About the University Bulletins

The Office of the University Registrar is responsible for compiling, producing, and maintaining the bulletin for each school at Duke University. The content for the bulletins is established by the schools in conjunction with the Duke University Bulletins Policy.

The information in this bulletin applies to the academic year 2023-2024 and is accurate and current, to the greatest extent possible, as of August 2023. All bulletins are published online and serve as static documents for historical records of the university. The university reserves the right to change programs of study, academic requirements, teaching staff, the calendar, and other matters described herein without prior notice, in accordance with established procedures.

Duke University Registrar: Frank Blalark, Assistant Vice Provost and University Registrar
Coordinating Editor: Maggie Douglas
Publications Coordinator: Patrina Hemingway
Bulletin Editors:

About Duke University

Mission Statement

Approved by the Duke University Board of Trustees October 1, 1994, and revised February 23, 2001, the Mission Statement for Duke University reads as follows:

"James B. Duke's founding Indenture of Duke University directed the members of the University to 'provide real leadership in the educational world' by choosing individuals of 'outstanding character, ability, and vision' to serve as its officers, trustees and faculty; by carefully selecting students of 'character, determination and application,' and by pursuing those areas of teaching and scholarship that would 'most help to develop our resources, increase our wisdom, and promote human happiness.'

"To these ends, the mission of Duke University is to provide a superior liberal education to undergraduate students, attending not only to their intellectual growth but also to their development as adults committed to high ethical standards and full participation as leaders in their communities; to prepare future members of the learned professions for lives of skilled and ethical service by providing excellent graduate and professional education; to advance the frontiers of knowledge and contribute boldly to the international community of scholarship; to promote an intellectual environment built on a commitment to free and open inquiry; to help those who suffer, cure disease, and promote health, through sophisticated medical research and thoughtful patient care; to provide wide-ranging educational opportunities, on and beyond our campuses, for traditional students, active professionals and life-long learners using the power of information technologies; and to promote a deep appreciation for the range of human difference and potential, a sense of the obligations and rewards of citizenship, and a commitment to learning, freedom and truth.

"By pursuing these objectives with vision and integrity, Duke University seeks to engage the mind, elevate the spirit, and stimulate the best effort of all who are associated with the University; to contribute in diverse ways to the local community, the state, the nation and the world; and to attain and maintain a place of real leadership in all that we do."

Duke University: A Brief Narrative History

Duke University traces its origins to a small school that opened in 1838 in Randolph County, North Carolina. Originally a preparatory school for young men called the Union Institute Academy, it was then chartered as a teaching college named Normal College by the state of North Carolina in 1851. The school underwent another transformation in 1859 when it turned to the Methodist Church for financial support. Reflecting the new partnership, the school's name changed to Trinity College.

From 1842 to 1882, Braxton Craven served as the principal and then president of the institution, overseeing its transition from a tiny schoolhouse to a full-fledged college. Shortly before his death, he helped to establish the Cherokee Industrial School at Trinity College, one of numerous schools established in the United States to "westernize" indigenous students, in this case boys and young men from the Eastern Band of the Cherokee. The
Duke University

School at Trinity lasted only a few years. It is worth noting that Craven enslaved several Black people prior to the Civil War, and that a number of other faculty and trustees were also enslavers.

John F. Crowell, Trinity College's president from 1887-1894, suggested that moving the college to an urban setting would attract more students, faculty, and financial support. With Crowell's encouragement, the trustees agreed to move the college, and after a spirited competition among regional cities, Trinity opened in Durham in 1892. Local tobacco magnates Washington Duke and Julian S. Carr assisted in providing land and money to Trinity. In 1897, at Washington Duke's request, the school began admitting women as regular students, making it an early co-educational institution. Carr's support for Trinity College was recognized with a building named in his honor in 1930. His name was removed in 2018 in light of his virulent white supremacist beliefs and actions.

Trinity prospered in its new location, and in 1924 the school was again transformed through philanthropy. Washington Duke's son James Buchanan Duke established the Duke Endowment, and the charitable foundation infused the college with funds. The trustees changed Trinity College's name to Duke University as a memorial to his father. The new funds supported the construction of a new campus, designed in a Gothic style by the Philadelphia architectural firm of Horace Trumbauer. The chief designer of West Campus, as well as the re-envisioned East Campus, was Julian Abele, a Black architect whose role in creating the architecture of Duke University was largely overlooked during his lifetime. In 2016, the main quad on West Campus was renamed Abele Quad in his honor.

President William P. Few (1910-1940) oversaw this metamorphosis of a small college into a complex university. In 1930, the Trinity College site (today's East Campus) became the Woman's College, while the West Campus served as the grounds for the all-male Trinity College. In 1972, Trinity College merged both colleges of men and women into what is now known as Trinity College of Arts and Sciences. Other schools include the School of Religion and Graduate School founded in 1926, the School of Medicine and hospital in 1930, and the School of Nursing in 1931. Originally established in 1904, the Law School reorganized in 1930. In 1938, what is today's Nicholas School of the Environment opened, and in 1939 the university formed what is now known as the Pratt School of Engineering. The last of James B. Duke's desires for the university was fulfilled when what is now the Fuqua School of Business, opened in 1969. The Sanford School of Public Policy became Duke's tenth school in 2005. The school was named for President Terry Sanford, formerly the governor of North Carolina, who supported a number of initiatives in the 1970s and 1980s to build Duke's reputation for excellence, growing the university's national and international profile.

Long a segregated institution, Duke first admitted Black graduate and professional students in 1961 and Black undergraduates in 1963. In 1968, a major student protest known as the Vigil demanded pay increases and better treatment of hourly workers, most of whom were Black. In 1969, Black students protested in what is now known as the Allen Building Takeover, demanding improved services and treatment for Black students. The protest resulted in the formation of what is now called the Department of African and African American Studies.

Faculty at Duke produce influential scholarship across a wide range of disciplines and professions. Two Duke faculty members have received the Nobel Prize in Chemistry: Professor Robert Lefkowitz in 2012 and Professor Paul Modrich in 2015. Duke researchers have mapped the human chromosome and led research into the treatment of HIV and AIDS. Duke faculty also research pressing social issues, producing high-impact scholarship on such topics as election districting and public health. Faculty authors have written books of award-winning nonfiction, fiction, and poetry, and have won awards ranging from the National Book Award to the Pulitzer Prize. Fifty Duke faculty are members of the American Academy of Arts and Sciences. Duke students have many opportunities to work with leading faculty in labs and on projects, ensuring hands-on experience during their course of study.

Duke has a number of notable athletic achievements. Best known is the men's basketball team, coached by Mike Krzyzewski from 1980 to 2022. The team has earned 5 national championships. The women's golf team holds the record at Duke for most national championships, at 7. Duke football has been played since the 1880s, when President Crowell coached the team himself. During the 1930s and 1940s, the football team competed in and won a number of bowl games, earning the nickname “Iron Dukes.” The Rose Bowl game of 1942 was played in Durham due to wartime concerns on the West Coast and remains the only Rose Bowl played outside of Pasadena, California.

International programs have expanded over the last several decades, bringing international students to Duke in Durham and expanding international opportunities for Duke students. In 2005, Duke partnered with the National University of Singapore and opened the Duke-NUS Medical School. In 2014, graduate programs at Duke Kunshan University began, followed by undergraduate programs in 2018. DKU is a partnership between Duke and Wuhan University in Kunshan, China.

The university has changed in many ways since its founding, and like other historically white schools it continues to confront issues of racism, sexism, and other inclusion and equity challenges. Students of color and international students now represent more than 50% of the student body. Duke’s hometown of Durham has also grown and changed, and Duke and Durham collaborate on topics ranging from community service to downtown development.

Ever evolving, Duke University strives to meet the stated aims of the university: “to foster a lively relationship between knowledge and faith; to advance learning in all lines of truth; to defend scholarship against all false notions and ideals; to develop a love of freedom and truth; to promote a respectful spirit of dialogue and understanding; to discourage all partisan and sectarian strife; and to further the advancement of knowledge in service to society.”

Duke University Leadership

Full leadership profiles for those listed below are available at duke.edu/about/leadership.

Executive Leadership
Duke University

Vincent Price, President | president.duke.edu
Daniel Ennis, Executive Vice President
Jennifer Francis, Interim Provost
A. Eugene Washington, Chancellor for Health Affairs, Duke University, President and CEO, DUHS

Academic Leadership
Deans of Schools and Colleges
Kerry Abrams, James B. Duke and Benjamin N. Duke Dean of the School of Law
Suzanne Barbour, Dean, Graduate School
Gary Bennett, Dean, Trinity College of Arts and Sciences
William Boulding, Dean, Fuqua School of Business
Edgardo Colón-Emeric, Dean, Divinity School
Vincent Guillamo-Ramos, Dean, School of Nursing and Vice Chancellor for Nursing Affairs
Judith Kelley, Dean, Sanford School of Public Policy
Mary E. Klotman, Dean, School of Medicine
Jerome P. Lynch, Dean, Pratt School of Engineering
Toddi Steelman, Stanback Dean, Nicholas School of the Environment

Vice Provosts
Edward Balleisen, Vice Provost for Interdisciplinary Studies
Abbas Benmamoun, Vice Provost for Faculty Advancement
John Brown, Vice Provost for the Arts
Yakut Gazi, Vice Provost for Learning Innovation and Digital Education
Mohamed Noor, Interim Vice Provost for Academic Affairs
Mary Pat McMahon, Vice Provost for Student Affairs
Amy Oates, Interim Vice Provost for Finance & Administration
Noah Pickus, Associate Provost
Joseph Salem, Rita DiGiallonardo Holloway University Librarian and Vice Provost for Library Affairs
Candis Watts Smith, Interim Vice Provost for Undergraduate Education

University Administration
Pamela J. Bernard, Vice President and General Counsel
Maggie Epps, Secretary to the Board of Trustees and Chief of Staff to the President
Tracy Futhey, Vice President for Information Technology and Chief Information Officer
Leigh P. Goller, Chief Audit, Risk and Compliance Officer
Kimberly Hewitt, Vice President for Institutional Equity and Chief Diversity Officer
David L. Kennedy, Vice President for Alumni Engagement and Development
Nina E. King, Vice President and Director of Athletics
Jennifer Lodge, Vice President for Research & Innovation
Antwan Lofton, Vice President of Human Resources & Chief Human Resources Officer
John J. Noonan, Vice President for Facilities
Rachel Satterfield, Vice President for Finance
Chris Simmons, Interim Vice President for Public Affairs & Government Relations
Russell Thompson, Interim Vice President for Operations
Neal Triplett, President, DUMAC
Stelfanie Williams, Vice President for Durham & Community Affairs

The Faculty
Duke faculty are chosen from among the most competitive selection processes in the country, having demonstrated excellence in their fields of research. Duke currently has two Nobel Laureates among its faculty. Many others hold appointments in the National Academy of Sciences. Their books and publications are numerous and influential.

Duke professors are also excellent teachers. There is an 8-to-1 ratio of students to faculty. Professors are committed to giving students the individual attention that pushes them to excel while nurturing their ideas. Undergraduates, even in their first year, interact with senior faculty on a regular basis in efforts such as the Focus Program, a series of first-year interdisciplinary seminars focused on a theme. In addition, many serve as advisors to students, including those who choose to design their program of study and as mentors to undergraduates who pursue hands-on research.

Profiles of Duke's faculty members are available via Scholars@Duke.

University Policies

Accreditation
Duke University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, doctorate, and professional degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call (404) 679-4500 for questions about the accreditation of Duke University.

Clergy Act
Information that the university is required to make available under the federal Clergy Act is available by visiting the Records Division, Duke University Police Department, 502 Oregon Street, Durham, NC 27708, or by calling (919) 684-4602. See police.duke.edu/news-stats/clery for more details.

Duke's Commitment to Diversity and Inclusion
Duke aspires to create a community built on collaboration, innovation, creativity, and belonging. Our collective success depends on the robust exchange of ideas—an exchange that is best when the rich diversity of our perspectives, backgrounds, and experiences flourishes. To achieve this exchange, it is essential that all members of the community feel secure and welcome, that the contributions of all individuals are respected, and that all voices are heard. All members of our community have a responsibility to uphold these values.

Excellence, Diversity, and Inclusion: A statement by the faculty, Provost, and President
To achieve our mission and meet the needs of a rapidly changing world, Duke strives to create a climate of collaboration, creativity, and innovation within and across disciplines. Our success depends upon the robust exchange of ideas—an exchange that flourishes best when the rich diversity of human knowledge, perspectives, and experiences is heard. We nonetheless acknowledge that our policies and practices have often failed to ensure equality of participation within our community. Our renewed commitment and responsibility to one another is articulated in the following statement.

Duke University Community Commitment
Because diversity is essential to fulfilling the university’s mission, Duke is committed to building an inclusive and diverse university community. Every student, faculty, and staff member—whatever their race, gender, age, ethnicity, cultural heritage or nationality; religious or political beliefs; sexual orientation or gender identity; or socioeconomic, veteran or ability status—has the right to inclusion, respect, agency and voice in the Duke community. Further, all members of the University community have a responsibility to uphold these values and actively foster full participation in university life.

Duke Community Standard
Duke University is a community dedicated to scholarship, leadership, and service and to the principles of honesty, fairness, respect, and accountability. Citizens of this community commit to reflect upon and uphold these principles in all academic and nonacademic endeavors, and to protect and promote a culture of integrity.

To uphold the Duke Community Standard:

- I will not lie, cheat, or steal in my academic endeavors;
- I will conduct myself honorably in all my endeavors; and
- I will act if the Standard is compromised.

Students' Obligation to Act with Respect to the Duke Community Standard
The Duke Community Standard (DCS) stresses the commitment that students share with all members of the community to enhance the climate for honesty, fairness, respect, and accountability at Duke University. Students affirm their commitment to foster this climate by signing a pledge that includes taking constructive action if they witness or know about behavior they perceive to be inconsistent with the DCS, which may include violation of university policies. Although there are no disciplinary sanctions associated with the failure to act, students are nonetheless expected to take action to do something as a responsibility of membership in the Duke community.
The university recognizes that it is not always easy to act in these situations, but several alternatives are available to suit a student's level of comfort and confidence. These alternatives are not mutually exclusive.

- Speaking directly with the individual exhibiting the behavior, both to gain clarity about the situation and to inform the individual about the concern.
- Publicly calling attention to the behavior as it is occurring.
- For incidents involving social behaviors, alerting residence hall, Student Affairs, or other university staff. The information provided will give staff an opportunity to address the matter informally or through appropriate formal channels.
- For cases involving academic integrity, alerting the instructor that cheating may be occurring in the course. This alert can be in any form, including anonymous notification, and the reporting student will not be identified. The information provided will allow the faculty member to consider corrective measures, in consultation with the Office of Student Conduct and Community Standards, and to address the topic with the class or suspected student(s).
- Directly alerting staff in the Office of Student Conduct and Community Standards at (919) 684-6938 or conduct@duke.edu, who will confer with the faculty member involved, if an academic issue, or with the reporting student(s), strategizing next steps. Maintaining the confidentiality of the source is possible, but may limit the extent of action that can be taken.

**Family Educational Rights & Privacy Act (FERPA)**

The Family Educational Rights & Privacy Act (FERPA), 20 U.S.C § 1232g; 34 CFR Part 99, is a federal law that guides the release of students' education records, of which disciplinary records are a part.

Duke University adheres to a policy of compliance with the Family Educational Rights and Privacy Act. The policy (1) permits students to inspect their education records, (2) limits disclosure to others of personally identifiable information from education records without students' prior written consent, and (3) provides students the opportunity to seek correction of their education records where appropriate.

For additional information about FERPA, see ed.gov/policy/gen/guid/fpco/ferpa/index.html. For Duke’s full FERPA policy, visit registrar.duke.edu/student-resources/family-educational-rights-and-privacy-act-ferpa.

**Nondiscrimination Statement**

Duke is committed to encouraging and sustaining a learning and work community that is free from prohibited discrimination and harassment. The institution prohibits discrimination on the basis of age, color, disability, gender, gender identity, gender expression, genetic information, national origin, race, religion, sex, sexual orientation, or veteran status, in the administration of its educational policies, admission policies, financial aid, employment, or any other institution program or activity. It admits qualified students to all the rights, privileges, programs, and activities generally accorded or made available to students.

Sexual harassment and sexual misconduct are forms of sex discrimination and prohibited by the institution. Duke has designated the Vice President for Institutional Equity and Chief Diversity Officer as the individual responsible for the coordination and administration of its nondiscrimination and harassment policies. The Office for Institutional Equity is located in Smith Warehouse, 114 S. Buchanan Blvd., Bay 8, Durham, North Carolina 27708, and can be contacted at (919) 684-8222.

Questions or comments about harassment or discrimination can be directed to one of the following administrators in the Office for Institutional Equity.

**Discrimination in employment or educational programs and activities:**

Cynthia Clinton, AVP Harassment and Discrimination Prevention and Compliance  
Title IX Coordinator  
Office for Institutional Equity  
114 S. Buchanan Blvd., Bay 8  
Durham, NC 27708  
(919) 684-8222

**Sex discrimination in educational programs or activities:**

Adrienne Allison, Deputy Title IX Coordinator for Students, Compliance Investigator  
Office for Institutional Equity  
114 S. Buchanan Blvd., Bay 8  
Durham, NC 27708  
(919) 684-8222

Additional information, including the complete text of Duke’s Policy on Prohibiting Discrimination, Harassment and Related Misconduct and appropriate complaint procedures, may be found here. For further information visit the U.S. Department of Education Office for Civil Rights, or call 1-800-421-3481.
University Resources, Campus Life & Activities

Agreements with other Universities

Neighboring Universities (Interinstitutional Agreement)

Under a plan of cooperation—the interinstitutional agreement among Duke University and The University of North Carolina at Chapel Hill, North Carolina State University, North Carolina Central University, The University of North Carolina at Charlotte, and The University of North Carolina at Greensboro—a student regularly enrolled in Duke University as a degree-seeking student and paying full fees may enroll for one approved course each semester at one of the institutions in the cooperative program unless an equivalent course is offered at Duke in the same academic term. Under the same conditions, one interinstitutional course per summer may be taken at a neighboring institution participating in this agreement provided that the student is concurrently enrolled at Duke for one full course credit. This agreement does not apply to contract programs such as the American Dance Festival or to study abroad programs. Approval forms for courses to be taken at these neighboring institutions may be obtained from the offices of the academic deans and the university registrar. Forms are also available online at the Office of the University Registrar website (registrar.duke.edu), in the Registration section. Only those courses not offered at Duke will be approved. Approval must be obtained at Duke from the director of undergraduate studies of the subject of the course and the student’s academic dean. Credit so earned is not defined as transfer credit since grades in courses taken under the interinstitutional agreement are entered on the official record and used in determining the grade point average. The courses may be eligible for Areas of Knowledge and Modes of Inquiry coding. The student pays any special fees required of students at the host institution.

Courses taken at The University of North Carolina at Chapel Hill by Duke students in the Robertson Scholarship Program (a joint scholarship program for students at Duke and The University of North Carolina at Chapel Hill) are interinstitutional courses. However, the restriction on the number of courses and the kind of courses (i.e., those not offered at Duke) permitted does not always apply. Robertson Scholars should refer to program materials for specific regulations.

Domestic Exchange Programs

Trinity College has exchange programs with two domestic institutions: Howard University in Washington, DC, and Spelman College in Atlanta, Georgia. Duke students may study for a semester at either institution, while students from these institutions enroll for the same period at Duke. Students may enroll in a wide variety of courses at either Howard University or Spelman College for which they will receive transfer credit at Duke. Transfer credits earned under this exchange program do not count against the maximum allowable domestic or study abroad transfer credits. For more information about these programs, visit 011 Allen.

Career Center

The Career Center, working in partnership with faculty and colleagues, provides career advising to all Duke undergraduates, graduate students, and alumni. Recognizing the unique talents and needs of each individual, the Career Center encourages students to make the most of their Duke experience by accessing relevant campus resources, developing career interests and values, and establishing and maintaining important human relationships with their peers as well as Duke faculty, staff, and alumni. The Career Center works to build and maintain relationships with alumni and employers who can provide internships and learning opportunities, entry-level positions, and opportunities for experienced professionals. For more information, visit careerhub.students.duke.edu.

Continuing Studies

Academic Study

Admission to the Continuing Studies Program is discretionary. For consideration for admission, applicants to the Continuing Studies Program must meet at least one of the following two criteria.

- Earned bachelor’s degree from a college or university accredited by a national or regional accrediting body recognized by the Department of Education.
- Age 25 or older, and intend to initiate or complete academic study in a Duke University academic program.

Students are given academic counseling by the Office of Continuing Studies and Summer Session, and are subject to the regulations set forth for degree candidates, unless explicitly noted otherwise. A junior or senior who is currently enrolled at an external college or university who wishes to pursue an academic discipline unique to Duke University, may apply through the Office of Continuing Studies for admission as a nondegree, full-time visiting student for one or two semesters. Students with unique circumstances should contact the Office of Continuing Studies.

Minimum GPA Requirement. Successful applicants are expected to have earned a minimum 3.0 GPA in their most recent program.

Applicants who fail to meet the minimum GPA requirement, are subject to additional review and may be admitted on a provisional basis. As part of the additional review, the following will be taken under consideration:

- the applicant has not been enrolled as a full-time student in the last 4 years, and
- the applicant demonstrates the ability to successfully complete college level coursework by earning a passing grade (B or better) in a minimum of 4 courses during the last 2 years.
As part of a provisional admission, a student must earn a minimum 3.0 GPA in the semester immediately following the provisional admission.

Withdrawal. If a student enrolled in a Duke University program withdraws from the program, or is no longer in good academic standing, they must wait two academic terms before re-applying to any Duke program, including Continuing Studies (see the Satisfactory Continuation Requirements outlined on page 51 of the Bulletin of Undergraduate Instruction).

Semester Continuation Requirements. Semester continuation requires that you earn a passing grade (C-or better) in a minimum number of courses to remain in good standing. Students who receive at least one failing grade (D, D-, F) are subject to academic probation or academic dismissal.

| Academic Probation          | • Earned D or D-in at least one course            |
|                            | • Earned F in one course, and C-or better in at least two courses |
| Academic Dismissal         | • Earned F in at least one course |

Students placed on academic probation must acknowledge their probationary status in writing to the academic dean for Continuing Studies students, in order to continue into the next academic term. They are also expected to seek assistance from campus resources and have their course selection approved by their academic dean. In the probationary term they must earn grades of C or better in all courses to continue. Students who withdraw from all courses must wait two semesters to submit a request to return to study.

Program and application information is available from Duke Continuing Studies. Application deadlines: August 1 for the fall semester, December 1 for the spring semester, April 15 for Term 1 of the summer session, and June 1 for Term 2 of the summer session.

Certificate Programs
Professional certificate programs offered include human resource management, management accounting, digital media and marketing, big data and data science, technical communications, business communications, business ethics, paralegal studies, financial planning, event development, Six Sigma Green Belt, entrepreneurship, supply side management, sustainable management, online learning, finance essentials, legal nurse consulting, and others.

Nonprofit Management Program
Students interested in the nonprofit sector or in community development are invited to explore the noncredit course offerings of this program. Taught by experts and practitioners, these short courses offer instruction concerning financial and resource management, management of personnel and volunteers, leadership development, fundraising, planning and evaluation, board development/governance, and media relations.

Osher Lifelong Learning Institute (OLLI) at Duke
OLLI at Duke began in 1977 as the Duke Institute for Learning in Retirement. Since 2004 the membership organization has been a member of the Osher Lifelong Learning Network, a group of more than 120 institutes across the country dedicated to meeting the needs of older learners and extending the demographic served by traditional universities. OLLI sponsors noncredit course offerings in the fall, winter, and spring as well as fall and spring retreats, language tables, reading groups, film and lecture series, and volunteer opportunities.

Duke Youth Programs
For more than thirty-five years, Duke Youth Programs has offered academic enrichment opportunities for middle and high school students in the summer. Current offerings range from camps in biosciences and engineering, forensic science, game design, drones, math, cryptography, neurosciences, creative writing, SAT preparation, video production, and a college admissions boot camp.

For more information, call the Office of Continuing Studies and Summer Session at (919) 684-6259, or visit learnmore.duke.edu.

Institutes, Initiatives & Centers

University Institutes
• Bass Connections bridges the classroom and the world beyond the university, giving students from all of Duke’s schools a chance to tackle complex societal problems alongside our superb faculty. For more information, visit bass.connections.duke.edu.
• The Duke Global Health Institute (DGHI) brings together knowledge and resources from across the university to address the most important global health issues of our time. DGHI faculty, staff and students are engaged in research and educational projects in more than 40 countries, including the United States. For more information, visit globalhealth.duke.edu.
• The Duke Institute for Brain Sciences (DIBS) provides a vibrant hub for all who share our vision of making neuroscience greater than the sum of its parts by integrating schools, disciplines, analysis and education to accelerate breakthroughs and benefit society. For more information, visit dibs.duke.edu.
• The John Hope Franklin Humanities Institute (FHI) is built on a fundamentally collaborative model befitting the Duke University emphasis on knowledge in the service of society. Through interdisciplinary cross-fertilization, we seek to encourage the conversations, partnerships, and collaborations that continually stimulate creative and fresh humanistic research, writing, teaching, and practice at Duke. For more information, visit fhi.duke.edu.
**The Kenan Institute for Ethics** is an interdisciplinary think and do tank committed to promoting moral reflection and commitment, conducting interdisciplinary research, and shaping policy and practice at Duke and beyond. For more information, visit kenan.ethics.duke.edu.

**The Nicholas Institute for Energy, Environment & Sustainability** advances the university's mission to build a more sustainable world by developing transformative educational experiences; galvanizing and conducting impactful research; and engaging with key decision makers at the global, national, state, and local levels. For more information, visit nicholasinstitute.duke.edu.

**The Social Science Research Institute (SSRI)** brings together researchers with interests in problems that cross the various social and behavioral sciences, including problems that connect with the humanities and natural sciences. For more information, visit ssri.duke.edu.

**Initiatives**

- **The Duke Initiative for Science & Society** ("Science & Society") fosters research, education, communication, democratic deliberation, and policy engagement on the ethical progress of science and technology in society. For more information, visit scienceandsociety.duke.edu.

- **Innovation & Entrepreneurship Initiative (I&E)** believes all Duke students benefit from learning about innovation and entrepreneurship—from those who wish to found a company, to those who want to change the world with innovation, to those who simply want to cultivate a more creative and entrepreneurial mindset. I&E partners with schools and departments across Duke to offer interdisciplinary, experience-based education. For more information, visit entrepreneurship.duke.edu.

- **MEDx (Medicine + Engineering at Duke)** was forged in 2015 to enhance existing ties and foster new interdisciplinary collaborations between the School of Medicine and Pratt School of Engineering. An initiative rather than an institute, MEDx is structured to enhance existing ties and encourage new collaborations among faculty from both schools as well as other schools, institutes and initiatives at Duke. For more information, visit medx.duke.edu.

- **The Rhodes Information Initiative at Duke (iiD)** is an interdisciplinary program designed to increase "big data" computational research and expand opportunities for student engagement in this rapidly growing field. For more information, visit bigdata.duke.edu.

**Centers**

- **The Center for Documentary Studies (CDS)** offers an interdisciplinary program in the documentary arts—photography, audio, film/video, narrative writing, new media, and other means of creative expression—that emphasizes active engagement in the world beyond the university campus. For more information, visit documentarystudies.duke.edu.

- **The Dewitt Wallace Center for Media and Democracy (DWC)** is Duke University’s hub for the study of journalism. DWC studies the interaction between news media and policy, supports watchdog and accountability reporting in the United States and around the world, and teaches about the media's role in democracy. The center is part of the Sanford School of Public Policy, and shares in the Sanford School’s mission of teaching, research, and policy engagement, with the goal of putting knowledge in service to society. For more information, visit dewitt.sanford.duke.edu.

- **Duke Civic Engagement (DCE)** strengthens and connects the ways in which Duke partners with communities. DCE supports Duke’s collaborations on pressing social challenges by increasing the capacity of the campus to sustain partnerships and sharing best practices in community engagement. For more information, visit civic.duke.edu.

- **The Duke University Center for International and Global Studies (DUCIGS)** grounds its research, teaching, and programming on the deep, region and culture-specific knowledge and experience of its organizational units while exploring global topics, pursuing interdisciplinary and cross-regional collaboration, and welcoming new approaches within areas studies and global studies. DUCIGS is home to various international area studies centers, councils, and initiatives. Visit the DUCIGS website at igs.duke.edu to learn more about the many centers and initiatives it houses.

- **DukeEngage** provides fully-funded opportunities that enable students and faculty to collaborate with organizations across the globe to address critical societal needs through an immersive summer of civic engagement. For more information, visit dukeengage.duke.edu.

- **The Margolis Center for Health Policy** catalyzes Duke University’s leading capabilities including interdisciplinary academic research and capacity for education and engagement, to inform policy making and implementation for better health and health care. The Center has offices and staff on Duke University’s campus in Durham, North Carolina and at the Duke in DC offices in the heart of the nation’s capital. For more information, visit healthpolicy.duke.edu.

**Libraries & Technology**

**Duke University Libraries**

The Duke University Libraries are the shared center of the university's intellectual life. The William R. Perkins Library, Bostock Library and Rubenstein Rare Book & Manuscript Library comprise the main West Campus library complex, which is joined by Lilly and Music libraries on East Campus, the Pearse Memorial Library at the Duke Marine Lab and the separately administered libraries serving the schools of Business, Divinity, Law and Medicine. Together they form one of the nation's top ten private university library systems.

**All Libraries**

- Perkins & Bostock Libraries (library.duke.edu)
The Student Disability Access Office (SDAO) recognizes disability as an aspect of diversity that is integral to society and to our campus community. Accessibility is an essential feature of the Duke campus, and we strive to create an inclusive community for our students. We strive to ensure that students with disabilities are provided the tools they need to fully access all aspects of student life inside and outside of the classroom.

Core Functions of SDAO
- Partner with students with disabilities to establish services for their access and inclusion on campus
- Manage, coordinate, implement and evaluate accommodation/service programs
- Serve as a resource to students/faculty/staff to ensure effective provision of services
- Provide educational and resource support to the campus community regarding how to create and sustain access and inclusion for students with disabilities in all aspects of the university
- Provide resource and referral information to the campus community and prospective student and their families

SDAO works with each student individually to establish academic adjustments and auxiliary aids and services, more frequently referred to as academic accommodations for the purpose of eliminating the environmental barriers impacting the student's equitable access to the campus facilities, programs and activities. To find out more information about how to establish services with SDAO you can contact us in the following ways.

In order to receive consideration for reasonable accommodations under Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990 (ADA), and the ADA Amendments Act of 2008, a student must have a physical or mental impairment that substantially limits one or more major life activities. Students requesting accommodations under the provisions of the ADA, ADA Amendments Act of 2008, and Section 504 of the Rehabilitation Act of 1973 (e.g., academic, accessibility, housing) must contact the Student Disability Access Office to explore possible coverage. Students with medical conditions not covered under the provisions of the ADA and the ADA Amendments Act may wish to contact Duke Student Health Service. Additional information and requests for accommodations may be found on the SDAO website.

For more information, visit access.duke.edu/students.

Housing, Dining, & Transportation

Housing and Residence Life (HRL)

Undergraduate Housing. Housing, Dining and Residence Life manages all aspects of the university's three-year undergraduate residency requirement. Residential programs are designed to build positive communities that value learning, create new opportunities for faculty engagement, and generate positive social connections. HRL, student residents and others in the Duke community develop and maintain environments that support classroom learning and encourage students to seek learning opportunities in the world around them. HRL promotes opportunities for students to connect with others and develop a strong and enduring sense of belonging; and intentionally provide opportunities for students to grow and develop as they continue to negotiate developmental issues related to identity, autonomy, and responsibility. HRL programs are rooted in the concepts of mutual respect and civility, and recognize and celebrate the dignity and self-worth of all members. For more information, visit studentaffairs.duke.edu/hdrl.

Graduate and Professional Student Apartments. Limited on-campus housing is available to full-time graduate students. For more information on graduate student housing application timeline and facility amenities, visit students.duke.edu/living/housing/graduate-professional-housing. Assignments are made in the order of receipt of completed applications.
Off-Campus Housing. The Duke Community Housing Office maintains a listing of rental apartments, rooms, and houses provided by property owners or real estate agencies in Durham at durhamgradhousing.com.

Duke Housing and Residence Life (HRL) operates a website specifically to simplify the off-campus housing search for students, parents, faculty and staff, and for area property owners and managers at nearduke.com/housing.

Duke Dining. Duke is home to one of the most innovative, dynamic, and cutting edge collegiate dining programs in the country, with access to over 50 dining locations that include 33 on-campus locations, Merchants-on-Points (off-campus restaurants that deliver), and food trucks. Find more information at students.duke.edu/living/dining.

DukeCard

All Duke students are issued electronic Duke University identification cards through their mobile devices. This identification should be carried at all times. DukeCards are the means of identification for library privileges, athletic events, and other university functions or services open to them as university students. Students will be expected to present their cards on request to any university official or employee. DukeCards are not transferable and fraudulent use may result in loss of student privileges or suspension. For more information, visit dukecard.duke.edu.

Parking & Transportation

Duke Parking & Transportation provides the Duke community with parking options that balance price and convenience while managing supply and demand across the parking system. A valid permit is required in all locations; most locations are gated and the permit activates the entry and exit gates. Visitors who do not have a permit pay by the hour in facilities specially set aside for them. Accommodations are also available for patrons that require accessible parking or transportation.

Options include annual permits and short-term permits that allow for flexible or occasional parking. Anyone affiliated with Duke is eligible to purchase on-campus parking in available locations. There are also many transportation options available at Duke, including Duke Transit (buses), vans, city and regional buses, private taxi service, and a ride-hailing program. For more information, visit parking.duke.edu.

Student Affairs & Organizations

The Division of Student Affairs is critically engaged in supporting the holistic engagement and personal growth of all students who attend Duke. The Division collaborates with student leaders, faculty, families, community members and many others in the delivery of key services.

Its programs and services are designed to support holistic wellbeing, foster an inclusive and dynamic community, and complement Duke’s commitment to academic excellence. For more information, visit studentaffairs.duke.edu.

The Student Affairs Identity and Cultural Centers also serve as important resources and places of connection and support for many of our students. The centers are offering programming and support throughout the year, including summer. ICCs include:

- Center for Multicultural Affairs
- Center for Muslim Life
- Center for Sexual and Gender Diversity
- Duke International Student Center
- Jewish Life at Duke
- Mary Lou Williams Center for Black Culture
- Women's Center

Graduate and Professional Student Government

The Graduate and Professional Student Government of Duke University (GPSG) is the umbrella student government organization for Duke's nine graduate and professional schools. Its purpose is to: represent and advocate on behalf of graduate and professional students at Duke University; serve as a liaison among the student governments of the graduate and professional schools of the University; serve as a liaison between graduate and professional students and the University Administration; nominate graduate and professional student representatives to University committees; program events of interest to the graduate and professional student community; and financially support the programming of graduate and professional student groups.

Visit the GPSG website at gpsg.duke.edu. Contact GPSG (gpsgexec@duke.edu) for additional details on how students can become involved.

The Black Graduate and Professional Student Association

The Black Graduate and Professional Student Association (BGPSA) represents all minority graduate and professional students on the Duke University campus. The association's primary mission is to enhance the Duke experience for its members through community service, social, and academically-based programming events. As an umbrella organization, the association welcomes students from groups including the Black & Latino MBA Organization, Black Law Students Association, Black Seminarians Union, Boucheit Society, Hurston-James Society, and Student National Medical Association. Through its academic forums, luncheons, community service initiatives, social events, and recognition ceremony the group hopes to assist in the development of future minority leadership in the Duke community and in the world.

Religious Life
In partnership with the Division of Student Affairs, the Chapel convenes, supports, and advocates for all of the officially recognized Religious Life groups on campus that serve students, including Buddhist, Catholic, Hindu, Jewish, Latter-Day Saints, Muslim, Orthodox, and Protestant organizations and groups. There are about two dozen Religious Life groups at Duke; find a listing of them at chapel.duke.edu/religiouslife.

With a mission of “bridging faith and learning,” the Chapel holds ceremonies, concerts, Christian worship services, and more. It is a sanctuary open to all people for important personal moments of prayer, reflection, grief, and gratitude. The Chapel’s Student Ministries provides opportunities for undergraduate students to hear and respond to God’s call for their lives on campus, in Durham, and beyond through study, artistic expression, counsel, service, and community. Learn more at chapel.duke.edu.

**Intercollegiate Athletics**

The Athletic Department fosters intercollegiate athletics by striving for excellence and by providing the best possible framework within which highly accomplished student-athletes can compete. The department has a dual responsibility to provide a high-quality athletic program and environment so that all students have the opportunity to compete to the fullest extent of their abilities. Duke is a member of the National Collegiate Athletic Association (NCAA) and the Atlantic Coast Conference (ACC).

**Student Health & Safety**

**Campus Police**

It is the mission of the Duke University Police Department to protect and serve the people and property of Duke. We are guardians of a community of world class education, research and healthcare and must prevent violence, reduce fear, and build relationships. For more information, visit police.duke.edu.

**Counseling & Psychological Services (CAPS)**

CAPS helps Duke students enhance their strengths and learn to cope with the trials of living, growing, and learning. CAPS offers many services to Duke undergraduate, graduate, and professional students, including brief individual counseling/psychotherapy, consultation, couples and group counseling, and assistance with referrals. CAPS’ staff also provide outreach education programs to student communities, promoting an empathic and supportive culture. Staff members are available for consultation with faculty concerning students or other matters relating to mental health in the university community. The CAPS staff includes psychologists, clinical social workers, and psychiatrists experienced in working with college-age adults. CAPS’ staff carefully adhere to professional standards of ethics, privacy, and confidentiality. For more information, visit studentaffairs.duke.edu/caps.

**DukeReach**

DukeReach provides direct case management services including interventions, advocacy, referrals and follow-up services for students who are experiencing significant difficulties related to mental health, physical health, and/or psycho-social adjustment. The Assistant and Associate Deans in DukeReach coordinate student services and provide connections with campus departments as well as outside agencies and providers. For more information, visit studentaffairs.duke.edu/dukereach.

**DuWell**

DuWell works to enhance the educational experience for Duke students by addressing substance use and abuse issues and promoting healthy physical, emotional and social development, including issues related to sexual health. It offers one-on-one screening (for substance use) and health coaching, workshops and trainings on the different topic areas of wellness (including Social Host Education, Stress and Sexual Health workshops) and programs for student groups upon request. Consultation on prevention of high-risk behavior and promotion of wellness is available to students, faculty, professionals and staff. DuWell is dedicated to fostering a living/learning environment on campus and within the surrounding community that encourages the full development of the individual as an engaged member of the community. For more information, visit studentaffairs.duke.edu/duwell.

**Student Health**

Student Health Services at Duke University is jointly supported by the Division of Student Affairs and the Department of Pediatrics. The Duke Student Health Center is the primary source for a wide range of healthcare services, many of which are covered by the Student Health Fee. Its mission is to provide evidence-based, patient-centered health care to the Duke student community in a professional and compassionate manner that directly contributes to the student’s well-being and overall success. For more information, visit studentaffairs.duke.edu/studenthealth.

Duke's Undergraduate Instruction
The Undergraduate College and School
Undergraduate students in the Trinity College of Arts & Sciences and the Pratt School of Engineering take advantage of the rich resources available across the schools and institutes that make Duke such a distinguished research university. Undergraduates learn, engage, and connect with committed professors and mentors whose innovative research is recognized around the world. Trinity and Pratt students interact with these faculty members not only in the classroom and the laboratory, but in a variety of settings, both formal and informal. This gives students the opportunity to exchange ideas with professors, graduate students, and broader communities.

Duke students are empowered to learn, expected to change, and encouraged to lead. A Duke education is based on the understanding that students grow intellectually and personally through successive experiences that are often transformative. Duke provides undergraduates with rewarding learning experiences during which they generate, evaluate, integrate, and apply knowledge; develop fluency across cultures; learn to value diversity and difference; and become active and ethical agents of change in their communities and in the world.

One of Duke’s core values is applying knowledge in the service of society. With the schools of the arts and sciences, environment, engineering, and public policy each offering undergraduate instruction, students can approach real-world problems from different fields of inquiry. Duke also offers many service and learning opportunities such as Global Education, DukeEngage, student organizations, and research opportunities that involve students directly with the many major challenges confronting society.

Trinity College of Arts & Sciences
Trinity is Duke’s liberal arts college. Steeped in academic tradition and infused with a sense of dynamic engagement, the college embraces the enduring philosophy of teaching and learning that empowers students with a broad base of knowledge and a strong sense of values and ethics. The college enhances the liberal arts tradition with robust opportunities to participate in independent research as well as civic and global engagement.

Trinity College provides students with the opportunity to connect directly with the scholarship of Duke’s faculty. Faculty mentors guide undergraduates in their research, much of it at the cutting edge of scholarship in the humanities, natural sciences, and social sciences. In fact, undergraduates are integral to the production of knowledge as well as artistic productions.
Trinity students learn to communicate persuasively, bring meaning to information, discern competing claims, and develop a capacity for reasoning, analysis, and empathy. Students join academic conversations grounded in values of integrity, freedom of inquiry and expression, respect for diversity and difference, and reliance on reason and evidence.

Trinity College’s 671 faculty members teach in thirty-eight departments and programs. Many teach and collaborate across traditional disciplinary boundaries, which create distinctive interdisciplinary opportunities for students to learn without limits. The innovative course of study Trinity College students pursue encourages inquiry in and outside the classroom, laboratory, and studio. Global education, service learning, internships, and research opportunities complement classroom instruction to infuse students with the excitement of discovery and the opportunity to use knowledge in the service of society.

Pratt School of Engineering

The undergraduate engineering program at Duke University is designed both for students who intend to become professional engineers and for those who desire a modern, general education based on the problems and the promises of a technological society. The environment in which students are educated is as important in shaping their future as their classroom experiences. In the Pratt School of Engineering, this environment has two major components: one is modern technology derived from the research and design activities of faculty and students in the school; the other is the liberal arts environment of the total university, with its humanitarian, social, and scientific emphases.

Engineering is not a homogeneous discipline; it requires many special talents. Some faculty members in the Pratt School of Engineering are designers; they are goal-oriented, concerned with teaching students how to solve problems, how to synthesize relevant information and ideas, and apply them in a creative, feasible design. Other engineering faculty members function more typically as scientists; they are method-oriented, using the techniques of their discipline in their teaching and research to investigate various natural and artificial phenomena.

QuadEx: Duke’s Residential Model

QuadEx builds a residential and community link between East and West Campus, which defines where students live and the community they build there. QuadEx is organized around seven West Campus Quads that support students throughout their four years at Duke. Each Quad is linked to an East Campus neighborhood, comprising two first-year residence halls. Students are assigned their Quad affiliation before arriving at Duke and will remain a Quad member for life. The Quads are also the source of strong, residentially-based communities, which are student-driven and promote inclusion and belonging for all students. The Quads govern their Quad communities and drive the development of each Quad’s identity and traditions. Students work to co-create shared experiences in ways that celebrate the unique features of each Quad through signs, symbols, rituals, and traditions. These identities foster an enduring sense of connection to bridge past, present, and future generations of Quad members. Equitable access to financial and administrative resources support fun and engaging on-campus social and intellectual events, but the different ways students use those resources result in the development of seven unique Quad cultures.

QuadEx also offers the targeted delivery of programs and resources that are critical to student success and wellbeing. These include health and wellness support, career guidance, academic resources, alumni programs, and intellectual exploration opportunities. QuadEx signature programs include experiential orientation, the Faculty in Residence Program, the Faculty Fellows, Academic Guides, and Sophomore Spark.

Duke’s Undergraduate Instruction

History

Duke University was created in 1924 by James Buchanan Duke as a memorial to his father, Washington Duke. The Dukes, a Durham family that built a worldwide financial empire in the manufacture of tobacco products and developed electricity production in the Carolinas, had long been interested in Trinity College. Trinity traced its roots to 1838 in nearby Randolph County when local Methodist and Quaker communities opened Union Institute. That school, whose name changed to Trinity College, moved to Durham in 1892, where Benjamin Newton Duke served as a primary benefactor and link with the Duke family until his death in 1929.

Women entered Trinity College as regular students in 1892, and Washington Duke’s gift to the school’s endowment in 1896 required that it would treat women “on an equal footing with men” by creating an on-campus residence for them. In December 1924, the provisions of indenture by Benjamin’s brother, James B. Duke, created the family philanthropic foundation, The Duke Endowment, which provided for the expansion of Trinity College into Duke University. Duke maintains a historic affiliation with the United Methodist Church.

As a result of the Duke gift, Trinity underwent both physical and academic expansion. The original Durham campus became known as East Campus when it was rebuilt in stately Georgian architecture. The Philadelphia architectural firm of Horace Trumbauer and Julian Abele, the firm’s chief designer in the 1920s, played a central role in the creation of East and West Campuses. West Campus, Gothic in style and dominated by the soaring 210-foot tower of Duke Chapel, opened in 1930. East Campus served as the home of the Woman’s College of Duke University until 1972, when the men’s and women’s undergraduate colleges merged. In 1963, the first five Black undergraduates enrolled at Duke. In 1995, East Campus became the home for all first-year students. In 2016, the main quad on West was named after Abele, an African American architect whose contributions were not widely known on campus until the mid-1980s.

Engineering courses were first taught intermittently starting in 1882. Engineering became a permanent department in 1910, an undergraduate College of Engineering in 1939, and a School of Engineering in 1966 after the addition of graduate courses. The school was renamed the Edmund T. Pratt Jr. School of Engineering in 1999. Academic expansion of the university throughout its history has included the establishment of other graduate
Duke University

and professional schools, as well. The first divinity degree was awarded in 1927, the first PhD in 1928, and the first MD in 1932. The School of Law, founded in 1904, was reorganized in 1930. The following year, the undergraduate School of Nursing was established, transforming in 1985 to a graduate school. The School of Forestry, which was founded in 1938, became the School of Forestry and Environmental Studies in 1974 and was renamed the Nicholas School of the Environment in 1995. The business school was established in 1969 and renamed The Fuqua School of Business in 1980. In 2009, the Sanford School of Public Policy became Duke University’s tenth school. All undergraduates now enroll in either the Trinity College of Arts & Sciences or the Pratt School of Engineering.

Today, Duke is a global leader. It consists of a community of learners from around the nation and world, including more than 6,700 undergraduates and 10,000 graduate and professional students. Students come from diverse geographic, racial, and socioeconomic backgrounds. The Class of 2026, with only 6 percent acceptance rate, is composed of 11 percent international students and 55 percent female students. Self-reported race and ethnicity numbers for the class show 10 percent identify as Black, 25 percent as Asian, 14 percent as Latino, 1 percent as Indigenous, 41 percent as White, and 9 percent as more than one race. Also, more than 50 percent of undergraduate students receive some form of financial aid, which includes need-based aid, athletic aid, and merit aid. About 10 percent are “first-generation” or the first in their family who will graduate from a four-year university.

About half of Duke undergraduates study abroad, many in Duke-run programs. The Duke-NUS Medical School in Singapore was established in 2005 as a strategic collaboration between Duke University and NUS. In 2014, Duke partnered with Wuhan University in China to open Duke Kunshan University, with the goal of creating a world-class liberal arts and research university. In 2018, Duke Kunshan fully launched its four-year undergraduate degree program. In recent years, DKU classes have been drawn from 25+ countries, including a strong representation from China and the United States.

Academic Resources

Academic Guides Program

Academic Guides work to promote the academic excellence and well-being of undergraduates in the residence halls on West Campus. By collaborating with campus partners, we offer one-on-one meetings, quad-based programming, and broader community engagement opportunities that provide a context for deeper engagement with the issues that matter to students. We embrace the idea that true academic success comes from overall well-being, which means we listen to students’ concerns, support students in and out of the classroom, and connect students with any and all resources needed to thrive at Duke. For more information, visit academicguides.duke.edu.

Academic Resource Center

Being a Duke student can be inspiring, rewarding, and demanding. There are challenging classes and many exciting opportunities in and out of the classroom. The Academic Resource Center (ARC) offers resources to maximize students’ capabilities so they can cultivate successful academic experiences at Duke. ARC services are free to all Duke undergraduate students, in any year, studying in any discipline.

Learning Consultations give students an opportunity to meet one-on-one with a professional staff member to enhance their academic skills and learn strategies tailored to how they learn and to their specific courses. Consultations can address many of the challenges students may face, including time management; procrastination, and motivation; how to balance study, work, and co-curricular activities; effective note-taking; exam preparation; and more.

Peer Tutoring offers group tutorials for select courses. Group tutorials provide one-hour, sessions for groups of two to five students with an assigned tutor.

STEM Advancement through Group Engagement (SAGE) learning communities provide opportunities for students to enhance their course experience, build community, and develop scholarship and leadership skills in certain STEM courses. Students work in small groups facilitated by upper-level undergraduate students. Currently, SAGE learning communities support introductory chemistry, biology, biochemistry, economics, mathematics, and computer science courses. See the ARC website for current courses.

Study Connect facilitates connecting students with their classmates to form course study groups. Students can also find other students interested in study groups for the GRE and MCAT.

LD/ADHD Support for students with learning and attention challenges provides course specific and tailored learning strategies through learning consultations, ADHD coaching, and tutoring.

For more information, call the ARC at (919) 684-5917, visit arc.duke.edu, or email ARC@duke.edu.

Duke Testing Center

The Duke Testing Center provides a secure, comfortable, and minimally distracting testing environment for Duke undergraduates who qualify and are enrolled in a course with an instructor who uses the Testing Center. Students who qualify include those granted testing accommodations by the Student Disability Access Office, or who need to complete make-up exams due to an approved absence. Students will schedule in advance to take their Duke course exams in the proctored environment at the Center. For more information about the Testing Center, visit testingcenter.duke.edu.

Undergraduate Research
Undergraduate Research Support Office
Duke University encourages connections between the academic experience and the research endeavors of its faculty scholars and investigators. The Undergraduate Research Support (URS) Office in Trinity College promotes student involvement in research by advising and by providing financial support for research engagements in many disciplines. The office provides research assistantships and grants through the academic year, research grants and fellowships for the summer, and travel grants for presentations at professional conferences. The URS Office also organizes symposia of undergraduate research and it administers summer research programs. For detailed information, visit undergraduateresearch.duke.edu.

Research Laboratories
Duke researchers on campus and in the medical center perform about $1.2 billion a year in research, most of it in clinical medicine and discovery science. Their work consistently places Duke among the top ten research universities in the nation. More than half of Duke undergraduates complete faculty-mentored research projects, working with professors from every department across campus. Students can pursue collaborative or individual research in programs and campus facilities. These include but are not limited to the medical center; the Levine Science Research Center; the Fitzpatrick Center for Engineering, Medical and Applied Sciences; the French Family Science Center; the Humanities Labs at the Franklin Humanities Institute; the Media Arts + Science Complex; the Duke Collaboratory for Classics Computing; and the Social Sciences Research Institute, as well as the teaching and research laboratories throughout Trinity College of Arts & Sciences, the Pratt School of Engineering, the Nicholas School of the Environment, and the Sanford School of Public Policy. Undergraduates also conduct research at the Duke University Marine Laboratory in Beaufort, NC; Duke Forest, adjacent to the campus; and the Duke Lemur Center.

Deans & Advisors

Academic Deans
Academic deans play many roles in undergraduate education. Primarily, they
1. monitor academic progress of all students,
2. interpret academic policies,
3. guide and advise students for success, and
4. support students of concern.

Students have the same academic dean for the duration of their academic career at Duke. Students consult with their academic dean whenever needed for discussion of long-term goals, issues concerning graduation requirements, special course enrollments or withdrawals, personal or medical problems that affect academic work, and general oversight of progress to the degree.

Academic deans also celebrate success by recognizing students who make the Dean's list and connecting them with other opportunities like the Undergraduate Research Support Office, Grand Challenge Scholars Program, and the Dean's Summer Research Fellowship program. They also help students navigate graduate and professional school opportunities.

Advising
At Duke, students are supported by a network of advisors who help them find the academic path that is right for them. Central to this network is their college advisor. The college advisor's role goes beyond helping a student choose classes and understand requirements to include helping the student think about their overall educational and personal goals, as well as possible majors and careers and interesting co-curricular opportunities. Students are required to meet with their college advisor each semester before registration but are encouraged to meet more regularly to discuss academic goals, plans for achieving them, and any other issues related to their academic experience.

In addition to their college advisor, students can consult with their academic dean, specialized advisors called directors of academic engagement, pre-professional advisors, faculty, and peer success leaders. Good advising can also be informal and often occurs in conversation with members of the faculty. Students have a responsibility to understand and meet the requirements for the curriculum under which they are studying and should seek advice as appropriate. Students will benefit from using the wide range of advising resources that are available to them.

Preparation for Graduate and Professional Schools
Students planning to enter a graduate or professional school should consult published information from the relevant advising programs or offices at advising.duke.edu/preprofessional-advising.

For specific information regarding courses and curriculum choices, students should seek input from their faculty advisors and pregraduate or preprofessional advisors where appropriate. Information specific to particular graduate and professional schools can be obtained from the website of each school. Graduate and professional schools require standardized tests for students seeking admission. Information on the tests can be obtained from the appropriate preprofessional school or pregraduate school advisor in Trinity College of Arts & Sciences.

Graduate Schools of Arts and Sciences
Students interested in obtaining a master of science, master of arts, or doctor of philosophy degree should discuss their plans as early as possible with faculty in the proposed field of advanced study. As undergraduates, they should become involved in research which may involve laboratory work, advanced seminars, or independent study. Graduate schools look favorably upon evidence that a student has conducted mentored research such as an honors thesis, leading to Graduation with Distinction. Many graduate schools require a reading knowledge of a foreign language. A research mentor, faculty advisor, and the director of graduate studies in the major department are the best resources for advice about graduate school in the arts and sciences.

**Graduate Schools of Engineering**

Students interested in graduate work in engineering should consult the associate dean of Pratt School of Engineering or the director of graduate studies in one of the engineering departments. Most engineering graduate schools require that a candidate have the equivalent of a bachelor of science in engineering degree; however, students in the natural and social sciences may obtain conditional admission if they have a sufficient background in mathematics.

**Graduate Business Schools**

Students seeking information about graduate business schools should consult the Graduate Business Advisor in Trinity College. In preparing for graduate business school, students should gain a good liberal arts background, by choosing courses that will help them develop communication skills and an understanding of human nature. Students should sharpen their analytical and quantitative skills. Most often this is done through courses in calculus, statistics, microeconomics, accounting, and computer science. Calculus, however, is the course of choice. Students should seek to develop their leadership skills through participation in classroom projects and by becoming active in any student organization of their choice.

**Medical and Dental Schools**

Students planning to enter schools of medicine and dentistry can prepare for admission by taking the courses required by the professional schools of their choice. Health professions schools place a priority on well-rounded achievement. Medical schools and most dental and veterinary schools require two semesters each of inorganic chemistry, organic chemistry, biology, and physics (each with corresponding labs), and English. Some schools also require or recommend biochemistry, math, and/or statistics, or additional biology courses. The MCAT requires students to have, in addition to the above courses, a background in biochemistry, statistics, psychology, and sociology. For a complete listing of course requirements set by each school, consult the Medical School Admissions Requirements, published by the Association of American Medical Colleges, or the Official Guide to Dental Schools, published by the American Dental Education Association. Students should discuss their programs of study with their major advisors, academic deans, and an advisor for the health professions from the Office of Health Professions Advising.

**Graduate Programs in the Health Professions**

Students interested in careers as physical therapists, health administrators, or others of the allied health professions should prepare with coursework in the natural sciences and behavioral sciences within a liberal arts curriculum. Up-to-date information on allied health professions and programs is best accessed through the Internet. An advisor in the Office of Health Professions Advising is available to meet with students interested in allied health professions.

**Law Schools**

Students who plan to prepare for law school and a career in law should seek breadth in their undergraduate courses. They may choose to major in any field. Students should select courses that encourage thinking analytically and synthetically, as well as courses that strengthen oral and written communication skills. For a fuller discussion of undergraduate preparation for the study of law, students should refer to the Duke Pre-Law Handbook or the Law School Admission Council (LSAC).

**Theological Study and Professional Religious Work**

Students interested in studying theology are encouraged to enroll in a Duke Divinity School course to explore topics of interest and engage with faculty members and other administrators to discuss possibilities for further study. Preparation for graduate theological study often prioritizes a strong background in the humanities with broad knowledge in the areas of biblical and modern languages, religion, English, history, and philosophy. Most theological schools do not require languages for admission at the master degree level; however, doctoral programs in theological fields ordinarily require proficiency in two modern languages prior to completing the program. Additionally, doctoral programs in biblical studies ordinarily require biblical language skills in Greek and Hebrew as a prerequisite for admission.

While theological degrees have most often been sought by persons desiring training for ordained ministry or other professional religious roles, theological degrees are also pursued by persons in other disciplines such as medicine, nursing, law, business, public policy, education, environmental studies, and social work to complement their studies and training.

More detailed information about theological study may be obtained from the Duke Divinity Office of Admissions by calling (919) 660-3436, sending an email to admissions@div.duke.edu, or visiting divinity.duke.edu.
Special Programs

Bass Connections
Bass Connections brings together faculty, graduate students, and undergraduate students to tackle complex societal challenges in interdisciplinary research teams. The program exemplifies Duke’s commitment to interdisciplinary research and teaching as a vital part of the university’s mission. Through Bass Connections project teams, courses, and summer programs, students and faculty engage in interdisciplinary, collaborative research focused on societal challenges, often in partnership with external organizations. Many participants choose to take their research further through grants and other opportunities within Duke and beyond.

Project Teams
Interdisciplinary research teams tackle complex societal challenges over two semesters (some teams add a summer component). Students can receive course credit during the academic year and funding during the summer. For more information, visit bassconnections.duke.edu/project-teams.

One-Semester Courses
Numerous courses highlight interdisciplinary thinking, collaborative assignments, and interaction with community partners. For more information, visit bassconnections.duke.edu/courses.

Summer Programs
Students spend six to ten weeks immersed in mentored research through a range of summer programs, including Data+, Story+, Global Health Student Research Training, and the Summer Neuroscience Program. Summer funding is available. For more information, visit bassconnections.duke.edu/summer-programs.

Student Research Awards
Students may apply for funding for student-driven research projects, collaborative or individual. For more information, visit bassconnections.duke.edu/student-research-awards.

Duke Immerse
Duke Immerse offers 4.0-course-credit, semester-long academic experiences in which a small cohort of undergraduates enrolls in a set of four interrelated seminars focused around a significant global challenge or issue. Examples of current Duke Immerse themes include pandemics and health, urban governance, food studies, human rights, and migration. Duke Immerse programs are research intensive and often include travel, fieldwork, and experiential learning. All course credits and codes apply toward a student’s graduation requirements. Each Duke Immerse offering has intensive faculty-student interaction, and many Duke Immerse students leverage their research for a senior thesis. Student experience data indicate that the Duke Immerse program offers students a strong sense of academic belonging and that Duke Immerse students are much more likely to have a deeply meaningful connection with a faculty mentor.

Different Immerse themes are offered in the spring and fall each year. The Duke Immerse Program requires participants to enroll in a set of four seminars. The seminars fulfill general curriculum, major, minor, and certificate requirements. Courses are often cross-listed in more than one department. For more information about courses in the Duke Immerse Program, visit immerse.duke.edu.

The Focus Program
The Focus Program creates a vibrant intellectual community involving faculty and first-year students embedded in a living-learning context during the fall semester. Students are postured for success from the very beginning in courses that focus on the scientific method, problem solving, and primary research. The Focus Program allows incoming first-year students to enroll in two of their four courses prior to starting at Duke. This early enrollment makes entry into Duke much less stressful for incoming students by providing access to faculty, their own cohort, and former Focus students from their cluster.

The Focus Program is an example of transformational education, where the boundaries of the classroom are fundamentally redefined. Many seniors note that the Focus Program is one of the most influential experiences of their college career.

The Focus Program draws its offerings from courses taught by more than sixty Duke University professors in twenty-nine cooperating departments and centers within two institutes and four schools. Courses have been designed specifically for the program to help place the topics chosen for specialization in a broad interdisciplinary and global perspective. Classes are small, interrelated, and mutually reinforcing; they provide opportunities for discussion and individualized research. The program is administered by a faculty director, program staff, and a faculty advisory committee representing the various clusters.

Since one of the aims of the Focus Program is to encourage the integration of academic life with residential life, participants of each cluster live in the same residence hall together with other first-year students.

Current Focus Program information may be found on the program website at focus.duke.edu. Questions and comments may be directed to the Focus Program Office at (919) 684-9370 or focus@duke.edu.
**Reserve Officer Training Corps**

Duke University and the military services cooperate in offering officer education programs to provide opportunities for students to earn a commission in the United States Air Force, Space Force, Army, Navy, or Marine Corps. These programs are described below, and detailed information on scholarships, entrance requirements, and commissioning requirements is available from the offices of the Department of Aerospace Studies (Air Force and Space Force), the Department of Military Science (Army), and the Department of Naval Science (Navy and Marine Corps). Courses offered in these departments are described on the Courses page.

**The Air Force Reserve Officer Training Corps (AFROTC)**

The Air Force Reserve Officer Training Corps (AFROTC) functions as the Department of Aerospace Studies at Duke University. AFROTC's mission is "Develop Leaders of Character for tomorrow's Air Force and Space Force." AFROTC offers students the unique opportunity to earn a commission as a Second Lieutenant in the United States Air Force or Space Force upon successful completion of the program and graduation. AFROTC selects, educates, trains, and commissions college men and women through a three-year to four-year curriculum. The program consists of both the General Military Course (GMC), a course sequence normally taken during the freshman and sophomore years, and the Professional Officer Course (POC) taken during the junior and senior years. The GMC program is open to freshman and sophomore students who meet AFROTC selective military eligibility requirements.

Students who complete the GMC program may compete for selective entry into the POC. Becoming a POC requires successful completion of a 13-day intensive leadership program. Field Training is generally offered the summer between sophomore and junior years. Also, during summer breaks, students are given the opportunity to volunteer for Air Force sponsored advanced training programs and internships in a variety of different areas.

Students may compete for various types and lengths of scholarships. These scholarships pay up to full tuition, a monthly tax-free stipend of $300-$500, and an annual book allowance of $900. All members of the POC receive the tax-free stipend even if not on scholarship. Upon program completion and graduation, students are commissioned and assigned to active duty units within the United States Air Force and Space Force for a service commitment of at least four years.

For further information, please direct inquiries to the Department of Aerospace Studies Recruitment Officer at Room 265 Trent Hall Building, (919) 660-1869, email det585@duke.edu, or visit their website at afrotc.duke.edu.

**The Army Reserve Officers' Training Corps (AROFTC)**

Army ROTC provides students of strong character with an opportunity to develop themselves as scholars/athletes/leaders and earn a commission as an Army Officer. Two programs are available, the three- or four-year progression program and the two-year lateral entry program.

The three- or four-year program consists of the Basic Course (first-year and sophomore year) and the Advanced Course (junior and senior years). Students who enroll at the start of their sophomore year have the option to compress the Basic Course into one year. Direct entry into the Advanced Course (a two-year program) is possible by attending four weeks of training at Fort Knox, Kentucky, during the summer before the student's junior year. Students may also be allowed direct entry into the Advanced Course if they have completed Basic Training through the Active Army, Army Reserve, or Army National Guard. Students wishing to register for the two-year program should confer with the Department of Military Science before March of their sophomore year to sign up for summer training and maintain eligibility to compete for a two-year scholarship. There is currently one mandatory summer training requirement: Advanced Camp at Fort Knox, which takes place over a five-week period between the junior and senior years. All uniforms, equipment, and texts are provided.

Detailed information on Army ROTC is available from the Department of Military Science at arotc@duke.edu or on the departmental website at arotc.duke.edu.

**The Naval Reserve Officer Training Corps (NROTC)**

The Department of Naval Science offers students the opportunity to become Navy and Marine Corps officers upon graduation. Selected students will receive up to four years of tuition, fees, uniforms, and textbooks at government expense under the auspices of the Scholarship Program. In addition, scholarship students receive subsistence pay and summer active duty pay of approximately $3,000 a year. Each summer they participate in four weeks of training either aboard a ship or a shore facility to augment their academic studies. A minimum of five years of active duty service is required upon graduation.

A two-year program is available to rising juniors. Students wishing to join the two-year program must meet with the Department of Naval Science no later than March 1 of their sophomore year in order to qualify for the summer training and two-year scholarship, which covers full tuition, fees, uniforms, and textbooks.

Non-scholarship students wishing to join the NROTC Battalion may be enrolled in the College Program at any time before the spring semester of their junior year. They take the same courses and wear the same uniforms, but attend the university at their own expense. Uniforms and Naval Science textbooks are provided by the government.

College Program students may compete for scholarship status through academic performance, demonstrated aptitude for military service, and nomination by the professor of Naval Science. Students in either program may qualify for a commission in the United States Marine Corps through the Marine Corps Option Program.

For further information on the NROTC program, contact the Department of Naval Science at (919) 660-3700 or visit nrotc.duke.edu.
Service-Learning and Community-Engaged Courses (SLCE)

Service-learning and community-engaged (SLCE) courses build a strong academic foundation by incorporating collaborations with local community partners and translating theory into real-world experience. By exploring the rich diversity of our local and global communities, SLCE courses provide students with opportunities to engage effectively with communities on issues such as the environment, socioeconomic inequities, public policy, health, immigration, education, and more.

Service-learning courses require a commitment to engage in a service project determined by the needs of the community partner. Community-engaged classes may or may not require a service-component, but provide opportunities to interact with community members, organizations, and events.

All SLCE courses support students in developing a wide range of skills, from cross-cultural awareness and critical thinking to problem-solving and leadership skills. The courses also help students discover the specific ways they want to be agents of change in the world. To learn more about Duke Service-Learning, go to servicelearning.duke.edu.

Academic Policies

Academic & Financial Obligations

Students are expected to meet academic requirements and financial obligations, as specified in the school bulletin, to remain in good standing. Failure to meet these requirements and to abide by the rules and regulations of Duke University may result in summary dismissal.

Degrees and Academic Credit

Duke University offers in Trinity College of Arts & Sciences the degrees of bachelor of arts and bachelor of science, and in Pratt School of Engineering the degree of bachelor of science in engineering. Within the curriculum of each college or school, students have the major responsibility for designing and maintaining a course program appropriate to their background and goals. They are assisted by faculty advisors, departmental directors of undergraduate studies, and academic deans. Students must accept personal responsibility for understanding and meeting the requirements of the curriculum. Credit toward a degree is earned in units called course credits, which ordinarily consist of three to four hours of instruction each week of the fall or spring semester or the equivalent total number of course credits in a summer term. Double (2.0) course credits, half (0.5) course credits, and quarter (0.25) course credits are also recognized.

Course Numbering

Introductory-level courses are numbered 100 to 199; mid- to advanced-level courses are numbered 200 and above; courses numbered from 400 to 499 are primarily for seniors; courses numbered from 500 to 699 are graduate-level courses open to advanced undergraduate students. Special Topics courses may be repeated (if the subtitles of the courses are different), subject to any limitation set forth in the course description in this bulletin.
### Attendance

#### Class Attendance & Missed Work

Responsibility for class attendance rests with individual students, and since regular and punctual class attendance is expected, students must accept the consequences of failure to attend. Instructors may refer students to their academic dean when students accumulate excessive numbers of absences.

Absences from class and missed work are accommodated (excused) in five circumstances: 1) significant illness, 2) personal instances of distress or emergency, 3) religious observance, 4) varsity athletic participation, and 5) required court or legal appearances.

Detailed information about the policy and the notification procedure is available at trinity.duke.edu/undergraduate/academic-policies/class-attendance-and-missed-work for students in Trinity College, or pratt.duke.edu/undergrad/students/policies/3486 for students in the Pratt School of Engineering.

Missed work associated with any other absence is not covered by this policy. In courses where a defined number of absences is permitted, students should make judicious use of them and save them for unavoidable circumstances. Students are encouraged to discuss any absence, planned or unexpected, with their instructor to determine whether accommodation is possible. The nature of the accommodation, if any, is to be determined by the faculty member in accordance with their attendance policy as outlined in the course syllabus.

### Changes in Status

#### Withdrawal and Readmission

Students who wish to withdraw from the college must give official notification to the Time Away Office. Notification must be received prior to the beginning of classes in any term, or tuition will be due on a pro-rata basis. (See the section Fall and Spring Refunds in Financial Policies.) For students withdrawing on their initiative after the beginning of classes and up to the first day of the last four weeks of regular classes in the fall or
spring term, or before the last two weeks of regular classes in a summer term, a W is assigned in lieu of a regular grade for each course. After these dates, an F grade is recorded unless withdrawal is caused by an emergency beyond the control of the student, in which case a W is assigned as part of the time away process. Withdrawals from the university during a semester will not be approved after the last day of classes.

Students may be involuntarily withdrawn for academic reasons, financial reasons, violation of academic regulations, disciplinary reasons, as well as administratively. Their withdrawal will be noted accordingly on the official academic record. Students with a dismissal pending are not in “good standing” and therefore are ineligible to undertake coursework scheduled to be taught during the pending dismissal period. Students who receive an I or X grade during a semester in which they experienced a voluntary or involuntary separation from Duke, may, at the discretion of their academic dean, be advised to complete the outstanding work prior to returning to school.

Students who are placed on academic probation after returning to Duke may not be eligible to participate in particular university programs such as, but not limited to, study abroad and DukeEngage.

Return requests are made to the appropriate school or college through the Time Away Office. Each request is reviewed by the Time Away Office and other relevant campus partners. A return decision is based on information shared by the student on the request form, information shared by relevant providers, and general readiness to return. Students who are returned must meet residential requirements. All returning students are eligible to live in on-campus housing unless they have been deemed ineligible due to a university sanction.

Return requests must be completed by November 1 for enrollment in the spring, by April 1 for enrollment in the summer, and by June 1 for enrollment in the fall. For more information, visit the Time Away Office website at undergrad.duke.edu/student-success/time-away-office.

Leave of Absence

Personal leave is planned and must be requested before the semester starts by submitting a Time Away Inquiry Form to the Time Away Office. A personal leave of absence is not granted for a term in which classes have begun. In extreme cases such as family death or a recent diagnosis of terminal illness, an administrative leave of absence will be granted.

A medical leave is a voluntary time away that occurs during the course of the semester when a student’s medical situation is causing them to put a pause in their academics to focus on their health. Students must submit a Time Away Inquiry Form and the required documentation from their medical provider. The Time Away Office will review the documentation and meet with the student to review the treatment recommendations established by the student’s provider. After the student has reviewed the recommendations they will decide if they want to move forward with the medical time away. If the student wants to move forward, the Time Away Office will notify relevant university offices, and professors and process the required documentation. The deadline for requesting a medical time away and submitting the provider form is by 5:00 pm on the last day of class of that term.

Students who request a medical leave of absence for a current term and submit their leave request prior to the last day of classes will be assigned W in lieu of a regular grade for each course. A medical leave of absence will not be retroactively granted for a term for which the last day of classes has already occurred.

Registration information will be provided by the university registrar to all students who are approved to return from a leave of absence. All returning students must register prior to the first day of classes for the term of intended enrollment. Students returning from time away and desiring housing on campus will be placed in the general housing lottery, provided they have submitted the appropriate information to the Office of Housing, Dining & Residential Life by its published deadline and provided that they lived on campus before taking their approved leave. Detailed information about requesting and returning from a leave of absence is provided on the Time Away Office website. Students returning to Trinity College of Arts & Sciences or the Pratt School of Engineering should visit the Time Away Office website at undergrad.duke.edu/student-success/time-away-office.

Students who undertake independent study under Duke supervision and for Duke credit are not on leave of absence even if studying elsewhere. Students register at Duke as a nonresident students and pay the appropriate fees or tuition at Duke. This policy also applies to Duke programs conducted away from the Durham campus.

Transfer between Duke University Schools

Students in good standing may be considered for transfer from one Duke undergraduate school or college to another, upon completion of the transfer process found at pratt.duke.edu/undergrad/students/policies/3537. The review of requests to transfer involves consideration of a student’s general academic standing, citizenship records, and relative standing in the group of students applying for transfer. The school or college to which transfer is sought will give academic counseling to a student as soon as the intention to apply for transfer is known, although no commitment will be implied. A student may apply to transfer at any time prior to receiving a baccalaureate degree, and transfers may become effective as early as the completion of the first semester. A student transferring to Trinity College of Arts & Sciences from Pratt School of Engineering, prior to receiving a baccalaureate degree, may not use more than six professional school credits toward the bachelor of arts or bachelor of science degree. If admitted to either Trinity College or Pratt School of Engineering after having earned a baccalaureate degree at another institution, a student must complete in the new school/college a total of seventeen additional courses and fulfill degree requirements in order to be eligible for a second undergraduate degree at Duke.

Transfer from Duke to Another Institution
Students who enroll at Duke and subsequently transfer to another institution as degree-seeking students, will be eligible to request a return to Duke in future semesters. Former Trinity College students cannot transfer more than the equivalent of two domestic transfer credits back to Duke. Former Pratt School of Engineering students cannot transfer more than the equivalent of 4.0 course credits back to Duke. For both Trinity and Pratt students, any transfer credits will count toward the maximum allowable transfer credits from another institution as stipulated under the policy Work Taken after Matriculation at Duke on the page Transfer & Entrance Credit. Students considering transferring to another institution should discuss this with their academic dean in the early stages of their planning. Students must submit a Time Away Inquiry Form to begin the transfer process. The Time Away Office will assist students through the process and complete all necessary documentation.

**Full-Time and Part-Time Degree Status**

Candidates for degrees must enroll in a normal course load (i.e., at least 4.0 course credits) each semester unless they are eligible and have received permission from their academic dean to be enrolled in fewer than 4.0 course credits (see Course Load and Eligibility for Courses). Students who intend to change from full-time to part-time status must request permission from their academic dean. Except for extraordinary circumstances, such permission is given only to students for the final semester of their senior year. Students must submit their online request for part-time status by the last day of classes in the semester that immediately precedes their final semester of enrollment at Duke. Part-time students may register for no less than 1.0 and no more than 2.5 course credits. Part-time students may be denied university housing. Degree candidates who matriculated through continuing education or are employees should confer with their academic dean about course load requirements.

**Resident and Nonresident Status**

See the section Living Expenses.

**Nondegree to Degree Status**

A nondegree student must apply to the Office of Undergraduate Admissions for admission to degree candidacy.

**Undergraduate Status**

An undergraduate student admitted to Trinity College or Pratt School of Engineering officially becomes a Duke undergraduate student at the point of matriculation and is accorded all the rights, privileges, and responsibilities of a Duke student at that time. When an undergraduate has completed all of the requirements of the bachelor's degree and is no longer enrolled in coursework toward the degree, the student ceases to be a Duke undergraduate student in the strict sense of the word. Their rights and privileges are then defined by the Duke Alumni Association. (This definition also applies to nondegree-seeking visiting students during the period of their enrollment at Duke.)

**Continuation**

Students must achieve a satisfactory record of academic performance each term and make satisfactory progress toward graduation each year to continue at Duke University. Students who fail to meet the minimum requirements to continue will be dismissed from the university for at least two semesters. (A summer session may be counted as a semester.) Those desiring to return after the dismissal period may submit a petition to return to the Time Away Office. Visit undergrad.duke.edu/student-success/time-away-office for more information. If after returning the student fails again to meet minimum continuation requirements, the student will be dismissed for six terms, which includes the combination of consecutive summer, fall, and spring terms. Students admitted to degree programs from continuing education should consult their academic dean concerning continuation.

**Satisfactory Performance Each Term (Semester Continuation Requirements)**

A student who does not receive a passing grade in all courses must meet the following minimum requirements or be withdrawn from the college.

**In the Fall or Spring Semester**

1. In the first semester of enrollment at Duke, a student must pass at least 2.0 course credits; 2. after the first semester at Duke, a student must pass at least 3.0 course credits; 3. a student enrolled in an underload after the first semester at Duke must earn all passing grades. Students may not carry an underload without the permission of their academic dean. For the purposes of continuation, incomplete work in any course is considered a failure to achieve satisfactory performance in that course. Therefore, where continuation is in question, incomplete work in any course must be completed with a passing grade in time for final grades to be submitted to the Office of the University Registrar no later than the weekday preceding the first day of classes of the spring semester, or one week prior to the first day of classes of the second term of the summer session, as appropriate. In the case of incomplete work in the spring semester, this requirement applies whether or not the student plans to attend one or more terms of the summer session. The student, however, may not enroll in a summer term at Duke unless the requirement of satisfactory performance each semester has been satisfied.

**In the Summer Session**

To continue enrollment at Duke in the fall, a student enrolled at Duke in any previous semester must not fail more than one full course taken during that summer. For purposes of continuation, incomplete work is considered a failure to achieve a satisfactory performance in that course. Therefore, when eligibility to continue from the summer session to the fall is in question, incomplete courses must be satisfactorily completed in
time for a passing grade to be submitted to the Office of the University Registrar no later than the business day preceding the first day of fall classes.

Any student excluded from the college under the provisions of these regulations may on request have the case reviewed by the lead academic dean of Trinity College of Arts & Sciences.

Satisfactory Progress toward Graduation (Annual Continuation Requirements)

Each year prior to the beginning of fall term classes, a student must have made satisfactory progress toward fulfillment of curricular requirements to be eligible to continue in the college; i.e., a certain number of courses must have been passed at Duke according to the following schedule:

<table>
<thead>
<tr>
<th>Trinity College of Arts &amp; Sciences</th>
<th>TO BE ELIGIBLE TO CONTINUE TO THE:</th>
<th>A STUDENT MUST HAVE PASSED:</th>
</tr>
</thead>
<tbody>
<tr>
<td>2nd semester at Duke</td>
<td></td>
<td>2.0 course credits at Duke</td>
</tr>
<tr>
<td>3rd semester at Duke</td>
<td></td>
<td>6.0 course credits at Duke</td>
</tr>
<tr>
<td>4th semester at Duke</td>
<td></td>
<td>10.0 course credits at Duke</td>
</tr>
<tr>
<td>5th semester at Duke</td>
<td></td>
<td>14.0 course credits at Duke</td>
</tr>
<tr>
<td>6th semester at Duke</td>
<td></td>
<td>19.0 course credits at Duke</td>
</tr>
<tr>
<td>7th semester at Duke</td>
<td></td>
<td>22.0 course credits at Duke, plus two additional course credits</td>
</tr>
<tr>
<td>8th semester at Duke</td>
<td></td>
<td>26.0 course credits at Duke, plus two additional course credits</td>
</tr>
</tbody>
</table>

Note: The additional courses in 7th and 8th semesters may be earned through placement and/or transferred courses.

<table>
<thead>
<tr>
<th>Pratt School of Engineering</th>
<th>TO BEGIN ENROLLMENT IN THE:</th>
<th>A STUDENT MUST HAVE PASSED:</th>
</tr>
</thead>
<tbody>
<tr>
<td>2nd semester at Duke</td>
<td></td>
<td>2.0 course credits at Duke</td>
</tr>
<tr>
<td>3rd semester at Duke</td>
<td></td>
<td>6.0 course credits at Duke</td>
</tr>
<tr>
<td>4th semester at Duke</td>
<td></td>
<td>10.0 course credits at Duke</td>
</tr>
<tr>
<td>5th semester at Duke</td>
<td></td>
<td>13.0 course credits at Duke</td>
</tr>
<tr>
<td>6th semester at Duke</td>
<td></td>
<td>17.0 course credits at Duke</td>
</tr>
<tr>
<td>7th semester at Duke</td>
<td></td>
<td>22.0 course credits at Duke</td>
</tr>
<tr>
<td>8th semester at Duke</td>
<td></td>
<td>26.0 course credits at Duke</td>
</tr>
</tbody>
</table>

Note: The Pratt School of Engineering will count up to four post-matriculation transfer course credits (in addition to study abroad) for students entering the 7th or 8th semester of Annual Continuation Requirements.

For students who have interrupted their university studies, the continuation requirement must still be satisfied before the beginning of each fall term. For such students, the number of courses needed to satisfy the continuation requirement is determined from the table above, based on which semester they will enter in the fall term.

Courses taken in the summer term at Duke may be used to meet this requirement; except as noted, Advanced Placement may not be used to satisfy it. AP credits are not counted when determining annual continuation, however, they are counted toward graduation requirements. No more than two courses completed with D grades, 1.0 total course credit of PE; 1.0 course credit of activity courses (no house courses); 2.0 course credits of military science (junior/senior year only); and 6.0 course credits of professional or graduate school courses may be counted toward fulfilling this annual continuation requirement.

Academic Warning and Probation

A student whose academic performance satisfies continuation requirements, but whose record indicates marginal scholarship, will be subject either to academic warning or academic probation. Failure to clear probationary status in the semester of probation will result in a student's dismissal for academic reasons. Students admitted to degree programs from continuing education should consult their academic deans concerning warning and probation.

In determining whether a student should be placed on academic warning, probation, or dismissed for academic reasons, a grade of U earned in a course, whether that course is offered only S/U or the student elects to take it on the S/U basis, is considered equivalent to a grade of F.

Academic Warning

A student who receives a single grade of F while enrolled in four or more courses or a second (or more) D will be issued an academic warning by the academic dean.
Academic Probation

For a student enrolled in 4.0 or more course credits, the following grades will result in academic probation for the succeeding semester: during the first semester of the first year, grades including DD, DF, or FF; during any subsequent semester, grades including DDD, DF, or FF (as long as the student has passed 3.0 other course credits); and during two consecutive semesters, grades including DDDD, DDDF, or DDDFF. For a student enrolled in an authorized underload (i.e., fewer than 4.0 course credits), the following academic performance will result in academic probation: during the first semester of the first year, grades of DD or FF; during any subsequent semester, grades including DDD or DF (as long as 3.0 course credits have been passed in that semester); and during two consecutive semesters, grades including DDDD, DDDF, or DDDFF. In a case where probation may be in question because of an incomplete grade, the student will be notified by the dean of the need to have the incomplete replaced by a satisfactory grade to avoid probation.

The probation status will be reflected on those academic records used for internal purposes only. Students placed on academic probation must acknowledge their probationary status in writing to their academic dean to continue in the college. They are also expected to seek assistance from campus resources, have their course selection approved by their academic deans, and meet periodically with them. They may not study abroad during the probation period. Students are expected to clear their probationary status during the semester of probation. In order to do so, they must enroll in four full-credit courses, of which no more than one may be taken on a Satisfactory/Unsatisfactory basis. Grades of C, S, or better must be earned in each course, or a C average must be achieved in that semester.

Probationary status cannot be cleared in a semester in which students seek permission and are allowed to withdraw to an underload. In such cases, the probationary status continues through the next semester of enrollment or in both terms of the summer session. Students on probation, whether in a normal load or an underload, are required to meet continuation requirements. Students whose probationary status for the reason of an underload continues to a second semester must adhere to the conditions and standards previously outlined for clearing probation. Failure to do so will result in academic dismissal.

Declaration of Major

Declaration of Major in Trinity College of Arts & Sciences

All students enter Trinity College without a major. Before declaring a major at Trinity College, students work with their college advisor and others to develop a long-range academic plan. This plan lays out the courses they anticipate taking in their remaining semesters and is reviewed by their advisor to confirm that it will meet established college requirements for graduation.

Students may declare a major after completing their first year and must declare a major no later than the last day of class prior to the mid-semester break of their fourth semester. Students who do not declare their major may be prevented from registering for classes for their fifth semester and from participating in study abroad programs.

After students have declared their major, primary advising responsibility shifts to their major department and they will work with an advisor in their major. However, many students choose to continue a relationship with their college advisor throughout their time at Duke.

Students who have declared a major and wish to change, add, or delete a major, minor, or certificate may do so through the Office of the University Registrar's Academic Plan Change form, which is available at registrar.duke.edu/student-resources/student-forms.

Seniors who have completed the Intention to Graduate Form, which is distributed via email during the fall of the senior year, can change a major, minor, or certificate at trinity.duke.edu/undergraduate/academic-policies/notification-intent-to-graduate. Seniors who have not received or completed the Intention to Graduate Form can change a major, minor, or certificate by emailing trinity_graduation@duke.edu from a duke.edu email address.

Only one undergraduate degree may be earned; however, a notation of a second major will appear on the transcript. A student may not declare more than two majors. Majors offered within each degree are listed below.

Interdepartmental Major. A student may declare a student-originated interdepartmental major in two Trinity College departments or programs that offer a major after receiving the approval of the directors of undergraduate studies of the departments involved. A student who is interested in a student-originated interdepartmental major should consult with the academic dean responsible for students completing an interdepartmental major. Students proposing an interdepartmental major must present a written plan that has the signed approval of the two directors of undergraduate studies to the academic dean for interdepartmental majors; the plan must include a descriptive title and rationale as well as a list of courses that will be taken in both departments. Any subsequent changes to the course of study must be jointly approved by the directors of undergraduate studies. A student may declare a department-originated interdepartmental major the same way as declaring any other major. For more information, visit trinity.duke.edu/undergraduate/academic-policies/majors-minors-certificates-interdepartmental-major.

Program II. Program II provides an alternative, self-designed degree program for undergraduates at Trinity College. This can be an excellent option for students who feel that a self-designed program will best enable them to pursue their intellectual interests. Students interested in Program II should speak with their college advisor and with the academic dean who oversees Program II. For more information, visit program2.duke.edu.

Declaration of Major in the Pratt School of Engineering
Degree Requirements

Trinity General Education Requirements (Program I)

Programs I and II provide a variety of approaches to obtaining a liberal arts education. Both programs lead to the bachelor of arts (AB) or bachelor of science (BS) degree, and both involve completing 34.0 course credits to satisfy the requirements for the degree.

Trinity College of Arts & Sciences curriculum is meant to encourage breadth as well as depth and provide structure as well as choice. It reflects Duke's desire to dedicate its unique resources to preparing its students for the challenging and rapidly changing global environment. The curriculum provides a liberal arts education that asks students to engage in a wide variety of subjects: arts, literature, and performance; civilizations; natural sciences; quantitative studies; and social sciences. It supports a cross-cultural and interdisciplinary approach to knowledge and fosters the development of students' abilities to read and think critically and in historically and ethnically informed ways, to communicate lucidly and effectively, and to undertake and evaluate independent research.

The curriculum has two components: general education requirements and the major requirements. Students must complete the requirements of the curriculum listed below—and explained more fully in the following sections—to satisfy the requirements for the degree. Students who receive an S (Satisfactory) grade will receive credit toward general education requirements, including curriculum codes, and the course will count toward the required credits for graduation and continuation. Courses taken on a Satisfactory/ Unsatisfactory basis may not, however, be used to satisfy the requirements of any major, minor, or certificate program (including prerequisites), unless the Director of Undergraduate Studies gives special permission.

General Education Requirements

The general education requirements include two interrelated features: Areas of Knowledge and Modes of Inquiry, which are described in more detail in the following sections. Since a course may have several intellectual goals and intended learning outcomes, it may simultaneously satisfy more than one general education requirement, as well as requirements of a major, minor, or certificate program.

Required Courses

Areas of Knowledge. 2.0 course credits must be completed in each of the following five areas. Courses satisfying one Area of Knowledge cannot be reused to complete requirements in a second Area.

Historically, the ways in which knowledge has been organized reflect both differences in subject matter and methods of discovery. This delineation is dynamic, marked by increasing differentiation and an array of academic disciplines. Disciplines have traditionally been grouped into three divisions: humanities, social sciences, and natural sciences. Duke has chosen to divide the humanities and natural sciences further to assure that undergraduates engage the full range of substantive concerns and approaches there. Thus, the curriculum adopts the following division of courses (into the five areas of knowledge): arts, literatures, and performance; civilizations; natural sciences; quantitative studies; and social sciences. Because Duke believes that engagement with each is essential, not optional, for an informed and educated person in the twenty-first century, students must satisfactorily complete 2.0 course credits in each area.

- Arts, Literatures, and Performance (ALP). Through courses in arts, literatures, and performance, students learn about the creative products of the human intellect.
- Civilizations (CZ). Courses about civilizations ask students to engage in analysis and evaluation of ideas and events that shape civilizations past and present.
- Natural Sciences (NS). Through courses in natural sciences, students learn about the interpretation or application of scientific theories pertaining to or models of the natural world.
- Quantitative Studies (QS): one of the QS courses must be in math, statistical science, or computer science. Courses in quantitative studies, including computer science, mathematics, and statistical science, help develop skills of inference and analysis.
- Social Sciences (SS). Through courses in the social sciences students learn about patterns of human behavior and about the origins and functions of the social structures in which we operate.

Modes of Inquiry. Credits must be obtained in courses designated as offering exposure to each of the following inquiries, as indicated below. A single course can be used to satisfy up to three Modes of Inquiry, as well as one Area of Knowledge.

The first three of the six required Modes of Inquiry address important cross-cutting intellectual themes that represent enduring focal points of inquiry and involve the application of knowledge to which many disciplines speak. Students need to be prepared to engage in a critical analysis of world issues pertaining to cross-cultural, ethical, and science and technology matters throughout their lives and careers. Students must take 2.0 course credits in each of these three modes.

- Cross-Cultural Inquiry (CCI): 2.0 course credits. This Mode of Inquiry provides an academic engagement with the dynamics and interactions of culture(s) in a comparative or analytic perspective. It involves a scholarly, comparative, and integrative study of political, economic, aesthetic, social, and cultural differences. It seeks to provide students with the tools to identify culture and cultural differences
across time or place, and/or between or within national boundaries. This includes, but is not limited to, the interplay between and among material circumstances, political economies, scientific understandings, social and aesthetic representations, and the relations between difference/diversity and power and privilege within and across societies. In fulfilling this requirement, students are encouraged to engage in comparisons that extend beyond national boundaries and their own national cultures and explore the impact of increasing globalization.

- **Ethical Inquiry (EI): 2.0 course credits.** Undergraduate education is a formative period for engaging in critical analysis of ethical questions arising in human life. Students should be able to assess critically the consequences of actions, both individual and social, and to sharpen their understanding of the ethical and political implications of societal and personal decision-making. Thus, they need to develop and apply skills in ethical reasoning and to gain an understanding of a variety of ways in which, across time and space, ethical issues and values frame and shape human conduct and ways of life.

- **Science, Technology, and Society (STS): 2.0 course credits.** Advances in science and technology have brought profound changes to the structure of society in the modern era. They have fundamentally changed the world, both its philosophical foundations, as in the Copernican or Darwinian revolutions, and in its practical everyday experience, as in the rise of the automobile and television. In the second half of the last century, the pace of such change has accelerated dramatically; science and technology play an even greater role in shaping the society of the future. If students are to be prepared to analyze and evaluate the scientific and technological issues that will confront them and to understand the world around them, they need exposure to basic scientific concepts and to the processes by which scientific and technological advances are made and incorporated into society. They must understand the interplay between science, technology, and society—that is, not only how science and technology have influenced the direction and development of society, but also how the needs of society have influenced the direction of science and technology.

The six required Modes of Inquiry also include Foreign Language, Writing, and Research.

- **Foreign Language (FL): 1.0 to 3.0 course credits in the same language, determined by level of proficiency.** Duke has set internationalization as an institutional priority to prepare students to live in an increasingly diverse and interdependent world. By developing proficiency in a foreign language, students can develop cross-cultural competency and become more successful members of their increasingly complex local, national, and international communities. Students should have an awareness of how language frames and structures understanding and effective communication. To satisfy the foreign language competency requirement students must complete one of the following:
  - For students who enter their language study at Duke at the intermediate level or above, and intend to complete the requirement in the same language:
    - Completion of a 300-level course that carries the FL designation is required. Therefore, students who place into the first semester of the intermediate level take three full courses, students who place into the second semester of the intermediate level take two full courses, and students who place into the 300 level take one course.
    - Russian requires an official written and oral proficiency examination at Duke for foreign language placement. Students who plan to continue studying any other language should consult with the director of undergraduate studies in that language or see the table "College Board Tests" here.
  - For students who begin the study of a foreign language at Duke at the elementary level (first or second semester) course and intend to complete the requirement in that language: The successful completion of three full sequential courses in the same language that carry the FL designation is required.

  Students are encouraged to register for an FL designated course no later than the first semester of their sophomore year.

- **Writing (W): 3.0 course credits, including Writing 101 in the first year and two writing-intensive (W) courses in the disciplines, at least one of which must be taken after the first year.** Effective writing is central to both learning and communication. To function successfully in the world, students need to be able to write clearly and effectively. To accomplish this, they need to have a sustained engagement with writing throughout their undergraduate career. Thus, students must take at least 3.0 course credits' worth of writing courses at Duke: a) Writing 101 in their first year and b) two writing-intensive courses (W) in the disciplines, at least one of which must be taken after their first year. Through the latter type of courses, students become familiar with the various modes and genres of writing used within an academic discipline, participate in multiple rounds of drafting and feedback, and learn how the conventions and expectations for writing differ among the disciplines.

- **Research (R): 2.0 course credits.** As a research university, Duke seeks to connect undergraduate education to the broad continuum of scholarship reflected in its faculty. Such a rich setting provides students with opportunities to become involved in a community of learning and to engage in the process of discovery that allows them to be active participants in the acquisition, critical evaluation, and application of knowledge. Engagement in research develops in students an understanding of the process by which new knowledge is created, organized, accessed, and synthesized. It also fosters a capacity for the critical evaluation of knowledge and the methods of discovery. This is important not only for undergraduates who wish to pursue further study at the graduate level, but also for those who seek employment in a rapidly changing and competitive marketplace. Students are required to complete 2.0 course credits' worth of research exposures; one Research Independent Study (coded R) may be submitted for approval for the Writing in the disciplines (W) designation.

Advanced Placement credits, international placement credits, and prematriculation credits for college courses taken elsewhere before matriculation in the first-year class at Duke cannot satisfy Areas of Knowledge or Modes of Inquiry requirements.
Independent Study courses do not carry Areas of Knowledge or Modes of Inquiry designations, except for a research independent study course, which may carry the Research (R) designation. A maximum of one research independent study (coded R) may also count toward the requirement of writing-intensive courses (W) in the disciplines.

Transfer courses and interinstitutional courses may be considered for approval to satisfy Areas of Knowledge requirements.

Small Group Learning Experiences
During the first year: one full-course seminar (i.e., a 1.0-credit course, not partial credit courses). After the first year: a total of 2.0 course credits designated as seminars, tutorials, independent studies, and/or thesis courses. (The total may include partial credit courses.)

By supplementing the classroom and lecture methods of instruction, small group learning experience courses assure students have opportunities to engage in discussion, develop skills, refine judgment, and defend ideas when challenged. A seminar (indicated by the suffix S) is an independent course of twelve to fifteen (exceptionally to eighteen) students who, together with an instructor, engage in disciplined discussion. The number of meeting hours per term is the same as for regular courses of equivalent credit. A tutorial (indicated by the suffix T) is a group of one to five students and an instructor meeting for discussion which is independent of any other course. For independent study, students pursue their own interests in reading, research, and writing, but meet one-on-one with an instructor for guidance and discussion. See the section "Independent Study."

To meet the first-year seminar requirement, students who transfer to Duke with sophomore standing are required to meet the first-year seminar requirement, The first-year seminar requirement is waived for students who transfer to Trinity with sophomore standing, are required to complete a seminar by the end of their sophomore year at Duke or to submit documentation that they completed a seminar course at the college they attended previously.

While discussion sections (D) and preceptorials (P) do not satisfy the formal Small Group Learning Experience requirement in Trinity, they offer additional opportunities for students to participate in small classes. A discussion section, with an enrollment limit set by the individual department, is an integral part of a larger regular course, and every member of the class is enrolled. A preceptorial (P) is a group of usually no more than twelve students and an instructor in which discussion is the primary component; it is an additional and optional unit attached to a regular course involving one or more extra meetings per week. No additional course credit is given for discussion sections or preceptorials.

Instructors in all courses that satisfy the requirements for small group learning experiences, including independent study, must meet with the students at least once every two weeks during the spring/fall semesters and at least once every week during the summer terms. The requirements for small group learning experiences are listed under Program 1, above.

A course may carry up to two Areas of Knowledge and up to three Modes of Inquiry. A course may count toward only one Area of Knowledge, but toward multiple Modes of Inquiry.

34.0 Course Credits
There are specific requirements concerning course credits at Trinity College of Arts & Sciences. Thirty-four (34.0) course credits are required for graduation, at least twenty-four of which must be Duke-originated courses. Duke-originated courses are defined as courses taught by Duke or Duke-affiliated faculty, offered through Duke University, and subject to the approval processes of Duke’s schools. Duke-originated courses include some Duke Kunshan University courses and the Duke-originated courses offered in Duke-in-study abroad/away programs. The 34.0 course credits required for graduation are subject to limitations described elsewhere in this bulletin.

Of the 34.0 course credits required for graduation, a maximum of 2.0 course credits passed with a D grade (D, D+, D-) can be used toward the 34.0 course credits requirement. (Courses for which a D grade is earned do, however, satisfy all other requirements.) The 34.0 course credits may include

1. no more than 1.0 course credit in physical education activity courses (i.e., two half-credit activity courses, including military science physical activity courses)
2. no more than 4.0 course credits in dance/American Dance Festival technique/performance courses (i.e., eight half-credit courses)
3. no more than 2.0 course credits in house courses (i.e., four half-credit courses)
4. no more than 4.0 course credits in military science
5. no more than 4.0 course credits electively taken on a Satisfactory/Unsatisfactory grading basis (not including courses offered only on that basis)
6. no more than four interinstitutional courses
7. no more than 6.0 course credits in graduate and professional school courses not listed in the Duke University Bulletin of Undergraduate Instruction. These courses include all courses offered by the schools of business, law, divinity, nursing, and all graduate courses numbered 700 and above. These courses are generally not open to undergraduates and require special permission to enroll. Independent Study may not be taken in a professional school, unless listed as a course in the Duke University Bulletin of Undergraduate Instruction or offered through a Trinity College of Arts & Sciences department or program. (See policies in the section Independent Study.)

For limitations on transfer credit and Advanced Placement credit, see the section “Entrance Credit and Placement,” the section “Transfer of Work Taken Elsewhere,” and the “Residence” section immediately below.
Undergraduates at Duke are expected to complete either the bachelor of arts or the bachelor of science degree in eight semesters of enrollment. This period may be extended for one semester by a student's academic dean for legitimate reasons. Very rarely, a student will be granted a tenth semester of study by an academic dean. Students are not permitted to complete more than ten undergraduate semesters at Duke.

For purposes of establishing the length of residence of a student admitted in transfer, the semesters completed at the institution previously attended are counted as semesters of residence at Duke.

For the minimum residence period, at least seventeen courses must be satisfactorily completed at Duke. If only seventeen courses are taken at Duke, they must include the student's last eight courses.

**The Major**

The requirements for majors in the department or program in which a student wishes to obtain a bachelor's degree are described after the course listings for each department or program.

Students are expected to acquire some mastery of a particular discipline or interdisciplinary area as well as to achieve a breadth of intellectual experience. They, therefore, complete a departmental major, a program major, or an interdepartmental major. Majors, including interdepartmental majors, are designed to give students breadth and depth in a particular discipline or interdisciplinary area. The courses required for majors are specified by the department or academic program, and include a progression from lower to upper level courses. Departmental and program majors require a minimum of ten courses; interdepartmental majors require a minimum of fourteen courses. The courses for a departmental major may include introductory or basic prerequisite courses and higher level courses in the major department or in the major department and related departments. The total number of courses that a department or program may require may not exceed 17.0 course credits for the bachelor of arts degree and 19.0 course credits for the bachelor of science degree. At least half the courses for a student's major field must be taken at Duke, although individual departments and programs offering majors may require that a greater proportion be taken at Duke. Although no more than two D grades can count toward the 34.0-course-credit requirement, courses in which D grades are earned satisfy major, minor, and certificate requirements. Students are responsible for meeting the requirements of a major as stated in the bulletin for the year in which they matriculated in Trinity College; however, they have the option of meeting requirements in the major changed subsequent to the students' matriculation. A student who declares and completes the requirements for two majors may have both listed on the official record. A maximum of two majors may be recorded on a student's record. See the page Declaration of Major for procedures on declaring a major.

**Interdepartmental Major.** A student may pursue an interdepartmental major in two Trinity College departments or programs that offer a major. The student works with an advisor in each department to adopt an existing interdepartmental major or to design a new one. The major must be approved by the directors of undergraduate studies in both departments who define a course of study covering core features of each discipline, such as theory, methodology, and research techniques. The criteria must include at least fourteen courses split evenly between the departments. At least four of the seven courses required by each department are to be taught at Duke. All courses must be among those normally accepted for a major in the two departments. The directors of undergraduate studies in the two departments must agree to an initial list of courses that the student will take in the two departments and jointly approve any subsequent changes to that course of study. Students proposing an interdepartmental major must present a descriptive title for the major and a rationale for how the program of study will help them realize their intellectual goals. The academic dean for the Interdepartmental Major must also give final approval for the proposal.

The directors of undergraduate studies in two Trinity College departments or programs that offer a major may also propose an interdepartmental major (IDM). The proposed IDM will define a course of study covering core features of each discipline, such as theory, methodology, and research techniques. Current active interdepartmental IDMs and their dates of inception are as follows:

- Ancient Religion & Society — Classical Studies and Religious Studies (Fall 2018)
- Computational Media — Computer Science and Visual and Media Studies (Fall 2021)
- Data Science — Computer Science and Statistical Science (Fall 2018)
- Data Science — Computer Science and Mathematics (Fall 2020)
- Global Gender Studies — Gender, Sexuality, and Feminist Studies and International Comparative Studies (Fall 2020)
- Linguistics and Computer Science — Computer Science and Linguistics (Fall 2019)

Additional information about IDMs can be found at trinity.duke.edu/undergraduate/academic-policies/majors-minors-certificates-interdepartmental-major.

**The Minor**

Minors are available, though not required. They are described after the course listings for each department or program.

The courses required for a minor are specified by the department/academic program. Minors require a minimum of five courses. Further information about specific minors is available on their program pages in this bulletin. Students may not major and minor in the same department/program with the exception of four departments in which multiple majors or concentrations are possible: (1) Asian and Middle Eastern studies, (2) art, art history, and visual studies, (3) classical studies, and (4) romance studies. At least half the courses taken to satisfy a minor must be taken at Duke although individual departments may require that a greater proportion be taken at Duke.
Certificate Programs

A certificate program is a course of study that affords a distinctive, usually interdisciplinary, approach to a subject that is not available within any single academic unit. All certificate programs have a required introductory course as well as a required culminating capstone course. There are two versions of certificate programs: the traditional certificate, consisting primarily of academic coursework (minimum six courses), and the experiential certificate, consisting of a combination of coursework (minimum four courses) and immersive co-curricular experiences. Eligible undergraduates electing to satisfy the requirements of a traditional certificate program may use, for that purpose, no more than two courses that are also used to satisfy the requirements of any major, minor, or other certificate program; for experiential certificates, no more than one course may be used to satisfy the requirements of any other major, minor, or certificate program. Individual programs may prohibit such double counting or restrict it to one course. At least half the courses taken to satisfy a certificate must be taken at Duke, although individual programs may require that a greater proportion be taken at Duke. More complete descriptions of these certificate programs appear in the Programs section.

Restrictions on Majors, Minors, Certificates

A student must declare one major and may declare a second (although not a third) major. The combined number of majors, minors, and certificate programs may not exceed three. Thus, a student may declare as a maximum: two majors and either a minor or a certificate program; a major and two minors; a major and two certificate programs; or a major, a minor, and a certificate program.

Elective Courses

Advanced placement credits, international placement credits, and prematriculation credit for college courses taken elsewhere before entering the first-year class may function only as elective courses and do not satisfy general education requirements aside from counting toward the 34.0-course-credit requirement (with limitations). Elective courses taken after a student matriculates may or may not carry general education designations.

Degree Requirements

Program II: Trinity College of Arts & Sciences

Programs I and II provide a variety of approaches to obtaining a liberal arts education. Both programs lead to the bachelor of arts (AB) or bachelor of science (BS) degree, and both involve completing 34.0 course credits to satisfy the requirements for the degree.

Nature and Purpose

Students in Trinity College who believe that their intellectual interests and talents would be better served outside the regular curriculum options under Program I are encouraged to consider Program II. Students admitted into Program II follow individualized degree programs to explore a topic, question, or theme not available as a course of study within Program I. As degree candidates in Program II, students separate themselves from the requirements and options of Program I, including the requirement for a major and the options of multiple majors and minors.

Program II typically best serves the needs of students who find that their intellectual interests cross departmental boundaries or who perceive areas of learning in clusters other than those of the current departmental units of the university. Program II graduates have gone on to graduate and professional schools around the country and to satisfying positions in many areas of employment. They have won important awards, including Rhodes and Fulbright scholarships, and have received national recognition for career success. Among the many topics for Program II have been architectural design, bioethics, dramatic literacy, the epic in music and literature, planetary and evolutionary biology, and US national security. Full information is available on the Program II website at program2.duke.edu.

Admission

If interested in Program II, students should first attend an information session, and confer with the academic dean for Program II. Students will select a regular rank faculty advisor in one of the departments or programs of Trinity College; with approval of the director of undergraduate studies, that department or program will become the sponsor for the student. Application to Program II requires students to propose a topic, question, or theme for the degree program and to plan a special curriculum adapted to their interests and talents. The student and faculty advisor together assess the student's background, interests, and ambitions and evaluate the resources at the university, or outside it, to support those ambitions.

The curricular program proposed by a Program II candidate must address the student's specific interests and offer a coherent plan for learning rather than a sampler of interesting courses. It should incorporate the depth and breadth of study expected of a liberal education at Trinity College. This is achieved in Program II through carefully selected interdisciplinary coursework focused on the student's theme. Programs may be proposed for either the bachelor of arts or the bachelor of science degree; in the latter case, the sponsoring department must offer a Program I major within the BS degree option. The program must be approved by the sponsoring department or program and also by the committee on Program II of the Faculty Council of Arts and Sciences.

Upon endorsement by the Program II Committee, the program becomes an obligation assumed by the student. Until formally accepted into Program II, a student should register for courses to satisfy the curricular requirements for Program I. Students who withdraw from Program II for any reason assume all requirements of Program I. Students will be accepted into Program II only after their first year at Duke; they are ineligible for
admission after the midpoint of their junior year. Further information may be obtained from the Academic Advising Center and from the office of the academic dean responsible for Program II.

General Requirements
Apart from the requirements arising from the approved plan of work, a Program II student must satisfy certain general requirements to satisfy the requirements for the degree: 34.0 course credits for graduation; curricular breadth; the regulations on military science, house, professional school, and physical activity and dance courses; and residence, although the regulation relating to the last eight courses may be adjusted to suit the student’s approved plan of work. Graduation with Distinction is available for qualified students in Program II. See the section Academic Recognition and Honors.

Pratt School of Engineering Degree Requirements
Duke University offers the Edmund T. Pratt Jr. School of Engineering programs of study which lead to the degree of bachelor of science in engineering. Five programs are accredited by the Engineering Accreditation Commission of ABET, abet.org. These programs are biomedical engineering, civil engineering, environmental engineering, electrical and computer engineering, and mechanical engineering. These accredited programs, as well as minors in energy engineering and electrical & computer engineering, and special programs of study in interdisciplinary fields, are offered by the departments of biomedical engineering, civil and environmental engineering, electrical and computer engineering, and mechanical engineering and materials science.

For graduation with a bachelor of science in engineering degree, a student must successfully complete a minimum of 34.0 course credits. These 34.0 course credits (c.c.) must include the following:

<table>
<thead>
<tr>
<th>GENERAL REQUIREMENTS*</th>
<th>1.0 c.c.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Writing</td>
<td>This requirement is met by completing Writing 101.</td>
</tr>
<tr>
<td>Mathematics</td>
<td>5.0 c.c.</td>
</tr>
<tr>
<td>Natural Science</td>
<td>3.0 c.c.</td>
</tr>
<tr>
<td>Mathematics or Natural Science</td>
<td>1.0 c.c.</td>
</tr>
<tr>
<td>Humanities and Social Sciences</td>
<td>5.0 c.c.</td>
</tr>
<tr>
<td>Digital Computation</td>
<td>1.0 c.c.</td>
</tr>
<tr>
<td>Engineering and Applied Sciences</td>
<td>4.0 c.c.</td>
</tr>
<tr>
<td>Departmental Specifications</td>
<td>14.0 c.c.</td>
</tr>
</tbody>
</table>

Total Minimum Requirement 34.0 c.c.

Notes on the above table:
*Free electives are included in the 14.0 course credits listed under departmental requirements. Depending on the major, no more than 1.0 course credit in physical education activity and 1.0 course credit in music activity can be used to meet bachelor of science in engineering degree requirements. House courses may not be used to meet BSE requirements. A maximum of 2.0 course credits of junior or senior level air science, military science, or naval science coursework may be counted in satisfying the minimum requirements of 34.0 course credits for a BSE degree. These courses must be included in the 14.0 course credits listed under departmental requirements. All other courses completed in air, military, or naval science are taken in addition to the minimum program.
**Students placing out of any of these classes must take a suitable substitute. AP credit can be used as a substitute for Mathematics 111L and Mathematics 112L.**

**Students entering with AP, IPC, or PMC credits for both Physics 25 and 26 are required to take a Physics course after matriculation that is at or above the level of Physics 153L, or waive credit for Physics 26 and take Physics 152L, or waive both Physics pre-matriculation credits and take Physics 151L and Physics 152L.**

**A maximum of 2.0 courses that are either offered with mandatory S/U grading or are pre-matriculation credits may be used to meet humanities and social sciences requirements for the bachelor of science in engineering degree. Courses must be chosen from humanities and social science departments. Science and engineering courses with SS, CZ, FL, or ALP codes will not count toward this requirement unless they are cross-listed with humanities or social science courses. 200-level AP credits will not count toward satisfying depth in a humanities or social sciences subject area.**

**Residence Requirement**

At least 17.0 course credits must be completed satisfactorily at Duke. This must include the work of the final two semesters, with the following exceptions: the student who has completed more than four full semesters of work at Duke may take the last two courses elsewhere; others may take the last course elsewhere. The courses taken elsewhere must be approved in advance by the student’s major advisor and academic dean.

**Grade Requirement for Graduation**

Of the 34.0 course credits which fulfill the specified categories in the bachelor of science in engineering degree requirements, thirty-two (32.0) or their equivalent in number must be passed with grades of S, C, or better.

**The Pratt First-Year Curriculum**

The first year of study in the Pratt School of Engineering is largely common to all engineering students, with seven of the eight first-year courses being required by all engineering majors. The first-year curriculum offers:

- a general education in the fundamentals of mathematics, physics, and chemistry, on which the science and practice of engineering are based;
- instruction in modern engineering problem solving skills, including the use of digital technology for both computational and laboratory applications; and
- the opportunity to explore intellectual opportunities at Trinity College, through satisfaction with the university writing requirement.

Students predisposed toward a particular Pratt major use the eighth course to begin fulfilling degree requirements for that major as indicated below, while undecided students are encouraged to use this eighth course to aid in their subsequent selection of a major. The general layout for the curriculum is as follows (assuming no AP credit and Writing permission for the second semester):

<table>
<thead>
<tr>
<th>FIRST SEMESTER</th>
<th>COURSES</th>
<th>SECOND SEMESTER</th>
<th>COURSES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics 111L</td>
<td>1.0</td>
<td>Mathematics 112L</td>
<td>1.0</td>
</tr>
<tr>
<td>Chemistry 101DL</td>
<td>1.0</td>
<td>Physics 151L</td>
<td>1.0</td>
</tr>
<tr>
<td>Engineering 103L</td>
<td>1.0</td>
<td>Writing 101</td>
<td>1.0</td>
</tr>
<tr>
<td>Engineering 101L</td>
<td>1.0</td>
<td>Technical Course</td>
<td>1.0</td>
</tr>
<tr>
<td>Total</td>
<td>4.0-4.5</td>
<td>Total</td>
<td>4.0-4.5</td>
</tr>
</tbody>
</table>

In the event that prematriculation credit is granted for one or more of the above courses, substitutions of upper level technical requirements can be made or other curricular interests may be pursued (including first-year Focus Programs or initiation of a Trinity second major, minor, or certificate program).

The first-year technical course should be selected according to the student’s intended major:

<table>
<thead>
<tr>
<th>INTENDED MAJOR</th>
<th>SUGGESTED TECHNICAL COURSE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biomedical Engineering</td>
<td>Biology 201L</td>
</tr>
<tr>
<td>Civil Engineering</td>
<td>Civil and Environmental Engineering 132L</td>
</tr>
<tr>
<td>Electrical and Computer Engineering</td>
<td>Electrical and Computer Engineering 110L</td>
</tr>
<tr>
<td>Environmental Engineering</td>
<td>Civil and Environmental Engineering 132L</td>
</tr>
<tr>
<td>Mechanical Engineering</td>
<td>Engineering 121L</td>
</tr>
<tr>
<td>Undecided</td>
<td>Select from all above</td>
</tr>
</tbody>
</table>

**Second Major**

If an engineering student completes simultaneously the requirements for a departmental major in arts and sciences and the requirements for a bachelor of science in engineering degree, or satisfies simultaneously the requirements for two engineering majors, the official record will indicate this fact.
The director of undergraduate study for each major must certify that all major requirements have been met. In Pratt, each major must identify at least nine technical courses fundamental to the discipline of that major that are different from those of the other major. Each major must have at least five of these technical courses fundamental to the discipline that are not used to satisfy the requirement of the other major (free electives excluded). Any of the other fundamental courses may be counted for both majors if the directors of undergraduate study agree they have equivalent technical content. The remaining requirements for each major may be satisfied by taking additional courses associated with the approved academic unit, cross-listed courses, or upon agreement of the directors of undergraduate study, other courses with approved content.

The student must initiate the procedure, by completing a Declaration of Major form (online) in which the second major is declared. It is highly recommended that the student meet with the director of undergraduate studies in the second major to review the requirements for that major. The completion of the requirements for the major in this department must be confirmed no later than the time of registration for the final semester.

Minors
Two engineering minors are offered at the Pratt School of Engineering. The energy engineering minor is only open to students with an engineering major. The electrical and computer engineering minor is open to engineering and non-engineering majors. More information can be found on the program pages for these minors.

A minimum of five technical courses are required for a minor. Courses that are used to fulfill the student’s primary major are excluded from the additional courses counted for the minor; this exclusion also applies to courses with content substantially equivalent to courses in the student’s primary major. As an exception, at most one upper-level elective course cross-listed with the student’s primary major may be counted toward the minor.

If the minor area of study does not otherwise exist as a primary major, then the five technical courses counted for the minor are excluded from courses used to fulfill the student’s major; this exclusion also applies to courses with content substantially equivalent to courses in the student’s major. As an exception, at most one upper-level elective course cross-listed with the student’s primary major may count toward the minor if topically relevant. At least three of the minor courses must be upper-level courses.

For all minors, introductory-level courses intended as an early educational experience may not be used to fulfill the minor requirement, unless such courses contain substantial technical content that is a prerequisite for later courses, and that material is not otherwise covered in the student’s primary major. No more than one semester of independent study, supervised by an advisor in the unit offering the minor, may be used for the minimum five-course minor requirement.

IDEAS (Interdisciplinary Engineering & Applied Science) Program
Non-ABET-accredited majors that are interdisciplinary in scope and include engineering and applied science are available. These majors are proposed by the student, approved by a faculty committee, and result in a bachelor of science in engineering degree. Programs with a broad foundation in the engineering sciences also may be developed under this program by those who intend to enter non-engineering professions. Although not individually accredited, these programs satisfy the national general engineering accreditation criteria.

Any student, in consultation with their advisor or another faculty member, may propose a unique combination of courses designed to meet particular career objectives. A proposal must be submitted to the associate dean of Pratt School of Engineering and the Engineering Faculty Council for approval; it may be submitted as early as the second semester of the first year and must be submitted before the beginning of the senior year. The proposal must include a letter stating the students’ reasons for pursuing the suggested program of study.

Certificate Programs in Engineering
Two certificate programs are offered only to students enrolled in the Pratt School of Engineering. These certificates are the aerospace engineering certificate and the architectural engineering certificate. The aerospace engineering certificate is intended to educate students in the engineering principles related to the conceptualization, design, analysis, and performance of aerospace vehicles and systems. The objective of the architectural engineering certificate is to provide students with an understanding of the design elements of buildings and construction processes.

Bachelor of Science in Engineering/Master of Science Program
This 4+1 program provides students with an opportunity to plan a coordinated five-year program of studies in the Pratt School of Engineering leading to both the bachelor of science in engineering and master of science degrees. Application for admission to this integrated program may be made during the senior year. Provisional admission to The Graduate School may be granted when the student enrolls for the semester during which the bachelor of science in engineering degree requirements will be completed. Graduate-level courses during this period which are in excess of bachelor of science in engineering requirements may be credited toward fulfillment of the master of science degree requirements.

Bachelor of Science in Engineering/Master of Engineering Program
This 4+1 program provides students with an opportunity to plan a coordinated five-year program of studies in the Pratt School of Engineering leading to both the bachelor of science in engineering and master of engineering degrees. Application for admission to this program may be made as early as the spring of the junior year or as late as the spring of the senior year. Although admitted to the master of engineering program while
undergraduates, 4+1 students will remain in undergraduate status for four years and will become a master of engineering students in the fifth year. Graduate-level credits, where a grade of B or better was earned and which are in excess of the bachelor of science in engineering requirements, may be transferred toward fulfillment of the master of engineering degree requirements.

**Bachelor of Science/Master of Engineering Management**

This 4+1 program provides students with an opportunity to plan a coordinated five-year program of studies in the Pratt School of Engineering leading to both the bachelor of science in engineering and master of engineering management degrees. This program offers engineering students exposure to both business and law as well as advanced engineering and requires completion of an engineering internship, four graduate-level engineering courses, three business courses, and one law course. Specific program requirements and application forms may be obtained from the master of engineering management program office in The Wilkinson Center for Engineering Management, 3120 Fitzpatrick Center (CIEMAS).

**Pratt-Specific Academic Policies**

Some of the academic policies described in the next chapter will differ for Pratt students relative to their counterparts enrolled in the Trinity College of Arts & Sciences. In particular, the following policies vary slightly between undergraduate schools:

- Forfeiture of Precollege Credit
- Work Taken After Matriculation at Duke
- Repetition of Courses
- Declaration of Major Annual Continuation Requirements

**Degree Requirements**

**Combination Programs of Trinity College and Duke Professional Schools**

There are programs available that allow a student to combine the undergraduate experience with the beginning of a second degree. The format and length of the program and how it dovetails with undergraduate work varies across programs.

A student interested in attending the Nicholas School of the Environment may (upon meeting certain requirements), combine their senior year in Trinity College of Arts & Sciences with the first year in the professional school. This is known as the Nicholas School 3/2 Program. To qualify the student must:

1. successfully complete 26.0 course credits in Trinity College
2. fulfill all degree requirements in Trinity College except for eight elective courses
3. obtain approval from the appropriate liaison Academic Dean at Trinity College
4. be admitted to the professional school

If the student's application to the professional school is accepted, the student essentially takes a leave of absence from Trinity College to enroll in the professional school for what would have been the fourth year of undergraduate study and the student begins work on the professional degree. Upon successful completion of the work in the first year of the professional school, the baccalaureate degree is awarded to the student. The undergraduate record notes the student's enrollment in the combination program, the name of the professional school, the date of graduation from Trinity College, and the undergraduate degree awarded. However, it does not include courses taken in the professional school. Please contact Dean Claire Siburt (cps7@duke.edu) for questions regarding the Nicholas School 3/2 Program.

**Grading and Grade Requirements**

Final grades on academic work are provided to students via DukeHub after the examinations at the end of each term. Midterm advisory grades for first-year students are issued in the fall and spring and are provided to students via DukeHub.

**Passing Grades**

Passing grades are A, exceptional; B, superior; C, satisfactory; S, satisfactory (see Satisfactory/Unsatisfactory system below); and D, low pass. These grades (except S) may be modified by a plus or minus. A Z grade may be assigned for the satisfactory completion of the first term of a two-course sequence, and the final grade for both courses is assigned at the end of the second course of the sequence.

Although the D grade represents a low pass, no more than two courses passed with D grades may be counted among those required for year-to-year continuation or among the 34.0 course credits required for graduation. Courses for which a D grade is earned, however, satisfy other requirements. For information on repeating a course with a D grade, see the section Course Load and Eligibility for Courses.

**Failing and Unsatisfactory Grades**

A grade of F or U (see Satisfactory/Unsatisfactory grading system below) indicates that the student has failed to meet the requirements for the course. The grade is recorded on the student's record. If the student registers for the course again, a second entry of the course and the new grade earned is made on the record, but the first entry is not removed. All grades that appear on the record, with the exception of S and U, are included in the calculation of the cumulative grade point average.
Grade Point Average

The grade point average is based on grades earned in courses offering credit at Duke and may be calculated based on the following numerical equivalencies to the grading system:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Numerical Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>D-</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
</tbody>
</table>

With Satisfactory/Unsatisfactory courses, neither S nor U are calculated into the grade point average. The semester and cumulative grade point averages are determined at the end of each semester and displayed for students on the academic history reports made available to them via DukeHub.

Satisfactory/Unsatisfactory Grading System

With the consent of the instructor and academic dean, a student may register for grading on a Satisfactory/Unsatisfactory (S/U) basis in one course each semester and summer session, although only four courses taken on this basis may be counted toward the 34.0 course credits required for graduation. The limit of four does not apply to courses that are designated as mandatory S/U grading basis. A grade of S will be awarded if the student has earned the equivalent of a letter grade of C- or better, while a U will be awarded for the equivalent of a D+ or worse grade. Neither an S nor a U will be factored into the grade point average. Students who receive a U will receive no credit for the course and will be ineligible for Dean's List in that semester.

Students who receive an S will receive credit towards general education requirements, including curriculum codes, and the course will count toward the requirement for 34.0 course credits and continuation requirements. No other degree requirements (major, minor, certificate, including prerequisites) may be met by a course passed under the S/U option, unless by permission of the director of undergraduate studies of the department or program. Taking a course on the S/U basis may make one ineligible for the Dean’s List (see the section on Academic Recognition and Honors). Students studying abroad or on domestic study away programs may not receive credit for courses taken on an S/U or Pass/Fail basis.

Students who wish to take a course on an S/U basis must obtain permission from the instructor and their academic dean. Students have until the withdrawal deadline (usually set four weeks before the end of courses) to switch the grading basis for a course to an S/U basis. Students must enroll in a course on a graded basis and may be allowed to switch to an S/U basis before the deadline by filing a request with the Office of the University Registrar. Students are advised to wait to switch to S/U grading until they are certain. An S grade earned in a course may not be converted subsequently to a letter grade, and the course may not be retaken.

Students who, via accommodation by the Student Disabilities Access Office (SDAO), register for 3.0 course credits per semester may take a maximum of one S/U course per semester.

Effects of Incomplete Work

For purposes of determining satisfactory progress each term and toward graduation, incomplete work in a course indicated by a grade of I or X is not presumed to be satisfactory performance in that course. Furthermore, an incomplete (I grade) or X grade during the academic year cancels eligibility for semester honors in the term the I or X grade was issued; i.e., Dean’s List and Dean’s List with Distinction. See the section Incomplete Coursework.

The W and WA Designations

The designation W is recorded when a student officially withdraws from a course after the Drop/Add period. (See the section Course Changes after Classes Begin in the Fall and Spring Terms on Registration & Courses.) WA indicates withdrawal from an audited course.

Grading and Grade Requirements

Academic Recognition and Honors

In determining a student's eligibility for academic recognition and honors, only grades earned in Duke courses, including those earned in Duke Study Abroad programs and courses covered by the interinstitutional agreement are considered.

Dean's List accords recognition of academic excellence achieved during each semester. To be eligible for this honor, undergraduates in Trinity College of Arts & Sciences must earn a grade point average for a semester that places them in the highest third of undergraduates in their respective college and in addition must (1) complete at least 4.0 course credits, including at most two academic half courses (excluding dance performance/technique, physical education activity, music activity, and house courses) for a regularly assigned grade (i.e., no
Satisfactory (Unsatisfactory courses); and (2) receive no incomplete or failing grades. Undergraduates who in addition earn semester grade point averages that place them in the highest ten percent of undergraduates in their respective college will receive the Dean's List with Distinction honor, while the remainder of those placing in the highest one third will receive the Dean's List honor as noted above.

In the Pratt School of Engineering, undergraduates must earn a grade point average placing them in the highest one third of their class and in addition must: (1) complete at least 4.0 course credits, including at most two academic half courses (excluding dance performance/technology, physical education activity, music activity, and house courses) for a regularly assigned grade (i.e., no Satisfactory/ Unsatisfactory courses); and (2) receive no incomplete or failing grades. Undergraduates who in addition earn grade point averages that place them in the highest ten percent of their class also will receive the Dean's List with Distinction honor, while the remainder of those placing in the highest one third will receive the Dean's List honor as noted above.

**Graduation with Distinction** accords recognition to students who achieve excellence in their major area of study as determined by the departments and who demonstrate excellence on the basis of a thesis or other substantive scholarly project not anchored in a major but rather in a certificate program, a minor, or any other elective field of study. In Trinity College all academic units offering a major have eligibility requirements and procedures leading to Graduation with Distinction, as does Program II. Some may offer a double honors option, that is, honors in two academic units for a single thesis, though this is expressly precluded in the case of students pursuing Graduation with Distinction based on a project not associated with a major. Graduation with Distinction is separate and distinct from Latin Honors (see below). Interested students should consult the relevant directors of undergraduate study or Program II dean for information about specific requirements of and eligibility for Graduation with Distinction. In general, students seeking to graduate with distinction will participate during their junior and/or senior years in a seminar and/or a directed course of reading, laboratory research, or independent study that results in substantive written work. Each student's overall achievement in the major or Program II, including the written work, is assessed by a faculty committee. Graduation with Distinction may be awarded at one of three levels: highest distinction, high distinction, or distinction, though not all academic units offer all levels.

In the Pratt School of Engineering, students in biomedical engineering, civil and environmental engineering, electrical and computer engineering, and mechanical engineering must have a 3.5 grade point average and complete a significant independent study project during their senior year. The results of the research project must be summarized in a formal written report and defended in an oral presentation before a committee of faculty members. Departmental requirements for an oral presentation and written report may vary.

**Latin Honors by Overall Academic Achievement** accords recognition for academic excellence achieved over the duration of an entire undergraduate career. The Latin Honors program recognizes academic excellence achieved over the duration of an entire undergraduate career. Unlike the Dean's List honor, which recognizes academic excellence achieved over the short term (one semester), eligibility for the three categories of Latin Honors (summa cum laude, magna cum laude, and cum laude) is based on the cumulative grade point average for all coursework at Duke. The bachelor's degree will be awarded summa cum laude to no more than the top five percent of the graduating class; it will be awarded magna cum laude to no more than the next ten percent of the graduating class; and it will be awarded cum laude to no more than the next ten percent of the graduating class. Thus, about 25 percent of each graduating class will receive Latin Honors. Latin honors cutoffs are based on the spring academic term for spring graduates, or the preceding spring academic term for summer and fall graduates.

**Other Honors**

Trinity College of Arts & Sciences and the Pratt School of Engineering officially recognize the following national academic honor societies, each of which has a long and distinguished reputation at Duke and throughout the United States. Because the past several years have seen a proliferation of academic societies in America, undergraduates at Duke should be careful to scrutinize invitations to join national honor societies with which they are unfamiliar.

**Phi Beta Kappa**

Phi Beta Kappa, the national academic honor society founded at William and Mary on December 5, 1776, elects undergraduate students in Trinity College and the Pratt School of Engineering each spring. Eligibility for election is determined not by the university but by the bylaws of the local chapter (Beta of North Carolina) on the basis of outstanding academic achievement and good moral character. Reviews of the academic record of all prospective candidates are conducted in the junior and senior years as well as up to one year after graduation. The academic record must not contain an unresolved incomplete (I). For early election, students must have completed at least eighteen but fewer than twenty-four graded courses taken at Duke. Regular election requires at least twenty-four graded courses taken at Duke. Those who have earned their undergraduate degree at Duke will be considered for deferred election in the first spring after they have received their degree; deferred election also considers those who have graduated magna cum laude and who have been awarded Graduation with Distinction in their first or second major. Additional information is available on the Office of University Scholars and Fellows website at undergrad.duke.edu/office-university-scholars-fellows. The total number of persons elected annually is limited by chapter bylaw to no more than ten percent of the graduating class, of whom no more than one percent can be selected by early election. Eligibility requires a course of study with a breadth that characterizes a liberal education. The Program I curriculum meets those expectations; Program II and engineering students must demonstrate comparable breadth in order to be eligible. Inquiries concerning distribution requirements for students in the Pratt School of Engineering should be directed to Professor Michael Gustafson, Department of Electrical and Computer Engineering. All other inquiries may be directed to the Secretary of Phi Beta Kappa, care of The Office of University Scholars and Fellows at phi-beta-kappa@duke.edu.
Elections to the national engineering honor society, Tau Beta Pi, are held in the fall and spring. Eligibility is determined on the basis of distinguished scholarship and exemplary character. Engineering students whose academic standing is in the upper eighth of the junior class or the upper fifth of the senior class have earned consideration by their local chapter.

Grading and Grade Requirements

Incomplete Coursework

If, because of illness, emergency, or reasonable cause, a student cannot complete work for a course, the student may request in writing to their academic dean the assignment of an I (incomplete) for the course. (Forms are available at trinity.duke.edu/undergraduate/academic-policies/courses-incomplete-course-work; Pratt students must see their Academic Dean for a form.) If the request is approved by the instructor in the course and by the student’s academic dean, then the student must satisfactorily complete the work by the last class day of the fifth week of the subsequent regular semester except when an earlier deadline has been established by the instructor or the academic dean. An earlier deadline will be established when there is a question of the student’s ability to meet continuation requirements, or the professor decides an earlier deadline date is appropriate. An I assigned in the fall, spring, or summer terms must be resolved in the succeeding spring or fall term, respectively. If the I is not completed by the deadline, it will convert to an F grade. If a student whose work is incomplete is also absent from the final examination, an X is assigned for the course (see below). A student not enrolled in the university or studying away during the semester following receipt of an I or X will have until the end of the fifth week of classes of the next semester (fall or spring) of matriculation to clear the I or X unless an earlier due date is established by the instructor and/or the academic dean. Students may not complete work in a course after graduation. Once recorded, a notation of the I or X will remain permanently on the student’s record, even after the final grade is assigned for the course. In addition, an I or X cancels eligibility for Dean’s List and Dean’s List with Distinction. Finally, students who receive an I or X during a semester in which they experience a voluntary or involuntary separation from Duke may, at the discretion of their academic dean, be required to complete the outstanding work prior to returning to school.

Final Examinations and Excused Absences

The times and places of final examinations for the fall and spring terms are officially scheduled by the University Schedule Committee, generally according to the day and hour of the regular course meeting; changes may not be made to the schedule without the approval of the committee. If a final examination is to be given in a course, it will be given at the time scheduled by the University Schedule Committee. Take-home examinations are due at the regularly scheduled hour of an examination, based on the time period of the class. In courses in which final examinations are not scheduled, an exam that substitutes for a final examination may not be given in the last week of classes. Hourly tests may be given in the last week of classes, whether or not a final examination is administered during the exam period. In the summer session, final examinations are held on the last two days of each term and may not be scheduled within the last three days before the examination period. Final examinations for short courses are held on the last day of the course.

No, later than the end of the first week of classes of the fall and spring terms, the instructor is required to announce plans for the final examination exercise. Unless departmental policy stipulates otherwise, the form of the final exercise is determined by the instructor. However, a final written examination may not exceed three hours in length and a final take-home examination may not require more than three hours in the actual writing.

If a student is absent from a final examination, an X is given instead of a final grade unless the student’s grade in the class is failing, in which case the instructor may submit an F. The student must present an acceptable explanation for the absence to the appropriate academic dean within forty-eight hours after the scheduled time of the examination. Because end-of-the-semester travel arrangements are not the basis for changing a final examination, students are advised to consult the final examination schedule when making such arrangements. Deferral of a final examination will not be authorized by the academic dean if it is ascertained that the student has a history of excessive absences or failure to complete coursework in a timely fashion in the course in question. The X is converted to an F if the academic dean does not approve the absence. If the absence is excused by an academic dean, the student arranges with the dean and the instructor for a makeup examination to be given at the earliest possible time. It should be noted that uncleared grades of X may have significant ramifications regarding continuation in the university. An excused X not cleared by the end of the fifth week of the following semester is converted to an F. Once recorded, a notation of the X will remain permanently on the student’s record, even after the final grade is assigned for the course. A student not enrolled in the university or studying away during that following semester has until the end of the fifth week of the next semester of enrollment to clear the X unless an earlier deadline has been established by the instructor and/or the academic dean.

Grading and Grade Requirements

Multiple Submissions of a Term Paper

Students who wish (under unusual circumstances) to submit a single paper for credit in more than one course must receive prior written permission from each course instructor. The student must indicate the multiple submission on the title page of the paper.

Graduation

Notification of Intention to Graduate
The Diploma Form submitted by students in Trinity College of Arts & Sciences and Pratt School of Engineering is an official notification that they expect to have completed all requirements for the degree and to receive the diploma on a particular graduation date. They will be confirmed for that specific graduation if basic requirements, i.e., general education and one major, have been completed. Duke confers only one undergraduate degree to a student, that which is confirmed by the department of the first major. Students wishing to change expected graduation terms to complete additional requirements for second majors, minors, or certificates, must notify their academic deans by the end of the final exam period. It is the responsibility of students to submit the form or on before established deadlines. For students in Trinity College and Pratt School of Engineering, information regarding the location and date of availability of the online diploma form is sent to prospective graduates at their Duke email address.

Graduation and Commencement
Commencement exercises are held once a year in May when degrees are conferred upon and diplomas are issued to those who have completed degree requirements by the end of the spring term. Students who complete requirements by the end of the summer term or by the end of the fall term receive diplomas dated September 1 and December 30, respectively. Students who are within 5.0 course credits of graduation at the end of the spring term may request to participate in the annual commencement exercises.

Registration
Students are expected to register at specified times for each successive term. Prior to registration, each student receives instructions via email. Students prepare a course program via DukeHub and discuss it at a scheduled time with their advisor. The advisor must approve the schedule and mark the student eligible to enroll for the term prior to registration. Students who expect to obtain certification to teach in secondary and elementary schools should consult an advisor in the education program prior to each registration period to ensure that they are meeting requirements for state certification and that they will have places reserved for them in the student teaching program.

Those who register late are subject to a $50 late registration fee. In the case of students enrolled in continuing education, late fees are assessed after the first day of classes. Students who fail to register for the fall or spring semester are administratively withdrawn and must apply for readmission if they wish to return. Those students who have not paid any fees owed to or fines imposed by the university (such as laboratory fees, library fines, and parking fines) by the date specified for registration for the following term will not be permitted to register for the following term until such fees and fines have been paid in full, notwithstanding the fact that the student may have paid in full the tuition for the following term.

Students planning to register for a course under the interinstitutional agreement must have the course approved by the appropriate director of undergraduate studies and their academic dean. Further information about registration procedures may be obtained from the Office of the University Registrar, and at its website at registrar.duke.edu.

Concurrent Enrollment
A student enrolled at Duke may not enroll concurrently in any other school or college. See, however, the statement regarding the reciprocal agreement with The University of North Carolina at Chapel Hill, North Carolina Central University, North Carolina State University, The University of North Carolina at Charlotte, and The University of North Carolina at Greensboro in the Duke University Bulletin. Students participating in one of Duke’s domestic exchange programs may not concurrently enroll in another university under the interinstitutional agreement.

Course Changes after Classes Begin
Fall and Spring Terms. During the Drop/Add period, changes may be made in course schedules through DukeHub. Students may drop and add courses during the first week of classes in the fall and spring terms at their discretion; during the second week of the semester they may drop courses at their discretion, but a permission number provided by the appropriate instructor or department is required for adding a course. After the Drop/Add period, no course may be added; also, a course may not be changed to or from the audit basis.

Students have until the withdrawal deadline (usually set four weeks before the end of courses) to request to switch a course to a Satisfactory/Unsatisfactory grading basis by filing a request with their academic dean. Once approved by their academic dean, this decision will not be reversed. An "S" grade earned in a course may not be converted subsequently to a letter grade, and the course may not be retaken.

To withdraw from a course, students must obtain permission from their academic dean. After the Drop/Add period, students permitted to withdraw receive a designation of W on their academic record. Coursework discontinued without the dean's permission will result in a grade of F. When students note errors in their course schedules, they should immediately consult with their academic deans during the schedule correction period that occurs immediately after Drop/Add ends.

Summer Terms. Courses may be added before or during the first three days of the term. After the third day of the term, no course may be added. Prior to the first day of the term, students may drop a course or courses for which they have registered without penalty. With the permission of the academic dean, students with compelling reasons may withdraw from a course through the twentieth day of a regular term (sixteenth day at the Marine Laboratory); and a designation of W will be recorded on their academic record. Coursework discontinued without the approval of the dean will result in a grade of F. (See also the section beginning "Because Duke University participates in the Title IV federal aid programs..." in Refund Policy.)

Registration & Courses
Course Load and Eligibility for Courses

Students are reminded that it is their responsibility to be certain that their course load conforms with academic requirements. In fall and spring terms, students must enroll in at least 4.0 course credits. In their first semester, students are limited to a maximum of 4.5 course credits, 4.0 of which must be in full-credit courses. After their first semester, students can enroll in a maximum of 5.5 course credits per semester without special permission from their academic dean. With permission of their academic dean, a student can enroll in a maximum of 6.0 course credits. During the same period, students in the Pratt School of Engineering may register for up to 5.0 course credits, and up to 5.5 or 6.0 course credits with the approval of their academic dean. In no case will students be allowed to register for more than 6.0 course credits. Students should note that an additional 2.0 course credits are needed beyond the standard four courses for eight semesters in order to earn 34.0 course credits required for graduation.

The maximum course program for any session of the summer term is two courses, one of which may be a laboratory course. Students at Pratt School of Engineering may enroll in two laboratory courses. With permission of their academic dean, a student may enroll in an additional 0.25 or 0.5 credit course provided that it is a physical education activity or technique/performance activity course.

Eligibility for Courses

The rules established by The Graduate School provide that sophomores who have declared a major, juniors, and seniors may enroll in a 500- to 600-level (graduate-level, open to advanced undergraduates) course. Undergraduate sophomores wishing to enroll in a 500- to 600-level course must secure the permission of the instructor of the course and their academic dean. Undergraduates are normally not allowed to enroll in 700-900-level courses. Under exceptional circumstances, however, permission to do so may be granted to a junior or senior, provided the instructor, the director of graduate studies, their academic dean, and the dean of The Graduate School give their signed permission.

Students are responsible for ensuring that they have the stated prerequisites for a course. DukeHub prevents registration for some, but not all, courses when the prerequisite is not fulfilled. Students must check the course description to determine if they have taken the necessary prerequisites before enrolling in the course.

In certain subjects, such as the sciences, mathematics, and foreign languages (particularly at the introductory and intermediate levels), some lower-level courses must be taken in sequence because the content presented at one level is necessary for successful work at the next level. Given this circumstance, it follows that students who complete a higher-level course in a sequence may not subsequently enroll in a lower one in that sequence. Information about course eligibility is often contained in the official description of the course (see the Courses page). Students may direct additional questions about course sequencing to their academic dean or to the director of undergraduate studies of the department in question.

Students may not register for two courses officially listed as meeting at the same time or overlapping times. No course may be repeated for credit or a grade if a C- or higher has been earned previously, except where noted in the course description. Furthermore, a course taken at another institution with a grade of C- or above and not transferred to Duke may not be repeated at Duke. If it is determined such a course has been taken elsewhere and repeated at Duke, the Duke course will be removed from the academic record. A course previously passed at another educational institution, however, may be audited at Duke. Physical education activity courses may be repeated, but only one full credit of these courses counts toward graduation.

Students who receive a D-, D, or D+ in any course in Trinity College are allowed to repeat the course only at Duke and with the permission of their academic dean. The original grade, as well as the grade earned in the repeated course, appear on the transcript, the latter identified as a repeat; both grades count in the grade point average, but the credit for only one counts toward the required number of courses for continuation and the 34.0 course credits required for graduation. Course repeat request forms are available online at trinity.duke.edu/undergraduate/academic-policies/repeat-course.

An engineering student who has earned a grade of D-, D, or D+ in a required mathematics, science, or a required engineering course may, with permission of their advisor, director of undergraduate studies, and academic dean, repeat the course. Both grades will remain on the student's record. Only one credit may be counted toward satisfying continuation requirements and toward fulfilling graduation requirements.

Course Audit

Students who audit a course are not required to submit daily work or take examinations, but are expected to attend class sessions. They do not receive credit for the course. With the written consent of the instructor, a full-time degree student is allowed to audit one or more courses in addition to the normal program. Students must register for audit courses by submitting a signed permission note from the instructor to the Office of the University Registrar. The prohibition against registering for two courses meeting at the same time applies. After the Drop/Add period in any term, no student classified as an auditor in a particular course may take the course for credit, and no student taking a course for credit may be
Duke University

reclassified as an auditor. Physical education activity, studio art, applied music, and dance technique/performance courses may not be audited. In the fall or spring term, a part-time degree student may audit courses by payment for each course audited. A student in a summer term carrying less than a full program for credit may secure permission to audit (above exceptions apply) but is required to pay an audit fee for the course. A student may not repeat for credit any course previously audited. Undergraduates who have been dismissed, suspended, or placed on a leave of absence may not audit or enroll in a course for credit at Duke.

Courses may be audited by faculty members, staff, alumni, employees, and their spouses, as well as spouses of currently enrolled students, members of the Osher Lifelong Learning Institute at Duke, and other members of the Triangle community. Undergraduates who are currently separated from Duke for any reason, may not audit or enroll in courses through the Office of Continuing Studies. Formal application is not necessary; written permission from the instructor must be obtained and an approval form must be signed by the director of the Office of Continuing Studies. Additional information about auditing by community members can be found at leannmore.duke.edu/academics/auditing.

Independent Study

Independent study enables a student to pursue course credit and individual interests under the supervision of a faculty member. Independent study is of two types: Independent Study (non-research) and Research Independent Study. Both require approval of the instructor involved as well as the director of undergraduate studies in the relevant department or program; student-faculty meetings at least once every two weeks during the fall or spring semester and once each week during the summer semester; completion of a final product to be completed during the semester for which a student is registered for the course; and evaluation by the instructor of the work, including the final product, associated with the independent study. The independent study form is available at trinity.duke.edu/undergraduate/academic-policies/independent-study.

Courses entitled Independent Study are individual non-research directed study in a field of special interest on a previously approved topic taken under the supervision of a faculty member and resulting in an academic and/or artistic product. Such independent study courses do not bear a Research (R) code and do not satisfy any general education requirement aside from the 34.0-course-credit requirement. Courses entitled Research Independent Study are individual research in a field of special interest under the supervision of a faculty member; the central goal of which is a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. Such research independent study courses bear a Research (R) code and satisfy general education Research requirements. One research independent study may be submitted and approved for a Writing (W) code in addition to the R code designation, but no other curriculum code designations are permitted for research independent study courses. Students who wish to request a W code for one research independent study course must take the appropriate form to courserequests@duke.edu by the end of the Drop/Add period of the semester they are enrolled in the course. The request form is available at trinity.duke.edu/undergraduate/academic-policies/research-independent-study-w-code.

Students in the Pratt School of Engineering should consult their Academic Dean and departmental office for information about completing an Independent Study.

Academic Internships

At Trinity College, internship courses carry zero credits. To receive credit related to an internship, students must enroll in an independent study or companion course in which the student distills from the internship a certifiable academic experience that qualifies for course credit. Academic courses related to internships must be offered under the auspices of an academic unit in Trinity College. Further information about procedural requirements may be obtained from the academic deans.

The Pratt School of Engineering does not give course credit for internships.

Procedure for Resolution of Students' Academic Concerns

Trinity College provides formal educational opportunities for its students under the assumption that successful transmission and accumulation of knowledge and intellectual understanding depend on the mutual efforts of teachers and students. Ideally, the college offers a range of learning experiences in which students strive to learn enough to be able to test their ideas against those of the faculty, and faculty, through the preparation of course materials and the freshness of view of their students, discover nuances in their disciplines.

Sometimes, however, student-faculty interrelationships in certain courses give rise to concerns that, for whatever reason, can inhibit successful teaching and learning. When this occurs, students often need assistance in resolving the issues.

The faculty and administration of Trinity College attempt to be genuinely responsive to all such matters and a student should not hesitate to seek assistance from faculty and administrative officers in resolving problems.

Questions about course content, an instructor’s methods of presentation, the level of discourse, criteria for evaluation of students, or administrative procedures in a course should be directed to the instructor of the course. (See the following section, Undergraduate Grade Review Procedure, when concerned about a grade.) If a student believes that productive discussion with the instructor is not possible, courtesy requires that the instructor be informed before the student refers questions about the course to the director of undergraduate studies or, in their absence, to the chair of the department. If a student’s concern involves a departmental policy rather than an individual course, the student should first confer
with the director of undergraduate studies in the department. A list of the names, addresses, and telephone numbers of the various directors of undergraduate studies can be found in the University Directory. Staff members in the department offices can assist in arranging appointments with the directors. When necessary, directors of undergraduate studies may refer students to the department chair.

Students in doubt about how to proceed in discussing a particular problem, or who seek a resolution of a problem, are encouraged to confer with their academic dean at Trinity College or Pratt School of Engineering.

In those exceptional cases where a problem remains unresolved through informal discussion, a formal procedure of appeal to the senior associate dean of Trinity College or the senior associate dean for education at Pratt School of Engineering is available. A student may initiate this more formal appeal procedure by bringing their problems with assurance of confidentiality, if requested, to the attention of the senior associate dean of Trinity College or the senior associate dean for education at Pratt School of Engineering, who will request information about the nature of the issue and about the earlier efforts made to deal with it. If the problem concerns a specific course, it should be directed to the appropriate senior associate dean in the college or school in which the course is taught.

**Undergraduate Grade Review Procedure**

A student who questions a final grade received in a course should first discuss the matter with the instructor within thirty days of receiving the grade. After meeting with the instructor, if the student still believes the instructor has assigned an inaccurate or unjustified grade, the student should discuss the matter with the director of undergraduate studies in the department or program concerned. If no satisfactory resolution is reached, the student may make a formal complaint to the director of undergraduate studies in the department or program concerned. The formal complaint must be submitted to the director of undergraduate studies prior to the first day of classes for the semester immediately following the recording of the grade.

The director of undergraduate studies will present the case to the chair of the department or program director, and the two of them will review the case with the instructor involved. If the chair or the director of undergraduate studies agrees with the instructor that there are no legitimate grounds on which to change the grade, the grade stands as recorded. If the director of undergraduate studies and chair believe there are grounds to consider a change and the instructor is unwilling to change the grade, the director of undergraduate studies will notify the student that they may request a review of the case by writing to the dean of arts and sciences or the dean of Pratt School of Engineering, depending on which college or school offered the course in question. A written request must be submitted before the end of the Drop/Add period of the semester following that in which the instructor recorded the grade.

The dean will review the case and decide whether there are grounds to convene an ad hoc Committee for Review of Grade. If the dean decides there are no grounds, then the grade is not changed.

If the dean decides that there are grounds to proceed, the dean will charge and convene an ad hoc Committee for Review of Grade. The committee shall consist of the dean and two regular rank faculty members from the same division but not the same department (or from different departments in Pratt School of Engineering). The two faculty members of the committee are to be nominated by the appropriate faculty council, either the Executive Committee of the Arts and Sciences Council or the Engineering Faculty Council. This committee will then evaluate and review the case, and the dean may initiate a grade change if that is the recommendation of the committee.

**Compliance with Academic Regulations**

Under no circumstances may students ignore official rules and requirements, as this is a breach of the Duke Community Standard and a "failure to comply" as described in The Duke Community Standard in Practice: A Guide for Undergraduates. Students who ignore official rules and requirements will at the least have their registration for the next academic semester blocked by their academic dean until after the close of the last window of that registration period. They could also be subject to involuntary withdrawal for a period of two semesters and/or referred to the Undergraduate Student Conduct Board for possible disciplinary action.

**Exclusion of Disruptive Students from a Course**

The successful conduct of courses depends upon a basic spirit of mutual respect and cooperation among the participants. If a student disrupts a class in such a way that it seriously compromises the educational experience of the course for other students or prevents the instructor from accomplishing the goals of the course as outlined in the syllabus, the instructor may ask the student to leave the class meeting.

The instructor and the student are then expected to meet to discuss and prepare in writing the conditions under which the student may return to the course. If the disruptive behavior continues, the instructor may report the matter to the student's academic dean. The academic dean will investigate the matter to determine whether the student should be referred to the Office of Student Conduct for consideration of formal charges of violation of university policies including "Classroom Disruption," "Disorderly Conduct," and/or "Failure to Comply." If probable cause resulting in further judicial action is not found, the matter is to be referred to the student's academic dean who will make a decision concerning the status of the student in the course.

If the student or the faculty member wishes to appeal the decision of the academic dean, an appeal is to be directed to the senior associate dean of Trinity College, the academic appellate officer for the college. The decision of the senior associate dean in such a case is final. If the student is permanently excluded from the course, a notation of W will be recorded on the student's academic record.

**Study Abroad/Away**
Global Education Office for Undergraduates

During the academic year or summer, a Duke student may earn Duke or study abroad/away transfer credit, depending on the program type, for approved work completed (1) on a Duke-administered program; (2) at an approved foreign university; or (3) on an approved program abroad that is sponsored by another US college or university. No credit will be awarded for college coursework completed on a study abroad program undertaken prior to matriculation at Duke.

A student who wishes to receive credit for study abroad/away should take into account the following criteria established by the faculty and administered by the Global Education Committee for Undergraduates:

- A scholastic grade point average of at least 2.7 for semester or academic year study abroad/away—a student lacking this average may request a GPA waiver from their academic dean if there are unusual circumstances;
- Pre-departure approval of the program and courses by the Global Education Committee and the Global Education Office for Undergraduates (GEO);
- Confirmation of eligibility to study off campus from the Office of Student Conduct and the student’s academic dean;
- Approval by the appropriate directors of undergraduate studies for the courses to be taken abroad/away.

Please note that a student on academic or disciplinary probation or one who does not meet academic continuation requirements will not be permitted to study abroad/away, regardless of the student’s acceptance to a program.

Generally, there are two types of study abroad/away programs available to Duke undergraduates: Duke-administered and Duke-approved programs. Duke-administered programs have varying degrees of academic and logistical oversight from Duke; offer a mixture of Duke credits and study abroad/away transfer credits, depending on the program; and charge Duke tuition, a program fee, and a housing fee (when applicable). Duke-approved programs are administered by other US institutions or foreign universities; offer study abroad transfer credits that do not compute in the Duke GPA, but are eligible for credit toward certain curricular requirements at Duke; and charge tuition and fees entirely apart from Duke. For Duke-approved programs, Duke charges a per semester Study Abroad Fee (see the section Fees for Study Abroad for details about fees charged for Duke-approved study abroad programs).

Students in Duke-administered and Duke-approved programs are expected to enroll in the equivalent of 4.0 Duke course credits each semester. No underloads and no overloads are permitted. To receive the maximum amount of transfer credit at Duke—generally 4.0 course credits for a full semester, 8.0 course credits for a full academic year, 2.0 course credits for a summer—students on Duke-approved programs are expected to take a full, normal course load, as defined by the GEO and the Duke University Registrar. Students should confirm the required course load for each program with GEO advisors.

Study abroad/away transfer credit will be awarded for work satisfactorily completed in Duke-administered and Duke-approved programs abroad in accordance with GEO policies and procedures found at gloaled.duke.edu/about/forms-policies. Study abroad/away transfer credit courses may, upon evaluation, carry Areas of Knowledge codes. The foreign language (FL) mode of inquiry is only available to transfer courses through a separate approval process upon return.

Students should consult the section on Academic Recognition and Honors or their academic dean to determine the eligibility of study abroad courses for honors such as the Dean’s List. Seniors planning to spend their final semester studying off campus may face postponed graduation because study abroad/away semester dates may differ from Duke’s, and transcripts may be delayed.

Duke-Administered Semester Study Abroad/Away Programs

Duke currently administers a number of its study abroad/away programs. In these programs, Duke faculty and/or academic departments are involved in the academic design and implementation of the programs, and the courses receive Duke credit, as courses on campus do, unless otherwise noted. Information on these programs is available from GEO at gloaled.duke.edu/programs/duke-in-programs.

Transfer & Entrance Credit

Transfer of Work Taken Elsewhere

Work Taken during High School

College-level courses taken elsewhere before matriculation at Duke may be considered for prematriculation credit provided they meet each of the following criteria: was taken after the commencement of the junior year of high school and yielded a grade of B- or better, not used to meet high school diploma requirements, taken on the college campus, taken in competition with degree candidates of the college, taught by a regular member of the college faculty, part of the regular curriculum of the college, not taken on a study abroad program completed before matriculation at Duke, and not precalculus or English composition courses. A formal review of courses meeting these criteria will proceed after an official transcript of all college courses taken and documentation pertaining to these criteria are received by the university registrar. (See also the section on entrance credit on this page for a discussion of the number of prematriculation credits that can transfer and how they may be used at Duke.)

Work Taken after Matriculation at Duke

51 / 1526
After matriculation as a full-time degree-seeking student at Duke, a student in Trinity College may receive transfer credit for no more than two courses taken at another accredited four-year institution, whether in the summer, while withdrawn from Trinity, or while on leave of absence for personal, medical, or financial reasons. A student in the Pratt School of Engineering is limited to four of these types of transfer courses. In cases that involve transferring study abroad credit, a student in Trinity or Pratt may transfer up to four credits for a semester or eight credits for a full year, plus two for a summer. In no instance, however, may a student transfer more than ten courses when combining study abroad and the allowable number of transfer courses. No credit will be accepted for coursework taken while a Duke student is withdrawn involuntarily.

Only those courses taken in which grades of C- or better have been earned are acceptable for transfer credit; courses taken at other institutions with P/F grading or the equivalent are not accepted for transfer credit. The course credit unit of credit awarded at Duke for satisfactorily completed courses cannot be directly equated with semester-hour or quarter-hour credits. Credit equivalency is determined by the university registrar. Courses for which there is no equivalent at Duke may be given a 100 or a 300 number, lower to upper level. All courses approved for transfer are listed on the student's permanent record at Duke, but grades earned are not recorded. Once the limit of transferred credit has been reached, no additional transferred work will be displayed on the record or used as a substitute for a previously transferred course. Further information is available from the university registrar.

Courses taken at other institutions that, upon evaluation, yield transfer credit at Duke may be given Areas of Knowledge but not Modes of Inquiry. (The same is true of courses taken as a part of a study abroad program, except the FL Mode of Inquiry, for which students may apply upon completion of the course). They could count toward the major, minor, or certificate if approved by the relevant academic unit. For purposes of this regulation, interinstitutional credits (see the section Agreements with Other Universities in the Duke University Bulletin) are not considered as work taken at another institution.

At least half of the courses submitted toward fulfillment of a student’s major field must be taken at Duke, but departments may make exceptions to this rule in special circumstances. No credit is given for work completed by correspondence, and courses taken online are not eligible for transfer credit. Credit for not more than 2.0 course credits is allowed for extension courses.

Approval forms for Duke students taking courses at institutions other than Duke may be obtained online or from the offices of the academic deans. Students wishing to transfer credit for study at another accredited college while on leave or during the summer must present a catalog of that college to the appropriate dean and director of undergraduate studies and obtain their approval prior to taking the courses. Students wishing to receive the FL Mode of Inquiry code for transfer coursework taken in study abroad must apply for the FL code using the Transfer Course FL Mode of Inquiry Request Form available at trinity.duke.edu/undergraduate/academic-policies/transfer-credit.

### Transfer Credit for Students Transferring to Duke

Students transferring from a degree program in another accredited institution may be granted credit for up to 17.0 course credits. Courses accepted for transfer in this circumstance may be given, upon evaluation, Areas of Knowledge and Modes of Inquiry codes. They may count toward a major, minor, or certificate if approved by the relevant academic unit. See the section above for information on the evaluation of courses for transfer and the limitation on transfer courses for the major. For questions about transfer credit for transfer students that have been offered admission to Duke, please email transfers@duke.edu.

### Transfer Credit and the Foreign Language Requirement

The same rules that apply to the transferring of courses to meet other curriculum requirements apply to foreign language courses. Foreign language courses taken elsewhere and approved for transfer as credit to Duke may be used for language placement. Students who request placement on the basis of non-Duke courses will be required to show their work (including books, syllabus, writing samples, and exams) to the director of undergraduate studies in the department of that language, and/or to pass an in-house proficiency exam appropriate to the level.

### Entrance Credit & Placement

Scores on the tests discussed below and documented previous educational experience are the criteria used to determine a student's qualifications for certain advanced courses. In addition, a limited amount of elective course credit may be awarded in Trinity College of Arts & Sciences on the basis of precollege examination and/or credits earned of the following three types: Advanced Placement (AP), international placement credit (IPC), and prematriculation college credit. Trinity College will record on students' permanent Duke records courses of these three types completed prior to their matriculation at Duke. The three types of precollege work are regarded as equivalent and may be used for placement into higher-level coursework and to satisfy departmental major and minor requirements at Duke to the extent allowed by the individual departments. Additionally, Trinity College students may be granted up to two elective course credits toward the degree requirement of 34.0 course credits for any combination of AP, IPC, or prematriculation credits. Up to six additional credits may be awarded for acceleration toward the degree. Acceleration is defined as completing the requirements for the bachelor's degree one or two semesters earlier than the original expected graduation date. Specifically, the two electives, as well as up to two acceleration credits, may be included in the graduation total for students graduating in seven consecutive semesters. The two elective credits, as well as up to six acceleration credits, may be included in the graduation total for students graduating in six consecutive semesters. Students may not use acceleration credits in order to compensate for time taken away from their studies due to a leave of absence, voluntary or involuntary withdrawal from the university, or a period of practice-oriented education that does not include credit-bearing coursework taken to satisfy graduation requirements. Students wishing to graduate early must complete an early graduation form, available from their academic dean, by the end of the fifth semester of enrollment. AP, IPC, and prematriculation credits may not be used to satisfy general education requirements—the Areas of Knowledge or the Modes of Inquiry.

Duke University
The Pratt School of Engineering evaluates AP and IPC credits as Trinity College does. These courses, with limitations, may be used to satisfy general education requirements toward the BSE degree. The criteria for evaluating such work are the same as in Trinity College (see the section Work Taken during High School on the previous page). Enrollment in a course for which AP or IPC credit has been given will cause the AP credit to be forfeited.

**Forfeiture of Precollege Credit Awarded**

Students who successfully complete a course at Duke for which they received precollege credit may not use that or any higher precollege credit in that subject to satisfy degree requirements, but the precollege work will remain on the Duke transcript. A Trinity College student who enrolls in a course for which precollege credit was awarded and who subsequently fails or withdraws from the course after the Drop/Add deadline will be allowed to apply the precollege credit toward graduation requirements according to the policy governing use of such credits (see above). A Pratt School of Engineering student enrolled in a course for which precollege credit was awarded and who subsequently fails or withdraws from the course after the Drop/Add period will not be allowed to use the precollege credit nor any higher credit in that subject to satisfying degree requirements.

**College Board Advanced Placement Program (AP) Examinations**

A score of four or five on College Board Advanced Placement Program Examinations, taken prior to matriculation in college, is the basis for consideration of placement in advanced courses in some departments. Departmental policies regarding Advanced Placement may vary. Approval of the director of undergraduate studies or supervisor of first-year instruction in the appropriate department is required before final placement is made. Scores must be submitted directly from the appropriate testing service to the Office of the University Registrar. The expectation is that they will be sent prior to matriculation.

Advanced Placement courses completed with a score of four or five will be recorded on a student's permanent Duke record. Students may use all of these courses for placement into higher-level courses and to satisfy departmental major and minor requirements at Duke to the extent allowed by individual departments. AP credit is usually not accepted to satisfy introductory physics course requirements for Physics and Biophysics majors. In the Pratt School of Engineering, AP or IPC courses count toward the general requirements, and the student is required to take one physics course at Duke. If awarded AP, IPC, or PMC credit for Physics 25 and 26, the student must take one of the following physics courses here at Duke: Physics 152L, 153L, 264, 361, or 362. Students have the option of taking Physics 152L which will result in forfeiture of Physics 26L AP. This AP will remain on the transcript. In Trinity College, AP courses do not count toward the general education requirements, i.e., the Areas of Knowledge or the Modes of Inquiry.

**Advanced Placement in Physics.** Neither credit nor Advanced Placement is given for a score below five on the Advanced Placement (AP) Physics-B exam. Trinity College students with a score of five on the AP Physics-B exam may be placed out of Physics 141L with consultation and approval of the physics director of undergraduate studies, although no credit will be granted for these courses. This option is not available to students in the Pratt School of Engineering. Entering students with a score of four or five on the AP Physics-C Mechanics exam will receive credit for Physics 25; students with a score of four or five on the AP Physics-C Electricity and Magnetism exam will receive credit for Physics 26. This policy applies to students entering either the Pratt School of Engineering or Trinity College. For more details about AP course credits and international AP course credits in physics, see physics.duke.edu/undergraduate/prospective-students/transfer-credit/college-board-advanced-placement-ap.

**International Placement Credit (IPC)**

Duke University recognizes the International Baccalaureate Program; the French Baccalaureate; the British, Hong Kong, or Singapore A-Level Examinations; the Cambridge pre-U; the Caribbean Advance Proficiency Examination; the German Abitur; the Swiss Federal Maturity Certificate; the All India Senior School Certificate Examination; the Indian School Certificate examination; and the Israeli Matriculation Certificate. Scores acceptable for consideration are determined by the faculty and evaluated by the university registrar. Course equivalents for these programs may be recorded on a student's permanent Duke record for placement and credit according to the same policy governing the use of AP and prematriculation credits (see above). In Trinity College, these credits do not satisfy the general education requirements and, thus, may not be used for the Areas of Knowledge or the Modes of Inquiry. Any combination of two IPC, AP, or prematriculation credits may be used toward the 34.0 course credits required for graduation. Additional IPC, AP, and prematriculation credits may be used to accelerate. In the Pratt School of Engineering, these courses may be used to satisfy general education requirements toward the BSE degree.

**Prematriculation Credit**

First-year Duke students may submit for evaluation college courses taken at another US regionally accredited college or university after the commencement of the student's junior year of high school. (For details concerning transferring this work, see the section Work Taken during High School on the previous page.) In Trinity College, prematriculation credits awarded for such work may be used as electives and may not be used to satisfy the general education requirements—the Areas of Knowledge or the Modes of Inquiry. Any combination of two prematriculation, IPC, or AP credits may be used toward the 34.0 course credits required for graduation (credits do not have to be designated by the student). Additional IPC, AP, and prematriculation credits may be used to accelerate if early graduation is intended and if there has been no gap in the student's studies at Duke. In the Pratt School of Engineering, these courses may be used to satisfy general education requirements toward the BSE degree. No prematriculation credit will be awarded for college coursework completed on a study abroad program undertaken prior to matriculation at Duke.

**Placement in Languages and Mathematics**
Duke University

Placement in French, German, Latin, and Spanish. Newly admitted students who wish to continue the study of French, German, or Latin begun in secondary school should take a College Board Advanced Placement (AP) Examination in that language by June of their senior year in secondary school. Students who do not take these tests or submit test scores should refer to the placement guidelines on the website of the relevant department, or consult with the relevant language program director. In Spanish, French, and German, a score of four or five on the AP literature exam, or a score of five on the AP language exam qualifies students to enroll in a 300-level course. Students who plan to take mathematics at Duke are expected to present College Board Scholastic Achievement Tests (SAT), Mathematics Achievement (Level I or Level II), or Advanced Placement Program (AP, either level AB or level BC) scores.

In French and Spanish students must receive permission from the relevant language program director to enroll in a course one level below their placement (e.g., from 300 to 204 or from 204 to 203, in French; from 3055 to 204 or from 204 to 203 in German). Without permission, no credit will be allowed for courses two levels below the achievement score; similarly, no credit will be given for French 101 or Spanish 101 to students who have completed more than two years of French or Spanish in high school without permission from the relevant language program director.

Students should check the Self-Placement Guidelines:
- French (romancestudies.duke.edu/undergraduate/languages/french)
- German (german.duke.edu/undergraduate/language-program/placement)
- Latin (classicalstudies.duke.edu/undergraduate/placement-latin-greek)

Placement in Languages Other than French, German, Spanish, and Latin. Students who wish to continue in any language other than French, German, Spanish, or Latin should consult with the appropriate director of undergraduate studies. In the case of Russian, Polish, and Turkish, the department offers a written examination and oral interview, which are used in conjunction with other criteria for placing students at the appropriate level. In the case of Asian and African languages, students should consult with the appropriate language coordinators.

Placement in Mathematics. All students who plan to take mathematics during their first semester at Duke, and who do not submit the College Board SAT or Achievement Test or Advanced Placement Program score in mathematics, should refer to the placement guidelines on the website of the Department of Mathematics, or consult with the supervisor of first-year instruction in mathematics during New Student Orientation. New students who have been placed in Mathematics 105L or 111L on the basis of College Board SAT, Achievement, or Advanced Placement Examinations but who believe that their background in mathematics justifies a higher placement should also confer during New Student Orientation with the supervisor of first-year instruction or with the director of undergraduate studies in the Department of Mathematics. Placement testing in mathematics is not offered during New Student Orientation.

Admissions

Principles of Selection

James B. Duke, in his Indenture of Trust, requested that “great care and discrimination be exercised in admitting as students only those whose previous record shows a character, determination, and application evincing a wholesome and real ambition for life.” Therefore, in considering prospective students, Duke University looks beyond the basic characteristics of academic competence possessed by the majority of applicants. It seeks, regardless of race, color, religion, national and ethnic origin, gender, handicap, sexual orientation, or age, not only evidence of intellectual promise and maturity of judgment, but also a sense of life beyond the classroom. Often, this is expressed in the form of special talents and accomplishments; it is seen consistently in a student’s determination to make creative use of the opportunities and challenges posed by Duke University.

Requirements for Application

As there are occasional changes in admission policies or procedures after the printing deadline for the Bulletin of Undergraduate Instruction, candidates are urged to consult the Duke Admissions website at admissions.duke.edu for specific admissions information, dates, and policies.

Degree Status

Although there are no inflexible requirements as to subject matter, students are urged to choose a broad and challenging high school program. Candidates for admission should present a minimum of four years of English and at least three of mathematics, natural sciences, a foreign language, and social studies. Applicants to Pratt School of Engineering are strongly advised to take four years of mathematics and four years of science, including physics. Calculus is a prerequisite for admission to Pratt School of Engineering.

Duke University has a test-optional policy for students applying for first-year or transfer admission. Applications will be equally considered regardless of whether or not students submit SAT or ACT scores. Duke University will continue to consider self-reported and/or official scores from the SAT and ACT, English proficiency tests, Advanced Placement tests, International Baccalaureate exams, and A-level and other similar national exams from students who choose to submit them. Duke will accept self-reported scores for purposes of assessing an application; scores sent from testing agencies will be required only from those students who enroll at Duke.

Nondegree Status
Summer Session. Persons who are or were at the time of leaving their home institutions in good standing in accredited colleges or universities may be admitted for summer study only by the director of the summer session. Duke students who are on leave or who have been involuntarily withdrawn from the university are not eligible to enroll in courses during the summer session or fall and spring terms.

Continuing Studies. Admission as a continuing studies student at Duke is limited to adults who live in the Triangle area; Duke graduates; persons who will be moving into the area and plan to reside here for a substantial period of time, for family and work reasons; and visiting college students desiring a course of study particular to Duke. These students are given academic counseling by the Office of Continuing Studies; they are subject to most of the regulations set forth for degree candidates. Duke students who are on leave or who have been involuntarily withdrawn from the university are not eligible to enroll as nondegree students through the Office of Continuing Studies. Because these students oftentimes are prohibited from being on the Duke campus, they should also understand that they may not enroll in any noncredit classes that meet on Duke’s campus.

Application Procedures

Degree Status

Information regarding applying for admission may be obtained online at the Duke Admissions website at admissions.duke.edu. A nonrefundable processing fee that is determined annually must accompany the first part of the application. Students may apply using either the Common Application or Coalition Application. The Common Application (commonapp.org) and the Coalition Application (coalitionforcollegeaccess.org) are available online.

A personal interview is not required for admission, but it provides an opportunity to learn more about an applicant's strengths and goals. All interviews are conducted by alumni volunteers. Students who submit their Common Application by the Early Decision deadline (November 1) or the Regular Decision priority interview deadline (December 20) will be contacted by alumni on a first-come, first-served basis. While Duke makes every effort to interview all applicants who submit applications by these deadlines, interviews are not guaranteed.

Regular Decision. Candidates who wish to enter Duke as first-year students must submit a completed application no later than January 2 of the year in which they intend to enroll. Decisions are provided by the university in late March, and accepted candidates are expected to reserve a place in the class by May 1.

Early Decision. The Early Decision plan is designed to provide well-qualified students who know Duke is their first choice a means of indicating that commitment to the university and notification of a decision early enough to eliminate the necessity of applying to several colleges.

Candidates who apply for Early Decision are required to sign a statement confirming their commitment to enroll at Duke if they are admitted in the Early Decision process. Under this agreement, applicants are required to withdraw all applications to other colleges and universities once they learn of their admission to Duke. Students applying to Duke under Early Decision may not apply to any school whose conditions of application conflict with those outlined in Duke's Early Decision agreement. However, Early Decision applicants are still able to apply to other schools whose conditions of application do not conflict with Duke's, provided they enroll at Duke if admitted. Duke reserves the right to withdraw the applications of students accepted to other schools under binding Early Decision plans. Secondary school counselors and parents are also asked to sign the Early Decision agreement. Students who are denied admission under the Early Decision program may not reapply for admission under the Regular Decision program.

Students applying for Early Decision must submit a completed application by November 1. Applicants are notified of their status—admit, defer, or deny—by mid-December. Admitted students are expected to respond by January 6. The credentials of candidates who are deferred are considered along with candidates for Regular Decision. Deferred students are no longer bound by the Early Decision agreement and are free to accept offers of admission from other colleges and universities.

Midyear Admission. A midyear (January) admission program has not been offered to first-year students for a number of years and there are no current plans to reinstate one.

Transfer Admission. A limited number of transfer seats may be available, and the number will vary from year to year. Prospective transfer students should refer to the Duke Admissions website at admissions.duke.edu for the most up-to-date information on the transfer process. Duke considers transfer applicants intending to enter Duke as sophomores or juniors. All students entering the Trinity College of Arts & Sciences must meet the college’s curriculum requirements in addition to the requirements of their selected major. For most transfer students, this will require up to six semesters at Duke to complete. Candidates must submit completed application forms, official transcripts of all work completed at other accredited colleges, high school records, scores on the SAT or ACT, and employment records if there has been an extended period of employment since graduation from secondary school. See the section “Transfer Credit for Students Transferring to Duke.”

Transfer applicants submit a completed application by March 15, learn of their decisions in mid-May, and must respond to the university by June 1.

Nondegree Status

Summer Session. General information, registration forms, and schedules of courses may be obtained from the office’s website (summersession.duke.edu) or by calling (919) 684-6259. An application fee is required.

Continuing Education. Applications may be obtained from the Office of Continuing Studies and must be returned to that office, accompanied by the application fee, by August 1 for the fall semester, by December 1 for the spring semester, by April 15 for Summer Session Term 1, and by June 1 for Summer Session Term 2.
A certain grade point average over four courses must be attained before a nondegree student may apply for degree candidacy. More detailed information on nondegree coursework through continuing education is available from the Office of Continuing Studies by calling (919) 684-5375.

Readmission of Former Students. All undergraduate students (including those of The Pratt School of Engineering) applying to return to Duke from a leave of absence, withdrawal, dismissal, or suspension must apply directly to the Office of Student Returns located in Trinity College Office of the Academic Deans. Students on leave of absence or who have been dismissed are not eligible to enroll in classes through the Office of Continuing Studies. For additional information, visit the Time Away Office website at undergrad.duke.edu/student-success/time-away-office. Also, see the section “Changes in Status.”

Tuition & Fees
When deciding to make the investment in a college education, students are urged to give their attention first to the selection of institutions that meet their intellectual and personal needs, and then to the devising of a sound plan for meeting the cost of their education. This process requires an in-depth knowledge of both the university’s financial aid program and the resources of the student’s family. Information describing in detail the various forms of financial aid available at Duke may be obtained from the Karsh Office of Undergraduate Financial Support website at financialaid.duke.edu.

The figures in this section are projections and are subject to change.

</tbody>
</table>

The figures in this table are projections and are subject to change. Certain basic expenditures, such as tuition, fees, housing, and food, are considered in preparing a student’s budget. These necessary expenditures, with a reasonable amount allotted for miscellaneous personal expenses and books, course materials, supplies, equipment, and transportation costs, are shown above. Food projections include a meal plan service fee and NC tax surcharge. There are no meal plans for Summer Session. Students can add points or select a debit account that is either small, medium, or large. For financial aid purposes, the summer cost of food and miscellaneous personal expenses is calculated as a percentage of the academic-year cost based on the number of weeks attended.

Additional expenses may be incurred that will depend to a large extent upon the tastes and habits of the individual. The average first-year undergraduate student, however, can plan on a budget of approximately $87,357 plus transportation costs. Note that for students receiving financial aid who live off-campus, consideration will be given for the cost of an on-campus double room and dining plan D in their calculated cost of attendance. These budgets represent most student living expenses except for parking and loan fees.

### Fees and Deposits for Fall and Spring

On the first bill from Duke, students (including transfer students) are required to pay a one-time nonrefundable registration fee of $180, which includes transcript processing.

### Part-Time Students
In the regular academic year, students who, with permission, register for no more than 2.5 courses in a semester will be classified as part-time students. Part-time students will be charged tuition at the rate of $7,932; half course, $3,966; quarter course, $1,983. Registration for more than 2.5 courses requires payment of full tuition. Students in nondegree programs who are being considered for admission to degree programs, as designated by the Office of Continuing Studies, will pay the rate per course. Duke employees, members of the Osher Lifelong Learning Institute (OLLI), and qualified members of the local community may audit undergraduate courses for the above payment per course.

**Duke Employees**

Many employees may be eligible to receive either a Tuition Grant from Trinity College of Arts & Sciences or an Employee Tuition Benefit through Duke Human Resources to enroll in regular university classes, or both, to assist with the cost of tuition or audit fees. The details of these two plans can be found at [learnmore.duke.edu/academics](learnmore.duke.edu/academics) and [hr.duke.edu/benefits/educational/employee-tuition-assistance](hr.duke.edu/benefits/educational/employee-tuition-assistance).

**Fees for Courses**

Additional fees are charged for certain physical education activities, field trips, and applied music courses. For specific charges, consult the Bursar’s Office. For students receiving need-based financial aid, all fees are paid in full.

A fee of $198 will be charged for Music 101. A fee of $395 will be charged for Music 103 to 108. A fee of $790 will be charged for Music 203 to 208. Fees for these courses for students receiving need-based aid are paid in full.

**Fees for Study Abroad**

Students who register to study abroad in programs administered by institutions other than Duke University will pay the tuition and fees of the administering institution. There will be a fee of $4,580 per semester, payable to Duke University, to maintain a student’s enrollment at Duke. Students receiving financial aid will receive aid based on revised costs from the administering institution.

**Additional Cost of Attendance Components**

In addition to the expenses listed above, Duke's additional cost of attendance components for the purposes of financial aid includes the following:

<table>
<thead>
<tr>
<th>ESTIMATED EXPENSES</th>
<th>ACADEMIC YEAR 2023-2024</th>
</tr>
</thead>
<tbody>
<tr>
<td>Miscellaneous personal expenses</td>
<td>$3,274</td>
</tr>
<tr>
<td>Transportation</td>
<td>$582-$1,317 (contingent on home address)</td>
</tr>
</tbody>
</table>

**Tuition and Fees for Summer Session**

Tuition for undergraduates is $1,355 for each half-course, $680 for each quarter-course, and $2,705 for a non-science lab course. A course with a lab is charged at the rate of $3,460.

Tuition for graduate master's students taking an undergraduate course will be charged at the graduate master's summer tuition rate. A graduate PhD student taking an undergraduate course that will apply toward their graduate degree will be charged at the graduate PhD summer rate. If the course will not be considered a part of the student's graduate degree program, undergraduate rates apply as described above.

**Health Fee and Student Services Fee**

All Duke students and all full-time non-Duke students are required to pay a health fee of $162 per term, as well as a student services fee of $140.90 per term for all students living on Duke campus.

**Music Fee**

A fee of $198 will be charged for Music 101. A fee of $395 will be charged for Music 103 to 108. A fee of $790 will be charged for Music 203 to 208. Students receiving need-based aid for summer will have the fee covered in full.

**Auditing Fees**

Students carrying less than a full course program may be granted permission by the instructor and the director of summer session to audit one non-laboratory course except a physical education or dance activity course, a studio art course, an applied music course, an independent study course, tutorials, and foreign programs. Regular deadlines apply. Courses may not be changed from credit to audit (or vice versa) after the Drop/Add period. For arts and sciences offerings, the auditing fee is $302 per course. Professional school course audit policies may differ.

**Living Expenses**

The figures contained in this section are projections and are subject to change prior to the beginning of the fall term.
Housing for Fall and Spring

In residence halls for undergraduate students, the housing fee is $13,056 for a single room, $9,884 for a double room, and $8,814 for a triple room Duke-provided housing for the academic year. Apartment rates for upper-class students range from $13,056 to $16,230 for the academic year. Detailed information concerning the student’s obligations under the housing license and the consequences of failure to comply are published in The Duke Community Standard in Practice: A Guide for Undergraduates.

Housing for Summer

For detailed information on types and costs of accommodations available at Duke University for the summer session, email housing@studentaffairs.duke.edu, call (919) 684-4304, or visit studentaffairs.duke.edu/hdrl.

Food and Other Expenses

Duke Dining Services and Duke University Stores operations are located on campus to serve the needs of the Duke community. The university identification card, known as the DukeCard, can be used to gain access to prepaid accounts and make purchases in many Duke University facilities.

The first-year student dining program is composed of two parts:

- **Dining Plan:** Fourteen prepaid all-you-can-eat-meals per week (five breakfasts, seven dinners, and two brunches) at The Marketplace at East Union.
- **Food Points:** Declining balance points to be used at any dining location on campus, convenience stores, snacks from vending machines, and late-night meal delivery from approved local off-campus vendors and food trucks.

The cost of the dining plan for the First-Year Plan (Plan I) is $4,247 per semester, plus a $25 dining fee per semester and 7.5 percent NC tax surcharge. The First-Year Plan also includes 800 food points for $910 plus a 7.5 percent NC tax surcharge. Participation in the First-Year Plan is required of all first-year students who reside on East Campus.

Upper-class students who live in the residence halls are required to participate in one of five dining plan debit accounts that allow access to all dining locations. The five plan levels (Plan A-Plan E) range from $2,641 to $4,103 per semester, plus a $25 dining fee and 7.5 percent NC tax surcharge per semester. Upper-class students who live in Swift Avenue apartments are also required to participate in the dining plan but may choose to do so at the lower minimum requirement of Plan J ($1,868 plus a $25 dining fee and 7.5 percent NC tax surcharge per semester).

Nonresident students are not required to participate in the dining plan; however, Plan F, for $865 and a $25 dining fee and 7.5 percent NC tax surcharge per semester, is offered as an option.

An optional summer dining plan is provided in three plan levels ranging from $339 to $1,372 per summer term (plus a $25 dining fee and 7.5 percent NC tax surcharge).

Students may also purchase a Flexible Spending Account (FLEX) that can be used to purchase any goods or services from Duke Dining, Duke Stores, and other campus operations. FLEX is optional and may be opened with as little as $25. Additional funds may be deposited to either the FLEX or dining plan debit account at any time.

Information regarding these accounts is sent to matriculating students. For more information about campus retail and food facilities, see the page Housing, Dining, & Transportation in the Duke University Bulletin.

Financial Policies

Fall & Spring Student Bills

The Bursar’s Office prepares students’ bills for tuition and fees. Tuition and fees are due before the start of each term. Please consult the Bursar’s Office website for a complete billing schedule (finance.duke.edu/bursar). Students applying for financial aid should complete that process by the assigned due date.

Bills are available electronically on DukeHub, and students will receive a bill via email. Students may view bills and up-to-date student account history on DukeHub. Email bills will also be sent to anyone the student has designated as a guest with access to view online bills.

Payment

Students are encouraged to pay by e-check, a fast and convenient method for paying their bills. To pay by e-check, visit DukeHub or finance.duke.edu/bursar and click the DukePay icon. Payment also may be mailed to the address listed on the bill.

Payment Plan

Duke partners with Nelnet to provide a payment plan for current term charges. For additional information please visit mycollegepaymentplan.com/duke or finance.duke.edu/bursar.

Additional reference information regarding student accounts is available at finance.duke.edu/bursar. Students may also contact the Bursar's Office for questions regarding their student account. Email bursar@duke.edu, call (919) 684-3531, or fax (919) 684-3091.

Restrictions on Past Due Accounts
As noted above, tuition and fees are due before the start of each term. If a student's account becomes past due, a late payment penalty charge (not to exceed 1.25 percent of the past due balance from the prior bill) will be assessed on subsequent bills. If the account remains unpaid, a student will not be allowed to register for future semesters and may be administratively withdrawn from Duke. As long as the account is past due, a student will not have access to academic transcripts, have academic credits certified, or receive a diploma at graduation. If the account remains outstanding after a student departs from Duke, it may be referred to a collection agency and reported to a credit bureau.

**Summer Student Bills**

The Bursar's Office will prepare bills in April, May, and June for current Duke students enrolled for Summer Session. April and May bills are due on the twelfth of the following month. June bills are due on the first business day of August. Please consult the Bursar's Office website for a complete billing schedule (finance.duke.edu/bursar). Students will receive bill notifications via their Duke email account and also may view their bills on DukeHub. Email bills will also be sent to anyone the student has designated as a guest with access to view online bills.

Problems meeting these deadlines should be discussed with the Bursar's Office prior to the start of the term. Failure to meet deadlines may have implications for fall enrollment.

The Summer Session Office will enclose a statement of charges with the confirmation of registration letter sent to all visiting students and Duke graduates. Payment for term charges will be due on the designated due dates.

The Summer Session Office will enclose a statement of charges with the confirmation of registration letter sent to all visiting students and Duke graduates. Payment for term charges will be due on the designated due dates. Summer Session retains the right to withdraw students from classes if they never attend, have not paid tuition and fees, or if they have failed to clear with the Bursar's Office, by the end of the Drop/Add period. Attendance in classes after the first three days of the term obligates the student to the full tuition and fees for the course.

Students who, subsequent to withdrawal, clear with the Bursar's Office prior to the midpoint of the particular term may, with written permission of their academic dean, be reinstated in their classes as originally registered and receive regular grades. The administrative withdrawal fee will stand and the student will be liable for full tuition and fees.

**Refund Policy**

Tuition and mandatory fees are required to be paid in full, regardless of:

- The method of instruction and/or mode of academic delivery;
- Any changes to instructional content, schedule, or duration of the semester;
- Any inability to access Duke University-maintained facilities; and
- Any disruption to or cancellation of activities, events, services, or programs during the academic year.

For the avoidance of doubt, and as has been the Policy of Duke University in the past, tuition and mandatory fees will not be refunded in whole or in part for any reason, except as provided for under the Refund Policy. By paying the tuition and mandatory fees, the student and anyone paying tuition on their behalf acknowledges and accepts these terms.

**Fall and Spring Refunds**

In the case of withdrawal from the university, tuition will be reduced according to the following schedule:

<table>
<thead>
<tr>
<th>TIME OF WITHDRAWAL</th>
<th>AMOUNT REFUNDED</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before classes begin</td>
<td>Full amount</td>
</tr>
<tr>
<td>During first or second week</td>
<td>80%</td>
</tr>
<tr>
<td>During third, fourth, or fifth week</td>
<td>60%</td>
</tr>
<tr>
<td>During sixth week</td>
<td>20%</td>
</tr>
<tr>
<td>After sixth week</td>
<td>None</td>
</tr>
</tbody>
</table>

Grants or loans will be restored to those funds on the same pro rata basis and will not be refunded or carried forward. In the event of death, a full tuition, fees, and residence hall refund will be granted. In case of a call to military service, a full semester's tuition, the full purchase price of textbooks from the university's bookstore, and the pro rata amount of the room charge will be refunded. The outstanding balance of the food service plan will be refunded in case of military service or death.

In the case of dropping special fee courses (e.g., music, art, golf), or of part-time students dropping audit courses, a full refund will be granted to students during the Drop/Add period. Students changing status to part-time are required to request permission at the time of preregistration; therefore, no refunds are granted during the Drop/Add period or subsequently for changes that involve carrying less than a full-time load.

Because Duke University participates in the Title IV federal aid programs, it follows federal guidelines with respect to the refund and repayment of these funds. All first-time students who withdraw within 60 percent of the enrollment period will have their charges and financial aid adjusted according to the federal regulations. Additional information regarding this procedure may be obtained from the Office of Financial Aid.

**Summer Administrative Withdrawal Charges and Refunds**
Drop or Administrative Withdrawal Charges. Students who will not be attending a summer term or course for which they have registered must officially drop the course(s) prior to the beginning of the term whether or not they have paid tuition and fees. (See the section Course Changes after Class Begin: Summer Terms in Registration & Courses.) Students who fail to drop the course(s) prior to the beginning of the term will be charged $150 per course.

Refunds (Except Study Abroad Programs). Students who will not be attending a summer term or course for which tuition and fees have been paid are eligible for refunds according to the following policy: There is a financial obligation of full tuition and fees if the student withdraws from a course(s) or withdraws from the term after the third day. Full tuition and fees are refunded if the student officially drops a course(s) or withdraws from the term before the first day.

Financial Support

Duke University is strongly committed to its program of financial support and, for the four years of undergraduate enrollment, will meet 100 percent of the demonstrated need of each eligible admitted US citizen or eligible noncitizen. The university's financial support program includes both merit and need-based scholarships, work-study, and all federal grant and loan programs.

For US citizens and eligible noncitizens, an applicant's need for financial aid, or the fact that a student has applied for financial aid, will not disadvantage a student in the admission process. Students needing assistance are strongly encouraged to apply for funding at the same time as for admission. Students awarded support funding will be notified at the same time they are offered admission, assuming all required documentation has been received.

It is the intention of the Karsh Office of Undergraduate Financial Support to set each award at a level consistent with a family's ability to meet the costs of attending Duke University. This will be done by taking into consideration the contribution that can reasonably be expected from the student and the family.

Financial Support for Entering First-Year Students

Candidates should initiate their application for financial support concurrently with their application for admission. Instructions outlining the specific requirements and deadline dates will accompany application materials. To receive institutional funds, two forms must be submitted, the Free Application for Federal Student Aid (FAFSA) to the federal processor and the PROFILE application to the College Board’s Scholarship Service (CSS). Students applying for federal loans and grants, not Duke University aid, must complete only the FAFSA. If a student's parents are divorced or separated, both parents must submit the PROFILE and one parent must submit the FAFSA. Students may be asked to submit copies of their and their parents' federal income tax returns (all forms, schedules, statements, and W2s must be included). Early Decision and Regular Decision applicants are required to submit their tax information directly to the College Board for processing by the Institutional Documentation Service (IDOC). Students will receive information from the College Board about the IDOC process. All tax information is then sent to Duke electronically by the College Board.

International students interested in obtaining need-based financial aid must apply for financial support at the time of admission to be eligible to receive need-based aid in any year of undergraduate study. To apply, students must complete the International CSS Profile online. A Statement of Foreign Earnings for both parents or a copy of the most recently completed tax return for both parents must be submitted to the College Board IDOC Service. For further information about financial assistance for international students, visit their website at financialaid.duke.edu/apply-aid.

Renewal of Financial Support after the First Year

Each year, domestic students must file an application for renewal of need-based financial aid. All students must complete a new Free Application for Federal Student Aid (FAFSA), and students may also be asked to complete a new PROFILE form and submit a copy of all pages, including schedules and attachments, of the parents' and student's federal income tax return. Students will be notified electronically of the documents necessary to receive their financial aid renewal. The deadline for the receipt of all application materials by the Karsh Office of Undergraduate Financial Support is January 2. All qualified students may receive need-based aid for up to nine semesters (eight semesters of fall and spring plus two summer terms).

To have financial aid renewed, a student must meet the requirements outlined in Duke's policy for Satisfactory Academic Progress for Financial Aid. Students not qualifying for financial aid due to their inability to meet these requirements may appeal directly to the Karsh Office of Undergraduate Financial Support. Students holding merit scholarships are required to maintain an average considerably higher than the minimum required for need-based financial aid recipients. Specific details regarding retention standards will be provided to scholarship winners.

Summer School Financial Support

Financial support is available for a total of two summer sessions but only for Duke programs. No financial support is available for non-Duke summer programs. Students may choose to attend two summer sessions as part of a ninth semester of aid eligibility. Interested students can obtain more information about summer financial support, budgets, and eligibility at financialaid.duke.edu/making-most-your-aid/summer-study.

Types of Financial Support

Gift scholarships or grants, long-term loans, and employment are integral parts of the financial support program, and some portion of the financial support offered an undergraduate is normally in each of these forms.
The following are among the named gift scholarships offered through Duke University. Application; interested Duke applicants are urged to file all financial aid forms as early as possible. Board, mandatory fees, assistance for additional demonstrated need, and support for a summer abroad or research project. There is no separate

Undergraduate University Scholars receive a full-tuition scholarship, room, board, and the cost of a summer program. Trinity Scholars are also eligible to apply for enrichment funding.

Robertson Scholars. Half of the Robertson scholars matriculate at The University of North Carolina at Chapel Hill, and half at Duke University. All exhibit exceptional leadership potential, commitment to public service, and proven interest in the diversity of peoples and cultures both within the United States and beyond its borders. The program is designed so that every Robertson Scholar will have dynamic intellectual homes at two superb universities—Duke and The University of North Carolina at Chapel Hill. Robertson scholars receive full tuition, room, board, and mandatory fees at The University of North Carolina at Chapel Hill or Duke, summer community-building and enrichment opportunities in the United States and abroad, support for research and related travel, and a top-of-the-line laptop computer.

Trinity Scholarships. Awarded to North and South Carolinians of exceptional ability, these scholarships are named to honor the fact that Duke University was originally named Trinity College. Trinity scholarships provide each winner an award equal to the value of tuition, fees, room, board, and the cost of a summer program. Trinity Scholars are also eligible to apply for enrichment funding.

The University Scholars Program is an interdisciplinary, intergenerational community of undergraduate, graduate, and professional school scholars. Undergraduate University Scholars are exceptional students who have also demonstrated, through official financial aid applications, that they need scholarship support to achieve their academic ambitions. Undergraduate University Scholars receive a full-tuition scholarship, room, board, mandatory fees, assistance for additional demonstrated need, and support for a summer abroad or research project. There is no separate application; interested Duke applicants are urged to file all financial aid forms as early as possible.

Gift Scholarships

The following are among the named gift scholarships offered through Duke University.
Alice M. Baldwin Scholarships. One or more of these scholarships, varying in amount, are awarded to women who are rising sophomores, juniors, or seniors on the basis of scholarship, character, leadership, and need.

Gross Scholarship, established in 2005, provides whole or partial scholarships to undergraduate students who are, or shall be at the time of receipt of the scholarship, enrolled in Trinity College of Arts & Sciences or Pratt School of Engineering at Duke University. The scholarship will replace loans and/or work study. Gross scholarship recipients will come from families with income below the median of students receiving financial aid at Duke the previous year, using the same measurement standards applied by the Office of Financial Aid.

J. A. Jones Memorial Scholarships, sponsored through the Jones Fund for Engineering, are awarded to engineering students whose outstanding academic and personal qualifications suggest that they will become leaders in a technological society. The awards may be based on merit criteria set by the Pratt School of Engineering and financial need.

The Janet B. Chiang Memorial Scholarship Fund was created by the family and friends of Janet B. Chiang. This grant supports student projects with the goal of furthering Asian American understanding, as well as funding need-based grants for students to study in Asia. Duke undergraduate and graduate students may apply. Special consideration will be given to projects connected with Asian American relations, Asian American cultural or legal issues, and women's issues, but any project that is designed to meet a need and encourages student leadership initiative will be considered. Special consideration will also be given to Asian Americans who apply for grants to study in Asia, but all students with a demonstrated interest in the relation of Asian and American cultures are encouraged to apply for this grant.

Kravis Scholarships. The endowment, established in 1997, provides need-based support for disadvantaged students. Assistance is given to students enrolled in Trinity College of Arts & Sciences, with a preference for African Americans. Kravis Scholars will receive $24,200 for four years, which includes replacement of loans and/or work study, and an award for one Duke-sponsored summer study abroad program.

Panhellenic Scholarship. A scholarship is awarded to a rising senior woman on the basis of scholarship, character, leadership, service, and need.

Richard Miles Thompson Scholarships are awarded annually to male undergraduate students enrolled in the Pratt School of Engineering. The awards are based upon academic merit and demonstrated financial need.

Robert H. Pinnix Scholarships are awarded annually to students enrolled in the Pratt School of Engineering. The award is based upon demonstrated ability, excellence in engineering, and financial need.

United Methodist Scholarships. Several United Methodist Scholarships are available on the basis of demonstrated need to Methodist students who have given evidence of leadership in their local Methodist Youth Fellowship groups.

W. N. Reynolds Memorial Scholarships. Recipients of these awards are students with outstanding ability and/or need who show promise of constructive leadership. In considering candidates for the awards, consideration will be given in the following order: (1) children of employees of R. J. Reynolds Tobacco Company or any of its affiliates or subsidiaries; (2) children of families residing in Forsyth County, North Carolina; and (3) other candidates who are residents or natives of North Carolina. There are a number of awards available for each first-year class with a minimum value of $500.

The William O'Connor Memorial Scholarship. This music scholarship, established by the Mary Duke Biddle Foundation in honor of William O'Connor and in appreciation for his many years of service to the foundation, is awarded to a student of a string instrument or organ.

Drama Scholarships

The Beth Gotham Semans Drama Scholarships. These awards are made annually to currently enrolled undergraduate students who have been and continue to be active in drama, with preference given to African American students. Applicants need not be drama majors but must have demonstrated need and demonstrate significant involvement in dramatic activities.

Emma A. Sheaver Drama Scholarships. These scholarships are awarded to talented prospective drama students who would not be able to attend Duke University without financial assistance. Awards shall be made to a single individual or several qualified students in need.

Kohler Scholarships in Drama. Several awards each year are given to needy students active in the drama program.

The Steven and Toby Korman Drama Scholarships. The scholarship shall be awarded annually to a student(s) with demonstrated need who has demonstrated exceptional talent and ability in the field.

ROTC Scholarships

Air Force ROTC College Scholarship Program. Students can apply for three-year scholarships during their first year and two-year scholarships during their sophomore year. Scholarships are available to qualified students who major in most fields, primarily scientific or engineering. The scholarships range from $15,000 up to full tuition, fees, textbook reimbursement, and a monthly tax-free allotment.

Army ROTC Scholarship Program. All Duke students are eligible to apply for Army ROTC scholarships. Generally awarded without regard to academic major (some are awarded for specific majors such as critical languages, math, science, or engineering), these grants pay either full tuition and fees or room and board up to $10,000 per year. Scholarship recipients also receive a book allowance of $300 in addition to a tax-free monthly stipend of between $300-$500 per month during the school year. Non-scholarship contracted cadets also receive the $300-$500 stipend. Following graduation, cadets are required to serve as Commissioned Officers in the Active Army, Army Reserve, or Army National Guard. The service component (Active Guard or Reserve) is determined by the cadet's scholarly, physical, and leadership achievements while at Duke; the cadet's service preferences; and the needs of the Army. High school seniors interested in competing for an Army ROTC scholarship must begin

62 / 1526
the FAFSA, or those having borrowed the full subsidized amount already, may borrow through the Unsubsidized Loan program. Interest on student is enrolled at least half-time in an accredited degree program for Direct Subsidized Loans. Students not demonstrating need, according to filing the Free Application for Federal Student Aid (FAFSA) may qualify for a Direct Subsidized Loan, and interest does not accrue while the juniors and seniors. Interest rates are set annually by the Department of Education and published on its website. Students who demonstrate need have their loan and/or work study replaced and will be required to demonstrate high academic achievement as well as leadership and/or involvement in extracurricular activities. The scholarship is available for four years.

J. Welch Harriss Scholarships. Recipients of these scholarships will receive up to demonstrated need levels based on merit criteria and will have their loan and/or work study replaced. These awards are made to entering first-year students who have achieved outstanding academic records. They are renewable each year as long as the student maintains the required average. Consideration will be given in the following order: (1) students from High Point, North Carolina; (2) students from Guilford County, North Carolina; and (3) students from North Carolina. (Recipients are chosen by the Office of Undergraduate Admissions at the time of application.)

The John M. and Sally V. Blalock Beard Scholarship. These scholarships are awarded annually to outstanding students from the Wake County area of North Carolina who intend to major in English or the history of the United States. These awards are based on financial need, scholarship, character, and academic achievement.

North Carolina Math Contest. Upon enrolling at Duke, the top student finishing in the top ten in the North Carolina Math Contest taken as a high school senior is eligible to receive a scholarship equal to the amount of tuition. This scholarship is available for each of the four years of undergraduate enrollment as long as the student maintains the specified average. Winners must have applied to and been accepted by Duke University.

The Perry Family Scholarship is awarded to students from Winston-Salem and the Forsyth County area. Recipients of the scholarship will have up to $5,000 of their loan and/or work study replaced and will be required to demonstrate high academic achievement as well as leadership and/or involvement in extracurricular activities. The scholarship is available for four years if the student meets the specified academic requirements.

Scholarships for Students in Extracurricular Activities

Financial Support

Loans

The loan programs that are available to students through Duke University are listed below.

The Federal Direct Loan is available to students who may borrow up to $5,500 as first-year students, $6,500 as sophomores, and $7,500 as juniors and seniors. Interest rates are set annually by the Department of Education and published on its website. Students who demonstrate need by filing the Free Application for Federal Student Aid (FAFSA) may qualify for a Direct Subsidized Loan, and interest does not accrue while the student is enrolled at least half-time in an accredited degree program for Direct Subsidized Loans. Students not demonstrating need, according to the FAFSA, or those having borrowed the full subsidized amount already, may borrow through the Unsubsidized Loan program. Interest on
unsubsidized loans accrues while the student is in school, and the student may choose to capitalize on the interest or pay it as it accrues. Repayment for both loans begins six months after the student is no longer enrolled at least half-time as a degree candidate at an accredited institution.

The Federal Direct Parent Loan for Undergraduate Students (PLUS) allows qualified parents to borrow up to the cost of education minus other financial aid. The proceeds from this loan may only be used to pay the current year’s costs of attendance. The interest rate is fixed and published annually by the Department of Education, and repayment of this loan begins within sixty days after the first disbursement for the academic year. Borrowers who have a student enrolled at least half-time may be eligible for deferment of payment. Federally mandated credit checks are required for all PLUS applicants.

Financial Support

Tuition Plans
Many families finance a college education with the assistance of an insured tuition payment plan regardless of whether they receive financial assistance from Duke. The university is pleased to offer a five-month interest-free payment plan each semester through Nelnet. An application fee will apply. More information can be obtained from the Bursar’s Office or by visiting duke.afford.com.

Financial Support

Employment
Most financial aid recipients are offered work study as part of their aid package. All students interested in working during the school year should review the jobs posted at duke.studentemployment.ngwebsolutions.com. All earnings are paid directly to the student for hours worked. Duke University also expects that students receiving financial aid will contribute to the cost of their education. First-year students should have a minimum contribution of $2,600 toward college expenses. In subsequent years, minimum student contributions will be $2,900 for rising sophomores, and $3,000 for rising juniors and seniors.

Duke University also offers subsidized employment opportunities to many students not qualifying for need-based financial aid (Duke Work Study). Interested students should submit the appropriate aid applications. Additional information about how work study works, types of work study, and how to apply can be found at financialaid.duke.edu/work-study.

African & African American Studies (AB)
Program Code: U-AFRI-AB
Degree Designation: Bachelor of Arts
Department: African & African American Studies Program
Website: aaas.duke.edu/undergraduate/major-minor

Program Summary
The Department of African & African American Studies offers undergraduate degrees that equip students with bodies of knowledge that emerge from studying the histories, cultures, and social realities of African and African American peoples, and others of African descent across the diaspora. Mastering this knowledge will also produce a broad-based interdisciplinary learning experience that contributes to an intellectual, personal, and social maturation process. Students may choose to focus on Africa or the Americas.

The program offers work leading to Graduation with Distinction. See the section on honors in this bulletin and contact the director of undergraduate studies if you are interested in pursuing this.

Go to Programs by Department to view all related programs.

African & African American Studies (AB) (U-AFRI-AB)

Academic Requirements

The major requires ten courses – two introductory courses (102 and 103) and eight 1 credit courses at the 200-level or above. Students may choose one of the following two options.

- The Americas Focus
  - African & African American Studies 102 (Introduction to African American Studies)
  - African & African American Studies 103 (Introduction to African Studies)
  - Three courses at the 200-level or above, focused on the Americas, in or cross-listed with African & African American Studies, and each of the following Areas of Knowledge represented across the three-course selection:
    - Arts, Literatures, and Performance (ALP)
    - Civilizations (CZ)
    - Social Sciences (SS)
  - Four additional courses at the 200-level or above, in or cross-listed with African & African American Studies
  - African & African American Studies 499S (Senior Seminar)
- Africa Focus
  - African & African American Studies 102 (Introduction to African American Studies)
African & African American Studies 103 (Introduction to African Studies)
Three courses at the 200-level or above, focused on Africa, in or cross-listed with African & African American Studies, and each of the following Areas of Knowledge represented across the three-course selection:
- Arts, Literatures, and Performance (ALP)
- Civilizations (CZ)
- Social Sciences (SS)
Four additional courses at the 200-level or above, in or cross-listed with African & African American Studies
African & African American Studies 499S (Senior Seminar)

Ancient Religion and Society, Interdepartmental (AB)
Program Code: U-IRLSO-AB
Degree Designation: Bachelor of Arts
Department: Classical Studies Department, Religious Studies Department
Website: religiousstudies.duke.edu/undergraduate/interdepartmental-major

Program Summary
This interdepartmental major (IDM) between Religious Studies and Classical Studies is for anyone interested in the many ways that religion shaped history, society, and thought in the ancient Mediterranean, particularly within the Greek and Roman traditions. In this cultural context, a rich variety of Greco-Roman religious cults and ritual practices intersected with Judaism, Christianity, and (eventually) Islam, as well as with myth, magic, and other expressions of humanity's relationship to notions of the divine. Just as students in Religious Studies often look to Classical Studies for social and cultural background, so too Classicists attend to the fundamental role played by religion in their understanding of the Greco-Roman world.

In this IDM, both disciplines work together to provide essential content, context, methodologies, and skills, and to yield the kind of insight into religious experiences and traditions that is beyond the reach of either discipline alone. The IDM differs significantly from a Religious Studies major in its emphasis on the socio-cultural and political and intellectual histories of Greece and Rome, the optional focus on an ancient language as a fundamental for the major, and the focus on Greek and Roman literature and material culture. The IDM differs significantly from a Classical Studies major in its emphasis on religious traditions and the themes and methodologies that characterize the contemporary study of religion.

Core parts of the research and coursework in a Religious Studies Department involve texts, buildings, and artifacts, particularly those in the Jewish and Christian traditions, that reside in an ancient historical, social, intellectual, and literary culture that is usually considered the focus of a Classical Studies Department. Likewise, the classical era (especially the Hellenistic and Imperial periods) contains huge amounts of texts and archeological remains, again mostly but not exclusively Jewish and Christian, that are downplayed or even ignored in preference to literary or non-religious narratives. In the 1st and 2nd centuries CE, for example, Classicists look to the likes of Tacitus, Pliny, Martial, Plutarch, Lucian, Galen, Dio, Aristides, Fronto, and the Greek novels, while scholars of religion focus on writings such as the Pauline letters, the gospels, Justin Martyr, Ignatius, Irenaeus, Clement, Philo, the novelistic Joseph and Aseneth and Acts, Apocalypses and other early Christian Apocrypha. Yet these all existed in the same time, and many in the same place! Recent developments in ancient Mediterranean studies are increasingly focusing on this problem, or rather opportunity, and this major is then a way for a student to travel down a leading-edge path through this interdisciplinary study of the ancient world.

Go to Programs by Department to view all related programs.

Academic Requirements

Required courses in the Religious Studies Department
- Seven Religious Studies courses in total, at least five of which must be numbered 200 or above.
- At least one course must be on a religious tradition outside the Mediterranean. The following courses satisfy this requirement: RELIGION 110, 120, 160, 165FS, 175, 176, 219S, 242, 321S, 322, 323, 323S, 325S, 373S, 374S, 375, 376, 380, 384S, 386S, 388S.

Required courses in the Classical Studies Department
- Seven Classical Studies courses in total, at least five of which must be numbered 200 or above.
  - Option 1 (historical emphasis): CLST 283 and 284.
  - Option 2 (language emphasis): One year of classical Greek or Latin at or above the 250-level. Note: The two options may not be combined (e.g., CLST 283 and LATIN 252 does not satisfy the requirement)
- At least 2 courses that focus on Classical Civilization as it relates to ethics, myth, religions, or socio-cultural components broadly foundational for the study of religion. (The following courses satisfy this requirement CLST 208, 264, 268S, 271, 312S, 354, 360.)

In either department
Art History (AB)

Program Code: U-ART-AB
Degree Designation: Bachelor of Arts
Department: Art & Art History Department
Website: aahvs.duke.edu/undergraduate/majors/art-history

Program Summary
Art history is the study of works of art in the context of the broader social, political, and intellectual cultures of which they are a part. Studying art history develops the ability to evaluate and organize information, visual as well as verbal; it also enhances the faculties of creative imagination, precise observation, clear expression, and critical judgment. Students of art history acquire a sophisticated understanding of the theory and practice of artistic production and reception.

Academic Requirements

The major in art history requires at least eleven courses, eight of which must be at the 200-level or above. The following courses are required: one (1) Foundations (100-level) course, one (1) Visual Arts (practice-based) course, and two (2) upper-level (400-699-level) seminars. Students pursuing Graduation with Distinction take the Honors Thesis Workshop (Art History 495S) as one of the upper-level seminars. The remaining eight courses must be in at least four of the following five geographical areas, and one course in each of the three chronological periods: Europe and the Mediterranean, Asia and the Pacific, the Americas, Middle East and Africa, Trans-cultural; Prehistoric-1200, 1200-1800, and 1800-present. Individual courses can fulfill both a Geographical and a Chronological requirement.

The requirements and prerequisites for the major can be satisfied by courses taken at other institutions or abroad, but no more than two courses taken away from Duke may count toward the major. Further courses are available for credit at North Carolina State University and The University of North Carolina at Chapel Hill.

Students planning to attend graduate school should consider taking two 500 to 699-level seminars: Art History 543S (Methodology of Art History), and a second seminar in the same field as a 200-level course already taken by the student. For example, Art History 255 (Art in Renaissance Italy), is a logical preparation for Art History 590S-4 (Topics in Italian Renaissance Art). Two years of a foreign language at the college level are strongly recommended.

Concentration in Architecture

Thirteen courses are required in four broad areas:
- Either Art History 491/493 or 492/494 on a subject approved by the concentration in architecture advisor, or a relevant 500-699-level seminar
- Seven additional courses in art history, including at least three of the following: Art History 225, 226, 258, 382, 285 or 286D, or topics courses that focus on space or architecture in visual and media studies or art history
- Two courses in the visual arts
- Three courses in mathematics, physics, and/or engineering courses that offer or require advanced math or physics skills (recommended courses include Mathematics 111L, 112L, and 212; Physics 141L or 142L; Civil and Environmental Engineering 311 or 411). Distribution requirements for the major must be fulfilled.

Concentration in Museum Theory and Practice

The concentration allows students insight into the nature and ideology of the museum as a cultural institution, while also providing hands-on experience, working closely with museum staff to gain essential career preparation.

Students must take at least one of the following, preferably in their Junior year—Museum Theory and Practice (Art History 220); The Museum Object: Art and Artifacts on Display (Art History 221S). Students must also take Museum Internship 1 (Art History 310); and one of the following: Museum Internship 2 (Art History 311); Curatorial Practicum (Art History 455S); History and Theory of Curatorial Practice (Art History 222S). Those students who do not take both Art History 220 and Art History 221S must select two of the following courses: Art History 311, Art History 455S, Art History 222S. Students must take seven courses in Art History, including one (1) Foundations (100-level) course and at least one practice-based Visual Arts
course. The two Wired! proseminars (Visual and Media Studies 580S and Visual and Media Studies 581S) and “The Lives of Things” (Visual and Media Studies 590) are recommended as offering opportunities to engage with digital technologies for museum installations and public outreach. Distribution requirements for the major must be fulfilled.

**Art History and Visual Arts (AB)**

*Program Code: U-AHVA-AB*

*Degree Designation: Bachelor of Arts*

*Department: Art & Art History Department*

*Website: aahvs.duke.edu/undergraduate/majors/art-history-visual-arts*

**Program Summary**

Art history is the study of works of art in the context of the broader social, political, and intellectual cultures of which they are a part. Studying art history develops the ability to evaluate and organize information, visual as well as verbal; it also enhances the faculties of creative imagination, precise observation, clear expression, and critical judgment. Students of art history acquire a sophisticated understanding of the theory and practice of artistic production and reception. A major or second major in art history provides basic training for those interested in teaching, museum and gallery work, art publishing, and advertising; the major also furnishes an appropriate background for graduate training in architecture. Art history's emphasis on careful observation, the ordering of diverse sorts of information, expository writing, and scholarly research makes it a good general preparation for any profession.

Studio art courses offer directed experiences in the practice of the visual arts, enhancing the understanding of art both within the history of culture and as an individual human achievement. Department offerings emphasize the analysis and articulation of visual concepts and processes as they relate to a broader education in the humanities and sciences.

Go to Programs by Department to view all related programs.

**Academic Requirements**

**Art History and Visual Arts (AB)**

*Academic Requirements*

A combined major in art history and visual arts requires at least fourteen courses. These include: Visual Arts 199 (Drawing) and Art History 104 (Exploring Art and Architecture); and twelve upper-level courses. The twelve upper-level courses are to be divided as follows:

- **Art History:** Six upper-level courses distributed across the fields of ancient, medieval, Renaissance/Baroque, modern, and non-Western (pre-Columbian, African, Asian). Students must take at least one course in four of these five areas. At least one of these courses must be a 500- to 699-level seminar.

- **Visual Arts:** Six 200-level courses including a minimum of one course in at least three of the following primary areas of instruction: arts of the moving image, graphic design, painting, photography, print making, and sculpture. Students are encouraged to enroll as seniors in an independent study and, during the spring of that year, in Visual Arts 390S (Special Topics in Visual Arts).

**Asian and Middle Eastern Studies (AB)**

*Program Code: U-AMES-AB*

*Degree Designation: Bachelor of Arts*

*Department: Asian & Middle Eastern Studies*

*Website: asianmideast.duke.edu/undergraduate/major-minors*

**Program Summary**

The Department of Asian & Middle Eastern Studies explores the cultures of the cities, nations, and regions of East Asia, the Indian Subcontinent, and the Middle East within the framework of the humanities. It provides students with an understanding of the languages, histories, cultural practices, and perspectives of these regions to prepare them for professional work or advanced graduate studies in the international arenas. The curriculum is designed to develop reflective, critical thinking and conceptually grounded understanding of the contemporary cultures of Asia and the Middle East within a global, geopolitical context. The coursework for the major provides an intellectual training that includes the study of languages and of cultural practices as well as of critical frameworks for the analysis of cultural perspectives. The concentration of the major is determined by the language of study: Arabic, Chinese, Hebrew, Hindi, Japanese, Korean, Persian, or Turkish. Majors will be advised by AMES regular-ranked faculty.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**
Academic Requirements

To major in Asian and Middle Eastern studies, students should take at least ten courses (no fewer than ten credits) in the department, distributed as follows:

- For advanced linguistic skills, students should take at least two language courses at the 300 level in one AMES language or one course at the 400 level or above. Students may take up to six language classes altogether, not necessarily in one language. Students whose competence in a language exceeds the most advanced language course offered by the department may substitute language courses with literature/culture courses at the 100 level or above. 100-level language courses do not count toward the major.
- For a critical engagement with the cultural traditions of Asia and the Middle East, students are required to take four to nine AMES literature/culture courses at the 100 level or above, but no more than two courses at the 100 level.
  - Students are required to take an AMES Gateway Course.
  - Students should identify one main AMES regional or thematic pathway and complete at least three courses in the chosen pathway. Regional pathways include: (i) The Middle East; (ii) East Asia; (iii) The Indian Subcontinent. Thematic pathways include: (i) Race, Religion, Class, Gender; (ii) Empire, Nation, Migration; and (iii) Literature, Culture, Media.
- For reflection on their academic trajectory and their accomplishments in studying the languages and cultures of Asia and the Middle East, students turn in a senior portfolio at the conclusion of their final semester. The portfolio includes research papers, papers in AMES languages, creative works, and publications when applicable.

Study Abroad. Study abroad should be an integral part of the student's experience will be study abroad; while not a requirement of the major, it is strongly encouraged. Students should discuss this option as early as possible with their major advisor. Students who study abroad may transfer up to five language credits and up to two literature and culture credits, but no more than five credits altogether, toward their major in Asian & Middle Eastern Studies.

Biology (AB)

Program Code: U-BIO-AB
Degree Designation: Bachelor of Arts
Department: Biology Department
Website: biology.duke.edu/undergraduate/majors-minor/major-requirements

Program Summary

The biology major and minor and biology courses in a variety of areas are offered by the Department of Biology. Additional courses in the biological sciences are offered by the departments of evolutionary anthropology, chemistry, and psychology in Trinity College of Arts & Sciences; by the basic sciences departments in the School of Medicine; and by the Pratt School of Engineering and the Nicholas School of the Environment.

The bachelor of arts and the bachelor of science degrees are offered with a major in biology or in an individually designed interdepartmental concentration approved by the director of undergraduate studies in biology. Information may be obtained in the office of the director of undergraduate studies.

This degree program is a general liberal arts major program. Students contemplating a career in biological or biomedical sciences should elect the program leading to the BS degree.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction

Biology majors who achieve excellence in both their studies and a research-based thesis may apply for Graduation with Distinction in biology. Students may apply if they have a grade point average of 3.0 or above in biology courses, not including independent study, at the time of application. The award of distinction requires the maintenance of this grade point average and completion of an original research project, usually carried out as an independent study in biology or as an interdisciplinary study that includes biology. The application for distinction must be endorsed by the student's research supervisor. Distinction will be awarded by a three-member faculty committee based on an oral poster presentation and the written thesis. See the director of undergraduate studies for more details.

Areas of Concentration
Academic Requirements

A minimum of thirteen courses is required for this major.

Prerequisites. Chemistry 101DL or equivalent

Corequisites. Mathematics 105L and 106L, or equivalent, or Statistical Science 101 or above (102 recommended) or Biology 304

Major Requirements. One or two gateway courses: Either one in molecular biology (Biology 201L) and one in genetics and evolution (Biology 202L), or for students with a 5 on the AP exam or equivalent, one course in molecular biology, genetics, and evolution (Biology 203L). These courses are prerequisites to many of the advanced courses in these subject areas. In addition to the Biology 201L and 202L, a minimum of eight full courses in at least eight-course registrations in the biological sciences, not including the above corequisites or courses specified not for science majors; or, in addition to the Biology 203L a minimum of nine full courses in at least nine-course registrations in the biological sciences, not including the above corequisites or courses specified not for science majors; two of these eight (or nine) courses must include related laboratory experience at the 200 level or above; one laboratory independent study course may be counted toward the laboratory requirement. The eight (or nine) courses must include one course in structure and function (chosen from a list of approved courses), one course in organismal diversity (chosen from a list of approved courses), and one course in ecology (chosen from a list of approved courses). The remaining courses may be elected from among courses numbered 200 or above in biology, or from approved courses in the basic science departments of the School of Medicine; or from approved courses of a basic biological character in related departments. Six of these eight (or nine) courses must be in biology. A maximum of two independent study or tutorial courses may be counted toward the eight (or nine) course minimum. At least one of these eight (or nine) courses must be an advanced course at the 400 level or above in biology. This requirement may not be satisfied by a first semester of an independent study but may be satisfied by a second-semester continuation of an independent study. The elective courses acceptable for a biology major with an area of concentration (see below) are defined by the requirements for that concentration.

Biology (BS)

Program Code: U-BIO-BS
Degree Designation: Bachelor of Science
Department: Biology Department
Website: biology.duke.edu/undergraduate/majors-minor/major-requirements

Program Summary

The biology major and minor and biology courses in a variety of areas are offered by the Department of Biology. Additional courses in the biological sciences are offered by the departments of evolutionary anthropology, chemistry, and psychology in Trinity College of Arts & Sciences; by the basic sciences departments in the School of Medicine; and by the Pratt School of Engineering and the Nicholas School of the Environment.

The bachelor of arts and the bachelor of science degrees are offered with a major in biology or in an individually designed interdisciplinary concentration approved by the director of undergraduate studies in biology. Information may be obtained in the office of the director of undergraduate studies.

This is the program in biology for students contemplating a career in biological or biomedical sciences.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction

Biology majors who achieve excellence in both their studies and a research-based thesis may apply for Graduation with Distinction in biology. Students may apply if they have a grade point average of 3.0 or above in biology courses, not including independent study, at the time of application. The award of distinction requires the maintenance of this grade point average and completion of an original research project, usually carried out as an independent study in biology or as an interdisciplinary study that includes biology. The application for distinction must be endorsed by the student's research supervisor. Distinction will be awarded by a three-member faculty committee based on an oral poster presentation and the written thesis. See the director of undergraduate studies for more details.

Areas of Concentration

Students may elect to complete requirements in specified areas of concentration. Currently, available areas of concentration in the biology major are anatomy, physiology, and biomechanics; animal behavior; biochemistry; cell and molecular biology; ecology; evolutionary biology; genetics; genomics; marine biology; neurobiology; pharmacology; and plant biology. For information on areas of concentration see the director of undergraduate studies.
Duke University

Biology (BS) (U-BIO-BS)

Academic Requirements

A minimum of fifteen courses is required for this major.

Prerequisites. Chemistry 101DL or equivalent.

Corequisites. Chemistry 201DL; Mathematics 21 or 111L, either Calculus II (122, 112L, or 122L) or Statistical Science 101 or above (or 102 recommended) or Biology 304. Physics 141L or 151L. Additional corequisites may be required for professional schools or particular areas of concentration (see below).

Major Requirements. One or two gateway courses: Either one in molecular biology (Biology 201L) and one in genetics and evolution (Biology 202L), or for students with a 5 on the AP exam or equivalent, one course in molecular biology, genetics, and evolution (Biology 203L). These courses are prerequisites to many of the advanced courses in these subject areas. In addition to the Biology 201L and 202L, a minimum of eight full courses in at least eight-course registrations in the biological sciences, not including the above corequisites or courses specified not for science majors; or, in addition to the Biology 203L a minimum of nine full courses in at least nine-course registrations in the biological sciences, not including the above corequisites or courses specified not for science majors; two of these eight (or nine) courses must include related laboratory experience at the 200 level or above; one laboratory independent study course may be counted toward the laboratory requirement. The eight (or nine) courses must include one course in structure and function (chosen from a list of approved courses), one course in organismal diversity (chosen from a list of approved courses), and one course in ecology (chosen from a list of approved courses). The remaining courses may be elected from among courses numbered 200 or above in biology, or from approved courses in the basic science departments of the School of Medicine; or from approved courses of a basic biological character in related departments. Six of these eight (or nine) courses must be in biology. A maximum of two independent study or tutorial courses may be counted toward the eight (or nine) course minimum. At least one of these eight (or nine) courses must be an advanced course at the 400 level in biology. This requirement may not be satisfied by a first semester of an independent study but may be satisfied by a second-semester continuation of an independent study. The elective courses acceptable for a biology major with an area of concentration (see below) are defined by the requirements for that concentration.

Biomedical Engineering (BSE)

Program Code: U-BME-BSE

Degree Designation: Bachelor of Science in Engineering

Department: Pratt School of Engineering, Biomedical Engineering Department

Website: bme.duke.edu/undergrad

Program Summary

The biomedical engineering program is accredited by the Engineering Accreditation Commission of ABET. Our Program Educational Objectives are the following. We expect that after graduation, graduates of our program will be on track to become leaders in corporate, professional, and academic communities. In particular, they will:

- advance in their careers in biomedical engineering or related areas of industry, academia, and medicine;
- engage in lifelong learning, for example, by enrolling in graduate or professional degree programs or receiving advanced training for professional advancement;
- utilize their engineering experience in creating new knowledge or enabling technologies for improvement of human health and health care; and
- understand the social and ethical implications of their work.

Biomedical engineering is the discipline in which the physical, mathematical, and engineering sciences and associated technology are applied to biology and medicine. The program is flexible to match the student's interests; options exist for double majors. Each student selects one of four areas of interest in which to obtain depth in their education. The areas of interest are matched to the laboratories and expertise of the faculty in the department; these include, biomechanics and biomaterials, electrophysiology, imaging and measurement systems; and molecular, cellular, and tissue engineering. Design experience is integrated throughout the curriculum and includes capstone design courses. Many students gain valuable design experience in the course of independent study projects within the research laboratories of the biomedical engineering department.

The biomechanics laboratories use advanced experimental test facilities, data acquisition technologies, computer simulations and theoretical modeling in the study of cells, tissues, and biological structures. The mechanisms of injury, aging, degeneration, and mechanical signal transduction are studied in a variety of biological systems, including biological fluids, the cervical and lumbar spines, diarthrodial joints, and the heart.

Electrophysiology laboratories use large-scale computer modeling, scientific visualization, and experimental data acquisition and analysis to increase basic understanding of normal and abnormal electrical activity in the brain, peripheral nerves, and heart tissue. Other projects involve the study of the effects of externally applied electric fields and radio frequency energy on activity in excitable tissue.

The ultrasound imaging laboratories develop medical imaging methods that leverage the inherent acoustic and mechanical contrast of tissues to
improve image quality and provide novel diagnostic information to clinicians. The laboratories are equipped with a variety of state-of-the-art clinical and research-dedicated ultrasound imaging systems, electronics, and acoustic output characterization tools, as well as acoustic and transducer modeling software. The biophotonics group develops novel photonics technologies for biological and medical applications. Research areas include optical imaging techniques, advanced spectroscopy methods, plasmonics applications, and new microscopy modalities. Applications span from cell and developmental biology to clinical diagnostics and imaging methods.

Molecular, cellular and tissue engineering is concerned with the regulation of the external and internal environment of the cell for control of biosynthesis and degradation activities, as well as determination of the factors responsible for differentiation of cells into tissues with varying functional requirements. The groups in this program investigate biomaterials, material property characterizations, surface modifications, cell cultures, and the mechanics of biofluids, tissues, and cells. Applications include the development of novel biosensors and drug delivery systems, new techniques for enhanced biological transport, and improved techniques for stimulated repair or inhibited degradation of biological tissues.

Instruction in all these areas is offered at the undergraduate as well as graduate and postdoctoral levels, and opportunities for undergraduate student research are available in most of the biomedical engineering laboratories. The courses offered by the Department of Biomedical Engineering are listed below. Some biomedical engineering courses require students to have a suitable laptop computer with wireless capabilities. Course Designators:

- (AC) Satisfies an Area Core Class
- (DR) Satisfies the Design requirement
- (GE) Satisfies a Biomedical Engineering General Elective
- (BB) Satisfies a Biomechanics and Biomaterials Advanced Elective
- (EL) Satisfies an Electrobiology Advanced Elective
- (IM) Satisfies an Imaging and Measurement Systems Advanced Elective
- (MC) Satisfies a Molecular, Cellular and Tissue Engineering Advanced Elective

Academic Requirements

The major requirements are included in the minimum total of 34.0 course credits listed under general requirements. The following specific courses or their approved alternatives must be included: Electrical and Computer Engineering 110L; Engineering 201L; Biomedical Engineering 244L, 260L, 271, 354L; Biomedical Engineering 221L or Mechanical Engineering 221L; two Area of Interest core classes (Biomedical Engineering 301L, 302L, 303, 307); two Advanced Electives from one selected Area of Interest; another Advanced Elective and one General Elective in biomedical engineering; and one biomedical engineering design course (Biomedical Engineering 427L, 432L, 436L, 460L, 462L, 464L, 490L). The BME Undergraduate Program Handbook (available on the departmental website at bme.duke.edu/undergrad/curriculum) provides updated information and examples of course sequences that incorporate all general requirements and departmental requirements comprising the accredited biomedical engineering major.

To encourage depth in a specific area of biomedical engineering, students select two Areas of Interest in the junior year. There are four areas of interest: (1) biomechanics and biomaterials (BB), (2) electrophysiology (EL), (3) imaging and measurement systems (IM), and (4) molecular, cellular, and tissue engineering (MC). Students must take one core class in each of their two selected areas followed by two Advanced Electives in one of the selected areas. All biomedical engineering elective courses have a general elective (GE) designation. Most 500-level course are designated as Advanced Electives, also, and may have one or more area of interest designations (BB, EL, IM, MC). Students are encouraged to consult with their advisors when selecting areas of interest and electives.

Students intending to study abroad should plan to travel in the fall semester of their junior year. These students should consult with both their advisor and the Global Education Office about course planning. Premed students need to take Chemistry 201L and 202L, Biology 203L or 201L and 201L, and Biochemistry 301 by the end of the junior year. These students should consult with both their advisor and the Office of Health Professions Advising about course planning. More information about study abroad and premed planning, as well as options for dual majors in electrical and computer engineering, civil engineering, and mechanical engineering, can be found in the BME Undergraduate Program Handbook (available at bme.duke.edu/undergrad/curriculum).

Biophysics (AB)

Program Code: U-BPHY-AB
Degree Designation: Bachelor of Arts
Department: Physics Department
Website: physics.duke.edu/undergraduate/biophysics-major
Program Summary

Biophysics is the study of quantitative biological questions using insights, concepts, theory, and experimental techniques from physics, as well as knowledge from biology, chemistry, mathematics, and computer science. The major is a good choice for students who like biology and who enjoy thinking quantitatively. The major prepares students for graduate school in biophysics, diverse areas of biology like cell biology, neuroscience, physiology, and health professions like medicine, veterinary school, and dentistry. (But if a student anticipates applying to graduate school in physics, he or she should consider the Physics major as an alternative.). This major is administered in close cooperation with the departments of biology and chemistry.

A BS in biophysics is also available. Go to Programs by Department to view all related programs.

Academic Requirements

Prerequisites. Chemistry 101DL (or equivalent); Mathematics 122 (or equivalent), 212 and 216.

Major Requirements. Biology 201L and either Biology 202L or 220 or Biology 203L and 220; Physics 161, 164L, 162, 165L (or equivalent); Physics 364L or equivalent; Physics 264L (or Chemistry 310 and either 310L or 311L), Physics 363 (or Chemistry 311); one of Physics: 361, 362, 464, or a director-approved 300-level or above course not including independent studies; Physics 414 and 415; one 200-level or higher director-approved elective course relevant to the biophysics major.

Biophysics (BS)

Program Code: U-BPHY-BS
Degree Designation: Bachelor of Science
Department: Physics Department
Website: physics.duke.edu/undergraduate/biophysics-major

(But if a student anticipates applying to graduate school in physics, they should consider the Physics major as an alternative.). This major is administered in close cooperation with the departments of biology and chemistry.

An AB in biophysics is also available. Go to Programs by Department to view all related programs.

Academic Requirements

Prerequisites. Chemistry 101DL (or equivalent); Mathematics 122 (or equivalent), 212 (or 222), 221 (or 218), and 356.

Major Requirements. Biology 201L and either Biology 202L or 220 or Biology 203L and 220; Physics 161, 164L, 162, 165L (or equivalent); Physics 264L and 464 (satisfies A) (or Chemistry 310 and either 310L or 311L), Physics 363 (or Chemistry 311); Physics 364L or equivalent; one of Physics 361, 362, 464(A), or a director-approved 300-level or above course not including independent studies; Physics 414 and 415; three 200-level or higher director-approved elective courses relevant to the biophysics major.

Brazilian and Global Portuguese Studies (AB)

Program Code: U-BPST-AB
Degree Designation: Bachelor of Arts
Department: Romance Studies Department
Website: romancesstudies.duke.edu/brazilian-global-portuguese-major

Program Summary

Students majoring in Brazilian and Global Portuguese studies will acquire competency in spoken and written Portuguese, as well as familiarity with the literature and culture of Brazil and Portuguese-speaking regions.

A minor in this program is also available. Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction
Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further information may be obtained from the director of undergraduate studies or the assistant to the director.

Study Abroad

Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- **Duke-Administered Summer Programs**
  - Duke-in-Brazil. **Major:** Two courses may be counted.

- **Non-Duke-Administered Semester Programs**
  - **Major:** A maximum of two courses per semester may be counted toward the core-course requirement.

- **Non-Duke-Administered Summer Programs**
  - **Major:** One course may be counted toward the core-course requirement.

---

**Chemistry (AB)**

Program Code: U-CHEM-AB
Degree Designation: Bachelor of Arts
Department: Chemistry Department
Website: chem.duke.edu/undergraduate/ab

**Program Summary**

The study of chemistry provides a fascinating and intellectually stimulating foray into the molecular underpinnings of the world around us, and through independent study, an opportunity to participate first hand in cutting edge research that spans a wide range of disciplines in the molecular sciences.

The Chemistry AB major allows greater flexibility than the BS in scheduling and course selection. Students with interests in a second major or in advanced work in a professional school (e.g. medical, dental, veterinary, business, or law) following graduation should consider this program. Students with an interest in employment in the chemical or a related industry, or in advanced study in chemistry or a related science (e.g. Biochemistry or Pharmacology) may also consider this program, although they are encouraged to augment their program with additional upper-level chemistry courses.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**

The department offers a program for Graduation with Distinction in chemistry. Selection for the honor by the Chemistry Department Undergraduate Awards Committee is based on fulfilling the following requirements: at least a B average in chemistry courses at the time of application and at graduation, satisfactory completion of at least two courses of research independent study in chemistry (or in an approved chemistry-related area), enrollment and participation in Chemistry 295 (Introduction to Research Independent Study) and Chemistry 496 (Graduation with Distinction in Chemistry), submission of a high quality research thesis based upon the results of independent study, nomination for the honor by the research advisor, presentation of a poster on the research project, and an oral defense of the research thesis.

**Academic Requirements**

**Academic Requirements**

Prerequisites. Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L; Physics 141L-142L or 151L-152L, or 161L-162L.
Major Requirements. Chemistry 201DL, 202L, 210DL or 20 or 21, 301 and 301L, or 310 and 310L and 311, 401, 401L plus one of the following three course options:

Three of the following: Chemistry 302, 410, any 500 or 600 level courses; Biochemistry 301, 302.

One of the following: Chemistry 302 or 311, any 500 or 600 level courses; Biochemistry 301 plus Chemistry 393 and 394 or the equivalent in an approved chemistry-related discipline.

One of the following:

- Physics emphasis. Chemistry 302 or 311; plus two of the following: Physics 264L, 361, 362.
- Mathematics emphasis. Chemistry 302 or 311; plus either of the following pairs of courses: Mathematics 221 and Mathematics 356, or Mathematics 216 and Mathematics 353.

In certain cases, substitutions may be made for courses outside the chemistry department with consent of the director of undergraduate studies.

The Concentration in Biochemistry

In cooperation with the Department of Biochemistry in the School of Medicine, the chemistry department offers both an AB and a BS degree in chemistry with concentration in biochemistry. Certification of this concentration is designated on the official transcript. Prerequisites. Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L; Physics 141L-142L or 151L-152L, or 161L-162L; Biology 201L.

Major Requirements. Chemistry 201DL, 202L, 210DL or 20 or 21, 301 and 301L, or 310 and 310L and 311, 401, 401L; Biochemistry 301, 302; plus one of the following: (Chemistry 393, Biology 293, or Biochemistry 593).

The Concentration in Chemical Biology

The chemistry department offers both an AB and a BS degree in chemistry with a concentration in chemical biology. Certification of the concentration is designated on the official transcript. Prerequisites. Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L; Physics 141L-142L or 151L-152L, or 161L-162L; Biology 201L.

Major Requirements. Chemistry 201DL, 202L, 210DL or 20 or 21, 301 and 301L, or 310 and 310L and 311, 401, 401L; Biochemistry 301; Chemistry 517 and 518 plus two semesters of independent study involving some aspect of chemical biology (Chemistry 393, 394 or the equivalent in an approved chemistry-related discipline).

The Concentration in Environmental Chemistry

In conjunction with the Nicholas School of the Environment, the chemistry department is pleased to offer both an AB and a BS degree in chemistry with concentration in environmental chemistry. Official recognition of the completion of the requirements given below will appear on the permanent transcript of a major. Prerequisites. Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L; Physics 141L-142L or 151L-152L, or 161L-162L; Biology 201L.

Major Requirements. Chemistry 201DL, 202L, 210DL or 20 or 21, 301 and 301L, or 310 and 310L and 311, 401, 401L; Biochemistry 301; Environment 360; plus two of the following: Environment 239, 540, 542L, Civil Engineering 365, 667; plus one semester of independent study involving some aspect of environmental chemistry (Chemistry 393 or Environment 393 or Civil Engineering 391).

The Concentration in Pharmacology

In conjunction with the Department of Pharmacology in the School of Medicine, the chemistry department offers both an AB and a BS degree in chemistry with a concentration in pharmacology. Certification of the concentration is designated on the official transcript. Prerequisites. Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L; Physics 141L-142L or 151L-152L, or 161L-162L; Biology 201L.

Major Requirements. Chemistry 201DL, 202L, 210DL or 20 or 21, 301 and 301L, or 310 and 310L and 311, 401, 401L; Biochemistry 301; Pharmacology 350 and 360; plus two semesters of independent study involving some aspect of pharmacology (Chemistry 393, 394 or Pharmacology 493, 494).

Chemistry (BS)

Program Code: U-CHEM-BS
Degree Designation: Bachelor of Science
Department: Chemistry Department
Website: chem.duke.edu/undergraduate/bs

Program Summary
The study of chemistry provides a fascinating and intellectually stimulating foray into the molecular underpinnings of the world around us, and through independent study, an opportunity to participate first hand in cutting edge research that spans a wide range of disciplines in the molecular sciences.
The BS degree program is recommended for students planning to undertake graduate study in Chemistry or a related science (e.g., Biochemistry or Pharmacology) or for those contemplating employment in the chemical industry following graduation.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**

The department offers a program for Graduation with Distinction in chemistry. Selection for the honor by the Chemistry Department Undergraduate Awards Committee is based on fulfilling the following requirements: at least a B average in chemistry courses at the time of application and at graduation, satisfactory completion of at least two courses of research independent study in chemistry (or in an approved chemistry-related area), enrollment and participation in Chemistry 295 (Introduction to Research Independent Study) and Chemistry 496 (Graduation with Distinction in Chemistry), submission of a high-quality research thesis based upon the results of independent study, nomination for the honor by the research advisor, presentation of a poster on the research project, and an oral defense of the research thesis.

**Academic Requirements**

**Prerequisites.** Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L, 212; Physics 141L-142L or 151L-152L, or 161L-162L.

**Major Requirements.** Chemistry 201DL, 202L, 210DL or 20 or 21, 310, 310L, 311, 311L, 393 (or its equivalent in an approved chemistry-related discipline), 401, 401L, 410, 420L; plus two additional courses selected from the following: Biochemistry 301; Chemistry 302, 394 (or its equivalent in an approved chemistry-related discipline), and any chemistry courses at the 500 or 600 level.

**The Concentration in Biochemistry**

In cooperation with the Department of Biochemistry in the School of Medicine, the chemistry department offers both an AB and a BS degree in chemistry with concentration in biochemistry. Certification of this concentration is designated on the official transcript.

**Prerequisites.** Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L; Physics 141L-142L or 151L-152L, or 161L-162L; Biology 201L.

**Major Requirements.** Chemistry 201DL, 202L, 210DL or 20 or 21, 301 and 301L and 302, or 310 and 310L and 311, 401, 401L, 410; Biochemistry 301, 302; Biology 220; plus one of the following: Chemistry 393, Biology 293, or Biochemistry 593.

**The Concentration in Chemical Biology**

The chemistry department offers both an AB and a BS degree in chemistry with a concentration in chemical biology. Certification of the concentration is designated on the official transcript.

**Prerequisites.** Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L; Physics 141L-142L or 151L-152L, or 161L-162L; Biology 201L.

**Major Requirements.** Chemistry 201DL, 202L, 210DL or 20 or 21, 301 and 301L and 302, or 310 and 310L and 311, 401, 401L, 410; Biochemistry 301; Chemistry 517 and 518 plus two semesters of independent study involving some aspect of chemical biology (Chemistry 393, 394 or the equivalent in an approved chemistry-related discipline).

**The Concentration in Environmental Chemistry**

In conjunction with the Nicholas School of the Environment, the chemistry department is pleased to offer both an AB and a BS degree in chemistry with concentration in environmental chemistry. Official recognition of the completion of the requirements given below will appear on the permanent transcript of a major.

**Prerequisites.** Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L; Physics 141L-142L or 151L-152L, or 161L-162L; Biology 201L.

**Major Requirements.** Chemistry 201DL, 202L, 210DL or 20 or 21, 301 and 301L and 302, or 310 and 310L and 311, 401, 401L, 410; Environment 360; plus two of the following: Environment 239, 540, 542L, Civil Engineering 565, 667; plus one semester of independent study involving some aspect of environmental chemistry (Chemistry 393 or Environment 393 or Civil Engineering 391).

**The Concentration in Pharmacology**

In conjunction with the Department of Pharmacology in the School of Medicine, the chemistry department offers both an AB and a BS degree in chemistry with a concentration in pharmacology. Certification of the concentration is designated on the official transcript.

**Prerequisites.** Chemistry 101DL or 110DL or 21; Mathematics 111L-112L, or 122L; Physics 141L-142L or 151L-152L, or 161L-162L; Biology 201L.

**Major Requirements.** Chemistry 201DL, 202L, 210DL or 20 or 21, 301 and 301L and 302, or 310 and 310L and 311, 401, 401L, 410; Biochemistry 301; Pharmacology 350 and 360; plus two semesters of independent study involving some aspect of pharmacology (Chemistry 393, 394 or Pharmacology 493, 494).

**Civil Engineering (BSE)**
The infrastructure that makes up what we refer to as civilization is, for the most part, the work of civil and environmental engineers. Improving, or even maintaining, the quality of life is ever more challenging as urban problems in the industrialized nations of the world intensify, while rapid urbanization in many developing countries creates other opportunities and obligations for the civil and environmental engineer. The planning, design, construction, and maintenance of necessary facilities, in an era of increasingly scarce monetary and other resources, demand civil and environmental engineers dedicated to work for the public good and prepared to seek more efficient and effective solutions based on current technology. The challenges faced by civil and environmental engineers vary widely in nature, size, and scope, and encompass both the public and private sectors. Examples include high-rise buildings and long-span bridges; concert halls and museums; hazardous waste disposal facilities; orbital structures; water supply and treatment facilities; tunnels; dams; seaports, airports, and offshore structures.

The mission of the undergraduate program in the Department of Civil and Environmental Engineering at Duke University is to provide an education that prepares graduates to solve technical problems, to pursue lifelong learning in their field, to assume leadership roles in their chosen careers, and to recognize their professional and personal obligations to the broader society and culture. The program is designed to provide a holistic educational experience where engineering sciences and design are combined with humanities and social sciences to provide the foundation for the critical thinking and skills that allow graduates to enjoy the benefits of a liberal education.

The alumni of the civil engineering (CE) program are expected to exhibit the following behaviors:

- conceive, communicate, and contribute to effective and sustainable solutions to professional, multi-disciplinary challenges (in, for example, engineering design, project management, consulting, finance, and academia) by utilizing fundamental principles of mathematics, science, and engineering, and employing engineering methods and judgment as needed;
- seek and engage in professional development, including advanced degrees and professional licensure, to enhance their capabilities and personal fulfillment;
- be leaders in their professional and personal communities while responding ethically and boldly when confronted with modern societal and environmental challenges.

The civil engineering program is built upon the expertise and experience of the faculty of the Civil and Environmental Engineering department and is supported by commensurate laboratory and instructional facilities. The civil and environmental engineering professors are committed to providing quality classroom instruction, advising, and laboratory experiences in settings that encourage student-faculty interactions as well as student-student interactions. The faculty conducts research of national and international consequence, and undergraduates have ample opportunities to be involved in such research, through undertaking independent study projects and/or by working as research assistants. The research facilities in the department, including laboratory equipment and instrumentation as well as computer resources, are comparable to those found in other major universities.

Graduates of the civil engineering program are able to select from a wide range of career paths. Recent graduates have pursued advanced study in engineering, business, law, and architecture, while others have accepted positions with major corporations and federal, state, and local government agencies as design engineers and project managers.

The civil engineering (CE) degree program is accredited by the Engineering Accreditation Commission of ABET.

Go to Programs by Department to view all related programs.

**Civil Engineering (BSE) (U-CE-BSE)**

**Academic Requirements**

**Academic Requirements**

The major requirements for civil engineering (CE) are included in the minimum of 34.0 course credits listed under general requirements and departmental requirements.

Meeting the departmental requirements together with the four engineering and applied science courses from the general requirements requires that the following courses must be included. All majors must take Engineering 101L, 201L, 244L and 305; Civil and Environmental Engineering 132L, 201L, 301L, 302L, and Statistical Science 130. All majors must complete at least one concentration: structural engineering and mechanics (S/M) or environmental engineering and water resources (E/W). Majors choosing the structural engineering and mechanics concentration (S/M) must take Civil and Environmental Engineering 421L, 422L, 423L and 429. Majors choosing the environmental engineering and water resources concentration (E/W) must take Civil and Environmental Engineering 461L, 462L, 463L and 469. To complete the engineering and applied sciences general requirement, all majors must take one of the following (electrical science, information and computer science, materials science, thermal science, and transfer processes) courses: Biomedical Engineering 253L, 307, Civil and Environmental Engineering 560, 581, Computer Science 201, Electrical and Computer Engineering 110L, 311, Engineering 224L, Mechanical Engineering and Material Science 221L, 331L, or Physics 271L (students completing the structural engineering and mechanics concentration may take Civil and Environmental Engineering 461L, 463L, or 462L...
students completing the environmental engineering and water resources concentration may take Civil and Environmental Engineering 421L, 422L, or 423L. All majors must take two civil and environmental engineering electives at the 300-level, or higher. All majors have a total of two unrestricted electives.

Toward fulfilling the general requirements, the following elective options must be selected from the following courses. The natural science requirement is satisfied by completing Biology 201L, 215/215L, 275A, 311, Earth and Climate/Ocean Sciences 101, 102, 201L, 202, or 370A. At least one of the five courses used to satisfy the humanities and social sciences requirement, or an approved alternate course, must possess an ethical inquiry (EI) code.

A sample semester-by-semester sequencing of the requirements for the major is available online at cee.duke.edu/undergrad/degrees/cengineering-planning. Students planning to attend graduate school are strongly advised to use the unrestricted electives to take at least one additional civil and environmental engineering elective, with at least one of them at the 500-level, or higher.

### Classical Civilization (AB)

**Program Code:** U-CLST-AB  
**Degree Designation:** Bachelor of Arts  
**Department:** Classical Studies Department  
**Website:** classicalstudies.duke.edu/undergraduate/majors/classical-civilization

**Program Summary**  
Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**  
Graduation with Distinction is available to majors. Eligible students must have a 3.5 grade point average in the major (3.3 overall) at the beginning of their project and must maintain these through completion. In the context of a research independent study (Classical Studies/Greek/Latin 493) the candidate writes a major research paper. A committee of three faculty members votes whether to award Distinction, High Distinction, or Highest Distinction for the work. Majors interested in applying shall consult the director of undergraduate studies by the spring of their junior year.

**Academic Requirements**

**Academic Requirements**  
Two required introductory courses: Option 1: Classical Studies 181S or 283 and 182S or 284; Option 2: two courses in Greek or Latin below the 250 level. Note: The two options may not be combined (e.g., Classical Studies 181S and Latin 102 do not satisfy the requirement). Seven classical studies courses at or above the 200 level; literature in the original language, at or above the 250 level. Courses must be in at least three of the following areas: literature in translation at or above the 200 level, or in the original language at or above the 250 level; history; art and archaeology; philosophy. Classical Studies 480S (Capstone Seminar). Latin 251 and 252 will both count toward the classical studies major.

Total: Ten courses and the Senior Dossier. For double majors in classical languages and classical civilization, no more than two courses may be counted toward both majors.

### Classical Languages (AB)

**Program Code:** U-CLLA-AB  
**Degree Designation:** Bachelor of Arts  
**Department:** Classical Studies Department  
**Website:** classicalstudies.duke.edu/undergraduate/majors/classical-languages

**Program Summary**  
Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.
The requirements of the major convey the disciplinary coherence of the field, yet are flexible enough to allow students to develop their own interests as they progress through their course of study. Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction

Graduation with Distinction is available to majors. Eligible students must have a 3.5 grade point average in the major (3.3 overall) at the beginning of their project and must maintain this through completion. In the context of a research independent study (Classical Studies/Greek/Latin 493) the candidate writes a major research paper. A committee of three faculty members votes whether to award Distinction, High Distinction, or Highest Distinction for the work. Majors interested in applying shall consult the director of undergraduate studies by the spring of their junior year.

Academic Requirements

Knowledge of both Greek and Latin through the second year (i.e., through Greek 252 or the equivalent). Eight courses in Greek and/or Latin, at least six of which must be at the 250 level or above; one 200-level or above course in Classical Studies; Classical Studies 480S (Capstone Seminar). Latin 251 and 252 will both count toward the classical studies major.

Total: Ten courses and the Senior Dossier. For double majors in classical languages and classical civilization, no more than two courses may be counted toward both majors.

Computational Media, Interdepartmental (AB)

Program Code: U-IVMCS-AB
Degree Designation: Bachelor of Arts
Department: Art & Art History Department, Computer Science Department
Website: cmac.duke.edu/undergraduate

Program Summary

The Departments of Art, Art History & Visual Studies and Computer Science sponsor an interdepartmental major and minor in Computational Media. The interdepartmental major is designed for students who want to combine deep theoretical and critical engagement with art, computation, and culture with substantive engagement with core computer science concepts and principles, undertaken alongside hands-on experience with computational media practice. Students interested in areas such as digital humanities, digital media and algorithmic arts, computer interface and experience design, game studies, digital storytelling and data journalism, information aesthetics, computational media ethics, global media studies and related topics will find the program of interest. The major also encourages participation in collaborative, interdisciplinary projects through the required Technical Project Experience, which may be fulfilled through coursework or participation in a variety of related programs such as Data+, Story+, Bass Connections, Code+, CS+ or another approved project experience.

Go to Programs by Department to view all related programs.

Academic Requirements

The major includes 14 courses, 7 from Computer Science and 7 from Visual and Media Studies. On the Computer Science side, students must take 4 core courses from Computer Science 201, 230 or 330, 250, and a course on computer systems or 370 (Artificial Intelligence) or 371 (Machine Learning). In addition, 3 electives, which may consist of any COMPSCI course at the 200 level or above, with at most two Research Independent Studies. Two of those courses must be 300-level or above. Prerequisites include Compsci 101/102/116, Math 111, Math 112, or 100-level STA or higher. On the Visual and Media Studies side, requirements include VMS 202D: Introduction to Visual Culture; one Theories course, 327S: Theories of Visual Studies or LIT 328S: Media Theory, or an approved alternative; two AAHVS practice-based courses or approved alternatives at the 200-level or above; 3 additional 200+ VMS electives, including approved cross-lists; and one approved Technical Project Experience. All majors are also required to submit a Major Portfolio documenting their work.

Computer Science (AB)

Program Code: U-CPS-AB
Degree Designation: Bachelor of Arts
Department: Computer Science Department
Website: cs.duke.edu/undergrad/ba

Program Summary

Classical Languages (AB) (U-CLLA-AB)
The Department of Computer Science provides courses on the concepts of computing and computers, their capabilities, and uses. In most courses students make extensive use of the available computing facilities. Students who wish to take a single introductory course as part of their general education usually elect Computer Science 94, 101, 102 or 116.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**

A program for Graduation with Distinction in computer science is available. Candidates for a degree with Distinction, High Distinction, or Highest Distinction must apply to the director of undergraduate studies and meet the following criteria. Candidates for Graduation with Distinction must have a grade point average of 3.0 or higher in computer science courses numbered above 200. Candidates must complete a substantial project, representing at least one year’s work and including at least one independent study, under the guidance of a faculty member in computer science who oversees and endorses the project. The project should represent a significant intellectual endeavor including the writing of a report. A presentation of the project must be made to a committee of three faculty members, two of whom will normally be from computer science although for interdisciplinary projects this restriction can be relaxed. Graduation with High or Highest Distinction is awarded at the discretion of the faculty committee in consultation with the director of undergraduate studies. Graduation with High or Highest Distinction is typically awarded for projects that are of publishable quality. In addition, candidates for a degree with high or highest distinction should have a grade point average of 3.5 or higher in those computer science courses related to the area of research; these courses must include at least one course at the 500 level.

**Academic Requirements**

**Prerequisites.** Computer Science 101L, 102, or 116 or equivalent; Mathematics 111L or equivalent; Mathematics 112L or equivalent

**Major Requirements.** Computer Science 201, 230, 250, 330, and one systems course from 310, 316, 350, 351, 356, or their 500-level versions (510, 516, 550, 551, 514). Three electives at 200-level or higher: one in Computer Science (and not an independent study course); and two in either Computer Science (independent study possible), Electrical and Computer Engineering, Mathematics, Statistical Science, or a related area approved by the director of undergraduate studies.

**Computer Science (BS)**

Program Code: U-CPS-BS
Degree Designation: Bachelor of Science
Department: Computer Science Department
Website: cs.duke.edu/undergrad/bs

**Program Summary**

The Department of Computer Science provides courses on the concepts of computing and computers, their capabilities, and uses. In most courses students make extensive use of the available computing facilities. Students who wish to take a single introductory course as part of their general education usually elect Computer Science 94, 101, 102 or 116.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**

A program for Graduation with Distinction in computer science is available. Candidates for a degree with Distinction, High Distinction, or Highest Distinction must apply to the director of undergraduate studies and meet the following criteria. Candidates for Graduation with Distinction must have a grade point average of 3.0 or higher in computer science courses numbered above 200. Candidates must complete a substantial project, representing at least one year’s work and including at least one independent study, under the guidance of a faculty member in computer science who oversees and endorses the project. The project should represent a significant intellectual endeavor including the writing of a report. A presentation of the project must be made to a committee of three faculty members, two of whom will normally be from computer science although for interdisciplinary projects this restriction can be relaxed. Graduation with High or Highest Distinction is awarded at the discretion of the faculty committee in consultation with the director of undergraduate studies. Graduation with High or Highest Distinction is typically awarded for projects that are of publishable quality. In addition, candidates for a degree with high or highest distinction should have a grade point average of 3.5 or higher in those computer science courses related to the area of research; these courses must include at least one course at the 500 level.

**Academic Requirements**

**Prerequisites.** Computer Science 101L, 102, or 116 or equivalent; Mathematics 111L or equivalent; Mathematics 112L or equivalent
Major Requirements. Computer Science 201, 230, 250, 330, and one systems course from 310, 316, 350, 351, 356, or their 500-level versions (510, 516, 550, 551, 514). Two courses in Mathematics/Statistical Science: one of Mathematics 202, 216, 218, or 221; and one Statistical Science course at or above Statistical Science 111, including the cross-listed Mathematics 230. Five electives at 200-level or higher: three in Computer Science (and not independent study courses); and two in either Computer Science (independent study possible), Electrical and Computer Engineering, Mathematics, Statistical Science, or a related area approved by the director of undergraduate studies.

Cultural Anthropology (AB)
Program Code: U-CA-AB
Degree Designation: Bachelor of Arts
Department: Cultural Anthropology Department
Website: culturalanthropology.duke.edu/undergraduate/degree-options

Program Summary

Cultural anthropology is a comparative discipline that studies human social life across the world's diverse peoples and cultures. Cultural anthropology is the science of contemporary life: it emphasizes how power, identity, inequality, and social justice shape everyday life and global processes. It uniquely bridges the social sciences and the humanities with its holistic approach. Cultural anthropologists at Duke conduct research on a wide range of urgent issues, including racism, digital media, science and technology, ethnic identities, environment and climate change, health and medicine, music and performance, gender and sexuality, economic inequality, migration, sports, religion and myth, food politics, human rights, Indigenous sovereignty, and design. What unites these varied topics is a research method called ethnography. Ethnography is an empirical social research method focused on an engaged and community-based inquiry into everyday practices and how people make sense of them. It can involve participant observation, interviews, life histories, and action-oriented research, and is a widely applicable career skill. Ethnography reveals local solutions to global challenges.

The department offers a wide range of courses that introduce the discipline's core concepts and topics and that train students in ethnographic thinking, research, ethics, writing, and application. Courses in cultural anthropology often draw on in-depth case studies from different world areas to explore a specific topic. Faculty integrate their ethnographic fieldwork into courses, and the Department has special strengths in Africa and the African diaspora, Latin America, the Middle East, East Asia, South Asia, the United States, and Native North America.

Cultural Anthropology majors can take a broad approach to their studies and select courses that cover many topics, places, and communities. Should they choose, they can select courses that allow them to concentrate on a particular area of the world or a particular topic. They are encouraged to conduct original, independent ethnographic research, or to build a portfolio of course or project work that supports their professional aims.

Cultural Anthropology students have multiple career options owing to the program's flexible and rigorous training. Majors often pursue graduate studies in law, medicine, public policy, social work, and business. They work in journalism, tech, design, consulting, and international development and in government, corporate, and non-profit sectors with a global or multicultural focus. All of these opportunities value the skills of social analysis and the understanding of cultural diversity that cultural anthropology training emphasizes.

Students without prerequisites for a course may ask the instructor for admission.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction

The department offers an intensive and personalized Graduation with Distinction program to qualified seniors, who research and write a senior thesis on a topic of their own choice in close collaboration with members of the cultural anthropology faculty. Admission to the program requires a 3.0-grade point average overall and a 3.3 grade point average in the major, both of which must be maintained to graduation for the student to be eligible for distinction. Qualified juniors will be notified each year by the Director of Undergraduate Studies about their eligibility. To pursue distinction, students must then enroll in the senior seminar, Cultural Anthropology 498S and Cultural Anthropology 499S, in the fall and spring of their senior year, where they will learn about research methods and prepare a thesis. Credit for Cultural Anthropology 498S and Cultural Anthropology 499S is given for a passing grade whether or not the student is awarded a distinction. The thesis can be based on original fieldwork on a topic of the student's choice, archival or library research, media analysis, or some combination of various anthropological methods. The student also forms a supervisory committee for the thesis during the fall of the senior year. It should consist of three faculty members who offer the student advice and support in preparing the thesis. At least two of the members must be faculty from the cultural anthropology department. Due in April of the senior year, the thesis must be judged of at least B+ quality by the supervisory committee to receive the distinction. In addition, the student must pass an oral examination on the thesis, which is given on its completion by the supervisory committee, and present their findings to the public. Students who fulfill the above requirements graduate with distinction in cultural anthropology. A typical sequence would be: select a research topic and conduct research in the summer before senior year; take the senior seminar in fall and spring; form a supervisory committee; complete the research and writing by April and submit the final draft to the supervisory committee; schedule the oral defense for some time in early or mid-April; and defend the thesis in an oral examination given by the supervisory committee.

Cultural Anthropology (AB) (U-CA-AB)

Academic Requirements
Academic Requirements

Major Requirements. A total of ten courses distributed in the following manner: Cultural Anthropology 101, 301, and 302; six courses at the 100 level or above, including at least one at the 300 level or above; and one additional cultural anthropology course at any level. The one additional cultural anthropology course at any level may include courses from the FOCUS program and Duke Engage courses cross-listed with Cultural Anthropology, as well as approved study abroad courses.

CULANTH 101, Introduction to Cultural Anthropology, is required of all majors and minors, is taught in fall and spring terms, and should ideally be taken in the first or second year of study. Cultural Anthropology majors are strongly encouraged to complete CULANTH 101 and either CULANTH 301 or CULANTH 302 before a study-away semester.

Students must take at least five of their ten courses with instructors whose primary appointment is in the Department of Cultural Anthropology. The Senior Seminar sequence counts toward this requirement. 3 courses may be counted toward the Cultural Anthropology major from study abroad or transfer institutions. Students seeking Cultural Anthropology approval for a study-abroad class need to send the full syllabus to the DUS for approval. Independent studies done abroad will not be counted.

Suggested Work in Related Disciplines. Related courses in other departments are strongly advised. Each student’s advisor will recommend a program of related work to complement the student’s concentration and interests in cultural anthropology.

Dance (AB)
Program Code: U-DANCE-AB
Degree Designation: Bachelor of Arts
Department: Dance Department
Website: danceprogram.duke.edu/undergraduate/major

Program Summary
The Duke University Dance Program offers a major and minor in dance. The program focuses on dance as an integral part of the human experience and a medium for rigorous intellectual creativity. Our aim is to engage students in the profound potential for dance as embodied knowledge in the service of society. The Dance Program curriculum is designed to encourage the exploration of dance from interdisciplinary perspectives: historical, cultural, aesthetic, literary, technological, musical, scientific, and creative.

The Dance Program welcomes all students, regardless of the extent of their experience in dance. The curriculum provides opportunities to encounter dance traditions and movement experimentation as processes for discovery, communication, inquiry, and discourse. Students already deeply engaged in specific dance forms can explore and further enhance their physical, performance, and creative capacities. Students will experience dance as a mode for personal development and leadership and as a transformative force for social action. As the landscape of dance continues to evolve, Duke Dance Program students will gain the knowledge and skills to impact the nature and function of dance in contemporary society and reimagine the future of performance. They will move into action, agency, and sustainability with tools that can transform relationships locally and globally.

Students are encouraged to enroll in a summer session with the American Dance Festival. One course credit earned at the American Dance Festival may be counted toward the requirements of the major or minor.

Through the Duke in New York Arts Program, a student has the opportunity in the fall semester of the junior or senior year to pursue the study of the arts in New York City. Appropriate courses taken at New York University may fulfill a requirement of the major or minor.

A minor in dance is also available. Go to Programs by Department to view all related programs.

Academic Requirements

Four pathways highlight the research trajectories of the Dance Program. None of the pathways targets a specific physical style or cultural tradition; rather, these traditions interweave through all the pathways.

These pathways are:

1. Dancing Cultures
2. Being and Healing
3. Process, Practice, and Research
4. Social Issues and Social Action

Please refer to the Dance Program website (danceprogram.duke.edu) for the current descriptions and listing of courses under each of these pathways.

Major Requirements: To major in dance, a student must take a minimum of ten course credits:

- Dance 101 (Introduction to Dance) or Dance 165 (Let’s Dance!)
Duke University

- Three courses selected from a primary pathway
- One course from each of the secondary (three courses) pathways
- Dance 487S (Capstone Seminar: Research Methods and Writing in Dance Studies and Choreographic Performance)
- Dance 489T (Capstone: Senior Project) or Dance 499S (Capstone Seminar: Distinction Project)
- Equivalent of two course credits from partial or full-credit movement courses

Pathways
Courses listed below are suggested choices in the pathways.

**Dancing Cultures**
- Dance 165 (Let’s Dance! Live Art and Performance)
- Dance 235SL (Capoeira: Practice and Culture)
- Dance 255 (T’ai Chi and Chinese Thought)
- Dance 316S (Postmodernism in Dance, 1950-2000)
- Dance 318S (Movement in Question: Introduction to Critical Dance Studies)
- Dance 325S (The Black Parades)
- Dance 335SL (West African Rootholds in Dance)
- Dance 336 (Black Dance)
- Dance 337 (Black Dance: Jamaican Contexts)
- Dance 338 Ballet History: Black Presence
- Dance 356 (Dance and Dance Theater of Asia)
- Dance 561S (Art as Work: Valuing Labor in the Arts)
- Dance 590S (Topics in Dance/Embodiment)
- Dance 665S (Contemporary Dance History)
- Dance 690S (Special Topics in Dance)

**Being and Healing**
- Dance 284 (Ritual, Performance, and Religion)
- Dance 377S (Dance Science: An Evolutionary Approach)
- Dance 371SL (Artists in Healthcare: Collaborations and Complexities)
- Dance 390/390S (Special Topics)
- Dance 575S (Somatics: Embodiment for the Twenty-First Century)
- Dance 590 (Topics in Dance/Embodiment)
- Dance 690S (Special Topics in Dance)

**Process, Practice, and Research**
- Dance 105S (Dance Composition)
- Dance 205S (Advanced Dance Composition)
- Dance 211 (Musical Theater Workshop: Performance)
- Dance 301 (Arts Activism & Everyday Technology)
- Dance 302S (Writing about Performance)
- Dance 370S (The Choreographic Mind: Order, Disorder, Organization, Relations)
- Dance 375 (Music for Dancers)
- Dance 390/390S (Special Topics)
- Dance 403S (Pedagogies of Dance)
- Dance 412 (Performance: Modern)
- Dance 422 (Performance: Ballet)
- Dance 432 (Performance: African)
- Dance 442 (Performance: Jazz)
- Dance 443 (Performance: Tap)
- Dance 446 (Performance: Interdisciplinary)
- Dance 472 (Performance: Dance Theater)
- Dance 590S (Topics in Dance/Embodiment)
- Dance 690S (Special Topics in Dance)

**Social Issues and Social Action**
Duke University

- Dance 201S (Arts Entrepreneurship)
- Dance 208S Non-Profit Cultural Institutions
- Dance 309S (Dancing States of Mind: The Self, Social and Political Practice of Dance)
- Dance 325S (The Black Parades)
- Dance 379S (Legal Issues for the Performing Arts)
- Dance 390/390S (Special Topics)
- Dance 590 (Topics in Dance/Embodiment)
- Dance 690S (Special Topics in Dance)

Courses originating outside of the Dance Program not listed here may be considered as satisfying pathways requirements at the discretion of the director of undergraduate studies and the student's major advisor. No more than two courses originating outside of the Dance Program may count toward the pathways requirements.

Data Science: Math+CS, Interdepartmental (BS)

Program Code: U-IDASC-BS
Degree Designation: Bachelor of Science
Department: Computer Science Department, Mathematics Department
Website: cs.duke.edu/undergrad/idm/mathematics

Program Summary
The Departments of Mathematics and Computer Science have collaboratively mapped out a data science pathway for an IDM (interdepartmental major) between the two departments. This pathway makes it easier for you to identify courses relevant to a career in data science, and to plan and optimize your program of study accordingly.

This IDM is intended for students interested in data science and its mathematical foundations, but not necessarily all the lower-level computational aspects. An IDM in STA+CS on Data Science is also available.

Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements
An IDM must consist of a minimum of 14 courses, split evenly between the two departments (seven courses in each). Some of the courses listed below have prerequisites not listed here.

From Mathematics
- MATH 221 (Linear Algebra)
- MATH 340/STA 231 (Advanced Intro to Probability) or MATH/STA 230 (Probability)
- MATH 342/STA 250 (Statistics) OR MATH 343/STA 432
- Plus one of the following:
  - MATH 401 or 501 (Abstract Algebra)
  - MATH 431 or 531 (Basic Analysis)
- Plus two of the following:
  - MATH 403 (Advanced Linear Algebra)
  - MATH 465/CompSci 445 (High-dim Data Analysis)
  - MATH 412/CompSci 434 (Topology with Applications)
- Plus one of the following electives, (or others approved by the Director of Undergraduate Studies):
  - MATH 401, 501, 431, or 531, if not taken for the requirement above
  - MATH 371 (Combinatorics)
  - MATH 375 (Linear Programming and Game Theory)
  - MATH 387 (Logic)
  - MATH 421 (Differential Geometry)
  - MATH 304 or 404 (Cryptography)
  - MATH 502 (Abstract Algebra II)
  - MATH 561 (Numerical Linear Algebra)
  - MATH 532 (Basic Analysis II)

From Computer Science
Data Science: STA-CS, Interdepartmental (BS)

Program Code: U-IDATA-BS
Degree Designation: Bachelor of Science
Department: Computer Science Department, Statistical Science
Website: cs.duke.edu/undergrad/idm/statistics

Program Summary
The Departments of Statistical Science and Computer Science have collaboratively mapped out a data science pathway for an interdepartmental major (IDM) between the two departments. This pathway makes it easier for you to identify courses relevant to a career in data science, and to plan and optimize your program of study accordingly.

This IDM is intended for students interested in data science, particularly its underpinning statistical techniques, but not necessarily its lower-level computational aspects. An IDM in Math+CS on Data Science is also available.
Go to Programs by Department to view all related programs.

Academic Requirements

An IDM must consist of a minimum of 14 courses, split evenly between the two departments (seven courses in each). Some of the courses listed below have prerequisites not listed here.

From Statistics
- STA 199L - Intro to Data Science
- STA 210L - Regression
- STA 240L Probability for Statistics (recommended) OR STA 230 - Probability
- STA 360L - Bayesian Modeling
- STA 432 - Theory and Methods of Statistical Inference and Learning (STA 250 - Statistical Inference - counts if taken Spring 2020 or earlier)
- 2 electives from the following (or others with DUS approval):
  - STA 310 - Generalized Linear Models
  - STA 313L - Advanced Data Visualization
  - STA 323D - Statistical Computing
  - STA 325L - Machine Learning and Data Mining
  - STA 440L - Capstone
  - STA 444L - Spatio-Temporal Modeling
  - STA 450L - Social Network Analysis
Earth and Climate Sciences (AB)

Program Code: U-ECS-AB
Degree Designation: Bachelor of Arts
Department: Earth and Climate Sciences
Website: nicholas.duke.edu/academics/undergraduate-programs/earth-climate-sciences

Program Summary

The Earth and Climate Science major is for students interested in the science of how planet Earth works, and creating scientific solutions to earth and environmental challenges such as climate change, water use, sustainable development of mineral resources, clean energy production, as well as understanding Earth's long geological and biological evolution.

The Division of Earth and Climate Sciences offers introductory and advanced courses in climatology, coastal processes, geology, water sciences, hydrology, geomorphology, physical oceanography, petrology, geological history, and energy. The majors are administered by the Nicholas School of the Environment. Additional information about the division can be found on the divisional website.

A bachelor of arts degree is offered for students who wish to understand local and global earth and climate sciences in support of careers in government, environmental sciences, policy or economics, environmental law, and environmental health.

Go to Programs by Department to view all related programs.

Graduation with Distinction

The Division of Earth and Climate Sciences through Trinity College offers Graduation with Distinction through the successful completion of a student research project. A candidate for Graduation with a Distinction in Earth and Climate Sciences must have a grade point average of 3.2 in the major at the beginning of the project to qualify for nomination. The student will apply for consideration for Graduation with Distinction by the beginning of their senior academic year by submitting an application to the director of undergraduate studies describing the project. The student must identify a faculty advisor who has agreed to oversee the project. The student will normally do the work as part of research independent study courses (Earth and Climate Sciences 393, 394) completed during one academic year. The project will consist of an original piece of scientific research, which will be summarized by a written report in the style of a scientific publication. The student will also give a poster presentation to students and faculty of the division before the end of classes of the student's final semester. The decision on granting Graduation with Distinction will be made by a vote of the student's project committee, with a majority in favor needed for Graduation with Distinction.

Academic Requirements

Corequisites. Choose two from Math 111L, Math 112L, Chem 101, Chem 201 or 210, Physics 141, Physics 142, Biology 201 or Biology 202 or Biology 207, Statistics 101, Compsci 101 or EGR 103, or equivalent.

Gateway Course. ECS 101 or ECS 103
Earth and Climate Sciences (BS)

Program Code: U-ECS-BS
Degree Designation: Bachelor of Science
Department: Earth and Climate Sciences
Website: nicholas.duke.edu/academics/undergraduate-programs/earth-climate-sciences

Program Summary

The Earth and Climate Science major is for students interested in the science of how planet Earth works, and creating scientific solutions to earth and environmental challenges such as climate change, water use, sustainable development of mineral resources, clean energy production, as well understanding Earth's long geological and biological evolution.

The Division of Earth and Climate Sciences offers introductory and advanced courses in climatology, coastal processes, geology, water sciences, hydrology, geomorphology, physical oceanography, petrology, geological history, and energy. The majors are administered by the Nicholas School of the Environment. Additional information about the division can be found on the divisional website.

A bachelor of science degree is offered for students interested in pursuing further studies or professional work in earth and climate sciences and related fields, or for students who intend to apply their scientific and analytic training to other professional careers, such as business, consulting, law, or medicine.

Go to Programs by Department to view all related programs.

Graduation with Distinction

The Division of Earth and Climate Sciences through Trinity College offers Graduation with Distinction through the successful completion of a student research project. A candidate for Graduation with a Distinction in Earth and Climate Sciences must have a grade point average of 3.2 in the major at the beginning of the project to qualify for nomination. The student will apply for consideration for Graduation with Distinction by the beginning of their senior academic year by submitting an application to the director of undergraduate studies describing the project. The student must identify a faculty advisor who has agreed to oversee the project. The student will normally do the work as part of research independent study courses (Earth and Climate Sciences 393, 394) completed during one academic year. The project will consist of an original piece of scientific research, which will be summarized by a written report in the style of a scientific publication. The student will also give a poster presentation to students and faculty of the division before the end of classes of the student's final semester. The decision on granting Graduation with Distinction will be made by a vote of the student's project committee, with a majority in favor needed for Graduation with Distinction.

Academic Requirements

Corequisites. Math 111L, Chem 101, Physics 141; and a choice of two from Math 112L, Chem 201 or 210, Physics 142, Biology 201 or Biology 202 or Biology 207, Statistics 101, Computer Sciences 101 or Engineering 103, or equivalent.

Gateway Course. ECS 101 and ECS 103

Experiential Course. ECS 210 or ECS 212S

Field Courses. One course from ECS 226S, ECS 288A, ECS 289A, ECS 401, ECS 402S, ECS 403, or ECS 410, or approved substitution.

Electives. At least one course from each of the two subject areas (Earth Science Area and Climate Science Area), and an additional 5 courses from either area, the latter may include up to one course from the Field Course List (in addition to the one-course field course requirement). Up to 2 courses may be substituted from related areas of science, mathematics or engineering, with DUS approval.

- Earth Science Area
  - ECS 201 The Solid Earth
  - ECS 203 The Surface of the Earth
  - ECS 204 Evolving Earth and Life
  - ECS 220 Water Sciences
  - ECS 325 The Anthropocene
  - EOS 226 Field Methods in the Earth and Environmental Sciences
  - ECS 315 Waves, Beaches, and Coastlines
Economics (AB)

Program Code: U-ECON-AB
Degree Designation: Bachelor of Arts
Department: Economics Department
Website: econ.duke.edu/undergraduate/ba-economics

Program Summary

Economics courses develop the critical and analytical skills essential for understanding economics and institutions, in both their contemporary and historical settings. Although no particular vocational or professional goal is emphasized, these courses provide the academic background necessary for positions in industry or the non-profit sector, for work in many branches of government service, for law school, and for graduate study in business administration, economics, and the social sciences.

Students who contemplate graduate study in economics should strongly consider the BS instead of the AB degree. A minor is also available.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction

Awarding of Distinction. A student will be awarded distinction upon graduation if they have satisfied all of the following requirements:
- A minimum grade point average of 3.3 in the major and 3.3 overall;
- Completion of five electives commensurate with an undergraduate AB or BS degree; and
- The honors committee determines if the honors thesis qualifies for Graduation with Distinction.

Awarding of High Distinction. A student will be awarded High Distinction upon graduation if they have satisfied all of the requirements for Distinction and their honors thesis is selected by our honors committee from among nominated theses.

Awarding of Research Distinction. In recognition of the strong independent research dimension required of a successful honors thesis, a student will be awarded Research Distinction upon graduation if the honors committee determines their thesis qualifies for Graduation with Distinction regardless of whether or not the student meets the university and departmental GPA standards for Graduation with Distinction. These students will be recognized in the departmental graduation program.

Paths to the Honors Thesis.

An honors thesis is a research paper completed during the senior year of the economics major. It represents a degree of research and critical thinking sufficiently complex and sophisticated as to require two to three semesters’ worth of work. The thesis is planned, researched, drafted, and revised over the course of two to three semesters, using research tools and techniques commensurate with an undergraduate BS degree.

To be considered for Graduation with Distinction in economics, students must pursue one of two paths outlined below.

Path 1: Honors Workshop Courses: The best setting in which to foster the research process is a two-semester workshop, resembling graduate workshops. In a workshop setting, students meet with their professor(s) and each other to observe advanced research (professors from outside the university, Duke economics graduate students, and Duke economics professors present their own research to the students), and then, in turn, develop and later present their own research on a regular biweekly basis, continually receiving feedback from their peers and from professors and graduate students.

The department offers a two-semester research workshop sequences for students interested in writing an honors thesis: Economics 495S (Honors Seminar I) and Economics 496S (Honors Seminar II). Students do not necessarily have to qualify for Graduation with Distinction in order to enroll in these research workshop sequences, nor will completion of either sequence guarantee Graduation with Distinction. The honors committee will determine if the honors thesis qualifies for Graduation with Distinction. Note: Should a problem arise that prevents a student from completing this sequence, they can switch to Path 2 described below.

Students who follow Path 1 may begin as early as the spring semester of their junior year. Davies Fellowships are available to sponsor some of these juniors (and their mentors) to enable them to do research full-time under the supervision of their advisor during the summer between their junior and senior years.
Path 2: Independent Study Courses: Students choosing this path enroll in Economics 394 (Research Independent Study) in either the spring of their junior year or the fall of their senior year, under the instruction of the mentoring faculty member. In the following semester (or in a subsequent semester), the student enrolls in an Economics 493 (Honors Research Independent Study) and completes the thesis. For the independent study courses (Economics 394 and Economics 493), students must enlist the approval of a specific faculty member (through submission of an approval form to the director of undergraduate studies) indicating that the faculty member is willing to work with the student for an entire academic year in an independent study format to produce an honors thesis. The honors committee will determine if the honors thesis qualifies for Graduation with Distinction. Students who start on Path 2 may switch to Path 1 by enrolling in Economics 496S (Honors Seminar II) with the signature of their faculty mentor and the approval of the 496S instructor (which is gained by submission of a satisfactory thesis proposal).

Academic Requirements

Prerequisites. Mathematics 21, 105L and 106L; or 111L, or any higher-level mathematics course with Mathematics 111 as a prerequisite. Economics 104D. Economics 104D is a prerequisite for Economics 204D and many other 300/400-level economics courses and therefore should be taken by the fall of sophomore year. Prerequisites for the major, as well as requirements, may not be taken Satisfactory/Unsatisfactory, with the exception of Economics 101D.

Requirements. Four core courses: Economics 101D, Economics 201D, Economics 204D, and Economics 210D. For students entering Fall 2022 or later, these classes must be completed before senior year, but students are encouraged to complete them no later than sophomore year. For students entering prior to Fall 2022, only Economics 204D must be taken prior to senior year (but students are still encouraged to complete all core requirements as early as possible.) Five electives chosen from Economics (ECON) or Financial Economics (FECON) courses at the 300 level or above with at least one courses at the 300 level and at least one course at the 400 level. For students entering in Fall 2022 or later, at least one of the electives must carry the course attribute "Applied Economics": Economics 335, 345, 352, 371, 442, 443, 444, 445, 451, 493, 496S and select special topics with the number Economics 390, 490 and others with the approval of the director of undergraduate studies. Transfer students entering prior to Fall 2022, Economics 205D can substitute for either of the 300-level electives. Courses 500-549 can only be counted toward the major with the approval of the director of undergraduate studies.

Substitution of similar courses in other departments at Duke for courses in the Department of Economics used toward major requirements is not permitted. A maximum of two transfer and/or study abroad credits may be counted toward major requirements. (The only exception applies to study abroad credit from the full year program at the London School of Economics, from which a maximum of four transfer and/or study abroad credits may be counted toward major requirements.) Transfer credits are not permitted for Economics 101D, 104D, 201D, 204D, 205D or 210D. Transfer students must earn at least half their credits toward the major requirements at Duke.

Economics (BS)

Program Code: U-ECON-BS
Degree Designation: Bachelor of Science
Department: Economics Department
Website: econ.duke.edu/undergraduate/bs-economics

Program Summary
Economics courses develop the critical and analytical skills essential for understanding economics and institutions, in both their contemporary and historical settings. Although no particular vocational or professional goal is emphasized, these courses provide the academic background necessary for positions in industry or the non-profit sector, for work in many branches of government service, for law school, and for graduate study in business administration, economics, and the social sciences.

Students who contemplate graduate study in economics are urged to develop skills in intermediate calculus (Mathematics 212), linear algebra (Mathematics 221), differential equations (Mathematics 356), and advanced calculus (Mathematics 431).

The undergraduate degree in economics signifies achievement of proficiency in quantitative skills and experience in applying these to economics. The Department of Economics maintains online resources to guide economics majors and minors at econ.duke.edu/undergraduate.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction

Awarding of Distinction. A student will be awarded distinction upon graduation if they have satisfied all of the following requirements:

- A minimum grade point average of 3.3 in the major and 3.3 overall;
- Completion of five electives commensurate with an undergraduate AB or BS degree; and
- The honors committee determines if the honors thesis qualifies for Graduation with Distinction.

Awarding of High Distinction. A student will be awarded High Distinction upon graduation if they have satisfied all of the requirements for Distinction and their honors thesis is selected by our honors committee from among nominated theses.
**Academic Requirements**

**Prerequisites.** Mathematics 122 or 122L and 202; or 212, or 222 or any higher-level mathematics course with Mathematics 212 as a prerequisite. Economics 104D. Economics 104D is a prerequisite for Economics 204D and many 300/400-level economics courses and therefore should be taken by the fall of sophomore year. Prerequisites for the major, as well as requirements, may not be taken Satisfactory/Unsatisfactory, with the exception of Economics 101.

**Requirements.** Five core courses: Economics 101D. Economics 201D. Economics 204D, Economics 210D, and Economics 205D or 301D. (Economics 205D will no longer be offered beginning Fall 2025 when it will be replaced by Econ 301D). For students entering Fall 2022 or later, these classes must be completed before senior year, but students are encouraged to complete them no later than sophomore year. For students entering prior to Fall 2022, only Economics 204D must be taken prior to senior year (but students are still encouraged to complete all core requirements as early as possible.) Five electives chosen from any Economics (ECON) or Financial Economics (FECON) courses at the 300 level or above with at least one course at the 300 level and one course at the 400 level. Courses 500-549 can only be counted toward the major with the approval of the director of undergraduate studies.

Substitution of similar courses in other departments at Duke for courses in the Department of Economics used toward major requirements is not permitted. A maximum of two transfer and/or study abroad credits may be counted toward major requirements. (The only exception applies to study abroad credit from the full year program at the London School of Economics, from which a maximum of four transfer and/or study abroad credits may be counted toward major requirements.) Transfer credits are not permitted for 101D, 104D, 201D, 204D, 205D, or 210D. Transfer students must earn at least half the credits toward their major requirements at Duke.

**For the BS Degree with Concentration in Financial Economics**

The economics department also offers a BS degree with a concentration in financial economics. Certification of this concentration is designated on the official transcript. Students who wish to pursue this designation must complete the requirements for the BS degree with the addition of the following requirements.
Requirements. Financial Economics 372 (FECON 372) (Asset Pricing and Risk Management). Two additional electives chosen from among the following: Financial Economics (FECON) at the 300 level or above; Financial Markets (FMKT) courses at the 200-level or above; Fintech 520, 533, 534, 536, 550, 552, 564 and Energy 620. Financial Economics (FECON) courses at the 300 level or above simultaneously satisfy both the general BS and the Concentration in Finance elective requirements.

Electrical and Computer Engineering (BSE)

Program Code: U-ECE-BSE
Degree designation: Bachelor of Science in Engineering
Department: Pratt School of Engineering, Electrical & Computer Engineering Department
Website: ece.duke.edu/undergrad/degrees/planning

Program Summary
The educational mission of the Department of Electrical and Computer Engineering is to graduate electrical and computer engineers who embody excellence in a broad sense. We expect our graduates to advance within industry positions or in graduate study, or to carry the attributes of an engineering education into other disciplines. The electrical and computer engineering program of study must include mathematics and basic sciences, fundamentals, and applications in several engineering sciences, and team-based experience in the process of design, where theory is applied in the context of real needs and limitations, and where judgment must be exercised. Our electrical and computer engineering graduates should be able to think critically when solving problems and managing tasks and communicate effectively in multidisciplinary professional environments. To be a responsible member of the engineering profession, each graduate must be aware of social, ethical, environmental, and economic factors and constraints on engineering activity, and must understand the importance of these matters in a global context. We aspire to have our graduates exhibit intellectual depth and creativity, uphold high ethical standards, and show a commitment to the betterment of society through service and professional work.

To this end, the specific program educational objectives that we look for in our graduates are that they

- advance professionally in their chosen field;
- contribute to their professional community and society; and
- engage in lifelong learning in professional and personal endeavors.

The electrical and computer engineering (ECE) program is fully accredited by the Engineering Commission of ABET and leads to a bachelor of science in engineering (BSE) degree. The ECE curriculum provides a solid foundation in mathematics, physical and life sciences, computer science, and humanities and social sciences that complements a set of twelve theme-based ECE courses.

The Department of Electrical and Computer Engineering has designed its curriculum based on the theme of integrated sensing and information processing (ISIP). The ISIP theme capitalizes on the collective research expertise of the ECE faculty and provides a coherent, overarching framework that links principles of ECE to each other and real-world engineering problems. The cornerstone of the ECE curriculum is the first course fundamentals of electrical and computer engineering, which has been designed to provide students with a holistic view of ECE by introducing concepts spanning how to interface sensors and systems with the physical world, how to transfer/transmit energy/information, and how to extract, manipulate, analyze, and interpret information. The integrated design challenge in this first course introduces students to team problem solving and motivates in-depth study of ECE concepts in subsequent terms. Each of the four follow-on core courses focuses on a specific subfield of ECE (digital systems, microelectronics, sensing and waves, signals, and systems), and integrates lateral and vertical connections to other courses through the use of thematic examples. Following the core courses are seven ECE technical electives that include a culminating engineering design course where teams of students address a significant real-world problem or opportunity.

The ECE curriculum emphasizes creative problem-solving through open-ended design challenges in many courses. Working in teams, students collaborate to utilize and develop their individual and collective technical, management, and leadership skills to design, simulate, build, and test components and systems to meet a set of specifications, often defined by industry standards.

Students have the option to pursue two or more areas of concentration, depending on personal interests. The upper-level technical electives, which extend the breadth and depth of the ECE core curriculum, provide a firm foundation for future technical accomplishment and for effective problem-solving in the diverse fields that our graduates pursue.

The flexibility of the ECE curriculum enables students and their faculty advisors to tailor a unique educational experience for every student. This may include a semester abroad; a second major, minor, or certificate program; and/or a research experience with a faculty member. The most popular second majors are computer science and biomedical engineering. Other popular second majors include mathematics, economics, and physics. Interests such as pre-medicine, pre-law, art, music, psychology, and social sciences can be accommodated through individually designed programs. Students are encouraged to take more than the minimum required courses in the sciences and the liberal arts, as is fitting at an engineering school in a university with a strong liberal arts tradition.

A minor in ECE is also available. Go to Programs by Department to view all related programs.
Academic Requirements

The requirements for the electrical and computer engineering major are included in the minimum total of 34.0-course credits listed under the general requirements and departmental requirements. The following specific courses or their approved alternatives must be taken: Electrical and Computer Engineering 110L; Electrical and Computer Engineering 230L, 250D, 270DL, 280L; Computer Science 201; Engineering 101L; four approved electrical and computer engineering concentration electives, in two different areas with at least two courses in one of the elected areas; one elective electrical and computer engineering courses at the 300-level or higher; one ECE Extension Elective at the 300-level or higher; and one electrical and computer engineering design course. Currently, Electrical and Computer Engineering 449, 458, 459, 489, 559, 532, and 539 are approved as electrical and computer engineering design electives. A statistical science course is also required (Statistical Science 130, Statistical Science 240L, Mathematics 230, Mathematics 340, Engineering 238L, Electrical and Computer Engineering 380, or Electrical and Computer Engineering 555).

To encourage depth and breadth in electrical and computer engineering, students must select a minimum of four upper-level courses in at least two areas of concentration, with no less than two courses in one of the elected areas. There are five areas of concentration: (1) computer engineering and digital systems, (2) signal processing, communications, and control systems, (3) solid-state devices and integrated circuits, (4) electromagnetic fields, and (5) photonics. Students are encouraged to consult with their advisors when selecting areas of concentration and electives.

A sample, semester-by-semester sequencing of the requirements for the major is available online at ece.duke.edu/undergrad/degrees/planning.

English (AB)

Program Code: U-ENGL-AB
Degree Designation: Bachelor of Arts
Department: English Department
Website: english.duke.edu/undergraduate/major

Program Summary

The English major is designed to convey to students a broad knowledge of English, American, and Anglophone literature, a sophisticated habit of critically engaging literary and cultural texts, a shared understanding of major problems, trends, and methods of literary and cultural analysis, and the ability to pose questions and organize knowledge in productive and original ways. While offering students clear direction on how to profit most from their study within the English department, the major also seeks to encourage students to assume an enduring habit of questioning and intellectual self-articulation. Each of the four areas of requirement for completion of the major thus invites students, in consultation with their advisor, to devise a coherent, challenging, and intellectually distinctive plan of study.

Go to Programs by Department to view all related programs.

Foreign Languages

The department recommends that students majoring in English complete at least two years of college-level study, or the equivalent, of a foreign language. Students contemplating graduate work in English should note that many master's programs require examination in one foreign language and that doctoral programs commonly require examination in two. Students interested in linguistics are strongly urged to study at least one non-Indo-European language.

Teacher Certification

Each year a number of Duke English majors earn certificates as secondary school teachers. While licensed by the state of North Carolina, these majors are essentially certified for other states, as well. Also, such training is urged for those who consider teaching in independent schools, since most private or parochial schools would prefer candidates who have earned teaching certificates.

Such certification may be gained as part of the English major and is not as time-consuming as is sometimes believed. Candidates should have a solid background in both American and British literature; also helpful are courses in composition and cultural studies. Among the requirements are one course in linguistics (English 396S, 204, 206, or 395), an appropriate course in psychology, and several courses in education.

The last semester of the senior year is devoted to the student teaching block, including two special, accelerated courses and ten weeks of full-time teaching and observation in the schools, working with a mentor teacher and with Duke faculty. This experience leads to an English teaching certificate to accompany the bachelor's degree.

Anyone considering secondary school English teaching should confer with the director of secondary school teacher preparation in the Program in Education as soon as possible.

Departmental Graduation with Distinction

The English department offers its majors two options to earn distinction: the Critical Thesis option or the Creative Writing Thesis option.

Structure. Either two independent studies or a “home seminar” and one independent study. (This may be fall/spring or spring/fall.) Under most circumstances, a completed length of thirty-five to seventy pages.

Coursework. The distinction courses count toward the major. Students must complete eleven total courses to graduate with distinction in the
major instead of the standard ten.

**Application.** To apply students must have completed, by the beginning of the senior year, at least five 200-level or above English courses and must have a GPA of at least 3.5 in English courses.

Students submit an application that includes a writing sample of about ten pages from an English course, one letter of recommendation from an English faculty member, and a project description and basic bibliography (one page single-spaced). Applications must be submitted to the director of undergraduate studies. Applications are due November 15 for a spring-to-fall option and March 15 for a fall-to-spring option.

**Evaluation Procedure.** Upon approval by the instructor, the completed thesis is submitted to the director of undergraduate studies by December 1 (for a spring-to-fall project) or March 31 (for a fall-to-spring project) of the senior year for evaluation by the director of undergraduate studies, the thesis advisor, and one other faculty member. Please deliver three spiral-bound copies to Allen 303AA.

**Levels of Distinction.** Three levels: Distinction, High Distinction, or Highest Distinction. Levels of distinction are based on the quality of the completed work. Students who have done satisfactory work in the seminar or independent study but whose thesis is denied distinction will simply receive graded credit for their seminars and/or independent studies. Whereas the standard major in English asks for a total of ten courses, students pursuing honors in English will take nine courses plus either two independent studies or a “home seminar” to be followed by an independent study.

**Academic Requirements**

**Academic Requirements**

Ten courses, nine of which must be at the 200 level or above. Required courses include one gateway course; four area study courses; one criticism, theory, or methodology course; and four electives, as follows:

**Gateway Course.** Students must select one section of English 101S (The Art of Reading), and complete it ideally in their sophomore year and no later than the end of the junior year.

Each student must take at least nine additional courses at the 200 level or above. Five of these courses must satisfy the following requirements:

**Diversified Study.** Students must select at least two courses in the medieval and early modern area (Area I), at least one in the eighteenth and nineteenth centuries area (Area II), and at least one course in the modern to contemporary area (Area III), as outlined below. Courses must be chosen from more than one national literature. Courses that appear in more than one area of study may only count for one designated area as determined by instructor.

- Area I (Medieval and Early Modern); two courses required
- Area II (Eighteenth and Nineteenth Centuries); one course required
- Area III (Modern to Contemporary); one course required

**Criticism, Theory, Methodology (CTM).** Students must select one course on criticism, theory, or methodology. Some courses to satisfy CTM are English 204, 395, 396, 480S, 482S, 490S-10—in addition, other English courses designated as CTM will be posted on the English website each semester.

**Recommendations**

1. Students should take at least one course focused on minority literatures or Anglophone literatures from beyond the United States and Great Britain. The department offer courses in African, Asian, Caribbean, diasporic, and ethnic literatures (e.g., African American, Asian American) that will broaden students’ perspectives on English as a global language.

2. Students planning to enter graduate study in an English department should take additional courses from the early as well as later and modern periods. If eligible, they should also apply for the Distinction Program. Aspiring graduate students should consult their advisor.

**Environmental Engineering (BSE)**

Program Code: U-ENVE-BSE
Degree Designation: Bachelor of Science in Engineering
Department: Pratt School of Engineering, Civil & Environmental Engineering Department
Website: cee.duke.edu/undergrad/degrees/enve-planning

**Program Summary**

The environmental engineering degree program, launched in Fall 2013, is highly interdisciplinary and brings together topics as diverse as chemistry, the life sciences, economics, fluid mechanics, and public health engineering. The degree responds to the needs of students looking for such an interdisciplinary engineering degree that prepares them to work as environmental engineers, graduate work in environmental engineering, or for advanced study in environmental law, medicine, public health, or global sanitation.
The infrastructure that makes up what we refer to as civilization is, for the most part, the work of civil and environmental engineers. Improving, or even maintaining, the quality of life is ever more challenging as urban problems in the industrialized nations of the world intensify, while rapid urbanization in many developing countries creates other opportunities and obligations for the civil and environmental engineer. The planning, design, construction, and maintenance of necessary facilities, in an era of increasingly scarce monetary and other resources, demand civil and environmental engineers dedicated to work for the public good and prepared to seek more efficient and effective solutions based on current technology. The challenges faced by civil and environmental engineers vary widely in nature, size, and scope, and encompass both the public and private sectors. Examples include high-rise buildings and long-span bridges; concert halls and museums; hazardous waste disposal facilities; orbital structures; water supply and treatment facilities; tunnels; dams; seaports, airports, and offshore structures.

The mission of the undergraduate program in the Department of Civil and Environmental Engineering at Duke University is to provide an education that prepares graduates to solve technical problems, to pursue lifelong learning in their field, to assume leadership roles in their chosen careers, and to recognize their professional and personal obligations to the broader society and culture. The program is designed to provide a holistic educational experience where engineering sciences and design are combined with humanities and social sciences to provide the foundation for the critical thinking and skills that allow graduates to enjoy the benefits of a liberal education.

The alumni of the environmental engineering (EnvE) programs are expected to exhibit the following behaviors:

- conceive, communicate, and contribute to effective and sustainable solutions to professional, multi-disciplinary challenges (in, for example, engineering design, project management, consulting, finance, and academia) by utilizing fundamental principles of mathematics, science, and engineering, and employing engineering methods and judgment as needed;
- seek and engage in professional development, including advanced degrees and professional licensure, to enhance their capabilities and personal fulfillment;
- be leaders in their professional and personal communities while responding ethically and boldly when confronted with modern societal and environmental challenges.

The environmental engineering program is built upon the expertise and experience of the faculty of the Civil and Environmental Engineering department and is supported by commensurate laboratory and instructional facilities. The civil and environmental engineering professors are committed to providing quality classroom instruction, advising, and laboratory experiences in settings that encourage student-faculty as well as student-student interactions. The faculty conducts research of national and international consequence, and undergraduates have ample opportunities to be involved in such research, through undertaking independent study projects and/or by working as research assistants. The research facilities in the department, including laboratory equipment and instrumentation as well as computer resources, are comparable to those found in other major universities.

Graduates of the environmental engineering program are able to select from a wide range of career paths. Recent graduates have pursued advanced study in environmental engineering, while others have accepted positions with major corporations and federal, state, and local government agencies as design engineers and project managers.

The environmental engineering (EnvE) degree program is accredited by the Engineering Accreditation Commission of ABET.

Go to Programs by Department to view all related programs.

Environmental Engineering (BSE) [U-ENVE-BSE]

**Academic Requirements**

**Academic Requirements**

The major requirements for environmental engineering (EnvE) are included in the minimum of 34.0 course credits listed under general requirements and departmental requirements.

Meeting the departmental requirements together with the four engineering and applied science courses from the general requirements requires that the following courses must be included. All majors must take Engineering 101L, 201L, and 244L; Civil and Environmental Engineering 132L, 301L, 461L, 462L, 463L, 469, 560; and Statistical Science 130. All majors must take Engineering 305 or Civil and Environmental Engineering 201L. All majors must take an approved earth science course. All majors must take an approved thermodynamics course. All majors must take two approved upper-level environmental courses. All majors have two unrestricted electives. Approved earth science electives are Earth and Climate/Ocean Sciences 101, 102, 201L, 202, 315, 323, and Civil and Environmental Engineering 666. Approved thermodynamics courses are Mechanical Engineering 331L. Approved upper-level environmental electives are Chemistry 201DL, 202L; Biomedical Engineering 307; Civil and Environmental Engineering 315-60, 563, 564, 566, 661L, 666, 667, 683, 684, 686; Engineering 424L; and Environment 535.

Toward fulfilling the general requirements, the following elective options must be selected from the following courses. The natural science requirement is satisfied by completing an approved biology course. Approved Biology courses are 201L, 202L, 212L, and 275A. At least one of the five courses used to satisfy the humanities and social sciences requirement, or an approved alternate course, must possess an ethical inquiry (EI) code.

A sample semester-by-semester sequencing of the requirements for the major is available online at cee.duke.edu/undergrad/degrees/enve-planning.
Program Summary
The undergraduate major in environmental sciences is offered as a bachelor of science degree to students interested in a scientific perspective on environmental issues. The major is designed to expose students to the breadth of environmental sciences, while engaging students to develop depth in a focus area. This major is designed for students with career objectives in environmental sciences, industry, or management that require a strong scientific background, or for students intending to pursue graduate degrees in environmental sciences. The major also merges well with pre-health requirements. The corequisites for the BS degree stress a firm foundation in the physical and life sciences, and mathematics. The gateway course focuses on local, regional, and global case studies taught by interdisciplinary teams of faculty. The major requirements include five core courses selected from five categories (Environmental Health, Ecology, Environmental Physical Sciences, Environmental Social Science, and Environmental Tools and Skills) and three focus area courses (one of which can be a core course). Students are required to participate in a relevant field experience or internship and many students choose to fulfill this requirement through study abroad, a semester at Duke Marine Lab, or the Stanback Internship Program. The department encourages all students to pursue independent research with Nicholas School faculty members.

Advising in Environmental Sciences and Policy
Advisors are assigned based on students’ general areas of interest. Students present a proposed plan of study to their advisors that explains the rationale for their chosen area of concentration within their focused study. The program encourages close relationships between faculty and students with convergent interests.

Graduation with Distinction
The environmental sciences and policy and environmental sciences both offer a Graduation with Distinction option. Interested students with a 3.0 grade point average overall and 3.2 grade point average in the environmental sciences/policy major should apply by the beginning of their senior year. The application should include a written request to the director of undergraduate studies describing the proposed research project, and identifying a primary faculty advisor who has agreed to supervise the research. Students are required to take one independent research study as part of the Graduation with Distinction process. Students will write a substantial paper describing their completed research, which is evaluated by the faculty advisor, and will make an oral presentation to students and faculty of the program before the end of classes of the student’s final semester. For additional information and an application form, contact the director of undergraduate programs or visit nicholas.duke.edu/academics/undergraduate-programs/graduation-distinction.

Academic Requirements
Corequisites
The following courses or their equivalents (for example, Advanced Placement credit) are required. Approval to substitute course taken at other universities must be obtained from the director of undergraduate studies in the department offering the course. Some of these courses are prerequisites to upper-level courses in this major.

- Environment 102 (Introduction to Environmental Sciences and Policy)
- Biology 201L or 202L or 203L (Gateway to Biology) or equivalent
- Chemistry 101DL (Advanced General Chemistry) and either Chemistry 210DL or 201DL or equivalents
- Physics 141L, 151L, 161D, or 164L (Introductory Physics) or equivalent
- Mathematics 111L and 112L (Introductory Calculus), or equivalent
- Statistical Science 101L, 102L, 111L, 130L, or 199L; or Biology 304

Major Requirements
- Gateway Course: Environment 201 (Integrating Environmental Sciences and Policy)
- Core Areas: One course in each area, chosen from a list of approved courses:
  - Environmental Health
  - Ecology
  - Environmental Physical Sciences
  - Environmental Social Sciences
Environmental Tools/Skills

- **Focus Area:** Students are required to choose a focus area and take three courses around that focus, at least one of which is a 500-level course. One of these courses can overlap the core courses. Focus areas will be chosen under the direction of the student's major advisor and will be approved by the director of undergraduate studies upon successful submission of a short essay outlining the focus area and justifying the chosen courses.
- **Capstone:** Environment 495 (Capstone Course). Participating in Graduation with Distinction (GWD) can fulfill this requirement.
- **Field Experience or Internship:** Students will complete a field experience or internship relevant to their major. The Duke Career Center maintains information on available internships. Field experiences may include a semester or summer session at the Duke University Marine Laboratory or participation in field-oriented study abroad programs.

### Environmental Sciences and Policy (AB)

**Program Code:** U-ENVS-AB  
**Degree Designation:** Bachelor of Arts  
**Department:** Nicholas School of Environment  
**Website:** nicholas.duke.edu/academics/undergraduate-programs/environmental-sciences-policy

#### Program Summary
The undergraduate major in environmental science and policy is offered as a bachelor of arts degree to students interested in the interdisciplinary study of environmental issues. The major draws from the breadth of perspectives from science, policy, and humanities while engaging students in an in-depth study in natural or social sciences. This major is designed for students with career objectives such as environmental law, policy, science, management, or planning that require an in-depth understanding of environmental issues that cross disciplinary boundaries. The corequisites for the AB degree stress a firm foundation in basic natural, environmental, and social science areas. The gateway course focuses on local, regional, and global case studies taught by interdisciplinary teams of faculty. The major requirements include three topical courses selected from three categories (Environmental Humanities, Environmental Sciences, and Environmental Policy) and three additional focus area courses. Students are required to participate in a relevant field experience or internship and many students choose to fulfill this requirement through study abroad, a semester at Duke Marine Lab, or the Stanback Internship Program. The department encourages all students to pursue independent research with Nicholas School faculty members.

Go to [Programs by Department](#) to view all related programs.

#### Advising in Environmental Sciences and Policy
Advisors are assigned based on students’ general areas of interest. Students present a proposed plan of study to their advisors that explains the rationale for their chosen area of concentration within their focused study. The program encourages close relationships between faculty and students with convergent interests.

#### Graduation with Distinction
The environmental sciences and policy and environmental sciences both offer a Graduation with Distinction option. Interested students with a 3.0 grade point average overall and 3.2 grade point average in the environmental sciences/policy major should apply by the beginning of their senior year. The application should include a written request to the director of undergraduate studies describing the proposed research project, identifying a primary faculty advisor who has agreed to supervise the research. Students are required to take one independent research study as part of the Graduation with Distinction process. Students will write a substantial paper describing their completed research, which is evaluated by the faculty advisor, and will make an oral presentation to students and faculty of the program before the end of classes of the student’s final semester. For additional information and an application form, contact the director of undergraduate programs or visit nicholas.duke.edu/academics/undergraduate-programs/graduation-distinction.

#### Academic Requirements

##### Corequisites
The following courses or their equivalents (for example, Advanced Placement credit) are required. Approval to substitute courses taken at other universities must be obtained from the director of undergraduate studies in the department offering the course. Some of these courses are prerequisites to some upper-level courses in this major.

- Environment 102 (Introduction to Environmental Sciences and Policy)
- Biology 201L or 202L or 203L (Gateway to Biology)
- Chemistry 101L or 110L (Advanced General Chemistry), or equivalent
- Economics: Economics 101 (Economic Principles); Environment 155 (Principles of Economics and the Environment); or Political Science 145 (Introduction to Political Economy) or equivalent
Duke University

- Mathematics 111L (Introductory Calculus) or equivalent (e.g., Mathematics 105L and 106L)
- Statistics: Statistical Science 101L, 102L, 111L, 130L, or 199L; or Biology 304; or Sociology 333; or equivalent

**Major Requirements**

- **Gateway Course:** Environment 201 (Integrating Environmental Sciences and Policy)
- **Topical Areas:** One course in each area, chosen from a list of approved courses:
  - Environmental Humanities
  - Environmental Sciences
  - Environmental Policy
- **Focus Area:** Students are required to choose a focus area and take three courses around that focus, at least one of which is a 500-level course. Focus areas will be chosen under the direction of the student's major advisor and will be approved by the director of undergraduate studies upon successful submission of a short essay outlining the focus area and justifying the chosen courses.
- **Capstone:** Environment 495 (Capstone Course). Participating in Graduation with Distinction (GWD) can fulfill this requirement.
- **Field Experience or Internship:** Students will complete a field experience or internship relevant to their major. The Duke Career Center maintains information on available internships. Field experiences may include a semester or summer session at the Duke University Marine Laboratory or participation in field-oriented study abroad programs.

**Evolutionary Anthropology (AB)**

Program Code: U-EVANT-AB  
Degree Designation: Bachelor of Arts  
Department: Evolutionary Anthropology  
Website: evolutionaryanthropology.duke.edu/undergraduate/degree-programs/major

**Program Summary**

Evolutionary Anthropology is an interdisciplinary department centering on the origin and evolution of human beings and their close biological relatives. The department and its course offerings cover a variety of research areas including primate behavior, ecology, cognition and genetics; primate and human disease ecology; human genetics, energetics, and physiology; paleoanthropology; and functional and comparative anatomy. Opportunities for independent research exist in departmental laboratories, including the Canine Cognition Center and the Primate Locomotion Lab. Additional research opportunities can be found at the Duke Lemur Center and the Lemur Center’s Museum of Natural History.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**

To qualify for the Graduation with Distinction program, students must have a GPA of 3.0 overall and 3.5 within evolutionary anthropology. To earn distinction, students typically spend one year conducting independent research with a faculty mentor and writing a substantial senior thesis. Students must be enrolled in an independent study course within evolutionary anthropology. Exceptions must be approved by the director of undergraduate studies. Students must submit a brief (one- to two-paragraph) description of the honors project, the names of the faculty comprising the examination committee, and the signature of the student's faculty mentor to the director of undergraduate studies by the end of the first week of classes of the student's next-to-last semester (e.g., fall semester for May graduates). The examination committee should consist of three faculty members, at least two of whom are in the Department of Evolutionary Anthropology.

**Academic Requirements**

**Academic Requirements**

- **Prerequisite:** Evolutionary Anthropology 101 or 101D  
- **Corequisite:** Biology 202L

**Major Requirements.** Nine courses are required (not including the above pre and corequisites) of which eight courses must be 200-level or above and one course must be a 400-level or above (capstone course). One course is required in each of the following areas: 1) anatomy/paleoanthropology and 2) behavior/ecology/cognition (see allowed course listings in the Handbook for Majors). At least three additional courses must be taken in Evolutionary Anthropology and another four courses may be taken in either Evolutionary Anthropology or from a list of preapproved electives in related departments. One of the above courses must be a lab/field experience in Evolutionary Anthropology (research independent study may count toward this requirement). Note that no more than two independent studies may be counted toward the nine courses required. Evolutionary Anthropology offers three optional concentrations (see below).

**Areas of Concentration**
Students may elect to complete courses representing an in-depth study of a given area within Evolutionary Anthropology. There are currently three area concentrations available: 1) anatomy and paleoanthropology; 2) behavior, ecology, and cognition; and 3) human biology. Concentrations require that three of the five courses in Evolutionary Anthropology (as required by the major) be taken in the area of concentration. Preapproved courses for each area can be found in the Handbook for Majors.

Evolutionary Anthropology (BS)
Program Code: U-EVANT-BS
Degree Designation: Bachelor of Science
Department: Evolutionary Anthropology
Website: evolutionaryanthropology.duke.edu/undergraduate/degree-programs/major

Program Summary
Evolutionary Anthropology is an interdisciplinary department centering on the origin and evolution of human beings and their close biological relatives. The department and its course offerings cover a variety of research areas including primate behavior, ecology, cognition, and genetics; primate and human disease ecology; human genetics, energetics, and physiology; paleoanthropology; and functional and comparative anatomy. Opportunities for independent research exist in departmental laboratories, including the Canine Cognition Center and the Primate Locomotion Lab. Additional research opportunities can be found at the Duke Lemur Center and the Lemur Center's Museum of Natural History.

Departmental Graduation with Distinction
To qualify for the Graduation with Distinction program, students must have a GPA of 3.0 overall and 3.5 within evolutionary anthropology. To earn the distinction, students typically spend one year conducting independent research with a faculty mentor and writing a substantial senior thesis. Students must be enrolled in an independent study course within evolutionary anthropology. Exceptions must be approved by the director of undergraduate studies. Students must submit a brief (one- to two-paragraph) description of the honors project, the names of the faculty comprising the examination committee, and the signature of the student's faculty mentor to the director of undergraduate studies by the end of the first week of classes of the student's next-to-last semester (e.g., fall semester for May graduates). The examination committee should consist of three faculty members, at least two of whom are in the Department of Evolutionary Anthropology.

Academic Requirements
Academic Requirements
Prerequisite. Evolutionary Anthropology 101 or 101D
Corequisites. Biology 201L and 202L; Chemistry 101DL and 201DL; Mathematics 111; Physics 141L; introductory statistics (any level). Equivalent courses can be approved by the director of undergraduate studies.

Major Requirements. Eight courses numbered 200 or above are required (not including the above pre- and corequisites) of which one course must be numbered 400 or above (a capstone course). One course is required in each of the following areas: 1) anatomy/paleoanthropology and 2) behavior/ecology/cognition (see listings in the Handbook for Majors). At least three additional courses must be taken in evolutionary anthropology and an additional three courses may be taken in evolutionary anthropology or from a preapproved list of electives in related departments. One of the above courses must be a lab/field experience in evolutionary anthropology (research independent study may count toward this requirement). Note that no more than two independent studies may be counted toward the major. Evolutionary anthropology offers two optional concentrations.

Areas of Concentration
Students may elect to complete courses representing an in-depth study of a given area within evolutionary anthropology. There are currently three area concentrations available: 1) anatomy and paleoanthropology; 2) behavior, ecology, and cognition; and 3) human biology. Concentrations require that three of the five courses in evolutionary anthropology (as required by the major) be taken in the area of concentration. Preapproved courses for each area can be found in the Handbook for Majors.

French Studies (AB)
Program Code: U-FREN-AB
Degree Designation: Bachelor of Arts
Department: Romance Studies Department
Website: romancesudies.duke.edu/undergraduate/majors/french-francophone-studies

Program Summary
Students majoring in French will acquire a considerable degree of competence in the written and spoken language as well as knowledge of the literature and culture of France and the French-speaking world.
The department offers a wide array of courses in language, literature, and culture, and strongly encourages interdisciplinary work in French through courses emphasizing the relation between literature, the arts, history, and society. A major in French is an excellent portal to a variety of careers in the humanities, the economic world, government, and science, and to a lifetime of global awareness and cultural reflection. An honors thesis option is available, including the possibility for theses interweaving two fields for students pursuing double or second majors. Students interested in majoring in French should consult the director of undergraduate studies.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**

Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further information may be obtained from the director of undergraduate studies or the assistant to the director.

**Study Abroad**

Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- **Department-Administered Programs**
  - **Duke-in-France. Major:** All courses may be counted toward the major, as long as the courses are approved by the Director of Undergraduate Studies. Courses may cover a variety of topics related to Francophone or Romance Studies. Courses with unrelated content, such as biology or math taught in French, will not be granted.
  - **Duke-Administered Summer Programs (Office of Study Abroad)**
    - **Duke-in-Aix-en-Provence.** French 212A Intensive Intermediate French Language and Culture counts as two courses toward the major.
    - **Duke-in-Paris. Major:** Two courses may be counted toward the major.
    - **Duke-in-Provence. Major:** One course may be counted.
  - **Non-Duke Administered Semester Programs**
    - **Major:** A maximum of two courses per semester may be counted toward the major.
  - **Non-Duke-Administered Summer Programs**
    - **Major:** One course may be counted toward the core-course requirement.

**French Studies (AB) (U-FREN-AB)**

**Academic Requirements**

**Academic Requirements**

The French studies major requires a total of ten courses. At least eight French courses must be taken at the 300 level or above. Depending on placement, French 203 and/or French 204 may count toward the requirement; for students entering with 300-level proficiency, all ten French courses will be at the 300 level or above. For transfer students, consult with the director of the language program for equivalent transfer credits.

Of these advanced-proficiency courses:

- Students may take up to two Romance studies courses with French-related content or non-departmental courses with French-related content
- Students must take at least three French courses numbered above 400 or complete a thesis. 500-600 level courses will be constructed with the undergraduate experience in mind and students are warmly welcome to take more than one 500-600 level course. Such courses also present an excellent opportunity for undergraduates to work with a graduate student peer cohort. French majors are encouraged to write a senior thesis, and to consider interdisciplinary topics capable of linking French studies to their additional fields of academic interest.

**Gender, Sexuality, and Feminist Studies (AB)**

*Program Code: U-GSF-AB*

*Degree Designation: Bachelor of Arts*

*Department: Gender, Sexuality, and Feminist Studies*

*Website: gendersexualityfeminist.duke.edu/undergraduate/major-minors-requirements*

**Program Summary**

The Program in Gender, Sexuality, and Feminist Studies at Duke University is dedicated to exploring gender identifications, relations, practices, theories, and institutions. In the field's first decades, feminist scholarship reoriented traditional disciplines toward the study of women and gender and developed new methodologies and critical vocabularies that have made interdisciplinarity a key feature of women's studies as an autonomous field. Today, scholars continue to explore the meaning and impact of identity as a primary, though by no means transhistorical or universal, way of
organizing social life by pursuing an intersectional analysis of gender, race, sexuality, class, and nationality. In the classroom, as in research, the goal of the program is to transform the university's organization of knowledge by reaching across the epistemological and methodological divisions of historical, political, philosophical, economic, representational, technological, and scientific analysis. Through a dual emphasis on interdisciplinarity and intersectionality, the program offers students new knowledge while equipping them with a wide range of analytical and methodological skills.

Many students identify gender, sexuality and feminist studies courses as among the most exciting and enlightening they take at Duke. The women and men who enroll in the program's classes each semester gain the opportunity to understand how social, historical, and psychological forces, organized by the central concept of gender, shape them as individuals; attain a fuller understanding of human behavior, culture, and society made possible by investigating women's lives; acquaint themselves with the experience of women of different economic classes, sexual orientations, and cultural and racial backgrounds; and transfer the critical and analytical skills they acquire in the study of gender and society to other classes, beyond the campus to other activities, and eventually to their professional careers.

Gender, sexuality, and feminist studies has, since its inception, been an interdisciplinary field. It has consistently assessed the strengths and challenges of such interdisciplinarity. Duke students find their background in women's studies to be a valuable resource for their professional development and lifelong intellectual growth. Gender, sexuality, and feminist studies at Duke is a focal point within the university for the study of women, gender, and feminist theories—a structure that allows graduate students to address complex issues beyond their traditional disciplinary and classroom boundaries and to explore problems in ways that connect theories and approaches of different disciplines. The Gender, Sexuality, and Feminist Studies Program serves students' intellectual interests by offering credit courses, housing a variety of research projects, and implementing programs for diverse audiences. For additional information, visit the program website at gendersexualityfeminist.duke.edu.

Advising

Each year, faculty affiliated with Gender, Sexuality, and Feminist Studies serve as advisors for students majoring in gender, sexuality, and feminist studies. Majors are paired with faculty advisors on the basis of students' general areas of interest. Students majoring in gender, sexuality, and feminist studies are encouraged to seek out and work with any of the Gender, Sexuality, and Feminist Studies faculty in addition to their primary faculty advisor.

Departmental Graduation with Distinction

Qualified students earning a major in gender, sexuality, and feminist studies may be eligible for Graduation with Distinction. More detailed guidelines are available in the program office. Students interested in being considered for distinction should contact the program office no later than the spring of their junior year.

Academic Requirements

To major in gender, sexuality, and feminist studies, a student must take a minimum of ten courses. Gender, Sexuality, and Feminist Studies 199S (Thinking Gender: An Introduction to Feminist Theory) and a senior seminar (Gender, Sexuality, and Feminist Studies 490S) are required, along with four of the following:

- 360S. Feminism in Historical Context
- 361. Money, Sex, Power
- 361S. Money, Sex, Power
- 362. Gender and Popular Culture
- 362S. Gender and Popular Culture
- 363S. Interpreting Bodies: Identity and Beyond
- 364S. Race, Gender, and Sexuality
- 365. Gender and Political Theory
- 366S. Nature, Culture and Gender
- 367S. Feminist Ethics
- 368S. Gender, Sexuality and Human Rights
- 369S. Transnational Feminism
- 370S. Queer Theory
- 371S. Gender, Sexuality, and the Image

The remaining four elective courses must be at or above the 200 level and may be chosen from other gender, sexuality, and feminist studies offerings. Students may also petition for credit for courses offered in other departments and programs, with clear documentation of their intellectual value to the overall goals of the major. Students may take no more than two independent study courses, which must be approved by the director of undergraduate studies.
German (AB)

Program Code: U-GER-AB
Degree Designation: Bachelor of Arts
Department: German Studies
Website: german.duke.edu/undergraduate/major-minor

Program Summary

Students majoring in German develop language skills, become knowledgeable about the literature and culture of German-speaking areas, and acquire analytic and interpretive abilities. The combination of language skills with the ability to navigate across cultures is excellent preparation for a variety of professions in business, government, engineering, law, education, and academia. Double (second) majors are also encouraged and supported. Numerous opportunities are available, including Global Education programs, interdepartmental majors, Fulbright and German Academic Exchange Service (DAAD) scholarships, independent research and independent studies, and internships, both before and after graduation. Students interested in a major should consult the director of undergraduate studies.

Departmental Graduation with Distinction

Qualified students (see the section on honors in this bulletin) may apply or be invited to apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Further information may be obtained from the director of undergraduate studies.

Academic Requirements

Academic Requirements

Ten one-credit departmental courses at the 200 level or above, including cross-listed courses and courses taught in the Duke-in-Berlin program. Direct enrollment classes taken in the Duke-in-Berlin program count as well. Half-credit courses may count toward the total number of credits required for graduation, however, they do not count toward the major. Eight out of ten of these courses must be taught in German; exceptions to this rule can be made at the discretion of the director of undergraduate studies.

Required courses include the Advanced German sequence, German 305S and/or 306S (and/or the equivalent taught in Berlin, German 303AS, German 312AS, or German 319AS), at least two courses taught in German on Duke’s home campus numbered 320 or above, at least one of which must be a 400-level course.

Note: All Duke-in-Berlin courses taught in German at the 200 level or above, semester and summer, may count toward the major and minor as courses taught in German. Half-credit courses may count toward the total number of credits required for graduation; however, they do not count toward the minor.

Global Cultural Studies in the Literature Program (AB)

Program Code: U-LIT-AB
Degree Designation: Bachelor of Arts
Department: Global Cultural Studies in the Literature Program
Website: literature.duke.edu/undergraduate/major

Program Summary

Global Cultural Studies in the Program in Literature draws broadly on the resources of the humanities to address the ethical, cultural, technical, social, and political complexities of events in our world. We focus on aesthetic objects and the arts to do so. As the hub of interdisciplinary humanities, the Global Cultural Studies major offers students the opportunity to engage comprehensively with areas of inquiry normally separated by disciplinary forms. Whether the focus is on 19th century travel writing or contemporary cinematic projection in Asia, the latest bio-medical breakthrough, or recent geopolitical upheavals in the Middle East, the major is concerned with deepening our understanding of the events that have shaped and continue to shape our lives. Given the rapid acceleration in the production of culture, and the apparently seamless transposition of culture into capital, our major is committed to the idea that the humanities may be the only place where broad and non-instrumental examination of the scope and nature of cultural change not only remains possible but continues to be actively encouraged.

Global Cultural Studies thus explores the range of humanistic inquiry. It is committed to the notion that the humanities produce a distinct kind of positive knowledge.

Our major provides students with the “bigger picture” that will allow them to understand and shape global cultural production and change. To that end, we offer courses that deal with major conceptual discussions in theory, philosophy, and literature as well as those that give students in-depth expertise in the work of individual thinkers, such as Michel Foucault and Simone Weil, into contemporary social movements, such as Black Lives Matter, into questions of identity, including gender fluidity, into international and intercultural cinemas, such as Eurasian cinema, into digital media and culture, including sampling and remixing and the viral circulation of cultural objects and ideas in memes and TikTok videos.
Our core faculty work comparatively in and across different cultural contexts, diverse geographical and geopolitical locations, and distinct media forms to offer courses in seven general areas:

- critical and social theory and the history of philosophy
- modern literature and contemporary theories and philosophies of language and literature
- visual culture, global cinema, and film theory, the internet and media studies in the digital age
- political and decolonial theory, Marxism, poststructuralism, and postcolonial studies
- psychoanalysis, science studies, cognitive neuroscience, and the history of psychiatry
- comparative race studies in a transnational frame
- feminism, gender, queer and trans-theory, and sexuality studies.

The broad scope of our program provides students with the knowledge base and analytical skills needed for participation as responsible global citizens.

Our majors are active thinkers. The student-run Society for Modern Thought and literary journal OTHER provide extracurricular opportunities for collaborative work beyond the classroom, allowing students to expand and apply the skills they learn as Literature majors to creative and practical endeavors.

Our graduates have gone on to careers in law, medicine, information technology, public policy, teaching, academic administration, journalism, publishing, and the creative cultural industries.

The Global Cultural Studies in Literature Program also offers a film and media concentration, providing students the opportunity to pursue a flexible curriculum in global cultural studies with a focus on film and media issues. The film and media concentration is intended to work together with Duke’s Program in the Arts of the Moving Image.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**

To receive Graduation with Distinction students must satisfy university GPA requirements and submit an application by the beginning of the spring semester of their junior year. They must have a minimum overall GPA of 3.0, a GPA of 3.5 in the major, and an honors thesis grade of B+ or above. Students accepted into the distinction program must take the honors seminar sequence (Literature 495 and 496). A final grade will be issued at the end of the spring term. (A grade of “Z” will be issued at the end of the fall term.) Students must write an honors thesis (60 pages minimum) and submit it by the official submission date noted on a written and signed departmental agreement. Students will defend the thesis before a three-member committee consisting of the thesis advisor, the director of undergraduate studies, and a third reader chosen from among the members of the literature faculty and affiliated faculty. The committee determines the grade for the thesis, which becomes the grade of the honors seminar sequence. The two honors seminars do not count toward the ten literature courses required for the major.

**Academic Requirements**

The major in global cultural studies is composed of ten courses. All majors are required to take a gateway course, Literature 201 (Gateway to Global Cultural Studies), and an upper-level course, Literature 301S (Theory Today), as well as four core courses taught by faculty with appointments in Literature. In addition, students must select three electives from across the humanities offerings at Duke (approved by the DUS or Literature advisor) and fulfill the “Senior Culminating Experience” requirement.

- LIT 201: Intro to Global Cultural Studies
- LIT 301S: Theory Today
- 4 core courses chosen taught only by faculty with primary, secondary, or joint appointments in Literature*
- 3 electives from humanities fields, with DUS review and approval
- Senior culminating experience led only by faculty with appointments in Literature: LIT 393 research independent study OR graduate-level course OR completed honors thesis track

*Only courses taught by faculty who have appointments in Literature will count as Core Courses toward our Major, Minor, or Film and Media Concentration.

ALL courses MUST have a letter grade to count toward any major/minor requirements in our program.

For more information, visit literature.duke.edu.

**Major in Global Cultural Studies with Concentration in Film and Media**

The major with a concentration in film and media is composed of ten courses. All majors are required to take the gateway course Literature 201 (Introduction to Global Cultural Studies, upper-level course Literature 301S (Theory Today), as well as Literature 110 (Introduction to Film Studies), and either Literature 316 (Film Theory) or Literature 317 (Media Theory). For the remaining six courses, students must take at least two courses that focus on the study of film and/or media, and at least three of the six courses must be core literature courses.
Global Gender Studies, Interdepartmental (AB)

Program Code: U-IGGS-AB
Degree Designation: Bachelor of Arts
Department: Gender, Sexuality, and Feminist Studies, International Comparative Studies
Website: gendersexualityfeminist.duke.edu/undergraduate/major-GGS

Program Summary
Global Gender Studies offers a focused curriculum drawn from the Program in Gender, Sexuality and Feminist Studies and the Program in International Comparative Studies. The interdepartmental undergraduate major, which is composed of 14 courses, explores gender, sexuality, and feminism across academic disciplines. It allows majors to consider how gender, sexuality, and feminism— as ideas, categories, identities, experiences, or sources of political and cultural conflict— develop historically in particular places and communities and at global or transnational scales.

The four required courses in Global Gender Studies focus on theory, practice, and politics. They address representation, epistemology, and ontology, as well as poverty, development, environmentalism, demography, reproduction, nationalism, indigeneity, and decolonization. They consider gender and sexuality through embodiment and intimacy; colonialism and imperialism; racism and classism; politics and economics; family and ecology.

Each student major chooses an additional 10 courses to further explore their areas of interest in Global Gender Studies from a wide range of options in ICS, GSF, and many other departments.

No Independent Studies may be counted toward the 14 courses required to complete the Global Gender Studies major.

Global Gender Studies provides opportunities for students to complete individual research and creative projects in courses that carry the R code. Students interested in completing a comprehensive research project under faculty guidance may apply to the GGS Honors/Distinction Program in spring of their junior year. Completion of the GGS Honors/Distinction Program requires majors to enroll in two additional course credits in their senior year, for a total of 16 credits.

Graduating seniors in Global Gender Studies will be listed in the International Comparative Studies and the Gender, Sexuality and Feminist Studies commencement programs. They (and their guests) will be part of the GSF Commencement Ceremony and will receive their degrees at that event.

Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements

- 4 Required Courses
  - ICS 195—Comparative Approaches to Global Issues
  - GSF 199S—Thinking Gender: An Introduction to Feminist Theory
  - GSF 369S—Transnational Feminism
  - ICS 489S or ICS 495S—Capstone Seminar in Global Studies or Honors Thesis Seminar. If a GGS honors student chooses to take ICS 495S in fall to fulfill this requirement, they must also take ICS 496S in spring.

- 5 Qualifying ICS Courses for GGS. Two of the five courses must be taught by ICS Core Faculty. The remaining three are chosen from the GGS interdisciplinary courses approved for ICS (these offerings vary from term to term). No more than one of the five courses may be numbered below the 100-level. One of the five courses must be numbered at the 400-level or above.

- 5 GSF-Origin Courses for GGS. All five courses must originate within the Program in Gender, Sexuality, and Feminist Studies. No more than one of the five courses may be numbered below the 100-level. At least two of the five courses must be numbered at the 300-level or above.
Global Health (AB2)

Program Code: U-GLHL-AB2
Plan Type: Second Major
Department: Global Health
Website: globalhealth.duke.edu/programs/undergraduate-programs

Program Summary

Global health is an area of study, research, and practice that emphasizes achieving health equity for all people worldwide. Global health involves myriad disciplines, incorporates population-based approaches and individual level clinical care, promotes interdisciplinary collaboration, and emphasizes transnational health issues and determinants. The Program in Global Health incorporates knowledge from academic disciplines—within the sciences, social sciences and humanities—to best address the complexity of global health challenges.

The mission of the global health major is to educate the next generation of scholars and leaders whose efforts will improve health and help achieve health equity for all people worldwide. Accordingly, the global health major teaches students to approach global health challenges using both disciplinary and interdisciplinary perspectives. The global health major is offered only as part of a double major program of study, meaning students must complete the global health major requirements along with the requirements of any other undergraduate major at Duke. The global health major is composed of six components—core, foundations, statistics, electives, experiential learning, and a senior seminar. Students must complete eleven courses and an experiential learning requirement, in addition to their co-major requirements, as outlined below.

Go to Programs by Department to view all related programs.

Graduation with Distinction

The Graduation with Distinction program recognizes students who successfully complete a substantive written project evaluated by a committee of three faculty members. Students majoring in global health may pursue the following tracks leading to Graduation with Distinction:

- Graduation with distinction in global health
- Graduation with distinction in global health and the non-global health major through a double honors thesis
- Graduation with distinction in the non-global health major

Students interested in graduating with distinction in global health are encouraged to pursue a double honors thesis, in order to integrate what they have learned in the two majors. Students must complete their thesis under the mentorship of a Duke Global Health Institute (DGHI) faculty member or affiliate who has experience guiding undergraduate student research. Students who meet the eligibility requirements must submit an application form by the last day of Drop/Add of the fall semester of their senior year.

Academic Requirements

Academic Requirements

Three Core Courses

- Gateway: Global Health 101 (Fundamentals of Global Health)
- Ethics: Choose from:
  - Global Health 210 (Global Health Ethics)
  - Global Health 341 (Ethics of Infectious Disease Control)
  - Global Health 373 (Global Health Service, Research, & Ethics)
  - Global Health 241 (Global Bioethics)
- Methods: Global Health 371/Psychology 309 (Research Methods in Global Health)

Three Foundations Courses. One course from three of the four foundations. See globalhealth.duke.edu for eligible courses.

- Arts and Humanities in Global Health
- Global Health Systems and Policy
- Natural Science in Global Health
- Social Sciences in Global Health

One Statistics Course

- A course listed/cross-listed in the Department of Statistical Science or
- Biology 203/204, BME 244, Economics 208D, Mathematics 230, Psychology 201L, Psychology 204L/205L, Sociology 333

Three Elective Courses. Each major must complete three elective courses from a predetermined list. See globalhealth.duke.edu for additional information. Electives must meet the following requirements:

- any 200-level course with a Global Health offering (either owned or cross-listed);
- any course listed as a Foundation course (see above);
- only one 1.0-credit independent study or Bass Connections course (Global Health 391, 392, 393, 395(T), or 396(T)) is allowed per student; and
Duke University

- a maximum of 2.0 credits of preapproved study abroad or transfer credit courses are allowed per student.
- Courses from the above categories will be allowed to count as electives, with the constraint that courses cannot be double-counted within the major.

- **Experiential Learning.** An experiential learning activity must address and/or engage a global health question, context or challenge. Students may fulfill the requirement through the DGHI Student Research Training (SRT) program, an internship, a faculty-mentored independent global health project, or a summer civic engagement or research experience such as those offered by DukeEngage, Bass Connections, Data+ or Story+. The experiential learning activity must be preceded by the Ethics core course, be approved prior to engagement, and be completed prior to the spring semester of senior year. See globalhealth.duke.edu for more details on requirements and eligible experiences.

- **Senior Seminar.** Global Health 499, Global Health Capstone. Students are expected to have completed Fundamentals of Global Health, Global Health Ethics, Global Health Research Methods and experiential learning prior to enrolling in a capstone course.

**History (AB)**

Program Code: U-HIST-AB  
Degree Designation: Bachelor of Arts  
Department: History Department  
Website: history.duke.edu/undergraduate/major

**Program Summary**

History offers all students within the university an opportunity to investigate the past, gain perspective on the present, and improve their critical faculties. There are three broad objectives for those who major in history as a discipline. First, it offers students broad exposure to the histories of our own and other societies, to the recent and the more distant past, and to the variety of approaches to the study of history. Second, it allows the in-depth study of the history of a particular time and place or a particular type of history. Breadth of knowledge is achieved through the distribution requirements for coursework across geographic areas and in pre-modern as well as modern history. Depth is achieved through the requirement that students identify a concentration. Third, it develops the skills of historical thinking necessary for better understanding our own and other human societies and teaches majors to gather and interpret evidence and how to fashion and compellingly convey arguments grounded in that evidence. Taken as a whole our curriculum will prepare majors to:

- **Understand history as a discipline.** This involves developing knowledge within a chosen area of concentration, realizing that historical interpretations change over time, and seeing the ways in which historians find layered, complex causes and connections in human affairs.

- **Build critical and analytic skills.** This involves learning to define research questions and to frame them as part of ongoing scholarly conversations. You will also learn to establish what contexts matter in answering those research questions, how to find a variety of relevant evidence – from speeches to visual materials to court records and beyond – and how to analyze it effectively to help refine and answer the questions posed.

- **Enhance their skills in written and oral communication.** This involves communicating and writing with clarity and cogency and understanding that, in History, content (what something says) cannot be separated from form (how it is said).

Our curriculum is structured around an area of thematic concentration and book-ended by two hands-on seminars: a Gateway Seminar that introduces students to the fundamentals of historical research and analysis, and a Capstone Seminar that gives students the opportunity to demonstrate what they have learned in their time as a History major.

**Honors Thesis and Graduation with Distinction**

Students pursuing distinction normally apply for a year-long senior honors seminar (HISTORY 495S/496S) in March of the junior year. In special circumstances, students may also prepare a thesis outside this sequence. Either way, most students begin their thesis research during the summer before the senior year, and all students pursuing distinction work closely with a faculty thesis advisor, usually through an independent study each semester.

Thesis writers are expected to produce a well-written research essay substantially engaged with primary sources and engaged with ongoing historiographic conversations. Most theses run 80-120 pages.

Upon its completion, the thesis will be evaluated by a committee of at least three faculty to determine the honors level of the thesis: Distinction, High Distinction, or Highest Distinction. The department also recognizes senior theses with two prizes: the William T. Laprade Prize for most outstanding thesis, and the Raymond Gavins prize, awarded to an outstanding thesis in African-American history, the history of Civil Rights movements, and/or the history of the US South. Both prizes are accompanied by a $250 cash award.

Students will also have the opportunity to archive their thesis work in the Duke University Library.

**Academic Requirements**

Academic Requirements
Ten history courses, at least seven of which must be at or above the 200 level. The ten courses may include one transfer credit and up to three courses cross-listed as history courses regardless of the department through which the student enrolls. At least seven must be from the list of approved "core" history courses on the department website.

The ten courses are to be distributed as follows:

1. **Gateway Seminar**: History 150-199 are identified as gateways and are ideally taken by the end of the sophomore year.

2. **Courses from a Geographic Area of History**: Select one course each in any three of the six geographic areas listed below.

3. **Courses in an Area of Concentration**: Students have two ways to focus their studies in History. A geographic concentration allows you to explore a specific area of the globe while a thematic concentration allows you to focus on a specific theme or subject area from a historical perspective.
   - You must select at least four courses in your chosen field of concentration.
   - One course below the 100 level may be counted toward the student's concentration.
   - Concentration courses count toward meeting the area and pre-modern distribution requirements.

4. **Pre-Modern Courses**: At least two courses must focus substantially on eras before 1800 (consult list on the department website).

5. **Capstone Seminar**: Select at least one senior research seminar (History 550-499s) specifically coded CAPSTONE SEMINAR or CAP SEM. This seminar is usually taken in the junior or senior year.
   - A 500-600 level history seminar may be substituted for the capstone seminar if approved by the director of undergraduate studies and the course instructor.
   - The senior thesis seminar (History 495S and 4965S) substitutes for the capstone seminar for those students accepted into the program.

**Geographic Concentrations:**
- Africa and the Middle East
- Asia
- Europe and Russia
- Global or Comparative
- Latin America and the Caribbean
- United States and Canada

Individual courses in each area are listed on the department website. If a course is not listed, students should petition the Director of Undergraduate Studies (DUS) to classify it appropriately (a syllabus may be requested).

**Thematic Concentrations:**
- Economic and Business Cultures
- Emotions and Psychology of Self
- Human Rights and Social Movements
- Law and Governance
- Medicine, Science, and Technology
- Race and Ethnicity
- War, Military, and Society
- Women, Gender, and Sexuality

Individual courses in each area are listed on the department website. If a course is not listed, students should petition the DUS to classify it appropriately (a syllabus may be requested).

**Double Counting**: Courses can fulfill two or more requirements. For example, History 226 on Ancient and Early Modern Japan could count towards both a pre-modern and a geographic area requirement. For a student with an area concentration on Asia, it would also count toward their geographical concentration requirement.

**Advanced Placement**: Advanced Placement (AP) courses do not count as one of the ten required courses for the history major.

**International Baccalaureate**: International Baccalaureate (IB) courses do not count as one of the ten required courses for the history major.

**Transfer Credit**: One History course taken abroad or at another college may be counted towards the major if approved by the DUS.
   - The History Department sets a relatively high standard in evaluating whether college-level courses completed at other institutions are acceptable as equivalent to courses taken in our department. Approval is not automatic and will be awarded only on a case-by-case basis and must be accompanied by a syllabus.
   - Courses taken in a Duke abroad program (e.g., Duke in Florence, Duke in Berlin) are **not counted as transfer credits** towards the major because they are considered to have been taken at Duke.

**Cross-listed Courses**: Three Duke courses from other departments that have been cross-listed in history can count towards the ten courses required for the major.
However, when taking courses cross-listed in history that originate in other departments, the major must be careful to guarantee that their ten courses for the major include seven courses listed as "core" courses on the website.

In exceptional cases, a student may petition the DUS to consider a specific cross-listed course for classification as "core" for the purpose of the major.

Foreign Languages: Majors interested in a particular area of study benefit from knowledge of the language of that area. Those considering possible graduate work are reminded that most graduate programs require advanced and/or reading knowledge of one or more foreign languages.

Majors Planning to Teach: Majors who plan to teach in secondary schools should consult an advisor in the Program in Education. Rising juniors who intend to practice-teach in the senior year should consider taking the senior capstone seminar as juniors.

Departmental Graduation with Distinction: Any student who is qualified may apply to the DUS for permission to undertake work leading to a degree with distinction (see the section of the History website on the Honors Thesis and Graduation with Distinction).

Independent Study (HISTORY 391/392) is usually undertaken by students concurrently with the Thesis Seminar or with an instructor with whom they have had a course. They offer students a unique opportunity for directed work in an area of special interest not available in the existing course offerings.

- A proposal for directed reading and research should include a detailed description and a list of the proposed readings, and should result in a substantive paper or report.
- The form must be signed by the instructor and the director of undergraduate studies.

Interdisciplinary Program in Engineering (IDEAS) (BSE)

Program Code: U-IDC-BSE
Degree Designation: Bachelor of Science in Engineering
Department: Pratt School of Engineering, Electrical & Computer Engineering Department
Website: pratt.duke.edu/undergrad/students/policies/3512

Program Summary
Through IDEAS: Interdisciplinary Engineering & Applied Science, undergraduates propose their own curricula, or use approved curricula, to create specialized Bachelor of Science in Engineering (BSE) degrees.

To participate, engineering students (in consultation with an independent study advisor and appropriate faculty members) propose unique combinations of courses designed to meet their career objectives.

To guide students while creating their proposals, a General Curriculum template and three Approved Curricula templates can be found on the IDEAS site.

IDEAS curricula are not specifically accredited by the Engineering Accreditation Commission of ABET, but do satisfy the national general engineering accreditation criteria.

Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements
Students must submit proposals to the Engineering Faculty Council, through the Office of the Engineering Dean, for approval.

Timing
A proposal may be submitted as early as the second semester of the first year, but must be submitted before the senior year.

Minimum Requirements
Although not individually accredited, these programs satisfy the national general engineering accreditation criteria.

At the Pratt School of Engineering, the term "national general engineering accreditation criteria" corresponds to 34 courses:

- Writing 101
- 9 Courses in Mathematics and the Natural Sciences
  - At least one (1) Physics Course must be taken post-matriculation
  - Engineering Track Course prerequisites may satisfy Natural Science requirements
- 13 Courses in Engineering
  - EGR 101 Engineering Design & Communication
  - EGR 103 Computational Methods
Students with Advanced Placement (AP) credit in Computer Science may substitute CS 201

- EGR 238 Data & Decision
- 4 Engineering Track Core Courses
- 2 Engineering Track Electives
  - 5 or more Track Core and Track Electives must be at or above 300 level
  - 3 or more Track Core and Track Electives must be at or above 400 level
- 2 Engineering Science Electives
  - Engineering Track Course prerequisites may satisfy Engineering Science elective requirements

- 1 Open Track Elective
  - Not necessarily an engineering course

- 5 Social Science & Humanities Courses
  - Must cover 3 of 4 distribution areas: FL, CZ, SS, AL
  - 2 courses in the same department; one must be at or above 200 level
  - 2 Social Science & Humanities course requirements may be satisfied by AP credits

- 5 or More Free Electives
  - AP credit may not be applied toward free elective courses

Curricula and Templates
While it is not required, students may use—and are strongly encouraged to use—the Approved Curricula and templates provided on the IDEAS site.

International Comparative Studies (AB)
Program Code: U-ICS-AB
Degree Designation: Bachelor of Arts
Department: International Comparative Studies
Website: internationalcomparative.duke.edu/academics

Program Summary
The International Comparative Studies Program offers a bachelor of arts degree to students interested in an interdisciplinary individualized major focused on global and transnational studies. The ICS Program mission is to prepare lifelong learners who can live, work, and thoughtfully engage with people and problems in a complex, diverse, and interconnected world. ICS majors gain knowledge in the culture(s), history, politics, and language of one geographic region of the world through region and foreign language coursework. This multidimensional study of a particular part of the world is complemented by an examination of transnational dynamics through core and comparative coursework in global studies. Well over 75 percent of ICS majors complete some of their coursework in study away programs. Core courses, individualized advising, and research mentoring encourage ICS students to formulate and address questions through a variety of disciplinary approaches.

The most up-to-date listings of approved global and region courses is available on the ICS website under “Courses.”

The ICS major is divided into four categories: (1) Core courses are taught by ICS faculty members and include the required gateway course (taken in first or second year), the required capstone seminar (taken in senior year), and for students in excellent academic standing who wish to complete a lengthy supervised research project, the two-semester senior year honors thesis sequence. (2) Region courses focus on a particular geographic area of the world. (3) Global courses focus on global and transnational studies. (4) Foreign language courses build expertise in one language related to a student’s region focus. Region, Global, and foreign language courses are offered by faculty members in many of Duke’s academic programs and departments, as well as in study away programs. Each ICS major must complete a curricular plan, updated with and approved by an ICS advisor each semester, to assure they are on track toward fulfilling major requirements.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction
ICS offers a Graduation with Distinction program for majors whose achievements in university coursework and co-curricular experiences have prepared them to complete an interdisciplinary research-based project on a question of interest relevant to the global and transnationalism focus of the ICS Program.

Structure: A two-semester seminar sequence (International Comparative Studies 495S and International Comparative Studies 496S), taken fall and spring of senior year, supports the completion of the distinction project. Each student chooses a Duke faculty member qualified and willing to mentor the student on the project topic to serve as a research supervisor, and is guided through a multi-stage writing process by the ICS faculty member teaching the seminar sequence. Under most circumstances, the product is a completed thesis of seventy to one hundred pages on a topic relevant to ICS’s focus in global and transnational studies. Students may work in, with, and through different mediums, but all are required to complete a research-based and interdisciplinary piece of writing and to submit the final project in electronic form. The completed project is proposed research project and to have taken at least one university course that required completion of a research paper (on any topic). The ICS Distinction Program Coordinator can provide assistance on conceptualizing an ICS honors project. Further details on the application process,
Academic Requirements

Ten courses (Core, Region, and Global) at least eight of which must be at or above the 200 level and at least two of which must be at or above the 400 level. Four foreign language courses in one language, initiated at any level. Region and Global courses may not be below the 100 level. The ICS gateway course fulfills one of the 100-level requirements and the ICS capstone seminar fulfills one of the 400-level or above requirements.

Successful completion of the first semester of the ICS honors thesis sequence fulfills the capstone requirement. The second semester of the major instead of the standard ten.

Application: To apply for admission to the honors seminar sequence a student must complete, by the end of the junior year, a substantial portion of the major (roughly eleven courses, including foreign language), must have strong academic achievement (at least 3.3 GPA) in all the courses completed for the major, and must have an updated and approved ICS curricular plan on file with the program. Applications from interested juniors are due the week after spring break. The application includes a project proposal (about five pages) and initial bibliography (one to two pages), along with a letter of recommendation from a Duke faculty member qualified and willing to serve as the research supervisor. Ideally, this faculty member should be someone who has worked with the student in a classroom setting. It is particularly important to have taken at least one university course that provides foundational knowledge on the topic of the honors seminars but whose thesis is denied distinction will receive graded credit for the coursework.

Double Honors: The ICS Program does not typically allow students to pursue double honors (i.e., complete a single interdisciplinary thesis for two different departments), but individual and rare exceptions may be granted.

Further details on deadlines, schedules, and expectations for Graduation with Distinction in ICS are available on the ICS website.
under any cross-list department/number.

- **Study Away Courses in a Foreign Language**: Content courses offered in an advanced level of a non-English language at a study-away institution may count toward a major’s Region concentration if they meet region criteria.

- **Global Courses (4)**: ICS majors complete four courses chosen from a robust list of ICS-approved Global courses that is available on the ICS website. Global courses are typically assigned an ICS number in DukeHub, but are listed and organized according to the original disciplinary or interdisciplinary department/homeroom number on the ICS website.

  - Criteria for Global courses: Content is organized by a connective, transnational, comparative, or international approach to cultural, social, historical, political, economic, environmental, or discursive dynamics. Courses approach the above through one or more of the following nodes: 1) institutions, organizations, or systems; 2) identities and lived experiences; 3) circulations, circuits, borders, and migrations; 4) social or other movements; 5) cultural productions and receptions. By definition, course content should not be delimited by a focus on one place or state. Course content is theoretically informed and empirically engaged (ethnography, observation, interviews, archives, surveys, and statistical data; institutional, literary, artistic, cultural, commercial, or environmental artifacts, processes, or forms). Course content examines dynamics that occurred at any time from 1700 to the present, although it may include content that began in earlier periods.

  - Interdisciplinarity: The four Global courses chosen must come from at least two disciplinary or interdisciplinary departmental homes. The disciplinary home is determined by the originating departmental sponsor of the course. Approved ICS Global courses are listed according to the originating disciplinary home/homeroom number on the ICS website. However, a given ICS student may enroll under any cross-list department/department number of an approved Global course.

  - **Foreign Language Corequisite (4 courses)**: Because language knowledge is crucial to deeper historical, political and cultural understanding, as well as social and professional functioning in a variety of settings, the ICS major requires two years (four full courses) of university courses in one non-English language used by a group in part or all of the geographic region concentration. College Board, IB, or other pre-university language courses, knowledge, or exams cannot be counted toward this requirement. Language courses used to fulfill the requirement may begin at any level. Barring other restrictions, students should count toward the ICS major the most advanced university language courses taken. Barring other restrictions, unlimited content courses offered in one foreign language major may count toward the foreign language corequisite. Language courses can be found in their sponsoring departments and will not be listed by ICS numbers in DukeHub.

  - **Double Counting**: One advanced language course may double count in the appropriate Region or Global category if its content meets ICS Region or Global criteria and other thresholds (see FAQs on the ICS website), whether the course is offered on Duke’s campus or is an approved study away course.

  - **Research Methods**: In certain situations, such as when a student is fluent in a non-English language widely used in the chosen Region concentration, one of the foreign language courses may be met with a research methods or research analysis course.

  - **Notes**: Although the foreign language requirement is not flexible, in certain cases there is reasonable flexibility in regard to the language used to fulfill it. Examples of such cases: 1) when a second year of a language is not taught at Duke; 2) when no language course is available at a sufficiently advanced level. See “Major Requirements” on the ICS website for additional notes on the ICS foreign language requirement.

- **Capstone Seminar: International Comparative Studies 489S (Capstone Seminar in International Comparative Studies)**. At least one section of this seminar is offered each fall and spring semester. The seminar is restricted to declared ICS majors in their final year or semester (for December graduates) of study. International Comparative Studies 195 is a prerequisite for International Comparative Studies 489S. ICS seniors who produce capstone seminar research projects of exceptional quality are nominated for the ICS Capstone Research Prize by their faculty member. Winners receive a book prize, are listed in the Duke Commencement Program, and are recognized in the ICS Diploma Program and Ceremony.

**ICS Advising & ICS Curricular Plan**: After a student has formally declared an ICS major, the director of undergraduate studies will assign the student an ICS faculty advisor. Each major is required to complete an ICS Curricular Plan (forms are available on the ICS website). In order to assure that each student's curricular plan is accurate and up-to-date and each ICS major is on track for timely completion of the major, each ICS major is responsible for meeting with their ICS faculty advisor every semester before registration. Students who are studying away often communicate with their ICS advisor through email or Skype. This requirement to update a curricular plan every term also holds true for ICS AB2 majors and ICS majors who plan to study away the following semester, unless they have completed all ICS requirements. Because of the interdisciplinary nature of the ICS major, meeting with one’s advisor and updating the curricular plan is the single most important administrative aspect for a successful senior clearance before commencement.

**Study Away**: ICS students are strongly encouraged to study away for a semester, and a large majority of ICS majors complete some part of their coursework in study away programs. Students considering or planning to major in ICS are expected to complete the required gateway course, ICS 195, before a study away semester. Up to four full credit study away or transfer courses that meet ICS Region, Global, or foreign language criteria may count toward the major. Students who declare an ICS major are required to meet with an advisor and begin their ICS Curricular Plan before leaving for a study away program. The ICS gateway, capstone, and thesis courses must be taken at Duke and may not be substituted with transfer or study away courses. Further important information on study away requirements and policies is available on the ICS website.

**Grants and Awards**: Duke students who are not graduating seniors are eligible to apply for research funding provided by several units on campus. For more information, visit the Undergraduate Research Support Office website at undergradureresearch.duke.edu. In addition, rising seniors accepted into the ICS Distinction Program may apply for a summer travel grant to advance language learning and/or to conduct field
research, funded by the Scott Lee Stephenson Memorial Fund. The author of an exceptional distinction project is recognized with the ICS
Distinguished Thesis Award. Additionally, up to four Capstone Research (Book) Prizes are awarded to seniors who produce superb research in an
ICS capstone seminar.

Italian Studies (AB)
Program Code: U-ITAL-AB
Degree Designation: Bachelor of Arts
Department: Romance Studies Department
Website: romances.tudies.duke.edu/undergraduate/majors/italian-studies

Program Summary
The Italian studies major offers two concentrations: Italian studies and Italian and European studies.
Students majoring in Italian develop language skills in their social and cultural contexts. The combination of linguistic and cultural competency is
excellent preparation for a variety of professional careers in business, government, the humanities, and science. Double (second) majors are
encouraged and supported. Numerous opportunities are available, including programs of study abroad, work study, interdisciplinary programs,
and Fulbright. Students interested in majoring in Italian should consult the director of undergraduate studies.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction
Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year.
Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely
audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further
information may be obtained from the director of undergraduate studies or the assistant to the director.

Study Abroad
Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's
culture. Courses taken abroad count toward the core and/or related courses as follows:

- **Duke-Administered Semester Programs in English (Duke in Florence; Duke in Venice)**
  - **Major:** A maximum of three courses per semester may be counted as related courses.

- **Duke-Administered Summer Programs in the language (Duke in Bologna)**
  - **Major:** Two courses may be counted toward the core-course requirement.

- **Duke-Administered Summer Programs in English (Duke in Venice)**
  - **Major:** One course may be counted toward the core-course requirement.

- **Non-Duke-Administered Semester Programs in Italy (All courses taught entirely in Italian)**
  - **Major:** A maximum of two courses per semester may count toward the core-course requirement and a maximum of one may count as a
    related course.

- **Non-Duke-Administered Semester Programs in Italy where not all courses are taught in Italian**
  - **Major:** A maximum of two courses per semester may count toward the core-course requirement.

- **Non-Duke-Administered Summer Programs (Courses taught in Italian)**
  - **Major:** One course may be counted toward the core-course requirement.

Academic Requirements

Academic Requirements

Italian Studies Track
A total of ten courses, at least eight of which must be at the 300 level or above. (Courses below the 300 level are restricted to Italian 213A, Italian
203, and Italian 204). Six of the ten courses must be taught in Italian, or taken concurrently with an Italian preceptorial (P) component (taught in
Italian) or the Italian 370T tutorial and include at least one course in each of the following areas: Medieval, Renaissance, Modern/ Contemporary,
Linguistics. The four remaining courses may be taught in English, such as courses in Romance studies, or cross-listed courses with Italian content
offered by other departments or programs such as art history, cultural anthropology, English, cinematic arts, history, international comparative area
studies, literature, medieval and renaissance studies, music, philosophy, political science, religion, and theater studies. Duke-approved courses
taught in Italian in study abroad programs may also count toward this major concentration.

Italian and European Studies Track
An interdisciplinary concentration requiring a total of ten courses, at least eight of which must be at the 300 level or above. (Courses below the 300 level are restricted to Italian 213A, Italian 203, and Italian 204). Five of the ten courses must be taught in Italian, or taken concurrently with an Italian preceptorial (P) component (taught in Italian) or the Italian 370T tutorial, and include at least one course from two of the following areas: Medieval, Renaissance, Modern/Contemporary, Linguistics. Five related courses on any Italian and/or European topic may be taken in or outside the department and not in the language of the major (consult the undergraduate major advisor for approval of related courses). Duke-approved courses taught in Italian in study abroad programs may also count toward this major concentration.

Linguistics (AB)

Program Code: U-LING-AB
Degree Designation: Bachelor of Arts
Department: Linguistics Department
Website: linguisticsprogram.duke.edu/major

Program Summary
From the earliest philosophers to modern neuroscientists, researchers from a wide range of disciplines have explored a diverse range of issues concerning the human capacity for language and the diversity of the world’s languages. Linguists work at the intersection of these issues and define linguistics as the science of language and languages. During the past 150 years, linguists have developed a variety of theoretical paradigms to describe and explain language history, dialect variation, cross-cultural similarities and differences, the neurological processing and production of language, and the evolutionary emergence of language.

The linguistics major at Duke is unusual in its range of theoretical approaches coupled to the study of languages of the world. The required courses for the major stress empirical methods and the global database; the theory courses expose the student to the perspectives offered by historical and comparative linguistics, structural linguistics, generative linguistics, sociolinguistics, semiotics, discourse analysis, philosophy, cognitive linguistics, and psycholinguistics. The major maintains the traditional and mainstream body of linguistic inquiry and, at the same time, encourages exploration of the most recent developments in language study that issue from cultural and literary theory and the biological sciences.

The major is composed of ten courses, eight of which must be at the 200 level or above. The courses combine empirical methods with theory. They are devised to provide depth and breadth in linguistic theory, the different schools of linguistics, the history and development of linguistic thought, and the interdisciplinary aspects of linguistics in the context of languages and cultures. Majors must take Linguistics 201 and 202, which define the fundamental questions of linguistic theory in the context of the world’s languages; and in the junior or senior year the capstone course Linguistics 450S, which adds cohesion to the major. For depth, the student is required to take three courses from the list of theory courses, which provide the necessary theoretical and empirical constructs for the study of linguistics. In addition, two courses are required in one of the concentrations in a specific area of linguistics. All majors are required to take at least two foreign language courses at or above the 300 level. Students may petition to add courses to the list of courses that count toward the theory and disciplinary areas below (II and III).

Departmental Graduation with Distinction
The linguistics program offers work leading to Graduation with Distinction. See the program chair.

Procedure for Selection of Students. An overall GPA of 3.3 and GPA of 3.5 in the major are required. The process for admission to the Graduation with Distinction program is initiated by the submission of a research proposal to a faculty advisor by the end of the second semester of the junior year.

Expected Product. The central requirement is an honors thesis prepared by the student under faculty supervision. The thesis generally consists of three to five chapters with an extensive bibliography.

Levels of Distinction. The honors thesis committee will decide to grant distinction and at what level (Distinction, High Distinction, Highest Distinction) based on the quality of the completed work.

Special Courses Required. The program consists of two courses:
1. Research Independent Study (Linguistics 493). Taken in the fall semester of the senior year, this course is devoted to development of the honors thesis and includes close supervision of the writing stage of the project by a faculty member selected by the student.
2. Capstone Course (Linguistics 450S or 595). The second course is the capstone course required for all linguistics majors, which must be one of the following courses: Linguistics 450S, Senior Seminar in Linguistics, or Linguistics 595, Language, Music and Dementia.

Additional research independent study courses may be taken. Independent study courses are above and beyond the ten courses required for the major.
Academic Requirements

The linguistics major is composed of ten courses, eight of which must be at the 200 level or above. The courses combine empirical methods with theory. They are devised to provide depth and breadth in linguistic theory, the different schools of linguistics, the history and development of linguistic thought, and the interdisciplinary aspects of linguistics in the context of languages and cultures. The requirements are as follows:

- **Introductory Linguistics Courses (two):**
  - Linguistics 201 (Introduction to Linguistics)
  - Linguistics 202 (Languages of the World)

- **Capstone:** Linguistics 450S (Jr./Sr. Seminar in Linguistics) or Linguistics 595 (Language, Music and Dementia)

- **Theory:** Three courses in the study of theoretical linguistics. Courses to be chosen from the following list:
  - 203S. Introduction to Theoretical Linguistics
  - 204. English Historical Linguistics
  - 206. Variety in Language
  - 207. Psychology of Language (cross-listed)
  - 209. Philosophy of Language
  - 216S. Neuroscience and Human Language
  - 250. Symbolic Logic
  - 303. Fundamentals of Spanish Linguistics
  - 305S. Italian Sociolinguistics
  - 306S. Korean Sociolinguistics
  - 308S. Bilingualism
  - 364. Gender and Language
  - 410S. Linguistics and Law
  - 451. Language and Society
  - 471S. Language and Politics
  - 473S. Neuroscience and Multilingualism (cross-listed w/Neuroscience 439S)
  - 480S. Critical Discourse Analysis
  - 493. Research Independent Study
  - 490S. Special Topics in Linguistics
  - 494. Research Independent Study
  - 497. Second Language Acquisition and Research
  - 501. Cognitive and Neurolinguistics
  - 5025. Language, Brain, and Human Behavior
  - 506. Semiotics and Linguistics
  - 510. Brain and Language
  - 561S. Second Language Acquisition and Applied Linguistics
  - 590. Special Topics
  - 590S. Special Topics in Linguistics
  - 595. Language, Music and Dementia

- **Disciplinary Areas.** Two courses in one of the areas listed below. No course taken for credit as theory may be double-counted to fulfill the disciplinary concentration requirement. Qualifying courses are listed above under the heading "Regularly Scheduled Linguistics Courses and Special Topics Courses." Disciplines include:
  - Asian and Middle Eastern Studies
  - Computer Science
  - Cultural Anthropology
  - English
  - German
  - Italian
  - Neuroscience
  - Philosophy
  - Psychology
  - Romance Studies
  - Slavic and Eurasian Studies
  - Spanish

- **Junior/Senior Seminar in Linguistics (Linguistics 450S) or Language, Music and Dementia (Linguistics 595).** The capstone course for the major, usually taken in the junior or senior year.
Duke University

- Language Requirement. Two semester courses in a single language other than English at or above the 300 level, excluding languages in which the student possesses CEFR C2 proficiency in speech and writing. Advisor’s approval is required in order to determine the language chosen for the major. The specific language courses are too numerous to list here. Advisors should also be consulted for specific approval of the language choice if it does not conform to the list below: Arabic, Chinese, French, German, Greek, Hebrew, Hindi, Italian, Japanese, Korean, Latin, Polish, Portuguese, Russian, Spanish.

Linguistics and Computer Science, Interdepartmental (AB)
Program Code: U-ILGCS-AB
Degree Designation: Bachelor of Arts
Department: Computer Science Department, Linguistics Department
Website: cs.duke.edu/undergrad/idm/linguistics

Program Summary
In recent years, we have been witnessing exciting advances in the intersection of computing and linguistics, as well as growing interest in these disciplines among undergraduate students at Duke. We are happy to offer an inter-departmental major (IDM) that allows students to pursue their joint interests in Computer Science and Linguistics.

We expect student interests to be diverse, some interested more in computer science, while others may be more interested in theoretical linguistics, neurolinguistics, or sociolinguistics. There is no one-size-fit-all. The requirements below accommodate all of these interests. We have also annotated specific courses with their relevance to different tracks, and developed example semester-by-semester course plans for these tracks. Because of the rapid developments in the field, course offerings related to this IDM will likely continue to evolve in the coming years. We will continue to revise the course plan to reflect any such changes.

Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements
An IDM must consist of a minimum of 14 courses, split evenly between the two departments (i.e., seven courses in each).

From Computer Science
Prerequisites:
- COMPSCI101, 102, 103, or 116

Core (5): at least 2 out of 5 must be 300-level or above.
1. COMPSCI201 (Data Structures and Algorithms)
2. COMPSCI230 (Discrete Math for Computer Science)
3. COMPSCI330 (Design and Analysis of Algorithms) or 334 (Mathematical Foundations of Computer Science)
   - 330 is recommended as it is a quintessential COMPSCI course (required by the COMPSCI BS/BA degrees), but 334 is also relevant because of its coverage of formal languages. If one of them is used to fulfill this bullet, we recommend taking the other as an elective.
   - 250 is recommended for its coverage of architecture and lower-level computer languages.
   - 316 is recommended for its coverage of various data query languages and data management/analysis techniques.
5. One of COMPSCI 370 (Intro. Artificial Intelligence) or 371 (Elements for Machine Learning)
   - 370 is recommended for its coverage of knowledge representation and logic.
   - 371 is recommended for its coverage of data analysis techniques.

Electives (2): any COMPSCI courses at 200-level or above, besides the 5 used to fulfill the core requirement above. Here are some more recommended courses besides those already listed above:
- COMPSCI216 (Everything Data), for various aspects of text and data analytics
- COMPSCI1570 (Artificial Intelligence) and 671 (Machine Learning), as more advanced versions of 370 and 371, respectively
- COMPSCI1553 (Compiler Construction), for its coverage of the implementation of programming languages
- COMPSCI1527 (Computer Vision)

From Linguistics
Required CORE (5) courses:
1. LINGUIST 201 Introduction to Linguistics or LINGUIST 203 Elements of Linguistic Structure
2. LINGUIST 202 Languages of the World (and we could add a section on computer languages)
4. Neurolinguistic requirement (1 course from following: LINGUIST 216FS, 336S, 473S, 510, 595)
5. LINGUIST 450S - Junior/Senior research seminar in Linguistics (or junior/senior seminar that includes CS + LIN)

Plus Relevant Electives (2), including (but not restricted to) the following:

- LINGUIST 204 English Historical Linguistics
- LINGUIST 205 Law and Language
- LINGUIST 207 Psychology of Language – language and cognition, biological bases, animal communication, language pathologies, nonverbal communication, bilingualism
- LINGUIST 209 Philosophy of Language – theories of language, signs and symbols, theories of meaning, types of discourse (scientific, mathematical, poetic)
- LINGUIST 213FS Politics of Language – political theory, sociology and sociolinguistics approaches to understanding how language policies reflect and produce sociopolitical realities (topics include migration, citizenship, nationalism and decolonization)
- LINGUIST 216FS Neuroscience and Human Language – primary research in neuroscience, neurolinguistics, imaging and linguistic theory
- LINGUIST 217FS Language, Thought and Culture
- LINGUIST 250 Symbolic Logic – detailed analysis of deduction and deductive systems
- LINGUIST 303 Fundamentals of Spanish Linguistics
- LINGUIST 305S Italian Sociolinguistics
- LINGUIST 306S Korean Sociolinguistics
- LINGUIST 308S Bilingualism
- LINGUIST 336S Issues in Language Development – topics include critical periods, role of 'motherese', infant speech perception, innovative word creation, telegraphic speech, bilingualism, second language learning, cognition and culture, language pathology, focus on methodologies and analysis
- LINGUIST 364 Gender and Language – includes cognitive science, cultural anthropology/ethnographic and sociolinguistic research methods
- LINGUIST 396S Language in Immigrant America – language in context of immigration to U.S. from 1900 to present, approaches informed by language policy, media studies, literature, memoirs, linguistic anthropology, topics include identity, assimilation, race, bilingual communities, bilingual education, foreign accents, language contact
- LINGUIST 409S Identity and Linguistic Rights
- LINGUIST 437S Language Development - unique human ability: learning language, how young children first learn language, including: 1) how children figure out what sounds their language includes; 2) how infants learn words & their meanings; and 3) what kind of processes help babies figure out the grammar of their particular native language. Methods and analysis based on primary research, experimental and observational data, and new research initiatives.
- LINGUIST 451 Language and Society – language as social practice, including language and social identity (such as ethnicity, social class, age, gender), variation in language (including dialects, accents, registers), multilingualism, languages in contact (including pidgins, creoles), intercultural communication, language in education and media
- LINGUIST 471S Language and Politics – examination of the interfaces between language, migration, and socio-political structures in the newly independent nations of Eurasia. While these interfaces have long historical antecedents in nation-state formations, their manifestations in the post-national, post-communist era are novel and complex. Understanding these new dynamics requires viewing language from a political-sociological perspective that takes into account the interplays between the local, the national and the global.
- LINGUIST 473S Neuroscience and Multilingualism – healthy subjects and lesion-deficit studies, imaging methods and analysis (including BOLD fMRI and resting state, PET, MEG, EEG/ERP, eye tracking studies, fundamentals of languages and linguistic theory
- LINGUIST 480S Critical Discourse Analysis – central theories, frameworks and methodologies of CDA with analysis of real-world discourse and texts, ethical implications
- LINGUIST 510 Brain and Language – focus on imaging studies (fMRI [including BOLD and resting state], PET, MEG, EEG/ERP), functional connectivity, analysis of data and methods, theory and controversies
- LINGUIST 595 Music, Language and Dementia - neuroscience data on cognitive processing of languages and music in healthy subjects and pathology. Specific attention given to the interaction of language(s) and music in the brain, music therapy and dementia, and multilingualism and dementia. Topics include the role of languages and music in building cognitive reserve, linguistic breakdown and cognitive decline in healthy aging and dementia, cross-cultural studies of pitch and timbre perception across languages of the world, possible benefits of multilingualism in healthy aging, interactions of singing and memory, integration of auditory and visual neural systems in language and music.

Note: The Neurolinguistic courses are cross-listed with NEUROSCI. Other courses are often cross-listed with Cultural Anthropology, Sociology, English, Philosophy.
Program Summary

The Bachelor of Arts and Bachelor of Science degrees are offered with a major in Marine Science and Conservation, or in an individually designed interdepartmental concentration approved by the Director of Undergraduate Studies in Marine Science and Conservation. Information may be obtained in the office of the Director of Undergraduate Studies. These degree programs are offered through Duke University's Marine Laboratory in Beaufort, North Carolina. Course offerings are available in Durham and Beaufort. Full programmatic details are available on our website.

The Marine Science and Conservation majors and minor are offered through the Division of Marine Science and Conservation in the Nicholas School of the Environment. The majority of the Division of Marine Science and Conservation faculty are resident at the Marine Laboratory in Beaufort, NC. Additional courses in marine science are offered in Biology and Global Health in the Trinity College of Arts and Sciences; in the Divisions of Environmental Science and Policy and Earth and Climate Science in the Nicholas School of the Environment; and in the Pratt School of Engineering.

The Duke University Marine Lab provides students with a unique experiential opportunity to live and study in Beaufort for a full academic semester (fall or spring) or during two summer terms. The program emphasizes small class sizes, independent research projects, and integrated classroom, laboratory, and field experiences. Students have daily access to the surrounding marine environment and to modern scientific equipment including a shared-use molecular laboratory, and the Marine Robotics and Remote Sensing (MARSS) Lab.

Residential undergraduate courses are offered year-round (fall, spring, and summer sessions I and II) at the Duke Marine Lab. Fall and spring courses include travel courses which offer students opportunities for extended travel with Duke faculty to Mexico, Panama, Puerto Rico, Singapore, the US Virgin Islands, and Australia. Small class size and an island setting facilitate rewarding student-faculty interactions.

Go to Programs by Department to view all related programs.

For the AB Degree

This degree is designed to be a general liberal arts major, and targets students interested in studying social science, policy, and governance related to oceans.

Graduation with Distinction in Marine Science and Conservation

The Marine Science and Conservation degree offers a Graduation with Distinction option. Interested students with a 3.0 grade point average overall and a 3.2 grade point average in the Marine Science and Conservation major should apply by the beginning of their senior year. The application should include a written request to the Director of Undergraduate Studies describing the research project and identifying the faculty advisor who has agreed to supervise the research. At least one research independent study is required as part of the Graduation with Distinction process, although more than one is encouraged. The student will write a thesis describing their research. The thesis will be evaluated by the faculty advisor. The student will also present their results to fellow students and faculty before the end of their final semester.

Academic Requirements

Academic Requirements

Corequisites. Students must choose three of the following: Chemistry 101DL or 110DL, Chemistry 201L or 210DL (Chemistry 201L/210L is recommended but not required), Biology 201L or 202L or 203L, Physics 141 or 151L or 161L, Environment 155 or Econ 101 and 201 or PubPol 155 and 303. Students must also choose one of the following: Math 111L and 112L or 122L or Stats 101 (or equivalent).

Major Requirements. One gateway course: Future of the Oceans (MARSCI 201). Three core courses: Marine Biology (MARSCI 202), Marine Social Science (MARSCI 203), and Integrative Oceanography (MARSCI 204). Five elective courses at the 200-level or above, of which at least three must be Marine Science and Conservation "A" courses, and up to two courses can be alternative electives from other Duke departments. Courses can be a mix of natural, physical and social sciences. A maximum of two independent study credits can be used for electives. A maximum of one course from another university can be used as an elective with approval by the director of undergraduate studies. One capstone course: Marine Science and Conservation Capstone (MARSCI 350S). The capstone course may be substituted by a Graduation with Distinction thesis following the guidelines below.

Marine Science and Conservation (BS)

Program Code: U-MSC-BS
Degree Designation: Bachelor of Science
Department: Marine Science & Conservation
Website: nicholas.duke.edu/academics/undergraduate-programs/marine-science-conservation

Program Summary
Duke University

The Bachelor of Arts and Bachelor of Science degrees are offered with a major in Marine Science and Conservation, or in an individually designed interdepartmental concentration approved by the Director of Undergraduate Studies in Marine Science and Conservation. Information may be obtained in the office of the Director of Undergraduate Studies. These degree programs are offered through Duke University’s Marine Laboratory in Beaufort, North Carolina. For the BS Degree

This degree is designed for students wishing to pursue a career in ocean sciences including graduate studies.

Graduation with Distinction in Marine Science and Conservation

The Marine Science and Conservation degree offers a Graduation with Distinction option. Interested students with a 3.0 grade point average overall and a 3.2 grade point average in the Marine Science and Conservation major should apply by the beginning of their senior year. The application should include a written request to the Director of Undergraduate Studies describing the research project and identifying the faculty advisor who has agreed to supervise the research. At least one research independent study is required as part of the Graduation with Distinction process, although more than one is encouraged. The student will write a thesis describing their research. The thesis will be evaluated by the faculty advisor. The student will also present their results to fellow students and faculty before the end of their final semester.

Academic Requirements

Academic Requirements

Corequisites. Students must choose four of the following: Chemistry 101DL or 110DL, Chemistry 201L or 210DL (Chemistry 201L/210L is recommended but not required), Biology 211L or 231L or 203L, Physics 141L or 151L or 161L, Environment 155 or Econ 101 and 201 or PubPol 155 and 303. Students must also choose one of the following three options: Math 111L and 112L or Math 122L or Math 111L and Stats 101 (or equivalent).

Major Requirements. One gateway course: Future of the Oceans (MARSCI 201). Three core courses: Marine Biology and Ecology (MARSCI 202), Marine Social Science (MARSCI 203), and Integrative Oceanography (MARSCI 204). Five elective courses at the 200-level or above, at least three must be MARSCI "A" courses, up to two courses can be alternative electives from other Duke departments. Courses can be a mix of natural, physical and social sciences. A maximum of two independent study credits with MARSCI faculty can be used for electives. A maximum of one course from another university can be used as an elective with approval by the director of undergraduate studies. One capstone course: Marine Science and Conservation Capstone (MARSCI 350S). The capstone course may be substituted by a Graduation with Distinction thesis following the guidelines below.

Mathematics (AB)

Program Code: U-MATH-AB
Degree Designation: Bachelor of Arts
Department: Mathematics Department
Website: math.duke.edu/undergraduate/major

Program Summary

The Department of Mathematics offers both the AB degree and the BS degree. Students who plan to attend graduate school in mathematics or the sciences should consider working toward the BS degree, which requires at least eight courses in mathematics numbered Mathematics 230 or above. The AB degree requires at least seven courses in mathematics numbered Mathematics 230 or above. At least half of the major/minor courses numbered above 212 should be taken at Duke. In particular, Mathematics 401 (or 501) and 431 (or 531) should be taken at Duke.

The director of undergraduate studies can be consulted for additional information and advice on course selection. The Handbook for Mathematics Majors and Minors, published by the department, can be used as a guide in developing a coherent program of study consistent with professional goals.
Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**
The department offers a program for Graduation with Distinction in mathematics. See the Handbook for Mathematics Majors and Minors and also the section on honors in this bulletin.

**Mathematics (AB) (U-MATH-AB)**

**Academic Requirements**

**Prerequisites.** Mathematics 21 or 111L or 121 or an equivalent course; Mathematics 22 or 112L or 122 or 122L or an equivalent course; Mathematics 212 or 222 and Mathematics 221 or equivalent courses. (Many upper-level mathematics courses assume programming experience at the level of Computer Science 94. Students without computer experience are encouraged to take Computer Science 101.)

**Major Requirements.** Seven courses in mathematics numbered 230 or above including Mathematics 401 or 501 and Mathematics 431 or 531.

**Mathematics (BS)**

Program Code: U-MATH-BS
Degree Designation: Bachelor of Science
Department: Mathematics Department
Website: math.duke.edu/undergraduate/major

**Program Summary**
The Department of Mathematics offers both the AB degree and the BS degree. Students who plan to attend graduate school in mathematics or the sciences should consider working toward the BS degree, which requires at least eight courses in mathematics numbered Mathematics 230 or above. The AB degree requires at least seven courses in mathematics numbered Mathematics 230 or above. At least half of the major/minor courses numbered above 212 should be taken at Duke. **Departmental Graduation with Distinction**
The department offers a program for Graduation with Distinction in mathematics. See the Handbook for Mathematics Majors and Minors and also the section on honors in this bulletin.

**Mathematics (BS) (U-MATH-BS)**

**Academic Requirements**

**Prerequisites.** Mathematics 21 or 111L or 121 or an equivalent course; Mathematics 22 or 112L or 122 or 122L or an equivalent course; Mathematics 212 or 222 and Mathematics 221 or equivalent courses. (Many upper-level mathematics courses assume programming experience at the level of Computer Science 94. Students without computer experience are encouraged to take Computer Science 101.)

**Major Requirements.** Eight courses in mathematics numbered 230 or above including Mathematics 401 or 501; Mathematics 431 or 531; and one of Mathematics 333, 342, 411, 412, 502, 532, 541, 581. No more than three electives at the 200-level may count toward the major. The BS degree also requires a pair of science courses from the following list:

- Physics: (Physics 25 (AP), 141L, 151L, or 161D) and (Physics 26 (AP), 142L, 152L, or 162D)
- Statistical Science: Statistical Science 210 and (Statistical Science 360 or 325)
- Economics: Economics 205D and Economics 210D
- Electrical and Computer Engineering: ECE 110L and ECE 280L
- Computer Science: Computer Science 330 and Computer Science 334
- Biology: (Biology 201L and Biology 202L) or (Biology 203L and Biology 215L) or (Biology 201L or 203L and Biology 329L or 329D) or (Biology 202L or 203L and Biology 209) or (Biology 202L or 203L and Biology 460)
- Chemistry: (Chemistry 21 (AP), 101DL, or 110DL) and Chemistry 201DL

**Mechanical Engineering (BSE)**
Duke University

Program Code: U-ME-BSE
Degree Designation: Bachelor of Science in Engineering
Department: Pratt School of Engineering, Mechanical Engineering & Materials Science Department
Website: mems.duke.edu/undergrad/degrees/planning

Program Summary

The mechanical engineering program is accredited by the Engineering Accreditation Commission of ABET.

Mechanical engineers are concerned with the optimum use of materials, energy, time, and individual effort to serve societal needs through the design of machines, structures, devices, and mechanical, thermal, and electro-dynamic systems, and through better understanding of dynamic processes involving these systems. They have a wide involvement in many industries including aerospace, automotive, energy and power generation, biomechanical and biomedical engineering, construction, electronics, manufacturing, national defense, and transportation systems. Within these industries, the engineer might specialize in the design, analysis, automation, operation, or marketing of systems or services. The individual’s contribution may lie anywhere in the spectrum from highly theoretical to imminently practical, and often involves leadership as an engineering manager or organization executive.

Because mechanical engineers in industry and research engage in such a great variety of activities, their education must be broadly based. Our goal is to graduate mechanical engineers who embody excellence in a broad sense. We expect our graduates to move to industry positions or on to graduate study, or to carry the attributes of an engineering education into other disciplines. The mechanical engineering program of study must include mathematics and basic sciences, fundamentals and applications in several engineering sciences, and team-based experience in the process of design, where theory is applied in the context of real needs and limitations, and where judgment must be exercised. Our mechanical engineering graduates should be able to think critically when solving problems and managing tasks and communicate effectively in multidisciplinary professional environments. To be a responsible member of the engineering profession, each graduate must be aware of social, ethical, environmental, and economic factors and constraints on engineering activity, and must understand the importance of these matters in a global context. We aspire to have our graduates exhibit intellectual depth and creativity, uphold high ethical standards, and show a commitment to the betterment of society through service and professional work.

Our specific Program Educational Objectives are to prepare our graduates to:
- Identify and address significant needs and challenges in engineering and society, and effectively communicate solutions
- Advance in professional careers that may encompass a broad range of endeavors, both technical and non-technical
- Exhibit intellectual depth and creativity in employment, advanced education and research
- Uphold high ethical standards and show a commitment to the betterment of society through service and professional work

The curriculum capitalizes on the exceptional abilities of our highly select students to cultivate the learning, thinking, and problem-solving abilities needed to adapt, to develop, and to exercise responsible leadership through times of rapid change. The program provides firm preparation in the essential engineering topics while allowing wide flexibility for students to pursue their own specialized interests. The overall program requirements are summarized following the list of courses.

Go to Programs by Department to view all related programs.

Mechanical Engineering (BSE) (U-ME-BSE)

Academic Requirements

Academic Requirements

The major requirements for mechanical engineering are included in the minimum total of 34.0 course credits listed under general requirements. The following specific courses or their approved alternatives must be included. Engineering courses: Engineering 121L (Engineering Innovation), Engineering 201L (Mechanics of Solids), Engineering 224L (Mechatronics), Engineering 244L (Dynamics); mechanical engineering courses: Mechanical Engineering 221L (Materials), Mechanical Engineering 321L (Analysis for Design), Mechanical Engineering 331L (Thermodynamics), Mechanical Engineering 336L (Fluid Mechanics), Mechanical Engineering 344L (Control Systems), Mechanical Engineering 421L (Mechanical Design), Mechanical Engineering 424L (Mechanical Systems Design), Mechanical Engineering 431L (Heat Transfer); two upper-level mechanical engineering electives to encourage depth in areas of particular interest. In addition, the program allows for four additional general electives, two of which must be upper level and can be used for further breadth or depth. Students are encouraged to consult with their advisors when selecting areas of interest and electives.

The MEMS Undergraduate Program Handbook (available on the departmental website at mems.duke.edu/undergrad/degrees/planning) provides examples of course sequences that incorporate all general requirements and departmental requirements comprising the accredited mechanical engineering major. In addition, a downloadable MEMS Curriculum Flow Chart and MEMS Annotated Check Sheet are also available on the website, and provide precise summaries of the curriculum requirements and prerequisite structure.

Usually students intending to study abroad should plan to travel in the fall semester of their junior year. Typically these students are expected to take two courses abroad that are approved as equivalent to required mechanical engineering courses and/or mechanical engineering electives. Students should consult their advisor, the Office of Global Education, and the mechanical engineering and material science director of undergraduate studies.
Options for a certificate in aerospace engineering, a certificate in energy and the environment, a minor in energy engineering, a minor or second major in electrical and computer engineering, or a second major in biomedical engineering are described in the MEMS Undergraduate Program Handbook (available at mems.duke.edu/undergrad/degrees/planning). Mechanical engineering and material science adheres strictly to the Pratt major and minor requirements described in the front portion of this bulletin. Students interested in second majors and minors with departments in Trinity College should seek information from the department of interest.

Medieval and Renaissance Studies (AB)
Program Code: U-MDVL-AB
Degree Designation: Bachelor of Arts
Department: Medieval and Renaissance Studies Program
Website: cmrs.trinity.duke.edu/undergraduate/major-and-minor

Program Summary
The Program in Medieval and Renaissance Studies is designed to provide the student with a well-rounded understanding of the historical, cultural, and social forces that shaped the medieval and Renaissance periods. The program is divided into four areas of study: fine arts (art and music); history; language and literature (English, French, German, Greek, Italian, Latin, and Spanish); and philosophy and religion.

The major requires ten courses, two requirements, and eight elective distribution courses taken in the following four areas of study: history; fine arts (art and music); language and literature (English, French, German, Greek, Italian, Latin, and Spanish); philosophy and religion.

Go to Programs by Department to view all related programs.

Graduation with Distinction
Majors are encouraged to pursue honors work in an area of special interest.

Procedure for Selection of Students. The student should apply to the director of undergraduate studies or program coordinator during the junior year, and must maintain a minimum GPA of 3.5 in the Medieval and Renaissance Studies major.

Expected Product. A written thesis based on at least one independent study (Medieval and Renaissance Studies 491, 493) with a Medieval and Renaissance studies faculty member who directs the thesis.

Evaluation Procedure. Evaluation by a committee of three Medieval and Renaissance Studies faculty members appointed by the director of undergraduate studies, one of whom must be the thesis director.

Levels of Distinction. Recommendation from the review committee for distinction, high distinction, and highest distinction based on the quality of the thesis and on performance in the major program.

Special Courses. The Medieval and Renaissance Studies independent study courses (Medieval and Renaissance Studies 491, 493) may count toward the major. The thesis may be written in conjunction with independent study work in either the junior or senior year.

Academic Requirements

Students must either participate in the Medieval and Renaissance Focus Program or take one course designated as Medieval Cultures and one as Renaissance Cultures. In addition to these two courses, students must take the remaining eight elective courses in one of the following distributions: (a) 3-3-2-0, three courses in two of the four areas of study and two courses in a third area; or (b) 3-3-1-1, three courses in two of the four areas of study and one course in each of the other two areas.

Each program is tailored to the needs and interests of the student. After discussion with the associate director or director of undergraduate studies for Medieval and Renaissance Studies, the student submits a provisional program of study outlining special interdisciplinary interests. Normally the program is planned before the end of the sophomore year to allow time to acquire a working knowledge of languages pertinent to specific interests.

The Four Course Study Areas
The following courses are taken in distributions across four areas of study. Some of these courses are available in more than one study area. Cross-listed courses may count toward the major or minor in both Medieval and Renaissance Studies and in the cross-listed departments or programs.

Area 1: Fine Arts

Area 2: History
Area 3: Language and Literature

Area 4: Philosophy and Religious Studies

Additional Topics and Seminar Courses
The following topics courses are taught in various disciplines and vary from semester to semester. They may be taken in any of the above four study areas depending on the nature of their subjects. Students need to consult with a Medieval and Renaissance Studies advisor to determine how any one of these courses may be distributed: 89S, 190A, 190S, 291, 293, 390, 390A, 390S, 491, 493, 590, 590S.

Music (AB)
Program Code: U-MUS-AB
Degree Designation: Bachelor of Arts
Department: Music Department
Website: music.duke.edu/undergraduate/major

Program Summary
Music is among the most ancient of human pursuits and has long been viewed as a crucial part of education. As a discipline, it has its own logic and grammar in the understanding of which the mind is stretched and tested. Students at Duke encounter a variety of approaches to music that encompass the many ways that we create, perform, and comprehend it.

Courses fall into three broad categories: theory and composition; literature, history, and ethnomusicology; and applied music (performance). Within these are included many kinds of instruction, such as lessons in performance and composition; theory, history, and literature lectures and seminars; electronic music classes; ensembles; practical laboratory work (such as ear-training or Listening Lab), coaching sessions in chamber music; and classes in improvisation. Students’ musical activity can vary widely across the spectrum. Almost every student has some personal involvement with music, and the courses aim to further that involvement, whether it is a simple hobby or a compelling interest.

The requirements present a balanced selection of courses in music theory, history, literature, and performance, and are a means of preparing graduates for further professional training in the art of music. The music major can also be an attractive pursuit for the well-rounded undergraduate planning a career in another field. A sequence of three courses seeks to develop the student's fluency in music theory and another four semesters offer a survey of Western music history. Students pick three further courses from a range of musical styles, including jazz, world music, rock, and other electives. As they progress through the major curriculum, students develop their practical musicianship and performance skills through music theory/labs, applied lessons, and participation in music department ensembles.

Go to Programs by Department to view all related programs.

Applied Music
Provided they qualify by audition, students may enroll in private instruction and participate in ensembles. Auditions must be arranged with the instructor prior to registration. For more audition details, visit music.duke.edu/lessons/auditions-schedule. Enrollment in an applied music course does not guarantee permission to enroll in the instructor’s class or ensemble the following semester; in some cases, another audition may be required. Those students who wish to study privately but do not qualify for university-level instruction should consider group lessons or contact department faculty for recommendations for local instructors. All applied music courses may be repeated for credit, but no more than two ensembles may be taken concurrently.

Departmental Graduation with Distinction
Music Majors who have earned a minimum 3.5 GPA in music courses may undertake work leading to departmental Graduation with Distinction. The candidate must apply to the Director of Undergraduate Studies by March 20 of the junior year. The project is normally a yearlong endeavor involving an independent study (Music 393), two semesters of advanced study in performance or composition, or an appropriate graduate seminar each semester of the senior year. It must culminate in (a) a substantial paper (historical, analytical, or theoretical); (b) a full-length recital with a shorter paper or composition; or (c) a major composition with a shorter paper or half-length recital. The final project must be completed by March 31 of the senior year and be approved by a faculty committee. For more information, visit music.duke.edu/undergraduate/graduation-with-distinction.

Music (AB) (U-MUS-AB)

Academic Requirements

Academic Requirements
The core curriculum comprises 3 courses in music theory, 4 in Western music history, and 3 electives (chosen from a wide selection, including jazz, world music, rock, and more.)

- Prerequisite. Music 261
**Duke University**

- **Requirements.** Music 255S, 256S, 257, 258, 361, 461
- **Applied Music.** Two semesters of study in an instrument or voice
- **Ensemble.** Two semesters in a departmental ensemble (excluding Music 210-3)
- **Three Additional Courses** (two of which must be above the level of Music 213) to be chosen from: Music 120, 121, 129S, 130, 137, 140, 141, 143, 144, 146, 147, 161, 161-2, 1625, 163L, 190S, and Music courses numbered above 213

**Major in Music with a Concentration in Performance**

- **Prerequisite.** Music 261
- **Requirements.** Music 255S, 256S, 257, 258, 361, 461
- **Applied Music.** At least five semesters of individual applied instruction (Music 103-108, 203-208, 401) earning a minimum of four full credits. (including 2 semesters of Music 401, culminating in a full recital)
- **Ensemble.** Two semesters in a departmental ensemble (excluding Music 210-3)
- **One Additional Music Elective, approved by the Director of Undergraduate Studies.**

For a list of Music courses offered, please refer to [music.duke.edu/courses](http://music.duke.edu/courses).

**Students majoring or minoring in Music MUST complete the core requirements for a letter grade. S/U grading will NOT count toward the completion of the Music major or minor.**

**Waiver of Music Minor Requirements**

A request for waiver of any requirement for the music major or the music minor, together with supporting documentation where appropriate, should be submitted to the Director of Undergraduate Studies.

After reviewing the request, the DUS may decide that the student needs to take a departmental examination in the area before a final decision can be made. Waived courses earn no credit towards the 34-course graduation requirement, nor will grades for them appear on your transcript.

**Neuroscience (AB)**

Program Code: U-NEUR-AB
Degree Designation: Bachelor of Arts
Department: Neuroscience
Website: [psychandneuro.duke.edu/undergraduate/neuroscience/requirements](http://psychandneuro.duke.edu/undergraduate/neuroscience/requirements)

**Program Summary**

Like the inner workings of the brain itself, neuroscience synthesizes discovery from diverse sources of knowledge. The undergraduate curriculum in neuroscience reflects this interdisciplinary perspective and challenges students to explore knowledge across levels of analysis: from the molecular and cellular level, through the level of neural circuits within which cells are organized and interconnected, and toward the level of behavior where the functions of neural circuits and systems, including human cognition, are manifested. A comprehensive understanding of neuroscience requires knowledge of each level and integrative learning across levels.

The principal strength of this program is that it provides rich opportunities for undergraduate students to study brain science with faculty from diverse disciplines who bring their complementary perspectives and expertise to the classroom and laboratory. Thus, the undergraduate curriculum in neuroscience is truly a joint, interdisciplinary major/minor that draws faculty and courses from several departments, chiefly the Department of Psychology and Neuroscience in the Trinity College of Arts & Sciences. Students may also elect to pursue faculty-mentored research and scholarship wherever brain science discovery happens at Duke. Indeed, the broad impact of neuroscience discovery now extends beyond the academic disciplines in the natural sciences to spaces where neuroscientists collaborate and regularly interact with experts in ethics, law, business, social sciences, philosophy, engineering, the fine arts and performing arts, and the humanities. Accordingly, our neuroscience curriculum reflects this broad interdisciplinary platform for discovery and learning, with a rich offering of coursework and experiences that reflect the exciting growth of neuroscience and its increasing relevance to human flourishing, the diverse challenges facing society, and the health and wellness of all life.

The Bachelor of Arts degree in neuroscience encourages such interdisciplinary exploration where neuroscience intersects and engages in disparate disciplinary areas of knowledge beyond the life and natural sciences.

Go to [Programs by Department](http://programs.bydepartment) to view all related programs.

**Graduation with Distinction in Neuroscience**

Neuroscience majors with a GPA of 3.5 or above in neuroscience courses (not including corequisites), may apply for Graduation with Distinction in neuroscience. They must also maintain at least this level of performance throughout the remainder of their neuroscience studies at Duke. Candidates for distinction will conduct and complete an original research project carried out as two terms of research independent study in neuroscience. A substantial paper (thesis), usually based on empirical research and written in publication style, and a scientific poster are required. In addition, an oral defense of the thesis will be evaluated by a committee comprising three members. One member of the committee (either the research mentor or one of the two additional committee members) must be a neuroscience faculty member from an Arts and Sciences department.
Duke University

or be a faculty member who teaches regularly in undergraduate neuroscience. One member of the committee can be a postdoctoral fellow or an advanced graduate student who has completed their preliminary exam. The director(s) of undergraduate studies and the associate director (if applicable) are available as committee members and should be consulted if there is a question about committee membership.

Either following completion of the two-terms of independent study or, more commonly, concurrent with completion of the second-term of independent study, students aspiring to earn Graduation with Distinction in neuroscience will take Neuroscience 499 (Current Research in Neuroscience). This course includes review of directed reading and research in both theoretical and experimental neuroscience, as well as discussion of the students' independent study projects. Emphasis is placed on the development of the ability to critically evaluate empirical research and to construct mathematical or deductive/inductive models. The final project in this course includes preparation of a formal research proposal and a review of the role of ethics in science.

Evaluation of the student for distinction is based on the written thesis, an oral poster presentation and the oral examination before the distinction committee. The evaluation committee will then decide whether the overall performance of the candidate qualifies for Graduation with Distinction in neuroscience (only one distinction level is recognized). Finally, Graduation with Distinction in neuroscience research projects will be presented as scientific posters in April during an undergraduate research forum.

Interdepartmental Major (IDM) with Neuroscience

Like the inner workings of the brain itself, neuroscience synthesizes discovery from diverse sources of knowledge. The undergraduate curriculum in neuroscience reflects this interdisciplinary perspective and challenges students to explore knowledge across levels of analysis: from the molecular and cellular level, through the level of neural circuits within which cells are organized and interconnected, and toward the level of behavior where the functions of neural circuits and systems, including human cognition, are manifested. A comprehensive understanding of neuroscience requires knowledge of each level and integrative learning across levels.

Similarly, Neuroscience may be constructed as a component of an interdepartmental major (IDM). Currently, Neuroscience allows for student-originated IDMs, which are individualized programs proposed by a student. When students craft their IDM proposal, all Trinity College guidelines must be followed (see appropriate Trinity College webpage).

Requirements for IDM with Neuroscience. Inclusive of all Trinity College requirements for a student-generated IDM, a proposal involving Neuroscience must include each of the following features. Neuroscience coursework should start with Neuroscience 101 or 102 (Biological Bases of Behavior). Next, the proposal should specify both of the core Neuroscience courses: Neuroscience 212 and Neuroscience 223. The proposal should then list the following courses, which may be taken concurrently with the core courses: one course in statistical science or computer science, one Neuroscience methods or laboratory course, and two Neuroscience electives, with one of these being an upper-division Neuroscience seminar (>350S or higher). While working through the Neuroscience courses listed above, a subset of co-requisite requirements for the Neuroscience major are necessary, with a total of three corequisite courses for the AB IDM plan and five corequisite courses for BS IDM plan. If both departments represented in the IDM proposal require corequisites, then any overlapping corequisite courses may be shared between departments at the discretion of the Directors of Undergraduate Studies. Otherwise, students should choose among the corequisites available for the appropriate AB or BS plans of the Neuroscience major. Before completing the Trinity College Interdepartmental Major Proposal form, students must discuss the development of their plan with the directors of undergraduate studies of both majors.

Academic Requirements

Academic Requirements

Ten courses in major (eight of ten courses must be 200-level or higher, one or more courses must be laboratory or methods; one or more courses must be intersection; one or more courses must be from 350-level or higher seminars). No more than two of the ten courses required for the major may be used to satisfy the requirements of another major, minor, or certificate.

Corequisites. Foundational coursework is required in the disciplines of biology, chemistry, mathematics, and physics that may be completed concurrently with courses in the major for completion of the AB degree. For these disciplines, the same guidelines detailed above for the BS degree apply to the AB degree, with the following exceptions: there is no corequisite in Computer Science for the AB major in neuroscience, and in Mathematics, the equivalent of just one term of calculus is required (Mathematics 21 or 111L or 121, or 105L and 106L). A score of 5 on the College Board Advanced Placement Test in Calculus AB or a 4 or better on the Calculus BC test fulfills this corequisite.

Gateway Course. Neuroscience 101/102 (Biological Basis of Behavior: Introduction and Survey) is the gateway to the major.

Core Courses (two courses required). There are two core courses in the major in neuroscience that reflect the different levels of inquiry described above: Neuroscience 223 (Cellular and Molecular Neurobiology), which focuses on cellular processes and synaptic mechanisms of neural signaling; and Neuroscience 212 (Introduction to Cognitive Neuroscience), which focuses on cognition and the brain basis of behavior. Neuroscience 223 and 212 may be taken in any order.

Laboratory/Methods Courses (one course required). Neuroscience majors are required to understand the methods of scientific inquiry for investigating the structure and function of the nervous system. Any one of the following courses will satisfy this curricular requirement: Neuroscience 103L (Computing and the Brain), Neuroscience 104L (Interdisciplinary Introduction to Computer Science), Neuroscience 301L (Bioelectricity), Neuroscience 376 (Contemporary Neuroscience Methods), Neuroscience 378L (Perception and the Brain), Neuroscience 379L
Graduation with Distinction in Neuroscience

Neuroscience majors with a GPA of 3.5 or above in neuroscience courses (not including corequisites), may apply for Graduation with Distinction in neuroscience. They must also maintain at least this level of performance throughout the remainder of their neuroscience studies at Duke. Candidates for distinction will conduct and complete an original research project carried out as two terms of research independent study in neuroscience. A substantial paper (thesis), usually based on empirical research and written in publication style, and a scientific poster are required. In addition, an oral defense of the thesis will be evaluated by a committee comprising three members. One member of the committee (either the research mentor or one of the two additional committee members) must be a neuroscience faculty member from an Arts and Sciences department or be a faculty member who teaches regularly in undergraduate neuroscience. One member of the committee can be a postdoctoral fellow or an advanced graduate student who has completed their preliminary exam. The director(s) of undergraduate studies and the associate director (if applicable) are available as committee members and should be consulted if there is a question about committee membership.
Duke University

Either following completion of the two-terms of independent study or, more commonly, concurrent with completion of the second-term of independent study, students aspiring to earn Graduation with Distinction in neuroscience will take Neuroscience 499 (Current Research in Neuroscience). This course includes review of directed reading and research in both theoretical and experimental neuroscience, as well as discussion of the students' independent study projects. Emphasis is placed on the development of the ability to critically evaluate empirical research and to construct mathematical or deductive/inductive models. The final project in this course includes preparation of a formal research proposal and a review of the role of ethics in science.

Evaluation of the student for distinction is based on the written thesis, an oral poster presentation and the oral examination before the distinction committee. The evaluation committee will then decide whether the overall performance of the candidate qualifies for Graduation with Distinction in neuroscience (only one distinction level is recognized). Finally, Graduation with Distinction in neuroscience research projects will be presented as scientific posters in April during an undergraduate research forum.

**Interdepartmental Major (IDM) with Neuroscience**

Like the inner workings of the brain itself, neuroscience synthesizes discovery from diverse sources of knowledge. The undergraduate curriculum in neuroscience reflects this interdisciplinary perspective and challenges students to explore knowledge across levels of analysis: from the molecular and cellular level, through the level of neural circuits within which cells are organized and interconnected, and toward the level of behavior where the functions of neural circuits and systems, including human cognition, are manifested. A comprehensive understanding of neuroscience requires knowledge of each level and integrative learning across levels.

Similarly, Neuroscience may be construed as a component of an interdepartmental major (IDM). Currently, Neuroscience allows for student-originated IDMs, which are individualized programs proposed by a student. When students craft their IDM proposal, all Trinity College guidelines must be followed (see appropriate Trinity College webpage).

**Requirements for IDM with Neuroscience.** Inclusive of all Trinity College requirements for a student-generated IDM, a proposal involving Neuroscience must include each of the following features. Neuroscience coursework should start with Neuroscience 101 or 102 (Biological Bases of Behavior). Next, the proposal should specify both of the core Neuroscience courses: Neuroscience 212 and Neuroscience 223. The proposal should then list the following courses, which may be taken concurrently with the core courses: one course in statistical science or computer science, one Neuroscience methods or laboratory course, and two Neuroscience electives, with one of these being an upper-division Neuroscience seminar (>350S or higher). While working through the Neuroscience courses listed above, a subset of co-requisite requirements for the Neuroscience major are necessary, with a total of three corequisite courses for the AB IDM plan and five corequisite courses for BS IDM plan. If both departments represented in the IDM proposal require corequisites, then any overlapping corequisite courses may be shared between departments at the discretion of the Directors of Undergraduate Studies. Otherwise, students should choose among the corequisites available for the appropriate AB or BS plans of the Neuroscience major. Before completing the Trinity College Interdepartmental Major Proposal form, students must discuss the development of their plan with the directors of undergraduate studies of both majors.

**Academic Requirements**

**Academic Requirements**

Ten courses in major (eight of ten courses must be 200-level or higher; one or more must be laboratory and methods; one or more must be a seminar at the 350 level or higher). Only two Independent Scholarship or Research Independent Study courses may count as electives. BS majors may only count one intersection course. No more than two of the ten courses required for the major may be used to satisfy the requirements of another major, minor, or certificate.

**Corequisites.** Foundational coursework is required in the disciplines of biology, chemistry, computer science, mathematics, and physics that may be completed concurrently with courses in the major. In biology, one of the gateway courses, Biology 201L (Gateway to Biology: Molecular Biology) or Biology 202L (Gateway to Biology: Evolution & Genetics), or Biology 203L (Gateway to Biology: Molecular Biology, Genetics & Evolution) or its equivalent, will satisfy the corequisite. A score of 4 or 5 on the College Board Advance Placement Test in Biology can also be used to satisfy this corequisite. In chemistry, one general chemistry course-Chemistry 101DL (Core Concepts in Chemistry) or Chemistry 110DL (Honors Chemistry: Core Concepts in Context)-or equivalent, will satisfy the corequisite for the neuroscience major. A score of 4 or 5 on the College Board Advance Placement Test in Chemistry can also be used to satisfy this requirement. For Computer Science, one of the following courses (or its equivalent) will fulfill the corequisite: Neuroscience 103L (Computing and the Brain), Computer Science 101L (Introduction to Computer Science), Computer Science 102L (Interdisciplinary Introduction to Computer Science), Engineering 103L (Computational Methods in Engineering), or the equivalent. A score of 4 or 5 on the College Board Advance Placement Test in Computer Science A or Computer Science Principles can also be used to satisfy this corequisite. For mathematics, two terms of calculus or equivalent are required for the BS degree. The first semester calculus requirement can be satisfied by Mathematics 21 (Introductory Calculus I) or Mathematics 111L (Laboratory Calculus I) or Mathematics 121 (Introductory Calculus I), or Mathematics 105L (Laboratory Calculus and Functions I) and Mathematics 106L (Laboratory Calculus and Functions II). A score of 5 on the College Board Advanced Placement Test in Calculus BC fulfills the corequisite for both terms of calculus. In physics, two terms of algebra- or calculus-based physics are required, which
Program Summary

The undergraduate program in the Department of Philosophy acquaints students with the content and structure of philosophical theory in various areas. Classes encourage discussion so that students can engage actively in the philosophical examination of problems.
Course offerings fall into two general categories: the systematic and the historical. In a systematic treatment, the organization of a course reflects the problems presented by the subject matter of that course, as in logic, ethics, and metaphysics. Historical courses direct attention more to the order of development in the thought of a particular philosopher (Plato, Aristotle, Kant) or in a historical period. In all courses, reading the works of philosophers acquaints the students with important and influential contributions to the definition and solution of philosophical issues.

The problems raised in philosophy about various fields of the arts and sciences involve questions that these particular disciplines typically neglect. In consideration of such problems, students will acquire some understanding and perspective of the major areas of human intellectual endeavor. Philosophical comprehension is in this way an essential part of a complete education.

Philosophy provides a sound preparation for the demands of many professions. For example, the precision of argument and broad acquaintance with intellectual traditions emphasized in philosophy form an excellent basis for the study of law.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction
The department offers work leading to Graduation with Distinction. See the section on honors in this bulletin.

Academic Requirements
Ten courses in philosophy, eight of which must be at the 200 level or above. The courses must include Philosophy 201 and 203; a course at the 200 level or above in value theory (for example, ethics, political philosophy); a course at the 200 level or above in metaphysics, epistemology, philosophy of mind, or philosophy of science; a course in logic (Philosophy 150, 250, or 350); and at least one seminar at the 500-600 level.

Only one course from among Philosophy 101, 103S, and 104S may be taken for credit. These courses are not open to juniors and seniors.

Physics (AB)

Academic Requirements
Prerequisites. Physics 161D, 162D, 164L, and 165L or equivalents; Mathematics 122/122L, 212, and 221
Major Requirements. Physics 264L and 363 and two courses out of 361, 362D, 464D, 513, or one 300-level or higher physics course approved by the director of undergraduate studies. One laboratory-related course which can be Physics 271L, 417S, or 493 with a substantial experimental component. One other physics elective numbered above 200.

Concentration in Astrophysics

In addition to the physics major requirements, Physics 305 and three additional astrophysics courses are required. Two or more of these must be selected from among Physics 555, 556, or an independent study (Physics 491, 493, or 495) approved by the director of undergraduate studies as an astrophysics course. One of Physics 346, 505, 522, 622, 655, or Mathematics 575 may be chosen. Courses for the astrophysics concentration may also satisfy the elective requirements for the major.
Political science aims at a systematic and rigorous understanding of politics, both in explaining political phenomena and in exploring their ethical and normative dimensions. The discipline covers a broad range of subjects, from authoritarian to democratic politics, from local governance to international relations, from formal rules and institutions to the psychology and behavior of individuals who participate in political processes. Political scientists make use of data ranging from ancient texts, to satellite images, to surveys, to millions of Facebook posts, and analyze them with a diverse set of methods and tools, including qualitative and quantitative approaches.

Our undergraduate curriculum is designed to give you a sophisticated understanding of political processes, critical and independent thinking, writing and communication skills, and an analytical skill set. Our majors are highly successful, and pursue careers in diverse fields, including non-governmental and public interest organizations, think tanks, consulting, journalism, communications, local, state, and federal government, polling firms, finance, and business management. Many also go on to pursue graduate study in law, political science, public administration, or business administration.

**Interdepartmental Major.** The Department does not normally accept applications for Interdepartmental Majors.

Go to [Programs by Department](#) to view all related programs.

**Departmental Graduation with Distinction**

The department offers students majoring in political science an opportunity to achieve Graduation with Distinction in political science by the submission of an original research paper.

To be eligible for honors, students must have:

- taken four courses in the subfield of your proposed research;
- completed Statistical Science 198/199 or higher (Statistical Science 210 or the equivalent is recommended), the political theory requirement (Political Science 175), and a minimum of six courses in political science;
- the statistics requirement may be waived if students are pursuing honors in the area of political theory; or
- have a minimum undergraduate GPA of 3.3, and a major GPA of 3.5; this GPA must be maintained until graduation.

The goal of honors in political science is an original research paper of journal length (approximately 50 pages), which will be submitted to the Honors Thesis Committee by December 15 and March 1 of each year. The key criterion is that the paper must feature original research, and be conducted at a level that satisfies professional standards.

The Honors Thesis Committee will, in most cases, either accept or reject the paper for honors and the paper will be read by a minimum of two members of the committee. A revision may be requested by the committee (to be conducted by the student in the spring semester and due by April 1). If at all possible, students should begin their honors research the spring of the junior year and over that summer. Students may begin their honors research by producing a quality, journal-level paper in:

- a 400-, 500-, or 600-level political science seminar; or
- an independent study.

Often, the student will need to polish the paper during or after these options before submitting it to the Honors Thesis Committee. It is strongly suggested that the student submit a draft of the thesis before March 1.

**Academic Requirements**

**Electives.** At least two additional Political Science courses from outside the student’s chosen concentration (except for DSDT concentrators, in “D”, where no electives are required), for a minimum of 10 courses to constitute the major.

**Gateway Courses and Concentrations.** POLSCI 175 and STA 198/199. Concentrations. Choose a concentration, and satisfy the following course requirements

- A. American politics: Take POLSCI 114, plus four courses with an “A” designation.
- B. International relations: Take POLSCI 160, plus four courses with a “B” designation.
- C. Political theory and law: Take either POLSCI 211 or POLSCI 384, plus four courses with a “C” designation.
- D. Data science and decision theory: Take all of the following:
  - DECSCI 101/POLSCI 128
  - Three co-requisite courses (MATH 112, COMPSCI 101L or COMPSCI 201, and NEUROSCI 101)
  - One game theory or decision theory course (selected from this list: POLSCI 217, ECON 201, or POLSCI 631L)

Also, take one data analysis course (selected from this list: ECON 204, POLSCI 189FS, STA 210, or COMPSCI 216), and take two electives from the following list (COMPSCI 270, COMPSCI 290, DECSCI 213, ECON 462, NEUROSCI 257, NEUROSCI 258, POLSCI 240, POLSCI 333, or POLSCI 342).

Political economy: Take POLSCI 145, plus either ECON 101 or ECON 201. Take four additional courses with an “E” designation.
ALL CONCENTRATIONS: Take at least one additional "capstone" course listed at the 400 level or higher, with the designation (A, B, C, D, E) relevant for that concentration.

FOR ALL CONCENTRATIONS EXCEPT D, take two additional elective courses outside the primary concentration.

Course levels are:
- Political Science 100-199: Introductory courses in subfields and foundation courses. Students must take any one (1) subfield introduction listed at the 100 level before taking 300 or higher listings. They may, however, take 200-level courses without any prerequisite.
- Political Science 200-299: Nonintroductory courses with no prerequisite.
- Political Science 300-399: Intermediate courses that require any one subfield introduction course taken at the 100 level.
- Political Science 400-499: Advanced undergraduate and capstone courses that require an intermediate subfield course taken at the 300 level in addition to meeting all of the general requirements of the major.
- Political Science 500-699: Advanced undergraduate and introductory graduate courses.

Of the political science courses required for each subfield, at least six must be Duke courses taught by a member of the Duke instructional staff. However, this requirement may be reduced to five courses if the student: 1) is engaged in political science courses in a year-long study abroad through either a Duke-administered or Duke-approved program, or 2) transferred to Duke after completing two undergraduate years at another institution.

In satisfying the requirements of the major, students in the Robertson Scholars Program may count, exclusive of transfer courses, as many as two University of North Carolina at Chapel Hill courses offered at a level below the 400 level at Duke.

Advanced Placement Credit. Advanced placement credits in political science (score of 4 or 5). These course credits are designated as Political Science 20 (American Government and Politics) and Political Science 21 (Comparative Government and Politics). Such credits are applied toward the 34.0 course credits needed for Trinity graduation. Advanced placement course credits (20, 21) do not satisfy course requirements for the political science major.

Suggested Work in Related Disciplines. Selected courses in such disciplines as anthropology, economics, history, philosophy, psychology, public policy, religion, sociology, and statistics are desirable.

Courses with Primary Listing in Political Science (POLSCI)
Courses are designated as follows, in terms of counting toward concentrations:
- G: General (elective only)
- A: American politics
- B: International relations
- C: Political theory and law
- D: Decision theory and data science
- E: Political economy

102. The Science of Politics. (G)
110. Comparative Approaches to Global Issues. (E)
114. From Voting to Protests: Intro to Political Attitudes, Groups and Behaviors. (A)
116D. The American Political System. (A)
120D. The Challenges of Living an Ethical Life. (C)
125D. Introduction to Global Development: Politics, Policy and Practice. (E)
145D. Introduction to Political Economy. (E)
146. Politics and Economics. (E)
160D. Introduction to Security, Peace and Conflict. (B)
175D. Introduction to Political Philosophy. (C)
201. Public Opinion. (A)
203. Women and the Political Process. (A)
205. Introduction to Racial and Ethnic Minorities in American Politics. (A)
206. American Values, Institutions, and Culture. (A)
208. How to Think in an Age of Political Polarization. (A, C)
210. Conservatism. (A, C)
211D. Democracy: Ancient and Modern. (C)
212. American Presidency. (A)
Duke University

217. Discovering Game Theory: Social Complexity and Strategic Interdependence. (D, E)
219. Comparative Government and Politics: Selected Countries. (B, E)
221. South Africa: Past and Present. (B)
222. The Arab Youths Revolution. (B)
224. Inequality and Politics. (E)
227. Ethnic Conflict. (B)
228. Politics of Authoritarian Regimes. (B)
229. Institutions and Self Governance. (B, E)
230. Networks in a Globalizing World. (B)
231. Introduction to Tools of Political Risk Analysis. (B, E)
232. Introduction to Terrorism. (B)
235. Comparative Urban Politics and Policymaking. (A)
236. Racial Attitudes, Racial Prejudice, and Racial Politics. (A)
239. Political Communication in a Changing Media Environment. (A)
240. Political Psychology. (A)
242. Campaigns and Elections. (A)
245. American Constitutional Development / Interpretation I: Constitutional Structure. (A)
246. American Constitutional Development / Interpretation II: Individual Rights. (A)
250. The Politics of International Economic Relations: America in the World Economy. (B)
255. America in World Economy: Law, Politics, & Economics of Antitrust, 1890-2015. (A, E)
257. Latin American Wars of Independence. (B)
258. From Machine Learning to Ethnography. (D, E)
264. Democratic Erosion. (A)
265. Introduction to American Political Thought. (C)
268. Politics and Literature. (C)
270. Ambition and Politics. (C)
272. Human Rights in Theory and Practice. (B, C)
273. The Middle East Through Film. (B)
274. Race and Society: South Africa and the US, 1890-present. (A, B)
275. Left, Right, and Center: Competing Political Ideals. (C)
277. The Ethics of War: Self-Defense, Humanitarian Intervention, Terrorism and Law. (B, C)
278. Roman Political Thought and Its Modern Legacy. (C)
301. Illiberal Nondemocracies: Focus on Eastern Europe and Asia. (B, E)
305. Black Politics. (A)
308. Islam and the State: Political Economy of Governance in the Middle East. (E)
316. American Political Parties. (A)
317. Global Corruption. (B)
318. Congress and the President. (A)
319. US Comparative State Politics. (A)
321. International Law and International Institutions. (B)
322. Introduction to Middle East Politics. (B)
324. Chinese Politics. (B)
326. Reason and Passion in Politics. (A)
329. Politics in Violence. (B, E)
330. Quantitative Political Inquiry and Evaluation. (G)
331D. Prisoner's Dilemma and Distributive Justice. (E)
332. Games and Politics. (D, E)
333S. Democracy and Social Choice. (D, E)
335S. Economic, Political, and Social Institutions. (E)
338. Political Economy of Southeast Asia. (B, E)
342. Strategy and Politics. (D, E)
345. Experimental Political Science. (A, E)
346. Business, Politics, and Economic Growth. (B, E)
349. Political Economy of Latin America. (B, E)
350. International Political Economy. (B, E)
351. Economic History and Modernization in the Middle East. (C, E)
352S. U.S. Policy in the Middle East. (B)
353. Globalization of Democracy. (B)
354. Politics in the Developing World. (B, E)
356. Political and Criminal Armed Groups. (B)
362. International Security. (B)
363. International Human Rights in World Politics. (B, C)
364. Political Violence, Repression, and Organized Crime. (B)
365D. Foreign Policy of the United States. (A, B)
372S. Sex, Politics and Feminist Philosophy. (C)
373. Law and Politics. (A, C)
402S. Origins of WWI and WWII in Europe. (B, Capstone)
406S. South African Life Histories. (B)
421. Constitutionalism and Crisis: From Catalina's Conspiracy to Covid. (C, E, Capstone)
427S. World in Your Hand. (B, Capstone)
428S. International Conflict Resolution. (B, Capstone)
449. Politics, Philosophy, and Economics Capstone. (E, Capstone)
468S. Wealth and Poverty of Nations: Prosperity and Distribution in the Long Run. (B, E, Capstone)
497S. American Foreign Policy and the Presidential Campaign. (A, B, Capstone)
503S. Crisis, Choice, and Change in Advanced Democratic States. (B, Capstone)
504S. Comparative Ethnic Politics. (B, Capstone)
505S. Race in Comparative Perspective. (A, B, Capstone)
506. Theorists of Modern Politics: Marx, Durkheim, Weber. (C)
507S. Religion and Comparative Politics. (B, E)
508S. Public Opinion and Behavior. (A)
509S. Political Participation: Comparative Perspectives. (A, B)
515S. Post War Europe, 1945-1968: Politics, Society, and Culture. (B)
516S. Rule of Law. (C)
517S. Democratic Institutions. (B, C)
519. The American Party System. (A)
522S. Comparative Party Politics. (B)
525S. Race and American Politics. (A)
526S. Markets and Democracy in Latin America. (B, E)
528S. Peace and Conflict Processes. (B, Capstone)
536S. Choosing in Groups: Social Choice and Collective Action. (D, E, Capstone)
550S. Predicting Politics: Counter Insurgency, Elections, and Stability. (B, D)
Psychology (AB)
Program Code: U-PSY-AB
Degree Designation: Bachelor of Arts
Department: Psychology Department
Website: psychandneuro.duke.edu/undergraduate/psychology/requirements

Program Summary
The study of behavior and its determinants lies at the heart of our understanding of numerous systems ranging from the biological to the economic and social. Psychology majors and minors apply their understanding of human behavior to varied professional fields including mental and physical health care, research, education, policy, law, finance, consulting, marketing, and business management. Understanding of psychological concepts is also helpful for fields relating to engineering and data analysis.

Go to Programs by Department to view all related programs.

Independent Study
A program of individual non-research-directed study may be carried out by arrangement with a faculty supervisor and enrollment in Psychology 391, 392, 491, or 492. This study should result in a significant product that promotes the understanding or application of psychological science. At most only two Independent Study courses (whether research- or non-research directed) may count toward the major.

Research Independent Study
A program of individualized readings or an empirical research project may be carried out by arrangement with a faculty supervisor and enrollment in Psychology 393, 394, 493, or 494. Psychology 203 serves as an excellent introduction to Research Independent Study. A written plan for the program must be approved by the Research Mentor and the Director of Undergraduate Studies. At most only two Independent Study courses (whether research- or non-research-directed) may count toward the major.

Graduation with Distinction Program
The Graduation with Distinction program is based on a special project that requires original empirical research, usually developed through completion of Research Independent Study courses. With approval from the Director of Undergraduate Studies, a critical analysis of a problem in the field based on an extensive literature review may be substituted for an empirical research study. The project is to be summarized in a carefully written thesis to be the subject of an oral examination. The opportunity to write a thesis and qualify for Graduation with Distinction is open only to those majoring in Psychology. Applicants must have an overall GPA of 3.0 and a GPA in Psychology of 3.5, without rounding, by graduation. Neither Independent Study classes in psychology, nor Research Independent study classes in psychology, nor the Distinction Thesis Workshop, are included when calculating the GPA.

An application to the Graduation with Distinction program should be submitted by the last day of regular class registration for the term in which the thesis will be defended (for a fall defense, Fall registration in April; for a spring defense, Spring registration in November). The application must include names of the three people who will serve on the student's committee. The committee chair generally holds a Primary or Joint Graduate Training Faculty appointment in Psychology & Neuroscience. (Other faculty in P&N may be able to serve as chairs with special approval from the Director of Undergraduate Studies or with another faculty member serving as the chair of record.) The second committee member may hold a
Primary, Joint, or Secondary appointment in P&N. The final committee member may be another faculty member in P&N, a post-doc or graduate student in P&N, a faculty member from another department at Duke, or a faculty member from another institution. (A current list of faculty with Primary, Joint, and Secondary appointments may be found under the People tab at psychandneuro.duke.edu.)

Students interested in applying for Graduation with Distinction will register for two research independent study courses (Psychology 393, 394, 493, 494). (Usually these courses will be taken consecutively, but this is not required.) Students must register for the first Research Independent Study before submitting their application for Graduation with Distinction. Ordinarily, the same faculty member will serve as a given student's mentor both semesters. Candidates for Graduation with Distinction must also enroll in Psychology 496, the Distinction Thesis Workshop, a full-credit course focusing on the conduct of psychological research, ethics in research, professional development, and especially science writing, in order to prepare a quality thesis. Psychology 496 is only offered in the spring. Near the end of the final semester, candidates provide an electronic version of the thesis to their committee members and convene the committee for an oral examination. At the end of the oral exam, the committee decides whether the overall performance qualifies for Graduation with Distinction. An exceptional thesis combined with outstanding performance in Psychology may qualify a student for nomination for the Zener Award. Graduation with Distinction research projects are presented at the spring undergraduate research poster fair, Visible Thinking.

Academic Requirements

Eleven courses are required for the AB in Psychology.

The major is devised to provide breadth, a small group course in psychology, one additional upper-level course, and familiarity with the quantitative techniques and research methods used in the field. Neither AP nor IB credit will allow students to place out of Psychology 101 (Introductory Psychology).

For breadth, the student is required to take Psychology 101 (Introductory Psychology) and at least three survey courses that cover major areas of the field. One of these survey courses must be Psychology 106/107 (Biological Bases of Behavior) or Psychology 102 (Cognitive Psychology), and one must be Psychology 105 (Clinical Psychology and Mental Health), Psychology 103 (Developmental Psychology), or Psychology 104 (Social Psychology). Students seeking additional breadth may count up to four of these survey courses toward the major. Psychology 101 is strongly recommended as the first course taken in the major as it provides a foundation for all other courses; the survey courses should be taken next as they provide a foundation for upper-level courses in each area.

For instruction in small groups, the student is to take at least one seminar. It is recommended that the seminar be taken in an area where a survey course was completed.

For one additional upper-level course, the student is to take a course at the 300 level or above. It is recommended that this course be taken in an area where a survey course was completed. Please note that neither Independent Study courses (Psychology 391, 392, 491, and 492) nor Research Independent Study courses (Psychology 393, 394, 493, and 494) may be used to satisfy this requirement. In addition, the Distinction Thesis Workshop (Psychology 496) may not be used to satisfy this requirement.

In order to satisfy the requirements for coursework in quantitative techniques and research methods in psychology, each student will take Psychology 204L (Quantitative Research Methods and Statistics for Psychological Science 1) and Psychology 205L (Quantitative Research Methods and Statistics for Psychological Science 2). Other courses may be substituted only with advance permission of the Director of Undergraduate Studies. Neither Psychology 204L nor Psychology 205L fulfills prerequisites for advanced coursework in the Department of Statistical Science; please review the Statistical Science website for the prerequisites for courses in that department. Finally, students may not use introductory-level statistics classes taken in Statistical Science to satisfy elective requirements for the Psychology AB. Psychology 101, Psychology 204L (Quantitative Research Methods and Statistics for Psychological Science 1), and Psychology 205L (Quantitative Research Methods and Statistics for Psychological Science 2) all should be completed prior to the end of the junior year, as they provide the foundation for all subsequent coursework, and will allow students to benefit most from their upper-level courses.

Of the eleven courses required for the major, at least nine must be taken at Duke; others, if approved, may count toward the 34.0 course credits needed for graduation but will not count toward the major. Information is also available at psychandneuro.duke.edu/undergraduate/psychology/requirements.

Psychology (BS)

Program Code: U-PSY-BS
Degree Designation: Bachelor of Science
Department: Psychology Department
Website: psychandneuro.duke.edu/undergraduate/psychology/requirements

Program Summary

141/1526
The study of behavior and its determinants lies at the heart of our understanding of numerous systems ranging from the biological to the economic and social. Psychology majors and minors apply their understanding of human behavior to varied professional fields including mental and physical health care, research, education, policy, law, finance, consulting, marketing, and business management. Understanding of psychological concepts is also helpful for fields relating to engineering and data analysis.

Go to Programs by Department to view all related programs.

Independent Study
A program of individual non-research-directed study may be carried out by arrangement with a faculty supervisor and enrollment in Psychology 391, 392, 491, or 492. This study should result in a significant product that promotes understanding or application of psychological science. At most only two Independent Study courses (whether research- or non-research directed) may count toward the major.

Research Independent Study
A program of individualized readings or an empirical research project may be carried out by arrangement with a faculty supervisor and enrollment in Psychology 393, 394, 493, or 494. Psychology 203 serves as an excellent introduction to Research Independent Study. A written plan for the program must be approved by the Research Mentor and the Director of Undergraduate Studies. At most only two Independent Study courses (whether research- or non-research-directed) may count toward the major.

Graduation with Distinction Program
The Graduation with Distinction program is based on a special project that requires original empirical research, usually developed through completion of Research Independent Study courses. With approval from the Director of Undergraduate Studies, a critical analysis of a problem in the field based on an extensive literature review may be substituted for an empirical research study. The project is to be summarized in a carefully written thesis to be the subject of an oral examination. The opportunity to write a thesis and qualify for Graduation with Distinction is open only to those majoring in Psychology. Applicants must have an overall GPA of 3.0 and a GPA in Psychology of 3.5, without rounding, by graduation. Neither Independent Study classes in psychology, nor Research Independent Study classes in psychology, nor the Distinction Thesis Workshop, are included when calculating the GPA.

An application to the Graduation with Distinction program should be submitted by the last day of regular class registration for the term in which the thesis will be defended (for a fall defense, Fall registration in April; for a spring defense, Spring registration in November). The application must include names of the three people who will serve on the student’s committee. The committee chair generally holds a Primary or Joint Graduate Training Faculty appointment in Psychology & Neurosciences. (Other faculty in P&N may be able to serve as chairs with special approval from the Director of Undergraduate Studies or with another faculty member serving as the chair of record.) The second committee member may hold a Primary, Joint, or Secondary appointment in P&N. The final committee member may be another faculty member in P&N, a post-doc or graduate student in P&N, a faculty member from another department at Duke, or a faculty member from another institution. (A current list of faculty with Primary, Joint, and Secondary appointments may be found under the People tab at psychandneuro.duke.edu.)

Students interested in applying for Graduation with Distinction will register for two Research Independent Study courses (Psychology 393, 394, 493, 494). (Usually these courses will be taken consecutively, but this is not required.) Students must register for the first Research Independent study before submitting their application for Graduation with Distinction. Ordinarily, the same faculty member will serve as a given student’s mentor both semesters. Candidates for Graduation with Distinction must also enroll in Psychology 496, the Distinction Thesis Workshop, a full-credit course focusing on the conduct of psychological research, ethics in research, professional development, and especially science writing, in order to prepare a quality thesis. Psychology 496 is only offered in the spring. Near the end of the final semester, candidates provide electronic versions of the thesis to their committee members and convene the committee for an oral examination. At the end of the oral exam, the committee decides whether the overall performance qualifies for Graduation with Distinction. An exceptional thesis combined with outstanding performance in psychology may qualify a student for nomination for the Zener Award. Graduation with Distinction research projects are displayed at the spring undergraduate research poster fair, Visible Thinking.

Academic Requirements

Academic Requirements
The BS degree requires completion of all requirements for the AB degree plus additional courses in the Quantitative Studies (QS) and/or Natural Sciences (NS).

The major is devised to provide breadth, a small group course in psychology, one additional upper-level course, and familiarity with the quantitative techniques and research methods used in the field. Neither AP nor IB credit will allow students to place out of Psychology 101 (Introductory Psychology).

For breadth, the student is required to take Psychology 101 (Introductory Psychology) and at least three survey courses that cover major areas of the field. One of these survey courses must be Psychology 106/107 (Biological Bases of Behavior) or Psychology 102 (Cognitive Psychology), and one must be Psychology 105 (Clinical Psychology and Mental Health), Psychology 103 (Developmental Psychology), or Psychology 104 (Social Sciences (NS)).
Duke University

Psychology. Students seeking additional breadth may count up to four of these survey courses toward the major. Psychology 101 is strongly recommended as the first course taken in the major as it provides a foundation for all other courses; the survey courses should be taken next as they provide a foundation for upper-level courses in each area.

For instruction in small groups, the student is to take at least one seminar. It is recommended that the seminar be taken in an area where a survey course was completed.

For one additional upper-level course, the student is to take a course at the 300 level or above. It is recommended that this course be taken in an area where a survey course was completed. Please note that neither Independent study courses (Psychology 391, 392, 491, and 492) nor Research Independent Study courses (Psychology 393, 394, 493, and 494) may be used to satisfy this requirement. In addition, the Distinction Thesis Workshop (Psychology 496) may not be used to satisfy this requirement.

In order to satisfy the requirements for coursework in quantitative techniques and research methods in psychology, each student will take Psychology 204L (Quantitative Research Methods and Statistics for Psychological Science 1) and Psychology 205L (Quantitative Research Methods and Statistics for Psychological Science 2). Other courses may be substituted only with advance permission of the Director of Undergraduate Studies. Neither Psychology 204L nor Psychology 205L fulfills prerequisites for advanced coursework in the Department of Statistical Science; please review the Statistical Science website for the prerequisites for courses in that department. Finally, students may not use introductory-level statistics courses taken in Statistical Science to satisfy elective requirements. Psychology 101, Psychology 204L (Quantitative Research Methods and Statistics for Psychological Science 1), and Psychology 205L (Quantitative Research Methods and Statistics for Psychological Science 2) all should be completed prior to the end of the junior year, as they provide the foundation for all subsequent coursework, and will allow students to benefit most from their upper-level courses.

To satisfy the Quantitative Studies/Natural Sciences elective requirement, students must take five elective courses, selected from an approved list, that meet the following criteria: (a) classes come from at least two departments, and (b) at least three of the five are at or above the 200 level.

Note: Psychology courses not used to fulfill AB requirements (including up to two semesters of Research Independent Study) may be counted toward the five, but courses cross-listed with Psychology and another department do not count as a second department. Additional research methods courses may be counted toward the elective requirement only with prior approval of the Director of Undergraduate Studies. A list of currently approved classes for the Quantitative Studies/Natural Sciences elective requirement may be found in the undergraduate section of the Psychology & Neuroscience website.

At least nine of the courses required for the major must be taken at Duke; others, if approved, may count toward the 34.0 course credits needed for graduation but will not count toward the major. Information is also available at psychandneuro.duke.edu/undergraduate/psychology/requirements.

Public Policy (AB)

Program Code: U-PPS-AB
Degree Designation: Bachelor of Arts
Department: School of Public Policy
Website: sanford.duke.edu/academics/undergraduate-program/programs/ba-public-policy

Program Summary

The Sanford School of Public Policy educates the next generation of policy professionals in a time when the skill set needed to succeed is changing and government needs professionals more than ever. Our mission is to improve lives and communities by researching the most pressing public policy issues and preparing students for lives of leadership, civic engagement, and public service. Information about the bachelor of arts in public policy is available at sanford.duke.edu/academics/undergraduate-program.

The Major

The public policy major offers many exciting opportunities. We teach courses in a broad array of areas, including education and social policy, health and population, environment and energy, international development, global governance and security, civil society, and leadership and ethics.

Rigorous coursework provides students with skills in political and economic analysis, knowledge about how to lead people and organizations, and a strong ethical foundation for decision-making. As a liberal arts major, public policy majors will enhance skills in political and economic analysis, articulate more concisely and clearly through critical analyzations, consider the implications of actions to make strong and ethical decisions, and participate in a policy-oriented internship. In addition, students are urged to participate actively in programs sponsored by the Sanford School of Public Policy to supplement the material covered in class.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction

For graduation with departmental distinction, students are required to complete an honors seminar or independent study project and produce an honors research project. To be awarded Distinction in Public Policy, a student must receive no less than an A- on the research paper as determined by the honors program director and have at least a 3.40 average in the following subset of public policy courses: Public Policy 155D, 301, 302D, and 303D.
If a student is judged to have done a clearly superior research project, as evidenced by a grade of A or A+ as determined by the honors program director, and if the 3.40 or higher average in the above subset of courses is attained, the Highest Distinction in Public Policy is awarded. The proposed program of research must be approved in advance by the director of undergraduate studies. More details on the honors program can be found at sanford.duke.edu/academics/undergraduate-program/current-students/honors-program.

**Accelerated MPP**

The 4+1 Accelerated Master of Public Policy track is an opportunity for Duke Undergraduate public policy majors to complete both their undergraduate and master's degrees in five years.

Majors who are able to pursue graduate-level coursework during their senior year are eligible to apply in the spring of their junior year. Students will complete the entire 51 graduate credits required for traditional two-year MPP students. This is a continuous enrollment program so students may not take a leave of absence between the undergraduate and graduate degrees.

**Requirements:**
1. Must be a Duke University undergraduate public policy major.
2. Must have a 3.5 GPA in the public policy major and overall (must maintain through junior year).
3. Must meet with the Director of Undergraduate Studies and the Director of Graduate Studies (MPP) prior to applying.
4. Must have three letters of recommendation – we suggest two faculty and one internship/professional.
5. Complete the online MPP application.

**Academic Requirements**

**Core and Required Courses:** Public Policy 155D, 301, 302D, 303D, 304; one history course; Statistical Science 199L (STA 198L, STA 101L, STA 102L, STA 104L, STA 111L, STA 130L or ECON 104 may substitute for STA 199L); plus four Public Policy 160-699-level elective courses, one of which must be a 401-699-level course. Effective Fall 2023, PUBPOL 155D will be offered as a satisfactory/unsatisfactory (S/U) Course. All other public policy courses must be taken for credit and cannot be taken as satisfactory/unsatisfactory (S/U).

Economics 201D may be substituted for Public Policy 303D. Either course is a prerequisite for Public Policy 304. Global Health 210 (Global Health Ethics) may be substituted for Public Policy 302.

The required history course must include a public policy component. History classes taught by public policy faculty or other history department classes designated by the public policy director of undergraduate studies may be used to satisfy this requirement.

No more than two transfer (including study abroad) credits may be counted toward the major requirements. Note that Public Policy 450AS (Glasgow Seminar in Public Policy) is classified as a Duke course rather than a transfer course.

A satisfactory policy-oriented internship, approved by the department, and enrollment in Public Policy 120, a noncredit, ungraded internship course, are required.

**Internship Program**

The internship is a culmination of the core coursework and gives students a chance to see how the skills from these classes apply in a real-world context. It also gives students the opportunity to gain exposure to different parts of the policy field and helps them prepare for their eventual job search.

For students to qualify to do their internship, they must have completed at least 3 of the following 6 required courses: STATS 199L, PUBPOL 155D, 301, 302 (GLTH 210), 303, or 304. From this list of courses, at least one course needs to be PUBPOL 155, 301 or 302. Students must finish their sophomore year before their internship. School year internships are no longer permitted. With the exception of Duke in DC, students will be required to do the internship during the summer.

The internship application process takes place during the fall and spring semesters prior to the internship under the guidance, assistance, and approval of the Public Policy Internship Office. Students whose internships are not preapproved by the internship office run the risk of not receiving credit for their internships. Upon completion of the internship, students are required to submit an internship experience evaluation form and submit the internship written assignment.

Public policy majors are strongly encouraged to take advanced follow-up coursework that builds upon the knowledge gained from their internship experiences.

More information on the internship requirement can be found at sanford.duke.edu/academics/undergraduate-program/current-students/internship-requirements.

**Religion (AB)**
**Program Summary**

The Department of Religious Studies offers a broad selection of undergraduate courses to majors, minors, and all interested students on campus. The department engages in different aspects of the study of religion, using a variety of perspectives and methodologies. The major religious traditions of the world—Christianity, Islam, Judaism, Buddhism, Hinduism, Confucianism, and Taoism—are studied in the ways they manifest themselves in present-day societies and in their historical depth, examining their origins and sacred texts (often in the original languages) as well as their historical developments, rituals, artifacts, practices, material forms, and transformations over time. Beyond the study of individual religious traditions, theories and definitions of religion are also explored. Courses numbered from 100 through 199 include survey or general courses; courses numbered from 200 through 399 include courses on more specific aspects of religion or religious traditions.

Go to Programs by Department to view all related programs.

**Foreign Languages**

To prepare for graduate or professional study of religion, the department recommends that students complete at least four courses in college-level study, or the equivalent, of a modern foreign language. Master of arts and doctor of philosophy programs often require examination in one or two modern foreign languages. Those planning to study religious traditions whose documents are in a language other than English should begin appropriate language study as part of their undergraduate preparation.

**Departmental Graduation with Distinction**

The Department of Religious Studies has a program for Graduation with Distinction. This program is intended for the outstanding religious studies major whose grade point average is at least 3.5 in religious studies (and 3.3 overall) and who has demonstrated the desire and talent to pursue independent research. The student, under the supervision of an advisor, will produce an honors thesis of exceptional quality. The main advisor is normally a faculty member in the department already familiar with the student’s work.

**Academic Requirements**

**Academic Requirements**

Ten courses. Religion 101 (Introduction to Religious Studies) is required. At least six courses must be numbered 200 or above. One course must be a religious studies independent study taken in the junior or senior year, a small group learning experience/seminar taken during the junior or senior year, or a religious studies honors project. The student will select, from a list of appropriate courses, at least one course apiece for each of three different religious traditions. In addition, the student, also in consultation with their advisor and with the advisor’s approval, will choose a set of four courses that constitute a thematic or methodological focus on a particular aspect of religion. Only two approved study abroad courses can count toward the major. Only one Duke Divinity School course can count toward the major, and that course cannot be equivalent to a course offered by the religious studies department. Students interested in taking Duke Divinity School courses should consult the director of undergraduate studies regarding credit toward the religious studies major.

**Romance Studies (AB)**

**Program Summary**

The Romance studies major at Duke involves advanced study in two of the department’s language/culture sections in an international and experiential learning mode. This major consists of foreign language study at the major level, departmental FL courses only, within two departmental fields, such as two continental fields, for example peninsular Spanish and Italian; two fields encompassing the diversity of cultures and engagement in the “developing” and the “developed” worlds, such Creole and French; or in geographically proximate postcolonial spaces such as lusophone (Portuguese-speaking) and francophone Africa, or Spanish and Portuguese-speaking environments in South America. The course requirements are paired with international/experiential learning requirements.

Go to Programs by Department to view all related programs.

**Departmental Graduation with Distinction**

Duke University
Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further information may be obtained from the director of undergraduate studies or the assistant to the director.

**Academic Requirements**

**Academic Requirements**

Five major-level departmental FL courses, in each of the two fields of study (see the descriptions of the single-language majors). The entry-level course for credit in the Romance studies major is the same as the entry level course for the minor in each of the French, Italian, and Spanish fields, i.e. French 204, Italian 203, and Spanish 301.

Students with unusual depth of study in Creole or Portuguese may petition the Romance studies faculty to unite one of the above sequences of five FL departmental courses with a combination of three courses and a required thesis (involving two semesters of independent study courses) in Creole or Portuguese. The Romance studies major in French, Italian, or Spanish and Creole or Portuguese therefore requires unusual initiative and experience in the field of either Creole or Portuguese. Petitions to undertake this option must include a one-page abstract of the project, a bibliography, and the names of three committee members who have consented to serve on the thesis committee.

**International/Experiential Learning Requirements for the Romance Studies Major**

To ensure breadth and depth of learning and linguistic/cultural immersion, any student completing the Romance Studies major must also complete two of the following international and/or experiential learning experiences related to their fields of Romance study. Each of these must be approved by the director of undergraduate studies:

- study abroad (up to two programs may be counted);
- an appropriate DukeEngage or another Duke service and/or experiential learning program;
- research experience related to the Romance language/culture field in a humanities lab, a fellowship, a research independent study, research assistantship, professional research environment, etc.;
- an honor’s thesis unifying the two fields; or
- a certificate in a related field with content directly related to that of the fields of language/culture study.

**Russian (AB)**

Program Code: U-RUS-AB
Degree Designation: Bachelor of Arts
Department: Slavic and Eurasian Studies
Website: slaviceurasian.duke.edu/undergraduate/major/russian

**Program Summary**

The Department of Slavic and Eurasian Studies has a strong commitment to increasing the language proficiency of its students regardless of their level at matriculation, to facilitate deep knowledge of the cultural context of each language represented, to help students develop their own scholarly interests and research abilities, and to acquaint students with trends in literary, linguistic, and cultural theory. Areas of specialization include nineteenth- and twentieth-century Russian and Soviet literature, Polish language and literature, semiotics, gender studies, film and media studies, legal and business Russian language, translation, Slavic linguistics, contemporary Russian and Polish literature, scientific and scholarly Russian language, stylistics, and Russian and Ukrainian cultural history. Languages taught include Russian, Polish, and Ukrainian.

Resources for study include a state-of-the-art language laboratory with video facilities and a humanities computing facility, reception of daily Russian television programming, and an exchange program with St. Petersburg University. The department offers several Focus seminars and maintains a cooperative relationship with Duke programs in Linguistics, Global Cultural Studies in Literature, Gender, Sexuality, and Feminist Studies, and Cultural Anthropology; the Center for Slavic, Eurasian and East European Studies; and related programs at The University of North Carolina at Chapel Hill.

The department offers work leading to Graduation with Distinction. See the section on honors in this bulletin and the departmental director of undergraduate studies.

Go to Programs by Department to view all related programs.

**Russian (AB) (U-RUS-AB)**

**Academic Requirements**

**Academic Requirements**
The Russian major requires a minimum of ten Russian courses in the department, eight of which must be at the 200 level or above. All majors must take the following courses: Russian 203, 204, 301S, 302S, 401, 402 or equivalent. Each major is additionally required to take four courses, of which at least three primarily focus on works of Russian culture (oral and written poetry and prose, drama, music, film, visual arts). The department urges students to consider coursework that would include at least one 500-level course.

Slavic and Eurasian Studies (AB)
Program Code: U-SES-AB
Degree Designation: Bachelor of Arts
Department: Slavic and Eurasian Studies
Website: slaviceurasian.duke.edu/undergraduate/major/slavic-eurasian-studies

Program Summary
The Department of Slavic and Eurasian Studies has a strong commitment to increasing the language proficiency of its students regardless of their level at matriculation, to facilitate deep knowledge of the cultural context of each language represented, to help students develop their own scholarly interests and research abilities, and to acquaint students with trends in literary, linguistic, and cultural theory. Areas of specialization include nineteenth- and twentieth-century Russian and Soviet literature, Polish language and literature, semiotics, gender studies, film and media studies, legal and business Russian language, translation, Slavic linguistics, contemporary Russian and Polish literature, scientific and scholarly Russian language, stylistics, and Russian and Polish cultural history. Languages taught include Russian, Polish, and Ukrainian.

Resources for study include a state-of-the-art language laboratory with video facilities and a humanities computing facility, reception of daily Russian television programming, and an exchange program with St. Petersburg University. The department offers several Focus seminars and maintains a cooperative relationship with Duke programs in Linguistics, Global Cultural Studies in Literature, Gender, Sexuality, and Feminist Studies, and Cultural Anthropology; the Center for Slavic, Eurasian and East European Studies; and related programs at The University of North Carolina at Chapel Hill.

The Slavic and Eurasian studies major is designed to enable students to gain knowledge about Slavic and Eurasian languages and cultures as well as the interrelated histories and contemporary interactions between these cultures.

The department offers work leading to Graduation with Distinction. See the section on honors in this bulletin and the departmental director of undergraduate studies.

Academic Requirements
To earn a major in Slavic and Eurasian studies, students must complete ten courses, eight of which must be at the 200 level or above. Required courses are one approved introductory course to the major (including, but not restricted to, Russian 350, Russian 370, Slavic and Eurasian Studies 373S, Slavic and Eurasian Studies 386S); one capstone seminar (Slavic and Eurasian Studies 423S) in their junior or senior year, which includes a significant research component; four language courses above the 102 level for Polish or four language courses above the 203-204 level for Russian; and four content (elective) courses on Slavic and Eurasian studies with no more than two of these on an exclusively Slavic topic. All 300-level and above courses with the designators Polish and Turkish may count toward the major. The Department of Slavic and Eurasian Studies also offers Romanian on a regular basis. These languages can be counted as fulfilling the language requirement with prior approval from the director of undergraduate studies. To determine if specific courses meet the requirements for the major, students should consult with the director of undergraduate studies in the Slavic and Eurasian Studies department.

Students are encouraged to study abroad in a country that is related to the geographical area covered by the major.

Sociology (AB)
Program Code: U-SOC-AB
Degree Designation: Bachelor of Arts
Department: Sociology Department
Website: sociology.duke.edu/undergraduate/major

Program Summary
Sociology is a field that uses scientific methods to answer questions about human behavior and society, such as: What impact does racial segregation have on students' educational outcomes? Who gets sick and why? How do social networks affect business profits? What are the social causes of criminal behavior? How can we harness big data to understand political divides? The department prides itself on creating an engaging curriculum that develops students' analytic and communication skills, provides in-depth knowledge of multiple research methods and substantive
Program Learning Outcomes

Undergraduate majors in the program should be able to:

- Explain how individuals are shaped by social networks, institutions, and culture
- Evaluate systems of social inequality
- Apply sociological theories to novel contexts
- Answer social science questions using qualitative and quantitative analyses
- Communicate ideas clearly and persuasively in writing and public speaking

Concentrations

Students who major in sociology have the option of declaring a concentration in one of the following three areas:

- **Medical Sociology**: study of social and structural determinants of health and healthcare
- **Sociology of Work and Organizations**: study of jobs, labor markets, and careers
- **Sociology of Crime, Law, and Justice**: study of legal processes and systems of punishment

To complete an optional concentration, majors must take four or more courses in the sub-discipline. The department's website provides an updated list of available courses for each concentration. Additionally, capstone courses (SOCIOL 393, 490S, 495, 496) that complete research in Medical Sociology, Sociology of Work and Organizations, or Sociology of Crime, Law, and Justice can count as one of the four required concentration courses for that area.

Departmental Graduation with Distinction

The department offers work leading to Graduation with Distinction through the Honors Thesis Program. This is a two-semester course sequence (SOCIOL 495S and 496S) that is available to juniors with at least a 3.3 GPA and an endorsement of a faculty member. Completion of SOCIOL 332 (Methods of Social Research) is required and SOCIOL 333 (Quantitative Analysis of Sociological Data or equivalent) is strongly encouraged prior to enrolling in the Honors Program. Students in this program conduct original research that results in substantive papers in the format of academic journal articles. The program captures the often-nonlinear process of research: translating an abstract idea into an answerable sociological question, situating a topic among existing literature, using appropriate methods to analyze data, and communicating empirical results. Students produce and share findings from their theses in a supportive community of faculty advisors and peer researchers.

Academic Requirements

**Academic Requirements**

Students complete 10 courses for the major, including four core courses, five electives at or above the 200-level, and one senior research experience. No Advanced Placement credits and no more than two transfer credits may count toward the major.

- **The core courses** are SOCIOL 110 (Sociological Inquiry), SOCIOL 338 (Theory and Society), SOCIOL 332 (Methods of Social Research), and SOCIOL 333 (Quantitative Analysis of Sociological Data). Students may substitute any 100-level or above statistical science course for SOCIOL 333.
- **Students complete five electives** at or above the 200-level. Students may study diverse topics within sociology, exploring the discipline's breadth. Alternatively, students may cluster their electives around a single substantive area, deepening knowledge of a specific sub-field.
- **Students choose their senior research experience** from the following: SOCIOL 393 (Research Independent Study), SOCIOL 490S-1 (Research Seminar: Special Topics), or SOCIOL 495S and SOCIOL 496S (Sociology Honors Seminar I & II).

Spanish (AB)

Program Code: U-SPAN-AB
Degree Designation: Bachelor of Arts
Department: Romance Studies Department
Website: romancesudies.duke.edu/undergraduate/majors/spanish-latin-american-studies

Program Summary

Did you know that Spanish is the second largest world language as a vehicle of international communication and the third as an international language of politics, economics and culture? Or that about 330 million people in the world speak Spanish as their first language? Or that Spanish is the official language in 21 countries and is expected to be the first language of 50% of the population of the United States within 50 years? Our
department sponsors summer study abroad programs (Duke in Spain, Duke in Chile, Duke in Costa Rica, and Duke Intensive Spanish in Alicante) and one semester/year study abroad program (Duke in Madrid). We encourage students to plan early in order to attain an advanced level in Spanish and to work into their study plans the possibility of studying abroad in a Spanish-speaking country.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction
Qualified students may apply for Graduation with Distinction. The application deadline is preregistration for the fall semester of the senior year. Students must find an appropriate faculty advisor to oversee the honors project. The thesis may be written in the language best suited to its likely audience, but students pursuing graduate study in a Romance studies field must write the thesis in the language of the area of study. Further information may be obtained from the director of undergraduate studies or the assistant to the director.

Study Abroad
Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- **Department-Administered Programs**
  - **Duke in Madrid.** Major: All courses may be counted toward the major. Credit distribution may vary according to students’ needs, with a maximum of three courses counting toward the core course requirement. For students remaining a second semester, two additional courses may be counted as core courses; the rest may be counted as related courses.
  - **Duke in Madrid-Intermediate.** Major: Spanish 314A, Gastronomía de España, being equivalent to Spanish 204 and advanced 300 level, counts as one course.

- **Duke-Administered Summer Programs (Office of Study Abroad)**
  - **Duke in Chile.** Major: Spanish 315A Language and Culture of Entrepreneurship in Latin America counts as one course credit.
  - **Duke in Costa Rica.** Major: Spanish 306A, Language, Culture, and Health in Costa Rica counts as one course credit.
  - **Duke in Spain.** Major: Spanish 439SA Global Spain counts as two course credits.

- **Non-Duke-Administered Semester Programs**
  - Major: A maximum of two courses per semester may be counted toward the core-course requirement.

- **Non-Duke-Administered Summer Programs**
  - Major: One course may be counted toward the core-course requirement.

**Academic Requirements**

**Academic Requirements**

A total of ten courses at the 300 level and above, at least seven of which must be from departmental offerings. These seven core courses must include any two survey courses (332, 333, 334, 335, 336) and at least three courses numbered above 400. The remaining courses must be on peninsular, Latin American or Latino-related topics and may be taken either in the department or in other departments. Brazilian or Lusophone literature or culture courses taught in Portuguese at or above the 300 level, offered by the department, may be substituted for some of these remaining courses. Overall, a total of seven courses must be taught in Spanish. Consult the undergraduate major advisor concerning approved related courses.

**Statistical Science (AB)**

Program Code: U-STA-AB
Degree Designation: Bachelor of Arts
Department: Statistical Science
Website: stat.duke.edu/undergraduate/major

**Program Summary**

The Department of Statistical Science coordinates teaching and research in the statistical sciences at Duke University. In its teaching and research, the department's faculty members emphasize modern statistical methods involving computationally intensive stochastic modeling, coupled with interdisciplinary applications in many fields. The department also offers courses in basic statistical and data science methods and advanced mathematical statistics.

The major in statistical science provides students with exposure to modern statistical reasoning and data science principles as well as the skills needed to develop, analyze, and utilize statistical techniques for addressing quantitative, data-based problems in a wide array of application domains, including but not limited to natural and social sciences and the humanities. The course of study exposes students to a broad range of statistical methods using tools from mathematical and computational sciences. Students who complete the major in statistical science will be well prepared for careers in technology and business, where they must appreciate and accommodate uncertainty in their decision-making, and for further study and embarking on research in science, law, business, or other fields.
As part of the course of study, majors in statistical science can complete a research project under the supervision of a faculty member. These projects can involve the analysis of complex data, the development of new methods or theories, or the extension and evaluation of existing techniques. The director of undergraduate studies can facilitate linking majors to a research mentor, who works with students to develop and complete the research project. Students earn credit for their research by taking Statistical Science 393 or 493 (up to one independent study can be used towards the major or minor, with prior approval of the director of undergraduate studies).

Go to Programs by Department to view all related programs.

Academic Requirements

Prerequisites. Mathematics 21 (or 111L), 122 (or 112L), 212 (or 222 or 202), and 221 (or 216 or 218). Computer Science 101L or 102L or 201 or Engineering 103L.

Major Requirements. Statistical Science 240L/Mathematics 228L or Statistical Science 230/Mathematics 230 or Statistical Science 231/Mathematics 340; Statistical Science 432/Mathematics 343; Statistical Science 210; Statistical Science 360; Statistical Science 440. Three additional courses above Statistical Science 240L (excluding 601, 602L, and 611); Statistical Science 199 is allowed. Up to one independent study in statistical science can be used toward the major. Transfer credit for up to one core or two elective courses can be used toward the major. A maximum of two grades of D+, D, or D- can be counted toward the degree.

Statistical Science (BS)

Program Code: U-STA-BS

Degree Designation: Bachelor of Science

Department: Statistical Science

Website: stat.duke.edu/undergraduate/major

Program Summary

The Department of Statistical Science coordinates teaching and research in the statistical sciences at Duke University. In its teaching and research, the department’s faculty members emphasize modern statistical methods involving computationally intensive stochastic modeling, coupled with interdisciplinary applications in many fields. The department also offers courses in basic statistical and data science methods and advanced mathematical statistics.

The major in statistical science provides students with exposure to modern statistical reasoning and data science principles as well as the skills needed to develop, analyze, and utilize statistical techniques for addressing quantitative, data-based problems in a wide array of application domains, including but not limited to natural and social sciences and the humanities. The course of study exposes students to a broad range of statistical methods using tools from mathematical and computational sciences. Students who complete the major in statistical science will be well prepared for careers in technology and business, where they must appreciate and accommodate uncertainty in their decision-making, and for further study and embarking on research in science, law, business, or other fields.

As part of the course of study, majors in statistical science can complete a research project under the supervision of a faculty member. These projects can involve the analysis of complex data, the development of new methods or theories, or the extension and evaluation of existing techniques. The director of undergraduate studies can facilitate linking majors to a research mentor, who works with students to develop and complete the research project. Students earn credit for their research by taking Statistical Science 393 or 493 (up to one independent study can be used towards the major or minor, with prior approval of the director of undergraduate studies).

Go to Programs by Department to view all related programs.
computer science, engineering, mathematics, one of the natural sciences, or one of the quantitative social sciences. Transfer credit for up to one core or two elective courses can be used toward the major. Students pursuing Graduation with Distinction must complete a year-long honor’s thesis in their senior year of study. A maximum of two grades of D+, D, or D- can be counted toward the degree.

Students may elect to complete requirements in specified areas of concentration. Currently, available areas of concentration in the statistical science major (BS) are data science and mathematical statistics. These concentrations are subsets of the major with specific choices of prerequisites and major courses. For the data science concentration: the linear algebra prerequisite must be Mathematics 218 or 221; of the four electives, at least two should come from the group of Statistical Science 199L, 322, 323D, 325L, 393/493 with a data science focus (subject to the approval of the director of undergraduate studies), 465, 561D, or 571, at least one of those two must come from the subgroup of Statistical Science 323D, 325L, 465, 561D, or 571, and one course should come from the group of Computer Science 216, 316, 330, 370D, 371D, 516, or 570 with others possible with pre-approval by the director of undergraduate studies. For the mathematical statistics concentration: the linear algebra prerequisite must be Mathematics 221; the multivariate calculus prerequisite must be Mathematics 212 or 222; and one of the four electives must be Mathematics 431 or 531.

Theater Studies (AB)

Program Code: U-THEA-AB
Degree Designation: Bachelor of Arts
Department: Theater Studies
Website: theaterstudies.duke.edu/academics/major

Program Summary

The Department of Theater Studies offers students a variety of opportunities to study and practice theater, combining respect for history with immersion in contemporary issues, and intellectual engagement with creative expression. The faculty views theater as a form of human expression, shaped by social, economic, technological, personal, and artistic forces.

The major in theater studies offers students instruction in both 1) the relationship of theater to the cultures that produce and consume it through the study of dramatic literature, theater history, and performance studies; and 2) the collaborative theater arts (dramatic writing, acting, design, directing, production and theater technology), with a particular interest in the ways in which these two areas inform each other. While the theater studies major offers students preparation for graduate study, advanced theater training, or entry-level work in theater and related professions, it also offers a basic understanding and appreciation of the literature, history, and practice of theater for a student who desires a liberal arts education.

Go to Programs by Department to view all related programs.

Departmental Graduation with Distinction

Students with at least a 3.5 average in their theater studies courses are eligible to apply for a project. Students must complete eleven courses in total to graduate with distinction in the major instead of the standard ten. All distinction courses count toward the major. Interested students should acquire the full policy for Graduation with Distinction in theater studies and an application form from the theater studies office. The student's proposed project needs the approval of the project supervisor and the director of undergraduate studies. All projects must be approved by March of the student's junior year.

A student may pursue a project in writing, directing, design, acting, dramatic literature, theater history, or performance studies. All projects must have a research and a substantial written component. They may also have a production component. Students are required to take either a research independent study or a home seminar in the fall and the Senior Colloquium in the spring.

The student's written work and production project will be reviewed by a committee (approved by the director of undergraduate studies) composed of the project supervisor, the director of undergraduate studies, and a third faculty member in theater studies or a related field. A meeting of the committee and the student to evaluate the project will be part of the evaluation process. The committee will decide whether the student receives distinction and what level of distinction the student will receive. See the Policy for Graduation with Distinction in theater studies for specific prerequisites.
Academic Requirements

One gateway course
- Theater Studies 145S (Acting)
- Theater Studies 187S (Reading Theater) or 187A (Reading Theater in New York)
- Theater Studies 125S (American Musicals)

Six area studies courses
- One course from Area 1: Acting, Directing
- Three courses from Area 2: Dramatic Literature, Performance Studies, Theater History
- One course from Area 3: Design, Theater Technology
- One course from Area 4: Dramatic Writing
- Three additional Theater Studies courses at the 200-level or above

Visual and Media Studies (AB)

Program Code: U-VIS-AB
Degree Designation: Bachelor of Arts
Department: Art & Art History Department
Website: aahvs.duke.edu/undergraduate/majors/visual-media-studies

Program Summary

Visual & Media Studies concerns all aspects of the production, circulation, and reception of visual images in culture, science, and society. Studies in visual culture engage you in the analysis of the effectiveness of the signs and symbols that give meaning to images, providing access to how visual meaning is socially, politically, and culturally constructed and received.

Visual Studies enable you to interpret the representations that shape the visual constructs of a particular society, to consider how systems of visual code differ from culture to culture, and to think through how the symbolic constructions of life organize how one sees, understands, and participates in natural and social environments. Most importantly, establishing a clear connection between the theory and the practice of visuality is
the foundation of Visual & Media Studies.
Go to Programs by Department to view all related programs.

Visual & Media Studies (AB) (U-VIS-AB)

Academic Requirements

The visual and media studies major requires thirteen courses, at least eight of which must be at the 200 level or above. Courses required for the major include Visual and Media Studies 202D (Introduction to Visual Culture), Visual and Media Studies 327S (Theories of Visual and Media Studies), and the capstone course Visual and Media Studies 499S (Visual and Media Studies Capstone) or an approved upper-level seminar, as well as ten additional courses to be divided as follows: two courses in visual and media history or art history, two courses in visual and media practice; three visual and media studies electives taught by faculty in AAHVS; and three previously approved cross-listed courses in another department. The requirements and prerequisites for the major can be satisfied by courses taken at other institutions or abroad, but no more than two courses taken away from Duke may count toward the major. Further courses are available for credit at North Carolina State University and The University of North Carolina at Chapel Hill.

Concentration in Cinematic Arts

The concentration allows students deep engagement and mentoring in a range of approaches within the cinematic arts; from film/video production and digital imaging to the myriad ways in which time-based media can become an element of mixed media works and installation art; building on our distinctive strengths in film production and studies on campus. The concentration enables students to extend and focus their study within multiple fields of practice, film history, and theory.

Thirteen courses are required for the concentration, including one gateway course (either Visual and Media Studies 202D or Visual and Media Studies 289) taken preferably in the first or sophomore year, one theory-focused course, four practice and two film studies courses taken from an approved list, and the Visual and Media Studies 496S Cinematic Arts Capstone class in the spring semester of the senior year. Four elective courses at any level offered by or cross-listed by ARTHIST, ARTSVIS, CINE, or VMS.

Visual Arts (AB)

Program Code: U-ARTV-AB
Degree Designation: Bachelor of Arts
Department: Art & Art History Department
Website: aahvs.duke.edu/undergraduate/majors/visual-arts

Program Summary

Studio art courses offer directed experiences in the practice of the visual arts, enhancing the understanding of art both within the history of culture and as an individual human achievement. Department offerings emphasize the analysis and articulation of visual concepts and processes as they relate to a broader education in the humanities and sciences.

Go to Programs by Department to view all related programs.

Visual Arts (AB) (U-ARTV-AB)

Academic Requirements

The visual arts major requires twelve courses. Courses for the major include: three courses at the 100 level in a variety of disciplines, four courses at the intermediate/advanced level (between 200-699), Visual Arts 497S (Advanced Visual Practice), Visual Arts 496S or 498S Senior Capstone in the Visual Arts, one course at any level in art history, one course at any level in visual and media studies, and one additional course in either art history or visual and media studies at the 200 level or above.

The requirements for the major can be satisfied by courses taken at other institutions or abroad, but no more than two courses taken away from Duke may count toward the major. Further courses are available for credit at North Carolina State University and The University of North Carolina at Chapel Hill.

African & African American Studies Minor

Program Code: U-AFRI-MIN
Plan Type: Minor
Department: African & African American Studies Program
Website: aaas.duke.edu/undergraduate/major-minor

Program Summary
Duke University

The Department of African & African American Studies offers undergraduate degrees that equip students with bodies of knowledge that emerge from studying the histories, cultures, and social realities of African and African American peoples, and others of African descent across the diaspora. Mastering this knowledge will also produce a broad-based interdisciplinary learning experience that contributes to an intellectual, personal, and social maturation process.

Go to Programs by Department to view all related programs.

African & African American Studies Minor (U-AFRI-MIN)

Academic Requirements

The minor requires five courses – two introductory courses (102 and 103) and three 1-credit courses at the 200-level or above.

- African & African American Studies 102 (Introduction to African American Studies)
- African & African American Studies 103 (Introduction to African Studies)
- Three courses at the 200-level or above, in or cross-listed with African & African American Studies, with both program foci (Africa and the Americas) represented across the three-course selection, and each of the following Areas of Knowledge represented across the three-course selection:
  - Arts, Literatures, and Performance (ALP)
  - Civilizations (CZ)
  - Social Sciences (SS)

Art History Minor

Program Code: U-ART-MIN
Plan Type: Minor
Department: Art & Art History Department
Website: aahvs.duke.edu/undergraduate/minors/art-history

Program Summary

Art history is the study of works of art in the context of the broader social, political, and intellectual cultures of which they are a part. Studying art history develops the ability to evaluate and organize information, visual as well as verbal; it also enhances the faculties of creative imagination, precise observation, clear expression, and critical judgment. Students of art history acquire a sophisticated understanding of the theory and practice of artistic production and reception.

Go to Programs by Department to view all related programs.

Academic Requirements

Five courses in art history at the 200 level or above. Two transfer courses may count toward the requirements for the minor; courses taken Satisfactory/Unsatisfactory or Advanced Placement credits do not count toward the minor.

Asian American and Diaspora Studies Minor

Program Code: U-AADS-MIN
Plan Type: Minor
Department: Asian American and Diaspora Studies
Website: asianamericanstudies.duke.edu

Program Summary

The Asian American & Diaspora Studies Program (AADS) is an interdisciplinary academic program with a minor degree program dedicated to the studies of Asian America and the Asian diaspora. The program offers a curriculum that enriches the understanding of the long-neglected history, rich cultural heritage, and present position of Asian Americans and the Asian diaspora through pedagogy, public outreach, and programming.

Go to Programs by Department to view all related programs.

Academic Requirements

One Introductory Course, select either:
Asian and Middle Eastern Studies Minor

Program Code: U-AMES-MIN
Plan Type: Minor
Department: Asian & Middle Eastern Studies
Website: asianmideast.duke.edu/undergraduate/major-minors

Program Summary
A minor is offered to students interested in the study of language, literature, culture, and history of a particular region of Asia and the Middle East. The concentration of the minor is determined by the language of study: Arabic, Chinese, Hebrew, Hindi, Japanese, Korean, Persian, or Turkish.

Academic Requirements
The minor offers two pathways: (1) language pathway and (2) literature and culture pathway. Five courses are required in each track.

- **Minor in Asian & Middle Eastern Studies with a Language Pathway:** Five courses are required as follows:
  - a minimum of three and up to a maximum of four language courses in one AMES language at the 200 level or above;
  - a minimum of one and up to a maximum of two AMES literature/culture courses at the 100 level or above.

- **Minor in Asian & Middle Eastern Studies with a Literature and Culture Pathway:** Five courses are required as follows:
  - two language courses in one AMES language at the 200 level or above;
  - a minimum of two and up to a maximum of three AMES literature/culture courses at the 100 level or above.

Study Abroad. Students who study abroad may transfer up to four language credits, but no literature and culture credits, toward the minor in Asian and Middle Eastern studies.

Biology Minor

Program Code: U-BIO-MIN
Plan Type: Minor
Department: Biology Department
Website: biology.duke.edu/undergraduate/minor

Program Summary
The biology major and minor and biology courses in a variety of areas are offered by the Department of Biology. Additional courses in the biological sciences are offered by the departments of evolutionary anthropology, chemistry, and psychology in Trinity College of Arts & Sciences; by the basic sciences departments in the School of Medicine; and by the Pratt School of Engineering and the Nicholas School of the Environment.

Academic Requirements
Five courses in biology, which may include the gateway courses, but not including Advanced Placement credit (Biology 20/21); the five courses may include any course numbered 200 or above in biology. A maximum of one course from approved courses in the basic science departments of the School of Medicine or from approved courses of a basic biological character in related departments. A maximum of one independent study or tutorial courses may be counted toward the five courses.

Brazilian and Global Portuguese Studies Minor
Duke University

Program Code: U-BPST-MIN
Plan Type: Minor
Department: Romance Studies Department
Website: romances.tudes.edu/content/brazilian-global-portuguese-minor

Program Summary
Students minoring in Brazilian and Global Portuguese studies will acquire competency in spoken and written Portuguese, as well as familiarity with the literature and culture of Brazil and Portuguese-speaking regions.

A major in this program is also available. Go to Programs by Department to view all related programs.

Study Abroad
Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country’s culture. Courses taken abroad count toward the core and/or related courses as follows:

- **Duke-Administered Summer Programs**
  - **Duke-in-Brazil. Minor:** One course may be counted.

- **Non-Duke-Administered Semester Programs**
  - **Minor:** One course per semester may be counted.

- **Non-Duke-Administered Summer Programs**
  - **Minor:** One course may be counted.

---

**Brazilian and Global Portuguese Studies Minor (U-BPST-MIN)**

**Academic Requirements**

**Academic Requirements**

A total of six courses from departmental Brazilian and Global Portuguese Studies offerings, three of which must be taught in Portuguese or include a preceptorial (P) component. Up to two courses in Portuguese below the 300 level may be counted (Portuguese 203, Portuguese 203A, Portuguese 204). Duke-approved courses taught in Portuguese in study abroad programs may also count toward this minor concentration.

**Chemistry Minor**

Program Code: U-CHEM-MIN
Plan Type: Minor
Department: Chemistry Department
Website: chem.tudes.edu/undergraduate/minor

Program Summary

The study of Chemistry provides a fascinating and intellectually stimulating foray into the molecular underpinnings of the world around us, and through independent study, an opportunity to participate firsthand in cutting-edge research that spans a wide range of disciplines in the molecular sciences.

The chemistry minor is designed for students who do not wish to major in the field, but do wish to invest significant time in chemistry courses.

Go to Programs by Department to view all related programs.

**Chemistry Minor (U-CHEM-MIN)**

**Academic Requirements**

**Academic Requirements**

Chemistry 101DL or 110DL or 21; plus four additional courses selected from the following: Chemistry 180, 201DL, 201L, 210DL or 20, Chemistry courses numbered above 210; Biochemistry 301, 302; Biology 372A; Environment 540, 542; Pharmacology 350, 360, 533.

In certain cases, substitutions may be made for courses outside the chemistry department with the consent of the director of undergraduate studies.

**Cinematic Arts Minor**

Program Code: U-CINE-MIN
Plan Type: Minor
Department: Art & Art History Department
Website: aahvs.tudes.edu/undergraduate/minors/cinematic-arts
Program Summary
The cinematic arts minor allows engagement in a range of approaches within film studies, moving image history, theory, and practices — from film/video production, and digital imaging to the myriad ways in which time-based media can become an element of mixed media works and installation art in historical and contemporary contexts.

Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements

Five courses, which must include at least one gateway course (either Visual and Media Studies 202D, Visual and Media Studies 289, or Visual and Media Studies 261S) taken preferably in the first or sophomore year. Additionally, students must take at least one film practice course and at least one film studies course (both from a list of approved Cinematic Arts courses). The fifth course may be either film practice or film studies. Two transfer courses may count toward the requirements for the minor; courses taken Satisfactory/Unsatisfactory or Advanced Placement credits do not count toward the minor.

Classical Archaeology Minor

Program Code: U-CLAR-MIN
Plan Type: Minor
Department: Classical Studies Department
Website: classicalstudies.duke.edu/undergraduate/minors

Program Summary
Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements

Five Classical Studies (CLST) courses in ancient art and archaeology. At least three of these must be taught by a primary or secondary member of the Department of Classical Studies, and at least three courses must be at or above the 200-level.

No courses used to fulfill the requirements of one minor may be used for another, or for the majors in classical languages or classical civilization.

Classical Civilizations Minor

Program Code: U-CLCZ-MIN
Plan Type: Minor
Department: Classical Studies Department
Website: classicalstudies.duke.edu/undergraduate/minors

Program Summary
Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements
Five Classical Studies (CLST) courses. At least three of these must be taught by a primary or secondary member of the Department of Classical Studies, and at least three courses must be at or above the 200 level in at least two levels: literature in translation (or in the original language at or above the 250 level); history; art and archaeology; philosophy.

No courses used to fulfill the requirements of one minor may be used for another, or for the majors in classical languages or classical civilization.

Computational Biology and Bioinformatics Minor
Program Code: U-CPSB-MIN
Plan Type: Minor
Department: Computer Science Department
Website: cs.duke.edu/undergrad/minor

Program Summary
The Department of Computer Science provides courses on the concepts of computing and computers, their capabilities, and their uses. In most courses, students make extensive use of the available computing facilities. Students who wish to take a single introductory course as part of their general education usually elect Computer Science 94, 101, 102, or 116.

Academic Requirements
Prerequisites. Mathematics 111L, and one of these: Mathematics 112, Mathematics 122, Statistical Science 101 or above, or Biology 204
Requirements. Five courses at the 200 level or above (not including the prerequisites); three from computer science and two from biology, as follows: Computer Science 201, Computer Science 260. One of Computer Science 216, 220, 224, 316, 370, or any 500-level course, or as approved by the director of undergraduate studies in computer science, e.g., an independent study in an area related to bioinformatics or computational biology. Biology 201L. One of Biology 215, 218, 220, 251L, 311, 325, 414L, 416L, 418, 425, 450S, 556L, 557L, any 500 level or above non-independent study CBB course, or as approved by the director of undergraduate studies in computer science in consultation with the director of undergraduate studies in biology.

Computational Media Minor
Program Code: U-CMAC-MIN
Plan Type: Minor
Department: Computational Media, Arts & Cultures
Website: cmac.duke.edu/undergraduate/requirements

Program Summary
Computational Media, Arts & Cultures (CMAC) represents a collection of related activities at Duke University. Originating in the Department of Art, Art History & Visual Studies and the Mellon-supported Visual Studies Initiative, CMAC has evolved to include various graduate programs and collaborative research initiatives.

Students interested in areas such as digital humanities, digital media and algorithmic arts, computer interface and experience design, game studies, digital storytelling and data journalism, information aesthetics, computational media ethics, global media studies and related topics will find the program of interest.

Academic Requirements
The minor includes two VMS/CMAC practice courses; two VMS/CMAC thematic courses, and one COMPSCI course at the 200-level or above. Two transfer courses may count toward the requirements for the minor; courses taken Satisfactory/ Unsatisfactory or Advanced Placement credits do not count toward the minor.

Computer Science Minor
Program Code: U-CPS-MIN
Plan Type: Minor
Department: Computer Science Department
Program Summary
The Department of Computer Science provides courses on the concepts of computing and computers, their capabilities, and uses. In most courses students make extensive use of the available computing facilities. Students who wish to take a single introductory course as part of their general education usually elect Computer Science 94, 101, 102 or 116.

Academic Requirements
Five courses in computer science (including the prerequisite), at least four of which must be at the 200 level or above.

Prerequisites. Computer Science 101L, 102, or 116 or equivalent
Requirements. Computer Science 201 and 250. All 200-level and above courses count in meeting the minor requirements

Academic Requirements
Five courses at the 200 level or above as follows:

- Computer Science 201
- Computer Science 370D or 570
- Computer Science 371D or 571D or 671D
- Two electives
  - One elective must be outside of Computer Science, Mathematics, Statistics, or Electrical and Computer Engineering and be drawn from the following list:
    - Biomedical Engineering 502, 503, 504, 513, 515, or 517
    - Law 592
    - Linguistics 216S, 498, 501, or 510
    - Neuroscience 267 or 355S
    - Philosophy 209, 212, 250, or 252
    - Policy, Journalism and Media Studies 372
    - Political Science 331
    - Psychology 257, 258, 276, 308L, 451S, 461S, 462S, 469S, 470S, or 478
    - Public Policy 290
    - Science and Society 606S
  - The second elective may be also from the same list, or maybe a course listed as an approved elective within the Computer Science BS major concentration in Artificial Intelligence and Machine Learning, or maybe a research independent study with a significant emphasis on Artificial Intelligence.

Students may not receive this minor in addition to another major or minor offered by Computer Science.

Creative Writing Minor
Creative Writing Minor (U-WRTG-MIN)

Program Summary
The English Department is home to the creative writing faculty at Duke. We offer introductory, intermediate, and advanced courses in fiction, poetry, and creative nonfiction, including specialized courses on topics that intersect with disciplines beyond English—Playwriting, Writing Across Borders, and Writing about Research. Our creative writing faculty are widely-published novelists, poets, playwrights, and essayists who have received many honors, including the National Book Award, a Guggenheim Fellowship, the Whiting Award, a McDowell Colony Fellowship, and the PEN/Hemingway Award. Creative writing workshops are intimate seminar courses where students can explore various genres at once or hone their craft in a single genre of writing. The department also offers opportunities for students to work directly with Blackburn Visiting Writers. In addition to The Blackburn Reading Series, which brings distinguished contemporary authors to campus each year, we host the ongoing Little Corner Reading Series and annual undergraduate creative writing contests in fiction, poetry, and creative nonfiction.

Academic Requirements
Five courses are required for the creative writing minor:

- English 110S (Introduction to Creative Writing)
- Two courses in creative writing at the 200 level or above
- One course at the 300 level or above
- An additional course in English, other than creative writing, at the 200 level or above, in a literary genre appropriate to the student’s emphasis

or

- Three courses in creative writing at the 200 level or above
- One course at the 300 level or above
- An additional course in English in a literary genre appropriate to the student’s emphasis

Note: For English majors, two courses will be allowed to overlap.

Cultural Anthropology Minor (U-CA-MIN)

Program Summary
Cultural anthropology is a comparative discipline that studies human social life across the world’s diverse peoples and cultures. Cultural anthropology is the science of contemporary life: it emphasizes how power, identity, inequality, and social justice shape everyday life and global processes. It uniquely bridges the social sciences and the humanities with its holistic approach. Cultural anthropologists at Duke conduct research on a wide range of urgent issues, including racism, digital media, science and technology, ethnic identities, environment and climate change, health and medicine, music and performance, gender and sexuality, economic inequality, migration, sports, religion and myth, food politics, human rights, Indigenous sovereignty, and design. What unites these varied topics is a research method called ethnography. Ethnography is an empirical social research method focused on an engaged and community-based inquiry into everyday practices and how people make sense of them. It can involve participant observation, interviews, life histories, and action-oriented research, and is a widely applicable career skill. Ethnography reveals local solutions to global challenges.

The department offers a wide range of courses that introduce the discipline's core concepts and topics and that train students in ethnographic thinking, research, ethics, writing, and application. Courses in cultural anthropology often draw on in-depth case studies from different world areas to explore a specific topic. Faculty integrate their ethnographic fieldwork into courses, and the Department has special strengths in Africa and the African diaspora, Latin America, the Middle East, East Asia, South Asia, the United States, and Native North America.

Go to Programs by Department to view all related programs.
Academic Requirements

A total of five courses distributed in the following manner: Cultural Anthropology 101; three courses at the 100 level or above; and one additional course at any level (this may include courses taken in the Focus Program).

Dance Minor

Program Code: U-DAN-MIN
Plan Type: Minor
Department: Dance Department
Website: danceprogram.duke.edu/undergraduate/minor

Program Summary

The Duke University Dance Program focuses on dance as an integral part of the human experience and a medium for rigorous intellectual creativity. Our aim is to engage students in the profound potential for dance as embodied knowledge in the service of society. The Dance Program curriculum is designed to encourage the exploration of dance from interdisciplinary perspectives: historical, cultural, aesthetic, literary, technological, musical, scientific, and creative.

The Dance Program welcomes all students, regardless of the extent of their experience in dance. The curriculum provides opportunities to encounter dance traditions and movement experimentation as processes for discovery, communication, inquiry, and discourse. Students already deeply engaged in specific dance forms can explore and further enhance their physical, performance, and creative capacities. Students will experience dance as a mode for personal development and leadership and as a transformative force for social action. As the landscape of dance continues to evolve, Duke Dance Program students will gain the knowledge and skills to impact the nature and function of dance in contemporary society and reimagine the future of performance. They will move into action, agency, and sustainability with tools that can transform relationships locally and globally.

Students are encouraged to enroll in a summer session with the American Dance Festival. One course credit earned at the American Dance Festival may be counted toward the requirements of the minor.

Through the Duke in New York Arts Program, a student has the opportunity in the fall semester of the junior or senior year to pursue the study of the arts in New York City. Appropriate courses taken at New York University may fulfill a requirement of the minor.

A major in dance is also available. Go to Programs by Department to view all related programs.

Earth and Climate Sciences Minor

Program Code: U-ECS-MIN
Plan Type: Minor
Department: Earth and Climate Sciences
Website: nicholas.duke.edu/academics/undergraduate-programs/earth-climate-sciences

Program Summary

The Earth and Climate Science minor is for students interested in the science of how planet Earth works, and creating scientific solutions to earth and environmental challenges such as climate change, water use, sustainable development of mineral resources, clean energy production, as well understanding Earth’s long geological and biological evolution.

The Division of Earth and Climate Sciences offers introductory and advanced courses in climatology, coastal processes, geology, water sciences, hydrology, geomorphology, physical oceanography, petrology, geological history, and energy. The minor is administered by the Nicholas School of the Environment.

Go to Programs by Department to view all related programs.
**Academic Requirements**

**Economics Minor**

Program Code: U-ECON-MIN  
Plan Type: Minor  
Department: Economics Department  
Website: econ.duke.edu/undergraduate/minor/economics

**Program Summary**

Economics courses develop the critical and analytical skills essential for understanding economics and institutions, in both their contemporary and historical settings. Although no particular vocational or professional goal is emphasized, these courses provide the academic background necessary for positions in industry, for work in many branches of government service, for law school, and for graduate study in business administration, economics, and the social sciences.

Go to Programs by Department to view all related programs.

**Academic Requirements**

Economics 101D, Economics 201D. Three additional economics courses, of which no more than one course may be at the 200 level other than Economics 204D, 205D, and 210D, which may all be counted toward the minor; and two courses at the 300 level or higher. Courses 500-549 can only be counted toward the minor with the approval of the director of undergraduate studies. Substitution of similar courses in other departments at Duke for courses in the Department of Economics used toward minor requirements is not permitted. A maximum of one transfer credit may be counted toward minor requirements.

**Education Minor**

Program Code: U-EDUC-MIN  
Plan Type: Minor  
Department: Education Department  
Website: educationprogram.duke.edu/undergraduate/minor

**Program Summary**

The minor in education is designed to provide students who are majoring in arts and sciences disciplines with opportunities to combine coursework in their majors with academic and field-based experiences focused on the complex social, psychological, economic, scientific, technological, historical, political, and cultural issues that impact education, schooling, teaching, and learning throughout the lifespan.

Go to Programs by Department to view all related programs.

**University Teacher Preparation Programs**

The Duke University Teacher Preparation Programs offer secondary teacher licensure programs at both the undergraduate and master’s levels and an elementary licensure program at the undergraduate level. A common conceptual framework—preparing knowledgeable and skilled instructors who conduct themselves professionally and ethically as they practice reflective teaching—links the Teacher Preparation Programs. As students complete the general education requirements of Trinity College and of a selected major, they may also fulfill the requirements of an approved Duke Teacher Preparation Program and become licensed to teach. Licensure by the Duke-approved program is authorized through the State Board of Education in North Carolina and is reciprocal with most states. A license to teach along with an undergraduate degree is required by most public school systems and recommended by many independent schools. Duke University is accredited by the North Carolina Department of Public Instruction (DPI) and the Council for the Accreditation of Educator Preparation and has reciprocal approval for initial licensure with most of the fifty states. Title II data is available upon request.

Brief descriptions of two undergraduate programs based on bachelor of arts or bachelor of science degrees (secondary school teaching and elementary teaching) follow. The Master of Arts in Teaching Program is also available.

**Secondary School Teaching.** The Program in Education offers secondary school teacher licensure programs in English, mathematics, social studies, and science. Prospective teachers are advised to consult with the academic advisors in their majors and the secondary program director concerning their interest in teaching and this licensure program.
Interested undergraduate students may apply to the secondary school teaching program beginning in the sophomore year. Students are accepted by competitive criteria into a program that includes education courses with field experiences in local schools and an intensive senior spring semester teaching practicum. During the practicum, students teach high school classes in their respective disciplines under the supervision of an experienced mentor teacher and a university professor.

Upon successful completion of the senior year spring semester practicum and the four-year Trinity College undergraduate degree, students earn a teaching license and a minor in education.

**Elementary School Teaching.** Undergraduate students who plan to teach young children (kindergarten through sixth grade) may become eligible for licensure to teach while at Duke in addition to completing any academic major offered by Trinity College. The Elementary School Teaching Program provides students with opportunities to examine critical issues in public education and engage with K-6 schools through supervised field experiences in diverse classroom settings. The senior spring capstone semester includes a student teaching practicum in a local public school in Durham in addition to courses on curriculum design and implementation.

Interested undergraduate students may apply to the Elementary School Teaching Program beginning in the sophomore year. Students are selected by competitive criteria for participation in the program.

Upon successful completion of the senior year spring semester practicum and the four-year Trinity College undergraduate degree, students earn a teaching license and a minor in education.

**Academic Requirements**

**Electrical and Computer Engineering Minor**

**Program Code:** U-ECE-MIN

**Plan Type:** Minor

**Department:** Pratt School of Engineering, Electrical & Computer Engineering Department

**Website:** ece.duke.edu/undergrad/degrees/minor/ece

**Program Summary**

The educational mission of the Department of Electrical and Computer Engineering is to graduate electrical and computer engineers who embody excellence in a broad sense. We expect our graduates to advance within industry positions or in graduate study, or to carry the attributes of an engineering education into other disciplines. The electrical and computer engineering program of study must include mathematics and basic sciences, fundamentals, and applications in several engineering sciences, and team-based experience in the process of design, where theory is applied in the context of real needs and limitations, and where judgment must be exercised. Our electrical and computer engineering graduates should be able to think critically when solving problems and managing tasks and communicate effectively in multidisciplinary professional environments. To be a responsible member of the engineering profession, each graduate must be aware of social, ethical, environmental, and economic factors and constraints on engineering activity, and must understand the importance of these matters in a global context. We aspire to have our graduates exhibit intellectual depth and creativity, uphold high ethical standards, and show a commitment to the betterment of society through service and professional work.

To this end, the specific program educational objectives that we look for in our graduates are that they

- advance professionally in their chosen field;
- contribute to their professional community and society; and
- engage in lifelong learning in professional and personal endeavors.

The electrical and computer engineering (ECE) program is fully accredited by the Engineering Commission of ABET and leads to a bachelor of science in engineering (BSE) degree. The ECE curriculum provides a solid foundation in mathematics, physical and life sciences, computer science, and humanities and social sciences that complements a set of twelve theme-based ECE courses.

The Department of Electrical and Computer Engineering has designed its curriculum based on the theme of integrated sensing and information processing (ISIP). The ISIP theme capitalizes on the collective research expertise of the ECE faculty and provides a coherent, overarching framework that links principles of ECE to each other and real-world engineering problems. The cornerstone of the ECE curriculum is the first course fundamentals of electrical and computer engineering, which has been designed to provide students with a holistic view of ECE by introducing concepts spanning how to interface sensors and systems with the physical world, how to transfer/transmit energy/information, and how to extract, manipulate, analyze, and interpret information. The integrated design challenge in this first course introduces students to team problem-solving and motivates the in-depth study of ECE concepts in subsequent terms. Each of the four follow-on core courses focuses on a specific subfield of ECE.
(digital systems, microelectronics, sensing and waves, signals, and systems), and integrates lateral and vertical connections to other courses through the use of thematic examples. Following the five core courses are seven ECE technical electives that include a culminating engineering design course where teams of students address a significant real-world problem or opportunity.

The ECE curriculum emphasizes creative problem-solving through open-ended design challenges in many courses. Working in teams, students collaborate to utilize and develop their individual and collective technical, management, and leadership skills to design, simulate, build, and test components and systems to meet a set of specifications, often defined by industry standards.

Students have the option to pursue two or more areas of concentration, depending on personal interests. The upper-level technical electives, which extend the breadth and depth of the ECE core curriculum, provide a firm foundation for future technical accomplishment and for effective problem-solving in the diverse fields that our graduates pursue.

The flexibility of the ECE curriculum enables students and their faculty advisors to tailor a unique educational experience for every student. This may include a semester abroad; a second major, minor, or certificate program; and/or a research experience with a faculty member. The most popular second majors are computer science and biomedical engineering. Other popular second majors include mathematics, economics, and physics. Interests such as pre-medicine, pre-law, art, music, psychology, and social sciences can be accommodated through individually designed programs. Students are encouraged to take more than the minimum required courses in the sciences and the liberal arts, as is fitting at an engineering school in a university with a strong liberal arts tradition.

Students have the option to pursue two or more areas of concentration, depending on personal interests. Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements

The requirements for the minor in electrical and computer engineering is composed of five courses in electrical and computer engineering including three core courses selected Electrical and Computer Engineering 110L, Electrical and Computer Engineering 230L, Electrical and Computer Engineering 250D, Electrical and Computer Engineering 270DL, and Electrical and Computer Engineering 280L; and two additional electrical and computer engineering courses at the 300-level or above. Courses that are used to fulfill the student’s primary major may not be double-counted toward the minor. In addition, electrical and computer engineering courses with content substantially equivalent to courses in the student’s primary major may not be counted toward the minor. Students with credit for any of the core courses (e.g., exact or equivalent course taken to satisfy a requirement of the primary major) may substitute additional upper-level electrical and computer engineering courses, with approval from the director of undergraduate studies in electrical and computer engineering.

Energy Engineering Minor

Program Code: U-ENE-MIN
Plan Type: Minor
Department: Pratt School of Engineering, School of Engineering
Website: energy.pratt.duke.edu/minor-requirements

Program Summary

The energy engineering minor at Duke adds breadth, depth, and diversity to enrolled students’ educational experience by providing rigorous exposure to the fundamentals of energy engineering. The program’s objective is to prepare graduates to:

- engage in engineering careers in diverse areas with particular emphasis on energy-related matters;
- pursue graduate education and research in energy engineering or energy-related fields; and
- integrate energy concepts in their primary engineering discipline and/or optimize the use of energy within their professional pursuits and in society.

Go to Programs by Department to view all related programs.

Eligibility

All Duke engineering undergraduates are eligible to participate in the energy engineering program and qualify for the minor. Completion of the minor is noted on the student’s academic transcript.

Academic Requirements

Academic Requirements

Five unique courses and one capstone design course must be completed to earn the minor in energy engineering. The requirements for the minor are:

Energy Engineering Area Courses. Four courses are required, at least one in each category, up to two outside Duke.

- **Generation and Delivery.** Energy Engineering 490.xx (Special Topics-Bioenergy); Energy Engineering 490.xx (Special Topics-Renewable Energy Technologies); Energy Engineering 490.xx (Special Topics-Modern Power Systems); Electrical and Computer Engineering 341 (Solar Cells); Mechanical Engineering 516 (Thin-Film Photovoltaic Technology).
- **Conversion and Efficiency.** Energy Engineering 490.0xx (Special Topics-Energy for the Built Environment); ECE 431/Energy Engineering 431 (Power Electronic Circuits for Energy Conversion); Energy Engineering 490.xx (Energy Engineering 370) (Special Topics-Transportation Energy); Mechanical Engineering 490.xx (Power for Mechanical Systems). Other courses not listed here can be considered to fulfill the area course requirements. They are to be approved by the energy engineering program director on an individual basis with consideration given to the engineering content and relevance to the field. Please contact the program director before enrolling.
- **Capstone Design.** Energy 490L (Energy and Environment Design) or departmental capstone if the project is energy-related, with prior approval by the energy engineering program director.

### English Minor

**Program Code:** U-ENGL-MIN  
**Plan Type:** Minor  
**Department:** English Department  
**Website:** english.duke.edu/undergraduate/minor-english

**Program Summary**

Duke’s English Department offers a major and minor in English and a minor in creative writing. The program is designed to:

- convey broad historical knowledge of English, American, and other Anglophone literatures,
- cultivate a sophisticated habit of critically engaging literary and cultural texts,
- develop a shared understanding of major problems, trends, and methods of literary and cultural analysis, and
- develop your ability to pose questions and organize knowledge in productive and original ways.

Go to [Programs by Department](#) to view all related programs.

### Academic Requirements

**Academic Requirements**

Five courses at or above the 200 level; or English 101S plus four courses at or above the 200 level. One of the 200 level courses must be a designated seminar. Only one of the five courses may be taken at an institution other than Duke. Advanced Placement credits and courses taken on a Satisfactory/Unsatisfactory grading basis may not be used.

### Environmental Sciences and Policy Minor

**Program Code:** U-ENVS-MIN  
**Plan Type:** Minor  
**Department:** Nicholas School of Environment  
**Website:** nicholas.duke.edu/academics/undergraduate-programs/environmental-sciences-policy

**Program Summary**

If you’re passionate about the environment, love interdisciplinary learning, and want to use the skills and knowledge you acquire at Duke to blaze new and better approaches to climate change and other environmental issues, these are the majors/minors for you.

The minor in Environmental Sciences and Policy allows students to demonstrate an environmental science knowledge in addition to their own major. The minor consists of five courses.

Go to [Programs by Department](#) to view all related programs.

### Academic Requirements

**Academic Requirements**

Five courses: two core courses (Environment 102 and Environment 201); the remaining three courses are selected from 200-level or above environment courses, which may include one substitution of a course in another department. Students with AP credit must select an additional environment course in place of Environment 102 to equal five courses.
Evolutionary Anthropology Minor

Program Code: U-EVAN-MIN
Plan Type: Minor
Department: Evolutionary Anthropology
Website: evolutionaryanthropology.duke.edu/undergraduate/degree-programs/minor

Program Summary
Evolutionary Anthropology is an interdisciplinary department centering on the origin and evolution of human beings and their close biological relatives. The department and its course offerings cover a variety of research areas including primate behavior, ecology, cognition and genetics; primate and human disease ecology; human genetics, energetics, and physiology; paleoanthropology; and functional and comparative anatomy. Opportunities for independent research exist in departmental laboratories, including the Canine Cognition Center and the Primate Locomotion Lab. Additional research opportunities can be found at the Duke Lemur Center and the Lemur Center’s Museum of Natural History.

Go to Programs by Department to view all related programs.

Academic Requirements
Evolutionary Anthropology 101 or 101D; one course in anatomy/paleoanthropology; one course in behavior/ecology/cognition; two elective courses numbered 200 or above in evolutionary anthropology. Approved courses for each of the above subfields are listed in the Handbook for Majors.

Financial Economics Minor

Program Code: U-ECOFIN-M
Plan Type: Minor
Department: Economics Department
Website: econ.duke.edu/undergraduate/minor/finance

Program Summary
Economics courses develop the critical and analytical skills essential for understanding economics and institutions, in both their contemporary and historical settings. Although no particular vocational or professional goal is emphasized, these courses provide the academic background necessary for positions in industry, for work in many branches of government service, for law school, and for graduate study in business administration, economics, and the social sciences.

Go to Programs by Department to view all related programs.

Academic Requirements
Economics 101D and Economics 201D. Economics 104D or Statistical Science 130 or Statistical Science 210 or Statistical Science 230/Mathematics 230 or Statistical Science 250/Mathematics 342D or Biomedical Engineering 244L; Mathematics 202 or Mathematics 212 or Mathematics 216 or Mathematics 219 or Mathematics 222. Financial Economics 372 (FECON 372). Two additional electives to be selected from among the following: Financial Economics (FECON) at the 300 level or above, Financial Markets (FMKT) courses at the 200 level or above, Fintech 520, 533, 534, 536, 550, 552, 564 and Energy 620. A maximum of one transfer credit may be counted toward minor requirements.

French Studies Minor

Program Code: U-FREN-MIN
Plan Type: Minor
Department: Romance Studies Department
Website: romanceseudies.duke.edu/content/french-studies-minor

Program Summary
Students minoring in French will acquire a considerable degree of competence in the written and spoken language as well as knowledge of the literature and culture of France and the French-speaking world.

The department offers a wide array of courses in language, literature, and culture, and strongly encourages interdisciplinary work in French through courses emphasizing the relation between literature, the arts, history, and society.
Study Abroad

Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country’s culture. Courses taken abroad count toward the core and/or related courses as follows:

- **Department-Administered Programs**
  - Duke-in-France. Minor: A maximum of two courses with French course numbers at or above the 300-level per semester may be counted.

- **Duke-Administered Summer Programs (Office of Study Abroad)**
  - Duke-in-Paris. Minor: Two courses may be counted toward the minor.
  - Duke-in-Provence. Minor: One course may be counted.

- **Non-Duke Administered Semester Programs**
  - Minor: One course per semester may be counted.

- **Non-Duke-Administered Summer Programs**
  - Minor: One course may be counted.

Academic Requirements

The French studies minor requires a total of five courses from departmental French offerings, at least four of which are at the 300 level or above. French 204 may count toward this requirement depending on placement.

Gender, Sexuality, and Feminist Studies Minor

Program Code: U-GSF-MIN
Plan Type: Minor
Department: Gender, Sexuality, and Fem Stu
Website: gendersexualityfeminist.duke.edu/undergraduate/major-minors-requirements

Program Summary

The Program in Gender, Sexuality, and Feminist Studies at Duke University is dedicated to exploring gender identifications, relations, practices, theories, and institutions. In the field's first decades, feminist scholarship reoriented traditional disciplines toward the study of women and gender and developed new methodologies and critical vocabularies that have made interdisciplinarity a key feature of women's studies as an autonomous field. Today, scholars continue to explore the meaning and impact of identity as a primary, though by no means transhistorical or universal, way of organizing social life by pursuing an intersectional analysis of gender, race, sexuality, class, and nationality. In the classroom, as in research, the goal of the program is to transform the university’s organization of knowledge by reaching across the epistemological and methodological divisions of historical, political, philosophical, economic, representational, technological, and scientific analysis. Through a dual emphasis on interdisciplinarity and intersectionality, the program offers students new knowledge while equipping them with a wide range of analytical and methodological skills.

Many students identify gender, sexuality and feminist studies courses as among the most exciting and enlightening they take at Duke. The women and men who enroll in the program’s classes each semester gain the opportunity to understand how social, historical, and psychological forces, organized by the central concept of gender, shape them as individuals; attain a fuller understanding of human behavior, culture, and society made possible by investigating women's lives; acquaint themselves with the experience of women of different economic classes, sexual orientations, and cultural and racial backgrounds; and transfer the critical and analytical skills they acquire in the study of gender and society to other classes, beyond the campus to other activities, and eventually to their professional careers.

Gender, sexuality, and feminist studies has, since its inception, been an interdisciplinary field. It has consistently assessed the strengths and challenges of such interdisciplinarity. Duke students find their background in women's studies to be a valuable resource for their professional development and lifelong intellectual growth. Gender, sexuality, and feminist studies at Duke is a focal point within the university for the study of women, gender, and feminist theories—a structure that allows graduate students to address complex issues beyond their traditional disciplinary and classroom boundaries and to explore problems in ways that connect theories and approaches of different disciplines. The Gender, Sexuality, and Feminist Studies Program serves students' intellectual interests by offering credit courses, housing a variety of research projects, and implementing programs for diverse audiences. For additional information, visit the program website at gendersexualityfeminist.duke.edu.

Go to Programs by Department to view all related programs.
Academic Requirements

For the minor, students complete five courses. Gender, Sexuality, and Feminist Studies 199S (Thinking Gender: An Introduction to Feminist Theory) is required, along with two courses from the following:

- 360S. Feminism in Historical Context
- 361. Money, Sex, Power
- 361S. Money, Sex, Power
- 362. Gender and Popular Culture
- 362S. Gender and Popular Culture
- 363S. Interpreting Bodies: Identity and Beyond
- 364S. Race, Gender, and Sexuality
- 365. Gender and Political Theory
- 366S. Nature, Culture and Gender
- 367S. Feminist Ethics
- 368S. Gender, Sexuality and Human Rights
- 369S. Transnational Feminism
- 370S. Queer Theory
- 371S. Gender, Sexuality, and the Image

In addition, students choose two elective courses at or above the 200 level from other in Gender, Sexuality, and Feminist Studies offerings. Students may also petition for credit for courses offered in other departments and programs, with clear documentation of their intellectual value to the overall goals of the major. Students may take no more than two independent study courses, which must be approved by the director of undergraduate studies.

German Minor

Program Code: U-GER-MIN
Plan Type: Minor
Department: German Studies
Website: german.duke.edu/undergraduate/major-minor

Program Summary

Students majoring in German develop language skills, become knowledgeable about the literature and culture of German-speaking areas, and acquire analytic and interpretive abilities. The combination of language skills with the ability to navigate across cultures is excellent preparation for a variety of professions in business, government, engineering, law, education, and academia. Double (second) majors are also encouraged and supported. Numerous opportunities are available, including Global Education programs, interdepartmental majors, Fulbright and German Academic Exchange Service (DAAD) scholarships, independent research and independent studies, and internships, both before and after graduation. Students interested in a major should consult the director of undergraduate studies.

Go to Programs by Department to view all related programs.

Global Cultural Studies in the Literature Program Minor

Program Code: U-LIT-MIN
Plan Type: Minor
Department: Global Cultural Studies in the Literature Program
Website: literature.duke.edu/undergraduate/minor

Program Summary
The Global Cultural Studies Minor of the Program in Literature offers Duke students an opportunity to complement their major field of concentration—whether it be computer science, environmental studies, economics, music, or mathematics—with a suite of courses designed to thematize the larger cultural contexts of their scholarly interests.

Go to Programs by Department to view all related programs.

**Academic Requirements**

The minor in Global Cultural Studies is composed of five courses. All minors are required to take a gateway course (LIT 201) as well as three core courses distributed across at least two of the three domains of humanistic inquiry as defined in the description of our major (Experience, Interpretation, Medium) and taught by faculty holding appointments in Literature, and one elective determined as eligible per DUS review. For more information, visit literature.duke.edu.

**Global Health Minor**

Program Code: U-GLHL-MIN
Plan Type: Minor
Department: Global Health
Website: globalhealth.duke.edu/programs/undergraduate-programs

**Program Summary**

Global health is an area of study, research, and practice that emphasizes achieving health equity for all people worldwide. Global health involves myriad disciplines, incorporates population-based approaches and individual level clinical care, promotes interdisciplinary collaboration, and emphasizes transnational health issues and determinants. The Program in Global Health incorporates knowledge from academic disciplines—within the sciences, social sciences and humanities—to best address the complexity of global health challenges.

Go to Programs by Department to view all related programs.

**Academic Requirements**

Students pursuing a minor in global health must complete the following five course requirements:

- **Gateway**: Global Health 101 (Fundamentals of Global Health)
- **Ethics**: Choose from:
  - Global Health 210 (Global Health Ethics)
  - Global Health 341 (Ethics of Infectious Disease Control)
  - Global Health 373 (Global Health Service, Research, Ethics)
  - Global Health 241 (Global Bioethics)
- **Three electives in Global Health**: Students must complete three global health courses. Cross-listed courses are acceptable, but courses taken Satisfactory/Unsatisfactory and Advanced Placement credits do not count toward the minor. Electives must meet the following requirements:
  - course must include a Global Health offering (either owned or cross-listed);
  - only one 1.0-credit independent study or Bass Connection course (Global Health 391, 392, 393, 395(T), or 396(T)) is allowed per student; and
  - a maximum of 2.0 credits of preapproved study abroad or transfer credit courses are allowed per student.

**Greek Minor**

Program Code: U-GRK-MIN
Plan Type: Minor
Department: Classical Studies Department
Website: classicalstudies.duke.edu/undergraduate/minors

**Program Summary**

Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field
of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to Programs by Department to view all related programs.

Greek Minor (U-GRK-MIN)

Academic Requirements

Five courses in ancient Greek. At least three of these must be taught by a primary or secondary member of the Department of Classical Studies, and at least three courses must be at or above the 250 level.

History Minor

Program Code: U-HIST-MIN
Plan Type: Minor
Department: History Department
Website: history.duke.edu/undergraduate/minor

Program Summary

The history minor allows students specializing in another department or program to enrich their studies with an historical perspective. History courses provide an opportunity to investigate the past, gain perspective on the present, and improve their critical faculties. History provides an integrating principle for the entire learning process, and students of history gain a sense of human development, an understanding of fundamental and lasting social processes, and a feeling for human interrelatedness. History courses train the mind by improving skills in the rigorous analysis of evidence as well as helping you to communicate effectively and with imagination. Those who graduate with a major or minor in history are to be found in all walks of life and all fields of the economy, society, and culture.

Go to Programs by Department to view all related programs.

History Minor (U-HIST-MIN)

Academic Requirements

A minimum of five history courses, at least three of which must be at the 200 level or above. One transfer credit and one cross-listed course originating in another department may be used to meet the requirements for a minor. Advanced Placement (AP) and International Baccalaureate (IB) credits can not be used to fulfill your minor requirements.

Inequality Studies Minor

Program Code: U-HIST-INE
Plan Type: Minor
Department: History Department
Website: history.duke.edu/inequality-studies-minor

Program Summary

The Inequality Studies minor is a joint collaboration between the Samuel DuBois Cook Center on Social Equity and the Department of History. The minor is a way for students to advance their understanding of the causes and consequences of inequality and pursue research around issues of social equity across a range of social science methods. The minor can be completed independent of, or alongside, a major in History. Inequality Studies minors, in fact, come from across departments in both the sciences and humanities.

Inequality Studies Minor (U-HIST-INE)

Academic Requirements

Requirements: 6 courses

Core Courses
- HISTORY 288: History of Inequality
- HISTORY 323: Methods in Inequality Studies
- PUBPOL 435/645: Global Inequality Research Initiative

Electives
Duke University

- History Gateway course, typically listed between 160–180 with inequality themes
- History course at the 200-level or above with inequality themes
- History course at the 300-level or above with inequality themes

A full list of History courses that count towards the minor can be found on the History departmental website.

Requests for additional courses to go on this list should go to the History DUS and the Director of the Minor.

Additional Information
- For History majors who want to minor in Inequality Studies, three minor electives are allowed to overlap with the requirements for the major.
- Courses taken pass/fail and AP credits do not count toward the minor.
- Questions? Email the Director of the Inequality Studies Minor, Adam Hollowell.

Italian Studies Minor
Program Code: U-ITAL-MIN
Plan Type: Minor
Department: Romance Studies Department
Website: romance.studies.duke.edu/undergraduate/minors/italian-studies

Program Summary
Students minoring in Italian develop language skills in their social and cultural contexts.

Go to Programs by Department to view all related programs.

Study Abroad
Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Duke-Administered Semester Programs in English (Duke in Florence; Duke in Venice)
  - Minor: A maximum of one course may be counted toward the core-course requirement.
- Duke-Administered Summer Programs in the language (Duke in Bologna)
  - Minor: Two courses may be counted.
- Duke-Administered Summer Programs in English (Duke in Venice)
  - Minor: One course may be counted toward the core-course requirement.
- Non-Duke-Administered Semester Programs in Italy (All courses taught entirely in Italian)
  - Minor: A maximum of two courses per semester may be counted.
- Non-Duke-Administered Semester Programs in Italy where not all courses are taught in Italian
  - Minor: A maximum of one course per semester may be counted.
- Non-Duke-Administered Summer Programs (Courses taught in Italian)
  - Minor: One course may be counted.

Academic Requirements

A total of six courses from departmental Italian offerings, three of which must be taught in Italian or taken concurrently with a preceptorial (P) component or the Italian 370T tutorial, and must include at least one course in one of the following areas: Medieval, Renaissance, Modern/Contemporary, Linguistics. Two courses in Italian below the 300 level may be counted (restricted to Italian 203, 204, and 213A). Duke-approved courses taught in Italian in study abroad programs may also count toward this minor concentration. Majors and minors are also encouraged to take advantage of 500-600 level course offerings.

Journalism and Media Minor
Program Code: U-JAM-MIN
Plan Type: Minor
Department: DeWitt Wallace Center for Media & Democracy
Website: dewitt.sanford.duke.edu/journalism-and-media-studies-minor-jam

Program Summary
The Journalism and Media minor is administered by the DeWitt Wallace Center for Media & Democracy in the Sanford School of Public Policy. The minor is a way for students interested in the intersection of media, journalism, and democracy to advance their understanding of the increasingly complex and ever-evolving media and information environment and ways in which this environment is affecting politics, culture, and public policy. The minor provides professional and analytical skills for students interested in journalism-related career paths, as well as for students interested in career paths related to media, technology, public affairs, and public policy. The minor can be completed independent of or alongside a major in Public Policy. Journalism and Media Studies minors come from across departments in both the sciences and humanities.

There is no major available for the program.

**Academic Requirements**

**Introductory Skills Course (1 of 3 required):**
- Newswriting and Reporting
- Video Journalism
- Longform Journalism

**Ethics Course (required):**
- News as a Moral Battleground

**Capstone course (required):**
- Final Journalism & Media Studies project course (completed or concurrent internship approved by the JAM director of undergraduate studies required)

**Electives (3 required)**
Students must complete three JAM or PJMS courses, or any courses from other subject areas that are approved for the JAM minor. Study abroad or transfer credit courses will also be allowed with the approval of the JAM director of undergraduate studies.

**Internship (required)**
All students must complete an eight-week media, journalism, and democracy-related internship, approved by the JAM director of undergraduate studies.

**Latin Minor**

Program Code: U-LAT-MIN
Plan Type: Minor
Department: Classical Studies Department
Website: classicalstudies.duke.edu/undergraduate/minors

**Program Summary**
Courses in the Department of Classical Studies offer the chance to bring to life the past of ancient Greece and Rome, through exploration of their languages, literature, history, philosophy, art, material culture, and more. The department offers courses in Latin, Greek, and classical studies; two majors (classical languages and classical civilization); and four minors (Greek, Latin, classical civilizations, and classical archaeology). This rich field of study invites serious engagement with the complexity of the past and evaluation of its place in the present. In grappling with the classical pasts, students develop the tools and habits for thinking critically across space, time, culture, and disciplinary boundaries.

Go to Programs by Department to view all related programs.

**Academic Requirements**

Five courses in Latin. At least three of these must be taught by a primary or secondary member of the Department of Classical Studies, and at least three courses must be at or above the 250 level.

**Linguistics Minor**
Program Summary
From the earliest philosophers to modern neuroscientists, researchers from a wide range of disciplines have explored a diverse range of issues concerning the human capacity for language and the diversity of the world’s languages. Linguists work at the intersection of these issues and define linguistics as the science of language and languages. During the past 150 years, linguists have developed a variety of theoretical paradigms to describe and explain language history, dialect variation, cross-cultural similarities and differences, the neurological processing and production of language, and the evolutionary emergence of language.

Go to Programs by Department to view all related programs.

Academic Requirements
Five courses in linguistics, three of which must be at the 200 level or above. Usually, two of these courses are Linguistics 201 and Linguistics 202.

Academic Requirements

Fundamental Courses
Intermediate Machine Learning & Artificial Intelligence course—ECE 682D/CS 571D/STA 561D or ECE 687D/CS 671D/STA 671D

Upper-Level Focus Courses
Choose two (2)
- ECE 585: Signal Detection and Extraction Theory
- ECE 588: Image & Video Processing
- ECE 661: Computer Engineering Machine Learning & Deep Neural Networks
- ECE 684: Natural Language Processing
- ECE 685D: Deep Learning
- COMPSCI 527: Computer Vision
- MATH 412: Topological Data Analysis
- MATH 465/COMPSCI 445: Introduction to High Dimensional Data Analysis
- STA 340: Introduction to Statistical Decision Analysis
- STA 360: Bayesian Inference and Modern Statistical Methods
- ECE 590: Special Topics courses on machine learning and artificial intelligence topics (with DUS approval)
Duke University

Important Notes

- Courses that are used to fulfill the student’s primary major may not be double-counted toward the minor.
- Courses with content substantially equivalent to courses in the student’s primary major may not be counted toward the minor.
- Students with credit for any of the Fundamental Courses (e.g., exact or equivalent course taken to satisfy a requirement of the primary major) may substitute additional Upper-Level Focus courses from the approved list above. The Director of Undergraduate Studies in ECE must approve such exceptions.
- At most, one Independent Study course (approved by the DUS in ECE) may be used to fulfill one of the upper-level elective requirements.

Prerequisites

It is expected that a student pursuing a Minor in Machine Learning & Artificial Intelligence will satisfy all prerequisites for each course selected for their minor program.

This will typically involve completion of courses in Math, Statistics, and Computer Science, which are prerequisites for the fundamental and elective courses.

Specifically, the following prerequisite knowledge is assumed:

- Mid-level programming course (e.g., COMPSCI 201)
- Linear algebra (e.g., MATH 216, 218, 221)
- Introductory statistics (e.g., EGR 238L, ECE 380, ECE 555, STA/MATH 230, Stat 240L)

Exceptions may be granted by the Director of Undergraduate Studies in ECE, for example, if a student’s preparation is deemed equivalent to the prerequisite.

Marine Science and Conservation Minor

Program Code: U-MSC-MIN
Plan Type: Minor
Department: Marine Science & Conservation
Website: nicholas.duke.edu/academics/undergraduate-programs/marine-science-conservation

Program Summary

The Marine Science and Conservation majors and minor are offered through the Division of Marine Science and Conservation in the Nicholas School of the Environment. The majority of the Division of Marine Science and Conservation faculty are resident at the Marine Laboratory in Beaufort, NC. Additional courses in marine science are offered in the Trinity College of Arts and Sciences and in the Divisions of Environmental Science and Policy and Earth and Climate Science in the Nicholas School of the Environment, and the Pratt School of Engineering.

The Duke University Marine Lab provides students with a unique experiential opportunity to live and study in Beaufort for a full academic semester (fall or spring) or during two summer terms. The program emphasizes small class sizes, independent research projects, and integrated classroom, laboratory, and field experiences. Students have daily access to the surrounding marine environment and to modern scientific equipment including a shared-use molecular laboratory, and the Marine Robotics and Remote Sensing (MARSS) Lab.

Residential undergraduate courses are offered year-round (fall, spring, and summer sessions I and II) at the Duke Marine Lab. Fall and spring courses include travel courses which offer students opportunities for extended travel with Duke faculty to Mexico, Puerto Rico, Singapore, the US Virgin Islands, or other domestic or international locations. Small class size and an island setting facilitate rewarding student-faculty interactions.

Go to Programs by Department to view all related programs.

Marine Science and Conservation Minor (U-MSC-MIN)

Academic Requirements

Academic Requirements

Five courses, consisting of one gateway course, Future of the Oceans (MARSCI 201). A choice of any one of the three core courses, Marine Biology and Ecology (MARSCI 202), Marine Social Science (MARSCI 203), and Integrative Oceanography (MARSCI 204) and three Marine Science and Conservation courses at the 200-level or greater. Only one independent study with MARSCI faculty can be used toward the minor. A maximum of one non-MARSCI Duke course can be used toward the minor.

Mathematics Minor

Program Code: U-MATH-MIN
Plan Type: Minor
Department: Mathematics Department
Website: math.duke.edu/undergraduate/minor
Program Summary
The director of undergraduate studies can be consulted for additional information and advice on course selection. The Handbook for Mathematics Majors and Minors, published by the department, can be used as a guide in developing a coherent program of study consistent with professional goals.

Go to Programs by Department to view all related programs.

Mathematics Minor (U-MATH-MIN)

Academic Requirements

Academic Requirements
Prerequisites. Mathematics 212 or 222 or the equivalent
Requirements. Five courses in mathematics numbered above 212, other than 222, to include at least one course (or its equivalent) from the following: Mathematics 230, 333, 361S, 401, 411, 412, 421, 431, 451S, 487, or any Mathematics course at the 500 or 600 level.

Medical Sociology Minor
Program Code: U-MEDSOC-M
Plan Type: Minor
Department: Sociology Department
Website: sociology.duke.edu/undergraduate/minors

Program Summary
Medical sociology is the study of social and cultural causes and consequences of health and illness. Major areas of investigation include doctor/patient relationships, the unequal distribution of health, cross-cultural understandings of well-being, the socioeconomics of healthcare, and public health policies. The medical sociology minor prepares students for careers in medicine, research, and public health, as well as the behavioral and social science portions of the Medical College Admission Test (MCAT).

Go to Programs by Department to view all related programs.

Medical Sociology Minor (U-MEDSOC-M)

Academic Requirements

Academic Requirements
Students are required to take one foundation course: SOCIOL 250 or SOCIOL 361. Additionally, students take four electives chosen from SOCIOL 196FS, SOCIOL 212, SOCIOL 230S, SOCIOL 250, SOCIOL 255, SOCIOL 257, SOCIOL 264, SOCIOL 265, SOCIOL 271, SOCIOL 349, SOCIOL 351, SOCIOL 361, and SOCIOL 364S. Special topics courses (SOCIOL 290S or 490S) and independent studies (SOCIOL 291 or 293) may count as electives if the topic is related to medical sociology and approved by the director of undergraduate studies.

Medieval and Renaissance Studies Minor
Program Code: U-MDVL-MIN
Plan Type: Minor
Department: Medieval and Renaissance Studies Program
Website: cmrs.trinity.duke.edu/undergraduate/major-and-minor

Program Summary
The Program in Medieval and Renaissance Studies is designed to provide the student with a well-rounded understanding of the historical, cultural, and social forces that shaped the medieval and Renaissance periods. The program is divided into four areas of study: fine arts (art and music); history, language and literature (English, French, German, Greek, Italian, Latin, and Spanish); and philosophy and religion.

Go to Programs by Department to view all related programs.

Medieval and Renaissance Studies Minor (U-MDVL-MIN)

Academic Requirements

Academic Requirements
Five courses, two of which must be Medieval and Renaissance Studies Focus Program courses or courses designated as Medieval Cultures and Renaissance Cultures. The three remaining courses may be taken in any distribution suiting the student's interests in consultation with a Medieval and Renaissance Studies advisor.

The Four Course Study Areas
The following courses are taken in distributions across four areas of study. Some of these courses are available in more than one study area. Cross-listed courses may count toward the major or minor in both Medieval and Renaissance Studies and in the cross-listed departments or programs.

Area 1: Fine Arts

Area 2: History

Area 3: Language and Literature

Area 4: Philosophy and Religious Studies

Additional Topics and Seminar Courses
The following topics courses are taught in various disciplines and vary from semester to semester. They may be taken in any of the above four study areas depending on the nature of their subjects. Students need to consult with a Medieval and Renaissance Studies advisor to determine how any one of these courses may be distributed: 89S, 190A, 190S, 291, 293, 390, 390A, 390S, 491, 493, 590, 590S.

Music Minor
Program Code: U-MUS-MIN
Plan Type: Minor
Department: Music Department
Website: music.duke.edu/undergraduate/minor

Program Summary
Music is among the most ancient of human pursuits and has long been viewed as a crucial part of education. As a discipline, it has its own logic and grammar in the understanding of which the mind is stretched and tested. Students at Duke encounter a variety of approaches to music that encompass the many ways that we create, perform, and comprehend it.

The Minor I: Score-focused serves students who are engaged in music making, widely and broadly conceived, or who are invested listeners and would like to develop their critical thinking about music, improve their listening and analytical skills, expose themselves to a range of practices, styles, and ideas about music, and explore avenues towards the professional world of music. Music Minor I: Score-focused is designed to complement Music Minor II: Listening-focused which caters to students who are focused on aural practices. For Music Minor I, students will pursue aspects of theory, history, and performance, and supplement with courses in their field of interest. Reading music notation is a requirement for Minor I.

Courses fall into three broad categories: theory and composition, literature, history, and ethnomusicology, and applied music (performance). Within these are included many kinds of instruction, such as lessons in performance and composition; theory; history and literature lectures and seminars; electronic music classes; ensembles; practical laboratory work (such as ear-training or Listening Lab), coaching sessions in chamber music; and classes in improvisation. Students’ musical activity can vary widely across the spectrum. Almost every student has some personal involvement with music, and the courses aim to further that involvement, whether it is a simple hobby or a compelling interest.

Go to Programs by Department to view all related programs.

Graduation with Distinction in Music Performance for Non-Majors
Candidates for distinction in music performance for non-majors apply to the Director of Undergraduate Studies by April 1 of their junior year and are admitted to the program by a faculty committee (the thesis advisor must be a regular rank Music department faculty member) on the basis of recent live recordings. During the senior year the student will enroll in Music 401 (Advanced Study in Performance) both semesters. A distinction in musical performance project consists of (a) a full recital supported by a high-quality audio or video recording as documentation of the event; and (b) a written component, either in the form of an analytical paper or another organized commentary on the recital. One semester of research independent study (Music 393) is required in preparation of the written component. To be awarded distinction a student must maintain a GPA of 3.5 in the core music department courses, and a 3.3 GPA overall. For more information, consult the music department website at music.duke.edu/undergraduate/graduation-with-distinction.

Music Minor (U-MUS-MIN)
A minimum of 5.5 course credits is required for the score-focused minor, of which at least 3.0 full course credits must be above the 213 level.

- Music 261 Theory and Practice of Tonal Music I
- One course in music history, selected from the following:
  - Music 255S Music History I: Antiquity through Renaissance
  - Music 256S Music History II: 1600 through Mozart
  - Music 257 Music History III: Beethoven through WWI
  - Music 258 Music History IV: Post-WWI through the Present
- Two semester courses in performance from among:
  - Music 101-108, 203-213 (excluding 210-3). These courses cover classical or jazz piano, organ, harpsichord, violin, cello, string bass, classical or jazz guitar, harp, flute, oboe, clarinet, bassoon, saxophone, trumpet, French horn, trombone, tuba, percussions, djembe, voice, and some ensembles.
  - Music 318 Instrumental Conducting
  - Music 319 Choral Conducting
  - Music 401 Advanced Study in Musical Performance
  - Music 418 Advanced Study in Conducting
- Three elective courses, two must be above the level of Music 213. Music 120, 121, 129S, 130, 137, 140, 141, 143, 144, 146, 147, 161, 161-2, 162S, 163L, 190S, and Music courses numbered above 213 may count as an elective toward the minor.

For a list of Music courses offered, refer to music.duke.edu/courses.

**Students majoring or minoring in Music MUST complete the core requirements for a letter grade. S/U grading will NOT count toward the completion of the Music major or minor.**

**Waiver of Music Minor Requirements**

A request for waiver of any requirement for the music major or the music minor, together with supporting documentation where appropriate, should be submitted to the Director of Undergraduate Studies (DUS).

After reviewing the request, the DUS may decide that the student needs to take a departmental examination in the area before a final decision can be made. Waived courses earn no credit towards the 34-course graduation requirement, nor will grades for them appear on your transcript.

**Music Listening-Focused Minor**

Program Code: U-MUSL-MIN

Plan Type: Minor

Department: Music Department

Website: music.duke.edu/minor-music-listening-focused

**Program Summary**

Music is among the most ancient of human pursuits and has long been viewed as a crucial part of education. As a discipline, it has its own logic and grammar in the understanding of which the mind is stretched and tested. Students at Duke encounter a variety of approaches to music that encompass the many ways that we create, perform, and comprehend it.

The Music Minor II: Listening-focused hopes to serve students who are engaged in music making, widely and broadly conceived, or who are invested listeners and would like to develop their critical thinking about music, improve their listening skills, expose themselves to a range of sounds and ideas about music, and explore avenues towards the professional world of musical entertainment. Music Minor II: Listening-focused is designed to complement Music Minor I: Score-focused which caters to students who read music notation. For Music Minor II, students may draw on Duke’s student-initiated music-making opportunities, Durham’s music offerings, or the Department’s ensembles and lessons. Reading music notation is not a requirement for Minor II. However, Minor II is also available to students with notation skills who wish to expand the scope of their knowledge beyond their particular canonical expertise or to put their interests in dialogue with other musical histories or styles.

Attending to music – playing together, listening, dancing, talking – is a major preoccupation of student social life. Minor II accommodates students’ diverse musical interests and skills.

Go to Programs by Department to view all related programs.

**Academic Requirements**

**Academic Requirements**

A minimum of 5.5 course credits are required for the Listening-focused minor, of which at least 1.0 full academic course must be above MUSIC 213.

The listening-focused minor requires:

- MUSIC 163L Listening Lab (1.0 credit)
A “course cluster” consisting of four full-credit electives (at least 1.0 full academic course must be above MUSIC 213 (MUSIC 401 excluded))

Two semesters of Artistic Practice Workshop, taken concurrently with an approved artistic practice (ensembles, lessons, sound production, composition, other) (0.25 credits per semester)

Options to fulfill the artistic practice requirement include:

1. participation in an existing music department ensemble, an active campus ensemble or band, or a community-based music group;
2. cultivation of artistic knowledge, such as beat making, studio production, composition classes, or applied music lessons.

All students must participate in some form of ensemble. Therefore, a student who chooses Option 2 must also participate in an ensemble for at least one semester.

Students majoring or minoring in Music MUST complete the core requirements for a letter grade. S/U grading will NOT count toward the completion of the Music major or minor.

Waiver of Music Minor Requirements
A request for waiver of any requirement for the music major or the music minor, together with supporting documentation where appropriate, should be submitted to the Director of Undergraduate Studies.

After reviewing the request, the DUS may decide that the student needs to take a departmental examination in the area before a final decision can be made. Waived courses earn no credit towards the 34-course graduation requirement, nor will grades for them appear on your transcript.

Musical Theater Minor
Program Code: U-MUSTHE-M
Plan Type: Minor
Department: Theater Studies
Website: theaterstudies.duke.edu/academics/major

Program Summary
The Department of Theater Studies offers students a variety of opportunities to study and practice theater, combining respect for history with immersion in contemporary issues, and intellectual engagement with creative expression. The faculty views theater as a form of human expression, shaped by social, economic, technological, personal, and artistic forces.

The musical theater minor is offered to students specifically interested in developing artistic and critical skills in the field of musical theater. Courses are offered that focus on performing, writing, and directing musical theater—as well as on the history and theory of the genre.

Go to Programs by Department to view all related programs.
Musical Theater Minor (U-MUSTHE-M)

Academic Requirements

A total of five courses are required for the minor, and students must earn grades of C- or above in all courses that count for the minor.

- Theater Studies 209 (How Musicals Work)
- Theater Studies 125S (American Musicals)
- Two required courses in practice, which may be chosen from the following courses:
  - Theater Studies 211 (Musical Theater Workshop: Performance)
  - Theater Studies 212 (Musical Theater Workshop: Creation)
  - Theater Studies 215 (The Singing Actor)
  - Theater Studies 241 (Cabaret Workshop)
  - Theater Studies 255S (Directing)
  - Theater Studies 347S (The Moving and Sounding Body)
- One additional course at or above the 100-level, which may be an additional course in practice or an academic seminar on a topic related to musical theater

Neuroscience Minor

Program Code: U-NEUR-MIN
Plan Type: Minor
Department: Neuroscience
Website: psychandneuro.duke.edu/undergraduate/neuroscience/requirements

Program Summary

Like the inner workings of the brain itself, neuroscience synthesizes discovery from diverse sources of knowledge. The undergraduate curriculum in neuroscience reflects this interdisciplinary perspective and challenges students to explore knowledge across levels of analysis: from the molecular and cellular level, through the level of neural circuits within which cells are organized and interconnected, and toward the level of
behavior where the functions of neural circuits and systems, including human cognition, are manifested. A comprehensive understanding of neuroscience requires knowledge of each level and integrative learning across levels.

The principal strength of this program is that it provides rich opportunities for undergraduate students to study brain science with faculty from diverse disciplines who bring their complementary perspectives and expertise to the classroom and laboratory. Thus, the undergraduate curriculum in neuroscience is truly a joint, interdisciplinary major/minor that draws faculty and courses from several departments, chiefly the Department of Psychology in the Trinity College of Arts & Sciences. Students may also elect to pursue faculty-mentored research and scholarship wherever brain science discovery happens at Duke. Indeed, the broad impact of neuroscience discovery now extends beyond the academic disciplines in the natural sciences to spaces where neuroscientists collaborate and regularly interact with experts in ethics, law, business, social sciences, philosophy, engineering, the fine arts and performing arts, and the humanities. Accordingly, our neuroscience curriculum reflects this broad interdisciplinary platform for discovery and learning, with a rich offering of coursework and experiences that reflect the exciting growth of neuroscience and its increasing relevance to human flourishing, the diverse challenges facing society, and the health and wellness of all life.

Go to Programs by Department to view all related programs.

### Neuroscience Minor (U-NEUR-MIN)

#### Academic Requirements

The minor in neuroscience for students at Trinity College requires a minimum of five neuroscience courses: one gateway course, one (or both) core courses, and three elective courses. Four of the courses must be 200-level or higher. Biomedical Engineering students pursuing a minor in neuroscience must take BME 301L/NEUROSCI 301L as one of their electives.

No more than two of the five courses required for the minor may be used to satisfy the requirements of another major, minor, or certificate.

### Philosophy Minor (U-PHIL-MIN)

#### Program Summary

The undergraduate program in the Department of Philosophy acquaints students with the content and structure of philosophical theory in various areas. Classes encourage discussion so that students can engage actively in the philosophical examination of problems.

Course offerings fall into two general categories: the systematic and the historical. In a systematic treatment, the organization of a course reflects the problems presented by the subject matter of that course, as in logic, ethics, and metaphysics. Historical courses direct attention more to the order of development in the thought of a particular philosopher (Plato, Aristotle, Kant) or in a historical period. In all courses, reading of the works of philosophers acquaints the students with the important and influential contributions to the definition and solution of philosophical issues.

The problems raised in philosophy about various fields of the arts and sciences involve questions that these particular disciplines typically neglect. In consideration of such problems, students will acquire some understanding and perspective of the major areas of human intellectual endeavor. Philosophical comprehension is in this way an essential part of a complete education.

Philosophy provides a sound preparation for the demands of many professions. For example, the precision of argument and broad acquaintance with intellectual traditions emphasized in philosophy form an excellent basis for the study of law.

Go to Programs by Department to view all related programs.

### Photography Minor (U-PHTG-MIN)

#### Program Summary

At least five courses, no more than two of which may be below the 200 level. No specific courses are required. All students who wish to pursue a minor are encouraged to seek advice from faculty members in the department.
Visual competence and media literacy are central to critical thinking in the twenty-first century. The historical study of art, architecture, and visual culture provides the understanding and the language necessary for analyzing images, objects, and buildings and for recognizing and theorizing their social impact. The making of art develops the ability to think critically and visually, resolve spatial problems, and apply concepts to the creation of images, objects, multimedia installations, actions, and a variety of new socially interactive relations in culture. Visual studies enable understanding of the role of images in everything from the fine arts and the psychology of perception to popular culture and the media (advertising, television, photography, film, video, the Internet, and computer imagining), as well as in all professional and social contexts from the courtroom and hospital to the lecture hall and street.

Go to Programs by Department to view all related programs.

**Photography Minor (U-PHTG-MIN)**

**Academic Requirements**

**Academic Requirements**

Five courses related to photography, with the following courses required: Visual Arts 115 (Introduction to Photography) or Visual Arts 119S (Introduction to Digital Photography); Art History 303 (History of Photography); and Visual Arts 492 (Individual Project). Two transfer courses may count toward the requirements for the minor; courses taken Satisfactory/ Unsatisfactory or Advanced Placement credits do not count toward the minor.

**Physics Minor**

Program Code: U-PHYS-MIN

Plan Type: Minor

Department: Physics Department

Website: physics.duke.edu/undergraduate/physics-major-minor/minor

**Program Summary**

The undergraduate program in physics gives you an opportunity to explore how modern science is unraveling some of the mysteries that have held humankind in awe since the earliest of times. It is designed to acquaint you with the fundamental aspects of our description of nature and to develop analytic and laboratory skills.

The physics minor is intended as a pathway for students to build educational depth in physics as a broad field or in subdiscipline as a way to augment another major.

Go to Programs by Department to view all related programs.

**Polish Minor**

Program Code: U-POLISH-M

Plan Type: Minor

Department: Slavic and Eurasian Studies

Website: slaviceurasian.duke.edu/undergraduate/minor/polish-culture-language

**Program Summary**

The Department of Slavic and Eurasian Studies has a strong commitment to increasing the language proficiency of its students regardless of their level at matriculation, to facilitate deep knowledge of the cultural context of each language represented, to help students develop their own scholarly interests and research abilities, and to acquaint students with trends in literary, linguistic, and cultural theory. Areas of specialization include nineteenth- and twentieth-century Russian and Soviet literature, Polish language and literature, semiotics, gender studies, film and media studies, legal and business Russian language, translation, Slavic linguistics, contemporary Russian and Polish literature, scientific and scholarly Russian language, stylistics, and Russian and Polish cultural history. Languages taught include Russian, Polish, and Romanian.

Resources for study include a state-of-the-art language laboratory with video facilities and a humanities computing facility, reception of daily Russian television programming, and an exchange program with St. Petersburg University. The department offers several Focus seminars and maintains a cooperative relationship with Duke programs in Linguistics, Global Cultural Studies in Literature, Gender, Sexuality, and Feminist Studies, and Cultural Anthropology; the Center for Slavic, Eurasian, and East European Studies; and related programs at The University of North Carolina at Chapel Hill.
Academic Requirements

Political Science Minor

Five courses, three of which must be at the 200 level or above. At least two of these courses must be Polish language courses.

Psychology Minor

A minimum of five courses in political science, at least two of which are at the 300 or higher level. Four courses must be Duke courses taught by a member of the Duke political science instructional staff, but one course may be a transfer course. However, in satisfying the minor, students in the Robertson Scholars Program may count, exclusive of the transfer course, one course taken at The University of North Carolina at Chapel Hill. Courses taken Satisfactory/Unsatisfactory and Advanced Placement courses do not satisfy course requirements for the minor.

Psychology Minor

Five courses in psychology including Psychology 101 (Introductory Psychology) and at least two survey courses that cover major areas of the field. One of these survey courses must be Psychology 106/107 (Biological Bases of Behavior) or Psychology 102 (Cognitive Psychology), and one must either be Psychology 105 (Clinical Psychology and Mental Health), Psychology 103 (Developmental Psychology), or Psychology 104 (Social Psychology). At least one of the remaining courses must be beyond the survey level (i.e., above 107). However, students may not use introductory-level courses taken in Statistical Science to satisfy elective requirements for the psychology minor.

Religion Minor

Program Code: U-REL-MIN
Plan Type: Minor
Department: Religious Studies Department
Website: religiousstudies.duke.edu/undergraduate/minor
Program Summary
The Department of Religious Studies offers a broad selection of undergraduate courses to majors, minors, and all interested students on campus. The department engages in different aspects of the study of religion, using a variety of perspectives and methodologies. The major religious traditions of the world—Christianity, Islam, Judaism, Buddhism, Hinduism, Confucianism, and Taoism—are studied in the ways they manifest themselves in present-day societies and in their historical depth, examining their origins and sacred texts (often in the original languages) as well as their historical developments, rituals, artifacts, practices, material forms, and transformations over time. Beyond the study of individual religious traditions, theories, and definitions of religion are also explored. Courses numbered 100 through 199 include a survey or general courses; courses numbered 200 through 399 include courses on more specific aspects of religion or religious traditions.

The religious studies minor offers students specializing in another department or program the opportunity to enrich their studies by engaging in the consideration of religion.

Academic Requirements
A minimum of five religious studies courses, at least one of which must be numbered 200 or above. Minors are encouraged to take RELIGION 101 (Introduction to Religious Studies). Only one approved study abroad course can count toward the minor. Only one Duke Divinity School course can count toward the minor, and that course cannot be equivalent to a course offered by the religious studies department. Students who wish to take Duke Divinity School courses should consult the director of undergraduate studies regarding credit toward the religious studies minor.

Russian Minor
Program Code: U-RUS-MIN
Plan Type: Minor
Department: Slavic and Eurasian Studies
Website: slaviceurasian.duke.edu/undergraduate/minor/russian-culture-language

Program Summary
The Department of Slavic and Eurasian Studies has a strong commitment to increasing the language proficiency of its students regardless of their level at matriculation, to facilitate deep knowledge of the cultural context of each language represented, to help students develop their own scholarly interests and research abilities, and to acquaint students with trends in literary, linguistic, and cultural theory. Areas of specialization include nineteenth- and twentieth-century Russian and Soviet literature, Polish language and literature, semiotics, gender studies, film and media studies, legal and business Russian language, translation, Slavic linguistics, contemporary Russian and Polish literature, scientific and scholarly Russian language, stylistics, and Russian and Polish cultural history. Languages taught include Russian, Polish, and Ukrainian.

Resources for study include a state-of-the-art language laboratory with video facilities and a humanities computing facility, reception of daily Russian television programming, and an exchange program with St. Petersburg University. The department offers several Focus seminars and maintains a cooperative relationship with Duke programs in Linguistics, Global Cultural Studies in Literature, Gender, Sexuality, and Feminist Studies, and Cultural Anthropology; the Center for Slavic, Eurasian and East European Studies; and related programs at The University of North Carolina at Chapel Hill.

Academic Requirements
Five courses, three of which must be at the 200 level or above. At least two of these courses must be Russian language courses.

Russian and East European Literature in Translation Minor
Program Code: U-RLT-MIN
Plan Type: Minor
Department: Slavic and Eurasian Studies
Website: slaviceurasian.duke.edu/undergraduate/minor/russian-literature-translation

Program Summary
Duke University

The Department of Slavic and Eurasian Studies has a strong commitment to increasing the language proficiency of its students regardless of their level at matriculation, to facilitate deep knowledge of the cultural context of each language represented, to help students develop their own scholarly interests and research abilities, and to acquaint students with trends in literary, linguistic, and cultural theory. Areas of specialization include nineteenth- and twentieth-century Russian and Soviet literature, Polish language and literature, semiotics, gender studies, film and media studies, legal and business Russian language, translation, Slavic linguistics, contemporary Russian and Polish literature, scientific and scholarly Russian language, stylistics, and Russian and Polish cultural history. Languages taught include Russian, Polish, and Ukrainian.

Resources for study include a state-of-the-art language laboratory with video facilities and a humanities computing facility, reception of daily Russian television programming, and an exchange program with St. Petersburg University. The department offers several Focus seminars and maintains a cooperative relationship with Duke programs in Linguistics, Global Cultural Studies in Literature, Gender, Sexuality, and Feminist Studies, and Cultural Anthropology; the Center for Slavic, Eurasian and East European Studies; and related programs at The University of North Carolina at Chapel Hill.

### Academic Requirements

**Sexuality Studies Minor**

Program Code: U-SXL-MIN

Plan Type: Minor

Department: Program in the Study of Sexualities

Website: gendersexualityfeminist.duke.edu/undergraduate/major-minors-requirements

**Program Summary**

The Program in Gender, Sexuality, and Feminist Studies at Duke University is dedicated to exploring gender identifications, relations, practices, theories, and institutions. In the field’s first decades, feminist scholarship reoriented traditional disciplines toward the study of women and gender and developed new methodologies and critical vocabularies that have made interdisciplinarity a key feature of women’s studies as an autonomous field. Today, scholars continue to explore the meaning and impact of identity as a primary, though by no means transhistorical or universal, way of organizing social life by pursuing an intersectional analysis of gender, race, sexuality, class, and nationality. In the classroom, as in research, the goal of the program is to transform the university’s organization of knowledge by reaching across the epistemological and methodological divisions of historical, political, philosophical, economic, representational, technological, and scientific analysis. Through a dual emphasis on interdisciplinarity and intersectionality, the program offers students new knowledge while equipping them with a wide range of analytical and methodological skills.

Many students identify gender, sexuality and feminist studies courses as among the most exciting and enlightening they take at Duke. The women and men who enroll in the program’s classes each semester gain the opportunity to understand how social, historical, and psychological forces, organized by the central concept of gender, shape them as individuals; attain a fuller understanding of human behavior, culture, and society made possible by investigating women’s lives; acquaint themselves with the experience of women of different economic classes, sexual orientations, and cultural and racial backgrounds; and transfer the critical and analytical skills they acquire in the study of gender and society to other classes, beyond the campus to other activities, and eventually to their professional careers.

Gender, sexuality, and feminist studies have, since its inception, been an interdisciplinary field. It has consistently assessed the strengths and challenges of such interdisciplinarity. Duke students find their background in women’s studies to be a valuable resource for their professional development and lifelong intellectual growth. Gender, sexuality, and feminist studies at Duke is a focal point within the university for the study of women, gender, and feminist theories—a structure that allows graduate students to address complex issues beyond their traditional disciplinary and classroom boundaries and to explore problems in ways that connect theories and approaches of different disciplines. The Gender, Sexuality, and Feminist Studies Program serves students’ intellectual interests by offering credit courses, housing a variety of research projects, and implementing programs for diverse audiences. For additional information, visit the program website at gendersexualityfeminist.duke.edu.

Go to Programs by Department to view all related programs.

**Academic Requirements**

For the minor in sexuality studies, students complete five courses: the required Sexuality Studies 199S (Introduction to the Study of Sexualities) and four electives listed as SXL. Of the four electives, one must be a seminar at the 300 level or above. One of the following can count as an elective, with permission of the director of undergraduate studies: (a) an independent study, including thesis writing or research, on a topic focused on
sexuality studies; (b) a study abroad course with 50% or more focus on sexuality-studies themes; or (c) a relevant course offered by another unit (not cross-listed with SXL), with clear documentation of its intellectual value to the overall goals of the minor.

Sociology Minor
Program Code: U-SOC-MIN
Plan Type: Minor
Department: Sociology Department
Website: sociology.duke.edu/undergraduate/minors

Program Summary
Sociology is a field that uses scientific methods to answer questions about human behavior and society, such as: What impact does racial segregation have on students’ educational outcomes? Who gets sick and why? How do social networks affect business profits? What are the social causes of criminal behavior? How can we harness big data to understand political divides? The department prides itself on creating an engaging curriculum that develops students’ analytic and communication skills, provides in-depth knowledge of multiple research methods and substantive areas, and hones tools needed for a wide variety of professions. The department fosters active involvement in the learning process through seminars, fieldwork, independent study, and its Honors Program. Duke Sociology's signature strengths include race and inequality, medical sociology, organizational sociology, sociology of law, crime and justice, and computational social science.

Go to Programs by Department to view all related programs.

Academic Requirements

Students take five courses, four of which must be at or above the 200-level. Only one transfer credit and no Advanced Placement credits may count toward the minor. Students preparing for careers in medicine, business, and law may cluster their courses in one of the department's core areas of strength:

- Medical Sociology
- Sociology of Work and Organizations
- Sociology of Crime, Law, and Justice

Spanish Minor
Program Code: U-SPAN-MIN
Plan Type: Minor
Department: Romance Studies Department
Website: romance.studies.duke.edu/spanish-studies-minor

Program Summary
Did you know that Spanish is the second largest world language as a vehicle of international communication and the third as an international language of politics, economics and culture? Or that about 330 million people in the world speak Spanish as their first language? Or that Spanish is the official language in 21 countries and is expected to be the first language of 50% of the population of the United States within 50 years? Our department sponsors summer study abroad programs (Duke in Spain, Duke in Chile, Duke in Costa Rica, and Duke Intensive Spanish in Alicante) and one semester/year study abroad program (Duke in Madrid). We encourage students to plan early in order to attain an advanced level in Spanish and to work into their study plans the possibility of studying abroad in a Spanish-speaking country.

Go to Programs by Department to view all related programs.

Study Abroad
Students are strongly urged to study abroad since this is the best way to achieve language proficiency and to acquire knowledge of a country's culture. Courses taken abroad count toward the core and/or related courses as follows:

- Department-Administered Programs
  - Duke in Madrid. Minor: a maximum of two courses may be counted.
  - Duke in Madrid-Intermediate. Minor: Spanish 314A, Gastronomía de España, being equivalent to Spanish 204 and advanced 300 level, counts as one course.

- Duke-Administered Summer Programs (Office of Study Abroad)
  - Duke in Chile. Minor: Spanish 315A Language and Culture of Entrepreneurship in Latin America counts as one course credit.
  - Duke in Spain. Minor: Spanish 439SA Global Spain counts as two course credits.
Non-Duke-Administered Semester Programs

Minor: One course per semester may be counted.

Non-Duke-Administered Summer Programs

Minor: One course may be counted.

Academic Requirements

A total of five courses from departmental Spanish offerings numbered 300 or above. Courses for the minor must include one survey course (Spanish 332, 333, 334, 335, 336) and at least two courses at the 400 level or above. All five courses must be taught in Spanish (but Spanish 336 or 490S-2 may substitute for one of the five FL courses).

Statistical Science Minor

Program Code: U-STA-MIN
Plan Type: Minor
Department: Statistical Science
Website: stat.duke.edu/undergraduate/minor

Program Summary

The Department of Statistical Science coordinates teaching and research in the statistical sciences at Duke University. In its teaching and research, the department's faculty members emphasize modern statistical methods involving computationally intensive stochastic modeling, coupled with interdisciplinary applications in many fields. The department also offers courses in basic statistical and data science methods and advanced mathematical statistics.

The minor is designed to provide students in other disciplines with opportunities for exposure and skill development in advanced statistical methods. These are useful for conducting research in applied subjects, and they are appealing to employers and graduate schools seeking students with quantitative skills. The minor is flexible, so that students from most majors can find a path to the minor that serves their needs. A maximum of two grades of D+, D, or D- can be counted toward the minor.

Go to Programs by Department to view all related programs.

Academic Requirements

Prerequisites. Mathematics 21 (or 111L), 122 (or 112L), and 212 (or 202).

Requirements. Statistical Science 240L/Mathematics 228L or Statistical Science 230/Mathematics 230 or Statistical Science 231/Mathematics 340; Statistical Science 432/Mathematics 343; Statistical Science 210. Two additional courses in Statistical Science at or above the 100 level, only one of which can be from 100 level.

Theater Studies Minor

Program Code: U-THEA-MIN
Plan Type: Minor
Department: Theater Studies
Website: theaterstudies.duke.edu/academics/major

Program Summary

The Department of Theater Studies offers students a variety of opportunities to study and practice theater, combining respect for history with immersion in contemporary issues, and intellectual engagement with creative expression. The faculty views theater as a form of human expression, shaped by social, economic, technological, personal, and artistic forces.

Courses are designed to offer minors and nonmajors the opportunity to deepen their understanding and appreciation of the theater. Guiding the work of the faculty is the belief that theater is a collaborative art form that reaches out to other disciplines.

Courses in acting, directing, design, technical theater, dramatic literature, theater history, and performance studies are complemented by productions of plays, past and present. This combination of academic coursework and production experience is a hallmark of the department’s approach.

Go to Programs by Department to view all related programs.
Academic Requirements

Theater Studies 187S (Reading Theater) or 187A (Reading Theater in New York)

Four additional 100-level or above courses in theater studies

Visual and Media Studies Minor
Program Code: U-VIS-MIN
Plan Type: Minor
Department: Art & Art History Department
Website: aahvs.duke.edu/undergraduate/minors/visual-media-studies

Program Summary
Visual & Media Studies concerns all aspects of the production, circulation, and reception of visual images in culture, science, and society. Studies in visual culture engage you in the analysis of the effectiveness of the signs and symbols that give meaning to images, providing access to how visual meaning is socially, politically, and culturally constructed and received.

Visual Studies enable you to interpret the representations that shape the visual constructs of a particular society, to consider how systems of visual code differ from culture to culture, and think through how the symbolic constructions of life organize how one sees, understands, and participates in natural and social environments. Most importantly, establishing a clear connection between the theory and the practice of visuality is the foundation of Visual & Media Studies.

Go to Programs by Department to view all related programs.

Visual Arts Minor
Program Code: U-ARTV-MIN
Plan Type: Minor
Department: Art & Art History Department
Website: aahvs.duke.edu/undergraduate/minors/visual-arts

Program Summary
Studio art courses offer directed experiences in the practice of the visual arts, enhancing the understanding of art both within the history of culture and as an individual human achievement. Department offerings emphasize the analysis and articulation of visual concepts and processes as they relate to a broader education in the humanities and sciences.

Go to Programs by Department to view all related programs.

Academic Requirements

Five courses to be distributed as follows: any three visual and media studies courses at the 200 level or above taught by faculty in AAHVS and any two visual and media studies electives in any cross-listed discipline previously approved for the visual and media studies major. Visual and Media Studies 202D is strongly encouraged. Two transfer courses may count toward the requirements for the minor; courses taken Satisfactory/Unsatisfactory or Advanced Placement credits do not count toward the minor.

Aerospace Engineering Certificate
Program Code: U-AEREGR-C
Plan Type: Certificate
Department: Pratt School of Engineering, Mechanical Engineering & Materials Science Department
Website: mems.duke.edu/undergrad/degrees/certificates

Duke University
Program Summary
The objective of this multidisciplinary program is to educate students in the engineering principles related to the conceptualization, design, analysis, and performance of aerospace vehicles and systems. This certificate program is available only to students enrolled in the Pratt School of Engineering.

The certificate program focuses on upper class courses. All engineering undergraduates are eligible to participate in the program and qualify for certification. Mechanical engineering is the host department; however, there is flexibility for majors in other departments to meet the program standards while maintaining program focus and quality. Two courses already required for the primary major are permitted.

Go to Programs by Department to view all related programs.

Academic Requirements
Seven courses must be completed to earn the aerospace engineering certificate. All students are required to take the foundation course Aircraft Performance, plus at least one course from the core aerospace electives list (aerospace structures, aerodynamics, compressible flow) plus two supporting technical electives (can include relevant independent study). One upper-level Trinity College course from history or public policy involving the impact of technology on society, or an appropriate economics course.

Architectural Engineering Certificate
Program Code: U-ARC-C
Plan Type: Certificate
Department: Pratt School of Engineering, School of Engineering
Website: cee.duke.edu/undergrad/degrees/certificates/architectural-engineering

Program Summary
The objective of this interdisciplinary program is to provide students with an understanding of the relationships between the design elements of buildings and construction processes.

Go to Programs by Department to view all related programs.

Academic Requirements

Civil and Environmental Engineering 311 (Architectural Engineering I)
Civil and Environmental Engineering 411 (Architectural Engineering II)
Civil and Environmental Engineering 422L (Concrete and Composite Structures)
Civil and Environmental Engineering 423L (Metallic Structures)
Art History 285 or 285D (Modern Architecture) or Art History 286 or 286D (Contemporary Architecture)
Civil and Environmental Engineering 491 and 492 (Special Topics in Civil and Environmental Engineering). Topics for Civil and Environmental Engineering 491/492 must be appropriately related to architectural engineering and approved in advance by Certificate Director.
Civil and Environmental Engineering 421L (Matrix Structural Analysis) - only permitted for use in meeting certificate requirements for those students not enrolled in a Civil Engineering (Structures/Mechanics emphasis) degree program.
Engineering 201L (Mechanics of Solids) - only permitted for use in meeting certificate requirements for those students not enrolled in a Civil Engineering (Structures/Mechanics emphasis) degree program.

Child Policy Research Certificate
Program Code: U-CPRS-C
Plan Type: Certificate
Department: Child Policy Research
Website: childandfamilypolicy.duke.edu/education/child-policy-research-certificate
Duke University

Program Summary
The goal of the certificate in child policy research is to provide undergraduates with the opportunity to engage in interdisciplinary inquiry to solve problems facing today’s children and families. Because of the complexity of these problems, the certificate allows students the opportunity to study issues by incorporating the perspectives of numerous disciplines, including psychology, sociology, public policy, economics, and education. The certificate emphasizes engagement in empirical research; each student will work closely with a faculty member to produce an original research paper. Examples of research topics that may be pursued with this certificate include social and economic inequalities in schooling, the pervasiveness of gang violence in high schools, or the long-term consequences of childhood obesity. The certificate program culminates in a capstone seminar, in which students build upon the research experience by exploring real-world implications and translating their scholarship to policy solutions.

Go to Programs by Department to view all related programs.

Child Policy Research Certificate (U-CPRS-C)

Academic Requirements

In order to complete the certificate, students must take six courses:

- the cornerstone course Child Policy Research 250S
- the capstone course Child Policy Research 495S (Multidisciplinary Approaches to Contemporary Children’s Issues)
- two electives
- one research course
- one methods course

The research course is an independent study: students may register for Child Policy Research 393 or for an independent study in public policy or another department. The research course requirement also may be fulfilled through completion of an honors thesis in the student’s home department. The methods course can either be Child Policy Research 590S (Research Methods in Education Policy) cross-listed with Public Policy 590S or a methods course in the student’s home department. Both the research course and the methods course must be approved by the certificate director. The two electives may be drawn from a list of pre-approved electives. Two courses that are counted toward this certificate may also be used to satisfy the requirements of any major, minor, or other certificate program. Three of the courses that count toward the certificate may originate in a single department or program. More information is available at childandfamilypolicy.duke.edu/students/child-policy-research-certificate. The certificate director is available to provide additional information and guidance. Contact katie.rosanbalm@duke.edu.

Electives

Students will choose two electives from the following list of pre-approved courses. Updated electives list are posted on the certificate’s quick links each semester. If a student wishes to take a course for certificate credit that is not on the pre-approved list, then the certificate director will decide on the appropriateness of that course on a case-by-case basis.

African & African American Studies
- 549S. Schooling and Social Stratification

Documentary Studies
- 202S. Children and the Experience of Illness

Education
- 240. Educational Psychology
- 243S. Children, Schools, and Society
- 321S. Infancy, Early Childhood, and Educational Programs
- 542S. Schooling and Social Stratification

Psychology
- 207. Child Clinical Psychology
- 239. Adolescence
- 240. Educational Psychology
- 304. Child Observation
- 325. Social Development from Childhood to Early Adulthood
- 436S. Clinical Interventions with Children and Families
- 438S. Children’s Peer Relations

Public Policy
Decision Sciences Certificate

Program Code: U-DECSCI-C
Plan Type: Certificate
Department: Decision Sciences
Website: decisionsciences.trinity.duke.edu/overview

Program Summary

The Decision Sciences Certificate focuses on how humans make decisions in a variety of contexts, including economic, political, and social choices. If you are interested in behavioral economics, game theory, machine learning, or neuroeconomics, this certificate will provide an interdisciplinary appreciation of how these separate fields approach decision-making. This will enable communication and collaboration across disciplinary boundaries and will allow you to engage in research with a broader perspective than that provided by any single major.

The goal of the curriculum is to provide a shared methodological and substantive framework that will allow students to participate in the interdisciplinary study of decision-making. Our expectation, though, is that students will arrive from and return to different departments and conduct research in their home departments. The cohorts produced by the certificate will provide these students with support and criticism from a variety of perspectives, however, and the hope is that this will result in stronger student research.

Go to Programs by Department to view all related programs.

Academic Requirements

Foundations
- MATH 112L or AP credit
- STA 101 or higher

1st Year (preferred) or 2nd Year

Gateway. DECSCI101: Fundamentals of Decision Science

Interdisciplinary Methods
- Applied Stats/Machine Learning: (choose 1)
  - STA 199
  - STA 210
  - COMPSCI1216
  - ECON204D
- Computer Science/Coding:
  - COMPSCI101L
- Game Theory: (choose 1)
  - DECSCI201
  - ECON201
  - POLSCI631L
- Neuroscience: (choose 1)
Digital Intelligence Certificate
Program Code: U-DQ-C
Plan Type: Certificate
Department: Science & Society
Website: scienceandsociety.duke.edu/learn/undergraduate-programs/ss-certificate/digital-intelligence

Program Summary
The Digital Intelligence Certificate is an undergraduate, interdisciplinary course of study that equips students to develop foundational knowledge in computational technologies and their relationship to society.

To view all related programs, go to Programs by Department.

Academic Requirements

The certificate is targeted at all Duke students. To complete the certificate, students must take six courses in all:

- The core course (“Computing and Ethics”, SCISOC 256)
- Four elective courses from the following elective areas
  - Elective Area 1: Computational Thinking
  - Elective Area 2: Ethics and Policy
  - Elective Area 3: Representations, Translation & Communication
  - Elective Area 4: Computation in Practice
- A capstone course (“Digital Intelligence Capstone”, SCISOC 498S)

Together, the core and electives will provide students with a broad understanding of emerging computational and data technology as well as the policy and ethics issues they raise. The capstone course will provide students a way to integrate what they have learned across the different core and elective areas, with a captivating project and a course that helps them learn to present the findings in a compelling and accessible way.

Before enrolling in the Capstone course, students must participate in a substantial, summer-long or semester-long experiential research project, also known as their Capstone Project. This can be accomplished either through participation in existing Duke programs such as Data+, DOmath, Code+, CS+, or through a substantial independent project, equivalent to a semester in length, developed in consultation with Certificate faculty and supervised by a faculty mentor.

Documentary Studies Certificate
Program Code: U-DOCST-C
Plan Type: Certificate
Department: Documentary Studies
Website: documentarystudies.duke.edu/classes/undergraduate/certificate

Program Summary
The goal of this interdisciplinary program is to introduce, broaden, and enhance the technical skills and the theoretical and ethical awareness of students who specialize in one or more of the following modes of community-based fieldwork: photography, oral history, audio, filmmaking, folklore, and ethnographic writing. Courses in this area are offered through the Center for Documentary Studies, and the departments of African and African American studies, art, cultural anthropology, arts of the moving image, history, and public policy studies. The Center for Documentary Studies also houses a number of documentary projects that address issues of literacy, collaborative photography, oral history, and farm worker advocacy that students will be exposed to through their affiliation with this program. A major goal of this program is to connect student experience and creativity to community life. Documentary studies courses teach an arts-and-humanities-based fieldwork research methodology. Achievement of the program's goal is facilitated by an integrated curriculum of required and elective courses that allow students to specialize in one or more areas of documentary work, and to complete a major documentary project under the guidance of participating faculty members. An active advisory procedure assists students in planning fieldwork projects and other learning opportunities. A certificate is available for students who complete program requirements. Participation in documentary studies courses, with the exception of the capstone course, is available to all undergraduates whether or not they seek the certificate.

Go to Programs by Department to view all related programs.

### Academic Requirements

The certificate in documentary studies is awarded to students who successfully complete six courses approved as part of the documentary studies program. These include:

- A required survey course titled Traditions in Documentary Studies
- Four related courses from the approved courses (including electives) are listed in this undergraduate bulletin
- A required capstone course, Seminar in Documentary Studies

During the seminar, students are expected to bring to completion one major documentary project (using audio, video, photos, and/or ethnographic writing methods) and to present this project to an audience outside the classroom by the semester's end. The Seminar in Documentary Studies is designed as the culminating experience of the certificate program and is therefore open only to students enrolled in the program. Electives chosen by the student under the guidance of the program director should facilitate the completion of the final project.

### Program Courses

**African & African American Studies**

- 207. African Americans Since the Civil War
- 531S. Black Camera: Still and Moving Images
- 539. Black Camera: Still and Moving Images

**Art History**

- 539. Black Camera: Still and Moving Images
- 650S. Black Camera: Still and Moving Images Asian & Middle Eastern Studies
- 341S. Screening the Holocaust: Jews, WWII, and World Cinema

**Bioethics and Science Policy**

- 510S. Science and the Media: Narrative Writing about Science, Health and Policy

**Cultural Anthropology**

- 130. Anthropology and Film
- 131. World Music: Aesthetic and Anthropological Approaches
- 137. Music, Social Life, and Scenes
- 220FS. Global 'Mixed Race' Studies
- 220S. Global 'Mixed Race' Studies
- 243. Culture and Politics in Latin America

**History**

- 347. African Americans Since the Civil War

**Human Rights Program-Franklin Humanities Institute**

- 130. World Music: Aesthetic and Anthropological Approaches
- 262. Human Rights in Theory and Practice
- 371. News as a Moral Battleground
**Duke University**

**International Comparative Studies**
- 104. Anthropology and Film
- 325. Culture and Politics in Latin America

**Jewish Studies**
- 266S. Screening the Holocaust: Jews, WWII, and World Cinema

**Literature**
- 230A. Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)
- 263S. Screening the Holocaust: Jews, WWII, and World Cinema

**Music**
- 130. World Music: Aesthetic and Anthropological Approaches
- 137. Music, Social Life, and Scenes

**Philosophy**
- 262. Human Rights in Theory and Practice

**Policy Journalism and Media Studies**
- 371. News as a Moral Battleground
- 510S. Science and the Media: Narrative Writing about Science, Health and Policy

**Political Science**
- 272. Human Rights in Theory and Practice

**Public Policy**
- 231. Human Rights in Theory and Practice
- 371. News as a Moral Battleground
- 510S. Science and the Media: Narrative Writing about Science, Health and Policy

**Religion**
- 268. Religion and Film

**Study of Ethics**
- 259. News as a Moral Battleground

**Visual Arts**
- 206. Digital Imaging

**Visual and Media Studies**
- 130. Anthropology and Film
- 206. Digital Imaging
- 275S. Screening the Holocaust: Jews, WWII, and World Cinema
- 359A. Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)
- 545. Black Camera: Still and Moving Images
- 650S. Black Camera: Still and Moving Images

**Energy and the Environment Certificate**

Program Code: U-ENRENV-C
Plan Type: Certificate
Department: Pratt School of Engineering, School of Engineering, Environmental Sciences
Website: nicholas.duke.edu/academics/certificate-programs/certificate-energy-environment

**Program Summary**

The undergraduate certificate in energy and the environment is designed to provide Duke undergraduates in both Trinity and Pratt with an understanding of the breadth of issues that confront our society in its need for clean, affordable, and reliable energy. An expertise in energy will expand the student’s career options in the private, nonprofit, government, and academic sectors. In addition to integrative core and capstone courses, the certificate will expose students to the three key disciplines in the study of energy and the environment: markets and policy,
The goal of the certificate is to develop innovative thinkers and leaders who understand the energy system as a whole and the important interconnections among policy, markets, technology, and the environment. Energy use is a multifaceted problem that draws upon the perspectives and expertise of a variety of disciplines; the certificate in energy and the environment is therefore similarly interdisciplinary.

Beyond traditional coursework, the certificate in energy and the environment will offer a variety of activities intended to provide students with a real-world perspective and hands-on experiences. These include field trips, guest speakers such as visiting executives and practitioners, research opportunities, and internships. Additional information may be obtained from the Energy Initiative.

Go to Programs by Department to view all related programs.

Academic Requirements

Students pursuing the certificate in energy and the environment have the opportunity to choose from two different pathways. The first option is a course-based pathway consisting of six courses, including the Core and Capstone courses (which are required for every certificate student). No more than three of the six courses may originate in a single department. No more than two courses counted toward the certificate in energy and the environment may also satisfy the requirements of any major, minor, or other certificate program.

The second option is an experiential pathway. This pathway combines four courses (the Core and Capstone courses and two electives) with two experiential components: one research/design experience and one field experience. In this pathway, no more than one course counted toward the certificate in energy and the environment may also satisfy the requirements of any major, minor, or other certificate programs. Completion of a publicly-facing e-portfolio is also required.

AP credit may not fulfill certificate requirements in either pathway.

In the standard course-based pathway, six courses are required for the completion of the certificate program:

- One introductory course: Earth and Ocean Sciences/Environment/Energy 231 (Energy and the Environment)
- One elective course from each of the following three areas: Markets and Policy; Environment; and Energy Science and Technology (See approved elective courses below.)
- One additional elective course, selected from the elective course list below, other energy courses, or approved independent study.
- One Capstone Project Course: Energy 395/396 (Connections in Energy: Energy and the Environment: Design and Innovation). Teams of undergraduate and graduate students work with faculty supervisors on a Bass Connections team to identify, refine, explore, and develop solutions to pressing energy issues. Teams may also include postdoctoral fellows, visiting energy fellows, and other experts from business, government, and the nonprofit sector. A team's work may run in parallel with or contribute to an ongoing research project. Teams will participate in seminars, lectures, fieldwork, and other learning experiences relevant to the project. Participation consists of a half-credit course in the fall and a full-credit course in the spring, typically taken in the certificate candidate's senior year. Instructor consent is required.

In the experiential pathway of the certificate, students take four courses and complete two experiences:

- One introductory course: Earth and Ocean Sciences/Environment/Energy 231 (Energy and the Environment)
- One elective course from each of the following areas: Markets and Policy; and Energy Science and Technology (See approved elective courses below.)
- Two experiences: one research/design experience and one field experience. One experience must exceed 300 hours; the other must exceed 150 hours. Both experiences must be energy-related, and two different types of experiences must be completed. Students must receive pre-approval for the two thematically-related experiences.
- One Capstone Project Course: Energy 395/396 (Connections in Energy: Energy and the Environment: Design and Innovation). Teams of undergraduate and graduate students work with faculty supervisors on a Bass Connections team to identify, refine, explore, and develop solutions to pressing energy issues. Teams may also include postdoctoral fellows, visiting energy fellows, and other experts from business, government, and the nonprofit sector. A team's work may run in parallel with or contribute to an ongoing research project. Teams will participate in seminars, lectures, fieldwork, and other learning experiences relevant to the project. Participation consists of a half-credit course in the fall and a full-credit course in the spring, typically taken in the certificate candidate's senior year. Instructor consent is required.

- E-portfolio: Must reflect coursework and experiential learning

Electives (requirement differs depending upon chosen pathway)

Four elective courses are required for the course-based pathway, with one course chosen from each of the three key areas (Markets and Policy, Environment, and Energy Science and Technology) taken from the below list. The fourth elective is a “free” elective and may repeat any one of the key areas. For the experiential pathway, two elective courses are required in the markets and policy and energy science and technology areas. The most up-to-date version of this list can be found on the program's website at nicholas.duke.edu/academics/certificate-programs/certificate-energy-environment.

Markets and Policy
Economics
- 119. Introduction to Political Economy

Environment
- 212. United States Environmental Policy
- 363. Environmental Economics and Policy
- 544S. Collective Action, Property Rights, and the Environment
- 577. Environmental Politics
- 583S. Energy and U.S. National Security

Human Rights Program-Franklin Humanities Institute
- 213. United States Environmental Policy

Political Science
- 145. Introduction to Political Economy
- 549S. Collective Action, Property Rights, and the Environment
- 663S. Energy and U.S. National Security

Public Policy
- 275. United States Environmental Policy
- 577. Environmental Politics
- 583S. Energy and U.S. National Security

Environment (required only for course-based pathway)

Chemistry
- 91. Chemistry, Technology, and Society

Civil and Environmental Engineering
- 461L. Environmental Aquatic Chemistry
- 462L. Applied Biological Principles and Processes in Environmental Engineering

Earth and Ocean Sciences
- 355. Global Warming 364S. Changing Oceans Environment
- 102. Introduction to Environmental Sciences and Policy
- 245. The Theory and Practice of Sustainability
- 362S. Changing Oceans

Sustainability Engagement
- 245. The Theory and Practice of Sustainability

Energy Science and Technology

Note: in selecting the elective course in energy science and technology, it is important to consider which course will provide optimal preparation for the student’s capstone project course. Students should discuss their selection of this elective with a co-director of the program.

Energy
- 310. Introduction to Energy Generation, Delivery, Conversion and Efficiency
- 383. Engineering the Global Middle East
- 630. Transportation and Energy

Energy Engineering
- 310. Introduction to Energy Generation, Delivery, Conversion and Efficiency

Environment
- 630. Transportation and Energy

Global Health
- 549S. Histories of Science and Technology
Duke University

History
- 106. Science and the Modern World: Introduction to the History of Science
- 383. Engineering the Global Middle East
- 549S. Histories of Science and Technology

International Comparative Studies
- 118. Science and the Modern World: Introduction to the History of Science

Mechanical Engineering and Materials Science
- 461. Energy Engineering and the Environment

Physics
- 137S. Energy in the 21st Century and Beyond

Science & Society
- 118. Science and the Modern World: Introduction to the History of Science
- 549S. Histories of Science and Technology

Students may also participate in a Bass Connections in Energy & Environment team (see Capstone Project description) as their fourth elective course for the certificate’s course-based pathway.

Ethics & Society Certificate
Program Code: U-ETHIC-C
Plan Type: Certificate
Department: Ethics & Society
Website: kenan.ethics.duke.edu/ethics-society-certificate

Program Summary
The goal of the undergraduate Ethics & Society Certificate is to provide students with an opportunity to pursue a rigorous cross-disciplinary study of ethics. Such a course of study requires familiarity with systematic ethical theories and traditions of moral wisdom and reflection, an understanding of how ethical issues have been framed across history and cultures, experience delving into ethical issues through literature and the arts, and insights into how ethical challenges are being conceptualized and negotiated in practice by policymakers, researchers, doctors, journalists, and others. Ethics cannot be isolated within one or two disciplines. It is an inherently cross-disciplinary inquiry that needs to draw on tools, methods, and contexts from multiple disciplines.

Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements
Students pursuing the Ethics & Society Certificate have the opportunity to pursue two different pathways.

The first is a course-based pathway consisting of six courses (including the Gateway and Capstone courses, which every certificate student is required to take). The experiential pathway combines four courses with two experiential components: a faculty mentored independent research project and community-based field work.

In the standard course-based version, six courses are required for completion of the certificate program:
- Ethics 101D/Ethics 101 (Gateway - The Challenges of Living an Ethical Life)
- Ethics 497S (Capstone Seminar)
- Four additional electives approved by the department in the categories of Philosophical Ethics, Cross-Cultural Ethical Traditions, Ethics in Historical Perspective, Ethics in Literature and the Arts, and Ethics of Contemporary Issues. Students must take one Philosophical Ethics course and one Cross-Cultural Ethical Traditions course. They must take one course in either Ethics in Historical Perspective or Ethics in Literature and the Arts. The final elective course may come from any of the five elective categories.

In the Experiential Pathway, students work with the Ethics & Society Certificate Director to craft their own coherent pathway bringing together coursework, research, and community engagement in a concentration of their choosing. Concentrations may focus on ethical issues within topics such as (but not limited to): environmental justice; civil and civic engagement; medicine; race and the United States. Four courses and two experiences are required:
Duke University

- Ethics 101D/Ethics 101 (Gateway - The Challenges of Living an Ethical Life) (introductory course). Students may complete no more than one experience before taking the gateway course.
- Ethics 497S (Capstone Seminar). The capstone cannot be taken until all other requirements are complete.
- Two ethics courses of the students’ choosing, approved by the department.
- Two experiences are also required. The first must be a faculty-mentored research experience amounting to at least 150 hours and the second must be a community-based field experience of at least 300 hours.

See the ethics and society certificate program website for more information and additional certificate sequencing requirements and restrictions at kenan.ethics.duke.edu/ethics-society-certificate.

Global Development Engineering Certificate
Program Code: U-GBLDEV-C
Plan Type: Certificate
Department: Pratt School of Engineering, Civil & Environmental Engineering Department
Website: cee.duke.edu/undergrad/degrees/certificates/global-development

Program Summary
Global development engineering is focused on specific knowledge and skills related to planning, design, construction, and operation of engineered systems in under-resourced settings using appropriate technology to address issues of social justice and leveraging technological advances to benefit all of humanity, but especially marginalized populations. Duke’s certificate in global development engineering seeks to prepare engineers and other international development professionals for careers in the field of sustainable international development partnering with marginalized or disadvantaged people groups to address both technical and more structural issues related to poverty, wealth inequality, health access, and economic empowerment.

Go to Programs by Department to view all related programs.

Academic Requirements
The curricular pathway through the certificate includes the following:
- an Introductory/Gateway Class (which must be completed no later than the fall of a student’s junior year)
- demonstrated Global Competency (three classes total, with one class from Language and Culture; one from Ethics; and one from Economics OR Policy)
- Technological Depth (two course from one of the following tracks: Water, Energy, or Appropriate Technology)
- Required Experiential Component (putting education into practice)
- Design and Implementation Capstone

The total requirement is seven curricular courses plus one experiential/internship experience. See cee.duke.edu/undergrad/degrees/certificates/global-development.

Health Policy Certificate
Program Code: U-HLTHPL-C
Plan Type: Certificate
Department: Margolis Center for Health Policy
Website: healthpolicy.duke.edu/undergraduate-students

Program Summary
Developed jointly by Duke-Margolis Center for Health Policy and the Sanford School of Public Policy, this thematic certificate will provide undergraduate students with a cohesive program to study the policy foundations of the US health systems and health care. The program will be built on the Center’s strong interdisciplinary approach and include an introductory course on US health care systems, offer a range of health policy electives across campus, will include a large focus on the ability of policy to perpetuate and disrupt health inequities, and culminate in a capstone seminar. In addition, two substantial thematic experiences in health policy will be required. Students earning the certificate will gain health policy knowledge to apply in their careers and lived experiences.

More information is available at healthpolicy.duke.edu. The certificate director is available to provide additional information and guidance. Contact the Faculty Director by email, nathan.boucher@duke.edu.

Go to Programs by Department to view all related programs.
Academic Requirements

To complete the certificate, students must:

- complete two health policy-related co-curricular experiences (one or more than 150 hours and a second of more than 300 hours)
- develop a public-facing e-portfolio
- complete the introductory course PUBPOL 165 (Introduction to the United States Health Care System)
- complete the capstone course HLTHPOL 480 (Capstone Seminar for Certificate in Health Policy)
- complete two elective courses

The two electives may be drawn from a list of pre-approved electives or may be selected from outside this list with the approval of the Faculty Director. Both elective courses may also be used to satisfy the requirements of any major, minor, or other certificate program.

Sequencing is an important feature of the certificate. Students should declare their intention to pursue this certificate as early as possible, but no later than the drop/add deadline in the fall of their junior year. Also, neither of the two electives may count toward the certificate if it is taken before the introductory course. Finally, the capstone course may not be taken until the introductory course, two elective courses and the two learning experiences are completed.

Human Rights Certificate

Program Code: U-HMNRGT-C
Plan Type: Certificate
Department: Human Rights Program – Franklin Humanities Institute
Website: humanrights.fhi.duke.edu/human-rights-certificate

Program Summary

The goal of the undergraduate certificate in human rights is to provide students with an opportunity to pursue a rigorous interdisciplinary study of human rights. We will help cultivate life-long learners and engaged citizens who have a deep and nuanced understanding of human rights. This course of study requires foundational study in human rights history, theory, and policy issues, with particular attention to how the intellectual debates around rights translate into action in an increasingly globalized, interconnected world. Human rights cannot be isolated into one or even a few disciplines and its study must draw on the concepts and lived experience of scholars, practitioners, journalists and communities struggling to defend their rights.

Including a Gateway, Introduction to Human Rights, and a final Capstone in Human Rights, students will take a total of six undergraduate courses. Students will be encouraged to seek rights-related DukeEngage placements, internship and volunteer experiences, and to include study abroad courses as part of their certificate plan, so long as these courses have received prior approval from Duke and the Certificate Director. These elements will enrich a student's experience in the Capstone.

The certificate includes 1) a structured and interdisciplinary set of courses; 2) analytical, empirical, and applied elements; 3) education in the history and current practice of human rights in the United States and abroad; 4) exposure to key thinkers and debates about and within human rights, including the critique of human rights; 5) skills development in research and writing; 6) the application of knowledge toward real-world solutions; and 7) in-depth mentored research with faculty working in human rights.

Sequencing is a critical element in the study of human rights. Students are encouraged to enroll as soon as possible but no later than the end of Drop/Add in the fall of their junior year. Enrollment takes place after a student prepares a declaration of interest submitted to the Certificate Director.

Go to Programs by Department to view all related programs.

Academic Requirements

Six courses are required for completion of the human rights certificate.

1. A required Gateway, Introduction to Human Rights. This course gives priority to first-year students and sophomores, ideally building a cohort with other students also interested in human rights.

2. Four electives. A course can count toward the human rights certificate if it contains a preponderance of readings or other materials of inquiry that reference human and civil rights history, concepts, theory, practice, discourse, advocacy or a combination of these elements. A course may have a thematic focus on human rights, including in areas of civil rights and social justice; it may have a regional focus, examining rights in a specific location; or a disciplinary focus, as in how a specific type of study, like biology or literature, approaches a rights question. Prior to registration each semester, the DHRC@FHI will prepare a list of pre-approved courses in consultation with the Faculty Advisory Board. Students are required to take courses from at least two disciplines. No more than two of the four courses may come from the same home
Students may petition for a course to count toward the certificate by submitting a syllabus and rationale for the relevance to the Director of the certificate, specifying how it meets the criteria listed above. This would include courses taken outside Duke, including study abroad. Students are encouraged to search out study abroad courses that would count toward the human rights certificate.

3. A capstone seminar, Capstone in Human Rights. This course is offered to students in their senior year who have completed the Gateway and are enrolled in the human rights certificate program. A primary learning objective of this course is to connect the intellectual themes and scholarly knowledge they develop in the Gateway, electives and any rights-related experiences (through DukeEngage or internships and volunteer placements). The capstone requires students to critically re-visit themes introduced in the gateway course. The capstone culminates with a final project that requires students to choose a subject and produce research. Students may work in teams toward a final project but each student's work will be evaluated separately and at a high standard.

4. All human rights certificate students are required to present their work to their peers in a mini-conference or other forum. Students are encouraged to present their work in other public settings for or in benefit of an individual or group engaged in rights work. This could be through performance or web-based pieces, videos, op-ed columns, published essays, public exhibits, or other media. Where appropriate, students’ projects can link or be combined with departmental honors projects.

**Information Science + Studies Certificate**

Program Code: U-ISS-C  
Plan Type: Certificate  
Department: Information Science + Studies  
Website: iss.duke.edu/undergraduate-certificate

**Program Summary**

The Information Science + Studies (ISS) Program offers students an interdisciplinary approach to study the nature of information and its impact on art, culture, science, business, society, policy, and the environment. ISS helps students fill the gap between current academic training and the increasing demand in all professions for a broad understanding of the legal, social, philosophical, computational, cultural, and aesthetic issues concerning information technology and other related innovations. The program’s integrated curriculum combines topics and practices including information management; photonics and visualization; multimedia design; virtual reality, virtual worlds and games, issues of security, privacy, and property; and the history of science and technology. More information is available online at iss.duke.edu.

Go to Programs by Department to view all related programs.

**Program Enrollment**

Only students who have officially declared their major may enroll in the program, although all students may take ISS courses on a first-come/first-served basis, with ISS certificate students having a preference.

**Academic Requirements**

The certificate requirements include a team-taught introductory course, a communications course, three electives, and a research-oriented capstone course.

The ISS certificate requires six courses:

- Information Science + Studies 110 (Information, Society, and Culture)
- For non-computer science and non-engineering majors, Information Science + Studies 240L (Fundamentals of Web-based Multimedia Communications). For engineering and computer science majors, Engineering 206 or Computer Science 290
- Three electives selected from a list of ISS-approved courses
- Information Science + Studies 495S (Research Capstone)

No more than three courses may originate in a single department and no more than two courses that are counted toward the ISS certificate may also satisfy the requirements of any major, minor, or other certificate program.

**Innovation and Entrepreneurship Certificate**

Program Code: U-IIECP-C  
Plan Type: Certificate  
Department: Innovation and Entrepreneurship  
Website: entrepreneurship.duke.edu/education/undergrad-certificate

**Program Summary**
The goal of the undergraduate certificate in Innovation and Entrepreneurship is to provide students with a pathway to pursue a rigorous cross-disciplinary study of innovation and entrepreneurship that will be complementary to any major and enable students to be innovative and entrepreneurial in their pursuit of knowledge in service to society. The certificate requires an in-depth course of study examining the theories of innovation and entrepreneurship, coupled with hands-on practice in both areas. Innovation and entrepreneurship are, by their very nature, areas of cross-disciplinary inquiry, so the certificate will also draw on theory, contexts, and methods from across the disciplines.

The certificate builds on the already-existing emphasis of knowledge in service to society that is taking place within students’ majors and co-curricular activities, to further enhance students’ abilities to explore the complex problems being faced by our world and to develop innovative methods to address those problems. Cultivating such an innovative and entrepreneurial spirit will involve students developing the capacities of creativity, technical competencies, courage and resilience, reflection, and collaboration, acquired through a comprehensive undertaking of research, inquiry, experimentation, and experiential learning.

Go to Programs by Department to view all related programs.

Academic Requirements

In this experiential certificate, students take four courses in the subject areas outlined below, as well as complete two experiences and create an e-portfolio. The certificate program elements are:

1. Four course areas:
   - Gateway: Exploration of Discovery, Entrepreneurship, Innovation, Ideation, and/or Design
   - Keystone: Strategies for Innovation and Entrepreneurship
   - Elective: Further Exploration in Innovation and/or Entrepreneurship
   - Capstone: Ideas into Action

2. Two thematically-related experiential learning activities. One of the experiences must be at least 300 hours, and the other must be at least 150 hours.

3. Publicly facing e-portfolio

Sequencing is an important feature of the certificate. Students are required to apply to the certificate by the end of the add/drop period in the fall of their junior year. Successful application to the program includes four components: a) identification of the four courses and two thematically-related experiences the student plans to undertake; b) written essay outlining the logic and rationale for the pathway the student selected; c) written essay justifying the student’s desire to pursue the certificate; and d) review, advisory input, and approval of the student’s application by the Innovation and Entrepreneurship Certificate Admissions Committee.

Islamic Studies Certificate

Program Code: U-ISLST-C
Plan Type: Certificate
Department: Islamic Studies
Website: religiousstudies.duke.edu/islamic-studies-certificate

Program Summary

The Islamic Studies certificate offers students a deeper understanding of Islamic thought, spirituality, practices, and institutions as well as of Muslim cultures and societies around the world. It offers the opportunity for in-depth interdisciplinary study of Islam and Muslims that elucidates their significance for the history of humanity. This certificate helps cultivate life-long learners and critical thinkers who have a nuanced understanding of the diversity of Muslims past and present.

Students in the certificate program enroll in the gateway course that studies the history of Islam and Muslims in diverse contexts, the capstone seminar in their junior or senior year that engages in research, and four additional electives from a wide and compelling range of offerings. At least two different departments must be represented in the course selection, and no more than two of the certificate’s six courses may double count for a major, minor, or another certificate program.

The undergraduate certificate in Islamic Studies is administered by the Department of Religious Studies. Beyond coursework, students in the certificate program are regularly included in extracurricular events and opportunities.

Go to Programs by Department to view all related programs.

Academic Requirements

Six courses are required for completion of the Islamic Studies certificate.
1. The Gateway course. “Introduction to Islamic Civilization, Part I” (RELIGION 217 / HISTORY 210 / ICS 217 / AMES 122 / MEDREN 268 / CULANTH 256) analyzes the emergence of Islam and the spread of Muslim culture and learning across Africa, Asia, and Europe. It introduces how Muslims fostered a globalized economy and international community of scientists, scholars, agriculturalists, musicians, artisans, and philosophers of diverse religious and ethnic backgrounds – along with other key themes that students may pursue in greater detail through their elective coursework.

2. Four electives. Each student will devise an interdisciplinary set of electives corresponding to their interests in consultation with the program director over the course of their undergraduate studies, which must be approved for each student separately. Students are required to take courses from at least two disciplines, and students are also encouraged to search out study abroad courses that could count toward the Islamic Studies certificate. For coursework abroad, students should submit the proposed class syllabus to the program director along with a rationale for its relevance to Islamic Studies. Current electives are listed below.

3. The Capstone seminar. RELIGION 490S Junior-Senior Seminar is available to students in their junior or senior year who have completed the Gateway and are enrolled in the Islamic Studies certificate program. The Islamic Studies certificate capstone culminates with a final project that requires students to select, pursue, and share independent research in the field of Islamic Studies.

Electives

- AAAS 274S. Islam in the Americas
- AAAS 295S. Black Muslims: Race, Religion, and Culture
- AMES 126S. Understanding the Qur’an
- AMES 160. Islam
- AMES 205. Literary Islam: Poetry, Scripture, Philosophy
- AMES 213S. Muslim Ethics and Islamic Law
- AMES 209S. Love, Spirit, and Mysticism: The Path of Love in Middle East and South Asia
- AMES 224S. Muslim Women Across the Ages
- AMES 220S. From Al-Qaeda to ISIS: Understanding Terrorism, Its Roots, Responses, and Ramifications
- AMES 223S. Muhammad: The Prophet of Islam
- AMES 228S. Islam, Art, & Society
- AMES 230S. Islam in the Americas
- AMES 235S. Cross-Cultural Encounters
- AMES 238S. Istanbul: Religion, Politics and Cosmopolitanism
- AMES 288S. Religion and Politics in Post-Revolutionary Iran
- AMES 295. Black Muslims: Race, Religion, and Culture
- AMES 312S. Rumi: Mysticism and Poetry
- AMES 324S. Muslim Philosophy and Theology
- AMES 329S. Islamic Media
- AMES 339S. Local Islams
- AMES 359. Violent Jihad in the Twentieth Century
- AMES 373S. Islamic Mysticism
- AMES 385S. Islam, Medicine, & Healing
- AMES 519S. Andalusia
- ARTHIST 224S. Islam, Art, & Society
- CULANTH 224S. Muslim Women Across the Ages
- CULANTH 283S. Istanbul: Religion, Politics and Cosmopolitanism
- ECON 306. Economic History and Modernization of the Islamic Middle East
- ETHICS 235S. Muslim Philosophy and Theology
- ETHICS 345S. Muslim Ethics and Islamic Law
- ETHICS 373S. Islamic Mysticism
- GLHLTH 385S. Islam, Medicine, & Healing
- GSF 209S. Muslim Women Across the Ages
- GSF 295S. Black Muslims: Race, Religion, and Culture
- HISTORY 193S. Islam, Art, & Society

Jewish Studies Certificate
Program Code: U-JEWIST-C
Plan Type: Certificate
Department: Jewish Studies
Website: jewishstudies.duke.edu/academics/undergraduate-studies

Program Summary
This program is sponsored by the interdisciplinary Duke Center for Jewish Studies. Participating departments and programs include Asian & Middle Eastern Studies, Classical Studies, International Comparative Studies, Cultural Anthropology, English, Germanic Languages, History, Medieval and Renaissance Studies, Political Science, Religious Studies, and Gender, Sexuality, and Feminist Studies. A full range of courses is available in classical and modern Hebrew. Also, relevant courses in Jewish studies may be taken at The University of North Carolina at Chapel Hill.

The certificate program offers students the flexibility to design, with the aid of a faculty advisor, a curriculum that meets individual interests and talents.

Go to Programs by Department to view all related programs.

Latin American and Caribbean Studies Certificate
Program Code: U-LAS-C
Plan Type: Certificate
Department: Latin American & Caribbean Studies
Website: latinamericancaribbean.duke.edu/undergraduate-certificate

Program Summary
The Program in Latin American & Caribbean Studies, which is administered by the Center for Latin America and Caribbean Studies (CLACS), provides students with the opportunity for interdisciplinary, in-depth study of the realities of Latin American and Caribbean societies and cultures. In addition to offering a certificate and a wide array of area studies and language courses, CLACS also sponsors lectures, Mellon Visiting Professors, and an annual competition for Mellon Undergraduate Summer Research Awards in Latin America or the Caribbean. Moreover, the center and the Institute for the Study of the Americas at The University of North Carolina at Chapel Hill sponsor the Consortium in Latin American Studies at The University of North Carolina at Chapel Hill and Duke University, which provides opportunities for collaboration with faculty and students from both campuses who are interested in the region. The consortium sponsors yearly working groups and an annual Latin American Film Festival.

Students interested in earning a certificate in Latin American & Caribbean Studies are encouraged to declare it by completion of their fifth semester. Students may also elect this interest in Latin America while participating in a Duke-approved study abroad program either during summer or during their junior year.

Go to Programs by Department to view all related programs.
Academic Requirements

The course of study for program participants is interdisciplinary, with a minimum total of six courses. Students working toward a certificate in Latino/a studies in the Global South are encouraged (but not required) to declare it by their fourth semester. To enroll in the certificate program, students should officially declare their intention to pursue the certificate through academic advising (first- and second-year students) or through the Office of the University Registrar (juniors and seniors) and should also meet in person with the Senior Program Coordinator for Latino/a studies in the Global South (and Global North); and insight into the construction and assertion of Latino/a identities, involving convergences and divergences, over space and time. This certificate program allows students to draw on both the strength and scope of Duke’s offerings in Latino/a studies as well as complementary courses offered at The University of North Carolina at Chapel Hill, which offers an interdisciplinary minor in Latino/a studies.

In addition to offering courses and a certificate after completion of the requirements, the Program in Latino/a Studies in the Global South offers a variety of supplemental educational opportunities, including lectures and events involving prominent scholars, artists, writers, musicians, and performers; financial assistance for student-organized academic discussions; conference awards; advising; and a resource room. Students are invited to use the Latino/a Studies Resource Room (Friedl Building 124) for study sessions and meetings with faculty, students, staff, and community members. Resources available in this room include encyclopedias, texts, novels, scholarly journals, videos, and music. Students may also take advantage of events, lectures, and an annual film festival hosted by the Center for Latin American and Caribbean Studies, which include Latino/a Studies content. Students may enroll in Spanish Service Learning courses as well as Duke-approved study away programs and DukeEngage programs that focus on Latino/a populations in the United States and/or that take place in various countries within Latin America.

Eligible undergraduates satisfying the certificate may use no more than two courses that are also used to satisfy the requirements of any major, minor, or other certificate program. International comparative studies majors and minors interested in choosing Latin America as their primary area of concentration within that major or minor should consult the director of International Comparative Studies.

Appropriate courses may come from the list given below, or may include other courses not listed below (new courses, special topics courses, and independent study) with at least 50 percent of course content on a Latin American topic and with term papers or other major projects focusing on a Latin American subject. To determine if specific courses meet requirements for the certificate, students should consult the director. Regular courses are described under the listing of the various departments. Students may also wish to take advantage of house courses offered on Latin American topics although house courses cannot satisfy the requirements of the certificate.

In meeting the total requirements, a minimum of three departments must be represented, with no more than half (50 percent) of the courses originating in a single academic unit. Students may count toward this certificate no more than two courses that are being used to fulfill the requirements of any major, minor, or other certificate. To qualify for the certificate, students will take:

- Latino/a Studies in the Global South 201 or 201S (Introduction to Latino/a Studies in the Global South).

- Four elective courses, three of which must be at or above the 200-level. Of the elective courses, at least one must be a humanities course, and one a social science course. Qualifying courses may come from the list provided below, or may include other courses not listed (new courses, special topics courses, and independent study), and must have at least 50 percent of course content on Latino/as or Latino/a studies and with term papers or other major projects focusing on this field. Language courses directly applicable to students’ work in the certificate (e.g., in American indigenous languages or languages relevant to the study of Latino/a migrations to other areas of the Global South) can also be considered. To determine if specific courses meet requirements for the certificate, students should consult the Senior Program Coordinator. Up to two of the elective courses may be taken at The University of North Carolina at Chapel Hill, in consultation with the
Senior Program Coordinator. Courses taken abroad with Latino/a Studies content that appear on the Duke transcript may count toward the elective course total. Students may also wish to take advantage of house courses offered on Latino/a Studies topics, although house courses do not satisfy any requirement of the certificate program.

- Latino/a Studies in the Global South 495S (Capstone in Latino/a Studies in the Global South), or equivalent advanced offering with Program approval, preferably in the senior year.

Markets and Management Certificate
Program Code: U-MMST-C
Plan Type: Certificate
Department: Markets & Management
Website: markets.duke.edu

Program Summary
The Markets and Management Studies Program at Duke is designed to meet the needs of Duke undergraduates who wish to study business issues and functions in preparation for careers in business and management, banking, consulting, government, the nonprofit sector, and related graduate fields. Courses in the program emphasize three integrated themes: (1) globalization and organizational innovations in the world economy; (2) the social determinants and consequences of new or changing technologies; and (3) the effect of cross-cultural and institutional factors on management and entrepreneurship. Go to Programs by Department to view all related programs.

Course of Study
Organizational studies in the social sciences provide an innovative, liberal arts approach to business education. The markets and management studies program is rooted in sociology, but it also includes studies in a variety of disciplines—economics, history, political science, public policy studies, ethics, and management science. Each course in the program deals in some way with the impact of different organizational forms on managing human resources, coordinating work, integrating technology, and using business networks in an increasingly competitive global economy. The four overarching learning objectives of the program are bridging theory and research, teamwork, communication skills, and active learning.

Program Enrollment
Only sophomores and juniors who have officially declared their major may enroll in the program. Enrollment must be done via the Markets and Management Studies website.

Academic Requirements

Academic Requirements
The certificate requires a total of seven courses, including:

- Three core courses
  - MMS 197 is the required gateway course, to be taken early in the student’s coursework. The course lays a foundation in management theory and practice that is helpful knowledge for the rest of the MMS Certificate program.
  - MMS 450, an integrative capstone course taken in the senior year.
  - One additional core course
- Four elective courses

No more than three courses may originate in a single department (including MMS). No more than two courses that are counted toward the markets and management studies certificate may also satisfy the requirements of any major, minor, or other certificate program.

Materials Science and Engineering Certificate
Program Code: U-MSE-C
Plan Type: Certificate
Department: Pratt School of Engineering, Mechanical Engineering & Materials Science Department
Website: mems.duke.edu/undergrad/degrees/certificates/materials-science-engineering

Program Summary
Harvesting solar and thermal energy economically, enabling improved batteries and quantum computing, developing improved medical treatments all require new materials with specific properties.
Earn Duke's Certificate in Materials Science & Engineering to learn the scientific and engineering principles related to the fundamental structures, properties, and technological applications of materials. Expert faculty teach from multiple disciplines, such as the Departments of Mechanical Engineering & Materials Science, Electrical & Computer Engineering, Biomedical Engineering, Chemistry, and Physics. In addition, through a course selected from History, Public Policy, or Economics, learn about the role of technology in science, public policy and the economy.

Upper-level undergraduate students enrolled in both the Pratt School of Engineering and the Trinity College of Arts & Sciences are eligible to complete this certificate. Each student is assigned an academic advisor affiliated with the program. A student's academic transcript will note the successful completion of the certificate.

Go to Programs by Department to view all related programs.

Academic Requirements

Successful completion of seven (7) courses from the following categories will lead to a Certificate in Materials Science & Engineering:

- Two (2) required centerpiece courses
  - ME 221 Structure and Properties of Solids (For BME, Chemistry or Physics majors, possible alternates are BME 221, CHEM 548, or PHYSICS 516 respectively.)
  - At least one course from:
    - ME 412 (Chem 512) Modern Materials
    - ME 490 Statistical Thermodynamics of Materials
- Four (4) elective courses (one must be outside the student's major department)
- One (1) humanities/social science course in one of the following areas
  - History (if applicable to the role of technology and science)
  - Public Policy (if applicable to the use and impact of technology)
  - Economics

Philosophy, Politics and Economics Certificate

Program Code: U-PPE-C
Plan Type: Certificate
Department: Political Science Department
Website: sites.duke.edu/dukeppe

Program Summary

The interdisciplinary Philosophy, Politics, and Economics Program at Duke is designed to enable students to secure an understanding of the common foundations and the intersection of methods employed in normative inquiry by the three disciplines that make up the program. Political philosophy and political economy face similar questions and exploit common resources, and the alternative answers they provide to these questions are grounded in competing philosophical theories. Students intending to major in any of the three disciplines, or for that matter in any other discipline with an impact on public institutions and civil society, national, and international governance, and economic development, will find the certificate’s program of studies valuable.

The certificate in the Philosophy, Politics, and Economics Program is composed of six courses, including two cross-listed courses, one that functions as a gateway to the certificate program, a second that figures as its capstone, and four other classes in economics, philosophy, and political science.

Go to Programs by Department to view all related programs.

Academic Requirements

Academic Requirements

Program Preparation. Preparation for participation in the gateway course should normally include the following prerequisites: a) Economics 101 (Economic Principles), and b) Philosophy 207 (Political and Social Philosophy), or Political Science 175 (Introduction to Political Philosophy). However, students without this previous preparation may enroll in the gateway course with the permission of the instructor.

Requirements. Six specified courses distributed across the three disciplines, including gateway and capstone courses.

Gateway Course. All students in the certificate program must take the Philosophy, Politics, and Economics introductory course: Political Science 331 (Prisoner’s Dilemma and Distributive Justice)

Capstone Course. In their senior year, students must take the Philosophy, Politics, and Economics capstone course: Political Science 449

Core Courses. Beyond the gateway course, and prior to or concurrent with the capstone course, students must take a common core of a selected
sequence of four courses in microeconomics, rational choice, ethical theory/political philosophy, and the history of economic thought. The four courses will be chosen from three groups: This sequence will be selected in consultation with the program director and must be approved for each student separately. The four courses must include one course from each of the three core disciplines of the certificate—philosophy, politics, and economics—as well as one additional course that will reflect the interests of the student and will be chosen with an eye toward facilitating the completion of the major paper in the capstone class.

Robotics and Automation Certificate
Program Code: U-ROBOT-C
Plan Type: Certificate
Department: Pratt School of Engineering, Mechanical Engineering & Materials Science Department
Website: mems.duke.edu/draft/undergrad/degrees/certificates/robotics-automation

Program Summary
Robotics is an exciting and rapidly expanding field at the crossroads of mechanical engineering, electrical engineering, biomedical engineering and computer science. With the help of architects and designers, these intelligent machines have learned to infer, reason and act in the real world. Using large amounts of data, researchers in the field have made it possible for robots to learn from their experiences and improve their performance.

To safely and effectively integrate intelligent machines into our environment, robots must be taught to adapt and respond to unpredictable situations, as well as interact collaboratively with each other and humans.

These systems will soon be able to replace humans in dangerous environments and tedious jobs, boost their situational awareness, and assist them in difficult or repetitive tasks — further enhancing human capabilities.

Go to Programs by Department to view all related programs.

Academic Requirements
Academic Requirements
Successful completion of seven (7) courses will lead to a Certificate in Robotics & Automation:

1. Two (2) required Robotics Track courses
   - ECE 383/ME 442 Introduction to Robotics (Fall only)
   - ME 555 Robot Studio (Spring only)

2. Three (3) technical courses
   - One (1) must be in Controls and Dynamics
     - ME 344L/ECE 382L Linear Control Systems
     - EGR 244 Dynamics
     - PHYSICS 361 Intermediate Mechanics
     - ME 555 Model Predictive Control
   - One (1) must be in Machine Learning
     - ME 555 Data Driven Dynamical Systems and Control
     - ME 555 Robot Learning (Prerequisite for undergraduates: undergraduate Intro to Robotics)
     - ECE 580 Introduction to Machine Learning
     - BME 548L Machine Learning and Imaging
     - CS 371 Elements of Machine Learning
   - One (1) in either Controls and Dynamics, Machine Learning, or Breadth
     - Controls and Dynamics and Machine Learning courses are listed above
     - ME 555 Medical Robotics and Surgical Technologies
     - CS 527 Computer Vision
     - ECE 461/ME 555 Ocean Engineering
     - ECE 496/590/ME 555 Rainforest Engineering
     - ECE 588 Image and Video Processing: from Mars to Hollywood with a Stop at the Hospital
     - ME 491/ECE 493L Independent Project (must be robotics related; requires detailed semester plan and prior approval)

3. One (1) ethics course (found in the Breadth Track)
   - ME 555 Ethics of Case Studies in Robotics and Automation (required)

4. One (1) humanities/social science course
One course in one of the following areas: History (if applicable to the role of technology and science); Public Policy (if applicable to the use and impact of technology); Economics. Courses are to be approved by the certificate coordinator; other course options will be considered on an individual basis with consideration given to their relevance to the field.

Note 1: Two of the technical courses can be required courses in home department

Note 2: Other courses in areas related to Robotics are also permissible subject to approval of the Robotics and Automation Certificate Program Coordinator. New courses may also be created.

Science and the Public Certificate
Program Code: U-GSP-C
Plan Type: Certificate
Department: Science & Society
Website: scienceandsociety.duke.edu/learn/undergraduate-programs/ss-certificate/science-and-the-public

Program Summary
The Science & Society Certificate Program is an undergraduate, interdisciplinary course of study that integrates science with its relationship to society. The interdisciplinary curriculum enables students to understand the social, legal, historical, and policy issues stemming from research and technological advances in both basic and applied science.

The Certificate in Science and the Public allows undergraduate students to build on their science and technology leadership training and hone their expertise in science and technology policy.

Academic Requirements
Undergraduate students must complete five courses and two research experiences, (at least one of which is credit bearing):

- Science & Society 256-01 (core course) must be taken by the end of the junior year.
- Three elective courses (see current listings at scienceandsociety.duke.edu/learn/undergraduate-programs/ss-certificate), including at least one course with an ethics, law, or policy component.
- Two approved research experiences consisting of either two semester long independent study courses or one semester long independent study course plus one approved summer research experience.
- Science & Society 498S-02 capstone course to be taken in the spring of senior year.

At least one elective and at least one research experience must have a science component, and at least one elective must have an ethics, law, social science, and/or policy component. No more than three courses may originate in any one department; only two courses may be used to satisfy the requirements for any major, minor, or other certificate; and at least half of the courses must be taken at Duke.

Sustainability Engagement Certificate
Program Code: U-SUSTN-C
Plan Type: Minor
Department: Nicholas School of Environment
Website: nicholas.duke.edu/academics/certificate-programs/certificate-sustainability-engagement

Program Summary
The goal of this program is to provide undergraduates with an opportunity to engage deeply with complex interconnections involved in sustainability-related challenges. The program requires students to connect multiple disciplines, such as environmental science, economics, public policy, and/or social justice. The program will foster critical analysis, systems thinking, and practical skills to create engaged leaders in sustainability.

Go to Programs by Department to view all related programs.

Academic Requirements
In order to complete the certificate, students must take four courses, complete two substantial experiences, and develop an e-Portfolio.

The four courses include:

- one gateway course
Duke University

- Sustainability Engagement 245 (Sustainability: Theory and Practice, taught in the spring)
- Sustainability Engagement 276 (Denial, Faith, Reason: Sustainability and Survival, taught in the fall)
- two elective courses
- the capstone, Sustainability Engagement 498S (Building A Sustainable Tomorrow)

The experiences must include one exceeding 300 hours and one exceeding 150 hours. The electives and experiences must share a chosen theme in the field of sustainability engagement that relates to three key dimensions of sustainability: the environment, economics, and social equity. The course of study and engagement experiences must be approved by the student’s Oversight Committee. For information about the certificate, visit sustainability.duke.edu/academic/certificate.

Duke Kunshan University Dual-Degree Program

Duke Kunshan University

Duke Kunshan University (Duke Kunshan) is a US-China partnership of Duke University (Duke), Wuhan University, and the Municipality of Kunshan in Jiangsu province to create a world-class liberal arts and research university offering a range of academic programs for students from China and throughout the world. A nonprofit, joint-venture institution, Duke Kunshan University was granted accreditation approval by China’s Ministry of Education (MOE) in September 2013. Duke Kunshan welcomed its inaugural class of graduate students in August 2014 and launched the dual-degree undergraduate program in August 2018.

Duke Kunshan University Mission Statement

Duke Kunshan is a highly selective research-oriented, liberal arts and sciences university located in China, whose primary mission is to enable students from around the world to lead purposeful and productive lives. By delivering the highest quality undergraduate and graduate education that is truly interdisciplinary, Duke Kunshan prepares students for professional, intellectual, and societal leadership roles across the globe. The core of the educational offering is a four-year undergraduate dual-degree program featuring an integrated and multi-disciplinary curriculum, with an effective blend of Chinese, American, and global techniques and values and a culture of academic excellence and freedom. World-class faculty pursue knowledge in service to society, involving students in innovative scholarship and research programs. As a premier US-China joint-venture university, Duke Kunshan embraces the integration of global, national, and local traditions of thought and experience and promotes cross-cultural understanding and cross-border collaborations.

Duke Kunshan Animating Principles

Duke Kunshan aspires to provide a twenty-first century liberal arts education that helps students develop a sense of social responsibility and global citizenship, as well as strong and transferable intellectual and practical skills such as communication, analytical and problem-solving skills, and a demonstrated ability to apply knowledge and skills in real-world settings.

The overarching goals are embedded in the seven animating principles that are expressed throughout the curriculum:

1. **Rooted Globalism:** To cultivate informed and engaged citizens who are knowledgeable about each other’s histories, traditions of thought, and affiliations; and skilled in navigating among local, national, and global identities and commitments.
2. **Collaborative Problem-Solving:** To instill the habits of collaboration and the ability to synthesize disparate insights in solving complex challenges.
3. **Research and Practice:** To enhance the ability to forge links between theory and practice in the many-sided and rapidly changing world of human needs.
4. **Lucid Communication:** To develop the ability to communicate effectively, both orally and in writing, and to listen attentively to different viewpoints in coming to mature judgments.
5. **Independence and Creativity:** To nurture free inquiry, deep reflection, and a drive to ask interesting questions and find compelling answers.
6. **Wise Leadership:** To shape thinkers and doers who possess the moral compass to guide communities and institutions toward a common good and who have the wisdom and technical competence to deal effectively with complexity.
7. **A Purposeful Life:** To form reflective scholars who test their core beliefs, who connect their course of study to big questions of meaning, and who build the capacity for lifelong learning and exploration.

Duke Kunshan is accredited by the MOE. Duke is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) in the United States to award baccalaureate, master’s, and doctorate degrees. Duke Kunshan is not accredited by SACSCOC and the accreditation of Duke does not extend to or include Duke Kunshan or its students.

Kunshan City

Kunshan, located in the southeastern part of Jiangsu province, is a satellite city in the greater Suzhou region and adjacent to Shanghai municipality, two of the largest and most developed metropolitan areas in China. Kunshan is regarded as one of the most economically successful county-level administrations in China. It was ranked first in the “25 Best County-level Cities in China” study by Forbes China for the sixth year running in 2014. With an immigrant population larger than the number of its permanent residents, Kunshan is the winner of the UN-HABITAT Scroll of Honor Award 2010.
along with Singapore and Vienna, the most prestigious award given by the United Nations in recognition of work carried out in the field of human settlements development, for its innovative approach to granting migrants the right to essential services in the city. It also carries titles and awards such as National Hygiene City, Excellent Tourism City of China, and National Garden City, as well as the National Model City of Environment Protection and National Model Zone of Ecology.

Kunshan is culturally significant as the origin of Kunshan Diao, the melody which ultimately evolved into Kunqu Opera, one of China’s oldest extant theater arts, which has been listed as one of the World Intangible Culture Heritages by UNESCO. In history, famous figures include Zu Chongzhi, Gong Xian, Gu Yanwu, Gui Youguang, and Zhu Bailu.

The Duke Office of Duke Kunshan University Relations

The Duke Office of Duke Kunshan University Relations works in close collaboration with Duke and DKU stakeholders to develop and support initiatives across our institutions, including:

- Developing strategy for the Duke-DKU relationship,
- Creating and implementing programs for undergraduate and graduate students,
- Facilitating opportunities for faculty to teach and engage in research at Duke and DKU,
- And providing administrative, financial, human resources, and logistical support for all Duke-DKU initiatives.

The Duke Office of Duke Kunshan University Relations is located on the second floor of the Flowers Building on Duke’s West Campus. Students can reach the office by using the information below or by contacting a staff member directly.

Mailing Address
Duke Office of Duke Kunshan University Relations Box 90036
Durham, NC 27708

Physical Address
Office of Duke Kunshan University Programs 404 Chapel Drive
Flowers Building, Suite 214 Durham, NC 27708

Phone: (919) 684-1958
Fax: (919) 668-7860
Email: dkurelations@duke.edu

Admissions

Admissions

Per Duke’s Collaboration Agreement with Duke Kunshan University (Duke Kunshan) for the dual-degree framework, Duke collaborated with Duke Kunshan to establish and approve standards for admissions that are consistent with those at Duke now and in the future, while also meeting China’s Ministry of Education requirements.

Duke Kunshan strives to attract a high caliber, diverse and talented group of students from around the world.

The admission criteria are similar to those at Duke University. While academic excellence and accomplishments, broadly defined, are important factors for admissions consideration, Duke Kunshan highly values a student’s ‘adventurous’ spirit, global orientation, ability to overcome obstacles, and potential to positively impact the campus and community life.

International Student Admissions

Early Decision. The application deadline is in early November. International applications are reviewed by an Admissions Committee and select applicants are invited for video interviews in late November. Admission offers are released in December.

Regular Decision. The application deadline is in early January. International applications are reviewed by an Admissions Committee. Select applicants are invited for video interviews between January and March. Admission offers are released in March.

Financial Aid Application. Students who want to be considered for financial aid should complete a CSS Profile application with their admissions application. Final deadlines are November 15 for Early Decision applicants and February 1 for Regular Decision applicants. Students applying to Duke and Duke Kunshan should prepare separate CSS Profile applications for each institution.

Chinese Student Admissions. Applicants with Chinese citizenship may submit an application in round one (early January) or round two (mid-February). Selected applicants are invited to participate in a one-day Campus Day event on weekends in March and April, during which the applicants take a written English test and an interview conducted in English. Shortlisted applicants are notified of their status in April and final offers are made once Gaokao scores (for Chinese mainland students) or other equivalent tests (for Chinese students in Hong Kong, Macau, and Taiwan) are announced in June and July.

How to Apply
International students applying to Duke Kunshan University must complete the Common Application. Duke Kunshan does not charge an application fee. Students who wish to apply to both Duke University and Duke Kunshan University, may use the Duke University application and select YES to the question that asks if they would like to share their application with Duke Kunshan. On the application, international students select a decision plan (Early Decision or Regular Decision), which determines when their applications for admission are due and when they will be notified of an admission decision. Students can select only one of the decision plans when submitting an application, and those who have selected an Early Decision will not be considered during the Regular Decision cycle if an admissions decision is made during the Early Decision round. International applicants may choose to submit either their SAT or ACT scores for consideration, or apply as a test-optional applicant. The Duke Kunshan University CEEB code is 16406.

Applicants with Chinese citizenship apply through Slate by either round’s deadline. Applicants from the Chinese mainland must take the Gaokao test regardless of where their high school is located. Applicants from Hong Kong, Macau, and Taiwan should take the “Hong Kong, Macao, and Taiwan Joint Examination” or Taiwan’s General Scholastic Ability Test. Students enrolled at Duke University are not eligible for the dual-degree program.

For information on tuition, financial support, as well as more in-depth information about Duke Kunshan University, visit dukekunshan.edu.cn/en/admissions.

Standards and Degree Program

Standards and Policies

In general, students participating in the dual-degree program are subject to academic procedures, standards, and policies of the institution the student is enrolled at the time. While enrolled in courses on the Duke campus, Duke instruction courses, or participating in a Duke-In study abroad program, students are subject to the majority of Duke’s Trinity College of Arts & Sciences academic policies and procedures. However, the following policies and procedures directly related to transfer, registration restrictions, and application of academic credits were modified to better suit the unique nature of the dual-degree academic program.

Academic Concerns of Students

Teaching and learning is based on collaboration between instructors and students. Occasionally, however, the student-faculty dynamic in a course can inhibit successful teaching and learning. When this occurs, students often need assistance in resolving the issue, and should not hesitate to seek assistance from faculty and administrative officers in resolving problems.

Students who have questions about the content of a course taken on the Duke campus or as a part of a Duke-In study abroad academic program, about an instructor’s methods of presentation of material, the level of discourse, criteria for evaluation of students, or administrative procedures in the course, should contact the course instructor. Even if a student doubts that a productive discussion with the instructor is possible, they are best positioned to address student concerns and are often the best first point of contact before a matter is referred to the director of undergraduate studies or, in their absence, to the chair of the department. Students should be able to resolve most course-related academic concerns through direct consultation with the instructor.

However, in exceptional cases in which a problem remains unresolved after informal discussions have taken place, students can appeal the matter to the senior associate dean of Trinity College or the senior associate dean for education at the Pratt School of Engineering. The senior associate dean will request information about the nature of the issue and about the earlier efforts students have made to resolve them. If the problem concerns a specific course, it should be directed to the senior associate dean of the college or school in which the course is taught.

- If a student concern involves a departmental policy rather than an individual course, students should confer with the director of undergraduate studies in the department. When necessary, the director of undergraduate studies can refer a student to the department chair. Students can also contact their academic dean if they are in doubt about how to proceed with a matter of concern.
- If a student concern involves a Duke instruction course or academic policy on the Duke Kunshan campus, students should refer to the relevant Duke Kunshan academic policies.

Finally, if a student’s academic concern arises from a poor course grade submitted by an instructor at the end of the semester for a course taken at Duke or as part of a Duke-In study abroad academic program, there is a separate procedure established for handling grade complaints.

Courses: Course Load at Duke

Students are admitted to full-time study and responsible to make certain that their course load conforms to academic requirements, including the requirement to enroll in at least 4.0 course credits during a semester at Duke, except when expressly authorized to enroll in an underload by their academic dean. This policy is strictly enforced.

Normal Load. A normal course load is defined as four (4.0) course credits and, as noted above, students are expected to enroll in at least this many course credits each semester.

Overload. Dual-degree students are free to enroll in a course overload of 4.5 course credits.

Underload. Dual-degree students are not eligible for an underload.
Courses: Repeating
Students in the dual-degree program should generally follow the course repeating policy in Trinity. An exception for the dual-degree program is that students may repeat a course taken at Duke at Duke Kunshan with approval.

Courses: Satisfactory/Unsatisfactory Grading Option
Students in the dual-degree program follow the Trinity policy on course grading and the satisfactory/unsatisfactory (S/U) option and DKU Study Away policy when enrolling in courses at Duke and follow the Duke Kunshan policy on course grading and the credit/no credit (CR/NC) option when enrolling in courses at Duke Kunshan. Students are not allowed to change a letter grade of a course taken at Duke to CR/NC when they return to Duke Kunshan.

Credit: Limitations and Restrictions
There are specific requirements concerning course credits in the dual-degree program and how these course credits apply to graduation requirements.

1. 34.0 Duke course credits are required for graduation.
2. At least 25% of the 34.0 Duke credits (8.5 Duke course credits) must be Duke-originated courses, defined as courses offered through Duke University or taught by Duke or Duke-affiliated faculty, and all are subject to the approval processes by relevant Duke course committees. Duke-originated courses include those taught at Duke University, the Duke University Marine Laboratory, Duke Kunshan University, and Duke-originated courses that are offered in Duke-In study away programs.
3. Up to 75% of the 34.0 Duke course credits may be non-Duke originated course credits and can include any combination of the following:
   - Two pre-matriculation credits, i.e., AP, International Placement Credit (IPC), and pre-matriculation Course Credit (PMC). If a student has more than two AP/IPC/PMC credits, Duke will record all of them on the Duke transcript and the student may use all for placement into higher-level coursework and to satisfy departmental major or minor requirements to the extent allowed by the individual department, but only 2.0 credits will count toward the 34.0 credits needed for graduation. If a student intends to graduate early, they may apply additional AP/IPC/PMC credits toward the 34.0 credits required for graduation, but the student is still subject to the required number of Duke-originated courses taken post-matriculation.
   - Two institutional transfer credits arranged by the student on their own at another accredited, four-year university or college in the United States or abroad.
   - Ten study away/abroad transfer credits that students take through an approved study away/abroad program. However, the maximum number of credits when combining institutional and study abroad transfer credits cannot exceed ten.
   - Ten of the 34.0 Duke credits may be non-Duke- or non-DKU-originated credits and can include any combination of the above.
   - Transfer credits the student takes through Duke Kunshan.

Summer Session and Policies
Students are allowed to enroll in Duke Summer Session and register for one, two, or three courses as long as students do not exceed 2.5 course credits in one term. However, students may not register for more than one natural science laboratory course in any one term. Students on a J-1 visa are required to enroll in 2.0 course credits in the six-week term. Contact the Duke Visa Services office with any questions about requirements for maintaining visa status. For additional information on Trinity's summer session policies, see trinity.duke.edu/undergraduate/academic-policies/summer-sessions-and-policies.

Transfer Credit
After matriculation, dual-degree undergraduates may receive a limited amount of transfer credit for courses taken at other approved degree-granting institutions. Credit may be earned in two ways:

2. Through a limited amount of institutional enrollment, where students are not engaged in a Duke-approved study abroad program and instead enroll on their own at another four-year college or university in or outside of the United States. This type of transfer credit is subject to approval from the relevant academic dean at Duke.

Graduation: Requirements
Duke/Duke Kunshan dual-degree undergraduates may earn one of two Duke degrees:

- Bachelor of Arts (AB)
- Bachelor of Science (BS)

The Duke Kunshan University curriculum is designed to meet the requirements outlined for both the Duke and Duke Kunshan undergraduate degrees. A total of 136.0 Duke Kunshan credits is required for graduation with a Duke Kunshan bachelor's degree and 34.0 Duke course credits (1.0 Duke course credit is equivalent to 4.0 Duke Kunshan credits) is required for graduation with a Duke bachelor's degree. At least 25 percent of the credit hours required for the undergraduate degree must be completed through Duke-originated courses.
To meet the 136.0 credit requirement, students need to take elective courses. The curriculum is designed to enable a wide range of flexibility for students. Some may elect to use their full range of electives to go wide and broad while others may elect to dive deep into their areas of disciplinary study.

There are additional credit-bearing requirements for the Duke Kunshan degree for students from the Chinese mainland, Hong Kong, Macau, and Taiwan per Chinese Ministry of Education requirements. The details of these requirements are listed in Duke Kunshan University’s Undergraduate Bulletin.

Duke University and Duke Kunshan University each confer separate degrees on candidates recommended by the faculty of the interdisciplinary majors and approved by the trustees (or other top-level governing body) at each respective academic institution.

**Leave of Absence: Medical or Personal**

While studying at Duke, students in the dual-degree program may request a medical or personal leave. If a student is contemplating a medical leave, consult with their academic dean as soon as possible. The academic dean will work with the dean of undergraduate studies at Duke Kunshan to process the request. A student must resubmit a Duke Kunshan University Study at Duke program application to return for study at Duke.

**Withdrawal: Voluntary**

While studying at Duke, students may choose to withdraw for health or financial issues, or personal reasons. To withdraw, students must meet with their academic dean, and their academic dean will work with the dean of undergraduate studies at Duke Kunshan to process the request. A student must resubmit a Duke Kunshan University Study at Duke program application to return for study at Duke.

**Withdrawal: Disciplinary Suspension**

While studying at Duke, if a student violates university expectations as outlined in The Duke Community Standard in Practice: A Guide for Undergraduates, the student may be subject to suspension (an involuntary withdrawal or dismissal from the university for a specified number of semesters) or permanent expulsion. If a student is found responsible for a conduct violation that leads to a suspension from the university, the Office of Student Conduct will notify the student and the academic dean of that decision. The student’s academic dean will work with the dean of undergraduate studies at Duke Kunshan to withdraw the student from both Duke and Duke Kunshan, close the student’s student record, and notify the advisors, instructors, and all appropriate offices. The withdrawal will be entered on the student record.

**Curriculum Components**

The Duke Kunshan curriculum begins from liberal arts principles and is imbued with the hallmarks of a Duke education blended with Chinese tradition: interdisciplinary approaches, engagement with research questions, problem-based and team-based learning, and opportunities for students to craft individual pathways and deepen their intellectual engagement over time. It is a kind of education that builds critical and problem-solving skills, simultaneously conferring a broad base of knowledge and fostering the ability to interrogate that knowledge and apply it flexibly. It is also deeply cross-cultural in its orientation: Duke Kunshan gives all participants the continual experience of learning to see from multiple points of view and to work together across cultural boundaries—a crucial skill for the future.

**A Liberal Arts College Experience**

The small-scale residential setting at Duke Kunshan offers significant opportunities for innovative and integrated forms of learning, an especially close connection between faculty and students, and the intermixing of students with different interests. In addition, Duke Kunshan offers creative alignment between its undergraduate curriculum and selected areas of research strength at Duke Kunshan and at Duke University.

**The Kunshan Campus**

The Duke Kunshan Campus is located in the newly developed west side of Kunshan. It is approximately a twenty-minute drive to the city center of Kunshan.

All students are required to live in on-campus housing for the first year and designated off campus housing for the rest of their study. Graduate students may live off campus after approval from Residence Life.

The Duke Kunshan campus features the Academic Center, Student Residences, Faculty Residences, the Services Building, Conference Center, and Innovation Building. The buildings surround a tranquil lake with walkways over water that join at a central pagoda. The second phase of campus construction, including the main library, additional classrooms, research building, student and faculty housing, and athletic facilities is currently underway.

**Academic Building**

With offices and classrooms over three floors, the building houses teaching programs and administrative staff, as well as an auditorium, library, ballroom, cafeteria, dining room, and cafe. An open central atrium serves as a campus “living room,” emblematic of Duke Kunshan’s emphasis on collaboration and community. The atrium and roof terraces provide views of the campus and a lake to the west.
Innovation Building
Over three stories, the building houses laboratories set up with cutting-edge equipment, classrooms, faculty offices, and conference rooms.

Library Resources
The Duke Kunshan Library is currently located on the first and second floors of the Academic Building. It operates in collaboration with Duke University Libraries (DUL) on the Durham campus and supports the research, instruction, and learning needs of Duke Kunshan faculty, staff, and students.
The Duke Kunshan Library website (dukekunshan.edu.cn/en/academics/library) provides access to the library's resources and services provided by the Duke Kunshan Library.

Additional Resources
The Duke Kunshan campus offers a vast number of academic support services, amenities, housing, and other campus-based resources. A complete list of campus-based resources can be found in the Duke Kunshan University Student Handbook.

Curriculum Overview
In line with the definition of dual-degree agreements as defined by the Southern Association of College and Schools Commission on Colleges, students who complete Duke Kunshan University's four-year undergraduate curriculum will receive two degrees, one from Duke University (accredited by the Southern Association of Colleges and Schools Commission of Colleges), and one from Duke Kunshan University (approved by the Ministry of Education of China), and will be alumni of both institutions. All students must fulfill the requirements for both Duke University and Duke Kunshan University degrees.
The undergraduate academic program at Duke Kunshan is organized into three divisions, rather than by traditional academic departments:

1. Natural Sciences
2. Arts and Humanities
3. Social Sciences

Students take foundational courses in their division as well as broad, integrated interdisciplinary courses and disciplinary courses to gain specific expertise for their major. Depending on division and language proficiency, eight to thirteen of students’ courses are electives. These courses enable them to deepen their interests or explore more broadly.

Students can choose their majors based on their interests by combining different forms of specialized training with their overall integrated plan of study. This structure allows students to follow a unique academic path that suits their intellectual drive.

For a complete list of majors offered at Duke Kunshan University, visit ugstudies.dukekunshan.edu.cn/academics/majors.

To meet Duke Kunshan’s rigorous academic requirements for graduation, all students must complete the Common Core and language course requirements as well as demonstrate proficiency in communication skills.

Curriculum Components
1. Common Core (3 courses). These courses create a common platform for cross-cultural engagement, ensuring that all students share the same experience. They focus on the big questions, critical challenges, and issues with which all students must be prepared to engage.
   Students take one course each year for the first three years.
   - China in the World focuses on historical and contemporary commercial, intellectual, and scientific exchanges between China and other nations.
   - Global Challenges in Science, Technology, and Health, which addresses key developments in fields such as biotechnology, nanotechnology, and information technology, highlights the global environmental challenges of our time, and teaches strategies for critically evaluating scientific claims.
   - Ethics, Citizenship, and the Examined Life examines traditional Asian and Western ideals and contemporary analyses of morality, pluralism, and democracy.

2. Language (2-4 courses depending on proficiency). One of Duke Kunshan University's goals is for students to graduate with strong skills in multiple languages, especially English and Chinese. To this end, all students are required to take 2-4 foreign language courses appropriate to their needs.

3. Communication (Writing, Speaking, and Listening). In the twenty-first century, success in both career and civic life requires the ability to communicate effectively. To ensure that Duke Kunshan students develop these abilities, guided practice in writing, speaking, and listening will be a component in the majority of courses.

4. The Semester Term. The semester is divided into two intensive 7-week sessions. Students typically take two courses in each session.
   Classes are held Monday-Thursday. Fridays and mini-sessions falling between the 7-week sessions are intended for experiential learning including field trips, internships, and civic engagement.

5. Mini-Term Courses. All students are required to take one ungraded mini-term course. These are intensive courses that typically last a week and provide focused exposure to a single topic about which a student might have curiosity but no experience.
6. **Signature Work.** During their sophomore year, students work with their faculty mentors to begin identifying the major questions, problems, or issues on which they would like to focus. Students create a project e-portfolio to demonstrate their progress and the new products they create for scholarly, private sector, and public audiences. These products will be drawn from a number of experiences inside and outside of the classroom including mentored research, creative expression, internships, community-based fieldwork, and other civic projects.

7. **Research.** All undergraduate students have opportunities to participate directly in advanced academic research. Advisors and faculty mentors help match students to research projects that are complementary to their areas of study.

**Courses**

Course credit at Duke Kunshan University follows the same standard as Duke University in terms of instruction hours and class study hours. Of the 34 course credits required for graduation, a maximum of two course credits passed with a D grade (D, D+, D-) can be used toward the 34 course credit requirement. The 34 course credits may include (1) no more than 0.5 course credits in physical education activity courses (i.e., two activity PE courses); (2) no more than four elective courses taken on a Pass/Fail grading basis (not including courses offered only on that basis); (3) no more than 10 course credits combining any allowable transfer credits including AP/IPC/PMC, transfer credits for study abroad, etc.; and (4) no more than 6.0 course credits in the graduate and professional school. These courses include those offered by Duke Kunshan University's MMS, MP, and IMEP programs; Duke University schools of business, law, divinity, and nursing; and all Duke University graduate courses numbered 500 and above. These courses are generally not open to undergraduates and require special permission to enroll.

**Duke Instruction Courses at Duke Kunshan University**

Duke Kunshan students have the opportunity to take classes from Duke faculty on the Kunshan campus. The Duke Instruction coursework appears on both the Duke Kunshan transcript and the Duke transcript. The Duke transcript will reflect the Duke course and the corresponding grade for the particular term completed. The list below represents the current Duke instruction courses at Duke Kunshan.

**Major and Degree Requirements**

**Major and Degree Requirements**

Duke/Duke Kunshan University dual-degree undergraduate majors foster learning communities of students and faculty whose intellectual interactions revolve around two groups:

1. Interdisciplinary study, which laterally spans a variety of disciplines. The big questions at the core of each interdisciplinary community will probe a variety of disciplines, voices, viewpoints, and expertise.

2. Disciplinary study, which is akin to, or even entirely aligned with, a traditional vertical discipline. This community provides discipline-specific training in methods, knowledge, and skills.

The dual structure is also flexible to accommodate a variety of student goals and outcomes. Some students might choose to pursue a less deep path in the disciplinary study while focusing more on developing broad expertise in the questions underlying the interdisciplinary study—and in that case, the outcome can be a powerful integrative education for students whose goal is not graduate school or specialized study. This approach allows for a highly integrative, team-based approach to problem-solving and knowledge acquisition. For students oriented toward graduate study, the integrative and outward-looking approach in the interdisciplinary study broadens and enriches their deeper specialist expertise. Our expectation is that a student with deep expertise who also has interacted in a significant, deep way with an interdisciplinary group focused on big questions will be more, not less, appealing to graduate schools or other specialty pursuits. For certain disciplines, students oriented towards graduate school may also need to use some electives, guided independent studies, online courses, and study abroad courses to deepen expertise beyond the seven courses required for disciplinary study.

**Curricular and Credit Requirements**

The Duke Kunshan University curriculum is designed to meet the requirements outlined for both the Duke and Duke Kunshan undergraduate degrees. A total of 136 Duke Kunshan credits is required for graduation with a Duke Kunshan bachelor's degree and 34 course credits (1 Duke course credit is equivalent to 4 Duke Kunshan credits) is required for graduation with a Duke bachelor's degree. At least 25 percent of the credit hours required for an undergraduate degree must be completed through Duke University courses.

To meet the 136-credit requirement, students need to take elective courses. The curriculum is designed to enable a wide range of flexibility for students. Some may elect to use their full range of electives to go wide and broad while others may elect to dive deep into their areas of disciplinary study.

There are additional credit-bearing requirements for the Duke Kunshan degree or students from mainland China, Hong Kong, Macau, and Taiwan per Chinese Ministry of Education requirements. The details of these requirements are listed in Part 3: The Curriculum of the Duke Kunshan Undergraduate Bulletin.

Duke University and Duke Kunshan University each confer separate degrees on candidates recommended by the faculty of the interdisciplinary majors and approved by the trustees (or other top-level governing body) at each respective academic institution. These components are reflected in specific requirements:
Courses required for each major include Divisional Foundation courses, Interdisciplinary Studies courses, Disciplinary Studies courses, Signature Work, and Experiential Education. The detailed course requirement for each major is listed in Part 9: Majors of the Duke Kunshan Undergraduate Bulletin. Students are responsible for meeting the requirements of a major as stated in the bulletin for the year in which they matriculated; however, they have the option of meeting requirements in the major changed subsequent to the students' matriculation.

**Divisional Foundation Courses**
Divisional Foundation courses provide opportunities to develop knowledge and skills essential to advanced work in each division. Each set of Divisional Foundation courses also provides instruction and guided practice in specialized communication skills.

**Interdisciplinary Studies Courses**
Interdisciplinary courses are characterized by distinct curricular pathways spanning several traditional disciplines. These are broad but defined areas of study that encourage integrative and multidisciplinary habits of inquiry and knowledge acquisition. The interdisciplinary component of a major serves as a primary definition of the student's academic community. It requires 4 to 7 courses and might be problem-focused, comparative and cross-cultural, or innovatively fused within or across divisions. In the social sciences and the arts and humanities communities, students in their third and/or fourth years will undertake advanced seminars that enable them to integrate their studies from more specialized areas.

**Disciplinary Studies Courses**
Students will also develop a disciplinary study, which will often map to the tools and methods of a traditional discipline and further enable students to be competitive for graduate school or other advanced work.

**Signature Work and Experiential Education**
Duke Kunshan University graduates will have experience addressing complex problems outside the classroom as well as within, developing these skills through Signature Work. Signature Work encourages students to seek creative alignments between curricular pathways and to engage in experiential learning that leads to the creation of knowledge and products for the scholarly, private sector, and public audiences

Signature Work calls for each student to identify one or more questions, problems, or issues that are of particular importance to themselves and to society, and to investigate these through a combination of curricular and related co-curricular experiences. Students develop guided pathways, identify questions, and undertake projects early in their academic careers. During the sophomore year, students work with their advisors and faculty mentors to begin identifying the major questions, problems, or issues on which they would like to work, and to develop a pathway that includes three thematically linked courses drawn from students' interdisciplinary studies, disciplinary studies or electives, one or more co-curricular experiences, and two capstone courses in which a student creates a substantial scholarly product. Experiences derived from the co-curricular experiential learning component should establish, build on, solidify, or enhance academic work aligned with the Signature Work project. These experiences should help DKU undergraduate students prepare for their next steps beyond DKU. Experiential learning activities might include, but are not limited to, internships, practica, laboratory work, creative arts-based projects, entrepreneurship-based projects, community-based fieldwork, or other civic projects. The signature product will vary across fields and disciplines, but will always include substantial writing, reflection on learning, and publicly visible results. A student's pathway will be developed by the end of the sophomore, or the beginning of the junior year, at the latest. In the junior and senior years, a student will create an e-portfolio that captures both the signature product a student has produced and a narrative explaining the larger inquiry informing their pathway.

**Dual-Degree Major and Degree Comparisons**
Undergraduate dual-degree majors at Duke Kunshan University map to a single major (Interdisciplinary Studies), and either a bachelor of arts or science degree. While the interdisciplinary and disciplinary academic content areas are listed as "majors" at Duke Kunshan, they are listed as tracks and areas of focus at Duke. The following chart illustrates how Duke and Duke Kunshan University majors map between institutions.

## All Courses

### AAAS102 - Introduction to African American Studies

**Subject**
AAAS

**Catalog Number**
102

**Title**
Introduction to African American Studies

**Description**
A range of disciplinary perspectives on key topics in African American Studies: slavery and abolitionism, theories of race and racism, gender and race, the era of Jim Crow, cultural expressions, political and intellectual thought, African American freedom struggles from the seventeenth through the twentieth centuries, and race and public policy.

### AAAS103 - Introduction to African Studies (DS3 or DS4)

**Subject**
AAAS

**Catalog Number**
103

**Title**
Introduction to African Studies (DS3 or DS4)

**Description**
A range of disciplinary perspectives on key topics in contemporary African Studies: nationalism and pan-Africanism, imperialism and colonialism, genocide and famine, development and democratization, art and music, age and gender.

### AAAS104 - Introduction to Latino/a Studies in the Global South

**Subject**
AAAS

**Catalog Number**
104

**Title**
Introduction to Latino/a Studies in the Global South

**Description**
Introduction to the interdisciplinary field of Latino/a Studies, and how it reconfigures the study of the United States and the Americas. Considers literature, history, sociology, economics, politics, culture and language in examining terms such as: Latino, latinidad, Global South, transnational, globalization, and multiculturalism. Exploration of alignments and divergences of Latino/a Studies with African and African American Studies, Latin American and Caribbean Studies, and Critical US Studies. Classroom learning will connect with the community outside of Duke. Required introductory course for students in the Latino/a Studies in the Global South certificate program.

### AAAS104S - Introduction to Latino/a Studies in the Global South

**Subject**
AAAS

**Catalog Number**
104S

**Title**
Introduction to Latino/a Studies in the Global South

**Description**
Intro to the interdisciplinary field of Latino/a Studies, and how it reconfigures the study of the United States and the Americas. Considers literature, history, sociology, economics, politics, culture and language in examining terms such as: Latino, latinidad, Global South, transnational, globalization, and multiculturalism. Exploration of alignments and divergences of Latino/a Studies with African and African American Studies, Latin American and Caribbean Studies, and Critical US Studies. Classroom learning will connect with the community outside of Duke. Required intro course for students in the Latino/a Studies in the Global South certificate program.

### AAAS110S - Embodied Blackness

**Subject**
AAAS

**Catalog Number**
110S

**Title**
Embodied Blackness

**Description**
How is race embodied and how are bodies racialized? How do gender, sexuality, class, size, perceived beauty, and ability mutually influence embodiment? This course considers anthropological and historical studies of the body, with a critical focus on Blackness. We investigate how Black human bodies are othered, valued, dehumanized, and experienced, across time and space, with a particular focus on the United States.

### AAAS117FS - Race and Language

**Subject**
AAAS

**Catalog Number**
117FS

**Title**
Race and Language

**Description**
We will examine the relationship between race and language by interrogating texts in medical ethics, gleaning from them wider lessons for navigating prior controversies at the juncture of racial and social difference and medicine (for instance, phrenology and eugenics). We will also examine features of medical and scientific practice that overlap with the study of language, such as contract, disclosure, survey design and policymaking, and how the medical profession and medical practice work to correct past mistakes in interactions with different communities of race.
### AAAS133S - Gateway Seminar: Civil Rights and Asian Americans

**Subject**  | AAAS  
**Catalog Number**  | 133S  
**Title**  | Gateway Seminar: Civil Rights and Asian Americans  

**Description**
Study of crucial legal and political moments in the struggle for equal civil rights of minorities, beginning with the laws of Chinese Exclusion, the struggle to define who was 'White,' the Asian Immigration Exclusion Acts, the relationships of Asians and African Americans and the struggle for equal schooling in the American South, the Japanese Concentration camps, the Redress and Reparations Civil Rights struggle, and the involvement of Asians Americans in the African American-led Civil Rights Movement in the 1960s, including working with Martin Luther King and Malcolm X, and Asian Americans in the anti-sweatshop unionization movement.

### AAAS134 - Old Worlds/New Histories, 500-1500 CE

**Subject**  | AAAS  
**Catalog Number**  | 134  
**Title**  | Old Worlds/New Histories, 500-1500 CE  

**Description**
New approaches to history of the world from ca. 500 to 1500 CE. Examines the world before European hegemony. Topics may include nature of autonomous centers of production around the globe; characteristics of trade, empire, science, technology, and high culture across Asia, the Middle East, Africa and the Americas; diffusion of inventions, ideas, cultures and religions through travel, trade, state and empire building. Readings and films explore diverse cosmopolitan worlds before the coming of modernity.

### AAAS139 - History of Rock: Rhythm & Blues and Rock & Roll to Indie Rock and Hip-Hop

**Subject**  | AAAS  
**Catalog Number**  | 139  
**Title**  | History of Rock: Rhythm & Blues and Rock & Roll to Indie Rock and Hip-Hop  

**Description**
The history of rock music from the 1950s to the present. Beginning with its roots in rhythm and blues, country and western, and commercial pop, examination of diverse musical styles, artists and bands, and the many historical, technological, and cultural factors that have contributed to the rise and popularity of rock music.

### AAAS140 - Introduction to Jazz

**Subject**  | AAAS  
**Catalog Number**  | 140  
**Title**  | Introduction to Jazz  

**Description**
Lecture version of Music 140D.
AAAS146 - Motown and American Soul Music

Description:
During the 1960’s, in Detroit, Michigan, a landmark in music was established: The Motown Sound. This aural kaleidoscope of high quality, dynamic song creation was established through a confluence of talent and hard work by people whose names now line the halls of fame for popular music. Some of these luminaries include Berry Gordy, Diana Ross, Stevie Wonder, Marvin Gaye, and Holland-Dozier-Holland. This course will investigate the societal and musical factors that gave rise to such a distinctive aesthetic, also framing this phenomenon as a point of comparison to a range of commercial music styles, including Philly Soul, Southern Soul, RnB, and current musical trends.

AAAS171 - Business Anthropology: Anthropologists in the Workplace

Description:
Introduces students to the various applications of anthropological theory and ethnographic method in contemporary institutional settings with the aim of familiarizing students with alternative career opportunities. The course looks at corporate and other private and public-sector use cases as well as the extensive literatures in the fields of organizational management, user, and consumer experience. Students also engage professionals in order to better understand processes of research, hypothesis testing, analysis, and the formulation of organizational management, design, and other strategic solutions for clients.

AAAS173S - The Ways and Wisdom of First-Gen College Students

Description:
This course examines the experience of first-generation college students, including their unique challenges, strategies, observations, and analyses. It is intended equally for students of all backgrounds and will, through the ethnographic method, train students in empathetic listening and participant-observation, as well as socially contextualized and cross-culturally comparative analysis.

AAAS180S - Gateway Seminar: The History of the U.S. South

Description:
This course examines the history of the South from the colonial era to the present. The first part traces the rise of the plantation economy based on human bondage, the slaves’ wars and other abolition movements, the Civil War, emancipation, and the destruction of the most powerful slaveholding society in the Atlantic world. The second part traces postwar efforts to build a democratic South, the rise of the Jim Crow system of segregation and disfranchisement, class struggles, the civil rights and abolition movements of the twentieth and twenty-first centuries, and southern culture. Students will acquire analytical and research skills using primary documents.
AAAS182S - The Law in Slavery and Freedom

**Description**
This course focuses on the relationship between slavery, race, and the law. It explores the dimensions and variability of the formal law of slavery, how it addressed the category of slave, codified the powers of slaveholders, and interacted with politics and culture to shape the institution of slavery and the making of the ideology of race. We will study primary documents such as trial transcripts, appellate opinions, treatises, codes, first-person narratives, and secondary work by legal scholars and historians. The course supports the development of skills in critical inquiry, research, and writing leading to the production of a final project based on original research.

AAAS185S - African Hashtag Activism

**Description**
The technological leapfrogging of the last three decades introduced mobile and smartphone technologies to Africans radically altering the modes of organizing available to women, members of the LGBTQI+ community, and other vulnerable groups. But beyond giving voice to local concerns, African opinions and perspectives are also directed towards larger conversations about climate change action, resistance to US hegemony, and the role China plays in African development.

AAAS187FS - Biological Impact of Racism and the Legacy of John Henry

**Description**
Racial differences in health outcomes and their social, historical, and epigenetic origins. The biological impact of the experience of racism on Black, Indigenous, Asian, and Latinx people as well as newly acculturating immigrants. How the stress of racism is codified in biological systems including increased inflammation; changes in gene expression; alterations in immune function; placental functioning; telomere shortening; physiological ‘weathering’; and possible changes in life history. Research on how to build resiliency and mechanisms for managing stress. Offered only in the Focus Program.

AAAS188 - Black Music and the Soul of America

**Description**
This course traces the deep and pervasive impact African Americans have had on music in the United States. Musicians include Louis Armstrong, Bessie Smith, James Brown, Aretha Franklin, John Coltrane, Marian Anderson, Sam Cooke, Olly Wilson, Duke Ellington, Florence Price, William Grant Still, Alicia Keys, Kirk Franklin, and Megan Thee Stallion. The course demonstrates musical, cultural and political connections between these different streams of music and American society. Students will discover the myriad ways that the very soul of America has been conditioned by the practices of Black music.

AAAS190A - Duke-Administered Study Abroad: Special Topics in African & African American Studies

**Description**
Topics differ by section.

<td>Patient and Research Participant Activism and Advocacy</td>
<td>In the 1960s, patients appropriated the language and tactics of the civil rights movement to advance clinical and research agendas. Today patient activism is evolving, leading to new solutions, dilemmas, and organizational structures. This course will examine patient and research participant activism and the ways it challenges conventional notions of expertise, amateurism, 'human subjects protections,' and minimization of risk. Students will bring the tools of journalism, anthropology, humanities scholarship, public policy and community engagement/citizen science to bear on ethical and policy questions. Open only to students in the Science &amp; the Public Focus Program cluster. Department consent required.</td>

<td>Race, Film, and Religion</td>
<td>In this course, we will examine how cinema both constructs and reproduces anti-black racism and how cinema works to liberate blackness from the strictures of racial domination. We will watch films from the past three decades that provide an opportunity to interrogate the relationship between race, gender, and sexuality. These films will also enable us to think about how cinema introduces unconventional notions of the sacred, a process that involves affect, desire, and imagination. Films that we watch may include: Moonlight, Medicine for Melancholy, Black Panther, Daughters of the Dust, Get Out, US, Pariah, and Selma.</td>

</table>
AAAS203 - Sport As Performance

Subject: AAAS
Catalog Number: 203
Title: Sport As Performance

Description:
This course studies athletic cultures under rubrics provided by theater, performance studies, anthropology, media studies, and history to understand sports as ritual, theater, and performance. Our investigation includes professional and collegiate teams sports, as well as individual athletic performances. The course includes examinations of gender, race, and national identity in live events and the media. A twice-weekly seminar format features lectures, discussions, independent research projects, and guest speakers from the worlds of athletics, theater, and media.

AAAS207 - African Americans Since the Civil War

Subject: AAAS
Catalog Number: 207
Title: African Americans Since the Civil War

Description:
Post-slavery black life and thought, as well as race relations and social change, during Reconstruction, Jim Crow, the Civil Rights and Black Power Movements, and contemporary times; ethical concepts and issues on human justice in the course of struggles for democracy, tolerance, and equality.

AAAS209 - Afro-Brazilian Culture and History

Subject: AAAS
Catalog Number: 209
Title: Afro-Brazilian Culture and History

Description:
Slavery and the post-emancipation trajectory of Afro-Brazilians in a racist society that officially proclaims itself a ‘racial democracy.’ Comparisons drawn with the Afro-American experience elsewhere in Latin America and the United States.

AAAS210 - Modern Africa

Subject: AAAS
Catalog Number: 210
Title: Modern Africa

Description:

AAAS211 - Anthropology of Money

Subject: AAAS
Catalog Number: 211
Title: Anthropology of Money

Description:
We will explore the history and theory of money – what it represents, how it circulates, the meanings it carries, its contemporary transformations – not only in the West but also in the global south. Some of the topics to be considered include shell currencies, gift economies, Ponzi schemes, paperless money, derivatives and futures, hedge funds, and global debt.

AAAS213 - Global Brazil

Subject: AAAS
Catalog Number: 213
Title: Global Brazil

Description:
Analysis of Brazilian history and culture from 1500 to the present in transnational context, with an emphasis on themes like slavery and race, regional cleavages, authoritarian rule, social inequality, and innovative attempts to expand democracy. Facilitates broad-based knowledge of a country of increasing global economic and diplomatic clout. Close examination of primary sources, including texts, images, music, and film.
Description
Explores the history of modern South Africa from the beginning of the mineral revolution in the 1860s to the post-apartheid present. We will cover mining-centered industrialization, the emergence of Afrikaner and African nationalism, segregationist ideology, and the construction of apartheid. We will examine the plethora of anti-apartheid struggles, and the regional and wide-ranging global efforts to end apartheid and usher in democracy. The establishment and promise of multi-party democracy, the AIDS epidemic, and the reemergence of social movements are all topics we will consider and we will conclude by reflecting on the place of South Africa as a regional, continental, and world power.

Description
Atlantic slave systems were gendered systems. Across lines of nation and empire, African-descended women and their reproductive labor were crucial to the formation of New World slave systems and the racial ideology that underwrote them. The study of gender is therefore critical in understanding slavery in the Americas. This course analyzes slave systems in North America, Latin America, and the Caribbean. Our aim will be to explore major points of emphasis in the histories of gender and slavery in these diverse locales. For their final project, students will have the opportunity to engage an area of this historiography more deeply in the form of a paper on a topic of their choosing.

Description
The development of the slave trade from the fifteenth century to its abolition in the nineteenth century; organization and mechanics, impact on Europe, Africa, and the Americas.

Description
The Caribbean region from the arrival of Columbus (1492) to the emergence of sugar and slavery as powerful shapers of society and culture, by 1700.

Description
The development of Caribbean society and economy in the contexts of slavery, empire, international rivalry, and democratic revolution.

Description
Lecture and dance laboratory exploring three West African traditional dance forms and their relationship to religious and social life in Africa and the Diaspora. Continuity and transformation of physical texts as cultural heritage, examined historically and aesthetically. Guest lecturers, videos, research project. Two lab sections, one for students with prior training in African Dance, and one for students with no experience.
AAAS221SL - Capoeira: Practice and Culture

Subject: AAAS  
Catalog Number: 221SL  
Title: Capoeira: Practice and Culture

Description
Lecture/lab course introducing the movement, music and culture of capoeira, an Afro-Brazilian martial art that combines dance, self-defense and acrobatics. Created by male African slaves in Brazil several hundred years ago, viewed as a social threat and outlawed in the 19th century, celebrated as an element of national identity in the 20th century, today capoeira is rapidly crossing national, racial and gender borders as it becomes a popular global practice. Studio classes twice a week focus on the basic movements, percussive music and call-and-response singing. Seminar once a week focuses on the historical, cultural and socio-political dynamics that shape capoeira in Brazil and beyond.

AAAS224 - African Diaspora Literature: Twentieth- and Twenty-First-Century Black Writers

Subject: AAAS  
Catalog Number: 224  
Title: African Diaspora Literature: Twentieth- and Twenty-First-Century Black Writers

Description
Late-nineteenth-century to contemporary writers, including African American, Caribbean, and African authors. Satisfies the Area III requirement for English majors.

AAAS225S - Documenting Black Experiences

Subject: AAAS  
Catalog Number: 225S  
Title: Documenting Black Experiences

Description
Explores how Black experiences have been documented and how crucial stories woven from real life get told. Students engage wide ranging contemporary and historical materials, including nonfiction, memoir, fiction, documentary and dramatic film, theater, poetry and music. Our aspirations are historical, but with an understanding that academic history, though irreplaceable, barely touches the range of storytelling that makes Black lives not only matter but transform the spaces in which they unfold. Our explorations are political, but in the largest sense—how Black power comes from making higher truth a tool, a weapon and a way of being.

AAAS226 - Crime and the City from Dickens to The Wire

Subject: AAAS  
Catalog Number: 226  
Title: Crime and the City from Dickens to The Wire

Description
Compares representation of crime and the city in two key 'texts': Charles Dickens’s ‘Oliver Twist’ and the HBO television series, ‘The Wire.’ Juxtaposes the social and political contexts to which each text refers, paying particular attention to the nature and causes of criminal activity therein. Explanations emphasizing individual or personal responsibility will be contrasted to those that take structural factors into account, including urban housing, public health, child labor, public education, poverty and its relief, urban governance, as well as the criminal justice system.
### AAAS227 - African American Art
- **Subject**: AAAS
- **Catalog Number**: 227
- **Title**: African American Art

**Description**
Emphasis on works derived from an Afro-United States cultural perspective. Major figures include Henry Ossawa Tanner, Aaron Douglas, Jacob Lawrence, Charles White, Elizabeth Catlett, Romare Bearden, Lois Mailou Jones, and others.

### AAAS228S - Fictions That Mark the Moment
- **Subject**: AAAS
- **Catalog Number**: 228S
- **Title**: Fictions That Mark the Moment

**Description**
Course is an engagement with novels from spectacular moments of history, an imagination of the future, a response to narrative conventions of realism and thinking with and against the grain of social understandings. Look at examples of historical, speculative, postcolonial, experimental, science, magical realist fictions and theoretical work. Will consider the means by which narratives produce or rely on ethical beliefs and arguments within the specific of their world-making as well as the ethical problems presented by relations of power within the particular histories of the texts' various moments.

### AAAS229S - Performing African Diaspora
- **Subject**: AAAS
- **Catalog Number**: 229S
- **Title**: Performing African Diaspora

**Description**
The Black cultural contributions of globally popular performance genres such as salsa, capoeira and kizomba often remain unrecognized. The objectives of this class are: 1) to understand the historical, cultural and political forces that created the African Diaspora and its rich tapestry of dances. 2) to question our assumptions that knowledge is only produced through the mind; knowledge is also produced and transmitted through moving bodies. To meet these objectives, the course will be a combination of seminar and studio: in seminar we will engage readings in anthropology, dance and performances studies about specific dances which we will then learn in studio.

### AAAS230 - The South in Black and White
- **Subject**: AAAS
- **Catalog Number**: 230
- **Title**: The South in Black and White

**Description**
Focus on present-day and historical documentary traditions in American South, with an emphasis on call and response between black and white cultures. The arts and humanities as embedded in particular histories and cultures found in the South, and as performed in music and theater; and portrayed in documentary films, civil rights photography, Southern literature, and historical and autobiographical writing. Includes historical texts, oral histories and testimonies of living persons, along with documentary films, photographs, and writings from people in Durham and elsewhere in the region.

### AAAS230S - The South in Black and White
- **Subject**: AAAS
- **Catalog Number**: 230S
- **Title**: The South in Black and White

**Description**
Seminar with focus on present-day and historical documentary traditions in American South, with an emphasis on call and response between black and white cultures. The arts and humanities as embedded in particular histories and cultures found in the South, and as performed in music and theater; and portrayed in documentary films, civil rights photography, Southern literature, and historical and autobiographical writing. Includes historical texts, oral histories and testimonies of living persons, along with documentary films, photographs, and writings from people in Durham and elsewhere in the region.

### AAAS232 - Race, Power, and Identity: From Ali to Kaepernick
- **Subject**: AAAS
- **Catalog Number**: 232
- **Title**: Race, Power, and Identity: From Ali to Kaepernick

**Description**
Exploration of historic and contemporary psycho-social and socio-cultural aspects of the African American sport experience. Examination of research that addresses the effect of physical differences, racial stereotyping, identity development, gender issues, and social influences on African American sport participation patterns. Analysis of sport as a microcosm of society with an emphasis on examining associated educational and societal issues.

**Description for AAAS239 - Racial Attitudes, Racial Prejudice, and Racial Politics**
Course delves into work from sociology, social psychology, and political science to explore the development of racial attitudes, stereotypes, and prejudice. Consideration of the way race matters for attitudes and behavior among all racial and ethnic group members and how racial attitudes have changed over time, corresponding to massive social, legal, and political changes in the United States. Examines how individual racial attitudes affect political outcomes, how they relate to individual political preferences, and how they have influenced voting behavior historically and in the present day. Not open to students who have taken Political Science 172FS.

**Description for AAAS240 - The Modern Caribbean after Emancipation**
Focus on the Caribbean region as it transitioned from a collection of slave and colonial societies into a region of postcolonial and independent nations. Topics may include: postemancipation political and cultural struggles, pan-Africanism and Rastafarianism, nationalist and anticolonial movements, American economic and political influence in the region, Caribbean emigration to Europe and the United States, and global spread of Caribbean culture.

**Description for AAAS242S - Race, Gender, and Sexuality**
Gender's relationship to race and sexuality explored through a variety of issues, including health, intimacy, family, the state, economic practices, transnational communities and identities, and social movement.

**Description for AAAS243 - The Civil Rights Movement**
An interdisciplinary examination of the civil rights movement from World War II through the late 1960s.

**Description for AAAS246 - Sociology of Racism in America**
Examines social history of major racial groups in the US and relationships to contemporary standing. Discusses central concepts sociologists use to analyze racial matters. Central theme: 'racism' is not mere 'prejudice,' 'ignorance,' or 'intolerance,' but a comprehensive historical system of racial domination organized around the logic of white supremacy. Discussion of 'whiteness' in the USA—how whiteness emerged as a social category, an identity based on experiences of variety of European 'peoples;' how it dominated the racial structure of the US since the 17th century, how wealth has been distributed along racial lines, racialization of Asians and Latinos, and color blind racism.

**Description for AAAS247S - Social Movements and Social Media**
Examines uses and abuses of social media by social movements. Interested in a broader historical study of mediating technologies and oppositional public sphere, course considers the uses of cameras, phones, cassette players, radio, and social media platforms, but also books, bodies, art, fashion, and automobiles as oppositional technologies. Studies political and ethical uses of technologies in social unrest. Investigates impact of technologies on social movements and social transformations in contemporary history. Student driven case studies will highlight contemporary engagement with social media by networked social movements.
AAAS248 - Hip Hop and Religion
Subject: AAAS
Catalog Number: 248
Title: Hip Hop and Religion
Description: For many people, hip-hop and religion are incompatible. Hip-hop seems to be defined by materialism, arrogance, violence, misogyny, and a general rejection of sacred ideals and values. In this course, we will challenge these assumptions by exploring the intersections between hip hop and religion, while questioning what these terms mean and signify. We will examine aspects of hip-hop (rap lyrics, video images, cultural rituals, films) that explicitly or implicitly express religious commitments and sensibilities.

AAAS249 - Martin Luther King and the Prophetic Tradition
Subject: AAAS
Catalog Number: 249
Title: Martin Luther King and the Prophetic Tradition
Description: Situates Martin Luther King as a preacher in the black Christian tradition with a liberationist reading. Traces the movement from civil rights to opposition to economic injustice, war, and militarism. Analyzes what the prophetic voices of today have to say about issues of poverty, racism, environmental destruction, militarism, homophobia, drones, sexism.

AAAS250FS - Global 'Mixed Race' Studies
Subject: AAAS
Catalog Number: 250FS
Title: Global 'Mixed Race' Studies
Description: By exploring pioneering and controversial writings from both the social and the biological sciences as well as the humanities, this course will situate debates on 'race', 'mixed race' and social hierarchies within broader global, comparative, and historical contexts. These comparative examples shed light on the different social, social, and historical meanings attached to 'race' and 'mixed race' and address social and cultural variations in the symbolic rules which determine the social status of 'mixed race' communities. Open only to students in the Focus Program.

AAAS251 - The Anthropology of Race
Subject: AAAS
Catalog Number: 251
Title: The Anthropology of Race
Description: Human variation and the historical development of concepts of race; science and scientific racism; folk-concepts of race; and the political and economic causes of racism; ethics of racism.

AAAS252S - Giants of Jazz: A Journey into the Lives and Music of the Masters of Jazz Music
Subject: AAAS
Catalog Number: 252S
Title: Giants of Jazz: A Journey into the Lives and Music of the Masters of Jazz Music
Description: In the Giants of Jazz Seminar, students will delve deeply into the music and lives of the biggest names in Jazz. Miles Davis, John Coltrane, Charlie Parker, Duke Ellington, Art Blakey and Cannonball Adderly (to name a few) are among those who created various levels of the art form known as jazz, and this course allows students a unique opportunity to get down and dirty with the music and blueprint they left for the world to enjoy. This highly interactive course engages students with the Professor, and its a fun and exciting way to get up close and personal with some of the greatest music and musicians of all time.

AAAS253S - Independent African American Cinema
Subject: AAAS
Catalog Number: 253S
Title: Independent African American Cinema
Description: Independent African American Independent cinema from the silent film era to the present. Perspectives on issues of politics, representation, cultural identity, marginality and difference in contemporary American society. Focus on independent directorial figures and their intervention through genres, historical movements, and modes of production to examine how innovation helps define African American cinema's rich past and possibilities as well as key shifts in the larger social contexts of race, gender, and class in the United States.

<tr>
<td>AAAS</td>
<td>256</td>
<td>Race in the 20th Century U.S.</td>
<td>Increasingly, our world today acknowledges that race is less about biological features and more about social rules and ideas. So why does race remain so important in the twenty-first century? This course combines ideas from history, public policy, sociology, and political science to examine how ideas of race have changed over from 1877, following the end of Reconstruction, to the present. While we might think of ideas like 'white,' 'Black,' 'Asian American,' or 'Hispanic' as concrete, easily definable categories, all of these categories and their social impact changed significantly over the course of a century.</td>

AAAS265S - Representing Breast Cancer: Feminist Literature, Art, and Film

Description
Analyzes representations of breast cancer in feminist literature, art, and film. Drawing on health feminism, feminist medical ethics, and disability studies, explores what those representations tell us about the intersections among gender, race, class, sexuality, and ability in both the Global North and South. Sets artistic representations of breast cancer against the hyper-sexualization of breasts in capitalism's visual cultures and the spectacles of breast cancer activism. Shows how literature, art, and film can reveal health care's material conditions as well as breast cancer's psychic complexities.

AAAS269 - Black Gods and Monarchs: Priests and Practices of the Afro-Atlantic Religions

Description
Surveys the spiritual, political and economic experience of those who worship African gods—West and Central Africans, Cubans, Brazilians, Haitians, and North Americans. The gods as sources of power, organization and healing amidst local political dominance of Muslims and Christians and seismic expansion of international capitalism. West African Yoruba religion, West-Central African Kongo religion, Brazilian Candomblé and Umbanda, Cuban Santería and Palo Mayombe, Haitian Vodou, and African American Pentecostalism are examined as belief systems, and contextualized to the trans-Atlantic slave trade, long-distance commerce and pilgrimage by free people.

AAAS270S - Religion in Black America

Description
Seminar version of Religion 236.

AAAS274S - Islam in the Americas

Description
Explores how Muslim communities live and practice Islam in the American context. Examines diverse Muslim communities emerging from transatlantic exploration, trade in slaves, and migration as well as indigenous conversion. Discussion of religious and cultural identities of American Muslim peoples and consideration of questions of communal organization, religious authority, gender dynamics, youth culture, political and civic engagement, as well as American Muslim comedy and entertainment. Examination of impact of 9/11 upon American Muslims, their responses to the tragedy, and Americans' shifting perceptions of Islam and Muslims.

AAAS276 - Religion and Race

Description
Discussion of various ways in which 'race' has been defined and constructed in recent centuries using categories from biology, sociology, philosophy, genetics, anthropology, etc. Examines how religious traditions and practitioners have actively sought both to eliminate race and have been complicit in maintaining and defending it. Special focus on Judaism, Christianity, and Islam in the modern period.

AAAS276S - Religion and Race

Description
Seminar version of Religion 276.
AAAS283S - Death, Burial, and Justice in the Americas

Subject: AAAS
Catalog Number: 283S
Title: Death, Burial, and Justice in the Americas

Description:
This interdisciplinary course explores the phenomenon of necroviolence: attacks on the dignity, integrity, and memory of the dead. Cases come from the United States, Latin America, and Canada. Topics include the rights of the dead, cultural attitudes towards the dead, and the 'ambiguous loss' experienced by loved ones of the disappeared. We also explore the activism of family members, volunteer cemetery reclamation groups, and forensic scientists who exhume mass graves to identify bodies. Students will interact with guest speakers, spend time in a local African American cemetery with ties to Duke, and do community work and research on behalf of the marginalized dead.

AAAS285S - Nigeria: A Modern History

Subject: AAAS
Catalog Number: 285S
Title: Nigeria: A Modern History

Description:
Nigeria is Africa's largest country by population, its largest economy, and one of the most diverse nation-states in the contemporary world. It is also a place of considerable poverty, wealth disparity, and political discord. How did Nigeria become this country of superlatives, good and bad? This course examines Nigeria's history over the last two centuries—a period encompassing the Atlantic trade in enslaved Africans, British colonial rule, the era of decolonization, and the recent histories of military rule and democracy. Along the way, we will consider Nigeria's place in the broader history of modern Africa.

AAAS286S - Critical Pedagogy of Hip Hop

Subject: AAAS
Catalog Number: 286S
Title: Critical Pedagogy of Hip Hop

Description:
This course examines the role of critical pedagogy in developing learning environments that engage and empower youth. Emphasis is placed on the context of Hip Hop as a foundation for instructional decision-making and social justice advocacy/activism. Students will explore the historical and socio-cultural foundations of education initiatives, teaching and learning strategies, federal and state mandates and educational policy issues that contribute to marginalization. Innovations, interdisciplinary collaboration and community programs designed to strengthen schools and communities will be highlighted.

AAAS288 - History of Inequality

Subject: AAAS
Catalog Number: 288
Title: History of Inequality

Description:
This course familiarizes students with the field of Inequality Studies through examination of the causes and consequences of social inequality throughout history. It addresses theories of group and sub-group social stratification and ways that disparity operates across multiple axes of stigmatized identities. This is a required course for the minor in Inequality Studies.

AAAS290 - Special Topics

Subject: AAAS
Catalog Number: 290
Title: Special Topics

**Description**
Course focuses on the evolution, nature, and role of African-Americans within the American political system. The concern is with African Americans as actors, creators and initiators in the political process. Beginning with an exploration of the historical antecedents of blackness in America, we will explore how the black experience in America has shaped the American political system (specifically public opinion, political institutions, political behavior, and salient public policy debates) and how black Americans have come to understand their position within the American political system.
**AAAS306 - Africa and Arabia: Cultures, Communities, and Connections**

**Subject**
AAAS

**Catalog Number**
306

**Title**
Africa and Arabia: Cultures, Communities, and Connections

**Description**
Explores communities, cultures, and connections between Africa and Arabia; Provides concepts and theories on human mobility and interconnectedness in the contexts of the two regional; Examines displacement, migration within and emigration from the two regions, and areas of collaboration and contention in the globalized world; Examines themes of religious terrorism, language, music, and narratives against European colonialism; Explores different intellectual platforms such as political biographies, films, guest experts etc; Interview partners in Egypt, Morocco and Senegal on related intercultural issues and politics.

**AAAS307 - Development and Africa**

**Subject**
AAAS

**Catalog Number**
307

**Title**
Development and Africa

**Description**
Addresses the vexed issue of economic development in Africa - its many failures, its occasional successes - from the early colonial period to the present. Focuses especially on the transition from the 1960s 'modernizing' moment to the millennium projects and humanitarian aid of the present. Will read the works of development experts, World Bank executives, anthropologists and historians, asking why this massively financed project has experienced such failure and exploring what can be done.

**AAAS310S - Conflict Analysis in Africa (Case Studies)**

**Subject**
AAAS

**Catalog Number**
310S

**Title**
Conflict Analysis in Africa (Case Studies)

**Description**
Utilizes four case studies to outline components of conflict analysis in Africa. Examines regional crisis nexus between Darfur, Chad and Central African Republic. Looks at issues of postcoloniality, autochthony, migration, citizenship, land tenure, and inequality. On a theoretical level, identifies potentially crosscutting, deeper layers of contemporary crises in Africa with the objective of establishing a series of templates, a 'protocol', for comparative conflict analysis and conflict management in Africa.

**AAAS312 - War and Public Health in Africa**

**Subject**
AAAS

**Catalog Number**
312

**Title**
War and Public Health in Africa

**Description**
An inquiry into the nature of contemporary war in sub-Saharan Africa and its human cost. Uses public health as a parameter to assess the impact of organized collective violence on people's lives. Link between war and public health established and measured with respect to civilian deaths, gender based violence, physical and psychological trauma, mental disorders, malnutrition and famine, and the spread of epidemic diseases, inter alia HIV/AIDS. Special attention is paid to rape as 'a weapon of war', to the trafficking of human beings in war zones, the child soldier phenomenon, and to death counts as a vector of humanitarian or political advocacy.
AAAS314 - Representing Slavery
Subject: AAAS  
Catalog Number: 314  
Title: Representing Slavery  
Description: Examines representations of the Atlantic slave trade in scholarship, literature, film, popular culture, and local site visits. We will examine portrayals of people who were enslaved, people who enslaved, as well as the nature of capture, the Middle Passage, and plantation life. We will also explore contemporary commemorations of the slave trade within museums, and the political mobilization of this history within the reparations movement. Through an examination of these materials, we will ask 'why represent slavery?' and 'what is at stake when representing slavery?'

AAAS316S - Apartheid South Africa and Struggles for Democracy
Subject: AAAS  
Catalog Number: 316S  
Title: Apartheid South Africa and Struggles for Democracy  
Description: Working through an array of diverse organizations – including the African National Congress, the Pan African Congress, the Black Consciousness Movement, a host of liberal organizations, the churches, the trade union federations, and countless more - South Africans fought against apartheid from its inception. In 1994 they achieved a multi-racial democracy led by President Nelson Mandela. This seminar explores key themes in post-World War II South African history, paying special attention to the plethora of anti-apartheid struggles, while analyzing the tenets of apartheid policies.

AAAS317S - Africa before Colonialism
Subject: AAAS  
Catalog Number: 317S  
Title: Africa before Colonialism  
Description: This undergraduate seminar considers the history of Africa south of the Sahara from the beginning of the Holocene era to 1800, focusing on processes of community formation and political and social change. Using a variety of sources and methods, it traces major debates and themes in the ‘deep’ African past across a number of regions and time periods. These themes include state formation, the dynamic reproduction of social structures through migration, the political meanings of health and healing, the development of ideas about gender, the relationship between Islam and Christianity and other cosmologies, and Africa’s interaction with the wider world.

AAAS318SA - New York Scenes
Subject: AAAS  
Catalog Number: 318SA  
Title: New York Scenes  
Description: New York Scenes will focus on the various cultural institutions, scenes, establishments, happenings, hang-outs, movements, etc., that make up New York City. Early in the semester, students will select a particular ‘scene’ to research over the course of the term. For example: Tin Pan Alley (popular music, theater), The Lafayette Theatre (black arts), St. Mark’s Church (poetry, punk rock), the Chelsea Hotel (mid-century writers, pop stars and outcasts), La MaMa (experimental theater), the Christopher Street Piers (queer history, lgbtq youth) and Union Square Park (leftist organizing history). Open to students in the Duke in New York program.

AAAS319 - East Africa and the World
Subject: AAAS  
Catalog Number: 319  
Title: East Africa and the World  
Description: An interconnected history of East Africa and the many places linked to the region by trade, migration, and politics. Using archival, oral, and artistic source materials, considers how East Africans’ lives have been shaped by mobility, from the dhows of the Indian Ocean, to the commercial hustle of contemporary Guangzhou and Dubai. Analyzes how ideas about race, class, gender, and sex changed over time in this complex setting.

AAAS320 - Black Dance
Subject: AAAS  
Catalog Number: 320  
Title: Black Dance  
Description: Exploration of composition and performance structures commonly described as black dance. Working with cultural criticism contemporary with emergent modes of black dance, assesses political motivations and aesthetic strategies of artists and writers working explicitly in this idiom. Considers possibility of black dance performed by people of First World, European, and Asian descent. Examines concert dance, social dance, religious dance.

<td>Visualizing the Caribbean</td>
</tr>
</tbody>
</table>

**Description**

Art (paintings, installations, performance art) and film on the Caribbean offer vantage points for analyzing alternative ways through which the region has been thought, imagined and produced. They are periodized semiotic productions that feed into and are marked by perspectives that are at once global, national, and even personal. Considering the constitutive contexts of these productions and performances, we will attempt to glean the diverse perspectives, and the way these have influenced sociocultural policy and offer alternative interpretations of diasporic lifeways of Caribbean people.

**Description**

This course will examine the novels and essays of James Baldwin and Toni Morrison, focusing on a range of topics: blackness, gender, sexuality, the relationship between race, religion, and nation, and the relationship between anguish and hope. While considering the differences between these authors, we will explore how Baldwin and Morrison converge on a set of ethical and existential themes and concerns. In particular, the course will focus on a shared ‘ethics of haunting,’ a sense that a better future relies on our capacity to remember, mourn, and be unsettled by forms of racial and gendered violence that mark the past and present.

### AAAS332 - Black Theater Workshop

**Description**
Explore race and culture in America through texts of Black playwrights. Scene study by racially diverse class to engender feedback process. Juxtaposition of playwright's race to societal standards of universal content; relevance of actor's race to playwright's intent; historical context of Black Arts 'militant' plays of the 1960s-70s. Workshop culminates in public performance.

### AAAS335 - The History of Hip-Hop

**Description**
What began as a localized activity designed to provide a safe haven for Black and Latino youth in New York City, has become a global brand that has had a documented impact on the cultural, political and economic realities of youth throughout the globe. This course will examine the organic social and cultural foundations of hip-hop, as well as the key aesthetic innovators/innovations, and the debates that have arisen over hip-hop's increased influence.

### AAAS336 - The Black Performance Tradition: Michael Jackson and Prince

**Description**
Examines the Black Performance context that produced Jackson's singular creative genius within the realms of music, movement and politics, including the influence of Black vernacular practices like signifying and sampling, the network of Black social spaces known as the Chitlin' Circuit, the impact of Black migration patterns to urban spaces in the Midwest, and Black performance traditions including Blackface minstrelsy.

### AAAS337 - Hollywood and Africa: Case Studies in Filmic Representation

**Description**
This course on Hollywood films about Africa—from classics such as 'African Queen' (East Africa), 'Tarzan' (Equatorial Africa) and 'Out of Africa' (Kenya) to recent productions such as 'Blood Diamond' (Sierra Leone), 'The Last King of Scotland' (Uganda), 'Lord of War' (arms trade), 'The Constant Gardener' (Kenya) and 'Black Hawk Down' (Somalia)—will tack back and forth between filmic representation and case study, using the latter to critique the former. As contrastive material, the class will also draw on non-Hollywood films about Africa, for example 'Hotel Rwanda' (Rwanda) or 'Lumumba' (DRC).

### AAAS338 - Popular Representations of Black Masculinity

**Description**
The course will examine the production and circulation of representations of 'Black Masculinity' in post-19th century American culture, within popular realms of expression including film, visual culture, music videos, advertising, popular music, television, drama and stage, literature, and dance/performance. The course will also explore the ways stereotypical images of Black masculinity have impacted public policy perceptions of African Americans and the ways that Black cultural producers have used Black masculinity as sites to stage alternative perceptions of Black humanity.

### AAAS339S - Women and Film: Directors of the Diaspora

**Description**
Black women filmmakers have been actively involved in filmmaking since the early 20th century, and occupy notable positions in the 21st century media environment. Artists such as Ava Duvernay and Julie Dash demand critical attention to black women film and video artists. Films made by Black women are constructed in a variety of forms, such as animation, documentary, experimental, and narrative. These works bring a unique perspective to the screen. This course will give students an opportunity to view films, examine the specifics of film/video production in general, compare the various works produced by women direc, and acquire the skills necessary for film/video cultural criticism.
### AAAS342 - The Civil War and Reconstruction: The United States, 1850-1880

**Description**
The social, economic, and cultural aspects of the Civil War's origins and outcomes as well as the resulting military, political, and legal conflicts. Focus on the contested and changing meanings of 'freedom' in all sections of the country.

### AAAS343 - Displacements: Migration and Human Trafficking

**Description**
Examination of the meaning of migration in the global world through cross-disciplinary texts and visual media. Situates the phenomenon of human trafficking within the context of these general movements focusing on the risks involved when people endanger their lives to find a better and more strategic position in the world. Explores how these experiences should be interpreted, and how processes and the politics of race, space and place are a condition and/or outcome of these movements. Investigates and considers ways to resolve some of the problems associated with such movements.

### AAAS345 - African Americans, Mass Incarceration and Citizenship

**Description**
Explores in depth the presence of African Americans within the phenomenon of U.S. mass incarceration and its implications for notions of citizenship. Surveys the history of prison build-up resulting from legislation and policy over the past forty years including the governmental discussions of drug policy and welfare reform that disproportionately affected African Americans. Course will explore definitions of citizenship and the means by which African American citizens were and are both included in and excluded from participation in the movement toward mass incarceration as part of their changing position in the U.S. polity.

### AAAS346S - Racial Justice in the 20th Century US and South Africa

**Description**
This course uses a comparative framework to assess race in two societies founded on premises of racial inequality: South Africa and the United States. We will explore some of the social, cultural and political exchanges that have taken place between African Americans and Black South Africans over the course of the twentieth century. Additional topics include segregation, twentieth century struggles for civil rights/liberation, the American anti-apartheid movement, and the possibilities for restitution.
### AAAS347S - White People: In Anthropological Perspective

**Description**
Against the cross-cultural backdrop of other systems of hereditary privilege and of the political and economic changes that threaten them, we will examine the history, the ideologies, and the psychology of white supremacy in the United States. It will be our task to understand both the insiders’ point of view and its social context, which includes the mid-20th-century civil rights reforms, affirmative action, neoliberalism, and the progressive erosion of white monopolies on honor, voting rights, due process, a living wage, and upward mobility in US society.

### AAAS348 - African Art: From Royal Court to Contemporary Marketplace

**Description**
Explores traditional, modern, and contemporary African art from the ever-shifting perspectives of prestige, power, and identity. The conceptual framework guiding this survey is both a broad introduction to the major artists and artworks of Africa across millennia, as well as probing specific questions about the changing definitions of African art, individual versus state identities in African art, and the impact of religion, colonization, and trade/commerce on African art.

### AAAS349S - Contemporary South Africa

**Description**
Nelson Mandela’s presidency in 1994 inaugurated democracy in South Africa. Using a historical lens, this course will explore the promises, possibilities, and disappointments of the democratic era. In what ways has the 1994 election slogan ‘A better life for all’ come to pass? Why and in what ways has the new political elite fallen short in delivering on its promises? How have segments of the public sought to impose accountability and restitution on new democratic governments, as well as on the long-standing titans of industry?

### AAAS352 - Pigging Out: The Cultural Politics of Food

**Description**
Examines cultural influences of food while linking class, geography, and ethnicity to food practices. Investigates link between overeating and cheap food, under-eating and expensive food; discrepancy between cost and quality; changing diets in US and elsewhere; current debates regarding food production, specifically in the U.S., Americas, Africa and Asia. Discussion of Cargill companies’ restrictions on spread of their hybrid grains; questionable agricultural practices, e.g. animal cruelty, overuse of pesticides, condition of migrants. Environmental policies examined in relation to pursuit of such industrial agricultural practices. Will include hands-on experiments with food preparation and tasting.
AAAS354S - Race and Society: South Africa and the US, 1890-present

Subject: AAAS  
Catalog Number: 354S  
Title: Race and Society: South Africa and the US, 1890-present

Description:
Scholars, pundits and historical actors have long drawn parallels between the United States & South Africa-two countries founded on the premises of racial inequality. This course explores the machinations of race from the quickening of industrial development to present. We will consider the benefits and pitfalls of thinking comparatively. Topics include segregation, transatlantic cultural exchanges, living apartheid and Jim Crow, government surveillance of political opponents, the American anti-apartheid movement, mass incarceration and privatization of prisons, memory and the struggles for social change as well as the persistence of racial inequality in two country's contemporary societies.

AAAS355S - Black Feminism and Fashion

Subject: AAAS  
Catalog Number: 355S  
Title: Black Feminism and Fashion

Description:
Black feminist perspectives on clothing and fashion. Explores traditions in which Black artists and writers make clothing a primary theme. Presenting photographic, painted, and literary portrayals by and of Black people across the diaspora, and bringing together the study of visual culture, material culture, and literary studies, reveals fashion and clothing as aesthetic practices of everyday life that defy the objectifying effects of racism and sexism. Engages with scholarship that explores slavery's and colonialism's impact on gender and sexuality and examines how artists and writers work within and against those impacts to document the self-fashioning in Black cultural life.

AAAS359S - Brazil and Lusophone Africa

Subject: AAAS  
Catalog Number: 359S  
Title: Brazil and Lusophone Africa

Description:
This seminar examines three historical components of the South Atlantic in terms of history, culture, and contemporary political and economic consequences. European colonialism in Africa and Brazil constitutes the baseline for this exploration, but the long and tardy nature of Portuguese colonialism in Africa in comparison with other European colonial powers, especially in its post-World War II manifestations, is our starting point. We will examine the last stages of Portuguese colonialism in Lusophone Africa, the African liberation movements and the efforts to forge new transnational relations among Portugal, Lusophone Africa and Brazil.

AAAS375S - The Insurgent South: Movements for Social Change

Subject: AAAS  
Catalog Number: 375S  
Title: The Insurgent South: Movements for Social Change

Description:
Social movements in the South from Reconstruction to the present. Includes Populism, Women's Suffrage, the Interracial Movement, labor, civil rights, post-1960s conservatism, environmental justice, and LGBTQ activism. Attention to public policy positions espoused by social movement organizations and activists.
### AAAS376S - Love, Sex, Madness in Caribbean Fiction and Film

**Subject** | **Catalog Number** | **Title**
--- | --- | ---
AAAS | 376S | Love, Sex, Madness in Caribbean Fiction and Film

**Description**
This course explores the themes of love, sex, and madness as the lenses through which Caribbean writers and filmmakers have challenged traditional ideas of citizenship, family, gender roles, and political power. What, for example, is the connection between a dictatorship in Haiti and women's sexual desire? How does the figure of 'the mad Creole woman' challenge masculinist constructions of national identity in the early years of independence in Africa? How might the love between a mother and child be read as an act of anti-colonial resistance? We will examine these questions through novels, short stories, and films. Recommended prerequisite: French 204 or equivalent.

### AAAS380 - France and Africa: The Politics and Culture of (Post-)Coloniality

**Subject** | **Catalog Number** | **Title**
--- | --- | ---
AAAS | 380 | France and Africa: The Politics and Culture of (Post-)Coloniality

**Description**
Examination of the Franco-African relationship over time, from the four 'communes' in Senegal to the present, through a political but also broader cultural lens. France's colonial doctrine and practices, African resistance and collaboration, 'la francophonie' and the postcolonial 'Françafrique' are analyzed as well as collective imaginaries on either side and how they shaped each other in literature, film, the social sciences or everyday life. The course is taught in English but a preceptorial class in French is offered in addition so that students can meet the requirement for their major or minor in French. Newcomers to Africa are welcome.

### AAAS380P - France and Africa: The Politics and Culture of (Post-)Coloniality Preceptorial

**Subject** | **Catalog Number** | **Title**
--- | --- | ---
AAAS | 380P | France and Africa: The Politics and Culture of (Post-)Coloniality Preceptorial

**Description**
A preceptorial, in French, requiring concurrent enrollment in African & African American Studies 380 or Romance Studies 380. Course counts toward the language requirement for the French major or minor if student enrolls in the preceptorial. Students need to have the proficiency to partake in discussions in French in the preceptorial, as well as to complete their readings and their final paper in African & African American Studies 380 or Romance Studies 380 in French. Further information available from instructor.

### AAAS385S - Race, Gender and Culture of the African Diaspora

**Subject** | **Catalog Number** | **Title**
--- | --- | ---
AAAS | 385S | Race, Gender and Culture of the African Diaspora

**Description**
Course reveals the diversity of black life in the Americas, Europe, and the Middle East through film and classical and contemporary ethnographies by the likes of W. E. B. DuBois, Zora Neale Hurston, Fernando Ortiz, and others. Examines diverse analytical tropes that illuminate how cultures and communities reproduce themselves amid exploitation and stigma.
### AAAS386S - Women and Visual Media Studies

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
AAAS | 386S | Women and Visual Media Studies  

**Description**  
This course explores visual media by women artists, as well as the production, circulation, and reception of visual culture about the idea of ‘woman.’ Drawing on feminist scholarship across disciplines, students will examine representation, spectatorship, power, beauty, and sex. We will explore work by popular icon Beyoncé, artist Lorna Simpson, but also independent documentary films on relevant themes.

### AAAS387 - Moral Panics, Spectacle, and Everyday Life: Social Anxieties and Minorities

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
AAAS | 387 | Moral Panics, Spectacle, and Everyday Life: Social Anxieties and Minorities  

**Description**  
Moral panic refers to the way a social order becomes hyper aware of activities of groups, objects, or circumstances posing a menace to accepted values. Course explores how everyday life is managed, intensified, and altered by moral panics’ spectacle. Sexual deviance, drugs, popular culture, disease, witch hunts, gender fears, etc., are not only creations of pre-existing fears, they make various kinds of sense in specific moments. They are how people recognize themselves and new challenges to that self. From those challenges they try to police others; they are public consensus-building events and the means by which we identity our fears and desires.

### AAAS390 - Special Topics

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
AAAS | 390 | Special Topics  

**Description**  
Topics vary from semester to semester.

### AAAS390S - Special Topics

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
AAAS | 390S | Special Topics  

**Description**  
Seminar version of African & African American Studies 390. Topics vary from semester to semester.

### AAAS391 - Independent Study

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
AAAS | 391 | Independent Study  

**Description**  
Individual research and reading in a field of special interest, under the supervision of a faculty member, resulting in a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. Open to juniors and seniors. Consent of both instructor and director of undergraduate studies required.

### AAAS393 - Research Independent Study

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
AAAS | 393 | Research Independent Study  

**Description**  
Individual research in a field of special interest under the supervision of a faculty member, the central goal of which is a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. Open to juniors and seniors. Consent of instructor and director of undergraduate studies required.
### AAAS397S - African Cities, Development, and Climate Change

**Subject**
AAAS

**Catalog Number**
397S

**Title**
African Cities, Development, and Climate Change

**Description**
The displacement of sizeable urban populations as a consequence of climate change renders African cities sites of two contending conditions: the one is a prevailing sense of crisis; the other, in the form of a response, is to attend to the prevailing conditions of crisis. African cities are poised to mobilize not only extant forms of cultural ingenuity, but technological ingenuity too. Students will explore African city life from megalopolises like Cairo to threatened UNESCO world heritage sites like Saint-Louis, Senegal. The course reimagines terms such as 'development,' 'employment,' 'infrastructure,' 'sustainability,' and 'citizenship.'

### AAAS399 - Black Religion, Anguish, and Liberation

**Subject**
AAAS

**Catalog Number**
399

**Title**
Black Religion, Anguish, and Liberation

**Description**
In this course, we will study the relationship between race, religion, and politics in the context of black strivings for liberation in the Americas, the trans-Atlantic, and so forth. We will examine how struggles against anti-black violence have been inspired by criticisms and re-interpretations of prevailing religious ideas and practices in addition to the creation of new conceptions of the sacred. We will focus on two different contexts/movements – anti-slavery/abolitionist movements and mid 20th century black freedom/decolonial struggles —considering in each case how religion is both an object of critique and a source of empowerment, agency, and resistance.

### AAAS402S - South Africa and the World

**Subject**
AAAS

**Catalog Number**
402S

**Title**
South Africa and the World

**Description**
Throughout the 20th century, South Africa had the largest economy and military on the African continent. Its strategic geographic position and mineral wealth in gold and uranium made it an important ally for the largest economies in the world. The Cold War enhanced its significance. However, in the second half of the twentieth century, its policies of apartheid rendered it an international pariah. This course examines the ways in which countries, international institutions, and millions of 'ordinary' people shaped the course of South African history. How did South Africa interact with the broader world, and how did the world try to affect South Africa's policies of white supremacy?

### AAAS405S - Black Thought and Creativity to 1865

**Subject**
AAAS

**Catalog Number**
405S

**Title**
Black Thought and Creativity to 1865

**Description**
How did people of African descent express themselves in the context of slavery? What did they write about? What kinds of items did they create? This course will explore the cultural, intellectual, and aesthetic knowledge produced by people of African descent before 1865 and how these works continue to shape conceptions of liberation in contemporary Black life. Students will engage materials by Black thinkers, artists, activists, and critics, from the nineteenth to the twenty-first century, who use creativity to ruminate on freedom and black liberation in diverse media, including autobiography, painting, speech, photography, performance and food culture.
AAAS406S - South African Life Histories

Subject: AAAS  
Catalog Number: 406S  
Title: South African Life Histories

Description:
South Africa presented the world with one of the great moral challenges of the 20th century. We will explore its history through the lens of biography and autobiography. The country underwent major transformations -- rapid industrialization, segregation, the rise and fall of apartheid, and the emergence of democracy. How did individuals experience these social changes? In what ways do individual lives illuminate these larger social processes? Protagonists include a prophetess, political artists and writers, exiles, and celebrated figures. Topics cover how segregation and apartheid affected people’s daily lives, opposition to white supremacy, and the personal impact of the AIDS’s epidemic.

AAAS407S - Capstone Seminar - Globalization: Asia and Asian America

Subject: AAAS  
Catalog Number: 407S  
Title: Capstone Seminar - Globalization: Asia and Asian America

Description:
'Globalization': a shorthand for describing the period of extraordinary change that we are living through, our lives, and our worlds as defined by global connections, from the internet technologies and rapid mass communication to issues of mobilization for social justice. This course focuses on two main themes: global moments of common struggle against racism in Asian, Asian American, and African American contexts, and global manufacture and the ways in which the microprocessor chip technology has come to bind Asia, Africa, and America, with a special focus on women and Asian Americans in the IT sector.

AAAS408S - Capstone Seminar: Post-Civil Rights America: The Search for Social Justice, 1968-Present

Subject: AAAS  
Catalog Number: 408S  
Title: Capstone Seminar: Post-Civil Rights America: The Search for Social Justice, 1968-Present

Description:
Central outcomes of the Civil Rights Movement, 1968 to the present; critical reading and discussion, research and writing on racial and social equality and inequality in major areas of American life, notably electoral politics; education; religion and ethics; and public culture.

AAAS410S - Black Frame: African American Documentary Film

Subject: AAAS  
Catalog Number: 410S  
Title: Black Frame: African American Documentary Film

Description:
This course examines black documentary film by drawing on The Full Frame Archive Film Collection. The Full Frame Documentary Film Festival is the largest film festival in the United States entirely devoted to documentary film. Students enrolled in this class will read canonic texts on the black documentary film, study camera techniques, explore the history of the Full Frame Festival, critique the role of race in social justice filmmaking and interact with documentary filmmakers.

AAAS411D - Black (In) Translation

Subject: AAAS  
Catalog Number: 411D  
Title: Black (In) Translation

Description:
Examines the meanings of Blackness as it moves through the Atlantic world from 18th century to present. Readings explore theories of race and representation, and ways that translation conveys, shapes, and disrupts ideas about Blackness as cultural identity, lived experience, political claim. Course materials include works of literature, history, anthropology, and film. Taught in English, though, students enrolled under foreign language discussion sections will do reading, writing, research, and discussion in the language, requiring 2 years of foreign language study for language credit for the major or minor.

AAAS412S - Afro-Latin America

Subject: AAAS  
Catalog Number: 412S  
Title: Afro-Latin America

Description:
This course focuses on the position of Blacks in the national histories and societies of Latin America from slavery to the present day. Emphasis is on an interdisciplinary engagement with issues and critical discussion of national images contrasted with the realities of blackness. We will explore the connections between race, gender, sexuality, and representation in national and transnational encounters and the consequences of the migration of people and ideas within the hemisphere. Countries to be explored include Cuba, Brazil, the Dominican Republic, Puerto Rico, Argentina, Mexico, Haiti, and Peru.
AAAS419S - Meaning, Mattering, and Black Being-in-the-World: Towards a Critical Theory of Race and Value

**Subject**  | **Catalog Number**  | **Title**  
--- | --- | ---  
AAAS | 419S | Meaning, Mattering, and Black Being-in-the-World: Towards a Critical Theory of Race and Value

**Description**
This course interrogates the ways scholars in the social sciences and humanities have conceptualized and theorized value, and the curious absence of race/racism from this discourse. Drawing from scholarship in the fields of history, anthropology, African diaspora studies, and (ethno)musicology, students will develop a better understanding of the interrelationship between race and value and the distinct ways that race has been one of the most pervasive 'value regimes' in the making of the modern world. Topics include the transatlantic slave trade and plantation societies in the Americas; intersections of race with science and technology; and black radical politics and expressive culture.

AAAS420S - The Role of Race and Culture on Development

**Subject**  | **Catalog Number**  | **Title**  
--- | --- | ---  
AAAS | 420S | The Role of Race and Culture on Development

**Description**
Critical examination of racial, cultural, and social influences on development of African American children in the U.S. Traditional and nontraditional theoretical and empirical approaches; issues surrounding children's cognitive, language, and psychosocial development, plus educational attainment explored from a socio-cultural perspective. Includes discussion of racial stereotypes, familial interactions, social policy, the media, and peer groups. Prerequisites: Introductory Psych, Developmental, Human Development, Research Methods courses. Juniors and Seniors only.

AAAS422S - Music and the Black Radical Imagination

**Subject**  | **Catalog Number**  | **Title**  
--- | --- | ---  
AAAS | 422S | Music and The Black Radical Imagination

**Description**
This seminar introduces students to key texts on histories and theories of Black radicalism, and spotlights the role of the imagination and creativity within modern Black political struggles. Building on the foundational scholarship of Cedric Robinson, Robin D. G. Kelley, and others, students will investigate how the philosophical and ideological foundations of the Black Radical Tradition have been nurtured and transmitted across time and space as culture. Special emphasis will be placed on the study of sound, music, and performance as manifestations of the Black radical imagination, from the era of Atlantic slavery to the contemporary Black Lives Matter Movement.

AAAS425 - Global Inequality Research

**Subject**  | **Catalog Number**  | **Title**  
--- | --- | ---  
AAAS | 425 | Global Inequality Research

**Description**
Engagement of vertically integrated research teams in projects exploring racial and ethnic disparities exhibited and expressed in six arenas, employment, wealth, health, political participation, education, and arts and culture. Each team will produce a major paper that will qualify for submission to a refereed journal in the area (relevant to the focus of the study). Course is not open to students who have taken Public Policy 645 or 645S.
AAAS425S - Global Inequality Research Seminar

Subject: AAAS  
Catalog Number: 425S  
Title: Global Inequality Research Seminar

Description:
Engagement of vertically integrated research teams in projects exploring racial and ethnic disparities exhibited and expressed in six arenas: employment, wealth, health, political participation, education, and arts and culture. Each team will produce a major paper that will qualify for submission to a refereed journal in the area relevant to the focus of the study. Course is not open to students who have taken Public Policy 645S.

AAAS430 - Music History and Politics in Contemporary Africa

Subject: AAAS  
Catalog Number: 430  
Title: Music History and Politics in Contemporary Africa

Description:
The objective of the course is to analyze the social, political and cultural dynamics of post-independence African states through the musical archive. The course will analyze the role that music has played in the construction of national identities in post-colonial African states, but also in social, political and cultural dynamics of contemporary Africa. From High-life in Ghana to Congolese rumba, Afrobeat in Nigeria, reggae, Hip Hop and Rai, it will show how music has accompanied societal and political evolutions of African nations. The course will think of music as a landscape and analyze the musical circulation, as a space for the constitution of African societal modernities. In English.

AAAS450S - The Global Caribbean

Subject: AAAS  
Catalog Number: 450S  
Title: The Global Caribbean

Description:
The course introduces students to the Caribbean as a transnational space that reflects the global dynamics associated with flows of bodies via migration, labor, and goods all of which have undergirded the birth and evolution of the (primarily) Atlantic world economy. The Global Caribbean will have a historical sociological bent that frames the region as the first modern colonial space which has served as a template for other projects of colonial and postcolonial development elsewhere in the world. Emphasis will be on the way that freedoms and unfreedoms operate in the Caribbean and elsewhere. Discussions of how knowledge has conditioned the representation of the region will be entertained.

AAAS470S - Law and Power in Africa and the African Diaspora

Subject: AAAS  
Catalog Number: 470S  
Title: Law and Power in Africa and the African Diaspora

Description:
This course examines the history of law and politics in Africa and the African diaspora over the last two centuries. What role did law play in the colonization of Africa? In its liberation? How did law buttress or challenge ideas about race? How did people of African descent in the western hemisphere use law, and how did they find it used against them? What counts as a ‘legal’ institution, and who decides? Law can be a shield or a weapon, sometimes both at once. What it does depends on who is using it, and for what purpose. Readings will include history and legal philosophy. Students will use primary sources extensively, including court records.

**Title**
Introduction to Asian American and Diaspora Studies

**Description**
What does it mean to be Asian American? Asian American Studies is an interdisciplinary field that draws on social sciences, humanities, and the arts to explore the historical and contemporary experiences of Asian Americans in the western hemisphere. This course provides students with an introduction to this dynamic and growing field of study, taking race, gender, immigration, diaspora, class, labor, and sexuality as primary subjects of the field. The course also historicizes Asian American racialization to better understand the structural forces that have shaped Asian American lives and the ways that writers, scholars, and activists have responded to and resisted these forces.

**AADS205 - Introduction to Racial and Ethnic Minorities in American Politics**

**Subject**
AADS

**Catalog Number**
205

**Title**
Introduction to Racial and Ethnic Minorities in American Politics

**Description**
The politics of four of the United States principal racial minority groups—blacks, Latinos, Asians, and American Indians.

**AMES106FS - Documenting the Middle East: Community and Oral History**

**Subject** AMES  
**Catalog Number** 106FS  
**Title** Documenting the Middle East: Community and Oral History  

**Description**  
Studies the documentary record of the Middle East in photography, film, and oral history. From early studio photography to recent community and student production, considers documentary expression's meaning and function. Analyzes the role of digital humanities and social media in documentary research. Uses best practices of documentary work. Includes a service-learning, hands-on documentary component: recording diverse voices from Iraqi, Syrian, and Palestinian communities. Student-produced fieldwork from the class will be permanently housed at Duke's Archive of Documentary Arts. Open only to students in the Focus Program. Department consent required.

---

**AMES107 - Introduction to East Asian Cultures: Narrating East Asia through Word and Image**

**Subject** AMES  
**Catalog Number** 107  
**Title** Introduction to East Asian Cultures: Narrating East Asia through Word and Image  

**Description**  
The study of East Asia makes sense not necessarily as a study of shared canons or of 'civilizational origins' or, shared 'Asian values': rather, modern East Asia can be productively studied in terms of shared historical, political, cultural concerns; the influx of new ideologies; the processes of 'becoming modern'; and of course, the positioning of East Asian area studies in the academy and the larger world. In this introductory course, we will be looking at 'Global East Asia' and its diasporas through all manners of storytelling, focusing on word-image narratives: Asian traditions of manga, manhwa, manhua, as well as graphic novels.

---

**AMES108 - Intro to Middle East: History, Culture, Politics**

**Subject** AMES  
**Catalog Number** 108  
**Title** Intro to Middle East: History, Culture, Politics  

**Description**  
Introductory course for the study of the Middle East. Introduce both modern and medieval aspects of the Middle East, including but not limited to Arab, Turkish, and Iranian cultures of Middle East. No background necessary.

</table>
AMES142 - History of Chinese Medicine

Subject: AMES  
Catalog Number: 142  
Title: History of Chinese Medicine

Description:
This course introduces students to the history of medicine through the study of medical practices and beliefs in China. Paying close attention to socio-historical context, we will explore how those beliefs formed, how the practices have changed over time, and in particular how the introduction of Western medicine and then scientific biomedicine forced fundamental changes in Chinese medicine over the course of the twentieth century. This course also introduces students to the discipline of History, and students will work in close consultation with the professor to produce a unique research paper. History majors should take a Gateway Seminar first, but there are no official prerequisites.

AMES143 - Contemporary Israeli Cinema

**AMES157S - Indian Civilization**

**Subject**
AMES

**Catalog Number**
157S

**Title**
Indian Civilization

**Description**
Surveys the rise of civilization and kingdoms on the Indian subcontinent from the first urban centers of the Indus Valley through the establishment of the Mughal Empire in the 16th century. Uses literary, archeological, linguistic, ethnological, and inscriptive evidence on the diversity of Indic peoples and their complex social, religious, and caste integration into the major states and empires of pre-modern India; considers wider civilizational networks and extensions of the Indian cultural sphere into other parts of Asia; integrates a historical and anthropological perspective on various primary materials.

**AMES160 - Islam**

**Subject**
AMES

**Catalog Number**
160

**Title**
Islam

**Description**
Introduction to Islamic theology, practice, social institutions, and ethics in the past and present. This course uses original Islamic texts, academic prose, as well as film and fiction. Two short papers, quizzes, and brief presentation are required.

**AMES161 - Japanese Cinema**

**Subject**
AMES

**Catalog Number**
161

**Title**
Japanese Cinema

**Description**
An introduction to the history of Japanese cinema focusing on issues including the relation between the tradition-modernity or Japan-West in the development of Japanese cinema, the influence of Japanese films on the theory and practice of cinema abroad, and the ways in which cinema has served as a reflection of and an active agent in the transformation of Japanese society.

**AMES162 - Anime: Origins, Forms, Mutations**

**Subject**
AMES

**Catalog Number**
162

**Title**
Anime: Origins, Forms, Mutations

**Description**
Historical origins of Japanese anime, as well as its status as art, narrative, genre. Ways in which anime mutates: formally (literature, manga, live action), culturally (fashion, otaku, fan communities), geographically. No prior knowledge of subject matter or Japanese language required.

**AMES165S - The World of Japanese Pop Culture**

**Subject**
AMES

**Catalog Number**
165S

**Title**
The World of Japanese Pop Culture

**Description**
An examination of modern Japanese culture through a variety of media including literary texts, cultural representations, and films. Different material each year.

**Description**
Explores cinematic representations of the Israeli-Palestinian conflict; probes the history and the current state of the conflict through its visual representations. Focuses on representations of violence: of state violence vs. non-state terrorism; probes the relationship between spectatorship and violence.
[**AMES203S - Modern Islam:** Contemporary Islamic thought between revival and reform](#)

**Description**
Course designed to give students mastery over debates in modern Islam. Islam's encounter with modernity, women's rights, fundamentalism, and colonialism. No background is necessary. Readings in English.

---

[**AMES205FS - Literary Islam: Poetry, Scripture, Philosophy**](#)

**Description**
A broad overview of the most essential elements of the Islamic literary tradition. Begins with pre-Islamic poetry and how it framed the emergence of the Qur'an, hadith (sayings of the Prophet Muhammad), and the early Islamic community. Looks at the early Meccan verses of the Qur'an in comparison to the later Madinan ones. Traces intertwined oral and scriptural traditions, hadith science and biographical literature, poetry and philosophy, mysticism and rationalism, belles lettres and adab, satire and vernacular literature. Ends with modern takes on classic genres and sources. Open only to students in the Focus Program. Department consent required.

---

[**AMES206FS - Clash of Civilizations: In the Heart of Europe**](#)

**Description**
This course focuses on the battle between barbarian invaders, established communities, and new religions in the Middle Ages. What became Spain and Portugal were battlegrounds between faiths old and new, a clash of civilizations between Christianity, Judaism, and Islam that would inform future global conflicts. We explore the history of this confrontation at the crossroad of civilizations—between East and West, Africa and Europe—and its effect on our worldview today. A common culture was forged in science, mathematics, music, literature, philosophy, and mysticism, a shared legacy shaping world history and the current world order. Part of the ‘Geopolitics and Culture’ Focus Cluster.

---

[**AMES207 - Silk Roads and China, Ancient and Medieval Transformations**](#)

**Description**
The Silk Roads are the oldest and longest routes of cultural communication and economic exchange connecting Asia, Europe and Africa. In use since the days of Alexander the Great, the Roads and its rail networks now extend from China to England, connecting 70 countries and forming a vital system. This course introduces the ancient to early modern histories, cultures, and religions of the Silk Roads anchored in four themes: Alexander’s empire; life in medieval cities of Chang’an, Baghdad and Constantinople; Silk Roads religions and the interactions of Buddhism, Christianity, Judaism and Islam; and the Mongol empire visited through the travels of Marco Polo.
AMES209S - Love, Spirit, and Mysticism: The Path of Love in Middle East and South Asia

**Subject**
AMES

**Catalog Number**
209S

**Title**
Love, Spirit, and Mysticism: The Path of Love in Middle East and South Asia

**Description**
Examination of Love-based spirituality in multiple religious traditions. Focus on material originating from Persian, Urdu, Turkish, and Arabic sources. Readings will include literature and songs in English.

AMES210 - Arab Cultures: Literature, Politics, History

**Subject**
AMES

**Catalog Number**
210

**Title**
Arab Cultures: Literature, Politics, History

**Description**
Explore different facets of modern and contemporary Arab cultures; memoirs, novels, prison notebooks, films, comic books, theoretical tracts, music, psychiatric case-studies, histories, and ethnographies; consider how authors depict key historical transformations taking place in the Arab world; different angles through which political questions are tackled; the negotiation between self and other.

AMES211 - Melodrama East and West

**Subject**
AMES

**Catalog Number**
211

**Title**
Melodrama East and West

**Description**
Melodrama as a genre in literature and as a mode of representation in film and other media. Issues include: gender construction, class formation, racial recognition, and national identity-building. Emphasis on comparative method attending American and Chinese cultures and the politics of cross-cultural representation.

AMES212S - North Indian Classical Music: Structure, Culture and Lyric

**Subject**
AMES

**Catalog Number**
212S

**Title**
North Indian Classical Music: Structure, Culture and Lyric

**Description**
North Indian classical music (NICM) has a rich history of three thousand years with influences from multiple cultures/languages. This course will explore linguistic/cultural/musical aspects of NICM culture. Texts and music include Bandishes (songs), using four different languages—Sanskrit, Hindi, Urdu, and Brajbasha, exploration of multilingual and multicultural aspects of text and melody construction, fundamental monophonic musical structure and improvisation (NICM-based definitions of raaga (melody) and thala(rhythm). Theoretical principles include the Bhatkandes notation system. Live performances of main ragas and compositions in different dialects. Students learn to play tanpura, a traditional instrument.

AMES213S - Muslim Ethics and Islamic Law: Issues and Debates

**Subject**
AMES

**Catalog Number**
213S

**Title**
Muslim Ethics and Islamic Law: Issues and Debates

**Description**
Premodern judicial arrangements and the contestations surrounding their modern incarnations. Topics include bioethics, gender and family law, war and peace, environmental issues, and political ethics.

AMES215S - The Middle East: From Facebook to Film

**Subject**
AMES

**Catalog Number**
215S

**Title**
The Middle East: From Facebook to Film

**Description**
Studying the Middle East through the lens of popular culture, with a focus on the cultural changes of the digital era. Focus on social media, film, graphic novels, amateur cameras. Studies how popular cultural forms relate to concurrent political and historical processes. Themes include: digital media and society, state violence and terrorism, human rights, sexuality and youth culture.

**Title**  
Islam in the Age of Trump: Race, Immigration, and Empire

**Description**  
Policy and history of treatment of Muslim Americans under Trump administration; Islamophobia as state policy; policy, law, history of both African American Muslims and Muslim immigrants; racism, policies of colonialism and Empire, and anti-immigrant bigotry.

### AMES226S - World of Gaming: Art, Theory, Technology, and Business of a Multi-Billion Dollar Global Industry

**Subject**  
AMES

**Catalog Number**  
226S

**Title**  
World of Gaming: Art, Theory, Technology, and Business of a Multi-Billion Dollar Global Industry

**Description**  
Interdisciplinary and transnational exploration into the multi-billion dollar global gaming industry through social and theoretical lens. Asks what are the possibilities and pitfalls of gaming in our societies? Examines local and global cases, through art, storytelling, theory, design, technology, business, and gamer and fan communities. Select social and theoretical issues explored include im/migration and refugees, identity (race, gender, class and sexuality), environment, education, civic engagement, sports, recreation, war, and technology. Asia is one important case study as one of the most vibrant regions for examining gaming cultures, conflicts, and theories.

### AMES227SA - Korea in Performance: Global Culture and Soft Power

**Subject**  
AMES

**Catalog Number**  
227SA

**Title**  
Korea in Performance: Global Culture and Soft Power

**Description**  
This course surveys the various ways in which South Korea has emerged as a leading nation in the creation of global culture since the late twentieth century. Exemplified by K-pop and K-drama, various cultural contents created in and promoted by Korea have circulated globally and have had a lasting impact on popular culture, new media, and the arts around the world. By using specific case studies in Seoul and its vicinities and by inviting guest speakers, the course introduces students to topics of globalization, interculturalism, neocolonialism, neoliberalism, transnationalism, and tourism.

### AMES228S - Islam, Art, and Society

**Subject**  
AMES

**Catalog Number**  
228S

**Title**  
Islam, Art, and Society

**Description**  
Explores the historic interweaving of theology, spirituality, art, architecture, mathematics, & astronomy in the beautification of everyday objects & lived spaces. It examines how underlying principles of beauty and geometry shaped places such as hospitals, palaces, gardens, colleges, mosques, inns, and Sufi lodges as well as their historical functions in Muslim societies. Students also study and reconstruct historic examples of artistic patterns. A rotating variety of case studies across Afro-Eurasia may include sites and cultural artifacts from Bukhara, Cairo, Cordoba, Damascus, Delhi, Fes, Granada, Guangzhou, Hyderabad, Istanbul, Isfahan, Jerusalem, Malacca, Samarqand, Timbuktu & more.
AMES229D - From Agra to Istanbul: Islamic Art and Architecture in the Early Modern Era

**Description**
From glittering gold domes to vibrantly colored illuminated manuscripts, this course examines Islamic art and architecture from the Indian subcontinent to the eastern Mediterranean from the fifteenth to mid-nineteenth centuries. This period corresponds to the rise of major Islamic empires, most notably the Mughals, Safavids, and Ottomans, whose capital cities became booming centers of art and architecture. This class will explore the artistic production of these empires and consider the rich cross-cultural connections between them, as well as their relationships with the artistic traditions of both Europe and East Asia.

AMES230S - Islam in the Americas

**Description**
Explores how Muslim communities live and practice Islam in the American context. Examines diverse Muslim communities emerging from transatlantic exploration, trade in slaves, and migration as well as indigenous conversion. Discussion of religious and cultural identities of American Muslim peoples and consideration of questions of communal organization, religious authority, gender dynamics, youth culture, political and civic engagement, as well as American Muslim comedy and entertainment. Examination of impact of 9/11 upon American Muslims, their responses to the tragedy, and Americans' shifting perceptions of Islam and Muslims.

AMES231 - Migrant China

**Description**
Introduction to the study of contemporary China, including Taiwan and the Chinese Diaspora. Key themes include family and kinship, sex and gender, regional diversity, ethnic minority relations, the politics of modernity, revolution, and reform, and the representation of Chinese identity through popular media, film, and travel.

AMES232S - Jerusalem

**Description**
Seminar assesses the contribution of Jerusalem's buildings to its contentiousness from Biblical to modern times. Particular sites considered in the context of the urban history of the city from the time of Jesus through Arab, Crusader, Turkish and British rule to contemporary Israeli control. How these places act upon the religious imagination and how they affect the ideological positions of their users (and their abusers) discussed on the basis of photographs, archaeological reports, news reports, novels, sacred texts and diaries.

AMES233 - Global Chinese Cities through Literature and Film

**Description**
Modern Chinese cities in and beyond China, particularly as represented in literature and film. Considers city as object of cultural representation, as well as an engine of cultural production. Examines themes of modernization, alienation, nostalgia, migration, labor, and commoditization, and rethinks the very notion of 'Chineseness' within an increasingly globalized world. Featured cities include Beijing, Shanghai, Hong Kong, Taipei, and New York.

AMES234 - Survey of Modern China 1800-Present

**Description**
The course introduces the broad political and social changes of the last two hundred years in China beginning with the Qing imperial era and the last emperors, to the Opium Wars, the turning point of the Taiping Rebellion, the Republican Revolution and Communist Revolution; with focus and introduction to critical thought on imperialism, nationalism and ethnicity, revolution and social change using primary documents, secondary readings and films.

AMES252S - Indigenous Journeys in South Asian Film and Literature

**Subject**
AMES

**Catalog Number**
252S

**Title**
Indigenous Journeys in South Asian Film and Literature

**Description**
A survey of real or imagined journeys in South Asian film and literature from the anxieties of modernity towards traces of the indigenous. Combines an interest in travel literature and road movies with inquiry into human values. Examines aesthetic representations of journeys that are made to idealize a particular past or to valorize contemporary traces of indigenous communities, while exploring the perspectives on modernity afforded by these real or imagined journeys.

AMES253S - Epics of India: Ethics, Politics, and Performance Traditions

**Subject**
AMES

**Catalog Number**
253S

**Title**
Epics of India: Ethics, Politics, and Performance Traditions

**Description**
Wide variety of epics across linguistic, geographical, and community orientations. Moral discourses, literary theory relating to epic form, performance traditions and media representations of epic narrative, and connections between political ideology and epic visions.

AMES255 - Religion and the Novel in Modern India

**Subject**
AMES

**Catalog Number**
255

**Title**
Religion and the Novel in Modern India

**Description**
Indian writing in English, especially the novel, provides a unique understanding of religion in the world’s largest democracy. The novel has come of age in India, seen innovations and has influenced world literature. Indian and Indian-origin novelists have been Booker and Pulitzer winners, Commonwealth awardees, and Sahitya Akademi laureates. Course will examine how the Indian novel in English understands and mediates tradition and modernity, selfhood and society in a deeply diverse culture. Includes novels written during the twilight of British colonial rule, the Partition, and contemporary decades of rapid globalization and diasporic change.

AMES257 - Four Funerals and a Wedding: Introduction to Chinese Religious Life

**Subject**
AMES

**Catalog Number**
257

**Title**
Four Funerals and a Wedding: Introduction to Chinese Religious Life

**Description**
This is an introductory course on contemporary Chinese religious life. Students are encouraged to think comparatively about religious life with sociological as well as historical imagination. We examine the major religious traditions in China today—Confucianism, Buddhism, Daoism, Christianity, Islam, and popular religious traditions—through rituals and beliefs related to everyday life, such as birth, marriage, and death. Case studies include a history of the development of Confucianism; an analysis of essential concepts and practices in Daoism; a narrative of Catholicism in a Chinese village; a history of women’s mosques in China; and a study of contemporary popular religious practices.

**Description**
This course traces the global development of Confucianism as religious, political, and cultural traditions from the eighteenth century to the twentieth-first century. Confucianism has taken a strong hold in East Asia for centuries, and it has also been having significant impact in Southeast Asia, especially in Vietnam, Singapore, Indonesia, and Malaysia, and today in North America as well. By examining textual, historical, and ethnographic data, this course focuses on the most recent developments of Confucianism as a religious and ritual tradition in diverse societies, while taking into account its cultural and political impact on global modernity.
AMES267 - Spiritual But Not Religious

Subject: AMES
Catalog Number: 267
Title: Spiritual But Not Religious

Description
This course addresses one of the most pressing questions in the study of religion today: What does it mean to be 'spiritual but not religious'? This is a question that frequently appears in survey research; about a quarter of U.S. adults now say they think of themselves as spiritual but not religious (Pew). In this course, we address the big questions about how to define 'religion' and 'spirituality,' and we use empirical data to acquire a new understanding of the lived experience of people who are 'spiritual but not religious,' not only in the United States, but also in Asia and other parts of the world.

AMES270T-1 - Voices in Global Health: Arabic Tutorial

Subject: AMES
Catalog Number: 270T-1
Title: Voices in Global Health: Arabic Tutorial

Description
Through practical and theoretical discussions around case studies, visual texts, and interviews in the target language, Voices in Global Health examines emerging health challenges at the local and global level. Through the experiences and knowledge shared from our guest speakers, we will explore the underlying health behaviors and cultural beliefs while producing culturally appropriate health interventions. Tutorials meet weekly for 75-minutes. Prerequisite: 4 semesters of language or equivalent – heritage and native speakers are welcome to enroll. Satisfactory/Unsatisfactory. Community-engaged course.

AMES270T-4 - Voices in Global Health: Hindi Tutorial

Subject: AMES
Catalog Number: 270T-4
Title: Voices in Global Health: Hindi Tutorial

Description
Through practical and theoretical discussions around case studies, personal narratives, documentaries and recorded interviews in the Chinese language, students examine how language and culture impact health beliefs and behaviors. Explore underlying reasons for different beliefs and behaviors with the goal of creating culturally appropriate interventions. This is a service-learning or community-engaged course. Engagement may include direct, project-based, or research-focused service with local/global community partners among other engaged practices. Meet weekly for 75 minutes. Prerequisite: Chinese 305 or equivalent. Instructor consent required.

AMES270T-5 - Voices in Global Health: Mandarin Tutorial

Subject: AMES
Catalog Number: 270T-5
Title: Voices in Global Health: Mandarin Tutorial

Description
Through practical and theoretical discussions around case studies, personal narratives, documentaries and recorded interviews in the Chinese language, students examine how language and culture impact health beliefs and behaviors. Explore underlying reasons for different beliefs and behaviors with the goal of creating culturally appropriate interventions. This is a service-learning or community-engaged course. Engagement may include direct, project-based, or research-focused service with local/global community partners among other engaged practices. Meet weekly for 75 minutes. Prerequisite: Chinese 305 or equivalent. Instructor consent required.
AMES271T - Voices in Philosophy: Chinese Tutorial

Subject: AMES
Catalog Number: 271T
Title: Voices in Philosophy: Chinese Tutorial

Description:
Discussion-based course trains students to read and analyze core philosophical texts in Chinese, typically in conjunction with a lecture course offered in philosophy. Classes include close readings of original texts, discussions of interpretation and application in variety of other forms (including film, documentary, multimedia) and real-life situations. Students examine how language/culture impact our understanding of core philosophical texts through attention to issues such as translation, vernacular, and word choice. Tutorials meet weekly for 75 minutes. Recommended prerequisite: Chinese 306 or equivalent.

AMES272T - Voices in the Environment: Mandarin

Subject: AMES
Catalog Number: 272T
Title: Voices in the Environment: Mandarin

Description:
In this course, students will explore how language and culture impact environmental policy and practice. Through authentic text, video, and case studies in Mandarin, students will analyze environmental issues in the Francophone World to develop their understanding of core issues in the field. Tutorials meet for 75 minutes/week. Taught in Mandarin.

AMES275 - Chinese Philosophy

Subject: AMES
Catalog Number: 275
Title: Chinese Philosophy

Description:
The major schools of classical Chinese philosophy: Confucianism, Moism, and Taoism. Confucianism on the ideals of harmonious human life; Moism’s charge that Confucianism encourages an unjustified partiality toward the family; Taoism’s claim that no logically consistent set of doctrines can articulate the ‘Truth.’ Debates and mutual influences among these philosophies. Comparisons between Chinese and Western cultures with respect to philosophical issues and solutions.

AMES276 - Introduction to Asian American and Diaspora Studies

Subject: AMES
Catalog Number: 276
Title: Introduction to Asian American and Diaspora Studies

Description:
What does it mean to be Asian American? Asian American Studies is an interdisciplinary field that draws on social sciences, humanities, and the arts to explore the historical and contemporary experiences of Asian Americans in the western hemisphere. This course provides students with an introduction to this dynamic and growing field of study, taking race, gender, immigration, diaspora, class, labor, and sexuality as primary subjects of the field. The course also historicizes Asian American racialization to better understand the structural forces that have shaped Asian American lives and the ways that writers, scholars, and activists have responded to and resisted these forces.
AMES277T - Voices in Marketing: Advertising in Chinese

Description
Discussion-based course trains students to analyze all forms of advertising in Chinese. Classes explore the history and theories of advertising in China, as well as hands-on strategies for analyzing ads, with particular attention to issues such as translation, localization, and ethics. Tutorials meet weekly for 75 minutes. Does not count for the Markets & Management Studies certificate program. Prerequisite: Chinese 204 or equivalent.

AMES283S - Istanbul: Religion, Politics and Cosmopolitanism

Description
Istanbul is the only city in the world located on two continents. Byzantine, Ottoman, and Turkish cultural legacies allow the city to be read as a 'palimpsest', a multi-layered urban text of multiple, even contradictory meanings. Istanbul is an ideal site to explore imperial history, Islam and Christianity, migration, East/West relations, and cosmopolitanism. Through interdisciplinary sources in history, culture, theory, and politics, students will examine a variety of urban, architectural and social spaces including churches, mosques, public squares, and ethnic neighborhoods. Taught in English.

AMES288S - Religion and Politics in Post-Revolutionary Iran

Description
The relationship between religion and politics; Islam and politics; Islamic political theology and ethics; stages of Shi'ite Islam and politics; Iran between two revolutions; political Islam; Khomeini's political thought; Iranian Constitution; tension between theocracy, secularism, and democracy; quasi-democracy and elections; expediency and secularization; civil and Islamic law; Muslim fundamentalists, traditionalists, and reformists; from competitive electoral to the non-competitive electoral authoritarian regime; women's rights; religious and ethnic minorities; foreign policy; revolutionary guards; Khomeini and Khamenei administrations; the future of Islamic republic of Iran.

AMES290S - Special Topics in Asian and Middle Eastern Studies

Description
Topics vary by semester.
AMES295S - Black Muslims: Race, Religion, & Culture

Subject: AMES  
Catalog Number: 295S  
Title: Black Muslims: Race, Religion, & Culture  
Description: The intersection of African, American, European, and Islamic cultures studied through the cultural and intellectual flourishing of black Islam. Topics include early Muslim communities established in the Americas through the transatlantic slave trade, Muslim slave rebellions in Brazil and the Caribbean, Muslim slave autobiographies, African Muslims in Europe, the emergence of the Moorish Science Temple and the Nation of Islam, Elijah Muhammad, Malcolm X, Muhammad Ali, women of the Nation of Islam, women's Qur'an exegeses, Hagar as a black woman, black feminism, the Five-Percent Nation, Islamic hip-hop and rap, 'the Black Crescent,' the black international and Islam, and the Black Panthers.

AMES296S - Turkish History through the Novels of Orhan Pamuk

Subject: AMES  
Catalog Number: 296S  
Title: Turkish History through the Novels of Orhan Pamuk  
Description: An introduction into Turkish history (including the Ottoman Empire) through a comparative study of the historical novels and nonfiction of Nobel Laureate Orhan Pamuk. Addresses Pamuk's role as an intellectual-author who mediates between Islamic culture, secular modernity, the Turkish national tradition and an international canon of literature. Political implications of Sufism, cultural revolution, Orientalism, and post-colonialism. Secondary focus on representations of cosmopolitan Istanbul, political Islam and the military coup. Taught in English.

AMES301D - Religion, Restrictions, and Violence

Subject: AMES  
Catalog Number: 301D  
Title: Religion, Restrictions, and Violence  
Description: An examination of the historical roots and current manifestations of religiously-justified violence and disenfranchisement, with a focus on the Abrahamic traditions (Judaism, Christianity, and Islam). The violence treated will include the expressly physical as well as the more insidiously existential, including political and cultural marginalization. Major loci of exploration will include gender and sexuality, Israel-Palestine, and the intersection of contemporary identities. Topics include the nature of extremisms within each tradition, the challenges of assimilation and 'modernity,' and the role and nature of citizenship and territory.

AMES304 - Africa and Arabia: Cultures, Communities, and Connections

Subject: AMES  
Catalog Number: 304  
Title: Africa and Arabia: Cultures, Communities, and Connections  
Description: Explores communities, cultures, and connections between Africa and Arabia; Provides concepts and theories on human mobility and interconnectedness in the contexts of the two regional; Examines displacement, migration within and emigration from the two regions, and areas of collaboration and contention in the globalized world; Examines themes of religious terrorism, language, music, and narratives against European colonialism; Explores different intellectual platforms such as political biographies, films, guest experts etc; Interview partners in Egypt, Morocco and Senegal on related intercultural issues and politics.
AMES308S - Bilingualism

**Subject**  
AMES

**Catalog Number**  
308S

**Title**  
Bilingualism

**Description**  
Examination of bilingualism at the individual, interpersonal, and social levels from psycholinguistic, socio-linguistic, anthropological, and educational perspectives. Issues to include the relation between language and cognition, language development, language identity, socio-linguistic practices in multicultural settings, language maintenance, and language policy and planning.

AMES309 - Chinese Im/migration: Chinese Migrant Labor and Immigration to the US

**Subject**  
AMES

**Catalog Number**  
309

**Title**  
Chinese Im/migration: Chinese Migrant Labor and Immigration to the US

**Description**  
Comparative examination of contemporary China's 'floating population' of migrant labor, and of Chinese immigration abroad (particularly to the US). Focus on cultural representation of these phenomena (particularly literary, cinematic, and artistic works), but sociological, anthropological, economic, and political perspectives will also be considered. Topics include cultural alienation, marginalization, and assimilation; education and health care; labor and commodification; gender and ethnicity; narratives of modernization and development; together with the ethical, social, and political implications of migration.

AMES310S - Acquisition of Japanese as a Second Language

**Subject**  
AMES

**Catalog Number**  
310S

**Title**  
Acquisition of Japanese as a Second Language

**Description**  
Examining the Japanese language data used in the development of second language acquisition theories; learning syntactic and semantic properties of the Japanese language and their comparisons with English; reading published empirical studies about acquiring Japanese as a second language and evaluate their arguments; designing an original research to address the current issues in learning and teaching Japanese.

AMES311S - Poetic Cinema

**Subject**  
AMES

**Catalog Number**  
311S

**Title**  
Poetic Cinema

**Description**  
Inquiry into sources of 'resonance' in international cinema with emphasis on films from Asia and the Middle East. The object of the course is to attempt a description of aspects of film construction which conduce to intense experience for viewers. Readings in indigenous aesthetics.

<td>Asian Religion and Knowledge of the Other</td>
<td>This is a course that deals with some of the most fundamental questions in our modern global age: How do we understand societies that seem very different from our own? How do we relate to people who come from different cultural traditions and how do we understand religions that are distinct from our own? In order to answer these questions, we need to comprehend the various conceptualizations of the so-called ‘Other’ and our relationship with ‘the Other.’ We examine the diverse way through which we engage with Asian religions, such as Confucianism and Tibetan Buddhism, in the West, as well as the actual religious experience of Asian Americans, in particular Chinese-Americans.</td>

**AMES316 - Introduction to Critical Theory**

**Subject**: AMES  
**Catalog Number**: 316  
**Title**: Introduction to Critical Theory

**Description**
This course is an introduction to fundamental texts and concepts in the history of critical theory. We will be expanding the scope of our examination well beyond the remit of the Frankfurt School, to which the term 'critical theory' is often linked and look at key texts in the history of political philosophy, social theory, linguistics and language philosophy, gender studies, critical race theory, and postcolonialism. All our readings will be primary literature from what might be dubbed a 'critical theory cannon' and is intended to introduce students in the humanities and qualitative social sciences to essential and foundational materials.

**AMES317 - Martin Luther King and the Prophetic Tradition**

**Subject**: AMES  
**Catalog Number**: 317  
**Title**: Martin Luther King and the Prophetic Tradition

**Description**
Situates Martin Luther King as a preacher in the black Christian tradition with a liberationist reading. Traces the movement from civil rights to opposition to economic injustice, war, and militarism. Analyzes what the prophetic voices of today have to say about issues of poverty, racism, environmental destruction, militarism, homophobia, drones, sexism.

**AMES318S - Social Movements and Social Media**

**Subject**: AMES  
**Catalog Number**: 318S  
**Title**: Social Movements and Social Media

**Description**
Examines uses and abuses of social media by social movements. Interested in a broader historical study of mediating technologies and oppositional public sphere, course considers the uses of cameras, phones, cassette players, radio, and social media platforms, but also books, bodies, art, fashion, and automobiles as oppositional technologies. Studies political and ethical uses of technologies in social unrest. Investigates impact of technologies on social movements and social transformations in contemporary history. Student driven case studies will highlight contemporary engagement with social media by networked social movements.

**AMES319S - Andalusia: Muslim, Jewish, Christian Spain**

**Subject**: AMES  
**Catalog Number**: 319S  
**Title**: Andalusia: Muslim, Jewish, Christian Spain

**Description**
Intersection of cultures, religions, languages, & peoples through history, poetry, music, architecture, & philosophy in Spain. Cultural flourishing from the contact—and sometimes clash—of European, Spanish, Islamic, Arab, African, Middle Eastern, and Jewish civilizations and Arabic, Spanish, and Hebrew languages. Ends with Andalusian culture in modern music, poetry, art, dance, & architecture at the crossroads of civilizations. Includes travel to Spain over spring break so students witness firsthand the coexistence of different religious traditions and cultures. Instructor consent required.

**AMES321 - Rumi: Mysticism and Poetry**

**Subject**: AMES  
**Catalog Number**: 321  
**Title**: Rumi: Mysticism and Poetry

**Description**
Rumi, the iconic poet of Persian Islamic tradition; course examines his writings, context, and legacy. Involves students' research. Encourages students to cultivate critical skills by assessing relevant scholarship and developing multidisciplinary methodologies. All readings in English; no previous coursework or command of Persian/Arabic required.

**AMES323S - Modern Buddhism in Asia and America**

**Subject**: AMES  
**Catalog Number**: 323S  
**Title**: Modern Buddhism in Asia and America

**Description**
An examination of Buddhism in Asia, Europe, and the United States from the mid-nineteenth century to the present. Emphasis on global exchanges that resulted in the emergence of Buddhism in the United States and Europe and the transformation of Buddhism in Asia.

### AMES335 - Chinatowns: A Cultural History

**Subject**: AMES  
**Catalog Number**: 335  
**Title**: Chinatowns: A Cultural History  

**Description**
Explores the intersection of space and ethnicity through the myriad ways Chinatown has circulated as memory, fantasy, narrative, myth, in the dominant cultural imagination, and how lived realities of overseas Chinese communities, Asian American history, and changing conceptions of 'Chineseness' have productively engaged with real and phantom Chinatowns. Research will emphasize multi-disciplinary approaches, such as urban history, architecture, ethnography, economics; or engagement in a creative project.

### AMES336 - Chinese science fiction

**Subject**: AMES  
**Catalog Number**: 336  
**Title**: Chinese science fiction  

**Description**
An examination of modern Chinese-language science fiction (SF), including literature and cinema. Particular attention to how SF works use descriptions of alternate worlds to comment critically on contemporary social and political concerns. All materials will be available in English translation. No prior knowledge required.

### AMES337S - Chinese Sociolinguistics

**Subject**: AMES  
**Catalog Number**: 337S  
**Title**: Chinese Sociolinguistics  

**Description**
Investigation of the complex interaction between Chinese linguistic practices and Chinese-speaking societies. Integration of conceptual framework in sociolinguistics and empirical research on sociolinguistics issues in Chinese-speaking societies. Topics including the historical development of the modern Chinese language, regional and social variations, language ideology and language policies, language and identity, language and gender, politeness and cross-cultural communication, language and social media, and language and education. Readings and class conducted in English.

### AMES338S - Globalization and Theater

**Subject**: AMES  
**Catalog Number**: 338S  
**Title**: Globalization and Theater  

**Description**
This course surveys the various ways in which contemporary theatre has been created and circulated in a global context.

### AMES342S - Languages in Southwest China: Grammar of Multilingualism

**Subject**: AMES  
**Catalog Number**: 342S  
**Title**: Languages in Southwest China: Grammar of Multilingualism

**Description**
Issues in bilingualism and multilingualism under the context of Southwest China; experimental approaches to bilinguals of Nuosu Yi and Mandarin Chinese/bilinguals of Kham Tibetan and Mandarin Chinese, a total of 4 million people living in Southwest China; theoretical and pedagogical issues specific to minority group languages in China.

### AMES349S - Hinduism and Judaism: Culture, Religion, and Identity

**Subject**: AMES  
**Catalog Number**: 349S  
**Title**: Hinduism and Judaism: Culture, Religion, and Identity

**Description**
Using interdisciplinary comparative frameworks, this course will study how two major world religions, Hinduism and Judaism, create a dynamic cosmos that brings abiding meaning to the daily lives of millions of believers. Explores concepts such as 'ritual' and 'myth' by examining Jewish and Hindu materials from early to modern times. The broader aims of the course are to understand how each tradition imagines time, space, and matter, and to explore how claims about the sacred are transformed in modernity. Ultimately, it aims to inspire reflection on how religion, identity and culture function in the modern world.
AMES352 - Modern Hindi Literature
Subject: AMES  
Catalog Number: 352  
Title: Modern Hindi Literature  
Description: A survey of Hindi literature from the early twentieth century to the present focusing on the power of literary forms to induce aesthetic experience and express cultural endeavors. Poetry, plays, short stories, novels.

AMES357 - Modern & Global India
Subject: AMES  
Catalog Number: 357  
Title: Modern & Global India  
Description: Examines the historical foundations for the emergence of India as a modern and global society with a focus on the Mughal empire, British colonialism, and Indian nationalism. Uses textual and visual sources for charting how local political, social-economic and cultural factors intersect with the global movements of peoples, goods, technologies, and ideas in the creation of the modern nation-state of India. Concludes with discussion of globalization of Indian labor, food, and Bollywood. Time frame from 1500 to present.

AMES359 - Violent Jihad in the Twentieth Century - A Global History
Subject: AMES  
Catalog Number: 359  
Title: Violent Jihad in the Twentieth Century - A Global History  
Description: This course focuses on the history of Muslim groups and social movements which are often regarded as politically fundamentalists or radical in the twentieth-century Middle East. We shall critically survey the intellectual origins of radical ideologies, the social history of the 'Muslim Brotherhood' in Egypt and Syria, the politics of Saudi Arabia, the rise of Hizbullah, the question of the caliphate, the interaction between foreign intervention and the approval of violence as a legitimate means in politics, a history of al-Qaeda, and finally of what we know about ISIS.

AMES360 - Global Apple: Life and Death and the Digital Revolution
Subject: AMES  
Catalog Number: 360  
Title: Global Apple: Life and Death and the Digital Revolution  
Description: Examination of the Apple Corporation's development from a Silicon Valley garage operation to a company with unprecedented global reach; the Cult of Steve Jobs, the Apple Launch and use the design and development of the Apple Store; labor and environmental struggles over Apple supply chain and production processes, from cobalt mining in Africa to Foxconn factories in China; migrant worker suicide and poetry as forms of protest in China; e-waste villages and digital rubbish; everyday uses of Apple technology and the ethics of consuming Apple products.

AMES360S - Global Apple: Life and Death and the Digital Revolution
Subject: AMES  
Catalog Number: 360S  
Title: Global Apple: Life and Death and the Digital Revolution  
Description: Examination of the Apple Corporation's development from a Silicon Valley garage operation to a company with unprecedented global reach; the Cult of Steve Jobs, the Apple Launch and use the design and development of the Apple Store; labor and environmental struggles over Apple supply chain and production processes, from cobalt mining in Africa to Foxconn factories in China; migrant worker suicide and poetry as forms of protest in China; e-waste villages and digital rubbish; everyday uses of Apple technology and the ethics of consuming Apple products.

AMES372 - Two Koreas: History, Society and Culture
Subject: AMES  
Catalog Number: 372  
Title: Two Koreas: History, Society and Culture  
Description: Introduces the divided histories of North and South Korea and their contemporary legacies in regional and global contexts. Explores topics such as colonization, modernization, division, war, migration, gender and sexuality, human rights, popular and political cultures, and globalization in comparative perspectives. Examines historical narratives, journalism, museums, literature, and visual cultures.
AMES373S - Islamic Mysticism

**Subject**
AMES

**Catalog Number**
373S

**Title**
Islamic Mysticism

**Description**
This course introduces the history and key concepts of Islamic spirituality through the lives, writings, institutions, and influence of Muslim sages, ascetics, and saints across Africa, Europe, Asia, and the Americas. Critical topics include Sufi origins, psychology, healing, music, poetry, politics, and the aspiration to beautify one's self and society through connection with the Divine.

AMES379SA - Gender and Immigration between Europe and the Middle East

**Subject**
AMES

**Catalog Number**
379SA

**Title**
Gender and Immigration between Europe and the Middle East

**Description**
Investigates the gendered experience of immigration and its implications for changing the culture both at home and in the hosting countries. Between the traditions of the country of origin and acculturation to the new home, women and LGBTQ communities are the most vulnerable facing gender-based discrimination and violence. Nonetheless, immigration also offers the opportunity to cross the borders of binaries, such as femininity and masculinity, which can be empowering and liberating. This seminar is offered as part of the Middle East in Europe: Berlin/Istanbul study abroad program.

AMES380SA - Transnational Muslims in Germany: Politics of Migration, Religion, and Culture

**Subject**
AMES

**Catalog Number**
380SA

**Title**
Transnational Muslims in Germany: Politics of Migration, Religion, and Culture

**Description**
Critically analyzes political debates about Muslims and Islam in Europe that often cast them as a 'security threat' or a 'problem' of failed integration. Traces the geographical production of Muslim subjects through transnational flows, networks and imaginaries. Examines a series of topics including debates about the headscarf, Muslim women's dress, mosque construction, Muslim civil society organizations, and the refugee crisis in Germany. Taught in English as part of the Duke Middle East in Europe program.

AMES381SA - Politics and Culture Between Europe and the Middle East

**Subject**
AMES

**Catalog Number**
381SA

**Title**
Politics and Culture Between Europe and the Middle East

**Description**
Surveys the changing geopolitical context of communities between Europe and the Middle East through an interdisciplinary cultural framework from WWI to the present. Emphasis on German/Turkish relations. Analysis of representations of nationalism, identity, ethnicity, gender and religion. Examines intersections of modernity, revolution, and lived and political Islam to analyze the ways in which political ideologies create and question Middle Eastern identities. Secondary theoretical readings, including work by political scientists, cultural critics, and policy experts. Taught in English as part of the Duke Middle East in Europe program.

### AMES402 - Hashtags Memes, Digital Tribes

**Description**
Tracks digital life and creative expression of groups online in a close study of images, captions and hyperlinked tags. Examines rituals, symbols and cultural patterns that structure everyday life of digital tribes online and investigates impact of digital and social media (Twitter, Instagram, Facebook, Periscope) on the constitution of communities online and offline. Studying varied array of digital tribes: tribes of the deaf, of oil rig workers, of Hindu worshippers, of prison wives and laptop entrepreneurs, students learn about underlying myths, rituals, and cultural symbols that connect groups of people online.

### AMES402S - Hashtags Memes, Digital Tribes

**Description**
Tracks digital life and creative expression of groups online in a close study of images, captions and hyperlinked tags. Examines rituals, symbols and cultural patterns that structure everyday life of digital tribes online and investigates impact of digital and social media (Twitter, Instagram, Facebook, Periscope) on the constitution of communities online and offline. Studying varied array of digital tribes: tribes of the deaf, of oil rig workers, of Hindu worshippers, of prison wives and laptop entrepreneurs, students learn about underlying myths, rituals, and cultural symbols that connect groups of people online.

### AMES405S - Media and Conflict

**Description**
Focus on the role of media in the context of colonialism, war and conflict across various historical periods. Attentive to the ways that media technologies have been employed both as tools of power and vehicles of protest and resistance. Theoretical readings are paired with a set of international case studies -- e.g., colonial atrocity archives, #BlackLivesMatter, Syrian civil war, the Abu Ghraib torture scandal, the Israeli military occupation, drone strikes -- that enable us to test the applicability of theoretical discussions to contemporary case studies. Readings in Butler, Kaplan, Sontag, Stein and Kuntsman, Virilio and others.

### AMES408S - The Geopolitics of Islamophobia from Bosnia to Xinjiang

**Description**
Comparative study of geopolitical attitudes toward Muslim minorities in and majority Muslim nations of the greater Middle East beginning with the Ottomans and including Bosnia, Chechnya, Iran, Afghanistan and/or Xinjiang. These polities have histories of colonialism, contested Islamic and secular state traditions, and experiences of anti-Muslim racism, religious and ethnic conflict and political violence. Theoretical analysis of historiography, Islamophobia, gender, identity, and policy. Discussion of US, European, and regional geopolitical interests through cultural texts including literature and film. This course does not fulfill the History capstone requirement.
AMES410S - Trauma and Space in Asia

Subject: AMES
Catalog Number: 410S
Title: Trauma and Space in Asia

Description: Space and Trauma across Asia. Introduces the theoretical framework of 'trauma discourse;' examines how the experience of space in Asia broadly defined has shaped historical traumas, which have marked the transition from colonialism to postcolonialism. Focus on Israel/Palestine, India/Pakistan, China/Taiwan, Japan/Korea; examine how critical terms originating in one historico-geographical context are translated across geographical boundaries.

AMES425S - Cultures of New Media

Subject: AMES
Catalog Number: 425S
Title: Cultures of New Media

Description: Anthropological look at 'new media' - their varied forms and histories, how they are used and understood, and their meanings and effects within different communities of users. Charts a number of technologies deemed 'new' in their day and the social meanings and communities that such technologies generated. Explores new media in domains of art and literature, as well as issues of race, gender, sexuality and how other indices of difference come to bear on new media and its use. Grounded in anthropology, readings will also draw on media studies, visual studies, cultural studies and critical theory, queer and gender theory, history and geography.

AMES426S - France-Asia: Cultural Transfers and Translations in a Globalized Context

Subject: AMES
Catalog Number: 426S
Title: France-Asia: Cultural Transfers and Translations in a Globalized Context

Description: This class explores the dynamic contemporary Franco-Asian dialogue with a specific focus on China, Japan, Vietnam, Laos and Cambodia. Seeking to go beyond the East-West divide, the seminar investigates the current stakes of this dialogue, given its growing complexity after 1945. It examines the postcolonial legacy of France's occupation of Indochina, and how East Asia has also often been viewed as an 'Other,' serving to crystallize French anxieties over political and cultural power. It uses an interdisciplinary perspective encompassing novels, cinema, dance, visual arts, and critical theory to trace a web of exchanges in a globalized context. Taught in French.

AMES432S - Storyworlds: The Art, Technology, and Pleasure of Narrative

Subject: AMES
Catalog Number: 432S
Title: Storyworlds: The Art, Technology, and Pleasure of Narrative

Description: Is 'tell me a story' an universal imperative? Seminar examines storytelling practices across a broad span of histories and cultures, and the creation of storyworlds through multiple media, genres, and platforms. Topics include comparative oral traditions, Medieval story cycles, serial tales, textual poaching and fanfic, alternate reality gameworlds (ARG), social media, transmedia storytelling, and transcultural fandoms.

Subject: AMES
Catalog Number: 435S
Title: Chinese Media and Popular Culture: Politics, Ideology, and Social Change

Description: Examines contemporary Chinese media such as traditional news press, radio and TV, new media such as the internet and social media, and popular culture, including cinema, popular music and fashions. Uses cross-cultural, interdisciplinary, and comparative approach. Focuses on how China views itself and constructs its global images, and how the world views China through media and popular culture. Primary objective is to understand political, ideological, and social changes since the Reform Era that began in 1978. No foreign language prerequisites are required.

AMES437S - Capstone Seminar - Globalization: Asia and Asian America

Subject: AMES
Catalog Number: 437S
Title: Capstone Seminar - Globalization: Asia and Asian America

Description: 'Globalization': a shorthand for describing the period of extraordinary change that we are living through, our lives, and our worlds as defined by global connections, from the internet technologies and rapid mass communication to issues of mobilization for social justice. This course focuses on two main themes: global moments of common struggle against racism in Asian, Asian American, and African American contexts, and global manufacture and the ways in which the microprocessor chip technology has come to bind Asia, Africa, and America, with a special focus on women and Asian Americans in the IT sector.

AMES438S - Techno-Orientalism: Asian/America, (Post)Human and Science Fiction

Subject: AMES
Catalog Number: 438S
Title: Techno-Orientalism: Asian/America, (Post)Human and Science Fiction

Description: Course examines global Science Fiction genres in literature, film, and social media as case studies to understand broad historical and social formations of Otherness, the Alien, Citizenship, (Im)migration. Studies racial assumptions in popular culture, domestic and international law, discourse of the human and human rights, science and technology industries, and other disciplines. Explores interdisciplinary intersections of race, gender, sexuality, class, and geopolitical divisions and interactions in Asian/American Studies and Postcolonial Studies from the past to the present.

AMES439 - Queer China

Subject: AMES
Catalog Number: 439
Title: Queer China

Description: Examines queer discourses, cultures, and social formations in China, Greater China, and the global Chinese diaspora from the late imperial period to the present. Course will focus on cultural representations, particularly literary and cinematic, but will also consider a wide array of historical, anthropological, sociological, and theoretical materials.
AMES449S - The History of Modern Syria, 1921-2021
Subject: AMES
Catalog Number: 449S
Title: The History of Modern Syria, 1921-2021
Description: This seminar focuses on the history of State of Syria in the last hundred years. We survey the economic, legal, political, environmental, and cultural history of this region from the late Ottoman Empire to 2021.

AMES452S - From the Art of the Pleasure Quarters to Tokyo Pop
Subject: AMES
Catalog Number: 452S
Title: From the Art of the Pleasure Quarters to Tokyo Pop
Description: Starting in the bordello of 17th-century Edo (now modern-day Tokyo) and spanning up through the kitsch of contemporary Japanese pop culture, this course examines the vibrant and often bawdy forms of Japanese print and visual culture. Introduction to Japanese printmaking practices and a forum for discussing critical issues related to sexuality, censorship, spectacle, satire, tourism, the supernatural, and the Asian experience of modernity. Investigates the spectacular worlds of the kabuki theater, sumo wrestling, and the 'pleasure quarters' (the red-light district designated for licensed prostitution).

AMES456S - Chinese Culture and Ideology in the 20th Century and Now
Subject: AMES
Catalog Number: 456S
Title: Chinese Culture and Ideology in the 20th Century and Now
Description: Exposes students to cultural and literary expressions and representations of modern China from the beginning of the 20th century to the present; focus on issues of politics and ideology and the formation of Chinese exceptionalism; the beginning of the 20th century (1900-1949) and the Mao era (1949-1976); contemporary China since the era of reform and opening up (1978-present); comparative, interdisciplinary approaches of intellectual and cultural history, literary and cultural studies, and political science.

AMES476S - Archiving and Visualizing Asia: Politics and Poetics of Knowledge Production
Subject: AMES
Catalog Number: 476S
Title: Archiving and Visualizing Asia: Politics and Poetics of Knowledge Production
Description: Engages students in the practices and theories of archiving, documenting and curating marginal histories. Hands-on research in the archives of Duke's Rubenstein Special Collections and elsewhere. Examines histories of movements and encounters between the 'West' and 'Asia.' Teaches original archival research and documentary methods through guided excavations in digital, audiovisual, and material resources. Directed readings and special guest lectures guide students on how to think critically on the theories and praxis of knowledge production, collection, documentation, circulation, and consumption. Students curate projects for final research assignment.
AMES477S - The Global Arab World
Subject: AMES  
Catalog Number: 477S  
Title: The Global Arab World  
Description: This seminar will focus on contemporary works, anthropological and historical, that unearth veins of research on the Arab world whose horizons transcend the earlier theoretical metonyms, as well as the frontiers of nation-states and the boundaries of religious traditions. We will read works which explore lives, ideas, practices, and institutions in the Arab world through situating them within global processes. In thinking about the Arab world in a transnational perspective we seek to look into how this area of the world both shaped other societies, and was shaped by, this global circulation of humans, commodities, technologies, ideologies, news and thought.

AMES478S - Korean Sociolinguistics
Subject: AMES  
Catalog Number: 478S  
Title: Korean Sociolinguistics  
Description: Examination of Korean language in social and cultural contexts from sociolinguistic and linguistic anthropological points of view. Focus on construction of cultural identities, social order and interpersonal relationships through everyday language use. Honorifics and language ideology, language and gender, regional and social variations, language contact and language policy in contemporary Korea. Sociolinguistics literature introducing conceptual frameworks and empirical research on specifics of language in use and synchronic and diachronic variations. Readings and class conducted in English. Prerequisite: Familiarity with Korean or basics of Linguistics.

AMES490S - Special Topics
Subject: AMES  
Catalog Number: 490S  
Title: Special Topics  
Description: Topics in Asian and Middle Eastern Studies vary each semester.

AMES493 - Research Independent Study
Subject: AMES  
Catalog Number: 493  
Title: Research Independent Study  
Description: Individual Research in a field of special interest under the supervision of a faculty member, the central goal of which is a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. Consent of instructor and director of undergraduate studies required.

AMES494A - Research Independent Study on Contemporary China
Subject: AMES  
Catalog Number: 494A  
Title: Research Independent Study on Contemporary China  
Description: Research and field studies culminating in a paper approved and supervised by the resident director. Includes field trips on cultural and societal changes in contemporary China. Offered at the Duke in China Program.

AMES495 - Collaborative Research Projects
Subject: AMES  
Catalog Number: 495  
Title: Collaborative Research Projects  
Description: Small collaborative research projects of faculty with graduate and undergraduate students. Close mentoring of students. Training in methods of cultural analysis and interpretation. Projects developed in conjunction with ongoing faculty initiatives. Students will present their research in the form of a term paper or some equivalent medium. Funding available to support students' research. Consent of Director of Undergraduate Studies required.

ARTHIST102D - Introduction to World Art History from 1200 to the Present

Description
An expansive investigation of the history of art, from the Renaissance to the present, including non-Western visual traditions, art historical methods and theories placed in dynamic interdisciplinary dialogues across the humanities, social sciences, and sciences, and involving wide perspectives, intersecting ideas, and the capacity to observe works of art in museums, galleries, and installations throughout the world.

ARTHIST103D - Introduction to the History of Architecture

Description
The survey provides a panorama of architectural production from Antiquity to the present with a global perspective. The objective is to insure knowledge of architectural production, related historiography, contemporary debate, and scholarship. The reading materials are organized chronologically to facilitate the students' approach to the field of architectural history. A thematic approach will inform the lectures, where notions of practice, techniques, spread of knowledge and models among others, are considered in relation to specific case studies.

ARTHIST104 - Exploring Art and Architecture - Foundations and Histories

Description
Provides knowledge for developing skills in visual analysis and historical interpretation of art from antiquity to present; examines major theoretical frameworks, key movements and concepts; explores how we look at and talk about works of art, investigating a variety of approaches to their study, including artists and their material practices; biography, patrons and the public; built environment and cultural institutions; how the social and political roles of art change through time. Taught in Nasher Museum. Classroom discussions complemented by visits to Nasher galleries and direct practice of visual analysis, critical theory, and role of changing histories in comprehension of art.

ARTHIST107 - Roman Art and Archaeology

Description
Roman artistic legacy shaped Western art in profound ways. Artistic innovations: realistic portraiture, trompe l'oeil wall painting; architectural innovations: amphitheater, circus, multi-seat latrine, steam-heated bath. Explore Roman art and architecture throughout Mediterranean from late Republic to early fourth century AD. Emphasis is on social and cultural contexts. Study major technical and aesthetic innovations, and impact of Roman emperors as art patrons. Class lectures and readings arranged both chronologically and thematically, with case studies of archaeology of Pompeii, Athens, Aphrodisias in Turkey.
**ARTHIST139 - Seven Wonders: Monuments and Cultures of the Ancient Mediterranean**

**Subject**
ARTHIST

**Catalog Number**
139

**Title**
Seven Wonders: Monuments and Cultures of the Ancient Mediterranean

**Description**
Study of the ‘Seven Wonders’ of the ancient world: the Great Pyramids, the Hanging Gardens of Babylon, the Temple of Artemis at Ephesus, the Mausoleum at Halicarnassus, the Statue of Zeus at Olympia, the Colossus of Rhodes, and the Lighthouse of Alexandria. Course explores the meaning of these monuments to the societies that produced them, with attention to their chronological and geographical specificity. Topics include: how archaeologists approach ancient monuments; what these monuments tell us about the human experience and about life in the past; who precisely they bear witness to; and how the study of such monuments helps us to understand our own present.

Etruscans: Myth, Archaeology and Civilization

**Description**
The Etruscans were a pre-Indo-European population living in the Italic peninsula in the first millennium BCE. One of the most important and fascinating civilizations of the ancient world, which deeply influenced the Classical world and the Mediterranean basin. The class involves archaeological studies and comparative analyses of pre-urban and urban settlements, the necropoleis, art, art history, iconography and archaeological remains of the Etruscan and pre-Roman Italic world. Use of digital technologies for the study of Etruscan cities and landscape with a specific focus on the Etruscan city of Vulci. Not open to students who have taken Classical Studies 198.

### ARTHIST219S - The Tokyo Idea: Visualizing a Global City

**Subject:** ARTHIST  
**Catalog Number:** 219S  
**Title:** The Tokyo Idea: Visualizing a Global City

**Description:** Tokyo is the political, cultural, and economic center of Japan. This class will focus on the different portrayals of Tokyo over time and how the city has been imagined in art, architecture, literature, film, popular culture, and fashion from the end of the Edo period to the present day.

### ARTHIST220 - Museum Theory and Practice

**Subject:** ARTHIST  
**Catalog Number:** 220  
**Title:** Museum Theory and Practice

**Description:** Introduction to museum theory and the operation, with a particular focus on art museums. How theory and practice is negotiated in real world settings. Issues involve collecting practices, exhibition practices, and interpretive techniques, as well as legal and ethical issues. Taught at the Nasher Museum.

### ARTHIST221S - The Museum Object: Art and Artifact on Display

**Subject:** ARTHIST  
**Catalog Number:** 221S  
**Title:** The Museum Object: Art and Artifact on Display

**Description:** Technical study focusing on the material properties of artifacts and the technologies of art-making. Collection, exhibition, care, storage, handling, preservation, and conservation of objects in context with anthropological theory and legal and ethical considerations.

### ARTHIST222S - History and Theory of Curatorial Practice

**Subject:** ARTHIST  
**Catalog Number:** 222S  
**Title:** History and Theory of Curatorial Practice

**Description:** An inquiry into the rise of the curatorial discipline by tracing its history and theoretical underpinnings. Primary emphasis on contemporary art and examination of various approaches to curatorial practice including curating in a global context, the rise of the biennial, performance art and non-traditional venues, as well as curatorial critique. Readings will be drawn from a range of popular and academic sources.

### ARTHIST223D - From Agra to Istanbul: Islamic Art and Architecture in the Early Modern Era

**Subject:** ARTHIST  
**Catalog Number:** 223D  
**Title:** From Agra to Istanbul: Islamic Art and Architecture in the Early Modern Era

**Description:** From glittering gold domes to vibrantly colored illuminated manuscripts, this course examines Islamic art and architecture from the Indian subcontinent to the eastern Mediterranean from the fifteenth to mid-nineteenth centuries. This period corresponds to the rise of major Islamic empires, most notably the Mughals, Safavids, and Ottomans, whose capital cities became booming centers of art and architecture. This class will explore the artistic production of these empires and consider the rich cross-cultural connections between them, as well as their relationships with the artistic traditions of both Europe and East Asia.

### ARTHIST224S - Islam, Art, and Society

**Subject:** ARTHIST  
**Catalog Number:** 224S  
**Title:** Islam, Art, and Society

**Description:** Explores the historic interweaving of theology, spirituality, art, architecture, mathematics, & astronomy in the beautification of everyday objects & lived spaces. It examines how underlying principles of beauty and geometry shaped places such as hospitals, palaces, gardens, colleges, mosques, inns, and Sufi lodges as well as their historical functions in Muslim societies. Students also study and reconstruct historic examples of artistic patterns. A rotating variety of case studies across Afro-Eurasia may include sites and cultural artifacts from Bukhara, Cairo, Cordoba, Damascus, Delhi, Fes, Granada, Guangzhou, Hyderabad, Istanbul, Isfahan, Jerusalem, Malacca, Samarqand, Timbuktu & more.
ARHIST225 - Gothic Cathedrals
Subject: ARTHIST
Catalog Number: 225
Title: Gothic Cathedrals
Description: Great cathedrals of Europe in England, Germany, and Italy, with a special focus on France, from roughly 1140 to 1270, and their construction, financing, and role in the fabric of medieval city life. The urban context of each city, the history of the site and its relics, and the artistic and technological developments that made the construction of these complex and large-scale structures possible. A consideration of Romanesque precedents and the origins of the various structural elements of Gothic architecture.

ARHIST227 - Medieval Castles of Europe
Subject: ARTHIST
Catalog Number: 227
Title: Medieval Castles of Europe
Description: This course will examine the transition of Western Europe into a fortified landscape from the mid-11th century until the advent of large-scale artillery in the mid-15th century. In addition to tracking technological and stylistic changes over time, this course will identify the discrete elements of fortification that were combined into a variety of castle plans. Natural resources and physical topography will emerge as central factors in the choice of site and design for medieval castles. As a way of investigating these topics, students will digitally reconstruct a historical or imagined castle in 3D graphics at a specific place and time covered in the course.

ARHIST228S - Arts Policy, Leadership, and Engagement
Subject: ARTHIST
Catalog Number: 228S
Title: Arts Policy, Leadership, and Engagement
Description: This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.

ARHIST230S - Jerusalem
Subject: ARTHIST
Catalog Number: 230S
Title: Jerusalem
Description: Seminar assesses the contribution of Jerusalem’s buildings to its contentiousness from Biblical to modern times. Particular sites considered in the context of the urban history of the city from the time of Jesus through Arab, Crusader, Turkish and British rule to contemporary Israeli control. How these places act upon the religious imagination and how they affect the ideological positions of their users (and their abusers) discussed on the basis of photographs, archaeological reports, news reports, novels, sacred texts and diaries.

<td>Science Fiction Film</td>
</tr>
<tr>
<td>Description</td>
<td></td>
<td>Science fiction film from the 1950s to the present. From talking apes to mind control, forbidden planets to genetic dystopias, alien invasions to travel in time and space, an exploration of classic films in the genre with attention to how the films imagine the relationships among science, politics, and society over time. Attention to visual as well as literary story telling.</td>
</tr>
<tr>
<td>ARTHIST238S - Science Fiction Film</td>
<td>238S</td>
<td>Science Fiction Film</td>
</tr>
<tr>
<td>Description</td>
<td></td>
<td>This class will study science fiction film from 1950 to the present. Discussions will be organized around the relationship between scientific and technological innovation and social and geopolitical transformation: how, for example, the threats of nuclear war and the exhaustion of environmental resources, discoveries in virology and genetics, and the innovations in cybernetics and artificial intelligence all intersect with decolonization and global development, race relations, and new social and geopolitical configurations. We will explore how science fiction film registers and responds to the uncertainties of a changing world: to changing conceptions of the human and of life.</td>

<td></td>
<td>Description</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Through lectures, discussion and individual projects, this course considers the roles women have played in the Early Modern art world as makers, buyers, patrons, donors, critics, and art collectors. It also takes up issues of gender, of race, of masculinity as well as femininity. A central theme of this class is how debates about the so-called Woman Question, which was essentially an ongoing quarrel about the nature and social role of women, shaped the representations and experiences of women of different classes and conditions. Our focus will be on visual representations, as well as period writing of and by women.</td>

ARThIST254 - Renaissance Architecture: A European Perspective

Description
Surveys panorama of European architectural theory and production in fifteenth and sixteenth centuries within a broad geographical area including Italy, France, Spain, Germany, Poland, the Low Countries, and England. Course objectives are to insure knowledge of Renaissance architectural production, related historiography, and contemporary debate and scholarship as well as develop students' analytical and research skills. Reading materials organized chronologically to facilitate students' approach to the field of architectural history, while a thematic, case-study based approach will prevail in class.

ARThIST255 - Art in Renaissance Italy

Description
The course provides a panorama of Italian Renaissance art including theory, painting, print, sculpture, and architecture. The objectives are to ensure knowledge of Renaissance artistic production and related historiography and to develop students' analytical and research skills. Materials are organized thematically around notions of artistic training and workshop practice, techniques, centers of production, art markets, antiquarianism and collections, patronage, gender, artistic rivalry, dissemination of knowledge, relationship with the spectator, social structures, sacred and secular spaces and objects, among others, which will be considered in relation to specific case studies.

ARThIST255A - Renaissance and Baroque Art History

Description
Introduction to the development of painting, sculpture, and architecture in Rome from the fifteenth to the early seventeenth centuries, focusing on the patronage of the Popes and the Papal court. Consent required. (Taught at the Intercollegiate Center for Classical Studies in Rome.)

ARThIST256 - Italian Baroque Art

Description
This course will trace the development of the Italian baroque in architecture, sculpture and painting. It will consider a variety of themes relevant to Baroque artistic production, including religious influences on the art of the period, namely the Reformation and the Catholic Counter Reformation; economic influences; central versus peripheral locations; issues of gender and sexuality; patronage; architectural site and meaning; urban planning and transformation; the artist, his workshop and rivalries; decoding the myths of artistic genius; and seventeenth-century primary sources.

<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTHIST</td>
<td>265</td>
<td>Drawing Foundations in Early Modern Europe</td>
</tr>
</tbody>
</table>

**Description**

Through classroom lectures, museum visits, and studio practice, this course studies the place of drawing since its early modern theorization in the visual arts and in the artistic practice. Drawings can be records of visual observation, or of a speculative thought process; ways of working out ideas, and of presenting plans; they also achieve the status of independent art objects. Students will gain familiarity with drawing as an artistic medium related to major questions about art and society, while also learning fundamental and practical drawing skills that will give deeper insights into theory.

**Title**  
African American Art

**Description**  
Emphasis on works derived from an Afro-United States cultural perspective. Major figures include Henry Ossawa Tanner, Aaron Douglas, Jacob Lawrence, Charles White, Elizabeth Catlett, Romare Bearden, Lois Mailou Jones, and others.

---

**ARTHIST284 - The Political History of Modern Architecture: From Revolution through Neoliberalism**

**Subject**  
ARTHIST

**Catalog Number**  
284

**Title**  
The Political History of Modern Architecture: From Revolution through Neoliberalism

**Description**  
Given the needs for labor, materials, and legal permissions, architects in the modern period by definition intersect with interests of power. This course explores the role of political institutions and ideologies in the history of modern architecture. While the course focuses on European and North American examples, we will also include key case studies of non-Euroamerican architecture and politics. The course provides a foundational knowledge of the history of modern architecture as well as how political institutions and ideologies have influenced that development.

---

**ARTHIST285D - Modern Architecture**

**Subject**  
ARTHIST

**Catalog Number**  
285D

**Title**  
Modern Architecture

**Description**  
The history of European and American architecture from eighteenth-century Neo-Classicism through Gothic Revival, Art Nouveau, and Arts and Crafts to the early twentieth century Bauhaus. Labrouste, Richardson, early Wright, and LeCorbusier among the architects considered.

---

**ARTHIST286 - Contemporary Architecture**

**Subject**  
ARTHIST

**Catalog Number**  
286

**Title**  
Contemporary Architecture

**Description**  
Examination of the Bauhaus through Corporate International Style as a background to the Postmodern core of the course. Later Wright and LeCorbusier, Gehry, Graves, Eisenman, Disney Imaginers among the architects and designers considered. Political, ideological, aesthetic, and technical aspects of building investigated through primary texts.

---

**ARTHIST295 - Chinese Art 1900 to Present**

**Subject** ARTHIST  
**Catalog Number** 295  
**Title** Chinese Art 1900 to Present  

**Description**  
Study of selected works of Chinese art and visual culture (painting, sculpture, architecture, video, performance, and installation art; fashion design and cinema) from 1900 to the present. Emphasis on the visual analysis of objects as well as their social and historical context.

**ARTHIST296A - Berlin: Architecture, Art and the City, 1871-Present**

**Subject** ARTHIST  
**Catalog Number** 296A  
**Title** Berlin: Architecture, Art and the City, 1871-Present  

**Description**  
Development of urban Berlin from the Gründerzeit (the Boom Years) of the 1870s to the present: architecture of Imperial Berlin; the Weimar and Nazi periods; post World War II; reconstruction as a reunified city. The major architectural movements from late historicism to postmodernism. (Taught only in the Duke-in-Berlin Program.)

**ARTHIST297A - Art and Architecture of Berlin, Fifteenth to the Twentieth Century**

**Subject** ARTHIST  
**Catalog Number** 297A  
**Title** Art and Architecture of Berlin, Fifteenth to the Twentieth Century  

**Description**  
Introduction to the visual arts of Germany from the fifteenth to the twentieth century through lectures conducted in Berlin’s museums and cultural institutions. German Old Masters, German Romantic and Realist artists, Modernist art movements, such as Expressionism and New Objectivity, considered in relation to upheavals in modern German history. Taught in English in the Duke-in-Berlin summer program.

**ARTHIST298 - History of Impressionism**

**Subject** ARTHIST  
**Catalog Number** 298  
**Title** History of Impressionism  

**Description**  
The evolution of the impressionist movement and postimpressionist reactions of the 1880s. Particular attention to the work of Manet, Degas, Monet, Renoir, and Pissarro.

**ARTHIST303 - History of Photography, 1839 to the Present**

**Subject** ARTHIST  
**Catalog Number** 303  
**Title** History of Photography, 1839 to the Present  

**Description**  
Major artists and movements in the history of the photographic medium, including visual and critical traditions inherited and manipulated by photographers, the ways photography participated in nineteenth- and twentieth-century art movements as well as documentation and social change, and critical photographic discourse throughout this period. Topics include the invention of photography, 'Art' photography and documentary photography in the nineteenth century, pictorialism, ‘straight’ and purist photography, photography and modernist art movements (dada, surrealism, Bauhaus, Russian avant-garde), twentieth-century documentary, and photography of the 1950s, 1960s, 1970s, 1980s, and 1990s.

**ARTHIST305L - Virtual Museums: Theories and Methods of Twenty-First-Century Museums**

**Subject** ARTHIST  
**Catalog Number** 305L  
**Title** Virtual Museums: Theories and Methods of Twenty-First-Century Museums  

**Description**  
The future of museums will be one of immateriality and interaction. Course focuses on how the 'Internet of Things,' augmented reality technologies, new data analyses of artifacts will transform missions, roles, and goals of museums and collections. Core of course will be digital lab sessions focused on virtual reconstruction of lost heritage—e.g., museums and sites destroyed and damaged by ISIS and other conflicts in Iraq and the Middle East (Hatra, Nineveh, Nimrud, Baghdad).
**ARTHIST310 - Museum Practicum I**

**Subject**  
ARTHIST

**Catalog Number**  
310

**Title**  
Museum Practicum I

**Description**  
Museum work in the context of art-historical, ethical, philosophical, and economic issues related to the presentation of art in museums. Under direction of museum staff, students engage in practicum to gain first-hand knowledge of museum operations. Museum Practicum requires weekly meeting plus five hours per week working in assigned department, additional readings and assignments. Production of exhibition reviews, sample exhibition writing, blog posts, and final presentations.

**ARTHIST311 - Museum Practicum II**

**Subject**  
ARTHIST

**Catalog Number**  
311

**Title**  
Museum Practicum II

**Description**  
Additional depth or breadth of experience in museum work in the context of art-historical, ethical, philosophical, and economic issues related to the presentation of art in museums. Under the direction of museum staff, students engage in practicum to gain first-hand knowledge of museum operations. Museum Practicum II requires eight hours per week working in assigned department, additional readings and assignments. Students produce documents related to a museum department. Prerequisite: Art History 310.

**ARTHIST312 - Internship in New York**

**Subject**  
ARTHIST

**Catalog Number**  
312

**Title**  
Internship in New York

**Description**  
Immersion in the professional art world through apprenticeship to a sponsoring artist or organization. Students spend fifteen hours per week at the internship and write a substantive paper containing significant analysis and interpretation of the relation of the students' sponsoring institution to the art form of activity as a whole, the system of production and consumption surrounding that art form or activity, and the sponsor's organizational framework, operating mechanics, and role in the creation, preservation, or interpretation of the art form or activity. Open only to students admitted to the Duke in New York Arts Program. Does not count toward the major. Consent of instructor required.

Internship in New York

**Description**  
Immersion in the professional world of the arts and media through working with a sponsoring artist, organization, or business. Open only to students admitted to the Duke in New York Arts and Media Program. Does not count toward the major. Consent of instructor required.

**ARTHIST313A - The Business of Art and Media**

**Subject**  
ARTHIST

**Catalog Number**  
313A

**Title**  
The Business of Art and Media

**Description**  
Duke in New York. The changes experienced by print and visual media (book publishing, magazines, newspapers, TV, films, theatre, advertising) in the twenty-first century in how art and business can, and often must, be done and in how they interact with society. Examinations through readings (including selected case histories) and guest speakers of how technology and technological change affect art and society today. Satisfies Area III requirement for English majors.
**ARTHIST315 - Mapping History with Geographic Information Systems**

**Subject**: ARTHIST  
**Catalog Number**: 315  
**Title**: Mapping History with Geographic Information Systems

**Description**
Beginner/intermediate Geographic Information System (GIS) course designed to help students learn how to investigate history spatially. Emphasizes perspectives, procedures, and tools that are relevant to applications of GIS in Art History and Humanistic disciplines. Designed as a hybrid lecture/lab format in which direct instruction is supplemented by hands on learning labs using ArcGIS software and real-world spatial data. The main skills students will gain are: integration of spatial and tabular data, geoprocessing, data visualization, creating features, editing features, vector and raster integration, spatial analysis, georeferencing.

---

**ARTHIST317 - The Body in Art in Early Modern Europe: Power and Limits of Corporeal Representations**

**Subject**: ARTHIST  
**Catalog Number**: 317  
**Title**: The Body in Art in Early Modern Europe: Power and Limits of Corporeal Representations

**Description**
This course studies the artistic representations of the human body in many guises: aesthetic, political, social, cultural, and erotic. It analyses the different strategies artists deployed to develop rhetorics of the body both physical and emotional. It considers different media (including painting, sculpture, drawings, prints, architecture, and gardens) and major theoretical frameworks (including feminist theory, phenomenology, social theory and somaesthetics). This course considers the body dynamically through composition, as object of investigation, as locus of meaning and through social understanding. Lectures and discussions are complimented by corporeal performances and improvisations.

---

**ARTHIST318SA - New York Scenes**

**Subject**: ARTHIST  
**Catalog Number**: 318SA  
**Title**: New York Scenes

**Description**
New York Scenes will focus on the various cultural institutions, scenes, establishments, happenings, hang-outs, movements, etc., that make up New York City. Early in the semester, students will select a particular 'scene' to research over the course of the term. For example: Tin Pan Alley (popular music, theater), The Lafayette Theatre (black arts), St. Mark's Church (poetry, punk rock), the Chelsea Hotel (mid-century writers, pop stars and outcasts), La MaMa (experimental theater), the Christopher Street Piers (queer history, lgbtq youth) and Union Square Park (leftist organizing history). Open to students in the Duke in New York program.

---

**ARTHIST334 - Roman Spectacle**

**Subject**: ARTHIST  
**Catalog Number**: 334  
**Title**: Roman Spectacle

**Description**
Gladiatorial games, wild beast hunts, elaborately-staged executions of condemned criminals, and chariot racing as some of the most popular forms of public entertainment in the Roman world. The ritual of these entertainments and spectacles, the circumstances of and occasions for their performance, and the form and elaboration of the venues - the amphitheater, the circus, the theater, and the stadium - in which they took place. Visual and literary representations of these spectacles.

<td>This course explores the history of garden and landscape design through a series of case studies beginning with ancient gardens of the Mediterranean and Near East and ending with the Sarah P. Duke gardens. Students will explore how landscapes were shaped to meet the aesthetic, agricultural, and social needs of a range of different cultures and time periods. Among the themes explored are the tension between the natural environment and human intervention and the religious, philosophical, and cultural significance of garden design. The class will culminate in a detailed study of Duke gardens, in which students will digitally map and conduct research into a portion of the gardens.</td>

<td>ARTHIST339 - Chicago: Architecture, Urbanism, Politics</td>
<td>339</td>
<td>Chicago: Architecture, Urbanism, Politics</td>
</tr>
<tr>
<td>Description</td>
<td></td>
<td>Building has often been at the center of major social, economic and political struggles of the modern era. This course will analyze the development of architecture and urbanism in Chicago, from its incorporation to the present day, in relation to these historical struggles. Focusing particularly on the concept of place and space, the course will give the student an overview of building in Chicago and analyze in detail the theories and practices which govern urban planning up to our own times. Select sections of the course will particularly emphasize Chicago 1920-1975, and how questions of class and race intersect with a political economy of architecture.</td>

<td>ARTHIST340S - Classical Sculpture</td>
<td>340S</td>
<td>Classical Sculpture</td>
</tr>
<tr>
<td>Description</td>
<td></td>
<td>Statues were the 'other population' of Greece and Rome. Portraits of athletes, generals, kings, emperors lined streets and filled markets. Why? What do statues do for people setting them up, for people viewing them? Seminar explores place of statues in Greek and Roman society, and relationship between context, style, and meaning. Course approaches material thematically and contextually. Particular attention paid to changing physical, cultural, historical, political contexts in which statues were set up and in which they continued to operate for centuries. Instructor consent required.</td>

ARThIST342A - Dante and the Art of Hell

Subject: ARTHIST  
Catalog Number: 342A  
Title: Dante and the Art of Hell

Description:
Dante's Divine Comedy, has inspired medieval illuminations, Renaissance frescoes, Surrealist paintings, and modern sculptures. This course explores this remarkable visual history to interpret Dante's poem. What new features of Dante's world do these visual adaptations bring into focus? Visiting sites throughout Italy, we will also aim to reconstruct Dante's visual and built environment to understand what is distinctive about his vision. Taught in English. Offered through Duke in Venice and Duke in Bologna programs.

ARThIST343SA - Conservation and Management of the Material Heritage

Subject: ARTHIST  
Catalog Number: 343SA  
Title: Conservation and Management of the Material Heritage

Description:
This course offers theoretical and practical experience in the management of cultural heritage, with special reference to Roman art and architecture in Rome. Students live the experience of being a conservator of archaeological items, monuments, and sites, and a manager of cultural and material heritage.

ARThIST344 - Performance Art History and Theory

Subject: ARTHIST  
Catalog Number: 344  
Title: Performance Art History and Theory

Description:
Performance Art History and Theory explores cultural experimentation, theoretical strategies, and ideological aims of performance art internationally; examines interchanges between artists' theories of performance, stylistic development, and impact in the context of cultural criticism and art history; traces interdisciplinary genealogies of performance globally; thinks about the body as a vehicle for aesthetic expression, communication, and information in its critique of social and political conditions; studies performance and gender, sexuality, race, and class; asks how performance alters the semiotics of visual culture and contributes to a paradigm shift from modernism to postmodernism.

ARThIST345 - African Art: From Royal Court to Contemporary Marketplace

Subject: ARTHIST  
Catalog Number: 345  
Title: African Art: From Royal Court to Contemporary Marketplace

Description:
Explores traditional, modern, and contemporary African art from the ever-shifting perspectives of prestige, power, and identity. The conceptual framework guiding this survey is both a broad introduction to the major artists and artworks of Africa across millennia, as well as probing specific questions about the changing definitions of African art, individual versus state identities in African art, and the impact of religion, colonization, and trade/commerce on African art.
**ARTHIST347 - Roman Coinage: The Materiality of an Ancient Economy**

**Subject**: ARTHIST  
**Catalog Number**: 347  
**Title**: Roman Coinage: The Materiality of an Ancient Economy  

**Description**  
The scholarly study of Roman coinage, focusing on historical trends from the late Republic to the early Empire, 3rd c. BCE-2nd c. CE. Topics of particular attention will be: introduction of coinage in Rome and the provinces; historically contextualizing the making, using, and losing of money (how and why coins are produced, exchanged, buried, counterfeited, even used in religious rituals). Coins as works of art—but common, widely circulating works of art produced by governments, often used to spread propaganda about state goals or national identity.

**ARTHIST351 - Art of the Meal: Alcohol and Feasting in the Ancient World**

**Subject**: ARTHIST  
**Catalog Number**: 351  
**Title**: Art of the Meal: Alcohol and Feasting in the Ancient World  

**Description**  
Commensality—the act of eating and drinking together—is a fundamental part of human social life, no matter the time or place. This course examines the wide variety of evidence from the ancient world for feasting activities, and especially the production and consumption of alcoholic beverages, in text, visual and material culture. Readings in anthropological theory and archaeological and ethnographic case studies are used to explore human relationships to food and alcohol in different social contexts, and their use in the construction of cultural similarity and difference, group identities, and social hierarchies. With special emphasis on the ancient Mediterranean and Middle East.

**ARTHIST354SL - Digital Art History I: New Representational Technologies**

**Subject**: ARTHIST  
**Catalog Number**: 354SL  
**Title**: Digital Art History I: New Representational Technologies  

**Description**  
Research and study in material culture and visual arts expressed by using new visual technologies to record and communicate complex sets of visual and physical data from urban and/or archaeological sites. Introduces techniques for presentation and interpretation of visual material through a series of interpretive and reconstructive technologies, including development of web pages, timelines, Photoshop, Illustrator, Trimble SketchUp, Google Maps, GIS. Uses test cases (archaeological site or urban/architectural site) to develop techniques of interpretation and representation. Instructor consent required.

**ARTHIST360D - What Is Beauty?**

**Subject**: ARTHIST  
**Catalog Number**: 360D  
**Title**: What Is Beauty?  

**Description**  
Exploration of Western theories of beauty from Plato to the present. What do we mean when we call something beautiful? Does beauty belong to an object or an observer’s mind? Is art or nature the best example of beauty? The class also examines the intertwining of modern theories of beauty with theories of race; analyzes the gender and power dynamics of theories of beauty; and asks about the relationship of aesthetics to society, politics, and biology. Readings include authors such as Plato, Burke, G.E. Lessing, Kant, Schiller, Charles Darwin, George Eliot, Nietzsche, W.E.B. DuBois, Arthur Danto, Elaine Scarry, Alice Walker, and Semir Zeki. Taught in English.

**ARTHIST378 - Chinese Buddhist Art**

**Subject**: ARTHIST  
**Catalog Number**: 378  
**Title**: Chinese Buddhist Art  

**Description**  
Chinese sculpture, painting, and architecture in relation to Buddhist texts, practice, and ritual from the fourth through the ninth century C.E. Introduction to precedents in Indian and Central Asian Buddhist art. Emphasis on the relationship between Buddhist and non-Buddhist imagery.

**ARTHIST381D - Global Art Since 1945**

**Subject**: ARTHIST  
**Catalog Number**: 381D  
**Title**: Global Art Since 1945  

**Description**  
Major avant-garde movements of the post-World War II era, with a concentration on the unprecedented changes in the mediums of art, its forms, impact on society and politics, and ethical role in shaping culture through painting and sculpture, conceptual and performance art, installation and new media, video, photography, and film.
**ARThIST381S - Global Art Since 1945**  
**Subject** ARThIST  
**Catalog Number** 3815  
**Title** Global Art Since 1945  
**Description**  
Major avant-garde movements of the post-World War II era, with a concentration on the unprecedented changes in the mediums of art, its forms, impact on society and politics, and ethical role in shaping culture through painting and sculpture, conceptual and performance art, installation and new media, video, photography, and film.

**ARThIST382 - Visualizing Cities: Representing Urban Landscapes, Cultures, and Environments**  
**Subject** ARThIST  
**Catalog Number** 382  
**Title** Visualizing Cities: Representing Urban Landscapes, Cultures, and Environments  
**Description**  
Visualizing cities in theory and practice. Exploring digital and visual representation of landscapes, structures, environments, history, culture, architecture, events, and populations. Change over time, cultural heritage, possible futures, and alternate pasts from historical, cultural, documentary, and scientific evidence and archives. The idea of the city as a conceptual category and metaphor. Ubiquitous computing in urban environments as a medium for interaction. Global cities and diaspora. Visual imagery and written accounts. Use of mapping, imaging, 3D, augmented reality, games. Individual and group research and production of visualizing cities projects. Topics and temporal foci vary.

**ARThIST383 - The Black Atlantic**  
**Subject** ARThIST  
**Catalog Number** 383  
**Title** The Black Atlantic  
**Description**  
The African diaspora—a direct result of the transatlantic slave trade and Western colonialism—has generated a wide array of artistic achievements, from the 'shotgun' houses of New Orleans to the urban graffiti of NYC. The course surveys several major cultural groups in West and Central Africa and their aesthetic impact on the arts, religions, and philosophies of peoples of African descent in South America, the Caribbean, and the United States.

**ARThIST384 - Art of the United States**  
**Subject** ARThIST  
**Catalog Number** 384  
**Title** Art of the United States  
**Description**  
Course introduces the major art forms and aesthetic theories developed in the US from colonial period to present. Emphasis on architecture, painting, sculpture, graphic, and decorative arts. Structured chronologically, this course defines the characteristics of the different historical periods and the ways American artists both adopted and diverged from other models to create their own distinctive national identity.

**ARThIST390 - Special Topics in Art History**  
**Subject** ARThIST  
**Catalog Number** 390  
**Title** Special Topics in Art History  
**Description**  
Topics vary by semester.

**ARThIST390-1 - Topics in Renaissance Art**  
**Subject** ARThIST  
**Catalog Number** 390-1  
**Title** Topics in Renaissance Art  
**Description**  
Specific problems dealing with the iconography, style, or an individual master from c. 1300 to 1600. Subject varies from year to year.

<tr>
<td>ARTHIST</td>
<td>417S</td>
<td>Art &amp; Democracy: Madrid/Barcelona/Valencia/Bilbao</td>
<td>Beyond the poster, mural and graffiti, was there a painterly art in the pre-digital age that found a fitting place on the street and the square, the citizen venues where direct democracy and the people's rights first emerged? Is there an ethically responsive and socially responsible praxis which may yield visual works of enduring value without sacrificing the humanistic imperative of communicability? Since the 1950s such questions concerned Spanish artists in all styles (Tapies, Genoves, Ibarrola, Equipo Cronica). Like Goya before them, these painters tried to help their society transition from political tyranny to more inclusive forms of participation. Prerequisite: Advanced reading knowledge of Spanish.</td>
</tr>
<tr>
<td>ARTHIST</td>
<td>426S</td>
<td>France-Asia: Cultural Transfers and Translations in a Globalized Context</td>
<td>This class explores the dynamic contemporary Franco-Asian dialogue with a specific focus on China, Japan, Vietnam, Laos and Cambodia. Seeking to go beyond the East-West divide, the seminar investigates the current stakes of this dialogue, given its growing complexity after 1945. It examines the postcolonial legacy of France's occupation of Indochina, and how East Asia has also often been viewed as an 'Other,' serving to crystallize French anxieties over political and cultural power. It uses an interdisciplinary perspective encompassing novels, cinema, dance, visual arts, and critical theory to trace a web of exchanges in a globalized context. Taught in French.</td>

<td>ARTHIST475S - Queer Phenomenology &amp; Art</td>
</tr>
<tr>
<td>Description</td>
<td></td>
<td></td>
</tr>
<tr>
<td>This seminar applies phenomenology to writing and thinking about art. Beginning with primary debates concerning how things present themselves to perception (Husserl, Heidegger, Shapiro, Merleau-Ponty, Beauvoir, Sartre), the course then considers poetic extrapolations (Fanon, Focillon, Bachelard), culminating in contemporary accounts (Nesbit, Salamon, Wainwright, and Ahmed) that interrogate phenomenology’s basic precepts while employing its methods to address art in relation to bodily experience, identity, sexual orientation, and social context. Short exercises and a final paper provide students with the opportunity to work through these ideas in light of their own interests and research.</td>

ARTHIST492 - Independent Study
Subject: ARTHIST
Catalog Number: 492
Title: Independent Study
Description: See Art History 491. Open only to qualified students in the senior year. Consent of instructor and director of undergraduate studies required.

ARTHIST493 - Research Independent Study
Subject: ARTHIST
Catalog Number: 493
Title: Research Independent Study
Description: Individual research in a field of special interest under the supervision of a faculty member, the central goal of which is a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. Open only to qualified students in the senior year. Consent of instructor and director of undergraduate studies required.

ARTHIST494 - Research Independent Study
Subject: ARTHIST
Catalog Number: 494
Title: Research Independent Study
Description: See Art History 493. Open only to qualified students in the senior year. Consent of instructor and director of undergraduate studies required.

ARTHIST495S - Honors Thesis Workshop
Subject: ARTHIST
Catalog Number: 495S
Title: Honors Thesis Workshop
Description: Research and writing skills for students completing an honors thesis; bibliography, library and on-line research; use of archives; picture research and other research skills relating to the history of art; organization of material and preparation for writing; drafting, editing, and production of a finished text; use of scholarly conventions of referencing, footnoting etc. Compulsory for seniors preparing a graduation with distinction dissertation in art history. Instructor consent required.

ARTHIST89S - First-Year Seminar
Subject: ARTHIST
Catalog Number: 89S
Title: First-Year Seminar
Description: Topics vary each semester offered.

ARTS&SCI101D - Introduction to Inquiry and Research across Disciplines
Subject: ARTS&SCI
Catalog Number: 101D
Title: Introduction to Inquiry and Research across Disciplines
Description: Students will analyze, discuss, and write about complex issues through multiple disciplinary frameworks to compose academic arguments about a relevant topic. Topics may include, but are not limited to, public health, big data, digital humanities, behavioral trends, and political climate. Students will learn about writing transfer as they explore research methods and epistemologies across disciplines, while evolving their writing and reasoning strategies in support of their academic arguments. This course is taught by faculty in the Thompson Writing Program.
ARTS&SCI190 - Signature Course (Special Topics)

Subject: ARTS&SCI  
Catalog Number: 190  
Title: Signature Course (Special Topics)

Description: Duke Signature Courses are wide-ranging, theme-based courses that integrate perspectives from across academic fields of inquiry and provide a common intellectual experience for students from a variety of fields and interests. Signature Courses feature some of Duke's most renowned scholar-teachers exploring large themes, enduring questions, or compelling challenges of their disciplines and of our times. Topics vary.

ARTS&SCI201S - Ethics, Citizenship, and the Examined Life

Subject: ARTS&SCI  
Catalog Number: 201S  
Title: Ethics, Citizenship, and the Examined Life

Description: Ethics, Citizenship and the Examined Life explores several related themes. It attends to traditional Asian and Western ideals, and contemporary analyses of moral self-cultivation, personal achievement, and meaning to obligations beyond the self to family, community, religion, party, nation, and humanity. Whether it is possible to reconcile the criteria for 'doing the right thing' across cultures and ages; and to the ways in which Asian and Western philosophical and political traditions have addressed the relationship between a meritocratic elite and democratic forms of government.

ARTS&SCI205S - Composing Oneself: Stress, Identity, and Wellness

Subject: ARTS&SCI  
Catalog Number: 205S  
Title: Composing Oneself: Stress, Identity, and Wellness

Description: Interdisciplinary exploration of arts and science related to stress, identity, and wellness. Multi-dimensional focus fusing science, theory, art, literature, and performance to understand structural causes of stress, their physiological effects, and how stressors impact our identities and community ethics. Through text analysis and experience, students explore how arts of wellness, including yoga, mindfulness, and art therapies, impact stress, identity, and ethics. Course texts include literary and discourse theory, social science, neuroscience, and primary texts related to stress, identity, and wellness, including nonfiction, fiction, poetry, art, music, performance.

ARTS&SCI206 - Contemporary Documentary Film: Filmmakers and the Full Frame Documentary Film Festival

Subject: ARTS&SCI  
Catalog Number: 206  
Title: Contemporary Documentary Film: Filmmakers and the Full Frame Documentary Film Festival

Description: Integrated with the films and filmmakers of the Full Frame Documentary Film Festival. The art form, style, and technology of contemporary documentary films. Issues of autonomy and power, politics, and public policies. Analysis of outstanding films from around the world. Presentations and discussions by filmmakers.

ARTS&SCI301S - Foundations of Research

Subject: ARTS&SCI  
Catalog Number: 301S  
Title: Foundations of Research

Description: The Foundations of Research course is designed to provide students with comprehensive understanding of research, as well as the practical skills needed to navigate the research experience. The course will cover a range of topics, including goal setting, mentoring, resource finding, research ethics, and research communication. This course is reserved for Duke Kunshan University students.

ARTS&SCI390 - University Course (Special Topics)

Subject: ARTS&SCI  
Catalog Number: 390  
Title: University Course (Special Topics)

Description: Interdisciplinary course on topics of social relevance, sponsored by the Dean of Arts & Sciences. Topics vary each year.

**Description**

This course introduces the theory and practice of the fundamentals of design. Students explore critical thinking, visual literacy, elements and principles of design, color, composition, typography and other design topics to lay a basic foundation in the visual arts. Through lectures, readings and exercises students gain knowledge of visual concepts and vocabulary, explore formal elements and principles of design, analyze iconic design to understand what makes it great, and experience different physical and digital media. Hands-on assignments will inspire students, and challenge them to explore the practice of design and art, and to work towards successful solutions through experimentation.

**Description**

Foundation class in photography utilizing black and white film and a wet darkroom. Shoot, process, and print individual student work throughout the semester. Emphasis on the documentary approach and a continual visual exploration of meaning and metaphor in the form of regular assignments, slide lectures of important historic and contemporary photographic work, and critiques of each other’s work. No textbooks are required, though students will need to budget a comparable amount for supplies and equipment.
### ARTSVIS119S - Introduction to Digital Photography

**Subject**: ARTSVIS  
**Catalog Number**: 119S  
**Title**: Introduction to Digital Photography  

**Description**
An emphasis on digital photography, using the camera as a distinctive way of seeing and knowing. Class assignments accompanied by historical and theoretical readings, lectures, class discussions, and field trips. Final projects include thematic photographic series and an individual documentary essay.

### ARTSVIS120 - Compositional Painting

**Subject**: ARTSVIS  
**Catalog Number**: 120  
**Title**: Compositional Painting  

**Description**
Studio practice in painting with individual and group criticism and discussion of important historical or contemporary ideas. Prerequisite: Visual Arts 199.

### ARTSVIS130 - Experimental Drawing: Image and Bit Play

**Subject**: ARTSVIS  
**Catalog Number**: 130  
**Title**: Experimental Drawing: Image and Bit Play  

**Description**
Approaches the creation of digital image-making in collective play. Includes individual and group brainstorming using different digital and traditional analogue processes (drawing, painting, and collage) to study how the ludic (play) enables creative thinking and experimentation in digital image manipulation. Database of images presented from multiple genres. Students work on outside assignment critiqued at end of class.

### ARTSVIS135 - Experimental Sculpture and Installation Art

**Subject**: ARTSVIS  
**Catalog Number**: 135  
**Title**: Experimental Sculpture and Installation Art  

**Description**
This course explores ideas surrounding the creation of experimental sculpture. Employs non-traditional methods: 'readymades,' non-traditional materials, conceptual processes, digital interaction and fabrication techniques (rapid prototyping), mixed media including video, and projection technologies. Content of work driven by individual student interests—sustainability, the anthropocene, feminism, social and political commentary, and/or more formal, abstract sculptural relations. Instructor consent required.

### ARTSVIS140 - Create, Innovate, Act: Creativity, Innovation, and Social Action

**Subject**: ARTSVIS  
**Catalog Number**: 140  
**Title**: Create, Innovate, Act: Creativity, Innovation, and Social Action  

**Description**
Introductory course for first and second year undergraduates. This course bridges sciences, arts, and humanities, with focus on experiential knowledge and engagement with the everyday. Combines methods from broad range of areas based on creative inquiry and innovation. Students chose particular areas, or combination thereof, discussing their own research, inventions, artworks, compositions, performances, new media, or activist interventions. Specific skills developed at specialized maker spaces, labs, and studios. With exception of guest presentations, lectures delivered in video format to maximize class time production. Guest speakers include artists, activists, innovators, entrepreneurs, curators, and scholars.

### ARTSVIS171SA - Capturing the City: Documentary Photography in Berlin

**Subject**: ARTSVIS  
**Catalog Number**: 171SA  
**Title**: Capturing the City: Documentary Photography in Berlin  

**Description**
History and development of documentary photography in Germany since the 19th century. Photography fieldwork projects focused on interpreting cultural life, public spaces, landscapes, and people in Berlin. Includes techniques and practice of color photography—composition, lighting, color correction, editing, and sequencing. Engagement with contemporary photography scene in Berlin through visits with area artists, museum visits, and mounting of exhibition of student work. Offered through the Duke in Berlin program.
ARTSVIS190FS - Topics in Visual Arts

**Subject**: ARTSVIS  
**Catalog Number**: 190FS  
**Title**: Topics in Visual Arts

**Description**
Subjects, areas, or themes that embrace art and visual culture. Open only to students in the Focus program.

ARTSVIS198 - Experimental Interface Design

**Subject**: ARTSVIS  
**Catalog Number**: 198  
**Title**: Experimental Interface Design

**Description**
Class explores issues surrounding embodied approaches to interface design. Articulates methodology for generating new forms of human/computer interface; includes workshops, discussions, student presentations, critiques and group brainstorming sessions. Content related to biomimetics; haptic body knowledge; multi-modal sensing; physical computing; physical | digital relationships; networked relations; the potentials of virtual space and different qualities of space, both visual and sonic. Database potentials discussed and explored in service of developing new approaches to interface. Instructor consent required.

ARTSVIS199 - Drawing

**Subject**: ARTSVIS  
**Catalog Number**: 199  
**Title**: Drawing

**Description**
Drawing as integrative tool where ideas and processes are explored and expanded through a variety of media. Still life, figure, landscape, architecture. Representation, abstraction, and working from imagination. Through problem solving within a range of projects, development of a visual language, and drawing skills to be applied to conceptual, visual, and technical disciplines. Class open to 1st and 2nd year students only. Students 3rd year and above will need permission # to enroll.

ARTSVIS203 - Introduction to Architectural Design

**Subject**: ARTSVIS  
**Catalog Number**: 203  
**Title**: Introduction to Architectural Design

**Description**
Introduction to architectural design: space making with emphasis on process, abstraction, and modes of representation. Drawing conventions, orthographic projection, model building, rendering, digital technologies as forms of visual inquiry. Tectonics, space, scale, and material as ensemble parts of project presentations to represent ideas as well as artifacts. Final projects on building program and architectural issues: threshold, view, entry. Instructor consent required.

ARTSVIS204S - Medicine and the Vision of Documentary Photography

**Subject**: ARTSVIS  
**Catalog Number**: 204S  
**Title**: Medicine and the Vision of Documentary Photography

**Description**
The intersection of healthcare and documentary photography. Explore work of established photographers engaged with healthcare topics. Produce semester-long documentary photography project and 5-10 page documentary essay on healthcare related topic. Students must have or quickly develop proficiency in the use of a digital SLR camera and Adobe Lightroom. Course materials include photographs, articles, and books. Class sessions combine critique of student work, discussion of course materials, and discussion of ethical questions involved in documentary representation of healthcare-related topics.

ARTSVIS205 - Intermediate Drawing

**Subject**: ARTSVIS  
**Catalog Number**: 205  
**Title**: Intermediate Drawing

**Description**
Allows students to explore their artistic interests and biases through a series of self-directed projects. Both the directness and the flexibility of the medium of drawing are investigated. Prerequisites: Visual Arts 199 and consent of instructor.
ARTSVIS206 - Digital Imaging

Subject: ARTSVIS
Catalog Number: 206
Title: Digital Imaging

Description:
Photoshop and Illustrator used to introduce single and serial images for print and web output. Consent of instructor required.

ARTSVIS207S - Comics and Zines: History, Theory, and Practice

Subject: ARTSVIS
Catalog Number: 207S
Title: Comics and Zines: History, Theory, and Practice

Description:
Focus on the art of the comic book, zines and other sequential forms such as graphic novels and photo comics (fumetti, fotonovelas). Methods include the study and practice of creating sequential art, storytelling, drawing, graphic design, basic book making, and DIY publishing. Students make complete comic books and small editions while learning the history and theory of these genres and techniques.

ARTSVIS209 - 3D Modeling and Animation

Subject: ARTSVIS
Catalog Number: 209
Title: 3D Modeling and Animation

Description:
Basic concepts of 3D modeling and animation; fundamentals of computer geometry; knowledge of basic tools of 3D software (Maya); introduction to modeling, animation, texturing, lighting, and rendering; combination of these techniques in a final project. Recommended prerequisite: Visual and Media Studies 206 or 396.

ARTSVIS21 - General Art, Studio

Subject: ARTSVIS
Catalog Number: 21
Title: General Art, Studio

Description:
Credit for advanced placement on the basis of the College Board examination in Studio Art. Does not count toward the major in visual arts.

ARTSVIS210 - Sculpture

Subject: ARTSVIS
Catalog Number: 210
Title: Sculpture

Description:
Sculptural principles, processes, and issues introduced through lectures, readings, studio assignments, individual projects, and field trips. Consent of instructor required.

ARTSVIS211 - Intermediate Sculpture

Subject: ARTSVIS
Catalog Number: 211
Title: Intermediate Sculpture

Description:
Studio practice in sculpture at the intermediate level. Group and individual discussion and critique. Prerequisite: Visual Arts 210 and consent of instructor.
### ARTSVIS212FS - Digital Documentary Photography: Education, Childhood, and Growth

**Subject** | ARTSVIS  
---|---  
**Catalog Number** | 212FS  
---|---  
**Title** | Digital Documentary Photography: Education, Childhood, and Growth  
---|---  
**Description**

Documentary photography as a tool for exploring public education in Durham. Learn digital techniques including camera function, Photoshop, ink-jet printing, audio capture and production of audio-visual slide shows. Discuss ethical issues that emerge as a result of digital photographic impermanence. Service-learning environment consisting of fieldwork photography in collaboration with community organization, culminating in an exhibit. This is a Focus Program Course for Knowledge in the Service of Society. Department consent is required.

### ARTSVIS212S - Digital Documentary Photography: Education, Childhood, and Growth

**Subject** | ARTSVIS  
---|---  
**Catalog Number** | 212S  
---|---  
**Title** | Digital Documentary Photography: Education, Childhood, and Growth  
---|---  
**Description**

Documentary photography as a tool for exploring public education in Durham. Learn digital techniques including camera function, Photoshop, ink-jet printing, audio capture and production of audio-visual slide shows. Discuss ethical issues that emerge as a result of digital photographic impermanence. Service-learning environment consisting of fieldwork photography in collaboration with community organization, culminating in an exhibit. Consent of instructor required.

### ARTSVIS216S - Documentary Photography and the Southern Culture Landscape

**Subject** | ARTSVIS  
---|---  
**Catalog Number** | 216S  
---|---  
**Title** | Documentary Photography and the Southern Culture Landscape  
---|---  
**Description**

Emphasis on the tradition and practice of documentary photography as a way of seeing and interpreting cultural life. The techniques of color and black-and-white photography - exposure, development, and printing - diverse ways of representing the cultural landscape of the region through photographic imagery. The role issues such as objectivity, clarity, politics, memory, autobiography, and local culture play in the making and dissemination of photographs.

### ARTSVIS220 - Intermediate Painting

**Subject** | ARTSVIS  
---|---  
**Catalog Number** | 220  
---|---  
**Title** | Intermediate Painting  
---|---  
**Description**

Learn to paint with oil paint, using a primary palette and mixing secondary colors. Work from observation and learn how to see color. Paint still lives, self-portraits, interior spaces and exterior spaces. Course may be repeated for credit. Prerequisite: Visual Arts 120. This requirement can be waived by the instructor. Consent of instructor is required.
**ARTSVIS222S - The Photographic Portfolio**

**Subject**
ARTSVIS

**Catalog Number**
222S

**Title**
The Photographic Portfolio

**Description**
Students actively seek specific photographic territory to explore and build a body of work. The resulting images are extensively worked for sequencing. Particular emphasis on the making of high quality prints. Semester culminates in the production of finished portfolios in three formats: a printed form, a digital form, and an exhibition or installation form. Each student's evolving body of work to be informed by relevant precedents from the history of photography. These are brought into discussions of the work as the semester progresses, with an emphasis on examining bodies of photographic work that communicate something larger than a single idea. Instructor consent required.

**ARTSVIS223 - Graphic Design in Multimedia: Theory and Practice**

**Subject**
ARTSVIS

**Catalog Number**
223

**Title**
Graphic Design in Multimedia: Theory and Practice

**Description**
Description history and theory. Lectures and projects focused on direct interaction with digitized elements of historically significant designs. Design elements and principles. Comparison of the language and tools of old and new media. Analysis of visual materials, discovering conceptual and stylistic connections, including Illustrator and Photoshop. Consent of instructor required.

**ARTSVIS224 - Printmaking: Silkscreen**

**Subject**
ARTSVIS

**Catalog Number**
224

**Title**
Printmaking: Silkscreen

**Description**
The silkscreen medium and its stencil-making processes including paper stencils, blockouts, crayon, and photographic methods. Students develop a significant body of prints using these techniques. Consent of instructor required.

**ARTSVIS226 - Printmaking: Relief and Monotype**

**Subject**
ARTSVIS

**Catalog Number**
226

**Title**
Printmaking: Relief and Monotype

**Description**
Relief methods of woodcut and linoleum block printing and monotype techniques. Concentration on both the technical and historical aspects of the media and their expressive potentials. Students develop a significant body of prints using these techniques. Instructor consent required.

**ARTSVIS228S - Arts Policy, Leadership, and Engagement**

**Subject**
ARTSVIS

**Catalog Number**
228S

**Title**
Arts Policy, Leadership, and Engagement

**Description**
This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.

**ARTSVIS229S - Experimental Filmmaking**

**Subject**
ARTSVIS

**Catalog Number**
229S

**Title**
Experimental Filmmaking

**Description**
The history of avant-garde in film and video combined with production exercises.
ARTSVIS232S - Small Town USA: Local Collaborations

Subject: ARTSVIS
Catalog Number: 232S
Title: Small Town USA: Local Collaborations

Description:
Theory and practice of documentary photography in a small-town context. Students working in collaboration with one nearby small town complete a documentary photographic study of one individual or group within that town. Includes analysis of the documentary tradition, particularly as it relates to locally situated work and to selected individual projects; building visual narrative, developing honest relationships with subjects, responsibility to subjects and their communities, and engaging with and portraying a community as an outsider. Photo elicitation and editing techniques. Consent of instructor required. Required participation in service-learning.

ARTSVIS233S - Costume Design

Subject: ARTSVIS
Catalog Number: 233S
Title: Costume Design

Description:
This course is designed to introduce students to the essentials of costume design and rendering. Emphasis will be placed on historical research, applying conceptual thought, and script and character analysis. Students will also explore and deepen visual art skills using figure drawing and various media as communication tools. No previous art or theatre experience necessary.

ARTSVIS234S - Scene Design

Subject: ARTSVIS
Catalog Number: 234S
Title: Scene Design

Description:
Study of theory and methodology of set design for stage through examination of historical and contemporary stage design as well as conceptualization, research, and development of design solutions for assigned plays.

ARTSVIS235S - Lighting Design

Subject: ARTSVIS
Catalog Number: 235S
Title: Lighting Design

Description:
Introduction to the process and practice of lighting design for the theater. Focus on text analysis, research, design process, instrumentation, control, color, design documents, and realization of designs in the theater. Includes the study of principles and practices, labs in design imagery, and projects in lighting design.

ARTSVIS237 - Book Art: Typography as Image

Subject: ARTSVIS
Catalog Number: 237
Title: Book Art: Typography as Image

Description:
Investigates use of text as vehicle for communication and visual form within book format. Typography, interaction of writing and page design, history of typography, writing and printed page, use of written form as work of art, book design, binding and how text as visual element interacts with and becomes the image. Prerequisite: Visual Arts 201 preferred. Instructor consent required.

ARTSVIS238 - Digital Printmaking: Exploring Photo Silkscreen and Photoshop

Subject: ARTSVIS
Catalog Number: 238
Title: Digital Printmaking: Exploring Photo Silkscreen and Photoshop

Description:
Explore different facets of photo-silkscreen process through development of digital imagery using a variety of digital approaches. Application of paralleling layering approaches found in image development and printing methods with image development in Adobe Photoshop and Illustrator, combining handmade and photo-silkscreen stencil-making methods. Different digital image making methods and silkscreen printing techniques in addition to serial image development. Prerequisite: ARTSVIS 101; ARTSVIS 224 recommended. Instructor consent required.
### ARTSVIS240S - Color Photography: Fieldwork and Digital Color

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTSVIS</td>
<td>240S</td>
<td>Color Photography: Fieldwork and Digital Color</td>
</tr>
</tbody>
</table>

**Description**  
Field-based course examining color photography as a documentary tool. Students learn about aesthetic and technical foundations of color photography using recent digital technology. Class-conducted intensive examination of the work of historic and contemporary color documentary photographers. Advanced techniques in film scanning, Photoshop, and color pigment printing. Completion of semester-long color photographic project, and final project consisting of production of a series of color pigment prints.

### ARTSVIS242L - Interactive Graphics: Critical Code

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTSVIS</td>
<td>242L</td>
<td>Interactive Graphics: Critical Code</td>
</tr>
</tbody>
</table>

**Description**  
Introduction to interactive graphics programming for artists. Explores object-oriented programming via the Processing programming environment as well as historical and theoretical appreciation of interactivity and computer graphics as artistic media. Combines discussions of key concepts from the readings with hands-on Processing projects and critiques. No previous programming experience or prerequisites required. Enrollment limited to 15 students.

### ARTSVIS248S - Cinematography

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTSVIS</td>
<td>248S</td>
<td>Cinematography</td>
</tr>
</tbody>
</table>

**Description**  
In-depth investigation of cinematographic techniques and principles for motion picture production. Exercises in both film and high definition digital video. Emphasis on advanced lighting techniques, lensing, camera mobility, set operations and close analysis of master works of cinematography.

### ARTSVIS249S - The Photobook: History and Practice

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTSVIS</td>
<td>249S</td>
<td>The Photobook: History and Practice</td>
</tr>
</tbody>
</table>

**Description**  
Cultural, intellectual and artistic history and uses of the book in photographic practice. Traces technical, conceptual, formal innovations that mark international history of photography books through lectures/hands-on examination of key books, including lesser known innovations and uses of photobook in Eastern Europe, the Soviet Union and Japan. Marries historical awareness with studio practice. Simultaneous immersion in production of images as well as collecting of archives from various cultures. Crafting of photobooks in several genres as students edit, print, scan, assemble materials. Seminar includes readings, discussions, short writings, field trips. Consent of instructor required.
ARTSVIS251AS - Duke in London: Arts

**Subject** | ARTSVIS
---|---
**Catalog Number** | 251AS
**Title** | Duke in London: Arts

**Description**
This course surveys London as a site of dynamic cultural production, whose participation in the global marketplace of artistic commodities reveals the city's restlessly transnational, cosmopolitan character. Studying local institutions, students are introduced to the complex relationship among art, state, and the global cultural marketplace; studying a multiracial and multiethnic community, they become familiar with theories of globalization, neoliberalism, and cosmopolitanism, as well as migration and so-called national identity. Students also participate in excursions including dance, opera, and theatre productions and visits to museums and other sites of cultural importance.

ARTSVIS263S - Representing Breast Cancer: Feminist Literature, Art, and Film

**Subject** | ARTSVIS
---|---
**Catalog Number** | 263S
**Title** | Representing Breast Cancer: Feminist Literature, Art, and Film

**Description**
Analyzes representations of breast cancer in feminist literature, art, and film. Drawing on health feminism, feminist medical ethics, and disability studies, explores what those representations tell us about the intersections among gender, race, class, sexuality, and ability in both the Global North and South. Sets artistic representations of breast cancer against the hyper-sexualization of breasts in capitalism's visual cultures and the spectacles of breast cancer activism. Shows how literature, art, and film can reveal health care's material conditions as well as breast cancer's psychic complexities.

ARTSVIS264S - Puppetry

**Subject** | ARTSVIS
---|---
**Catalog Number** | 264S
**Title** | Puppetry

**Description**
This course explores the conception and creation of various forms of puppetry. Students will investigate methods of building and performing puppets while looking into the strengths of different forms and styles. In addition students will be exposed to the incredible variety of contemporary world puppetry.

ARTSVIS290 - Topics in Visual Arts

**Subject** | ARTSVIS
---|---
**Catalog Number** | 290
**Title** | Topics in Visual Arts

**Description**
Subject varies from year to year. Consent of instructor required.

ARTSVIS290S - Special Topics in Visual Arts

**Subject** | ARTSVIS
---|---
**Catalog Number** | 290S
**Title** | Special Topics in Visual Arts

**Description**
Subject varies from year to year.

ARTSVIS291 - Individual Project in the Visual Arts

**Subject** | ARTSVIS
---|---
**Catalog Number** | 291
**Title** | Individual Project in the Visual Arts

**Description**
Individual directed study in a field of visual practice on a previously approved topic, under the supervision of a regular-rank faculty member, resulting in an academic and/or artistic product. Instructor consent required.
<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTSVIS</td>
<td>295S</td>
<td>Arts Entrepreneurship</td>
<td>Student teams work on specific arts-based entrepreneurial projects. Teams comprised of students from different backgrounds (arts, engineering, economics, computer science). Goals include creating business plan and launching ventures in areas of the arts. Structure an adaptation of Fuqua Program for Entrepreneurs. Ideal projects have real/positive impact on society. Students learn to situate artistic creativity within projects that meet societal need. Students from any background welcome to apply for enrollment. Must have interest in arts or working with artists in entrepreneurial context. Admission by permission of instructors.</td>
</tr>
<tr>
<td>ARTSVIS</td>
<td>303S</td>
<td>Writing the Short Film</td>
<td>In-depth study of the short format movie. Development of short film concept and script, including pre-production, storyboarding, and look books.</td>
</tr>
<tr>
<td>ARTSVIS</td>
<td>305L</td>
<td>Virtual Museums: Theories and Methods of Twenty-First-Century Museums</td>
<td>The future of museums will be one of immateriality and interaction. Course focuses on how the 'Internet of Things,' augmented reality technologies, new data analyses of artifacts will transform missions, roles, and goals of museums and collections. Core of course will be digital lab sessions focused on virtual reconstruction of lost heritage—e.g., museums and sites destroyed and damaged by ISIS and other conflicts in Iraq and the Middle East (Hatra, Nineveh, Nimrud, Baghdad).</td>
</tr>
<tr>
<td>ARTSVIS</td>
<td>307</td>
<td>User Experience and User Interface Design and Development</td>
<td>How do we build knowledge about computational, aesthetic, product and spatial experience? What tools and methods enable our work in the design of these interactions? This course applies methods and technologies found in the User Experience (UX) and User Interface (UI) disciplines to analyze, document, design and prototype a number of spatial and product interactions.</td>
</tr>
</tbody>
</table>
**ARTSVIS317S - Movement in Question: Introduction to Critical Dance Studies**

**Subject** ARTSVIS  
**Catalog Number** 317S  
**Title** Movement in Question: Introduction to Critical Dance Studies  

**Description**  
This writing-intensive seminar casts students as a research team engaging in multiple ways with the interdisciplinary field of critical dance studies. Students read and analyze foundational texts and theories, develop capacity to interpretively analyze movement, and practically engage in embodied activities that make gaps between textual representation and embodiment visible. This holistic approach throws movement into question and centralizes dance as a critical way of making the social world. Final Research Projects include conventional academic papers or choreographed performances that engage issues raised in the course. Zero dance experience required. All physical abilities welcomed.

**ARTSVIS320 - Advanced Painting**

**Subject** ARTSVIS  
**Catalog Number** 320  
**Title** Advanced Painting  

**Description**  
In advanced painting you will learn how to develop conceptual ideas by using the elements of art (line, color, harmony, repetition, value, texture, composition, and rhythm) to visually communicate. We will focus on developing meaningful paintings that conceptually address issues or ideas that are important to you. Prerequisite: Visual Arts 220.

**ARTSVIS318S - Photo Workshop**

**Subject** ARTSVIS  
**Catalog Number** 318S  
**Title** Photo Workshop  

**Description**  
Examines historical and contemporary photographic artists for whom a particular photographic technique is essential to the creation of their work. Investigates strategies of intentional lighting. Explores techniques most suited to the documentation of individual student's chosen subject matter and create a cohesive body of work by semester's end employing that strategy. May use digital or analog equipment. No textbooks are required, though students will need to budget a comparable amount for supplies. Instructor consent required. Prerequisite (any one of): DOCST 115S, 119S; ARTSVIS 115S, 119S; VMS 115S; or equivalent experience.

**ARTSVIS322S - Motion Graphics for Film and Video**

**Subject** ARTSVIS  
**Catalog Number** 322S  
**Title** Motion Graphics for Film and Video  

**Description**  
An exploration of techniques and theoretical approaches to motion graphics, animation and post-production effects in film and video. Readings and screenings will lead to student-produced exercises through exposure to applications in the Adobe Creative Cloud and digital editing software.

**ARTSVIS325S - Visiting Filmmaker Master Courses: Special Topics**

**Subject** ARTSVIS  
**Catalog Number** 325S  
**Title** Visiting Filmmaker Master Courses: Special Topics  

**Description**  
Intensive production courses with visiting filmmaker. Topics vary by semester. May be taken twice.

**ARTSVIS326S - Film Animation Production**

**Subject** ARTSVIS  
**Catalog Number** 326S  
**Title** Film Animation Production  

**Description**  
Experimentation with various media; mastering animation techniques such as metamorphosis, timing, articulation, storytelling, sound design, special effects, and camera. Each student to produce a one-minute animated film on the Oxberry 16mm film animation stand. Not open to students who have taken this course as Film/Video/Digital 102S.
ARTSVIS340S - Producing Docu-Fiction

Subject: ARTSVIS
Catalog Number: 340S
Title: Producing Docu-Fiction

Description: Investigation of hybrid, genre-defying films that question traditional definitions of documentary and fiction. Emphasis on experimental forms, documentary reenactment, mockumentary and dramatized ‘true stories.’ Exploration of both documentary and fiction production techniques, culminating in the production of a final video project.

ARTSVIS350S - Sound for Film and Video

Subject: ARTSVIS
Catalog Number: 350S
Title: Sound for Film and Video

Description: Theory and practice of sound recording techniques and strategies for film and video. Focus on sound/image relationship, sound design and sound acquisition. Screenings and readings will reinforce practice exercises.

ARTSVIS353S - Black Feminism and Fashion

Subject: ARTSVIS
Catalog Number: 353S
Title: Black Feminism and Fashion

Description: Black feminist perspectives on clothing and fashion. Explores traditions in which Black artists and writers make clothing a primary theme. Presenting photographic, painted, and literary portrayals by and of Black people across the diaspora, and bringing together the study of visual culture, material culture, and literary studies, reveals fashion and clothing as aesthetic practices of everyday life that defy the objectifying effects of racism and sexism. Engages with scholarship that explores slavery’s and colonialism’s impact on gender and sexuality and examines how artists and writers work within and against those impacts to document the self-fashioning in Black cultural life.

ARTSVIS356S - 16mm Film Production

Subject: ARTSVIS
Catalog Number: 356S
Title: 16mm Film Production

Description: Hands-on experience with 16mm motion picture film and photography. In-depth exploration of the techniques and aesthetics of film production, including basic screen writing, lighting, storytelling, and editing.

<td><strong>ARTSVIS364S</strong> - Web Design and Narrative: Artists, Documentarians, Art Historians, and Entrepreneurs</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Description: Professional practices course for students in creative fields without a computer science background: for artists and documentarians to create robust web-based portfolios; for art historians to showcase curatorial and scholarly projects; for entrepreneurs to demonstrate ideas, concepts, and products to the public. Develop customized, individual websites using CMS platforms. Hone and workshop artistic/curatorial/product statements. Develop teaching philosophies, exhibition imagery, and video documentation of artistic, curatorial, or product talks. Publish a blog magazine on arts and innovation topics. Guest speakers visit the course on a regular basis to review the students' work.</td>
</tr>
<tr>

<td><strong>ARTSVIS368S</strong> - The View Camera: Black and White Large Format Photography</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Description: Advanced, production-based photography course introduces students to the 4 x 5 large format view camera and its role in the documentary tradition. Learn to operate a view camera and attendant processes and materials to develop black and white sheet film and make silver gelatin contact prints from 4 x 5 negatives. Begins with focus on black and white negatives and contact prints. After demonstration of proficiency, students may optionally work in color film. Students produce a final portfolio of prints from their work throughout the semester. Class meetings consist of lectures, demonstrations, darkroom work, and critique of both process and final images.</td>
</tr>
<tr>
<td></td>

<td><strong>ARTSVIS371S</strong> - The Choreographic Mind: Order, Disorder, Organization, Relations</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Description: Practice-based studio work, discussions, and readings in current cultural theory, contemporary philosophy, and political discourse. Introduces choreography as a creative act of structuring movement; interrogates culturally dominant as well as subversive modes of ordering; examines the wider social and political context and consequences of various forms of artificially created structures. The students' radically subjective creativity, artistic experimentation, awareness, perception and expression is cultivated in order to understand and challenge the status quo and to create 'relational artefacts' through choreographic craft.</td>

ARTSVIS450S - Narrative Projects
Subject: ARTSVIS  
Catalog Number: 450S  
Title: Narrative Projects

ARTSVIS451S - Filming Art
Subject: ARTSVIS  
Catalog Number: 451S  
Title: Filming Art
Description: Practice-based production course examining the filmic realization and visualization of the artistic process. Screenings of bio-pics, documentaries and experimental films focusing on artists and various art forms complement readings and hands on production exercises that will prepare students to undertake their own short video portrait of an artist or work of art.

ARTSVIS452S - Animation Practice II
Subject: ARTSVIS  
Catalog Number: 452S  
Title: Animation Practice II
Description: Building on foundations of animation, this course expands upon and develops a further working knowledge of challenges faced in animation production. Examines the historical origins of animation from film and digital imaging to the contemporary 3-D workflow. Skills will be integrated into a self-directed final project of the student's own design. Suggested prerequisites CINE 320S or CINE 381S.

ARTSVIS453S - Cinematography II
Subject: ARTSVIS  
Catalog Number: 453S  
Title: Cinematography II
Description: Course explores the approaches, strategies, motivations, and creative processes that inform cinematography. Elements of cinematic style, visual imagination, and storytelling are discussed and explored through exercises. Students learn the relationships and responsibilities involved in the art, and are guided in the execution of the various canonical and extraordinary working methods involved in traditional, experimental, and modern cinematography. Suggested prerequisite: CINE 355S.

ARTSVIS490S - Special Topics in the Visual Arts
Subject: ARTSVIS  
Catalog Number: 490S  
Title: Special Topics in the Visual Arts
Description: Subject varies from year to year.

ARTSVIS491S - Independent Study
Subject: ARTSVIS  
Catalog Number: 491S  
Title: Independent Study
Description: Individual directed study in a field of visual practice on a previously approved topic, under the supervision of a regular-rank faculty member, resulting in an academic and/or artistic product. Consent of instructor and director of undergraduate studies required.

ARTSVIS492 - Independent Study
Subject: ARTSVIS  
Catalog Number: 492S  
Title: Independent Study
Description: Individual directed study in a field of visual practice on a previously approved topic, under the supervision of a regular-rank faculty member, resulting in an academic and/or artistic product. Consent of instructor and director of undergraduate studies required.

ARTSVIS495S - Honors Thesis Workshop
Subject: ARTSVIS  
Catalog Number: 495S  
Title: Honors Thesis Workshop
Description: Research and writing skills for students completing an honors thesis; bibliography, library and on-line research; use of archives; picture research and other research skills relating to the history of art; organization of material and preparation for writing; drafting, editing, and production of a finished text; use of scholarly conventions of referencing, footnoting etc. Compulsory for seniors preparing a graduation with distinction dissertation in art history. Instructor consent required.

**Description**
Senior capstone seminar in advanced research in Visual Arts practice and theory, Cinematic Arts practice and theory. Capstone requires the completion of a major research project or body of work, participation in regular critiques, and presentation of work at a capstone exhibition. Visual Arts students work in any given media or combination thereof. Cinematic Arts Concentration students focus on the research and/or production of works in film, video, animation, or any time-based media. Course is structured around joint critiques and guest presentations, fostering an interdisciplinary environment representative of contemporary art contexts and professional practice.

Introductory Biochemistry I: Intermediary Metabolism  

**Description**  
Chemistry of the constituents of proteins, lipids, carbohydrates, and nucleic acids and their metabolic interrelationships. Recommended prerequisite: two semesters of organic chemistry.

BIOCHEM302 - Introductory Biochemistry II

**Subject**  
BIOCHEM  

**Catalog Number**  
302  

**Title**  
Introductory Biochemistry II  

**Description**  
Structure, function, and biosynthesis of biological macromolecules and regulation of their synthesis. Intermediary metabolism and metabolic utilization of energy. Biochemistry of biological membranes, receptors, and signal transduction via membrane receptors. Prerequisite: organic chemistry and Biochemistry 301.

BIOCHEM393 - Research Independent Study

**Subject**  
BIOCHEM  

**Catalog Number**  
393  

**Title**  
Research Independent Study  

**Description**  
Individual research in a field of special interest, under the supervision of a faculty member, the major product of which is a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. Open to first-year students and sophomores with consent of supervising instructor.

BIOETHIC282 - Science, Ethics, & Democracy

**Subject**  
BIOETHIC  

**Catalog Number**  
282  

**Title**  
Science, Ethics, & Democracy  

**Description**  
Examines relationships between scientific knowledge, ethics, & formation of public policies in a democratic society. Science influences public policy & public policy shapes scientific enterprise. How can citizens reliably identify genuine scientific expertise? If scientific expertise conflicts with religious views of some citizens, can public policy rely on scientific expertise without violating principles of religious toleration? What are ethical rules of public deliberation—must citizens appeal only to reasons accessible from secular viewpoints? To what extent should science goals be shaped by scientific community versus democratic processes?
BIOETHIC390S - Special Topics

Description
Topics vary each semester.

BIOLOGY128FS - Evolutionary Genomics: Who Are We, Where Have We Been, and Where Are We Going?

Description
We are now more than a decade into the genomics revolution that generated data allowing us to gaze into our past, present, and future in ways that were beyond imagining when Darwin's theory of Natural Selection was first introduced. The unification of genomic data, bioinformatics, and evolutionary theory has transformed our understanding of human history, our place within the Tree of Life, and the impact that our species is having on those with whom we share the planet. This course will use the primary literature to familiarize students with the multifaceted power of genomics, with a slant towards examining human history and disease from an evolutionary perspective. Open only to students in the Focus Program.

BIOLOGY138FS - Evolution, Ecology, and Genomics of Symbiotic Interactions

Description
Symbiotic interactions are the norm rather than the exception in the natural world, yet species are usually seen and studied independently from each other. Here we explore the symbiotic connectivity among microbes and their hosts, ranging from parasitism to mutualism, by addressing questions at the junction of evolutionary biology, ecology, and genomics. Multidisciplinary research on microbiome model systems often translate to major medical advancements. One main goal of this course is for students to experience how scientists do, and think about, research. Readings will focus on primary research articles.

BIOLOGY148FS - Evolution, ecology, and genomics of symbiotic interactions

Description
Symbiotic interactions are the norm rather than the exception in the natural world, yet species are usually seen and studied independently from each other. Here we explore the symbiotic connectivity among microbes and their hosts, ranging from parasitism to mutualism, by addressing questions at the junction of evolutionary biology, ecology, and genomics. Multidisciplinary research on microbiome model systems often translate to major medical advancements. One main goal of this course is for students to experience how scientists do, and think about, research. Readings will focus on primary research articles.
BIOLOGY153 - Climate, Coffee, and Coronavirus: Why Ecology Matters to Human Health

Description
This course explores interactions between organisms and their environments that impact human health. We will examine the effects of climate change and human population growth on our food supply, water availability, the spread of disease, and ecosystem services. Case studies will be used to illustrate the scientific process, to evaluate supporting evidence, and to investigate ethical issues. For nonmajors. Not open to students who have taken Biology 209-1 or Biology 209S-1.

BIOLOGY153S - Climate, Coffee, & Coronavirus: Why Ecology Matters to Human Health

Description
This course explores interactions between organisms and their environments that impact human health and wellbeing. We will examine the effects of climate change and human population growth on our food supply, water availability, the spread of disease, and ecosystem services. Case studies will be used to illustrate the scientific process, to evaluate supporting evidence, and to investigate ethical issues. Cross-listed between Biology, Global Health, and Environmental Studies and the fall seminar is affiliated with a Duke Immerse Cluster: Pandemics, Health & Power. Not open to students who have taken Biology 209-1 or Biology 209S-1.

BIOLOGY154 - AIDS and Other Emerging Diseases

Description
Explores the interaction of biology and culture in creating and defining diseases through an investigation of acquired immunodeficiency syndrome (AIDS) and other emerging diseases: molecular biology, biology of transmission and infection; the role of people and culture in the evolution of infectious diseases; reasons for the geographic variations in disease. The inductive-deductive methodology of science is both used to develop and test hypotheses as well as examined itself as an analytical tool. Intended for nonmajors.

BIOLOGY155S - Where Did Food Come From? The Ecology of Farming

Description
Ecological examination of subsistence and industrial farming, beginning with pre-agricultural ecological conditions in the paleolithic and neolithic and the transition to food production across geographic regions. Topics include optimal foraging/diet selection, climate change, and plant/animal domestication. Discussions of water, fertilizer, technology, and ethics in today’s globalized industrial farming.

BIOLOGY201 - Gateway to Biology: Molecular Biology

Subject: BIOLOGY  
Catalog Number: 201  
Title: Gateway to Biology: Molecular Biology

Description: Introduces major concepts in biology through the lens of molecular biology. Molecular mechanisms that comprise the Central Dogma and variants. DNA structure and function, replication, transcription, and translation. Protein synthesis, folding, structure and function. Supporting topics related to the structure of cells, metabolism and energetics. Integration of physical and quantitative principles to molecular biology. Relevance to human diseases and the biotechnology industry. Prerequisite: Chemistry 21, 21L, 101DL, 110DL, or 201DL. Not open to students who have taken or are currently enrolled in Biology 203L.

BIOLOGY201D - Gateway to Biology: Molecular Biology

Subject: BIOLOGY  
Catalog Number: 201D  
Title: Gateway to Biology: Molecular Biology

Description: Non-laboratory version of Biology 201L. Introduces major concepts in biology through the lens of molecular biology. Molecular mechanisms that comprise the Central Dogma and variants. DNA structure and function, replication, transcription, and translation. Protein synthesis, folding, structure and function. Supporting topics related to the structure of cells, metabolism and energetics. Integration of physical and quantitative principles to molecular biology. Relevance to human diseases and the biotechnology industry. Prerequisite: Chemistry 21, 21L, 101DL, 110DL, or 201DL. Not open to students who have taken Biology 201L/Biology 201LA. Taught online.

BIOLOGY201DA - Gateway to Biology: Molecular Biology

Subject: BIOLOGY  
Catalog Number: 201DA  
Title: Gateway to Biology: Molecular Biology

Description: Non-laboratory version of Biology 201L taught at the Duke Marine Lab. Prerequisite: Chemistry 21, 21L, 101DL, 110DL, or 201DL. Not open to students who have taken Biology 201L/Biology 201LA.

BIOLOGY201L - Gateway to Biology: Molecular Biology

BIOLOGY203L - Gateway to Biology: Molecular Biology, Genetics & Evolution

Subject: BIOLOGY  
Catalog Number: 203L  
Title: Gateway to Biology: Molecular Biology, Genetics & Evolution

Description
Major concepts in modern biology through the lens of molecular biology, genetics and evolution. The structure and function of genes at the molecular, organismal, and population level. Molecular mechanisms including replication, transcription, translation, and DNA mutation and repair. Mendelian and non-Mendelian inheritance, genetic mapping, evidence for evolution, natural selection, genetic drift, speciation, molecular evolution, phylogenetic analysis. Relevance to human diseases, social implications of genetics and biotechnology. Prerequisite: Biology 21 and Chemistry 21, 21L, 101DL, 110DL, or 201DL. Not open to students who have taken or are currently enrolled in Biology 201L or 202L.

BIOLOGY205 - Marine Megafauna

Subject: BIOLOGY  
Catalog Number: 205  
Title: Marine Megafauna

Description
Ecology, systematics, and behavior of large marine animals including giant squid, bony fishes, sharks, sea turtles, seabirds, and marine mammals. Relations between ocean dynamics, large marine animals, and their role in ocean food webs. Impact of human activities and technological advancement on populations. Economic, social, and policy considerations in the protection of threatened species. Prerequisite: AP Biology, Introductory Biology, or consent of the instructor.

BIOLOGY207 - Organismal Evolution

Subject: BIOLOGY  
Catalog Number: 207  
Title: Organismal Evolution

Description
Exploration of the diversity of life by emphasizing evolutionary, structural, and functional aspects of the major lineages of bacteria, plants, protists, animals and fungi.

BIOLOGY208FS - Computing on the Genome: An Introduction to Genomics and Bioinformatics

Subject: BIOLOGY  
Catalog Number: 208FS  
Title: Computing on the Genome: An Introduction to Genomics and Bioinformatics

Description
This course will provide an introduction to key concepts in the genome sciences, using tools and concepts from computational biology and bioinformatics. Topics to be covered include genome structure, function, variation, and evolution. Students will learn computational and statistical methods for describing and quantifying various aspects of genome biology and will apply these tools to real world data. Recommended prerequisite: familiarity with molecular biology concepts such as DNA replication, transcription, and translation. No prior programming experience is required. Open only to Focus Program students.

**Title:** The Ecology of Human Health  

**Description:**
Humans are the dominant species on Earth and ecology is key to understanding the multiple feedbacks through which their activities affect human health. Fundamental principles of ecology, from population to ecosystem levels, will be examined through the lens of human health. Topics include human population growth and carrying capacity, why we age, infectious disease dynamics, the microbiome and human health, sustainable agriculture and food security, sustainable harvest of wild foods, dynamics of pollutants in food webs, ecosystem services to humans, and human impacts of climate change. Not open to students who have taken Biology 209-1 or 209D-2.

---

**BIOLOGY212 - General Microbiology**

**Subject:** BIOLOGY  
**Catalog Number:** 212  
**Title:** General Microbiology  

**Description:**
Classical and modern approaches to the study of microorganisms and their roles/applications in everyday life, medicine, research, and the environment. Microbial cell structure, function, growth, genetics, metabolism, evolution, and ecology. Study of disease, infection, and immunology. Introduction to virology. Recommended for many pre-health programs. Recommended prerequisite: one course in a biological science.

---

**BIOLOGY212L - General Microbiology Lab**

**Subject:** BIOLOGY  
**Catalog Number:** 212L  
**Title:** General Microbiology Lab  

**Description:**
Standalone lab equivalent to laboratory component of Biology 212L. Open only to students who previously completed the non-lab version Biology 212.

---

**BIOLOGY213D - Cell Signaling and Diseases**

**Subject:** BIOLOGY  
**Catalog Number:** 213D  
**Title:** Cell Signaling and Diseases  

**Description:**
During the past several decades, exploration in basic research has yielded extensive knowledge about the numerous and intricate signaling processes involved in the development and maintenance of a functional organism. In order to demonstrate the importance and processes of cellular communication, this course will focus on cell signaling mechanisms and diseases resulting from their malfunction, such as cancer, stroke, and neuron degeneration (including Parkinson’s disease, Alzheimer’s disease, Huntington’s disease, and Amyotrophic lateral sclerosis). Students will be exposed to current literature and cutting edge knowledge. Recommended prerequisite: Biology 201L or 203L.
### BIOLOGY218 - Biological Clocks: How Organisms Keep Time

<table>

<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOLOGY</td>
<td>218</td>
<td>Biological Clocks: How Organisms Keep Time</td>
</tr>
</tbody>
</table>

**Description**

From sleep/wake cycles to flower openings to cell division and malaria infections, all organisms and cells display rhythmic behaviors. The course will focus on genetic and molecular networks that comprise clocks regulating cell division and circadian rhythms. Quantitative aspects of clock networks will be examined from the perspective of data analysis and dynamical systems models. Class will include lectures, primary literature readings, and in-class projects. Recommended prerequisite: Math 112L or equivalent, and Biology 20, 21, 201L, or 203L.

### BIOLOGY220 - Cell Biology

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOLOGY</td>
<td>220</td>
<td>Cell Biology</td>
</tr>
</tbody>
</table>

**Description**

The role of genes and proteins in mediating basic cellular processes. Topics include: structure and function of cellular membranes and organelles; protein targeting and transport; signal transduction; role of the cytoskeleton in cell shape and motility; function of the immune system; genetic regulation of cell growth/division and the relationship to cancer. Recommended prerequisite: Biology 201L or 203L.

### BIOLOGY221D - Developmental Biology: Development, Stem Cells, and Regeneration

<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOLOGY</td>
<td>221D</td>
<td>Developmental Biology: Development, Stem Cells, and Regeneration</td>
</tr>
</tbody>
</table>

**Description**

Mechanisms of fertilization, control of cell divisions, diversification of cell types, organization and differentiation of cells and tissues of the organism, and patterning necessary to establish the body plan of many organisms including vertebrates, invertebrates and plants. Included among these mechanisms are the roles of transcription factors in controlling the trajectories toward tissues, signal transduction, morphogenetic movements, and other mechanisms used by different plants and animals to build a functional adult. Also includes stem cell biology, regeneration of tissues, sex determination, and evolutionary mechanisms of diversification. Recommended prerequisite: Biology 201L or 203L or equivalent.

### BIOLOGY223 - Cellular and Molecular Neurobiology

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOLOGY</td>
<td>223</td>
<td>Cellular and Molecular Neurobiology</td>
</tr>
</tbody>
</table>

**Description**

This course will cover the molecular and cellular components underlying nervous system function. Topics include the regulation of the neuronal cytoskeleton, process outgrowth and axon guidance, transport mechanisms, the generation and propagation of the action potential, components of the presynaptic and postsynaptic terminals, growth factors in development and regeneration, neuronal stem cells, and sensory signal transduction. Lectures by the instructor and expert guests, with regular readings of current and/or historical primary literature. Recommended prerequisite: Biology 20, 21, 201L or 203L or equivalent, and Neuroscience 101/Psychology 106 or Neuroscience 102/Psychology 107.
### BIOLOGY224 - Fundamentals of Neuroscience

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOLOGY</td>
<td>224</td>
<td>Fundamentals of Neuroscience</td>
</tr>
</tbody>
</table>

**Description**
Course covers broad and rapidly evolving field of neuroscience encompassing questions about how humans and other animals experience their world. Learners explore the organization of neural systems that sense our environment, plan and execute complex movements, encode and retrieve memories, and experience a wide range of emotions. Learners examine brain development and how changes in structure and function underlie impacts of neurological and psychiatric disorders. Not recommended for first-year students.

Prerequisite: Biology 20, 201L, 202L, or 203L and Chemistry 20, 21, 101DL, or 110DL -or-concurrent enrollment in Biology 201L, 202L, or 203L and concurrent enrollment in Chemistry 101DL or 110DL.

### BIOLOGY228S - Food and Fuel for a Growing Population: Nuts and Bolts of Plant Growth and Production

<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOLOGY</td>
<td>228S</td>
<td>Food and Fuel for a Growing Population: Nuts and Bolts of Plant Growth and Production</td>
</tr>
</tbody>
</table>

**Description**
Covers primary physiological processes from subcellular to whole plant that affect plant growth in a changing environment. Processes include photosynthesis, respiration, water relations, nutrient and carbohydrate allocation, signaling, and stress responses to various biotic and abiotic factors for a range of plant species adapted to different environments. Applications include plant improvement for food and biofuel production, management of plant growth in response to global change. Offered through the DukeImmerse program. Will include travel to farms in NC locally, to the mountains, and to the coast. Recommended prerequisite: Biology 201L, 202L, or 203L. Instructor consent required.

### BIOLOGY248D - Evolution of Animal Form

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOLOGY</td>
<td>248D</td>
<td>Evolution of Animal Form</td>
</tr>
</tbody>
</table>

**Description**
The course explores three views of the evolution of form: the Darwinian view which stresses function; the historicist view which emphasizes historical accident; and the structuralist view that form is mainly the result of fixed mathematical relationships. We also review the history of life, including major events such as the origin of life and of the eukaryotic cell, the Cambrian explosion, and the major mass extinctions. Recommended prerequisite: Biology 20, 21, 202L or 203L.

### BIOLOGY251L - Molecular Evolution

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOLOGY</td>
<td>251L</td>
<td>Molecular Evolution</td>
</tr>
</tbody>
</table>

**Description**
Evolution of genes, gene families, and genomes and relation to their structure, function and history. Contemporary computer-based analysis of nucleic acid and protein evolution including: BLAST searches; sequence alignment; estimation of rates, patterns, types of substitution; interpreting evolutionary changes in structure-function relations; protein homology modeling; visualizing and annotating protein structure. Recommended prerequisite: Biology 201L, 203L, or consent of the instructor.
<table>

<tbody>
<tr>
<td>BIOLOGY</td>
<td>255</td>
<td>Philosophy of Biology</td>
<td>An introduction to conceptual and methodological issues raised in contemporary biology, including reductionism, the meaning of chance, laws in biology, the units of natural selection, teleology, and the structure of evolutionary theory. Recommended prerequisite: AP biology or introductory biology.</td>
</tr>
<tr>
<td>BIOLOGY</td>
<td>260S</td>
<td>Genetics and Genomics of Human Variation</td>
<td>Research over the last 50 years has demonstrated that the human species is characterized by low genetic diversity and extensive recombination. Yet, social constructions of 'race' based on phenotypic differences are ingrained in our understanding of how humans vary. This course will uncover how the human species varies at the genetic and genomic levels, in the context of other primate species. Given this background, we will discuss the social construction of 'race' and the intersection of macroevolution, genetics, and phenotype. Finally, we will explore current research that suggests a genetic or epigenetic basis for perceived racial health disparities and outcomes in biomedicine. Open only to Duke Immerse students. Instructor consent required.</td>
</tr>
<tr>
<td>BIOLOGY</td>
<td>261D</td>
<td>Race, Genomics, and Society</td>
<td>The field of genetics has been at the forefront of discourse concerning the concept of 'race' in humans. This course explores human origins, human variation, human identity, and human health through a broad range of enduring and emerging themes and challenging questions related to race and genetics (and now, genomics) on a global scale. Students will acquire knowledge and skills required for integrative analyses of the relevant scientific, ethical, legal, societal, cultural, and psychosocial issues. Open to students at all levels from any discipline in the arts, humanities, and sciences (natural, social, formal, and applied).</td>
</tr>
<tr>
<td>BIOLOGY</td>
<td>262</td>
<td>People, Plants and Pollution: Introduction to Urban Environments</td>
<td>Cities turn natural lands into impervious surfaces, like roofs and parking lots, while trees, forests, and grass decrease. Course covers urban environmental issues, including energy and carbon, air, heat, and water pollution, the health and welfare of people, and changes in other species and regional/global climatic patterns. Examines costs/benefits of urban nature on solving urban environmental problems, including enhancing the social welfare of people's lives.</td>

### BIOLOGY263 - Biological Responses to Climate Change
**Description**
Lecture/discussion course on how organisms, populations, and biological communities are expected to respond to climate change. Topics include evidence for effects of climate change on organisms, how to experimentally test for potential effects of climate change, ecological and evolutionary mechanisms that organisms have—or do not have—that enable them to respond to climate change, community responses to climate change. Recommended prerequisite: Biology 202L or 203L.

### BIOLOGY263-1 - Biological Responses to Climate Change
**Description**
Climate change is happening now. This course will focus on how organisms, populations, and biological communities are expected to respond to climate change. While reading the primary literature, we will discuss evidence for effects of climate change on organisms, how to experimentally test for potential effects of climate change, and the ecological and evolutionary mechanisms that organisms have—or do not have—that enable them to respond to climate change. Non-W version of Biology 263. Not available to students who have taken Biology 263. Recommended prerequisite: Bio 202L or Bio 203L.

### BIOLOGY267D - Behavioral Ecology and the Evolution of Animal Behavior
**Description**
How animal behavior is shaped by natural selection, historical factors, and ecological constraints. These factors considered in the context of mating systems, parental care, foraging, and other current issues in behavior. Recommended prerequisite: Biology 202L or 203L.

### BIOLOGY267D-1 - Behavioral Ecology and the Evolution of Animal Behavior
**Description**
How animal behavior is shaped by natural selection, historical factors, and ecological constraints. These factors considered in the context of mating systems, parental care, foraging, and other current issues in behavior. Does not carry codes for research- (R) or writing- (W) intensive course. Recommended prerequisite: Biology 202L or 203L.

### BIOLOGY268 - Mechanisms of Animal Behavior
**Description**
Survey of causal factors underlying the expression of animal behavior, organized around common problems organisms need to solve, such as finding food, avoiding predation, determining when and with whom to reproduce, communicating with other organisms, and extracting information from the environment. These factors are examined from an integrative perspective that includes neurobiology, endocrinology, sensory physiology, genetics, developmental biology, and functional morphology. Prerequisite: Biology 202L, 202LA, or 203L.

### BIOLOGY268D - Mechanisms of Animal Behavior
**Description**
Survey of causal factors underlying the expression of animal behavior, organized around common problems organisms need to solve, such as finding food, avoiding predation, determining when and with whom to reproduce, communicating with other organisms, and extracting information from the environment. These factors are examined from an integrative perspective that includes neurobiology, endocrinology, sensory physiology, genetics, developmental biology, and functional morphology. Prerequisite: Biology 202L, 202LA, or 203L.

**Subject**  
BIOLOGY

**Catalog Number**  
301

**Title**  
Introductory Biochemistry I: Intermediary Metabolism

**Description**  
Chemistry of the constituents of proteins, lipids, carbohydrates, and nucleic acids and their metabolic interrelationships. Recommended prerequisite: two semesters of organic chemistry.

---

**BIOLOGY306SLA - Evolutionary and Ecological Genetics/Genomics of Marine Mammals**

**Subject**  
BIOLOGY

**Catalog Number**  
306SLA

**Title**  
Evolutionary and Ecological Genetics/Genomics of Marine Mammals

**Description**  
Current sequencing technologies have revolutionized the fields of molecular, evolutionary, and ecological genetics. The ability to generate an entire genome worth of sequence data in a single instrument run allows us to study whole genomes in a variety of non-model organisms. We will use the genomes of marine mammals to explore the field of genomics. We will begin with basic genomics (i.e. Genome-101), sequencing technologies and bioinformatics, and explore conservation, ecological and evolutionary genetics of marine mammals using literature and publicly available datasets. Biology 201L is recommended but not required. Offered at the Duke University Marine Lab in Beaufort.
BIOLOGY308A - Oceans in Human and Environmental Health

**Subject**  
BIOLOGY

**Catalog Number**  
308A

**Title**  
Oceans in Human and Environmental Health

**Description**

Students will gain a grounding in marine sciences to help them to evaluate impacts of anthropogenic activities on marine ecosystems and the humans that rely on them. After developing an understanding of the issues facing environmental and human health and well-being in marine systems, students will travel to the Galapagos to better understand environmental challenges facing biodiversity and tourism hot spot. This course embraces immersive field experiences in North Carolina and the Galapagos to contextualize classroom learning and to develop connections with environmental practitioners and residents. Taught in Beaufort at Duke Marine Lab. Duke Immerse course. Instructor consent is required.

BIOLOGY309A - Oceans in Human and Environmental Health

**Subject**  
BIOLOGY

**Catalog Number**  
309A

**Title**  
Oceans in Human and Environmental Health

**Description**

Focus on the concept of 'One Health' that the health of the environment and the people who live in it are linked. The basis (from a biological perspective) of threats facing the marine environment and interactions between environmental and human health and their role in global health disparities. For example, in discussing fisheries and aquaculture, the course will cover environmental impacts of these extractive industries and their importance in human and societal well-being. This course will embrace immersive field experiences in North Carolina that will contextualize classroom learning and develop connections with practitioners and residents. Taught in Beaufort at Duke Marine Lab.

BIOLOGY309DA - Oceans in Human and Environmental Health

**Subject**  
BIOLOGY

**Catalog Number**  
309DA

**Title**  
Oceans in Human and Environmental Health

**Description**

Focus on the concept of 'One Health' that the health of the environment and the people who live in it are linked. The basis (from a biological perspective) of threats facing the marine environment and interactions between environmental and human health and their role in global health disparities. For example, in discussing fisheries and aquaculture, the course will cover environmental impacts of these extractive industries and their importance in human and societal well-being. This course will embrace immersive field experiences in North Carolina that will contextualize classroom learning and develop connections with practitioners and residents. Taught in Beaufort at Duke Marine Lab.

BIOLOGY314 - Regenerative Biology and Medicine

**Subject**  
BIOLOGY

**Catalog Number**  
314

**Title**  
Regenerative Biology and Medicine

**Description**

Fundamentals, current research, and applications of regenerative biology. Focus on regenerative biology across different tissues and species, ranging from planaria to humans. Clinical applications regenerative biology, including replacing lost, damaged or diseased tissue with new, healthy tissue without organ transplantation. Lectures, readings from the literature, student presentations.
### BIOLOGY315 - Introduction to Mathematical Modeling in Biology

**Subject**: BIOLOGY  
**Catalog Number**: 315  
**Title**: Introduction to Mathematical Modeling in Biology  

**Description**  
A first course applying mathematics to biological problems. Topics drawn from cell and molecular biology, molecular evolution, enzyme catalysis, biochemical pathways, ecology, systems biology, and developmental biology. Prerequisite: Mathematics 212 or equivalent. Not open to students with credit for Biology 215.

### BIOLOGY318 - Human Evolutionary Genetics

**Subject**: BIOLOGY  
**Catalog Number**: 318  
**Title**: Human Evolutionary Genetics  

**Description**  
An evolutionary perspective on human genetics and genomics, with an emphasis on current models and inference methods using medically important examples. The mechanisms of evolution shaping human genetic variation, as well as inference of evolutionary processes from genetic data. Topics include: population differences in disease risk; adaptation to local environments and pathogens; identifying regions of the genome underlying traits; models of neutral variation, migration, and genetic ancestry. Computational and quantitative skills will be emphasized throughout. Recommended prerequisite: Evolutionary Anthropology 101D, Biology 202, or equivalent; some probability and programming background helpful but not required.

### BIOLOGY319A - Coastal Watershed Management and Restoration

**Subject**: BIOLOGY  
**Catalog Number**: 319A  
**Title**: Coastal Watershed Management and Restoration  

**Description**  
This course will examine management of coastal watersheds and their biological function, focusing on the positive (restoration) and negative (degradation, eutrophication) ways that humans alter ecosystems. Local field trips are an integral part of this class to examine anthropogenic modifications to coastal ecosystems (e.g. farms, wetland restoration) as well as discussing these issues with stakeholders at NGOs, businesses and government. Taught at the Duke Marine Lab in Beaufort.

### BIOLOGY321 - Primate Sexuality

**Subject**: BIOLOGY  
**Catalog Number**: 321  
**Title**: Primate Sexuality  

**Description**  
A comparative and integrative study of primate sex and reproduction. The material is presented in three sections: the first focuses on primate social organization, mating systems, and reproductive strategies; the second focuses on the endocrine system and behavioral endocrinology, and; the third focuses on sexual differentiation of morphology, brain and behavior. In each section, this course places human sexuality within the broader context of the primate order. Prerequisites: Evolutionary Anthropology 101D or Biology 202L or 203L.

### BIOLOGY321D - Primate Sexuality

**Subject**: BIOLOGY  
**Catalog Number**: 321D  
**Title**: Primate Sexuality  

**Description**  
A comparative and integrative study of primate sex and reproduction. The material is presented in three sections: the first focuses on primate social organization, mating systems, and reproductive strategies; the second focuses on the endocrine system and behavioral endocrinology, and; the third focuses on sexual differentiation of morphology, brain and behavior. In each section, this course places human sexuality within the broader context of the primate order. Note: course is the same as Evolutionary Anthropology 341 but with an additional required 50 minute discussion. Recommended prerequisite: Evolutionary Anthropology 101D or Biology 202L or 203L.

### BIOLOGY325 - Current Technologies in Genomics and Precision Medicine

**Subject**: BIOLOGY  
**Catalog Number**: 325  
**Title**: Current Technologies in Genomics and Precision Medicine  

**Description**  
Comprehensive overview of genome science technologies, analytical tools, clinical applications, and related issues. Exposure to a range of technologies currently used in research and some in clinical practice, as well as the tools to interrogate the large data-sets generated by these technologies. Projects will explore the range of datasets publicly available and analysis of genomic datasets. Prerequisite: Biology 201L or 203L.
BIOLOGY326S - Evolutionary Genomics

Description
The unification of genomic data, bioinformatic analysis, and evolutionary theory has transformed our understanding of human history, our place within the Tree of Life, and the impact that our species is having on those with whom we share the planet. This course will draw from the primary literature to familiarize students with the multifaceted power of genomics, with a slant towards examining human history and disease from an evolutionary perspective. Readings will be drawn from a wide variety of sources, from some published more than a century ago, up through the contemporary popular press. Recommended prerequisite: Biology 202L.

BIOLOGY329D - Principles of Animal Physiology

Description
Non-laboratory version of Biology 329L. Does not carry the R or W curricular designations. Not open to students who have taken Biology 329L. Recommended prerequisite: Biology 20, 21, 201L or 203L and Physics 141L and Chemistry 101DL.

BIOLOGY329L - Principles of Animal Physiology

Description
Examination of physiological principles that guide animal life processes. Framed in an evolutionary context, processes including respiration, circulation, neural control, movement, excretion and metabolism will be understood in terms of core principles that also apply to humans. Laboratories will include directed and self-directed investigations into animal physiology using research grade data acquisition systems. This is a writing-intensive course. Not open to students who have taken Biology 329D. Recommended prerequisite: Biology 20, 21, 201L or 203L and Physics 141L and Chemistry 101DL.

BIOLOGY335 - Drones in Marine Biology, Ecology, and Conservation

Description
Includes a full overview of past and emerging applications for ecology and biology of marine species and coastal habitats, with in-depth discussion on future of drone applications in coastal biological and ecological research. Comprehensive exploration of current drone technologies, including detection of target species, payloads, aeronautical concepts, rules and regulations, mission planning, aircraft design, maintenance, data collection, management and analysis. Lab components tailored to student interests: active participation in megafaunal or environmental research and data analysis; building, operating and maintaining aircraft, programming for manual and autonomous flight.
**BIOLOGY335A - Drones in Marine Biology, Ecology, and Conservation**

**Subject**  
Biology

**Catalog Number**  
335A

**Title**  
Drones in Marine Biology, Ecology, and Conservation

**Description**  
Lecture-based version of Environment 335LA. Includes a full overview of past and emerging applications for ecology and biology of marine species and coastal habitats, with in-depth discussion on future of drone applications in coastal biological and ecological research. Comprehensive exploration of current drone technologies, including detection of target species, payloads, aeronautical concepts, rules and regulations, mission planning, aircraft design, maintenance, data collection, management and analysis. Lab components tailored to student interests: active participation in megafaunal or environmental research and data analysis; building, operating and maintaining aircraft, programming for manual and autonomous flight. Taught in Beaufort at Duke Marine Lab.

**BIOLOGY341L - Plant Communities of North Carolina**

**Subject**  
Biology

**Catalog Number**  
341L

**Title**  
Plant Communities of North Carolina

**Description**  
Overview of plant communities in the mountains, piedmont, and coastal plain of North Carolina, primarily through field trips. The dominant native plants of each community, the biology and identification of important invasive species. Required weekend field trip to the mountains, and several weekend day trips.

**BIOLOGY344S - Plant Diversity: A Field Approach**

**Subject**  
Biology

**Catalog Number**  
344S

**Title**  
Plant Diversity: A Field Approach

**Description**  

**BIOLOGY346 - Symbiosis: From Organelles to Microbiomes**

**Subject**  
Biology

**Catalog Number**  
346

**Title**  
Symbiosis: From Organelles to Microbiomes

**Description**  
Symbiotic interactions are integral to the biology of multicellular eukaryotes. The discovery of the roles of the human microbiome in the development, physiology, ecology and evolution of humans is currently transforming medicine. This course is a multidisciplinary study, at the intersection of evolutionary biology, ecology and genomics, of symbiotic systems such as plant-animal, microbe-plant, and microbe-animal symbioses spanning the entire tree of life, including the human microbiome. We explore this topic from a researcher’s perspective and with the goal of helping students join research labs.

**BIOLOGY347L - Plants and People**

**Subject** BIOLOGY  
**Catalog Number** 347L  
**Title** Plants and People  

**Description**  
The history of humans is deeply intertwined with plants. We depend on them for food, fuel, beverages, medicine, textiles, shelter, and trade. This course explores the evolutionary diversity of plants across the Green Tree of Life and their importance to people through time, in the history of their domestication, their current roles in our society, and in our ecosystems. Includes laboratory investigations and scheduled field trips.

**BIOLOGY348LS - Herpetology**

**Subject** BIOLOGY  
**Catalog Number** 348LS  
**Title** Herpetology  

**Description**  
Introduction to diversity and biology of amphibians and non-avian reptiles. Emphases on their evolutionary history, including the relationships among the major taxonomic groups and to other taxa. Topics include evolutionary adaptations with regard to life history, physiology, behavior. Human interactions and species conservation. Examples from North Carolina and the Southeastern US will be used whenever possible. Laboratory activities, field projects, required and optional field trips. Prerequisites: Biology 202L recommended.

**BIOLOGY349 - Entomology: An Introduction to Insect Biology**

**Subject** BIOLOGY  
**Catalog Number** 349  
**Title** Entomology: An Introduction to Insect Biology  

**Description**  
Introduction to insect biology and diversity. Insect external and internal anatomy, development, physiology, ecology, diversity, human impacts, and evolution. Non-lab version of Biology 349L.

**BIOLOGY349L - Entomology: An Introduction to Insect Biology**

**Subject** BIOLOGY  
**Catalog Number** 349L  
**Title** Entomology: An Introduction to Insect Biology  

**Description**  
Introduction to insect biology and diversity. Insect external and internal anatomy, development, physiology, ecology, diversity, human impacts and evolution. Lab includes observation of local insect diversity, as well as student-designed experimental investigations.

**BIOLOGY361LS - Field Ecology**

**Subject** BIOLOGY  
**Catalog Number** 361LS  
**Title** Field Ecology  

**Description**  
Explore the natural systems of North Carolina through hands-on experimentation. Through student-guided inquiry and field experimentation students will gain experience in formulating hypotheses, designing field observations and experiments, analyzing field data and interpreting results from the fields of ecosystem, community, population, and physiological ecology. In addition to weekly field labs, the course will include a weekend field trip. Recommended prerequisite: Biology 20 or 21 or one course in ecology or consent of instructor; Mathematics 111L.

**BIOLOGY363S - Animal Intelligence and the Social Brain**

**Subject** BIOLOGY  
**Catalog Number** 363S  
**Title** Animal Intelligence and the Social Brain  

**Description**  
Complexity of animals’ social lives, with focus on cognitive implications of sociality on acquisition, expression, and transmission of knowledge. Topics include: discrimination & insight learning; social influences on behavior; tool use & causality; traditions & cultural transmission; mechanisms of recognition, knowledge of social domain; prosociality & play; coalitions, cooperation, & reciprocity; conflict, punishment, & reconciliation; vocal & gestural communication; sharing; language & instruction; knowing what others know; self recognition & social monitoring; tactical deception & social manipulation; social norms/morality. Prerequisite: EvAnth 101 or Bio 202.

**BIOLOGY375LA - Biology and Conservation of Sea Turtles**

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
BIOLOGY | 375LA | Biology and Conservation of Sea Turtles  

**Description**
Laboratory version of Biology 375A. Includes laboratory and field experience with animals and with their habitat requirements. Taught in Beaufort at Duke Marine Lab. Prerequisite: introductory biology.

**BIOLOGY376A - Marine Mammals**

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
BIOLOGY | 376A | Marine Mammals  

**Description**
The biology of cetaceans, pinnipeds, sirenians, and sea otters. Topics covered include the diversity, evolution, ecology, and behavior of marine mammals and their interactions with humans. Detailed consideration given to the adaptations that allow these mammals to live in the sea. Evaluation of the scientific, ethical, and aesthetic factors influencing societal attitudes toward these animals and of their conservation management in light of domestic legislation and international treaties. Taught in Beaufort at Duke Marine Lab. Prerequisite: introductory biology.

**BIOLOGY376L - Marine Mammals**

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
BIOLOGY | 376L | Marine Mammals  

**Description**
Laboratory and field exercises consider social organization, behavior, ecology, communication, and anatomy of local bottlenose dolphins. Recommended prerequisite: introductory biology.

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
BIOLOGY | 376LA | Marine Mammals  

**Description**
Laboratory version of Biology 376A. Laboratory and field exercises consider social organization, behavior, ecology, communication, and anatomy of local bottlenose dolphins. Taught in Beaufort at Duke Marine Lab. Prerequisite: introductory biology.

**BIOLOGY377L - Biodiversity of Marine Invertebrates**

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
BIOLOGY | 377L | Biodiversity of Marine Invertebrates  

**Description**
An introduction to the biodiversity represented by major marine invertebrate groups, with emphasis on the diversity of body forms and behaviors and on anatomical structures and functions. Field trips primarily by boat allow students to explore invertebrates characteristic of a variety of coastal habitats in North Carolina, including mud flats, sandy beaches, salt marshes, oyster reefs, piers and docks, and the water column. Live invertebrates maintained in the laboratory serve as models for detailed study of form and function.

**BIOLOGY377LA - Biodiversity of Marine Invertebrates**

### BIOLOGY385L - Integrative Neuroscience Laboratory

**Subject** BIOLOGY  
**Catalog Number** 385L  
**Title** Integrative Neuroscience Laboratory  

**Description**
Gain skills necessary to conduct neuroscience research and integrate findings from multiple levels of analysis (molecular, cellular and behavioral). Team-based learning format and collaboration with neuroscience lab to generate, analyze, and communicate novel scientific findings. Experimentation will occur in a model organism and may include PCR, live cell imaging and/or behavioral conditioning experiments.

### BIOLOGY390A - Duke-Administered Study Abroad: Advanced Special Topics in Biology

**Subject** BIOLOGY  
**Catalog Number** 390A  
**Title** Duke-Administered Study Abroad: Advanced Special Topics in Biology  

**Description**
Topics differ by section.

**Title** Duke-Administered Study Away: Special Topics  

**Description**
Topics differ by section.

### BIOLOGY391 - Independent Study: Advanced Topics

**Subject** BIOLOGY  
**Catalog Number** 391  
**Title** Independent Study: Advanced Topics  

**Description**
Reading in a field of special interest under the supervision of a Biology faculty member. Intended for students interested in studying topics not offered in regularly available courses. Instructor consent is required.

### BIOLOGY391A - Independent Study: Advanced Topics

**Subject** BIOLOGY  
**Catalog Number** 391A  
**Title** Independent Study: Advanced Topics  

**Description**
Reading in a field of special interest under the supervision of a Biology faculty member. Intended for students interested in studying topics not offered in regularly available courses. Taught in Beaufort at Duke Marine Lab. Instructor consent is required.

### BIOLOGY412S - Sensory Signal Transduction

**Subject** BIOLOGY  
**Catalog Number** 412S  
**Title** Sensory Signal Transduction  

**Description**
Recent progress in sensory signal transduction mediated by calcium channels and receptors. Topics include history and techniques in the study of ion channels, such as electrophysiology, calcium imaging, and cell and molecular biology; cell surface perception for external signals, including light receptors, olfactory receptors, taste receptors, hot and cold receptors, and mechanical receptors; heart and brain pacemakers; sensory channel receptor-related human diseases; and plan sensory signaling network.

**Description**

BIOLOGY414LS - Experiments in Developmental and Molecular Genetics

Experimental approaches in development and genetics using animal and plant models. Laboratory training in molecular genetics, immunochemistry, microscopy, protein chemistry, and genetic screening. Experiments include immunochemical localization, in situ hybridization, polymerase chain reaction, genetic screening, embryo micromanipulation, microscopic imaging, and mutant analysis. Recommended prerequisite: Biology 201L, 202L, or 203L, prior or concurrent registration in Biology 220.

BIOLOGY415S - Developmental and Stem Cell Biology Colloquium

Lectures, seminars, and discussion of current topics in developmental biology. Recommended prerequisite: Biology 201L, 202L or 203L and/or 220 or equivalent.

BIOLOGY417S - Genetic Engineering and Biotechnology

Applications of recombinant DNA in medicine and in agriculture. Topics include diagnosis of genetic diseases, gene therapy, drugs for AIDS and cancer, DNA fingerprinting, cloning of mammals, phytoremediation, crop improvement, and pharmaceutical protein production in transgenic plants and animals. Social and environmental impacts of biotechnology. Recommended prerequisite: Biology 201L, 203L, or 220, or lab experience or consent of instructor.

BIOLOGY418 - Introduction to Biophysics

How theory and experimental techniques from physics can be used to analyze and understand biological structure and function, including chemical, mechanical, electrical, collective, and information-processing aspects. Prerequisite: Biology 201L and knowledge of statistical physics by taking either Physics 363 or Chemistry 311.

BIOLOGY420 - Cancer Genetics

Overview of the genetic changes associated with cancer and the molecular events that transform normal cellular processes into tumor-promoting conditions. Topics include: tumor viruses, oncogenes, growth factors, signal transduction pathways, tumor suppressors, cell cycle control, apoptosis, genome instability, stem cells, metastasis, and current therapeutic approaches. Prerequisite: (Biology 201L/201LA and Biology 202L/202LA) or Biology 203L.

BIOLOGY421S - Biology of Nervous System Diseases

Primary literature investigating the underlying molecular and cellular mechanisms of nervous system disorders such as neurodegenerative diseases (Alzheimer's, Parkinson's, Huntington's), mental illness, and epilepsy. Prerequisite: Neuroscience 201 or 223 or Biology 220 or consent of instructor.
BIOLOGY422L - Experiments in Animal Models of Human Neurodegenerative Disease

Subject: BIOLOGY
Catalog Number: 422L

Title: Experiments in Animal Models of Human Neurodegenerative Disease

Description
This course will bring students into a basic research setting to directly contribute to our understanding of the molecular and cellular underpinnings of neurodegenerative disease. Classic experimental approaches in the lab (fruit fly genetics, molecular techniques, dissection, immunocytochemistry, microscopy) will be paired with short lectures, literature-based discussions, and data presentations. Students should, through firsthand experience, gain an appreciation for 1) the life cycle of basic research, 2) the utility, challenges, and caveats of various approaches to understanding disease, and 3) the elegance and relevance of gene and cell function across organisms. Recommended prerequisite: Biology 201L or 203L.

BIOLOGY425 - Biophysics II

Subject: BIOLOGY
Catalog Number: 425

Title: Biophysics II

Description
Quantitative understanding of biological systems through the application of physical principles. Course will emphasize topics that span multiple length and time scales, and different levels of biological organization. Two to four topics per semester, including possibly organosol motion from molecular processes to whole organisms, nervous systems from membrane channels to neuronal networks, noise in biology, novel biophysical technologies, etc. Recommended prerequisite: Biology 201L or 203L, Mathematics 212 and 216 or equivalent, and calculus-based introductory physics or permission of the instructors.

BIOLOGY424S - The Biological, Chemical, and Physical Bases of Cell Shape and Cell Shape Changes

Subject: BIOLOGY
Catalog Number: 424S

Title: The Biological, Chemical, and Physical Bases of Cell Shape and Cell Shape Changes

Description
Cell shape and shape change are fundamental features of biological development and homeostasis. We investigate the intimate relationship between cellular structure and function at molecular, sub-cellular, cellular and tissue length scales. We study a range of cell types, from the very simple (e.g., red blood cells) to those that are structurally complex (e.g., epithelia, muscle and nerve). We integrate information from studies in vivo, in vitro, in cell free systems and on purified proteins. We learn from a combination of readings (reviews and primary literature), lectures, discussions and presentations by students. Prerequisite: Biology 201L/203L.

**BIOLOGY427A - Current Topics in Sensory Biology**

**Description**
Exploration of recent and classic studies in sensory biology. Topics are chosen by students at the start of the semester. Usually includes vision, hearing, smell, taste, pheromones, electroreception, magnetoreception, bioluminescence, touch, time, and music. Taught at the Duke Marine Lab in Beaufort. Recommended prerequisite: Biology 201L, or 201L and 202L, or 203L or the equivalent, and one course in Neuroscience, or consent of instructor.

**BIOLOGY427S - Current Topics in Sensory Biology**

**Description**
Exploration of recent and classic studies in sensory biology. Actual topics are chosen by students at the start of the semester. Usually includes vision, hearing, smell, taste, pheromones, electroreception, magnetoreception, bioluminescence, touch, time, and music. Recommended prerequisite: Biology 201L, or 201L and 202L, or 203L or the equivalent, and one course in Neuroscience, or consent of instructor.

**BIOLOGY429S - How Organisms Move**

**Description**
Connecting basic physics with biological systems to examine the principles of organismal movement. Course provides a quantitative and analytical foundation in the major modes of locomotion, such as flight, swimming, and walking, then applies this foundation to broader issues in science and society, such as the development of biologically-inspired mechanisms and the impact of climate change on organismal movement. Foundational lecture presentations, in-class group problem-solving and projects, and R-computer programming. Prerequisite: Physics 25, Physics 141L/141LA, Physics 151L, or Physics 161D. Recommended prerequisite: Biology 203L or 201L and 202L.

**BIOLOGY432S - Biology of Host-Pathogen Interactions**

**Description**
Pathogens have evolved a broad set of strategies for growing and dividing in a host. We will explore the complex and dynamic host-pathogen interactions from the perspective of a variety of pathogenic organisms. This seminar style course will include lectures, discussions, readings, and presentations of primary literature by students. Recommended prerequisite: Biology 201L or 203L.

**BIOLOGY433S - The Biology Nobels**

**Description**
The Biology Nobels is a seminar course designed to take upper level students on a deep dive into the cellular and molecular biology related to that research whose excellence was recognized by a Nobel Prize in Chemistry, Physics or Physiology or Medicine and is related to modern research in biology. Students will read, discuss, and present papers by the Laureates and related material that provides background or additional information about each field. Prerequisites: Biology 201L or Biology 203L. Biology 220 or 223 or equivalent cell biology course recommended.

**BIOLOGY438 - Chemical Dialogs in Biology**

**Description**
Intra-species and inter-species chemical communications. Production, detection and transduction of chemical signals and cues. How these signaling molecules evoke biological and behavioral responses across the kingdoms of life. Recommended prerequisite: Biology 201L or 203L, and Chemistry 201L and 202L.
BIOLOGY445A - Climate Change in the Marine Environment

**Subject**
Biology

**Catalog Number**
445A

**Title**
Climate Change in the Marine Environment

**Description**
Exploration of climate change science focusing on marine ecosystems and inhabitants—specifically ocean acidification, warming and sea level rise. Factors causing climate change, and how those vary spatially, focusing on sensitive polar ecosystems and marine mammal populations. Critical examination of climate change modeling using EdGCM (research-grade Global Climate Model), focusing on how scientists use models, observations/theory to predict climate, and assumptions/uncertainty implicit in modeling. Discussion of potential human impacts including consequences of sea level rise and potential increases in disease due to climate change. Taught in Beaufort at Duke Marine Lab.

BIOLOGY450S - Genomics of Adaptation: A Modern Look at Evolution

**Subject**
Biology

**Catalog Number**
450S

**Title**
Genomics of Adaptation: A Modern Look at Evolution

**Description**
Contemporary studies of how populations and species evolved adaptations to their ecological habitats. Focus on modern methods of genome mapping and sequence data and analysis in wild populations that can identify genetic changes that contributed to ecological adaptations. Emphasis on case studies of genomics of adaptation in plant and animal systems, including humans and our adaptations to environments that our ancestors encountered as they colonized diverse habitats throughout the world. Examples will also illustrate how speciation and hybridization can contribute to adaptive biodiversity. Recommended prerequisite: Biology 202L or 203L or equivalent course.

BIOLOGY452S - Genes & Development

**Subject**
Biology

**Catalog Number**
452S

**Title**
Genes & Development

**Description**
Literature-based seminar covering transcriptional regulation of development. Regulatory mechanisms and genome-wide approaches will be covered. Topics: embryogenesis, stem cells, transcription factors, regulatory networks, chromatin, nuclear organization, small RNAs, imprinting and Pol II pausing. Prerequisite: Biology 201L and 202L, or Biology 203L. Recommended prerequisite: Biology 220 or 221D.

BIOLOGY453S - Gene-Environment Interaction: Genes in an Ecological Context

**Subject**
Biology

**Catalog Number**
453S

**Title**
Gene-Environment Interaction: Genes in an Ecological Context

**Description**
Seminar on genotype-environment interaction. Topics include the evolution and adaptive value of environment-dependent phenotypes (phenotypic plasticity), ecological consequences of genotype-environment interaction, molecular mechanisms of phenotypic plasticity, and how genotype-environment interaction pertains to outstanding debates in evolutionary biology and genetics. Recommended prerequisite: Biology 202L or 203L.
**BIOLOGY454S - Physiological Genetics of Disease**

**Subject**  
BIOLOGY

**Catalog Number**  
454S

**Title**  
Physiological Genetics of Disease

**Description**  
An exploration of how we have come to understand the relationships between genes and traits, with a focus on traits of biomedical importance. We explore how physiological systems biology can be used to understand the causal pathways by which genes affect traits. Examples will be taken largely from the biomedical literature with a focus on genetic diseases and the roles of genetic background and environment in determining how (and why) genes affect traits. Readings and class participation, short papers and oral presentations on research projects. Recommended prerequisite: Biology 203L or 201L and 202L and Mathematics 112L.

---

**BIOLOGY460 - Population Genetics**

**Subject**  
BIOLOGY

**Catalog Number**  
460

**Title**  
Population Genetics

**Description**  
Use of genetic sequence analysis to examine aspects of natural populations of humans and other organisms in the past and present. Topics include molecular phylogenetics; the origin, maintenance, and loss of major features of evolution; the evolutionary process at the molecular level; reconstruction of human origins and paleohistory; and genetic information in forensic studies. Not open to students who have taken Biology 250.

---

**BIOLOGY490 - Topics in Biology**

**Subject**  
BIOLOGY

**Catalog Number**  
490

**Title**  
Topics in Biology

**Description**

BIOLOGY491 - Independent Study: Advanced Topics

Subject: BIOLOGY
Catalog Number: 491
Title: Independent Study: Advanced Topics

Description: Reading in a field of special interest under the supervision of a Biology faculty member. Intended for students interested in studying topics not offered in regularly available courses. Consent of instructor required.

BIOLOGY491A - Independent Study: Advanced Topics

Subject: BIOLOGY
Catalog Number: 491A
Title: Independent Study: Advanced Topics

Description: Reading in a field of special interest under the supervision of a Biology faculty member. Intended for students interested in studying topics not offered in regularly available courses. Taught in Beaufort at Duke Marine Lab. Instructor consent is required.

BIOLOGY493 - Research Independent Study

Subject: BIOLOGY
Catalog Number: 493
Title: Research Independent Study

Description: Continuation of Biology 293. Individual research and reading of the primary literature in a field of special interest, under the supervision of a faculty member, the major product of which is a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. Open to juniors and seniors only with consent of supervising instructor. Prerequisite: Biology 293 or Biology 379LA. May be repeated.

BIOLOGY493A - Research Independent Study

Subject: BIOLOGY
Catalog Number: 493A
Title: Research Independent Study

Description: Continuation of Biology 293A. Individual research and reading of the primary literature in a field of special interest, under the supervision of a faculty member, the major product of which is a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. Open to juniors and seniors only with consent of supervising instructor. Taught in Beaufort at Duke Marine Lab. Prerequisite: Biology 293A or Biology 379LA. May be repeated.

BIOLOGY495 - Scientific Arguments: Writing an Undergraduate Thesis

Subject: BIOLOGY
Catalog Number: 495
Title: Scientific Arguments: Writing an Undergraduate Thesis

Description: Conventions of scientific writing, focusing on the process of writing a thesis or other major research paper in the natural sciences. Course intended for all candidates for Graduation with Distinction in Biology and Physics.

BIOLOGY495S - Scientific Arguments: Writing an Undergraduate Thesis

Subject: BIOLOGY
Catalog Number: 495S
Title: Scientific Arguments: Writing an Undergraduate Thesis

Description: Seminar version of Biology 495. Conventions of scientific writing, focusing on the process of writing a thesis or other major research paper in the natural sciences. Course intended for Candidates for Graduation with Distinction in Biology.

**Description**
Medical devices have revolutionized healthcare in the developed world. Yet, this technology revolution has failed to reach the developing world. Compared to the estimated 1.5 million medical devices introduced in the developed world in the last 50 years, only a few dozen pieces of medical equipment have been specifically designed to be appropriate and affordable for resource poor settings. We will examine and discuss the factors that make the research, design & development, introduction & marketing, maintenance and use of medical devices in resource poor settings uniquely challenging conditions. Focus students only.

**Description**
This course provides an introduction to Materials Science, with an emphasis on the materials and applications relevant to Biomedical Engineering. The course emphasizes the relationships between the structure and properties of materials, with a focus on their mechanical, biological, and surface properties. Electrical, optical, and thermal properties will also be touched upon. Classes of materials to be addressed include metals, polymers, ceramics, gels, and composites. The course will close with an introduction to biocompatibility and the foreign body response. Prerequisite: EGR 201L.

The course will close with an introduction to biocompatibility and the foreign body response. Prerequisite: Engineering 201L.
BME230L - Global Women's Health Technologies

Subject: BME  
Catalog Number: 230L  
Title: Global Women's Health Technologies

Description
Exploration of the intersection of technology, women's health, and global poverty. Analysis of case studies related to human-centered design and applications of engineering to solve global health challenges. Hands-on learning of engineering concepts related to circuitry and light as well as skills needed to prototype a functional light source. Application of course knowledge in a design challenge based on a need from a real-world client in a low-resource setting. Open to both Trinity and Pratt students.

BME244L - Quantitative Physiology with Biostatistical Applications

Subject: BME  
Catalog Number: 244L  
Title: Quantitative Physiology with Biostatistical Applications

Description
An examination of the importance of mass and energy balances, transport processes, mechanics, energetics, and electrical activity in physiological systems. Lectures cover cellular physiology, cardiovascular system, nervous system, muscle physiology, and renal physiology. Labs complement lecture topics and introduce statistical methods related to the measurement and analysis of physiological data. Statistical topics include: descriptive statistics; hypothesis testing; correlation, regression, and goodness of fit; ANOVA and post-hoc tests; power analysis and experimental design. Prerequisite: Engineering 103L or Computer Science 201 and co-/prerequisite: (Biology 201L or Biology 203L) and (Mathematics 212, 216, 218D-2, 219, 221, 222 or 353).

BME260L - Modeling Cellular and Molecular Systems

Subject: BME  
Catalog Number: 260L  
Title: Modeling Cellular and Molecular Systems

Description
An introduction to the application of engineering models to study cellular and molecular processes. Topics covered include the conservation of mass and energy, kinetic analysis of reactions, and enzyme kinetics. Students complete projects in which they write and solve differential equations that model complex biological systems. Applications to biotechnology are discussed. Corequisite: Biomedical Engineering 244L and Mathematics 212 or 219 or 222. Prerequisite: Biology 201L or 203L; or consent of the instructor.

BME271A - Signals and Systems

Subject: BME  
Catalog Number: 271A  
Title: Signals and Systems

Description
Convolution, deconvolution, Fourier series, Fourier transform, sampling, and the Laplace transform. Continuous and discrete formulations with emphasis on computational and simulation aspects and selected biomedical examples. Prerequisite: Biomedical Engineering 253L or Electrical & Computer Engineering 110L; Mathematics 216; or consent of the instructor.

BME271D - Signals and Systems

Subject: BME  
Catalog Number: 271D  
Title: Signals and Systems

Description
Convolution, deconvolution, Fourier series, Fourier transform, sampling, and the Laplace transform. Continuous and discrete formulations with emphasis on computational and simulation aspects and selected biomedical examples. Prerequisite: Biomedical Engineering 253L or Electrical & Computer Engineering 110L and Mathematics 216, 218, 221, or 356.

BME290 - Intermediate Topics (GE)

Subject: BME  
Catalog Number: 290  
Title: Intermediate Topics (GE)

Description
Intermediate subjects or selective topics related to programs within biomedical engineering. Consent of instructor required.

**Description**
Principles of materials science and mechanics applicable to orthopedics, cell signaling, medical imaging, implant design, injury prevention and treatment, cardiovascular mechanics, and tissue engineering. Topics include: structure-function relationships of biocomposites; unique properties of biomaterial surfaces; behavior of tissues and materials in physiological environments; mechanics of human movement and physiology; dynamics and vibration; and viscoelastic models. Selected experimental measurements on biomechanical and biomaterial systems. Prerequisite: BME 244L and (Math 353 or 353A) and (ME 221L or BME 221L).

**Description**
This BME area core course offers an engineer’s perspective on how cell processes including gene and protein regulation, growth, proliferation, death, differentiation, adhesion and migration can be manipulated to achieve a desired outcome. Mathematical models are applied to quantitatively describe these cell processes. Applications of cell therapies and tissue engineering are examined. Mammalian cell culture techniques including quantitative measurements of viability, proliferation, differentiation, and protein and gene expression are introduced within the laboratory. MC area core course leading to MC area elective pathway. Prerequisite: BME 244L and BME 260L.

**Description**
An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. Topics include the conservation of mass and momentum using differential and integral balances; rheology of Newtonian and non-Newtonian fluids; steady and transient diffusion in reacting systems; dimensional analysis; homogeneous versus heterogeneous reaction systems. Biomedical and biotechnological applications are discussed. Prerequisite: Biomedical Engineering 244L, 260L, and Mathematics 353.
### Transport Phenomena in Biological Systems (AC or GE, BB)

An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. Topics include the conservation of mass and momentum using differential and integral balances; rheology of Newtonian and non-Newtonian fluids; steady and transient diffusion in reacting systems; dimensional analysis; homogeneous versus heterogeneous reaction systems. Biomedical and biotechnological applications are discussed. Prerequisite: Biomedical Engineering 244L, 260L, and Mathematics 353.

### Introduction to Medical Instrumentation

**Subject** | **Catalog Number** | **Title** |
---|---|---|
BME | 354L | Introduction to Medical Instrumentation

**Description**
Study of the basic principles of biomedical electronics with emphasis on transducers, instruments, micro-controller and PC based systems for data acquisition and processing. Laboratories focus on measurements and circuit design emphasizing design criteria appropriate for biomedical instrumentation. Prerequisite: Physics 152L; Mathematics 353 or 353A; BME 244L; ECE 110L or BME 253L; BME 271 or BME 271A or ECE 280L; or consent of the instructor.

For juniors and seniors who express a desire for such work and who have shown aptitude for research in one area of biomedical engineering. Reserved for Engineering Undergraduate Fellows. Consent of program director required.

### Biotech Design I (GE, MC)

**Subject** | **Catalog Number** | **Title** |
---|---|---|
BME | 405L | Biotech Design I (GE, MC)

**Description**
This course is the first semester of a two semester biochemical engineering design course sequence on biotechnology. It is a team focused project-based course. Student teams take on real world problems and evaluate the commercial and technical potential of biotechnological solutions. The first semester course is primarily conceptual (on paper) design which students can then build and test in the second semester design course, Biotech Design II. Previous projects have included the design of diagnostics, small molecule and protein drugs, cell based therapies, CRISPR based therapeutics as well as novel bioprocesses. Prerequisites: BME 260L (GE, MC) and senior standing.
BME406L - Biotech Design II

Subject: BME  
Catalog Number: 406L  
Title: Biotech Design II

Description
This is the second semester of a two semester design course sequence on biotechnology. In this second semester, student teams will design, build and test biotechnological designs. The course will cover basic principles of product/process design and commercialization including project management, market and economic constraints, regulatory considerations and an intellectual property assessment. Satisfies Design Requirement. Prerequisites: BME 405L and senior standing.

BME432L - Biomechanics and Vehicle Safety Engineering (DR)

Subject: BME  
Catalog Number: 432L  
Title: Biomechanics and Vehicle Safety Engineering (DR)

Description
Design course dealing with contemporary issues in the biomechanics of injury and motor vehicle safety engineering. Covers international standards for safety in vehicle design. Topics also include: airbag and belt systems, structural vehicle components, accident reconstruction, the biomechanics of injury, anthropomorphic test devices, and injury risk assessment metrics. Problem-based approach where students work as teams on a current engineering problem in dummy design or injury mitigation technology. The teams set design specifications, evaluate the designs using finite element analysis and fabricate the final product using rapid prototyping. Prerequisite: BME 302L; senior standing.

BME436L - Biophotonic Instrumentation (DR)

Subject: BME  
Catalog Number: 436L  
Title: Biophotonic Instrumentation (DR)

Description
Design of optical instruments for biomedical applications. Section I focuses on basic optics theory and laboratory practice. Section II focuses on a deeper understanding of selected biophotonic instruments, including laboratory work. Section III comprises the design component of the course. Student teams are presented with a design challenge and work through the steps of engineering design, culminating in building a prototype solution. Lecture topics include engineering design, intellectual property protection, engineering ethics, and safety. Prerequisite: BME 354L; senior standing.

BME460L - Devices for People with Disabilities (DR)

Subject: BME  
Catalog Number: 460L  
Title: Devices for People with Disabilities (DR)

Description
Design of custom devices to aid disabled individuals. Students will be paired with health care professionals at local hospitals who will supervise the development of projects for specific clients. Formal engineering design principles will be emphasized; overview of assistive technologies, patent issues, engineering ethics. Oral and written reports will be required. Selected projects may be continued as independent study. Course includes a service-learning component involving work in the community. Prerequisites: BME 354L; senior standing.

BME493 - Projects in Biomedical Engineering (GE)

Subject: BME
Catalog Number: 493
Title: Projects in Biomedical Engineering (GE)

Description:
For juniors and seniors who express a desire for such work and who have shown aptitude for research in one area of biomedical engineering. Consent of instructor required.

BME493-1 - Projects in Biomedical Engineering (GE)

Subject: BME
Catalog Number: 493-1
Title: Projects in Biomedical Engineering (GE)

Description:
For juniors and seniors who express a desire for such work and who have shown aptitude for research in one area of biomedical engineering. Consent of instructor required. Half-credit version of BME 493.

BME494 - Projects in Biomedical Engineering (GE)

Subject: BME
Catalog Number: 494
Title: Projects in Biomedical Engineering (GE)

Description:
For juniors or seniors who express a desire for such work and who have shown aptitude for research in one area of biomedical engineering. Consent of instructor required.

BRAINSOC390S - Bass Connections in Brain and Society: Special Topics

Subject: BRAINSOC
Catalog Number: 390S
Title: Bass Connections in Brain and Society: Special Topics

Description:
Bass Connections in Brain and Society: Special Topics; course content varies by semester. Enrollment requires prior acceptance into an associated Bass Connections in Brain and Society project team, which is managed separately by Bass Connections administration. Only students admitted into a project team will be given instructor consent for enrollment.

BRAINSOC393T - Bass Connections in Brain & Society Research Team

Subject: BRAINSOC
Catalog Number: 393T
Title: Bass Connections in Brain & Society Research Team

Description:
Bass Connections Year-long Project Team. Topics vary by semester and section. Interdisciplinary teams of students work with faculty to build connections between neuroscience and socially challenging questions rooted in policy, economics, ethics, law, the humanities and/or healthcare. Teams may include external partners. A team's work may parallel or contribute to ongoing faculty-initiated research. Teams will participate in seminars, data collection and analysis, lab work, field work, and other relevant learning, research or service experiences. Requires final paper or product containing significant analysis and interpretation.

BRAINSOC394T - Bass Connections in Brain & Society Research Team

Subject: BRAINSOC
Catalog Number: 394T
Title: Bass Connections in Brain & Society Research Team

Description:
Bass Connections Year-long Project Team. Topics vary by semester and section. Interdisciplinary teams of students work with faculty to build connections between neuroscience and socially challenging questions rooted in policy, economics, ethics, law, the humanities and/or healthcare. Teams may include external partners. A team's work may parallel or contribute to ongoing faculty-initiated research. Teams will participate in seminars, data collection and analysis, lab work, field work, and other relevant learning, research or service experiences. Requires final paper or product containing significant analysis and interpretation. Instructor consent required.
BRAINSOC395 - Bass Connections in Brain and Society: Interdisciplinary Team Projects

Subject: BRAINSOC
Catalog Number: 395

Description:
Teams of undergraduate and graduate/professional students work with faculty to identify, explore and develop solutions to important, strategic issues where brain science impacts and is informed by society. Teams may also include postdoctoral fellows, visiting fellows and researchers, community partners, and other experts from business, government, and the non-profit sector. The work may run in parallel with or contribute to ongoing, faculty-initiated research. Teams will participate in seminars, lectures, laboratory-based research, field work, and/or other learning experiences relevant to the project. Requires substantive paper or product containing significant analysis and interpretation. Enrollment requires prior acceptance into an associated Bass Connections in Brain and Society project team. Only students admitted into a project team will be given consent for enrollment.

BRAINSOC396 - Bass Connections in Brain and Society 2: Interdisciplinary Team Projects

Subject: BRAINSOC
Catalog Number: 396

Description:
Teams of undergraduate/graduate/professional students work with faculty in a second term to identify, explore, and develop solutions to strategic issues in brain science and society. Teams may also include fellows, community partners, and other experts from business, government, and the non-profit sector. The work may run in parallel with or contribute to ongoing, faculty-initiated research. Teams will participate in seminars, lectures, laboratory-based research, field work, and/or other learning experiences relevant to the project. Requires substantive paper or product containing significant analysis and interpretation. Enrollment requires prior acceptance into an associated Bass Connections in Brain and Society project team, which is managed separately by Bass Connections administration. Consent of the director of undergraduate studies required. Prerequisite: Brain & Society 395.

BRAINSOC395T - Bass Connections in Brain & Society Research Team

Subject: BRAINSOC
Catalog Number: 395T

Description:
Tutorial course for Bass Connections yearlong project team. Topics vary by semester and section. Teams of undergraduate and graduate students work with faculty to build connections between neuroscience and socially challenging questions in healthcare, the humanities, policy, economics, ethics and law. Teams may include external partners. Work may run in parallel with or contribute to ongoing faculty-led research. Teams participate in seminars, data collection and analysis, lab work, field work, and other relevant learning or research experiences. Requires final paper or product containing significant analysis and interpretation. Instructor consent required.

BRAINSOC395-1 - Bass Connections in Brain and Society: Interdisciplinary Team Projects

Subject: BRAINSOC
Catalog Number: 395-1

Description:
Teams of undergraduate and graduate/professional students work with faculty to identify, explore and develop solutions to important, strategic issues where brain science impacts and is informed by society. Teams may also include postdoctoral fellows, visiting fellows and researchers, community partners, and other experts from business, government, and the non-profit sector. The work may run in parallel with or contribute to ongoing, faculty-initiated research. Teams will participate in seminars, lectures, laboratory-based research, field work, and/or other learning experiences relevant to the project. Requires substantive paper or product containing significant analysis and interpretation. Enrollment requires prior acceptance into an associated Bass Connections in Brain and Society project team. Only students admitted into a project team will be given consent for enrollment.
BRAINSOC396 - Bass Connections in Brain and Society 2: Interdisciplinary Team Projects

Subject: BRAINSOC
Catalog Number: 396-1
Title: Bass Connections in Brain and Society 2: Interdisciplinary Team Projects

Description:
Teams of undergraduate/graduate/professional students work with faculty in a second term to identify, explore and develop solutions to strategic issues in brain science and society. Teams may also include fellows, community partners, and other experts from business, government, and the non-profit sector. The work may run in parallel with or contribute to ongoing, faculty-initiated research. Teams will participate in seminars, lectures, laboratory-based research, field work, and/or other learning experiences relevant to the project. Requires substantive paper or product containing significant analysis and interpretation. Enrollment requires prior acceptance into an associated Bass Connections in Brain and Society project team, which is managed separately by Bass Connections administration. Only students admitted into a project team will be given consent for enrollment. Prerequisite: Brain & Society 395-1. Instructor consent required.

BRAINSOC396T - Bass Connections in Brain & Society Research Team

Subject: BRAINSOC
Catalog Number: 396T
Title: Bass Connections in Brain & Society Research Team

Description:
Tutorial course for Bass Connections yearlong project team. Topics vary by semester and section. Teams of undergraduate and graduate students work with faculty to build connections between neuroscience and socially challenging questions in healthcare, the humanities, policy, economics, ethics and law. Teams may include external partners. Work may run in parallel with or contribute to ongoing faculty-led research. Teams participate in seminars, data collection and analysis, lab work, field work, and other relevant learning or research experiences. Requires final paper or product containing significant analysis and interpretation. Instructor consent required.

BRAINSOC397 - Bass Connections in Brain and Society 3: Interdisciplinary Team Projects

Subject: BRAINSOC
Catalog Number: 397
Title: Bass Connections in Brain and Society 3: Interdisciplinary Team Projects

Description:
Teams of undergraduate/graduate/professional students work with faculty in a third term to identify, explore and develop solutions to strategic issues in brain science and society. Teams may also include fellows, community partners, and other experts from business, government, and the non-profit sector. The work may run in parallel with or contribute to ongoing, faculty-initiated research. Teams will participate in seminars, lectures, laboratory-based research, field work, and/or other learning experiences relevant to the project. Requires substantive paper or product containing significant analysis and interpretation. Prerequisite: Brain & Society 395 and 396. Instructor consent required.

BRAINSOC397-1 - Bass Connections in Brain and Society 3: Interdisciplinary Team Projects

Subject: BRAINSOC
Catalog Number: 397-1
Title: Bass Connections in Brain and Society 3: Interdisciplinary Team Projects

Description:
Teams of undergraduate/graduate/professional students work with faculty in a third term to identify, explore and develop solutions to strategic issues in brain science and society. Teams may also include fellows, community partners, and other experts from business, government, and the non-profit sector. The work may run in parallel with or contribute to ongoing, faculty-initiated research. Teams will participate in seminars, lectures, laboratory-based research, field work, and/or other learning experiences relevant to the project. Requires substantive paper or product containing significant analysis and interpretation. Prerequisite: any two of the following courses: Brain & Society 395, 395-1, 396, and 396-1. Instructor consent required.

</tbody>
</table>

**Description**

Teams of undergraduate/graduate/professional students work with faculty in a fourth term to identify, explore and develop solutions to strategic issues in brain science and society. Teams may include fellows, community partners, and experts from business, government, and the non-profit sector. The work may run in parallel with or contribute to ongoing, faculty-initiated research. Teams will participate in seminars, lectures, laboratory-based research, field work, and/or other learning experiences relevant to the project. Requires substantive paper or product containing significant analysis and interpretation. Prerequisite: any three of the following courses: Brain & Society 395, 395-1, 396, 396-1, 397, and 397-1. Instructor consent required.

**Description**

Tutorial course for Bass Connections yearlong project team. Topics vary by semester and section. Teams of undergraduate and graduate students work with faculty to build connections between neuroscience and socially challenging questions in healthcare, the humanities, policy, economics, ethics and law. Teams may include external partners. Work may run in parallel with or contribute to ongoing faculty-led research. Teams participate in seminars, data collection and analysis, lab work, field work, and other relevant learning or research experiences. Requires final paper or product containing significant analysis and interpretation. Instructor consent required.

**Description**

Four broad disciplines within civil and environmental engineering will be explored and over-arching experiential projects will apply theory and practice to real-world design problems. The course will examine the societal context of these disciplines and their contributions to and impacts on the built environment. Specifically, the course will examine air, water, land use, shelter, systems, and energy and students will be challenged with issues of economics, social impact, green engineering, sustainable design and building practices.
CEE201L - Uncertainty Design and Optimization

Subject: CEE
Catalog Number: 201L
Title: Uncertainty Design and Optimization

Description:
Principles of design as a creative and iterative process involving problem statements, incomplete information, conservative assumptions, constraining regulations, and uncertain operating environments. Parameterization of costs and constraints and formulation of constrained optimization problems. Analytical and numerical solutions to constrained optimization problems. Evaluation of design solutions via sensitivity and risk analysis. Application to design problems in civil and environmental engineering. Prerequisite: Engineering 201L.

CEE205 - Practical Methods in Civil Engineering

Subject: CEE
Catalog Number: 205
Title: Practical Methods in Civil Engineering

Description:
Introduction to the practical methods used by Civil Engineers, including surveying, computer-aided-design, geographical information systems, and use of the mills, lathes, and other machine tools.

CEE290 - Special Topics in Civil and Environmental Engineering

Subject: CEE
Catalog Number: 290
Title: Special Topics in Civil and Environmental Engineering

Description:
A course on a special topic within the civil and environmental engineering department.

CEE291 - Independent Study in Civil and Environmental Engineering

Subject: CEE
Catalog Number: 291
Title: Independent Study in Civil and Environmental Engineering

Description:
Study arranged on a special topic by an instructor with related interests and expertise. Consent of instructor and director of undergraduate studies required.

CEE292 - Independent Study in Civil and Environmental Engineering

Subject: CEE
Catalog Number: 292
Title: Independent Study in Civil and Environmental Engineering

Description:
Study arranged on a special topic by an instructor with related interests and expertise. Consent of instructor and director of undergraduate studies required.

CEE293 - Research Independent Study in Civil and Environmental Engineering

Subject: CEE
Catalog Number: 293
Title: Research Independent Study in Civil and Environmental Engineering

Description:
Research project mentored by an instructor with related interests and expertise. Course may be taken by students who have demonstrated aptitude for independent work. Consent of instructor and director of undergraduate studies required.
**CEE294 - Research Independent Study in Civil and Environmental Engineering**

**Subject**: CEE  
**Catalog Number**: 294  
**Title**: Research Independent Study in Civil and Environmental Engineering

**Description**: Research project mentored by an instructor with related interests and expertise. Course may be taken by students who have demonstrated aptitude for independent work. Consent of instructor and director of undergraduate studies required.

---

**CEE301L - Fluid Mechanics**

**Subject**: CEE  
**Catalog Number**: 301L  
**Title**: Fluid Mechanics

**Description**: Physical properties of fluids; fluid-flow concepts and basic equations; continuity, energy, and momentum principles; dimensional analysis and dynamic similarity; viscous effects; applications emphasizing real fluids. Selected laboratory work. Corequisites: Engineering 244L and Mathematics 353.

---

**CEE302L - Introduction to Soil Mechanics**

**Subject**: CEE  
**Catalog Number**: 302L  
**Title**: Introduction to Soil Mechanics

**Description**: Origin and composition of soils, soil structure. Flow of water through soils. Environmental geotechnology: land waste disposal, waste containment, and remediation technologies. Soil behavior under stress; compressibility, shear strength. Elements of mechanics of soil masses with application to problems of bearing capacity of foundations, earth pressure on retaining walls, and stability of slopes. Laboratory included. Prerequisite: Civil and Environmental Engineering 301L.

---

**CEE311 - Architectural Engineering I**

**Subject**: CEE  
**Catalog Number**: 311  
**Title**: Architectural Engineering I

**Description**: Analysis of the building through the study of its subsystems (enclosure, space, structural, environmental-control). Building materials and their principal uses in the enclosure and structural subsystems. Computer aided design. Field trips. Prerequisite: junior or senior standing, consent of instructor for nonengineering students.
CEE315-20 - Engineering Sustainable Design and the Global Community: Structural Focus

Subject: CEE  
Catalog Number: 315-20  
Title: Engineering Sustainable Design and the Global Community: Structural Focus

Description
Design and testing of solutions to complex interdisciplinary design products in a service-learning context with a focus on structural products. Technical design principles; sustainable and engineering best practices; prototype formation, testing and evaluation; and establishment of research and analysis methodologies in a community-based research experience. Working in partnership with a community agency (local, national, or international) and participation in an experimental learning process by engineering a design solution for an identified community need. Evaluation focused on design deliverables, fabricated prototypes and a critical reflection of the experimental learning process.

CEE315-60 - Engineering Sustainable Design and the Global Community: Environmental Focus

Subject: CEE  
Catalog Number: 315-60  
Title: Engineering Sustainable Design and the Global Community: Environmental Focus

Description
Design and testing of solutions to complex interdisciplinary design products in a service-learning context with a focus on structural products. Technical design principles; sustainable and engineering best practices; prototype formation, testing and evaluation; and establishment of research and analysis methodologies in a community-based research experience. Working in partnership with a community agency (local, national, or international) and participation in an experimental learning process by engineering a design solution for an identified community need. Evaluation focused on design deliverables, fabricated prototypes and a critical reflection of the experimental learning process. Prerequisite: Engineering 201L or Electrical and Computer Engineering 110L or consent of instructor.

CEE365 - Hydrologic and Environmental Data Analysis

Subject: CEE  
Catalog Number: 365  
Title: Hydrologic and Environmental Data Analysis

Description
Focus on development of quantitative approaches used to interpret observations on hydrological and environmental processes across space and time, with application to case studies in water science. In this course, we will (1) generate knowledge of fundamental processes in aquatic ecosystems as they relate to contemporary issues, (2) apply data science skills to datasets in the water resources field, and (3) quantitatively explore a topic in aquatic science through an in-depth course project. Recommended prerequisite: prior experience with computational software (R preferred; Stata, MATLAB, and/or GIS acceptable). Instructor consent required.

CEE393 - Research Independent Study in Civil and Environmental Engineering

Subject: CEE  
Catalog Number: 393  
Title: Research Independent Study in Civil and Environmental Engineering

Description
Research project mentored by an instructor with related interests and expertise. Course may be taken by junior and senior students who have demonstrated aptitude for independent work. Consent of instructor and director of undergraduate studies required.
CEE394 - Research Independent Study in Civil and Environmental Engineering

**Subject**
CEE

**Catalog Number**
394

**Title**
Research Independent Study in Civil and Environmental Engineering

**Description**
Research project mentored by an instructor with related interests and expertise. Course may be taken by junior and senior students who have demonstrated aptitude for independent work. Consent of instructor and director of undergraduate studies required.

CEE411 - Architectural Engineering II

**Subject**
CEE

**Catalog Number**
411

**Title**
Architectural Engineering II

**Description**
Design and integration of building subsystems (enclosure, space, structural, environmental control) in the design of a medium-sized building. Prerequisite: Civil and Environmental Engineering 311 or consent of instructor.

CEE421L - Matrix Structural Analysis

**Subject**
CEE

**Catalog Number**
421L

**Title**
Matrix Structural Analysis

**Description**
Development of stiffness matrix methods from first principles. Superposition of loads and elements. Linear analysis by hand and computer of plane and space structures comprising one-dimensional truss and beam elements. Prerequisites: Engineering 201L and Mathematics 216.

CEE422L - Concrete and Composite Structures

**Subject**
CEE

**Catalog Number**
422L

**Title**
Concrete and Composite Structures

**Description**
Properties and design of concrete. Analysis and design of selected reinforced concrete structural elements according to strength design methodology. Mechanics forming the foundation of the methodology is featured. Laboratory work on properties of aggregates, concrete, and reinforced concrete. Prerequisite: Engineering 201L.

CEE423L - Metallic Structures

**Subject**
CEE

**Catalog Number**
423L

**Title**
Metallic Structures

**Description**
Design of tension, compression, and flexural members. Bolted and welded connections. Design by LRFD methodology. Selected laboratory work. Prerequisite: Engineering 201L.

CEE429 - Integrated Structural Design

**Subject**
CEE

**Catalog Number**
429

**Title**
Integrated Structural Design

**Description**
Student design teams complete a preliminary design of an actual structural engineering project and present the design to a panel of civil engineering faculty and practitioners. A written technical report is required. Topics to be addressed include: the design process; cost estimation; legal, ethical, and social aspects of professional engineering practice; short-term and long-term design serviceability considerations. Open only to civil engineering students during their final two semesters. Prerequisites: Civil and Environmental Engineering 421L, 422L, and 423L.

<td>Introduction to key concepts, theories, and critiques of civic engagement and social change, with a focus on competing notions of democratic citizenship. Examination of voluntarism, philanthropy, community service, political participation, social activism and other forms of community engagement. Critical reflection on ethical issues related to community engagement and social change, including critiques of progressivism and service. Students will also be asked to apply these various approaches to pressing social issues of our time, such as income inequality, environmental justice, education reform and gender and race equality.</td>
<td></td>
</tr>
</tbody>
</table>
CESC201S - Introduction to Engaged Citizenship and Social Change (Gateway Course)

Subject: CESC  
Catalog Number: 201S  
Title: Introduction to Engaged Citizenship and Social Change (Gateway Course)

Description:
Introduction to key concepts, theories, and critiques of civic engagement and social change, with a focus on competing notions of democratic citizenship. Examination of voluntarism, philanthropy, community service, political participation, social activism and other forms of community engagement. Critical reflection on ethical issues related to community engagement and social change, including critiques of progressivism and service. Students will also be asked to apply these various approaches to pressing social issues of our time, such as income inequality, environmental justice, education reform and gender and race equality. Consent of instructor is required.

CESC283 - Ethics in an Unjust World

Subject: CESC  
Catalog Number: 283  
Title: Ethics in an Unjust World

Description:
The course considers the question, 'How can we fix poverty?' It begins by exploring the nature of poverty through a variety of descriptive metaphors (for example, poverty as a 'trap' or a 'disease'). It then considers the word 'we,' and in doing so introduces several basic understandings of ethics (deontology, utilitarianism, virtue ethics, etc.). Finally it considers the word 'fix' and offers three models for responding to poverty: working for, working with, and being with. Each model explores several examples of good practice followed by critical reflection as students engage with opportunities in Durham displaying each approach.

CESC391 - Independent Study

Subject: CESC  
Catalog Number: 391  
Title: Independent Study

Description:
Directed readings in a field of special interest under the supervision of a faculty member, the central goal of which is a substantive paper or project on a previously approved topic. Consent of instructor and director of undergraduate studies required. For students enrolled in the Civic Engagement and Social Change Certificate Program.

CESC401S - The Adventure of Citizenship: Lives of Civic Engagement

Subject: CESC  
Catalog Number: 401S  
Title: The Adventure of Citizenship: Lives of Civic Engagement

Description:
What does it mean to be a citizen and live a civic life? In this course students will integrate academic content with their own community based experiences to understand and critique their understandings of civic engagement and social change. Students will reflect on their Duke experience and begin to chart their post Duke futures. They will gain knowledge of the historical context of democratic citizenship, understanding of the relationship between theory and practice, and familiarity with the contestations of civic engagement that emerge from considerations of race, class, and gender. Students will undertake independent projects to study those who have lived civic lives.
CHEM101DL - Core Concepts in Chemistry

**Subject**  
CHEM

**Catalog Number**  
101DL

**Title**  
Core Concepts in Chemistry

**Description**  
Emphasizes core concepts required for organic chemistry, including atomic and molecular structure, chemical equilibrium with applications to acids and bases, thermodynamics, chemical kinetics, and reaction mechanisms. Relevance and integrated nature of these concepts illustrated through applications to a modern theme in chemistry, e.g., in biological, materials, or environmental chemistry. Laboratory illustrates experimental applications of these core concepts. Not open to students who have credit for Chemistry 21.

CHEM101L9 - Core Concepts in Chemistry (Lab)

**Subject**  
CHEM

**Catalog Number**  
101L9

**Title**  
Core Concepts in Chemistry (Lab)

**Description**  
Lab component for Chemistry 101DL.

CHEM110DL - Honors Chemistry: Core Concepts in Context

**Subject**  
CHEM

**Catalog Number**  
110DL

**Title**  
Honors Chemistry: Core Concepts in Context

**Description**  
Emphasizes core concepts required for organic chemistry, including atomic and molecular structure, chemical equilibrium with applications to acids and bases, thermodynamics, chemical kinetics, and reaction mechanisms. Strong emphasis on applications of these concepts in context of large, interdisciplinary scientific challenge, e.g., in cancer biology or nanoscience. Laboratory illustrates experimental applications of these core concepts. Students may not receive credit for both Chemistry 101DL and 110DL.

CHEM110L9 - Honors Chemistry: Core Concepts in Context (Lab)

**Subject**  
CHEM

**Catalog Number**  
110L9

**Title**  
Honors Chemistry: Core Concepts in Context (Lab)

**Description**  
Lab component for Chemistry 110DL.

CHEM130L - The Chemistry and Physics of Cooking

**Subject**  
CHEM

**Catalog Number**  
130L

**Title**  
The Chemistry and Physics of Cooking

**Description**  
Explores the chemistry and physics of cooking, including how famous chefs use basic science to create gastronomic art. Includes both lecture and laboratory components. Recommended prerequisite: Chemistry 99D or an equivalent background in chemistry.

CHEM180 - Chemistry Outreach: Sharing Chemistry with the Community

**Subject**  
CHEM

**Catalog Number**  
180

**Title**  
Chemistry Outreach: Sharing Chemistry with the Community

**Description**  
Principles of chemistry outreach with emphasis on chemical demonstrations. Activities include readings, discussion, and practice related to staging effective demonstrations, as well as structured service-learning experiences in local schools and other venues. Societal issues relevant to chemistry outreach will be examined, along with assessment and pedagogical strategies. Participation in service-learning is required. Prerequisites: Chemistry 101DL, or 110DL, or 20, or 21.

</table>

**Description**
Laboratory that accompanies Chemistry 202D. Course provides hands-on synthesis, purification, and characterization of organic compounds. Major functional groups will be explored: aromatic and aliphatic compounds, carbonyls, alcohols, amines, etc. Techniques for separation of organic mixtures and determinations of yields will be practiced. Spectra (NMR, IR, UV, MS) will be collected to characterize compound structures. Responsible conduct in laboratory research practices will be emphasized, including but not limited to adherence to chemistry laboratory safety guidelines, proper laboratory notebook record keeping, analysis of data, and scientific writing.

**Description**
Laboratory accompanying Chemistry 210D. Course provides hands-on synthesis, purification, and characterization of inorganic, organic, and organometallic compounds. It illustrates experimental approaches to problems in biological, materials, or environmental chemistry. Emphasis on solutions of acids and bases, buffers, or complex ions as well as electron transfer reactions and UV-Vis techniques. Responsible conduct in laboratory research practices will be emphasized, including but not limited to adherence to chemistry laboratory safety guidelines, proper laboratory notebook record keeping, analysis of data, and scientific writing.
### CHEM295 - Introduction to Research Independent Study

**Subject**: CHEM  
**Catalog Number**: 295  
**Title**: Introduction to Research Independent Study  

**Description**  
Includes research methodology, retrieval techniques for, and use of, the chemical literature, safety in the research laboratory, the ethical conduct of research, and writing a research proposal. Co-requisite: registration for a first course in research independent study in chemistry (393) or a related area. Lecture/discussion.

### CHEM301 - Elements of Physical Chemistry

**Subject**: CHEM  
**Catalog Number**: 301  
**Title**: Elements of Physical Chemistry  

**Description**  
Survey of physical chemistry including quantum chemistry, molecular structure, molecular spectroscopy, thermodynamics, and kinetics. Prerequisites: Chemistry 210DL; or Chemistry 20 plus 101DL; or Chemistry 20 plus 110DL; or Chemistry 21; Mathematics 112L, and Physics 142L or 152L or 162L or consent of instructor.

### CHEM301L - Physical Chemistry Laboratory

**Subject**: CHEM  
**Catalog Number**: 301L  
**Title**: Physical Chemistry Laboratory  

**Description**  
Laboratory experiments designed to accompany Chemistry 301. Includes instruction and practice in writing the laboratory notebook and formal laboratory reports. Prerequisite: (or corequisite) Chemistry 301.

### CHEM302 - How Does Biology Work? The Physical and Chemical Underpinnings of Biological Nanomachines

**Subject**: CHEM  
**Catalog Number**: 302  
**Title**: How Does Biology Work? The Physical and Chemical Underpinnings of Biological Nanomachines  

**Description**  
An introduction to biophysical chemistry and molecular biophysics. Explores principles that underpin biological structure and function through such topics as: how the structure and function of biomolecules can be studied at the level of single molecules; how biomolecular machines capture energy and do work; how biomolecules function within networks to convey signals, act cooperatively, and form patterns. Recommended prerequisite: Chemistry 301 or 311 or consent of instructor.

### CHEM310 - Physical Chemistry I

**Subject**: CHEM  
**Catalog Number**: 310  
**Title**: Physical Chemistry I  

**Description**  
Fundamentals of physical chemistry. Emphasizes quantum chemistry, molecular structure, and molecular spectroscopy. Chemistry 310L should be taken concurrently with Chemistry 310. Prerequisites: Chemistry 210DL; or Chemistry 20 plus 101DL; or Chemistry 20 plus 110DL; or Chemistry 21; Mathematics 212, Physics 142L, 152L, or 162L or consent of the instructor.

### CHEM310L - Physical Chemistry I Laboratory

**Subject**: CHEM  
**Catalog Number**: 310L  
**Title**: Physical Chemistry I Laboratory  

**Description**  
Laboratory experiments designed to accompany Chemistry 310. Includes instruction and practice in writing the laboratory notebook and formal laboratory reports. Prerequisite: (or corequisite) Chemistry 310.

CHEM99D - Introduction to Chemistry and Chemical Problem Solving

Subject: CHEM  
Catalog Number: 99D  
Title: Introduction to Chemistry and Chemical Problem Solving  

Description: Introductory course for students with limited background in chemistry emphasizing chemical problem solving. Topics include atoms, molecules, ions, compounds, and the periodic table, stoichiometry and chemical reactions, reactions in solution, and an introduction to chemical bonding, thermochemistry, and gas laws. To be followed by Chemistry 101DL. Not open to students who have credit for Chemistry 20, 21 or 101DL.

CHILDPOL250S - Child Policy Research

Subject: CHILDPOL  
Catalog Number: 250S  
Title: Child Policy Research  

Description: Major developmental stages of childhood and influences in a child’s life: parents/family life, schools, communities, and the economy. Emphasis on 1) applying theory for analyzing complex societal problems (often involving issues of race, class, and gender); 2) using material and methodologies from psychology, sociology, economics, and public policy. Required course for certificate program Child Policy Research, but open to all undergraduate students.

CHILDPOL290 - Selected Child Policy Research Topics

Subject: CHILDPOL  
Catalog Number: 290  
Title: Selected Child Policy Research Topics  

Description: Topics vary but pertain to the development and social and economic well-being of children and their families. Interdisciplinary in nature and drawing material from disciplines such as sociology, psychology, public policy, economics, and education. An elective course for students pursuing Child Policy Research certificate.

CHILDPOL290S - Selected Child Policy Research Seminar Topics

Subject: CHILDPOL  
Catalog Number: 290S  
Title: Selected Child Policy Research Seminar Topics  

Description: Seminar version of Child Policy Research Topics 290.

CHILDPOL325S - Equity in Early Childhood Programs and Policies

Subject: CHILDPOL  
Catalog Number: 325S  
Title: Equity in Early Childhood Programs and Policies  

Description: This course will explore contemporary theories and empirical research that address issues of equity and early childhood development from birth to age 8. We will examine factors related to individuals and systems (e.g., child care, public health, housing, workforce, social services) that impact early childhood development. Students will critically consider the developmental science that has informed early childhood policies and programs; the social, political and economic forces that shape the study of young children and contributed to developmental trajectories that benefit some children while disadvantaging others; the changing roles of families; and the implications of these policies.

CHILDPOL393 - Research Independent Study

Subject: CHILDPOL  
Catalog Number: 393  
Title: Research Independent Study  

Description: Individual research on a topic of special interest under the supervision of a faculty member, the central goal of which is a substantive paper containing significant analysis and interpretation. Consent of instructor and director of the Child Policy Research certificate program required.

</tbody>
</table>

**Description**
In this course, you will learn to translate your scholarship into policy-relevant writing and actions. Students must have completed or be in the process of completing an independent research project on a topic related to children, families, or education. You will translate knowledge gained from your independent research project into several products for diverse audiences, including practitioners and policymakers. You will learn to present your academic scholarship in oral, academic, lay-public, and professional forums. Capstone course required for the Child Policy Research certificate program. Consent of Director of that certificate program required.

**Description**
First semester of a two-semester sequence. Designed for students with little or no knowledge of the Chinese language. Aim at developing basic communicative proficiency in Mandarin Chinese with equal attention to aural comprehension, speaking, reading, and writing skills. Learn some Chinese cultural facts and social-cultural etiquette when developing basic communicative competence in Chinese. Recognize and write approximately 250-300 characters by the end of the semester.

### CHINESE102 - First-Year Chinese II

</thead>
<tbody>
<tr>
<td>CHINESE</td>
<td>105D</td>
<td>First-Year Chinese in Review I</td>
</tr>
</tbody>
</table>

**Description**
Consolidate learning the basic elements of Chinese language and culture. Equal attention paid to the development of listening, speaking, reading and writing proficiencies. Introduction to aspects of Chinese life and culture. Open to students who had received some Chinese language instruction before coming to Duke but lacked a solid foundation in basic Chinese grammar and pronunciation. Not open for credit to students who grew up in a household speaking Mandarin Chinese. After completing Chinese 105, students will take Chinese 203.
### CHINESE131 - First Year Chinese for Bilingual Learners

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CHINESE | 131 | First Year Chinese for Bilingual Learners  

**Description**  
Designed for students who were raised in a Chinese-speaking environment and who can converse about personal information or daily topics but have little or no reading and writing skills in Mandarin Chinese. Gain knowledge of the etymologies of Chinese characters and writing system. Substantial work on the development of reading and writing competencies in Chinese while continuing to improve aural understanding and speaking competency. Topics focus on issues concerning the aspects of bilingual and bicultural experiences specifically addressed for Chinese heritage learners.

### CHINESE203 - Intermediate Chinese

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CHINESE | 203 | Intermediate Chinese  

**Description**  
Second-year level Mandarin Chinese. Prerequisite: Chinese 102 or its equivalent. Not open to students who have completed Chinese 232 or 242. Aiming to enhance students’ abilities in conversing on personal topics in informal situations, in reading and writing narrative and descriptive texts, and in analyzing the structure of Chinese language.

### CHINESE204 - Intermediate Chinese

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CHINESE | 204 | Intermediate Chinese  

**Description**  
Continuation of Chinese 203. A service-learning/community-engaged labeled course. Project-based service with local/global community partners. Community-engaged course activities involving linguistic and cultural exchange. Prerequisite: Chinese 203 or its equivalent. Not open to students who have completed Chinese 232 or 242. Continued work on consolidating the language.

### CHINESE205 - Intermediate-Mid Chinese

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CHINESE | 205 | Intermediate-Mid Chinese  

**Description**  
Second-year level Chinese for students who have completed Chinese 105 or its equivalent. Not open to students who grew up in a household speaking Mandarin Chinese. Aim to enhance the abilities in conversing on personal topics in informal situations and some social issues in formal situations. Focus on improving skills for reading and writing narrative, descriptive, and some expository texts, on developing analytical knowledge of the Chinese language structure, and on enhancing cultural literacy.

### CHINESE223A - Intensive Progress in Chinese

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CHINESE | 223A | Intensive Progress in Chinese  

**Description**  
Offered in the Duke Study in China Program at the University of International Business and Economics, Beijing, China. Consent of instructor required.

### CHINESE224A - Intensive Progress in Chinese

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CHINESE | 224A | Intensive Progress in Chinese  

**Description**  
Continuation of Chinese 223A. Offered in the Duke Study in China Program at the University of International Business and Economics, Beijing, China. Consent of instructor required.
CHINESE232 - Intermediate Chinese for Bilingual Learners

Subject: CHINESE  
Catalog Number: 232  
Title: Intermediate Chinese for Bilingual Learners  
Description: Continuation of Chinese 131. Further development of reading and writing fluency and competencies through studying a range of topics consisting of more complex vocabulary and grammatical structures. Content covering necessary understanding of language and cultural heritage concerning Chinese customs, civilization, and history. Prerequisite: Chinese 131 or equivalent.

CHINESE271T - Voices in Philosophy: Chinese Tutorial

Subject: CHINESE  
Catalog Number: 271T  
Title: Voices in Philosophy: Chinese Tutorial  
Description: Discussion-based course trains students to read and analyze core philosophical texts in Chinese, typically in conjunction with a lecture course offered in philosophy. Classes include close readings of original texts, discussions of interpretation and application in various forms (including film, documentary, multimedia) and real-life situations. Students examine how language/culture impact our understanding of core philosophical texts through attention to issues such as translation, vernacular, and word choice. Tutorials meet weekly for 75 minutes. Recommended prerequisite: Chinese 306 or equivalent.

CHINESE273T - Voices in Public Policy: Mandarin Chinese Tutorial

Subject: CHINESE  
Catalog Number: 273T  
Title: Voices in Public Policy: Mandarin Chinese Tutorial  
Description: Students will explore how language and culture impact public policy and practice. Through authentic text, video, and case studies in Chinese, students will analyze public policy issues in the Chinese-speaking world, in order to develop their understanding of core issues in the field. 1/2 credit. S/U. Tutorials meet for 75 minutes/week. Taught in the target language.

CHINESE277T-3 - Voices in Marketing: Advertising in Chinese

Subject: CHINESE  
Catalog Number: 277T-3  
Title: Voices in Marketing: Advertising in Chinese  
Description: Discussion-based course trains students to analyze all forms of advertising in Chinese. Classes explore the history and theories of advertising in China, as well as hands-on strategies for analyzing ads, with particular attention to issues such as translation, localization, and ethics. Tutorials meet weekly for 75 minutes. Does not count for the Markets & Management Studies certificate program. Prerequisite: Chinese 204 or equivalent.

CHINESE305D - Pre-Advanced Chinese

Subject: CHINESE  
Catalog Number: 305D  
Title: Pre-Advanced Chinese  
Description: Designed for Chinese as a foreign/second language. Follows Chinese 204 or 224A as part of the language sequence. Increases students’ knowledge of more complex forms of the Chinese vocabulary system and competencies in speaking, aural comprehension, reading, and writing. Exposure to a speech variety appropriate to formal and informal speech situations. Materials drawn from newspaper articles, essays, and other readings concerning social and cultural issues in contemporary Chinese society. Emphasis on the active use of the language for communication in written and spoken forms. Recommended prerequisite: Chinese 204 or equivalent.

CHINESE306 - Advanced Chinese II

Subject: CHINESE  
Catalog Number: 306  
Title: Advanced Chinese II  
Description: Continuation of Chinese 305. Designed for Chinese as a foreign/second language. Builds knowledge of more sophisticated linguistic forms and learning to differentiate between different types of written and spoken discourse. Development of writing skills in selected formats and genres while continuing to develop correct use of speech patterns and vocabulary and cross-cultural understanding. Content drawn from newspaper articles, essays, and other readings concerning social and cultural issues in contemporary Chinese society. Prerequisite: Chinese 305 or equivalent.
CHINESE321S - Business and Interculturality in the Chinese Society

Subject: CHINESE  
Catalog Number: 321S  
Title: Business and Interculturality in the Chinese Society

Description
Introduction to the basis of China's Economic Reform from the late 1970s to 1990s; current economics and politics between China and the world; Chinese communication patterns and behavioral culture present in business settings; case studies of multinational corporations, and career preparation and job searching in Chinese-speaking countries. Focus on oral communicative skills, reading authentic texts, and case analyses of Chinese companies in domestic and global markets. Recommended prerequisite: Chinese 305, Chinese 232 or equivalent proficiency.

CHINESE321SA - Business and Interculturality in Chinese Society

Subject: CHINESE  
Catalog Number: 321SA  
Title: Business and Interculturality in Chinese Society

Description
Study abroad version of Chinese 321S with modifications made to accommodate internship component of course content. Introduction to topics related to recruitment, business negotiation, e-commerce, logistics management, international investment, etc. and specialized terminology for the Chinese-speaking workplace. Focus on oral, written and intercultural communication, product marketing, business practices and protocols, and case studies in mainland Chinese society. Recommended prerequisite: Chinese 325A.

CHINESE325A - Advanced Progress in Chinese

Subject: CHINESE  
Catalog Number: 325A  
Title: Advanced Progress in Chinese

Description
Third-year Chinese. Offered in the Duke Study in China Program at the University of International Business and Economics, Beijing, China. Consent of instructor required.

CHINESE326A - Advanced Progress in Chinese

Subject: CHINESE  
Catalog Number: 326A  
Title: Advanced Progress in Chinese

Description
Continuation of Chinese 325A. Third-year Chinese. Offered in the Duke Study in China Program at the University of International Business and Economics, Beijing, China. Consent of instructor required.

CHINESE331 - Modern Chinese Society and Culture through New Media

Subject: CHINESE  
Catalog Number: 331  
Title: Modern Chinese Society and Culture through New Media

Description
Different social and cultural issues that China is facing, including the coronavirus pandemic in Hubei, China's artificial-intelligence boom, globalization, etc; Content drawn from Chinese broadcast news, blogs and videos, TV shows, and documentary films; A community-engaged course or service-learning course; Engagement includes direct, project-based, or research-focused service with local/global community partners among other engaged practices; Improving language and intercultural communication skills that can be used to comprehend, analyze, and discuss real life topics and issues in modern Chinese society. Prerequisite: Chinese 232 or equivalent proficiency.

CHINESE332 - Chinese Translation and Interpretation

Subject: CHINESE  
Catalog Number: 332  
Title: Chinese Translation and Interpretation

Description
A third-year Chinese course focusing on Chinese translation and interpretation skills with the aim to improve students' comprehension and communication abilities in Chinese. Different genres of authentic reading texts and real-life audio and video materials used as course materials. Topics to be covered closely related to culture, literature, society, business/economy, and science/technology. Teacher's lectures of skills combined with students' practices as the course format. Linguistic features and cultural practices between English and Chinese will be compared and demonstrated. Prerequisite: Chinese 232, Chinese 242, or their equivalent.

**Description**
Introducing the main ideas of Confucianism through modern translations of canonical Chinese texts. Observing and examining the representation of information in multimedia, real-life situations, and current events. Learning the original stories behind idioms and the impact of those texts on the belief system in Chinese-speaking regions. Emphasizing oral proficiency in Chinese through various formats including inquiries, discussion, dialogue, debate, and role-play. Comparisons with respect to philosophical perspectives and approaches to manage critical issues between Chinese and Western cultures. Recommended prerequisite: Chinese 333, 407, or equivalent.

</table>

**Description**
Introduction to Classical Chinese for the basic reader. Historical background of essential texts in the ancient period, covering classical literature, philosophy, and history. Focus on grammar, systematic sentence analysis, and distinctive functions of grammatical particles. A gateway to advanced literary reading and writing (shu-mian-yu). Enhancement of knowledge of classical literature, philosophy, and history. Recommend consultation with instructor before enrolling in course. Prerequisite: Chinese 333 or Chinese 407S.
### CHINESE391 - Independent Study

**Subject**: CHINESE  
**Catalog Number**: 391  
**Title**: Independent Study

**Description**  
Individual study of language for conducting research involving sources written or spoken in the language. Students have to submit a proposal describing the purported research, types of sources to be analyzed, and kinds of language knowledge or skills they need to be equipped with. Consent of instructor and director of undergraduate studies required.

### CHINESE407S - Issues in Chinese Language and Society I

**Subject**: CHINESE  
**Catalog Number**: 407S  
**Title**: Issues in Chinese Language and Society I

**Description**  
Materials from public media used to analyze diverse social phenomena and cultural issues in contemporary China. Major focus on developing literary reading and writing skills along with learning methods of writing academic Chinese essays on a wide range of complex topics. Topics include popular culture, food, marriage outlooks, Cultural Revolution, Confucianism, and social issues after the economic reform in China. Analysis of cultural and literary texts from variety of media and genres providing a basis for practice in discussion and writing.

### CHINESE408S - Chinese Language and Culture through Film

**Subject**: CHINESE  
**Catalog Number**: 408S  
**Title**: Chinese Language and Culture through Film

**Description**  
This course aims to further develop students’ language skills and improve their understanding of Chinese society and culture through contemporary Chinese language film. Films of different themes are covered, such as the comparison of Chinese and Western family values and relationships, youth culture and campus life, romantic love stories, migrant workers and their living situations, space travel in fiction, etc. Critical film analysis such as film genre, camera angles, lighting, sound will be discussed to help students explore and analyze the artistic characteristics of films. Recommended prerequisite: Chinese 407 or 331 or equivalent proficiency.

### CHINESE421SA - The Culture of Business and Economics in Chinese

**Subject**: CHINESE  
**Catalog Number**: 421SA  
**Title**: The Culture of Business and Economics in Chinese

**Description**  
Designed for students enrolled in the DSIC business Chinese track with practicum. Introduction to topics relevant to business and efficiency, enterprise management, international trade, economic regulations, environmental protection and economic development in the Chinese business context, and specialized terminology for the Chinese-speaking workplace. Focus on oral, written and intercultural communication, product marketing, business practices and protocols, and case studies in mainland Chinese society.

### CHINESE427A - Intensive Advanced Chinese

**Subject**: CHINESE  
**Catalog Number**: 427A  
**Title**: Intensive Advanced Chinese

**Description**  
Study of diverse public media in which Mandarin Chinese is the principal language of communication. Includes interviews, methods of writing Chinese essays, and rhetorical analysis on a range of topics. Equivalent of fourth-year Chinese. Offered in the Duke Study in China Program at the University of International Business and Economics, Beijing, China. Consent of instructor required.

### CHINESE428A - Intensive Advanced Chinese

**Subject**: CHINESE  
**Catalog Number**: 428A  
**Title**: Intensive Advanced Chinese

**Description**  
Continuation of Chinese 427A. Equivalent of fourth-year Chinese. Offered in the Duke Study in China Program at the University of International Business and Economics, Beijing, China. Consent of instructor required.
CHINESE435S - Chinese in the Humanities I
Subject: CHINESE
Catalog Number: 435S
Title: Chinese in the Humanities I
Description: Designed for advanced learners of Chinese as a second language. Study short stories by prominent writers published in the late 1990s. Stories focus on the concerns of human beings, touching upon contemporary themes such as the recollections of the Cultural Revolution, the impact of commercialization of the traditional family, sex, drugs and crime, etc. Advance analytical competency in the language and cultural literacy.

CHINESE450S - Understanding China and the United States: Stereotypes, Conflicts, and Common Challenges
Subject: CHINESE
Catalog Number: 450S
Title: Understanding China and the United States: Stereotypes, Conflicts, and Common Challenges
Description: Designed for Chinese international students and students who have finished fourth-year Chinese language courses with an aim to enhance students' intercultural knowledge and intercultural communication skills. Authentic reading texts and video/movie clips in English and Chinese used as prompts for class discussions and course projects. Covers the stereotypes about the two countries and the two cultures, the history of Sino-US relations, the common challenges for both countries. Prerequisite: successful completion of at least one 400-level Chinese course or approval of instructor.

CHINESE455 - Modern Chinese Culture: Narratives of Home and Abroad
Subject: CHINESE
Catalog Number: 455
Title: Modern Chinese Culture: Narratives of Home and Abroad
Description: Major works in Chinese literature, film, and other cultural media in their creation of the spectacle of 'Modern China' at home and abroad. All reading materials and class discussion in Chinese. Prerequisite: Chinese language proficiency at the fourth-year level or the equivalent.

CHINESE456 - Aspects of Chinese Culture and Society
Subject: CHINESE
Catalog Number: 456
Title: Aspects of Chinese Culture and Society
Description: Topics in Chinese culture and society including media, popular culture, literature, and the arts of China. Prerequisite: Chinese language proficiency at the fourth-year level or the equivalent.

CHINESE473A - Current Issues in Modern Chinese I
Subject: CHINESE
Catalog Number: 473A
Title: Current Issues in Modern Chinese I
Description: Equivalent to fifth year. Discussion based on oral and written reports and topical readings. Offered in the Duke Study in China Program at the University of International Business and Economics, Beijing, China.

CHINESE474A - Current Issues in Modern Chinese II
Subject: CHINESE
Catalog Number: 474A
Title: Current Issues in Modern Chinese II
Description: Equivalent to fifth year. Readings and discussion of selections from modern Chinese literature, expository prose, and the Chinese press. Offered in the Duke Study in China Program at the University of International Business and Economics, Beijing, China.
CINE139 - The Hollywood Musical: Singing and Dancing the American Dream
Subject CINE  
Catalog Number 139  
Title The Hollywood Musical: Singing and Dancing the American Dream

Description
Beyond its unapologetic praise of spectacularity and entertainment, what makes the Hollywood film musical a quintessential American genre? Since its origins, the Hollywood musical has been channeling various ideologies in its modes of performance and production; it has offered a space to address specific anxieties of the American society: modernity vs. nostalgia, representations of gender, ethnicity, class, and the low/high divide in arts. Emphasis will be given on its performative aspects, the relationship between choreography and song, the changing representations of the dancing body, musical styles, sexual objectification and the star persona.

CINE141S - Audiovisual Cultures in East Asia: Film, Music, and Other Media
Subject CINE  
Catalog Number 141S  
Title Audiovisual Cultures in East Asia: Film, Music, and Other Media

Description
This seminar introduces students to various aspects of audiovisual cultures in East Asia, including film, photography, music, and other new and emerging media. It focuses on visual and sound studies and their interconnected relationship to the constitution of the sensible world within the East Asian regions while connecting to the larger global context, highlighting the global movement and cross-cultural networks of audiovisual media both enabled and complicated by technologies. Emphases are also placed on hand-on practice with individual and group projects. The goal is to not only understand audiovisual cultures critically but also actively engage in their production.

CINE142 - LGBTQ/Queer Cinema and Cultural Production
Subject CINE  
Catalog Number 142  
Title LGBTQ/Queer Cinema and Cultural Production

Description
This class investigates LGBTQ identities, communities and relationships pre, post, and during the Stonewall era through cinema, television, and new media. We will also explore constructions of sexuality, gender, class, race, and nationalism within the context of LGBTQ transnational film cultures and scholarship.

CINE190 - Special Topics in Cinematic Arts
Subject CINE  
Catalog Number 190  
Title Special Topics in Cinematic Arts

Description
Special topics in cinematic arts.

CINE190S - Special Topics in Cinematic Arts
Subject CINE  
Catalog Number 190S  
Title Special Topics in Cinematic Arts

Description
Special topics in Cinematic Arts seminar.

CINE201 - Introduction to Film Studies
Subject CINE  
Catalog Number 201  
Title Introduction to Film Studies

Description
Basic film theory and history of motion picture technology. Introduction to experimental, documentary, and narrative forms of Third World, European, and United States cinemas.
CINE202 - History of Documentary Film
Subject: CINE
Catalog Number: 202
Title: History of Documentary Film
Description: Introduction to the history, theory, and styles of nonfiction film and video. Transformation in technologies and their influence on form, from actuality films to contemporary digital documentaries. Documentary's marginal status and surprising commercial appeal; the mixing of fiction and nonfiction strategies in cultural construction. Use of documentary as a tool for exploring individual identity, filmmaker/subject relationships, and fomenting political change.

CINE202A - History of Documentary Film
Subject: CINE
Catalog Number: 202A
Title: History of Documentary Film
Description: Introduction to the history, theory, and styles of nonfiction film and video. Transformation in technologies and their influence on form, from actuality films to contemporary digital documentaries. Documentary's marginal status and surprising commercial appeal; the mixing of fiction and nonfiction strategies in cultural construction. Use of documentary as a tool for exploring individual identity, filmmaker/subject relationships, and fomenting political change.

CINE203S - Film Theory
Subject: CINE
Catalog Number: 203S
Title: Film Theory
Description: Recent critical developments in Marxist aesthetics, structuralism, semiotics of the image, feminist film theory, History and theory of film technology. Both experimental and Hollywood narrative films.

CINE204S - Media Theory
Subject: CINE
Catalog Number: 204S
Title: Media Theory
Description: Introduction to the material and technical infrastructure that informs and constrains the production and dissemination of knowledge. Exploration of cultural impact of technical media from writing to the internet. Combines historical and theoretical discussion with hands-on experimentation with various media, including the codex book, phonography and sound registration technology, photography, cinematography, video, virtual reality, digital computation, and the internet.

CINE205 - Contemporary Documentary Film: Filmmakers and the Full Frame Documentary Film Festival
Subject: CINE
Catalog Number: 205
Title: Contemporary Documentary Film: Filmmakers and the Full Frame Documentary Film Festival
Description: Integrated with the films and filmmakers of the Full Frame Documentary Film Festival. The art form, style, and technology of contemporary documentary films. Issues of autonomy and power, politics, and public policies. Analysis of outstanding films from around the world. Presentations and discussions by filmmakers.

CINE207S - Documentary and Policy: How Documentary Influences Policy
Subject: CINE
Catalog Number: 207S
Title: Documentary and Policy: How Documentary Influences Policy
Description: Examines documentaries as catalysts for change in local, state, and federal laws and regulations, with special attention to relationships between film and organizations with political influence. Looks at how documentaries have altered public sentiment and political outcomes. Uses case studies of documentary films (essay-style, journalistic, information-driven films; narrative, story-driven films; propaganda; art films; and hybrids of all of the above). Explores the question of how a film achieves influence: for example, with a high-profile theatrical and/or television release, by utilization as an educational tool, or by 'going viral' to become part of a public conversation.
### CINE208S - The Silent Film: An Introduction

**Subject**  
CINE  

**Catalog Number**  
208S  

**Title**  
The Silent Film: An Introduction  

**Description**  
The first thirty-five years of cinema as an emerging art form and mode of communication. Aesthetic, technical, and cultural aspects of the medium will be considered in historical context, from nineteenth-century experiments to nascent narrative conventions and the first disruptive avant-garde movements. Focus is on close reading of relevant films.

### CINE209A - Internship in New York

**Subject**  
CINE  

**Catalog Number**  
209A  

**Title**  
Internship in New York  

**Description**  
Participants in this course are immersed in the professional work of New York’s arts, culture, and performance industries through apprenticeship to a sponsoring artist, institution, or organization. Participants work fifteen hours per week at their internship and meet arts professionals from within and beyond Duke’s alumni network. They also meet regularly with their supervising professor. In combination, this work experience, networking opportunity, and academic reflection help interns develop their professional capabilities, refine their interpersonal and workplace skills, and prepare for future work in creative industries.

### CINE210 - Film Genres

**Subject**  
CINE  

**Catalog Number**  
210  

**Title**  
Film Genres  

**Description**  
A historical survey of motion picture genre as a stylistic and narrative device, including comedy, horror, the musical, the western, and science fiction.

### CINE211S - American Film Comedy

**Subject**  
CINE  

**Catalog Number**  
211S  

**Title**  
American Film Comedy  

**Description**  
A historical survey of American film comedy from silent cinema to contemporary television and film.

### CINE212 - American Dreams, American Movies

**Subject**  
CINE  

**Catalog Number**  
212  

**Title**  
American Dreams, American Movies  

**Description**  
A course in selected American films that create as well as reflect American identity from the beginnings of Hollywood moviemaking in the Studio System through the beginnings of Indie spirit. Nine to twelve best-loved movies, such as Mr. Smith Goes to Washington, Casablanca, Rear Window, Singin’ in the Rain, and Dr. Strangelove by directors like Frank Capra, John Ford, Alfred Hitchcock, and Stanley Kubrick. The course pays attention to American cultural history, the development of the movie industry, the idea of the director as auteur, narrative form in film, and some fundamentals of film analysis. Assignments are both written and creative experiments in filmmaking, as suits class interests.

### CINE213 - Melodrama East and West

**Subject**  
CINE  

**Catalog Number**  
213  

**Title**  
Melodrama East and West  

**Description**  
Melodrama as a genre in literature and as a mode of representation in film and other media. Issues include: gender construction, class formation, racial recognition, and national identity-building. Emphasis on comparative method attending American and Chinese cultures and the politics of cross-cultural representation.

**Description**

**CINE214S - American Independent Cinema**

Examination of the emergence, establishment, and transformations of American indie film. Addresses main genres, key films and prominent directors by looking at the aesthetic characteristics of indie films, as well as the social and institutional contexts (primarily its relationship to Hollywood cinema) that led to the creation and important impact of this filmmaking practice. Topics include Midnight Movies of the 70s, New American Cinema, Trash Cinema, Art Cinema, Black Indie Cinema, New Queer Cinema, Generation X, Smart Cinema, Neo Noir, and the Pulp Fiction success story.

**CINE215 - Animated Film: A History and Aesthetic**

Evolution of animation from the philosophical 'toys' of the late eighteenth century to the major international entertainment form of today. Special focus on American animation as it evolved from inspired individuals like Emile Cohl and Winsor McCay to a full-blown industrial model allowing for the creation of the animated feature and contemporary special effects.

**CINE216 - Cinematic Authorship**

Theories of authorship continue to generate heated debates. What is at stake in these debates and for whom? This course will consider both the historical and contemporary debates around the controversial notion of authorship as it relates to signature and style. Drawing on film and media theory, literary theory, and philosophy, we will examine how artists explore and challenge the romantic conflation of the author as a stylistic innovator, site of influence, collaborator, and iconoclast. Throughout the semester we will ask: What is an author? What is the impact of stylistic innovation in media culture? And, why does authorship matter?

**CINE217A - The Arts, Culture, and Performance of New York**

This course introduces its participants to New York though its rich artistic, cultural, and performance offerings—drawn from art, dance, film, music, literature, and theater. Visiting all five boroughs, they contemplate how the identities of New Yorkers—formed by the city and by ability, class, ethnicity, gender, race, and sexuality—are performed in the theater of everyday life: in parks, streets, subways, and especially the city's diverse neighborhoods and restaurants.

<td>Description</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Black women filmmakers have been actively involved in filmmaking since the early 20th century, and occupy notable positions in the 21st century media environment. Artists such as Ava Duvernay and Julie Dash demand critical attention to black women film and video artists. Films made by Black women are constructed in a variety of forms, such as animation, documentary, experimental, and narrative. These works bring a unique perspective to the screen. This course will give students an opportunity to view films, examine the specifics of film/video production in general, compare the various works produced by women directors, and acquire the skills necessary for film/video cultural criticism.</td>

CINE251SA - Berlin Film City: Movies in the Metropolis

Subject: CINE
Catalog Number: 251SA
Title: Berlin Film City: Movies in the Metropolis

Description:
A course about Berlin's rich and unparalleled cinema history. Screenings, readings, and visits to historical studios and cinemas, film museums, archives, and film academies. The course is structured around a series of iconic films about Berlin. Units on Weimar cinema, Nazi film, DEFA (East Germany's production studio), the New German Cinema of the 1970s and 80s, post-wall film, and the twenty-first century Berlin School. Students will engage in close analysis of films in their historical context and discuss how cinema engages with issues of national, political, religious, ethnic, gender and sexual identities. Offered in English in the Duke in Berlin summer program.

CINE252 - German Film

Subject: CINE
Catalog Number: 252
Title: German Film

Description:
Introduction to German film, film theory, and reception. Emphasis on history and cultural background of films. Topics include Expressionism, Nazi and postwar films, New German cinema, DEFA. Films subtitled; readings and discussion in English.

CINE253 - Indian Cinema

Subject: CINE
Catalog Number: 253
Title: Indian Cinema

Description:

CINE254 - Italian Cinema

Subject: CINE
Catalog Number: 254
Title: Italian Cinema

Description:
Introduction course to Italian cinema including silent films, Neorealism, fascist productions, Commedia all'italiana and experimentalism. Taught in English, Italian majors and minors should inquire with the professor about the possibility of concurrently enrolling in a tutorial for credit towards the language requirement for the major or minor.

CINE255 - Japanese Cinema

Subject: CINE
Catalog Number: 255
Title: Japanese Cinema

Description:
An introduction to the history of Japanese cinema focusing on issues including the relation between the tradition-modernity or Japan-West in the development of Japanese cinema, the influence of Japanese films on the theory and practice of cinema abroad, and the ways in which cinema has served as a reflection of and an active agent in the transformation of Japanese society.

CINE256 - World of Korean Cinema

Subject: CINE
Catalog Number: 256
Title: World of Korean Cinema

Description:
The world of Korean cinema, broadly defined in terms of national, generic, theoretical boundaries, beyond conventional auteur, genre, one-way influence, and national cinema theories. Cinematic texts examined in local, regional, and global contexts and intersections, in conversation with global theories and histories of cinema, visual cultures, and other representational forms. Variable topics informed theoretically and politically by discourses on gender/sexuality, race/ethnicity, global flows of people and cultures, popular and 'high' culture crossovers, transnational co-productions, remakes, translations and retellings. No knowledge of Korean language/culture presumed.

CINE266S - Poetic Cinema
Subject CINE
Catalog Number 266S
Title Poetic Cinema
Description
Inquiry into sources of 'resonance' in international cinema with emphasis on films from Asia and the Middle East. The object of the course is to attempt a description of aspects of film construction which conduce to intense experience for viewers. Readings in indigenous aesthetics.

CINE268S - Trauma and Nostalgia: East European Film in the 21st Century
Subject CINE
Catalog Number 268S
Title Trauma and Nostalgia: East European Film in the 21st Century
Description
Examines the major thematic focus of East European filmmakers in the 21st century: their efforts to reconstruct and reassess the experience of the Cold War (1945-1989) and the Yugoslav wars (1991-1995). These films from the Czech Republic, Hungary, Poland, Romania, Croatia, and Serbia include ironic/sentimental tales of Cold War childhood, thrillers about sleeping with the enemy (political informers), and psychological dramas centering on political trauma, resistance, and compromise. All films shown with English subtitles.

CINE270S - Storyworlds: The Art, Technology, and Pleasure of Narrative
Subject CINE
Catalog Number 270S
Title Storyworlds: The Art, Technology, and Pleasure of Narrative
Description
Is 'tell me a story' an universal imperative? Seminar examines storytelling practices across a broad span of histories and cultures, and the creation of storyworlds through multiple media, genres, and platforms. Topics include comparative oral traditions, Medieval story cycles, serial tales, textual poaching and fanfic, alternate reality gameworlds (ARG), social media, transmedia storytelling and transcultural fandoms.

CINE271 - Mafia at the Movies
Subject CINE
Catalog Number 271
Title Mafia at the Movies
Description
A study of the mafia, and by extension, of Italy’s ‘dark heart,’ in its historical, social, economic, cultural, and political dimensions, as represented in a wide range of Italian and American films and television productions, from documentary to comedy. Course will also consider possibilities and limits inherent to cinema in representing, and influencing cultural and social realities. Taught in English, Italian majors and minors should inquire with the professor about the possibility of concurrently enrolling in a tutorial for credit towards the language requirement for the major or minor.

CINE272 - The Middle East Through Film
Subject CINE
Catalog Number 272
Title The Middle East Through Film
Description
Film as access into the region through a series of direct as well as poetic connections woven across films viewed, filmmakers featured, lectures, discussions, and texts read. By means of the integration of course components and students’ weekly responses, an understanding of the region is developed by way of inquiry into and rigorous engagement with cultural production. From feature length films to shorts, the breadth of the work we will engage with includes documentaries, dramas, and less traditional forms. A substantial midterm paper, and a final project to be in the form of one of three potential possibilities subject to approval of proposal: a paper, a talk, a short film.

CINE273 - Religion and Film
Subject CINE
Catalog Number 273
Title Religion and Film
Description
A study of the relationship between motion pictures and religion. Focus on the comparative portrayal of organized religions; expressions of religious life; and religious topics, such as God, evil and morality, in both Western and non-Western films in which contemporary artists and intellectuals explore the challenges of modernity.
CINE274 - Spies Like Us: Screening Cold War Espionage

Subject: CINE
Catalog Number: 274
Title: Spies Like Us: Screening Cold War Espionage

Description:
When the Cold War erupted in the wake of World War II, filmmakers were poised to screen it as propaganda, entertainment (thriller, horror, science fiction), and morally reflective realism. This course explores the films/television series produced on both sides of the Iron Curtain as well as those made after the Cold War (post-1989). Discussion will focus on ethical justifications and critiques of espionage; the characterizations of the spy and those spied on, and the interactions between these protagonists; and the changing aesthetics of screening espionage.

CINE276 - America Dreams American Movies II: Independents Through Streaming

Subject: CINE
Catalog Number: 276
Title: America Dreams American Movies II: Independents Through Streaming

Description:
This course studies contemporary American movies as they create and reflect America's self-image from the rise of independents through the innovations of the 21st century, including digital video, streaming, and the rise of high-quality TV productions. Approaches include U.S. cultural history, industry developments, and technical analysis. Directors such as Kubrick, Coppola, Spielberg, Tarantino, Lee, Moore, Cameron, Campion, Jenkins, Bigelow, Peele, DuVernay, and others up to today. At least two weeks of the semester will be devoted to TV, such as Game of Thrones, The Americans, or Watchmen. Like the film and TV industries themselves, assignments encourage creativity and collaboration.

CINE280AS - Studies in the United States Culture Industries

Subject: CINE
Catalog Number: 280AS
Title: Studies in the United States Culture Industries

Description:
A survey of the major professions in the arts, media, and entertainment industries, featuring prominent speakers from fields such as studio and independent film and television, screenwriting, directing, producing, financing, acting, artist representation, journalism, marketing, animation, and music. Students apply theory and analysis to projects currently in production, observing live tapings, rehearsals, and screenings. Real-world case studies to examine how and why stories chosen for production shape and are shaped by societal values and discourse, domestic and global economies, and the greater world of the arts and media. Only offered on Duke in LA program.

CINE283A - Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)

Subject: CINE
Catalog Number: 283A
Title: Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)

Description:
This course explores the complexities of global Los Angeles by focusing on issues that especially impact its marginalized communities. For the service-learning component, students volunteer at least 20 hours during the semester at nonprofit organizations engaged in the pursuit of social justice. This experience provides an opportunity to observe, participate in and reflect on the day-to-day implementation of social action, policy and organizing initiatives. As part of the volunteer commitment and in lieu of a final paper, students produce a documentary media project that communicates goals identified by and in collaboration with the community partner.

<td>Ready for Prime Time: Writing the Dramatic TV Episode</td>
</tr>
</tbody>
</table>

**Description**

Some of the best dramatic writing today can now be found on television. This class will focus on one commercial prime-time drama, past or present. Beginning with a deep immersion into the world of that show—watching all of Season One—students break into groups, coming up with their own long stories to advance the plots. Each student will pitch a story for their particular version of 'Season Two'—developing an outline, tracking their storylines with the other members of their group, and finally writing a draft of an hour-long TV episode. Each student will write his or her own script—but will need to share notes, thoughts and feedback with their fellow writers.
CINE305S - Screenwriting
Subject: CINE
Catalog Number: 305S
Title: Screenwriting
Description: Advanced writing projects for feature film. Study of existing scripts and videos, application of techniques.

CINE306S - Writing the Movie.
Introduction to the Theory and Practice of Writing for the Screen
Subject: CINE
Catalog Number: 306S
Title: Writing the Movie.
Introduction to the Theory and Practice of Writing for the Screen
Description: Theory and practice of the process of writing for the screen. Exploration of visual storytelling; analysis of screenplays and movies; developing original stories into screenplay format. Projects: writing and presenting treatments, outlines and scenes.

CINE310S - Acting For the Camera
Subject: CINE
Catalog Number: 310S
Title: Acting For the Camera
Description: Introduction to film and television acting. Prerequisite: Theater Studies 145S Acting.

CINE315DS - Environmental Issues & the Documentary Arts
Subject: CINE
Catalog Number: 315DS
Title: Environmental Issues & the Documentary Arts
Description: Survey how filmmakers, authors, photographers, and other artists have brought environmental issues to the public's attention in the last century, and in some cases instigated profound societal and political change. Examine the nebulous distinctions between persuasion and propaganda, agenda and allegory, point of view and content. Evolve as a viewer of the environment and a maker of documentary art. Initiate your own projects to address and/or depict environmental issues in one form of a broad range of media.

CINE315S - Environmental Issues & the Documentary Arts
Subject: CINE
Catalog Number: 315S
Title: Environmental Issues & the Documentary Arts
Description: Survey how filmmakers, authors, photographers, and other artists have brought environmental issues to the public's attention in the last century, and in some cases instigated profound societal and political change. Examine the nebulous distinctions between persuasion and propaganda, agenda and allegory, point of view and content. Evolve as a viewer of the environment and a maker of documentary art. Initiate your own projects to address and/or depict environmental issues in one form of a broad range of media.

CINE320S - Film Animation Production
Subject: CINE
Catalog Number: 320S
Title: Film Animation Production
Description: Experimentation with various media; mastering animation techniques such as metamorphosis, timing, articulation, storytelling, sound design, special effects, and camera. Each student to produce a one-minute animated film on the Oxberry 16mm film animation stand. Not open to students who have taken this course as Film/Video/Digital 102S.
### CINE322S - Motion Graphics for Film and Video

**Subject**: CINE  
**Catalog Number**: 322S  
**Title**: Motion Graphics for Film and Video  

**Description**: An exploration of techniques and theoretical approaches to motion graphics, animation and post-production effects in film and video. Readings and screenings will lead to student-produced exercises through exposure to applications in the Adobe Creative Cloud and digital editing software.

---

### CINE331S - The Documentary Experience: A Video Approach

**Subject**: CINE  
**Catalog Number**: 331S  
**Title**: The Documentary Experience: A Video Approach  

**Description**: A documentary approach to the study of local communities through video production projects assigned by the course instructor. Working closely with these groups, students explore issues or topics of concern to the community. Students complete an edited video as their final project. Not open to students who have taken this course as Film/Video/Digital 105S.

---

### CINE334S - Producing Docu-Fiction

**Subject**: CINE  
**Catalog Number**: 334S  
**Title**: Producing Docu-Fiction  

**Description**: Investigation of hybrid, genre-defying films that question traditional definitions of documentary and fiction. Emphasis on experimental forms, documentary reenactment, mockumentary and dramatized 'true stories.' Exploration of both documentary and fiction production techniques, culminating in the production of a final video project.

---

### CINE340S - Experimental Filmmaking

**Subject**: CINE  
**Catalog Number**: 340S  
**Title**: Experimental Filmmaking  

**Description**: The history of avant-garde in film and video combined with production exercises.

---

### CINE342S - Filming Art

**Subject**: CINE  
**Catalog Number**: 342S  
**Title**: Filming Art  

**Description**: Practice-based production course examining the filmic realization and visualization of the artistic process. Screenings of bio-pics, documentaries and experimental films focusing on artists and various art forms complement readings and hands on production exercises that will prepare students to undertake their own short video portrait of an artist or work of art.

---

### CINE343S - Dance for the Camera

**Subject**: CINE  
**Catalog Number**: 343S  
**Title**: Dance for the Camera  

**Description**: The choreographic and bodily experience essential to dance for the camera. Hands on experience in videodance production through the exploration/production of several short individual and group videodance projects. Issues in creative and conceptual thinking, experimentation, pre/post video production, camera techniques, non-linear editing (Final Cut Pro), choreography for the camera. Viewings of seminal as well as experimental videodance works; discussions; readings; internet site visits; computer lab and dance studio/shooting location time; gallery/museum or videodance installation site visits. Prerequisite: Intermediate or above level of any dance technique, or Dance 1055.

<tbody>
<tr>
<td>CINE350S - Sound for Film and Video</td>
<td>CINE 350S</td>
<td>Sound for Film and Video</td>
</tr>
</tbody>
</table>

**Description**
Theory and practice of sound recording techniques and strategies for film and video. Focus on sound/image relationship, sound design and sound acquisition. Screenings and readings will reinforce practice exercises.

| CINE351 - 3D Modeling and Animation | CINE 351 | 3D Modeling and Animation |

**Description**
Basic concepts of 3D modeling and animation; fundamentals of computer geometry; knowledge of basic tools of 3D software (Maya); introduction to modeling, animation, texturing, lighting, and rendering; combination of these techniques in a final project. Recommended prerequisite: Visual and Media Studies 206 or 396.

| CINE352S - Time, Space and Film | CINE 352S | Time, Space and Film |

**Description**
Exploration of temporal transformation, spatial articulation and subjectivity in the moving image. From special effects and avant-garde experiments to the long take and the fluid master. Readings and screenings inform hands-on practical exercises.

| CINE355S - Cinematography | CINE 355S | Cinematography |

**Description**
In-depth investigation of cinematographic techniques and principles for motion picture production. Exercises in both film and high definition digital video. Emphasis on advanced lighting techniques, lensing, camera mobility, set operations and close analysis of master works of cinematography.

| CINE356S - 16mm Film Production | CINE 356S | 16mm Film Production |

**Description**
Hands-on experience with 16mm motion picture film and photography. In-depth exploration of the techniques and aesthetics of film production, including basic screen writing, lighting, storytelling, and editing.

| CINE357S - Editing for Film and Video | CINE 357S | Editing for Film and Video |

**Description**
Theory and practice of film and video editing techniques. Exploration of traditional film cutting as well as digital non-linear editing. Exercises in narrative, documentary and experimental approaches to structuring moving image materials.

| CINE366S - Video Journalism | CINE 366S | Video Journalism |

**Description**
Theories and concepts of television broadcasting; writing and editing for electronic media; issues of production. Students will produce a Web portfolio. Approved as a practicum course for the Policy, Journalism and Media Studies certificate.

| CINE371 - News as a Moral Battleground | CINE 371 | News as a Moral Battleground |

**Description**
Ethical inquiry into journalism and its effect on public discourse. Issues include accuracy, transparency, conflicts of interest and fairness. Topics include coverage of national security, government secrecy, plagiarism/fabrication, and trade-offs of anonymous sourcing.

</table>

**Description**  
This course examines black documentary film by drawing on The Full Frame Archive Film Collection. The Full Frame Documentary Film Festival is the largest film festival in the United States entirely devoted to documentary film. Students enrolled in this class will read canonic texts on the black documentary film, study camera techniques, explore the history of the Full Frame Festival, critique the role of race in social justice filmmaking and interact with documentary filmmakers.
CINE425S - Advanced Writing for Stage and Screen
Subject: CINE
Catalog Number: 425S
Title: Advanced Writing for Stage and Screen
Description: 'Advanced Writing for Stage and Screen' will look at the strengths of three dramatic art-forms - playwriting, screen and TV writing - and the particular challenge they share: the concept of 'dramatic action' which provides the 'motor' for a dramatic work. Initial writing exercises will explore these dramatic-writing forms, in conjunction with the study of representative plays, films and TV series. Final projects - a play, screenplay or TV pilot - will be discussed and critiqued in class as they progress, prior to a final rewrite. Prerequisite for this course is one previous dramatic writing course - either playwriting or screenwriting.

CINE429S - Historical Documentary Production
Subject: CINE
Catalog Number: 429S
Title: Historical Documentary Production
Description: Course examines how archival footage and photographs are used in historical documentaries about struggles for social equity in America. Iconic films will be reviewed to assess editors' strategies for employing archival material in documentaries on the labor movement, civil rights movement, anti-Vietnam war movement, and early lesbian and gay rights movement. Students will then conduct research for film footage and photographs and learn practical steps needed to acquire rights to use the material. During the second half of the semester, students will be guided in the production and editing of their own short historical documentary.

CINE439S - Screening Europe
Subject: CINE
Catalog Number: 439S
Title: Screening Europe
Description: Course debates identification of Europe as a political, historical and social entity from the standpoint of cinema. Provides students with an introduction to the notion of 'European cinema' from 1945 to the present-day crisis of Brexit and migration. Explores issues concerning interactions and relations between national and transnational identities, the local and the global, post-colonialism and multiculturalism, migration and nationalism, and Eastern versus Western Europe.

CINE451S - Narrative Projects
Subject: CINE
Catalog Number: 451S
Title: Narrative Projects

CINE452S - Animation Practice II
Subject: CINE
Catalog Number: 452S
Title: Animation Practice II
Description: Building on foundations of animation, this course expands upon and develops a further working knowledge of challenges faced in animation production. Examines the historical origins of animation from film and digital imaging to the contemporary 3-D workflow. Skills will be integrated into a self-directed final project of the student's own design. Suggested prerequisites CINE 320S or CINE 381S.

CINE453S - Cinematography II
Subject: CINE
Catalog Number: 453S
Title: Cinematography II
Description: Course explores the approaches, strategies, motivations, and creative processes that inform cinematography. Elements of cinematic style, visual imagination, and storytelling are discussed and explored through exercises. Students learn the relationships and responsibilities involved in the art, and are guided in the execution of the various canonical and extraordinary working methods involved in traditional, experimental, and modern cinematography. Suggested prerequisite: CINE 355S.
## CINE490S - Special Topics In Cinematic Arts
**Subject**  
CINE  
**Catalog Number**  
490S  
**Title**  
Special Topics In Cinematic Arts  
**Description**  
Advanced special topics investigation of major concepts and principles in arts of the moving image. Content varies with instructors.

**Description**  
Independent Study.

## CINE499S - Visual Arts Practice and Cinematic Arts Concentration Senior Capstone
**Subject**  
CINE  
**Catalog Number**  
499S  
**Title**  
Visual Arts Practice and Cinematic Arts Concentration Senior Capstone  
**Description**  
Senior capstone seminar in advanced research in Visual Arts practice and theory, Cinematic Arts practice and theory. Capstone requires the completion of major research project or body of work, participation in regular critiques, and presentation of work at a capstone exhibition. Visual Arts students work in any given media or combination thereof. Cinematic Arts Concentration students focus on the research and/or production of works in film, video, animation, or any time-based media. Course is structured around joint critiques and guest presentations, fostering an interdisciplinary environment representative of contemporary art contexts and professional practice.

## CINE89S - First-Year Seminar
**Subject**  
CINE

89S  
**Title**  
First-Year Seminar  
**Description**  
Topics vary each semester offered.

## CLST107 - Roman Art and Archaeology
**Subject**  
CLST  
**Catalog Number**  
107  
**Title**  
Roman Art and Archaeology  
**Description**  
Roman artistic legacy shaped Western art in profound ways. Artistic innovations: realistic portraiture, trompe l’oeil wall painting; architectural innovations: amphitheater, circus, multi-seat latrine, steam-heated bath. Explore Roman art and architecture throughout Mediterranean from late Republic to early fourth century AD. Emphasis on social and cultural contexts. Study major technical and aesthetic innovations, and impact of Roman emperors as art patrons. Class lectures and readings arranged both chronologically and thematically, with case studies of archaeology of Pompeii, Athens, Aphrodisias in Turkey.

## CLST122 - Scribes and Scriptures: The Transmission of the Bible in Antiquity
**Subject**  
CLST  
**Catalog Number**  
122  
**Title**  
Scribes and Scriptures: The Transmission of the Bible in Antiquity  
**Description**  
A study of the people and communities responsible for the writing and copying of sacred literature in antiquity, with a focus on the transmission of biblical texts. Topics include: scribal education, tools or instruments, methods of copying, and (dis)similarities in practices across time, place, and religious tradition. Ancient texts now held at Duke’s Rubenstein Rare Book and Manuscript Library will form the basis of our inquiry.
CLST139 - Seven Wonders: Monuments and Cultures of the Ancient Mediterranean

**Subject**
CLST

**Catalog Number**
139

**Title**
Seven Wonders: Monuments and Cultures of the Ancient Mediterranean

**Description**
Study of the ‘Seven Wonders’ of the ancient world: the Great Pyramids, the Hanging Gardens of Babylon, the Temple of Artemis at Ephesus, the Mausoleum at Halicarnassus, the Statue of Zeus at Olympia, the Colossus of Rhodes, and the Lighthouse of Alexandria. Course explores the meaning of these monuments to the societies that produced them, with attention to their chronological and geographical specificity. Topics include: how archaeologists approach ancient monuments; what these monuments tell us about the human experience and about life in the past; who precisely they bear witness to; and how the study of such monuments helps us to understand our own present.

CLST141 - Age of Warriors: Pre-Roman and Italian Archaeology

**Subject**
CLST

**Catalog Number**
141

**Title**
Age of Warriors: Pre-Roman and Italian Archaeology

**Description**
Classical archaeology is often centered on Roman and Greek civilizations, but can overlook other exciting, formative struggles. What were the earliest civilizations peopling the Italian peninsula in the first millennium BCE? This was an age of conflicts, battles, social change and dramatic events involving individuals and ethnic groups. It was an age of warriors and wars, weapons and armies, contending for the political and religious power of city-states, nations and territories. Among them, the Etruscan civilization was the one able to deeply influence the Roman and other Italic societies for several generations.

CLST144 - Principles of Archaeology

**Subject**
CLST

**Catalog Number**
144

**Title**
Principles of Archaeology

**Description**
Introduction to the many disciplines of archaeology, using a survey of cultures and civilizations to explain archaeological techniques, methods, theory, results, and ethics.

CLST151 - Classical Etymology: The Greek and Latin Roots of English

**Subject**
CLST

**Catalog Number**
151

**Title**
Classical Etymology: The Greek and Latin Roots of English

**Description**
Studies the Greek and Latin roots of English words, and the adoption and evolution of English derivatives from Greek and Latin. Focuses on lexical analysis and vocabulary building, with attention to sociopolitical dimensions of word development and language use.

<td><strong>Birth of the West: Thinking about the Greek Origins of Western Civilization</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Description: Have you ever wondered about the many ways in which those in the West look back to the Greeks for the origins of civilization? There is a breathtaking array of such 'beginnings' claimed by the Greeks, such as the invention of the alphabet, the first staged drama, the rise of formal logic and philosophy, democracy, realistic sculpture, the conventions of writing history (historiography), and much else. In this course, we will think through these claims to cultural ‘origins,’ seeking both to learn and understand the narratives passed down to us, and to thoughtfully interrogate those narratives. An introductory course: no prior knowledge required.</td>

<td>Archaeology of Migration: Greeks, Roman, Egyptians, Etruscans</td>
</tr>
</tbody>
</table>

**Description**

Since before recorded history massive migrations have moved people throughout the world, creating hybrid identities and new societies and destroying old ones. This course examines migration in the Mediterranean among classical Greeks, Romans, Etruscans and Egyptians in the first millennium BCE. We explore historical factors, such as famine, overpopulation, and violent conquest and enslavement, and we consider recognized and unacknowledged consequences. After introduction to mapping technologies, we end by mapping various ancient migrations and their effects. Taught online.

Exploration of ancient, medieval and modern conceptualizations of good and evil as found in the iconic heroes, villains, and buffoons of literature and film; film and literature as windows onto their contemporary historical contexts, and as indicators of social values, debates, and limits.
CLST208 - Ancient Myth
Subject: CLST  
Catalog Number: 208  
Title: Ancient Myth  

Description
Myths are humanity's longest-lasting and most powerful stories. They shape our understanding of transitions and crises, and explore the boundaries between right and wrong, life and death, and the natural and the supernatural. They can also be playful, exuberant, and highly entertaining. This course introduces students to the myths of Greece and Rome, with comparative material drawn from the Hebrew Bible and other ancient texts. Throughout the course we will also think about the role of mythology today, and the way we use stories to come to terms with ourselves and our world.

CLST210 - The Good Life: Religion, Philosophy, and Life's Ultimate Concerns
Subject: CLST  
Catalog Number: 210  
Title: The Good Life: Religion, Philosophy, and Life's Ultimate Concerns  

Description
What does it look like for a human life to go well? What leads to human flourishing or 'happiness' or 'success'? What is freedom? Love? Justice? What is the basis for ethics? What is our relationship to the natural world? What is the significance of death? How do our beliefs (or lack thereof) about God or the gods shape how we view the world? We will examine how philosophical or religious traditions around the globe have answered life's biggest questions. Traditions may include Confucianism, Islam, Christianity, Stoicism, Judaism, Buddhism, Hinduism, scientific naturalism, expressive individualism, and utilitarianism. Part of the Transformative Ideas Sophomore Program.

CLST211 - How to Live and How to Die: Death, Dying, and the Afterlife from Confucius to Cryonics
Subject: CLST  
Catalog Number: 211  
Title: How to Live and How to Die: Death, Dying, and the Afterlife from Confucius to Cryonics  

Description
Death is one of the only completely universal human experiences, yet we resist talking about it in our everyday lives. In this course, we will investigate some of the biggest questions and issues surrounding death. We will first examine the different ways that philosophical and religious traditions have conceived of death and problems that these conceptions may raise. In the second half of our course we will focus on how death affects our actions and choices in life. How does the prospect of impermanence shape the way we live? Are there causes that are worth dying for? How should we prepare for death? Should we use new technologies to extend our lives and 'cheat' death?

CLST214 - Medicine and Human Flourishing
Subject: CLST  
Catalog Number: 214  
Title: Medicine and Human Flourishing  

Description
This course examines the nature, ends, and practice of medicine as it relates to the human condition. How can medicine foster human flourishing and well-being—individual and social—against the experience of injury, pain, and suffering? Beginning with ancient Greece and its Hippocratic corpus, students explore answers to this question within a variety of historical and contemporary contexts. Taught by an interdisciplinary team of scholars that includes medical professionals, the course highlights the importance and professional relevance of posing big questions about personal meaning and human values at stake in the practice of medicine.
**CLST214D - Medicine and Human Flourishing**

**Subject** CLST  
**Catalog Number** 214D  
**Title** Medicine and Human Flourishing

**Description**

**CLST222 - The Age of Nero: History, Art, and Literature**

**Subject** CLST  
**Catalog Number** 222  
**Title** The Age of Nero: History, Art, and Literature

**Description**  
The Age of Nero: History, Literature, and Art. Study of the history, literature, and art of one of the best documented, if misunderstood, periods of Roman history, with a view to separating fact from fiction, and understanding why Nero became one of history's greatest villains and whether his reputation is justified. Focus on: what makes for a 'bad' political leader; who gets to decide how history is told; how power, politics, and art intersect; how and why Nero's story resonates with us today.

---

**CLST224S - 'Telling' Time, Then and Now: Cultural Identity, Politics, and Values in the Roman Calendar**

**Subject** CLST  
**Catalog Number** 224S  
**Title** 'Telling' Time, Then and Now: Cultural Identity, Politics, and Values in the Roman Calendar

**Description**  
How we reckon time and the calendar are so ingrained in us that they seem natural and value-neutral. Is this true? What and why do we commemorate with the calendar? Who are 'we'? How is timekeeping related to cultural identity? To imperialism? We explore these questions through the lens of the Romans and their calendar. We learn how the Romans measured time; how Roman cultural values were expressed in their calendar; how Augustus' changes to the calendar reflected a change in Roman identity. The course studies material evidence, selections from ancient historians (Herodotus, Thucydides, Livy, Jerome), and authors that incorporate Roman timekeeping and commemoration (Horace, Virgil, Ovid).

---

**CLST230S - Augustine's City of God**

**Subject** CLST  
**Catalog Number** 230S  
**Title** Augustine's City of God

**Description**  
Study of the literary form and argument of Augustine's epoch-making City of God: a rhetorical tour de force of consummate artistry and stunning originality and scope; and a political, religious, and moral critique of ancient Rome within a comparative, cross-cultural analytical framework that vindicates an alternative vision of society rooted in the Christian scriptures. City of God provides a remarkable example of sophisticated literary construction, rhetorical prowess, cross-cultural examination, and moral reflection. We focus on these four facets of a celebrated synthesis that breaks new ground in historiography, political science, and moral theory.
CLST240L - Virtual Museums: Theories and Methods of Twenty-First-Century Museums

<tbody>
<tr>
<td>CLST</td>
<td>241</td>
<td>Etruscans: Myth, Archaeology and Civilization</td>
</tr>
</tbody>
</table>

**Description**

The Etruscans were a pre-Indo-European population living in the Italic peninsula in the first millennium BCE. One of the most important and fascinating civilizations of the ancient world, which deeply influenced the Classical world and the Mediterranean basin. The class involves archaeological studies and comparative analyses of pre-urban and urban settlements, the necropoleis, art, art history, iconography and archaeological remains of the Etruscan and pre-Roman Italian world. Use of digital technologies for the study of Etruscan cities and landscape with a specific focus on the Etruscan city of Vulci. Not open to students who have taken Classical Studies 198.

CLST243S - Representations of Women in the Classical World

**Description**

Explores profound influence of Greek and Roman artistic legacy on Western art. Innovations include portrait, Baroque style, large-scale painting, public baths, theater. Explore art and architecture of Greece and Rome in social and cultural context, including major technical and aesthetic innovations. Role of artistic agency and patronage. Starts with the Classical age and ends with Christian emperor Constantine.
CLST262 - Ancient Athletics
Subject: CLST
Catalog Number: 262
Title: Ancient Athletics
Description:
The athletic festivals of the ancient Greeks and Romans are among the most enduring legacies of the Classical world, and provide a particularly accessible introduction to the study of antiquity. Through examination of literary and historiographical sources (in translation) and of the material remains at the ancient sites, this course introduces students to the origins and development of the major athletic contests (especially the Olympic Games), the methods and practicalities of ancient training, and the changing role of athletics in ancient and modern education, religion, and politics. We end with a survey of the modern Olympic movement, from the nineteenth century to the present.

CLST264 - Greek and Roman Religion
Subject: CLST
Catalog Number: 264
Title: Greek and Roman Religion
Description:
Topics in Greek and Roman religion from the Bronze Age through the rise of Christianity, based on literary, documentary, and archaeological sources. Coverage within the chronological boundaries via survey, case-studies, or a combination of both. Topics might include the relationship of myth and ritual, hero cult, mysteries, festivals, interface between philosophy and religion, 'public' and 'private' religion, religious 'imports' and exoticism, architecture and landscape of religion.

CLST266 - Gender and Sexuality in the Ancient World
Subject: CLST
Catalog Number: 266
Title: Gender and Sexuality in the Ancient World
Description:
Class examines ancient erotic poetry, prose, material evidence (e.g., vase paintings) to explicate gender as a cultural sign; sexuality as a language in which other business is transacted. 'Obscene' literature, paintings, etc. evidence how the ancients constructed men, women, sexuality—but also social hierarchies, national prerogatives, and identity.

CLST271 - History of Ancient Philosophy
Subject: CLST
Catalog Number: 271
Title: History of Ancient Philosophy
Description:
The pre-Socratics, Socrates, Plato, Aristotle, and post-Aristotelian systems. Not open to students who have taken Classical Studies 93 or Philosophy 93.

CLST272A - The Birth of Reason in Ancient Greece
Subject: CLST
Catalog Number: 272A
Title: The Birth of Reason in Ancient Greece
Description:
A study of the Classical Greeks’ pronounced emphasis on the rational aspect of human nature, which enabled them to lay the foundations for subsequent intellectual developments in western thought. The Athenian Empire as a case study for an investigation of the five major ancient ethical systems. Taught only in the Duke Greece Summer Study Abroad program.

CLST275 - Democracy: Ancient and Modern
Subject: CLST
Catalog Number: 275
Title: Democracy: Ancient and Modern
Description:
Examines democracy in its ancient and modern forms, with special attention to Athenian and American democracy. Does modern democracy fulfill the promise of ancient democracy, or betray its fundamental tenets? Topics may include freedom, equality, and rights; democratic institutions; citizenship; rhetoric; democratic knowledge and decision-making; foreign policy; corruption; religion; and hope.

<td>Contemporary Nationalism and Classical Political Theory</td>
</tr>
<tr>
<td>Description</td>
<td></td>
<td>Ancient Greece and Rome offered competing visions of politics based on republics and the cosmopolitan idea of humans as world-citizens. In light of classical political theory and the resurgence of nationalism in current politics, we will consider the following questions: Should politics be based on concern for the individual or the nation? Do we have stronger duties to our nations and fellow citizens than to the rest of the world? If so, can we ignore other countries and focus on our own problems? Should foreign policy further the goals of nation-states or focus on global justice? Are nation-states necessary? How should we address the environment, immigration, and economic globalization?</td>

<td>How to Rule the World: Empire and Global Governance from Greece to America</td>
</tr>
<tr>
<td>Description</td>
<td></td>
<td>From Babylon and Persia to Greece and Rome, empires have risen and fallen, but they always seem to make a comeback. Their defenders point to the stability they bring to a chaotic world. Their detractors point to the harsh rule required to maintain them. This course will explore arguments for and against empire, drawing on history, philosophy, and political theory, with a special focus on the Greeks and Romans. Then, in light of the parallel problems of empire and global governance, we will ask what lessons we can learn for the practice of international affairs today. Contemporary topics will include global institutions, foreign intervention, East Asia policy, and NATO and Eastern Europe.</td>

Duke University
**CLST316S - Self-Knowledge and the Pursuit of Wisdom**

**Subject** CLST  
**Catalog Number** 316S  
**Title** Self-Knowledge and the Pursuit of Wisdom

**Description**
This course looks to the Classical Tradition for guidance on how to grow in wisdom through a deeper knowledge of the self in relation to others. Students explore questions of personal meaning and significance by reading literary, philosophical, and biographical classics of the Western Tradition. Focus on wisdom and fulfillment in life, and the means for attaining them through friendship and community. Topics include: wisdom, conscience, happiness, justice, passion, moderation, guilt, shame, excellence, character, purpose, prudence, and choice. Authors may include Homer, Vergil, Sophocles, Plato, Aristotle, Epictetus, Seneca, Marcus Aurelius, St. Paul, Augustine, Calvin, Hobbes, Spinoza.

**CLST322 - Jesus and the Gospels**

**Subject** CLST  
**Catalog Number** 322  
**Title** Jesus and the Gospels

**Description**
Investigation of Jesus as he is portrayed in the Synoptic Gospels (Matthew, Mark, and Luke) and John, looking also at literary relationships, dates, and historical contexts, with special focus on the historical Jesus, eschatology, parables, stories about the miraculous, passion narratives, and gospel women.

**CLST328S - Literary Translation: History, Theory, and Practice**

**Subject** CLST  
**Catalog Number** 328S  
**Title** Literary Translation: History, Theory, and Practice

**Description**
A study of the theory and practice of translation from antiquity to the present, with a focus on religious, literary, and philosophical texts and the distinctive challenges involved in rendering such works into a different language. Topics include analysis of historically-significant translations, a survey of the history and theory of translation as a practice, a close study of the ethics of translation, and a workshop in which students will prepare, revise, and analyze their own translations. Prerequisite: Three semesters of language.

**CLST340A - Rome: History of the City**

**Subject** CLST  
**Catalog Number** 340A  
**Title** Rome: History of the City

**Description**
On-site study of the development of Rome’s urban plan and its major monuments through the ages; the influence of the ancient Republic and Empire, the Papacy, and the modern secular state; change and continuity in artistic forms and daily life. (Summer program in Italy.)

**CLST341A - The Ancient City**

**Subject** CLST  
**Catalog Number** 341A  
**Title** The Ancient City

**Description**
Examination of the archaeological monuments of Rome and other Italian sites, as well as literary sources, inscriptions, and works of art. Consent required. Taught in Rome as part of the Intercollegiate Center for Classical Studies program. Students must register for both 341A-1 and 341A-2.

- **Description**: Study Abroad Course

### CLST343SA - Conservation and Management of the Material Heritage

- **Subject**: CLST
- **Catalog Number**: 343SA
- **Title**: Conservation and Management of the Material Heritage
- **Description**: This course offers theoretical and practical experience in the management of cultural heritage, with special reference to Roman art and architecture in Rome. Students live the experience of being a conservator of archaeological items, monuments, and sites, and a manager of cultural and material heritage.

### CLST344 - Early Greek Archaeology: From the Fall of Mycenae to the Persian Wars

- **Subject**: CLST
- **Catalog Number**: 344
- **Title**: Early Greek Archaeology: From the Fall of Mycenae to the Persian Wars
- **Description**: Greek material culture in its social, economic, and historical contexts, 1200 to 480 BCE.

### CLST346S - Classical Sculpture

- **Subject**: CLST
- **Catalog Number**: 346S
- **Title**: Classical Sculpture
- **Description**: Statues were the 'other population' of Greece and Rome. Portraits of athletes, generals, kings, emperors lined streets and filled markets. Why? What do statues do for people setting them up, for people viewing them? Seminar explores place of statues in Greek and Roman society, and relationship between context, style, and meaning. Course approaches material thematically and contextually. Particular attention paid to changing physical, cultural, historical, political contexts in which statues were set up and in which they continued to operate for centuries. Instructor consent required.

### CLST348 - Classical Greek Archaeology, Archaic to Classical

- **Subject**: CLST
- **Catalog Number**: 348
- **Title**: Classical Greek Archaeology, Archaic to Classical
- **Description**: The archaeology of the Greek citystate including its historical context. Emphasis on both themes (sanctuaries, death and burial, warfare) and the ability to understand material culture in context.

### CLST350 - Art of the Meal: Alcohol and Feasting in the Ancient World

- **Subject**: CLST
- **Catalog Number**: 350
- **Title**: Art of the Meal: Alcohol and Feasting in the Ancient World
- **Description**: Commensality—the act of eating and drinking together—is a fundamental part of human social life, no matter the time or place. This course examines the wide variety of evidence from the ancient world for feasting activities, and especially the production and consumption of alcoholic beverages, in text, visual and material culture. Readings in anthropological theory and archaeological and ethnographic case studies are used to explore human relationships to food and alcohol in different social contexts, and their use in the construction of cultural similarity and difference, group identities, and social hierarchies. With special emphasis on the ancient Mediterranean and Middle East.

<td>Digital approaches to humanistic research and its expression, across disciplines and fields. Critical approaches to the digital turn in contemporary culture; theoretical approaches to digital creation and digital remediation of analog sources. Topics include aesthetics, cultural impact, opportunities for global circulation. Critical contextualization around access, authorship, diversity and inclusion, media effects, and evaluation. Exercises in text analysis, digital mapping, data visualization, databases, networks, online archives and exhibitions, immersive media, situated within broader cultural debates on digital cultures, and on best practices for interdisciplinary collaboration.</td>
<td>Laboratory version of Information Science + Studies 240. Multimedia information systems, including presentation media, hypermedia, graphics, animation, sound, video, and integrated authoring techniques; underlying technologies that make them possible. Practice in the design innovation, programming, and assessment of web-based digital multimedia information systems. Intended for students in non-technical disciplines. Engineering or Computer Science students should take Engineering 206 or Computer Science 408.</td>

CMAC255 - Humanities Text Mining and Meaning

Subject: CMAC  
Catalog Number: 255  
Title: Humanities Text Mining and Meaning

Description:
The digital text has led to new forms of research and is receiving increasing attention from artificial intelligence (AI). The application of machine learning to text, known as text mining, presents unique intellectual challenges that require major contributions from the humanities. This course introduces students to the interdisciplinary domain of text mining through a humanities-based media-theoretic framework. Students will first learn text data prep skills and practices fundamental to meaningful analysis. The semester will later introduce unsupervised machine learning and topic modeling, and culminate in a group project. Not recommended for advanced CS students.

CMAC265S - Introduction to Digital Feminism

Subject: CMAC  
Catalog Number: 265S  
Title: Introduction to Digital Feminism

Description:
The aim of this course is to critically analyze digital culture from a feminist and gender studies perspective. We will address topics related to digital innovation and its history, unpacking and questioning them through the insights offered by gender studies analytical tools. Subjects such as the rise of Silicon Valley, gaming culture, social media, algorithms, Artificial Intelligence, extraction of data applied to biotechnology, macroeconomic development of IT platforms and the impact of technology on ecology will be discussed starting from a current event or debate, to which we will give a historical, ethical, sociological, theoretical, literary or cinematographic perspective.

CMAC266 - Media History: Old and New

Subject: CMAC  
Catalog Number: 266  
Title: Media History: Old and New

Description:
Development of various media forms in historical and social contexts. Impact of old/new media on established art, commerce, education, politics, entertainment from 19th c. on. Changing ideas about authenticity, authority, agency, reception, identity, and power relating to emerging media forms, production, circulation. Overlaps, disjunctions, convergences, persistences and antiquations via case studies and examples. Technologies include print publishing, photography, audio recording, film, telegraph, maps, exhibitions, architecture and installations alongside contemporary web, multimedia, database, game, virtual reality, and telepresence systems. Final rich media research project required.

CMAC270S - Constructing Immersive Virtual Worlds

Subject: CMAC  
Catalog Number: 270S  
Title: Constructing Immersive Virtual Worlds

Description:
Theory, practice, and creation of 3D virtual worlds. Hands-on design and development of online collaborative simulation environments. Introduction to graphics workflow for creating virtual world media assets. Critical exploration of state-of-the-art virtual world technologies; 3D graphics, chat, voice, video, and mixed reality systems. Topics include: history/culture of virtual worlds, identity and avatars; behavioral norms; self-organizing cultures; user-generated content, virtual world economies; architectural scalability.

CMAC290 - Special Topics in Computational Media

Subject: CMAC  
Catalog Number: 290  
Title: Special Topics in Computational Media

Description:
Topics vary from semester to semester.

CMAC290S - Special Topics in Computational Media, Arts and Cultures

Subject: CMAC  
Catalog Number: 290S  
Title: Special Topics in Computational Media, Arts and Cultures

Description:
Topics vary by semester and instructor.
**CMAC291 - Independent Study in Computational Media, Arts and Cultures**

**Subject**
CMAC

**Catalog Number**
291

**Title**
Independent Study in Computational Media, Arts and Cultures

**Description**
Individual research directed study in a field of special interest on a previously approved topic, under the supervision of a faculty member, resulting in an academic and/or artistic product.

**CMAC293 - Research Independent Study in Computational Media, Arts and Cultures**

**Subject**
CMAC

**Catalog Number**
293

**Title**
Research Independent Study in Computational Media, Arts and Cultures

**Description**
Individual research directed study in a field of special interest on a previously approved topic, under the supervision of a faculty member, resulting in an academic and/or artistic product.

**CMAC315 - Mapping History with Geographic Information Systems**

**Subject**
CMAC

**Catalog Number**
315

**Title**
Mapping History with Geographic Information Systems

**Description**
Beginner/intermediate Geographic Information System (GIS) course designed to help students learn how to investigate history spatially. Emphasizes perspectives, procedures, and tools that are relevant to applications of GIS in Art History and Humanistic disciplines. Designed as a hybrid lecture/lab format in which direct instruction is supplemented by hands on learning labs using ArcGIS software and real-world spatial data. The main skills students will gain are: integration of spatial and tabular data, geoprocessing, data visualization, creating features, editing features, vector and raster integration, spatial analysis, georeferencing.

**CMAC317 - User Experience and User Interface Design and Development**

**Subject**
CMAC

**Catalog Number**
317

**Title**
User Experience and User Interface Design and Development

**Description**
How do we build knowledge about computational, aesthetic, product and spatial experience? What tools and methods enable our work in the design of these interactions? This course applies methods and technologies found in the User Experience (UX) and User Interface (UI) disciplines to analyze, document, design and prototype a number of spatial and product interactions.
**CMAC326 - Introduction to Programming and User Interface Design in Unity 3D**

**Description**
Practical concepts and exercises with the C# programming language. Basic concepts of algorithms and data structures. Discussion of basic computer graphics concepts. Introduction to the Unity3D game engine. Importing various model formats into Unity3D. User interface design in Unity3D. Advanced scripting using C# for Unity3D. Unity3D common pitfalls and tips for optimizations. Usage of augmented and virtual reality libraries. Weekly homework and final project. No prior coding experience is assumed.

**CMAC326S - Introduction to Programming and User Interface Design in Unity 3D**

**Description**
Practical concepts and exercises with the C# programming language. Basic concepts of algorithms and data structures. Discussion of basic computer graphics concepts. Introduction to the Unity3D game engine. Importing various model formats into Unity3D. User interface design in Unity3D. Advanced scripting using C# for Unity3D. Unity3D common pitfalls and tips for optimizations. Usage of the MiddleVR virtual reality library. Weekly homework and final project. No prior coding experience is assumed.

**CMAC351 - 3D Modeling and Animation**

**Description**
Basic concepts of 3D modeling and animation; fundamentals of computer geometry; knowledge of basic tools of 3D software (Maya); introduction to modeling, animation, texturing, lighting, and rendering; combination of these techniques in a final project. Recommended prerequisite: Visual and Media Studies 206 or 396.

**CMAC355S - Videogame Design and Critique**

**Description**
Surveys history, art, technology, narrative, ethics, and design of interactive computer games. Games as systems of rules, games of emergence and progression, state machines. Flow, systems of pleasure, goals, rewards, reinforcement schedules, fictional and narrative elements of game worlds. Responses to immersive & interactive media; experience of gamified systems in diverse contexts. Social, artistic, and cultural effects of games: impact, harm, benefits. Team design and development of game-design storyboards and stand-alone games. Interplay between narrative, graphics, rule systems, and artificial intelligence in the creation of interactive games. Programming experience not required.
**CMAC357S - Digital Storytelling and Interactive Narrative**

**Description**

**CMAC366L - Theories and Practices of Data Visualization**

**Description**
Combination of lectures, labs, and workshops on the theories and practices of data visualization, focused on creative applications of advanced tools and software, including introduction to data scraping, data cleaning, and elementary coding. Students will use innovative strategies to develop new databases with imperfect information, combining qualitative and quantitative data on the interface of the humanities and the social sciences. Individual and collaborative research projects will combine qualitative and quantitative analysis with weekly feedback and assessment.

**CMAC380 - Visualizing Cities: Representing Urban Landscapes, Cultures, and Environments**

**Description**
Visualizing cities in theory and practice. Exploring digital and visual representation of landscapes, structures, environments, history, culture, architecture, events, and populations. Change over time, cultural heritage, possible futures, and alternate pasts from historical, cultural, documentary, and scientific evidence and archives. The idea of the city as a conceptual category and metaphor. Ubiquitous computing in urban environments as a medium for interaction. Global cities and diaspora. Visual imagery and written accounts. Use of mapping, imaging, 3D, augmented reality, games. Individual and group research and production of visualizing cities projects. Topics and temporal foci vary.

**CMAC390 - Special Topics in Computational Media**

**Description**
Topics vary from semester to semester.

**CMAC390-2 - Topics in Computational Media Module**

**Description**
This is a special topics module that will vary by semester. It is a half-unit course.

**CMAC390S - Special Topics in Computational Media, Arts & Cultures**

**Description**
Special Topics vary by semester.
CMAC391 - Computational Media, Arts and Culture Independent Study

Subject
CMAC
Catalog Number
391
Title
Computational Media, Arts and Culture Independent Study

Description
Individual non-research directed study in a field of special interest on a previously approved topic, under the supervision of a faculty member, resulting in an academic and/or artistic product.

CMAC393 - Research Independent Study in Computational Media, Arts and Cultures

Subject
CMAC
Catalog Number

Description
Special Topics vary by semester.

CMAC490T - Collaborative Computational Media Project Design and Development Topics

Subject
CMAC
Catalog Number
490T
Title
Collaborative Computational Media Project Design and Development Topics

Description
Interdisciplinary teams of students work with faculty to design and develop a computational media project. A team's work may run in parallel with or contribute to an ongoing research project, which will be determined in advance. Teams will participate in seminars, data collection and analysis, fieldwork and other learning experiences relevant to the project. Requires final paper or product containing significant analysis and interpretation. This course is designed to fulfill the project requirement for the Interdepartmental Major in Computational Media, Certificate in Information Science + Studies, or for Bass projects. Students from other disciplines welcome.

CMAC491 - Computational Media, Arts and Culture Independent Study

Subject
CMAC
Catalog Number
491
Title
Computational Media, Arts and Culture Independent Study

Description
Individual non-research directed study in a field of special interest on a previously approved topic, under the supervision of a faculty member, resulting in an academic and/or artistic product.

This course is designed to fulfill the project requirement for the Interdepartmental Major in Computational Media, Certificate in Information Science + Studies, or for Bass projects. Students from other disciplines welcome.

**COMPSCI101L - Introduction to Computer Science**

**Subject**  
COMPSCI

**Catalog Number**  
101L

**Title**  
Introduction to Computer Science

**Description**  
Introduction practices and principles of computer science and programming and their impact on and potential to change the world. Algorithmic, problem-solving, and programming techniques in domains such as art, data visualization, mathematics, natural and social sciences. Programming using high-level languages and design techniques emphasizing abstraction, encapsulation, and problem decomposition. Design, implementation, testing, and analysis of algorithms and programs. No previous programming experience required. Not open to students who have taken Computer Science 102, 116, Engineering 103 or Computer Science 201.

**COMPSCI102L - Interdisciplinary Introduction to Computer Science**

**Subject**  
COMPSCI

**Catalog Number**  
102L

**Title**  
Interdisciplinary Introduction to Computer Science

**Description**  
Introduction to the practices and principles of computer science and programming and their impact on and potential to change the world motivated by problems drawn from natural science, social science, engineering, and humanities. Programming using Python, appropriate libraries, and APIs to process, analyze, and visualize data. Design, implementation, and analysis emphasizing abstraction, encapsulation, and problem decomposition. No previous programming experience required.
COMPSCI103L - Computing and the Brain
Subject: COMPSCI
Catalog Number: 103L
Title: Computing and the Brain
Description: Introductory programming based on problems in neuroscience. Provides foundational skills for using computers to collect and analyze neuroscience data. Study of how computational processes are implemented by information-processing entities: both brains and computers. Python programming to generate sensory stimuli and collect/analyze behavioral and neural data. Scientific and Software Engineering best practices for conducting and verifying neuroscience experiments. Not open to students who have taken Computer Science 101. Prerequisite: Neuroscience 101/Psychology 106 or Neuroscience 102/Psychology 107.

COMPSCI110 - Information, Society & Culture: Bass Connections Gateway
Subject: COMPSCI
Catalog Number: 110
Title: Information, Society & Culture: Bass Connections Gateway
Description: Information, Society, and Culture across disciplines. How all aspects of information theory and practice, including computational and mathematical and those from social sciences and the humanities are transforming research, reframing intellectual questions in research and its application, and having an impact on interactions within societies, cultures, ideologies, economics, politics. Modules presented by faculty from all areas and schools, contrasting and comparative perspectives in research-driven modules focused on interdisciplinary project questions and ideas. Lecture/section activities. Course Gateway for the Bass Connections theme in Information, Society and Culture.

COMPSCI112S - Introduction to Digital Feminism
Subject: COMPSCI
Catalog Number: 112S
Title: Introduction to Digital Feminism
Description: The aim of this course is to critically analyze digital culture from a feminist and gender studies perspective. We will address topics related to digital innovation and its history, unpacking and questioning them through the insights offered by genders studies analytical tools. Subjects such as the rise of the Silicon Valley, gaming culture, social media, algorithms, Artificial Intelligence, extraction of data applied to biotechnology, macroeconomic development of IT platforms and the impact of technology on ecology will be discussed starting from a current event or debate, to which we will give a historical, ethical, sociological, theoretical, literary or cinematographic perspective.

COMPSCI116 - Foundations of Data Science
Subject: COMPSCI
Catalog Number: 116
Title: Foundations of Data Science
Description: Introduction to computer programming and statistical inference in the process of conducting analysis of real-world datasets, including economic data, document collections, geographical data, and social networks. Exploration of data via visualization and descriptive statistics. Creating predictions with techniques from machine learning and optimization. Testing hypotheses and making statistical inferences. Learn basic Python programming skills to organize and manipulate data in tables, and to visualize data effectively. Discussion of social issues surrounding data analysis such as privacy and bias. No prior programming experience or statistics is required.

COMPSCI190 - Topics in Computer Science
Subject: COMPSCI
Catalog Number: 190
Title: Topics in Computer Science

COMPSCI190A - Duke-Administered Study Abroad: Special Topics in Computer Science

Prerequisite: Computer Science 201. Not open to students who have taken Computer Science 250D. Instructor: Lebeck, Chase, Zhou, Fain, Wills.</td>
</tr>
</tbody>
</table>
COMPSCI216 - Everything Data

Subject: COMPSCI  
Catalog Number: 216  
Title: Everything Data

Description: Study of data and its acquisition, integration, querying, analysis, and visualization. Concepts and computational tools for working with unstructured, semi-structured, and structured data and databases. Interdisciplinary perspectives of data and its impact crossing science, humanities, policy, and social science. Culminating team project applied to real datasets. Prerequisite: 200-level computer science OR 100-level Statistics OR 200-level Math course, or permission of instructor.

COMPSCI230 - Discrete Math for Computer Science

Subject: COMPSCI  
Catalog Number: 230  
Title: Discrete Math for Computer Science

Description: Mathematical notations, logic, and proof; linear and matrix algebra; graphs, digraphs, trees, representations, and algorithms; counting, permutations, combinations, discrete probability, Markov models; advanced topics from algebraic structures, geometric structures, combinatorial optimization, number theory. Pre/corequisite: Computer Science 201.

COMPSCI240 - Race, Gender, Class, & Computing

Subject: COMPSCI  
Catalog Number: 240  
Title: Race, Gender, Class, & Computing

Description: This course explores the diversity, equity, and inclusion (DEI) challenges in computing through an introduction to and analysis of identity as a social construct, its impact on computing departments and organizations, and the resulting impact of technology on various identities.

COMPSCI243 - Programming Interview Skills and Practice

Subject: COMPSCI  
Catalog Number: 243  
Title: Programming Interview Skills and Practice

Description: Techniques and best practices for solving the kind of programming and algorithmic problems typically part of technical interviews. Common genres of problems, methods for solving them, engaging peers and interviewers in the process of solving problems. Students will be expected to participate in leetcode, hackerrank, and APT problems, with role-playing and discussion of what works and does not work. Prerequisite: Computer Science 201.

COMPSCI247S - Human Flourishing in a Digital Age

Subject: COMPSCI  
Catalog Number: 247S  
Title: Human Flourishing in a Digital Age

Description: The digital age has enhanced human life in many ways: communication is faster, medicine is better, and our knowledge of the world is deeper. But it has also changed the nature of work, society, and our sense of well-being, and raised fundamental questions about the meaning and purpose of human life. This course asks what it means for humans to flourish in a digital age. It considers how new technologies through the centuries have impacted human flourishing, making certain aspects easier and others harder, and perhaps even altering our conception of what flourishing looks like. Our ultimate goal is to ponder together how we should practically live in today's digital age. For sophomores only.

COMPSCI249 - Computer Science Education Research

Subject: COMPSCI  
Catalog Number: 249  
Title: Computer Science Education Research

Description: A project-based course involving computer science education, issues on computer science curricula, and educational techniques in general. Students should have previous or current experience in teaching or tutoring Computer Science. May be repeated. Instructor consent is required.
COMPSCI250D - Computer Architecture

Subject: COMPSCI  
Catalog Number: 250D  
Title: Computer Architecture

Description:
Computer structure, assembly language, instruction execution, addressing techniques, and digital representation of data. Computer system organization, logic design, microprogramming, cache and memory systems, and input/output interfaces. Prerequisite: Computer Science 201.

COMPSCI255 - Introduction to Cyber Policy

Subject: COMPSCI  
Catalog Number: 255  
Title: Introduction to Cyber Policy

Description:
Policy and technical elements of activity in cyberspace will continue to impact and shape global society. Provide a basic understanding of fundamental of cyber technologies and threats, national and international cyber policies and frameworks, and key topical issues in cyber. Students will be required to complete a written mid-term based on lectures and readings, present short classroom briefings, and engage in class discussions. The final will be a capstone written and oral presentation on a realistic cyber scenario applying knowledge from classwork and their own research. No prior skills or knowledge is required.

COMPSCI260 - Introduction to Computational Genomics

Subject: COMPSCI  
Catalog Number: 260  
Title: Introduction to Computational Genomics

Description:
A computational perspective on the analysis of genomic and genome-scale information. Focus on exploration and analysis of large genomic sequences, but also attention to issues in structural and functional genomics. Topics include genome sequence assembly, local and global alignment, gene and motif finding, protein threading and folding, and the clustering and classification of genes and tissues using gene expression data. Students to learn computational approaches to genomics as well as to develop practical experience with handling, analyzing, and visualizing information at a genome-scale.

COMPSCI288 - Logic and Its Applications

Subject: COMPSCI  
Catalog Number: 288  
Title: Logic and Its Applications

Description:
Topics in proof theory, model theory, and recursion theory; applications to computer science, formal linguistics, mathematics, and philosophy. Usually taught jointly by faculty members from the departments of computer science, mathematics, and philosophy. Prerequisite: a course in logic or consent of instructor.

COMPSCI290 - Topics in Computer Science

Subject: COMPSCI  
Catalog Number: 290  
Title: Topics in Computer Science

Description:
Topics from various areas of computer science, changing each year. Prerequisite: Computer Science 201 or equivalent.

COMPSCI290A - Duke-Administered Study Abroad: Advanced Special Topics in Computer Science

Subject: COMPSCI  
Catalog Number: 290A

<td>321</td>
<td>Graph Analysis with Matrix Computation</td>
<td>Undergraduate Level. Introduction to analysis of real-world networks and generated graphs via matrix representation, connection and computation. Graphs and networks are characterized, analyzed and categorized by combinatorial, algebraic and probabilistic measures of connectivity and centrality. Probabilistic graph categories include the small-world network model, the scale-free network model as well as the traditional Erdős–Rényi model. Prerequisites: Math 212 or equivalent; Math 216, 218D or 221 or equivalent; CompSci 101L or equivalent.</td>
</tr>
<tr>
<td>COMPSCI</td>
<td>323D</td>
<td>Computational Microeconomics</td>
<td>Use of computational techniques to operationalize basic concepts from economics. Expressive marketplaces: combinatorial auctions and exchanges, winner determination problem. Game theory: normal and extensive-form games, equilibrium notions, computing equilibria. Mechanism design: auction theory, automated mechanism design. Prerequisite: at least one of the following: Computer Science 230, 200-level Mathematics course, or 200-level Statistical Science course.</td>
</tr>
<tr>
<td>COMPSCI</td>
<td>330</td>
<td>Introduction to the Design and Analysis of Algorithms</td>
<td>Design and analysis of efficient algorithms including sorting, searching, dynamic programming, graph algorithms, fast multiplication, and others; nondeterministic algorithms and computationally hard problems. Prerequisites: Computer Science 201 and 230.</td>
</tr>
<tr>
<td>COMPSCI</td>
<td>333</td>
<td>Algorithms in the Real World</td>
<td>Design and implementation of modern algorithms. Stresses application and project based development of algorithmic techniques. Emphasis on algorithmic ideas that have had substantial impact in the real world, including approximation, randomization, hashing, streaming, spectral techniques, optimization, and search. Project-driven: Several homework assignments as well as a larger student-driven course project researching, designing, and implementing algorithms for a substantive problem with real world applications. Prerequisite: Computer Science 201 and and Computer Science 230 or equivalent.</td>
</tr>
</tbody>
</table>
COMPSCI 334 - Mathematical Foundations of Computer Science

Subject: COMPSCI
Catalog Number: 334
Title: Mathematical Foundations of Computer Science

Description:
An introduction to theoretical computer science including studies of abstract machines, the language hierarchy from regular sets to recursively enumerable sets, noncomputability, and complexity theory. Prerequisites: Computer Science 201 and 230.

COMPSCI 342 - Technical and Social Analysis of Information and the Internet

Subject: COMPSCI
Catalog Number: 342
Title: Technical and Social Analysis of Information and the Internet

Description:
The development of technical and social standards governing the Internet and information technology in general. The role of software as it relates to law, patents, intellectual property, and IETF (Internet Engineering Task Force) standards. Written analysis of issues from a technical perspective with an emphasis on the role of software and on how standards relate to social and ethical issues. Current events as a driver for writing in traditional and online formats related to technology and policy. Open only to students with declared Computer Science major. Prerequisite: Computer Science 201.

COMPSCI 344 - Computer Graphics

Subject: COMPSCI
Catalog Number: 344
Title: Computer Graphics

Description:
Overview, motivation, and history; Graphic software and APIs; coordinate systems and geometric transforms; drawing routines, antialiasing, supersampling; 3d object representation, spatial data structures, constructive solid geometry; hidden-surface-removal algorithms, z-buffer, A-buffer; illumination and shading models, surface details, radiosity; achromatic light, color specification, colorimetry, different color models; graphics pipeline; animation, levels of detail. Prerequisites: Computer Science 201.

COMPSCI 345 - Graphics Software Architecture

Subject: COMPSCI
Catalog Number: 345
Title: Graphics Software Architecture

Description:
Learn the fundamentals of modern 2D software graphics, and how these can be efficiently implemented in C/C++. Core topics include color, geometric primitives, scan conversion, clipping, transformations, alpha blending, sampling. Advanced topics may include gradients, parametric curves, and triangle meshes. Students will develop their own graphics engine, evolving it over the course of the semester as new principles and techniques are introduced. At each milestone, their work will be evaluated for functionality, clarity, and performance. Students will learn firsthand how to evaluate implementation tradeoffs. Prerequisite: Computer Science 201; and Computer Science 210 or 250; and Mathematics 216, 218, or 221.

<tr>
<td>COMPSCI</td>
<td>350L</td>
<td>Digital Systems</td>
<td>Design and implementation of combinational and sequential digital systems with special attention to digital computers. The use of computer-aided design tools, hardware description languages, and programmable logic chips to facilitate larger and higher performance designs will be stressed. Laboratory exercises and group design projects will reinforce the various design techniques discussed in class. Prerequisite: Electrical and Computer Engineering 250D or Computer Science 250.</td>
</tr>
<tr>
<td>COMPSCI</td>
<td>351</td>
<td>Introduction to Computer Security</td>
<td>Principles of securing the creation, storage, and transmission of data and ensuring its integrity, confidentiality, and availability. Topics include access control and authentication in distributed systems; cryptography and cryptographic protocols (mainly key exchange protocols); user authentication; software vulnerabilities and software engineering to reduce vulnerabilities; firewalls and related technologies; technologies to support online privacy; and selected advanced topics. Prerequisite: Computer Science 210D or 250D and Computer Science 230.</td>
</tr>
<tr>
<td>COMPSCI</td>
<td>356</td>
<td>Computer Network Architecture</td>
<td>Introduces students to the fundamentals of computer networks. Focus on layered architecture of the network protocol stack. Case studies drawn from the Internet, combined with practical programming exercises. Concepts include the Internet architecture, HTTP, DNS, P2P, Sockets, TCP/IP, BGP, routing protocols, and wireless/mobile networking and their applications such as how to achieve reliable/secure communications over channels, how to find a good path through a network, how to share network resources among competing entities, how to find an object in the network, and how to build network applications. Prerequisite: ECE 250D, CompSci 210D or CompSci 250D.</td>
</tr>
<tr>
<td>COMPSCI</td>
<td>362</td>
<td>Introduction to Computational Imaging</td>
<td>Computational imaging refers to the process of forming images from data where computation and algorithms play an integral role. This course will cover basic principles of image formation, denoising, classification, and inverse problems used in applications ranging from computational photography to biomedical and molecular imaging and vision science. Programming strategies to accelerate calculations and the fundamentals of modern imaging tools based on deep neural-networks will also be covered. Prerequisite: CompSci 230, Programming experience.</td>
</tr>
<tr>
<td>COMPSCI</td>
<td>370D</td>
<td>Introduction to Artificial Intelligence</td>
<td>Algorithms and representations used in artificial intelligence. Introduction and implementation of algorithms for search, planning, decision, theory, logic, Bayesian networks, robotics and machine learning. Prerequisite: Computer Science 201 and one of the following: Computer Science 230, 200-level Mathematics course, or 200-level Statistical Science course.</td>
</tr>
<tr>
<td>COMPSCI</td>
<td>371</td>
<td>Elements of Machine Learning</td>
<td>Fundamental concepts of supervised machine learning, with sample algorithms and applications. Focuses on how to think about machine learning problems and solutions, rather than on a systematic coverage of techniques. Serves as an introduction to the methods of machine learning. Prerequisite: Computer Science 201. Recommended Prerequisites: Mathematics 221, 218, or 216 or equivalent; Mathematics 212 or equivalent; and Mathematics 230, Statistical Science 230 or equivalent.</td>

**COMPSCI434 - Topological Data Analysis**

*Description*
Introduction to topology from a computational view-point, with a focus on applications. Themes include: basic notions of point-set topology, persistent homology, finding multi-scale topological structure in point cloud data. Algorithmic considerations emphasized. Prerequisite: Mathematics 221 or equivalent.

**COMPSCI445 - Introduction to High Dimensional Data Analysis**

*Description*

**COMPSCI474 - Data Science Competition**

*Description*
In this course, students enter a data science competition. They learn any skills necessary to gain insight (data sleuthing). This may include classical machine learning algorithms, time series analysis or point processes, multi-armed bandits, creating a new custom machine learning technique, handling imbalanced data, techniques for tuning parameters, any of a broad array of other techniques, or domain knowledge in another field. Students will work in teams, and during class they will have the opportunity to discuss possible stumbling blocks. Prerequisites: CS 671 (or STA 671D or ECE 687D - Theory and Algorithms for Machine Learning), STA 622 (Statistical Data Mining), Math 466 (Mathematics of Machine Learning), STA 231 (Advanced Introduction to Probability), STA 470S (Introduction to Statistical Consulting) or STA 440 (Case Studies in the Practice of Statistics).

**COMPSCI89S - First-Year Seminar**

*Description*
Topics vary each semester offered.
COMPSCI92L - Technical and Social Analysis of Information and the Internet

Subject: COMPSCI
Catalog Number: 92L
Title: Technical and Social Analysis of Information and the Internet

Description
Study of standards, software, policy, and the impact of computing and the Internet on science and society. Analysis and creation of software and other computational and digital artifacts to solve problems in many domains using different approaches, including data mining, web-based communication, algorithmic and data-driven approaches, crowdsourcing. Use of real-world problems in understanding evolving international standards. Analysis of tradeoffs in ethical, economic, and technical areas.

COMPSCI93 - History of Computing, Cryptography, and Robotic Devices

Subject: COMPSCI
Catalog Number: 93
Title: History of Computing, Cryptography, and Robotic Devices

Description
Introduction to the history of many diverse devices invented for computation, cryptography, and robotics. These technologies include a wide variety of ingenious devices, including purely mechanical devices, hybrid devices, as well as purely electrical devices. The history includes many fascinating inventors including Babbage and Turing. This history begins in the Greek period and spans many historical periods, to the modern times. By use of models and simulators, students will learn the basics of the operation and programming of various historical mechanical computers, robots and cryptographic devices. Students will do projects on historical devices and/or device inventors.

COMPSCI94 - Programming and Problem Solving

Subject: COMPSCI
Catalog Number: 94
Title: Programming and Problem Solving

Description
Programming and problem solving in a specific domain such as robotics, virtual worlds, web programming, biology, genomics, or computer science. Students learn the basics of programming by studying problems in one application area. Not open to students who have taken Computer Science 101, 102, 116, Engineering 103 or Computer Science 201.

COMPSCI94FS - Programming and Problem Solving

Subject: COMPSCI
Catalog Number: 94FS
Title: Programming and Problem Solving

Description
Programming and problem solving in a specific domain such as designing and implementing games, robotics, virtual worlds, web programming, biology, genomics, or computer science. Students learn the basics of programming by studying problems in one application area.

CREOLE101 - Elementary Creole I

Subject: CREOLE
Catalog Number: 101
Title: Elementary Creole I

Description
An introduction to the essential elements of Haitian Creole or Kreyòl language and aspects of Haitian culture. The first of the two-semester sequence of elementary Haitian Creole or Kreyòl, the course provides practice in understanding, speaking, reading, and writing the language, culturally contextualized through units on health care, Haitian women's rights issues, and unpaid child servants (restavèk). Students will acquire enough vocabulary and idioms to be able to interact with Haitians. Taught in Haitian Creole. No prerequisite.

CREOLE102 - Elementary Creole II

Subject: CREOLE
Catalog Number: 102
Title: Elementary Creole II

Description
Second course in the two-semester sequence on elementary Haitian Creole provides essential elements of Creole language and aspects of Haitian culture. Course is designed to help students develop speaking, listening, reading, and writing skills in Haitian Creole. Students will be exposed to different aspects of Haitian culture through films, storytelling, games, music, and proverbs. Pre-requisite: Creole 101 or a comparable level of previous Creole language experience, such as DukeEngage experience in Haiti or familial background in Creole. Taught in Haitian Creole.
CREOLE203 - Intermediate Creole I
Subject: CREOLE
Catalog Number: 203
Title: Intermediate Creole I
Description:
First semester of intermediate Haitian Creole or Kreyol. This course moves beyond survival skills in Creole to more complex social interactions and expressions of analysis and opinion. Intermediate skills in understanding, speaking, writing, reading will be contextualized within a broad range of issues such as rural life in Haiti, religion, fenchified Creole vs popular Creole, through texts, poems, and excerpts taken from novels in Haitian Creole. Students will learn to carefully follow contemporary events and debates in Haitian culture using internet resources in Creole. Pre-requisite: Creole 102 or equivalent. Taught in Haitian Creole.

CREOLE204 - Intermediate Creole II
Subject: CREOLE
Catalog Number: 204
Title: Intermediate Creole II
Description:
Second semester of Intermediate Creole. Sharpens students reading and communication skills, further mastering Haitian Creole grammar at an advanced level, gaining a deeper understanding of the different components of Haitian culture while becoming familiar with the works of several Haitians artists (art, literature, poetry, and music) that play a significant role in promoting Haitian culture. Recommended prerequisite: Creole 203 or equivalent.

CREOLE301 - Advanced Haitian Creole 1
Subject: CREOLE
Catalog Number: 301
Title: Advanced Haitian Creole 1
Description:
This class is designed to help students sharpen their listening, speaking, reading, and writing skills in Kreyòl at an advanced level while exploring different themes related to Ayiti such as literature(s), language(s), school system in Haiti, history, and different types of Haitian music. In addition, students will be able to work on different songs and music groups that left their mark on Haitian music for the past 50 years as well as Haitian films. Prerequisites: Creole 204 or completion of Advanced Intermediate Creole at any institution that offers Intensive Haitian Creole class or any native speaker who is fluent in reading and writing the language.

CREOLE302 - Advanced Haitian Creole 2
Subject: CREOLE
Catalog Number: 302
Title: Advanced Haitian Creole 2
Description:
This class is designed to help students sharpen their listening, speaking, reading and writing skills at an advanced level so that they will be able to make themselves understood by native speakers while using proverbs, historical references, common idiomatic expressions, and even simple jokes. To do so, students will explore the archives of Radio Haiti-Inter available at Duke University which cover a range of significant themes that are linked with current events. All of these explorations will be supported by films, songs, poems, and paintings that go with each theme that will be studied in class. Prerequisite: Creole 301.

CREOLE390S - Special Topics in Haitian Creole Studies
Subject: CREOLE
Catalog Number: 390S
Title: Special Topics in Haitian Creole Studies
Description:
Topics vary by semester.

CREOLE393 - Research Independent Study
Subject: CREOLE
Catalog Number: 393
Title: Research Independent Study
Description:
Individual research in a field of special interest, under the supervision of a faculty member, resulting in a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. Open only to qualified students by consent of instructor and director of undergraduate studies.

**Description**

**CULANTH101 - Introduction to Cultural Anthropology**

Theoretical approaches to analyzing cultural beliefs and practices cross-culturally, application of specific approaches to case material from present and/or past cultures.

**CULANTH101D - Introduction to Cultural Anthropology**

Same as Cultural Anthropology 101 except instruction is provided in lecture and discussion group each week.

**CULANTH102 - American Indian Nations Today**

This course is an introduction to the tremendous diversity of contemporary American Indian sovereign nations' and their citizens' experiences in the territory now known as the United States. American Indian Nations Today addresses the complexities of contemporary Native Nation topics by providing context for understanding the distinct political, legal, economic, social, and cultural institutions of Native Nations today. These topics and issues are analyzed from individual, local, and national Native and non-Native perspectives through readings, media, and occasional guest speakers.

**CULANTH103FS - Human Rights: Back to The Future, Looking at Roots and Current Reality of Human Rights**

This Focus course introduces students to a brief history of rights as a way to ground our exploration of current human rights challenges and what rights may be envisioned in the future. Rights have never been static. Recent changes in how we see rights include the right to truth in post-conflict societies and animal rights. We'll explore how cutting-edge thinkers contribute to an expanded horizon of rights. We will be engaging with activists, scholars, and artists. Open only to students in the Focus Program.

**CULANTH104 - Introduction to Human Rights: Gateway for the Human Rights Certificate**

This is the Gateway course for the Human Rights Certificate. Students are introduced to the history, theory, practice of, and current issues in human rights. The course is interdisciplinary.

**CULANTH105 - Introduction to African Studies (DS3 or DS4)**

A range of disciplinary perspectives on key topics in contemporary African Studies: nationalism and pan-Africanism, imperialism and colonialism, genocide and famine, development and democratization, art and music, age and gender.

<td>Making Your Case: Global Advocacy for Humanitarian Causes</td>
</tr>
</tbody>
</table>

**Description**
This course equips students with public speaking skills and cultural awareness in the pursuit of effective advocacy for humanitarian causes. At the heart of students' initiative for advocacy lie three questions: 1) Does it improve the human condition? 2) Will it cause no harm and 3) Is it ethical? Centered on the skill of researching an area of humanitarian need, and presenting an initiative of advocacy through effective communication skills, it stresses the critical importance of cultural and ethical considerations in both the analysis of humanitarian challenges, and processes through which these pressing issues can be addressed in the quest of advocating for change.

**Description**
Introduction to the Israel/Palestine conflict, studied through an interdisciplinary lens, including scholarship from the fields of anthropology, environmental studies, history, geography and cultural studies. Themes include: competing nationalisms, environmental politics and resource management, peace building, refugees and displacement, humanitarian crises and challenges, representational politics. Range of primary sources will be used including human rights reports and testimonials, natural resource policies, feature and documentary film, memoirs, political treatises, and maps.
CULANTH150 - Anthropology of Food
Subject: CULANTH
Catalog Number: 150
Title: Anthropology of Food
Description:
Food systems, globalization and sustainability, cultural and symbolic uses of cuisine, politics and economics of consumption-production. Readings in anthropology of food, food economics, history of cuisine, and allied social science disciplines. Appropriate for students in social sciences, global/public health, etc.

CULANTH151S - Sports and Society
Subject: CULANTH
Catalog Number: 151S
Title: Sports and Society
Description:
This course will examine the giant role that sports play in the modern world. It will explore the history of sports in the U.S. and worldwide, and the role of forces like race, gender, mythmaking, economics, and fan cultures in a variation of games from soccer to basketball and football.

CULANTH167S - Gateway Seminar: Nationalism: Ideology, Technology, Globalization
Subject: CULANTH
Catalog Number: 167S
Title: Gateway Seminar: Nationalism: Ideology, Technology, Globalization
Description:
What is a nation? What is a nation state? Is the nation state still a useful unit of government today? The goal of this seminar is to teach you theoretical and methodological tools and historical examples to critically think about nationalism in globalization. Readings include primary sources, classic theories on nationalism, fresh arguments from sociology and anthropology. The historical and contemporary case studies include American, Middle Eastern, South Asian, and European examples.

CULANTH170 - Advertising and Society: Global Perspective (DS4)
Subject: CULANTH
Catalog Number: 170
Title: Advertising and Society: Global Perspective (DS4)
Description:
History and development of commercial advertising; advertising as a reflector and/or creator of social and cultural values; advertisements as cultural myths; effects on children, women, and ethnic minorities; advertising and language; relation to political and economic structure; and advertising and world culture. Emphasis on American society complemented by case studies of advertising in Canada, Japan, Mexico, Russia, Western Europe, and selected other countries.

CULANTH170D - Advertising and Society: Global Perspective (DS4)
Subject: CULANTH
Catalog Number: 170D
Title: Advertising and Society: Global Perspective (DS4)
Description:
Same as Cultural Anthropology 170 except instruction is provided in lecture and discussion group each week.

CULANTH171 - Business Anthropology: Anthropologists in the Workplace
Subject: CULANTH
Catalog Number: 171
Title: Business Anthropology: Anthropologists in the Workplace
Description:
Introduces students to the various applications of anthropological theory and ethnographic method in contemporary institutional settings with the aim of familiarizing students with alternative career opportunities. The course looks at corporate and other private and public-sector use cases as well as the extensive literatures in the fields of organizational management, user, and consumer experience. Students also engage professionals in order to better understand processes of research, hypothesis testing, analysis, and the formulation of organizational management, design, and other strategic solutions for clients.
CULANTH172 - The Anthropology of Design and User Experience (UX) Research

**Description**
The field of design and the burgeoning field of User Experience (UX) research has recently applied the methods anthropologists have used for over a century. The methods of cultural anthropology are distinctly aligned to ask questions about motivations, beliefs, values, and relationships within cultural systems through direct participant observation, surveys, focus groups, and archival research. Privileging critical listening, empathy, and perspective-taking, we try to discern why people do what they do, and apply these questions to human-centered design.

CULANTH173S - The Ways and Wisdom of First-Gen College Students

**Description**
This course examines the experience of first-generation college students, including their unique challenges, strategies, observations, and analyses. It is intended equally for students of all backgrounds and will, through the ethnographic method, train students in empathetic listening and participant-observation, as well as socially contextualized and cross-culturally comparative analysis.

CULANTH180FS - Heroes and Villains: Dissidence in the Middle East

**Description**
Considering the historical culture of disobedience in the Middle East and the significant actors as superheroes and villains depending on the time and their affiliations. Investigating how the dissident voices are constructed and performed from pre-modern esoteric practices in dervish convents, or coffee houses to print culture and social media in modern times. Discussing major themes such as protest and propaganda, censorship and self-censorship, and surveillance and counter-surveillance through films, poetry, graphic novels, and music.

CULANTH185S - African Hashtag Activism

**Description**
The technological leapfrogging of the last three decades introduced mobile and smartphone technologies to Africans radically altering the modes of organizing available to women, members of the LGBTQI+ community, and other vulnerable groups. But beyond giving voice to local concerns, African opinions and perspectives are also directed towards larger conversations about climate change action, resistance to US hegemony, and the role China plays in African development.

CULANTH189 - Women and Gender in the Middle East

**Description**
An introductory survey exploring the Middle East through the gender perspective introduction to the gender and women’s studies in the Middle East and the major issues. Cross-cultural and interdisciplinary readings to introduce the diversity of the region. Readings and screenings include the narratives and performances from the region.

CULANTH190A - Duke-Administered Study Abroad: Introductory Special Topics in Cultural Anthropology

<td>CULANTH</td>
<td>195</td>
<td>Critical Approaches to Global Issues</td>
<td>Introduction to critical transnational studies through several disciplinary approaches. Examines capitalism and neo-liberal globalization and their relationships to culture, politics, economics, and other social forms and outcomes; considers transnationalism 'from below'; addresses linear and Western-centric thinking about progress and modernity; focuses a historical lens on political discourses, institutions, and projects to understand them contextually; demonstrates how cultures and identities are dynamically constituted in interaction with historical, material, political, and situational factors; considers how different inequalities and contestations inflect most social formations.</td>

<td>Patient and Research Participant Activism and Advocacy</td>
<td>In the 1960s, patients appropriated the language and tactics of the civil rights movement to advance clinical and research agendas. Today patient activism is evolving, leading to new solutions, dilemmas, and organizational structures. This course will examine patient and research participant activism and the ways it challenges conventional notions of expertise, amateurism, 'human subjects protections,' and minimization of risk. Students will bring the tools of journalism, anthropology, humanities scholarship, public policy and community engagement/citizen science to bear on ethical and policy questions. Open only to students in the Science &amp; the Public Focus Program cluster. Department consent required.</td>

</table>
CULANTH201 - Introduction to Linguistics
Subject  Catalog Number  Title
CULANTH   201  Introduction to Linguistics

Description
Introduction to the scientific study of linguistics and languages. Topics include the origin and nature of language, methods of historical and comparative linguistics, theories and schools of linguistics, empirical and descriptive approaches to the study of language, including phonology, morphology, semantics, and syntax.

CULANTH202 - Languages of the World
Subject  Catalog Number  Title
CULANTH  202  Languages of the World

Description
The major languages of the world viewed in the context of the communicative and signficative functions of language as parameters that shape and define society. The role of language in defining and structuring culturally-based relationships from a semiotic point of view. The structure, writing systems, phonology, morphology, and lexicon of languages from the following groups: Indo-European, Semitic, Turkic, Finno-Ugrian, Caucasian, Afroasiatic, Sino-Tibetan, Niger-Kordofanian, Dravidian, and Native American languages.

CULANTH203 - Marxism and Society
Subject  Catalog Number  Title
CULANTH  203  Marxism and Society

Description
Introduction to Marx's core concepts, such as alienation, commodity, and revolution. Includes examination of Marx's own major historical & political analyses, his economic texts, and his philosophical writings. Students also gain familiarity with the role of Marxist thought in different fields and disciplines, including feminist theory, anthropology, history, political science, and literary studies.

CULANTH205 - The Law and Language
Subject  Catalog Number  Title
CULANTH  205  The Law and Language

Description
Intersections of language and law and legal institutions examined from a comparative approach, i.e., official state language and national identity; freedom of speech and its limitations; language as property.

CULANTH207 - Anthropology of Sports
Subject  Catalog Number  Title
CULANTH  207  Anthropology of Sports

Description
The role of sports in different cultures in the contemporary world. Dynamics of race, gender, sexuality, fantasy and desire, mythmaking and the culture of celebrity, commercial and mass media. Not open to students who have taken CulAnth 89S World of Sports.

CULANTH208 - The Anthropology of Race
Subject  Catalog Number  Title
CULANTH  208  The Anthropology of Race

Description
Human variation and the historical development of concepts of race; science and scientific racisms; folk-concepts of race; and the political and economic causes of racism; ethics of racism.

<td>Language &amp; Identity: How We Construct Identities and Reproduce Social Hierarchies Through Language</td>
<td>Language is a central and pervasive feature of human identity through which we portray ourselves and negotiate social identities. With such practices we re/produce values, norms, social hierarchies, and the privilege these entail. Using examples from media, literature, and ethnographic data we will explore how speakers negotiate social identities through language and how ideas about it inform our understanding and interpretation of society and speakers within it. Topics include language, racism, gender, sexuality, class, ethnicity and ways that language and discourse construct and maintain a sense of belonging, otherness, truth, and value. Not open to students who have taken Romance Studies 207FS.</td>
<td></td>

</tbody>
</table>

**Description**
By exploring pioneering and controversial writings from both the social and the biological sciences as well as the humanities, this course will situate debates on 'race', 'mixed race' and social hierarchies within broader global, comparative, and historical contexts. These comparative examples shed light on the different social, cultural, and historical meanings attached to 'race' and 'mixed race' and address social and cultural variations in the symbolic rules which determine the social status of 'mixed race' communities. Open only to students in the Focus Program.

| CULANTH220S - Global 'Mixed Race' Studies | 220S            | Global 'Mixed Race' Studies                |

**Description**

| CULANTH221SL - Capoeira: Practice and Culture | 221SL            | Capoeira: Practice and Culture             |

**Description**
Lecture/lab course introducing the movement, music and culture of capoeira, an Afro-Brazilian martial art that combines dance, self-defense and acrobatics. Created by male African slaves in Brazil several hundred years ago, viewed as a social threat and outlawed in the 19th century, celebrated as an element of national identity in the 20th century, today capoeira is rapidly crossing national, racial and gender borders as it becomes a popular global practice. Studio classes twice a week focus on the basic movements, percussive music and call-and-response singing. Seminar once a week focuses on the historical, cultural and socio-political dynamics that shape capoeira in Brazil and beyond.

| CULANTH222S - Sound in Social Life | 222S            | Sound in Social Life                       |

**Description**
Considers sonic environments as socially cultivated and sound production (recording, processing, mixing) and listening as cultural practices, shaped by acoustic space. Includes study of music, recorded soundscapes (films, games, installations, field recordings), built and ecological environments (rainforests, cities, institutions), and the history and use of sound technology (sound production, reproduction, reception, acoustic materials).
CULANTH222SA - Sound in Social Life

Subject: CULANTH  
Catalog Number: 222SA  
Title: Sound in Social Life

Description
Focus on sound in NYC, to consider sonic environments as socially cultivated and listening as a cultural practice, shaped by acoustic space. Includes study of music, recorded soundscapes (films, games, installations), built and ecological environments (parks, subways, streets, institutions, clubs, neighborhoods), the politics of soundmaking, and the history and use of sound technology (sound production, reproduction, reception, acoustic materials). Considers noise ordinances in relation to public life, the representation of public life in sound, the shaping of city living practices by its acoustic architecture, and creative responses in sound as urban activist projects. Offered through the Duke in New York program.

CULANTH223S - Global Stories, Local Issues

Subject: CULANTH  
Catalog Number: 223S  
Title: Global Stories, Local Issues

Description
What stories are there to tell about often overlooked objects and people and places? How can we research and share those stories with generosity and integrity? In every corner of our lives—the stickers on our computers, the plates at a local restaurant, the wood in our guitars—there is a story to be told that connects our individual experiences to broader, often global, phenomena. Participants will learn and use methods of ethnography and archival research to connect their experiences and their observations about a place, community, or thing to larger stories about culture and society, and they will practice writing about their research in engaging and broadly accessible ways.

CULANTH224S - Muslim Women Across the Ages

Subject: CULANTH  
Catalog Number: 224S  
Title: Muslim Women Across the Ages

Description
This course explores the diverse realities of Muslim women's lives, from the origins of Islam to the present, through autobiographical and biographical accounts situated in their social, economic, political, and cultural contexts. The women we will encounter through textual and audiovisual materials represent a wide range of personal backgrounds, including scholars, mystics, merchants, philanthropists, poets, slavegirls, feminists, and Islamists. We will metaphorically travel across the globe and time to understand the multifarious facets of Muslim women's lived experiences.

CULANTH225 - Stimulants and Society

Subject: CULANTH  
Catalog Number: 225  
Title: Stimulants and Society

Description
Undergraduate course on stimulants and legal 'drug foods' (e.g. sugar, coffee, tea, tobacco) their use and development historically in context of European colonialism and their transformation in major global commodities in modern capitalism. Studies the connection between pharmacology, cultural reception, markets, supply chains, and political economy. Students prepare for independent final research project via interdisciplinary readings from history, anthropology, environmental studies as well as in-class demonstrations and field visits. Suitable for students interested in food studies, STS, pharmacology as well as anthropology, history, environmental studies.
CULANTH226S - Performing African Diaspora

Subject: CULANTH  
Catalog Number: 226S  
Title: Performing African Diaspora

Description: The Black cultural contributions of globally popular performance genres such as salsa, capoeira and kizomba often remain unrecognized. The objectives of this class are: 1) to understand the historical, cultural and political forces that created the African Diaspora and its rich tapestry of dances. 2) to question our assumptions that knowledge is only produced through the mind; knowledge is also produced and transmitted through moving bodies. To meet these objectives, the course will be a combination of seminar and studio: in seminar we will engage readings in anthropology, dance and performances studies about specific dances which we will then learn in studio.

CULANTH227 - Internet, Technology, and Capitalism

Subject: CULANTH  
Catalog Number: 227  
Title: Internet, Technology, and Capitalism

Description: This course will explore the role of the internet and new technologies in our society. We will examine the history of the rise of the computer age, and then cover questions that include surveillance and algorithmic targeting; cybercommerce and crypto; AI and robots; social media and celebrity; labor rights and profit-making; and the changing nature of daily life in a wireless world. There will be several guest speakers as well as readings, films, and other content.

CULANTH228FS - Human Rights on Camera

Subject: CULANTH  
Catalog Number: 228FS  
Title: Human Rights on Camera

Description: This course studies the interplay between cameras and human rights; how media technologies are used by activists and human rights workers to amplify grievances. Focus on cases studies where state violence was captured on camera: the Rodney King beating; the Abu Ghraib torture images; the Syrian revolution; and the Black Lives Matter movement. How are legal assessments impacted by visual aesthetics? How much faith do we have in the power of cameras to deliver justice? Readings in foundational theoretical texts about media, technology, and visuality. Open only to students in the Focus Program.

CULANTH229S - Politics of Pandemics

Subject: CULANTH  
Catalog Number: 229S  
Title: Politics of Pandemics

Description: Exploration of social, cultural, historical, and political facets of epidemic disease and widespread health crises. Key concepts of medical anthropological research and writing; reading ethnographic texts alongside journalistic, literary, and policy accounts of disease experiences and institutional responses. Assess scope, scale, and genre associated with representing pandemics. Analyze global case studies of both infectious and chronic diseases.
CULANTH230 - Southern Voices: Activism and Progressive Movements in the US South

Description
This course explores the lesser known, often hidden, and dismissed works of activism in the US South, primarily through an ethnographic lens. While many know key moments of the Civil Rights movement, much equity and justice work today has its roots in large Southern post-Reconstruction efforts and conflicts. Interdisciplinary lectures will examine a wide variety of movements including labor, health, music, sports, food, education, religion, and media representations. The trajectories of these movements will be contextualized over time in order to understand current regional grassroots and policy actions as well as impacts on national policies.

CULANTH232 - Gender and Language

Description
Theoretical approaches to the question of the interrelationship of gender and language including neurobiology, psychology, semiotics, feminist critical theory, philosophy of language, discourse analysis, and linguistic theory. Taught in English.

CULANTH234S - Anthropology and Education

Description
Exploration of different conceptions of culture and the importance of employing cultural lenses to examine the process of education. Investigation, in particular, of the impact of culture and issues of race, class and gender in American schools.

CULANTH235 - African Music: Sound, History, Culture, Politics

Description
This class is about the sound, culture, politics and history of African music as heard in the world today. We will sample diverse styles and practices from around the continent, including live and recorded musics, 'popular' and 'traditional' styles, and sacred and secular practices. The class aims to teach you about the music 'itself', the African history of the international music industry, and about the social value of music, exploring how the patterns of circulation of African music could augment or diminish African problems, Africa's promise, and Africans' creative gifts to the world.
CULANTH236S - Farmworkers in North Carolina: Roots of Poverty, Roots of Change

Subject: CULANTH
Catalog Number: 236S
Title: Farmworkers in North Carolina: Roots of Poverty, Roots of Change

Description
Focus on those who bring food to our tables, particularly those who labor in the fields of North Carolina and the Southeast. Students will learn about farm work from the plantation system and slavery to sharecropping and up to the migrant and seasonal farmworker population today. Study and analysis of media representations of farmworkers and agricultural issues as well as historical and contemporary documentary work and its contributions to farmworker advocacy. Includes a service-learning component involving work in the community.

CULANTH240 - Love and Loneliness: What's Happening to Relationships in the Twenty-First Century?

Subject: CULANTH
Catalog Number: 240
Title: Love and Loneliness: What's Happening to Relationships in the Twenty-First Century?

Description
Long-standing ties to other—whether of kinship, marriage, or community—have long been considered to be fundamental to the human condition. But in an age of dissipated and shifting social worlds, the relationships we form with others are radically changing in the twenty-first century. The class will critically examine the ideals, premises, and obstacles for forming intimacy with others through such cases as hook-ups, solitary death, solo weddings, domestic violence, human/non-human attachments, and migrancy.

CULANTH241 - Migrant China

Subject: CULANTH
Catalog Number: 241
Title: Migrant China

Description
Introduction to the study of contemporary China, including Taiwan and the Chinese Diaspora. Key themes include family and kinship, sex and gender, regional diversity, ethnic minority relations, the politics of modernity, revolution, and reform, and the representation of Chinese identity through popular media, film, and travel.

CULANTH242S - Bodies at Work

Subject: CULANTH
Catalog Number: 242S
Title: Bodies at Work

Description
This course traces the dynamic relationship between bodies and economies over the course of American history. If disability has been defined as the inability to work, then an exploration of disability necessitates an exploration of capitalism. Moving between disability studies and labor history, students will develop the conceptual tools necessary to understand capitalism through the lens of disability, while also generating new ways to think about disability via critical histories of capitalism. We will also look at how disabled people have pushed back, envisioning new ways of valuing bodies beyond productivity.

CULANTH243 - Culture and Politics in Latin America

Subject: CULANTH
Catalog Number: 243
Title: Culture and Politics in Latin America

Description
Key themes in Latin American societies, including art, literature, history, violence and human rights, economic development, and rebellion and revolution.

CULANTH245S - Human Rights in the Americas

Subject: CULANTH
Catalog Number: 245S
Title: Human Rights in the Americas

Description
This course introduces students to the history of human rights in Latin America, with a focus on certain regions. We will begin with the Conquest and cover the emergence of independent nation-states; the role of imposed economic policies, including neoliberalism; indigenous protest movements and their relationships to corporate interests; and the influence of the United States on human rights, government formation, immigration and the drug trade. Instructor consent required. Open only to students in the Duke Immerse program.
CULANTH250 - Muslim World: Transformations and Continuities

Subject: CULANTH  
Catalog Number: 250  
Title: Muslim World: Transformations and Continuities

Description: The diversity of social practices within the community of Islam. Particular emphasis on gender relations, religious movements, diaspora communities, and social change.

CULANTH254 - Cultures and Politics of the America Borderlands

Subject: CULANTH  
Catalog Number: 254  
Title: Cultures and Politics of the America Borderlands

Description: Americas borderlands refers to the intersection of North and Latin America through the movement of people, products, ideas, and technologies with focus on culture and agri-culture, including the production of food and pharmaceuticals-legal and illegal; explores dirt as concept of matter out of place and people without place and how sustenance can become poison; examines histories of Latin American bodies as 'terrain' for US-based scientific experiments.

CULANTH255 - World of Korean Cinema

Subject: CULANTH  
Catalog Number: 255  
Title: World of Korean Cinema

Description: The world of Korean cinema, broadly defined in terms of national, generic, theoretical boundaries, beyond conventional auteur, genre, one-way influence, and national cinema theories. Cinematic texts examined in local, regional, and global contexts and intersections, in conversation with global theories and histories of cinema, visual cultures, and other representational forms. Variable topics informed theoretically and politically by discourses on gender/sexuality, race/ethnicity, global flows of people and cultures, popular and 'high' culture crossovers, transnational co-productions, remakes, translations and retellings. No knowledge of Korean language/culture presumed.

CULANTH256 - Islamic Civilization I

Subject: CULANTH  
Catalog Number: 256  
Title: Islamic Civilization I

Description: A global history of Islamic thought, practice, spirituality, politics, and culture. This course analyzes the emergence of Islam and the spread of Muslim culture and learning across Africa, Asia, and Europe. It introduces how Muslims fostered a globalized economy and international community of scientists, scholars, agriculturalists, musicians, artisans, and philosophers of diverse backgrounds – along with other key themes that students may pursue in greater detail in future coursework. Gateway course for an interdisciplinary certificate in Islamic studies.

CULANTH257 - Islamic Civilization II

Subject: CULANTH  
Catalog Number: 257  
Title: Islamic Civilization II

Description: Continuation of Religion 375.

CULANTH258S - Our Culinary Cultures

Subject: CULANTH  
Catalog Number: 258S  
Title: Our Culinary Cultures

Description: Documentary approach to the world of food using fieldwork research. Topics of food and its preparation examined through deep stories of how food is raised, prepared, and presented in order to explore how the myriad ways in which what we eat reveal key biographical, economic, religious, and other truths about our cultures. Introduces students to the history of food writing and the concept of food in general as a nonverbal tool of communication. Photography, audio, and documentary writing employed.
CULANTH259S - Around the Bloc: Cold War Culture in the USSR and Eastern Europe

**Subject**
CULANTH

**Catalog Number**
259S

**Title**
Around the Bloc: Cold War Culture in the USSR and Eastern Europe

**Description**
Drawing on oral and written history, memoirs, film, fiction, and essays in anthropology and sociology, we'll resist the black/white readings imposed by the Iron Curtain and explore the dreams, fears, ethical concerns, cultural trends, and lifestyles of Cold War baby boomers in the USSR, Poland, Czechoslovakia, and Romania. Highlighted topics include: the privileges and discontents of postwar youth, the atomic age and its mutations, adventures in socialist consumer culture, gender politics and real life, making art about the socialist state of the absurd. All texts in English translation, films screened with English subtitles.

CULANTH261D - Race, Genomics, and Society

**Subject**
CULANTH

**Catalog Number**
261D

**Title**
Race, Genomics, and Society

**Description**
The field of genetics has been at the forefront of discourse concerning the concept of 'race' in humans. This course explores human origins, human variation, human identity, and human health through a broad range of enduring and emerging themes and challenging questions related to race and genetics (and now, genomics) on a global scale. Students will acquire knowledge and skills required for integrative analyses of the relevant scientific, ethical, legal, societal, cultural, and psychosocial issues. Open to students at all levels from any discipline in the arts, humanities, and sciences (natural, social, formal, and applied).

CULANTH262S - Documenting Black Experiences

**Subject**
CULANTH

**Catalog Number**
262S

**Title**
Documenting Black Experiences

**Description**
Explores how Black experiences have been documented and how crucial stories woven from real life get told. Students engage wide ranging contemporary and historical materials, including nonfiction, memoir, fiction, documentary and dramatic film, theater, poetry and music. Our aspirations are historical, but with an understanding that academic history, though irreplaceable, barely touches the range of storytelling that makes Black lives not only matter but transform the spaces in which they unfold. Our explorations are political, but in the largest sense—how Black power comes from making higher truth a tool, a weapon and a way of being.

CULANTH263S - Black Europe: Race, Ethnicity and Diaspora in Contemporary Europe

**Subject**
CULANTH

**Catalog Number**
263S

**Title**
Black Europe: Race, Ethnicity and Diaspora in Contemporary Europe

**Description**
Exploration of the historical and contemporary presence and impact of the African diaspora throughout Europe. Course engages an anthropological examination of ethnographic texts, including examples of biography, film and visual culture.
CULANTH267S - Culture and Mental Health

Subject: CULANTH
Catalog Number: 267S
Title: Culture and Mental Health

Description
This course examines the social and cultural facets of mental illness, psychological diagnoses, and mental health from the standpoints of cultural psychiatry, medical anthropology, and social medicine. Global case studies will form the basis for several key questions: how do mental distress and forms of treatment differ cross-culturally? How might social differences such as gender, sexuality, and race shape therapeutic encounters in mental health? And what roles do psychology, psychiatry, and the brain sciences play in everyday life?

CULANTH269 - Black Gods and Monarchs: Priests and Practices of the Afro-Atlantic Religions

Subject: CULANTH
Catalog Number: 269
Title: Black Gods and Monarchs: Priests and Practices of the Afro-Atlantic Religions

Description
Surveys the spiritual, political and economic experience of those who worship African gods—West and Central Africans, Cubans, Brazilians, Haitians, and North Americans. The gods as sources of power, organization and healing amid local political dominance of Muslims and Christians and seismic expansion of international capitalism. West African Yoruba religion, West-Central African Kongo religion, Brazilian Candomblé and Umbanda, Cuban Santería and Palo Mayombe, Haitian Vodou, and African American Pentecostalism are examined as belief systems, and contextualized to the trans-Atlantic slave trade, long-distance commerce and pilgrimage by free people.

CULANTH271 - Gender and Culture

Subject: CULANTH
Catalog Number: 271
Title: Gender and Culture

Description
Explanation of differing beliefs about gender cross-culturally, by comparison with dominant themes about gender in our own cultural history and contemporary ideological struggles.

CULANTH273 - Amazon.com and the Cybereconomy

Subject: CULANTH
Catalog Number: 273
Title: Amazon.com and the Cybereconomy

Description
This course will introduce students to the complexities and controversies around the meteoric growth of the digital economy, with a focus on the biggest company of them all, Amazon. We will examine questions that range from labor conditions and consumerism to data harvesting, algorithmic marketing, and monopoly concerns. By drawing on insights from cultural anthropology, economics, history, and other disciplines, the course will give students a new understanding of how e-commerce is changing the structure of our economy, society, and everyday lives. Students will do an individual research project on some aspect of Amazon for a final project.

<td>Sex/Gender - Nature/Nurture: Intersections of Biology and Society</td>
<td>Debates about sexuality, sex, and gender hinge on radically different ideas about relative effects of biological forces vs. social forces, or nature vs. nurture. Course changes terms of arguments about sexuality and gender and nature/nurture. Explores how nature/nurture emerged as scientific and popular debate. Evaluates new developments in science and cultural fields that are now reconsidering how biology and environments interact. Showcases debates about how sex and sexuality are formed through interplay of genetic information, hormones, material bodies, and social environments.</td>
</tr>
<tr>
<td>CULANTH</td>
<td>280S</td>
<td>Ethics of Ethnography: In the Field and on the Page</td>
<td>Inquiry into the practical and ethical considerations of ethnography as both a research method and a writing genre. Students learn to identify rhetorical strategies of ethnographic texts and interrogate the moral, political, and ethical issues in representing the 'other.' Frequent workshops guide students through individual research on the intersection of 'race' and some aspect of Durham's social or historical context. Students develop observation and interviewing skills, conduct fieldwork in Durham, and work through several drafts of their own ethnographies, while learning to give and receive feedback. Prerequisite: Writing 101. Open only to DukeImmerse students. Instructor consent required.</td>
</tr>
<tr>
<td>CULANTH</td>
<td>283S</td>
<td>Istanbul: Religion, Politics and Cosmopolitanism</td>
<td>Istanbul is the only city in the world located on two continents. Byzantine, Ottoman, and Turkish cultural legacies allow the city to be read as a 'palimpsest,' a multi-layered urban text of multiple, even contradictory meanings. Istanbul is an ideal site to explore imperial history, Islam and Christianity, migration, East/West relations, and cosmopolitanism. Through interdisciplinary sources in history, culture, theory, and politics, students will examine a variety of urban, architectural and social spaces including churches, mosques, public squares, and ethnic neighborhoods. Taught in English.</td>
</tr>
<tr>
<td>CULANTH</td>
<td>284</td>
<td>Ritual, Performance, and Religion</td>
<td>Exposes students to theories of ritual and performance (Turner, Schechner, Grimes, Geertz, Paden) in religious and non-religious contexts; compares contexts as a way of understanding common structures and what differentiates the religious/non-religious. Guest lecturers (from religion, dance, theater, psychology, English, visual and media studies, cultural anthropology) expose students to a range of approaches to specific kinds of ritual and performance. Possibly involves both class and individual trips to local religious events and performances for field work exercises.</td>

### CULANTH285S - Death, Burial, and Justice in the Americas

**Description**
This interdisciplinary course explores the phenomenon of necroviolence: attacks on the dignity, integrity, and memory of the dead. Cases come from the United States, Latin America, and Canada. Topics include the rights of the dead, cultural attitudes towards the dead, and the 'ambiguous loss' experienced by loved ones of the disappeared. We also explore the activism of family members, volunteer cemetery reclamation groups, and forensic scientists who exhume mass graves to identify bodies. Students will interact with guest speakers, spend time in a local African American cemetery with ties to Duke, and do community work and research on behalf of the marginalized dead.

### CULANTH290 - Current Issues in Anthropology

**Description**
Selected topics in methodology, theory, or area.

### CULANTH290A - Duke-Administered Study Abroad: Special Topics in Cultural Anthropology

**Description**
Topics differ by section.

### CULANTH290S - Current Issues in Anthropology

**Description**
Same as Cultural Anthropology 290 except instruction is provided in seminar format.

### CULANTH291 - Independent Study

**Description**
Individual non-research directed study in a field of special interest on a previously approved topic, under the supervision of a faculty member, resulting in an academic product. With consent of instructor and director of undergraduate studies.

### CULANTH293 - Research Independent Study

**Description**
Individual research in a field of special interest under the supervision of a faculty member, the central goal of which is a substantive paper or written report containing significant analysis and interpretation of a previously approved topic. With consent of instructor and director of undergraduate studies.
CULANTH295S - Anthropology of Childhood

Subject: CULANTH  
Catalog Number: 295S  
Title: Anthropology of Childhood  

Description:
What does it mean to be—and to raise—a child? This course begins with the premise that childhood has existed, and continues to exist, in myriad forms. Using the tools of anthropology we will ask a series of questions: how do definitions of childhood and childrearing vary across history and culture? How do children’s daily lives differ from place to place and how are race, class and gender linked to discourses and experiences of childhood and childrearing? What role does education – formal and informal – play in shaping childhood? Furthermore, how do children stand in as symbols of broader political and cultural concerns?

CULANTH298S - Global Humanitarianism

Subject: CULANTH  
Catalog Number: 298S  
Title: Global Humanitarianism  

Description:
This course explores humanitarianism as both a global phenomenon and a western model for engaging with the world. It examines the cultural and political conditions that make it possible for some people to be saviors and others to require saving. It focuses on the ways humanitarian interventions are increasingly as much about alleviating poverty and supporting political change, as about responding to crises caused by health epidemics, conflict or war, and environmental disasters. We will pay close attention to the impacts of humanitarian interventions good and bad, while critically exploring how local agendas and conditions shape and respond to these programs.

CULANTH301 - Theoretical Foundations of Cultural Anthropology

Subject: CULANTH  
Catalog Number: 301  
Title: Theoretical Foundations of Cultural Anthropology  

Description:
Major schools and theories of cultural anthropology. Open to seniors and juniors. Sophomores by permission only.

CULANTH302 - Fieldwork Methods: Cultural Analysis and Interpretation

Subject: CULANTH  
Catalog Number: 302  
Title: Fieldwork Methods: Cultural Analysis and Interpretation  

Description:
Anthropology as a discipline (a field of study) and the site where anthropologists work: the field. Combines theories of anthropological fieldwork methods with practice, including participation, observation, and interviews. Students undertake original research in a local fieldsite of their choice and produce their own mini-ethnography. This requirement may also be satisfied by taking Cultural Anthropology 290A Duke in Ghana Anthropological Field Research.

CULANTH303S - Theory Today

Subject: CULANTH  
Catalog Number: 303S  
Title: Theory Today  

Description:
This course is an introduction to fundamental concepts of contemporary critical theory, broadly conceived. Readings will include key texts from the past 50 years in fields including gender and sexuality studies, literary and media studies, critical race studies, Marxism, postcolonial studies, and political theory. The course will involve close reading of difficult texts with the goal of obtaining facility with the concepts and modes of argumentations of contemporary theory.

CULANTH305S - White People: In Anthropological Perspective

Subject: CULANTH  
Catalog Number: 305S  
Title: White People: In Anthropological Perspective  

Description:
Against the cross-cultural backdrop of other systems of hereditary privilege and of the political and economic changes that threaten them, we will examine the history, the ideologies, and the psychology of white supremacy in the United States. It will be our task to understand both the insiders’ point of view and its social context, which includes the mid-20th-century civil rights reforms, affirmative action, neoliberalism, and the progressive erosion of white monopolies on honor, voting rights, due process, a living wage, and upward mobility in US society.
CULANTH306 - Health, Culture, and the Latino Community

Subject CULANTH  
Catalog Number 306  
Title Health, Culture, and the Latino Community  

Description  
Exploration of health issues in the Spanish-speaking world shaped by social, cultural, political, ethnic, and economic determinants. Topics: cultural competency, community beliefs, medical practices and policies, preventive medicine, mental health. Projects include presentations, writing, research, and conversations with local and global contacts. Evaluation on knowledge of content, oral and written proficiency in Spanish. One 300-level Spanish course recommended prior to enrolling. Prerequisite: Spanish 204 or equivalent.

CULANTH307 - Development and Africa

Subject CULANTH  
Catalog Number 307  
Title Development and Africa  

Description  
Addresses the vexed issue of economic development in Africa - its many failures, its occasional successes - from the early colonial period to the present. Focuses especially on the transition from the 1960s 'modernizing' moment to the millennium projects and humanitarian aid of the present. Will read the works of development experts, World Bank executives, anthropologists and historians, asking why this massively financed project has experienced such failure and exploring what can be done.

CULANTH308S - Imagining Human Rights: Science Fiction, Culture, and the Creation of Rights

Subject CULANTH  
Catalog Number 308S  
Title Imagining Human Rights: Science Fiction, Culture, and the Creation of Rights  

Description  
This course engages students in the intersection of speculative fiction and the history of ideas about human rights and what it means to be human. Using interdisciplinary tools, including history, anthropology, and public policy, students will explore created worlds and new ways of thinking about what rights humans—and other beings—have, how those rights are proposed, and what happens when those rights are contested. The course focuses on how the imaginary influences or presages the real, allowing us to experiment with what-ifs. Students will work in Duke’s Locus Archives of primary documents on 20th-century science fiction spanning writers from China, the USSR, and Japan.

CULANTH309S - Manger: Foodways and Food Systems

Subject CULANTH  
Catalog Number 309S  
Title Manger: Foodways and Food Systems  

Description  
This course seeks to deepen our understanding of foodways and food systems, and of the roles that nourishment and nourishers play in our lives, while regenerating connections with food practices and food creators through the study of global French narratives, scholarships on foodways and foodscape, and hands-on, in-person experiences with nourishers in our local community. A strong emphasis on experiential learning, including community engagement in systems of food access and production as well as work with chefs and farmers, and the study of French-language narrative, culinary, scholarly, journalistic writing, and other cultural documents.
CULANTH 309SA - Manger: Food and Food Systems in the French-Speaking World

**Description**
An exploration of our relationship with food and its cultural and societal roles in French-speaking countries, from French gastronomy to the historical and economic influences that have determined our current systems of food production, what effects those systems have on immigration, equity, and climate, and the movements that seek to bring about changes in the ways people produce and consume food. A strong emphasis on experiential learning, including community engagement in systems of food access and production, as well as work with chefs and the study of French-language narrative, culinary, scholarly, and journalistic writing and other cultural documents. Recommended prerequisite: French 204 or equivalent.

CULANTH 310S - Conflict Analysis in Africa (Case Studies)

**Description**
Utilizes four case studies to outline components of conflict analysis in Africa. Examines regional crisis nexus between Darfur, Chad and Central African Republic. Looks at issues of postcoloniality, autochthony, migration, citizenship, land tenure, and inequality. On a theoretical level, identifies potentially crosscutting, deeper layers of contemporary crises in Africa with the objective of establishing a series of templates, a 'protocol', for comparative conflict analysis and conflict management in Africa.

CULANTH 311S - Dancing States of Mind: The Self, Social and Political Practice of Dance

**Description**
Practice-based studio work, discussion, and readings in current political discourse, System Theory, contemporary philosophy and cultural theory. Reveals the culturally constructed nature of dance in Western society - its manner of production, dissemination and aesthetics - and examines the consequences of 'the cultured flesh' as a mode of propaganda. The cultivation of students' radically subjective creativity, artistic experimentation, awareness, perception and expression, in order to understand and challenge the status quo; and to integrate abstract concepts into one's own physical existence and redefine assumptions by moving right through them.

CULANTH 312 - War and Public Health in Africa

**Description**
An inquiry into the nature of contemporary war in sub-Saharan Africa and its human cost. Uses public health as a parameter to assess the impact of organized collective violence on people’s lives. Link between war and public health established and measured with respect to civilian deaths, gender based violence, physical and psychological trauma, mental disorders, malnutrition and famine, and the spread of epidemic diseases, inter alia HIV/AIDS. Special attention is paid to rape as 'a weapon of war', to the trafficking of human beings in war zones, the child soldier phenomenon, and to death counts as a vector of humanitarian or political advocacy.
CULANTH314 - Introduction to Critical Theory

Subject: CULANTH  
Catalog Number: 314  
Title: Introduction to Critical Theory

Description
This course is an introduction to fundamental texts and concepts in the history of critical theory. We will be expanding the scope of our examination well beyond the remit of the Frankfurt School, to which the term 'critical theory' is often linked and look at key texts in the history of political philosophy, social theory, linguistics and language philosophy, gender studies, critical race theory, and postcolonialism. All our readings will be primary literature from what might be dubbed a 'critical theory cannon' and is intended to introduce students in the humanities and qualitative social sciences to essential and foundational materials.

CULANTH322 - The Modern Caribbean after Emancipation

Subject: CULANTH  
Catalog Number: 322  
Title: The Modern Caribbean after Emancipation

Description
Focus on the Caribbean region as it transitioned from a collection of slave and colonial societies into a region of postcolonial and independent nations. Topics may include: postemancipation political and cultural struggles, pan-Africanism and Rastafarianism, nationalist and anticolonial movements, American economic and political influence in the region, Caribbean emigration to Europe and the United States, and global spread of Caribbean culture.

CULANTH323 - Fundamentals of Global Mental Health

Subject: CULANTH  
Catalog Number: 323  
Title: Fundamentals of Global Mental Health

Description
Examines global mental health from perspectives of culture, public health, epidemiology, human rights, policy, and intervention. Readings focus on peer-reviewed research literature highlighting topics such as the prevalence of mental health disorders worldwide, the role of culture in mental health, and the interventions backed by strong evidence for prevention and treatment. Students will discuss and critique study methodologies and explore the needs for future research in this emerging field. Designed for students with prior research methods and psychology coursework.

CULANTH327S - Migrations

Subject: CULANTH  
Catalog Number: 327S  
Title: Migrations

Description
Climate refugees, exiles of war, economic migrants, expatriates seeking new opportunities, along with others compelled to flee their current circumstances and look for a new life, are moving across borders. Combine these movers with the billions of religious pilgrims, adventure travelers, and tourists, and we find a movement of humanity en masse in greater numbers than ever in the history of humanity. Combining literature on pilgrimage with travel memoirs and essays on travel, films on the act of walking, and multimedia explorations of refugee journeys, immigrant life, and border crossings, this course seeks to make sense of our unprecedented era of migration.
CULANTH329S - Undocumented America in Literature

**Subject**
CULANTH

**Catalog Number**
329S

**Title**
Undocumented America in Literature

**Description**
This seminar explores the representation of lived experiences, trajectories, and current events vis-à-vis the figure of the undocumented migrant, in contemporary American literature. Testimonial accounts, journalism chronicles, memoirs, poetry, cinematic works, and critical scholarship inform and propel our study of the experience of ('illegal') migrant movement—departure, journey, and arrival—as portrayed in Latino and Latina literature. We will question status designations such as 'illegal,' 'undocumented,' and 'unauthorized'; 'legitimacy' and recognition; the inadmissible and the construction of 'suspect' bodies; social participation in US society.

CULANTH330S - Narratives of Migration

**Subject**
CULANTH

**Catalog Number**
330S

**Title**
Narratives of Migration

**Description**
Stories of migration captivate us because they touch on universally important themes: home, family, belonging, identity, pain, loss. In this course, we will explore narratives, or stories, of migration, as told by refugees and immigrants from across the world, through different media: written, spoken, photographed, and constructed digitally on social media. This course approaches narratives of migration primarily from the perspective of sociocultural linguistics and discourse analysis, but we will refer to other scholarly traditions as well. This is a Service-Learning course: students will engage in a mentoring relationship with an immigrant student in a Durham high school.

CULANTH335 - The History of Hip-Hop

**Subject**
CULANTH

**Catalog Number**
335

**Title**
The History of Hip-Hop

**Description**
What began as a localized activity designed to provide a safe haven for Black and Latino youth in New York City, has become a global brand that has had a documented impact on the cultural, political and economic realities of youth throughout the globe. This course will examine the organic social and cultural foundations of hip-hop, as well as the key aesthetic innovators/innovations, and the debates that have arisen over hip-hop's increased influence.

CULANTH336 - Hollywood and Africa: Case Studies in Filmic Representation

**Subject**
CULANTH

**Catalog Number**
336

**Title**
Hollywood and Africa: Case Studies in Filmic Representation

**Description**
This course on Hollywood films about Africa—from classics such as 'African Queen' (East Africa), 'Tarzan' (Equatorial Africa) and 'Out of Africa' (Kenya) to recent productions such as 'Blood Diamond' (Sierra Leone), 'The Last King of Scotland' (Uganda), 'Lord of War' (arms trade), 'The Constant Gardener' (Kenya) and 'Black Hawk Down' (Somalia)—will tack back and forth between filmic representation and case study, using the latter to critique the former. As contrastive material, the class will also draw on non-Hollywood films about Africa, for example 'Hotel Rwanda' (Rwanda) or 'Lumumba' (DRC).
CULANTH341 - Life and Death: Global Perspectives

Subject: CULANTH
Catalog Number: 341
Title: Life and Death: Global Perspectives

Description:
Anthropological investigation of customs, practices, and beliefs that get activated when people (and other living beings) die. What constitutes life as in when does it start, what determines well-being, how is it measured; and what constitutes death as in a good versus bad death, by what medical definition, and according to what rituals and beliefs. Comparative inquiry into such questions as why brain-death is not accepted in some cultures and why people in some places prefer to die rather than live after an amputation. Topics will include organ transplants, gang warfare, cancer, and warzones from China and Botswana to Mexico and the United States.

CULANTH342 - Displacements: Migration and Human Trafficking

Subject: CULANTH
Catalog Number: 342
Title: Displacements: Migration and Human Trafficking

Description:
Examination of the meaning of migration in the global world through cross-disciplinary texts and visual media. Situates the phenomenon of human trafficking within the context of these general movements focusing on the risks involved when people endanger their lives to find a better and more strategic position in the world. Explores how these experiences should be interpreted, and how processes and the politics of race, space and place are a condition and/or outcome of these movements. Investigates and considers ways to resolve some of the problems associated with such movements.

CULANTH345S - Energy Futures and Environmental Justice

Subject: CULANTH
Catalog Number: 345S
Title: Energy Futures and Environmental Justice

Description:
Advanced undergraduate seminar on comparative energy crises and natural resource management. Uses case studies of fossil fuel, nuclear, and renewable energy resources drawn from anthropology, natural sciences, and even business economic readings. Appropriate for students interested in global politics, economic development, human rights, or environmental issues.

CULANTH346S - The Connection between Human Rights, Memory and How Societies Create Memorials

Subject: CULANTH
Catalog Number: 346S
Title: The Connection between Human Rights, Memory and How Societies Create Memorials

Description:
This seminar introduces students to multiple approaches to how to create memory, with a focus on building a proposal for Duke to expand the sites where stories are told. We are particularly interested in how to tell difficult stories of slavery, segregation and inequality through new sites and interpretive plans. Students will create a Duke memory map and develop a Story Bank. The class is in part funded by Bass Connections and is affiliated with the Story Lab.

CULANTH352A - From Enlightenment Culture to Popular Culture

Subject: CULANTH
Catalog Number: 352A
Title: From Enlightenment Culture to Popular Culture

Description:
Course constructs a sociological history of French (and partially European) culture by routinely using the city of Paris as an example. Analyzes conflicts inherited by contemporary culture in highlighting major moments that have defined it since pre-revolutionary era. Focuses on theoretical issues raised by each period, and the manner in which sociologists and critical theorists addressed them—from opposition of nature and culture just as it plays out for the pre-romantics, to the criticism of mass-culture by post-modern theorists. Sessions will be chronological, and will introduce and cover principle problems of social sciences. Taught in French through the Duke in France Program.

CULANTH360 - Global Apple: Life and Death and the Digital Revolution

Subject: CULANTH
Catalog Number: 360
Title: Global Apple: Life and Death and the Digital Revolution

Description:
Examination of the Apple Corporation’s development from a Silicon Valley garage operation to a company with unprecedented global reach; the Cult of Steve Jobs, the Apple Launch and use the design and development of the Apple Store; labor and environmental struggles over Apple supply chain and production processes, from cobalt mining in Africa to Foxconn factories in China; migrant worker suicide and poetry as forms of protest in China; e-waste villages and digital rubbish; everyday uses of Apple technology and the ethics of consuming Apple products.

CULANTH360S - Global Apple: Life and Death and the Digital Revolution

Subject: CULANTH
Catalog Number: 360S
Title: Global Apple: Life and Death and the Digital Revolution

Description:
Examination of the Apple Corporation’s development from a Silicon Valley garage operation to a company with unprecedented global reach; the Cult of Steve Jobs, the Apple Launch and use the design and development of the Apple Store; labor and environmental struggles over Apple supply chain and production processes, from cobalt mining in Africa to Foxconn factories in China; migrant worker suicide and poetry as forms of protest in China; e-waste villages and digital rubbish; everyday uses of Apple technology and the ethics of consuming Apple products.

CULANTH361S - African Cities, Development, and Climate Change

Subject: CULANTH
Catalog Number: 361S
Title: African Cities, Development, and Climate Change

Description:
The displacement of sizeable urban populations as a consequence of climate change renders African cities sites of two contending conditions: the one is a prevailing sense of crisis; the other, in the form of a response, is to attend to the prevailing conditions of crisis. African cities are poised to mobilize not only extant forms of cultural ingenuity, but technological ingenuity too. Students will explore African city life from megalopolises like Cairo to threatened UNESCO world heritage sites like Saint-Louis, Senegal. The course reimagines terms such as ‘development,’ ‘employment,’ ‘infrastructure,’ ‘sustainability,’ and ‘citizenship.’
**CULANTH365S - The World of Japanese Pop Culture**

**Subject**
CULANTH

**Catalog Number**
367S

**Title**
Mayas, Aztecs, and Incas: The World According to the Indigenous People of Latin America

**Description**
The basic philosophical architecture of the three great civilizations of America; Maya, Aztec and Inca civilizations. Links the current indigenous revival in the Andes (Bolivia and Ecuador) and in the South of Mexico and Guatemala with the survival of their historical legacies.

---

**CULANTH368 - Visualizing the Caribbean**

**Subject**
CULANTH

**Catalog Number**
368

**Title**
Visualizing the Caribbean

**Description**
Art (paintings, installations, performance art) and film on the Caribbean offer vantage points for analyzing alternative ways through which the region has been thought, imagined and produced. They are periodized semiotic productions that feed into and are marked by perspectives that are at once global, national, and even personal. Considering the constitutive contexts of these productions and performances, we will attempt to glean the diverse perspectives, and the way these have influenced sociocultural policy and offer alternative interpretations of diasporic lifeways of Caribbean people.
### CULANTH369S - Soundscapes of Migration: Music and Migration in Paris from the Interwar Years to the Present

**Subject**: CULANTH  
**Catalog Number**: 369S  
**Title**: Soundscapes of Migration: Music and Migration in Paris from the Interwar Years to the Present

**Description**
This class studies migration through the prism of music, focusing on Paris as a node of networks of musical migration. It analyzes how the metropolis has been a site of musical encounters, as well as a recipient, catalyst, and disseminator of migrating musical practices. It studies music as a transnational and diasporic cultural process. Although our musical journey will be structured chronologically, its frontiers will encompass the soundscapes of the capital's peripheries. The range of music considered will be varied: from the Eastern European classical repertoire and African American Jazz to contemporary Rap, through Algerian Rai and Arab-Andalusian popular music. Taught in French.

### CULANTH382SA - Transnational Muslims in Germany: Politics of Migration, Religion, and Culture

**Subject**: CULANTH  
**Catalog Number**: 382SA  
**Title**: Transnational Muslims in Germany: Politics of Migration, Religion, and Culture

**Description**
Critically analyzes political debates about Muslims and Islam in Europe that often cast them as a ‘security threat’ or a ‘problem’ of failed integration. Traces the geographical production of Muslim subjects through transnational flows, networks and imaginaries. Examines a series of topics including debates about the headscarf, Muslim women’s dress, mosque construction, Muslim civil society organizations, and the refugee crisis in Germany. Taught in English as part of the Duke Middle East in Europe program.

### CULANTH385S - Race, Gender and Culture of the African Diaspora

**Subject**: CULANTH  
**Catalog Number**: 385S  
**Title**: Race, Gender and Culture of the African Diaspora

**Description**
Course reveals the diversity of black life in the Americas, Europe, and the Middle East through film and classical and contemporary ethnographies by the likes of W. E. B. DuBois, Zora Neale Hurston, Fernando Ortiz, and others. Examines diverse analytical tropes that illuminate how cultures and communities reproduce themselves amid exploitation and stigma.

### CULANTH389S - Food, Culture, and Society

**Subject**: CULANTH  
**Catalog Number**: 389S  
**Title**: Food, Culture, and Society

**Description**
This DukeImmerse course provides a broad overview of food as culture and its role in society. Exploration of the intersections between food and identity from gender, ethnic, class, religious, and political identities to how people use food to develop a sense of themselves as ethical beings. Food and democracy and food activism. Readings from anthropological, sociological, linguistic, and literary writings with ethnographic observations in local communities of practice. Instructor consent required.

### CULANTH390SA - Duke-Administered Study Abroad: Special Topics in Cultural Anthropology

**Subject**: CULANTH  
**Catalog Number**: 390SA  
**Title**: Duke-Administered Study Abroad: Special Topics in Cultural Anthropology

**Description**
Topics differ by section.

### CULANTH393A-1 - Research Independent Study on Contemporary China

**Subject**: CULANTH  
**Catalog Number**: 393A-1  
**Title**: Research Independent Study on Contemporary China

**Description**
Research and field studies culminating in a paper approved and supervised by the resident director of the Duke in China Program. Includes field trips on cultural and societal changes in contemporary China. Offered only in the Duke in China Program.
CULANTH397S - Language in Immigrant America

**Subject**  
CULANTH

**Catalog Number**  
397S

**Title**  
Language in Immigrant America

**Description**  
Discussion of issues of language in the context of immigration in the United States, from the turn of the 20th century until the present, combining approaches from literature, memoirs, language policy, media studies, and linguistic anthropology. Some fieldwork in an immigrant community. Topics include: identity, assimilation, race, bilingual communities, bilingual education, foreign accents, language contact.

CULANTH399A - Global Russia

**Subject**  
CULANTH

**Catalog Number**  
399A

**Title**  
Global Russia

**Description**  
Globalization of Russian culture as manifested in popular/academic cultural forms, including political ideologies, media/artistic texts, film, theater/television, markets, educational/legal institutions, historical/contemporary social movements. Examination of ethical issues in context of such topics as the relationship between church and state; evolution of a totalitarian government into a democratic state; reproductive rights; struggle against corruption in education, finance, police; role of censorship; views of citizenship, patriotism, valor, and treason; historical perspectives on prison camps, abuses of psychiatry. Offered in the Duke in Russia Program. Instructor consent required.

CULANTH399 - Global Russia

**Subject**  
CULANTH

**Catalog Number**  
399

**Title**  
Global Russia

**Description**  
This course will examine the process of globalization of Russian culture and institutions as manifested in political, economic, and legal institutions; religion; education; popular and academic cultural forms, including media and artistic texts, film, theatre and television; diplomacy; reproductive rights; health care; the role of censorship; views of citizenship, patriotism, and sport. We will evaluate the ethical issues, potential shift of cultural values, and their impact on 21st century Russian institutions.

CULANTH401S - Indigenous Americas

**Subject**  
CULANTH

**Catalog Number**  
401S

**Title**  
Indigenous Americas

**Description**  
Explores histories, experiences, struggles, art, and philosophies of indigenous peoples in the Americas, meaning both Latin and North America. Acknowledging 500 years of genocidal practices, will focus on concepts of 'the good life' and the complex relations of the spiritual and the material. Roles of gender and sexuality within indigenous worlds and in the often violent relations with settler societies will be a special focus. Explore relations between past, present, and the future under burden of Anthropocene.

<tr>
<td>CULANTH</td>
<td>402</td>
<td>The Problem of Evil: God, Evil, Suffering, Sin, Meaning of Life, and Philosophy of Religion</td>
</tr>
</tbody>
</table>

**Description**

'The problem of evil' as the challenge of reconciling the existence of an absolutely perfect being (Omnipotent, Omniscient, and omnibenevolent God) with the existence of sin and suffering has one of the greatest problems of intellectual history from ancient to modern times. The problem of evil effects the 'meaning of life' deeply, so it is not exclusive to the monotheists, and involves atheists as well. This is an introduction to the problem of evil, and explores its major issues and concepts: the logical problem of evil, the evidential problem of evil, soul-making theodicy, natural law theodicy, process theodicy, anti-theodicy, free will defense, reformed epistemology, and skeptical theism.

<tr>
<td>CULANTH</td>
<td>404S</td>
<td>Ethics of Hope</td>
</tr>
</tbody>
</table>

**Description**

Hope involves the expectation or desire for good things to happen. Yet, does this set up people for despair when hopes get dashed or have no possibility of realization? Or, is the conjuring of something better—somewhere, sometime—what enables life to be sustained in the face of difficulties or just the daily grind of making do? In this class we raise the issue of the ethics, politics, and tactics of hope, drawing on philosophy, feminism, and anthropology.

<td>Media and Conflict</td>
</tr>
</tbody>
</table>

**Description**

Focus on the role of media in the context of colonialism, war and conflict across various historical periods. Attentive to the ways that media technologies have been employed both as tools of power and vehicles of protest and resistance. Theoretical readings are paired with a set of international case studies -- e.g., colonial atrocity archives, #BlackLivesMatter, Syrian civil war, the Abu Ghraib torture scandal, the Israeli military occupation, drone strikes -- that enable us to test the applicability of theoretical discussions to contemporary case studies. Readings in Butler, Kaplan, Sontag, Stein and Kuntsman, Virilio and others.

<td>South African Life Histories</td>
</tr>
</tbody>
</table>

**Description**

South Africa presented the world with one of the great moral challenges of the 20th century. We will explore its history through the lens of biography and autobiography. The country underwent major transformations -- rapid industrialization, segregation, the rise and fall of apartheid, and the emergence of democracy. How did individuals experience these social changes? In what ways do individual lives illuminate these larger social processes? Protagonists include a prophetess, political artists and writers, exiles, and celebrated figures. Topics cover how segregation and apartheid affected people's daily lives, opposition to white supremacy, and the personal impact of the AIDS's epidemic.

<td>This course focuses on the position of Blacks in the national histories and societies of Latin America from slavery to the present day. Emphasis is on an interdisciplinary engagement with issues and critical discussion of national images contrasted with the realities of blackness. We will explore the connections between race, gender, sexuality, and representation in national and transnational encounters and the consequences of the migration of people and ideas within the hemisphere. Countries to be explored include Cuba, Brazil, the Dominican Republic, Puerto Rico, Argentina, Mexico, Haiti, and Peru.</td>
</tr>
<tr>
<td>CULANTH416A</td>
<td>Cultural Lab: Walk, Think, Experiment Now</td>
<td>CULANTH</td>
<td>416A</td>
<td>This Duke in Madrid course parts from the present, from what is happening culture-wise today, to offer a wider perspective on cultural systems and creative processes in our recent history. Most class sessions will take place outside the classroom and will have a participative character. One of the central concepts of this course is transversality, which allows the student to organize more dynamic and active comprehension networks than what is usually offered by courses in this field of study. Nevertheless, students will always have a base point to focus their direction of study related to the modules within the course: art, literature, architecture, politics, creation, theatre, technology.</td>
</tr>

CULANTH418S - Meaning, Mattering, and Black Being-in-the-World: Towards a Critical Theory of Race and Value

Subject: CULANTH  
Catalog Number: 418S  
Title: Meaning, Mattering, and Black Being-in-the-World: Towards a Critical Theory of Race and Value

Description
This course interrogates the ways scholars in the social sciences and humanities have conceptualized and theorized value, and the curious absence of race/racism from this discourse. Drawing from scholarship in the fields of history, anthropology, African diaspora studies, and (ethno)musicology, students will develop a better understanding of the interrelationship between race and value and the distinct ways that race has been one of the most pervasive 'value regimes' in the making of the modern world. Topics include the transatlantic slave trade and plantation societies in the Americas; intersections of race with science and technology; and black radical politics and expressive culture.

CULANTH419S - Global Environmentalism and the Politics of Nature

Subject: CULANTH  
Catalog Number: 419S  
Title: Global Environmentalism and the Politics of Nature

Description
Exploration of several themes: how local, national, and transnational organizations manage the environment, discuss it, study it, protect and defend it; who speaks for nature and to what ends; the differences between capitalist and socialist approaches to the environment; how relations among natures, nations, social movements, individuals, and institutions have changed over time. Case studies from Africa, East and Southeast Asia, India, Latin America, and the United States; study of new theoretical writing on the relationship between humans, technology, capital, and nature.

CULANTH423 - Sex and Money

Subject: CULANTH  
Catalog Number: 423  
Title: Sex and Money

Description
Sexual practices that involve transactions of money in different cultural and historical settings, including ‘regular’ marriage practices that involve exchanges of money and goods as well as extramarital practices where one party is selling bodily acts. Examination of the ethics and politics of these exchanges questioning who benefits from them (and who not) and how to also assess other bodily transactions including prostitution and surrogacy. Reading materials on sexual practices in different cultural contexts (including Tonga, Thailand, Brazil, India, Ghana, China, Japan, Russia, Turkey, Indonesia). Comparisons made in terms of culture, religion, ethical systems, politics, and economy.

CULANTH424-1 - Medical Anthropology

Subject: CULANTH  
Catalog Number: 424-1  
Title: Medical Anthropology

Description
Cross-cultural study of health and illness. Prerequisites: Completion of both Writing 101 and any First Year Seminar.
### CULANTH425 - Globalization and Anti-Globalization

<table>

<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CULANTH</td>
<td>426S</td>
<td>France-Asia: Cultural Transfers and Translations in a Globalized Context</td>
</tr>
</tbody>
</table>

**Description**
This class explores the dynamic contemporary Franco-Asian dialogue with a specific focus on China, Japan, Vietnam, Laos, and Cambodia. Seeking to go beyond the East-West divide, the seminar investigates the current stakes of this dialogue, given its growing complexity after 1945. It examines the postcolonial legacy of France’s occupation of Indochina, and how East Asia has also often been viewed as an ‘Other,’ serving to crystallize French anxieties over political and cultural power. It uses an interdisciplinary perspective encompassing novels, cinema, dance, visual arts, and critical theory to trace a web of exchanges in a globalized context. Taught in French.

### CULANTH431 - Anthropologie Economique

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CULANTH</td>
<td>431</td>
<td>Anthropologie Economique</td>
</tr>
</tbody>
</table>

**Description**
Taught in French, this course is based on the achievements of anthropology to identify the foundations of economic practice as well as the theoretical problems it poses. Whether it is the market, credit or investment, economic institutions and practices are historical inventions. A better understanding of these requires analyzing the process by which the universe, which we call ‘economy,’ was constituted. It is about reintegrating economic behavior into human behavior. An economy that positively affects living things and meets the needs of human communities must rethink the foundations of the theory of value and exchange.

### CULANTH432S - Gender, Sex and Citizenship

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CULANTH</td>
<td>432S</td>
<td>Gender, Sex and Citizenship</td>
</tr>
</tbody>
</table>

**Description**
Explore current issues and debates relating to the relationship between gender, sexuality and global flows of people, labor, capital, and ideas. Consider feminist analyses of the citizen-subject and foundational questions central to this area of study relationship between cultural representation, queer subjectivities, and sexual citizenship. Examine scholarship on gendered vulnerability and the welfare state; the politics of ‘terror,’ security, and stereotyped masculinities; domestic labor and contemporary slavery; and the controversial debates about the connections between sex tourism, human trafficking, and commercial sex work. Prerequisite: Previous gender studies course or consent of the instructor.
### CULANTH434S - Cultures of New Media

**Subject**: CULANTH  
**Catalog Number**: 434S  
**Title**: Cultures of New Media

**Description**: Anthopological look at 'new media' - their varied forms and histories, how they are used and understood, and their meanings and effects within different communities of users. Charts a number of technologies deemed 'new' in their day and the social meanings and communities that such technologies generated. Explores new media in domains of art and literature, as well as issues of race, gender, sexuality and how other indices of difference come to bear on new media and its use. Grounded in anthropology, readings will also draw on media studies, visual studies, cultural studies and critical theory, queer and gender theory, history and geography.

### CULANTH438S - Techno-Orientalism: Asian/America, (Post)Human and Science Fiction

**Subject**: CULANTH  
**Catalog Number**: 438S  
**Title**: Techno-Orientalism: Asian/America, (Post)Human and Science Fiction

**Description**: Course examines global Science Fiction genres in literature, film, and social media as case studies to understand broad historical and social formations of Otherness, the Alien, Citizenship, (Im)migration. Studies racial assumptions in popular culture, domestic and international law, discourse of the human and human rights, science and technology industries, and other disciplines. Explores interdisciplinary intersections of race, gender, sexuality, class, and geopolitical divisions and interactions in Asian/American Studies and Postcolonial Studies from the past to the present.

### CULANTH439 - Queer China

**Subject**: CULANTH  
**Catalog Number**: 439  
**Title**: Queer China

**Description**: Examines queer discourses, cultures, and social formations in China, Greater China, and the global Chinese diaspora from the late imperial period to the present. Course will focus on cultural representations, particularly literary and cinematic, but will also consider a wide array of historical, anthropological, sociological, and theoretical materials.

### CULANTH440S - Games and Culture: Gateway to the Study of Games

**Subject**: CULANTH  
**Catalog Number**: 440S  
**Title**: Games and Culture: Gateway to the Study of Games

**Description**: Examines analog and computer games from a cultural perspective. Explores how prevailing culture and values affect game design, popularity, and experience, how games affect those areas of culture, such as imagining disaster, utopia and dystopia. Explores role-playing and identity, ethics, group behavior, competition, politics, gender, race, and aesthetics.
### CULANTH450S - The Global Caribbean

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CULANTH | 450S | The Global Caribbean  

**Description**  
The course introduces students to the Caribbean as a transnational space that reflects the global dynamics associated with flows of bodies via migration, labor, and goods all of which have undergirded the birth and evolution of the (primarily) Atlantic world economy. The Global Caribbean will have a historical sociological bent that frames the region as the first modern colonial space which has served as a template for other projects of colonial and postcolonial development elsewhere in the world. Emphasis will be on the way that freedoms and unfreedoms operate in the Caribbean and elsewhere. Discussions of how knowledge has conditioned the representation of the region will be entertained.

### CULANTH469S - Capstone Seminar: Islamic Law In History

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CULANTH | 469S | Capstone Seminar: Islamic Law In History  

**Description**  
This seminar focuses on Islamic law and Muslim jurists in social and economic history, with a special attention on the last two hundred years. In a historical anthropology of law, we read primary sources in English translation and secondary literature about the norms and practices of law in Muslim and non-Muslim polities. We look at law as a domain of social interaction, an instrument of government, and part of statecraft in Muslim polities. The main goals of the class are 1) to help students in understanding Islamic legal terms and the difference between norm and practice 2) to help students using the distinction between primary and secondary sources in an original research paper.

### CULANTH470S - Capstone: Research in Human Rights

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CULANTH | 470S | Capstone: Research in Human Rights  

**Description**  
A primary learning objective is to have students connect the intellectual themes and scholarly knowledge they have developed in the Gateway, Introduction to Human Rights, and the electives they have taken toward the Human Rights Certificate. The course integrates co-curricular rights-related experiences (through DukeEngage, DukeImmerse, internships and volunteer placements). The capstone culminates in a final project. Students may work in teams toward a final project so long as each student’s work is evaluated separately and at a high standard. Prerequisite: Cultural Anthropology 104D. Consent of director of undergraduate studies required.

### CULANTH473 - Two Koreas: History, Society and Culture

**Subject** | **Catalog Number** | **Title**  
--- | --- | ---  
CULANTH | 473 | Two Koreas: History, Society and Culture  

**Description**  
Introduces the divided histories of North and South Korea and their contemporary legacies in regional and global contexts. Explores topics such as colonization, modernization, division, war, migration, gender and sexuality, human rights, popular and political cultures, and globalization in comparative perspectives. Examines historical narratives, journalism, museums, literature, and visual cultures.
CULANTH481 - Living, Dying, Healing in Russia

Subject: CULANTH  
Catalog Number: 481  
Title: Living, Dying, Healing in Russia

Description: Explores ways historical, cultural, political forces shape major moments of the life course and the stories told to make sense of them. Team taught by a professor of literature and a professor of anthropology, focus is on family life, sexuality, childbearing and its prevention; biomedical health care and alternative healing; survival in gulag (concentration camp) conditions; care for the dead and dying and their families. By examining compelling works from a range of genres—short story, ethnographic case study, memoir, and novel—students will learn analytical techniques from both fields, and hone interpretive and writing skills. Knowledge of Russian is not required.

CULANTH490 - Advanced Special Topics in Cultural Anthropology

Subject: CULANTH  
Catalog Number: 490  
Title: Advanced Special Topics in Cultural Anthropology

Description: Selected topics in methodology, theory, or area.

CULANTH490S - Special Topics

Subject: CULANTH  
Catalog Number: 490S  
Title: Special Topics

Description: Advanced Special Topics in Cultural Anthropology.

CULANTH498S - Senior Seminar Distinction Program Sequence

Subject: CULANTH  
Catalog Number: 498S  
Title: Senior Seminar Distinction Program Sequence

Description: No credit for Cultural Anthropology 498S without satisfactory completion of Cultural Anthropology 499S. Students who wish to exit the Senior Seminar Distinction Program sequence after completion of 498S must petition the course instructor, their advisor, and the director of undergraduate studies. The student will be given course credit and a final grade provided the instructor, their advisor, and the director of undergraduate studies determine the student has done adequate work. Consent of director of undergraduate studies required.

**Description**

Technical and artistic training in the modern dance idiom through technique, improvisation and composition. First steps in developing skill, clarity and motivational intent as well as strength and flexibility. No previous dance experience necessary.
DANCE116 - Alexander Technique for Musicians, Dancers, and Actors

Subject: DANCE
Catalog Number: 116
Title: Alexander Technique for Musicians, Dancers, and Actors

Description:
The Alexander Technique provides a structured method of self inquiry which has helped performing artists improve their skills for over 100 years. By uncovering and transforming previously unconscious movement patterns and mental habits, performers can significantly improve their skills by increasing freedom and ease of movement. All instrumentalists and singers with a strong interest and background in performance are welcome.

DANCE120 - Beginning Ballet

Subject: DANCE
Catalog Number: 120
Title: Beginning Ballet

Description:
Basic classical ballet technique, body alignment, vocabulary, and musicality for the absolute beginner. Barre and center exercises included.

DANCE122 - Intermediate Ballet

Subject: DANCE
Catalog Number: 122
Title: Intermediate Ballet

Description:
Barre work concentrating on body alignment and correct placement within the ballet vocabulary followed by center adagio and allegro sequences. Prerequisite: Dance 121 or equivalent.

DANCE125S - American Musicals

Subject: DANCE
Catalog Number: 125S
Title: American Musicals

Description:
What is it about musicals that made them a uniquely American theatrical form? In this course, we will investigate how musicals represent what it means to be American. Musical theatre history is American history, indebted to and reflective of critical histories of appropriation, capitalism, immigration, and popular entertainment. Musicals seduce us in song and dance; it is easy to ignore the substance beneath the sequins. We will study the texts and historical contexts of musicals over the past century, from Shuffle Along, and Oklahoma!, to A Chorus Line, and Hamilton. Musicals reveal shifting notions of what 'American' means as they stage ability, ethnicity, gender, race, and sexuality.

DANCE130 - African Dance Technique I

Subject: DANCE
Catalog Number: 130
Title: African Dance Technique I

Description:
Introduction to African dance styles and related rhythmic structures from selected countries such as Guinea, Senegal, Nigeria and Cote d'Ivoire. Taught in the context of their social, occupational, and religious functions.

DANCE131 - Capoeira: Brazilian Dance/Martial Art

Subject: DANCE
Catalog Number: 131
Title: Capoeira: Brazilian Dance/Martial Art

Description:
Introduction to Capoeira, the dynamic art form that emerged in Brazil during the era of the Atlantic Slave Trade and blends music, ritual, acrobatic movement, and combat.

**Description**
This introductory course offers an examination of the major movements in the history of concert and social dance, including ballet, tap, jazz, modern dance, musical theater, and particular cultural forms. Considerations of popular culture and reality competition dance programs; feminist foundations of modern dance; contemporary performance idioms that involve the presence of the body.
**DANCE199FS - Knowing Through Performance**

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANCE</td>
<td>199FS</td>
<td>Knowing Through Performance</td>
</tr>
</tbody>
</table>

**Description**
Inquiry into the concept of 'performance' broadly construed; not only as it refers to 'staged' performances, but as social ritual and as self-representation, situated in cultural context. Writing experiments aimed at capturing the ephemerality of live performance, with attention to how meaning is enacted through movement, sound, lighting, rhythm, voice, emotion, and audience interaction. Regular writers' workshops and attendance of theater, dance, and musical performances. Students compose critical reviews and a research project on a performance genre, an artist's approach, or other related topic of their choosing.

**Description**
Student teams work on specific arts-based entrepreneurial projects. Teams comprised of students from different backgrounds (arts, engineering, economics, computer science). Goals include creating business plan and launching ventures in areas of the arts. Structure an adaptation of Fuqua Program for Entrepreneurs. Ideal projects have real/positive impact on society. Students learn to situate artistic creativity within projects that meet societal need. Students from any background welcome to apply for enrollment. Must have interest in arts or working with artists in entrepreneurial context. Admission by permission of instructors.

<tbody>
<tr>
<td>DANCE</td>
<td>202S</td>
<td>Arts Policy, Leadership, and Engagement</td>
</tr>
</tbody>
</table>

**Description**
This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.

**DANCE203A - The Arts, Culture, and Performance of New York**

</table>

**Description**
This course introduces its participants to New York though its rich artistic, cultural, and performance offerings—drawn from art, dance, film, music, literature, and theater. Visiting all five boroughs, they contemplate how the identities of New Yorkers— informs by the city and by ability, class, ethnicity, gender, race, and sexuality—are performed in the theater of everyday life: in parks, streets, subways, and especially the city's diverse neighborhoods and restaurants.

**Description**
Non-profit cultural institutions are an integral part of arts communities at all levels: national, regional, local. Through readings, projects and service-learning, students gain overview of non-profit cultural organization formation, management, operational structures, governance challenges, board member responsibilities and situational ethics. Explores historical and present functions and social structures in which nonprofit tax-exempt organizations operate. Investigates how nonprofit cultural institutions have increasingly become a vehicle for fostering creativity in the arts and humanities. Students partner with local non-profit arts/cultural organizations to work on specific projects.

**DANCE211 - Musical Theater Workshop: Performance**

**Description**

Students will develop the three primary skills of musical theater performance (acting, dancing, and singing) in this workshop. Students will also try their hand at choreography, direction, and dramaturgy as we collaboratively stage scenes and songs from musicals throughout the semester. We will analyze what makes musical theatre performance successful as we work to hone your own abilities and talents together. Each student will receive a mixture of individual and group coaching every week. Permission to enroll is granted by instructor consent following a successful audition into the mainstage production.

**DANCE219S - Production Management for Theater**

**Description**

What does it mean to successfully manage an artistic endeavor? How does management affect whether or not a project is successful? How can artist managers be more sensitive and responsive to the needs of their fellow collaborators? This course explores theater from the perspective of the production manager. While our focus will be theater, we'll also discuss how to apply skills such as scheduling, budgeting, writing contracts, and personnel negotiation across the performing and cinematic arts.

**DANCE225S - Ballet Forces: Dancing the State**

**Description**

Exploration of ballet as an art form, entangled in questions of commerce, race, aesthetics, embodied practice, creative achievement. Historical trends of theatrical dance, and fields of engagement that produced ballet as a practice are examined. Questions of pedagogy and access, qualities of performance across geographies and eras, biographical depictions of influential figures. Theoretical grounding established for how ballet arrives entangled in circles of enduring social influence.

**DANCE226S - Performing African Diaspora**

**Description**

The Black cultural contributions of globally popular performance genres such as salsa, capoeira and kizomba often remain unrecognized. The objectives of this class are: 1) to understand the historical, cultural and political forces that created the African Diaspora and its rich tapestry of dances. 2) to question our assumptions that knowledge is only produced through the mind; knowledge is also produced and transmitted through moving bodies. To meet these objectives, the course will be a combination of seminar and studio: in seminar we will engage readings in anthropology, dance and performances studies about specific dances which we will then learn in studio.

**DANCE229 - Stage Management**

**Description**

This course will familiarize the student with techniques and skills required to be a smart, efficient and effective Stage Manager in a Theatrical Production. We will delve into the principles and processes of stage management through exploration of the tasks required of stage managers throughout the production process.

**DANCE230 - African Dance Technique II**

**Description**

Continuation of Dance 130. Dances from selected African ethnic groups providing increasingly complex movement sequences and rhythmic structures. Emphasis on greater technical proficiency, clarity of expression and quality of performance. Taught in the context of their social, occupational and religious functions. Prerequisite: Dance 130 or consent of instructor.
DANCE235SL - Capoeira: Practice and Culture

<table>

<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANCE</td>
<td>235SL</td>
<td>Capoeira: Practice and Culture</td>
</tr>
</tbody>
</table>

**Description**
Lecture/lab course introducing the movement, music and culture of capoeira, an Afro-Brazilian martial art that combines dance, self-defense and acrobatics. Created by male African slaves in Brazil several hundred years ago, viewed as a social threat and outlawed in the 19th century, celebrated as an element of national identity in the 20th century, today capoeira is rapidly crossing national, racial and gender borders as it becomes a popular global practice. Studio classes twice a week focus on the basic movements, percussive music and call-and-response singing. Seminar once a week focuses on the historical, cultural and socio-political dynamics that shape capoeira in Brazil and beyond.

DANCE251AS - Duke in London: Arts

<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANCE</td>
<td>251AS</td>
<td>Duke in London: Arts</td>
</tr>
</tbody>
</table>

**Description**
This course surveys London as a site of dynamic cultural production, whose participation in the global marketplace of artistic commodities reveals the city's restlessly transnational, cosmopolitan character. Studying local institutions, students are introduced to the complex relationship among art, state, and the global cultural marketplace; studying a multiracial and multiethnic community, they become familiar with theories of globalization, neoliberalism, and cosmopolitanism, as well as migration and so-called national identity. Students also participate in excursions including dance, opera, and theatre productions and visits to museums and other sites of cultural importance.

DANCE267S - Lighting Design

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANCE</td>
<td>267S</td>

**Description**
Introduction to the process and practice of lighting design for the theater. Focus on text analysis, research, design process, instrumentation, control, color, design documents, and realization of designs in the theater. Includes the study of principles and practices, labs in design imagery, and projects in lighting design.
DANCE280 - Individual Dance Program: Special Topics

Subject: DANCE
Catalog Number: 280
Title: Individual Dance Program: Special Topics

Description: An individualized program of study of dance technique from existing class sessions. Consent of instructor required.

DANCE284 - Ritual, Performance, and Religion

Subject: DANCE
Catalog Number: 284
Title: Ritual, Performance, and Religion

Description: Exposes students to theories of ritual and performance (Turner, Schechner, Grimes, Geertz, Paden) in religious and non-religious contexts; compares contexts as a way of understanding common structures and what differentiates the religious/non-religious. Guest lecturers (from religion, dance, theater, psychology, English, visual and media studies, cultural anthropology) expose students to a range of approaches to specific kinds of ritual and performance. Possibly involves both class and individual trips to local religious events and performances for field work exercises.

DANCE290 - Special Topics Lecture

Subject: DANCE
Catalog Number: 290
Title: Special Topics Lecture

Description: Content to be determined each semester.

DANCE290A - Special Topics in Dance Duke-Administered Study Abroad

Subject: DANCE
Catalog Number: 290A
Title: Special Topics in Dance Duke-Administered Study Abroad

Description: Topics differ each semester.

DANCE290S - Special Topics Seminar

Subject: DANCE
Catalog Number: 290S
Title: Special Topics Seminar

Description: Content to be determined each semester.

DANCE301 - Arts Activism & Everyday Technology

Subject: DANCE
Catalog Number: 301
Title: Arts Activism & Everyday Technology

Description: In the last decade, smartphones and social media have been utilized to expose societal inequity and injustice. This course explores the intersection of arts activism and digital activism, both of which sprout from a desire to effect change. In Arts Activism & Everyday Technology, students integrate their social media savvy and passion for exerting influence into a formalized generative art practice (using dance, film, photography, drama, music, visual art, creative writing, and digital media design) addressing a topical issue. Students study past and present artist-activists, research an area of interest and use their smartphones to create a culminating interdisciplinary digital exhibition.
DANCE302S - Writing about Performance

Subject: DANCE  
Catalog Number: 302S  
Title: Writing about Performance

Description:
Inquiry into the concept of ‘performance’ broadly construed—not only as it refers to ‘staged’ concerts or plays, but also as social ritual and as self-presentation, appropriately situated in cultural context. Writing experiments aimed at capturing the ephemeral nature of live performance, with attention to how meaning is enacted through movement, sound, lighting, rhythm, voice, emotion, and audience interaction. Regular writer’s workshops and field trips to theater, dance, and musical performances. Students compose critical reviews and a research project on a performance genre, an artist’s approach, or other related topic of their choosing. Prerequisite: Writing 101.

DANCE306S - Dance for the Camera

Subject: DANCE  
Catalog Number: 306S  
Title: Dance for the Camera

Description:
The choreographic and bodily experience essential to dance for the camera. Hands on experience in videodance production through the exploration/production of several short individual and group videodance projects. Issues in creative and conceptual thinking, experimentation, pre/post video production, camera techniques, non-linear editing (Final Cut Pro), choreography for the camera. Viewings of seminal as well as experimental videodance works; discussions; readings; internet site visits; computer lab and dance studio/shooting location time; gallery/museum or video installation site visits. Prerequisite: Intermediate or above level of any dance technique, or Dance 105S.

DANCE308 - Performance and Technology: Composition Workshop

Subject: DANCE  
Catalog Number: 308  
Title: Performance and Technology: Composition Workshop

Description:
Workshop exploration of technologies embedded in performance: robots, media, computer interface. Students create performance projects and discuss theoretical and historical implications of technologies in performance. Open to dancers, actors, musicians, spoken word artists and all those interested in technology and the arts. No previous experience or programming skills required.

DANCE309S - Dancing States of Mind: The Self, Social and Political Practice of Dance

Subject: DANCE  
Catalog Number: 309S  
Title: Dancing States of Mind: The Self, Social and Political Practice of Dance

Description:
Practice-based studio work, discussion, and readings in current political discourse, System Theory, contemporary philosophy and cultural theory. Reveals the culturally constructed nature of dance in Western society - its manner of production, dissemination and aesthetics - and examines the consequences of ‘the cultured flesh’ as a mode of propaganda. The cultivation of students’ radically subjective creativity, artistic experimentation, awareness, perception and expression, in order to understand and challenge the status quo; and to integrate abstract concepts into one’s own physical existence and redefine assumptions by moving right through them.
DANCE310 - Advanced Modern Dance

Subject: DANCE  
Catalog Number: 310  
Title: Advanced Modern Dance

Description
Technical and artistic training in the modern dance idiom at an advanced level. Increased complexity of movement sequences and emphasis on clarity of expression, musicality, and quality of performance. Prerequisite: Dance 210 or equivalent dance training. Prerequisite: Dance 210 or equivalent.

DANCE316S - Unique Approaches to Dance Choreography

Subject: DANCE  
Catalog Number: 316S  
Title: Unique Approaches to Dance Choreography

Description
Course focusing on and analyzing the unique approaches to dance choreographies spanning late twentieth and twenty-first-century from world cultures. Discussions of choreographic approaches in their historical, political, racial, and aesthetic context. Readings will focus on creativity and choreography as a social phenomenon, as a form of racial and political activism, and as a medium of projecting gendered identity and the ever changing aesthetics. Discussions will also include postmodernism in dance and the impact of globalization on the traditional and regional aesthetics. When possible, guest artists will be invited to lead discussions.

DANCE317 - The Body in Art in Early Modern Europe: Power and Limits of Corporeal Representations

Subject: DANCE  
Catalog Number: 317  
Title: The Body in Art in Early Modern Europe: Power and Limits of Corporeal Representations

Description
This course studies the artistic representations of the human body in many guises: aesthetic, political, social, cultural, and erotic. It analyses the different strategies artists deployed to develop rhetorics of the body both physical and emotional. It considers different media (including painting, sculpture, drawings, prints, architecture, and gardens) and major theoretical frameworks (including feminist theory, phenomenology, social theory and somaesthetics). This course considers the body dynamically through composition, as object of investigation, as locus of meaning and through social understanding. Lectures and discussions are complimented by corporeal performances and improvisations.

DANCE318S - Movement in Question: Introduction to Critical Dance Studies

Subject: DANCE  
Catalog Number: 318S  
Title: Movement in Question: Introduction to Critical Dance Studies

Description
This writing-intensive seminar casts students as a research team engaging in multiple ways with the interdisciplinary field of critical dance studies. Students read and analyze foundational texts and theories, develop capacity to interpretively analyze movement, and practically engage in embodied activities that make gaps between textual representation and embodiment visible. This holistic approach throws movement into question and centralizes dance as a critical way of making the social world. Final Research Projects include conventional academic papers or choreographed performances that engage issues raised in the course. Zero dance experience required. All physical abilities welcomed.
DANCE320 - Advanced Ballet

Subject: DANCE
Catalog Number: 320
Title: Advanced Ballet

Description: Progression of Dance 220 with increased emphasis on line, style, and performance-level quality and technique. Diverse batterie, pirouettes, and tours included in allegro combinations. Prerequisite: Dance 220 or equivalent.

DANCE321 - Pointe and Variations: Advanced Study of Pointe Work for Ballet

Subject: DANCE
Catalog Number: 321
Title: Pointe and Variations: Advanced Study of Pointe Work for Ballet

Description: Classical and contemporary pointe technique and variations. Refinement of the classical style and the exploration of contemporary studies en pointe in the ballet lexicon. Training in and analysis of the principles of classical and neoclassical variations and their historical and aesthetic context. Development of interpretative skills, enhancement of style and performance qualities through coaching and informal showings. Prerequisite: Dance 220 or Dance 320 or Dance 420 or permission of instructor.

DANCE325S - The Black Parades: African Diaspora Parade Culture and Radical Resistance

Subject: DANCE
Catalog Number: 325S
Title: The Black Parades: African Diaspora Parade Culture and Radical Resistance

Description: The Black Parades: African Diaspora Parade Culture and Radical Resistance explores African diaspora parades as the embodiment of political activism, cultural and social imagination, identity construction, and radical resistance in action. From dance, music, food, socio-political meaning, and cultural symbolism, we will examine Carnival, Oshún Festival in Nigeria and Philadelphia, Emancipation Day in Trinidad, Second Line in New Orleans, USA Juneteenth, Garifuna Settlement Day Belize, Black Pride in Africa and the USA, the 1968 Poor Peoples March, Home Coming Day Parades, West Indian Day Parade in NYC, Martin Luther King Jr. Day Parades, and the Harlem Hell Fighters Parade.

DANCE332 - Black Theater Workshop

Subject: DANCE
Catalog Number: 332
Title: Black Theater Workshop

Description: Explore race and culture in America through texts of Black playwrights. Scene study by racially diverse class to engender feedback process. Juxtaposition of playwright’s race to societal standards of universal content; relevance of actor’s race to playwright’s intent; historical context of Black Arts ‘militant’ plays of the 1960s-70s. Workshop culminates in public performance.
DANCE335SL - West African Rootholds in Dance

Subject: DANCE
Catalog Number: 335SL
Title: West African Rootholds in Dance

Description: Lecture and dance laboratory exploring three West African traditional dance forms and their relationship to religious and social life in Africa and the Diaspora. Continuity and transformation of physical texts as cultural heritage, examined historically and aesthetically. Guest lecturers, videos, research project. Two lab sections, one for students with prior training in African Dance, and one for students with no experience.

DANCE336 - Black Dance

Subject: DANCE
Catalog Number: 336
Title: Black Dance

Description: Exploration of composition and performance structures commonly described as black dance. Working with cultural criticism contemporary with emergent modes of black dance, assesses political motivations and aesthetic strategies of artists and writers working explicitly in this idiom. Considers possibility of black dance performed by people of First World, European, and Asian descent. Examines concert dance, social dance, religious dance.

DANCE337S - Black Dance: Jamaican Contexts

Subject: DANCE
Catalog Number: 337S
Title: Black Dance: Jamaican Contexts

Description: Black Dance: Jamaican Contexts is a survey of one of the most beloved island nations through the religious, folkloric, and social dances from which Jamaican theatrical dance emerges. A hybrid of lectures, movement classes, and discussions, the course analyzes and interprets Jamaican dance’s aesthetic, philosophical, and historical foundations through a study of institutions, individuals, and artistic artifacts spanning the periods of slavery to the present. The course locates Jamaican dance as a creative product with the capacity to influence global culture, as evidenced in the proliferation and appropriation of Reggae and DanceHall.

DANCE338S - Ballet History: Black Presence

Subject: DANCE
Catalog Number: 338S
Title: Ballet History: Black Presence

Description: Ballet History: Black Presence examines the exclusion of Black ballet artists from the historical canon. The course content spans from 1930 to 2020, investigating the events, individuals, institutions, and artistic artifacts involving Black artists, placing them into the narrative of ballet history. It focuses on the social, political, economic, and aesthetic factors that inform artistic production and canonical inclusion based on race and nationality, interrogating the perception that ballet is an exclusively European cultural artform. The course discusses the influence of West African, Caribbean, European, South American, and American Blacks on the development of the ballet profession.

DANCE347S - The Moving and Sounding Body

Subject: DANCE
Catalog Number: 347S
Title: The Moving and Sounding Body

Description: This acting course offers a constellation of embodied techniques from the traditions of physical acting, laboratory theater, and devised performance. We will playfully investigate creative articulation of the poetic body and its voice as an integrated system using diverse texts, found objects, site-specific observations, and imagination. The course is intended to support acting performers as they develop strategies for a wider range of creative expression and character interpretation through sensorial awareness, embodied sound production, and transformative gesture for stage, film, and performance art.

DANCE356 - Dance and Dance Theater of Asia

Subject: DANCE
Catalog Number: 356
Title: Dance and Dance Theater of Asia

Description: Asian dance and dance theater performance genres and the cultural aesthetics that inform them. Cultural traditions of China, Korean, Japan, India, Indonesia, Thailand and Cambodia. Religious, ritual, folk and royal court forms of artistic performance. The mythology, legends and symbolic interpretations that underlie the thematic core of these performance traditions; spiritual importance of disciplined training; the intercultural translation and adaptation of Asian performance disciplines to the West.
DANCE368 - Gender in Dance and Theatre

Subject: DANCE
Catalog Number: 368
Title: Gender in Dance and Theatre

Description:
Ways in which gender and sexuality are conceptualized in selected performance cultures. Interprets these historically constituted social formations through an examination of the diverse cultural constructions of gender meanings, representations and ideologies as interpreted and expressed in dance and theatre. Symbolic meanings of gender in relation to forms of social life and theatrical experience. The Devadasi in India, the concept of the male embodied Onnagata, and the notion of the female embodied Otokoyaku in the dance-theatre of Japan.

DANCE370S - The Choreographic Mind: Order, Disorder, Organization, Relations

Subject: DANCE
Catalog Number: 370S
Title: The Choreographic Mind: Order, Disorder, Organization, Relations

Description:
Practice-based studio work, discussions, and readings in current cultural theory, contemporary philosophy, and political discourse. Introduces choreography as a creative act of structuring movement; interrogates culturally dominant as well as subversive modes of ordering; examines the wider social and political context and consequences of various forms of artificially created structures. The students’ radically subjective creativity, artistic experimentation, awareness, perception and expression is cultivated in order to understand and challenge the status quo and to create ‘relational artefacts’ through choreographic craft.

DANCE371 - Artists in Healthcare: Collaborations and Complexities

Subject: DANCE
Catalog Number: 371
Title: Artists in Healthcare: Collaborations and Complexities

Description:
The economically over-burdened US health care system and extended life expectancies for older adults offer a unique opportunity for working artists—not arts therapists—to intervene in the rapidly expanding field of integrative art and health. Rather than study health outcomes as indicators of ‘success,’ we centralize creative practice as our axis of inquiry. Course readings, interviews, and field visits to a Durham-based intervention highlight power imbalances and cultural sensitivities in hospitals, clinical care, assisted living, and nonprofit community care contexts. Culminates in student driven case studies of local arts work and workarounds.

DANCE375 - Music for Dancers

Subject: DANCE
Catalog Number: 375
Title: Music for Dancers

Description:
Exploration of the elements of music, music structures, and their relationship to movement and dance. Practical emphasis on rhythmic fundamentals, rhythm notation, musicality, mindful listening, and how they apply to choreography/composition and dance class. In-class movement, rhythm, and listening exercises, both solo and in groups, along with written and creative assignments, using drums, voice, body percussion and digital audio. The goal of this course is to provide musical training for dance/movement artists. Requirements: no musical training required to take the class, however, students should be able to create/choreograph/improvise movement phrases.
### DANCE377S - Dance Science: An Evolutionary Approach

DANCE435 - Experimental Sculpture and Installation Art

Subject: DANCE  
Catalog Number: 435  
Title: Experimental Sculpture and Installation Art

Description:
This course explores ideas surrounding the creation of experimental sculpture. It employs non-traditional methods: 'readymades,' non-traditional materials, conceptual processes, digital interaction and fabrication techniques (rapid prototyping), mixed media including video, and projection technologies. Content of work driven by individual student interests, sustainability, the anthropocene, feminism, social and political commentary, and/or more formal, abstract sculptural relations. Instructor consent required.

DANCE442 - Performance: Jazz

Subject: DANCE  
Catalog Number: 442  
Title: Performance: Jazz

Description:
Study of choreography and performance through participation in the mounting of a dance work in the jazz idiom from inception through rehearsal to performance. Separate enrollment in dance technique is encouraged. Consent of instructor required.

DANCE443 - Performance: Tap

Subject: DANCE  
Catalog Number: 443  
Title: Performance: Tap

Description:
The study of choreography and performance through participation in the mounting of a dance work from inception through rehearsal to performance. Separate enrollment in a dance technique course encouraged. Consent of department required.

DANCE444 - Performance: Hip Hop

Subject: DANCE  
Catalog Number: 444  
Title: Performance: Hip Hop

Description:
This is a performance course. Students audition the first week of classes. Selected students will receive a permission number to register. Students learn and create original choreography with the course instructor. All participants will perform in the Duke Dance Program semester concert with other Faculty, guest, and student works. Students attend this course twice a week until the concert date (TBA - April or November). Students work in the hip-hop dance idiom and explore the nuances and innovative concepts relating to hip-hop dance.

DANCE462 - Amendment - A Social Choreographic Work

Subject: DANCE  
Catalog Number: 462  
Title: Amendment - A Social Choreographic Work

Description:
In times of a burning world, and the irreversible damage to our environment, the work 'Amendment' offers to reform our relationship to 'the other.' The work will provide us with extraordinary experiences in movement to temporarily transcend the human/human, human/non-human divide into a relationship of reciprocal belonging. This is a rare opportunity to work with Duke Professor Michael Klién on an experimental, immersive work of social choreography. Part of Bass Connections: Performing Embodied Communities.

DANCE472 - Performance: Dance Theater

Subject: DANCE  
Catalog Number: 472  
Title: Performance: Dance Theater

Description:
The study of choreography and performance through participation in the mounting of a dance work from inception through rehearsal to performance. Separate enrollment in a dance technique course required. Consent of department required.

**DANCE487S - Capstone Seminar: Research Methods in Dance Studies and Choreographic Performance**

**Subject**: DANCE  
**Catalog Number**: 487S  
**Title**: Capstone Seminar: Research Methods in Dance Studies and Choreographic Performance  

**Description**  
Methods used in dance theory, history, ethnography, education and choreography/practice. Interviewing and documentation; examination of issues concerning participatory experience and objectivity in ethnographic research. Students develop a research paper that culminates in an extensive individual project completed in this course, or, in the case of dance majors, in Dance 489T. Open only to junior/seniors. Recommended prerequisite: Dance 101, one additional course in dance history, theory, or world cultures of dance. Requires instructor consent.

**DANCE489T - Capstone: Senior Project**

**Subject**: DANCE  
**Catalog Number**: 489T  
**Title**: Capstone: Senior Project  

**Description**  
A research paper, choreographic project, or performance program with appropriate written documentation under dance faculty supervision. Open only to seniors earning a major in dance and with permission to seniors earning a minor in Dance. Consent of instructor required.

**DANCE490S - Special Topics in Dance**

**Subject**: DANCE  
**Catalog Number**: 490S  
**Title**: Special Topics in Dance  

**Description**  
Special Topics in Dance.

**DANCE499S - Capstone Seminar: Distinction Project**

**Subject**: DANCE  
**Catalog Number**: 499S  
**Title**: Capstone Seminar: Distinction Project  

**Description**  
A substantial historical, analytical, empirical or theoretical paper of 30-50 pages in length, or a major choreographic or performance project with a written component of 15-25 pages in length that analyzes and elucidates the project’s conceptual, thematic and technical aspects.

**DANCE89S - First-Year Seminar**

**Subject**: DANCE  
**Catalog Number**: 89S  
**Title**: First-Year Seminar  

**Description**  
Topics vary each semester offered.

**DECSCI101 - Fundamentals of Decision Science**

**Subject**: DECSCI  
**Catalog Number**: 101  
**Title**: Fundamentals of Decision Science  

**Description**  
This course is a question-driven introduction to the certificate and the fundamentals of how humans make decisions. The primary goal is to provide hands-on and problem-focused instruction designed to connect students to research as quickly as possible. Substantive topics include behavioral and experimental economics, consumer behavior and marketing research, game theory, medical decision making, neuroeconomics, and political psychology.
**DECSCI201 - Discovering Game Theory: Social Complexity and Strategic Interdependence**

**Subject**  
DECSCI

**Catalog Number**  
201

**Title**  
Discovering Game Theory: Social Complexity and Strategic Interdependence

**Description**  
Strategy is all around you: In sports, the economy, law, politics, and your own social interactions. In this course, you will explore one of the foundational tools that social scientists use to analyze the complexity of strategic interactions: Game Theory. To do so, the course employs a highly interactive learning environment, in which you and your peers engage in strategic interactions that illustrate fundamental social dilemmas. In taking this course, you will gain a new analytical perspective into the complexity of social phenomena, and develop a solid foundation for additional course work in social science.

**DECSCI213S - Paradoxes of Rational Choice**

**Subject**  
DECSCI

**Catalog Number**  
213S

**Title**  
Paradoxes of Rational Choice

**Description**  
In this course, we will delve into the philosophical foundations of rational choice theory and confront a broad range of decision theoretic puzzles and paradoxes. Along the way, we’ll evaluate several of the most prominent philosophical theories of rational decision making and their relationships to topics in epistemology, causal inference and statistics.

**DECSCI235 - Risk**

**Subject**  
DECSCI

**Catalog Number**  
235

**Title**  
Risk

**Description**  
Simply put, risk is 'the possibility of something bad happening.' Defined in this way, increased attentiveness to risk has the potential to be paralyzing because it is present in nearly every aspect of human existence. This course, organized by the Duke Center on Risk, capitalizes on this ubiquity by bringing together ideas and approaches from all corners of the university. A unifying perspective is the recognition that risk involves elements of both chance (‘possibility’) and value (‘something bad’). Therefore, students will learn the languages of probability and economics within the cultural settings of public policy, law, engineering, business, and medicine.

**DECSCI401S - Research in Decision Science**

**Subject**  
DECSCI

**Catalog Number**  
401S

**Title**  
Research in Decision Science

**Description**  
This seminar allows students to engage in original research in the area of individual decision-making. As part of the Decision Science program, the emphasis is on interdisciplinary research combining insights from disciplines that include behavioral economics, game theory, machine learning, neuroscience, political psychology, and statistics. Work completed in this seminar can lead to either a stand-alone research project or honors in the student's home major. Prerequisite: Decision Sciences 101.

DOCST110S - Introduction to Oral History

Subject: DOCST  
Catalog Number: 110S  
Title: Introduction to Oral History  
Description: Introductory oral history fieldwork seminar. Oral history theory and methodology, including debates within the discipline. Components and problems of oral history interviewing as well as different kinds of oral history writing.

DOCST115S - Introduction to Black and White Photography

Subject: DOCST  
Catalog Number: 115S  
Title: Introduction to Black and White Photography  
Description: Foundation class in photography utilizing black and white film and a wet darkroom. Shoot, process, and print individual student work throughout the semester. Emphasis on the documentary approach and a continual visual exploration of meaning and metaphor in the form of regular assignments, slide lectures of important historic and contemporary photographic work, and critiques of each other's work. No textbooks are required, though students will need to budget a comparable amount for supplies and equipment.

DOCST119S - Introduction to Digital Photography

Subject: DOCST  
Catalog Number: 119S  
Title: Introduction to Digital Photography  
Description: An emphasis on digital photography, using the camera as a distinctive way of seeing and knowing. Class assignments accompanied by historical and theoretical readings, lectures, class discussions, and field trips. Final projects include thematic photographic series and an individual documentary essay.

DOCST135S - Introduction to Audio Documentary

Subject: DOCST  
Catalog Number: 135S  
Title: Introduction to Audio Documentary  
Description: Recording techniques and audio mixing on digital editing software for the production of audio (radio) documentaries. Various approaches to audio documentary work, from the journalistic to the personal; use of fieldwork to explore cultural differences. Stories told through audio, using National Public Radio-style form, focusing on a particular social concern such as war and peace, death and dying, civil rights.

DOCST171SA - Capturing the City: Documentary Photography in Berlin

Subject: DOCST  
Catalog Number: 171SA  
Title: Capturing the City: Documentary Photography in Berlin  
Description: History and development of documentary photography in Germany since the 19th century. Photography fieldwork projects focused on interpreting cultural life, public spaces, landscapes, and people in Berlin. Includes techniques and practice of color photography—composition, lighting, color correction, editing, and sequencing. Engagement with contemporary photography scene in Berlin through visits with area artists, museum visits, and mounting of exhibition of student work. Offered through the Duke in Berlin program.

DOCST179FS - Documenting Youth Movements for Environment and Racial Justice Since 2010

Subject: DOCST  
Catalog Number: 179FS  
Title: Documenting Youth Movements for Environment and Racial Justice Since 2010  
Description: Immersion in the dangerous and contentious recent history of youth activism in environmental and racial justice movements worldwide. Using oral history, archival research methods, and cultural production, students explore methods for researching documenting and creating narratives of youth social activism. Historical and contemporary youth campaigns explored in this course include those to protect land, soil, air and people from pollutants in Black, Indigenous, and Global South communities. All of these movements have expanded the legal, narrative, and practical understanding of environmental and human rights in US and global frameworks.

</table>
DOCST206S - Medicine and the Vision of Documentary Photography

Subject: DOCST
Catalog Number: 206S
Title: Medicine and the Vision of Documentary Photography

Description:
The intersection of healthcare and documentary photography. Explore work of established photographers engaged with healthcare topics. Produce semester-long documentary photography project and 5-10 page documentary essay on healthcare related topic. Students must have or quickly develop proficiency in the use of a digital SLR camera and Adobe Lightroom. Course materials include photographs, articles, and books. Class sessions combine critique of student work, discussion of course materials, and discussion of ethical questions involved in documentary representation of healthcare-related topics.

DOCST208S - The Silent Film: An Introduction

Subject: DOCST
Catalog Number: 208S
Title: The Silent Film: An Introduction

Description:
The first thirty-five years of cinema as an emerging art form and mode of communication. Aesthetic, technical, and cultural aspects of the medium will be considered in historical context, from nineteenth-century experiments to nascent narrative conventions and the first disruptive avant-garde movements. Focus is on close reading of relevant films.

DOCST209FS - Digital Documentary Photography: Education, Childhood, and Growth

Subject: DOCST
Catalog Number: 209FS
Title: Digital Documentary Photography: Education, Childhood, and Growth

Description:
Documentary photography as a tool for exploring public education in Durham. Learn digital techniques including camera function, Photoshop, ink-jet printing, audio capture and production of audio-visual slide shows. Discuss ethical issues that emerge as a result of digital photographic impermanence. Service-learning environment consisting of fieldwork photography in collaboration with community organization, culminating in an exhibit. This is a Focus Program Course for Knowledge in the Service of Society. Department consent is required.

DOCST209S - Digital Documentary Photography: Education, Childhood, and Growth

Subject: DOCST
Catalog Number: 209S
Title: Digital Documentary Photography: Education, Childhood, and Growth

Description:
Documentary photography as a tool for exploring public education in Durham. Learn digital techniques including camera function, Photoshop, ink-jet printing, audio capture and production of audio-visual slide shows. Discuss ethical issues that emerge as a result of digital photographic impermanence. Service-learning environment consisting of fieldwork photography in collaboration with community organization, culminating in an exhibit. Consent of instructor required.
**DOCST215S - Documentary Photography and the Southern Culture Landscape**

Subject  | Catalog Number | Title                                    |
---------|----------------|------------------------------------------|
DOCST    | 215S           | Documentary Photography and the Southern Culture Landscape |

**Description**

Emphasis on the tradition and practice of documentary photography as a way of seeing and interpreting cultural life. The techniques of color and black-and-white photography - exposure, development, and printing - diverse ways of representing the cultural landscape of the region through photographic imagery. The role issues such as objectivity, clarity, politics, memory, autobiography, and local culture play in the making and dissemination of photographs.

**DOCST222S - The Photographic Portfolio**

Subject  | Catalog Number | Title                                    |
---------|----------------|------------------------------------------|
DOCST    | 222S           | The Photographic Portfolio               |

**Description**

Students actively seek specific photographic territory to explore and build a body of work. The resulting images are extensively work-shopped for sequencing. Particular emphasis on the making of high quality prints. Semester culminates in the production of finished portfolios in three formats: a printed form, a digital form, and an exhibition or installation form. Each student's evolving body of work to be informed by relevant precedents from the history of photography. These are brought into discussions of the work as the semester progresses, with an emphasis on examining bodies of photographic work that communicate something larger than a single idea. Instructor consent required.

**DOCST223S - Global Stories, Local Issues**

Subject  | Catalog Number | Title                                    |
---------|----------------|------------------------------------------|
DOCST    | 223S           | Global Stories, Local Issues             |

**Description**

What stories are there to tell about often overlooked objects and people and places? How can we research and share those stories with generosity and integrity? In every corner of our lives—the stickers on our computers, the plates at a local restaurant, the wood in our guitars—there is a story to be told that connects our individual experiences to broader, often global, phenomena. Participants will learn and use methods of ethnography and archival research to connect their experiences and their observations about a place, community, or thing to larger stories about culture and society, and they will practice writing about their research in engaging and broadly accessible ways.

**DOCST224S - Children's Self Expression: Literacy Through Photography**

Subject  | Catalog Number | Title                                    |
---------|----------------|------------------------------------------|
DOCST    | 224S           | Children's Self Expression: Literacy Through Photography |

**Description**

Children's self-expression and education through writing, photography and documentary work. Focus on reading and critical interpretation of images. The history, philosophy, and methodology of Literacy Through Photography. Includes internship in an elementary or middle school classroom. Required participation in service-learning.
### DOCST227S - Sociology through Photography

**Subject**
DOCST  

**Catalog Number**
227S  

**Title**
Sociology through Photography  

**Description**
Documentary photography used as a tool to see the world through a sociological lens. Photographs and the social construction of reality; generic components of social organization (codes of conduct, mechanisms of social control); power relations and social inequalities; and social identities (how they’re formed in relation to structures, experiences, history and culture).

### DOCST236S - Color Photography: Fieldwork and Digital Color

**Subject**
DOCST  

**Catalog Number**
236S  

**Title**
Color Photography: Fieldwork and Digital Color  

**Description**
Field-based course examining color photography as a documentary tool. Students learn about aesthetic and technical foundations of color photography using recent digital technology. Class-conducted intensive examination of the work of historic and contemporary color documentary photographers. Advanced techniques in film scanning, Photoshop, and color pigment printing. Completion of semester-long color photographic project, and final project consisting of production of a series of color pigment prints.

### DOCST230S - Small Town USA: Local Collaborations

**Subject**
DOCST  

**Catalog Number**
230S  

**Title**
Small Town USA: Local Collaborations  

**Description**
Theory and practice of documentary photography in a small-town context. Students working in collaboration with one nearby small town complete a documentary photographic study of one individual or group within that town. Includes analysis of the documentary tradition, particularly as it relates to locally situated work and to selected individual projects; building visual narrative, developing honest relationships with subjects, responsibility to subjects and their communities, and engaging with and portraying a community as an outsider. Photo elicitation and editing techniques. Consent of instructor required. Required participation in service-learning.

### DOCST242S - Dance for the Camera

**Subject**
DOCST  

**Catalog Number**
242S  

**Title**
Dance for the Camera  

**Description**
The choreographic and bodily experience essential to dance for the camera. Hands on experience in videodance production through the exploration/production of several short individual and group videodance projects. Issues in creative and conceptual thinking, experimentation, pre/post video production, camera techniques, non-linear editing (Final Cut Pro), choreography for the camera. Viewings of seminal as well as experimental videodance works; discussions; readings; internet site visits; computer lab and dance studio/shooting location time; gallery/museum or video installation site visits.  
Prerequisite: Intermediate or above level of any dance technique, or Dance 105S.

---

*509 / 1526*
DOCST246S - Feeding Diaspora: Global Food Stories and Audio Journalism

Subject: DOCST  
Catalog Number: 246S  
Title: Feeding Diaspora: Global Food Stories and Audio Journalism

Description:
Audio production-based course. Learn histories of global diaspora and their relationship to food and culture. Understand social, political and economic factors that shape global food production. Develop journalistic and storytelling skills including interview techniques, interpersonal and cross-cultural engagement with subjects, journalistic research, and narrative construction. Critical engagement with ethical considerations of representation central to journalism in a cross-cultural, diasporic context. Build audio-production skills including recording techniques and editing software. Produce broadcast-quality, full-length audio journalism piece on a global food story of student's choosing.

DOCST250S - The Photobook: History and Practice

Subject: DOCST  
Catalog Number: 250S  
Title: The Photobook: History and Practice

Description:
Cultural, intellectual and artistic history and uses of the book in photographic practice. Traces technical, conceptual, formal innovations that mark international history of photography books through lectures/hands-on examination of key books, including lesser known innovations and uses of photobook in Eastern Europe, the Soviet Union and Japan. Marries historical awareness with studio practice. Simultaneous immersion in production of images as well as collecting of archives from various cultures. Crafting of photobooks in several genres as students edit, print, scan, assemble materials. Seminar includes readings, discussions, short writings, field trips. Consent of instructor required.

DOCST264 - Introduction to Film Studies

Subject: DOCST  
Catalog Number: 264  
Title: Introduction to Film Studies

Description:
Basic film theory and history of motion picture technology. Introduction to experimental, documentary, and narrative forms of Third World, European, and United States cinemas.

DOCST268 - Religion and Film

Subject: DOCST  
Catalog Number: 268  
Title: Religion and Film

Description:
A study of the relationship between motion pictures and religion. Focus on the comparative portrayal of organized religions; expressions of religious life; and religious topics, such as God, evil and morality, in both Western and non-Western films in which contemporary artists and intellectuals explore the challenges of modernity.

DOCST270 - Contemporary Documentary Film: Filmmakers and the Full Frame Documentary Film Festival

Subject: DOCST  
Catalog Number: 270  
Title: Contemporary Documentary Film: Filmmakers and the Full Frame Documentary Film Festival

Description:
Integrated with the films and filmmakers of the Full Frame Documentary Film Festival. The art form, style, and technology of contemporary documentary films. Issues of autonomy and power, politics, and public policies. Analysis of outstanding films from around the world. Presentations and discussions by filmmakers.

DOCST272S - Documentary and Policy: How Documentary Influences Policy

Subject: DOCST  
Catalog Number: 272S  
Title: Documentary and Policy: How Documentary Influences Policy

Description:
Examines documentaries as catalysts for change in local, state, and federal laws and regulations, with special attention to relationships between film and organizations with political influence. Looks at how documentaries have altered public sentiment and political outcomes. Uses case studies of documentary films (essay-style, journalistic, information-driven films; narrative, story-driven films; propaganda; art films; and hybrids of all of the above). Explores the question of how a film achieves influence: for example, with a high-profile theatrical and/or television release, by utilization as an educational tool, or by 'going viral' to become part of a public conversation.

Studies in the United States Culture Industries

**Description**
A survey of the major professions in the arts, media, and entertainment industries, featuring prominent speakers from fields such as studio and independent film and television, screenwriting, directing, producing, financing, acting, artist representation, journalism, marketing, animation, and music. Students apply theory and analysis to projects currently in production, observing live tapings, rehearsals, and screenings. Real-world case studies to examine how and why stories chosen for production shape and are shaped by societal values and discourse, domestic and global economies, and the greater world of the arts and media. Only offered on Duke in LA program.

Special Topics in Documentary Studies: Study Abroad

**Description**
Documentary Studies course taught in Duke-administered study abroad programs. Topics vary by semester.
DOCST290S - Special Topics in Documentary Studies

Subject: DOCST  
Catalog Number: 290S  
Title: Special Topics in Documentary Studies

Description:
Topics vary each semester.

DOCST291 - Independent Study

Subject: DOCST  
Catalog Number: 291  
Title: Independent Study

Description:
Supervision and guidance of individual, documentary production-based topics. Consent of director of undergraduate studies required.

DOCST292 - Independent Study

Subject: DOCST  
Catalog Number: 292  
Title: Independent Study

Description:
Supervision and guidance of individual, documentary production-based topics. Consent of director of undergraduate studies required.

DOCST293 - Research Independent Study

Subject: DOCST  
Catalog Number: 293  
Title: Research Independent Study

Description:
Supervision and guidance of research-based, individual topics. Consent of director of undergraduate studies required.

DOCST294 - Research Independent Study

Subject: DOCST  
Catalog Number: 294  
Title: Research Independent Study

Description:
Supervision and guidance of research-based, individual topics. Consent of director of undergraduate studies required.

DOCST295S - Arts Entrepreneurship

Subject: DOCST  
Catalog Number: 295S  
Title: Arts Entrepreneurship

Description:
Student teams work on specific arts-based entrepreneurial projects. Teams comprised of students from different backgrounds (arts, engineering, economics, computer science). Goals include creating business plan and launching ventures in areas of the arts. Structure an adaptation of Fuqua Program for Entrepreneurs. Ideal projects have real/positive impact on society. Students learn to situate artistic creativity within projects that meet societal need. Students from any background welcome to apply for enrollment. Must have interest in arts or working with artists in entrepreneurial context. Admission by permission of instructors.
DOCST303 - History of Photography, 1839 to the Present

Subject: DOCST
Catalog Number: 303
Title: History of Photography, 1839 to the Present

Description:
Major artists and movements in the history of the photographic medium, including visual and critical traditions inherited and manipulated by photographers, the ways photography participated in nineteenth- and twentieth-century art movements as well as documentation and social change, and critical photographic discourse throughout this period. Topics include the invention of photography, 'Art' photography and documentary photography in the nineteenth century, pictorialism, 'straight' and purist photography, photography and modernist art movements (dada, surrealism, Bauhaus, Russian avant-garde), twentieth-century documentary, and photography of the 1950s, 1960s, 1970s, 1980s, and 1990s.

DOCST313S - Non-Profit Cultural Institutions

Subject: DOCST
Catalog Number: 313S
Title: Non-Profit Cultural Institutions

Description:
Non-profit cultural institutions are an integral part of arts communities at all levels: national, regional, local. Through readings, projects and service-learning, students gain overview of non-profit cultural organization formation, management, operational structures, governance challenges, board member responsibilities and situational ethics. Explores historical and present functions and social structures in which nonprofit tax-exempt organizations operate. Investigates how nonprofit cultural institutions have increasingly become a vehicle for fostering creativity in the arts and humanities. Students partner with local non-profit arts/cultural organizations to work on specific projects.

DOCST315DS - Environmental Issues & the Documentary Arts

Subject: DOCST
Catalog Number: 315DS
Title: Environmental Issues & the Documentary Arts

Description:
Survey how filmmakers, authors, photographers, and other artists have brought environmental issues to the public's attention in the last century, and in some cases instigated profound societal and political change. Examine the nebulous distinctions between persuasion and propaganda, agenda and allegory, point of view and content. Evolve as a viewer of the environment and a maker of documentary art. Initiate your own projects to address and/or depict environmental issues in one form of a broad range of media.

DOCST315S - Environmental Issues & the Documentary Arts

Subject: DOCST
Catalog Number: 315S
Title: Environmental Issues & the Documentary Arts

Description:
Survey how filmmakers, authors, photographers, and other artists have brought environmental issues to the public's attention in the last century, and in some cases instigated profound societal and political change. ### DOCST317S - Veterans Oral History Project

**Subject**  
DOCST

**Catalog Number**  
317S

**Title**  
Veterans Oral History Project

**Description**  
Explore methods of oral history, specifically focusing on interviewing U.S. military veterans who have served during times of conflict. Weekly readings concerning ethics of oral history work and the particulars of interviewing veterans. Learn techniques for conducting successful oral history interviews and master technical skills involving recording equipment. Conduct multiple interviews with veterans throughout the semester. Discuss interviews and transcriptions with classmates. Assignments include written responses and a final presentation on conducted interviews. Includes a service-learning component involving work in the community.

### DOCST318S - Photo Workshop

**Subject**  
DOCST

**Catalog Number**  
318S

**Title**  
Photo Workshop

**Description**  
Examines historical and contemporary photographic artists for whom a particular photographic technique is essential to the creation of their work. Investigates strategies of intentional lighting. Explores techniques most suited to the documentation of individual student's chosen subject matter and create a cohesive body of work by semester's end employing that strategy. May use digital or analog equipment. No textbooks are required, though students will need to budget a comparable amount for supplies. Instructor consent required. Prerequisite (any one of): DOCST 115S, 119S; ARTSVIS 115S, 119S; VMS 115S; or equivalent experience.

### DOCST322S - American Independent Cinema

**Subject**  
DOCST

**Catalog Number**  
322S

**Title**  
American Independent Cinema

**Description**  
Examination of the emergence, establishment, and transformations of American indie film. Addresses main genres, key films and prominent directors by looking at the aesthetic characteristics of indie films, as well as the social and institutional contexts (primarily its relationship to Hollywood cinema) that led to the creation and important impact of this filmmaking practice. Topics include Midnight Movies of the 70s, New American Cinema, Trash Cinema, Art Cinema, Black Indie Cinema, New Queer Cinema, Generation X, Smart Cinema, Neo Noir, and the Pulp Fiction success story.

### DOCST323S - Motion Graphics for Film and Video

**Subject**  
DOCST

**Catalog Number**  
323S

**Title**  
Motion Graphics for Film and Video

**Description**  
An exploration of techniques and theoretical approaches to motion graphics, animation and post-production effects in film and video. Readings and screenings will lead to student-produced exercises through exposure to applications in the Adobe Creative Cloud and digital editing software.
**DOCST326 - The South in Black and White**

**Subject**  
DOCST

**Catalog Number**  
326

**Title**  
The South in Black and White

**Description**
Focus on present-day and historical documentary traditions in American South, with an emphasis on call and response between black and white cultures. The arts and humanities as embedded in particular histories and cultures found in the South, and as performed in music and theater; and portrayed in documentary films, civil rights photography, Southern literature, and historical and autobiographical writing. Includes historical texts, oral histories and testimonies of living persons, along with documentary films, photographs, and writings from people in Durham and elsewhere in the region.

**DOCST326S - The South in Black and White**

**Subject**  
DOCST

**Catalog Number**  
326S

**Title**  
The South in Black and White

**Description**
Seminar with focus on present-day and historical documentary traditions in American South, with an emphasis on call and response between black and white cultures. The arts and humanities as embedded in particular histories and cultures found in the South, and as performed in music and theater; and portrayed in documentary films, civil rights photography, Southern literature, and historical and autobiographical writing. Includes historical texts, oral histories and testimonies of living persons, along with documentary films, photographs, and writings from people in Durham and elsewhere in the region.

**DOCST327S - Migrations**

**Subject**  
DOCST

**Catalog Number**  
327S

**Title**  
Migrations

**Description**
Climate refugees, exiles of war, economic migrants, expatriates seeking new opportunities, along with others compelled to flee their current circumstances and look for a new life, are moving across borders. Combine these movers with the billions of religious pilgrims, adventure travelers, and tourists, and we find a movement of humanity en masse in greater numbers than ever in the history of humanity. Combining literature on pilgrimage with travel memoirs and essays on travel, films on the act of walking, and multimedia explorations of refugee journeys, immigrant life, and border crossings, this course seeks to make sense of our unprecedented era of migration.

**DOCST329S - Historical Documentary Production**

**Subject**  
DOCST

**Catalog Number**  
329S

**Title**  
Historical Documentary Production

**Description**
Course examines how archival footage and photographs are used in historical documentaries about struggles for social equity in America. Iconic films will be reviewed to assess editors’ strategies for employing archival material in documentaries on the labor movement, civil rights movement, anti-Vietnam war movement, and early lesbian and gay rights movement. Students will then conduct research for film footage and photographs and learn practical steps needed to acquire rights to use the material. During the second half of the semester, students will be guided in the production and editing of their own short historical documentary.
**DOCST331S - Documenting US Women’s Health Post-Roe v. Wade**

**Description**
The overturning of Roe v. Wade in June 2022 led to the deaths of two women in South Carolina. One woman died from sepsis following self-instrumentation, and the second died after giving birth to a healthy baby. She began to hemorrhage; hospital administrators were afraid that the ‘D&C’ she needed to survive was too close to the abortion procedure. A physician team at Duke University Hospitals, led by Dr. Beverly Clark, began to see similar cases in North Carolina. The aim of this course is to document—in real time—the political and ethical dimensions of the situation that healthcare providers now find themselves in as they attempt to provide women the nationwide medical ‘standard of care.’

---

**DOCST332S - Farmworkers in North Carolina: Roots of Poverty, Roots of Change**

**Description**
Focus on those who bring food to our tables, particularly those who labor in the fields of North Carolina and the Southeast. Students will learn about farm work from the plantation system and slavery to sharecropping and up to the migrant and seasonal farmworker population today. Study and analysis of media representations of farmworkers and agricultural issues as well as historical and contemporary documentary work and its contributions to farmworker advocacy. Includes a service-learning component involving work in the community.

---

**DOCST338S - Media and Indigenous Experiences**

**Description**
This course examines the relationship between media and Indigenous Peoples in American history. Course content focuses on the following: First, critical analysis of representations of Indigenous Peoples, politics, issues, and cultures in historical and contemporary mainstream media, including television, Hollywood films, popular music, and news media. Second, the ways media has been used by Indigenous media producers as a social and political platform to engage the non-Indigenous American public on Indigenous issues. Environmental issues and land rights issues play a large role in content of media examined in this course.

---

**DOCST344S - Our Culinary Cultures**

**Description**
Documentary approach to the world of food using fieldwork research. Topics of food and its preparation examined through deep stories of how food is raised, prepared, and presented in order to explore how the myriad ways in which what we eat reveal key biographical, economic, religious, and other truths about our cultures. Introduces students to the history of food writing and the concept of food in general as a nonverbal tool of communication. Photography, audio, and documentary writing employed.
### DOCST350S - Documenting Black Experiences

**Subject**  
DOCST

**Catalog Number**  
350S

**Title**  
Documenting Black Experiences

**Description**  
Explores how Black experiences have been documented and how crucial stories woven from real life get told. Students engage wide ranging contemporary and historical materials, including nonfiction, memoir, fiction, documentary and dramatic film, theater, poetry and music. Our aspirations are historical, but with an understanding that academic history, though irreplaceable, barely touches the range of storytelling that makes Black lives not only matter but transform the spaces in which they unfold. Our explorations are political, but in the largest sense—how Black power comes from making higher truth a tool, a weapon and a way of being.

### DOCST353S - Sound for Film and Video

**Subject**  
DOCST

**Catalog Number**  
353S

**Title**  
Sound for Film and Video

**Description**  
Theory and practice of sound recording techniques and strategies for film and video. Focus on sound/image relationship, sound design and sound acquisition. Screenings and readings will reinforce practice exercises.

### DOCST354S - Web Design and Narrative: Artists, Documentarians, Art Historians, and Entrepreneurs

**Subject**  
DOCST

**Catalog Number**  
354S

**Title**  
Web Design and Narrative: Artists, Documentarians, Art Historians, and Entrepreneurs

**Description**  
Professional practices course for students in creative fields without a computer science background: for artists and documentarians to create robust web-based portfolios; for art historians to showcase curatorial and scholarly projects; for entrepreneurs to demonstrate ideas, concepts, and products to the public. Develop customized, individual websites using CMS platforms. Hone and workshop artistic/curatorial/product statements. Develop teaching philosophies, exhibition imagery, and video documentation of artistic, curatorial, or product talks. Publish a blog magazine on arts and innovation topics. Guest speakers visit the course on a regular basis to review the students’ work.

### DOCST356S - Long-form Journalism

**Subject**  
DOCST

**Catalog Number**  
356S

**Title**  
Long-form Journalism

**Description**  
Storytelling techniques of magazine journalism; reporting and writing strategies; historical and contemporary writing for magazines in print and digital formats. Students develop experience in different kinds of magazine writing. Approved as a practicum course required for the Policy, Journalism and Media Studies certificate.
**DOCST357S - 16mm Film Production**

**Subject**
DOCST

**Catalog Number**
357S

**Title**
16mm Film Production

**Description**
Hands-on experience with 16mm motion picture film and photography. In-depth exploration of the techniques and aesthetics of film production, including basic screen writing, lighting, storytelling, and editing.

**DOCST358S - Understanding Mediation**

**Subject**
DOCST

**Catalog Number**
358S

**Title**
Understanding Mediation

**Description**
Examines experience as always mediated. How does text mediate expression, or language mediate subjectivity? How do images mediate power, or sounds mediate resistance? How does computation mediate agency, or networks mediate thought? But also, how do nations mediate globalization, or oil mediate energy? And how do bodies mediate liveness, or the environment mediate history? Moves from particular media forms and examples (language, literature, the fine and performing arts, audiovisual media, computational media) to focus on key theoretical concepts and debates of critical theory from twentieth and twenty-first centuries. Crosses national boundaries to understand mediation from global perspective.

**DOCST359A - Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)**

**Subject**
DOCST

**Catalog Number**
359A

**Title**
Introduction to Global Los Angeles: An Interdisciplinary Survey (Service-Learning)

**Description**
This course explores the complexities of global Los Angeles by focusing on issues that especially impact its marginalized communities. For the service-learning component, students volunteer at least 20 hours during the semester at nonprofit organizations engaged in the pursuit of social justice. This experience provides an opportunity to observe, participate in and reflect on the day-to-day implementation of social action, policy and organizing initiatives. As part of the volunteer commitment and in lieu of a final paper, students produce a documentary media project that communicates goals identified by and in collaboration with the community partner.

**DOCST363S - The Autobiographical Impulse in Photography**

**Subject**
DOCST

**Catalog Number**
363S

**Title**
The Autobiographical Impulse in Photography

**Description**
Study the autobiographical impulse in photography. Study and discuss methods of sequencing images and how these choices affect the photographic narrative. Interrogate subjective and ethical implications of the editorial process. Create autobiographical photographs and narratives. Study and discuss autobiographical narrative in the work of photography’s most renowned practitioners – From Alfred Stieglitz and Vivian Maier to Lee Friedlander and Carrie Mae Weems.
### DOCST364S - Art of the Interview

**Subject**
DOCST

**Catalog Number**
364S

**Title**
Art of the Interview

**Description**
An exploration of the role of the interview as a core feature of modern American journalism, with focus on its development as a tool of inquiry, a cultural form and news-making event. Students will study examples of media coverage and produce projects involving interviews.

### DOCST365S - The Documentary Turn: Southern Culture

**Subject**
DOCST

**Catalog Number**
365S

**Title**
The Documentary Turn: Southern Culture

**Description**
Traces the convergence of traditional 20th c. documentary narrative (oral history, photography, film, and ethnography) with emergent 21st c. technologies (digital platforms, crowd-sourced communications, viral information) that expand and test definitions of documentary practice. Course looks for unexpected outcomes and future possibilities at the intersections of analog and digital practice. Focus is on the cultures of the American South with an understanding of that region as mapped within a global imaginary. Requirements include experimental documentary project that combines storytelling (visual/literary), performance (theater/dance/music) or investigative research (oral/archival).

### DOCST367S - Video Journalism

**Subject**
DOCST

**Catalog Number**
367S

**Title**
Video Journalism

**Description**
Theories and concepts of television broadcasting; writing and editing for electronic media; issues of production. Students will produce a Web portfolio. Approved as a practicum course for the Policy, Journalism and Media Studies certificate.

### DOCST368S - The View Camera: Black and White Large Format Photography

**Subject**
DOCST

**Catalog Number**
368S

**Title**
The View Camera: Black and White Large Format Photography

**Description**
Advanced, production-based photography course introduces students to the 4 x 5 large format view camera and its role in the documentary tradition. Learn to operate a view camera and attendant processes and materials to develop black and white sheet film and make silver gelatin contact prints from 4 x 5 negatives. Begins with focus on black and white negatives and contact prints. After demonstration of proficiency, students may optionally work in color film. Students produce a final portfolio of prints from their work throughout the semester. Class meetings consist of lectures, demonstrations, darkroom work, and critique of both process and final images.
### DOCST369 - Podcasting in A Changing Media Landscape: The Art, Craft and Ethics of An Emerging Medium

**Subject**  
DOCST

**Catalog Number**  
369

**Title**  
Podcasting in A Changing Media Landscape: The Art, Craft and Ethics of An Emerging Medium

**Description**  
Podcasting has exploded in recent years, with hundreds of thousands of shows in production and more than a fifth of Americans listening to podcasts at least weekly. This course will provide a hands-on introduction to the craft of podcasting, combined with critical reflection on various podcast forms. Students will consider the role of podcasts in the changing media equation, including the role of podcasts in local news. They will gain practice with the basics of podcast creation and will apply these lessons by creating podcast episodes focusing on the people, places, and issues of Durham, NC.

### DOCST370S - The Environment in Literature, Law, and Science

**Subject**  
DOCST

**Catalog Number**  
370S

**Title**  
The Environment in Literature, Law, and Science

**Description**  
This class explores changing concepts of 'environment' and 'nature' in lit, law & policy, & science. Using the Duke Campus Farm, the campus, & surrounding areas, we trace those changes across historical periods and cultures, culminating in a consideration of the dismantling of Black Durham (red lining, 147) & the emergence of the Environmental Justice Movement (in Warren County, NC). We explore how those concepts are constructed through science, law & policy, & cultural forms, how those concepts shape our lived experience, & how an understanding of that process might lead to more productive debates in science, law & policy, & ethics, and to constructive social and environmental change.

### DOCST371 - News as a Moral Battleground

**Subject**  
DOCST

**Catalog Number**  
371

**Title**  
News as a Moral Battleground

**Description**  
Ethical inquiry into journalism and its effect on public discourse. Issues include accuracy, transparency, conflicts of interest and fairness. Topics include coverage of national security, government secrecy, plagiarism/fabrication, and trade-offs of anonymous sourcing.

### DOCST375S - Recycled Cinema

**Subject**  
DOCST

**Catalog Number**  
375S

**Title**  
Recycled Cinema

**Description**  
Found footage filmmaking, cinematic appropriation, the use of archival materials in documentaries, and current day internet mashups. Covering early cinema, experimental and documentary cinema, television, and the internet. Key emphasis on practice based assignments with a concurrent focus on the historical impact of the field from seminal moments to the contemporary moment through films and readings on the subject. Prerequisite: 100-level or above Visual Arts course, or permission of instructor.

### DOCST390 - Special Topics in Documentary Studies

**Subject**  
DOCST

**Catalog Number**  
390

**Title**  
Special Topics in Documentary Studies

**Description**  
Topics vary each semester.

### DOCST390S - Special Topics in Documentary Studies

**Subject**  
DOCST

**Catalog Number**  
390S

**Title**  
Special Topics in Documentary Studies

**Description**  
Topics vary each semester.

DOCST80S - Studies in Special Topics

Subject: DOCST
Catalog Number: 80S
Title: Studies in Special Topics

Description: Opportunities for first-year students to engage with a specific issue in documentary studies, with emphasis on student writing. Topics vary each semester offered.

EAS190S - Special Topics

Subject: EAS
Catalog Number: 190S
Title: Special Topics

Description: Opportunities to engage with a specific topic in East Asian Studies.

ECE110L - Fundamentals of Electrical and Computer Engineering

Subject: ECE
Catalog Number: 110L
Title: Fundamentals of Electrical and Computer Engineering

Description: Students learn core ECE concepts, providing a foundation on which subsequent courses build. Concepts include techniques for analyzing linear circuits, semiconductor and photonic devices, frequency representation, filtering, combinational and sequential logic. Central to the course is an extensive design challenge that requires students to integrate knowledge across topics while honing practical design and project management skills. Course culminates in an exciting competition in which teams of robots race to overcome challenging obstacles using sensor data acquisition and processing. Prerequisite/corequisite: (Engineering 103L or Computer Science 201) and (Mathematics 112L or 22 or equivalent).

ECE110L9 - Fundamentals of Electrical and Computer Engineering - Lab

<td>Introduction to Microelectronic Devices and Circuits</td>
</tr>
</tbody>
</table>

**Description**

Introduction to semiconductor materials and their corresponding electronic devices and circuits. In lab, students will perform photolithography and characterize devices and circuits. Lecture will cover: underlying physics of semiconductor materials; operation of semiconductor devices, including diodes and transistors (MOSFETs); and application of MOSFETs into digital circuits. Students will understand basic operation of semiconductor devices in a way that is foundational for the expansive semiconductor industry. Prerequisite: (Engineering 103L or Computer Science 201) and (Physics 152L or 26) and (Electrical and Computer Engineering 110L or Biomedical Engineering 253L).

<tbody>
<tr>
<td>ECE</td>
<td>270DL</td>
<td>Fields and Waves: Fundamentals of Information Propagation</td>
</tr>
</tbody>
</table>

**Description**

Introduces the concept of fields - a mathematical description of physical quantities that vary from place to place (and potentially from time to time) - and explores the mathematical & physical reasons that oscillatory behavior is so ubiquitous across engineering and physics. Introduces mathematical foundations, followed by specific examples in electrical circuits, electromagnetic waves, quantum mechanics, & acoustics as well as the connection to Fourier analysis methods. Intended to facilitate subsequent study in any area involving wave phenomena, including analog & microwave circuits, electromagnetics, optics, & quantum mechanics. Prerequisite: Physics 152L, Math 212 or 219 or 222, & ECE 110L.
ECE270L9 - Fields and Waves: Fundamentals of Information Propagation (Lab)

**Subject**
ECE

**Catalog Number**
270L9

**Title**
Fields and Waves: Fundamentals of Information Propagation (Lab)

**Description**
Introduces the concept of fields—a mathematical description of physical quantities that vary from place to place (and potentially from time to time)—and explores the mathematical and physical reasons that oscillatory behavior is so ubiquitous across engineering and physics. Introduces the mathematical foundations, followed by specific examples in electrical circuits, electromagnetic waves, quantum mechanics, and acoustics as well as the connection to Fourier analysis methods. Intended to facilitate subsequent study in any area involving wave phenomena, including analog and microwave circuits, electromagnetics, optics, and quantum mechanics. Prerequisite: Physics 152L or 26, Mathematics 212 or 222, and ECE 110L.

ECE280L - Introduction to Signals and Systems

**Subject**
ECE

**Catalog Number**
280L

**Title**
Introduction to Signals and Systems

**Description**
Introduction to signals, signal properties, systems, and system properties. Time and frequency domain analysis of signals and systems. Exploration of filtering, sampling, communication systems, image processing, and other real-world applications. Laboratory projects using signal processing tools to investigate real-world scenarios. Computational analysis of one and two-dimensional signals and systems. Prerequisite: (Engineering 103L or Computer Science 201) and Electrical and Computer Engineering 110L.

ECE280L9 - Signals and Systems - Lab

**Subject**
ECE

**Catalog Number**
280L9

**Title**
Signals and Systems - Lab

**Description**
Continuous and discrete signal representation and classification; system classification and response; transfer functions. Fourier series; Fourier, Laplace, and z transforms. Applications to Integrated Sensing and Information Processing; networks, modulation, sampling, filtering, and digital signal processing. Laboratory projects using digital signal processing hardware and microcontrollers. Computational solutions of problems using Matlab and Maple. Prerequisite: (Engineering 103L or Computer Science 201) and (Electrical and Computer Engineering 110L or Biomedical Engineering 253L).

ECE290 - Special Topics in Electrical and Computer Engineering

**Subject**
ECE

**Catalog Number**
290

**Title**
Special Topics in Electrical and Computer Engineering

**Description**
Study arranged on a special electrical and computer engineering topic in which the faculty has particular interest and competence as a result of research and professional activities. Instructor consent required.

ECE291 - Projects in Electrical and Computer Engineering

**Subject**
ECE

**Catalog Number**
291

**Title**
Projects in Electrical and Computer Engineering

**Description**
Project arranged on a special topic by an instructor with related interests and expertise. For sophomore students. Consent of instructor and director of undergraduate studies required.

ECE292 - Projects in Electrical and Computer Engineering

**Subject**
ECE

**Catalog Number**
292

**Title**
Projects in Electrical and Computer Engineering

**Description**
Project arranged on a special topic by an instructor with related interests and expertise. For sophomore students. Consent of instructor and director of undergraduate studies required.
**ECE330L - Fundamentals of Microelectronic Devices**

**Subject**: ECE  
**Catalog Number**: 330L  
**Title**: Fundamentals of Microelectronic Devices  

**Description**
Fundamentals of semiconductor device physics (semiconductor technology, dopants and carrier concentrations, carrier drift and diffusion, semiconductor equations, semiconductor device models). Principles of semiconductor device analysis (current-voltage and capacitance-voltage characteristics). Static, small-signal, and dynamic operation of semiconductor contacts, PN-junction diodes, MOS capacitors, MOS field-effect transistors (MOSFETs), and bipolar-junction transistors (BJTs). SPICE models and parameter extraction. Fabrication and electrical characterization of MOS capacitors in the Shared Materials Instrumentation Facility (SMIF). Prerequisite: ECE 230L.

**ECE331L - Fundamentals of Microelectronic Circuits**

**Subject**: ECE  
**Catalog Number**: 331L  
**Title**: Fundamentals of Microelectronic Circuits  

**Description**
Analysis and design of electronic circuits in bipolar and MOS technologies, with emphasis on both large-signal and small-signal methods. Circuits for logic gates, latches, and memories. Single-stage and multistage amplifiers and op amps. Circuits with feedback, including stability and frequency response considerations. Analog and mixed analog/digital circuit applications. Extensive use of SPICE for circuit simulation. Prerequisite: Electrical and Computer Engineering 230L.

**ECE340L - Optics and Photonics**

**Subject**: ECE  
**Catalog Number**: 340L  
**Title**: Optics and Photonics  

**Description**
Ray optics, wave optics, beam optics, resonators, atom-photons, interaction, interference, diffraction, polarization, lasers, light detection, electromagnetic optics. Laboratory experiments apply concepts in basic optics. Prerequisite: Electrical and Computer Engineering 270L or equivalent.

**ECE341L - Solar Cells**

**Subject**: ECE  
**Catalog Number**: 341L  
**Title**: Solar Cells  

**Description**
A broad overview of solar cells, including solar radiation, device theory, materials options, device fabrication and characterization, and system-level issues. Students participate in hands-on laboratory exercises related to the fabrication and characterization of organic, photovoltaic solar cells. Prerequisite: Physics 152L or equivalent.

**ECE350L - Digital Systems**

**Subject**: ECE  
**Catalog Number**: 350L  
**Title**: Digital Systems  

**Description**
Design and implementation of combinational and sequential digital systems with special attention to digital computers. The use of computer-aided design tools, hardware description languages, and programmable logic chips to facilitate larger and higher performance designs will be stressed. Laboratory exercises and group design projects will reinforce the various design techniques discussed in class. Prerequisite: Electrical and Computer Engineering 250D or Computer Science 250.

**ECE353 - Introduction to Operating Systems**

**Subject**: ECE  
**Catalog Number**: 353  
**Title**: Introduction to Operating Systems  

**Description**
Basic concepts and principles of multiprogrammed operating systems. Processes, interprocess communication, CPU scheduling, mutual exclusion, deadlocks, memory management, I/O devices, file systems, protection mechanisms. Also taught as Electrical and Computer Engineering 353. Prerequisites: Computer Science 201; and either of Computer Science 210D, Computer Science 250D or Electrical and Computer Engineering 250D.
### ECE356 - Computer Network Architecture

**Subject**: ECE  
**Catalog Number**: 356  
**Title**: Computer Network Architecture  

**Description**  
Introduces students to the fundamentals of computer networks. Focus on layered architecture of the network protocol stack. Case studies drawn from the Internet, combined with practical programming exercises. Concepts include the Internet architecture, HTTP, DNS, P2P, Sockets, TCP/IP, BGP, routing protocols, and wireless/mobile networking and their applications such as how to achieve reliable/secure communications over channels, how to find a good path through a network, how to share network resources among competing entities, how to find an object in the network, and how to build network applications. Prerequisite: ECE 250D, CompSci 210D or CompSci 250D.

### ECE364 - Performance and Technology: Composition Workshop

**Subject**: ECE  
**Catalog Number**: 364  
**Title**: Performance and Technology: Composition Workshop  

**Description**  
Workshop exploration of technologies embedded in performance: robots, media, computer interface. Students create performance projects and discuss theoretical and historical implications of technologies in performance. Open to dancers, actors, musicians, spoken word artists and all those interested in technology and the arts. No previous experience or programming skills required.

### ECE365 - Rainforest Engineering

**Subject**: ECE  
**Catalog Number**: 365  
**Title**: Rainforest Engineering  

**Description**  
An open-format project-based class for student team design with a focus on rainforests and related environments. Engages students in cross-disciplinary team challenges that teach them to work together with other students of differing backgrounds and skills. Design challenges are similar to the XPRIZE contests, or the NAE Grand Challenges. Prerequisite: Electrical and Computer Engineering 230L or 250D or 270DL or 280L or Mechanical Engineering 221L or Engineering 244L or Environment 102.

### ECE370D - Intermediate Electromagnetic Theory

**Subject**: ECE  
**Catalog Number**: 370D  
**Title**: Intermediate Electromagnetic Theory  

**Description**  
Fundamentals of electrostatic and magnetostatic fields, including fields in matter, and magnetostatic forces. Boundary value problems, Maxwell's Equations, and propagation of electromagnetic waves. Fundamentals and application of transmission lines, waveguides, and antennas. Prerequisite: Electrical and Computer Engineering 270DL.

### ECE380 - Introduction to Random Signals and Noise

**Subject**: ECE  
**Catalog Number**: 380  
**Title**: Introduction to Random Signals and Noise  

**Description**  
Introduction to probability and random processes with example applications to processing data with uncertainty. Probability, conditional probability, discrete & continuous random variables, expected values, characteristic functions, multiple random variables. Intro to random processes, random discrete-time signals, power spectrum, autocorrelation, analysis of linear systems driven by wide-sense stationary random processes. Gaussian random processes, band limited white Gaussian noise. Intro to binary hypothesis testing, Bayesian signal detection, applications involving uncertain & random signals & noise. Prerequisite: ECE 280L, Math 212 or 219.

### ECE381 - Fundamentals of Digital Signal Processing

**Subject**: ECE  
**Catalog Number**: 381  
**Title**: Fundamentals of Digital Signal Processing  

**Description**  
An introduction to theory and applications of digital signal processing. Concepts, analytical tools and design techniques to process signals in digital form. Signal sampling and reconstruction, discrete-time transforms including the z-transform, discrete-time Fourier transform, and discrete Fourier transform. Discrete systems including the analysis and design of FIR and IIR filters. Introduction to applications of digital signal processing such as image processing, and optimal detection of signals in noise. Discrete system simulations using MATLAB. Prerequisite: Electrical and Computer Engineering 280L.
ECE382L - Control of Dynamic Systems

Subject: ECE
Catalog Number: 382L
Title: Control of Dynamic Systems

Description:
Model dynamic systems, characterize time and frequency domain response with respect to particular inputs. Characterize systems in terms of rise-time, settling-time, bandwidth. Identify the difference between stable and unstable system. Apply feedback control to modify response of dynamic systems. Develop methods of designing compensators for single-input, single-output, and multiple-input, multiple-output dynamic systems. Introduces optimal control theory, the linear quadratic regulator problem, the linear quadratic Gaussian problem. Gain a physical understanding of role of feedback control in modifying the dynamics of a system. Prerequisite: (Engineering 224L or ECE 280L) and Mathematics 216. Not open to students who have taken ECE 382.

ECE383 - Introduction to Robotics and Automation

Subject: ECE
Catalog Number: 383
Title: Introduction to Robotics and Automation

Description:
Fundamental notions in robotics, basic configurations of manipulator arm design, coordinate transformations, control functions, and robot programming. Applications of artificial intelligence, machine vision, force/torque, touch and other sensory subsystems. Design for automatic assembly concepts, tools, and techniques. Application of automated and robotic assembly costs, benefits, and economic justification. Selected laboratory and programming assignments. Prerequisites: ECE 280L or EGR 224L.

ECE384LA - Sound in the Sea: Introduction to Marine Bioacoustics

Subject: ECE
Catalog Number: 384LA
Title: Sound in the Sea: Introduction to Marine Bioacoustics

Description:
Fundamentals of marine bioacoustics with a focus on current literature and conservation issues. Topics include: introduction to acoustics; acoustic analysis methods and quantitative tools; production and recording of sound; ocean noise; propagation theory; active and passive acoustics; hearing, sound production and communication in marine organisms, potential impacts of anthropogenic noise; and regulation of marine sound. Labs will focus on methodologies used for generating, recording and analyzing marine sounds. Taught in Beaufort at Duke Marine Lab. Prerequisite: AP Biology, introductory biology, or consent of instructor; Physics 141L or 164L (or equivalent Physics courses) or consent of instructor.

ECE391 - Projects in Electrical and Computer Engineering

Subject: ECE
Catalog Number: 391
Title: Projects in Electrical and Computer Engineering

Description:
Project arranged on a special topic by an instructor with related interests and expertise. For junior students. Consent of instructor and director of undergraduate studies required.
ECE392 - Projects in Electrical and Computer Engineering

Subject: ECE  
Catalog Number: 392  
Title: Projects in Electrical and Computer Engineering

Description: Project arranged on a special topic by an instructor with related interests and expertise. For junior students. Consent of instructor and director of undergraduate studies required.

ECE420 - Introduction to Quantum Engineering

Subject: ECE  
Catalog Number: 420  
Title: Introduction to Quantum Engineering

Description: Quantum mechanics was discovered at the beginning of the 20th century and has had a profound effect on the development of modern technology. This course is about the potential for quantum technologies in the 21st century. The focus of the course this semester will be a survey of quantum computation, a field that promises to revolutionize the way we compute by using the dynamics of quantum mechanics. Topics include quantum circuits, introduction to quantum algorithms, hardware, and architectures. Prerequisite: ECE 270DL and ECE 280L and one of (Math 216, 218D-1, 218D-2, or 221). Not open to students who have taken ECE 520.

ECE431 - Power Electronic Circuits for Energy Conversion

Subject: ECE  
Catalog Number: 431  
Title: Power Electronic Circuits for Energy Conversion

Description: Efficient conversion of electrical energy is critical for electric and hybrid vehicles, wind and solar energy, power grids, computers, medical devices, and portables. This course teaches analysis and design of power electronic circuits for energy conversion, including circuit operation (converter topologies, steady-state modeling, switch realization), converter control (ac modeling, small-signal transfer functions, feedback), and magnetics (inductors, transformers). The course shares lectures with ECE/Energy Engineering 531, but has fewer assignments. Prerequisite: ECE 230L or Engineering 224L or graduate student standing. Not open to students who have taken ECE 531 or Energy Engineering 531.

ECE449 - Sensors and Sensor Interface Design

Subject: ECE  
Catalog Number: 449  
Title: Sensors and Sensor Interface Design

Description: Teams design board-level sensing system that achieves stated specifications. Analog, digital, wireless, optical & fluidic components. Resource planning/management, project budgeting, study of component specs & characteristics, vendor interaction, circuit schematic design & simulation, board layout, submission to foundry, component solder assembly, system test, comparison to design specs. Cost, economic viability, ethical & environmental issues, manufacturability considered. Prerequisite: ECE 230L, 250D, 270DL, and 280L & MATH 353 & (MATH 230 or ECE 555 or ECE 380 or STA 240L or EGR 238L or MATH 238L or MATH 340) & PHYS 152L & CHEM 101DL & one of (ECE 330L or ECE 331L or ECE 340L or ECE 350L).
### ECE458 - Engineering Software for Maintainability

**Subject**  
ECE  

**Catalog Number**  
458  

**Title**  
Engineering Software for Maintainability  

**Description**  
Students will refine their ability to engineer software, with a focus on maintainability. Teams complete a large programming project whose requirements undergo evolutions during the semester. Prior to each evolution, teams submit not only their code for the current requirements, but also a written document analyzing their current design and reflecting on how past design choices impacted their recent work. Teams must consider appropriate engineering standards and realistic constraints. Prerequisite: ECE 230L, 250D, 270DL, and 280L and (Computer Science 308 or 307D) and (Mathematics 353 or 356) and (Statistical Science 130L or Mathematics 230 or ECE 555 or ECE 380 or Statistical Science 240L or EGR 238L or Mathematics 340) and (Physics 152L or 26) and (Chemistry 101DL or 20 or 21).

### ECE459 - Introduction to Embedded Systems

**Subject**  
ECE  

**Catalog Number**  
459  

**Title**  
Introduction to Embedded Systems  

**Description**  
An introduction to hardware/software codesign of embedded computer systems. Structured programming techniques for high and low level programs. Hardware interfacing strategies for sensors, actuators, and displays. Detailed study of Motorola 68HC11 and 68HC12 microcomputers as applied to embedded system development. Hardware and simulation laboratory exercises with 68HC11 and 68HC12 development boards. Major design project. Prerequisite: ECE 230L and 250D and 270DL and 280L and (ECE 350L, 331L, or 330L) and (Mathematics 353 or 356) and (Physics 152L or 26) and (Chemistry 101DL, 20, or 21) and (Statistical Science 130, Mathematics 230, ECE 555, ECE 380, Statistical Science 240L, Engineering 238L, or Mathematics 340).

### ECE461 - Ocean Engineering

**Subject**  
ECE  

**Catalog Number**  
461  

**Title**  
Ocean Engineering  

**Description**  
A challenging Ocean Engineering project will be undertaken in this class. Past examples include participation in a national XPRIZE contest to build an Ocean Sensor. Students define project scope and form task-oriented sub-teams to make significant progress toward overall class project goal. Students are expected to spend several hours per week outside of class working on the team projects. Students will need to be in teams that can all meet for at least couple of hours at the same time each week. Prerequisite: one of ECE 230L, ECE 250D, ECE 270DL, ECE 280L, Mechanical Engineering 221L, Engineering 244L, or Environment 102.

### ECE469 - Wearable and Ubiquitous Computing Systems Design

**Subject**  
ECE  

**Catalog Number**  
469  

**Title**  
Wearable and Ubiquitous Computing Systems Design  

**Description**  
Design, implement, and evaluate wearable and ubiquitous computing systems. Topics include challenges and constraints in wearable and ubiquitous computing, input/output devices, human-computer interaction, embedded systems, prototyping, machine learning with focus on activity and affect recognition, applications with focus on healthcare, ethics, and social impact; project management and planning as students work on a semester-long team-based multidisciplinary project. Prerequisite: ECE 350L, ECE 230L, 250D, 270DL, and 280L and (Math 353 or 356) and (Math 230 or ECE 555 or ECE 380 or StatSci 240L or EGR 238L or Math 340) and (Physics 152L or 26) and (Chem 101DL or 20 or 21).

**Description**

This course discusses topics in Bayesian probability and its application to foundations of statistical learning. The primary objectives of the course are to provide a mathematically rigorous foundation in Bayesian probability and inference, develop strong intuition for Bayesian constructs, provide a foundation in statistical learning, and to show how Bayesian methods are fundamental to a variety of modern statistical learning techniques. Topics include probabilistic reasoning, Bayesian inference, linear models, mixture models, and model selection. Prerequisite: (Mathematics 216, 218, or 221) and (Statistical Science 130L, Statistical Science 240L, Mathematics 230, Mathematics 340, ECE 380, ECE 555, or EGR 238L) and (EGR 103L, Computer Science 101L, or Computer Science 201).

**Description**

Introduction to the design and analysis of modern digital communication systems. Communication channel characterization. Baseband and passband modulation techniques. Optimal demodulation techniques with performance comparisons. Key information-theoretic concepts including entropy and channel capacity. Channel-coding techniques based on block, convolutional and Trellis codes. Equalization techniques. Applications to design of digital telephone modems, compact discs and digital wireless communication systems. Prerequisite: ECE 280L and one of (Statistical Science 130L or Statistical Science 240L or Mathematics 230 or Mathematics 340 or ECE 380 or ECE 555 or Engineering 238L).

**Description**

Fundamental concepts, theory & practice of digital audio and acoustic signal processing. Concerning the process of transducing, digitizing, filtering, transforming, coding, storing, manipulating, transmitting, distributing, analyzing & reproducing high quality music and other acoustic signals. Topics: signal quantization, discrete-time signal analysis, audio digital filtering and equalization, hearing for audio applications, audio perceptual encoding (e.g. MP3), time and pitch-scale modification, room acoustics, audio spatial effects, 3-D audio rendition, basic microphone array processing. Prerequisite: ECE 280L and one of (Statistical Science 130L or Statistical Science 240L or Mathematics 230 or Mathematics 340 or ECE 380 or ECE 555 or Engineering 238L).

**Description**

Small groups work through design process for a machine learning &/or signal processing system. Brainstorming ideas, reviewing modern techniques in ML & SP, choosing & implementing projects. Use of modern collaboration tools & techniques that allow agile collaborative group design & development, consideration of resources, delivery of written & oral presentations, consideration of appropriate engineering standards & realistic constraints. Prerequisites: ECE 230L & 250D & 270DL & 280L & (MATH 353 or 356) & (STA 130 or 240L, MATH 230, 238L or 340, ECE 380 or 555 or EGR 238L) & (PHYSICS 26 or 152L) & (CHEM 101DL, 20 or 21) & two of (ECE 381,382L,383,480,483,485,488,580,588,681,682D,685D or 687D).
### ECE488 - Digital Image and Multidimensional Processing

**Subject**: ECE  
**Catalog Number**: 488  
**Title**: Digital Image and Multidimensional Processing  

**Description**  
Introduction to the theory and methods of digital image and video sampling, denoising, coding, reconstruction, and analysis. Both linear methods (such as 2- and 3-D Fourier analysis) and non-linear methods (such as wavelet analysis). Key topics include segmentation, interpolation, registration, noise removal, edge enhancement, halftoning and inverse halftoning, deblurring, tomographic reconstruction, superresolution, compression, and feature extraction. While this course covers techniques used in a wide variety of contexts, it places a strong emphasis on medical imaging applications.  

Prerequisite: Electrical and Computer Engineering 280L.

### ECE489 - Advanced Robot System Design

**Subject**: ECE  
**Catalog Number**: 489  
**Title**: Advanced Robot System Design  

**Description**  
Teams of students will design, implement, and integrate a robotic system to perform intelligent physical tasks. Example tasks might include navigation, coordinated movement, or object manipulation, among others. Perception, control, and artificial intelligence software will be applied to operate sensing and actuation hardware. Robot middleware for distributed system integration. Simulation prototyping, unit testing, and metrics for performance evaluation. Major design project. Prerequisite: ECE 230L, 250D, 270DL, 280L, and 383 and (ECE 353/Computer Science 310 or ECE 356/Computer Science 356 or ECE 382L) and (Mathematics 353 or 356) and (Statistical Science 130L or Mathematics 230 or ECE 355 or ECE 380 or Statistical Science 240L or EGR 238L or Mathematics 340) and (Physics 152L or 26) and (Chemistry 101DL or 20 or 21).

### ECE490D - Special Topics in Electrical and Computer Engineering

**Subject**: ECE  
**Catalog Number**: 490D  
**Title**: Special Topics in Electrical and Computer Engineering  

**Description**  
Study arranged on a special electrical and computer engineering topic in which the faculty has particular interest and competence as a result of research and professional activities. Instructor consent required.

### ECE490L - Special Topics in Electrical and Computer Engineering

**Subject**: ECE  
**Catalog Number**: 490L  
**Title**: Special Topics in Electrical and Computer Engineering  

**Description**  
Study arranged on a special electrical and computer engineering topic in which the faculty has particular interest and competence as a result of research and professional activities. Instructor consent required.

### ECE493 - Projects in Electrical and Computer Engineering

**Subject**: ECE  
**Catalog Number**: 493  
**Title**: Projects in Electrical and Computer Engineering  

**Description**  
Project arranged on a special topic by an instructor with related interests and expertise. For senior students. Consent of instructor and director of undergraduate studies required.

### ECE494 - Projects in Electrical and Computer Engineering

**Subject**: ECE  
**Catalog Number**: 494  
**Title**: Projects in Electrical and Computer Engineering  

**Description**  
Project arranged on a special topic by an instructor with related interests and expertise. For senior students. Consent of instructor and director of undergraduate studies required.

<td>104D</td>
<td>ECON104D - Statistical Foundations of Econometrics and Data Science</td>
<td>Rigorous introduction to statistical concepts that underpin econometrics. Course emphasizes conceptual understanding, uses mathematics to illustrate ideas, and applies ideas to examples from economics broadly construed. Students analyze data to reinforce understanding. Topics include experimental and non-experimental research designs; modern approaches to summarizing data; random variables, probability, expectations, density and distribution functions; sampling; estimation; inference and hypothesis testing; introduction to linear regression. First course in two-semester econometrics sequence. Prerequisite: Mathematics 21, 106L,111L, 112L, 121, 122, 122L, 202, 202D, 212, or 222.</td>

<td>Thinking Through Models</td>
<td>Models of agents, behaviors, mechanisms and markets are essential to the way economists think about and describe the world. This course examines several of the models that have been most crucial to the development of economic thought from the early nineteenth century through to the present. Students will learn to understand how economists have used models as tools of inquiry and prediction, assess the functional elements of these models and consider how accurately they map on to the empirical phenomena they describe. Open only to students in the Focus Program.</td>

Duke University
### ECON201D - Intermediate Microeconomics I

**Subject**  
ECON  

**Catalog Number**  
201D  

**Title**  
Intermediate Microeconomics I  

**Description**  
Preferences and technologies and their relation to demand, supply, and competitive equilibrium. The basic math behind constrained optimization. Income and substitution effects and their relation to demand and marginal willingness to pay. Cost functions and profit maximization. Policy and civil society approach to market failures from externalities, asymmetric information, and market power. Introduction to game theory and applications to market structures. The tension between efficiency and equity. Prerequisite: (Economics 101 or 101D) and either (Mathematics 105L and 106L) or (Mathematics 21, 111L, 112L, 121, 122, 122L, 202, 212, or a higher level math course).  

### ECON204D - Econometrics and Data Science

**Subject**  
ECON  

**Catalog Number**  
204D  

**Title**  
Econometrics and Data Science  

**Description**  
This course develops critical-thinking skills necessary to analyze and interpret real world data using modern data science and econometric methods. Students learn to be consumers and producers of empirical research in the sciences. Develop sophisticated understanding of both theoretical underpinnings and challenges in implementation of empirical methods to effectively evaluate quality of evidence and validity of causal inferences. Applications are primarily drawn from economic studies of individuals, firms and markets. Prerequisite: (ECON 21 and 22, ECON 23 and 24, ECON 101, ECON 101D, or ECON 201D) and (ECON104D or STA 230/MATH 230, STA 231/MATH 340, or STA 432/MATH 343).  

### ECON205D - Intermediate Microeconomics II

**Subject**  
ECON  

**Catalog Number**  
205D  

**Title**  
Intermediate Microeconomics II  

**Description**  
Calculus-based generalization of the theory of demand and supply developed in Economics 201D. Individual behavior in environments of risk and uncertainty. Introduction to game theory and strategic interaction. Adverse selection, moral hazard, non-competitive market structures, externalities, public goods. Prerequisite: Economics 201D; Mathematics 202, 212, 222, or any higher-level mathematics course with Mathematics 212 as a prerequisite.  

### ECON21 - Principles of Microeconomics

**Subject**  
ECON  

**Catalog Number**  
21  

**Title**  
Principles of Microeconomics  

**Description**  
This is the equivalent for Principles of Microeconomics from Advanced Placement on the basis of a score of 4 or 5 on the Advanced Placement Microeconomics exam, or credit for a sufficient score on a Duke-recognized international examination such as the International Baccalaureate. Only Economics 21 and Economics 22 together substitute for Economics 101.
**ECON210D - Intermediate Macroeconomics**

**Subject:** ECON  
**Catalog Number:** 210D  
**Title:** Intermediate Macroeconomics

**Description**
Intermediate level treatment of macroeconomic models, fiscal and monetary policy, inflation, unemployment, economic growth. Prerequisite: Economics 201D.

**ECON212 - Engineering Systems Optimization and Economics**

**Subject:** ECON  
**Catalog Number:** 212  
**Title:** Engineering Systems Optimization and Economics

**Description**
Introduction to mathematical optimization, engineering economic analysis, and other decision analysis tools used to evaluate and design engineering systems. Application of linear and nonlinear programming, dynamic programming, expert systems, simulation and heuristic methods to engineering systems design problems. Applications discussed include: production plant scheduling, water resources planning, design and analysis, vehicle routing, resource allocation, repair and rehabilitation scheduling and economic analysis of engineering design alternatives. Pratt students may not use this course toward the SS/H degree requirement. Corequisite: Mathematics 216.

**ECON213 - Follow the Ruble: Money in Russian Literature and Culture**

**Subject:** ECON  
**Catalog Number:** 213  
**Title:** Follow the Ruble: Money in Russian Literature and Culture

**Description**
Reading Russian literature through the lens of economics. Money as a driving plot principle in fiction from the 1600s to the present day. The profit motive underlying Russian artistic depictions of criminality. Gamblers, rogues, smugglers, thieves, tycoons, oligarchs, and 'New Russian' entrepreneurs as protagonists. Swindling and black marketeering as the underside of an economic system that condemns capitalism and the 'middleman.' Financial dealings as a battlefield between Russian and Western cultural values. Students are encouraged to do course projects applying economic analytical models to literary texts and films.

**ECON22 - Principles of Macroeconomics**

**Subject:** ECON  
**Catalog Number:** 22  
**Title:** Principles of Macroeconomics

**Description**
This is the equivalent for Principles of Macroeconomics from Advanced Placement on the basis of a score of 4 or 5 on the Advanced Placement Macroeconomics exam, or credit for a sufficient score on a Duke-recognized international examination such as the International Baccalaureate. Only Economics 21 and Economics 22 together substitute for Economics 101.

**Subject**: ECON  
**Catalog Number**: 224  
**Title**: Neoclassical Economics and Its Opponents: What Even Is 'Mainstream'?  

**Description**
Why do economics departments teach the theories they teach today? And how do these theories impact the real world? This course surveys the historical development of the economics discipline with a focus on those schools of thought that contested what is now mainstream economics. After a brief history of neoclassical economics, we will examine a few of its challengers: institutional economics, Keynesianism, and behavioral economics. We will discuss how their theories differ from neoclassicism, and their influence on US economic policy at several moments in the twentieth century. Course focuses on understanding theory by reading works by influential economists throughout the history of economics.

ECON225S - Liberalism and its Critics

**Subject**: ECON  
**Catalog Number**: 225S  
**Title**: Liberalism and its Critics  

**Description**
Examines development of liberalism within political philosophy and economics, and alternatives as articulated by conservative, progressive and socialist critics. Course examines doctrines themselves and place within historical context in which they emerged. Liberal tradition represented by such thinkers as Locke, Hume, Smith, Paine, Constant, J. S. Mill, Hayek and Friedman. Conservative critics will include such writers as Burke, de Maistre, Papal Encyclicals, Carlyle, Meyer, Kirk, Scruton, and Deneen. Socialist and progressive critics will include Saint Simon, Marx and Engels, Sidney and Beatrice Webb, Veblen, Lange, Laski, and Marcuse. Course is part of 'Transformative Ideas' curriculum.

ECON227 - Internet, Technology, and Capitalism

**Subject**: ECON  
**Catalog Number**: 227  
**Title**: Internet, Technology, and Capitalism  

**Description**
This course will explore the role of the internet and new technologies in our society. We will examine the history of the rise of the computer age, and then cover questions that include surveillance and algorithmic targeting; cybercommerce and crypto; AI and robots; social media and celebrity; labor rights and profit-making; and the changing nature of daily life in a wireless world. There will be several guest speakers as well as readings, films, and other content.

ECON23 - Principles of Microeconomics

**Subject**: ECON  
**Catalog Number**: 23  
**Title**: Principles of Microeconomics  

**Description**
This is the equivalent for Principles of Microeconomics taken at another school or Duke-In Program. Only Econ 23 and Econ 24 together substitute for Econ 101.
ECON235 - Risk

Subject: ECON
Catalog Number: 235
Title: Risk

Description:
Simply put, risk is 'the possibility of something bad happening.' Defined in this way, increased attentiveness to risk has the potential to be paralyzing because it is present in nearly every aspect of human existence. This course, organized by the Duke Center on Risk, capitalizes on this ubiquity by bringing together ideas and approaches from all corners of the university. A unifying perspective is the recognition that risk involves elements of both chance ('possibility') and value ('something bad'). Therefore, students will learn the languages of probability and economics within the cultural settings of public policy, law, engineering, business, and medicine.

ECON24 - Principles of Macroeconomics

Subject: ECON
Catalog Number: 24
Title: Principles of Macroeconomics

Description:
This is the equivalent for Principles of Macroeconomics taken at another school or Duke-In Program. Only Econ 23 and Econ 24 together substitute for Econ 101.

ECON241D - From Machine Learning to Ethnography: Puzzles and Approaches to International Development

Subject: ECON
Catalog Number: 241D
Title: From Machine Learning to Ethnography: Puzzles and Approaches to International Development

Description:
This is an introductory course in applied social science that examines policy issues in developing countries, with a focus on applied research and statistical methods. The objectives of the course are threefold: 1) to introduce students to a range of topics and puzzles in international development; 2) to introduce the broad range of research methods that social scientists use to rigorously study development; and 3) to apply those tools to topics and data that you care about.

ECON246S - Arts Policy, Leadership, and Engagement

Subject: ECON
Catalog Number: 246S
Title: Arts Policy, Leadership, and Engagement

Description:
This community-engaged course provides an introduction to contemporary issues in US arts policy and cultural sector leadership across four broad themes: creative institutions; cultural equity and accessibility; creative placemaking/community development; and the creative economy. In addition to policy questions in these areas, we examine leadership practices in arts organizations and cultural institutions, with particular attention to the kinds of leadership the arts require in a post-2020 world. Students will work in teams on a semester-long collaborative project with an arts policy organization and experience the arts in practice through attendance at performances and exhibitions.
ECON247S - Non-Profit Cultural Institutions

Subject: ECON  
Catalog Number: 247S  
Title: Non-Profit Cultural Institutions

Description:
Non-profit cultural institutions are an integral part of arts communities at all levels: national, regional, local. Through readings, projects and service-learning, students gain overview of non-profit cultural organization formation, management, operational structures, governance challenges, board member responsibilities and situational ethics. Explores historical and present functions and social structures in which nonprofit tax-exempt organizations operate. Investigates how nonprofit cultural institutions have increasingly become a vehicle for fostering creativity in the arts and humanities. Students partner with local non-profit arts/cultural organizations to work on specific projects.

ECON254 - Personal Finance

Subject: ECON  
Catalog Number: 254  
Title: Personal Finance

Description:
Course covers fundamentals of personal financial management: how to create and stay within a budget; how debit and credit cards work; how to borrow, manage, and pay off student debt; how to build a credit history to obtain the best possible rates on future loans (such as mortgages); best practices for cybersecurity; how to manage taxes; and how to invest for the future. Typical irrational behaviors common to financial decision-making such as prospect theory and framing errors will be introduced, and strategies to avoid them discussed. Changing dynamics of the financial services industry as a result of ongoing disruptive innovation (FinTech) are also addressed.

ECON255S - Shakespeare & Financial Markets: Why This Time is Never Different

Subject: ECON  
Catalog Number: 255S  
Title: Shakespeare & Financial Markets: Why This Time is Never Different

Description:
Course discusses how lessons from Shakespeare’s plays can provide insight into human behavior in today’s financial markets. Plays will include Hamlet, Julius Caesar, Twelfth Night, and others. Lessons about policy errors, cultural and political dislocation, regime changes, demographic conflicts etc. in current financial and macroeconomic environments. Discussion will include human biases in decision-making, and how these transcend cultural and historic boundaries. An important component of this class is understanding how to integrate themes from classical literature to better understand current socioeconomic trends.

ECON256 - Practical Financial Markets

Subject: ECON  
Catalog Number: 256  
Title: Practical Financial Markets

Description:
Familiarizes students with the practical, hands-on tools and knowledge required for careers in the financial markets. Topics covered include: securities markets; corporate valuation techniques including DCF, Comps, Precedent Transactions, LBO and IPO models; equity research methodologies; asset allocation and risk-return analytics; current market news and events; regulation; ethics; contemporary finance/business issues as applicable. Open only to sophomores.

ECON285 - Denial, Faith, Reason: Sustainability and Survival

Subject: ECON
Catalog Number: 285
Title: Denial, Faith, Reason: Sustainability and Survival

Description: This course investigates both theory and history of the concept of sustainability, and explores its various economic and political manifestations over time. What are the historical roots of the sustainability debate? What aspects of life do various concepts of sustainability entail, and how do they inform modern ethics? What, in the end, does the history of political economics teach us about the possibility of sustainable development?

ECON290 - Selected Topics In Economics

**Subject**
ECON

**Catalog Number**
303A

**Title**
Political Philosophy of Globalization

**Description**
Examination of the claim made for and against the expansion of free exchange on economic, political, and cultural institutions and conditions, from the perspectives of competing ethical theories and political philosophies. Taught only in the Duke in Geneva Summer Study Abroad program.

ECON305 - History of International Financial and Monetary Crises

**Subject**
ECON

**Catalog Number**
305

**Title**
History of International Financial and Monetary Crises

**Description**
Course examines monetary/financial crises plaguing world since 16th century. Analyzes origin, unfolding, and impact of crises, debates generated by them, and formulation/implementation of policy measures. Attention to international implications/connections on European/Asian money supply, banking/credit systems; reaction to South Sea Bubble and John Law Credit Systems in numerous European nations; experiments with paper money in America; rise/demise of gold standard in 19th/20th century; currency and exchange rate problems of last three decades. Case studies will be selected and assigned according to participants' interests. Prerequisite: Economics 201D and 210D.

ECON306 - Economic History and Modernization of the Islamic Middle East

**Subject**
ECON

**Catalog Number**
306

**Title**
Economic History and Modernization of the Islamic Middle East

**Description**
Economic development of the Middle East from the rise of Islam to the present. Transformation of the region from an economically advanced area into part of the underdeveloped world. Role of religion in economic successes and failures. Obstacles to development today. Topics: Islamic economic institutions, economic roles of Islamic law, innovation and change, political economy of modernization, interactions with other regions, economic consequences of Islamism. Prerequisite: Economics 101 or 21 and 22 or instructor consent.

</table>

**Description**

Introduction to conceptual and methodological issues raised in modern economics. Topics may include choice, rationality and irrationality, realism, models, the relationship between microeconomics and macroeconomics, prediction and explanation, value judgments and policymaking, and causality. Case studies of applications to economic problems. Prerequisites: One course in economics or consent of instructor.
ECON325S - Economic Analysis of Current Energy Issues

Subject: ECON
Catalog Number: 325S
Title: Economic Analysis of Current Energy Issues

Description:
Examination of present-day sources and end-users of energy in U.S. and selected foreign nations with attention to external cost of energy systems. Fossil fuel prospects, new and renewable energy sources and nuclear power. Opportunities for increasing energy productivity. Proposals for dealing with climate change. Course equips students to evaluate proposals and arguments from all sides of the energy debates using facts and analysis. Prerequisite: Economics 201D.

ECON326 - Islam and the State: Political Economy of Governance in the Middle East

Subject: ECON
Catalog Number: 326
Title: Islam and the State: Political Economy of Governance in the Middle East

Description:
Lecture version of Economics 326S. Introduction to political history of Middle East from advent of Islam 14 centuries ago to modern era. Four objectives: (1) familiarize students with institutions responsible for characteristics of political development in region; (2) examine particular transformations/selected cases of inertia to derive lessons about mechanisms that govern political development, including democratization; (3) investigate how religion shaped region's political trajectory; (4) identify social forces, especially economic forces, driving contemporary rediscovery/reinterpretation of Islam's political organization and requirements, by both Islamists and secular political actors.

ECON331SA - The Economics of the Energiewende in Germany

Subject: ECON
Catalog Number: 331SA
Title: The Economics of the Energiewende in Germany

Description:
Comprehensive overview of the Energiewende - Germany's effort to reshape its energy system, the industry, and building sectors into a nuclear-free, low-carbon economy. Application of a range of analytical methods - including economic assessment tools, legal analyses and political science - to shed light on different facets of the Energiewende, and to help understand the public and academic debates around it. The course thus offers different angles - looking at the economics of the Energiewende, as well as the technological, social, ethical, legal and political implications. Offered through the Duke-in-Berlin Program.

ECON332 - Modern Topics in Labor Economics

Subject: ECON
Catalog Number: 332
Title: Modern Topics in Labor Economics

Description:
Why do we have a welfare system? What are the implications of artificial intelligence and robotics for jobs? How can we justify the existence of minimum wage? What is the effect of immigration of the outcomes of natives? Why are female workers consistently paid less than their male counterparts? We will study how labor economists think about these topics. The course will provide some basic tools of economic analysis and important institutional background regarding the US and international economies. The class will consist of lectures and debates on the interplay between labor and public policies, including the ethical dimensions of these controversial issues. Prerequisite: Economics 201D.
ECON333 - Private Equity

Subject: ECON
Catalog Number: 333
Title: Private Equity

Description: Introduces students to the process of private equity investments, including evaluating potential investments, deal structure and financing, and key drivers of value. Students will learn about a range of private investment styles, from early stage to mature investments, with a focus on acquisitions of existing mid-market firms for value enhancement utilizing various strategies. The course will include both in-class discussions and lectures from visiting speakers from the private equity world. Prerequisite: Economics 201D or 372.

ECON334 - Health Economics

Subject: ECON
Catalog Number: 334
Title: Health Economics

Description: Economic aspects of the production, distribution, and organization of healthcare services, such as measuring output, structure of markets, demand for services, pricing of services, cost of care, financing, mechanisms, and their impact on the relevant markets. Prerequisite: Economics 201D or Public Policy 303D.

ECON335 - Economics of Global Health

Subject: ECON
Catalog Number: 335
Title: Economics of Global Health

Description: Examines reciprocal relationships between income, poverty and health across countries with focus on identifying effect of health on development. Addresses structural problems in delivery and quality of healthcare that arise from cultural as well as economic causes. Attention given to challenges of healthcare financing, and tension between high-tech care and basic care in developing countries. Students examine empirical evidence from interventions affecting health including infant mortality reduction programs. Focus on issues of poverty alleviation and the promise of foreign aid. Prerequisites: (Economics 201 or Public Policy 303D) and (Economics 204D or 208D or Public Policy 604), or instructor consent.

ECON336D - Computational Microeconomics

Subject: ECON
Catalog Number: 336D
Title: Computational Microeconomics

Description: Use of computational techniques to operationalize basic concepts from economics. Expressive marketplaces: combinatorial auctions and exchanges, winner determination problem. Game theory: normal and extensive-form games, equilibrium notions, computing equilibria. Mechanism design: auction theory, automated mechanism design. Prerequisite: at least one of the following: Computer Science 230, 200-level Mathematics course, or 200-level Statistical Science course.

ECON337S - Social Inequalities and Low-Wage Work

Subject: ECON
Catalog Number: 337S
Title: Social Inequalities and Low-Wage Work

Description: This course introduces students to several, different economic theories and viewpoints regarding social inequality, class, and socio-economic status in the United States. Current debates are discussed, such as the possible raising of the minimum wage. Students also gain first-hand knowledge concerning the livelihood strategies of low-wage workers in Durham, through students' participation in a service-learning project in the community.

ECON338 - Economics of the Public Sector

Subject: ECON
Catalog Number: 338
Title: Economics of the Public Sector

Description: Applies tools of intermediate micro economics to the public sector. Develops economic justifications for government intervention into the economy and examines and evaluates various government policies and programs including regulation of externalities, welfare programs, social security and other social insurance programs. Provides a solid foundation for applied benefit cost analysis. Analyzes tax policy and other forms of government financing, both at national and subnational levels. Prerequisites: Public Policy 303D or Economics 201D.
<table>
<thead>
<tr>

<th>Catalog Number</th>
<th>Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON</td>
<td>339</td>
<td>Environmental Economics and Policy</td>
<td>The role of the environment in the theory and practice of economics. Topics include ways in which markets fail to efficiently allocate resources in the presence of pollution, along with the array of policies regulators used to correct those failures; the empirical techniques used by economists to put values on environmental commodities; and an examination of questions related to everyday environmental issues, particularly those confronting the developing world. Prerequisites: Economics 201D and one Statistics course; Economics 204D or 208D recommended.</td>
</tr>
<tr>
<td>ECON</td>
<td>344</td>
<td>History of Art Markets</td>
<td>Analytical survey of emergence of art markets, interactions between market behavior(s), visual/media culture(s). Addresses questions regarding the nature of art markets, the specificity of art markets and the application of economic and historical methodologies, how and where players in local markets throughout the world shape visual culture(s), effective causes for art consumption, taste, fashion throughout ages, and methodological implications of art market research at the interface of Economics, Art History, Law and Visual Studies.</td>
</tr>

<td>History of Art Markets</td>
<td>Analytical survey and discussion of emergence of art markets, interactions between market behavior(s), visual/media culture(s). Addresses questions regarding the nature of art markets, the specificity of art markets and the application of economic and historical methodologies, how and where players in local markets throughout the world shape visual culture(s), effective causes for art consumption, taste, fashion throughout ages, and methodological implications of art market research at the interface of Economics, Art History, Law and Visual Studies.</td>
</tr>
<tr>
<td>ECON</td>
<td>345</td>
<td>Urban Economics</td>
<td>Intro to urban econ focusing on location of economic activity in geographic space and implications for society. Course uses theoretical modeling, empirical analysis, and historical accounts to explore questions: Why cities exist, form where they do, and grow/decline? How economic activity is organized. Spatial patterns of work, housing, transportation. Environmental consequences of urban density, suburban sprawl, polluting firms. Determinants of price of land, house values, rents. Household sorting across neighborhoods. Causes/consequences of racial segregation, neighborhood gentrification, spatial concentration of poverty/wealth. Prerequisite: Economics 201D; Economics 204D recommended.</td>
</tr>
<tr>
<td>ECON</td>
<td>346</td>
<td>Philosophical and Conceptual Problems of Entrepreneurship</td>
<td>Investigation of the nature of entrepreneurship; its psychological foundations, relation to science and technology, implications for economics, and ramifications for morality and ethics.</td>
</tr>
<tr>
<td>ECON</td>
<td>347</td>
<td>African Economic Development</td>
<td>This course will seek to provide students with a realistic picture of African economies and societies today, emphasizing their heterogeneity and accomplishments, as well as focusing on reasons for continued widespread poverty throughout the continent. The course develops behavioral models that can be used to explain and predict household, market, and government behaviors and outcomes. Students are expected to quickly acquire basic stylized facts and economic models, and then analyze one of the many data sets now available.</td>
</tr>
</tbody>
</table>
ECON348 - Gender in the Economy

Subject: ECON
Catalog Number: 348
Title: Gender in the Economy

Description:
Economics of gender including the status of women in the labor market; feminist economic theories; ethical considerations of gender-based inequalities; gendered division of labor within the family and between the household and labor market. Comparisons of women's status across different cultures and geographic areas; gender-related measurements and indicators; explanations and remedies for female/male occupational segregation and wage differentials. Prerequisite: Economics 201D.

ECON351S - The Economic and Political Performance of Civilizations

Subject: ECON
Catalog Number: 351S
Title: The Economic and Political Performance of Civilizations

Description:
Critical survey of theories concerning the economic and political development of major civilizations, with an emphasis on the causes of differences that took shape and persisted over long time periods. The theories covered address the roles of institutions, cultures, legal systems, beliefs, family structures, religions, institutions, technologies, geography, and natural resources. Interactions between economic and political development. Prerequisite: Econ 201D, or instructor consent.

ECON352 - How to use data to design better macro policies

Subject: ECON
Catalog Number: 352
Title: How to use data to design better macro policies

Description:
Recent increases in computational power and the availability of 'big data' have been transformational in empirical macroeconomics and macro policy. This course shows how large datasets and macro theory can be used to understand and make progress on some of the most important social and economic problems of our time. Topics include debt forgiveness and student debt, trends in inequality and market power, and how to address financial fragility (UI/minimum wage/UBI). For each class, we will read and discuss empirical papers on each topic, learn the relevant econometric techniques needed to understand them and then discuss how to best interpret this evidence using relevant macro theory. Prerequisite: Economics 201D.

ECON353 - Financial Institutions

Subject: ECON
Catalog Number: 353
Title: Financial Institutions

Description:
The operations of commercial and central banking and non-banking financial institutions and instruments in the United States, determination of monetary aggregates and interest rates, the financial impacts of Treasury operations, and the linkages from Federal Reserve actions to price level, employment, economic growth, and balance of payments objectives. Coverage of models of monetary economics (for example the Cagan money demand function, cash in advance models). The dynamics and real effects of inflation. Prerequisite: Economics 210D or 372.
ECON355 - International Trade

**Subject**  
ECON

**Catalog Number**  
355

**Title**  
International Trade

**Description**  
Topics include United States trade policies and protectionism, the North American Free Trade area, trade and economic relations with industrialized countries, policies toward developing countries and multilateral institutions, macroeconomic policy coordination, and relations with Europe. Prerequisite: Economics 201D.

---

ECON360 - Game Theory and Law, Economics and Organization

**Subject**  
ECON

**Catalog Number**  
360

**Title**  
Game Theory and Law, Economics and Organization

**Description**  
The goal of the course is to enhance your ability to think strategically about complex and interactive environments. Strategic reasoning is applied to the study of Law, Economics and Organizational Behavior. Four themes will be emphasized for becoming a competent strategist:

1. Identifying Environments: Knowing the key features of a strategic situation that call for a response  
2. Selecting Strategic Moves: Changing the game when necessary to your advantage  
3. Gathering Hidden Information: When to reveal information and when to solicit it  
4. Recognizing Rationality: How do opponents think? What are their preferences? How well informed are they? 

Prerequisite: Economics 201D and 205D.

---

ECON361 - Prisoner's Dilemma and Distributive Justice

**Subject**  
ECON

**Catalog Number**  
361

**Title**  
Prisoner's Dilemma and Distributive Justice

**Description**  
Economic, political, and philosophical perspectives on distribution justice and the problems in each discipline raised by variations on the prisoner's dilemma. Classic texts include Hobbes and Hume, Smith and Mill, Rawls and Nozick. Gateway course to the Politics, Philosophy, and Economics certificate program. Recommended prerequisite: Economics 101 and a course in ethics or political philosophy.

---

ECON362 - Discovering Game Theory: Social Complexity and Strategic Interdependence

**Subject**  
ECON

**Catalog Number**  
362

**Title**  
Discovering Game Theory: Social Complexity and Strategic Interdependence

**Description**  
Strategy is all around you: in sports, the economy, law, politics, and your own social interactions. In this course, you will explore one of the foundational tools that social scientists use to analyze the complexity of strategic interactions: Game Theory. To do so, the course employs a highly interactive learning environment, in which you and your peers engage in strategic interactions that illustrate fundamental social dilemmas. In taking this course, you will gain a new analytical perspective into the complexity of social phenomena, and develop a solid foundation for additional course work in social science.
### ECON368 - Behavioral Finance: A Taxonomy of Money Mistakes

### ECON370 - Global Capital Markets

<table>
<thead>
<tr>
<th>Subject</th>
<th>Catalog Number</th>
<th>Title</th>
<th>Description</th>
</tr>
</thead>
</table>
ECON370A - Global Capital Markets

Subject: ECON
Catalog Number: 370A
Title: Global Capital Markets

Description:
This course, offered on the Duke in Chicago Finance summer program, examines financial markets and the role of investment banks as intermediaries. Divisions and functions within investment banks: sales and trading, corporate finance, research, and wealth management. Impact of global current events on financial markets around the world, and the importance of Chicago as a global financial center. Visiting speakers from Chicago-based firms provide in-depth analysis of the various roles and opportunities in the Chicago financial arena.

ECON371 - Labor and Family Economics

Subject: ECON
Catalog Number: 371
Title: Labor and Family Economics

Description:
Examines decisions made by individuals as members of families - education, occupation, work, change of jobs, use of home time, consumption, having children, investment in their health and human capital, etc. Also, decisions to cohabit/break up, marry/divorce/remarry, leave the parental nest, etc. Understanding phenomena ranging from which high school couples have sex - to the stability of gay marriage - to domestic violence - to the impact of Covid-19 on the current and future labor force participation of women - are all enhanced by accounting for the multiplicity of both conflicting and complementary interests of individuals in families. Prerequisite: Economics 201D and either 204D or 208D.

ECON372 - Asset Pricing and Risk Management

Subject: ECON
Catalog Number: 372
Title: Asset Pricing and Risk Management

Description:
Integrates micro and macro economics with topics in finance. Utility maximization within mean variance framework for portfolio analysis and capital asset pricing model. Corporate valuation and discounted cash flow analysis. Capital structure and principal-agent problem will lead into a discussion of the Efficient Markets Hypothesis and underlying assumptions. Market pricing, forecasting, and financial crises. Prerequisite: Economics 101D (or Economics 21 and 22); and Economics 104D or Statistical Science 111L, 130L, 210L, 230, or 250D, or BME 244L; and Economics 205D or Mathematics 202D, 212, 216, 219, or 222.

ECON373 - Corporate Finance

Subject: ECON
Catalog Number: 373
Title: Corporate Finance

Description:
Major corporate decisions from the perspective of the firm with an emphasis on the interaction of the firm with financial markets: quantitative project evaluation for investment, choice between borrowing and issuing stock, dividend policy, organizational form (for example, mergers and acquisitions). Introduction to financial markets: asset pricing, issuing stocks, analyzing financial performance using relative value tools, and options. Prerequisite: Economics Majors: Economics 201D and 204D or 208D; Economics or Financial Economics Minors: Economics 372.
**ECON374S - New Ventures Operating Plan**

**Subject**: ECON  
**Catalog Number**: 374S  
**Title**: New Ventures Operating Plan

**Description**
Course allows teams to follow structured process in carrying out analysis aimed at development of complete operating/business plan for new corporate venture. Four major areas form basis of operating plan: core competencies, elements of operating plan, budget, and financing plan.

---

**ECON375 - The Economics of Entrepreneurship**

**Subject**: ECON  
**Catalog Number**: 375  
**Title**: The Economics of Entrepreneurship

**Description**
Application of microeconomic theory, such as game theory and industrial organization, to analyze business start-ups and their development. Focus on evaluation of the role of entrepreneurs in the macroeconomy, and the microeconomic performance of young businesses. The effects of government policies and economic fluctuations on entrepreneurs will be addressed, as well as an understanding of the organization and financial structure, development, and allocational decisions of growing entrepreneurial ventures. Prerequisite: Economics 201D.

---

**ECON376 - Commodities Markets**

**Subject**: ECON  
**Catalog Number**: 376  
**Title**: Commodities Markets

**Description**
A focused look at the history, structure and regulatory oversight of markets that trade in commodities. Course includes the role of these instruments in hedging and speculating in commodity exposure, and a broader view of the importance of commodities for the general economy. Prerequisite: Economics 205D or 372.

---

**ECON377 - The Economics of Financial Derivatives & Financial Engineering**

**Subject**: ECON  
**Catalog Number**: 377  
**Title**: The Economics of Financial Derivatives & Financial Engineering

**Description**
Introduction to derivatives focused on economic functions as tools for hedging/risk management. Topics include: forwards, futures, swaps, options, parity conditions, binomial options pricing, Black-Scholes formula, financial engineering for risk management Value-at-Risk (VAR). Emphasis on intuition and common sense implementation of technical material. Abuses and potentials for arbitrage profits considered. Prerequisite: Economics 201D or 372. Recommended prerequisite: either a statistics/probability course or demonstrated knowledge of basic probability concepts such as discrete and continuous probability distributions, expected value, variance, and correlation.
<table>

**ECON407 - Soviet and Post-Soviet Economic History**

**Subject**: ECON  
**Catalog Number**: 407  
**Title**: Soviet and Post-Soviet Economic History  

**Description**  
This course traces economic factors leading to the downfall of the Russian Empire and the rise of the USSR, followed by an assessment of the collapse of the USSR. Particular attention is devoted to the NEP period, earlier Soviet economic models, the famine of the 1930s, the impact of WWII, industrialization and urbanization, Soviet planning, and declining productivity growth and life expectancy in the in the 1970s and 1980s. The course then explores the economic consequences of the USSR's collapse as well as the nature of recovery in various countries that followed. The course concludes with an overview of formal political economy models. Prerequisite: Economics 201D and (Economics 208D or 204D, either of which can be taken concurrently).

---

**ECON407D - Soviet and Post-Soviet Economic History**

**Subject**: ECON  
**Catalog Number**: 407D  
**Title**: Soviet and Post-Soviet Economic History  

**Description**

**ECON413 - Forecasting Financial Markets**

**Subject**: ECON  
**Catalog Number**: 413  
**Title**: Forecasting Financial Markets  

**Description**  
Introduces statistical models for financial price and risk. ARMA, GARCH, Value-at-Risk. Covers both theory underlying these models and practical implementation using statistical software (MATLAB). Prerequisite: (Mathematics 202, 212, 216, 221, or 222) and (Economics 204D or 208D, or Statistics 111 or 130, or Statistics 230/Mathematics 230, or Statistics 250/Mathematics 342).
ECON432S - Environmental Justice: The Economics of Race, Place, and Pollution
Subject: ECON
Catalog Number: 432S
Title: Environmental Justice: The Economics of Race, Place, and Pollution

Description:
Minorities, people of color, and low-income households bear a disproportionate burden from environmental pollution. Since the Clinton Administration, addressing environmental injustice has been among the policy objectives of the EPA. Course examines how environmental injustices may arise out of discriminatory behavior and/or market forces founded on individual, firm, and government incentives. We begin with the theoretical framework used to document and explain disproportionate exposures, then review existing empirical evidence through case studies and evaluate competing explanations for injustice using an economics framework. Prerequisite: Economics 201D and Economics 204D or 208D.

ECON434A - Political Economy of Immigration
Subject: ECON
Catalog Number: 434A
Title: Political Economy of Immigration

Description:
The regulation of labour immigration is among the most important and controversial public policy issues in high-income countries. Many countries in Europe and North America, including the UK and the US, have experienced very rapid increases in labour immigration over the past 20 years. Instructor consent is required.

ECON435S - Economics of Education
Subject: ECON
Catalog Number: 435S
Title: Economics of Education

Description:
A course in applied microeconomic policy analysis, focusing on the economic factors underlying the historical and current provision of education in the United States. Topics of interest include the private and social returns to education; the effect of scholastic inputs on student achievement (including teacher quality and class size); the valuation of school quality through house prices; and the role of incentives in increasing the efficiency with which education services are delivered. To facilitate a deeper understanding of such concepts, key econometric techniques used in empirical research are reviewed. Prerequisite: Economics 201D required; Economics 204D or 208D strongly recommended.

ECON436 - Global Inequality Research
Subject: ECON
Catalog Number: 436
Title: Global Inequality Research

Description:
Engagement of vertically integrated research teams in projects exploring racial and ethnic disparities exhibited and expressed in six arenas, employment, wealth, health, political participation, education, and arts and culture. Each team will produce a major paper that will qualify for submission to a refereed journal in the area (relevant to the focus of the study. Course is not open to students who have taken Public Policy 645 or 645S.)
ECON436S - Global Inequality Research Seminar

Subject: ECON
Catalog Number: 436S
Title: Global Inequality Research Seminar

Description:
Engagement of vertically integrated research teams in projects exploring racial and ethnic disparities exhibited and expressed in six arenas: employment, wealth, health, political participation, education, and arts and culture. Each team will produce a major paper that will qualify for submission to a refereed journal in the area relevant to the focus of the study. Course is not open to students who have taken Public Policy 645S.

ECON442 - Development Economics: Theory, Evidence and Policy

Subject: ECON
Catalog Number: 442
Title: Development Economics: Theory, Evidence and Policy

Description:
This course studies the past, present, and future of economic development. We begin by briefly learning about patterns of economic development through time and across countries. We then study a selection of specific development policy challenges chosen from conflict, education, health, governance, infrastructure, international aid, labor markets, and trade. We emphasize learning the tools that economists use to study economic development: statistical analysis of large datasets, economic models, and historical case studies. Prerequisite: Economics 201D and (204D or 208D).

ECON442S - Development Economics: Theory, Evidence and Policy (Seminar)

Subject: ECON
Catalog Number: 442S
Title: Development Economics: Theory, Evidence and Policy

Description:
This course studies the past, present, and future of economic development. We begin by briefly learning about patterns of economic development through time and across countries. We then study a selection of specific development policy challenges chosen from conflict, education, health, governance, infrastructure, international aid, labor markets, and trade. We emphasize learning the tools that economists use to study economic development: statistical analysis of large datasets, economic models, and historical case studies. Seminar version of Economics 442. Prerequisite: Economics 201D and (204D or 208D).

ECON438 - Public Finance

Subject: ECON
Catalog Number: 438
Title: Public Finance

Description:
Economic aspects of the allocative and distributive role of government in the economy, the incidence and efficiency of taxation, the effects of taxation on behavior, and analysis of major government spending programs. Prerequisite: Economics 201D or Public Policy 303D.
### ECON443 - Empirical Methods in Gender and Family Economics

**Subject**: ECON  
**Catalog Number**: 443  
**Title**: Empirical Methods in Gender and Family Economics

**Description**  
Explores topics in economics of gender, an exciting and active field in current economics research. Focus on theoretical models of labor and marriage markets as well as empirical applications. Students will apply economic tools to these topics. They will find, analyze and interpret publicly available data, and develop skills to think critically about gender issues and evaluate policy interventions. Some main topics include: gender gaps in wages and employment; education, majors and occupation choices; effects of parenthood; risk aversion, competitiveness, social norms; marriage and divorce, fertility, household specialization; the role of governments and firms.  
Prerequisite: Economics 204D.

### ECON444 - Equality of Opportunity: Theory, Evidence, and Policy

**Subject**: ECON  
**Catalog Number**: 444  
**Title**: Equality of Opportunity: Theory, Evidence, and Policy

**Description**  
Recent evidence highlights the potential for early interventions in mitigating inequality of opportunity. This course introduces students to the economics of such interventions. The course covers the datasets, quantitative tools, and theoretical frameworks that economists employ to answer policy-relevant questions impacting the lives of children. Topics of interest include the role of K–12 public education on intergenerational mobility, the causal effects of foster care, and the long-run economic consequences of early-life circumstances and government transfer payments. Recommended prerequisite: ECON 204D.

### ECON445 - Economics of Crime

**Subject**: ECON  
**Catalog Number**: 445  
**Title**: Economics of Crime

**Description**  
In the United States there is widespread interest across the political spectrum in reforming criminal justice policies. Social scientists have responded to this phenomenon with a flurry of research attempting to understand the circumstances that led to the creation of this new, expansive criminal justice system and its consequences. This course considers empirical research from economics literature on a variety of topics related to the criminal justice system. STATA or R required.  
Prerequisite: Economics 204D.

### ECON451 - Housing and the Economy

**Subject**: ECON  
**Catalog Number**: 451  
**Title**: Housing and the Economy

**Description**  
Housing contributes over 16% to U.S. GDP and is the largest asset on the household sector’s balance sheet, while the mortgage market constitutes the second largest U.S. credit market, just behind Treasuries and well ahead of corporate debt. In this course, we will study the economic forces driving housing and mortgage markets and its interactions with the wider macro economy. Topics include the drivers of house price dynamics, urbanization, gentrification and housing affordability, an introduction to real estate finance, mortgage design and default, the primary and secondary mortgage market and mortgage securitization, and the causes and consequences of housing driven recessions.

### ECON452 - Economic Growth

**Subject**: ECON  
**Catalog Number**: 452  
**Title**: Economic Growth

**Description**  
Examination of the enormous differences in living standards across countries, which reflect differences in growth experiences. Course studies both analytical foundations of modern growth theory and the most recent advances in modeling to shed light on old and new questions about such experiences. Not open to students with credit for Economics 352/International Comparative Studies 356. Prerequisite: Economics 210D and 210D and (204D or 208D).

### ECON453 - Advanced Econometrics

**Subject**: ECON  
**Catalog Number**: 453  
**Title**: Advanced Econometrics

**Description**  
This course surveys the formal theory of causality, how to identify it from data, and how these methods are used in applied microeconomics and public policy. While causality is the focus, the course will also introduce various nonparametric statistical methods as necessary. Prerequisite: Economics 204D or 208D.
<table>

<td>How Markets Work: Theory, Evidence and Empirical Tools</td>
</tr>
</tbody>
</table>

**Description**
Uses theoretical models & empirical tools to understand how markets work and implications for public policy/firm strategy. Introduces main theoretical models and empirical techniques used to study range of markets, applying these methods to understand issues/markets in detail. Topics may include auctions, mergers/antitrust policy, collusion, dynamic pricing of new products, price discrimination, insurance markets and advertising. Students will read/evaluate research papers and complete empirical problem sets, highlighting areas suitable for future research. Prerequisite: Economics 204D or 208D.

<td>465</td>
<td>Market Power and Public Policy</td>
</tr>
</tbody>
</table>

**Description**
The purpose of antitrust laws is to control how firms attain and maintain their market position, presumably for the betterment of consumers, or at least for the benefit of society. Using a rigorous set of tools from microeconomic and game theory, this class will investigate the underpinnings of policies meant to deal with market power broadly defined, such as antitrust laws, the regulation of public utilities, the regulation of financial markets, and anti-dumping rules. Prerequisite: Economics 201D.
### ECON468 - Political Economics: Collective Decisions and Individual Values

**Subject**: ECON  
**Catalog Number**: 468  
**Title**: Political Economics: Collective Decisions and Individual Values

**Description**
This course offers a theoretical introduction to collective decision making. The first part of the course surveys classic results in social choice theory. We address the extent to which a group of diverse individuals can have a coherent collective preference. The second part turns to models of electoral competition, political accountability, and political influence (such as lobbying and special interests, agenda setting, and vote buying). The last part of the course focuses on (mis)information in collective processes. Do mass elections aggregate citizens dispersed information? What are the electoral effects of media bias? Is political persuasion a concern? Prerequisite: Economics 201D.

### ECON471 - Financial Markets and Investment

**Subject**: ECON  
**Catalog Number**: 471  
**Title**: Financial Markets and Investment

**Description**
The structure and workings of financial markets. Topics include risk-return relationships, aspects of portfolio selection, the capital asset pricing model, the arbitrage pricing theory, fixed income analysis, and aspects of derivatives. Prerequisite: Economics 201D or 372; AND Economics 104D, or Statistical Science 111L, 130L, 230, or 250D, or Mathematics 230 or 342D.

### ECON471A - Financial Markets and Investments

**Subject**: ECON  
**Catalog Number**: 471A  
**Title**: Financial Markets and Investments

**Description**
The structure and workings of financial markets. Topics include risk-return relationships, aspects of portfolio selection, the capital asset pricing model, the arbitrage pricing theory, fixed income analysis, and aspects of derivatives. Prerequisite: Economics 201D or 372; AND Economics 104D, or Statistical Science 111L, 130L, 230, or 250D, or Mathematics 230 or 342D.

### ECON472S - Goodner Equity Research Project

**Subject**: ECON  
**Catalog Number**: 472S  
**Title**: Goodner Equity Research Project

**Description**
An introduction to the art and science of equity research. Using detailed financial statement analysis and other public sources of information to analyze companies. Comparables analysis, discounted cash flow, event studies, and outside-the-box ways to find evidence of hidden value in companies. Course will include periodic video conference with New York investment manager for practical applications.
ECON473 - Corporate Finance Theory: Governance, Incentives and Valuation

**Description**
Uses tools of contract theory (information economics, mechanism design, and game theory) to analyze key features of corporate structure, performance, and valuation. Investigates critical interactions among stakeholders in a modern business enterprise (directors, executives, management, labor, financiers, shareholders, and regulators) in achieving goals and objectives of the corporation. Topics include: reform of corporate governance and auditing, role of private equity, financial markets, and takeovers; efficient determination of leverage, dividends, liquidity, risk management, and design of managerial incentive packages. Prerequisite: Economics 201D.

ECON474S - The Eichel Asset-Backed Securitization Project

**Description**
Introduction to asset-backed securitization market; analysis of risk and return of securitized products as investment tools. History of US mortgages and securitized products, and factors leading to the credit crisis. Exposition of relevant econometrics techniques and risk evaluation models. Students will work on team-based projects in which they identify a relevant research question, collect data, and apply robust statistical analysis of their hypothesis. Course enhanced by period visiting lectures from alumnus Scott Eichel and colleagues at Barclays to discuss practical applications of research. Prerequisite: (Economics 204D or 208D or 372) and (Mathematics 202 or Mathematics 212).

ECON476 - Empirical Asset Pricing

**Description**
This course develops, examines, and applies models for portfolio decisions by investors and the pricing of securities in capital markets. While developing portfolio theory, we will study the extensive empirical work that characterizes movements in security prices, evaluates alternative investment and asset pricing models, and attempts to test those models and interpret the implications of those tests. This is a research oriented course with practical implementation of quantitative methods in finance, aimed at highly motivated and technically proficient undergraduate and master's students. Prerequisite: Economics 372/572 or Economics 471/571.

ECON477 - Fixed Income Markets and Quantitative Methods

**Description**
Areas of focus include: The value of money and discounted cash flow concepts, statistics, probability concepts, correlation & regression, understanding risks associated with bonds, and bonds with embedded options, and mortgages and the mortgage markets. Prerequisite: Economics 372.

ECON490 - Selected Topics in Economics

**Description**
Topics vary by semester. Check individual semester offerings for prerequisites. Instructor permission usually an option.

ECON490A - Duke-Administered Study Abroad: Advanced Special Topics in Economics

**Description**
Topics differ by section. Prerequisite: Economics 201D; check individual semester offerings for additional prerequisites. Instructor permission usually an option.
ECON490AS - Duke-Administered Study Abroad: Advanced Special Topics in Economics

Subject: ECON  
Catalog Number: 490AS  
Title: Duke-Administered Study Abroad: Advanced Special Topics in Economics

Description: Topics differ by section. Prerequisite: Economics 201D; check individual semester offerings for additional prerequisites. Instructor permission usually an option.

ECON490S - Selected Topics in Economics

Subject: ECON  
Catalog Number: 490S  
Title: Selected Topics in Economics

Description: Seminar version of Economics 490. Prerequisite: Economics 201D; check individual semester offerings for additional prerequisites. Instructor permission usually an option.

ECON493 - Honors Research Independent Study

Subject: ECON  
Catalog Number: 493  
Title: Honors Research Independent Study

Description: Individual research in a field of special interest under the supervision of a faculty member, the central goal of which is the production of an honors thesis, containing significant analysis and interpretation of a previously approved topic. Prerequisites: Economics 201D and Economics 210D. Consent of instructor and Director of Undergraduate Studies required.

ECON494 - Research Independent Study

Subject: ECON  
Catalog Number: 494  
Title: Research Independent Study

Description: Individual research in a field of special interest under the supervision of a faculty member, containing significant quantitative analysis and interpretation of a previously approved topic. Department consent required. Prerequisite: Economics 201D and 210D.

ECON495S - Honors Seminar I

Subject: ECON  
Catalog Number: 495S  
Title: Honors Seminar I

Description: First course in two-semester honors sequence. Guided research on student-selected topics. Iterative presentations and writing assignments on current literature related to student-selected topics and of student-developed research proposals. Course requires completion of research proposal suitable for write-up as honors thesis in Economics 496S. Prerequisite: Economics 201D and 210D and (204D or 208D).

ECON496S - Honors Seminar II

Subject: ECON  
Catalog Number: 496S  
Title: Honors Seminar II

Description: Following Economics 495S, iterative forum for conducting original research culminating in a substantive research project suitable for submission as an honors thesis. Prerequisite: Economics 201D and 210D.

ECON80S - Special Topics

Subject: ECON  
Catalog Number: 80S  
Title: Special Topics

Description: Introductory special topics course.

ECON89S - First-Year Seminar

Subject: ECON  
Catalog Number: 89S  
Title: First-Year Seminar

Description: Topics vary each semester offered.

| ECS101D | 101D          | The Dynamic Earth |
| Description |
| Introduction to the dynamic processes that shape the Earth and the environment and their impact upon society. Volcanoes, earthquakes, seafloor spreading, floods, landslides, groundwater, seashores and geohazards. Emphasis on examining the lines of inductive and deductive reasoning, quantitative methods, modes of inquiry, and technological developments that lead to understanding the Earth's dynamic systems. |

| ECS102  | 102            | The Dynamic Oceans |
| Description |
| The oceans and their impact on the Earth's surface, climate, and society. Topics include seafloor evolution, marine hazards, ocean currents and climate, waves and beach erosion, tides, hurricanes/cyclones, marine life and ecosystems, and marine resources. Emphasis on the historical, society and economic roots of oceanography, the formulation and testing of hypotheses, quantitative assessment of data, and technological developments that lead to understanding of current and future societal issues involving the oceans. |

| ECS103  | 103            | Climate Change for Future Leaders |
| Description |
| The science of climate change, including the factors that control the Earth's climate system, the methods used to study climate variations, the nature of climate models and prediction scenarios, the changes of the Earth's climate through time, and the evidence that modern-day climate change is human-induced. Related topics include examination of the impacts of climate change on past and present societies, biodiversity, and human health, as well as potential alternative energy and engineering solutions, and the social, political, religious and economic challenges associated with responding and adapting to climate change. |

| ECS201L | 201L          | The Solid Earth: Minerals, Rocks, and Structural Geology |
| Description |
| Description and interpretation of minerals, rocks and geologic structures. Lectures on theoretical aspects, lab on practical applications and use of petrographic microscope. Instructor consent required. Prerequisite: Earth and Ocean Sciences 101. |

<p>| ECS202  | 202            | Atmosphere and Ocean Dynamics |
| Description |
| Introduction to the dynamics of ocean and atmospheric circulations, and their role in the global climate system. Prerequisite: Mathematics 21 and 122, Physics 141L or consent of instructor. |</p>

<td>205</td>
<td>ECS205 - The Future of the Oceans: From Science to Policy</td>
<td>The ocean covers two-thirds of the planet, forming the backbone of healthy ecosystems and many growing economies worldwide. Despite this importance, we know far less about the oceans than terrestrial environments. This course provides an overview of why the oceans matter, including the many ways people use and depend on the oceans. We will discuss the major issues that threaten our oceans, and students will explore emerging solutions to these challenges of changing ocean use using market-based, scientific, and policy approaches. Course will include an optional weekend field trip to the Duke Marine Lab in Beaufort.</td>
</tr>
</tbody>
</table>
ECS210S - Exploring Earth Sciences: Field and Laboratory Investigations

Subject: ECS  
Catalog Number: 210S  
Title: Exploring Earth Sciences: Field and Laboratory Investigations

Description
Exploration of key concepts in Earth sciences using field and laboratory techniques. Focus on collecting, analyzing and interpreting observational, geophysical, and geochemical data in order to experience how scientists conduct research to answer fundamental questions about how the Earth works. Modules vary by semester and may include local and global studies of plate tectonics, geological history, groundwater and surface water, geohazards, geophysical imaging of the sub-surface, geochemical chemical analyses, remote sensing studies, and how humans impact these systems. Local fieldwork and optional weekend fieldtrip to Appalachians or NC coast. Pre- or co-requisite: ECS/EOS 101.

ECS212S - Exploring Climate Sciences: Data-driven investigations

Subject: ECS  
Catalog Number: 212S  
Title: Exploring Climate Sciences: Data-driven investigations

Description
Exploration of key concepts in climate sciences using field, computational and laboratory techniques. Focus on collecting, analyzing and interpreting climate data and observations, in order to experience how scientists conduct research to answer fundamental questions about how the climate system works. Modules vary by semester, including local and global examinations of short-term and long-term climate variability and human impacts on the climate system. Field trip to a local weather station, e.g. Duke Forest or NC ECONet, to learn how meteorological data are collected. Recommended pre/corequisite: ECS/EOS 103.

ECS220 - Water Sciences: Principles and Challenges

Subject: ECS  
Catalog Number: 220  
Title: Water Sciences: Principles and Challenges

Description
Fundamental principles and challenges in water sciences on local, regional and global scales. Topics include the global hydrological cycle, impact of climate change on water availability, principles of surface water and groundwater flow, fundamentals of water quality, the energy-water nexus, and scientific and technological approaches used to trace pollutants and remediate contamination. Relationships between human activities (anthropogenic effects) and naturally occurring processes that affect local and global water availability and quality. Emphasis on cutting edge water research and human and environmental impacts. Recommended prerequisite: Earth and Ocean Sciences 101, Environment 102, or equivalents, and introductory chemistry.

ECS226DS - Field Methods in Earth and Environmental Sciences

Subject: ECS  
Catalog Number: 226DS  
Title: Field Methods in Earth and Environmental Sciences

Description
Introduction to basic field methods used in the earth and environmental sciences. Field investigations focus on topics such as groundwater and surface water movements, soil chemistry and identification, topographic and geologic mapping, the atmosphere/soil interface, and plant identification and distributions. Design of a field investigation, collection of data to address a specific goal, and interpretation and reporting of the results. Emphasis on learning to report field results in the format of scientific publications. Visits to five local field sites. Open only to juniors and seniors.
ECS226S - Field Methods in Earth and Environmental Sciences

Subject: ECS  
Catalog Number: 226S  
Title: Field Methods in Earth and Environmental Sciences

Description: Introduction to basic field methods used in the earth and environmental sciences. Field investigations focus on topics such as groundwater and surface water movements, soil chemistry and identification, topographic and geologic mapping, the atmosphere/soil interface, and plant identification and distributions. Design of a field investigation, collection of data to address a specific goal, and interpretation and reporting of the results. Emphasis on learning to report field results in the format of scientific publications. Visits to five local field sites. Open only to juniors and seniors.

ECS231 - Energy and the Environment

Subject: ECS  
Catalog Number: 231  
Title: Energy and the Environment

Description: Overview of the challenges confronting humanity as a consequence of our reliance on energy. Challenges include dwindling supplies, rising demand and environmental degradation. Realistic responses require an understanding of the complexity of the energy system, including energy resources, uses, and impacts, in the context of social, political and economic imperatives. Lectures will be augmented by presentations from guest speakers from industry, government and non-profit organizations.

ECS239 - Introduction to Atmospheric Chemistry: From Air Pollution to Climate Change

Subject: ECS  
Catalog Number: 239  
Title: Introduction to Atmospheric Chemistry: From Air Pollution to Climate Change

Description: Integrated scientific background for the impact of humans on the natural environment. Topics covered include greenhouse gases and climate, local and regional ozone pollution, long-range pollution transport, acid rain, atmospheric particulate matter pollution, and stratospheric ozone depletion. Prerequisite: Chemistry 101DL.

ECS272A - Analysis of Ocean Ecosystems

Subject: ECS  
Catalog Number: 272A  
Title: Analysis of Ocean Ecosystems

Description: The history, utility, and heuristic value of the ecosystem; ocean systems in the context of Odum's ecosystem concept; structure and function of the earth's major ecosystems. Taught in Beaufort at Duke Marine Lab. Prerequisite: one year of biology, one year of chemistry, or consent of instructor.

| ECS322     | 322            | Hydrologic and Environmental Data Analysis |
| Description|                | Focus on development of quantitative      |
|            |                | approaches used to interpret observations |
|            |                | on hydrological and environmental processes|
|            |                | across space and time, with application to |
|            |                | case studies in water science. In this     |
|            |                | course, we will (1) generate knowledge of  |
|            |                | fundamental processes in aquatic ecosystems|
|            |                | as they relate to contemporary issues,     |
|            |                | (2) apply data science skills to datasets  |
|            |                | in the water resources field, and (3)     |
|            |                | quantitatively explore a topic in aquatic  |
|            |                | science through an in-depth course project.|
|            |                | Recommended prerequisite: prior experience |
|            |                | with computational software (R preferred; |
|            |                | Stata, MATLAB, and/or GIS acceptable).     |
|            |                | Instructor consent required.               |

| ECS323     | 323            | Landscape Hydrology                        |
| Description|                | Introduction to hydrology examining how   |
|            |                | rainfall and snowmelt become streamflow,   |
|            |                | groundwater and atmospheric water, with     |
|            |                | emphasis on hydrological processes inside  |
|            |                | watersheds. Topics include: the hydrologic|
|            |                | cycle and water balances, evapotranspiration|
|            |                | and snow energy balances, vadose zone      |
|            |                | hydrology, hydrogeology, hyporheic zones,  |
|            |                | riparian zones, streamflow generation      |
|            |                | mechanisms, biogeochemical budgets, and    |
|            |                | field measurement techniques. Linkages     |
|            |                | between physical hydrology and broader    |
|            |                | ecological and environmental sciences will  |
|            |                | be highlighted.                            |

| ECS325     | 325            | The Anthropocene: The Next Epoch of Geologic|
| Description|                | History                                    |
|            |                | Introduction to the next epoch of geologic |
|            |                | history. The evolution of the technosphere,|
|            |                | the global human-technological system that  |
|            |                | increasingly dominates biology, hydrology,  |
|            |                | and other major natural earth systems.     |
|            |                | The future of the earth and humanity.      |
|            |                | Instructor consent required.               |
|            |                | Prerequisite: Earth and Climate Sciences 101|
|            |                | or 203.                                    |

| ECS355     | 355            | Global Warming                             |
| Description|                | Broad, interdisciplinary course on the      |
|            |                | observations, causes, and consequences of  |
|            |                | climate change. Course will cover modern  |
|            |                | and paleoclimate observations, human and   |
|            |                | natural drivers, and links between drivers |
|            |                | and responses. Building on this physical   |
|            |                | science base, course will then analyze how  |
|            |                | socioeconomic choices affect future        |
|            |                | climate as well as the factors influencing |
|            |                | those choices, including risk analyses,     |
|            |                | geoengineering proposals, climate metrics  |
|            |                | and the media.                             |

| ECS355D    | 355D           | Global Warming                             |
| Description|                | Broad, interdisciplinary course on the      |
|            |                | observations, causes, and consequences of  |
|            |                | climate change. Course will cover modern   |
|            |                | and paleoclimate observations, human and   |
|            |                | natural drivers, and links between drivers |
|            |                | and responses. Building on this physical   |
|            |                | science base, course will then analyze how  |
|            |                | socioeconomic choices affect future        |
|            |                | climate as well as the factors influencing |
|            |                | those choices, including risk analyses,    |
|            |                | geoengineering proposals, climate metrics  |
|            |                | and the media.                             |
ECS359 - Fundamentals of GIS and Geospatial Analysis

**Subject**: ECS  
**Catalog Number**: 359  
**Title**: Fundamentals of GIS and Geospatial Analysis  

**Description**: Fundamental aspects of geographic information systems and satellite remote sensing for environmental applications. Concepts of geographic data development, cartography, image processing, and spatial analysis. Consent of instructor is required.

ECS364S - Changing Oceans

**Subject**: ECS  
**Catalog Number**: 364S  
**Title**: Changing Oceans  

**Description**: Our oceans are under severe stress. This seminar will explore human disturbances of marine environments, including ocean warming, sea level rise, melting of ice caps and sea ice, ocean acidification, coastal eutrophication, changes in primary production and food web dynamics, invasive species, overfishing, increased subsurface hypoxia, changes in circulation, stratification, and physical, chemical (e.g. oil spills) and noise pollution.

ECS365 - Introduction to Weather and Climate

**Subject**: ECS  
**Catalog Number**: 365  
**Title**: Introduction to Weather and Climate  

**Description**: Introduction to weather and climate. Topics include atmospheric structure, composition, circulation and energy properties; severe weather events such as cyclones, hurricanes, and tornadoes; ozone depletion; natural climate variability; climate change and global warming.

ECS370A - Physical Oceanography

**Subject**: ECS  
**Catalog Number**: 370A  
**Title**: Physical Oceanography  

**Description**: Fundamental physical principles of ocean circulation. Physical properties of seawater; forces acting on the ocean such as heat, pressure gradients, wind stress, rotation, and friction; and conservation equations for heat, mass and momentum. Applications include geostrophic balances, thermal wind, coastally trapped waves, El Nino/ENSO, and tidal circulation. Taught in Beaufort at Duke Marine Lab.  
Prerequisite: one year of calculus and one semester of physics, or permission of instructor.

ECS374L - Marine Ecology

**Subject**: ECS  
**Catalog Number**: 374L  
**Title**: Marine Ecology  

**Description**: Distribution, abundance, and diversity of marine organisms, including a survey of the major flora and fauna in the marine environment, including physical characteristics, adaptation to environment, species interactions, biogeography, larval recruitment, and biodiversity and conservation of communities found in rocky shores, tidal flats, beaches, marshes, mangrove, coral reefs, and subtidal areas. Lectures, field excursions, lab exercises and an independent project. Taught fall, spring, and summer; spring enrollment requires travel. Recommended prerequisite: AP biology or introductory biology.

ECS374LA - Marine Ecology

**Subject**: ECS  
**Catalog Number**: 374LA  
**Title**: Marine Ecology  

**Description**: Distribution, abundance, and diversity of marine organisms, including a survey of the major flora and fauna in the marine environment, including physical characteristics, adaptation to environment, species interactions, biogeography, larval recruitment, and biodiversity and conservation of communities found in rocky shores, tidal flats, beaches, marshes, mangrove, coral reefs, and subtidal areas. Lectures, field excursions, lab exercises and an independent project. Taught in Beaufort at Duke Marine Lab. Taught fall, spring, and summer; spring enrollment requires travel. Recommended intro bio or AP Bio credit. Instructor consent required, visit DUML website for details.

ECS401 - Field Exploration of the Geology of North Carolina

Subject: ECS
Catalog Number: 401
Title: Field Exploration of the Geology of North Carolina

Description: Introduction to the geological history of North Carolina with an emphasis on active learning and field-based inquiry. Class time serves as preparation and background for two one-day and one overnight weekend field trips. An introductory geology background is useful but not required.

ECS402S - Volcanology: Geology of Hawaii

Subject: ECS
Catalog Number: 402S
Title: Volcanology: Geology of Hawaii

Description: Geology of volcanic processes and the benefits and hazards they present to society. Lectures, discussion and student presentations of independent research reports. Required field trip to Hawaii during spring break. Prerequisite: Earth and Ocean Climate 101 recommended. Consent of instructor required.

ECS403 - Geology and Natural History of the Yellowstone Region

Subject: ECS
Catalog Number: 403
Title: Geology and Natural History of the Yellowstone Region

Description: This course is a laboratory and field-trip based examination of the geological history of Yellowstone Country. We will look at the formation and deformational history of the Wyoming Thrust Belt, the volcanic history of the Absaroka Range, the dramatic activity and influence of the arrival of the Yellowstone Hotspot during the Pleistocene (and present day), the complex tectonic and world-famous glacial history of the Grand Tetons, and learn about the unique Eocene lacustrine and fluvial settings of the Wyoming Fossil Basin.

ECS410S - Senior Capstone Experience

Subject: ECS
Catalog Number: 410S
Title: Senior Capstone Experience

Description: Senior capstone field trip course. Field location varies. Topics in geology, hydrology, biology, climate, and other environmental subjects as appropriate for field area, especially human impact on the earth and the role of earth scientists as observers and teachers of earth-system change. Course content partially determined by students. Prerequisites: Open only to senior Earth and Ocean Climate majors. Department consent required.

EDUC101 - Social and Philosophical Foundations of Education

Subject: EDUC
Catalog Number: 101
Title: Social and Philosophical Foundations of Education

Description: Interdisciplinary examination of issues confronting American education, incorporating historical, political, economical, philosophical, and social perspectives. Exploration of ways cultural influences and differences have shaped public schools. Students participate in structured service learning experience in which they reflect on ethical issues related to schooling. Required participation in service-learning.

EDUC101S - Social and Philosophical Foundations of Education

Subject: EDUC
Catalog Number: 101S
Title: Social and Philosophical Foundations of Education

Description: Interdisciplinary examination of issues confronting American education, incorporating historical, political, economical, philosophical, and social perspectives. Exploration of ways cultural influences and differences have shaped public schools. Students participate in structured service-learning experience in which they reflect on ethical issues related to schooling. Required participation in service-learning.
EDUC111FS - Pursuit of Equality: Rethinking Schools - Lens of Social Justice

Subject: EDUC  
Catalog Number: 111FS  
Title: Pursuit of Equality: Rethinking Schools - Lens of Social Justice

Description: In 1954 the Supreme Court case Brown versus the Board of Education forever changed American schools by ending segregation and creating educational equity. Or did it? Are today's schools any more inclusive or socially just than schools were 50 years ago? Examination of ways schools may or may not perpetuate and reproduce social inequities. Focus on recent efforts to imagine and create socially-just schools. Discussion of our ethical responsibilities as civically engaged citizens to work towards educational equality and provide support of schools that are inclusive, culturally responsive, and democratic. Required service-learning experience working with children in a Durham public school.

EDUC112FS - Medical Ethics, Aging, and End of Life Care in the US

Subject: EDUC  
Catalog Number: 112FS  
Title: Medical Ethics, Aging, and End of Life Care in the US

Description: Study of medical ethics, policy, clinical, and personal issues in working with dying and bereaved people. Focuses on diverse populations in ethnicity, culture, socioeconomic status, education, sexual orientation, and more. Various models for providing care to the dying and bereaved. Visits from medical personnel. Works to be read/viewed may include 'Me, Earl, and the Dying Girl,' Charon's 'Narrative Medicine,' Gawande's 'Being Mortal,' Tolstoy's 'Death of Ivan Ilich,' Kalanithi's 'When Breath Becomes Air,' and policy articles on end of life care and physician assisted suicide. Focus Program students only. Service-Learning course. Instructor consent required.

EDUC113FS - Enterprising Leadership and Civic Engagement

Subject: EDUC  
Catalog Number: 113FS  
Title: Enterprising Leadership and Civic Engagement

Description: An exploration of ways that students can exercise enterprising leadership to develop innovative, resourceful solutions to important civic issues within and external to Duke University. Course includes four primary focuses: understanding models of change, exploring and practicing enterprising leadership behaviors, reflecting upon ethical values, and designing and implementing a civic engagement project on campus. Open only to students in the Focus Program. Instructor consent required.

EDUC115FS - Culture, Language, and Purposeful Discomfort in American Classrooms

Subject: EDUC  
Catalog Number: 115FS  
Title: Culture, Language, and Purposeful Discomfort in American Classrooms

Description: Examine linguistic features that participants in schools throughout America use to negotiate classroom culture. Focus on verbal and nonverbal communication through lens of historical and current primary sources that give voice to a range of American experiences. Analyze discursive moves based in (but not limited to) racial, ethnic, gender, and socioeconomic biases. Consider how teachers and students can collaborate to: (1) develop and build on discourses that respectfully address potentially uncomfortable topics; and (2) foster inclusive classroom communities founded on empathy, critical thinking, active listening, and objectivity. Open only to students in the Focus Program.
EDUC117FS - Race and Language

Subject: EDUC
Catalog Number: 117FS
Title: Race and Language

Description:
We will examine the relationship between race and language by interrogating texts in medical ethics, gleaning from them wider lessons for navigating prior controversies at the juncture of racial and social difference and medicine (for instance, phrenology and eugenics). We will also examine features of medical and scientific practice that overlap with the study of language, such as contract, disclosure, survey design and policymaking, and how the medical profession and medical practice work to correct past mistakes in interactions with different communities of race.

EDUC118FS - Critical Race Theory in Education

Subject: EDUC
Catalog Number: 118FS
Title: Critical Race Theory in Education

Description:
Critical exploration of systemic and endemic racism and ways that structural racism intersects with educational systems. Course begins with an examination of identity, positionality, privilege, bias at the individual level, then moves to an analysis of institutional structures and systems. Students will reflect on their educational experiences and apply case study analysis to their own K-12 education utilizing the framework of critical race theory. Students will examine data on educational inequities and work in teams to prepare a policy proposal that addresses systemic racial inequities within K-12 education.

EDUC150 - SOLD: The Science of Learning at Duke

Subject: EDUC
Catalog Number: 150
Title: SOLD: The Science of Learning at Duke

Description:
SOLD: The Science of Learning at Duke is designed to empower you to become an active, strategic learner at Duke and beyond. Grounded in the learning sciences, you will discover well-researched strategies and techniques that will give you a rich understanding of best practices and create new pathways for your growth. Course topics will include self-management, strategic learning, self-awareness, interdependence, and well-being. Throughout the semester, you will explore your unique approach to learning and apply strategies specific to you.

EDUC173S - The Ways and Wisdom of First-Gen College Students

Subject: EDUC
Catalog Number: 173S
Title: The Ways and Wisdom of First-Gen College Students

Description:
This course examines the experience of first-generation college students, including their unique challenges, strategies, observations, and analyses. It is intended equally for students of all backgrounds and will, through the ethnographic method, train students in empathetic listening and participant-observation, as well as socially contextualized and cross-culturally comparative analysis.

EDUC188S - Teaching Well-Being: Using the 5 Senses to Achieve Well-Being

Subject: EDUC
Catalog Number: 188S
Title: Teaching Well-Being: Using the 5 Senses to Achieve Well-Being

Description:
This course will evaluate the concepts of wellness and well-being as defined through various cultures. Students will discern definitions of well-being and evaluate theories to maintain and pursue a sense of well-being, happiness and serenity. Integration of mind, body and spirit will be defined. Students will develop a personal application of wellness, develop and implement an actionable program and evaluate success of meeting learning objectives to achieve an evolved view of integrated well-being.

EDUC190FS - Focus Special Topics

Subject: EDUC
Catalog Number: 190FS
Title: Focus Special Topics

Description:
This will be a special topics course for a Focus class within the Program in Education.

EDUC220 - Race, Power, and Identity: From Ali to Kaepernick

**Subject**  
EDUC

**Catalog Number**  
220

**Title**  
Race, Power, and Identity: From Ali to Kaepernick

**Description**  
Exploration of historic and contemporary psycho-social and socio-cultural aspects of the African American sport experience. Examination of research that addresses the effect of physical differences, racial stereotyping, identity development, gender issues, and social influences on African American sport participation patterns. Analysis of sport as a microcosm of society with an emphasis on examining associated educational and societal issues.

EDUC234S - Anthropology and Education

**Subject**  
EDUC

**Catalog Number**  
234S

**Title**  
Anthropology and Education

**Description**  
Exploration of different conceptions of culture and the importance of employing cultural lenses to examine the process of education. Investigation, in particular, of the impact of culture and issues of race, class and gender in American schools.

EDUC239 - Marxism and Society

**Subject**  
EDUC

**Catalog Number**  
239

**Title**  
Marxism and Society

**Description**  
Introduction to Marx's core concepts, such as alienation, commodity, and revolution. Includes examination of Marx's own major historical & political analyses, his economic texts, and his philosophical writings. Students also gain familiarity with the role of Marxist thought in different fields and disciplines, including feminist theory, anthropology, history, political science, and literary studies.

EDUC240 - Educational Psychology

**Subject**  
EDUC

**Catalog Number**  
240

**Title**  
Educational Psychology

**Description**  
Principles of developmental, social, and cognitive psychology as applied to education, with a focus on how children learn. Examination of the impact on learning of race, class, gender, and ethnicity, including a comparative analysis of cultural differences in American schools. Through structured service learning experiences in local schools, students reflect through writing on ethical issues in teaching. Required service-learning.

EDUC240-1 - Educational Psychology

**Subject**  
EDUC

**Catalog Number**  
240-1

**Title**  
Educational Psychology

**Description**  
Principles of developmental, social, and cognitive psychology as applied to education, with a focus on how children learn. Examination of the impact on learning of race, class, gender, and ethnicity, including a comparative analysis of cultural differences in American schools. Through structured service learning experiences in local schools, students reflect through writing on ethical issues in teaching. Online equivalent to Education 240. Not open to students who have taken Education 240.

EDUC240S - Educational Psychology

**Subject**  
EDUC

**Catalog Number**  
240S

**Title**  
Educational Psychology

**Description**  
Principles of developmental, social, and cognitive psychology as applied to education, with a focus on how children learn. Examination of the impact on learning of race, class, gender, and ethnicity, including a comparative analysis of cultural differences in American schools. Through structured service learning experiences in local schools, students reflect through writing on ethical issues in teaching. Required service-learning.
EDUC241 - Promising Paradigms: Issues and Innovations in American Classrooms

Description
Examination of promising educational initiatives and reform efforts, analysis of federal and state mandates and policies concerning educational issues, and exploration of innovative ideas and programs designed to advance classrooms into the 21st century. Focus given to the ethical and political implications of reforming America’s schools within the context of policy development. Note: This is an online course with both synchronous and asynchronous components. Contact the instructor for additional information. Consent of instructor required.

EDUC243S - Children, Schools, and Society

Description
The processes by which children are educated in the United States. Ways children acquire through schooling social skills, moral values, and a sense of their role in society. Evaluation of the appropriateness of these goals for schooling, how schooling shapes children’s development, and how the education policies that sanction these processes are formed. Application of theory and research for solving complex societal problems that confront children, schools, and communities. Required participation in service-learning.

EDUC244S - Children’s Self Expression: Literacy Through Photography

Description
Children’s self-expression and education through writing, photography and documentary work. Focus on reading and critical interpretation of images. The history, philosophy, and methodology of Literacy Through Photography. Includes internship in an elementary or middle school classroom. Required participation in service-learning.

EDUC255S - Literacy, Writing, Tutoring

Description
Theories of literacy and high school and college level teaching tutoring practices. Composition studies, literacy studies, and writing center/tutoring theories. Includes tutoring students.

EDUC262 - Designing Transformative Learning

Description
The term 'open source' is frequently used to denote software source code that is freely available, modifiable, and shareable. However, the term has much wider applicability and relevance. The core values of open source—open knowledge and access to information, collaboration and community, transparency and meritocracy, inclusion and diversity, and iterative creation and adaptability—have profound implications for 21st century learning. In this learner-centered, project-based course, students will research the intersection of open source concepts, technology, and education innovation and share their knowledge across public-facing open-access media.

EDUC267S - The Dialog Laboratory: Experiences in Group Communication

Description
Interactive, performance-based course grounded in dialog and discussion. Open-ended components of the course make learning emerge through doing, reflecting, and adjusting to the particularities of the people involved. Strong emphasis on student-built directions and norms. The laboratory approach to the classroom empowers students to decide how dialog skills are used and what goals to pursue individually and collectively. A course for self-directed students seeking sustained adventures into new communicative experiences and sharpened audience adaptation. Instructor feedback and readings provide ample concepts to service students’ needs and goals.
EDUC272S - Overlooked Children: Topics of Equity and Access in Gifted Education

Subject: EDUC  
Catalog Number: 272S  
Title: Overlooked Children: Topics of Equity and Access in Gifted Education

Description
The underrepresentation of certain groups in gifted programs persists. This course will examine the enrollment disparities that exist in gifted and advanced programs, critically review the assessment practices used to identify gifted students, and explore educational policy designed to reconcile equity and access issues in education. A variety of partners will host students for the service-learning component for this course. Potential partners include, but are not limited to, local schools, non-profit organizations, and research centers focusing on equity and access issues in education.

EDUC275S - Complex Issues in United States Healthcare

Subject: EDUC  
Catalog Number: 275S  
Title: Complex Issues in United States Healthcare

Description
Investigates historical, educational, social, political, economic and ethical implications of healthcare in US. Explores educational preparation of providers and current calls for reform. Analyzes health outcomes and costs as well as implications for future national economy. Investigates proposed healthcare models, methods of educating healthcare workers for an aging population, inequalities in distribution and political and ethical implications of change. Writing intensive: includes short weekly written reflections of assigned readings, mid-term paper on either education or policy. Final project will investigate solutions for identified population health problem.

EDUC283S - The Democratic Mission of American Higher Education

Subject: EDUC  
Catalog Number: 283S  
Title: The Democratic Mission of American Higher Education

Description
This seminar will explore the purposes of American higher education, with a focus on the origins of higher education in this country and important period of institutional evolution. We will interrogate the relationship between democracy and higher education in two ways. First, by understanding how democracy provides the necessary conditions for higher education to pursue its core mission. Second, by looking at how higher education promotes democratic values. The course will pay particular attention to post WWII American higher education, with a focus on important contemporary debates on higher education issues.

EDUC285S - Critical Pedagogy of Hip Hop

Subject: EDUC  
Catalog Number: 285S  
Title: Critical Pedagogy of Hip Hop

Description
This course examines the role of critical pedagogy in developing learning environments that engage and empower youth. Emphasis is placed on the context of Hip Hop as a foundation for instructional decision-making and social justice advocacy/activism. Students will explore the historical and socio-cultural foundations of education initiatives, teaching and learning strategies, federal and state mandates and educational policy issues that contribute to marginalization. Innovations, interdisciplinary collaboration and community programs designed to strengthen schools and communities will be highlighted.
**EDUC289S - Learning Outcomes**

**Assessment: Understanding and Using Evidence to Guide Teaching, Learning, & Policy**

**Description**
The practice of assessment and its impacts on education policy and curriculum. Course introduces undergraduate students to the practice of learning outcomes assessment in higher education – its traditions, contexts, and objectives. Students will cultivate critical judgment about the issues facing higher education and the ways in which the practice of assessment can help explain and mitigate those issues. At some point in their careers, students will be asked to design, execute, or evaluate a body of research. Course provides fundamental knowledge and skills necessary to engage in social science research, particularly research in education.

**EDUC290A - Duke-Administered Study Abroad: Special Topics in Education**

**Description**
Topics differ by section.

**EDUC290S - Selected Topics**

**Description**
Selected topics seminar.
EDUC290T - Freshman-Sophomore Tutorials (TOP)

Subject: EDUC  
Catalog Number: 290T  
Title: Freshman-Sophomore Tutorials (TOP)

Description: Small group discussions of significant books, authors, and ideas in education. May be repeated. Consent of instructor and Director of Undergraduate Studies required.

EDUC303S - De/Re/Segregation in Education: A Case of Back to the Future?

Subject: EDUC  
Catalog Number: 303S  
Title: De/Re/Segregation in Education: A Case of Back to the Future?

Description: Course traces timeline of segregation, desegregation, integration and resegregation in education in the United States, from policies and practices first enacted at this nation's birth through current policies and practices that challenge our commitments to opportunity, equality, and equity. Course invites students to study historical and contemporary practices in education, comparing segregation and resegregation as moments in the education history of the US, taking recent developments in North Carolina education policy and practice as cases to enrich understanding. Students engage in a minimum of 20 hours of planned service activities.

EDUC307S - Issues of Education and Immigration

Subject: EDUC  
Catalog Number: 307S  
Title: Issues of Education and Immigration

Description: Topics include Latino/a/x identities, educational pathways for Spanish-speakers in our community, relevant public policy and legislation, and social action. Required 20 hours outside of class with assigned community partners. Assessment on knowledge of content, oral and written Spanish, and participation in service. One 300-level Spanish course recommended prior to enrolling.

EDUC315S - Argument Across the Disciplines

Subject: EDUC  
Catalog Number: 315S  
Title: Argument Across the Disciplines

Description: This course provides practice in analyzing and using the conventions of research writing in students’ chosen disciplines and hones students’ awareness of how these conventions make the advancement of disciplinary knowledge possible. This course will be most useful for students who are considering multiple majors, research-intensive projects or theses, and students who are considering graduate school or any job that will require them to work closely with findings produced by researchers. Prerequisite: Writing 101.

EDUC333S - Legal Issues in Education

Subject: EDUC  
Catalog Number: 333S  
Title: Legal Issues in Education

Description: A case analysis approach giving students an opportunity to identify and review past, current, and emerging legal issues and theories in education. Topics include students' rights (for example search and seizures, due process), institutional liability and teacher's rights at the elementary and secondary levels and in the college setting.

EDUC345S - Asians in American Higher Education: Trends and Issues

Subject: EDUC  
Catalog Number: 345S  
Title: Asians in American Higher Education: Trends and Issues

Description: An interdisciplinary examination of the history and experience of students of Asian descent at the higher education level, including demographic trends, sociocultural development, and access and support. Special attention will be given to intragroup diversity within the Asian/American community in today's global context.
EDUC347S - The University as a Culture: A Survivor's Guide

Subject: EDUC  
Catalog Number: 347S  
Title: The University as a Culture: A Survivor's Guide

Description
The university generates some of the most influential forms of knowledge in the world, yet we seldom examine the historically specific cultural, social, political, and economic conditions under which knowledge is produced in the laboratories, classrooms, offices, dormitories, Greek-letter societies, and sports complexes that are the infrastructure of the academy. This course will employ readings from a range of disciplines, as well as the investigative and interpretive methods of cultural anthropology, to examine the taken-for-granted context of university life.

EDUC356S - Digital Durham

Subject: EDUC  
Catalog Number: 356S  
Title: Digital Durham

Description
Representing Durham past and present with digital media. Digitize historical and cultural materials, research in archives and public records and present information through various forms including web pages, databases, maps, video and other media. Analysis of social impact of new representations of place and space.

EDUC390T-1 - Junior-Senior Tutorials (Topics)

Subject: EDUC  
Catalog Number: 390T-1  
Title: Junior-Senior Tutorials (Topics)

Description
Small group discussions of significant books, authors, and ideas in education. The availability of tutorials, their content, and the instructors will be announced before preregistration. Consent of instructor required.

EDUC390T-2 - Junior-Senior Tutorials

Subject: EDUC  
Catalog Number: 390T-2  
Title: Junior-Senior Tutorials

Description
Small group discussions of significant authors and ideas in education. Different courses indicated by letter. May be repeated. Consent of instructor required.

EDUC391 - Independent Study

Subject: EDUC  
Catalog Number: 391  
Title: Independent Study

Description
Directed readings in a field of special interest under the supervision of a faculty member, the central goal of which is a substantive paper or project on a previously approved topic. Consent of instructor and director of undergraduate studies required.

EDUC393 - Research Independent Study

Subject: EDUC  
Catalog Number: 393  
Title: Research Independent Study

Description
Individual research in a field of special interest under the supervision of a faculty member, the central goal of which is a substantive research paper or written report containing significant analysis and interpretation of a previously approved topic. Consent of instructor and director of undergraduate studies required.

**EDUC401S - The Adventure of Citizenship: Lives of Civic Engagement**

**Description**
What does it mean to be a citizen and live a civic life? In this course students will integrate academic content with their own community based experiences to understand and critique their understandings of civic engagement and social change. Students will reflect on their Duke experience and begin to chart their post Duke futures. They will gain knowledge of the historical context of democratic citizenship, understanding of the relationship between theory and practice, and familiarity with the contestations of civic engagement that emerge from considerations of race, class, and gender. Students will undertake independent projects to study those who have lived civic lives.

**EDUC407S - Teaching Practices in Elementary Mathematics and Science**

**Description**
Research-based teaching practices in elementary mathematics and science for culturally diverse populations. Emphasis on the influence of science, mathematics, and technology in social issues and shaping teacher decision making about teaching and learning. Readings and field experience on ethical teaching practices, role of teachers and schools in society, and impact of teacher effect on environment and student learning. Consent of instructor required.

**EDUC408S - Teaching Practices in Elementary Language Arts and Social Studies**

**Description**
Research-based teaching practices in elementary language arts and social studies for culturally diverse populations. Emphasis on literacy development across grade levels and content areas. Readings and field experience promoting critical analysis of ethical teaching practices, role of teachers and schools in society, and impact of teacher effect on environment and student learning. Consent of instructor required. Includes a service-learning component involving work in the community.

**EDUC409S - Elementary Curriculum**

**Description**
Analysis, development, and evaluation of elementary curriculum with emphasis on integrating the expressive arts with literacy, mathematics, social studies, and science. Using Gardner's multiple intelligences model of learning, students write comprehensive curriculum units that focus on meeting the needs of learners from diverse social, ethnic, and cultural groups. Consent of instructor required.

**EDUC410S - Research/Reflective Practice Elementary Education**

**Description**
Classroom-based action research and structured reflection to promote the development of inquiry-oriented teachers. Systematic, long-term research project focused on meeting the diverse needs of learners in the elementary classroom. Consent of instructor required.

**EDUC420 - Elementary Education: Practicum**

**Description**
Engagement, as part of a teaching practicum in elementary schools, in active classroom research projects by designing, implementing, and evaluating units of instruction. Creation of a portfolio of products to demonstrate technology competencies for teaching certification. Students also reflect and write on ethical issues involved in their service experiences in public schools. Instructor consent required. Service-Learning course.
### EDUC420-1 - Elementary Education: Practicum

**Subject**: EDUC  
**Catalog Number**: 420-1  
**Title**: Elementary Education: Practicum

**Description**  
Engagement, as part of a teaching practicum in elementary schools, in active classroom research projects by designing, implementing, and evaluating units of instruction. Creation of a portfolio of products to demonstrate technology competencies for teaching certification. Students also reflect and write on ethical issues involved in their service experiences in public schools. Includes an optional pre-semester guided study, either domestic or global, focused on culturally and socially responsive teaching and learning. Instructor consent required. Service-Learning course.

### EDUC430S - What's Next: Women, Leadership, Purpose

**Subject**: EDUC  
**Catalog Number**: 430S  
**Title**: What's Next: Women, Leadership, Purpose

**Description**  
Interdisciplinary analysis of the history of ideas about women and the professions with emphasis on women's actions, past, present and future. The changing status of women in professional life; ethical and political implications of public and personal decision-making. Study of research and writing by and about women in professional fields; interviews with working women. Research paper integrating students' major, the internship experience and their future goals required. Senior seminar open only to Baldwin Scholars. Consent of instructor required.

### EDUC490A - Duke-Administered Study Abroad: Advanced Special Topics in Education

**Subject**: EDUC  
**Catalog Number**: 490A  
**Title**: Duke-Administered Study Abroad: Advanced Special Topics in Education

**Description**  
Topics differ by section.

### EDUC490S - Selected Topics

**Subject**: EDUC  
**Catalog Number**: 490S  
**Title**: Selected Topics

**Description**  
Selected topics seminar.

### EDUC495 - Teaching Practices in Secondary Education

**Subject**: EDUC  
**Catalog Number**: 495  
**Title**: Teaching Practices in Secondary Education

**Description**  
Secondary School curriculum and instruction with special emphasis placed on meeting the needs of high school students from diverse cultural backgrounds. Includes field-based experience with a focus on examining ethical teaching practices.

### EDUC496S - Secondary School Issues: Pedagogy, Culture, and Methods

**Subject**: EDUC  
**Catalog Number**: 496S  
**Title**: Secondary School Issues: Pedagogy, Culture, and Methods

**Description**  
Examination of schools and classrooms of the twenty-first century with focus on values, beliefs, and assumptions underlying teaching and learning in high school. Emphasis on ethical issues in teaching, pedagogical and methodological practices, teacher leadership, and impact of technology on schooling. Exploration of social fabric of schools as related to diversity, educational philosophies, and school culture by viewing these constructs from divergent perspectives. Students complete an extensive research project based on fieldwork in a local high school.
EDUC497S - Seminar in Secondary School Teaching

Subject: EDUC
Catalog Number: 497S
Title: Seminar in Secondary School Teaching

Description:
Principles, practices, and problems in secondary school instruction, including a focus on values and ethics in teaching. Consent of instructor required.

EDUC498 - Secondary Education: Practicum

Subject: EDUC
Catalog Number: 498
Title: Secondary Education: Practicum

Description:
Supervised practicum in a local high school focused on integration of educational theories and effective teaching practices. Design, implementation, and evaluation of units of instruction. Creation of portfolio to demonstrate competencies for teaching certification in a specific secondary content field. Instructor consent required.

EDUC498-1 - Secondary Education: Practicum

Subject: EDUC
Catalog Number: 498-1
Title: Secondary Education: Practicum

Description:
Supervised practicum in a local high school focused on integration of educational theories and effective teaching practices. Design, implementation, and evaluation of units of instruction. Creation of portfolio to demonstrate competencies for teaching certification in a specific secondary content field. Includes an optional pre-semester guided study, either domestic or global, focused on culturally and socially responsive teaching and learning. Instructor consent required.

EDUC89S - First-Year Seminar

Subject: EDUC
Catalog Number: 89S
Title: First-Year Seminar

Description:
Topics vary each semester.

EGR101L - Engineering Design and Communication

Subject: EGR
Catalog Number: 101L
Title: Engineering Design and Communication

Description:
Students work in a team to learn and apply the engineering design process to solve an open-ended, client-based problem drawn from a community partner. In this class, students learn to apply the engineering design process to meet the needs of a client, iteratively prototype using tools and materials appropriate to the solution, work collaboratively on a team, and communicate the critical steps in the design process in written, oral, and visual formats. First-year Pratt students only. Trinity first-year students may take the course with instructor consent.

EGR102L - Design to Deliver

Subject: EGR
Catalog Number: 102L
Title: Design to Deliver

Description:
Students work in a team to apply the engineering design process to complete an open-ended, client-based problem drawn from a community partner. Prerequisite: Engineering 101L.
