovisual media, computational media) to focus on key theoretical concepts and debates of critical theory from twentieth and twenty-first centuries. Crosses national boundaries to understand mediation from global perspective.

LIT333 - Bad Behavior

Course Description

What does it mean to behave badly? How is 'bad behavior' distinguished from actions that are otherwise described as evil or criminal? This course addresses these questions by examining ideas of deviance, wrongdoing, and misconduct in the nineteenth, twentieth, and twenty-first centuries—that is, modern behavioral categories that are considered to be aberrant without necessarily being strictly defined as transgressions of the law. We will consider how bad behavior concerns the disruption of implicit social norms rather than the explicit violation of legal or moral codes.

LIT337S - Don Quixote for Beginners

Course Description

This course introduces students to the overlapping realities and worlds that the novel encompasses to explore, through don Quixote's knightly ambitions of justice, love, and freedom, the similarities, and differences we see between ourselves and others, in a changing world where chivalry ideals, popular culture, history, and uprooted lives, and early capitalism dialogue to each other. Multiple characters raise questions about escapism, social justice, borders, and exile linking the present and the past.

LIT339 - El cine político en América Latina

Course Description

Examines question of political cinema through Latin American works from 1960s to present, including examples from 'New Latin American Cinema', with special focus on Brazil and Cuba. Emblematic films, manifestos and critical texts will define and contextualize alternate conceptions of 'political' cinema. Examination of modes of production and distribution of 'guerrilla' films; politics of film language inspiring experimentation of avant-garde aesthetics in fictional and documentary works; relationship between cinema and political memory; politics of gender, race, and sexual orientation; representations of social problems, including contemporary blockbuster thrillers. Conducted in Spanish.

LIT341S - Perspectives on the Amazon

Course Description

The Amazon has been a source of awe to outsiders at least since the first Europeans navigated the Amazon River in 1542. While early explorers searched the forest for a mythic city of gold, contemporary travelers, scientists, and concerned citizens look to the Amazon as the key to our endangered future.

Focusing on a variety of textual and visual representations, we will deal with major themes in the history of the Amazon and consider the ways in which this vast and widely depicted region eludes representation, holding entirely different and contending meanings to distinct socio-cultural groups. Our sources include works by indigenous thinkers and cultural producers.

LIT342A - Dante and the Art of Hell

Course Description

Dante's Divine Comedy, has inspired medieval illuminations, Renaissance frescoes, Surrealist paintings, and modern sculptures. This course explores this remarkable visual history to interpret Dante's poem. What new features of Dante's world do these visual adaptations bring into focus? Visiting sites throughout Italy, we will also aim to reconstruct Dante's visual and built environment to understand what is distinctive about his vision. Taught in English. Offered through Duke in Venice and Duke in Bologna programs.

LIT343 - African Americans, Mass Incarceration and Citizenship

Course Description

Explores in depth the presence of African Americans within the phenomenon of U.S. mass incarceration and its implications for notions of citizenship. Surveys the history of prison build-up resulting from legislation and policy over the past forty years including the governmental discussions of drug policy and welfare reform that disproportionately affected African Americans. Course will explore definitions of citizenship and the means by which African American citizens were and are both included in and excluded from participation in the movement toward mass incarceration as part of their changing position in the U.S. polity.

LIT346S - The End of One's World: Facing Geopolitical Collapse

Course Description

How do ordinary people navigate the sudden collapse of a political regime? What is it like to wake up in a non-existent country? This course explores the profound, often painful and disorienting, personal and collective experiences of individuals living through seismic geopolitical transformations across the globe with a primary focus on the Eastern Bloc. Engaging with texts that blend personal testimony with historical reflection, this course invites students to critically consider how art and storytelling illuminate the human dimensions of political collapse and the enduring search for meaning in radically transformed worlds.

LIT355S - Black Feminism and Fashion

Course Description

Black feminist perspectives on clothing and fashion. Explores traditions in which Black artists and writers make clothing a primary theme. Presenting photographic, painted, and literary portrayals by and of Black people across the diaspora, and bringing together the study of visual culture, material culture, and literary studies, reveals fashion and clothing as aesthetic practices of everyday life that defy the objectifying effects of racism and sexism. Engages with scholarship that explores slavery's and colonialism's impact on gender and sexuality and examines how artists and writers work within and against those impacts to document the self-fashioning in Black cultural life.

LIT357S - Gender, Trauma and the Politics of Memory

Course Description

What can we learn about war when we listen to the voices of women who lived through it? This course dives into the often-overlooked stories of women who lived through political violence—not just as survivors but also as soldiers, mothers, and witnesses. Through personal accounts and literary narratives from the twentieth and twenty-first centuries, we will examine how women's stories challenge traditional, male-centered understandings of war. This course invites students to critically engage with the intersection of gender, politics, and memory, exploring how women's stories reshape perspectives on war and violence.

LIT359S - Peasants in Russian Revolutionary and Counter-Revolutionary Thought and Literature

Course Description

This course offers a history of Russian social thought through the lens of literary representation. It focuses on the analysis and interpretation of creative texts in the context of debates about the peasantry as a force of change or stasis. Bringing together history and literature, this course engages cross-cultural inquiry on several levels. Familiarizing students with Russia's political and cultural past, it also introduces them to the cultural differences of class in one of the most hotly debated contexts for the topic: pre-revolutionary Russia. Students are asked to analyze literature while also learning of its historical background. Taught in English.

LIT362D - What Is Beauty?

Course Description

Exploration of Western theories of beauty from Plato to the present. What do we mean when we call something beautiful? Does beauty belong to an object or an observer's mind? Is art or nature the best example of beauty? The class also examines the intertwining of modern theories of beauty with theories of race; analyzes the gender and power dynamics of theories of beauty; and asks about the relationship of aesthetics to society, politics, and biology. Readings include authors such as Plato, Burke, G.E. Lessing, Kant, Schiller, Charles Darwin, George Eliot, Nietzsche, W.E.B. DuBois, Arthur Danto, Elaine Scarry, Alice Walker, and Semir Zeki. LIT383S - Breakdown: Madness, Self, Fiction

Course Description

Study of madness, mental illness, and psychological distress as experienced and accounted for from literary and philosophical perspectives. How should an individual's declaration of spiritual health or illness be understood? What critical tools can literature bring to the study of the soul's suffering? Focus on testimonies of mental strife in a transnational/historical frame. Literary selections range from romanticism and realism to high modernism and contemporary neurofiction.

LIT385 - Mafia at the Movies

Course Description

A study of the mafia, and by extension, of Italy's 'dark heart,' in its historical, social, economic, cultural, and political dimensions, as represented in a wide range of Italian and American films and television productions, from documentary to comedy. Course will also consider possibilities and limits inherent to cinema in representing, and influencing cultural and social realities. Taught in English, Italian majors and minors should inquire with the professor about the possibility of concurrently enrolling in a tutorial for credit towards the language requirement for the major or minor.

LIT386S - Mapping Jewish Modernism

Course Description

Students research Jewish modernism through questions of geography and movement, pointing to the many places where modern Jewish art has been created and the experiences of migration, exile, diaspora, and resettlement that shaped this work. We discuss the varieties of ways that different art forms, including literature, theater, music, art, film, architecture, and dance, can be mapped. We analyze mapping in terms of the movements of people (artists, authors, and directors), of objects (paintings, literature, performances, and films), and within the works themselves. Work with the Rubenstein Library will lead to projects that contribute to an exhibit in Perkins Library and a digital site.

LIT387 - Moral Panics, Spectacle, and Everyday Life: Social Anxieties and Minorities

Course Description

Moral panic refers to the way a social order becomes hyper aware of activities of groups, objects, or circumstances posing a menace to accepted values. Course explores how everyday life is managed, intensified, and altered by moral panics' spectacle. Sexual deviance, drugs, popular culture, disease, witch hunts, gender fears, etc., are not only creations of pre-existing fears, they make various kinds of sense in specific moments. They are how people recognize themselves and new challenges to that self. From those challenges they try to police others; they are public consensus-building events and the means by which we identity our fears and desires.

LIT388S - Expanded Cinema

Course Description

This project-based course explores moving image installations beyond the traditional movie theater, engaging with alternative venues such as public spaces, museums, and gallery environments. Students will study key works and theories from the history of moving image art, from early cinematic devices to the Expanded Cinema movement of the 1970s, and up to contemporary new media practices, through both research and hands-on creation. Throughout the course, students will design and produce their own moving image installation projects culminating in a final exhibition.

LIT418S - Art & Democracy: Madrid/Barcelona/Valencia/Bilbao

Course Description

Beyond the poster, mural and graffiti, was there a painterly art in the pre-digital age that found a fitting place on the street and the square, the citizen venues where direct democracy and the people's rights first emerged? Is there an ethically responsive and socially responsible praxis which may yield visual works of enduring value without sacrificing the humanistic imperative of communicability? Since the 1950s such questions concerned Spanish artists in all styles (Tapiés, Genoves, Ibarrola, Equipo Cronica). Like Goya before them, these painters tried to help their society transition from political tyranny to more inclusive forms of participation. Prerequisite: Advanced reading knowledge of Spanish.

LIT420 - Biography, Life Writing, Autofiction

Course Description

History and art of the life story, examining biography as it drives research and contemporary writing. From Montaigne to Rousseau, the biopic to the lives of troubadours, we will study modes, media and social functions: portrait, caricature, meditation, fragments, selfies. The subjects: famous or anonymous people; those who are not human, landscapes, the sea—even inanimate objects. The accounts of radical change or metamorphosis, personal epiphanies, self-conscious reflection. The aims of depicting lives as they unfold. Texts include Foucault, Augustine, Flora Tristan, Pascal, Ferraroun. Critical readings will be coupled with creative work culminating in a research project around your life.

LIT426S - France-Asia: Cultural Transfers and Translations in a Globalized Context

Course Description

This class explores the dynamic contemporary Franco-Asian dialogue with a specific focus on China, Japan, Vietnam, Laos and Cambodia. Seeking to go beyond the East-West divide, the seminar investigates the current stakes of this dialogue, given its growing complexity after 1945. It examines the postcolonial legacy of France's occupation of Indochina, and how East Asia has also often been viewed as an 'Other,' serving to crystallize French anxieties over political and cultural power. It uses an interdisciplinary perspective encompassing novels, cinema, dance, visual arts, and critical theory to trace a web of exchanges in a globalized context. Taught in French.

LIT428S - Reading Contemporary Literature in French for the 'Choix Goncourt' Prize

Course Description

Why read literature today? And how do we talk about what we read? This seminar offers a unique opportunity to participate in the Choix Goncourt Prize in the U.S, and learn how to be a literary critic. Students will engage in dialogue with contemporary authors, acquire theoretical and critical literary tools, and learn the best practices of being part of a selecting literary committee. It is intended for those who want to deepen their knowledge of literature and culture, sharpen their critical spirit, and improve their skills in reading and writing French. One student will be designated as delegate and travel to NYC to attend the Prize ceremony at the Albertine bookshop. Taught in French.

LIT442S - Jorge Luis Borges and Literary Representation in the Contemporary World

Course Description

This course examines the literary works by Argentinean author Jorge Luis Borges, considered one of the most important and influential writers of the 20th century. While early interpretations of Borges' work emphasized its aestheticism and the philosophical nature of his literary practice, more recent critics focus on its dialogue with a tradition of ethical and political thought dealing with issues of justice and the law, political representation and theology. We will read major works by Borges, as well as other major literary works from Argentina, representative works from 'high modernism', among others. Prerequisite: Spanish 333 or above, or instructor consent.

LIT460S - Weil, Beauvoir, Murdoch: Three Women Philosophers in Mid-Twentieth Century Europe

Course Description

Simone Weil (1909-44), Simone de Beauvoir (1908-86), and Iris Murdoch (1919-99) are towering figures in the history of European philosophy. Yet they have all, in different ways, become somewhat marginal to the philosophical mainstream. All three wrote on ethics. Weil wrote on labor, society, affliction, and grace. Beauvoir wrote novels, memoirs, and *The Second Sex*, a groundbreaking feminist analysis of women's situation. Inspired by Weil, Murdoch wrote about attention and the good and became one of the UK's leading novelists. The course will introduce students to their writing across genres, and situate their work about their respective national traditions.

LIT483 - What Machiavelli Really Says

Course Description

Everyone knows what 'Machiavellian' means, but what does Machiavelli really say? Reading his classical political texts, 'The Prince,' the 'Discourses on Livy,' and 'The Art of War' in the company of his literary works, including 'Mandragola,' we will examine how Machiavelli's ideas about power, deception, language, ethics, and representation emerged from his reading of Plato, Livy, Ovid, and Dante, while also exploring the reception and consequences of his ideas. Just as Machiavelli searched history for answers to his own political situation, our guiding question cannot help but be 'What would Machiavelli do?'

LSGS209 - Intermediate Spanish for Heritage Learners

Course Description

This course is the first of a two-course sequence for heritage Spanish learners. It aims to reconnect students with their linguistic and cultural heritage to further them through meaningful experiences. Activities in this course empower heritage learners to apply their bilingual/bicultural knowledge in academic and professional settings. Students have the opportunity to a) discuss topics relevant to their interests, use presentational skills to write and talk about them b) conduct sociolinguistic research, develop critical and integrative thinking skills in Spanish, and c) gain skills required to work professionally in a Spanish-speaking environment. Instructor consent required.

LSGS222 - History of Latinxs in the United States

Course Description

This introductory course will cover the social, cultural, and political histories of Latino/as in the United States from 1848 to the present including the Treaty of Guadalupe Hidalgo, the Great Depression, WWI/WWII, the creation of Latino/a civil rights organizations, and the civil wars and free trade agreements of the 1980s and 1990s that have spurred so much of contemporary migration. Themes include colonialism and conquest, sexuality and gender, race and ethnicity, transnationalism and migration, social inequality and practices of resistance. This class will highlight the diversity of the Latino/a experience—focusing on the history of Afro-Latino/as, queer Latino/as, and undocumented Latino/as.

LSGS235S - Selena: Music, Media, and the Mexican American Experience

Course Description

How did singer Selena Quintanilla impact the world and why does she remain as such an important cultural fixture for Mexican-American communities? This class explores the life, music, and legacy of Selena Quintanilla. We will discuss how Selena used music to navigate a complex Mexican-American identity. Focusing on intersectional feminism, sexuality, iconicity, and fandom, we will learn about Selena's music throughout the years and consider how these themes are interpreted and complicated across borders. Course materials engage readings from pop music studies, gender, sexuality, and feminist studies, Latinx studies and include a range of films, audio recordings, and podcasts.

LSGS305 - Advanced Spanish for Heritage Learners

Course Description

This course is designed for heritage or bilingual students who grew up speaking Spanish at home, but have been educated almost exclusively in English. Together we will explore, reflect, and express opinions about topics that affect the diverse Latino communities in the United States such as: identity, bilingual education, immigration, health and human rights issues. Through reading current news and literary works, and listening and watching audiovisual media, students will develop the ability to read and write in Spanish in formal contexts, and also comprehend and compare the diversity and commonality of their Hispanic heritage.

LSGS316 - Sociology of Racism in America

Course Description

Examines social history of major racial groups in the US and relationships to contemporary standing. Discusses central concepts sociologists use to analyze racial matters. Central theme: 'racism' is not mere 'prejudice,' 'ignorance,' or 'intolerance,' but a comprehensive historical system of racial domination organized around the logic of white supremacy. Discussion of 'whiteness' in the USA—how whiteness emerged as a social category, an identity based on experiences of variety of European 'peoples;' how it dominated the racial structure of the US since the 17th century, how wealth has been distributed along racial lines, racialization of Asians and Latinos, and color blind racism.

LSGS350 - Brains, Everywhere

Course Description

Over the last three decades we have witnessed the speedy rise of the 'neurosciences,' an historical event characterized by some 'neuro-cultures' and 'neuro-subjects.' In this course we will track this history and ask what change in meaning might 'neuro' effect in the disciplines that were previously 'neuro'-free. If there is a neuro-turn in the humanities and social sciences, what is it that's 'turning'? We will consider the centrality of brain research in these discussions to ask questions about the meaning of 'personhood/subjectivity,' 'human/post human,' 'mind/body,' 'self/ego,' and 'emotion/affect.'

LSGS365S - Latino/a Popular Culture

Course Description

Examines connections between US Latina/o and Latin American populations mediated by contemporary popular culture and the world of the commodity. Explores sociocultural and political issues in US national culture, the ways US Latina/o cultures dialogue across the Americas, and how Latina, Latino, LatinX, and Latin American bodies inhabit particular cultural and geographic contexts. Addresses how popular cultural forms are developed, contested, or resolved vis-à-vis issues of difference, multicultural inclusiveness, domestic history, narratives of exile and migration. Materials covered include films, documentaries, television shows, art, advertising, comic strips, food fusions, music.

LSGS366S - Latinx Social Movements

Course Description

Over the course of the twentieth-century various Latino/a groups have mobilized their growing power to make demands for social justice and equality. This course will study the history of Latino/a organizing from the 1940s to the contemporary moment. Some of the groups we will examine include: the Chicano movement, the Young Lords Party, Chicana feminists, Third World Women's Alliance, DREAMers, resistance to Arizona's SB1070, and UndocuQueer. We will look at the history of political organizations, community formation, identity development, and movement ideology.

LSGS425S - Cuzco: Local and Imperial

Course Description

Cuzco is a city in the Andes with a rich past that not only originates with the prominence of the Inca Empire, but also with its closeness to Aymara and Amazonian cultures. Its archeological record and history together with the prevalence of Quechua, Aymara and Spanish are tied to the city's pre-Columbian, colonial and contemporary cultural practices. The question that we will work through by engaging with readings and visual material is how a space or place—a city—creates its history and significance with the passage of time.

LSGS437S - Race & Conservatism in the Twentieth Century U.S.

Course Description

This course looks at the history of race and modern conservatism in the United States. Students will learn about the history of conservative leaders, politicians, and grassroots activists starting in the civil rights era and ending with the January 6th insurrection. This class focuses on how the Republican Party, and conservatives more broadly, have dealt with questions of race in this period. Students will look at a multiracial conservative history that includes the voices of non-white members of the GOP and conservative movements. Students will spend a significant amount of time in the course researching and writing original historical papers connected to the themes of the course.

LSGS438SA - Global Madrid

Course Description

Focusing on Madrid's porous LatinX landscape, this course draws comparative perspectives across countries and cultures. Madrid's demographic growth, at least since the late-1980s, includes migrants from Bolivia, Colombia, the Dominican Republic, Ecuador, Honduras, Paraguay, Peru, and Venezuela. Rather than drawing clear-cut 'authenticating' distinctions between LatinX and 'the rest,' this seminar places Latin and X—LatinX—in dialogue with the Iberian Peninsula and Spanish-speaking 'communities' alongside sociocultural imaginaries that enmesh Spaniards, Latin Americans, Latino/a/Xs, and beyond. Taught at Duke in Madrid.

LSGS439S - Global Spain

Course Description

This Duke in Spain course draws from comparative perspectives across countries and cultures. It links Madrid's socio-cultural turning points vis-à-vis national and international migration to other geographies where Spanish is spoken. Forming a nexus with broader Spanish-language mobile circuits—as evinced, for example, through U.S. Latino/a/x populations—this seminar explores the Spanish capital as a global urban epicenter and primary destination site for migrants from Africa, the Americas, Europe, and Asia. MARSCI201 - The Future of the Oceans: From Science to Policy

Course Description
The ocean covers two-thirds of the planet, forming the backbone of healthy ecosystems and many growing economies worldwide. Despite this importance, we know far less about the oceans than terrestrial environments. This course provides an overview of why the oceans matter, including the many ways people use and depend on the oceans. We will discuss the major issues that threaten our oceans, and students will explore emerging solutions to these challenges of changing ocean use using market-based, scientific, and policy approaches. Course will include an optional weekend field trip to the Duke Marine Lab in Beaufort.

MARSCI202 - Marine Biology and Ecology: Fantastic Sea Creatures and Where to Find Them

Course Description

Broad foundational knowledge of marine biology with an emphasis on ecology and evolution of marine organisms. Core areas include biodiversity, adaptations to marine environments, population & community ecology, ecosystem processes and services, and human forcing in marine systems. Survey of biodiversity in marine systems spanning microbes to marine mammals, emphasizing taxonomy, habitats and evolutionary history. Explore how marine communities interact with the physical environment to generate ecosystems and accompanying services spanning coastal/estuarine, blue water, and the deep sea. Examine population dynamics, population interactions and the consequences of those interactions.

MARSCI203 - Marine Social Science

Course Description

Efforts to understand, predict, or manage change in marine systems often fail due to an underappreciation of the tightly coupled relationship between people and the oceans. Correspondingly, identifying sustainable and just solutions to today's major ocean challenges requires an understanding of the values, processes, and systems that shape ocean connections and uses. Through the eyes of social scientists from various disciplines, this course will introduce students to the concepts and approaches social scientists use to understand major ocean sustainability problems (e.g. climate change, food production) and identify sustainable and just solutions to address them.

MARSCI303SA - Ocean Justice

Course Description

This course will focus on issues of environmental justice that pertain to the oceans across multiple scales. Introduction to diverse perspectives how people around the world think about the oceans as potential source of resources & as important social and historical spaces. We will critically evaluate what those perspectives mean for conceptualizing environmental justice in and around oceans. We will evaluate ocean-related justice concerns posed by timely issues like global biodiversity negotiations, sea level rise/disasters, the blue economy, fisheries/aquaculture, and marine protected areas. Students will conduct a specific ocean case study to understand the potential justice implications. Taught in Beaufort at the Duke Marine Lab.

MARSCI304SLA - Evolutionary and Ecological Genetics/Genomics of Marine Mammals

Course Description

Current sequencing technologies have revolutionized the fields of molecular, evolutionary, and ecological genetics. The ability to generate an entire genome worth of sequence data in a single instrument run allows us to study whole genomes in a variety of non-model organisms. We will use the genomes of marine mammals to explore the field of genomics. We will begin with basic genomics (i.e. Genome-101), sequencing technologies and bioinformatics, and explore conservation, ecological and evolutionary genetics of marine mammals using literature and publicly available datasets. Biology 201L is recommended but not required. Offered at the Duke University Marine Lab in Beaufort.

MARSCI309A - Oceans in Human and Environmental Health

Course Description

Focus on the concept of 'One Health' that the health of the environment and the people who live in it are linked. The basis (from a biological perspective) of threats facing the marine environment and interactions between environmental and human health and their role in global health disparities. For example, in discussing fisheries and aquaculture, the course will cover environmental impacts of these extractive industries and their importance in human and societal well-being. This course will embrace immersive field experiences in North Carolina that will contextualize classroom learning and develop connections with practitioners and residents. Taught in Beaufort at Duke Marine Lab.

MARSCI319A - Aquaculture and the Environment

Course Description

The major environmental, social and economic drivers of increasing global aquaculture, with a focus on marine systems. Quantitative evaluation and comparison of the range of species for aquaculture, locations where operations occur, operational aspects including environmental impacts and management considerations. Investigation of alternative approaches and potential future areas for aquaculture expansion as well as social, economic and technical barriers to implementation. Taught in Beaufort at Duke Marine Lab.

MARSCI321A - Coastal Watershed Management and Restoration

Course Description

This course will examine management of coastal watersheds and their biological function, focusing on the positive (restoration) and negative (degradation, eutrophication) ways that humans alter ecosystems. Local field trips are an integral part of this class to examine anthropogenic modifications to coastal ecosystems (e.g. farms, wetland restoration) as well as discussing these issues with stakeholders at NGOs, businesses and government. Taught at the Duke Marine Lab in Beaufort.

MARSCI323A - Offshore Renewable Energy & Wildlife Conservation

Course Description

Offshore renewable energy development requires unique considerations as an oceanic venture. Offshore renewable energy (wind and hydrokinetic) operation requires unique strategic preparation and considerations. This course will take a holistic approach to evaluating offshore renewable energy development: benefits and challenges of traditional vs. renewable offshore energy including concerns for wildlife (ocean noise generated by industrial activity, ship strikes, and a range of potential habitat changes); development of environmental impact statements; permitting processes; consultations with industry, government and other stakeholders; and legal implications. Taught in Beaufort.

MARSCI337A - Ecology and Physiology of Extreme Marine Ecosystems

Course Description

An exploration of the ecology of extreme marine ecosystems and the physiology behind the adaptations that allow inhabitants to survive and often thrive there. Marine ecosystems with extreme temperature, pressure, salinity, oxygenation, light, nutrient load, natural chemicals, and anthropogenic pollution will be discussed including polar seas, multiple deep sea and chemosynthetic ecosystems, oligotrophic gyres, oil spills, and superfund sites. Students will gain an understanding how these organisms and ecosystems function, their ecosystem services, threats by a changing ocean, and conservation challenges via lectures, discussions, videos, and primary literature. Taught in Beaufort at the Duke Marine Lab.

MARSCI369LA - Biological Oceanography

Course Description

Discusses patterns of abundance, diversity and activity of organisms in major ocean ecosystems. Identifies major physical, chemical and ecological processes that affect these patterns, and analyzes impact of biology on ecosystems. Uses a 'flipped' classroom for enhanced development of quantitative skills to measure these patterns, emphasizing hands-on data collection and analyses, multiple field trips aboard DUML research vessels, and participatory activities to demonstrate core concepts in biological oceanography. Taught at Duke Marine Lab. Spring section requires travel. Recommended intro bio or AP Bio credit. Instructor consent required, visit DUML website for details.

MATH163FS - Mathematics of Data Science

Course Description

Introduction to the mathematics and algorithms that are central to a variety of data science applications. Basic mathematical concepts underlying popular data science algorithms will be introduced and students will write code implementing these algorithms. We will discuss the impact of these algorithms on society and ethical implications. Algorithms examined include: Google's pagerank, principal component analysis for visualizing high dimensional data, hidden Markov models for speech recognition, and classifiers detecting spam emails. Linear algebra and basic probability will be the mathematical focus and there will be a programming component to this class using the R programming language. Open only to students in the Focus Program. Department consent required.

MATH167CNS - Game Theory and Democracy

Course Description

What is democracy? When there are more than two options, this is an open question in the sense that philosophical notions of 'best' are not universally agreed upon. In this seminar, we will use mathematics and game theory to aid us in our discussion on the meaning of democracy and to examine the pros and cons of different approaches to this question. We will discuss preferential ballot elections (where each voter ranks all of the choices) and cover some of the most common vote counting methods used to determine a winner in a preferential ballot election. The seminar will also include an introduction to game theory, both for its own sake, as well as an essential tool for predicting how intelligent people with agendas behave given carefully defined rules.

MATH181 - Math Everywhere: Mathematical Concepts and Reasoning in our Modern World

Course Description

Mathematical concepts and reasoning, and their essential and exciting roles in our modern world. Topics include but not limited to: storage and communication of data, images, and music; social networks; evaluation of assessments based on statistics; design of visuals for video games and animated movies. Designed for students without college math but with interest in mathematical concepts important to modern applications. Six largely independent units, focused on building understanding and appreciation rather than development of mathematical techniques. Transfer credit not accepted as equivalent.

MATH185 - The Art of Proof

Course Description

This course is an introduction to mathematical proofs as a creative endeavor. The intended audience of this course are students who would not normally take Math 245. Students in the arts, humanities, life sciences, and social sciences are encouraged to enroll. Students will learn problem solving, abstraction, symbolic logic; proof by construction, induction, contradiction; and basic set theory, number theory, and combinatorics. The course will be highly interactive, with emphasis placed on group learning. Students will practice communicating mathematical and logical arguments in both written (using LaTeX) and oral (via board talk) forms.

MATH231 - An Algorithmic Introduction to Probability and its Applications

Course Description

Probabilistic concepts and modeling introduced and explored through developing and implementing computational algorithms. Topics include Probability models, random variables with discrete and continuous distributions, independence, joint distributions, conditional distributions including binomial, multinomial, Gaussian, Poisson. Expectations, functions of random variables, central limit theorem, Poisson Limit theorem, Order Statistics, Bayes' formula, and Markov Chains. Many examples will drawn from algorithms used in modeling and data science. Requires ability to write basic computer programs. Recommended pre/corequisite: Mathematics 218 or 221. Not open to students who have taken Mathematics 228L, 230, or 340, Statistics 230, 231, or 240L.

MATH232S - Math, Ethics, and Society**Course Description**

Today, more than any time in history, mathematics builds and maintains the engines of power. What does it mean to use math ethically? Who should math benefit, and how does math culture, research, and education impact the world in which we live? We examine these questions through case studies covering a range of topics, including cryptography, algorithmically generated knowledge, AI, math education, and the underlying culture of mathematics. Students will learn through a combination of readings, discussions, group activities, and an open-ended cumulative project dealing with the interactions between math and community. Prerequisites: MATH 21, 105L, 111L, or 121.

MATH238L - Fundamentals of Data Analysis and Decision Science**Course Description**

This course provides a mathematically rigorous and broad foundation for key concepts in probability and statistics, as well as the application of probability and statistics to the mathematical modeling of non-deterministic systems. The main motivation of the course is to show how these concepts are fundamental to a variety of current data analysis techniques, and to demonstrate applications of these techniques in situations relevant to all engineering majors. Prerequisite: (Mathematics 216, 218, or 221) and (Engineering 103L, Computer Science 101L, Computer Science 201, or Mathematics 218L.)

MATH240 - Introduction to Applied Mathematics: Modeling, Equations and Proofs**Course Description**

The course will consist of 3 or 4 concrete applications, for which precise mathematical questions will be formulated, and a mathematical framework developed that will make it possible to answer these questions. In doing so, we will encounter and explore portions of real analysis, probability, linear algebra, convex analysis, information theory and maybe others. We will also learn how to construct watertight mathematical arguments, and explore different proof techniques. Prerequisites: none, beyond high school calculus.

MATH248S - Formalization of Mathematics: Seminar on the proof assistant Lean

Course Description

The Curry-Howard correspondence between types/programs (in computer science) and propositions/proofs (in mathematics) has led to the development of software - known as 'proof assistants' or 'interactive theorem provers' - that are used to formalize mathematics. This seminar is an introduction to the proof assistant Lean. Students will learn to formalize mathematics in Lean, including: implementation of definitions, encoding propositions, using tactics, and developing mathematics formally. Recommended prerequisite: one of Math 221, 242, or 245 (minimum grade of B suggested for success in this course), or an equivalent rigorous, proof-based mathematics course, and CompSci 101 or equivalent, or by instructor consent.

Grading Basis

MATH260 - Python Programming in Mathematics

Course Description

Introductory programming course in Python providing a foundational background for programming in a mathematical setting. Students will learn the basics of object orientated programming: memory storage and variable scoping, recursion, objects and classes, and basic data structures. A variety of numerical methods will be introduced, with a focus on their practical implementation, through a series of practice modules covering subjects that may include: linear algebra, machine learning, operations research, and genetics. Recommended prerequisite: linear algebra (Mathematics 216, 218, or 221). No programming background is required. Not open to students who have taken Computer Science 201.

MATH270 - Biological Clocks: How Organisms Keep Time

Course Description

From sleep/wake cycles to flower openings to cell division and malaria infections, all organisms and cells display rhythmic behaviors. The course will focus on genetic and molecular networks that comprise clocks regulating cell division and circadian rhythms. Quantitative aspects of clock networks will be examined from the perspective of data analysis and dynamical systems models. Class will include lectures, primary literature readings, and in-class projects. Previously offered as Math 183. Recommended prerequisite: Math 112L or equivalent, and Biology 20, 21, 201L, or 203L.

MATH282S - Mathematical and interdisciplinary modeling seminar

Course Description

Introduction to mathematical techniques and their applications to real world problems. Class meetings will start with an introduction to a mathematical tool (and often its implementation), with the remainder of the class devoted to working in teams on modeling strategies for a given problem. Practice problems will be drawn from the COMAP Mathematical or Interdisciplinary Contest for Modeling, and students may have the opportunity to participate in the contest in February. Students will learn about a range of tools useful for modeling and write reports describing models and results. Prerequisite: Math 111 (or 121) and 112 (or 122). Some programming experience is useful but not required.

MATH363 - Introduction to Quantum Information Science

Course Description

This course introduces the basic concepts of Quantum Information Science (QIS). First, we begin by introducing the principles of quantum theory from an QIS perspective. Specifically, we discuss the notion of qubits (quantum bits) and explain concepts such as states, measurements, and time evolution in terms of these systems. As we explore the fundamental concepts of quantum theory, we also examine their implications in QIS. Additionally, we cover various topics in QIS, including Quantum Cryptography, Quantum Communications, Quantum Algorithms, and Quantum Error Correction.

ME336L - Fluid Mechanics

Course Description

An introductory course emphasizing the application of the principles of conservation of mass, momentum, and energy in a fluid system. Physical properties of fluids, dimensional analysis and similitude, viscous effects and integral boundary layer theory, subsonic and supersonic flows, normal shockwaves. Selected laboratory work. Prerequisites: Engineering 244L and Mechanical Engineering 331L, Co-requisite or prerequisite: Mathematics 353.

Grading Basis

Graded

Course Typically Offered

Fall and/or Spring

Units**Min Units:**

1

Max Units:

1

ME344L - Control of Dynamic Systems

Course Description

Model dynamic systems, characterize time and frequency domain response with respect to particular inputs. Characterize systems in terms of rise-time, settling-time, bandwidth. Identify the difference between stable and unstable system. Apply feedback control to modify response of dynamic systems. Develop methods of designing compensators for single-input, single-output, and multiple-input, multiple-output dynamic systems. Introduces optimal control theory, the linear quadratic regulator problem, the linear quadratic Gaussian problem. Gain a physical understanding of role of feedback control in modifying the dynamics of a system. Prerequisite: (Engineering 224L or ECE 280L) and Mathematics 216. Not open to students who have taken ECE 382.

ME412 - Modern Materials

Course Description

Modern Materials will examine the underlying molecular details that give materials their specific properties. The course will emphasize polymers, photovoltaics, magnetic materials, and biocompatible ceramics. Each module will begin with an overview of applications, economics, and history of the material. Starting with the standard characterization methods for each material, we will work towards an understanding of the fundamental physics and chemistry that leads to the unique properties of each material. The course will draw upon fundamental concepts in materials science, chemistry, physics, and calculus.

ME438 - Constructal Theory and Design

Course Description

Flow configuration in nature and engineering emerges from the constructal law of increase of flow access in time, when the flow system is endowed with freedom to morph. The course brings together the basic principles of fluid mechanics, heat transfer and thermodynamics, and teaches how to generate (to 'discover') shape and structure for energy flow systems. The course teaches design as science, and presents a paradigm that is applicable across the board, from engineering to biology, geophysics and social dynamics.

Grading Basis

Graded

Course Typically Offered

Spring Only

Units**Min Units:**

1

Max Units:

1

ME442 - Introduction to Robotics and Automation

Course Description

Fundamental notions in robotics, basic configurations of manipulator arm design, coordinate transformations, control functions, and robot programming. Applications of artificial intelligence, machine vision, force/torque, touch and other sensory subsystems. Design for automatic assembly concepts, tools, and techniques. Application of automated and robotic assembly costs, benefits, and economic justification. Selected laboratory and programming assignments. Prerequisites: ECE 280L or EGR 224L.

1

Crosslisted Courses

ECE383 INTRO ROBOTICS/AUTOMATION

ME461 - Energy Engineering and the Environment

Course Description

Efficiencies of both new and established energy sources and conversion methods. Evaluation of alternative energy technologies by statistical information and by modeling using principals of fluid mechanics, thermodynamics and heat transfer. Electricity generation by fossil fuels, nuclear, solar, wind and hydro. Space heating and cooling by traditional methods and by solar. Transportation energy in automobiles, mass transit and freight. Environmental consequences of energy choices on local, national and global scales, including toxic emissions, greenhouse gases and resource depletion. Prerequisite: Mechanical Engineering 331L Thermodynamics.

Grading Basis

Graded

Course Typically Offered

Occasionally

Units**Min Units:**

1

Max Units:

1

ME472 - Aircraft Performance

Course Description

Brief overview of the aerodynamics of wings and bodies including profile and induced drag, performance of propellers and internal combustion and gas turbine power plants; the power curve and implications on the performance of the aircraft in steady-state and accelerated flight included power required, airspeeds to fly, takeoff and landing performance, performance of aircraft in turning flight; introduction to the conceptual design of new aircraft. Co-requisite: Mechanical Engineering 336L.

Grading Basis

Graded

Units**Min Units:**

1

Max Units:

1

ME473 - Aerospace Structures

Course Description

A rigorous course covering the analysis of aerospace structures. Basic elasticity, the stiffness method, plate and box-like structures, buckling, vibrations, loads, materials, design. Some project work and use of software. Prerequisite: EGR 201L, EGR 244L, Math 216. Use of Sakai. Text: Megson, 'Aircraft Structures', Elsevier, 2012.

Grading Basis

Graded

Units**Min Units:**

1

Max Units:

MEDREN105 - Old Worlds/New Histories, 500-1500 CE

Course Description

New approaches to history of the world from ca. 500 to 1500 CE. Examines the world before European hegemony. Topics may include nature of autonomous centers of production around the globe; characteristics of trade, empire, science, technology, and high culture across Asia, the Middle East, Africa and the Americas; diffusion of inventions, ideas, cultures and religions through travel, trade, state and empire building. Readings and films explore diverse cosmopolitan worlds before the coming of modernity.

MEDREN135 - Silk Roads and China, Ancient and Medieval Transformations

Course Description

The Silk Roads are the oldest and longest routes of cultural communication and economic exchange connecting Asia, Europe and Africa. In use since the days of Alexander the Great, the Roads and its rail networks now extend from China to England, connecting 70 countries and forming a vital system. This course introduces the ancient to early modern histories, cultures, and religions of the Silk Roads anchored in four themes: Alexander's empire; life in medieval cities of Chang'an, Baghdad and Constantinople; Silk Roads religions and the interactions of Buddhism, Christianity, Judaism and Islam; and the Mongol empire visited through the travels of Marco Polo.

MEDREN145S - Gateway Seminar: Disease in History

Course Description

Using primary sources students will explore the impact, management and changing definitions of disease in various pre-modern societies. We look at disease in the context of encounters, environmental change and state formation between 100 and 1700CE. Not just understood as a biological phenomenon, disease can also work as signifying system, creating status hierarchies and highlighting particular social and political anxieties. Through the study of five or six historical epidemics, students will learn how to create historical resources out of medical sources.

Fantasy as a genre has captured the attention of artists, writers, musicians, filmmakers, and videogame developers. Students will read, view, and play different fantasy narratives from ancient mythology to the Middle Ages, the 19th Century, and finally modern mediums. Focusing on themes of power, identity, and othering, students will explore how the mercurial genre of fantasy shifts through time and medium while commenting on the political and cultural world in which it originates. Taught in English.

MEDREN175 - Scripture: Judaism, Christianity, and Islam**Course Description**

Judaism, Christianity, and Islam are characterized as religions of the book. Their sacred texts are foundational to the faiths they represent. In spite of shared histories, overlapping contents, and parallel perspectives, their Sacred Scriptures diverge in key points of content, interpretation, and uses by their communities. In this course, students will be introduced to the history, contours, and content of the Hebrew Bible/Old Testament, the New Testament, and the Qur'an and hadith, exploring issues of scripture and authority, texts and manuscripts, translation and interpretation, performance, canonicity, ethical issues, and contemporary use.

MEDREN191FS - Clash of Civilizations: In the Heart of Europe

Course Description

This course focuses on the battle between barbarian invaders, established communities, and new religions in the Middle Ages. What became Spain and Portugal were battlegrounds between faiths old and new, a clash of civilizations between Christianity, Judaism, and Islam that would inform future global conflicts. We explore the history of this confrontation at the crossroad of civilizations—between East and West, Africa and Europe—and its effect on our worldview today. A common culture was forged in science, mathematics, music, literature, philosophy, and mysticism, a shared legacy shaping world history and the current world order. Part of the 'Geopolitics and Culture' Focus Cluster.

MEDREN217 - The Body in Art in Early Modern Europe: Power and Limits of Corporeal Representations

Course Description

This course studies the artistic representations of the human body in many guises: aesthetic, political, social, cultural, and erotic. It analyses the different strategies artists deployed to develop rhetorics of the body both physical and emotional. It considers different media (including painting, sculpture, drawings, prints, architecture, and gardens) and major theoretical frameworks (including feminist theory, phenomenology, social theory and somaesthetics). This course considers the body dynamically through composition, as object of investigation, as locus of meaning and through social understanding. Lectures and discussions are complimented by corporeal performances and improvisations.

MEDREN226 - Medieval Castles of Europe

Course Description

This course will examine the transition of Western Europe into a fortified landscape from the mid-11th century until the advent of large-scale artillery in the mid-15th century. In addition to tracking technological and stylistic changes over time, this course will identify the discrete elements of fortification that were combined into a variety of castle plans. Natural resources and physical topography will emerge as central factors in the choice of site and design for medieval castles. As a way of investigating these topics, students will digitally reconstruct a historical or imagined castle in 3D graphics at a specific place and time covered in the course.

MEDREN240 - Drawing Foundations in Early Modern Europe

Course Description

Through classroom lectures, museum visits, and studio practice, this course studies the place of drawing since its early modern theorization in the visual arts and in the artistic practice. Drawings can be records of visual observation, or of a speculative thought process; ways of working out ideas, and of presenting plans; they also achieve the status of independent art objects. Students will gain familiarity with drawing as an artistic medium related to major questions about art and society, while also learning fundamental and practical drawing skills that will give deeper insights into theory.

MEDREN245S - Women in Visual Arts, 1400-1800: Theory and History

Course Description

Through lectures, discussion and individual projects, this course considers the roles women have played in the Early Modern art world as makers, buyers, patrons, donors, critics, and art collectors. It also takes up issues of gender, of race, of masculinity as well as femininity. A central theme of this class is how debates about the so-called Woman Question, which was essentially an ongoing quarrel about the nature and social role of women, shaped the representations and experiences of women of different classes and conditions. Our focus will be on visual representations, as well as period writing of and by women.

MEDREN248S - Women and Power in the Renaissance

Course Description

Explores the intellectual, social, and political history of women in Renaissance Europe. Despite the overwhelmingly patriarchal nature of early modern society, many women wrote treatises, dialogues, and poetry in which they argued for a broader role for women. Students will examine these primary texts (some by famous figures, others by much less well-known writers) within the context of a burgeoning social history that has provided a more nuanced view of gender relations and power in this period.

MEDREN250FS - Bio-Lit: The Science of Renaissance Sex and Gender

Course Description

What is a woman? What is a man? Did Renaissance minds consider other options? Could women be intellectuals? Were male bodies necessary for reproduction? What taboos about sex and power were almost too scandalous even for the elites? Much as it does today, talk of sex and gender sparked hot debate throughout Renaissance Europe. Between the fourteenth and seventeenth centuries, bodies were sites of fascination and dread. This course studies 'Bio-Lit' (literature about life and the body), drawing on examples of epic and lyric poetry, medical treatises, recipe books, experiment logs, cosmetic how-to guides, paintings, and early opera. MEDREN253S - Cross-Cultural Encounters

Course Description

The dynamics of cross-cultural interaction have actively shaped the world for many centuries now. This class explores some of the religious, social, and economic forces that fostered increasingly global contacts in history. In particular, it examines how centrally located and cosmopolitan Muslims played a critical role in connecting people of far-flung regions, cultures, and religions with one another. It surveys the myriad encounters of Muslims, Buddhists, Confucianists, Hindus, Jews, Christians and more across Afro-Eurasia and into the Americas. How did religious networks, processes and events foster historic exchanges of ideas, practices, and commodities across the world?

MEDREN294S - Art of Renaissance Politics

Course Description

This course examines the thought of three of the most influential political writers of the Renaissance: Machiavelli, Francesco Guicciardini, and Benvenuto Cellini. Their ideas shaped the formation of the early modern state. It examines the background to their ideas in Renaissance Florence and the crisis of the republican tradition leading to Medici rule. Readings focus on the original texts of these writers, including (but not limited to) Machiavelli's PRINCE, Guicciardini's MAXIMS AND REFLECTIONS, and Cellini's PERSEUS.

MEDREN304 - The Problem of Love in Western Literature

Course Description

Love causes problems. It can inspire passion or madness; foster alliances, destroy friendships, provoke war, broker peace. It impacts communities and raises fundamental questions about life. Exploring amorous discourse from two millennia –Plato's erotic ascent, Virgil's deceived Dido, Ovid's rules of seduction, Boccaccio's legitimization of female desire, Michelangelo's homoerotic poetry, Leonardo's sublimated impulses, Foscolo's tragic obsession, comic uncertainties of Svevo's modern lovers, and love from afar in Montale—we will see what changes, what persists, and ultimately come to understand what we mean when we talk about love today.

MEDREN353 - The Seven Deadly Sins: Representing Vice and Virtue in Christian Tradition

Course Description

This course will trace the motif of the seven deadly sins in Western tradition, exploring two methods of understanding human psychology and behavior: the philosophical school of virtue ethics, which provides an account of how our actions and habits shape our characters and identities, and the artistic technique of allegory, which externalizes our inner life in vivid, sometimes shocking images, characters, and stories. Readings are drawn from philosophy (Aristotle, Aquinas), literature (Dante, Chaucer, Spenser), art (Giotto, Bosch), and present-day pop culture. Course assignments include both analytical essays and creative projects.

MEDREN355S - Augustine's City of God

Course Description

Study of the literary form and argument of Augustine's epoch-making City of God: a rhetorical tour de force of consummate artistry and stunning originality and scope; and a political, religious, and moral critique of ancient Rome within a comparative, cross-cultural analytical framework that vindicates an alternative vision of society rooted in the Christian scriptures. City of God provides a remarkable example of sophisticated literary construction, rhetorical prowess, cross-cultural examination, and moral reflection. We focus on these four facets of a celebrated synthesis that breaks new ground in historiography, political science, and moral theory.

MEDREN421S - Art & Environment in the Islamic World**Course Description**

The Islamic world spans a vast array of landscapes and climates that each present unique challenges to their human occupants. This seminar explores how artists, architects, patrons, and urban planners in the Islamic world related to these diverse environments and their many nonhuman inhabitants. Investigating the intersections of archaeology, art and architectural history, climate history, eco-criticism, environmental history, garden and landscape studies, manuscript studies, and legal and religious studies the class centers on case studies from areas including Pre-Islamic Arabia, the Umayyad Levant, Abbasid Iraq, Umayyad Iberia, Norman Sicily, Mamluk Egypt, Nasrid Granada, and Mughal India.

MEDREN425S - Capstone: Medieval Trials & Ordeals**Course Description**

Using a case study approach, students in this class will examine the history and records of three famous medieval trials: a trial in ninth-century Italy when a pope put his dead predecessor's corpse on the stand; the legendary trial by combat between Sir Lancelot and Gawain to prove the innocence of Queen Guinevere; and the inquisition trial of Joan of Arc. These episodes provide insights into the fundamentals of medieval culture: ideas about truth, honor, fairness, gender roles, the permeable boundaries between the living and the dead - and of course the evolution of law and government in Europe. Students read trial transcripts as primary sources while also learning about the worlds that produced them.

MEDREN473 - What Machiavelli Really Says

Course Description

Everyone knows what 'Machiavellian' means, but what does Machiavelli really say? Reading his classical political texts, 'The Prince,' the 'Discourses on Livy,' and 'The Art of War' in the company of his literary works, including 'Mandragola,' we will examine how Machiavelli's ideas about power, deception, language, ethics, and representation emerged from his reading of Plato, Livy, Ovid, and Dante, while also exploring the reception and consequences of his ideas. Just as Machiavelli searched history for answers to his own political situation, our guiding question cannot help but be 'What would Machiavelli do?'

MGM120FS - Ethical Implications of Genetic and Genomic Research

Course Description

This course will examine the ethical implications raised by genetic and genomic research. Students will gain an understanding of the historical basis of human subjects' protections in the United States, the ethical pillars of research, and the issues that arise from genetics and genomics research. Case studies in genomics research will be used to illustrate various ethical implications. Readings will consist of reviews of the history of human subjects' protections, federal regulations, actual informed consent documents, and scientific papers from the primary literature. Open only to students in the Focus Program. Instructor consent required.

MGM222FS - Genetics and Epigenetics: The Codes that Control Our Genomes

Course Description

Many inherited cellular and physiological traits in humans are not due to changes in DNA sequence, but instead are shaped by factors such as age, diet, or environment. This course will examine sequence-independent regulation of the human genome, non-genetic diseases, environmental factors that control the epigenome, and multi-generational inheritance of epigenetic information (how grandparental experiences shape descendants' genomes). Course readings will be drawn from the primary literature (historical and current) and will be anchored on human genetics, although model systems (yeast, *Drosophila*, plants) will also be discussed. Only open to students in the Focus Program. Department consent required. Prerequisite: AP Biology or equivalent.

MMS395 - New Ventures Develop

Course Description

Do you want to design a business model around either your own idea or someone else's problem? In New Ventures Develop you'll learn to assess opportunities, develop and test business models, understand your financials, and build successful teams. If you've validated an idea through New Ventures Discover or through your independent customer discovery process, New Ventures Develop can facilitate idea to action. In this course, student teams will develop core elements of a strategy for a technology or business idea; detail will be suitable for a business plan document for a company seeking initial investment; strategy will serve as a foundation for a first operating plan for company.

MUSIC121 - Discovering Music

Course Description

Discovering Music offers a survey of the Western musical tradition from the Middle Ages to the present. We begin by introducing the elements of music (pitch, rhythm, timbre, form), and then proceed historically. Along the way we listen to and examine eighty compositions representative of art music in the West in all its diversity. Students follow the music with enhanced listening diagrams coordinated with streaming audio, read materials about why and how to listen, and watch supplemental videos including members of the Boston Symphony Orchestra, Duke Symphony Orchestra and Duke Chorale.

MUSIC138 - Popular Music of Asia and Asian America

Course Description

In-depth examinations of key popular music genres from Japan, the two Koreas, China, Taiwan and Hong Kong, and Asian America. We will learn to listen analytically, and to situate our listening within each genre's or artist's cultural, historical, and political contexts. Through music, we also investigate questions migration and transnationalism; modernity and tradition; mediation and circulation; and the making of intersectional identities. No music background is required, but a willingness to listen to music is necessary.

MUSIC139 - Racial Attitudes, Racial Prejudice, and Racial Politics

Course Description

This course brings together the theories and strategies for perspective taking of two disciplines, Music and Political Science, to unravel some of our most complicated questions around race and inequality in the US. We will (a) focus on how institutions and people have defined 'race' and codified racial categories over time; (b) investigate how people have grappled with, challenged, or exacerbated racial inequalities through the arts; and (c) explore how racial politics are shaped by culture, and vice versa. By reviewing works from social science, humanities, and artists; modeling modes of communication; and addressing conflict and appropriation through active music making, we will analyze racism as a centripetal force in American society. No prior musical experience necessary.

MUSIC141 - The Hollywood Musical: Singing and Dancing the American Dream

Course Description

Beyond its unapologetic praise of spectacularity and entertainment, what makes the Hollywood film musical a quintessential American genre? Since its origins, the Hollywood musical has been channelling various ideologies in its modes of performance and production; it has offered a space to address specific anxieties of the American society: modernity vs. nostalgia, representations of gender, ethnicity, class, and the low/high divide in arts. Emphasis will be given on its performative aspects, the relationship between choreography and song, the changing representations of the dancing body, musical styles, sexual objectification and the star persona.

MUSIC146 - Motown and American Soul Music

Course Description

During the 1960's, in Detroit, Michigan, a landmark in music was established: The Motown Sound. This aural kaleidoscope of high quality, dynamic song creation was established through a confluence of talent and hard work by people whose names now line the halls of fame for popular music. Some of these luminaries include Berry Gordy, Diana Ross, Stevie Wonder, Marvin Gaye, and Holland-Dozier-Holland. This course will investigate the societal and musical factors that gave rise to such a distinctive aesthetic, also framing this phenomenon as a point of comparison to a range of commercial music styles, including Philly Soul, Southern Soul, RnB, and current musical trends.

MUSIC147 - Black Music and the Soul of America

Course Description

This course traces the deep and pervasive impact African Americans have had on music in the United States. Musicians include Louis Armstrong, Bessie Smith, James Brown, Aretha Franklin, John Coltrane, Marian Anderson, Sam Cooke, Olly Wilson, Duke Ellington, Florence Price, William Grant Still, Alicia Keys, Kirk Franklin, and Megan Thee Stallion. The course demonstrates musical, cultural and political connections between these different streams of music and American society. Students will discover the myriad ways that the very soul of America has been conditioned by the practices of Black music.

MUSIC163L - Listening Lab

Course Description

How do we perceive the world around us by listening to sound and music? What can we learn about the world and each other when we tune our ears to particular types of sound, or particular musical traditions? This course offers students an immersive listening environment in which they will be exposed to music from around the world. Students will practice close listening, critical thinking, and making musical associations across musical genres to connect how music and sound interact with concepts such as race, gender, sexuality, politics, religion, history, and place. Students will practice writing and speaking, to understand how language can be used to convey sound and music. No prior technical musical knowledge or experience is required.

MUSIC191FS - Music, Meanings, and the Brain**Course Description**

The search for meanings in musical works occupies a central theme in music studies. The composer's intentions, social and political circumstances, and the score itself are all part of the broader search for meaning and level of impact of a given work for individuals and cultures at large. Drawing from the latest research in neuroscience, musicology, linguistics and semiotics, this course seeks to understand how musical meanings are constructed, as well as how interpretations of artistic works are negotiated and made by naive listeners and scholars.

MUSIC218 - Musical Theater Workshop: Performance

Course Description

Students will develop the three primary skills of musical theater performance (acting, dancing, and singing) in this workshop. Students will also try their hand at choreography, direction, and dramaturgy as we collaboratively stage scenes and songs from musicals throughout the semester. We will analyze what makes musical theatre performance successful as we work to hone your own abilities and talents together. Each student will receive a mixture of individual and group coaching every week. The course will culminate in a student-led performance. Come prepared to move and to sing each week. All levels welcome.

MUSIC219S - Production Management for Theater

Course Description

What does it mean to successfully manage an artistic endeavor? How does management affect whether or not a project is successful? How can artist managers be more sensitive and responsive to the needs of their fellow collaborators? This course explores theater from the perspective of the production manager. While our focus will be theater, we'll also discuss how to apply skills such as scheduling, budgeting, writing contracts, and personnel negotiation across the performing and cinematic arts.

MUSIC226S - Performing African Diaspora

Course Description

The Black cultural contributions of globally popular performance genres such as salsa, capoeira and kizomba often remain unrecognized. The objectives of this class are: 1) to understand the historical, cultural and political forces that created the African Diaspora and its rich tapestry of dances. 2) to question our assumptions that knowledge is only produced through the mind; knowledge is also produced and transmitted through moving bodies. To meet these objectives, the course will be a combination of seminar and studio: in seminar we will engage readings in anthropology, dance and performances studies about specific dances which we will then learn in studio.

MUSIC230 - Arts Policy, Leadership, and Engagement

Course Description

This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.

MUSIC232 - K-Pop, Idols, and Fandom

Course Description

This course explores the complex relationship between Korean popular music (K-Pop) idols and the complex global online (anti-)fandoms that have formed around these industry entertainers. Through a critical analysis of K-Pop music videos, and documentaries, this course examines the historical roots of idol culture in South Korea, the current state of the K-Pop industry, fan behaviors, and the global expansion of K-Pop fandom to understand how these dynamics shape both the industry and the idols themselves. This course nuances concerns about what drives one to become an idol and what it means to be a fan by engaging in moral and ethical debates surrounding the emerging Western consumption of a predatory music genre with its own complex relationship to global music flows.

MUSIC233S - Performing Brazil

Course Description

Introduces the history and culture of Brazil through the lens of performance. The course explores the way performance arts (dance, music, carnival, theatre, sports) are celebrated as expressions of the African, Indigenous and European roots of Brazilian culture, yet also subjected to race, gender, sexuality and class discrimination. Readings, films, seminar discussions and studio workshops give students understanding of the social forces that shape Brazil; and a critical appreciation for the ways in which performance can both re-inscribe stereotypes and social injustice, and be an avenue for transgressive expressions, political protest, and liberatory practices.

MUSIC235S - Selena: Music, Media, and the Mexican American Experience

Course Description

How did singer Selena Quintanilla impact the world and why does she remain as such an important cultural fixture for Mexican-American communities? This class explores the life, music, and legacy of Selena Quintanilla. We will discuss how Selena used music to navigate a complex Mexican-American identity. Focusing on intersectional feminism, sexuality, iconicity, and fandom, we will learn about Selena's music throughout the years and consider how these themes are interpreted and complicated across borders. Course materials engage readings from pop music studies, gender, sexuality, and feminist studies, Latinx studies and include a range of films, audio recordings, and podcasts.

MUSIC243S - American Musicals

Course Description

What is it about musicals that made them a uniquely American theatrical form? In this course, we will investigate how musicals represent what it means to be American. Musical theatre history is American history, indebted to and reflective of critical histories of appropriation, capitalism, immigration, and popular entertainment. Musicals seduce us in song and dance; it is easy to ignore the substance beneath the sequins. We will study the texts and historical contexts of musicals over the past century, from Shuffle Along, and Oklahoma!, to A Chorus Line, and Hamilton. Musicals reveal shifting notions of what 'American' means as they stage ability, ethnicity, gender, race, and sexuality.

MUSIC246 - The Divine One: Mozart in Movie, Missive, and Music

Course Description

Mozart's music will be presented in connection with its ability to reveal the essence of humanity in sound. The duality of artist and man is brilliantly set forth in Milos Forman's film, Amadeus. Using this movie as a springboard for investigation, we will search out Mozart's identity through his written correspondence and most importantly, the music itself. We'll read some writings that have been put in the service of attempting to explain the music but principally, our focus will be on the music itself: the symphonies, the concertos, the chamber music and the operas, in all their stunning invention and ethereal beauty as they illuminate the spheres of the human and the divine.

MUSIC281S - Composition Seminar - Transcribing and Arranging Music for Chamber Ensembles

Course Description

This course is geared toward performers and composers who play chamber music or ensemble music. You will learn how to transcribe your favorite pieces (any style!) for chamber groups such as string quartet, woodwind quintet, piano trio, piano quartet, and other instrumental combinations. While the course is project-based, we will also study transcriptions by other musicians from the 19th through 21st centuries. Prerequisites: 1. Ability to play an instrument and read music fluently (treble and bass clef). 2. Participation in a Duke chamber music group or vocal ensemble is optimal but not required. 3. MUSIC 261 is excellent preparation but not required if you fulfill requirements 1 & 2. 4. Available to meet with collaborating musicians outside of class.

MUSIC289 - Music and the Brain

Course Description

Musical perception and performance from artistic, subjective and neuroscientific perspectives. Presentations/didactic musical performances address how our brain detects and represents music, distinguishing music from other sounds, how we learn to perform and create music, the effects of music on brain structure and function, musical schema, and musical antecedents and analogues in non-humans. Dialog between course directors, a professional musician and neuroscientist, highlights the intersection between artistic and scientific perspectives on this fundamental and aesthetic form of human expression. Music and/or neuroscience background preferred, but not required.

MUSIC303S - Breath and Air

Course Description

This class explores the aesthetic, social and cosmological dimensions of breathing in relation to the global health and environmental challenges that compromise breathing in our current world. Focus on the diverse ways musicians craft the breath, represent it, and respond to the hazards of air pollution, lung infection, police brutality, and discrimination. Emphasis on qualitative method and cultural analysis. Final paper or creative project. Final paper or creative project.

MUSIC305S - Writing about Performance

Course Description

Inquiry into the concept of 'performance' broadly construed--not only as it refers to 'staged' concerts or plays, but also as social ritual and as self-presentation, appropriately situated in cultural context. Writing experiments aimed at capturing the ephemeral nature of live performance, with attention to how meaning is enacted through movement, sound, lighting, rhythm, voice, emotion, and audience interaction. Regular writer's workshops and field trips to theater, dance, and musical performances. Students compose critical reviews and a research project on a performance genre, an artist's approach, or other related topic of their choosing. Prerequisite: WRITING 101 or WRITING 120.

MUSIC321 - Sample & Remix: Contemporary Cultural Production Across Arts & Media

Course Description

Sampling & remixing of previous works is a major mode of contemporary cultural production cutting across media and cultural practices. This course analyzes its genealogy, technological underpinnings, legal presuppositions and aesthetic consequences. Tensions between copy and copyright, between claims to originality and mechanical reproduction characterize this contemporary regime, now deployed globally. Its cultural implications will be distinguished from related modes of making art and meaning (imitation, citation, collage, montage...) and tracked through various objects: popular and avant-garde cinema; videogames, ready-mades and Pop Art; Hip-Hop and Electro; literature and DJ culture.

MUSIC340SA - Divas: Screens, Stages, and Italian Celebrity

Course Description

Italy is spectacular. But what (or even who) constitutes its fame? Historically, divas first emerged on the Italian stage before anywhere else in Europe, transforming into iconic figures of awe, outrage, admiration, scandal, wonder, and celebrity. From the prima donna of early Italian theater to the rise of the Baroque castrato, and the heroines of nineteenth-century opera to the icons of post-war Neorealism, divas have shaped the representations of Italian identity for centuries. This course is media-immersed with materials drawn from the history of theater, music, opera, film, and art. Course topics evolve in tandem with the site visits during the program to various cities, theaters, museums, libraries, and outdoor spaces. Course conducted in English through the Duke in Bologna program.

MUSIC366S - Versailles and the Arts

Course Description

Taught in French, this course examines the political, cultural, and artistic history of Versailles in the 17th and 18th centuries, emphasizing its role in the history of music. It analyzes the ways in which the Sun-King achieved the unification and centralization of the French nation through certain artistic politics which likewise set the scene for musical institutions. This seminar therefore seeks to investigate how these artists' creations articulated evolving ideas around the court, the monarchy, the State, and the private and public spheres, while exploring their resonances in present art and literature.

MUSIC367S - Soundscapes of Migration: Music and Migration in Paris from the Interwar Years to the Present

Course Description

This class studies migration through the prism of music, focusing on Paris as a node of networks of musical migration. It analyzes how the metropolis has been a site of musical encounters, as well as a recipient, catalyzer, and disseminator of migrating musical practices. It studies music as a transnational and diasporic cultural process. Although our musical journey will be structured chronologically, its frontiers will encompass the soundscapes of the capital's peripheries. The range of music considered will be varied: from the Eastern European classical repertoire and African American Jazz to contemporary Rap, through Algerian Raï and Arab-Andalusian popular music. Taught in French.

MUSIC371 - Artists in Healthcare: Collaborations and Complexities

Course Description

The economically over-burdened US health care system and extended life expectancies for older adults offer a unique opportunity for working artists—not arts therapists—to intervene in the rapidly expanding field of integrative art and health. Rather than study health outcomes as indicators of 'success,' we centralize creative practice as our axis of inquiry. Course readings, interviews, and field visits to a Durham-based intervention highlight power imbalances and cultural sensitivities in hospitals, clinical care, assisted living, and nonprofit community care contexts. Culminates in student driven case studies of local arts work and workarounds.

MUSIC378S - 'Bollywood' Dance, Music and National Identity

Course Description

Dance and Music are quintessential to Hindi Cinema, which is often nicknamed as 'Bollywood.' Over the last century, Hindi cinema has garnered what has emerged as a unique form of dance genre that subsumes, reconstitutes and remixes the traditional, modern, contemporary and global movement vocabularies as an aid to highlight and extend the narrative plot of the film. In the past few decades, Hindi cinema has incorporated Indian diasporic cultural identities alluring an unprecedented global reception. This course will focus on 'Bollywood' dance and music genres and ways in which they promote the allure for a revitalized national identity, a global cultural presence, and network associations with the Indian diaspora as well.

MUSIC430 - Music History and Politics in Contemporary Africa**Course Description**

The objective of the course is to analyze the social, political and cultural dynamics of post-independence African states through the musical archive. The course will analyze the role that music has played in the construction of national identities in post-colonial African states, but also in social, political and cultural dynamics of contemporary Africa. From High-life in Ghana to Congolese rumba, Afrobeats in Nigeria, reggae, Hip Hop and Raï, it will show how music has accompanied societal and political evolutions of African nations. The course will think of music as a landscape and analyze the musical circulation, as a space for the constitution of African societal modernities. In English.

MUSIC161-2 - Introduction to Music Theory Through Music Software and Digital Audio Workspaces

Course Description

This introductory course covers the fundamentals of music theory and music literacy through music software and digital audio workspaces like Ableton Live, Logic, Garage Band, and ProTools. Topics include major and minor scales, modes, keys, time signatures, meter, intervals, triads, seventh chords, inversions, basic application of Roman numeral harmonic analysis, and form. Students create short electronic compositions that employ the theoretical concepts explored in the class. Other topics include exploration of popular and classical idioms and the development of basic aural skills.

MUSIC201-3 - Intermediate Guitar Class

Course Description

This is the follow up to Intro Guitar Class and is mostly pop and folk music with some rock and classical songs added in. This is a challenging class that does require constant daily time practicing on your guitar. Anyone earning an A in Intro Guitar Class is encouraged to enroll. Building on the previous material we will continue working on learning more complicated accompanying patterns, songs with bar chords and intricate picking and more intermediate classical pieces and pop tunes.

NAVALSCI101 - Introduction to Naval Science

Course Description

Introduction to the organization, missions, and branches of specialization within the United States Navy and Marine Corps. Customs, traditions, leadership, career opportunities, and Naval and Marine Corps operations.

Grading Basis

Graded

Course Typically Offered

Fall Only

Units**Min Units:**

1

Max Units:

1

NAVALSCI111S - Seapower and Maritime Affairs

Course Description

This course is a conceptual study of the history and strategy of sea faring nations. The course examines the political and military impact of events from the birth of sea power in the Mediterranean, to the expansion through the Atlantic Ocean, and the spread of sea power to North America. It examines the development of strategy on the seas, and the impact on global economic forces. This course uses examples of military engagements on the seas from the American Revolution to the Global War on Terrorism and Operation Iraqi Freedom.

Grading Basis

Graded

Course Typically Offered

Spring Only

Units**Min Units:**

1

Max Units:

1

General Education Curriculum Codes

STS - (STS) Science, Technology, and Society, CZ - (CZ) Civilizations

NAVALSCI189L - First Year Naval Leadership Laboratory

Course Description

Practical application of military discipline, leadership and management. Also provides general military training. Mandatory for first year Naval ROTC program students.

Grading Basis

Satisfactory/Unsatisfactory

Course Typically Offered

Fall and/or Spring

Units**Min Units:**

0

Max Units:

0

NAVALSCI213S - Evolution of Warfare

Course Description

Continuity and change in the history of warfare, with attention to the interrelationship of social, political, technological, and military factors.

Grading Basis

Graded

Course Typically Offered

Occasionally

Units**Min Units:**

1

Max Units:

1

NAVALSCI215S - Fundamentals of Maneuver Warfare

Course Description

Fundamentals of Maneuver Warfare is a detailed look at the broad aspects of warfare and their interactions with maneuver warfare doctrine with a focus on the USMC as the premier maneuver warfare fighting institution. Throughout the course, students learn historical influences on current tactical, operational, and strategic implications of maneuver warfare practices, including case studies. The course focuses on the evolution of the USMC as a maneuver warfare organization, with particular attention devoted to the structure and capabilities of the present-day USMC as a forward deployed and rapid deployment force and the development of Expeditionary Maneuver Warfare concepts.

Grading Basis

Graded

Course Typically Offered

Occasionally

Units

Min Units:

1

Max Units:

1

NAVALSCI223 - Naval Leadership and Management

Course Description

Examination of current and classical leadership and management theories, as well as organizational behavior in the context of military organization. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories and communication.

Grading Basis

Graded

Course Typically Offered

Spring Only

Units

Min Units:

1

Max Units:

1

NAVALSCI231 - Concepts and Analyses of Naval Tactical Systems

Course Description

The study of weapons systems used aboard naval vessels and aircraft. Detection systems and systems integration into current naval platforms and their offensive and defensive capabilities.

Grading Basis

Graded

Course Typically Offered

Spring Only

Units

Min Units:

1

Max Units:

1

NAVALSCI289L - Second Year Leadership Laboratory

Course Description

Practical application of military discipline, leadership and management. Also provides general military training. Mandatory for second year Naval ROTC program students.

Grading Basis

Satisfactory/Unsatisfactory

Course Typically Offered

Fall and/or Spring

Units

Min Units:

0

Max Units:

0

NAVALSCI331 - Naval Ship Systems

Course Description

Quantitative study of basic naval ships' systems. Focus on detailed ship design, hydrodynamic forces, stability, propulsion, electrical theory and distribution, hydraulic theory, and damage control. Includes basic theory/design of various ship propulsion systems and case studies on leadership/ethical issues in the engineering arena.

Grading Basis

Graded

Course Typically Offered

Fall Only

Units

Min Units:

1

Max Units:

1

NAVALSCI353 - Navigation

Course Description

Theory, principles, and procedures of ship navigation, movements, and employment. Dead reckoning, piloting, celestial and electronic principles of navigation. Corequisite: Naval Science 353L.

Grading Basis

Graded

Course Typically Offered

Fall Only

Units

Min Units:

1

Max Units:

1

NAVALSCI353L - Navigation Laboratory

Course Description

Practical application of the theories and principles of navigation as presented in the lecture series.

Grading Basis

Satisfactory/Unsatisfactory

Units

Min Units:

0

Max Units:

0

NAVALSCI389L - Third Year Naval Leadership Laboratory

Course Description

Practical application of military discipline, leadership and management. Also provides general military training. Mandatory for third year Naval ROTC program students.

Grading Basis

Satisfactory/Unsatisfactory

Course Typically Offered

Fall and/or Spring

Units

Min Units:

0

Max Units:

0

NAVALSCI423S - Leadership and Ethics

Course Description

Capstone Course that examines principles of leadership and ethical decision-making through study and interactive discussion of classical and contemporary course documents and case studies. Coursework includes Constitutional Law, Natural Law Theory, as well as works by Kant, Mill, and Aristotle, among others.

Grading Basis

Graded

Course Typically Offered

Spring Only

Units

Min Units:

1

Max Units:

1

NAVALSCI453S - Naval Operations

Course Description

Components of general naval operations, including concepts and application of tactical formations and dispositions, relative motion, maneuvering board and tactical plots, rules of the road, and naval communications. Prerequisite: Naval Science 353 or consent of instructor.

Grading Basis

Graded

Units

Min Units:

1

Max Units:

NEUROSCI115FS - Music, Meanings, and the Brain

Course Description

The search for meanings in musical works occupies a central theme in music studies. The composer's intentions, social and political circumstances, and the score itself are all part of the broader search for meaning and level of impact of a given work for individuals and cultures at large. Drawing from the latest research in neuroscience, musicology, linguistics and semiotics, this course seeks to understand how musical meanings are constructed, as well as how interpretations of artistic works are negotiated and made by naive listeners and scholars.

NEUROSCI120FS - Judgment under pressure

Course Description

Under what circumstances are we most likely to make wise decisions? And what conditions push us toward forgettable or regrettable choices? While quantitative models of economic, political, and medical decision-making often assume 'rationality,' this course addresses the exercise of choice under physiological, emotional, and psychological stressors. Topics include: neuroanatomic sub-strates of executive function; the physiologic impact of acute and chronic stress responses; cognitive biases; and the effect of evidence, advisors, and experiential learning on reaching conclusions. Focus on neuroanatomical & physiological underpinnings of stress responses and rendering judgments.

NEUROSCI121FS - Sleep in Society: History, Culture, and Medicine

Course Description

Exploration of sleep as it intersects anthropology, history, psychology, neurology, sociology, linguistics, and public policy. Topics range from normal sleep and circadian rhythms to the evolution of sleep and sleep habits around the world. Social determinants of sleep in the United States are considered. Students discuss racism and public policies in sleep health, the costs of massive societal sleep deprivation, the history and cultural narratives of dream interpretation, and principles of clinical sleep medicine. Open only to students in the Focus Program.

NEUROSCI140CN - Neuroscience and Education: Understanding the Learning Brain

Course Description

Explore insights from neuroscience, psychology, and education to discover how experiences change your brain to support learning. Survey brain development, from early childhood into adulthood, with a particular focus on the transition between high school to college and environmental factors that optimize growth and learning. Discuss well-being and how wellness affects beliefs about education. Learn how mind and brain science provides evidence-based strategies and skills to enhance life-long learning. Test learning strategies, evaluate experiences through reflection, and make adjustments to enrich conditions for thriving in higher education. Open to all first-year students.

NEUROSCI153FS - Drugs and the Law

Course Description

Exploration of the relationship between addictive drugs and the law. Examine mechanisms by which drugs of abuse affect the brain and decision-making on the individual level, and consequences of those effects on the societal level, then examine how society responds to these behaviors in terms of attitudes and laws. Compare perspectives of the criminal justice system with that of drug users. Class consists of lectures, discussions, guest speakers, and media presentations and a project examining cross-generational views on drug use, abuse, and laws. Open only to students in the Focus Program. Instructor consent required.

NEUROSCI191FS - Intersections of the Sexual Brain

Course Description

Understanding how the human brain and environment interconnect evolved dramatically with recent advances in neuroscience research methods. Students analyze such interconnections and the impact on societal theories of human sexuality. Students assess influential factors such as ethnicity/race, culture, and religion, all diversely represented in contemporary America. Students read and discuss scientific and popular articles with historical context and explore the consequences of scientific observations on the personal, societal and political levels. Students develop written and oral communication skills and work collaboratively with fellow peers. Open only to Focus Program students.

NEUROSCI201 - Fundamentals of Neuroscience

Course Description

Course covers broad and rapidly evolving field of neuroscience encompassing questions about how humans and other animals experience their world. Learners explore the organization of neural systems that sense our environment, plan and execute complex movements, encode and retrieve memories, and experience a wide range of emotions. Learners examine brain development and how changes in structure and function underlie impacts of neurological and psychiatric disorders. Not recommended for first-year students. Prerequisite: Biology 20, 201L, 202L, or 203L and Chemistry 20, 21, 101DL, or 110DL -or-concurrent enrollment in Biology 201L, 202L, or 203L and concurrent enrollment in Chemistry 101DL or 110DL.

NEUROSCI202 - Medical Neuroscience: Foundations for the Neurological Sciences

Course Description

Examines the functional organization and neurophysiology of the human central nervous system, with a neurobiological framework for understanding human behavior. Students learn the anatomy and function of neural systems in the brain and spinal cord that mediate sensation, motivate bodily action, and integrate sensorimotor signals with memory, emotion, and related cognitive faculties. Provides the foundation for neurological sciences, including understanding the impairments of sensation, action, and cognition that accompany injury, disease, or dysfunction in the human central nervous system. Prior completion of Neuroscience 101/Psychology 106 or Neuroscience 102/Psychology 107 strongly encouraged.

NEUROSCI206L - Introduction to Systems Neuroscience

Course Description

Explore the functional organization of the nervous system. Discover the integrative actions of neural circuits, their physiological properties, and the neuroanatomical connections that constitute systems for sensory perception and bodily movement. Course employs principles and practices of team-based learning. Weekly laboratory activities examine the human brain and spinal cord, demonstrate neural phenomena underlying sensory perception, and the means by which neural signals are conveyed to effect movement. Computational approaches to systems neuroscience are considered. Course required for Neuroscience major and open to anyone. Prior exposure to Neuroscience in the first year is recommended.

NEUROSCI211 - Brain and Behavior: Translating Neuroscience

Course Description

This course will focus on how brain mechanisms enable behavior. We will examine the neural basis of homeostatic control, voluntary actions, motivation, emotion, and decision making. We will use systems analysis to elucidate how volition, intentionality, and purpose can be emergent properties of neuronal interactions. We will also explore how different neurological and psychiatric disorders can result from specific defects in hierarchical neural networks.

Prerequisite (one of the following): Psychology 106/Neuroscience 101, Psychology 107/Neuroscience 102, Psychology 275/Neuroscience 201, or Psychology 193FS/Neurobiology 193FS/Neuroscience 193FS.

Course Description

How new research in neuroscience, cognitive psychology, and behavioral economics shapes our understanding of decision making. Topics include functional organization of key brain systems, approaches to measuring and interpreting neuroscience data, methods for measuring decision-making behavior, economic and cognitive modeling, and impact of neuroscience on real-world decision-making. Emerging topics will include applications in policy, marketing, and finance. Prior coursework in neuroscience or decision sciences is strongly recommended.

NEUROSCI267 - Neuroethics

Course Description

Focus on emerging ethical controversies concurrent with advances in neuroscience. Background material covered: concepts and methods in neuroscience; theories of ethics and morality from philosophy, law, and other fields. Ethical topics covered: biological bases of morality; emotions and decision making; neuroeconomics and neuromarketing; pathologies of mind and behavior; volition and legal culpability. Course format: combined lectures, discussion, interactive activities, with case studies and real-world examples (e.g., neuroimaging as legal evidence). Prior coursework in neuroscience and/or ethical inquiry recommended.

NEUROSCI268 - Mechanisms of Animal Behavior

Course Description

Survey of causal factors underlying the expression of animal behavior, organized around common problems organisms need to solve, such as finding food, avoiding predation, determining when and with whom to reproduce, communicating with other organisms, and extracting information from the environment. These factors are examined from an integrative perspective that includes neurobiology, endocrinology, sensory physiology, genetics, developmental biology, and functional morphology. Prerequisite: Biology 202L, 202LA, or 203L.

NEUROSCI274S - Aristotle and Neuroscience

Course Description

Explores the relevance of Aristotle's thought, especially his treatise 'On the Soul,' to understanding the research projects and foundations of cognitive psychology and neuroscience and the relationship between them. Brings Aristotle into dialogue with modern scholarship. Topics include: the use ofhylomorphism and functionalism; the nature of perception, representation (including knowledge and belief), memory, emotion, and pain; desire, intentionality, and the relationship of perception to action; consciousness; folk psychology, inference, and explanatory reduction; the self; and moral psychology. Prior knowledge of Aristotelian philosophy or neuroscience is not required.

NEUROSCI277 - Looking Inside the Disordered Brain

Course Description

What brain circuits give rise to the dazzling diversity of human behavior, and how do even subtle disturbances within these circuits lead to abnormal behavior or psychopathology? This course provides students with a working knowledge of the brain circuits that create order in our social, emotional and cognitive worlds, and how disorder within these circuits leads to a broad range of psychopathology including depression, anxiety, phobias, PTSD, OCD, addiction, autism, schizophrenia, psychopathy and violence. Prerequisite: Psychology 106/Neuroscience 101 or Psychology 107/Neuroscience 102.

NEUROSCI278 - Sex/Gender - Nature/Nurture: Intersections of Biology and Society

Course Description

Debates about sexuality, sex, and gender hinge on radically different ideas about relative effects of biological forces vs. social forces, or nature vs. nurture. Course changes terms of arguments about sexuality and gender and nature/nurture. Explores how nature/nurture emerged as scientific and popular debate. Evaluates new developments in science and cultural fields that are now reconsidering how biology and environments interact. Showcases debates about how sex and sexuality are formed through interplay of genetic information, hormones, material bodies, and social environments.

NEUROSCI282 - Neuroscience of Movement and Athletic Performance

Course Description

Addresses neurobiology of movement, sports and other forms of physical performance at a variety of levels, from biochemical and physiological to cognitive and behavioral. Starting with neurophysiology of muscle development and movement and progressing through use of imagery and cognitive training, we will discuss the variety of neurobiological processes involved in athletic performance, as well as methods used to study these processes. Explores neuromuscular diseases, injuries and dysfunctions as well as use of exercise and movement as therapy for neuromuscular and non-neuromuscular disorders. NEUROSCI289 - Music and the Brain

Course Description

Musical perception and performance from artistic, subjective and neuroscientific perspectives. Presentations/didactic musical performances address how our brain detects and represents music, distinguishing music from other sounds, how we learn to perform and create music, the effects of music on brain structure and function, musical schema, and musical antecedents and analogues in non-humans. Dialog between course directors, a professional musician and neuroscientist, highlights the intersection between artistic and scientific perspectives on this fundamental and aesthetic form of human expression. Music and/or neuroscience background preferred, but not required.

General Education Curriculum Codes

(NS) Natural Sciences

NEUROSCI427 - Current Topics in Sensory Biology

Course Description

Exploration of recent and classic studies in sensory biology. Topics are chosen by students at the start of the semester. Usually includes vision, hearing, smell, taste, pheromones, electroreception, magnetoreception, bioluminescence, touch, time, and music. Prerequisite: Biology 201L and 202L, or 203L or the equivalent. Recommended prerequisite: one course in Neuroscience, or consent of instructor.

NEUROSCI444S - Neuroscience Service Learning: Brain Connections

Course Description

Learn major scientific discoveries and technological advances in psychology, biology, and neurology that shaped contemporary neuroscience and society. Discuss early and recent works ranging from popular media to scientific journals online and in-class. Improve written communication through self-reflection and weekly feedback from instructor and peers. Develop and assess neuroscience demonstrations in team environment for engaging local communities. Prerequisites: strong competency in foundational knowledge of neuroscience - successful completion of Neuroscience 101 and TWO of the following core courses: Neuroscience 201, 211, 212 or 223 (concurrent enrollment in 2nd core course acceptable).

NEUROSCI451S - Autobiographical Memory

Course Description

A review and critical analysis of the literature, theory, and empirical study of autobiographical memory within cognitive psychology and neuroscience. Levels of analysis from the cultural, individual, neural systems, and neurobiological are integrated. Topics include accuracy, functions including planning for future actions, and effects of neural damage. Emphasis on the reasoning, research designs, and methods used in examining autobiographical memory. Research projects use primary and secondary materials, empirical observations, or reanalysis of existing data.

PHIL109 - Philosophy Through Computer Science

Course Description

In this class we will explore several classic philosophical issues by learning how to program in Python. This is made possible by the close affinity that is shared between a number of computational concepts and their philosophical counterparts. For example, the concept of recursion can help us think about the existence of God by way of infinity. Completing this class will give you rudimentary Python programming skills and the ability to critically engage several philosophical issues. The ideal student will have an interest in both disciplines but have no prior knowledge of either.

PHIL124FS - Freedom and Moral Obligation

Course Description

Are moral obligations limitations on our freedom, or are they, as some philosophers have insisted, the fullest expression of freedom? To understand the disagreement, we'll look at moral obligations, particularly social and political obligations. How do collective moral obligations, like climate change or reparations for slavery, obligate us individually—or do they? Is freedom of speech morally required? Finally, we will consider Kant's Groundwork of the Metaphysics of Morals, in which Kant argued that we are only free when our actions are dictated entirely by morality.

PHIL151 - The Self: Transformation and Aspiration

Course Description

Who are you? Who might you be one day? How much do you have control over the answers to these questions? And do the answers really even matter? In this course, we will consider some recent work in analytic philosophy that contends that aspiration and transformation are central to how we understand ourselves and our lives. We will also consider the views of philosophers who argue for the importance of transcendence of self to living well and with meaning, as well as writings from the Buddhist tradition, which famously advises the elimination of the self.

PHIL170FS - You, Me, and the Machine: Philosophy and the Idea of AI

Course Description

The idea of AI raises epistemological questions about the nature of mind. What does it mean to claim that a machine thinks and understands? In better understanding some epistemological puzzles about AI, we will better understand puzzles about our knowledge of others, and ultimately knowledge of ourselves. Topics may include: symbolic and connectionist AI, the computational theory of mind, intentionality, mental content, embodied cognition, functionalism, behaviorism, consciousness, and self-knowledge. Authors may include: Turing, Searle, Putnam, Nagel, Dreyfus, Kant, Heidegger, and Wittgenstein. Students will gain familiarity and practice with philosophy as an activity by interpreting, evaluating, and constructing arguments. No background in computer science is required.

PHIL205 - World Philosophy

Course Description

Course introduces students to several great philosophical traditions worthy of respect in their own right and important for understanding our contemporary world. Surveys, compares, contrasts philosophical thought from classical Greco-Roman world (Plato and Seneca), Middle Eastern and Africa traditions (including African American traditions), India (Hinduism, Buddhism, Jainism), and China (Confucianism and Daoism). These traditions, embodied in the modern world, try to answer questions like: Why are we here? Are we fated to live as we do? What is a good human life? Is there God or gods? Is there afterlife? How can we know what is true good? What is a person? How ought humans relate to nature?

PHIL214 - The Good Life: Religion, Philosophy, and Life's Ultimate Concerns

Course Description

What does it look like for a human life to go well? What leads to human flourishing or 'happiness' or 'success'? What is freedom? Love? Justice? What is the basis for ethics? What is our relationship to the natural world? What is the significance of death? How do our beliefs (or lack thereof) about God or the gods shape how we view the world? We will examine how philosophical or religious traditions around the globe have answered life's biggest questions. Traditions may include Confucianism, Islam, Christianity, Stoicism, Judaism, Buddhism, Hinduism, scientific naturalism, expressive individualism, and utilitarianism. Part of the Transformative Ideas Sophomore Program.

PHIL223 - Life's Purpose

Course Description

The aim of this course is to familiarize students with how teleology and notions of purpose have influenced, and continue to influence, various areas of biology and philosophy. Is there purpose in the world, or is the idea of a goal-directed purpose a bankrupt notion that refuses to go away? To consider this question we will examine the roots of teleological explanations in ancient thinking, objections to it that arose during the modern period, how Darwin's theory changed the landscape, and then we will consider some of the current debates regarding teleology as they impact contemporary philosophy and science. Transformative Ideas course, open to sophomores only.

PHIL283S - Philosophy of Death & Dying

Course Description

Philosophy of Death & Dying. This course will explore philosophical questions about the nature of death and end-of-life ethics. First we will consider metaphysical questions about the nature of death and dying. Next we will examine the psychological attitudes we have toward death and dying, and whether these attitudes are rational responses to our mortality. Finally, we will consider a range of ethical questions at the end of life, including virtues in the face of dying, whether suicide is permissible, and how to 'die well.' A primary aim of the course will be to encourage students to reflect on mortality and ethical dilemmas involved at the end of life.

PHIL302 - How to Live and How to Die: Death, Dying, and the Afterlife from Confucius to Cryonics

Course Description

Death is one of the only completely universal human experiences, yet we resist talking about it in our everyday lives. In this course, we will investigate some of the biggest questions and issues surrounding death. We will first examine the different ways that philosophical and religious traditions have conceived of death and problems that these conceptions may raise. In the second half of our course we will focus on how death affects our actions and choices in life. How does the prospect of impermanence shape the way we live? Are there causes that are worth dying for? How should we prepare for death? Should we use new technologies to extend our lives and 'cheat' death?

PHIL331T - Voices in Philosophy: German

Course Description

Discussion-based course trains students with advanced intermediate proficiency in German to read and analyze core philosophical texts in German, typically in conjunction with a lecture course offered in philosophy. Classes include close readings of original texts, discussions of interpretation and application in variety of other forms (including film, documentary, multimedia) and real-life situations. Students examine how language/culture impact our understanding of core philosophical texts through attention to issues such as translation, vernacular, and word choice. Tutorials meet weekly for 75 minutes. Recommended prerequisite: German 204 or equivalent.

PHIL460S - Weil, Beauvoir, Murdoch: Three Women Philosophers in Mid-Twentieth Century Europe

Course Description

Simone Weil (1909-44), Simone de Beauvoir (1908-86), and Iris Murdoch (1919-99) are towering figures in the history of European philosophy. Yet they have all, in different ways, become somewhat marginal to the philosophical mainstream. All three wrote on ethics. Weil wrote on labor, society, affliction, and grace. Beauvoir wrote novels, memoirs, and *The Second Sex*, a groundbreaking feminist analysis of women's situation. Inspired by Weil, Murdoch wrote about attention and the good and became one of the UKs leading novelists. The course will introduce students to their writing across genres, and situate their work about their respective national traditions.

PHIL463S - Eastern & Western Conceptions of Human Nature, Ethics, & Politics

Course Description

Course deals with differences of value by understanding a variety of traditions. Explores conceptions of human nature and how these connect with views about the good human life, duties, responsibilities, rights, and proper forms of political governance. International team leads discussions from comparative and cross-cultural perspectives. Critically examines Western sources, Chinese/Korean sources, Hindu, Buddhist, and Jain sources- analyzing how these ideas shape contemporary Western/East Asian/South Asian culture. All in context of contemporary scientific sources on human nature from psychology, anthropology, and primatology.

PHYSEDU113 - Weight Training Level 1

Course Description

Appropriate for individuals with no experience to less than one year of weight training experience. Emphasis on learning exercise variety, proper form, and designing an individualized program. Equipment/exercises covered include machines, free weights, cables, TRX, kettlebells, plyometrics, functional, circuit, and core training. Related topics include weight room safety and etiquette, workout design strategies, pre/post workout nutrition, flexibility/mobility, periodization, and basic muscle anatomy and physiology. Initially workouts will be provided; later students will implement an individualized program. A portion of each class will include a brief discussion on relevant topics and techniques.

Grading Basis

Satisfactory/Unsatisfactory

Course Typically Offered

Fall and/or Spring

Units**Min Units:**

0.5

Max Units:

0.5

PHYSEDU114 - Weight Training Level 2

Course Description

Appropriate for individuals with at least one year of weight training experience. Emphasis on advanced exercise technique analysis and resistance training program design. Exercises covered include the power lifts (bench press, squat, deadlift, and related variations), the Olympic lifts (clean & jerk, snatch, and related variations), plyometrics, and other standard exercises. Related topics include applied biomechanics, functional anatomy, physiology, advanced program design, periodization, sport-specific training, intensification methods, motor learning, and sports nutrition strategies. A portion of each class will include a brief discussion on relevant topics and techniques, with the remainder of the class period allocated to resistance training workouts.

Grading Basis

Satisfactory/Unsatisfactory

Course Typically Offered

Fall and/or Spring

Units**Min Units:**

0.5

Max Units:

0.5

PHYSEDU115 - Fitness for First Years

Course Description

This course emphasizes both cardiovascular conditioning and strength training. Get to know fellow first-year students and learn how to design, implement, and progress a personalized fitness program using a variety of exercise formats and equipment. Open only to first-year students.

Grading Basis

Satisfactory/Unsatisfactory

Course Typically Offered

Fall and/or Spring

Units**Min Units:**

0.5

PHYSEDU131 - Golf Level 1

Course Description

This course is designed for beginner students who have little to no experience in golf skills. Emphasizes learning the fundamentals, practicing different parts of the game, how to play a hole, understanding the rule book, and the spirit of the game. Topics include purpose, grip, posture, alignment, and ball position for different clubs; terminology; swing fundamentals; and technique for putting, chipping, pitching and full swing skills. Semester will start on and around the putting green, then lead into full swing with all different equipment. Video analysis of student's swing will be done during semester.

Grading Basis

Satisfactory/Unsatisfactory

Course Typically Offered

Fall and/or Spring

Units**Min Units:**

0.5

Max Units:

0.5

PHYSEDU132 - Golf Level 2

Course Description

This course is for students with intermediate skills who have practiced and played golf for several months to years. Emphasis on practice techniques to target strengths and weaknesses along with understanding the rules of the game. Topics and skills will cover the full swing with all clubs from short irons thru metal clubs, including putting, chipping, pitching and sand play. Learn to understand your swing thru video analysis and practice techniques.

Grading Basis

Satisfactory/Unsatisfactory

Course Typically Offered

Fall and/or Spring

Units**Min Units:**

0.5

Max Units:

0.5

PHYSEDU133 - Golf Level 3

Course Description

This class is for students that have played several years with advanced golf skills in all parts of the game, including some competitive rounds, and have an established handicap under 18. Emphasizes refining practice techniques and using video analysis to better understand your swing. Topics include review of equipment from driver to putter, working on all areas of game from short game to full swing, targeting specific areas of game to improve score, improve impact and direction of all shots by understanding distance control and spin, and how to use and look up rules in USGA rule book.

Grading Basis

Satisfactory/Unsatisfactory

Course Typically Offered

Fall and/or Spring

PHYSEDU167 - Aikido: Japanese Sword and Staff

Course Description

This course is for students with little to no experience in Aikido. Aikido sword and staff forms were developed to protect oneself from multiple attackers and involve whole body movements for maximum safety and power. By using traditional Aikido weapons, we develop coordination, flexibility, and strength in joints, muscles & tendons. Aikido weapons are used in solo and partner practices in a non-competitive manner. Emphasis is on increasing self-awareness of the mind/body connection, helping us to improve our own physical and emotional balance. Classes are broken into three parts: warmups, solo and partner practices. The founder of Aikido said, 'the Art of peace begins with you.'

PHYSEDU241 - Sport & Exercise Psychology

Course Description

This course examines theory and research related to affect regulation, cognition and behaviorism to consider psychological antecedents or determinants of sport and exercise participation and psychological outcomes of sport and exercise participation. Key topics will include personality, motivation, goal-setting, self efficacy, self determination, stress, team dynamics, leadership and communication, imagery, and the psychological consequences of injury, burnout and athlete transition or retirement. Learning activities will emphasize reflective analysis where concepts from class will be applied to hypothetical case studies, real athletes and exercisers, and community level sport and exercise programs.

PHYSICS121DL - General Physics I-A

Course Description

First semester of a two-semester introductory physics course suitable for students in the life sciences. Core physics topics: kinematics, dynamics, systems of particles, momentum, energy, angular momentum, conservation laws, statics, fluids, and oscillations. The course explores fundamental physics concepts, laws, and their synthesis. Quantitative reasoning is developed through the application of mathematical models of nature, as well as statistical data analysis. Relevant mathematics skills are taught and practiced in dedicated modules. Physics 121 includes lecture, lab, and discussion components. Not open to students with credit for Physics 141L, 151L, 161D or equivalent.

PHYSICS123CN - Science of and with Neural Networks

Course Description

An introductory undergraduate course surveying the building blocks of artificial networks, their basic structure and learning algorithms, from the perceptron to modern deep learning networks and exploring the applications of neural networks in a variety of scientific disciplines, their impact in how we acquire and apply scientific insights, and ethical/philosophical questions that are raised by their use. The course will be primarily structured in modules that feature an overview by the instructor and moderated student presentations.

QC - (QC) Quant & Comp Reasoning: A&S Curriculum

PHYSICS130S - From Quarks to the Cosmos

Course Description

The quest to understand the ultimate laws of nature is an ancient one. We seek to answer: what are the basic building blocks of the observed universe, how do they interact and what is the nature of the space that contains them? Remarkably, the physics of the smallest things we know is also tied to the largest distances and structures we can measure. The beautiful theories describing this physics are strikingly predictive, although today's picture is far from complete. How did we come to understand these things about the universe and how are we addressing remaining questions? Through lectures, presentations and projects we will learn about astronomy, modern particle physics and cosmology. Students will study a topic of their choice in further depth with a final project and presentation.

PHYSICS132 - Physics Matters

Course Description

When we observe a natural phenomenon, we can ask why it happens. An initial answer usually opens further questions as we continue to ask, 'Why?' This type of inquiry leads to consideration of the fundamental principles central to the discipline of physics. This course is about several such principles, each directly relevant to a topic of current societal interest: global warming, weather prediction, global positioning systems (GPS), computers, electric motors, medical imaging. Topics explored through readings and activities may include entropy and energy, fluid mechanics, and chaos, relativity, quantum mechanics, and electromagnetism. No physics/math background required.

PHYSICS175 - Introduction to Physics in Medicine

Course Description

The aim of the course is to introduce to physics and life science students the critical role of medical physics in medicine including clinical service, patient care, scientific innovation and clinical problem solving. Four main areas of professional activities will be covered: Radiation Therapy, Diagnostic Imaging, Health Physics, and Nuclear Medicine. The course will highlight key clinical challenges where medical physicists impact clinical practice and improve patient care and treatment outcomes. This introductory course will be taught by medical physics faculty who work in Duke Hospital Clinics and have joint appointments in the Duke Medical Physics Graduate Program. Prerequisite: Physics 141L/142L, 151L/152L, or 161L/162L.

PHYSICS380 - Introduction to Quantum Information Science

Course Description

This course introduces the basic concepts of Quantum Information Science (QIS). First, we begin by introducing the principles of quantum theory from an QIS perspective. Specifically, we discuss the notion of qubits (quantum bits) and explain concepts such as states, measurements, and time evolution in terms of these systems. As we explore the fundamental concepts of quantum theory, we also examine their implications in QIS. Additionally, we cover various topics in QIS, including Quantum Cryptography, Quantum Communications, Quantum Algorithms, and Quantum Error Correction.

POLSCI101 - Introduction to Political Science

Course Description

Political science seeks to describe and understand political phenomena, and to explore their ethical and normative dimensions. Course provides a broad introduction to the range of topics covered in political science, from authoritarian to democratic politics, from local governance to international relations, from formal rules and institutions to the psychology and behavior of individuals who participate in political processes.

POLSCI102 - The Science of Politics

Course Description

Why and how is political science a science? This course introduces students to the scientific study of the political world. Students are introduced to a broad set of questions and topics that political scientists work on. Students will learn how political scientists build theories, generate hypotheses, and test hypotheses with quantitative and qualitative data. And students will have an opportunity to apply their knowledge as political scientists do—by critiquing scientific research; proposing and testing original hypotheses; and using theory and evidence from the class as a basis for making policy recommendations.

POLSCI103S - Despotism and Dictatorship: The Political Theory of Nondemocracy

Course Description

Most regimes in the world are not representative democracies. They are autocracies. This class thinks through what makes the political life of these polities distinctive. To do so, we will read great works of philosophy, by figures such as Hannah Arendt, and recent social scientific and philosophical literature on the topic, including work in the Confucian tradition. We will also read novels exploring the nature of life in a non-democracy.

POLSCI107 - Intro to Comparative Politics: How to Compare the Incomparable

Course Description

An introduction to politics around the world through a comparative lens. Surveys elements of societies ranging from electoral institutions to persistent ethnic conflict. Provides explanations of the presence of those elements: e.g., why do governments take the form they do; when do they change; why do they experience conflict? Discusses explanations of consequences of those elements: e.g., how do institutions influence party systems, economic policy, and conflict? Introduces the tools necessary to assess those explanations. Highlights differences and similarities among countries and offers a range of approaches to analyzing the political world and comparing the incomparable.

POLSCI114 - From Voting to Protests: Introduction to Political Attitudes, Groups and Behaviors

Course Description

Why do group identities become salient in politics, and how do they shape political attitudes and behavior? This introductory course focuses on identities like ethnicity, race, gender, and partisanship in democracies across the world. The semester is split into four components: first we conceptualize group identities and political behavior; next, we examine various ways in which identity-related behaviors can be measured; then understand why some group identities become politically salient; and finally, consider the impact of those identities on political behavior, policy preferences, social trust, and discrimination.

POLSCI128 - Climate Change: A Political Economy Perspective

Course Description

This class introduces students to climate change from a political economy perspective. It reviews the main scientific facts about it and how their evolution traces back to political and economic causes. The bulk of the class is devoted to understand the consequences of climate change for domestic and international politics and to study, with the PE tools, the scope and limits of the solutions being proposed to address it. The class is purposefully interdisciplinary and will make use of academic work and data from different social and applied sciences. It is a class designed for first and second year students that could also be of interest to more advanced ones.

POLSCI164S - Gateway Seminar - Antisemitism: Ethnicity, Race, Religion, Culture

Course Description

Focuses on selected anti-Judaic and antisemitic episodes from ancient antiquity through modern times, paying attention to both antisemitic texts and events. It evaluates competing theoretical frameworks for understanding antisemitism as ethnic, racial, religious and cultural phenomenon. Can antisemitism be understood as part of the history of racism or of other forms of ethnic hatred? Why were Jews so often target of hatred? How did both Jews and antisemites view their relations with each other? How do historians understand them? If there is limited continuity among antisemitic episodes, how can the prevalence and repetitiveness of antisemitism be explained?

POLSCI177FS - 9/11 And After: The World We've Inherited and The Quest to Make A Difference

Course Description

This course critically examines the 9/11 attacks and its impact on American politics and culture. It surveys the events, people, and ideologies which led to the 9/11 attacks and its immediate aftermath; examines the US war in Afghanistan, treatment of detainees, surveillance of American Muslim communities, and rise of a national security apparatus in the US; assesses the rise of anti-immigrant, Islamophobic, anti-Semitic and extreme nationalist US domestic terror groups since 9/11; and enables students to interact with local Afghan refugees and encounter global difference. Open only to Focus students.

POLSCI180FS - Hierarchy and Spontaneous Order: The Nature of Freedom in Political and Economic Organizations (C-N)

Course Description

Course examines themes that emerge from the classics of political thought through contemporary work in the analytic social science tradition. Employs the tools of game theory to consider simple models of social and political interaction that shed light on the emergence of formal and informal institutions that govern individual behavior, and the role of these institutions in securing individual freedom. Reliance on analytic models is what differentiates this course from a historical or philosophical inquiry. Open only to students in the Focus Program. Department consent required.

POLSCI185FS - The Politics of Language

Course Description

Examines the political role of language in societies as diverse as China, India, the former Soviet Union, the UK and the US. Looks at how state and non-state actors influence citizens' language practices, and their beliefs about language. Drawing on political theory, sociology and sociolinguistics, we look at how language policies reflect and produce sociopolitical realities. Topics covered include migration, citizenship, nationalism and decolonization. Open to students in the Focus Program only.

POLSCI189FS - Introduction to Machine Learning and Computational Models in the Social Sciences

Course Description

Our goal as social scientists is to build models of the world and provide advice to policy makers. Given that human actors are often strategic and the games they play are complex, building and testing these models is difficult and distinct from common examples of machine learning. A task that is often used to motivate introductions to machine learning is teaching a model to recognize hand-written characters using MNIST data (<https://www.tensorflow.org/datasets/catalog/mnist>). Our task is harder: we must build models that involve forecasting human behavior ranging from votes in a legislature to changes in stock prices.

POLSCI195FS - Freedom and Moral Obligation

Course Description

Are moral obligations limitations on our freedom, or are they, as some philosophers have insisted, the fullest expression of freedom? To understand the disagreement, we'll look at moral obligations, particularly social and political obligations. How do collective moral obligations, like climate change or reparations for slavery, obligate us individually—or do they? Is freedom of speech morally required? Finally, we will consider Kant's Groundwork of the Metaphysics of Morals, in which Kant argued that we are only free when our actions are dictated entirely by morality.

POLSCI202 - Political Parties in Competition. Left, Right and Beyond.

Course Description

Why is electoral participation organized around parties and not individual candidates? What do parties offer and deliver to voters? How did parties and party systems develop in the United States and Europe in the 19th century and what consequences did this have for the rules of the competitive game (electoral laws)? How have American and European parties changed their political appeals in the twentieth century, and then lately into the twenty-first century? Why have some party systems—like the American—sharply polarized, while others—typically in Europe—have fragmented into a multiplicity of political parties?

POLSCI207 - National Security Simulation: The Arctic, Climate Change and Great Power Competition

Course Description

Students will participate in a national security simulation in which they will have an assigned role as a state or non-state actor and work with teams to develop policy responses to a security crisis that changes and develops over time. The simulation this semester will involve security issues that arise due to the climate change in the Arctic that has opened up sea lanes and other resources that are generating competition for advantage among multiple nations. Participants will be required to grapple with a complex information environment that is polluted with misinformation, manipulation and deception. Instructional weeks on the substantive security issues the simulation addresses will be interspersed with gameplay. No prior experience in national security is required.

POLSCI208 - How to Think in an Age of Political Polarization

Course Description

Americans today live in a time of deep political polarization, intellectual isolation, and intense partisanship. We rarely have genuine and open interactions with those with whom we disagree; when we do, we often do so on the assumption that they are not just wrong but are irrational and immoral. This class aims to explore this phenomenon in its sociological, political, ethical, and psychological dimensions. What are the causes, costs, and remedies of our polarization? Can friendships exist across ideological divides? Students are asked to openly discuss controversial political topics, while attempting to cultivate intellectual virtues and build a community of trust amid disagreement.

POLSCI209S - Ecology and the Human Good: Sustainability, Community, Nature, and Belonging

Course Description

This course examines the complex network of relationships that support flourishing human communities. How do our interactions with each other and the natural world enhance or undermine our ability to grow and live together? How does the structure of human communities shape our relationship with nature? What is the proper role of markets and technological innovation in our quest for a sustainable and flourishing future world? Through an interdisciplinary lens, we will examine topics including sustainable agriculture, community formation, friendship, climate migration, environmental ethics, food, conservation, the politics of belonging and citizenship. This course is part of the Transformative Ideas Sophomore Program.

POLSCI217 - Discovering Game Theory: Social Complexity and Strategic Interdependence

Course Description

Strategy is all around you: In sports, the economy, law, politics, and your own social interactions. In this course, you will explore one of the foundational tools that social scientists use to analyze the complexity of strategic interactions: Game Theory. To do so, the course employs a highly interactive learning environment, in which you and your peers engage in strategic interactions that illustrate fundamental social dilemmas. In taking this course, you will gain a new analytical perspective into the complexity of social phenomena, and develop a solid foundation for additional course work in social science.

POLSCI218 - Men and Women: Theory, Politics, and Life Together

Course Description

Much is said today about toxic masculinity, but what does healthy masculinity look like? There is a lively conversation about the possibility of providing a definition for the term 'woman', yet public discourse surrounding women's rights persists. This discussion-based seminar will explore femininity, masculinity, and what it means to be a good man or woman. Topics will include the transition from childhood to man/womanhood, aggression, the pay gap, gender and work in a modern economy, dating, marriage, parenthood, the household, the 'masculinity crisis' in the west, female autonomy and the legacy of the women's liberation movement, and the changing politics of the sexes in America today.

POLSCI238 - Racial Attitudes, Racial Prejudice, and Racial Politics

Course Description

This course brings together the theories and strategies for perspective taking of two disciplines, Music and Political Science, to unravel some of our most complicated questions around race and inequality in the US. We will (a) focus on how institutions and people have defined 'race' and codified racial categories over time; (b) investigate how people have grappled with, challenged, or exacerbated racial inequalities through the arts; and (c) explore how racial politics are shaped by culture, and vice versa. By reviewing works from social science, humanities, and artists; modeling modes of communication; and addressing conflict and appropriation through active music making, we will analyze racism as a centripetal force in American society. No prior musical experience necessary.

POLSCI256S - Contemporary Nationalism and Classical Political Theory

Course Description

Ancient Greece and Rome offered competing visions of politics based on republics and the cosmopolitan idea of humans as world-citizens. In light of classical political theory and the resurgence of nationalism in current politics, we will consider the following questions: Should politics be based on concern for the individual or the nation? Do we have stronger duties to our nations and fellow citizens than to the rest of the world? If so, can we ignore other countries and focus on our own problems? Should foreign policy further the goals of nation-states or focus on global justice? Are nation-states necessary? How should we address the environment, immigration, and economic globalization?

POLSCI257 - Latin American Wars of Independence

Course Description

This course covers the conspiracies, uprisings, and wars that led to the independence of Haiti and the Latin American colonies of Spain and Portugal between 1780 and the 1898 withdrawal of Spain from Cuba. It focuses on the key military and political leaders of anti-colonial struggles conducted on a continental scale from the islands of the Caribbean to the Andean highlands and beyond. Military strategy and political tactics were decisively shaped by modern debates about the meaning of freedom in terms of slavery and national self-determination. No prior knowledge of Latin America and the Caribbean required.

POLSCI259 - Russia in the World: From Cold War to Putin's Wars

Course Description

Traces evolution of Russian Federation foreign policy from the collapse of the Soviet Union at the beginning of the 1990s to the 2022 war in Ukraine. Examines elements of Russian grand strategy: military, economic (especially oil and gas), and diplomatic tools. Explores the role of one individual, President Vladimir Putin, in shaping policy in an increasingly autocratic state. Focuses on Russia's relations with its neighbors, former allies, Europe, and the wider world, including the United States. Identifies linkages between domestic politics and events and foreign policy. Assignments focus on translating historical knowledge into actionable policy advice to meet current challenges.

POLSCI260SA - Frontier City Berlin: Facing History's Great Challenges

Course Description

This course deals with some of the great challenges and conflicts of the 20th and 21st century, such as capitalism vs. communism; authoritarian vs. democratic governance, and focuses on Berlin as a city at the forefront of historic struggles. In particular, it treats Berlin as the site of the first socialist revolution in a highly industrialized nation (1918/19); the rise of fascism amidst an advanced urban culture, the legacy of world war and totalitarian rule; the Cold War division of Berlin; the fall of communism and the crises of capitalism; and the search for an environmentally sustainable future. Offered in English in the Duke-in-Berlin summer program.

POLSCI263 - The Political History of Modern Architecture: From Revolution through Neoliberalism

Course Description

Given the needs for labor, materials, and legal permissions, architects in the modern period by definition intersect with interests of power. This course explores the role of political institutions and ideologies in the history of modern architecture. While the course focuses on European and North American examples, we will also include key case studies of non-Euroamerican architecture and politics. The course provides a foundational knowledge of the history of modern architecture as well as how political institutions and ideologies have influenced that development.

POLSCI264S - Democratic Erosion

Course Description

The course is divided into two broad modules. The first module begins by defining democracy and democratic erosion, and then surveys six substantive themes. Each of the first five substantive themes addresses one of the causes, symptoms, and/or consequences of democratic erosion; the sixth—resistance—explores mechanisms for defending democracy from the threat of erosion. In the second module, regional or country case studies are discussed in greater depth. We conclude by returning to the case of the US and our own unique political moment.

POLSCI288S - Transformative Ideas: Power, Theater, and Politics

Course Description

What is power? How is it created, transferred, or lost within a polity? What happens when one entity seizes power from another? Must violence always be at the center of that event, or can shared culture animate the accumulation and maintenance of power in a society? This Transformative Ideas seminar examines how insights in political theory and theater studies have addressed these questions. Concepts include ambition; sovereignty; violence and coercion; collectivism, especially nationalism; and rhetoric. Key writers include Aristotle; Plato; Machiavelli; Sophocles; Shakespeare; Weber; Arendt; Douglass; Soyinka; Alfred Jarry; Caryl Churchill; June Jordan, and Lynn Nottage.

POLSCI301S - Illiberal Nondemocracies: Focus on Eastern Europe and Asia**Course Description**

As of 2016, only 11% of the countries in the world are liberal democracies. Some insight about how illiberal regimes function is a must to understand what is going on in the world. In this course, we explore illiberal and/or nondemocratic regimes of Eastern Europe and Asia—a perfect laboratory for the subject. We develop nuanced ideas about key concepts such as elections, representation, party rule, dictatorship, populism, patronalism, authoritarianism, and totalitarianism as well as the dilemmas of freedom, security, corruption, and development. We study the regimes of countries such as Hungary, Russia, Turkey, China and follow the news to see how political regimes evolve in real time.

POLSCI302 - Constitutional Law in the American Political Tradition

Course Description

The Constitution plays a preeminent role in U.S. political history and public discourse. Yet what does it mean for a government or policy to be constitutional—and why do we care so much? This course studies the concept of constitutionalism in the American political tradition. Why does the Constitution play such a significant role in American politics? What philosophical, moral, economic, and political considerations shaped our Constitution—and what might have been left out? What rights does the U.S. Constitution guarantee? How has our understanding of the Constitution—and its role in our republic—shifted over time?

Course Description

An examination of the historical roots and current manifestations of religiously-justified violence and disenfranchisement, with a focus on the Abrahamic traditions (Judaism, Christianity, and Islam). The violence treated will include the expressly physical as well as the more insidiously existential, including political and cultural marginalization. Major loci of exploration will include gender and sexuality; Israel-Palestine, and the intersection of contemporary identities. Topics include the nature of extremisms within each tradition, the challenges of assimilation and 'modernity,' and the role and nature of citizenship and territory.

POLSCI304S - The Democratic Mission of American Higher Education

Course Description

This seminar will explore the purposes of American higher education, with a focus on the origins of higher education in this country and important period of institutional evolution. We will interrogate the relationship between democracy and higher education in two ways. First, by understanding how democracy provides the necessary conditions for higher education to pursue its core mission. Second, by looking at how higher education promotes democratic values. The course will pay particular attention to post WWII American higher education, with a focus on important contemporary debates on higher education issues.

POLSCI323SA - Does Elite Philanthropy Serve Democracy?

Course Description

America's philanthropic foundations and wealthy benefactors are playing an increasingly powerful role in influencing public ideas, agendas, and policy -- and lately, in shoring up democratic norms, institutions, and civic culture. Donors' potential influence over public life and democracy itself cannot be understated: They control trillions of dollars in disposable assets, are only lightly regulated or scrutinized, and operate with a great deal of autonomy and little transparency. How are we to think about the place of these nondemocratic institutions in American democracy? We study the rise of elite philanthropy in the US, the policy framework within which it operates, and the strategies and sources of leverage that allow it to influence public life. Duke in DC only.

POLSCI334 - How to Rule the World: Empire and Global Governance from Greece to America

Course Description

From Babylon and Persia to Greece and Rome, empires have risen and fallen, but they always seem to make a comeback. Their defenders point to the stability they bring to a chaotic world. Their detractors point to the harsh rule required to maintain them. This course will explore arguments for and against empire, drawing on history, philosophy, and political theory, with a special focus on the Greeks and Romans. Then, in light of the parallel problems of empire and global governance, we will ask what lessons we can learn for the practice of international affairs today. Contemporary topics will include global institutions, foreign intervention, East Asia policy, and NATO and Eastern Europe.

POLSCI345 - Experimental Political Science

Course Description

Hands-on introduction to experimental work in political science. Course divided into thirds. First third: what are political science theories and how can we test them? Second third: political science in the lab. We'll use behavioral games and incentivized experiments to explore political behavior; students will formulate, run, and write up results from their own game, using classmates as subjects. Last third: political science in the field. We'll turn to survey and field experiments to address external validity; students will create, field, and write up results from their own survey.

POLSCI348 - Global Environmental Politics

Course Description

This course examines the international community's responses to various global environmental problems. Because many environmental problems cross national borders, solutions require some form of global governance such as state-led mechanisms in the form of international environmental regimes. The course will thus explore how and why states both succeed and fail to negotiate international governance mechanisms. The course will also examine why some international environmental regimes are more effective than others and why states choose to comply with environmental regimes.

POLSCI387 - Reimagining the World Together: Why Friendship Matters for Our Future

Course Description

Explores friendship and why it matters in the frenzied world of 'likes' and 'swipes.' The average Facebook user has 155 friends. Instagram added a 'Close Friends' feature to distinguish friends from followers. Social media has weakened our sense of friendship. Still, Facebook users say that, of those 155 friends, they would trust only four in a crisis. Pursues the importance of friendship, not only as a place of private refuge but as a relationship of trust that facilitates insight and innovation and that has public purchase. Classes center on conversations between pairs of friends who bring their friendship, their work, and their imaginations to bear on the shape of the world in the future.

POLSCI396S - Augustine's City of God

Course Description

Study of the literary form and argument of Augustine's epoch-making City of God: a rhetorical tour de force of consummate artistry and stunning originality and scope; and a political, religious, and moral critique of ancient Rome within a comparative, cross-cultural analytical framework that vindicates an alternative vision of society rooted in the Christian scriptures. City of God provides a remarkable example of sophisticated literary construction, rhetorical prowess, cross-cultural examination, and moral reflection. We focus on these four facets of a celebrated synthesis that breaks new ground in historiography, political science, and moral theory.

POLSCI401S - The Adventure of Citizenship: Lives of Civic Engagement

Course Description

What does it mean to be a citizen and live a civic life? In this course students will integrate academic content with their own community based experiences to understand and critique their understandings of civic engagement and social change. Students will reflect on their Duke experience and begin to chart their post Duke futures. They will gain knowledge of the historical context of democratic citizenship, understanding of the relationship between theory and practice, and familiarity with the contestations of civic engagement that emerge from considerations of race, class, and gender. Students will undertake independent projects to study those who have lived civic lives.

POLSCI402S - Origins of WWI and WWII in Europe

Course Description

Seminar will examine major scholarly works from History and Political Science that address the same question, namely, how can we explain the origins of World War I and World War II in Europe? Consider how these two disciplines explain why the Cold War did not escalate to full-blown war. Will provide students with an opportunity to undertake a significant research project, with opportunities to use one or another of the two disciplines or to undertake some form of integration across the two fields.

POLSCI403D - Introduction to Tools of Political Risk Analysis

Course Description

This course explores the impact of national and subnational government institutions on international business strategy. The course is designed around the theme of political risk analysis, approaching the topic from two perspectives: country and individual firm. Political risk is a type of risk faced by investors, that political decisions, events, or conditions will significantly affect the profitability of a business actor or the expected value of a given economic action. In this course, students will learn tools for measuring and assessing political risk, as well as how smart leaders can make intelligent business strategy decisions in these environments.

POLSCI406S - South African Life Histories

Course Description

South Africa presented the world with one of the great moral challenges of the 20th century. We will explore its history through the lens of biography and autobiography. The country underwent major transformations -- rapid industrialization, segregation, the rise and fall of apartheid, and the emergence of democracy. How did individuals experience these social changes? In what ways do individual lives illuminate these larger social processes? Protagonists include a prophetess, political artists and writers, exiles, and celebrated figures. Topics cover how segregation and apartheid affected people's daily lives, opposition to white supremacy, and the personal impact of the AIDS's epidemic.

POLSCI441 - What is Racism? Understanding racism and its consequences

Course Description

This seminar course explores the way in which racism is defined by academics across disciplines, practitioners, politicians, and the public over time and place. It considers racism as a system of inequalities, as a psychological predisposition, as a legitimizing myth, and more. It considers how and why racism has been defined in different circumstances. The class also digs deep into social science research on the consequences of racism for both dominant and marginalized groups in societies, and particularly in the United States over time.

POLSCI483 - What Machiavelli Really Says

Course Description

Everyone knows what 'Machiavellian' means, but what does Machiavelli really say? Reading his classical political texts, 'The Prince,' the 'Discourses on Livy,' and 'The Art of War' in the company of his literary works, including 'Mandragola,' we will examine how Machiavelli's ideas about power, deception, language, ethics, and representation emerged from his reading of Plato, Livy, Ovid, and Dante, while also exploring the reception and consequences of his ideas. Just as Machiavelli searched history for answers to his own political situation, our guiding question cannot help but be 'What would Machiavelli do?'

POLSCI497S - Capstone Seminar: Latin American Left Turns: A New Politics for the 21st Century?

Course Description

Examination of issues surrounding the upsurge of leftist governments elected by the popular vote in the wake of the perceived failures of neoliberalism and the Washington consensus of 1989. Looks at ways Washington has had to come to terms with an unexpected revival on the left that threatens U.S. hegemony while offering an alternative path to achieve national development, distribution of wealth, and recognition of diversity and pluralism. Students will examine these issues from multiple viewpoints and develop projects based on choosing specific research foci within the general enterprise of what these government share in common and how they differ.

PORTUGUE101 - Elementary Portuguese I

Course Description

Course is geared towards communicative skills and is designed for students to complete it with a basic level of proficiency in listening, speaking, reading, and writing. The course focuses on conversation, grammar acquisition, and cultural issues raised in lessons, films, videos, articles, readings, and music. Meets four times a week.

PORTUGUE102 - Elementary Portuguese II**Course Description**

Builds on the elements of language acquired in Elementary Portuguese 101; enrollment in Portuguese 102 presupposes acquisition of the contents covered in Portuguese 101. Speaking, reading, and writing skills emphasized; exposure to some aspects of Portuguese-speaking cultures an important component. Conducted entirely in Portuguese, using a communicative approach. Four class meetings a week. Prerequisite: Portuguese 101 or consent of instructor.

PORTUGUE112 - Accelerated Elementary Portuguese**Course Description**

Designed for highly motivated undergraduate and graduate students as well as fluent speakers of another Romance language, this course covers much of the elementary language sequence (Portuguese 101-102). Most grammar and textbook work is done outside of class, freeing class time for more communicative activities. Conversation sessions provide intensive work on grammar focused through discussion on issues raised in films, news media, reading, music. It is expected that students who take this course will be able to place directly into Portuguese 203; however, placement into Portuguese 102 may be recommended in some cases. Meets four times a week.

PORTUGUE203A - Intensive Brazilian Portuguese

Course Description

Four week immersion course in Portuguese language and Brazilian culture, offered only in Duke in Brazil. Elementary language pre-requisite required. Covers intermediate language curriculum, developing aural comprehension, speaking, reading and writing skills. Provides grammar practice and development of effective strategies for oral communication in conjunction with intensive cultural program activities. Includes strong civics, social, cultural, and environmental components geared to NGOs that engage with these issues. Classes meet five days per week for four hours with additional required extracurricular activities. Instructor consent required.

PORTUGUE233S - Performing Brazil

Course Description

Introduces the history and culture of Brazil through the lens of performance. The course explores the way performance arts (dance, music, carnival, theatre, sports) are celebrated as expressions of the African, Indigenous and European roots of Brazilian culture, yet also subjected to race, gender, sexuality and class discrimination. Readings, films, seminar discussions and studio workshops give students understanding of the social forces that shape Brazil; and a critical appreciation for the ways in which performance can both re-inscribe stereotypes and social injustice, and be an avenue for transgressive expressions, political protest, and liberatory practices.

PORTUGUE341S - Perspectives on the Amazon

Course Description

The Amazon has been a source of awe to outsiders at least since the first Europeans navigated the Amazon River in 1542. While early explorers searched the forest for a mythic city of gold, contemporary travelers, scientists, and concerned citizens look to the Amazon as the key to our endangered future.

Focusing on a variety of textual and visual representations, we will deal with major themes in the history of the Amazon and consider the ways in which this vast and widely depicted region eludes representation, holding entirely different and contending meanings to distinct socio-cultural groups. Our sources include works by indigenous thinkers and cultural producers.

PSY101 - Introductory Psychology

Course Description

Broad survey of the field of modern psychology. The class includes a broad study of behavior with emphasis on biological, evolutionary, cognitive, and developmental perspectives while placing this work in its historical, social and philosophical context. Conceptual issues unifying the subfields of psychology are highlighted along with consideration of techniques and methods by which knowledge about the brain, mind, thought and behavior is acquired and refined. There is also discussion about the impacts on life and society of contemporary scientific approaches and technologies. Students are required to participate in psychological research.

PSY196FS - Patient and Research Participant Activism and Advocacy**Course Description**

In the 1960s, patients appropriated the language and tactics of the civil rights movement to advance clinical and research agendas. Today patient activism is evolving, leading to new solutions, dilemmas, and organizational structures. This course will examine patient and research participant activism and the ways it challenges conventional notions of expertise, amateurism, 'human subjects protections,' and minimization of risk. Students will bring the tools of journalism, anthropology, humanities scholarship, public policy and community engagement/citizen science to bear on ethical and policy questions. Open only to students in the Science & the Public Focus Program cluster. Department consent required.

PSY197FS - Addiction and Substance Abuse: Global Health Perspectives**Course Description**

The major goal of the course is to develop scientific, clinical, and social perspectives on the issue of addiction and substance abuse disorders. Students will be able to develop a scientific perspective on the etiology of addiction and effects of social factors such as disease pandemic in its manifestation. We will explore the effects of the COVID-19 pandemic on substance abuse and mental health. We will also address the positive and negative aspects of legalization of marijuana. Be ready for an exciting scientific debate.

PSY204L - Quantitative Research Methods and Statistics for Psychological Science 1

Course Description

First part of two-semester series (204L/205L). Design of research studies and use of statistical methods to become better consumers, creators, and communicators of psychological research. First semester (204L) focused on research design and measurement, ethical issues, statistical tests for observational studies (e.g., t-tests, correlation, non-parametric tests), statistical software, and communicating scientific findings. Students will develop the methodological and statistical knowledge and skills to conduct their own psychological research. Includes lab section. Required for psychology major. Recommended prerequisite: two Psychology or Neuroscience courses (one may be taken concurrently with Psychology 204L).

PSY206L - Introduction to Systems Neuroscience

Course Description

Explore the functional organization of the nervous system. Discover the integrative actions of neural circuits, their physiological properties, and the neuroanatomical connections that constitute systems for sensory perception and bodily movement. Course employs principles and practices of team-based learning. Weekly laboratory activities examine the human brain and spinal cord, demonstrate neural phenomena underlying sensory perception, and the means by which neural signals are conveyed to effect movement. Computational approaches to systems neuroscience are considered. Course required for Neuroscience major and open to anyone. Prior exposure to Neuroscience in the first year is recommended.

PSY223 - The Self and Social Identities

Course Description

Course broadly explores definitions of 'the self' and how different social identities develop, change, and overlap with each other across the lifespan. Using both theory and a large body of empirical research from psychology, we investigate how our own sense of self as well as our perceptions of other people's identities guide behavior. Using media examples, peer-reviewed research, and news articles we will examine both personal and societal views of identity that contribute toward the intersectional nature of social existence. Psychology 101 or at least one other psychology course suggested before taking this course.

PSY224S - Beyond Reason: Empathy and Identity

Course Description

Leadership in the knowledge-based, global economy of the 21st century requires that students develop their abilities to constructively engage ethnic, religious, and political differences while generating and applying knowledge in the service of society. Developing critical reasoning is necessary but not sufficient; students must also cultivate a personal epistemology, empathy, and an integrated identity. This seminar uses a developmental science approach to synthesize understandings from the biological, social sciences, and humanities about these attributes. Discussions and Forum posts focus on selected readings and TED Talks. Students will write three 3-8 page synthesis/reflection papers and a 15-20 page research review paper. Grades are based on paper quality and class participation.

PSY227 - Leadership and Collaboration

Course Description

Leadership is essential to the success of groups, organizations, and societies. To be effective, leaders must possess a clear understanding of human behavior and social processes. This course is an introduction to the study of leadership from the perspective of the social sciences. We will draw on a range of social science research to address key questions about the process and practice of collaborative leadership and followership. The goal of the course is to not only expose students to the empirical study of leadership and followership but also stimulate them to think critically about human behavior.

PSY232A - The Return of the Collective (Psychosocial Approach Contemporary Spain) Theatre, Culture, & Identity

Course Description

The hasty transformation experienced by Spanish society the last 40+ years demands questioning the processes involved in its changing identities. This course delves into the economic, cultural, and linguistic circumstances that shaped the portrait of current Spain. By looking into contemporary theatrical production, we will consider causes, motivations, and consequences of the emergence of new subjectivities linked to the coming of democracy. To reach a better understanding of these new ways of thinking, sentimentalities, and behaviors operating in today's Spain, special attention will be paid to the social conditionings involved in the shaping of identities. PSY245D - Introduction to Cultural Psychology

Course Description

This course reviews the field of cultural psychology, the study of how the shared meanings and practices of diverse groups shape the human mind/brain. The course is divided into three major sections. First, we will discuss general theoretical approaches to culture from psychological perspectives, including how culture shapes the self and identity. Then, we will look at cultural influences on other aspects of psychology including motivation, morality, religion, inequality, and thinking. Finally, we will examine how culture shapes emotions, relationships, and biology (including both mental and physical health).

PSY273 - Behavior and Neurochemistry

Course Description

The role of brain chemicals (neurotransmitters, peptides, and hormones) in behavior. Hypotheses addressing the neurobiology of mental disorders and how they can be treated by pharmacological intervention. Emphasis on the development and critical evaluation of pharmacological models of brain function using mathematical and/or deductive/inductive models of reasoning and experimentation. Recommended prerequisite: Psychology 106 or 107/ Neuroscience 101 or 102.

PSY275 - Fundamentals of Neuroscience

Course Description

Course covers broad and rapidly evolving field of neuroscience encompassing questions about how humans and other animals experience their world. Learners explore the organization of neural systems that sense our environment, plan and execute complex movements, encode and retrieve memories, and experience a wide range of emotions. Learners examine brain development and how changes in structure and function underlie impacts of neurological and psychiatric disorders. Not recommended for first-year students. Prerequisite: Biology 20, 201L, 202L, or 203L and Chemistry 20, 21, 101DL, or 110DL -or-concurrent enrollment in Biology 201L, 202L, or 203L and concurrent enrollment in Chemistry 101DL or 110DL.

PSY276 - Brain and Behavior: Translating Neuroscience

Course Description

This course will focus on how brain mechanisms enable behavior. We will examine the neural basis of homeostatic control, voluntary actions, motivation, emotion, and decision making. We will use systems analysis to elucidate how volition, intentionality, and purpose can be emergent properties of neuronal interactions. We will also explore how different neurological and psychiatric disorders can result from specific defects in hierarchical neural networks. Prerequisite (one of the following): Psychology 106/Neuroscience 101, Psychology 107/Neuroscience 102, Psychology 275/Neuroscience 201, or Psychology 193FS/Neurobiology 193FS/Neuroscience 193FS.

PSY277 - Looking Inside the Disordered Brain

Course Description

What brain circuits give rise to the dazzling diversity of human behavior, and how do even subtle disturbances within these circuits lead to abnormal behavior or psychopathology? This course provides students with a working knowledge of the brain circuits that create order in our social, emotional and cognitive worlds, and how disorder within these circuits leads to a broad range of psychopathology including depression, anxiety, phobias, PTSD, OCD, addiction, autism, schizophrenia, psychopathy and violence. Prerequisite: Psychology 106/Neuroscience 101 or Psychology 107/Neuroscience 102.

PSY278 - Neuroethics

Course Description

Focus on emerging ethical controversies concurrent with advances in neuroscience. Background material covered: concepts and methods in neuroscience; theories of ethics and morality from philosophy, law, and other fields. Ethical topics covered: biological bases of morality; emotions and decision making; neuroeconomics and neuromarketing; pathologies of mind and behavior; volition and legal culpability. Course format: combined lectures, discussion, interactive activities, with case studies and real-world examples (e.g., neuroimaging as legal evidence). Prior coursework in neuroscience and/or ethical inquiry recommended.

PSY282 - Neuroscience of Movement and Athletic Performance

Course Description

Addresses neurobiology of movement, sports and other forms of physical performance at a variety of levels, from biochemical and physiological to cognitive and behavioral. Starting with neurophysiology of muscle development and movement and progressing through use of imagery and cognitive training, we will discuss the variety of neurobiological processes involved in athletic performance, as well as methods used to study these processes. Explores neuromuscular diseases, injuries and dysfunctions as well as use of exercise and movement as therapy for neuromuscular and non-neuromuscular disorders. PSY302L - Brain Waves and Cognition

Course Description

Combined lecture/lab course on the event-related potential (ERP) method and its use in cognitive neuroscience. ERPs, which are electrical brain waves triggered by sensory and cognitive events, provide a powerful means to noninvasively study the timing and sequence of the neural activity underlying cognitive processes in humans. The course covers how ERPs are generated, recorded, and analyzed, and how they are used to study cognitive processes. Students gain substantial hands-on experience in the context of performing a group cognitive neuroscience experiment. Recommended: previous courses in neuroscience/psychology, proficiency with computers, sophomore or higher status.

PSY319S - DukeLine Peer Health Coaching

Course Description

This is a training course for students who are interested in becoming peer mental health coaches for other Duke students. As part of a Bass Connections team, we are developing a peer to peer app that uses anonymous avatars to facilitate communication from students needing help to students trained to help them. This is an intense course in which students will learn how to help an individual manage intense emotions and hopelessness in moments of need. Topics include helping a suicidal individual, helping an individual deal with the aftermath of a sexual assault, and related topics. An initial interview and subsequent permission from the instructor is required. Instructor consent required.

PSY334 - Cognitive Development

Course Description

Ever wonder how you came to learn and think? This course looks at the start of these cool human abilities, covering how children learn to perceive, act, talk, understand, and reason with and about the people, concepts, and categories around them. Students will actively engage in mostly primary source readings, scaffolded by lively lecture. Students will leave with the theories, methods, and key findings of cognitive development in their back pocket, ready to interpret primary and media coverage of cognitive development. Prerequisite: At least one Psychology course, including those cross-listed with Psychology.

PSY335S - Moral Development

Course Description

How do children learn to tell right from wrong? How are they socialized into ethical practices of their culture? This course explores the sources of human morality by surveying major theories of moral development and analyzing the latest research on the emergence of the moral sense. It investigates the development of early prosocial behavior, socio-moral emotions (empathy, guilt, pride), cooperation, altruism, concepts of justice, moral identity, moral evaluation, and related phenomena. In addition to age-related changes, special attention is paid to cross-cultural comparisons. Prerequisite: Psychology 103 or Psychology 235 or Psychology 325 or consent of instructor.

PSY354A - History of Psychology in France and Europe

Course Description

This course aims to open students to the place psychology holds and how it is presented culturally and socially, as well as exposing them to French psychological practices. To do so, we will identify historical and conceptual landmarks concerning contemporary psychology in France and Europe. Students will focus on the birth and life of psychology, from its 18th-century beginnings to its current applications in France. Such movements as physiology, associationism, psychoanalysis, Gestalt, cognitivism, and social psychology will be scrutinized through readings, lectures, and co-curricular outings to those places in Paris where psychology is put into practice. Taught at Duke in France.

PSY404S - Trauma Across the Lifespan: Developmental Contexts and Clinical Implications of Trauma

Course Description

This seminar will examine the developmental effects of trauma in childhood/adolescence and cascading effects across the lifespan. The course will use a developmental psychopathology framework, examining normative development and (mal)adaptations following trauma exposure, as well as individual, family, and relationship factors affecting developmental trajectories. Emphasis will be placed on intersections of trauma with race and socioeconomic status (historical trauma and oppression), as well as prevention, assessment, and treatment approaches. Students will gain competency through readings, lectures, discussions, written work, and oral presentations.

SB - (SB) Social & Behavioral Analysis: A&S Curriculum, SS - (SS) Social Sciences

PSY405S - Great Ideas in Psychology

Course Description

Ideas in psychology drawn from many content areas (including perception, personality, motivation, biological, social, cognitive, developmental) and approaches (including laboratory experiments, questionnaires, observation, imaging, interview, computer simulation). We will examine what makes ideas good, great, and mediocre, and also examine 'bad ideas' in psychology. Course functions as a capstone experience -- an opportunity to synthesize previous knowledge, fill in missing areas, and reflect on the nature of ideas in the field. Implications for evaluating ideas in any academic discipline.

PSY440S - Prejudice & Stereotyping

Course Description

In this upper-level undergraduate seminar, students will be introduced to classic and contemporary research on the psychology of stereotyping, prejudice, and discrimination. We will examine social psychological experimental evidence investigating phenomena and processes associated with people's beliefs about members of social groups (stereotypes), evaluative attitudes toward social group members (prejudice), and behavioral responses toward individuals due to their group membership(s) (discrimination). This course will help you understand when and why people express prejudice and stereotype others as well as to consider how institutions can play a role in perpetuating disparities.

PSY450S - The Psychology of Trauma and Memory

Course Description

Inquiry into how memory changes in and supports the effects of traumatic events, and its relation to current diagnosis and treatment of posttraumatic stress disorder. Examination of differences across cultures in understanding trauma and responses to it. Integration of behavioral theory and observation with its neural basis, including neuroimaging. Topics include ongoing debates about accuracy, narrative coherence, and involuntary memory. Levels of analysis range from neural substrates, through behavior and thought processes to the social construction of memory and trauma. Research projects use primary and secondary materials, empirical observations, or reanalysis of existing data.

PSY465S - Advanced Cultural Psychology: Culture in the Mind, Brain and Behavior

Course Description

This course reviews the field on cultural psychology in four parts. First, we discuss different theoretical perspectives, including a historical background and cross-cultural methodologies. Second, we examine cultural variations in mentality, focusing on several substantive domains (e.g., self, cognition, emotion, and motivation). Third, we explore biological foundations of culture and, fourth, we look closely into varieties of culture including religion, honor, and social class. The course will provide an overview of cultural psychology with a focus on recent developments in neuroscience and cultural differences between non-Western cultures.

PUBPOL101CNS - Information, Technology, Ethics and Policy

Course Description

This is a course about the politics, policy and ethical dilemmas surrounding information and technology. The course will explore technology; not only about how to use technology nor even simply how people, groups or organizations use technology, but how politicians, policymakers, economists, citizens and society watchers talk about, worry about and understand technology. The class will explore digital equity and the ethical dilemmas society confronts by technology's use and misuse. It will also examine other technologies: phones, networks, etc., as well as uses, artificial intelligence, social media and more.

PUBPOL102CNS - Finding Yourself and Creating Your Voice: Speech and Resilience for a Complicated World

Course Description

'Finding (and Creating) Your Voice' in the legal system involves being able to not only recognize all sides of an issue, but ultimately, to also articulate a position/argument that is persuasive. This voice might also be one that involves the ability to mediate and/or negotiate an outcome. These skills require an understanding of how the law deals with speech and how telling a compelling story is at the heart of 'practicing' within the legal system. In addition, one's effectiveness in finding and creating a voice is also directly connected to one's overall self-awareness, resilience, courage, curiosity, creativity, capacity to listen and leadership style, among other factors. In this course, students will have the opportunity to gain a better understanding of how the law handles speech, with a focus on the 1st Amendment to the US Constitution. This understanding will be undergirded by a consideration of (and ultimately a greater appreciation for) the difference between what can legally be said versus what 'should' be said in a particular situation. Students will be invited to practice how to civilly and compassionately disagree with someone, particularly a peer, while identifying and exploring their personal values, reconciling these values with how they find, create and use their voice at Duke and beyond.

IJ - (IJ) Institutions, Justice & Power: A&S Curriculum

PUBPOL103CNS - War and Diplomacy in Fact and Fiction

Course Description

This first-year seminar offers an introduction to a number of the key military and diplomatic encounters of the nineteenth and twentieth centuries. We will explore from a multinational perspective the ways in which peoples and nation-states competed for both power and security. We will seek to understand the ways in which states attempted to balance their national needs for economic and military security with their desires for international prominence and stability. And we will interrogate the ways in which polities, non-state actors, and communities confronted each other and the Great Powers that sought to dominate them. Exploring some of the relevant scholarly literature in international history, we will discuss various great works of literature and film in their historical context. The final assignment will give students the opportunity to write their own short work of historical fiction or a traditional scholarly paper.

PUBPOL115FS - Human Rights: Back to The Future, Looking at Roots and Current Reality of Human Rights

Course Description

This Focus course introduces students to a brief history of rights as a way to ground our exploration of current human rights challenges and what rights may be envisioned in the future. Rights have never been static. Recent changes in how we see rights include the right to truth in post-conflict societies and animal rights. We'll explore how cutting-edge thinkers contribute to an expanded horizon of rights. We will be engaging with activists, scholars, and artists. Open only to students in the Focus Program.

PUBPOL120 - Undergraduates Internship Requirement

Course Description

Short term (350 hours) work experience in an area of public policy chosen by Public Policy majors and pre-approved by Internship Director. Must submit pre-approval form by last day of classes in spring semester, post-internship documentation, and self-evaluation form by August 1st. Recommended prerequisites: Students must have completed at least 3 of the following 6 required courses: STA 199L, PUBPOL 155D, PUBPOL 301, PUBPOL 302, PUBPOL 303 and PUBPOL 304. From this list of courses, at least one course needs to be PUBPOL 155, PUBPOL 301, or PUBPOL 302. **STA 198L, STA 101L, STA 102L, STA 104L, STA 111L, STA 130L, or ECON 104 may substitute for STA 199L.

PUBPOL123 - History of the Present

Course Description

Examines the history of the past forty years, focusing on the United States in a global context. Themes might include: globalization, inequality, the rise of the alt-right, climate change, the internet, and the emergence of finance and consulting. Prepares students to think historically about their own world, and gives them the opportunity to use historical methods to think about the forces shaping their lives, their families, and their potential careers. Draws on a wide variety of sources and genres: alongside more traditional academic readings, students might be exposed to digital storytelling, journalism, television, and video games.

PUBPOL155D - Introduction to Policy Analysis

Course Description

Gateway course introduces future leaders to the study of Public Policy through an overview of the political and social context in which public policy is made, the common obstacles to good decision-making, and several methodologies used in the field of Public Policy. Students learn to apply these concepts to real-world issues through a series of case-study-driven memos and assignments that introduce enduring problems, landmark policies, and contemporary issues in a topical concentration of their choice. Appropriate for students at any level (freshmen to seniors) and designed for both prospective public policy majors and non-majors with a general interest in public policy.

PUBPOL167FS - Citizenship, Patriotism, & Identity

Course Description

This course introduces students to fundamental moral questions about nation states and individuals' membership in them. Do people owe more to their compatriots than to foreigners? Is it desirable—or at least permissible—for countries to have and promote a national identity? What different forms can patriotism take, and in which (if any) of these forms is it a virtue? Should we all be 'citizens of the world?' These questions will be explored primarily through readings in contemporary moral and political philosophy. Open only to students in the Focus Program.

PUBPOL180S - Dynamics of Environmental & Climate Justice: Movements, Countermovements, & Institutional Response

Course Description

This course examines the contentious politics of the environmental justice and climate justice movements. We explore how these movements and their opposition work to shape political opportunities and responses. We will consider the substantive concerns of the environmental justice movement, the climate justice movement, their methods, and the scales at which they operate (local, national, global). Social movements of political significance will generate opposition. So, we will consider the countermovements that challenge both justice movements. These topics will be explored using a range of materials as well as through field observations of movement activities and other events. FOCUS program students only.

PUBPOL202 - How to Think in an Age of Political Polarization

Course Description

Americans today live in a time of deep political polarization, intellectual isolation, and intense partisanship. We rarely have genuine and open interactions with those with whom we disagree; when we do, we often do so on the assumption that they are not just wrong but are irrational and immoral. This class aims to explore this phenomenon in its sociological, political, ethical, and psychological dimensions. What are the causes, costs, and remedies of our polarization? Can friendships exist across ideological divides? Students are asked to openly discuss controversial political topics, while attempting to cultivate intellectual virtues and build a community of trust amid disagreement.

PUBPOL207 - Development and Africa

Course Description

Addresses the vexed issue of economic development in Africa - its many failures, its occasional successes - from the early colonial period to the present. Focuses especially on the transition from the 1960s 'modernizing' moment to the millennium projects and humanitarian aid of the present. Will read the works of development experts, World Bank executives, anthropologists and historians, asking why this massively financed project has experienced such failure and exploring what can be done.

PUBPOL208S - Language and Politics: Global Perspectives

Course Description

We will never speak a single language, or agree on the best way to organize society and politics for 'the good life.' How do macro-politics affect the language(s) we choose to speak? What public policy initiatives can be deployed so that language is an accessible resource for all? Are there such things as language rights, and how can they be distributed and defended? These questions are not just academic, but essential to understanding the world(s) that we inhabit. This course takes a global and historical approach to the politics of language, examining the relationships between language, society, and the state.

PUBPOL209S - Human Rights and Legal Redress: Seeking Justice through Human Rights

Course Description

In this course, students will analyze through case studies the issues that confront the implementation of human rights ethics down through the layers separated by geography and culture to local implementation and enforcement. They will acquire an understanding of the international, regional and local human rights conventions and structures which propose, cultivate and enforce the ethical norms of the international human rights regime. This class addresses questions including: in what respects do enforcement options differ from place to place? When, where and under what circumstances is the human rights apparatus most effective in providing redress for rights violations? And, what are the alternatives to the human rights approach to justice?

PUBPOL210SA - Frontier City Berlin: Facing History's Great Challenges

Course Description

This course deals with some of the great challenges and conflicts of the 20th and 21st century, such as capitalism vs. communism; authoritarian vs. democratic governance, and focuses on Berlin as a city at the forefront of historic struggles. In particular, it treats Berlin as the site of the first socialist revolution in a highly industrialized nation (1918/19); the rise of fascism amidst an advanced urban culture, the legacy of world war and totalitarian rule; the Cold War division of Berlin; the fall of communism and the crises of capitalism; and the search for an environmentally sustainable future. Offered in English in the Duke-in-Berlin summer program.

PUBPOL213 - Arts Policy, Leadership, and Engagement

Course Description

This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.

PUBPOL214S - South African Past and Present

Course Description

Explores the history of modern South Africa from the beginning of the mineral revolution in the 1860s to the post-apartheid present. We will cover mining-centered industrialization, the emergence of Afrikaner and African nationalism, segregationist ideology, and the construction of apartheid. We will examine the plethora of anti-apartheid struggles, and the regional and wide-ranging global efforts to end apartheid and usher in democracy. The establishment and promise of multi-party democracy, the AIDS epidemic, and the reemergence of social movements are all topics we will consider and we will conclude by reflecting on the place of South Africa as a regional, continental, and world power.

PUBPOL215S - Just Work: Restorative Justice Models and Applications

Course Description

Rooted in ancient practices from indigenous cultures & religious texts, Restorative Justice (RJ) has gained interest as a means to reform the modern justice system and manage wrongdoing in schools and workplaces. This course takes an interdisciplinary approach to consider RJ as an alternative to typical retributive justice models. Examines RJ theory, RJ diversion programs, & the strengths and limitations of RJ's application, including Victim-Offender Mediated Dialogues, Community Conflict Councils, and Truth & Reconciliation Commissions. Asks: does RJ offer the paradigm shift our society needs to address the failings in our justice systems in our communities, institutions, & personal lives?

PUBPOL224 - Russia in the World: From Cold War to Putin's Wars

Course Description

Traces evolution of Russian Federation foreign policy from the collapse of the Soviet Union at the beginning of the 1990s to the 2022 war in Ukraine. Examines elements of Russian grand strategy: military, economic (especially oil and gas), and diplomatic tools. Explores the role of one individual, President Vladimir Putin, in shaping policy in an increasingly autocratic state. Focuses on Russia's relations with its neighbors, former allies, Europe, and the wider world, including the United States. Identifies linkages between domestic politics and events and foreign policy. Assignments focus on translating historical knowledge into actionable policy advice to meet current challenges.

PUBPOL229 - The Good Life: Religion, Philosophy, and Life's Ultimate Concerns

Course Description

What does it look like for a human life to go well? What leads to human flourishing or 'happiness' or 'success'? What is freedom? Love? Justice? What is the basis for ethics? What is our relationship to the natural world? What is the significance of death? How do our beliefs (or lack thereof) about God or the gods shape how we view the world? We will examine how philosophical or religious traditions around the globe have answered life's biggest questions. Traditions may include Confucianism, Islam, Christianity, Stoicism, Judaism, Buddhism, Hinduism, scientific naturalism, expressive individualism, and utilitarianism. Part of the Transformative Ideas Sophomore Program.

PUBPOL235 - Risk

Course Description

Simply put, risk is 'the possibility of something bad happening.' Defined in this way, increased attentiveness to risk has the potential to be paralyzing because it is present in nearly every aspect of human existence. This course, organized by the Duke Center on Risk, capitalizes on this ubiquity by bringing together ideas and approaches from all corners of the university. A unifying perspective is the recognition that risk involves elements of both chance ('possibility') and value ('something bad'). Therefore, students will learn the languages of probability and economics within the cultural settings of public policy, law, engineering, business, and medicine.

PUBPOL250FS - Law, Ethics & Responsibility

Course Description

Examines the intersection of law and neuroscience, including the use of neuroimaging to determine if a witness is telling the truth; the implications of neuroscience for determining the mental competency of defendants, the insanity defense, the imposition of punishment on defendants. Considers the extent to which recent advances in brain science cause us to reevaluate fundamental legal concepts of 'intent,' 'insanity,' and responsibility; the ways in which neuroscience may be applied to these and related issues; and the inherent limitations and incongruities of applying brain science to legal questions.

PUBPOL252 - Amazon.com and the Cybereconomy

Course Description

This course will introduce students to the complexities and controversies around the meteoric growth of the digital economy, with a focus on the biggest company of them all, Amazon. We will examine questions that range from labor conditions and consumerism to data harvesting, algorithmic marketing, and monopoly concerns. By drawing on insights from cultural anthropology, economics, history, and other disciplines, the course will give students a new understanding of how e-commerce is changing the structure of our economy, society, and everyday lives. Students will do an individual research project on some aspect of Amazon for a final project.

PUBPOL260S - Leadership, Policy, and Change

Course Description

Seminar will examine the implications of declining trust in our institutions for leadership in the 21st Century. Considers this country's rich tradition of skepticism about its public institutions, as well as the vital role that societal trust has played in allowing leaders to craft and carry out meaningful public policy, dispense justice, and effect social change. Studies contemporary case studies and the role of increasing political polarization, seeking to understand why some institutions have maintained public confidence while others have not, and whether trust in the latter can be restored.

PUBPOL262S - Ethical Dimensions of Environmental Policy

Course Description

Uses case studies from different arenas of environmental policy (e.g., climate and clean air, water and waste, forests, oceans, energy) to surface normative assumptions often implicit in policy design and implementation. Links ethics to ethos (beliefs, aspirations, and spirit of a community or culture) to suggest that policies are not only pragmatic guidelines for decision-making and action, but also fundamental declarations concerning the character of human flourishing and the shape of the natural world, which is why environmental policies are often so contentious. Seeks to help students understand this aspect of environmental policy and to negotiate these deep-seated ethical conflicts.

PUBPOL270S - Lead the Way Durham: Civic Engagement, Social Innovation, and Community Leadership in the Bull City

Course Description

Let's explore how Durhamites shape and are shaped by the local policy environment and the creativity they employ to address social/civic issues in Durham. Who defines community? How does that inform our community participation? What are the core tenets of ethical community engagement? How do we implement them in our daily lives? How do geography, race, class, power, and privilege influence our conception of engagement? We'll learn from leaders in education, housing, government, criminal justice, and food security, and leave the classroom to discuss with Durham locals. Through active participation and mindful reflection, students refine their personal models of social change. All are welcome.

PUBPOL292 - National Security Simulation: The Arctic, Climate Change and Great Power Competition**Course Description**

Students will participate in a national security simulation in which they will have an assigned role as a state or non-state actor and work with teams to develop policy responses to a security crisis that changes and develops over time. The simulation this semester will involve security issues that arise due to the climate change in the Arctic that has opened up sea lanes and other resources that are generating competition for advantage among multiple nations. Participants will be required to grapple with a complex information environment that is polluted with misinformation, manipulation and deception. Instructional weeks on the substantive security issues the simulation addresses will be interspersed with gameplay. No prior experience in national security is required.

PUBPOL296 - Wars of Empire: Europe's Small Wars of the 19th and Early 20th Centuries

Course Description

The 19th and early 20th century wars through which the modern European empires 'pacified' the regions they conquered were considered 'Small Wars': conflicts that were imbalanced, with well-trained and equipped troops on one side, and what one theorist called 'savages and semi-civilized races' on the other. In these clashes, 'civilized' Europe was expected to easily triumph, but Europe's great empires consistently found themselves challenged and thwarted by the indigenous forces on the battlefields of Asia and Africa. This course will look at examples from the histories of the British, French, Italian, and Russian Empires, discussing both the military and imperial contexts of these struggles.

PUBPOL297 - Great Powers Diplomacy, 1789-1914

Course Description

This course will examine the political, economic, diplomatic and military relations of the Great Powers, 1789-1914. We will trace the development of the Great Power system within the context of the foundations of State power, examining topics including: (1) the diplomacy of the individual Great Powers; (2) the rise of non-European powers; (3) the military strategies of the Great Powers in peacetime and war; (4) the relationship between European continental commitments and world power; (5) the significance of technological advance for the strategic balance; (6) and the relationship between economic stability and diplomacy in the international system. We will end by exploring the collapse of the 19th century international system and the origins and outbreak of World War I.

PUBPOL298 - Developing Leadership for a Better World

Course Description

This course explores diverse concepts and practices of leadership and facilitation and their applications in community, organizational, public, and group contexts. Built on frameworks of asset-based community development and community organizing, the fundamentally relational model of leadership that guides this course empowers groups and teams to determine for themselves the change they want to bring about and then mobilize together for collective

action that meaningfully improves individual lives, community conditions, and social structures. Through readings, discussion, and community-engaged learning students will examine how to develop leadership that creates successful organizations, builds power in community-led initiatives, transforms systems, and improves policy outcomes.

PUBPOL299S - Innovating For Social Impact- Leading with Purpose

Course Description

Innovating for Social Impact will explore the ever-evolving intersection between the public sector, private sector, non-profit organizations, and individuals in tackling the world's most pressing challenges. Experiential and interactive, this class will take a hands-on, service-oriented approach to learning about issues that are impacting people here locally, and around the globe, and the innovative solutions that are helping to drive progress. Through an examination of our role in the world as leaders, we will think deeply about our moral character - diving into our personal values, wrestling with hard questions, and creating individual leadership maps that help to guide how we want to show up in the world.

PUBPOL317S - Illiberal Nondemocracies: Focus on Eastern Europe and Asia

Course Description

As of 2016, only 11% of the countries in the world are liberal democracies. Some insight about how illiberal regimes function is a must to understand what is going on in the world. In this course, we explore illiberal and/or nondemocratic regimes of Eastern Europe and Asia—a perfect laboratory for the subject. We develop nuanced ideas about key concepts such as elections, representation, party rule, dictatorship, populism, patronalism, authoritarianism, and totalitarianism as well as the dilemmas of freedom, security, corruption, and development. We study the regimes of countries such as Hungary, Russia, Turkey, China and follow the news to see how political regimes evolve in real time.

PUBPOL323 - Chicago: Architecture, Urbanism, Politics

Course Description

Building has often been at the center of major social, economic and political struggles of the modern era. This course will analyze the development of architecture and urbanism in Chicago, from its incorporation to the present day, in relation to these historical struggles. Focusing particularly on the concept of place and space, the course will give the student an overview of building in Chicago and analyze in detail the theories and practices which govern urban planning up to our own times. Select sections of the course will particularly emphasize Chicago 1920-1975, and how questions of class and race intersect with a political economy of architecture.

PUBPOL328 - Men and Women: Theory, Politics, and Life Together

Course Description

Much is said today about toxic masculinity, but what does healthy masculinity look like? There is a lively conversation about the possibility of providing a definition for the term 'woman', yet public discourse surrounding women's rights persists. This discussion-based seminar will explore femininity, masculinity, and what it means to be a good man or woman. Topics will include the transition from childhood to man/womanhood, aggression, the pay gap, gender and work in a modern economy, dating, marriage, parenthood, the household, the 'masculinity crisis' in the west, female autonomy and the legacy of the women's liberation movement, and the changing politics of the sexes in America today.

PUBPOL329SA - Does Elite Philanthropy Serve Democracy?

Course Description

America's philanthropic foundations and wealthy benefactors are playing an increasingly powerful role in influencing public ideas, agendas, and policy -- and lately, in shoring up democratic norms, institutions, and civic culture. Donors' potential influence over public life and democracy itself cannot be understated: They control trillions of dollars in disposable assets, are only lightly regulated or scrutinized, and operate with a great deal of autonomy and little transparency. How are we to think about the place of these nondemocratic institutions in American democracy? We study the rise of elite philanthropy in the US, the policy framework within which it operates, and the strategies and sources of leverage that allow it to influence public life. Duke in DC only.

PUBPOL330 - Global Health Ethics: Policy Choice as Value Conflict

Course Description

The primary foci of this course are: the ethics of engagement with marginalized/stigmatized populations; understanding the influence of power dynamics; and understanding the ways in which policies create structures that limit abilities. Students explore the roots of their personal value systems and those of others, in an effort to understand causes of conflict and ethical missteps in global health engagement. Involves reading texts and coming to class ready to engage in conversations and activities related to the learning objectives. Weekly 5-question quizzes help to ensure that students come to class prepared to engage with the material.

PUBPOL332S - Documenting US Women's Health Post-Roe v. Wade

Course Description

The overturning of Roe v. Wade in June 2022 led to the deaths of two women in South Carolina. One woman died from sepsis following self-instrumentation, and the second died after giving birth to a healthy baby. She began to hemorrhage; hospital administrators were afraid that the 'D&C' she needed to survive was too close to the abortion procedure. A physician team at Duke University Hospitals, led by Dr. Beverly Clark, began to see similar cases in North Carolina. The aim of this course is to document—in real time—the political and ethical dimensions of the situation that healthcare providers now find themselves in as they attempt to provide women the nationwide medical 'standard of care.'

PUBPOL333 - War and Public Health in Africa

Course Description

An inquiry into the nature of contemporary war in sub-Saharan Africa and its human cost. Uses public health as a parameter to assess the impact of organized collective violence on people's lives. Link between war and public health established and measured with respect to civilian deaths, gender based violence, physical and psychological trauma, mental disorders, malnutrition and famine, and the spread of epidemic diseases, inter alia HIV/AIDS. Special attention is paid to rape as 'a weapon of war', to the trafficking of human beings in war zones, the child soldier phenomenon, and to death counts as a vector of humanitarian or political advocacy.

PUBPOL340S - De/Re/Segregation in Education: A Case of Back to the Future?

Course Description

Course traces timeline of segregation, desegregation, integration and resegregation in education in the United States, from policies and practices first enacted at this nation's birth through current policies and practices that challenge our commitments to opportunity, equality, and equity. Course invites students to study historical and contemporary practices in education, comparing segregation and resegregation as moments in the education history of the US, taking recent developments in North Carolina education policy and practice as cases to enrich understanding. Students engage in a minimum of 20 hours of planned service activities.

PUBPOL344 - History of U.S. Social Movements

Course Description

Examines the social movements that have shaped U.S. history, starting with the American Revolution itself and covering others including the anti-slavery movement, women's rights, Populism, Socialism, the Ku Klux Klan, the labor movement, the Black Freedom Movement and broader New Left, lesbian and gay liberation, and the recent conservative movement, focusing on the ethical issues arguments they raised, and how new civil, political, and social rights were created through social movement organizing. Lectures and readings explore why these movements arose, what they achieved, why many opposed them, and what we can learn about American history writ large from their experiences.

PUBPOL347S - The Connection between Human Rights, Memory and How Societies Create Memorials

Course Description

This seminar introduces students to multiple approaches to why and how to create memory, with a focus on contributing to a project underway at Catawba Trail Farm. We are particularly interested in how to tell difficult stories of slavery, segregation, and inequality through new sites and interpretive plans. Students will conduct interviews and archival research in coordination with a Bass Connections project, 'Making Meaning at Historic Places' and the Catawba Trail Farm, a non-profit organization that builds community and addresses food insecurity through community gardening. As part of their community-building efforts, the leaders of this project are interested in reclaiming the history of the enslaved people who lived and worked on this property outside Durham.

PUBPOL349 - Global Environmental Politics

Course Description

This course examines the international community's responses to various global environmental problems. Because many environmental problems cross national borders, solutions require some form of global governance such as state-led mechanisms in the form of international environmental regimes. The course will thus explore how and why states both succeed and fail to negotiate international governance mechanisms. The course will also examine why some international environmental regimes are more effective than others and why states choose to comply with environmental regimes.

PUBPOL368S - Race and The Media

Course Description

The need for media coverage more finely attuned to race and prejudice is crucial. Instead of informing audiences, many of the fastest-growing news programs and media platforms are invoking and exploiting old prejudices and deeply-rooted fears to compete for increasingly narrow audiences. Using the same tactics employed to mobilize political parties, they employ coded messages and demonize opposing groups as their audience shares soar and website traffic ticks up. This course dissects the powerful ways modern media feed fears, prejudices, and hate.

Course Description

Course looks at evolution of news leadership from the latter half of 20th century-present, including decline of newspapers, rise of Internet, collapse of traditional news business model, emergence of attention economy, reinvention of factchecking, and revolutionary arrival of social media. Students will explore key questions regarding news leader's role in society today, limits of news leadership, continuing changes in technology that impact role of news leader, new knowledge news leaders need, and role government has had in transformation of news landscape and leadership. Exploration of how challenges affect news industry, society, those entering field of journalism. Prerequisite: Journalism & Media 371.

PUBPOL383S - Politics of Sexuality

Course Description

Explores intersections among sexual identity, desire, and behavior and political institutions, public policy, and concepts of citizenship. Readings and methods will be interdisciplinary and will examine politics of sexuality in diverse sociocultural, international, and historical contexts. Topics may include: social movements; laws, policing, and incarceration; medicalization and eugenics; militarism and geopolitics; immigration and human rights; welfare policies; nationalism and citizenship; and reproductive rights.

PUBPOL384 - Public Speaking and Global Civil Discourse

Course Description

Theoretical and practical understanding of the elements of effective advocacy, especially as applied to policy issues. Focus on oral communication (both formal public speaking and interactive exchange), written exposition, and presentation skills. Emphasis on the human dimensions of the communication process-voice and body behavior, audience evaluation, focus, control and self-awareness. Identifies techniques for minimizing communication distraction, developing confidence in presentation situations, and analyzing informational requirements. Does not apply toward public policy studies major. This course is open to students in their junior or senior year.

PUBPOL385 - Reimagining the World Together: Why Friendship Matters for Our Future

Course Description

Explores friendship and why it matters in the frenzied world of 'likes' and 'swipes.' The average Facebook user has 155 friends. Instagram added a 'Close Friends' feature to distinguish friends from followers. Social media has weakened our sense of friendship. Still, Facebook users say that, of those 155 friends, they would trust only four in a crisis. Pursues the importance of friendship, not only as a place of private refuge but as a relationship of trust that facilitates insight and innovation and that has public purchase. Classes center on conversations between pairs of friends who bring their friendship, their work, and their imaginations to bear on the shape of the world in the future.

PUBPOL386SA - Politics and Culture Between Europe and the Middle East

Course Description

Surveys the changing geopolitical context of communities between Europe and the Middle East through an interdisciplinary cultural framework from WWI to the present. Emphasis on German/Turkish relations. Analysis of representations of nationalism, identity, ethnicity, gender and religion. Examines intersections of modernity, revolution, and lived and political Islam to analyze the ways in which political ideologies create and question Middle Eastern identities. Secondary theoretical readings, including work by political scientists, cultural critics, and policy experts. Taught in English as part of the Duke Middle East in Europe program.

PUBPOL387S - Documenting Black Experiences

Course Description

Explores how Black experiences have been documented and how crucial stories woven from real life get told. Students engage wide ranging contemporary and historical materials, including nonfiction, memoir, fiction, documentary and dramatic film, theater, poetry and music. Our aspirations are historical, but with an understanding that academic history, though irreplaceable, barely touches the range of storytelling that makes Black lives not only matter but transform the spaces in which they unfold. Our explorations are political, but in the largest sense—how Black power comes from making higher truth a tool, a weapon and a way of being.

PUBPOL401S - The Adventure of Citizenship: Lives of Civic Engagement

Course Description

What does it mean to be a citizen and live a civic life? In this course students will integrate academic content with their own community based experiences to understand and critique their understandings of civic engagement and social change. Students will reflect on their Duke experience and begin to chart their post Duke futures. They will gain knowledge of the historical context of democratic citizenship, understanding of the relationship between theory and practice, and familiarity with the contestations of civic engagement that emerge from considerations of race, class, and gender. Students will undertake independent projects to study those who have lived civic lives.

PUBPOL405S - Media and Conflict

Course Description

Focus on the role of media in the context of colonialism, war and conflict across various historical periods. Attentive to the ways that media technologies have been employed both as tools of power and vehicles of protest and resistance. Theoretical readings are paired with a set of international case studies -- e.g. colonial atrocity archives, #BlackLivesMatter, Syrian civil war, the Abu Ghraib torture scandal, the Israeli military occupation, drone strikes -- that enable us to test the applicability of theoretical discussions to contemporary case studies. Readings in Butler, Kaplan, Sontag, Stein and Kuntsman, Virilio and others.

PUBPOL406S - South African Life Histories

Course Description

South Africa presented the world with one of the great moral challenges of the 20th century. We will explore its history through the lens of biography and autobiography. The country underwent major transformations -- rapid industrialization, segregation, the rise and fall of apartheid, and the emergence of democracy. How did individuals experience these social changes? In what ways do individual lives illuminate these larger social processes? Protagonists include a prophetess, political artists and writers, exiles, and celebrated figures. Topics cover how segregation and apartheid affected people's daily lives, opposition to white supremacy, and the personal impact of the AIDS's epidemic.

PUBPOL409 - Leadership in International Relations

Course Description

Course analyzes the impact political leaders have on international relations by examining case studies of specific decisions dealing with events of international importance over the past 3 decades, including end of the Cold War; the Falklands War; the unification of Germany; the Gulf War; the Soviet Union collapse; restoring Russian power, the decision to invade Iraq. Considers styles of leadership by American and Russian presidents and provides a basis for comparing the styles of other leaders analyzed. Considers such questions as similarities/differences in qualities of leadership in different societies, extent to which leaders are victims of circumstance, and degree to which decisions can change things.

PUBPOL416S - South Africa and the World

Course Description

Throughout the 20th century, South Africa had the largest economy and military on the African continent. Its strategic geographic position and mineral wealth in gold and uranium made it an important ally for the largest economies in the world. The Cold War enhanced its significance. However, in the second half of the twentieth century, its policies of apartheid rendered it an international pariah. This course examines the ways in which countries, international institutions, and millions of 'ordinary' people shaped the course of South African history. How did South Africa interact with the broader world, and how did the world try to affect South Africa's policies of white supremacy?

Course Description

In this course, students develop policy expertise and professional skills relating to their Washington internship. In their final paper, students analyze a policy issue they have encountered in their internship and develop and evaluate alternative approaches to the issues. The course also provides students with skills that enhance their internship experience and that prepare them for future research and policy work. The skill-building components may include: analyzing sources of information, interviewing for research and for policy analysis, doing sensitivity analysis, providing constructive criticism, and briefing expert and non-expert audiences.

PUBPOL211-20 - Engineering Sustainable Design and the Global Community: Structural Focus

Course Description

Design and testing of solutions to complex interdisciplinary design products in a service-learning context with a focus on structural products. Technical design principles; sustainable and engineering best practices; prototype formation, testing and evaluation; and establishment of research and analysis methodologies in a community-based research experience. Working in partnership with a community agency (local, national, or international) and participation in an experimental learning process by engineering a design solution for an identified community need. Evaluation focused on design deliverables, fabricated prototypes and a critical reflection of the experimental learning process.

RELIGION151 - Christian Orthodoxy and Heresy

Course Description

Study of the major theological concepts of Christianity, in an attempt to understand when and why these concepts became part of the Christian legacy. We will study the theology of the Bible, the proclamations of the councils, the authoritative decisions of the churches, and the writings of the most influential Christian authors, up to our own day. For each of the focal points we will consider the historical and cultural contexts, and listen to the various participants in the debates, winners and losers. The course aims to clarify the main topics that are shared by all Christians as well as the topics that have led to division of Christianity in the past and to ongoing debate in the present.

RELIGION164S - Gateway Seminar - Antisemitism: Ethnicity, Race, Religion, Culture

Course Description

Focuses on selected anti-Judaic and antisemitic episodes from ancient antiquity through modern times, paying attention to both antisemitic texts and events. It evaluates competing theoretical frameworks for understanding antisemitism as ethnic, racial, religious and cultural phenomenon. Can antisemitism be understood as part of the history of racism or of other forms of ethnic hatred? Why were Jews so often target of hatred? How did both Jews and antisemites view their relations with each other? How do historians understand them? If there is limited continuity among antisemitic episodes, how can the prevalence and repetitiveness of antisemitism be explained?

RELIGION170 - Comparative Religious Studies

Course Description

The category of 'religion' is arguably a Western concept that is applied to Eastern traditions of thought and practice such as Confucianism, Daoism, Buddhism, and Hinduism. What are the differences, and as well as the similarities that might be hidden by the broad application of this concept, if we compare these traditions of thought and practice with the Abrahamic religions of Judaism, Christianity and Islam? How do ethical values get related to conceptions of human salvation or enlightenment and the ultimate source of the natural order? Is there a conception of free will that exists across these traditions? Is there a distinction between the realms of the secular and the sacred that runs across these traditions?

RELIGION181 - Silk Roads and China, Ancient and Medieval Transformations

Course Description

The Silk Roads are the oldest and longest routes of cultural communication and economic exchange connecting Asia, Europe and Africa. In use since the days of Alexander the Great, the Roads and its rail networks now extend from China to England, connecting 70 countries and forming a vital system. This course introduces the ancient to early modern histories, cultures, and religions of the Silk Roads anchored in four themes: Alexander's empire; life in medieval cities of Chang'an, Baghdad and Constantinople; Silk Roads religions and the interactions of Buddhism, Christianity, Judaism and Islam; and the Mongol empire visited through the travels of Marco Polo.

RELIGION184S - Religion and Popular Culture

Course Description

In Religion and Popular Culture we will analyze fashion, sci-fi, music videos, sports, anime, TikTok trends, cosplay, advertisements, celebrities, food, video games, Disney, memes, and more. By exploring a wide variety of examples from different times, places, and religious traditions, we will consider what makes popular culture so appealing, seductive, and controversial. Throughout the course, we will also consider how popular culture and religion intersect with nationalism, capitalism, race, gender, and sexuality.

RELIGION201 - Race, Film, and Religion

Course Description

In this course, we will examine how cinema both constructs and reproduces anti-black racism and how cinema works to liberate blackness from the strictures of racial domination. We will watch films from the past three decades that provide an opportunity to interrogate the relationship between race, gender, and sexuality. These films will also enable us to think about how cinema introduces unconventional notions of the sacred, a process that involves affect, desire, and imagination. Films that we watch may include: Moonlight, Medicine for Melancholy, Black Panther, Daughters of the Dust, Get Out, US, Pariah, and Selma.

RELIGION204S - Neopaganism and Witchcraft

Course Description

Neopaganism and Witchcraft investigate the religious phenomenon loosely called Neopaganism – an inventive mixture of New Age religions, Witchcraft, Druidism, Wicca, Earth Religions, and non-Native American Shamanism. The course focus on practices principally in Europe and the United States for a particular set of reasons. Christianity and its pagan others have played a critical role in the history of modern European and American imagination of the nation-state. Race, religion, and native soil are key aspects of neopaganism's embattled self-concept, particularly in the context of globalization and the perceived menace of multi-ethnic West.

RELIGION206FS - Clash of Civilizations: In the Heart of Europe

Course Description

This course focuses on the battle between barbarian invaders, established communities, and new religions in the Middle Ages. What became Spain and Portugal were battlegrounds between faiths old and new, a clash of civilizations between Christianity, Judaism, and Islam that would inform future global conflicts. We explore the history of this confrontation at the crossroad of civilizations—between East and West, Africa and Europe—and its effect on our worldview today. A common culture was forged in science, mathematics, music, literature, philosophy, and mysticism, a shared legacy shaping world history and the current world order. Part of the 'Geopolitics and Culture' Focus Cluster.

RELIGION207S - Secularism

Course Description

This course examines the theory and practice of secularism through a global and comparative historical lens. It interrogates how secularism is related to the concept of religion, from the formation and development of secularism to the policies and laws enacted by secular states. How are questions of gender equality, race, and the exercise of power connected to the practice of secularism? What is the place of religious tolerance, free speech, and minority rights in secular societies? How do secular states adjudicate questions of religion? A diverse range of case studies include Egypt, France, Senegal, Turkey, the United States of America, and beyond.

RELIGION208 - Ancient Myth

Course Description

Myths are humanity's longest-lasting and most powerful stories. They shape our understanding of transitions and crises, and explore the boundaries between right and wrong, life and death, and the natural and the supernatural. They can also be playful, exuberant, and highly entertaining. This course introduces students to the myths of Greece and Rome, with comparative material drawn from the Hebrew Bible and other ancient texts. Throughout the course we will also think about the role of mythology today, and the way we use stories to come to terms with ourselves and our world.

RELIGION210 - The Good Life: Religion, Philosophy, and Life's Ultimate Concerns

Course Description

What does it look like for a human life to go well? What leads to human flourishing or 'happiness' or 'success'? What is freedom? Love? Justice? What is the basis for ethics? What is our relationship to the natural world? What is the significance of death? How do our beliefs (or lack thereof) about God or the gods shape how we view the world? We will examine how philosophical or religious traditions around the globe have answered life's biggest questions. Traditions may include Confucianism, Islam, Christianity, Stoicism, Judaism, Buddhism, Hinduism, scientific naturalism, expressive individualism, and utilitarianism. RELIGION212S - Sci-Fi & Religion

Course Description

Religion intersects with Sci-Fi in a range of topics, tropes, and themes. They both tell stories about the place of human in the universe, the meaning and purpose of life. They both deal with the nature of good and evil, illusions and reality. Whether stories where someone is looking for the Creator, questioning the meaning of life and what makes us human, to plots that rely on religious myths, tropes, and themes, and even question the nature of religious institutions, Sci-Fi has been embedded in spirituality and religion. The course Sci-Fi and Religion explores the many entanglements between religion and science fiction and invites students to reflect on these issues.

RELIGION216S - Hinduism and Judaism: Culture, Religion, and Identity

Course Description

Using interdisciplinary comparative frameworks, this course will study how two major world religions, Hinduism and Judaism, create a dynamic cosmos that brings abiding meaning to the daily lives of millions of believers. Explores concepts such as 'ritual' and 'myth' by examining Jewish and Hindu materials from early to modern times. The broader aims of the course are to understand how each tradition imagines time, space, and matter, and to explore how claims about the sacred are transformed in modernity. Ultimately, it aims to inspire reflection on how religion, identity and culture function in the modern world.

RELIGION221 - Indian Cinema & Social Change

Course Description

Considers the transnational purchase, aesthetic, and civic sensibilities of Indian cinema focusing on Hindi-language films. Review begins with emergence of Indian cinema in 1890s, then considers how social change became a driving force during anti-colonial resistance and nationalist reform. Course focuses on the post-independence (1947-) period, when social justice activism enters the mainframe of 'Bollywood' film. Core inquiry centers on how the cinematic imaginary of India perceives faultlines in Indian society and expresses its social voice. Themes include caste, gender, sanitation, poverty, successfulness, religious fundamentalism, ageism, and sexuality.

RELIGION231S - Augustine's City of God

Course Description

Study of the literary form and argument of Augustine's epoch-making City of God: a rhetorical tour de force of consummate artistry and stunning originality and scope; and a political, religious, and moral critique of ancient Rome within a comparative, cross-cultural analytical framework that vindicates an alternative vision of society rooted in the Christian scriptures. City of God provides a remarkable example of sophisticated literary construction, rhetorical prowess, cross-cultural examination, and moral reflection. We focus on these four facets of a celebrated synthesis that breaks new ground in historiography, political science, and moral theory.

RELIGION233 - Exploring Science and Religion

Course Description

This Transformative Ideas course, geared to sophomore STEM majors, introduces the most pressing questions about science and religion. Core topics will include faith and reason; the origins of the universe; the existence of fine-tuning; evolution, randomness and design; the neuroscience of free will; the science of the soul; and science and morality. Other possible topics may include: recent theories of consciousness in psychology; the relationship between God and time; God and the epistemology of mathematics; religion and advances in AI; the neuroscience of religious experience; the possibility of miracles; and historical episodes in the development of science vis-à-vis religion.

RELIGION235S - Cross-Cultural Encounters**Course Description**

The dynamics of cross-cultural interaction have actively shaped the world for many centuries now. This class explores some of the religious, social, and economic forces that fostered increasingly global contacts in history. In particular, it examines how centrally located and cosmopolitan Muslims played a critical role in connecting people of far-flung regions, cultures, and religions with one another. It surveys the myriad encounters of Muslims, Buddhists, Confucianists, Hindus, Jews, Christians and more across Afro-Eurasia and into the Americas. How did religious networks, processes and events foster historic exchanges of ideas, practices, and commodities across the world?

RELIGION239S - Histories of the Future: Hope in the Past and Present

Course Description

This class, offered in the Transformative Ideas Program, explores the ways in which people have imagined the future from Antiquity to the present. We begin with a study of the prophetic traditions in Judaism, Christianity, and Islam and the spread of apocalyptic ideas in medieval and Renaissance Europe. Then, we turn to the emergence of the Idea of Progress in the Enlightenment and beyond before tracing the interplay of apocalypticism and progressivism down to the contemporary period. Historically these visions of the future – one religious and one predominantly secular – have played a major role in shaping the human capacity for hope. But what can we do at present? Neither narrative exercises the hold it once did. Where – in a moment of global crises – do we turn for hope? x

RELIGION242S - Jihad: Of the Self and the Sword

Course Description

Philosophies of jihad over time from the early Muslim community to contemporary theories of jihad. Looks at jihad as armed struggle, but also focuses on the spiritual dimensions of jihad as a struggle within the self. Explores conceptions of jihad as intellectual struggle known as ijtiḥād. Revival of the concept of jihad in the contemporary period for the confrontation with colonialism, modernity, and secularism. Examines key theorists of jihad like al-Maududi in India/Pakistan, Hasan al-Banna & Sayyid Qutb in Egypt, Ali Shariati & Ayatollah Ruhollah Khomeini in Iran, and Frantz Fanon in Algeria. Examines how the Black Power movement used jihad to fight for racial justice in the West, and how women interpret jihad, specifically as a struggle for gender justice.

RELIGION248 - Hip Hop, Futurism, and the End of the World

Course Description

In this course, we will explore the intersections between hip hop, black futurity, science-fiction, and visions of the end of the world. We will focus on hip hop artists who draw themes from fantasy and speculative fiction to both re-make sense of the present and to imagine a radically different future. We will explore how these artists invent personas, identify with the alien, invoke space ships from other planets, and blur the line between human and non-human. While the course underscores themes of futurity and possibility, we will also examine how these themes respond to enduring conditions of racial, gender, and sexual oppression. Artists we will focus on include: Outkast, Janelle Monae, Erykah Badu, and MF Doom.

RELIGION250 - Art and Christianity: A History of Christian Visual Culture

Course Description

This course is an introduction to the history of Christian visual culture from the early Middle Ages to the present. Beginning with controversies concerning the nature of images and their role in Christian worship, the course moves through successive eras of Christian history, focusing on Western Europe in the medieval and early modern eras, then following Christianity around the globe in the colonial period, ending with examination of modern European and American art that draws in different ways from the history of Christian ideas and practices. Readings and discussion in class focus on objects such as reliquaries, paintings, architectural settings, illustrated books, and prints.

RELIGION255 - Religion and Colonialism in Africa

Course Description

This course examines religious life in Africa across space and time with a particular focus on the impact of colonialism. We will investigate the role of colonialism in the emergence of the concepts of both 'Africa' and 'religion,' before moving to explore the continent's breadth of religious practice and thought. We will engage with a range of indigenous traditions, local Christian and Islamic practices, mission Christianity in a variety of contexts, and the movement of African religions beyond the continent. Literature will be drawn from religious studies, history, and anthropology, and will incorporate discussions on writing about Africa.

RELIGION257 - Understanding Chinese Religions

Course Description

In this course, we examine the major religious traditions in China today – Confucianism, Buddhism, Daoism, Christianity, Islam, and other religious traditions – through both historical and ethnographic case studies. By focusing on rituals and beliefs related to everyday life experiences, we gain an understanding of Chinese religions through both historical contexts and contemporary developments. We also consider what it means to be religious in East Asia in the 21st century. Students in this course are encouraged to think comparatively, to write analytically, and to learn how to discuss accounts of religious life with a sociological as well as historical imagination.

RELIGION258 - Religion and the Novel in Modern India

Course Description

Indian writing in English, especially the novel, provides a unique understanding of religion in the world's largest democracy. The novel has come of age in India, seen innovations and has influenced world literature. Indian and Indian-origin novelists have been Booker and Pulitzer winners, Commonwealth awardees, and Sahitya Akademi laureates. Course will examine how the Indian novel in English understands and mediates tradition and modernity, selfhood and society in a deeply diverse culture. Includes novels written during the twilight of British colonial rule, the Partition, and contemporary decades of rapid globalization and diasporic change.

RELIGION261 - From History to Fantasy: Medieval Religions in Film & Fiction

Course Description

Explores the intersection of modern popular culture and medieval religious culture. Deep dive into how modern creators of mass entertainment use common notions of medieval faith, power, race, sexualities and violence to capture and hold our interest, teach us lessons about ourselves, and sell products. How do our ideas of faith, sexuality, race and power inspire or constrain the fiction we create about the past? What impact does this have on consumers? Monks, nuns, knights, crusades, secret societies, suffragists, alt-right, plague. Modern novels, commentaries, history, medieval texts, neurobiology, TV, films, ads, games, memes, clubs. Read, discuss, write, research.

RELIGION266S - Harry Potter and Religion

Course Description

This course explores the response of many Christians to the Harry Potter book series. Some theologically conservative Protestants have claimed that the Potter books contain satanic messages, promote witchcraft, and celebrate practices of the occult. By contrast, many supporters of the books insist they positively convey Christian messages. By investigating the debate, 'Harry Potter & Religion' also examines the history of thought concerning 'magic' and 'religion,' the sometimes blurred boundaries between religion and science, and the place of technologies of enchantment in all of the above--magic, religion, and science alike.

RELIGION267 - Spiritual But Not Religious

Course Description

This course address one of the most pressing questions in the study of religion today: What does it mean to be 'spiritual but not religious'? This is a question that frequently appears in survey research; about a quarter of U.S. adults 'now say they think of themselves as spiritual but not religious' (Pew). In this course, we address the big questions about how to define 'religion' and 'spirituality,' and we use empirical data to acquire a new understanding of the lived experience of people who are 'spiritual but not religious,' not only in the United States, but also in Asia and other parts of the world.

RELIGION286S - Religion in Cyberspace**Course Description**

Is cybertechnology a religion? If so, what does that mean? Rather than an analysis of how Christians, Buddhists, Jews, or Muslims use cyberspace to practice their religions, this course will take up the thesis that cyberspace has challenged the very idea of what it means to be human and, in so doing, has itself become a religion. We will look at the 'canonization' of eccentric technologists like Elon Musk and Steve Jobs, examine the startling philosophical ideas about personhood embedded in artificial intelligence, study communities of cyberspace users casual and obsessive, and look at the ways in which cyberspace is reshaping the political landscapes of the contemporary United States.

RELIGION287 - Religion and Science**Course Description**

The diverse interactions of religion and science from the Renaissance to the present. The profound transformation of premodern science by seventeenth-century revolutions and nineteenth-century discoveries; in turn, the transformation of society, including religion, by modern science. Some consideration of physics and astronomy, but major focus on the impact of Darwinian anti-teleology and modern biology, especially animal studies, on 'natural theology' and traditional arguments from design. Thinkers to be considered include Francis Bacon, Montaigne, Spinoza, Thomas Huxley, Albert Einstein, and E. O. Wilson. Topics include evolution, human consciousness, human identity, and the human-animal boundary.

RELIGION301D - Religion, Restrictions, and Violence

Course Description

An examination of the historical roots and current manifestations of religiously-justified violence and disenfranchisement, with a focus on the Abrahamic traditions (Judaism, Christianity, and Islam). The violence treated will include the expressly physical as well as the more insidiously existential, including political and cultural marginalization. Major loci of exploration will include gender and sexuality; Israel-Palestine, and the intersection of contemporary identities. Topics include the nature of extremisms within each tradition, the challenges of assimilation and 'modernity,' and the role and nature of citizenship and territory.

RELIGION318S - Asian Religions in Film: Knowledge of the Other

Course Description

Through analyzing films and historical cases, this course asks fundamental questions about religion in global age: How do we understand religions that seem very different from our own? How do we relate to people from different religious traditions, often treated as the 'Other'? To answer these questions, we address various conceptualizations of the so-called 'Other.' Hegel, de Beauvoir, Said, and Iwamura lead the way in theoretical discussion, touching on issues in philosophy, feminist theory, and postcolonial theory. Films are examined to show the diverse ways Asian religions are lived and transformed in encounters with the West. This course aims to reach a new understanding of not only Asian religions, but also of religion itself as ever-changing categories of knowledge and experience.

RELIGION325 - The Seven Deadly Sins: Representing Vice and Virtue in Christian Tradition

Course Description

This course will trace the motif of the seven deadly sins in Western tradition, exploring two methods of understanding human psychology and behavior: the philosophical school of virtue ethics, which provides an account of how our actions and habits shape our characters and identities, and the artistic technique of allegory, which externalizes our inner life in vivid, sometimes shocking images, characters, and stories. Readings are drawn from philosophy (Aristotle, Aquinas), literature (Dante, Chaucer, Spenser), art (Giotto, Bosch), and present-day pop culture. Course assignments include both analytical essays and creative projects.

RELIGION367 - Bodies, Sex, & Christianities

Course Description

Christian scripture, literature, and art abounds with female figures. From the Virgin Mary to female saints, the Christian tradition has memorialized extraordinary women as models for lay women. How did Christianity challenge and preserve norms for female behavior? How did ascetic women and female martyrs transgress gender expectations? This course navigates the pitfalls and opportunities that the study of women offers for understanding the development of Christian belief and institutions. We will trace how gender was theorized and normative behavior prescribed and enforced within the periods of Late Antiquity, the Middle Ages, Reformation and modern day.

RELIGION383S - Jewish Italy and its Literatures: The Most Ancient Minority

Course Description

Jews in Italy are often referred to as 'the most ancient minority' or 'the most ancient of minorities' because of their continuous presence in Italy, from pre-Christian times to today. This course examines the wealth of literature, art, and culture that they have produced and inspired. We will discuss a range of works, from antiquity to modern day Italy, to analyze Jewish Italy and its representations. We will scrutinize representations of the ghetto, Jewish learning, antisemitism, family life, memory, and the Holocaust.

RELIGION384S - Islam in the Americas

Course Description

Explores how Muslim communities live and practice Islam in the American context. Examines diverse Muslim communities emerging from transatlantic exploration, trade in slaves, and migration as well as indigenous conversion. Discussion of religious and cultural identities of American Muslim peoples and consideration of questions of communal organization, religious authority, gender dynamics, youth culture, political and civic engagement, as well as American Muslim comedy and entertainment. Examination of impact of 9/11 upon American Muslims, their responses to the tragedy, and Americans' shifting perceptions of Islam and Muslims.

RELIGION385S - Islam, Medicine, and Healing

Course Description

This course explores the global history of Islamic medicine and healing through the intersections of religion and medicine in multiple contexts. It investigates how questions of health, healing, and illness have been addressed across premodern patterns, colonial and post-colonial transitions, up to the present. Students will examine how different approaches to spirituality, law, and science congeal and compete in relation to the human body, animals, food, pharmaceuticals, medicine, and hospitals. Through considering traditional healing practices to contemporary bioethics, this class analyzes how religion and medicine have been constituted, lived, and experienced around the world.

RELIGION389 - Black Religion, Anguish, and Liberation

Course Description

In this course, we will study the relationship between race, religion, and politics in the context of black strivings for liberation in the Americas, the trans-Atlantic, and so forth. We will examine how struggles against anti-black violence have been inspired by criticisms and re-interpretations of prevailing religious ideas and practices in addition to the creation of new conceptions of the sacred. We will focus on two different contexts/movements – anti-slavery/abolitionist movements and mid 20th century black freedom/decolonial struggles —considering in each case how religion is both an object of critique and a source of empowerment, agency, and resistance.

RELIGION399S - James Baldwin and Toni Morrison

Course Description

This course will examine the novels and essays of James Baldwin and Toni Morrison, focusing on a range of topics: blackness, gender, sexuality, the relationship between race, religion, and nation, and the relationship between anguish and hope. While considering the differences between these authors, we will explore how Baldwin and Morrison converge on a set of ethical and existential themes and concerns. In particular, the course will focus on a shared 'ethics of haunting,' a sense that a better future relies on our capacity to remember, mourn, and be unsettled by forms of racial and gendered violence that mark the past and present.

RELIGION401 - The Problem of Evil: God, Evil, Suffering, Sin, Meaning of Life, and Philosophy of Religion

Course Description

'The problem of evil' as the challenge of reconciling the existence of an absolutely perfect being (Omnipotent, Omniscient, and omnibenevolent God) with the existence of sin and suffering has one of the greatest problems of intellectual history from ancient to modern times. The problem of evil effects the 'meaning of life' deeply, so it is not exclusive to the monotheists, and involves atheists as well. This is an introduction to the problem of evil, and explores its major issues and concepts: the logical problem of evil, the evidential problem of evil, soul-making theodicy, natural law theodicy, process theodicy, anti-theodicy, free will defense, reformed epistemology, and skeptical theism.

RELIGION402 - Philosophy of Religion

Course Description

Philosophy of religion is a critical examination of metaphysics and rational justification for religious claims, as well as philosophical exploration of faith, religious experience, and the distinctive features of religious discourse. The course explores the nature of God's attributes; arguments for God's existence; the problem of evil; religious epistemology; religious language; God, science, and naturalism; faith and revelation; morality and religion; death and afterlife; miracles; and religious diversity. We compare the advantages and disadvantages of four methods of practicing the philosophy of religion: analytic, Wittgensteinian, continental, and feminist.

RELIGION411S - Imperialism and Islamism

Course Description

This course draws on transnational material to gain perspectives on the conflict between the US and its Islamist opponents. Its central concern is Islam's transnational past and relations of European empires to that past. It is guided by a transnational perspective framing specific case studies, original source material and arguments on the nature of global Islamist politics and on the US as an imperial power. Students will strengthen skills in global anthropological and historical analysis, using the conflict between the US and its Islamist opponents as a case study.

RIGHTS214S - Ethical Challenges in Environmental Conservation

Course Description

Examination of current ethical challenges in environmental conservation. Topics include the philosophical basis and challenges of mankind's responsibility to the natural world; prioritization of often conflicting conservation efforts; balancing the needs of humans and the environment; the disputed role of scientists as advocates; and the philosophical and political obstacles to conservation efforts. Analysis of the evolving environmental movement, in relation to current issues.

RIGHTS215 - Sociology of Racism in America

Course Description

Examines social history of major racial groups in the US and relationships to contemporary standing. Discusses central concepts sociologists use to analyze racial matters. Central theme: 'racism' is not mere 'prejudice,' 'ignorance,' or 'intolerance,' but a comprehensive historical system of racial domination organized around the logic of white supremacy. Discussion of 'whiteness' in the USA—how whiteness emerged as a social category, an identity based on experiences of variety of European 'peoples;' how it dominated the racial structure of the US since the 17th century, how wealth has been distributed along racial lines, racialization of Asians and Latinos, and color blind racism.

RIGHTS217S - South African Past and Present

Course Description

Explores the history of modern South Africa from the beginning of the mineral revolution in the 1860s to the post-apartheid present. We will cover mining-centered industrialization, the emergence of Afrikaner and African nationalism, segregationist ideology, and the construction of apartheid. We will examine the plethora of anti-apartheid struggles, and the regional and wide-ranging global efforts to end apartheid and usher in democracy. The establishment and promise of multi-party democracy, the AIDS epidemic, and the reemergence of social movements are all topics we will consider and we will conclude by reflecting on the place of South Africa as a regional, continental, and world power.

RIGHTS218S - Conflict Analysis in Africa (Case Studies)

Course Description

Utilizes four case studies to outline components of conflict analysis in Africa. Examines regional crisis nexus between Darfur, Chad and Central African Republic. Looks at issues of postcoloniality, autochthony, migration, citizenship, land tenure, and inequality. On a theoretical level, identifies potentially crosscutting, deeper layers of contemporary crises in Africa with the objective of establishing a series of templates, a 'protocol', for comparative conflict analysis and conflict management in Africa.

RIGHTS219S - Muslim Women Across the Ages

Course Description

This course explores the diverse realities of Muslim women's lives, from the origins of Islam to the present, through autobiographical and biographical accounts situated in their social, economic, political, and cultural contexts. The women we will encounter through textual and audiovisual materials represent a wide range of personal backgrounds, including scholars, mystics, merchants, philanthropists, poets, slavegirls, feminists, and Islamists. We will metaphorically travel across the globe and time to understand the multifarious facets of Muslim women's lived experiences.

RIGHTS239D - Women, Gender, and Sexuality in U.S. History

Course Description

Major questions relating to women and women's place in society over the course of U.S. history, broadly defined, from the colonial period to the present: How did different groups of women see themselves as women? How did views of women's sexuality change? How did men's and women's relationships and roles change? How did women understand their connections to the larger society? How did race, ethnicity, and class shape all those issues? Course uses a variety of materials, including novels, movies, images, and music to explore the ethical contours of women's lives in the past, following change over time to better understand women's position today.

RIGHTS240S - Filming Freedom Movements: Movies, Music, Monuments, Memory

Course Description

This class is a cross-disciplinary exploration of a series of questions about what societies choose to commemorate, what they stay silent about, what they try to repress, and how this changes over time. What impact does this have on public policy and cultural debate? Using a cross-cultural examination of four societies, we will draw on methods from the arts, art history, history, documentary, policy, cultural studies, critical race theory, sound studies, Indigenous studies, and feminist theory.

RIGHTS247 - Southern Voices: Activism and Progressive Movements in the US South

Course Description

This course explores the lesser known, often hidden, and dismissed works of activism in the US South, primarily through an ethnographic lens. While many know key moments of the Civil Rights movement, much equity and justice work today has its roots in large Southern post-Reconstruction efforts and conflicts. Interdisciplinary lectures will examine a wide variety of movements including labor, health, music, sports, food, education, religion, and media representations. The trajectories of these movements will be contextualized over time in order to understand current regional grassroots and policy actions as well as impacts on national policies.

RIGHTS283S - Death, Burial, and Justice in the Americas

Course Description

This interdisciplinary course explores the phenomenon of necroviolence: attacks on the dignity, integrity, and memory of the dead. Cases come from the United States, Latin America, and Canada. Topics include the rights of the dead, cultural attitudes towards the dead, and the 'ambiguous loss' experienced by loved ones of the disappeared. We also explore the activism of family members, volunteer cemetery reclamation groups, and forensic scientists who exhume mass graves to identify bodies. Students will interact with guest speakers, spend time in a local African American cemetery with ties to Duke, and do community work and research on behalf of the marginalized dead.

RIGHTS302 - Global Narratives of Illness and Disability

Course Description

The humanities help us learn more about the global experiences of people living with illness and disability. Using a global health humanities approach, we study illness and disability through biography, poetry, blogs, and art created by patients, families, friends, doctors, and caregivers. We look beyond data to find meaning through documentaries, theories of representation, and illness narratives. We explore different illness experiences, such as HIV/AIDS and Ebola; different disabilities, such as physical and cognitive; different gender identities and ages; and different locations, such as South Africa, West Africa, Papua New Guinea, Brazil, Haiti, and rural and urban USA.

RIGHTS313S - Social Movements in Age of Globalization**Course Description**

Study of primary models and theories of social movements developed in fields of Sociology and Political Science. Readings provide vocabulary and conceptual framework for understanding how people organize, how social movements use media, role of leadership, meaning of success, and several other basic issues. Focus on social movements of last few decades. Students will conduct group projects on a selected contemporary social movement. Contemporary social movements considered include Occupy, 15M movement in Spain, Gezi Park encampment in Turkey, urban protests in Brazil, and Arab Spring uprisings.

RIGHTS314S - Imagining Human Rights: Science Fiction, Culture, and the Creation of Rights

Course Description

This course engages students in the intersection of speculative fiction and the history of ideas about human rights and what it means to be human. Using interdisciplinary tools, including history, anthropology, and public policy, students will explore created worlds and new ways of thinking about what rights humans—and other beings—have, how those rights are proposed, and what happens when those rights are contested. The course focuses on how the imaginary influences or presages the real, allowing us to experiment with what-ifs. Students will work in Duke's Locus Archives of primary documents on 20th-century science fiction spanning writers from China, the USSR., and Japan.

RIGHTS316S - Apartheid South Africa and Struggles for Democracy

Course Description

Working through an array of diverse organizations – including the African National Congress, the Pan African Congress, the Black Consciousness Movement, a host of liberal organizations, the churches, the trade union federations, and countless more - South Africans fought against apartheid from its inception. In 1994 they achieved a multi-racial democracy led by President Nelson Mandela. This seminar explores key themes in post-World War II South African history, paying special attention to the plethora of anti-apartheid struggles, while analyzing the tenets of apartheid policies.

RIGHTS337S - Documenting US Women's Health Post-Roe v. Wade

Course Description

The overturning of Roe v. Wade in June 2022 led to the deaths of two women in South Carolina. One woman died from sepsis following self-instrumentation, and the second died after giving birth to a healthy baby. She began to hemorrhage; hospital administrators were afraid that the 'D&C' she needed to survive was too close to the abortion procedure. A physician team at Duke University Hospitals, led by Dr. Beverly Clark, began to see similar cases in North Carolina. The aim of this course is to document—in real time—the political and ethical dimensions of the situation that healthcare providers now find themselves in as they attempt to provide women the nationwide medical 'standard of care.'

RIGHTS346S - The Connection between Human Rights, Memory and How Societies Create Memorials

Course Description

This seminar introduces students to multiple approaches to why and how to create memory, with a focus on contributing to a project underway at Catawba Trail Farm. We are particularly interested in how to tell difficult stories of slavery, segregation, and inequality through new sites and interpretive plans. Students will conduct interviews and archival research in coordination with a Bass Connections project, 'Making Meaning at Historic Places' and the Catawba Trail Farm, a non-profit organization that builds community and addresses food insecurity through community gardening. As part of their community-building efforts, the leaders of this project are interested in reclaiming the history of the enslaved people who lived and worked on this property outside Durham.

RIGHTS350S - Documenting Black Experiences

Course Description

Explores how Black experiences have been documented and how crucial stories woven from real life get told. Students engage wide ranging contemporary and historical materials, including nonfiction, memoir, fiction, documentary and dramatic film, theater, poetry and music. Our aspirations are historical, but with an understanding that academic history, though irreplaceable, barely touches the range of storytelling that makes Black lives not only matter but transform the spaces in which they unfold. Our explorations are political, but in the largest sense—how Black power comes from making higher truth a tool, a weapon and a way of being.

RIGHTS371S - South Africa and the World

Course Description

Throughout the 20th century, South Africa had the largest economy and military on the African continent. Its strategic geographic position and mineral wealth in gold and uranium made it an important ally for the largest economies in the world. The Cold War enhanced its significance. However, in the second half of the twentieth century, its policies of apartheid rendered it an international pariah. This course examines the ways in which countries, international institutions, and millions of 'ordinary' people shaped the course of South African history. How did South Africa interact with the broader world, and how did the world try to affect South Africa's policies of white supremacy?

RIGHTS380S - Gender and Human Rights: Global Perspectives

Course Description

Challenges to women's human rights are plentiful. They include gender-based violence and poverty, as well as access to health care, education, and political participation. This course will evaluate the efficacy of the UN Convention on the Elimination of All Forms of Discrimination Against Women and other instruments and organizations of the human rights system in addressing violations of women's human rights in different countries, societies and civilizations, including the U.S. While the human rights of women, transgender and other gender-nonconforming people around the world will be the primary focus, these cannot be separated from conceptions of patriarchy and masculinity across cultures.

RIGHTS406S - South African Life Histories

Course Description

South Africa presented the world with one of the great moral challenges of the 20th century. We will explore its history through the lens of biography and autobiography. The country underwent major transformations -- rapid industrialization, segregation, the rise and fall of apartheid, and the emergence of democracy. How did individuals experience these social changes? In what ways do individual lives illuminate these larger social processes? Protagonists include a prophetess, political artists and writers, exiles, and celebrated figures. Topics cover how segregation and apartheid affected people's daily lives, opposition to white supremacy, and the personal impact of the AIDS's epidemic.

RIGHTS409S - Identity and Linguistic Rights in the Spanish Speaking Americas

Course Description

This course focuses on linguistic justice and linguistic rights in interaction with other human rights. The class explores concepts of language, power, linguistic discrimination, and raciolinguistics in the context of bilingualism/multilingualism, indigenous languages, and endangered languages. We will examine how language is used to shape and negotiate identities, and how it reflects and sustains social realities and situations of social inequality. Methodologically, we will use linguistic and sociolinguistic analysis and elements of critical discourse analysis.

ROMST165FS - Virtual Realities: Collective Dreams from Plato to Cyberspace

Course Description

What is 'virtual reality'? If something is real, isn't it also always actual, and if virtual, only almost or nearly real? What strange, hybrid no-mans-land lies midway between truth and illusion, and how can we learn to navigate inside this space? The puzzle is an old one, even if the technology we call VR is new. In this discussion-intensive course, we will read, watch, and play our way through some of the most powerful attempts to understand humanity's penchant for collective dreaming: from Plato's allegory of the cave, to the immersive spectacles of baroque theater, to the ghostly realms of gothic literature and modern film, to the invention of cyberspace and parallel universe games.

Course Description

Students will engage in collaborative activities that highlight the fluid movement between linguistic systems, fostering creativity and deepening their understanding of multilingual communication. Through collaborative exercises, discussions, and real-world applications, participants will develop critical skills to navigate and reflect on multilingual spaces. This lab will emphasize cultural awareness, linguistic flexibility, and the power of leveraging multiple languages in academic and social contexts. Students enrolled in this course, must also be enrolled in Spanish 203 and/or French 203.

ROMST204FS - Clash of Civilizations: In the Heart of Europe

Course Description

This course focuses on the battle between barbarian invaders, established communities, and new religions in the Middle Ages. What became Spain and Portugal were battlegrounds between faiths old and new, a clash of civilizations between Christianity, Judaism, and Islam that would inform future global conflicts. We explore the history of this confrontation at the crossroad of civilizations—between East and West, Africa and Europe—and its effect on our worldview today. A common culture was forged in science, mathematics, music, literature, philosophy, and mysticism, a shared legacy shaping world history and the current world order. Part of the 'Geopolitics and Culture' Focus Cluster.

ROMST205 - The Problem of Love in Western Literature

Course Description

Love causes problems. It can inspire passion or madness; foster alliances, destroy friendships, provoke war, broker peace. It impacts communities and raises fundamental questions about life. Exploring amorous discourse from two millennia –Plato's erotic ascent, Virgil's deceived Dido, Ovid's rules of seduction, Boccaccio's legitimation of female desire, Michelangelo's homoerotic poetry, Leonardo's sublimated impulses, Foscolo's tragic obsession, comic uncertainties of Svevo's modern lovers, and love from afar in Montale—we will see what changes, what persists, and ultimately come to understand what we mean when we talk about love today.

ROMST206 - Modern European Short Fiction

Course Description

Comprehensive examination of several important works of modern European short fiction by authors such as Kafka, Woolf, Svevo, Sartre, Joyce, Proust, Mann, Schnitzler, Gogol, and Calvino. While stories will be contextualized historically, culturally, and geographically, course is organized into thematic units, including animals, home, punishment, and love, to facilitate comparative analysis. Students engage critically with concepts such as identity, trauma, genre, and narrative form.

ROMST208FS - Bio-Lit: The Science of Renaissance Sex and Gender

Course Description

What is a woman? What is a man? Did Renaissance minds consider other options? Could women be intellectuals? Were male bodies necessary for reproduction? What taboos about sex and power were almost too scandalous even for the elites? Much as it does today, talk of sex and gender sparked hot debate throughout Renaissance Europe. Between the fourteenth and seventeenth centuries, bodies were sites of fascination and dread. This course studies 'Bio-Lit' (literature about life and the body), drawing on examples of epic and lyric poetry, medical treatises, recipe books, experiment logs, cosmetic how-to guides, paintings, and early opera. Offered as part of the FOCUS program.

ROMST217FS - Language, Thought, and Culture

Course Description

Examines how language, thought, and culture are interrelated processes and structures. Takes a sociolinguistic perspective that language and society are intertwined, to understand how language either constrains or influences thought, how culture and language interact, and how culture is constructed through cognition. Course covers the study of signs (semiotics), cultural and linguistic depictions of people, groups, and issues (representation and discourse analysis), individual and societal beliefs about language itself (language ideologies), how meaning is created and perceived (semantics), and how speakers use language in real-life situations (linguistic anthropology). Open only to students in Focus Program. Department consent required.

ROMST226S - Performing African Diaspora

Course Description

The Black cultural contributions of globally popular performance genres such as salsa, capoeira and kizomba often remain unrecognized. The objectives of this class are: 1) to understand the historical, cultural and political forces that created the African Diaspora and its rich tapestry of dances. 2) to question our assumptions that knowledge is only produced through the mind; knowledge is also produced and transmitted through moving bodies. To meet these objectives, the course will be a combination of seminar and studio: in seminar we will engage readings in anthropology, dance and performances studies about specific dances which we will then learn in studio.

ROMST233S - Performing Brazil

Course Description

Introduces the history and culture of Brazil through the lens of performance. The course explores the way performance arts (dance, music, carnival, theatre, sports) are celebrated as expressions of the African, Indigenous and European roots of Brazilian culture, yet also subjected to race, gender, sexuality and class discrimination. Readings, films, seminar discussions and studio workshops give students understanding of the social forces that shape Brazil; and a critical appreciation for the ways in which performance can both re-inscribe stereotypes and social injustice, and be an avenue for transgressive expressions, political protest, and liberatory practices.

ROMST235SL - Capoeira: Practice and Culture

Course Description

Lecture/lab course introducing the movement, music and culture of capoeira, an Afro-Brazilian martial art that combines dance, self-defense and acrobatics. Created by male African slaves in Brazil several hundred years ago, viewed as a social threat and outlawed in the 19th century, celebrated as an element of national identity in the 20th century, today capoeira is rapidly crossing national, racial and gender borders as it becomes a popular global practice. Studio classes twice a week focus on the basic movements, percussive music and call-and-response singing. Seminar once a week focuses on the historical, cultural and socio-political dynamics that shape capoeira in Brazil and beyond.

ROMST256 - Italian Baroque Art

Course Description

This course will trace the development of the Italian baroque in architecture, sculpture and painting. It will consider a variety of themes relevant to Baroque artistic production, including religious influences on the art of the period, namely the Reformation and the Catholic Counter Reformation; economic influences; central versus peripheral locations; issues of gender and sexuality; patronage; architectural site and meaning; urban planning and transformation; the artist, his workshop and rivalries; decoding the myths of artistic genius; and seventeenth-century primary sources.

ROMST258S - Women and Power in the Renaissance

Course Description

Explores the intellectual, social, and political history of women in Renaissance Europe. Despite the overwhelmingly patriarchal nature of early modern society, many women wrote treatises, dialogues, and poetry in which they argued for a broader role for women. Students will examine these primary texts (some by famous figures, others by much less well-known writers) within the context of a burgeoning social history that has provided a more nuanced view of gender relations and power in this period.

ROMST266 - Virtual Realities: Collective Dreams from Plato to Cyberspace

Course Description

What is 'virtual reality'? If something is real, isn't it also always actual, and if virtual, only almost or nearly real? What strange, hybrid no-mans-land lies midway between truth and illusion, and how can we learn to navigate inside this space? The puzzle is an old one, even if the technology we call VR is new. In this discussion-intensive course, we will read, watch, and play our way through some of the most powerful attempts to understand humanity's penchant for collective dreaming: from Plato's allegory of the cave, to the immersive spectacles of baroque theater, to the ghostly realms of gothic literature and modern film, to the invention of cyberspace and parallel universe games.

ROMST314 - What is Critical Theory? An Introduction

Course Description

This course is an introduction to fundamental texts and concepts in the history of critical theory. We will be expanding the scope of our examination well beyond the remit of the Frankfurt School, to which the term 'critical theory' is often linked and look at key texts in the history of political philosophy, social theory, linguistics and language philosophy, gender studies, critical race theory, and postcolonialism. All our readings will be primary literature from what might be dubbed a 'critical theory cannon' and is intended to introduce students in the humanities and qualitative social sciences to essential and foundational materials.

ROMST317 - The Body in Art in Early Modern Europe: Power and Limits of Corporeal Representations

Course Description

This course studies the artistic representations of the human body in many guises: aesthetic, political, social, cultural, and erotic. It analyses the different strategies artists deployed to develop rhetorics of the body both physical and emotional. It considers different media (including painting, sculpture, drawings, prints, architecture, and gardens) and major theoretical frameworks (including feminist theory, phenomenology, social theory and somaesthetics). This course considers the body dynamically through composition, as object of investigation, as locus of meaning and through social understanding. Lectures and discussions are complimented by corporeal performances and improvisations.

ROMST322 - Sample & Remix: Contemporary Cultural Production Across Arts & Media

Course Description

Sampling & remixing of previous works is a major mode of contemporary cultural production cutting across media and cultural practices. This course analyzes its genealogy, technological underpinnings, legal presuppositions and aesthetic consequences. Tensions between copy and copyright, between claims to originality and mechanical reproduction characterize this contemporary regime, now deployed globally. Its cultural implications will be distinguished from related modes of making art and meaning (imitation, citation, collage, montage...) and tracked through various objects: popular and avant-garde cinema; videogames, ready-mades and Pop Art; Hip-Hop and Electro; literature and DJ culture.

ROMST338S - Brazil and Lusophone Africa

Course Description

This seminar examines three historical components of the South Atlantic in terms of history, culture, and contemporary political and economic consequences. European colonialism in Africa and Brazil constitutes the baseline for this exploration, but the long and tardy nature of Portuguese colonialism in Africa in comparison with other European colonial powers, especially in its post-World War II manifestations, is our starting point. We will examine the last stages of Portuguese colonialism in Lusophone Africa, the African liberation movements and the efforts to forge new transnational relations among Portugal, Lusophone Africa and Brazil.

ROMST341S - Perspectives on the Amazon

Course Description

The Amazon has been a source of awe to outsiders at least since the first Europeans navigated the Amazon River in 1542. While early explorers searched the forest for a mythic city of gold, contemporary travelers, scientists, and concerned citizens look to the Amazon as the key to our endangered future. Focusing on a variety of textual and visual representations, we will deal with major themes in the history of the Amazon and consider the ways in which this vast and widely depicted region eludes representation, holding entirely different and contending meanings to distinct socio-cultural groups. Our sources include works by indigenous thinkers and cultural producers.

ROMST343S - The Acoustic Image in the Renaissance

Course Description

Examines the dynamics between Renaissance voice, sound, and the body. Navigates the intersections between literary and performance histories. Studies the crossroads of personal and collective identity, issues of gender relations, factors of agency and exclusion, and the instruments of power that govern vocal expression. Readings and listenings include works by Homer, Ovid, Sappho, Petrarch, Costa, Monteverdi, Behn, Lope de Vega, Corneille, and others. Thematic units featured: voice in theory, the autobiographical pen, the political chorus, and performing the resilient body. Questions discussed: Who is allowed a voice? What do voices measure? What voices get heard? And who listens?

ROMST350 - Brains, Everywhere

Course Description

Over the last three decades we have witnessed the speedy rise of the 'neurosciences,' an historical event characterized by some 'neuro-cultures' and 'neuro-subjects.' In this course we will track this history and ask what change in meaning might 'neuro' effect in the disciplines that were previously 'neuro'-free. If there is a neuro-turn in the humanities and social sciences, what is it that's 'turning'? We will consider the centrality of brain research in these discussions to ask questions about the meaning of 'personhood/subjectivity,' 'human/post human,' 'mind/body,' 'self/ego,' and 'emotion/affect.'

ROMST365S - Latino/a Popular Culture

Course Description

Examines connections between US Latina/o and Latin American populations mediated by contemporary popular culture and the world of the commodity. Explores sociocultural and political issues in US national culture, the ways US Latina/o cultures dialogue across the Americas, and how Latina, Latino, LatinX, and Latin American bodies inhabit particular cultural and geographic contexts. Addresses how popular cultural forms are developed, contested, or resolved vis-à-vis issues of difference, multicultural inclusiveness, domestic history, narratives of exile and migration. Materials covered include films, documentaries, television shows, art, advertising, comic strips, food fusions, music.

ROMST366S - Picaras and Outlaws: Global South Feminisms**Course Description**

The term 'pícaras' or 'rogue outlaw' was designed to regulate and criminalize the bodies of women transgressing boundaries. This course uses the term to delve into the heroic histories of some of the most prominent women voices across the Global South and the various ways they challenge normalized and heteronormative structures of society. From a Cuban slave revolt leader, or the 17th century colonial 'Memoire of Basque Transvestite in the New World,' to the seminal Borderlands=La Frontera, prominent African Feminist theorists, and pop culture film Real Women Have Curves, we will read and engage in some of the most daring accounts of women power throughout the ages.

ROMST377S - Language & Identity: How We Construct Identities and Reproduce Social Hierarchies Through Language**Course Description**

Language is a central and pervasive feature of human identity through which we portray ourselves and negotiate social identities. With such practices we re/produce values, norms, social hierarchies, and the privilege these entail. Using examples from media, literature, and ethnographic data we will explore how speakers negotiate social identities through language and how ideas about it inform our understanding and interpretation of society and speakers within it. Topics include language, racism, gender, sexuality, class, ethnicity and ways that language and discourse construct and maintain a sense of belonging, otherness, truth, and value. Not open to students who have taken Romance Studies 207FS.

ROMST378S - Svevo and World Literature

Course Description

Italo Svevo wrote some of the most important modern Italian novels, like 'Zenos Conscience,' and was promoted by James Joyce. This class examines Svevo in his various contexts, including Italian, Austrian, German, Jewish, Triestine, European, and Modernist, to understand the strengths and weaknesses of classifications according to language, religious or cultural background, nation, education, and literary movement. By reading Svevo in the company of authors, such as Pirandello, Proust, Woolf, Kafka, and Shakespeare, as well as thinkers like Freud and Darwin, students will explore Svecos work in detail, while also investigating ideas of influence, literary connections, and world literature.

ROMST380 - France and Africa: The Politics and Culture of (Post-)Coloniality

Course Description

Examination of the Franco-African relationship over time, from the four 'communes' in Senegal to the present, through a political but also broader cultural lens. France's colonial doctrine and practices, African resistance and collaboration, 'la francophonie' and the postcolonial 'Françafrique' are analyzed as well as collective imaginaries on either side and how they shaped each other in literature, film, the social sciences or everyday life. The course is taught in English but a preceptorial class in French is offered in addition so that students can meet the requirement for their major or minor in French. Newcomers to Africa are welcome.

ROMST381S - Mapping Jewish Modernism

Course Description

Students research Jewish modernism through questions of geography and movement, pointing to the many places where modern Jewish art has been created and the experiences of migration, exile, diaspora, and resettlement that shaped this work. We discuss the varieties of ways that different art forms, including literature, theater, music, art, film, architecture, and dance, can be mapped. We analyze mapping in terms of the movements of people (artists, authors, and directors), of objects (paintings, literature, performances, and films), and within the works themselves. Work with the Rubenstein Library will lead to projects that contribute to an exhibit in Perkins Library and a digital site.

ROMST430 - Music History and Politics in Contemporary Africa

Course Description

The objective of the course is to analyze the social, political and cultural dynamics of post-independence African states through the musical archive. The course will analyze the role that music has played in the construction of national identities in post-colonial African states, but also in social, political and cultural dynamics of contemporary Africa. From High-life in Ghana to Congolese rumba, Afrobeat in Nigeria, reggae, Hip Hop and Raï, it will show how music has accompanied societal and political evolutions of African nations. The course will think of music as a landscape and analyze the musical circulation, as a space for the constitution of African societal modernities. In English.

RUSSIAN206S - Laboratory of Ongoing Catastrophe: Contemporary Russophone Writing

Course Description

This course is both a deep exploration and a creative journey into contemporary Russian literature born out of the catastrophic realities of war, repression, and societal upheaval. Students will immerse themselves in poetry, prose, plays, reportage, diaries, manifestos, and letters to uncover how writers document crises and create a voice for those silenced. Beyond analysis, this is a laboratory space to experiment with your own creative responses to the themes explored. Each week, we'll examine literary works, discuss the cultural and historical contexts that shape them, and engage in writing workshops designed to ignite your imagination. Together, we will explore literature not only as a mirror to broken reality but also as a form of resistance and a tool for survival.

RUSSIAN224 - From Stalin to Putin: The Art of Dictatorship

Course Description

When the Soviet Union ceased to exist, many believed that Russia's history of autocratic rule might finally end. Today Russia under Putin appears to be retreating from democracy. Putin's rule is routinely compared to a dictatorship. The Soviet most notorious dictator, Stalin is being rehabilitated by the Russian establishment. This course traces the history of modern Russian politics from Stalin to Putin and examines how such completely ordinary individuals managed to amass the kind of power that is best described dictatorial. It examines the complex evolution of communist and post-Soviet leadership. The course is comparative and draws on Nazi Germany and Fascist Italy as case studies.

RUSSIAN237 - Russia in the World: From Cold War to Putin's Wars

Course Description

Traces evolution of Russian Federation foreign policy from the collapse of the Soviet Union at the beginning of the 1990s to the 2022 war in Ukraine. Examines elements of Russian grand strategy: military, economic (especially oil and gas), and diplomatic tools. Explores the role of one individual, President Vladimir Putin, in shaping policy in an increasingly autocratic state. Focuses on Russia's relations with its neighbors, former allies, Europe, and the wider world, including the United States. Identifies linkages between domestic politics and events and foreign policy. Assignments focus on translating historical knowledge into actionable policy advice to meet current challenges.

RUSSIAN267S - Global Cold War

Course Description

Traditional narratives of the Cold War focus on a bi-polar series of conflicts that pit the United States against the Soviet Union in a good-versus-evil battle for global political and military supremacy. This course destabilizes this account of a process that affected every continent on earth – and even reached into space – over the period of more than half a century. It explores the Cold War from East-West, North-South, global, and interstellar perspectives. In addition to political and military issues, the course will also discuss the Cold War in social, cultural, intellectual, and economic spheres.

RUSSIAN278S - Literatures and Films of Pandemic

Course Description

This course explores past pandemics as a way to think about how to best live through COVID-19 and prevent or minimize future pandemics. Through examining literature and film, we will analyze the psychosocial dimensions of pandemic. We will read a variety of texts including: histories, fiction (Bulgakov, Porter, Tolstoy, Colson Whitehead); short essays; and films (e.g., Contagion, Outbreak). How do science, medicine, and society interact in a time of pandemic? How do pandemics reveal social inequities, and how could we use this knowledge to decrease disparities? And why do people turn to the humanities and arts in times of pandemic?

RUSSIAN310S - The Russian Fairy Tale and Its Cultural Legacy

Course Description

Extending beyond both Russian and the fairy tale genre alone, this course explores Slavic folklore in two major categories: cultural practice, from magic to social rites and material culture, and lore, from folktales to epic poetry. We survey the folklore of Eastern (Russian, Ukrainian, Belarusian), Western (Polish, Czech, Slovak) and South (Bulgarian, Croat, Serb, Macedonian, Slovenian) Slavs. This course offers knowledge of these places of the world while also showing how the study of folklore intersects with topics in cultural theory, literature, and history. Assignments will include participation, weekly posts/quizzes, and mid-term and final papers.

RUSSIAN319 - Introduction to Russian Culture through Art

Course Description

This course focuses on the art and visual culture of the Russian Empire and Soviet State/post-Soviet state. Emphasis is placed on the connections between art and politics from the social realist painting of the nineteenth century Wanderers through modernism and the avant-garde (Futurism, Suprematism, Constructivism, and Socialist Realism), to contemporary Russian art's response to global crises, including the war in Ukraine. We will look beyond Moscow and St. Petersburg toward other regions critical to the development of culture, including Kyiv and Kazan. The course offers a foundational understanding of modern Russian/Soviet/post-Soviet culture through the lens of the visual arts.

RUSSIAN331 - Demons, Rebels, Madmen, Fools: Non-Conformists in Russian Literature, Culture, and Film

Course Description

Examines the Russian anti-hero as literary figure, social critic, religious seeker, and revolutionary. The non-conformist hero performs an ethical role in culture, speaking truth to power and suffering the consequences. The tension between hero and society produces one of the world's great literary traditions, and offers a framework for understanding Russia's lurid history. Subjects include the scetic monk, holy fool, anarchist, political revolutionary, Gulag prisoner, drunkard, murderer, punk poet, vampire, and demon. The course will discuss folk tales, hagiographies, stories, poems, songs, films, and multimedia. Authors will include Avvakum, Pushkin, Dostoevsky, Tolstoy, Leskov, Chekhov, Shukshin, Erofeev, Pelevin, Tolstaya, Pussy Riot, and Tarkovsky.

Course Description

What can we learn about war when we listen to the voices of women who lived through it? This course dives into the often-overlooked stories of women who lived through political violence—not just as survivors but also as soldiers, mothers, and witnesses. Through personal accounts and literary narratives from the twentieth and twenty-first centuries, we will examine how women's stories challenge traditional, male-centered understandings of war. This course invites students to critically engage with the intersection of gender, politics, and memory, exploring how women's stories reshape perspectives on war and violence.

RUSSIAN376S - Peasants in Russian Revolutionary and Counter-Revolutionary Thought and Literature

Course Description

This course offers a history of Russian social thought through the lens of literary representation. It focuses on the analysis and interpretation of creative texts in the context of debates about the peasantry as a force of change or stasis. Bringing together history and literature, this course engages cross-cultural inquiry on several levels. Familiarizing students with Russia's political and cultural past, it also introduces them to the cultural differences of class in one of the most hotly debated contexts for the topic: pre-revolutionary Russia. Students are asked to analyze literature while also learning of its historical background. Taught in English.

RUSSIAN399 - Global Russia

Course Description

Through novels, short stories, poems, films, and cultural criticism produced in the last fifty years, the course equips students with the tools needed to unravel the historical, social, and philosophical underpinnings that have shaped Russian culture both within its native borders and in the global diaspora presented by the émigré community. The course analyzes state-sanctioned vs. oppositionist cultural productions while offering a prism through which the human experience is examined, inviting students to engage with a storytelling tradition that crosses, challenges and transcends linguistic and cultural thresholds.

SCISOC138FS - Genomics of Host-Microbe Interactions: The Symbiotic Web

Course Description

Genomic insights into the astonishingly diverse microbial world, including microbes that interact with hosts in beneficial and harmful ways. Dominance of microbes in our own bodies, which contain 10 times more bacterial cells than human cells and 150 times more bacterial genes than human genes. Understanding how microbial interactions have impacted life's history, genome evolution, ecology, and human health. Factors that dictate trajectories toward parasitism versus mutualism, how microbial symbionts respond to environmental change, molecular and cellular mechanisms of homeostasis. Readings will focus on primary articles. Open only to students in the Focus Program.

SCISOC140FS - On Suffering: How Science and Stories Shape Us

Course Description

By studying written and oral storytelling (including news articles, research reports, case histories, speeches, etc.), this course explores arguments for, and critiques of, appealing to stories in the face of suffering—personal and environmental—and starts articulating theological and ethical implications of 'being an engaged witness in the world.' We will listen to historical and contemporary voices that have shaped our views of the world, explore characteristics of pseudoscientific movements that make us squirm, and dig into the apparent and real differences between scientific, experiential, and theological reasoning. Open only to students in the Focus Program. Department consent required.

SCISOC153FS - Drugs and the Law

Course Description

Exploration of the relationship between addictive drugs and the law. Examine mechanisms by which drugs of abuse affect the brain and decision-making on the individual level, and consequences of those effects on the societal level, then examine how society responds to these behaviors in terms of attitudes and laws. Compare perspectives of the criminal justice system with that of drug users. Class consists of lectures, discussions, guest speakers, and media presentations and a project examining cross-generational views on drug use, abuse, and laws. Open only to students in the Focus Program. Instructor consent required.

SCISOC170FS - You, Me, and the Machine: Philosophy and the Idea of AI

Course Description

The idea of AI raises epistemological questions about the nature of mind. What does it mean to claim that a machine thinks and understands? In better understanding some epistemological puzzles about AI, we will better understand puzzles about our knowledge of others, and ultimately knowledge of ourselves. Topics may include: symbolic and connectionist AI, the computational theory of mind, intentionality, mental content, embodied cognition, functionalism, behaviorism, consciousness, and self-knowledge. Authors may include: Turing, Searle, Putnam, Nagel, Dreyfus, Kant, Heidegger, and Wittgenstein. Students will gain familiarity and practice with philosophy as an activity by interpreting, evaluating, and constructing arguments. No background in computer science is required.

SCISOC189FS - 'To Boldly Go!' Global Health and the Ethics of Engagement

Course Description

For the 'Science and Religion in Public Life' Focus Cluster, this seminar helps students think ethically about assumptions and language in Global Health. The title comes from Gene Roddenberry's built world of Star Trek. We use his world to examine cross-cultural engagement. How has culture and power in the U.S. framed interactions with and control of people inside the U.S. and in other countries? This includes the framing of people carrying disease to women whose bodies represent a threat to social order. Students analyze historical documents and images from popular culture and write weekly close analyses. No exams. Writing intensive.

SCISOC191FS - The Art and Soul of Healing

Course Description

This course offers an introduction to the multifaceted experience of being a physician through the humanities and the lived experiences of doctors. It moves beyond the scientific and technical aspects of medicine to explore the profound human dimensions of what it means to be a physician beyond science and technical skills: – the art and soul of healing. Through narrative medicine, discussions, debates, readings, movies, case studies, guest speakers, and experiential activities, students will gain a foundational understanding of the emotional, ethical, and interpersonal skills essential for compassionate and effective medical practice. Open only to students in the FOCUS Program.

SCISOC195FS - Medical Instrumentation in the Developing World (GE)

Course Description

Medical devices have revolutionized healthcare in the developed world. Yet, this technology revolution has failed to reach the developing world. Compared to the estimated 1.5 million medical devices introduced in the developed world in the last 50 years, only a few dozen pieces of medical equipment have been specifically designed to be appropriate and affordable for resource poor settings. We will examine and discuss the factors that make the research, design & development, introduction & marketing, maintenance and use of medical devices in resource poor settings uniquely challenging conditions. Focus students only.

SCISOC196FS - Patient and Research Participant Activism and Advocacy

Course Description

In the 1960s, patients appropriated the language and tactics of the civil rights movement to advance clinical and research agendas. Today patient activism is evolving, leading to new solutions, dilemmas, and organizational structures. This course will examine patient and research participant activism and the ways it challenges conventional notions of expertise, amateurism, 'human subjects protections,' and minimization of risk. Students will bring the tools of journalism, anthropology, humanities scholarship, public policy and community engagement/citizen science to bear on ethical and policy questions. Open only to students in the Science & the Public Focus Program cluster. Department consent required.

SCISOC197FS - From Siri to Skynet: Our Complex Relationships with Technology

Course Description

From mobile phones to driverless cars, modern high-tech devices have human-facing elements that shape our relationships with technology. Some integrate seamlessly into our daily lives, others frustrate us, and some simply captivate us. Students will investigate the intersection between people and technology to better understand how design can influence performance, safety, and user satisfaction. Topics include design principles; user experience concepts; and an overview of human strengths and limitations influencing interactions with technology. Case studies will include various technologies, including emerging systems such as brain-computer interfaces, robotics and artificial intelligence. Open only to students in Focus program. Department consent required.

SCISOC199FS - Imagining American Health**Course Description**

How has landmark public policy changed the health landscape in the United States and influenced the way we think and talk about health as a social fact? How has cultural expression both registered these changes and sought to influence law and policy? What debates have played out in public discourse regarding policies that impact health and how can attention to language and narrative literacy help us to understand both the potential and the limits of policy work? This course will explore these interactions between policies that impact health in its social context and cultural expression, focusing on photography, literature, and film.

SCISOC211 - Anthropology of Disability

Course Description

This course establishes ways to think about disability beyond medical definitions. It introduces the field of disability studies through a survey of canonical texts and core concepts of disability justice and critical studies of care. A foundation of disability studies and the course's guiding premise is that disability is not something inherently 'wrong' with individuals, but rather is shaped by society. Through ethnographies as well as films and memoirs, we will examine disability across global cultural and historical locations, and will address the traffic between disability and society across differences such as race, gender, and sexuality.

SCISOC212FS - Law, Ethics & Responsibility

Course Description

Examines the intersection of law and neuroscience, including the use of neuroimaging to determine if a witness is telling the truth; the implications of neuroscience for determining the mental competency of defendants, the insanity defense, the imposition of punishment on defendants. Considers the extent to which recent advances in brain science cause us to reevaluate fundamental legal concepts of 'intent,' 'insanity,' and responsibility; the ways in which neuroscience may be applied to these and related issues; and the inherent limitations and incongruities of applying brain science to legal questions.

SCISOC235 - Risk

Course Description

Simply put, risk is 'the possibility of something bad happening.' Defined in this way, increased attentiveness to risk has the potential to be paralyzing because it is present in nearly every aspect of human existence. This course, organized by the Duke Center on Risk, capitalizes on this ubiquity by bringing together ideas and approaches from all corners of the university. A unifying perspective is the recognition that risk involves elements of both chance ('possibility') and value ('something bad'). Therefore, students will learn the languages of probability and economics within the cultural settings of public policy, law, engineering, business, and medicine.

SCISOC242S - Bodies at Work

Course Description

This course traces the dynamic relationship between bodies and economies over the course of American history. If disability has been defined as the inability to work, then an exploration of disability necessitates an exploration of capitalism. Moving between disability studies and labor history, students will develop the conceptual tools necessary to understand capitalism through the lens of disability, while also generating new ways to think about disability via critical histories of capitalism. We will also look at how disabled people have pushed back, envisioning new ways of valuing bodies beyond productivity.

SCISOC295 - Inventing the Environment: Ideas of Nature in Literature and History of Science

Course Description

Course will explore western conceptions of nature in the modern period. We will ask: How have differing views of nature represented new definitions of the human? How have perspectives on nature changed historically in tandem with other cultural developments? What does it mean to have ethical responsibilities towards natural entities? How are ideas of the environment formed, critiqued, and changed through imaginative and investigative

practices such as those of science and literature? Views of the environment considered will include: resource, generative force, sacred space, ecological process, home, and apocalyptic wasteland. We will read diverse thinkers such as: Darwin, Blake, Thoreau, Humboldt, Goethe, Kafka, Theodor Storm, Haeckel, Lynn Margolis, and Octavia Butler.

SCISOC360S - The Environment in Literature, Law, and Science

Course Description

This class explores changing concepts of 'environment' and 'nature' in lit, law & policy, & science. Using the Duke Campus Farm, the campus, & surrounding areas, we trace those changes across historical periods and cultures, culminating in a consideration of the dismantling of Black Durham (red lining, 147) & the emergence of the Environmental Justice Movement (in Warren County, NC). We explore how those concepts are constructed through science, law & policy, & cultural forms, how those concepts shape our lived experience, & how an understanding of that process might lead to more productive debates in science, law & policy, & ethics, and to constructive social and environmental change.

SCISOC386S - Science Fiction Film

Course Description

This class will study science fiction film from 1950 to the present. Discussions will be organized around the relationship between scientific and technological innovation and social and geopolitical transformation: how, for example, the threats of nuclear war and the exhaustion of environmental resources, discoveries in virology and genetics, and the innovations in cybernetics and artificial intelligence all intersect with decolonization and global development, race relations, and new social and geopolitical configurations. We will explore how science fiction film registers and responds to the uncertainties of a changing world: to changing conceptions of the human and of life.

SCISOC415S - Capstone: Information History

Course Description

Data analytics, machine learning, deepfakes, artificial intelligence, mobile apps: revolutionary as it seems, today's information landscape is the product of centuries-long global history of information in society. Seminar introduces students to information history, a field scrutinizing information in/as technology, business, labor, governance, culture, politics, and science. Students conduct original research on a topic of their choice and write a major scholarly paper. Course fulfills Capstone requirement for History majors. Also, suitable for non-majors interested in historical perspective on computing and information, as well as prospective thesis-writers exploring topics and archives.

SES237 - Russia in the World: From Cold War to Putin's Wars

Course Description

Traces evolution of Russian Federation foreign policy from the collapse of the Soviet Union at the beginning of the 1990s to the 2022 war in Ukraine. Examines elements of Russian grand strategy: military, economic (especially oil and gas), and diplomatic tools. Explores the role of one individual, President Vladimir Putin, in shaping policy in an increasingly autocratic state. Focuses on Russia's relations with its neighbors, former allies, Europe, and the wider world, including the United States. Identifies linkages between domestic politics and events and foreign policy. Assignments focus on translating historical knowledge into actionable policy advice to meet current challenges.

SES267S - Global Cold War

Course Description

Traditional narratives of the Cold War focus on a bi-polar series of conflicts that pit the United States against the Soviet Union in a good-versus-evil battle for global political and military supremacy. This course destabilizes this account of a process that affected every continent on earth – and even reached into space – over the period of more than half a century. It explores the Cold War from East-West, North-South, global, and interstellar perspectives. In addition to political and military issues, the course will also discuss the Cold War in social, cultural, intellectual, and economic spheres.

SES388S - Illiberal Nondemocracies: Focus on Eastern Europe and Asia

Course Description

As of 2016, only 11% of the countries in the world are liberal democracies. Some insight about how illiberal regimes function is a must to understand what is going on in the world. In this course, we explore illiberal and/or nondemocratic regimes of Eastern Europe and Asia—a perfect laboratory for the subject. We develop nuanced ideas about key concepts such as elections, representation, party rule, dictatorship, populism, patronalism, authoritarianism, and totalitarianism as well as the dilemmas of freedom, security, corruption, and development. We study the regimes of countries such as Hungary, Russia, Turkey, China and follow the news to see how political regimes evolve in real time.

SES484S - Language and Politics: Global Perspectives

Course Description

We will never speak a single language, or agree on the best way to organize society and politics for 'the good life.' How do macro-politics affect the language(s) we choose to speak? What public policy initiatives can be deployed so that language is an accessible resource for all? Are there such things as language rights, and how can they be distributed and defended? These questions are not just academic, but essential to understanding the world(s) that we inhabit. This course takes a global and historical approach to the politics of language, examining the relationships between language, society, and the state.

SOCIOL125FS - Languages, Margins, Borders: Representations, Practices, and Policies

Course Description

Examines the relationships between language and contemporary migration patterns that, directly or indirectly, affect millions of people across the globe, focusing especially on migration flows related to humanitarian challenges. Divided into three key themes, it analyzes the representation of migrants and migration in media and culture; language practices of migrants, including translanguaging and language learning; and policies towards migrants and their languages that pertain to governance in linguistically diverse societies. Interdisciplinary in approach, readings are drawn from linguistic anthropology and sociolinguistics, as well as political sociology and public policy studies.

SOCIOL171 - Anthropologists in the Workplace: Applied Anthropology

Course Description

This course sets out to introduce students to some of the applications of anthropological theory and ethnographic method in contemporary institutional settings with the aim of familiarizing students with how anthropologists go about their work in complex organizational settings. Focusing on ethnographic method, as a powerful research tool, the course looks to both a series of use cases and an extensive literature of organizational management, user, and consumer experience. Students will have the opportunity to engage with anthropologists working in complex organizational contexts as well as business. Prior courses in Cultural Anthropology recommended but not required.

SOCIOL172 - The Anthropology of Design and User Experience (UX) Research

Course Description

The field of design and the burgeoning field of User Experience (UX) research has recently applied the methods anthropologists have used for over a century. The methods of cultural anthropology are distinctly aligned to ask questions about motivations, beliefs, values, and relationships within cultural systems through direct participant observation, surveys, focus groups, and archival research. Privileging critical listening, empathy, and perspective-taking, we try to discern why people do what they do, and apply these questions to human-centered design.

SOCIOL178FS - Refugees, Rights, and Resettlement

Course Description

35 million refugees and internally displaced persons in the world. A comparative historical overview of international refugee policy and law dealing with this growing population. Students will grapple with the ethical challenges posed by humanitarian intervention on behalf of refugees and the often unintended consequences of such policies. Students examine case studies to determine how different models for dealing with refugee resettlement affect the life chances of refugees. Service-learning course. Students will work with refugees from Bhutan, Burma and Iraq recently resettled in Durham. Instructor consent required.

SOCIOL195 - Critical Approaches to Global Issues

Course Description

Introduction to critical transnational studies through several disciplinary approaches. Examines capitalism and neo-liberal globalization and their relationships to culture, politics, economics, and other social forms and outcomes; considers transnationalism 'from below'; addresses linear and Western-centric thinking about progress and modernity; focuses a historical lens on political discourses, institutions, and projects to understand them contextually; demonstrates how cultures and identities are dynamically constituted in interaction with historical, material, political, and situational factors; considers how different inequalities and contestations inflect most social formations.

SOCIOL196FS - Patient and Research Participant Activism and Advocacy

Course Description

In the 1960s, patients appropriated the language and tactics of the civil rights movement to advance clinical and research agendas. Today patient activism is evolving, leading to new solutions, dilemmas, and organizational structures. This course will examine patient and research participant activism and the ways it challenges conventional notions of expertise, amateurism, 'human subjects protections,' and minimization of risk. Students will bring the tools of journalism, anthropology, humanities scholarship, public policy and community engagement/citizen science to bear on ethical and policy questions. Open only to students in the Science & the Public Focus Program cluster. Department consent required.

SOCIOL204S - Union Activism

Course Description

This course examines the past and present of U. S. union activism. This labor movement has been in prolonged decline in this country, but shown signs of revitalization as the gap between the earnings and opportunities for working people and the wealthy has grown larger than ever before. Readings and guest speakers will give students of rich view of labor organizing, with some written assignments. All students will gain hands-on experience by doing volunteer work with local labor movements. We will combine reflection about the history, problems, difficulties, and success of unionization through both our classroom and activist work.

SOCIOL208S - Transnational Feminism

Course Description

Explore feminist projects and approaches that cross a variety of borders. Under what conditions is solidarity across difference and inequality possible? This seminar examines this and other questions using relevant theories, film, and scholarship. Topics include activism, human rights, development, capitalism, war/militarization, racism, embodiment, and health. Assigned readings and films largely focus on the Global South but situate the Global North within circuits and relationships. The professor guides each student in preparing an original research paper on a relevant topic of interest to the student.

SOCIOL214 - Politics of Policing

Course Description

Drawing upon social science research, methodologies, and theories, this course examines the historical and contemporary intersection between policing and politics in the U.S. We first study the political history of policing, tracing its development from the colonial era to today. Next, we evaluate police incentives and power, covering theories of public legitimacy and organizational independence and strategic practices used to maintain social order, especially in marginalized communities. We then assess consequences of policing for social justice and civic incorporation. We conclude the course with an eye toward policing's future given ongoing controversies over racialized uses of force.

SOCIOL215 - Sociology of Racism in America

Course Description

Examines social history of major racial groups in the US and relationships to contemporary standing. Discusses central concepts sociologists use to analyze racial matters. Central theme: 'racism' is not mere 'prejudice,' 'ignorance,' or 'intolerance,' but a comprehensive historical system of racial domination organized around the logic of white supremacy. Discussion of 'whiteness' in the USA—how whiteness emerged as a social category, an identity based on experiences of variety of European 'peoples;' how it dominated the racial structure of the US since the 17th century, how wealth has been distributed along racial lines, racialization of Asians and Latinos, and color blind racism.

SOCIOL240 - Love and Loneliness: What's Happening to Relationships in the Twenty-First Century?

Course Description

Long-standing ties to other—whether of kinship, marriage, or community—have long been considered to be fundamental to the human condition. But in an age of dissipated and shifting social worlds, the relationships we form with others are radically changing in the twenty-first century. The class will critically examine the ideals, premises, and obstacles for forming intimacy with others through such cases as hook-ups, solitary death, solo weddings, domestic violence, human/non-human attachments, and migrancy.

SOCIOL241 - Race, Racism, and Democracy

Course Description

The paradox of racial inequality in societies that articulate principles of equality, democratic freedom, and justice for all. For years anthropologists have explored differences between what people say and what people actually do, the congruence and incongruence between structures of institutions and patterns of culture, and distinctions between myths and often-stark material realities. By the conclusion of the course, students can will better understand how the structures and processes of politics govern the everyday life of racial minorities in capitalist democracies.

SOCIOL242S - Bodies at Work

Course Description

This course traces the dynamic relationship between bodies and economies over the course of American history. If disability has been defined as the inability to work, then an exploration of disability necessitates an exploration of capitalism. Moving between disability studies and labor history, students will develop the conceptual tools necessary to understand capitalism through the lens of disability, while also generating new ways to think about disability via critical histories of capitalism. We will also look at how disabled people have pushed back, envisioning new ways of valuing bodies beyond productivity.

SOCIOL243 - Controlling Women: Women, Crime, & Social Control

Course Description

Examines how social institutions exert social control over girls and women by creating, recreating, and transmitting cultural norms, values, beliefs, and practices. Reveals how these cultural components shape women's and girls' lives historically, medically, socially, and politically. Highlights intersectionality and women and girls in the criminal-legal system. Probes various ethical issues, including differential application of rules and regulations, victimization, sentencing guidelines, school-to-prison pipeline, mass incarceration, capital punishment, political disenfranchisement, and medicalization of women's and girls' bodies.

SOCIOL251S - Science, Society, & Disability: Crippling Technoscience

Course Description

This course investigates the social aspects of technoscience (the intersection of knowledge, science, and technology) through the lens of disability. While the Americans with Disabilities Act generated new forms of accommodation through accessible design and infrastructures, technology and scientific knowledge have been tools of oppression, assimilation, and/or liberation for disabled people in differing cultural and historical contexts. With the United States as our (general) focus, the course will touch on such themes as eugenics, race, sexuality, gender, citizenship, and the nation-state.

SOCIOL252A - From Enlightenment Culture to Popular Culture

Course Description

Course constructs a sociological history of French (and partially European) culture by routinely using the city of Paris as an example. Analyzes conflicts inherited by contemporary culture in highlighting major moments that have defined it since pre-revolutionary era. Focuses on theoretical issues raised by each period, and the manner in which sociologists and critical theorists addressed them--from opposition of nature and culture just as it plays out for the pre-romantics, to the criticism of mass-culture by post-modern theorists. Sessions will be chronological, and will introduce and cover principle problems of social sciences. Taught in French through the Duke in France Program.

SOCIOL253A - The Return of the Collective (Psychosocial Approach Contemporary Spain) Theatre, Culture, & Identity

Course Description

The hasty transformation experienced by Spanish society the last 40+ years demands questioning the processes involved in its changing identities. This course delves into the economic, cultural, and linguistic circumstances that shaped the portrait of current Spain. By looking into contemporary theatrical production, we will consider causes, motivations, and consequences of the emergence of new subjectivities linked to the coming of democracy. To reach a better understanding of these new ways of thinking, sentimentalities, and behaviors operating in today's Spain, special attention will be paid to the social conditionings involved in the shaping of identities. Taught at Duke in Madrid.

SOCIOL256S - Just Work: Restorative Justice Models and Applications

Course Description

Rooted in ancient practices from indigenous cultures & religious texts, Restorative Justice (RJ) has gained interest as a means to reform the modern justice system and manage wrongdoing in schools and workplaces. This course takes an interdisciplinary approach to consider RJ as an alternative to typical retributive justice models. Examines RJ theory, RJ diversion programs, & the strengths and limitations of RJ's application, including Victim-Offender Mediated Dialogues, Community Conflict Councils, and Truth & Reconciliation Commissions. Asks: does RJ offer the paradigm shift our society needs to address the failings in our justice systems in our communities, institutions, & personal lives?

SOCIOL273S - Gender and Media

Course Description

The aim of this course is to critically analyze media culture and communication landscapes from a feminist and gender studies perspective. We will address a wide range of media innovations and their histories, unpacking and critically questioning them through the insights offered by feminist, queer, and intersectional analytical tools. To each, we will examine historical, ethical, sociological, theoretical, literary or film perspectives. What roles do media spaces play in our everyday lives and how do our politics and self-understandings inform and reflect burgeoning platforms? This course will consider these questions in terms of US media cultures and its interconnected global frameworks.

SOCIOL302S - South Africa and the World

Course Description

Throughout the 20th century, South Africa had the largest economy and military on the African continent. Its strategic geographic position and mineral wealth in gold and uranium made it an important ally for the largest economies in the world. The Cold War enhanced its significance. However, in the second half of the twentieth century, its policies of apartheid rendered it an international pariah. This course examines the ways in which countries, international institutions, and millions of 'ordinary' people shaped the course of South African history. How did South Africa interact with the broader world, and how did the world try to affect South Africa's policies of white supremacy?

SOCIOL314S - Race and Medicine

Course Description

This course looks critically at the role of race in modern medicine from historical and present-day perspectives. Race is central to any critical analysis of medicine--from the origins of gynecology and enslaved women, to tropical medicine and American empire, to contraceptive trials in Puerto Rico, to anti-Asian hate crimes in the advent of COVID-19. Through focused case studies, we will explore the racialized subject as intersecting with other categories of difference in medicine, such as sex, gender and sexuality. In parallel, we will ask how medicine has been used as a system of power and knowledge to create racial categories themselves.

SOCIOL319S - Global Environmentalism and the Politics of Nature

Course Description

Exploration of several themes: how local, national, and transnational organizations manage the environment, discuss it, study it, protect and defend it; who speaks for nature and to what ends; the differences between capitalist and socialist approaches to the environment; how relations among natures, nations, social movements, individuals, and institutions have changed over time. Case studies from Africa, East and Southeast Asia, India, Latin America, and the United States; study of new theoretical writing on the relationship between humans, technology, capital, and nature.

SOCIOL322S - Race and Society: South Africa and the US, 1890-present

Course Description

Scholars, pundits and historical actors have long drawn parallels between the United States & South Africa-two countries founded on the premises of racial inequality. This course explores the machinations of race from the quickening of industrial development to present. We will consider the benefits and pitfalls of thinking comparatively. Topics include segregation, transatlantic cultural exchanges, living apartheid and Jim Crow, government surveillance of political opponents, the American anti-apartheid movement, mass incarceration and privatization of prisons, memory and the struggles for social change as well as the persistence of racial inequality in two country's contemporary societies.

SOCIOL323S - Social Movements in Age of Globalization

Course Description

Study of primary models and theories of social movements developed in fields of Sociology and Political Science. Readings provide vocabulary and conceptual framework for understanding how people organize, how social movements use media, role of leadership, meaning of success, and several other basic issues. Focus on social movements of last few decades. Students will conduct group projects on a selected contemporary social movement. Contemporary social movements considered include Occupy, 15M movement in Spain, Gezi Park encampment in Turkey, urban protests in Brazil, and Arab Spring uprisings.

SOCIOL324S - The University as a Culture: A Survivor's Guide

Course Description

The university generates some of the most influential forms of knowledge in the world, yet we seldom examine the historically specific cultural, social, political, and economic conditions under which knowledge is produced in the laboratories, classrooms, offices, dormitories, Greek-letter societies, and sports complexes that are the infrastructure of the academy. This course will employ readings from a range of disciplines, as well as the investigative and interpretive methods of cultural anthropology, to examine the taken-for-granted context of university life.

SOCIOL330 - Bad Behavior

Course Description

What does it mean to behave badly? How is 'bad behavior' distinguished from actions that are otherwise described as evil or criminal? This course addresses these questions by examining ideas of deviance, wrongdoing, and misconduct in the nineteenth, twentieth, and twenty-first centuries—that is, modern behavioral categories that are considered to be aberrant without necessarily being strictly defined as transgressions of the law. We will consider how bad behavior concerns the disruption of implicit social norms rather than the explicit violation of legal or moral codes.

SOCIOL372S - Language and/in the Media

Course Description

The relationships between language and media have long been a socio-political concern. Plato was suspicious of the 'new' media of writing; at the end of the Middle Ages, the printing press meant Bibles written in the vernacular could weaken the power of the established church in Europe; today, fake news and online aggression are on the rise, potentially changing the outcomes of democratic elections. Innovations in media give rise to changes in both language practices and social, cultural, and political relations. This course looks at these issues from contemporary sociolinguistic and sociological perspectives, focusing on how linguistic resources are used to create and contest meanings.

SOCIOL377S - Language & Identity: How We Construct Identities and Reproduce Social Hierarchies Through Language

Course Description

Language is a central and pervasive feature of human identity through which we portray ourselves and negotiate social identities. With such practices we re/produce values, norms, social hierarchies, and the privilege these entail. Using examples from media, literature, and ethnographic data we will explore how speakers negotiate social identities through language and how ideas about it inform our understanding and interpretation of society and speakers within it. Topics include language, racism, gender, sexuality, class, ethnicity and ways that language and discourse construct and maintain a sense of belonging, otherness, truth, and value. Not open to students who have taken Romance Studies 207FS.

SOCIOL387 - Reimagining the World Together: Why Friendship Matters for Our Future

Course Description

Explores friendship and why it matters in the frenzied world of 'likes' and 'swipes.' The average Facebook user has 155 friends. Instagram added a 'Close Friends' feature to distinguish friends from followers. Social media has weakened our sense of friendship. Still, Facebook users say that, of those 155 friends, they would trust only four in a crisis. Pursues the importance of friendship, not only as a place of private refuge but as a relationship of trust that facilitates insight and innovation and that has public purchase. Classes center on conversations between pairs of friends who bring their friendship, their work, and their imaginations to bear on the shape of the world in the future.

SOCIOL450S - The Global Caribbean

Course Description

The course introduces students to the Caribbean as a transnational space that reflects the global dynamics associated with flows of bodies via migration, labor, and goods all of which have undergirded the birth and evolution of the (primarily) Atlantic world economy. The Global Caribbean will have a historical sociological bent that frames the region as the first modern colonial space which has served as a template for other projects of colonial and postcolonial development elsewhere in the world. Emphasis will be on the way that freedoms and unfreedoms operate in the Caribbean and elsewhere. Discussions of how knowledge has conditioned the representation of the region will be entertained.

SOCIOL471S - Language and Politics: Global Perspectives

Course Description

We will never speak a single language, or agree on the best way to organize society and politics for 'the good life.' How do macro-politics affect the language(s) we choose to speak? What public policy initiatives can be deployed so that language is an accessible resource for all? Are there such things as language rights, and how can they be distributed and defended? These questions are not just academic, but essential to understanding the world(s) that we inhabit. This course takes a global and historical approach to the politics of language, examining the relationships between language, society, and the state.

SPANISH317S - Community Health and Intercultural Awareness: Health Initiatives in the Andes

Course Description

This course delves into the complex relationship between community health and intercultural awareness. It explores how socio-historical practices and interaction with the land not only influence understandings of health, well-being and illness but also profoundly influence health care access, delivery, and outcomes within indigenous communities in Urubamba, Cuzco. Students will gain specific knowledge related to these communities and their health practices and outcomes. Students will also develop an understanding of the relevance of developing intercultural competence.

SPANISH320S - El poder de las palabras: el impacto del lenguaje en la sociedad

Course Description

This course explores the influence of language in society through critical discourse analysis. Students will examine how discourse shapes, reinforces, and challenges power structures, social inequality, and identities. By analyzing a range of real-world texts and contexts, students will learn to uncover the often hidden ways in which language can legitimize or disrupt social hierarchies and cultural norms. They will also gain tools to critically evaluate both explicit and implicit messages in discourse, empowering them to recognize the role of language in social change and reflect on their own responsibilities as language users in shaping societal values and beliefs.

SPANISH336 - Introduction to US Latino/a Literature

Course Description

Survey of US Latino/a Literature from 1960s to present. Examines formation of a Latino/a literary canon, its heterogeneous voices and imaginations, thematic strands, historical and political contexts, theoretical approaches, establishing critical overview of the range of nationalities, communities, identifications, and practices falling under the Latino/a designation. Explores how Latina and Latino identities have been envisioned and manifested since the Civil Rights Movement, and how Latina- or Latino-specific cultural production continues in dialogue with US multiracial landscape. Not open to students who have taken Spanish 336A. In English; does not satisfy Trinity FL requirement.

SPANISH338S - Race and Memory in the Americas

Course Description

This course confronts this relationship between memory and narrative and their role in addressing the trauma of colonization and the slave trade in its many iterations within Latino, Latin American and at times West African literature. Often pairing the readings with prominent UNESCO-sponsored memorials or other landmarks, this course endeavors to have students question how a transnational Americas remembers itself through narrative and memorialization, despite colonization, imperialism, neoliberalism, and heteronormative hegemonies. Taught in Spanish.

SPANISH344A - The Ecological Side of Spain: How the Climate, Biology and Territory Define Our Society

Course Description

This Duke in Madrid course aims to give a perspective that combines geography, biology, anthropology, and sociology in a joint vision of Spain as a natural space, and how this configuration is reflected in diverse creative environments: the cinema, literature, photography, or art from both past and present. Ecology, territory, the rural world, primary economic activity, and nature will guide us in our journey that, acknowledging Spain's biogeographical and climatic plurality, will take us from the paleolithic paintings in northwest Cantabria and their intimacy with nature to diverse stops in the Spanish context and the interaction of these stops with the environment and society.

SPANISH345A - Mobility, Health and Healthcare Systems

Course Description

This Duke in Madrid course reflects on the relation among health as a collective process, with healthcare systems as one element of a whole ecology of care, where global and urban structures determine both people's health and the organization of healthcare systems. Drawing on contemporary situations (pre-covid, covid, and post-covid) and diverse contexts (primarily European, but also North American and Latin American), we will explore the social components of health and how inequality (class, race, gender) affects the health of individuals and groups of population by exploring the role of the state, the market, and other actors (humanitarian, activist actors) in health provision.

SPANISH416A - Cultural Lab: Walk, Think, Experiment Now

Course Description

This Duke in Madrid course parts from the present, from what is happening culture-wise today, to offer a wider perspective on cultural systems and creative processes in our recent history. Most class sessions will take place outside the classroom and will have a participative character. One of the central concepts of this course is transversality, which allows the student to organize more dynamic and active comprehension networks than what is usually offered by courses in this field of study. Nevertheless, students will always have a base point to focus their direction of study related to the modules within the course: art, literature, architecture, politics, creation, theatre, technology.

SPANISH417S - Art & Democracy: Madrid/Barcelona/Valencia/Bilbao

Course Description

Beyond the poster, mural and graffiti, was there a painterly art in the pre-digital age that found a fitting place on the street and the square, the citizen venues where direct democracy and the people's rights first emerged? Is there an ethically responsive and socially responsible praxis which may yield visual works of enduring value without sacrificing the humanistic imperative of communicability? Since the 1950s such questions concerned Spanish artists in all styles (Tapiés, Genoves, Ibarrola, Equipo Cronica). Like Goya before them, these painters tried to help their society transition from political tyranny to more inclusive forms of participation. Prerequisite: Advanced reading knowledge of Spanish.

SPANISH418A - The Return of the Collective (Psychosocial Approach Contemporary Spain) Theatre, Culture, & Identity

Course Description

The hasty transformation experienced by Spanish society the last 40+ years demands questioning the processes involved in its changing identities. This course delves into the economic, cultural, and linguistic circumstances that shaped the portrait of current Spain. By looking into contemporary theatrical production, we will consider causes, motivations, and consequences of the emergence of new subjectivities linked to the coming of democracy. To reach a better understanding of these new ways of thinking, sentimentalities, and behaviors operating in today's Spain, special attention will be paid to the social conditionings involved in the shaping of identities. Taught at Duke in Madrid.

SPANISH419 - Spanish Cinema from the Transition to the Present

Course Description

Overview of Spanish cinema, from transition to our present days. Having undergone dramatic transformation in past years, Spanish film offers privileged area to study main features, novelties, contradictions, and tensions. Analyzes two chronological phases: the mid 70s to late 80s, characterized by intense cinematic negotiation with immediate past that unveils cracks and violences of normalizing erasure proposed from the political institutions; and the 90s until the present, a period marked by Spanish film's entrance in the global market, with its identitarian reassessment and emphasis in new pressing issues such as immigration, memory, and gender violence.

SPANISH420 - Poéticas de aquí y de allá / Thinking Language: Poetics from Here and There

Course Description

An overview of current Spanish and Transatlantic poetry, with special attention to poetics (i.e. how poetry thinks the world while it thinks itself). Following critical interventions of authors like Gertrude Stein or Octavio Paz, and poems and reflections of contemporary authors like Antonio Gamoneda, Olvido García Valdés, or Eduardo Milán, course considers theoretical issues such as subjectivity, poetry's relation to thought, its formal, or the question about reality. Also explores the possibilities of language to serve as a powerful tool of resistance and memory. Students will have the opportunity to meet and converse with some of these poets.

SPANISH425S - Cuzco: Local and Imperial

Course Description

Cuzco is a city in the Andes with a rich past that not only originates with the prominence of the Inca Empire, but also with its closeness to Aymara and Amazonian cultures. Its archeological record and history together with the prevalence of Quechua, Aymara and Spanish are tied to the city's pre-Columbian, colonial and contemporary cultural practices. The question that we will work through by engaging with readings and visual material is how a space or place—a city—creates its history and significance with the passage of time.

SPANISH433S - Photography in the Americas: War, Tourism, Art, and Protest

Course Description

Since it emerged in the 19th century until today, the camera has framed our way of seeing and understanding the world. In this course, students accompany the camera in its path through major events in the Americas—North, South, and Central—and examine the profound connections between them. We discuss photography as a weapon of war, a souvenir for tourists, an instrument of protest, an illustration of history, a journalistic and ethnographic tool, and an artistic medium. Key developments in photographic processes, from half tone printing to digital imaging, offer opportunities to reflect on the relationship between visual culture and technology, and art and politics. Taught in Spanish.

SPANISH437S - Atlantic Constellations: Migration, Exile, Second Slavery

Course Description

This seminar explores the collective identities of Afro-descendant slaves in the Americas as well as migrant and exiled Spaniards away from the homeland. We will consider three main themes: 1) chattel or second slavery in Cuba, and, secondarily, in the U.S. and/or Brazil; 2) Ibero-Atlantic diasporas since the mid-nineteenth century, including so-called white slavery; and 3) the career of María Zambrano, an expatriate intellectual who turned her banishment from Spain in 1939 into the enabling condition of her radical revision of Western philosophy and the ethics of exile. Prerequisite: 300-level or above Spanish course that meets foreign language (FL) requirement.

SPANISH438SA - Global Madrid**Course Description**

Focusing on Madrid's porous LatinX landscape, this course draws comparative perspectives across countries and cultures. Madrid's demographic growth, at least since the late-1980s, includes migrants from Bolivia, Colombia, the Dominican Republic, Ecuador, Honduras, Paraguay, Peru, and Venezuela. Rather than drawing clear-cut 'authenticating' distinctions between LatinX and 'the rest,' this seminar places Latin and X—LatinX—in dialogue with the Iberian Peninsula and Spanish-speaking 'communities' alongside sociocultural imaginaries that enmesh Spaniards, Latin Americans, Latino/a/Xs, and beyond. Taught at Duke in Madrid.

SPANISH442S - Jorge Luis Borges and Literary Representation in the Contemporary World

Course Description

This course examines the literary works by Argentinean author Jorge Luis Borges, considered one of the most important and influential writers of the 20th century. While early interpretations of Borges' work emphasized its aestheticism and the philosophical nature of his literary practice, more recent critics focus on its dialogue with a tradition of ethical and political thought dealing with issues of justice and the law, political representation and theology. We will read major works by Borges, as well as other major literary works from Argentina, representative works from 'high modernism', among others.

SPANISH443S - Spanish American Novel

Course Description

The course will introduce students to the analysis of Spanish American novels from the second part of the twentieth century to the twenty-first century. We will study the works by Spanish American authors that responded to the crisis induced by capitalist development and dictatorship, colonialism, expropriation, and extractionism, white supremacism and patriarchy, and how they explore and push the discursive limits of national sovereignty and capitalism and how they imposed their order upon living and non-living beings in the Americas. The course also explores how these novels respond to ecological crisis and the anthropocene, from a racial, gendered and transgendered perspective.

STA198CNL - Introduction to Global Health Data Science

Course Description

Rigorous introduction to health data science using current applications in biomedical research, epidemiology, and health policy. Use modern statistical software to conduct reproducible data exploration, visualization, and analysis. Interpret and translate results for interdisciplinary researchers. Critically evaluate data-based claims, decisions, and policies. Includes exploratory data analysis, visualization, basics of probability and inference, predictive modeling, and classification. This course focuses on the R computing language. No statistics or computing background is necessary.

STA199L - Introduction to Data Science and Statistical Thinking

Course Description

Intro to data science and statistical thinking. Learn to explore, visualize, and analyze data to understand natural phenomena, investigate patterns, model outcomes, and make predictions, and do so in a reproducible and shareable manner. Gain experience in data wrangling and munging, exploratory data analysis, predictive modeling, and data visualization, and effective communication of results. Work on problems and case studies inspired by and based on real-world questions and data. The course will focus on the R statistical computing language. No statistical or computing background is necessary. Not open to students who have taken a 100-level Statistical Science course, Statistical Science 210, or a Statistical Science course numbered 300 or above.

STA310 - Generalized Linear Models

Course Description

Linear regression and logistic regression can be used analyze multivariable relationships; however, they require data follow a particular structure and that certain assumptions be met. Building upon the the content from STA 210, this course will cover the broader class of generalized linear models, focusing on models for non-normal response variables. Students will also be introduced to multi-level models, and extension of generalized linear models used to analyze data with correlated observations. Focus will be on model fitting and interpretation. Applications will come from a variety of fields. R will be used for computing.

STA313L - Advanced Data Visualization

Course Description

This course is all about the art and science of visualizing data. Learn about the what (types of visualizations, tools to produce them), the how (start with a design, pre-process the data, map it to graphical attributes, make strategic decisions about visual encoding, post-process for readability and visual appeal), and the why (the theory behind the grammar of graphics). Evaluate the clarity, effectiveness, and honesty of visualization choices and improve (your and others') visualizations through an iterative design process. Discuss the role of statistical graphics in modeling and inference. Do it all in R, reproducibly, and using a variety of modern data visualization packages. Prerequisite: Prerequisite: Statistical Science 198L or (198L-1 and 198L-2) or 199L or (199L-1 and 199L-2) or 210L.

STA322 - Study Design: Design of Surveys and Causal Studies

Course Description

Investigation of study designs collecting data and their implications for statistical inference. Design and analysis of surveys of populations, including stratification, clustering, multi-stage sampling, design-based inference, considerations when analyzing convenience samples, and big data. Design and analysis of causal studies, including A/B testing and randomized experiments, blocking, fractional factorial designs, non-randomized studies, and propensity score analysis. Applications involving health, policy, natural and social sciences, as well as examples relevant to big tech. Not open to students who have taken STA 522. Recommended prerequisite or corequisite: STA 210L, 221L, 521L, or the equivalent.

STA325L - Machine Learning and Data Mining

Course Description

The rapid growth of digitalized data and the computer power available to analyze it has created immense opportunities for both machine learning and data mining. This course introduces machine learning and data mining methods. Topics covered include information retrieval, clustering, classification, modern regression, cross validation, boosting, and bagging. Course emphasizes selection of appropriate methods and justification of choice, use of programming for implementation of the method, and evaluation and effective communication of results in data analysis reports.

STA332 - Statistical Inference

Course Description

Definition of a random sample, statistical model, and likelihood. Definition and properties of estimators and sufficient, ancillary, and complete statistics. Point estimation: comparing estimators in a decision-theoretic framework (loss functions, risk, mean squared error) and optimality results (Uniform Minimum Variance Estimators, Fisher's information, Cramér-Rao bound). Hypothesis testing: comparing testing procedures and constructing optimal tests within the Neyman-Pearson framework. Tests based on the likelihood ratio. Confidence intervals: construction based on inverting tests. Asymptotic considerations: consistent and asymptotically efficient estimators. Likelihood-based asymptotic tests and confidence intervals.

THEATRST109 - How Musicals Work

Course Description

How do musicals work? How do musicals create alchemy in song and dance? What is the relationship between content, form, and context? These questions will guide our study of musicals and their evolution. We will then cover the elements of musical production: backstage labor, casting, choreography, direction, design, marketing, performance, producing, and more. By the end of the course, students will gain holistic understanding of how the musical theater industry works. Students will recognize various forms of musical theatre, gain an understanding of the pivotal relationship between historical context and dramatic form, and be able to chart how innovations often become conventions. We explore the world's most popular form of theater, musicals, on the page, the stage, and behind the scenes.

THEATRST141 - The Hollywood Musical: Singing and Dancing the American Dream

Course Description

Beyond its unapologetic praise of spectacularity and entertainment, what makes the Hollywood film musical a quintessential American genre? Since its origins, the Hollywood musical has been channelling various ideologies in its modes of performance and production; it has offered a space to address specific anxieties of the American society: modernity vs. nostalgia, representations of gender, ethnicity, class, and the low/high divide in arts. Emphasis will be given on its performative aspects, the relationship between choreography and song, the changing representations of the dancing body, musical styles, sexual objectification and the star persona.

THEATRST145S - Acting

Course Description

Acting 145S explores the craft of acting as an experiential and embodied knowledge through collaboration, imagination, play, and attending live theater. The course engages culturally diverse approaches to the practice while facilitating an introduction to voice and movement; monologue and scene work; audition preparation; and a creation of a dramaturgical toolbox to aid students in future classes and productions.

THEATRST187A - Reading Theater in New York

Course Description

Theater is a live art in which one assembly of people tells a story to another: the audience. This course introduces this art from two, interwoven perspectives. First we consider the scripts as artifacts of the past. We uncover the acting, directing, and design conventions that originally animated the scripts; the spaces for which they were intended; the audiences for whom they were performed. Then we consider the scripts as blueprints for the present with the guidance of guest artists in New York (some from Duke's alumni network) and site visits to theaters and rehearsal rooms. We see productions all plays, which are chosen from that season's offerings in New York.

THEATRST187S - Reading Theater

Course Description

In the theater, what we read on the page is an artifact of performances that once happened as well as a blueprint for stage performances yet to come. In this course, we work as archeologists to explore the meanings of the artifact and as creators—on our feet and with our bodies—to unlock the potential meanings of the blueprint. The course focuses on six plays, drawn from different periods in history and different countries, and includes non-European and non-white perspectives.

THEATRST198FS - Performing Science: Experimentation, Collaboration, and Artistry

Course Description

Combines a historical survey of science-themed plays with an examination of sci+arts initiatives such as the University of Western Australia's Symbiotica; the Art & Science Laboratory in New Mexico; and the UK's Centre for Performance Science. Central course questions: How can performing arts improve public awareness and knowledge about complex scientific ideas and research? What points of view and methods of research do artists bring to scientific inquiry and vice-versa? We will pay particular attention to secondary schools, contemporary art installations, and science museums as public laboratories for experimental, embodied collaborations across the two disciplines. Open only to students in the Focus Program. Department consent required.

THEATRST199FS - Knowing Through Performance

Course Description

Inquiry into the concept of 'performance' broadly construed; not only as it refers to 'staged' performances, but as social ritual and as self-representation, situated in cultural context. Writing experiments aimed at capturing the ephemerality of live performance, with attention to how meaning is enacted through movement, sound, lighting, rhythm, voice, emotion, and audience interaction. Regular writers' workshops and attendance of theater, dance, and musical performances. Students compose critical reviews and a research project on a performance genre, an artist's approach, or other related topic of their choosing.

THEATRST201S - American Musicals

Course Description

What is it about musicals that made them a uniquely American theatrical form? In this course, we will investigate how musicals represent what it means to be American. Musical theatre history is American history, indebted to and reflective of critical histories of appropriation, capitalism, immigration, and popular entertainment. Musicals seduce us in song and dance; it is easy to ignore the substance beneath the sequins. We will study the texts and historical contexts of musicals over the past century, from Shuffle Along, and Oklahoma!, to A Chorus Line, and Hamilton. Musicals reveal shifting notions of what 'American' means as they stage ability, ethnicity, gender, race, and sexuality.

THEATRST205A - Internship in New York

Course Description

Participants in this course are immersed in the professional work of New York's arts, culture, and performance industries through apprenticeship to a sponsoring artist, institution, or organization. Participants work fifteen hours per week at their internship and meet arts professionals from within and beyond Duke's alumni network. They also meet regularly with their supervising professor. In combination, this work experience, networking opportunity, and academic reflection help interns develop their professional capabilities, refine their interpersonal and workplace skills, and prepare for future work in creative industries.

THEATRST206SA - Duke in New York: New York, New York

Course Description

New York City is an idea as much as a real place. New York is always on the go. In this course, we focus on the people, places, and institutions that make and remake New York. We traverse each of New York's five boroughs, paying attention to the movements of people, culture, and food within them as well as attend to the social dynamics of geography and gentrification. Paralleling the evolution of the city's neighborhoods and ethnic enclaves is the establishment of its globally-known institutions. Experiencing the interplay of individuals and institutions allows us to examine life in the city through the lens of what geographer Ruth Wilson Gilmore terms an 'infrastructure of feeling.'

THEATRST211 - Musical Theater Workshop: Performance

Course Description

Students will develop the three primary skills of musical theater performance (acting, dancing, and singing) in this workshop. Students will also try their hand at choreography, direction, and dramaturgy as we collaboratively stage scenes and songs from musicals throughout the semester. We will analyze what makes musical theatre performance successful as we work to hone your own abilities and talents together. Each student will receive a mixture of individual and group coaching every week. The course will culminate in a student-led performance. Come prepared to move and to sing each week. All levels welcome.

THEATRST220SA - Korea in Performance: Global Culture and Soft Power

Course Description

This course surveys the various ways in which South Korea has emerged as a leading nation in the creation of global culture since the late twentieth century. Exemplified by K-pop and K-drama, various cultural contents created in and promoted by Korea have circulated globally and have had a lasting impact on popular culture, new media, and the arts around the world. By using specific case studies in Seoul and its vicinities and by inviting guest speakers, the course introduces students to topics of globalization, interculturalism, neocolonialism, neoliberalism, transnationalism, and tourism.

THEATRST223S - Modern German Theater and Drama

Course Description

Introduction to some major works of theater and drama of German-speaking central Europe, especially as they attempt to address contemporary social issues. Emphasis primarily on 20th century theater and drama. Authors include Bertolt Brecht, Friedrich Dürrenmatt, Peter Weiss, Peter Handke, Elfriede Jelinek and others whose experiments with dramatic form have drawn international attention. Discussions will explore the relationships between texts and their various theatrical performances on the stage and screen, as well between dramatic form and social-historical context. Final project may include performance of scenes from different plays. Taught in German.

THEATRST225S - Transformative Ideas: Power, Theater, and Politics

Course Description

What is power? How is it created, transferred, or lost within a polity? What happens when one entity seizes power from another? Must violence always be at the center of that event, or can shared culture animate the accumulation and maintenance of power in a society? This Transformative Ideas seminar examines how insights in political theory and theater studies have addressed these questions. Concepts include ambition; sovereignty; violence and coercion; collectivism, especially nationalism; and rhetoric. Key writers include Aristotle; Plato; Machiavelli; Sophocles; Shakespeare; Weber; Arendt; Douglass; Soyinka; Alfred Jarry; Caryl Churchill; June Jordan, and Lynn Nottage.

THEATRST226S - World Building for the Theater

Course Description

World Building for the Theater introduces students to the design components used to create a theatrical production: set, costumes, sound, lighting, and projection. Students learn the process that brings these components to life: play analysis for design, artistic research, design, technical and build preparation, construction, and final performance. Each student has the opportunity to focus on their particular area of interest while contributing to the creation of the Theater Studies Mainstage production. Students work in the areas of set, costumes, lights, paint, and backstage support, gaining hands-on practical experience with the tools of their chosen area of interest.

THEATRST245 - The Body in Art in Early Modern Europe: Power and Limits of Corporeal Representations

Course Description

This course studies the artistic representations of the human body in many guises: aesthetic, political, social, cultural, and erotic. It analyses the different strategies artists deployed to develop rhetorics of the body both physical and emotional. It considers different media (including painting, sculpture, drawings, prints, architecture, and gardens) and major theoretical frameworks (including feminist theory, phenomenology, social theory and somaesthetics). This course considers the body dynamically through composition, as object of investigation, as locus of meaning and through social understanding. Lectures and discussions are complimented by corporeal performances and improvisations.

THEATRST247 - Alexander Technique for Musicians, Dancers, and Actors

Course Description

The Alexander Technique provides a structured method of self inquiry which has helped performing artists improve their skills for over 100 years. By uncovering and transforming previously unconscious movement patterns and mental habits, performers can significantly improve their skills by increasing freedom and ease of movement. All instrumentalists and singers with a strong interest and background in performance are welcome.

THEATRST249S - Understanding Mediation

Course Description

Examines experience as always mediated. How does text mediate expression, or language mediate subjectivity? How do images mediate power, or sounds mediate resistance? How does computation mediate agency, or networks mediate thought? But also, how do nations mediate globalization, or oil mediate energy? And how do bodies mediate liveness, or the environment mediate history? Moves from particular media forms and examples (language, literature, the fine and performing arts, audiovisual media, computational media) to focus on key theoretical concepts and debates of critical theory from twentieth and twenty-first centuries. Crosses national boundaries to understand mediation from global perspective.

THEATRST250S - Queer Theater, Straight Plays

Course Description

If, as scholar D.A. Miller argues, musicals are 'a somehow gay genre, the only one that mass culture ever produced,' where does that leave queer plays? This course surveys US queer theater from the early twentieth century to today. We will study how theater, identity, and LGBTQ+ political movements intersect. We will read plays both well-known and obscure to see how queer writers skirted censors through coding and camp before Stonewall, how Gay Liberation made coming out possible in the 1970s, and how HIV/AIDS impacted theater. Queer theater's expansiveness since the 1990s in the age of equality continues to challenge, subvert, and reinforce norms and push boundaries.

THEATRST251AS - Duke in London: Arts

Course Description

This course surveys London as a site of dynamic cultural production, whose participation in the global marketplace of artistic commodities reveals the city's restlessly transnational, cosmopolitan character. Studying local institutions, students are introduced to the complex relationship among art, state, and the global cultural marketplace; studying a multiracial and multiethnic community, they become familiar with theories of globalization, neoliberalism, and cosmopolitanism, as well as migration and so-called national identity. Students also participate in excursions including dance, opera, and theatre productions and visits to museums and other sites of cultural importance.

THEATRST252FS - Performance and Citizenship in Asian America

Course Description

The course examines the relationship between performance and citizenship with case studies drawn from Asian American history. Performance has been central to the formation and expression of citizenship since the beginning of US history, and for Asian Americans, who are stereotyped as 'perpetual foreigners,' the experience of becoming citizens have involved complex legal and cultural challenges that question what 'American' means broadly. Providing an interdisciplinary survey, the course includes studies of various forms of performances, including legal cases, activism, political campaigns, theater, film, and new media. Open only to Focus Program students.

THEATRST265S - Modern American Drama

Course Description

While the playwright names—Eugene O'Neill, Tennessee Williams, Edward Albee—may be familiar, do American playgoers know how weird these artists' works can be? This survey course tracks some of twentieth- and twenty-first century's most recognizable dramas, focusing on the theatre's potential for formal innovation as well as social commentary. Plays include Williams's *A Streetcar Named Desire*, Arthur Miller's *Death of a Salesman*, Anna Deavere-Smith's *Twilight Los Angeles, 1992*, Tony Kushner's *Angels in America*, and Annie Baker's *The Flick*. Evaluation will be based on online response posts, two formal essays, one oral presentation, and class participation. No prerequisites necessary.

THEATRST284S - How to Write a Horror Movie

Course Description

Great horror movies are substantial works of art that go beyond jump-scares to confront society's most intractable problems – like racism, in the brilliant 'Get Out'. In 'How To Write A Horror Movie', students will study genre classics, while writing weekly short scenes – to be read aloud in class – that address basic elements of screenplay-writing, the mid-semester goal being the script for a short horror film. Students will also keep a journal of story-ideas, one of which they will develop – in the second half of the semester - as a feature-length screenplay, completing a rough draft of at least 80 pages, with successive portions of these scripts to be discussed in class.

THEATRST285S - Ready for Prime Time: Writing the Dramatic TV Episode

Course Description

Some of the best dramatic writing today can now be found on television. This class will focus on one commercial prime-time drama, past or present. Beginning with a deep immersion into the world of that show—watching all of Season One—students break into groups, coming up with their own long stories to advance the plots. Each student will pitch a story for their particular version of 'Season Two'—developing an outline, tracking their storylines with the other members of their group, and finally writing a draft of an hour-long TV episode. Each student will write his or her own script—but will need to share notes, thoughts and feedback with their fellow writers.

THEATRST309S - Dancing States of Mind: The Self, Social and Political Practice of Dance

Course Description

Practice-based studio work, discussion, and readings in current political discourse, System Theory, contemporary philosophy and cultural theory. Reveals the culturally constructed nature of dance in Western society - its manner of production, dissemination and aesthetics - and examines the consequences of 'the cultured flesh' as a mode of propaganda. The cultivation of students' radically subjective creativity, artistic experimentation, awareness, perception and expression, in order to understand and challenge the status quo; and to integrate abstract concepts into one's own physical existence and redefine assumptions by moving right through them.

THEATRST320S - Movement in Question: Introduction to Critical Dance Studies

Course Description

This writing-intensive seminar casts students as a research team engaging in multiple ways with the interdisciplinary field of critical dance studies. Students read and analyze foundational texts and theories, develop capacity to interpretively analyze movement, and practically engage in embodied activities that make gaps between textual representation and embodiment visible. This holistic approach throws movement into question and centralizes dance as a critical way of making the social world. Final Research Projects include conventional academic papers or choreographed performances that engage issues raised in the course. Zero dance experience required. All physical abilities welcomed.

THEATRST371 - Artists in Healthcare: Collaborations and Complexities

Course Description

The economically over-burdened US health care system and extended life expectancies for older adults offer a unique opportunity for working artists—not arts therapists—to intervene in the rapidly expanding field of integrative art and health. Rather than study health outcomes as indicators of 'success,' we centralize creative practice as our axis of inquiry. Course readings, interviews, and field visits to a Durham-based intervention highlight power imbalances and cultural sensitivities in hospitals, clinical care, assisted living, and nonprofit community care contexts. Culminates in student driven case studies of local arts work and workarounds.

THEATRST375S - Contemporary American Drama

Course Description

How does an artform like dramatic literature theorize concepts like 'contemporary' or 'American'? This course studies contemporary drama to explore how we might understand our current moment beyond chronology and Americanness beyond national distinctiveness. For instance, did the 'contemporary' begin with 9/11, the Great Recession, or our current political upheavals? Does 'American' signify a set of affects, histories, and discourses that are shared by some but not others? To pursue these and other queries, we will read works by Lynn Nottage, Ayad Akhtar, Sarah Ruhl, Matthew Lopez, among others. We plan for at least one trip to see performances in New York City, conditions permitting.

THEATRST402S - History of Acting

Course Description

This course surveys major acting traditions from around the world. Readings provide historical and theoretical perspectives on acting, and assignments require students to engage with the topic as researchers. Students will learn about various philosophical and artistic understandings of embodiment and about the political and societal roles actors have played throughout history. Students will work on research projects and will be required to write a research paper. (Does not fulfill the capstone requirement for History).

THEATRST425S - Advanced Writing for Stage and Screen

Course Description

'Advanced Writing for Stage and Screen' will look at the strengths of three dramatic art-forms - playwriting, screen and TV writing - and the particular challenge they share: the concept of 'dramatic action' which provides the 'motor' for a dramatic work. Initial writing exercises will explore these dramatic-writing forms, in conjunction with the study of representative plays, films and TV series. Final projects - a play, screenplay or TV pilot - will be discussed and critiqued in class as they progress, prior to a final rewrite. Prerequisite for this course is one previous dramatic writing course - either playwriting or screenwriting.

THEATRST476S - Modern Spectacles 1790 - Present

Course Description

Drawing on landscape painting, theater, carnival, and scientific demonstration, modern spectacles immerse viewers in a particularly European imaginary of identity and otherness. This seminar addresses three periods: 19th-century boulevard spectacles (magic lantern, panorama, etc.); 20th-century habitat dioramas that present species and cultures in place and time; and contemporary installations that seek to recreate the 'spectacle experience' with new tools. Case studies are discussed in relation to themes that traverse period, including colonialism, magic, anti-modernism, urban lighting, and the experience of time. Students will participate in the weekly seminar, as well as writing and presenting an original research paper in the final weeks of the course.

THEATRST380S-1 - Playmaking for Writers: Collaboration from Page to Stage

Course Description

Dramatic writing for stage, screen or film, is not meant to be read, like a novel or poem, it's meant to be performed. In this class, student writers explore the 'liveness' of dramatic writing in collaboration with actors and directors. Starting with writing exercises that aim at the core concept of 'dramatic action', students' progress to self-generated works. Semester ends with public presentation of student work as brought to the stage by the companion section for actors and directors. Prerequisite: one previous dramatic writing course in playwriting, TV writing, or screenwriting.

UNIV101D - Let's Talk About Race

Course Description

This university course will provide foundational knowledge about and explore the origins and meanings of the concept of race. It will examine the evolution, pervasiveness, and consequences of racial classifications and racial hierarchies in the U.S. and around the world. The course will also introduce students to the concept that race is linked to all disciplines and will highlight scholarship and scholars from across Duke. Weekly opportunities for reflection and discussion will be woven into the course, with teaching students how to constructively engage in potentially difficult conversations as an express goal.

VMS110S - Intro to Digital Culture: Media Theory, Politics, Aesthetics

Course Description

What is digital culture today? In the 90s digital culture studied how the internet transformed our interactions. In the 00s digital culture is driven by social media platforms (from youtube to tiktok), data profiling and recommendation algorithms. We visit iconic places through our constantly updating city apps. Our identity profiles are fashioned by social media influencers. We match with new friends and become followers. We know that biases of race, class, gender and sexuality are internal to search algorithms. Everyday decisions, behaviours, and desires are linked to our smart media. This course explores how digital media affect our subjectivity, our body, social and collective actions, political power and control.

Course Description

Approaches the creation of digital image-making in collective play. Includes individual and group brainstorming using different digital and traditional analogue processes (drawing, painting, and collage) to study how the ludic (play) enables creative thinking and experimentation in digital image manipulation. Database of images presented from multiple genres. Students work on outside assignment critiqued at end of class.

VMS135 - Experimental Sculpture and Installation Art

Course Description

This course explores ideas surrounding the creation of experimental sculpture. Employs non-traditional methods: 'readymades,' non-traditional materials, conceptual processes, digital interaction and fabrication techniques (rapid prototyping), mixed media including video, and projection technologies. Content of work driven by individual student interests—sustainability, the anthropocene, feminism, social and political commentary, and/or more formal, abstract sculptural relations. Instructor consent required.

VMS140 - Create, Innovate, Act: Creativity, Innovation, and Social Action

Course Description

Introductory course for first and second year undergraduates. This course bridges sciences, arts, and humanities, with focus on experiential knowledge and engagement with the everyday. Combines methods from broad range of areas based on creative inquiry and innovation. Students chose particular areas, or combination thereof, discussing their own research, inventions, artworks, compositions, performances, new media, or activist interventions. Specific skills developed at specialized maker spaces, labs, and studios. With exception of guest presentations, lectures delivered in video format to maximize class time production. Guest speakers include artists, activists, innovators, entrepreneurs, curators, and scholars.

VMS141S - Audiovisual Cultures in East Asia: Film, Music, and Other Media

Course Description

This seminar introduces to students to various aspects of audiovisual cultures in East Asia, including film, photography, music and other new and emerging media. It focuses on visual and sound studies and their interconnected relationship to the constitution of the sensible world within the East Asian regions while connecting to the larger global context, highlighting the global movement and cross-cultural networks of audiovisual media both enabled and complicated by technologies. Emphases are also placed on hand-on practice with individual and group projects. The goal is to not only understand audiovisual cultures critically but also actively engage in their production.

VMS165FS - Virtual Realities: Collective Dreams from Plato to Cyberspace

Course Description

What is 'virtual reality'? If something is real, isn't it also always actual, and if virtual, only almost or nearly real? What strange, hybrid no-mans-land lies midway between truth and illusion, and how can we learn to navigate inside this space? The puzzle is an old one, even if the technology we call VR is new. In this discussion-intensive course, we will read, watch, and play our way through some of the most powerful attempts to understand humanity's penchant for collective dreaming: from Plato's allegory of the cave, to the immersive spectacles of baroque theater, to the ghostly realms of gothic literature and modern film, to the invention of cyberspace and parallel universe games.

VMS220S - Ready for Prime Time: Writing the Dramatic TV Episode

Course Description

Some of the best dramatic writing today can now be found on television. This class will focus on one commercial prime-time drama, past or present. Beginning with a deep immersion into the world of that show—watching all of Season One—students break into groups, coming up with their own long stories to advance the plots. Each student will pitch a story for their particular version of 'Season Two'—developing an outline, tracking their storylines with the other members of their group, and finally writing a draft of an hour-long TV episode. Each student will write his or her own script—but will need to share notes, thoughts and feedback with their fellow writers.

VMS249 - Building Global Audiences

Course Description

Marketing and publicity are so important to audience building that, 20 years ago, expanding beyond local audiences usually couldn't be accomplished without huge advertising budgets. However, thanks to the Internet, you can build a global audience from your dorm room. This class explores how. Learn about social media, search engine optimization, virality, content marketing, growth hacking, and other digital audience building strategies. They're difficult to learn and time consuming to execute, so expect to struggle. We'll learn as much from our failures as we will from our successes as we discover what it takes to cultivate global awareness for an idea without ever leaving Durham.

VMS255 - Social Marketing: From Literary Celebrities to Instagram Influencers

Course Description

Typical Duke students spend hours each day using social media. You've surely heard the platforms described as 'revolutionary,' and you've also heard them described as 'time wasters.' What you probably haven't thought about is how similar they are to previous 'revolutionary' communications technologies like novels, newspapers, and even language itself. This course explores ways in which studying the masters of previous 'social' media technologies—the Shakespeares, Whitmans, and Eliots of the world—can help us understand how influencers on digital social media leverage the same platforms you use every day to market themselves, build their brands, and grow their audiences.

VMS272A - The Arts, Culture, and Performance of New York

Course Description

This course introduces its participants to New York through its rich artistic, cultural, and performance offerings—drawn from art, dance, film, music, literature, and theater. Visiting all five boroughs, they contemplate how the identities of New Yorkers—informed by the city and by ability, class, ethnicity, gender, race, and sexuality—are performed in the theater of everyday life: in parks, streets, subways, and especially the city's diverse neighborhoods and restaurants.

VMS273 - The Middle East Through Film

Course Description

Film as access into the region through a series of direct as well as poetic connections woven across films viewed, filmmakers featured, lectures, discussions, and texts read. By means of the integration of course components and students' weekly responses, an understanding of the region is developed by way of inquiry into and rigorous engagement with cultural production. From feature length films to shorts, the breadth of the work we will engage with includes documentaries, dramas, and less traditional forms. A substantial midterm paper, and a final project to be in the form of one of three potential possibilities subject to approval of proposal: a paper, a talk, a short film.

VMS274D - Race, Genomics, and Society

Course Description

The field of genetics has been at the forefront of discourse concerning the concept of 'race' in humans. This course explores human origins, human variation, human identity, and human health through a broad range of enduring and emerging themes and challenging questions related to race and genetics (and now, genomics) on a global scale. Students will acquire knowledge and skills required for integrative analyses of the relevant scientific, ethical, legal, societal, cultural, and psychosocial issues. Open to students at all levels from any discipline in the arts, humanities, and sciences (natural, social, formal, and applied).

VMS276 - America Dreams American Movies II: Independents Through Streaming

Course Description

This course studies contemporary American movies as they create and reflect America's self-image from the rise of independents through the innovations of the 21st century, including digital video, streaming, and the rise of high-quality TV productions. Approaches include U.S. cultural history, industry developments, and technical analysis. Directors such as Kubrick, Coppola, Spielberg, Tarantino, Lee, Moore, Cameron, Campion, Jenkins, Bigelow, Peele, Du Vernay, and others up to today. At least two weeks of the semester will be devoted to TV, such as Game of Thrones, The Americans, or Watchmen. Like the film and TV industries themselves, assignments encourage creativity and collaboration.

VMS277S - Cyber Connections: Communication in the Digital Age

Course Description

Explores contemporary challenges, contexts, and opportunities with communication across media platforms. Examines historical contexts and texts related to rhetoric and communication, and how these ideas have persisted and shifted in the digital age. Texts include theoretical approaches to communication and rhetoric (past and present) and examples of communication across a range of media (for example: podcasts, multimodal texts, web-based presentations, and social media content). Students learn to conduct rhetorical analysis across media, and create written, visual, and/or verbal rhetorical content across media platforms. Prerequisite: Writing 101.

VMS283S - Filming Freedom Movements: Movies, Music, Monuments, Memory

Course Description

This class is a cross-disciplinary exploration of a series of questions about what societies choose to commemorate, what they stay silent about, what they try to repress, and how this changes over time. What impact does this have on public policy and cultural debate? Using a cross-cultural examination of four societies, we will draw on methods from the arts, art history, history, documentary, policy, cultural studies, critical race theory, sound studies, Indigenous studies, and feminist theory.

VMS309S - Environmental Issues & the Documentary Arts**Course Description**

Survey how filmmakers, authors, photographers, and other artists have brought environmental issues to the public's attention in the last century, and in some cases instigated profound societal and political change. Examine the nebulous distinctions between persuasion and propaganda, agenda and allegory, point of view and content. Evolve as a viewer of the environment and a maker of documentary art. Initiate your own projects to address and/or depict environmental issues in one form of a broad range of media.

VMS310S - Archives As Data: Structuring Information for Humanities Scholarship**Course Description**

A discursive and hands-on engagement with questions of how archival materials can be transformed into data, why scholars may engage archives as data, what kinds of ethical concerns arise when archives are understood as data, and how to critique archival data scholarship. Drawing on library and information sciences and humanities scholarship, learn to combine archival theories with theories of data structuring when developing research questions. Gather and structure data from many types of archival materials representing a range of cultures and communities housed in Duke's David M. Rubenstein Rare Book & Manuscript Library. Perform humanistic analyses via both digital and analog methods.

VMS316S - Understanding Mediation**Course Description**

Examines experience as always mediated. How does text mediate expression, or language mediate subjectivity? How do images mediate power, or sounds mediate resistance? How does computation mediate agency, or networks mediate thought? But also, how do nations mediate globalization, or oil mediate energy? And how do bodies mediate liveness, or the environment mediate history? Moves from particular media forms and examples (language, literature, the fine and performing arts, audiovisual media, computational media) to focus on key theoretical concepts and debates of critical theory from twentieth and twenty-first centuries. Crosses national boundaries to understand mediation from global perspective.

VMS324 - Sample & Remix: Contemporary Cultural Production Across Arts & Media

Course Description

Sampling & remixing of previous works is a major mode of contemporary cultural production cutting across media and cultural practices. This course analyzes its genealogy, technological underpinnings, legal presuppositions and aesthetic consequences. Tensions between copy and copyright, between claims to originality and mechanical reproduction characterize this contemporary regime, now deployed globally. Its cultural implications will be distinguished from related modes of making art and meaning (imitation, citation, collage, montage...) and tracked through various objects: popular and avant-garde cinema; videogames, ready-mades and Pop Art; Hip-Hop and Electro; literature and DJ culture.

VMS330S - Black Durham: Discovering Durham's Hallowed Ground through Arts

Course Description

Study of Durham's hallowed grounds and sites of struggle, with a deep focus on the African American experience. Investigation of histories, both celebrated and troubled, that have built the present-day community surrounding Duke University. Exploration of the city's tumultuous and rich past from slavery to Black Wall St and onward through the lens of past and present visual and performing artists, leading to new collaborations with these artists. Sites and stories will include Pauli Murray House, Stagville, Civil Rights history in Durham, the Booker T. Spicely murder and more. Using interpretive and historical methods, students will research Durham's stories, ultimately helping to construct a roadmap for future community collaborations that recover local history through the arts.

VMS355 - American Dreams, American Movies

Course Description

A course in selected American films that create as well as reflect American identity from the beginnings of Hollywood moviemaking in the Studio System through the beginnings of Indie spirit. Nine to twelve best-loved movies, such as Mr. Smith Goes to Washington, Casablanca, Rear Window, Singin' in the Rain, and Dr. Strangelove by directors like Frank Capra, John Ford, Alfred Hitchcock, and Stanley Kubrick. The course pays attention to American cultural history, the development of the movie industry, the idea of the director as auteur, narrative form in film, and some fundamentals of film analysis. Assignments are both written and creative experiments in filmmaking, as suits class interests.

VMS359A - Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)

Course Description

This course explores the complexities of global Los Angeles by focusing on issues that especially impact its marginalized communities. For the service-learning component, students volunteer at least 20 hours during the semester at nonprofit organizations engaged in the pursuit of social justice. This experience provides an opportunity to observe, participate in and reflect on the day-to-day implementation of social action, policy and organizing initiatives. As part of the volunteer commitment and in lieu of a final paper, students produce a documentary media project that communicates goals identified by and in collaboration with the community partner.

VMS371S - 'Bollywood' Dance, Music and National Identity

Course Description

Dance and Music are quintessential to Hindi Cinema, which is often nicknamed as 'Bollywood.' Over the last century, Hindi cinema has garnered what has emerged as a unique form of dance genre that subsumes, reconstitutes and remixes the traditional, modern, contemporary and global movement vocabularies as an aid to highlight and extend the narrative plot of the film. In the past few decades, Hindi cinema has incorporated Indian diasporic cultural identities alluring an unprecedented global reception. This course will focus on 'Bollywood' dance and music genres and ways in which they promote the allure for a revitalized national identity, a global cultural presence, and network associations with the Indian diaspora as well.

VMS374 - Artists in Healthcare: Collaborations and Complexities**Course Description**

The economically over-burdened US health care system and extended life expectancies for older adults offer a unique opportunity for working artists—not arts therapists—to intervene in the rapidly expanding field of integrative art and health. Rather than study health outcomes as indicators of 'success,' we centralize creative practice as our axis of inquiry. Course readings, interviews, and field visits to a Durham-based intervention highlight power imbalances and cultural sensitivities in hospitals, clinical care, assisted living, and nonprofit community care contexts. Culminates in student driven case studies of local arts work and workarounds.

VMS386S - Documentary and Policy: How Documentary Influences Policy

Course Description

Examines documentaries as catalysts for change in local, state, and federal laws and regulations, with special attention to relationships between film and organizations with political influence. Looks at how documentaries have altered public sentiment and political outcomes. Uses case studies of documentary films (essay-style, journalistic, information-driven films; narrative, story-driven films; propaganda; art films; and hybrids of all of the above). Explores the question of how a film achieves influence: for example, with a high-profile theatrical and/or television release, by utilization as an educational tool, or by 'going viral' to become part of a public conversation.

VMS388S - Black Thought and Creativity to 1865

Course Description

How did people of African descent express themselves in the context of slavery? What did they write about? What kinds of items did they create? This course will explore the cultural, intellectual, and aesthetic knowledge produced by people of African descent before 1865 and how these works continue to shape conceptions of liberation in contemporary Black life. Students will engage materials by Black thinkers, artists, activists, and critics, from the nineteenth to the twenty-first century, who use creativity to ruminate on freedom and black liberation in diverse media, including autobiography, painting, speech, photography, performance and food culture.

VMS398SA - Duke in New York: New York, New York

Course Description

New York City is an idea as much as a real place. New York is always on the go. In this course, we focus on the people, places, and institutions that make and remake New York. We traverse each of New York's five boroughs, paying attention to the movements of people, culture, and food within them as well as attend to the social dynamics of geography and gentrification. Paralleling the evolution of the city's neighborhoods and ethnic enclaves is the establishment of its globally-known institutions. Experiencing the interplay of individuals and institutions allows us to examine life in the city through the lens of what geographer Ruth Wilson Gilmore terms an 'infrastructure of feeling.'

VMS405S - Media and Conflict

Course Description

Focus on the role of media in the context of colonialism, war and conflict across various historical periods. Attentive to the ways that media technologies have been employed both as tools of power and vehicles of protest and resistance. Theoretical readings are paired with a set of international case studies -- e.g. colonial atrocity archives, #BlackLivesMatter, Syrian civil war, the Abu Ghraib torture scandal, the Israeli military occupation, drone strikes -- that enable us to test the applicability of theoretical discussions to contemporary case studies. Readings in Butler, Kaplan, Sontag, Stein and Kuntsman, Virilio and others.

VMS414A - Urban Fiction and Collective Imagination: Madrid Through Literature and Film

Course Description

This Duke in Madrid course offers a panoramic look at some of the most important, contemporary artistic and cultural expressions and how they represent Madrid. While looking at historical, social and artistic contexts, we will spend time reflecting and engaging in debates about issues that have been shaping the dynamics of modern cities such as multiculturalism, migration and the role of women. Also, we will look for a way to position Madrid in the face of global questions about Hispanic culture and how it is perceived in other countries.

VMS419 - Spanish Cinema from the Transition to the Present

Course Description

Overview of Spanish cinema, from transition to our present days. Having undergone dramatic transformation in past years, Spanish film offers privileged area to study main features, novelties, contradictions, and tensions. Analyzes two chronological phases: the mid 70s to late 80s, characterized by intense cinematic negotiation with immediate past that unveils cracks and violences of normalizing erasure proposed from the political institutions; and the 90s until the present, a period marked by Spanish film's entrance in the global market, with its identitarian reassessment and emphasis in new pressing issues such as immigration, memory, and gender violence.

VMS429S - Historical Documentary Production

Course Description

Course examines how archival footage and photographs are used in historical documentaries about struggles for social equity in America. Iconic films will be reviewed to assess editors' strategies for employing archival material in documentaries on the labor movement, civil rights movement, anti-Vietnam war movement, and early lesbian and gay rights movement. Students will then conduct research for film footage and photographs and learn practical steps needed to acquire rights to use the material. During the second half of the semester, students will be guided in the production and editing of their own short historical documentary.

VMS433S - Photography in the Americas: War, Tourism, Art, and Protest

Course Description

Since it emerged in the 19th century until today, the camera has framed our way of seeing and understanding the world. In this course, students accompany the camera in its path through major events in the Americas—North, South, and Central—and examine the profound connections between them. We discuss photography as a weapon of war, a souvenir for tourists, an instrument of protest, an illustration of history, a journalistic and ethnographic tool, and an artistic medium. Key developments in photographic processes, from half tone printing to digital imaging, offer opportunities to reflect on the relationship between visual culture and technology, and art and politics. Taught in Spanish.

VMS495T - Collaborative Computational Media Project Design and Development

Course Description

Interdisciplinary teams of students work with faculty to design and develop a computational media project. A team's work may run in parallel with or contribute to an ongoing research project, which will be determined in advance. Teams will participate in seminars, data collection and analysis, field work and other learning experiences relevant to the project. Requires final paper or product containing significant analysis and interpretation. This course is designed to fulfill the project requirement for the Interdepartmental Major in Computational Media, Certificate in Information Science + Studies, or for Bass projects. Students from other disciplines welcome.

WRITING201S - History of Writing Studies

Course Description

What constitutes writing? What makes it 'good'? Why study writing? History of Writing Studies explores the development of writing studies as a field, from its roots in ancient rhetoric to more contemporary understandings of writing in a digital age. The course presents ways in which writing has been described, analyzed, debated, and taught, following the understanding of writing from linear to recursive, from a contextualized process to a social process. As we move through the trajectory of the discipline, students will write regularly and extensively, personally and academically, as they engage with evidence-based best practices of writing, such as drafting, revising, and workshoping.

WRITING202S - Theoretical Frameworks of Writing Studies

Course Description

Rooted in the discipline of writing studies, this course delves into the intricate theories surrounding the act of composing. Furthermore, the course raises questions about the pervasive influence of various social forces on writing processes. In addition to its focus on the act of writing itself, the course foregrounds the pivotal role of pedagogy within the discipline of writing studies. Through its rigorous inquiry and scholarly engagement, this course equips learners with the analytical tools and critical perspectives necessary to navigate and engage meaningfully with the ever-evolving landscape of written communication in contemporary society.

WRITING253 - Social Marketing: From Literary Celebrities to Instagram Influencers

Course Description

Typical Duke students spend hours each day using social media. You've surely heard the platforms described as 'revolutionary,' and you've also heard them described as 'time wasters.' What you probably haven't thought about is how similar they are to previous 'revolutionary' communications technologies like novels, newspapers, and even language itself. This course explores ways in which studying the masters of previous 'social' media technologies—the Shakespeares, Whitmans, and Eliots of the world—can help us understand how influencers on digital social media leverage the same platforms you use every day to market themselves, build their brands, and grow their audiences.

WRITING265S - Writing for Global Audiences – Theories and Applications of Comparative Rhetoric

Course Description

This course examines how writing practices and communication strategies are shaped by cultural differences, focusing on how writers construct, adapt, and negotiate voice and identity for global audiences. We will analyze rhetorical traditions through non-Eurocentric theories—spanning cultural, geographical, and non-human perspectives—via rigorous reading, case studies, and discussion. By examining real-world examples like protest writings, we will explore methodologies for effective global communication. We will refine rhetorical knowledge through collaborative learning, honing adaptive, ethical, and sophisticated writing practices that meet the expectations of diverse global audiences.

WRITING363 - Podcasting in A Changing Media Landscape: The Art, Craft and Ethics of An Emerging Medium

Course Description

Podcasting has exploded in recent years, with hundreds of thousands of shows in production and more than a fifth of Americans listening to podcasts at least weekly. This course will provide a hands-on introduction to the craft of podcasting, combined with critical reflection on various podcast forms. Students will consider the role of podcasts in the changing media equation, including the role of podcasts in local news. They will gain practice with the basics of podcast creation and will apply these lessons by creating podcast episodes focusing on the people, places, and issues of Durham, N.C.
