PGEOG or GTECH elective credits (grad) 3

Undergraduate Minor

Minor in Environmental Studies

A minor in environmental studies consists of a minimum of 12 credits as follows:

- one course selected from PGEOG 13000, GEOL 10100, GEOL 10500, GEOL 18000; and
- at least one course (minimum of 3 credits) selected from PGEOG 25000, PGEOG 25100*, GEOG 22600, GEOL 28000, or GTECH 20100; and
- at least one course (minimum of 3 credits) from the 300-level approved electives listed in the college catalog under either the environmental studies program’s Concentration A (Environmental Earth Science) or Concentration B (Environmental Management and Policy).

*PGEOG 25000 is a prerequisite for PGEOG 25100

Minor in Geography

A minor in geography consists of a minimum of 12 credits chosen from undergraduate courses that have a GEOG, PGEO or GTEC prefix. Prerequisites may apply. Thoughtful selection of courses may result in a minor program of
study that will enhance the student’s major. It is recommended that prospective geography minors consult with the geography undergraduate adviser concerning course selection.

**Minor in Geology**

A minor in geology consists of a minimum of 12 credits selected from courses with a GEOL prefix, or PGEOG 23100, or PGEOG 33400, or GTECH 35000. Prerequisites may apply. It is recommended that prospective geology minors consult with an undergraduate adviser from the Department of Geography.

**Geography**

**GEOG 10100 - People and Their Environment**

**Hunter Core**

Individual and Society - Social Science

**GER**

2/B

A broad overview of subjects and ideas in geography, possibly the most internally diverse of the social sciences. Covers the geographical aspects of topics including weather and climate, landforms, religions, food, cities, economics, culture, politics and much more. While students will be expected to understand the basics of each of the topics covered, the overarching emphasis will be on understanding the relationships among them. As such, the course builds from one topic to the next, ultimately stressing the sheer geographical complexity and wonder of modern life. Contemporary economic, political and social patterns and problems are discussed.

3 hrs
3 cr.
offered fall and spring.

**GEOG 15000 - World Regional Geography**

**Pluralism and Diversity**

PD/A or D

**GER**

2/B

A survey of the world’s major regions. Geographic concepts and principles are used to study the physical, economic, social and political conditions and problems in the culturally diverse world. Spatial expression of culture; specialized behavior patterns; adaptations and way of life in distinct environments. Regional interdependence; implications for development.

*prereq: ENGL 12000*

3 hrs
3 cr.
Offered fall and spring

**GEOG 18300 - Special Topics: Introductory Geosciences**
Introductory special topics in geography, environmental geosciences, or spatial sciences.

3 hrs
3 cr.

**GEOG 22100 - Economic Geography and Globalization**

GER 2/B

An introduction to the sub-discipline of economic geography, which will include an exploration of the history of both economics and geography, and a rigorous global approach to the subjects. Students will come to understand the history of the development of economic thought, leading up to, and transformed, by today’s crisis, as well as the particularly geographical nature of economic phenomena and processes, and the immense contributions geographers have made to the understanding of economics. Course focus is on the dominant form of global economic activity today, which is capitalistic, and the way this economic structure plays out through different geographies at different historical moments in time.

Not open to freshmen

*prereq: GEOG 10100 or perm instr.*

3 hrs
3 cr.

Offered fall and spring

**GEOG 22600 - Environmental Conservation: Resource Management**

GER 2/B

Introduces students to environmental studies with a focus on policy and management of resources. The course will examine issues pertaining to sustaining our resource base (biodiversity, food, soil, water and energy), a review of factors influencing sustainable use, and how humans have impacted these key elements of the natural system.

3 hrs
3 cr.

**GEOG 22700 - Environmental Conservation: Urban Problems**

GER 3/B

Covers topics related to environmental problems and their connection to urban areas. The course will begin with a survey of urban systems (transport, water, food, waste and energy) followed by investigating how these systems contribute to environmental problems and their solutions. This investigation will also include a discussion about the connections between rural and urban areas and urban planning that attempts to minimize environmental hazards.

3 hrs
3 cr.

**GEOG 24100 - Population Geography**

Pluralism and Diversity
PD/B or C
GER
3/B

Course will explore several critical issues such as the relationship between population growth and development; immigration and internal migration; how age, race and gender affect other demographic processes; and how and why these processes vary around the world. Additionally, students will examine the “mechanics” of computing population growth and change as well as different ways to visually display measures of population. Offered fall and spring.

prereq: GEOG 10100 or GEOG 15000 or perm instr.
3 hrs
3 cr.

GEOG 24200 - Medical Geography

GER
3/B

This subfield integrates human and physical geography. Two major themes are disease ecology (relationship of disease to natural and human environment) and spatial/social aspects of provision of medical care in society. The course will examine the concepts and methodologies that form the basis of the discipline.

GER 3B
prereq or coreq: GEOG 10100 or GEOG 15000 or perm instr.
3 hrs
3 credits

GEOG 24300 - Urban Geography

GER
3/B

Open to Jr/Sr only. Spatial analysis of functions of metropolitan areas. Social and economic characteristics of cities and suburbs. Land use and transportation patterns.

prereq: GEOG 10100 or GEOG 15000 or perm instr, Jr/Sr only
3 hrs
3 cr.

GEOG 24400 - Political Geography

GER
3/B

Political geography concerns the nature and consequences of human efforts to divide and control Earth. Major topics to be covered by this course include the origin and evolution of countries and their constituent political units; the defining and drawing of political boundaries; territorial conflicts and disputes; the impact of boundaries on personal and cultural identity; centripetal and centrifugal forces that encourage the success or failure of political units; jurisprudence, crime and punishment; electoral geography; war, piracy and terrorism; ownership of ocean floors and outer space; the environmental impacts of political power (zoning, incorporation, height restrictions, land tenure); and symbols of power in the landscape. Lectures and assignments will stress the relevancy of political geography to issues that affect our everyday life.

prereq: GEOG 10100 or GEOG 15000 or perm instr
GEOG 24500 - Geography of Development

Introduction to geographic concepts, methods, and theories of development, as well as failures and challenges for development in a changing world.

prereq: ENGL 12000, and GEOG 10100 or GEOG 15000 or permission of instructor

GEOG 24700 - Cultural Geography

GER

3/B

This course provides an overview of the field of cultural geography. It will cover the basics as well as recent developments in social and cultural geographic theory. The main focus is to understand relationships between cultures and environments through geographical analyses of processes, landscapes, and identities.

Open to Jr/Sr only.

prereq: GEOG 10100 or GEOG 15000 or perm instr

GEOG 25100 - Geography of the United States and Canada

GER

2/B

Seeks to familiarize students with the regional geography of the United States and Canada. More specifically, the goals are to acquaint students with the dynamic nature of human and physical features that characterize the study area; the ways in which human and natural phenomena interact to create unique place characteristics and sub-regions; the key environmental issues that characterize the study area and its constituent parts; major trends that are affecting the geography of the two countries; and the locations of principal features. The course begins with general overview material, and then examines the various sub-regions of the study area in much greater detail, focusing on key characteristics and environmental challenges.

prereq: GEOG 10100 or GEOG 15000 or perm instr

GEOG 26000 - Geography of New York State

GER

2/B

The goals of the course are to learn about the geography of New York State – its physical environment, the distribution of its people and their activities, and the interrelationships between the people and the environment in NYS. and to apply geographic principles and reasoning to a real world situation where NYS is used as an example of regional analysis; and to explore, navigate through, and use the geographic information available on the Internet, especially the information provided by the State of New York. For those in the education sequence an addition goal is to gather and
use information about NYS within the guidelines of the National Geography Standards for presentation at a grade-specific level.

prereq: GEOG 10100 or GEOG 15000 or perm instr.
3 hrs
3 cr.

GEOG 27000 - Regional Geography of Mexico, Central America and the Caribbean

Pluralism and Diversity
PD/A
GER
3/B

Analysis of relationship of natural environment to economic, social and political life of Mexico, Central America and West Indies.
3 hrs
3 cr.

GEOG 27100 - Regional Geography of South America

Pluralism and Diversity
PD/A
GER
3/B

Analysis of relationship of natural environment to economic, social and political life of South America.
3 hrs
3 cr.

GEOG 27200 - Regional Geography of Europe

Pluralism and Diversity
PD/D
GER
3/B

Analysis of relationship of natural environment to economic, social and political life of modern Europe.
3 hrs
3 credits

GEOG 27400 - Regional Geography of the Middle East and North Africa

Pluralism and Diversity
PD/A
GER
3/B

Analysis of relationship of natural environment to economic, social and political life of Middle East and North Africa.
3 hrs
3 cr.
GEOG 27500 - Regional Geography of Sub-Saharan Africa

Pluralism and Diversity
PD/A
GER
3/B

Analysis of the relationship of natural environment to economic, social and political life of Africa south of Sahara.
3 hrs
3 cr.

GEOG 27700 - Regional Geography of East Asia

Pluralism and Diversity
PD/A
GER
3/B

Analysis of East Asia's potentials in terms of natural resources, population, industry and agriculture, with emphasis on China.
3 hrs
3 cr.

GEOG 27800 - Regional Geography of Russia and Central Asia

Pluralism and Diversity
PD/A or D
GER
3/B

Analysis of the relationship of the natural environment to economic, social and political life of Russia, the former Soviet republics of Central Asia and Mongolia.
3 hrs
3 cr.

GEOG 28300 - Special Topics: Geography and Geosciences

Special topics in regional or topical geography, environmental geosciences, or spatial sciences
prereq: Vary by course. Regional courses would have no prerequisites. Topical and technical courses would have appropriate introductory-level prerequisites.

3 hrs
3 cr.

GEOG 30500 - Special Topics in Urban and Regional Dynamics

Advanced topics in urban geography. Topics will vary. Open to Jr/Sr only.

prereq: GEOG 24300 Urban Geography or instructor permission
3 hrs
3 cr.
GEOG 30600 - Special Topics in Contemporary Regional Geographies

Advanced topics in contemporary regional geographies and globalization. Topics will vary. Open to Jr/Sr only.

prereq: GEOG 15000 World Regional Geography or instructor permission
3 hrs
3 cr.

GEOG 31100 - Introduction to Fluid Mechanics

GER
3/B

This course covers the basic principles of fluid mechanics include statics, forces on plane and curve surfaces, kinematics of fluid motion, integral and differential representation of conservation of mass, linear momentum, the first Law of Thermodynamics, Bernoulli’s equation, dimensional analysis, and elementary viscous flow. Frictional losses in laminar flow and simple pipe flow analysis are covered. Understanding of the physical phenomena is stressed and vector notation is introduced and used whenever suitable.
cross-listed PHYS 31100
prereq: PHYS 12100 or PHYS 12000 and MATH 15500
3 hrs
3 cr.

GEOG 32100 - Transportation Geography

GER
3/B

A geographic study and modeling of transportation routes and their influences on the location of economic activity.
prereq: GEOG 221 or perm instr.
3 hrs
3 cr.
not offered 2011

GEOG 32800 - Urban Environmental Problems: Evaluations and Solutions

GER
3/B

Open to Jr/Sr only. The special environmental problems of urban and metropolitan areas will be studied, including water supplies, waste management, environmental impact and waterfront use. Natural physical processes, methodologies and techniques will be reviewed and applied to decision making. Transportation fee for field work may be required.
prereq: GEOG 101 or GEOG 150 or URBS 101 and Jr/Sr standing
3 hrs
3 cr.

GEOG 33500 - International Pollution Issues

GER
3/B
A study of international trans-boundary pollution and the science, source terms, transport pathways and international impacts of contamination events. The regional focus will change yearly pending current global environmental events.

**prereq:** GEOG 101 or GEOL 101 or PGEO 130 or perm instr.

3 hrs  
3 cr.

**GEOG 34200 - Geography of International Migration and Ethnicity**

**Pluralism and Diversity**

PD/B  
GER  
3/B

Quantitative and qualitative examination of historic and contemporary international migration patterns. Spatial demographic impacts of immigration policy in the United States with a focus on major urban centers. Comparative analysis of ethnic and racial minorities in the United States.

**prereq:** GEOG 24100 or perm instr.

3 hrs  
3 cr.

**GEOG 34300 - Urban Geographic Theory**

GER  
3/B

Spatial analysis of contemporary and theoretical issues concerning the economic growth, transportation, land use, social segregation and political fragmentation in metropolitan areas.

**prereq:** GEOG 34100 or equiv.

3 hrs  
3 cr.

**GEOG 35700 - Geography of New York City and Vicinity**

GER  
3/B

Informed immersion in NYC is the main objective of this course. Students will learn by exploration and observation more than by media. The city is the laboratory to complement readings, lectures and discussion. Students will emerge from this class with an enhanced appreciation of the entire city. Study assignments include keeping a journal of walking assignments as well as readings. Field work will focus on the five boroughs of New York City. (Students with difficulties in walking or using public transportation or who have phobias regarding unfamiliar neighborhoods should consider this before registering.)

Open to Jt/Sr only.

**prereq:** GEOG 10100  

3 hrs  
3 cr.  
Offered fall.

**GEOG 37000 - Geography of Sustainable Development in Developing Countries**
Pluralism and Diversity  
PD/A  
GER  
3/B  

Reviews the theories and approaches of international development. Themes include development theory, availability and distribution of resources, population growth, food production, water supply and forestry. The course will also highlight the development and environmental problems that challenge the achievement of sustainable development such as population growth, food and world economic crises, increasing number of the poor and climate change. The course will provide students with theory, methods, problems and analysis of factors that influence sustainable development in developing countries.

*prereq: one of the following: GEOG 10100, 15000, 27000, 27100, 27500, 27700 or perm instr.*  
3 hrs  
3 cr.

**GEOG 37100 - Rural Water Supply in Developing Regions**  

Pluralism and Diversity  
PD/A  
GER  
3/B  

Covers concepts, methods and analysis of rural water utilization and related problems and challenges in developing countries. It will discuss water management and quality and their relationship with sanitation and hygiene education. The course will also discuss methods of providing drinking water in a sustainable manner.

*prereq: GEOG 10100, 15000, 27000, 27100, 27500, 27700 or perm instr.*  
3 hrs  
3 cr.

**GEOG 38000 - Seminar in Geographic Concepts and Methodology**  

GER  
3/B  

An investigation of the evolution, conceptual framework, and methodological approaches of modern geography. Course goals are: increase student competence and marketability as a teacher; review content of geography with teaching in mind; share strategies, ideas activities (as befits a seminar course); familiarization with national and state standards; develop and acquire appropriate classroom-ready materials; acquire a classroom-ready photo collection; explore links to other subjects; and develop appropriate bibliographies of children’s literature and websites.

*prereq: perm instr.*  
3 hrs  
3 cr.

**GEOG 38100 - Special Topics in Geography**  

GER  
3/B  

Open to Jr/Sr only. Topics to be announced.

*prereq: GEOG 101, 200-level course of which special topic is logical outgrowth, perm instr.*  
1-4 hrs (lec or lec/lab)  
1-3 cr
**GEOG 38200 - Special Topics in Geography**

**GER**

3/B

Open to Jr/Sr only. Topics to be announced.  
**prereq:** GEOG 101, 200-level course of which special topic is logical outgrowth, perm instr.  
1-4 hrs (lec or lec/lab)  
1-3 cr

**GEOG 38300 - Special Topics in Geography**

**GER**

3/B

Open to Jr/Sr only. Topics to be announced.  
**prereq:** GEOG 101, 200-level course of which special topic is logical outgrowth, perm instr.  
1-4 hrs (lec or lec/lab)  
1-3 cr

**GEOG 38500 - Geographic Studies in the Field**

Geographic Studies in the Field course offered either through the department or in conjunction with Education Abroad, taught primarily outside the formal classroom.  
**prereq:** Vary by course  
3 hrs  
3 cr.

**GEOG 39100 - Individual Study in Geography**

Individual studies and readings, with lab or fieldwork where appropriate, carried out under faculty guidance.  
**prereq:** 2 sem of geography, perm dept.  
1-3 cr

**GEOG 39200 - Individual Study in Geography**

Individual studies and readings, with lab or fieldwork where appropriate, carried out under faculty guidance.  
**prereq:** 2 sem of geography, perm dept.  
1-3 cr

**GEOG 39300 - Individual Study in Geography**

Individual studies and readings, with lab or fieldwork where appropriate, carried out under faculty guidance.  
**prereq:** 2 sem of geography, perm dept.  
1-3 cr

**GEOG 48000 - Capstone in Urban and Social Geography**

Individual or group research project as capstone experience in urban and social geography.
prereq: Senior standing as a geography major, approval of undergraduate adviser, and signed project contract with faculty sponsor.
3 hrs
3 cr.

**GEOG 49000 - Honors in Geography**

Upper Jr/Sr geography majors only. Individual research to be carried on under faculty guidance. Results must be embodied in an honors essay or equivalent.

*prereq: perm dept.*
1 sem
3 cr.

**GEOG 49800 - Internship**

Open to qualified geography majors and minors, upper Jr/Sr only. Opportunities for working in positions of responsibility in professional institutions for academic credit. See undergraduate adviser.

1-4 cr.

**PGEOG 48000 - Capstone in Physical Geography**

Individual or group research project as capstone experience in physical and environmental geography.

*prereq: Senior standing as a geography or environmental studies major, approval of undergraduate adviser, and signed project contract with faculty sponsor.*
3 hrs
3 cr.

**Geographic Techniques and Methods**

**GEOG 25000 - Geographic Research Methods**

Introduction to geographic theories and research methods, with a focus on social and cultural geographic research. Lectures, hands-on exercises, collaborative projects.

*prereq: ENGL 12000 and a 100-level GEOG, PGEOG, GTECH, or GEOL course*
3 hrs
3 cr.

**GTECH 20100 - Introduction to Geographic Information Science**

Introduces the means by which geographers analyze the world to better understand geography and geographical processes. It offers an introduction to various methods for interpreting and analyzing spatial data including, cartography, GIS, remote sensing, spatial statistics and survey research.

Material Fee: $15
prereq: GEOG 10100 or GEOG 15000 and MATH 10100 or equiv or perm instr.
6 hrs (2 lec, 4 lab)
4 cr.
Offered fall and spring

GTECH 20300 - Introduction to Remote Sensing

Introduces remote sensing image interpretation and a basic understanding of the use of remote sensing technology in the study of environmental issues and the monitoring of Earth systems. The first half of the course focuses on aerial photography, photogrammetry and image interpretation. The second half focuses on the use of remote sensing in Earth system sciences. Extensive labs include practical assignments and computer-based analysis of remote sensing images. Students will learn basic image interpretation and some web-based image processing skills through various lab exercises.

Material Fee: $15
prereq: GTECH 20100
6 hrs (2 lec, 4 lab)
4 cr.

GTECH 30100 - Quantitative Methods in Geography

Open to Jr/Sr only. Process of spatial analysis. Application of scientific methods to geographic research; sampling; distribution measurement; statistical analysis of spatial data.
prereq: GTEC 201, STAT 113 or 213 or perm instr.
3 hrs
3 cr.

GTECH 32100 - Remote Sensing of the Environment

Focuses on use of satellite images to study the environment and the physical processes involved in remote sensing to better understand the nature and properties of electromagnetic radiation and how it interacts with the atmosphere and the Earth’s surface and a wide variety of satellite sensors. These sensors make measurements in the optical, thermal and microwave electromagnetic spectrums and are used to study issues related to global environmental science and natural resource management. The course includes heavy lab components which will include practical assignments, field exercises, computer-based analysis of remotely-sensed images and the use of image processing software (ENVI) to analyze satellite images. Field measurements will be made in Central Park to facilitate better understanding satellite measurements.
Material Fee: $15
prereq: GTEC 32000 or perm instr.
4 hrs (2 lec, 2 lab)
3 cr.

GTECH 32200 - Digital Image Processing

Course emphasizes the acquisition and nature of digital image data and the tools required to process and analyze remotely sensed data. Topics include: image preprocessing, spectral mixture analysis, image transformation, image classification and accuracy assessment, change detection, information extraction from LIDAR and radar. At least one application for each image processing method will be introduced. This is an advanced remote sensing course. The course includes lab exercises through which students will obtain hands-on experience in digital image processing. The labs include practical assignments and computer-based analysis of remotely-sensed images, and also field work to evaluate the results. The lab will use ENVI, an image processing software, together with the comprehensive data analysis tool IDL.
GTECH 35000 - Field Topographic Surveying

Field use of surveying equipment. Notebook and computer data collection relating to horizontal and vertical location on the landscape, including the use of global positioning systems. Field record-keeping and preliminary analysis of results. Fee for transportation, accommodations and food allowance required.

prereq: GTEC 20100, perm instr.
90 hrs of field/lab work (1 day lab, 10 days field)
3 cr.
Offered summer intersession (check with dept. in April).

GTECH 35100 - Field Techniques in Geography

Observation and analysis of physical geography, biogeography and geomorphology of selected areas. Field geographic techniques such as ground-truthing of remotely sensed images, the use of maps, compasses and GPS to navigate. Fee for transportation, lodging and food allowance required.

Material Fee: $300-400
prereq: GTEC 20100, any two additional geography or geology courses, perm dept.
90 hrs field/lab work (3 days lab, 7 days field)
3 cr.
Offered summer intersession (check with dept. in April).

GTECH 36100 - GIS Analysis

Advanced principles and operation of GIS, including 3-D, network and field representations and their respective analysis functions. Development of geoprocessing workflows. Geographic information science approaches to geospatially relevant methods, including geophysical, landscape ecological, econometric, epidemiological, and regional science.

Material Fee: $15
prereq: GTECH 20100
4 hrs (2 lec, 2 lab)
3 cr.

GTECH 36200 - Geographic Information Science II

Examines the principles of geographic information systems (GIS) including an overview of data structures, data types, methods of data analysis, cartographic modeling, and object-oriented GIS. It will also compare the relative merits of different types of GIS software packages. The primary software used will be ArcGIS.

Material Fee: $15
prereq: GTECH 36100, STAT 11300
4 hrs (2 lec, 2 lab)
3 cr.

GTECH 38000 - Analytical and Computer Cartography
Introduces modern cartographic theory and conventions, but also provides significant introductory hands-on experience in map design using computer software, specifically ESRI’s ArcView GIS. The majority of topics covered in the course are divided into a lecture and laboratory section. Students are presented with fundamental design theories and principles associated with particular types of maps or related graphic materials in lectures, and then challenged to implement these principles in self-guided hands-on exercises utilizing the software. The course is intended to cover the basic principles of cartography as well as modern techniques which influence map design, presentation, and interpretation processes. Students will develop a series of hard copy maps, charts, and graphics as well as design materials for presentation through digital media.

Material Fee: $15
 prerequisite: GTEC 20100
4 hrs (2 lec, 2 lab)
3 cr.

GTECH 38500 - GIS Applications

Selected topics in GIS applications to human and physical geographic problems. See department for topics offered.
May be repeated for credit as topics change.
Material Fee: $15
 prerequisite: GTEC 20100 or equiv.
3 hrs
3 cr.

GTECH 48000 - Capstone in Geographic Information Science

Individual or group research project as capstone experience in geographic information science.
 prerequisite: Senior standing, approval of undergraduate adviser, and signed project contract with faculty sponsor.
3 hrs
3 cr.

GTECH 49000 - Honors in Geographic Information Science

Open to qualified Track C geography majors.
 prerequisite: Senior standing, a minimum GPA of 3.5 in the major, approval of undergraduate adviser, and signed project contract with faculty sponsor.
3 hrs
3 cr.

GTECH 49800 - Internship in Geographic Information Science

Open to qualified geography majors and minors. Opportunities for working in positions of responsibility in professional institutions for academic credit.
 prerequisite: Senior standing, approval of undergraduate adviser, and signed project contract with faculty sponsor.
3 hrs
3 cr.

Physical Geography
PGEOG 13000 (STEM) - Weather and Climate

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
GER
2/E

Offers a basic understanding of how weather systems form, why certain regions have particular types of weather patterns, and what is known about climatic fluctuations across the globe. This includes an understanding of the basic physical principals that determine: how hot or cold a particular location is; how seasonal cycles vary in different parts of the world; and the types and amounts of precipitation. Students learn to analyze several types of weather maps and acquire a basic understanding of central issues related to global climate change, one of the most significant environmental issues of our time.
Material Fee: $ 5
5 hrs (3 lec, 2 lab)
4 cr.
Offered in the Fall and Spring

PGEOG 23100 - Physical Geography II: Principles of Geomorphology

See GEOL 23100

PGEOG 25000 - Earth System Science I

GER
3/B

In this course students learn to think of Earth as a system of several components that interact with each other, sometimes in very complicated ways. The components of the Earth system that will be considered include the atmosphere, the hydrosphere, the lithosphere, and the biosphere. While each of these components can, and should, be studied in more detail in separate courses, here the focus is on interactions between them.
prereq: at least one 100-level science course or perm instr.
prereq or coreq: GEOL 10100 or PGEOG 13000 or GEOG 22600 or perm instr.
4 hrs
3.5 cr.

PGEOG 25100 - Earth System Science II

GER
3/B

The second part of a two-course sequence, students continue the objectives of PGEOG 25000, and learn about our planet as a system of interacting components, including the atmosphere, hydrosphere, lithosphere, and biosphere. This course focuses primarily on the biosphere, paleoclimates, and the Arctic climate system.
prereq: PGEO 25000 or perm instr.
4 hrs
3.5 cr.

PGEOG 31100 - Introduction to Fluid Mechanics
Covers the basic principles of fluid mechanics including statics, kinematics of fluid motion, integral and differential representation of conservation of mass, linear momentum, the first Law of Thermodynamics, Bernoulli's equation, dimensional analysis, and elementary viscous flow.

cross-listed PHYS 31100

prereq: PHYS 12100 or 12000 and MATH 15500 or perm instr.
3 hrs
3 credits

PGEOG 31300 - Biogeography

GER
3/B

Provides an understanding of the geographic distribution and temporal variability of biological diversity over the face of the Earth and the biotic and abiotic factors and processes underlying these patterns and dynamics. Completion of PGEOG 25000/25100 and GTECH 37300 prior to enrollment is strongly recommended.

prereq: PGEOG 13000, GEOG 10100 or BIOL 10000/10200
3 hrs
3 cr.

PGEOG 33200 - Introduction to Hydrology

GER
3/B

Designed to provide the basic understanding of how water on the Earth moves, distributes, circulates and interacts with the environment. Focus will be on hydrological processes including precipitation, evapotranspiration (evaporation and transpiration), soil water, ground water, and runoff, which form the complete water cycle at global, regional and watershed scales. The course will also cover some topics on how water responds to environmental changes and strategies of integrated water resources.

prereq: GEOL 10100, PGEO 13000 or perm instr.
3 hrs
3 cr.

PGEOG 33400 - Coastal Geomorphology See GEOL 33400

See GEOL 33400

PGEOG 33500 - Urban and Metropolitan Coasts

GER
3/B

A systematic study of the natural and anthropogenic processes on urban coastal environments. Special emphasis on the coastline of the NY metropolitan area, with examples from coastal cities worldwide.

prereq or coreq: Prereq: GEOL 10100 or GEOG 10100
PGEOG 36100 - Global Climatic Change

GER
3/B

Open to Jr/Sr only. An intensive introduction to the study of climate change with emphasis on modern climate change, anthropogenic forcing and measured and predicted consequences of this forcing. Students will develop an understanding of natural climate forcing, natural variability and feedbacks in the climate system while concurrently studying the Earth’s climate history, and modern climate change.

prereq: PGEO 13000 or GEOL 10100 or 10500

PGEOG 36300 - Environmental Hazards

GER
3/B

The course, in response to actual and potential hazards, either natural or anthropogenic in origin, will investigate the processes that link fundamental social development to environmental processes that are influenced by human activities. Natural hazards, in many cases, augment the environmental fragility of our society and the consideration of environmental hazards needs to be incorporated into management of climate variability, storms, droughts, floods, earthquakes, etc. An aim is to seek preventive measures and find solutions to act on environmental hazards on national and international levels.

prereq: PGEO 13000 or equiv.
prereq or coreq: PGEOG 13000 or equiv.

PGEOG 38100 - Special Topics in Environmental Studies

GER
3/B

Open to Jr/Sr only. Topics to be announced.

prereq: GEOL 10500, GEOG 22600 or PGEOG 13000, one course of which special topic is logical outgrowth; perm instr.

PGEOG 38200 - Special Topics in Environmental Studies

GER
3/B

Open to Jr/Sr only. Topics to be announced.

prereq: GEOL 10500, GEOG 22600 or PGEOG 13000, one course of which special topic is logical outgrowth; perm instr.
PGEOG 38300 - Special Topics in Environmental Studies

GER
3/B
Open to Jr/Sr only. Topics to be announced.
prereq: GEOL 10500, GEOG 22600 or PGEOG 13000, one course of which special topic is logical outgrowth; perm instr.
1-4 hrs (lec or lec/lab)
1-3 cr.

PGEOG 39100 - Individual Study in Environmental Studies

Individual studies and readings, with lab or fieldwork where appropriate, carried out under faculty guidance.
prereq: GEOL 10500, GEOG 22600 or PGEOG 13000
1-3 cr.

PGEOG 39200 - Individual Study in Environmental Studies

Individual studies and readings, with lab or fieldwork where appropriate, carried out under faculty guidance.
prereq: GEOL 10500, GEOG 22600 or PGEOG 13000, perm instr.
1-3 cr.

PGEOG 39300 - Individual Study in Environmental Studies

Individual studies and readings, with lab or fieldwork where appropriate, carried out under faculty guidance.
prereq: GEOL 10500, GEOG 22600 or PGEOG 13000; perm instr.
1-3 cr.

PGEOG 49000 - Honors in Environmental Studies

Open to upper Jr/Sr environmental studies majors only. Individual research to be carried out under faculty guidance. Results may be embodied in an honors essay or equivalent.
prereq: perm dept.

PGEOG 49800 - Internship in Environmental Studies

Open to qualified environmental studies majors and minors, upper Jr/Sr only. Opportunities for working in positions of responsibility in professional institutions for academic credit. See environmental studies faculty adviser.
1-4 cr.

Geology

GEOL 10000 - Introductory to Geology
Introduction to Geology is the study of the physical aspects of our planet. The goal of this course is to provide students with a basic understanding of the forces continuously shaping the surface of our planet and the influence they have on our environment, so that their appreciation and interest in our planet is heightened. At the same time, this course provides a strong fundamental background for students who want to pursue more advanced geological and environmental studies courses.

3 hrs lec
3 cr.
Offered fall and spring.

**GEOL 10100 - Introductory Geology Lab**

**Hunter Core**
Life & Physical Sciences

**GER**
2/E

Hands-on study of science, scientific method, scientific language and thought, regarding the earth, earth materials and the major geologic processes that continuously shape and reshape our dynamic planet surface. Guided study of minerals and rocks, geological structures, and the sequence of geologic events.

3 hrs lab
3 cr.

**GEOL 10200 - Plate Tectonics and the Earth's Evolution**

**GER**
2/E

The second course in geology offered to non-geology majors. It is designed to familiarize students with the main concepts used in deciphering and interpreting earth’s evolution from the spatial and temporal perspective. Topics to be covered include: geologic time; geological principles; earth materials as recorders of past geologic processes; depositional environments and sedimentary rock record; igneous and metamorphic geologic environments and their rock records; evolution of the solar system; plate tectonics and life on earth; origin of the universe; life on earth and the fossil record; Precambrian, Paleozoic, Mesozoic, and Cenozoic life, history and tectonics. Field trips may be required; transportation fee.

*prereq: GEOL 10100*

5 hrs (3 lec, 2 lab)
4 cr.
Offered fall.

**GEOL 10500 - Introduction to Environmental Geoscience**

**Hunter Core**
Scientific World (SW)

**GER**
2/E (Non lab course)

Introduction to environmental geoscience focusing on aspects of global change and the interrelationship of earth
systems. Review of the evolution of the earth from its origins to potential future developments; environmental problems and issues.

*prereq: ENGL 12000*

3 hrs

3 cr.

**GEOL 18000 - Introduction to Oceanography**

**GER**

2/E

Dynamic processes are responsible for the ocean’s influence on our environment and life cycles on earth. The course introduces students to the broad field of oceanography and specifically identifies areas which are of concern on both local and global scales. The origins of the oceans and life as it exists in today’s ocean will be covered. Lectures will include the sub-disciplines of biological, chemical, physical, and geological oceanography and concepts that relate to continental margins, ocean basins, sediments and seafloor spreading. Emphasis will be given to the interaction between the circulation of the atmosphere and ocean surface currents, deep ocean circulation, waves and tides. The coastal zone as a fragile environment will be highlighted in connection with dynamic physical and biological processes. No lab component.

3 hrs

3 cr.

Offered fall and spring.

**GEOL 20500 - Environmental Geology**

**GER**

3/B

As human populations continue to grow, resource depletion and hazards will become more severe. Many decisions concerning the use of resources, such as water, soil, minerals, energy and space to live, will determine our standard of living and the quality of the environment. Scientific knowledge, combined with human values, will dictate these decisions. This course examines not only the way geological processes operate and impact society, but also how the earth system responds to human activity. The difficult problems associated with extracting enormous quantities of resources needed to sustain modern societies will be discussed. The course will also address ways humans can minimize the risks associated with hazardous earth processes. Quantitative analysis of selected topics will be introduced to provide a deeper understanding of the complexity of today’s environmental issues.

*prereq: GEOL 10100*

3 hrs

3 cr.

**GEOL 23100 - Principles of Geomorphology**

**GER**

2/E or 3/B

Investigates the geologic forces that shape the surface of the Earth. In the laboratory students will learn to analyze features of the landscape and deduce the processes that produced them. Students will use traditional laboratories as well as Google Earth to learn about a variety of surficial processes.

*prereq: PGEO 13000 or GEOL 10100*

4 hrs (2 lec, 2 lab)

3 cr.
GEOL 28000 - Marine Geology

GER
3/B

Marine Geology is the study of the seafloor. This course attempts to answer the questions “what?”, “where?”, “when?” and more importantly “how?” in order to better understand the processes that shape the ocean basins and determine the structure and composition of the oceanic crust. The main patterns of sediment distribution in the ocean basins and how sediments preserve a record of past climatic and sea-level changes will be explored. In addition, the role of fluids in ocean sediments and the oceanic crust will be examined. The seafloor sediments will be studied with a focus on their role in marine biogeochemical cycles.

prereq: GEOL 10200 or perm instr.
3 hrs
3 cr.
Fall

GEOL 33200 - Hydrology See PGEO 33200

See PEGO 33200

GEOL 33400 - Coastal Geomorphology

GER
3/B

A study of the basic processes shaping the coast and the resulting form; surficial morphology and internal geometry of such forms as cliffs, dunes, beaches and near shore bars. Map exercise and a one-day field trip.

prereq: GEOL 23100 or PGEO 23100 or equiv. or perm dept.
3 hrs
3 cr.

GEOL 38000 - Advanced Oceanography: Chemistry and Physics of the Oceans

GER
3/B

The oceans play a significant role in how the climate system responds to anthropogenic perturbations. To understand past, present and future climate, students need to know and understand the world ocean. Oceanography is multidisciplinary. It offers an opportunity to review and to apply many of the concepts taught in the major traditional disciplines of physics, chemistry, biology and mathematics. This course will offer an in-depth tour of the complex study of oceanography and an introduction to quantitative methods in oceanography using Matlab. This science-based course requires students to learn and understand, and be willing to work with, physical and quantitative concepts. Students must be prepared to learn the basics of computer scripting/programming syntax and logic, one of the major skills to be acquired in this course.

prereq: one sem CHEM or PHYS, MATH 15000 or equiv.
3 hrs
3 cr.

GEOL 38100 - Special Topics in Geology and Oceanography
Intensive courses in various aspects of geology or oceanography. Topics to be announced.

**GEOL 38200 - Special Topics in Geology and Oceanography**

Intensive courses in various aspects of geology or oceanography. Topics to be announced.

**Prerequisites:** 200-level course of which special topic is logical outgrowth; perm instr.

1-4 hrs (lec or lec/lab)

1-3 cr.

**GEOL 38300 - Special Topics in Geology and Oceanography**

Intensive courses in various aspects of geology or oceanography. Topics to be announced.

**Prerequisites:** 200-level course of which special topic is logical outgrowth; perm instr.

1-4 hrs (lec or lec/lab)

1-3 cr.

**GEOL 39100 - Individual Study in Geology**

Individual studies and readings, with lab or fieldwork where appropriate, carried out under faculty guidance.

**Prerequisites:** 2 sems of geology, perm dept.

1-3 cr.

**GEOL 39200 - Individual Study in Geology**

Individual studies and readings, with lab or fieldwork where appropriate, carried out under faculty guidance.

**Prerequisites:** 2 sems of geology, perm dept.

1-3 cr.

**GEOL 39300 - Individual Study in Geology**

Individual studies and readings, with lab or fieldwork where appropriate, carried out under faculty guidance.

**Prerequisites:** 2 sems of geology, perm dept.

1-3 cr.

**GTECH 10100 - Digital Earth**

Digital Earth introduces students to the new suite of geospatial technologies and how they are being used to capture, store, process and display the vast amount of geospatial information about our planet, a wide variety of environmental and cultural phenomena, and how this information helps us to better understand natural and cultural characteristics of
the world, address world problems, and make sound decisions. Students will learn how satellites take complete photographs of the entire planet, Geographic Information Systems (GIS) display geospatial data, Global Positioning Systems (GPS) track the location of environmental and cultural phenomena, Geovisualization tools map our 3-D planet, and how these technologies are applied to solve problems in diverse fields and phenomena in the physical and social sciences in exciting ways. The knowledge and skills learned in Digital Earth open the door toward a geotechnology-oriented career.
3 hr.
3 cr.

Geography: Courses Less Frequently Offered

GEOG 21000 - Elementary Field Geography

GER
3/B

GEOG 21100 - Field Geography of New York City and Vicinity

GER
3/B

GEOG 34800 - Geography of Religion

GER
3/B

GEOG 37200 - Field Geography of Peru

GER
3/B
Regional field study of the geography of Peru. Topics include physical, environmental, historical, cultural, urban, political, agricultural, religious and economic geographies in various ecological zones. Taught in English. Fee for transportation and accommodations required. Completing GEOG 101 or GEOL 101 or P GEO 130 prior to enrollment is strongly recommended.
prereq: acceptance into Peru Study Abroad Program
coreq: GEOG 27100 or dept. perm.
90 hrs of fieldwork
3 cr.

GEOL 21100 - Field Geology of New York City and Vicinity

GER
3/B
Provides you with the essential information about the geology of New York City, plate tectonics, and the philosophy and the practice of geological field work. Students will learn how to use basic field equipment and geologic and topographic maps. The first part of the course consists of field trips using public transportation to the main geologic
formations of the New York metropolitan where students examine and identify rocks *in situ* and *non in situ*. Basic procedures of geologic field research are taught and students learn to identify, measure, and describe rocks, geologic structures and textures. The second part of the course will be in the laboratory to study the field material, plot information on topographic maps, correlate information and create basic geologic maps, basic geologic profiles and the synthetic geologic column of the NYC Metropolitan area.

*prereq or coreq: Prereq: GEOL 10100 or 10200*

**GEOL 23300 - Geology of North America**

GER  
3/B

**GEOL 24400 - Sedimentology**

GER  
3/B

**GEOL 24800 - Principals of Stratigraphy**

GER  
3/B

**PGEOG 21200 - Geography of Soils and Vegetation**

GER  
3/B

**Sociology: Upper Division**

**SOC 37102 - Independent Study**

GER  
3/B

Completion of written assignment as proposed by student as approved and supervised by full-time faculty sponsor.

*prereq: SOC 10100, perm instr.*

2 hrs  
2 cr

**Programs and Courses in German**

**German**
About the Department

German Program Description

Foreign Language Requirement

1. Students who begin German as a new language will fulfill the foreign language requirement by taking 12 credits in the elementary/intermediate language sequence: GERMN 10100-GERMN 10200 (or GERMN 10300), GERMN 20100-GERMN 20200 (or GERMN 20300).

2. Students who enter with one or more years of high school German must take all the credits they need so that they can pass GERMN 20200 (or GERMN 20300).

3. Students who enter with four years of high school German will be exempted from the foreign language requirement (see the General Education Requirement section of this catalog).

Placement

Students who have some knowledge of German should consult with one of the departmental advisers or the chair for placement in a class that is appropriate for them.

Undergraduate Major

German - BA

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

**GERMN 10100 - Elementary German I**

**Hunter Core**

World Culture and Global Issues (WCGI)

Practice in 4 basic skills of speaking, reading, writing and comprehending German. For beginners. GERMN 10100 not usually credited without GERMN 10200. For details about credit policy, please see Foreign Language Requirement.

*3 hrs*

*3 cr.*

**GERMN 10200 - Elementary German II**

Continued practice in speaking, reading, writing and comprehending German.

*prereq: GERMN 10100 or equiv.*

*3 hrs*

*3 cr.*

**GERMN 20100 - Intermediate German I**

Practice in comprehending and communicating in German at the intermediate level. Review of basic structures and study of advanced grammar topics.

*prereq: GERMN 10200 or equiv.*

*3 hrs*

*3 cr.*

**GERMN 20200 - Intermediate German II**

Grammar review and composition. Reading and discussion of selected literary texts.

*prereq: GERMN 20100 or equiv.*

*3 hrs*

*3 cr.*

-or-

**GERMN 10300 - Intensive Elementary German**
Intensive practice in 4 basic skills of German. Covers material of GRMN 10100 and 10200 in one semester.
6 hrs
6 cr.

**GERMN 20300 - Intensive Intermediate German**

Covers material of GRMN 201 and 202 in one semester.
_prereq: GRMN 10200, 10300 or equiv._
6 hrs
6 cr.

**Hunter Core Requirement**

Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: [Hunter Core Requirement](#)

**Major - 24 credits**

The major consists of 24 credits chosen from the following courses:

**Advanced courses in language, level I:**

**GERMN 30100 - Advanced German Comprehension and Conversation**

**GER**
3/A

Intensive practice in reading and listening to German texts and in conversational German; some essay writing. (Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.
_prereq: GERMN 20200 or 20300 or equiv._
3 hrs
3 cr.

**GERMN 30200 - Advanced German Conversation and Composition**

**GER**
3/A

Intensive practice in speaking and writing German. (Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.
_prereq: GERMN 20200 or 20300 or equiv._
3 hrs
3 cr.

**GERMN 31000 - Advanced German Language Studies**
Intensive language study in a German speaking country. May be repeated at different levels.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

\textit{prereq: GERMN 20200 or 20300 or equiv.}

3 hrs
3 cr.

**GERMN 31200 - Introduction to Business German**

Introduction to the specialized language of German business and economics and intensive practice in German terminology and style on such topics as banking and finance, the corporate structure and the European Union.

(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

\textit{prereq: GERMN 30100 or perm instr.}

3 hrs
3 cr.

**Advanced courses in literature, level I:**

**GERMN 32000 - Studies in German Literature and Language**

\textbf{Pluralism and Diversity}

PD/D

**GER**

3/A

Discussion of literary topics or linguistic phenomena. May be repeated with a different topic.

(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

\textit{prereq: GERMN 20200 or 20300 or equiv.}

3 hrs
3 cr.

**GERMN 32100 - Individual and Society in Modern German Literature**

\textbf{Pluralism and Diversity}

PD/D

**GER**

3/A

The central conflict between individual liberty and societal constraints as reflected in short stories, novellas and plays by 20th century authors such as Kafka, Brecht, Böll and Frisch.

(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

\textit{prereq: GERMN 20200 or 20300 or equiv.}
GERMN 32200 - German Civilization

**Pluralism and Diversity**

PD/D

GER

3/A

Introduction to key topics in German history, politics, arts, literature and sciences. (Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

**Prerequisite:** GERMN 20200 or equiv.

3 hrs

3 cr.

GERMN 32300 - Women in German Literature

**Pluralism and Diversity**

PD/C

GER

3/A

Reading and discussion of literature from the 19th century to the present written in German by and about women. (Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

**Prerequisite:** GERMN 20200 or 20300 or equiv.

3 hrs

3 cr.

GERMN 32700 - Modern Swiss Literature

**Pluralism and Diversity**

PD/D

GER

3/A

Reading and discussion of literature written in German by Swiss authors since the 19th century. (Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

**Prerequisite:** GERMN 20200 or 20300 or equiv.

3 hrs

3 cr.

GERMN 32800 - German Children's and Adolescent Literature

**Pluralism and Diversity**

PD/D

GER

3/A
Reading and discussion of literature for young readers and adolescents.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

**GERMN 33400 - The German Short Story and Novelle**

Pluralism and Diversity
PD/D
GER
3/A

Discussion of short narrative works from age of Goethe to present.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

**GERMN 33500 - German Radio Plays: Hoerspiel**

Pluralism and Diversity
GER 3/A PD/D
3/A

Listening to and discussion of literary radio plays from the 1950s to today.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

**GERMN 33600 - German Lyric Poetry**

Pluralism and Diversity
PD/D
GER
3/A

Discussion of important lyrics from Baroque period to present.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

**GERMN 33900 - German Drama from Naturalism to Present**
Pluralism and Diversity
PD/D
GER
3/A

Discussion of dramas by such writers as Hauptmann, Wedekind, Brecht, Drrenmatt, Frisch and Handke. 
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.
prereq: GER MN 20200 or 20300 or equiv.
3 hrs
3 cr.

Advanced courses in literature, level II:

GER MN 34100 - German Drama from Age of Goethe to Naturalism

Pluralism and Diversity
PD/D
GER
3/A

Discussion of dramas by such writers as Goethe, Schiller, Kleist, Bchner, Grillparzer and Hebbel. 
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.
prereq: one course numbered from GER MN 32000 to 35900 or equiv.
3 hrs
3 cr.

GER MN 34200 - The German Novel

Pluralism and Diversity
PD/D
GER
3/A

Discussion of narrative works by such writers as Goethe, Keller, Fontane, T. Mann, Kafka, Döblin and Böll. 
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.
prereq: one course numbered from GER MN 32000 to 35900 or equiv.
3 hrs
3 cr.

GER MN 34300 - German Literature from Its Origins to the Age of Goethe

Pluralism and Diversity
PD/D

GER MN 34400 - Readings in Classical Period of German Literature
Pluralism and Diversity
PD/D
GER
3/A

Discussion of selected works by Lessing, Goethe and Schiller.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

prereq: one course numbered from GERMN 32000 to 35900 or equiv.
3 hrs
3 cr.

GERMN 34500 - Literature of Weimar Republic

Pluralism and Diversity
PD/D
GER
3/A

Discussion of literary works and documents influential in German life between 1918 and 1933.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

prereq: one course numbered from GERMN 32000 to 35900 or equiv.
3 hrs
3 cr.

GERMN 34600 - German Literature of the 1930s and 1940s

Pluralism and Diversity
PD/D
GER
3/A

Reading and discussion of literature written between the time of the Weimar Republic and 1945.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

prereq: one course numbered from GERMN 32000 to 35900 or equiv.
3 hrs
3 cr.

GERMN 34700 - German Literature 1945-1995

Pluralism and Diversity
PD/D
GER
3/A

Reading and discussion of German literature written between 1945 and 1995.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

prereq: one course numbered from GERMN 32000 to 35900 or equiv.
GERMN 34800 - East German Literature (1945-1990)

Pluralism and Diversity
PD/D
GER
3/A

Reading and discussion in German of literature written in East Germany during the existence of the German Democratic Republic as a sovereign state.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.
prereq: one course numbered GERMN 32000 to 35900 or equiv.
3 hrs
3 cr.

GERMN 35000 - Austrian Literature

Pluralism and Diversity
PD/D
GER
3/A

Discussion of literature and culture of the fin-de-siècle Vienna.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.
prereq: one course numbered from GERMN 32000 to 35900 or equiv.
3 hrs
3 cr.

GERMN 35300 - Goethe's Faust

Pluralism and Diversity
PD/D
GER
3/A

Intensive study of Goethe's Faust, Parts I and II.
(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.
prereq: one course numbered from GERMN 32000 to 35900 or equiv.
3 hrs
3 cr.

GERMN 35900 - German Literary Seminar

Pluralism and Diversity
PD/D
GER
3/A
Seminar study of significant theme in German literature, German author or literary movement or genre. May be repeated with a different topic.

(Conducted in German) A varying selection of the following courses will be offered in alternate years in accordance with student needs. Please consult the chair of the department or a departmental adviser for specific details.

prereq: one course numbered from GERMN 32000 to 35900 or equiv.
3 hrs
3 cr.

Additional Information

At least 12 credits must be earned by taking advanced classes in German literature and culture (numbered 32000-35900; also 44400).
Three or more of these credits must be from level II literature courses (numbered 34000-35900; also 44400). Majors are permitted to substitute one level I literature course (numbered 32000-33900) with a level II language course (numbered 38100-38500).

Students are encouraged to consult a departmental adviser as early as possible to plan their course of studies in German.

Students who begin German in college may count the following as major courses.

**GERMN 20100 - Intermediate German I**

Practice in comprehending and communicating in German at the intermediate level. Review of basic structures and study of advanced grammar topics.

*prereq: GRMN 10200 or equiv.*

3 hrs
3 cr.

**GERMN 20200 - Intermediate German II**

Grammar review and composition. Reading and discussion of selected literary texts.

*prereq: GRMN 20100 or equiv.*

3 hrs
3 cr.

-or-

**GERMN 20300 - Intensive Intermediate German**

Covers material of GRMN 201 and 202 in one semester.

*prereq: GRMN 10200, 10300 or equiv.*

6 hrs
6 cr.

**Preparation for Teaching in Grades 7-12**

In cooperation with the School of Education, the program in German provides opportunities for students to prepare for a career in teaching German in grades 7-12. Students preparing to teach German must complete a 33-credit major option (Option 2) for teaching that includes the 24-credit sequence (Option 1) taken by non-teaching majors plus 9 additional credits: GERMN 39900 and 6 additional credits in advanced GRMN language and literature courses in the German Department between GERMN 30100 and GERMN 44400 or GERMN 24000, GERMN 24100 or 300-level courses related to German studies offered in other departments (with prior approval by the chairperson of the German Department). Students interested in teaching German in New York schools will take the 23-credit pedagogical sequence for grades 7-12 Languages Other than English: Chinese, French, German, Hebrew, Italian, Russian, Spanish (BA) Additional Coursework and Student Teaching along with the major in German. This sequence may count toward the course requirements for New York State Certification but will not by itself be sufficient for certification. Students interested in a teaching career should consult with the School of Education. All students who want to pursue a teaching certificate in German must take an oral examination with the German Department. See the School of Education section of this catalog for further information.

Programs and Courses in History

History

About the Department

History is the record of human experience. Its study is a first step in learning about ourselves and our society — about economics and politics, psychology and sociology, mathematics and science, the arts and the humanities. For students whose undergraduate major is history, career opportunities are numerous and varied. Medical, law and other professional schools favor applicants with history majors because of their broad background and research skills. Moreover, while teaching has long been a popular goal for history majors, positions in government (local, state and national), in publishing and advertising, in communications and in business also await those students whose human perspective and intellectual discipline have been developed in history classes. Beyond the purely practical consideration of a profession, the study of history is exciting in its own right.

Undergraduate Major

History - BA

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

ENGL 12000 - Expository Writing

Hunter Core
English Comp (EC)
GER
1/A

Required of all students unless exempt; trains students to analyze, develop and evaluate ideas and to express themselves clearly and effectively. Introduction to documented research.

prereq: successful completion of developmental courses, if required
3 hrs + conf
3 cr.
Hunter Core Requirement Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

Major

BA: 30 credits

- A minimum of 6 credits of HIST-designated courses with a grade of C or better are required before the declaration of major

- A maximum of 9 credits in 100-level courses may be taken.

- A minimum of 18 credits in advanced-level courses distributed as follows:
  - 6 credits in 200-level courses (not including HIST 29000)
  - 12 credits in 300-level courses (including HIST 30000)

• History Practicum

HIST 29000 - History Practicum (W)

A seminar-style course intended to introduce students to the practice of historical research and writing. Students will be given a directed “hands-on” experience in conducting historical research and in the writing of research papers in measured, progressively challenging assignments. The course will prepare students to successfully engage in more self-directed, substantial and independent historical research projects in the future.

 prerequisites: ENGL 12000; 6 cr in history and permission of the department
3 hrs.
3 cr.

A minimum grade of C is required to receive credit for HIST 29000

• Historical Research or Historical Research Honors

HIST 30000 - Historical Research (W)

GER
3/B
Independent research related to a prior upper-level course already completed under the supervising instructor. The research will result in an extensive paper.

Courses at the 300-level and above not offered to freshmen.

*prereq: HIST 29000 and departmental permission*

3 hrs

3 cr.

-or-

**HIST 40000 - Historical Research [H]**

**GER**

3/B

The origins of history writing and the modern historical profession; modes of historical research; the evaluation of historical evidence; the historical and social uses of history. Recommended for all history majors. Required of students who wish to graduate with honors in history. Courses at the 300-level and above not offered to freshmen.

*prereq: not open to students who have completed fewer than 80 credits*

3 hrs

3 cr.

*A minimum grade of C is required to receive credit for HIST 30000/HIST 40000*

Within the requirements for the major students must complete a minimum of 6 credits in each of the following geographic fields:

- United States history
- European history *(includes Russian and the U.S.S.R.)*
- World/Non-Western *(Asia, Africa, Middle East)/Latin American history.*

If there are questions about the applicability of a course for a particular requirement please consult with the History Department adviser. Appropriate HIST 29000 and HIST 30000/HIST 40000 sections may count toward one or another of these fields, see department for more information.

No less than half the courses taken for the major (15 credits) must be taken at Hunter College. Courses taken for CR/NC may not be applied to the major.

It is strongly recommended that history majors consult with an undergraduate adviser prior to their last semester to review progress toward fulfillment of the requirements for the major.

**Minor**

Students majoring in disciplines other than history may elect a minor in history. The history minor consists of 12 credits. The minor in History is flexible and thus it can provide depth to a variety of majors; students can tailor the minor to suit best their individual interests.

Requirements:

1. Four history courses of 3 credits each (or 12 credits total) taken for a letter grade (C or better. Courses taken for a grade of Credit/No Credit will not count toward the minor.)
2. Courses must be distributed in at least two geographic fields, i.e. at least one course (3 credits) must be taken in a geographic area different from the other three. (Currently, the geographic areas are defined as U.S., European and World/Non-Western.)

3. At least two courses (6 credits) must be at the 300-level or above. Internships do not count toward completion of the minor, although students completing the minor may elect to include an internship as an additional course. Independent studies (tutorials) and HIST300 are available only to History Majors and, thus, do not count toward the minor.

4. At least two of the courses (or 6 credits) must be taken in the History Department at Hunter College. Courses taken in other disciplines will not count toward the minor unless cross-listed and taken under the appropriate HIST course code. Transfer courses must be approved by the History Undergraduate Advisor.

There are no prerequisites for the minor, although certain courses may have their own prerequisites.

Declaring a Minor in History:

Students are advised to declare their minor by the beginning of the upper junior semester, but must do it prior to their final semester (that of graduation). Declaration requires a planning session with the History Undergraduate Advisor and completion of the Major/Minor Declaration Form (to be obtained from the OASIS).

Preparation for Teaching

Childhood Education (grades 1-6)

In cooperation with the School of Education, the Department of History provides opportunities for history majors to prepare for a career in childhood education. Students complete the 30-credit History major with the childhood education sequence as a collateral major.

Adolescent Education

Students who wish to prepare for a career in teaching social studies in grades 7-12 may take a 33-credit history major with an additional 9 credits of prerequisites History for Adolescent Education (Social Studies) In addition, students take the 23-credit adolescent education sequence.

Honors in History

Students will be eligible for honors in history upon completion of the requirements for the major with a 3.5 GPA and a 3.0 cumulative GPA at the time of graduation. To be eligible to graduate with honors in history, students can take HIST 40000 - Historical Research [H] or 3 to 6 credits in seminar, tutorial or problems courses or graduate courses with special permission, with a grade of B or better. Eligible students should apply for honors at the time they file for graduation. Applications are available from the department.

HIST 40000 - Historical Research [H]

GER

3/B

The origins of history writing and the modern historical profession; modes of historical research; the evaluation of historical evidence; the historical and social uses of history. Recommended for all history majors. Required of students who wish to graduate with honors in history. Courses at the 300-level and above not offered to freshmen.

prereq: not open to students who have completed fewer than 80 credits
3 hrs
3 cr.

**HIST 49300 - Individual Tutorial Research Project**

**GER**

3/B

Research paper under individual supervision of faculty member.

Courses at the 300-level and above not offered to freshmen.

*prereq: perm chair and instr.*

3 hrs

3 cr.

**Graduate Study**

Qualified students in their junior and senior years may be admitted to graduate courses with the approval of the department chair.
History: Major with Minor in International Affairs - BA

Adviser: Michael Luther

Major

The major consists of 18 credits in history:

**HIST 32900 - History of European Diplomacy**

*Pluralism and Diversity*
*PD/D*
*GER*
*3/B*

From the Congress of Vienna and national unification movements through the era of total wars and cold war. Courses at the 300-level and above not offered to freshmen.
*3 hrs*
*3 cr.*

**HIST 36100 - America and the World in the 20th Century**

*Pluralism and Diversity*
*PD/D*
*GER*
*3/B*

The trajectory of American foreign relations during the last century, focusing on how and why the United States engaged other nations and peoples as it did. It also explores the ways in which developments overseas helped shape American domestic life. Courses at the 300-level and above not offered to freshmen.
*prereq: ENGL 12000*
*3 hrs*
*3 cr.*

plus 9 credits selected from

**HIST 27700 - East Asia to 1600**

*Hunter Core*
*World Culture and Global Issues (WCGI)*
*Pluralism and Diversity*
*PD/A*
*GER*
*2/B*

Survey of traditional cultures and sociopolitical structures of China, Japan, Korea and Vietnam to about 1600 AD. Courses at the 300-level and above not offered to freshmen.
*3 hrs*
*3 cr.*
HIST 27800 - East Asia, 1600 to the Present

Hunter Core
World Culture and Global Issues (WCGI)
Pluralism and Diversity
PD/A
GER
2/B

Coming of West to Asia and resulting processes of revolution and modernization after 1600 AD.
Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.

HIST 28800 - History of Africa to the 19th Century

Pluralism and Diversity
PD/A
GER
2/B

Survey of pre-colonial African societies with emphasis on economic and social institutions changing under the impact of the environment.
Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.

HIST 28900 - Africa in the 19th and 20th Centuries

Pluralism and Diversity
PD/A
GER
2/B

Historical explanation of independent Africa rising after colonialism and adjusting to modernization.
Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.

HIST 32700 - Europe since 1914

GER
3/B

Europe in a century of total wars and cold war: the military, political, social, economic and intellectual scene.
Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.

HIST 34600 - Churchill's Britain (W)
GER
3/B

The history of Britain and its empire in the 20th century. The emphasis will be on the world wars and their impact on British military and diplomatic power, and thus on the spread of British imperial rule up to the 1920s, as well as on the changes the wars brought to the British economy, society and culture and, ultimately, the collapse of the empire after 1945. The major theme of the course will be how to understand Britain's "decline" in the 20th century. The rise and fall of the British imperial system and its transformation into a Commonwealth of nations.
Courses at the 300-level and above not offered to freshmen.

prereq: ENGL 12000
3 hrs
3 cr.

HIST 37500 - Late Imperial Russia and the Soviet Union

Pluralism and Diversity
PD/D
GER
3/B

Political, socioeconomic and cultural development of late 19th and 20th century Russian and Soviet society.
Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.

HIST 37700 - Ancient and Imperial China to 1800

GER
3/B

China's traditions and transformation from Neolithic times to the late-imperial period, emphasizing state/society relations and the development of the centralized bureaucratic political system; covers political, economic, religious and social developments.
Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.

HIST 37800 - China Since 1800

GER
3/B

Internal and external challenges to China's traditional order; the collapse of the imperial system and the establishment of a republic; the warlord period; the war against Japan; the civil war between Communist and Nationalist forces; China since the rise of the Communist Party to state power in 1949.
Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.

HIST 39000 - History of Modern West Africa
GER
3/B

Impact of Islam, Christianity and colonialism. Analysis of African nationalism and problems of independence. Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.
• Seminars, problems courses and tutorial if appropriate

Minor

The minor consists of 18 credits including

**ECO 34000 - International Trade**

GER
3/B

Theories of international trade and international trade policies.  
prereq: ECO 20000
3 hrs
3 cr.

**POLSC 37500 - International Law (W)**

GER
3/B

Case studies on nature, sources, practices and efficacy of international law, principles and rules.  
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

**POLSC 27800 - International Organizations (W)**

GER
3/B

Powers, functions and effectiveness of international institutions; emphasis on United Nations and regional organizations.  
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

**GEOG 22100 - Economic Geography and Globalization**

GER
2/B

An introduction to the sub-discipline of economic geography, which will include an exploration of the history of both economics and geography, and a rigorous global approach to the subjects. Students will come to understand the history
of the development of economic thought, leading up to, and transformed, by today’s crisis, as well as the particularly geographical nature of economic phenomena and processes, and the immense contributions geographers have made to the understanding of economics. Course focus is on the dominant form of global economic activity today, which is capitalistic, and the way this economic structure plays out through different geographies at different historical moments in time.

Not open to freshmen

**GEOG 24400 - Political Geography**

**GER**

3/B

Political geography concerns the nature and consequences of human efforts to divide and control Earth. Major topics to be covered by this course include the origin and evolution of countries and their constituent political units; the defining and drawing of political boundaries; territorial conflicts and disputes; the impact of boundaries on personal and cultural identity; centripetal and centrifugal forces that encourage the success or failure of political units; jurisprudence, crime and punishment; electoral geography; war, piracy and terrorism; ownership of ocean floors and outer space; the environmental impacts of political power (zoning, incorporation, height restrictions, land tenure); and symbols of power in the landscape. Lectures and assignments will stress the relevancy of political geography to issues that affect our everyday life.

**prereq:** GEOG 10100 or GEOG 15000 or perm instr

3 hrs

3 cr.

*Offered fall and spring*

**Undergraduate Minor**

**Minor in History**

Students majoring in disciplines other than history may elect a minor in history. The history minor consists of 12 credits. The minor in History is flexible and thus it can provide depth to a variety of majors; students can tailor the minor to suit best their individual interests.

Requirements:

1. Four history courses of 3 credits each (or 12 credits total) taken for a letter grade (C or better. Courses taken for a grade of Credit/No Credit will not count toward the minor.)
2. Courses must be distributed in at least two geographic fields, i.e. at least one course (3 credits) must be taken in a geographic area different from the other three. (Currently, the geographic areas are defined as U.S., European and World/Non-Western.)
3. At least two courses (6 credits) must be at the 300-level or above. Internships do not count toward completion of the minor, although students completing the minor may elect to include an internship as an additional
course. Independent studies (tutorials) and HIST300 are available only to History Majors and, thus, do not count toward the minor.

4. At least two of the courses (or 6 credits) must be taken in the History Department at Hunter College. Courses taken in other disciplines will not count toward the minor unless cross-listed and taken under the appropriate HIST course code. Transfer courses must be approved by the History Undergraduate Advisor.

There are no prerequisites for the minor, although certain courses may have their own prerequisites.

Declaring a Minor in History:

Students are advised to declare their minor by the beginning of the upper junior semester, but must do it prior to their final semester (that of graduation). Declaration requires a planning session with the History Undergraduate Advisor and completion of the Major/Minor Declaration Form (to be obtained from the OASIS).

prereq or coreq: ENGL 12000
3 hrs
3 cr.

GEOG 10100 - People and Their Environment
A broad overview of subjects and ideas in geography, possibly the most internally diverse of the social sciences. Covers the geographical aspects of topics including weather and climate, landforms, religions, food, cities, economics, culture, politics and much more. While students will be expected to understand the basics of each of the topics covered, the overarching emphasis will be on understanding the relationships among them. As such, the course builds from one topic to the next, ultimately stressing the sheer geographical complexity and wonder of modern life. Contemporary economic, political and social patterns and problems are discussed.

3 hrs
3 cr.
offered fall and spring.

Major (33 credits)

Geography (6 credits)

GEOG 25100 - Geography of the United States and Canada

GER
2/B

Seeks to familiarize students with the regional geography of the United States and Canada. More specifically, the goals are to acquaint students with the dynamic nature of human and physical features that characterize the study area; the ways in which human and natural phenomena interact to create unique place characteristics and sub-regions; the key environmental issues that characterize the study area and its constituent parts; major trends that are affecting the geography of the two countries; and the locations of principal features. The course begins with general overview material, and then examines the various sub-regions of the study area in much greater detail, focusing on key characteristics and environmental challenges

prereq: GEOG 10100 or GEOG 15000 or perm instr.
3 hrs
3 cr.

One course selected from the following

History: Topical, Seminar and Tutorial Courses

HIST 25000 - Historical Issues

Study of selected historical themes and issues. Topics vary each semester. May be taken a second time.

Courses at the 300-level and above not offered to freshmen.

3 hrs
3 cr.

HIST 29000 - History Practicum (W)

A seminar-style course intended to introduce students to the practice of historical research and writing. Students will be given a directed “hands-on” experience in conducting historical research and in the writing of research papers in measured, progressively challenging assignments. The course will prepare students to successfully engage in more self-directed, substantial and independent historical research projects in the future.

prereq: ENGL 12000; 6 cr in history and permission of the department

3 hrs.
3 cr.

HIST 29100 - Historical Methods

The study of history, its sources and its methods.

Courses at the 300-level and above not offered to freshmen.

3 hrs
3 cr.

HIST 30000 - Historical Research (W)

GER
3/B

Independent research related to a prior upper-level course already completed under the supervising instructor. The research will result in an extensive paper.
Courses at the 300-level and above not offered to freshmen.

**HIST 34100 - Topics in History**

**GER**
3/B

Exploration of major trends, special controversies or significant events; topics vary each term.

**HIST 34122 - Latin American Political Economy**

**GER**
3/B
courses at the 300-level and above not open to freshmen

**HIST 34139 - African Influences in the Americas**

**GER**
3/B

Courses at the 300-level and above not open to freshmen

**HIST 38200 - Historical Studies Seminar**

**GER**
3/B

Topics vary each term.

**HIST 39100 - Historical Restoration and Museum Work**

**GER**
3/B

Introduction to museum work.
Courses at the 300-level and above not offered to freshmen.

3 hrs
3 cr.

**HIST 40000 - Historical Research [H]**

**GER**
3/B

The origins of history writing and the modern historical profession; modes of historical research; the evaluation of historical evidence; the historical and social uses of history. Recommended for all history majors. Required of students who wish to graduate with honors in history.

Courses at the 300-level and above not offered to freshmen.

*prereq: not open to students who have completed fewer than 80 credits*

3 hrs
3 cr.

**HIST 49200 - Honors Seminar in Historical Studies**

3 hrs
3 cr.

**HIST 49300 - Individual Tutorial Research Project**

**GER**
3/B

Research paper under individual supervision of faculty member.

Courses at the 300-level and above not offered to freshmen.

*prereq: perm chair and instr.*

3 hrs
3 cr.

**HIST 49800 - Internship**

Work in professional institutions.

Courses at the 300-level and above not offered to freshmen.

*prereq: perm chair*

1-6 cr.

**Religion: Religious Traditions**

**HIST 31500 - Christianity in Modern Times**

**GER**
3/B

Not offered to freshmen. Transformation of Christianity since the Reformation, Enlightenment and modern political
and intellectual challenges.

3 hrs
3 cr.

Human Rights Faculty

Human Rights

Return to Human Rights Program

Minor in Human Rights

15-credit minor in Human Rights:
Students in majors such as Anthropology, History, Political Science, Sociology, Urban Affairs and Planning, etc. could select Human Rights as a minor. The minor consists of the following courses:

- Introduction to Human Rights (HR 20000)
- Internship in Human Rights (HR 25000)
- 3 Cognate courses
  - Cognate courses draw on traditional disciplinary perspectives to examine claims about, e.g., the universal nature of human rights, their historical origins, social and cultural contexts that affect the understanding and status of human rights, and the relation of human rights to political conflicts and the presence or absence of economic well-being.

Certificate in Human Rights

The 24-credit Certificate in Human Rights consists of 4 core human rights courses—a 3-credit introductory course, a 3-credit internship, a 3-credit internship seminar and a 3-credit capstone seminar—plus 4 cognate courses. Students should work with the Human Rights Program adviser to put together an intellectually meaningful set of cognate courses.

To be accepted into the Certificate program, a student must have at least a 3.0 GPA.

Courses in Human Rights

Human Rights

HR 20000 - Introduction to Human Rights: History, Discourse, Practice (W)

Pluralism and Diversity
PD/D
GER
3/B

An introduction to the study of human rights. It explores the historical, philosophical, and legal roots of human rights as a political idea and institutionalized practice. It also addressed the contested nature of human rights as an idea and practice in contemporary societies. In addition to providing an introduction to the subject, the course is a requirement for students minoring in Human Rights or pursuing a Human Rights Certificate.

In order to pursue a Human Rights minor or Certificate, a student must receive at least a B (3.0) in this course. Students should take this introductory course in their sophomore year but must take it no later than the first semester of their junior year. This is a writing intensive course.

prereq: ENGL 12000 or equivalent; one course in ethics, political philosophy, political theory, sociological theory, or permission from the instructors.
3 hrs
3 cr.
fall and spring

HR 25000 - Human Rights Internship
This is a practicum course. It involves students participating in an organization that identifies its mission as the promotion of human rights. The aim of the course is to educate students in the practical dimension of translating human rights discourse and law into practice. The course is required for students seeking a Human Rights Certificate or a minor in Human Rights.

**prereq:** ENGL 12000 or equivalent; HR 20000 or equivalent

3 hrs

3 cr.

**HR 26000 - Human Rights Internship Seminar (W)**

This course critically evaluates the role of human rights organizations and human rights practices in determining the meaning and value of human rights.

**prereq:** ENGL 12000 and HR 20000

**prereq or coreq:** HR 25000

3 hrs

3 cr.

*Offered spring 2012; not offered fall 2011*

**HR 35000 - Human Rights Capstone Seminar (W)**

This course involves the theoretical examination of constitutive problems in the discourse and practice of human rights, especially as they would inform the composition of a human rights academic research project. It requires participating students to present their research projects in the seminar and to compose a 20-25 page research paper on a human rights topic.

This course is specifically designed for students who are pursuing a Certificate in Human Rights. This is a writing intensive course.

**prereq or coreq:** HR 26000

*Offered spring 2012; not offered fall 2011*

**Programs and Courses in Hunter-Bellevue School of Nursing**

**Hunter-Bellevue School of Nursing**

**About the School**

Nursing education began at Hunter in 1943, when courses for registered nurses were added to its curriculum. In 1955, a four-year collegiate program that was a pioneer for its time — the Hunter College Program in Nursing — was launched. When the Bellevue School of Nursing closed in 1969, Hunter absorbed it to create the Hunter-Bellevue School of Nursing, now located at the college's Brookdale Health Science Center at 425 East 25th Street in Manhattan, near Bellevue Hospital.

The Hunter-Bellevue School of Nursing is one of the largest and most prestigious nursing schools in the country. The school's programs combine liberal and professional education with a humanistic and comprehensive approach to health care.
Programs

The School of Nursing offers four programs leading to the Bachelor of Science (nursing) degree: the Generic Program, for those students who do not have an RN license; the RN RN to BS Program, for those students who have completed a nursing program and have received or are about to receive a current RN license to practice professional nursing in New York State; the joint/dual degree program with Queensborough Community College see: http://www.qcc.cuny.edu/nursing/dualJoint-hunterBellevue.html; and the Accelerated 2nd Degree Program, for those students who have already achieved a baccalaureate degree in another field of study and wish to transition into a nursing profession. Information on applying to all of our programs is available on our website at http://www.hunter.cuny.edu/nursing.

In earning the bachelor of science (nursing) degree, students in all programs complete lower division (liberal arts and general education) and upper division (professional education) curriculum requirements. See Program pages below for specific program requirements.

Programs and Courses

Programs and Courses in Hunter-Bellevue School of Nursing

Admission Requirements (all Programs)

Students are considered for admission to the Generic Program and Accelerated 2nd Degree Program for the fall semester only. Students are considered for admission to the generic program in the spring semester of their freshman year, after completing pre-requisite course work and an application to the School of Nursing. RN to BS students are admitted for the fall semester. An overall college GPA of 3.0 in addition to other requirements is the minimum requirement for consideration of an application. Admission to the School of Nursing is competitive. A minimum grade of "C" must be maintained for all required science, mathematics, and nursing courses. Generic Program and Accelerated 2nd Degree Program students must attend during the day on a full-time basis. Only matriculated Hunter College students can apply to the Generic Program. RN Program students may attend during the day or evening (depending on scheduling of courses) on a full-or a part-time basis.

Students are admitted to the dual-degree HBSON-Queensborough Community College (QCC) program after completing their first semester of study at QCC with a grade of B or better in Nu 101 and a GPA of 3.0 or better.

Licensing and Accreditation

The Hunter-Bellevue School of Nursing baccalaureate, Master's and Doctor of Nursing Practice programs are accredited by the Commission on Collegiate Nursing Education (CCNE). Hunter-Bellevue graduates are prepared to give first-level professional nursing care in all areas of nursing practice. Graduates from the Generic and Accelerated 2nd Degree Programs are eligible to take the National Council Licensing Examination for Registered Nurses. The program also provides a foundation for graduate study which is also offered at the School of Nursing.

Administration and Faculty

Location:

Faculty

Faculty of Hunter-Bellevue School of Nursing

HEGIS Codes: 1203 (Generic); 1203.10 (RN to BSN)

Bachelor of Science - BS

Nursing Accelerated 2nd Degree Program

This program is designed for students who already have a baccalaureate degree in another field and wish to transition into a career in nursing. The program is intensive; students may receive a Bachelor of Science degree in Nursing in as little as 18 months provided they have met all general education requirements and met all prerequisite requirements. The amount of time required for 2nd degree students to complete the program depends on such factors as the number of applicable transfer credits they have and the number of courses they take each semester. Accelerated 2nd Degree Program students cannot earn the degree in the evening. The Accelerated 2nd Degree Program is a full-time, daytime program.

Requirements for Admission

In order to be considered for admission into the Accelerated 2nd Degree Program, applicants must meet eligibility requirements and admission criteria. All students applying to the Accelerated 2nd Degree Nursing Program must have a baccalaureate degree from an accredited institution with a minimum cumulative GPA of 3.0 and a minimum grade of "B" in all science courses by June 1 preceding their entrance into the program for the fall semester. Students who do not meet GPA and degree requirements are not eligible to take the National League for Nursing Pre-admission-RN Examination and are not eligible to apply for admission into the program.

Students applying may take their last two prerequisite courses during the spring semester of the admission process. Prerequisite courses cannot be taken on a credit/no credit (CR/NC) basis. Students may not take prerequisite courses during the summer immediately preceding the fall entry into the program. Proof of successful completion of courses taken in the spring must be received by the School of Nursing by June 1; otherwise the student will be ineligible to register as a nursing major at Hunter College. Since decisions are made before the spring term is completed, applicants with grades pending will be conditionally accepted until receipt of final grades.
Acceptance of the student into the major is based on the following admission criteria: composite admission score (GPA plus score on NLN Pre-Admission-RN Examination) and completion of all admission requirements. The composite score of all students applying for admission at the same time will be rank ordered from the highest to the lowest. Students will be accepted for admission based on this ranked composite score and the completion of all other admission requirements.

Transfer Credits

- Up to 90 credits from an accredited institution of higher learning may be transferred to Hunter College to count towards degree requirements (see following non-nursing requirements).
- All students in the Accelerated Second-Degree Program can receive up to 90 transfer credits from their previous BA/BS degree to count towards the 120 credits needed to graduate to receive the Bachelor of Science degree in Nursing.

Non-Nursing Program Requirements

Required Core (12 credits)

**ENGL 12000 - Expository Writing**

Hunter Core
English Comp (EC)
GER
1/A

Required of all students unless exempt; trains students to analyze, develop and evaluate ideas and to express themselves clearly and effectively. Introduction to documented research.

*prereq: successful completion of developmental courses, if required
3 hrs + conf*

**ENGL 22000 - Introduction to Writing about Literature (W)**

Hunter Core
English Comp (EC)
GER
2/A

Analytical writing and close reading in British and American fiction, drama, poetry, and literary criticism, with an emphasis on further development of critical writing and research skills. Students gain a deeper understanding and appreciation of literature as well as more extensive experience with academic writing.

*prereq: ENGL 12000
3 hrs + one additional conference hour*

**STAT 11300 - Elementary Probability and Statistics**

Hunter Core
Math/Quantitative Reasoning
GER
Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

prereq: A grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: ENGL 12000
3 hrs
3 cr.

CHEM 10000 (STEM) - Essentials of General Chemistry Lecture

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
GER 2/E

Essential facts, laws, and theories of general chemistry.
Note: Core credit awarded only if CHEM 10000 and CHEM 10100 are completed. Primarily for nursing, nutrition and food science and community health education students.
4 hrs (3 lec, 1 rec)
3 cr.

Flexible Core (18 credits)

* Students entering Hunter with a BA or BS degree are required to complete the new Hunter Core, the Pluralism and Diversity requirement, and one writing intensive course. Any course for which equivalency is granted does not need to be repeated. Some courses already taken may be used to satisfy the new Hunter Core requirements. Pre-requisites: A course in Nutrition and a course in Genetics. Co-requisites: The new Hunter Core requirements must be completed during the Accelerated 2nd Degree Program.

** Major courses taken prior to clinical nursing courses that are applicable to New Hunter Core@ Gateway course into major

Requirements for the Degree:
Suggested Sequences of Courses:

First Semester (Fall)

**NURS 20000 - Introduction to Nursing**

Introduction to essential theories, concepts, and values of the nursing profession. Emphasis on understanding the practice and principles of nursing. The principles of service-learning are introduced.

*prereq: CHEM 10100; STAT 11300
coreq: Generic Pathway: NURS 21000; NURS 24000
Accelerated 2nd Degree: NURS 21000; NURS 22000; NURS 33100
30 hrs
2 cr.
offered fall

**NURS 21000 - Nursing Fundamentals and Health Assessment**

This course is designed to provide students with the tools required to perform a comprehensive physical assessment and review of a client’s history. The course will also introduce students to the nursing process, principles of infection control, and safety promotion. Students will learn inspection, auscultation, palpation, and percussion techniques. Emphasis is placed upon assessment of the well person with common health problems. Health promotion and maintenance strategies are highlighted for all age groups.

*prereq: CHEM 10000/10100; STAT 11300
coreq: (Generic): NURS 20000; NURS 24000;
(A2D): NURS 20000; NURS 22000; NURS 33100
30 hrs Lecture; 30 hrs Health Assessment Lab; 45 hrs Clinical
4 cr.

**NURS 22000 - Adult Health and Illness**

This class provides a knowledge base for effective nursing care of adult clients. Students will gain insight into the management of chronic illnesses. Through utilization of the nursing process, the student's role as client advocate, patient educator, and caregiver are further actualized. Methods of systematic analysis of research are introduced. Experimental learning in a variety of setting provide an opportunity for the student to promote, maintain and/or restore an optimum level of wellness in adult clients and families in collaboration with other members of the health team.

*prereq: (Generic): NURS 20000; NURS 21000; NURS 24000; (A2D): CHEM 10000/10100; STAT 11300
coreq: NURS 33100, NURS 20000; NURS 21000; NURS 33100
22.5 hrs Lecture, 30 hrs Lab, 67.5 hrs. Clinical
4 cr.

**NURS 33100 - Pharmacology I**

The first course presenting essential pharmaceutical information with a focus on respiratory, cardiovascular, renal, gastrointestinal, and neuropsychological systems. Emphasis is placed upon clinical applications and the nurse's role in drug therapy.

*prereq: 1. Generic Program: NURS 20000; NURS 21000; NURS 24000
2. Accelerated 2nd Degree: CHEM 10000/10100; STAT 11300
coreq: 1. Generic Program: NURS 22000
2. Accelerated 2nd Degree: NURS 20000; NURS 21000; NURS 22000
3 hrs
3 cr.

Second Semester (Winter)

NURS 33900 - Pharmacology II

This course is designed to further explore essential pharmacological information. The class will build upon information provided in NURS 33100 and provide insight into additional topics in pharmacotherapy, including substance abuse, chemotherapy, alternative medicine, and medications acting on the immune and endocrine systems.

prereq: NURS 22000; NURS 33100
coreq: NURS 33200; NURS 35200; NURS 38000
45 hrs. lecture
3 hrs.

Third Semester (Spring)

NURS 34300 - Pathophysiology and Nursing Care

This course examines biological mechanisms producing disruptions in homeostasis and resulting alterations in physiologic function. The course synthesizes knowledge and theories from nursing, psychosocial, and biological sciences as a foundation for the study of pathophysiology. Emphasis is placed on the molecular basis of illness, the resulting clinical manifestations, and key nursing interventions.

prereq: 1. Generic Program: NURS 22000; NURS 24000; NURS 33900; NURS 38000
2. Accelerated 2nd Degree: NURS 22000; NURS 33900
coreq: 1. Generic Program: NURS 34900; NURS 36000
2. Accelerated 2nd Degree: NURS 35200; NURS 36000; NURS 38000
45 hrs
3 cr.

NURS 35200 - Nursing Care of Women and Childbearing Families

The course focuses on the assessment, care, counseling, and education of women and childbearing families. Didactic and clinical learning opportunities focus on nursing practice with expectant mothers, neonates and their families in classroom and selected health care settings. This course provides the theoretical basis for the nursing management of healthy and high risk women and childbearing families. Standards and Guidelines for Professional Nursing Practice in the Care of Women and Newborns (7th edition) (2009) developed by the Association for Women's Health, Obstetric and Neonatal Nursing will be utilized to emphasize the nurse's key role in providing evidence-based care that is developmentally and culturally appropriate.

prereq: NURS 22000; NURS 33100
coreq: (Generic) NURS 33200; NURS 33900; NURS 38000
(A2D) NURS 34300; NURS 36000; NURS 38000;
30 hrs. Lecture, 90 hrs. Clinical
4 cr.
NURS 36000 - Nursing Care of Infants, Children, and Adolescents

This course provides an analysis of the biological, psychological, social, cultural and spiritual dimensions of the pediatric client as a member of a family system within a changing society. The learner is taught to provide care in the context of the client's developmental stage. Emphasis is on the application of the nursing process in health promotion, maintenance and/or restoration to optimum levels of wellness. Experiential learning in a wide variety of settings provides the opportunity for the student to collaborate with other members of the nursing team.

Prereq: NURS 22000; NURS 33100
Coreq: (Generic) NURS 34300; NURS 34900
(A2D) NURS 34300; NURS 35200; NURS 38000
22.5 hrs: Lecture; 30 hrs: Lab; 67.5 hrs: Clinical
4 cr.

NURS 38000 - Nursing Research and Theory

Introduction to theory development and research in nursing. For Generic Program: NURS 20000, 31000
Prereq: Generic Program: NURS 22000
Accelerated 2nd Degree: NURS 22000
RN Program: STAT 11300; NURS 37900
Coreq: Generic Program: NURS 33200; NURS 33900; NURS 35200
(A2D) NURS 34300; NURS 35200; NURS 36000
RN Program: None
45 hrs
3 cr.

Fourth Semester (Summer)

NURS 45500 - Public Health Nursing

In lectures and in supervised clinical experiences, the student examines the roles of nurses in planning, delivering and evaluating health programs and services for families, communities and populations. The impact of social, economic and environmental determinants of human health is explored, as are tools for assessing the health status of communities and populations. The course introduces students to the global context of public and community health and examines nursing practice in areas including home health, environmental and school health. The role of nurses in preparing communities to plan for and recover from natural and human-made disasters is also examined.

Prereq: NURS 35200; NURS 36000
Coreq: NURS 46000
30 hrs: Lecture, 90 hrs: Clinical
4 cr.

NURS 46000 - Mental and Behavioral Health Nursing

This course introduces the learner to assessment and common interventions for care of patients across the lifespan who require mental and behavioral health care, including biological, psychological, social, cultural and spiritual dimensions of individuals. Disease/illness trajectories and their translation into clinical practice guidelines and standard procedures are considered in relation to their impact on providing culturally sensitive, person-centered care. Classroom, laboratory and clinical learning experiences in a variety of settings provide an opportunity for the student to practice delivering high quality and safe client care in collaboration with other members of the health team.

Prereq: NURS 35200; NURS 36000
Coreq: NURS 45500
Fifth Semester (Fall)

**NURS 42000 - Nursing Leadership and Ethics**

In this course, students will examine the roles of the professional leadership in leading and managing health care services and ensuring ethical nursing practice. The course examines trends in health care delivery and health policy, as well as registered nurses' accountability for delivering and overseeing the provision of safe, quality health care services consistent with the ethical principles of the nursing profession. Students will be introduced to principles of coordinating care, including delegation and assignment of nursing tasks and functions. The course addresses nurses' roles in advocating on behalf of patients, themselves and the profession.

*prereq: NURS 45500; NURS 46000*

*coreq: NURS 47000; NURS 49000; NURS 49200*

3 hrs

3 cr.

**NURS 47000 - Adult Acute Illness/ Immersion Clinical**

This course includes in-depth study of the biological, social, cultural and spiritual dimensions of the acutely and critically ill adults. Experiential learning in acute care settings provides an opportunity for the student to promote, maintain and/or restore an optimum level of health for these adults and their families in collaboration with other members of the health care team. Methods of systematic analysis of relevant research are discussed.

*prereq: NURS 45500; NURS 46000*

*coreq: (Generic) NURS 42200; NURS 49000; NURS 49200 (A2D) NURS 42000; NURS 49000; NURS 49200*

22.5 hrs: Lecture; 112.5 hrs: Clinical

4 cr.

**NURS 49000 - Gerontological Nursing**

This course provides a knowledge and skill base for effective nursing care of older adults. Evidence-based practice and theories guide the student in assisting the older adult and his/her family in understanding and managing health related issues in the aging process. The course includes an in-depth study of the biological, psychological, social, cultural and spiritual dimensions of the older adult client as a member of families and community systems within a changing society. The students learn to do a comprehensive assessment of the older adult using valid and reliable assessment tools. The nursing process is used as the foundation to assist the older adult to attain an optimal level of health. Concepts from related disciplines are explored as they impact on the promotion, maintenance and/or restoration of health. Experiential learning in a variety of settings provides the opportunity for the student to collaborate with interdisciplinary health teams.

*prereq: NURS 45500; NURS 46000*

*coreq: (Generic) NURS 42200; NURS 49000; NURS 49200 (A2D) NURS 42000; NURS 47000; NURS 49200*

30 hrs: Lecture; 90 hrs: Clinical

4 cr.

**NURS 49200 - Advanced Synthesis of Nursing Knowledge**
This course will serve as a review of essential concepts and skills from the nursing curriculum. Students will focus on those concepts that they need to improve for the successful practice of professional nursing. Students will utilize the Hunter-Bellevue School of Nursing Learning Laboratory to review clinical skills practiced throughout the nursing curriculum. Students will also take a comprehensive examination to determine their mastery of professional nursing content.

**prereq:** NURS 45500; NURS 46000  
**coreq:** (Generic) NURS 42200; NURS 47000; NURS 49000  
NURS 42000; NURS 47000; NURS 49000  
22.5 hrs: Lecture, 30 hrs: Lab  
2 cr.

**clinical courses running same semester as generic**  
**clinical courses running separate from generic**

**Accelerated 2nd Degree Program:**

**NURS 20000 - Introduction to Nursing**

Introduction to essential theories, concepts, and values of the nursing profession. Emphasis on understanding the practice and principles of nursing. The principles of service-learning are introduced.

**prereq:** CHEM 10100; STAT 11300  
**coreq:** Generic Pathway: NURS 21000; NURS 24000  
Accelerated 2nd Degree: NURS 21000; NURS 22000; NURS 33100  
30 hrs  
2 cr.  
offered fall

**NURS 21000 - Nursing Fundamentals and Health Assessment**

This course is designed to provide students with the tools required to perform a comprehensive physical assessment and review of a client’s history. The course will also introduce students to the nursing process, principles of infection control, and safety promotion. Students will learn inspection, auscultation, palpation, and percussion techniques. Emphasis is placed upon assessment of the well person with common health problems. Health promotion and maintenance strategies are highlighted for all age groups.

**prereq:** CHEM 10000/10100; STAT 11300

4 cr.

**NURS 22000 - Adult Health and Illness**

This class provides a knowledge base for effective nursing care of adult clients. Students will gain insight into the management of chronic illnesses. Through utilization of the nursing process, the student's role as client advocate, patient educator, and caregiver are further actualized. Methods of systematic analysis of research are introduced. Experimental learning in a variety of setting provide an opportunity for the student to promote, maintain and/or restore an optimum level of wellness in adult clients and families in collaboration with other members of the health team.

**prereq:** (Generic): NURS 20000; NURS 21000; NURS 24000; (A2D): CHEM 10000/10100; STAT 11300
coreq: NURS 33100, NURS 20000; NURS 21000; NURS 33100  
22.5 hrs Lecture, 30 hrs Lab, 67.5 hrs. Clinical  
4 cr.

NURS 33100 - Pharmacology I

The first course presenting essential pharmaceutical information with a focus on respiratory, cardiovascular, renal, gastrointestinal, and neurological systems. Emphasis is placed upon clinical applications and the nurse's role in drug therapy.

prereq: 1. Generic Program: NURS 20000; NURS 21000; NURS 24000  
2. Accelerated 2nd Degree: CHEM 10000/10100; STAT 11300  
coreq: 1. Generic Program: NURS 22000  
2. Accelerated 2nd Degree: NURS 20000; NURS 21000; NURS 22000  
3 hrs  
3 cr.

NURS 33900 - Pharmacology II

This course is designed to further explore essential pharmaceutical information. The class will build upon information provided in NURS 33100 and provide insight into additional topics in pharmacotherapy, including substance abuse, chemotherapy, alternative medicine, and medications acting on the immune and endocrine systems.

prereq: NURS 22000; NURS 33100  
coreq: NURS 33200; NURS 35200; NURS 38000  
45 hrs. lecture  
3 hrs.

NURS 34300 - Pathophysiology and Nursing Care

This course examines biological mechanisms producing disruptions in homeostasis and resulting alterations in physiologic function. The course synthesizes knowledge and theories from nursing, psychosocial, and biological sciences as a foundation for the study of pathophysiology. Emphasis is placed on the molecular basis of illness, the resulting clinical manifestations, and key nursing interventions.

prereq: 1. Generic Program: NURS 22000; NURS 24000; NURS 33900; NURS 38000  
2. Accelerated 2nd Degree: NURS 22000; NURS 33900  
coreq: 1. Generic Program: NURS 34900; NURS 36000  
2. Accelerated 2nd Degree: NURS 35200; NURS 36000; NURS 38000  
45 hrs  
3 cr.

NURS 35200 - Nursing Care of Women and Childbearing Families

The course focuses on the assessment, care, counseling, and education of women and childbearing families. Didactic and clinical learning opportunities focus on nursing practice with expectant mothers, neonates and their families in classroom and selected health care settings. This course provides the theoretical basis for the nursing management of healthy and high risk women and childbearing families. Standards and Guidelines for Professional Nursing Practice in the Care of Women and Newborns (7th edition) (2009) developed by the Association for Women's Health, Obstetric and Neonatal Nursing will be utilized to emphasize the nurse's key role in providing evidence-based care that is developmentally and culturally appropriate.
prereq: NURS 22000; NURS 33100

NURS 36000 - Nursing Care of Infants, Children, and Adolescents

This course provides an analysis of the biological, psychological, social, cultural and spiritual dimensions of the pediatric client as a member of a family system within a changing society. The learner is taught to provide care in the context of the client's developmental stage. Emphasis is on the application of the nursing process in health promotion, maintenance and/or restoration to optimum levels of wellness. Experiential learning in a wide variety of settings provides the opportunity for the student to collaborate with other members of the nursing team.

prereq: NURS 22000; NURS 33100
coreq: (Generic) NURS 34300; NURS 34900
(A2D) NURS 34300; NURS 35200; NURS 38000
22.5 hrs: Lecture; 30 hrs: Lab; 67.5 hrs: Clinical
4 cr.

NURS 38000 - Nursing Research and Theory

Introduction to theory development and research in nursing. for Generic Program: NURS 20000, 31000

prereq: Generic Program: NURS 22000
Accelerated 2nd Degree: NURS 22000
RN Program: STAT 11300; NURS 37900
coreq: Generic Program: NURS 33200; NURS 33900; NURS 35200
Accelerated 2nd Degree: NURS 34300; NURS 35200; NURS 36000
RN Program: None
45 hrs
3 cr.

NURS 42000 - Nursing Leadership and Ethics

In this course, students will examine the roles of the professional leadership in leading and managing health care services and ensuring ethical nursing practice. The course examines trends in health care delivery and health policy, as well as registered nurses' accountability for delivering and overseeing the provision of safe, quality health care services consistent with the ethical principles of the nursing profession. Students will be introduced to principles of coordinating care, including delegation and assignment of nursing tasks and functions. The course addresses nurses' roles in advocating on behalf of patients, themselves and the profession.

prereq: NURS 45500; NURS 46000
coreq: NURS 47000; NURS 49000; NURS 49200
3 hrs
3 cr.

NURS 45500 - Public Health Nursing

In lectures and in supervised clinical experiences, the student examines the roles of nurses in planning, delivering and evaluating health programs and services for families, communities and populations. The impact of social, economic and environmental determinants of human health is explored, as are tools for assessing the health status of communities and populations. The course introduces students to the global context of public and community health and examines nursing practice in areas including home health, environmental and school health. The role of nurses in preparing communities
to plan for and recover from natural and human-made disasters is also examined.

**NURS 46000 - Mental and Behavioral Health Nursing**

This course introduces the learner to assessment and common interventions for care of patients across the lifespan who require mental and behavioral health care, including biological, psychological, social, cultural and spiritual dimensions of individuals. Disease/illness trajectories and their translation into clinical practice guidelines and standard procedures are considered in relation to their impact on providing culturally sensitive, person-centered care. Classroom, laboratory and clinical learning experiences in a variety of settings provide an opportunity for the student to practice delivering high quality and safe client care in collaboration with other members of the health team.

**NURS 47000 - Adult Acute Illness/Immersion Clinical**

This course includes in-depth study of the biological, social, cultural and spiritual dimensions of the acutely and critically ill adults. Experiential learning in acute care settings provides an opportunity for the student to promote, maintain and/or restore an optimum level of health for these adults and their families in collaboration with other members of the health care team. Methods of systematic analysis of relevant research are discussed.

**NURS 49000 - Gerontological Nursing**

This course provides a knowledge and skill base for effective nursing care of older adults. Evidence-based practice and theories guide the student in assisting the older adult and his/her family in understanding and managing health related issues in the aging process. The course includes an in-depth study of the biological, psychological, social, cultural and spiritual dimensions of the older adult client as a member of families and community systems within a changing society. The students learn to do a comprehensive assessment of the older adult using valid and reliable assessment tools. The nursing process is used as the foundation to assist the older adult to attain an optimal level of health. Concepts from related disciplines are explored as they impact on the promotion, maintenance and/or restoration of health. Experiential learning in a variety of settings provides the opportunity for the student to collaborate with interdisciplinary health teams.
This course will serve as a review of essential concepts and skills from the nursing curriculum. Students will focus on those concepts that they need to improve for the successful practice of professional nursing. Students will utilize the Hunter-Bellevue School of Nursing Learning Laboratory to review clinical skills practiced throughout the nursing curriculum. Students will also take a comprehensive examination to determine their mastery of professional nursing content.

prereq: NURS 45500; NURS 46000
coreq: (Generic) NURS 42200; NURS 47000; NURS 49000
NURS 42000; NURS 47000; NURS 49000
22.5 hrs: Lecture, 30 hrs: Lab
2 cr.

Total Accelerated 2nd Degree Program Credits: 51

Nursing Course Listing

Return to Hunter-Bellevue School of Nursing

Note: Students who fail a core prerequisite course in a nursing sequence may not proceed to the next course in the sequence without repeating the failed course. In order to continue in the Nursing major, students must receive minimum grades of “C” in all required nursing courses. Only one failed required nursing course is repeatable only once by students who have received a “D” or less. Students who fail a second required nursing course in the sequence may not repeat that course and may not continue in the major. This policy applies even though a grade appeal is in progress.

Generic Pathway Courses

Nursing Generic Program

NURS 20000 - Introduction to Nursing

Introduction to essential theories, concepts, and values of the nursing profession. Emphasis on understanding the practice and principles of nursing. The principles of service-learning are introduced.

prereq: CHEM 10100; STAT 11300
coreq: Generic Pathway: NURS 21000; NURS 24000
Accelerated 2nd Degree: NURS 21000; NURS 22000; NURS 33100
30 hrs
2 cr.
offered fall

NURS 31000 - Nursing I

Provides essential knowledge base for implementing the nursing process in the care of clients across the lifespan, with specific emphasis on the childbearing family. Principles of service-learning are applied.

Material Fee: $50
prereq: completion of lower-division sequence
coreq: NURS 20000
NURS 31200 - Nursing II

Provides knowledge base for effective nursing care of clients from childhood through young adulthood. Community engagement learning experiences supporting the principles of service-learning are included.

Material Fee: $50
prereq: NURS 20000, 31000, 33100

NURS 33100 - Pharmacology I

The first course presenting essential pharmacological information with a focus on respiratory, cardiovascular, renal, gastrointestinal, and neurological systems. Emphasis is placed upon clinical applications and the nurse's role in drug therapy.

prereq: 1. Generic Program: NURS 20000; NURS 21000; NURS 24000
       2. Accelerated 2nd Degree: CHEM 10000/10100; STAT 11300
   coreq: 1. Generic Program: NURS 22000
       2. Accelerated 2nd Degree: NURS 20000; NURS 21000; NURS 22000

NURS 33200 - Normal and Therapeutic Nutrition in the Nursing Process

This course introduces students to the principles of nutrition and their application to professional nursing practice. Examines macro- and micro-nutrients, the role of nutrition in disease prevention and health promotion throughout the life span. Nutrition-related nursing interventions are discussed for acute and critically ill patients and for patients with selected disorders including gastrointestinal and cardiovascular diseases, diabetes, cancer and HIV/AIDS.

prereq: NURS 22000

NURS 38000 - Nursing Research and Theory

Introduction to theory development and research in nursing. for Generic Program: NURS 20000, 31000

prereq: Generic Program: NURS 22000
       Accelerated 2nd Degree: NURS 22000
       RN Program: STAT 11300; NURS 37900
   coreq: Generic Program: NURS 33200; NURS 33900; NURS 35200
       Accelerated 2nd Degree: NURS 34300; NURS 35200; NURS 36000
       RN Program: None

NURS 41000 - Nursing III
Provides a knowledge base for effective nursing care of middle-aged clients. Concepts and principles of service-learning are discussed and integrated into a professional practice paradigm.

Material Fee: $50

prereq: NURS 20000, 31000, 31200, 33100, 33200
18 hrs (4 lec, 14 lab)

8

offered fall

**NURS 41200 - Nursing IV**

Provides knowledge base for effective nursing care of elderly clients. Principles of service-learning are integrated into selected community experiences to promote civic engagement.

prereq: NURS 41000
18 hrs (4 lec, 14 lab)
8 cr.

offered spring

**NURS 41900 - Nursing Management and Leadership in the Health Care System**

Study of principles of nursing management, leadership, and research processes in health care system.

prereq: NURS 20000, 31000, 31200, 33100, 33200
2 hrs
2 cr.

offered spring

**NURS 42100 - Nursing and Society**

Analysis of issues and trends in nursing and health care from societal perspective, including opportunities for collaborative practice through service-learning.

prereq: NURS 20000, 31000, 31200, 33100, 33200, 41000, 41900
2 hrs
2 cr.

offered spring

**Accelerated Second Degree Pathway Courses**

Nursing Accelerated 2nd Degree Program

**NURS 20000 - Introduction to Nursing**

Introduction to essential theories, concepts, and values of the nursing profession. Emphasis on understanding the practice and principles of nursing. The principles of service-learning are introduced.

prereq: CHEM 10100; STAT 11300
coreq: Generic Pathway: NURS 21000; NURS 24000
        Accelerated 2nd Degree: NURS 21000; NURS 22000; NURS 33100
30 hrs
2 cr.

offered fall
NURS 31000 - Nursing I

Provides essential knowledge base for implementing the nursing process in the care of clients across the lifespan, with specific emphasis on the childbearing family. Principles of service-learning are applied.

Material Fee: $50
prereq: completion of lower-division sequence
coreq: NURS 20000

NURS 31200 - Nursing II

Provides knowledge base for effective nursing care of clients from childhood through young adulthood. Community engagement learning experiences supporting the principles of service-learning are included.

Material Fee: $50
prereq: NURS 20000, 31000, 33100
18 hrs (4 lec, 14 lab)
8 cr.
offered spring

NURS 33100 - Pharmacology I

The first course presenting essential pharmacological information with a focus on respiratory, cardiovascular, renal, gastrointestinal, and neurological systems. Emphasis is placed upon clinical applications and the nurse's role in drug therapy.

prereq: 1. Generic Program: NURS 20000; NURS 21000; NURS 24000
2. Accelerated 2nd Degree: CHEM 10000/10100; STAT 11300
coreq: 1. Generic Program: NURS 22000
2. Accelerated 2nd Degree: NURS 20000; NURS 21000; NURS 22000
3 hrs
3 cr.

NURS 33200 - Normal and Therapeutic Nutrition in the Nursing Process

This course introduces students to the principles of nutrition and their application to professional nursing practice. Examines macro- and micro-nutrients, the role of nutrition in disease prevention and health promotion throughout the life span. Nutrition-related nursing interventions are discussed for acute and critically ill patients and for patients with selected disorders including gastrointestinal and cardiovascular diseases, diabetes, cancer and HIV/AIDS.

prereq: NURS 22000
30 hrs
2 cr.

NURS 34300 - Pathophysiology and Nursing Care

This course examines biological mechanisms producing disruptions in homeostasis and resulting alterations in physiologic function. The course synthesizes knowledge and theories from nursing, psychosocial, and biological sciences as a foundation for the study of pathophysiology. Emphasis is placed on the molecular basis of illness, the
resulting clinical manifestations, and key nursing interventions.

prereq: 1. Generic Program: NURS 22000; NURS 24000; NURS 33900; NURS 38000
2. Accelerated 2nd Degree: NURS 22000; NURS 33900
coreq: 1. Generic Program: NURS 34900; NURS 36000
2. Accelerated 2nd Degree: NURS 35200; NURS 36000; NURS 38000
45 hrs
3 cr.

NURS 38000 - Nursing Research and Theory

Introduction to theory development and research in nursing. for Generic Program: NURS 20000, 31000
prereq: Generic Program: NURS 22000
Accelerated 2nd Degree: NURS 22000
RN Program: STAT 11300; NURS 37900
coreq: Generic Program: NURS 33200; NURS 33900; NURS 35200
Accelerated 2nd Degree: NURS 34300; NURS 35200; NURS 36000
RN Program: None
45 hrs
3 cr.

NURS 41000 - Nursing III

Provides a knowledge base for effective nursing care of middle-aged clients. Concepts and principles of service-
learning are discussed and integrated into a professional practice paradigm.
Material Fee: $50
prereq: NURS 20000, 31000, 31200, 33100, 33200

8 offered fall

NURS 41200 - Nursing IV

Provides knowledge base for effective nursing care of elderly clients. Principles of service-learning are integrated into
selected community experiences to promote civic engagement.

prereq: NURS 41000
18 hrs (4 lec, 14 lab)
8 cr. offered spring

NURS 42000 - Nursing Leadership and Ethics

In this course, students will examine the roles of the professional leadership in leading and managing health care
services and ensuring ethical nursing practice. The course examines trends in health care delivery and health policy, as
well as registered nurses' accountability for delivering and overseeing the provision of safe, quality health care services
consistent with the ethical principles of the nursing profession. Students will be introduced to principles of coordinating
care, including delegation and assignment of nursing tasks and functions. The course addresses nurses' roles in
advocating on behalf of patients, themselves and the profession.
prereq: NURS 45500; NURS 46000
coreq: NURS 47000; NURS 49000; NURS 49200
RN Pathway Courses

Nursing RN Program

NURS 37900 - Nursing and Societal Forces in the Health Care Delivery System

Open to RN Program students only. This is the first course in the RN Program curriculum and must be taken prior to or in conjunction with other required nursing courses depending on the pre/co requisites of the courses. Exploration of health care dilemmas through the integration of knowledge from nursing, social sciences and public health. Principles of service-learning are introduced.

3 hrs
3 cr.

NURS 38000 - Nursing Research and Theory

Introduction to theory development and research in nursing. for Generic Program: NURS 20000, 31000
prereq: Generic Program: NURS 22000
Accelerated 2nd Degree: NURS 22000
RN Program: STAT 11300; NURS 37900
coreq: Generic Program: NURS 33200; NURS 33900; NURS 35200
Accelerated 2nd Degree: NURS 34300; NURS 35200; NURS 36000
RN Program: None
45 hrs
3 cr.

NURS 38100 - Health Assessment Throughout the Lifespan

Open to RN Program students only. Analysis of normal patterns of wellness for individual clients with emphasis on development of assessment skills.
Material Fee: $45
prereq: CHEM 10000, CHEM 10100
prereq or coreq: NURS 37900
6 hrs (3 lec, 3 lab)
4.5 cr.

NURS 38400 - Nursing Culturally Diverse Families

Pluralism and Diversity
PD/B
Open to RN Program students only. Explores the interrelationships between sociocultural factors and health care practices of families from diverse cultures as a basis for nursing practice. Principles of service-learning are reflected in the culturally competent interventions.
3 hrs
3 cr.

NURS 48000 - Promotion of Wellness in the Community
Open to RN Pathway students only. Examination of family and community patterns as they relate to individual clients of all ages. Principles of service-learning are used in community-based clinical experiences to promote civic engagement.

prereq: NURS 37900, 38100, 38400
7.5 hrs (3 lec, 4.5 practicum)
4.5 cr.

NURS 48200 - Advancement of Roles and Relationships in Professional Nursing

Open to RN Program students only. Explores the roles and relationships in nursing with a focus on leadership as the key to the professionalism of nursing. Principles of service-learning are reflected in the ongoing development of the professional role. This is the last course in the RN Program.

prereq: NURS 37900
prereq or coreq: NURS 38000, 38100, 38400, 48000
3 hrs
3 cr.

Nursing Electives

NURS 34000 - Women’s Health

Pluralism and Diversity
PD/C
Desired to identify and analyze those factors which impact on the health status of women: biological, sociological, psychological, environmental, political.

3 hrs
3 cr.

NURS 34200 - Ethical Issues in Nursing Practice

Open to RN Program and senior Generic Program students only. Examines ethical issues which arise from the practice of nursing in an interpersonal, professional, institutional and social context of diverse and competing values.

3 hrs
3 cr.

NURS 34300 - Pathophysiology and Nursing Care

This course examines biological mechanisms producing disruptions in homeostasis and resulting alterations in physiologic function. The course synthesizes knowledge and theories from nursing, psychosocial, and biological sciences as a foundation for the study of pathophysiology. Emphasis is placed on the molecular basis of illness, the resulting clinical manifestations, and key nursing interventions.

prereq: 1. Generic Program: NURS 22000; NURS 24000; NURS 33900; NURS 38000
2. Accelerated 2nd Degree: NURS 22000; NURS 33900
coreq: 1. Generic Program: NURS 34900; NURS 36000
2. Accelerated 2nd Degree: NURS 35200; NURS 36000; NURS 38000
45 hrs
3 cr.
NURS 34500 - HIV/AIDS: An Interdisciplinary Perspective for Health Care Providers

Examines the impact of the HIV epidemic on the biological, psychological and social dimensions of persons affected by HIV/AIDS.
3 hrs
3 cr.

NURS 34600 - Death and Dying

Pluralism and Diversity
P/D B
Provides an overview of current theories, concepts, and practices associated with death, dying and end-of-life care.
3 hrs
3 cr.

NURS 35000 - Independent Study in Nursing

An opportunity to explore a topic relevant to nursing which is of individual interest.
1-3 hrs
1-3 cr.

NURS 35100 - Gender, Science and Technology

Pluralism and Diversity
PD/C
Explores the complex relationship between women and the sciences.
\textit{cross-listed} WGSS 35100
3 hrs
3 cr.

NURS 37900 - Nursing and Societal Forces in the Health Care Delivery System

Open to RN Program students only. This is the first course in the RN Program curriculum and must be taken prior to or in conjunction with other required nursing courses depending on the pre/co requisites of the courses. Exploration of health care dilemmas through the integration of knowledge from nursing, social sciences and public health. Principles of service-learning are introduced.
3 hrs
3 cr.

NURS 39998 - Urban Disaster Response and the Health Care Team

Provides the student with an understanding of the causes, prevention, and mitigation of disasters and insight into the disaster management system nationally and locally. The course will include content relevant to all disciplines in the disaster care continuum and focus on each individual health care member's role and responsibilities within these systems.
3 hrs
3 cr.

NURS 44000 - Stress Management for Nurses
An overview of stress and its effect upon behavior within the framework of the holistic man-wellness model.

NURS 44100 - Selected Studies in Nursing Research

Honors course. Utilization of basic knowledge in nursing research to critique and interpret studies and discuss their relevance and application in nursing.

prereq: NURS 31000, 31200, 33100, 33200, 38000, 38100

NURS 44200 - Nursing Care of Acute and Critically Ill Clients

Examination of nursing knowledge and roles in caring for acute and critically ill clients and their families.

NURS 44500 - Teaching-Learning Across the Developmental and Health Continua

Pedagogical/andrological principles of learning and instruction to enhance client teaching in the promotion, maintenance and/or restoration of health.

NURS 45000 - Computer Concepts and Application in Nursing

Study of computing concepts, principles, practices, and applications in nursing and health care.

NURS 48300 - Politics of Health

An analysis of the relationships between politics and health status, health services and health care providers.

Leave of Absence Policy and Reserved Placement in a Clinical Course

A reserved placement in a clinical/field course will be held for the student for only one year from the date of the leave of absence. The School of Nursing cannot guarantee the placement for any longer period of time. It is the responsibility of the student to submit to the undergraduate program director a letter of intent, one semester prior to returning to the program and enrolling in the course (April 1 for a fall course). Students who fail to follow this procedure release the School of Nursing from reserving a clinical/field placement in a course for the student.
Nursing Generic Program

The Hunter-Bellevue School of Nursing undergraduate program of study combines liberal arts and professional nursing education with a humanistic and comprehensive approach to health care, leading to a Bachelor of Science degree in Nursing. At the completion of this generic program, students are eligible to take the NCLEX-RN exam, the licensing examination for registered nurses. The Undergraduate program also provides a foundation for graduate study. The Generic Program consists of two parts:

- Non-nursing (liberal arts and general education requirements)
- Nursing (professional nursing education and general education requirements continued)

Students are considered for admission to the school of nursing for the fall semester only, after completing non-nursing pre-requisite courses and application. Only students admitted to the School of Nursing are allowed to declare nursing as their major. Students admitted to the School of Nursing are required to attend the program on a full-time basis.

Requirements for Admission to Nursing Program

All students applying to the Generic Nursing Program must have a college GPA of 3.0 or above by the end of the fall semester preceding spring application. Students who do not meet this GPA requirement are not eligible to take the National League for Nursing Pre-admission-RN Examination (administered in February of the spring application semester) and are not eligible to apply for admission to the nursing major.

- Courses taken prior to clinical nursing courses may not be taken on a Credit/No Credit basis.
- Course of Study prior to clinical nursing courses with a minimum GPA of 3.0 and a minimum grade of "B" in all science courses:
  - General Chemistry with lab (CHEM 10000 */CHEM 10100 ) or higher equivalent course
  - Organic Chemistry with lab (CHEM 12000 /CHEM 12100 ) or higher equivalent course
  - Introduction to Statistics (STAT 11300 *) or higher equivalent course
  - History( HIST 15100 , HIST 15200 or POLSC 11000 *)
  - English Composition ( ENGL 12000 and ENGL 22000 )*
  - General Psychology (PSYCH 10000 )*  
    - Human Development (Developmental Psychology of the Life Span;PSYCH 15000 *)
- Students enrolled in pre-requisite courses during the spring semester of application must provide proof of a minimum cumulative GPA of 3.0 and a minimum grade of "B" in all science courses no later than 6/1 in order to receive final acceptance to the nursing major.
- A career goal statement will be required.
- Complete at least 30 credits by the end of summer session prior to beginning Nursing Program courses.
- Complete the NLN RN Pre-Admission exam (referred to as the NLN PAX exam) which is administered in February at Hunter College Testing Center (150N)

Non-Nursing Program Requirement

Required Core (12 credits)

ENGL 12000 - Expository Writing

Hunter Core
English Comp (EC)
GER
1/A
Required of all students unless exempt; trains students to analyze, develop and evaluate ideas and to express themselves clearly and effectively. Introduction to documented research.

*prereq: successful completion of developmental courses, if required
3 hrs + conf
3 cr.

**ENGL 22000 - Introduction to Writing about Literature (W)**

**Hunter Core**
English Comp (EC)

**GER**
2/A

Analytical writing and close reading in British and American fiction, drama, poetry, and literary criticism, with an emphasis on further development of critical writing and research skills. Students gain a deeper understanding and appreciation of literature as well as more extensive experience with academic writing.

*prereq: ENGL 12000
3 hrs + one additional conference hour
3 cr.

**STAT 11300 - Elementary Probability and Statistics**

**Hunter Core**
Math/Quantitative Reasoning

**GER**
1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

*prereq: A grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: ENGL 12000
3 hrs
3 cr.

**CHEM 10000 (STEM) - Essentials of General Chemistry Lecture**

**Hunter Core**
Scientific World (SW); Life and Physical Sciences (LPS)

**GER**
GER 2/E

Essential facts, laws, and theories of general chemistry.
Note: Core credit awarded only if CHEM 10000 and CHEM 10100 are completed. Primarily for nursing, nutrition and food science and community health education students.

4 hrs (3 lec, 1 rec)
3 cr.
Flexible Core (18 cr.)

Nursing Program Requirements

Requirements for the Degree:

60 non-nursing and 60 nursing credits

Allied Courses:

**BIOL 12000 - Anatomy and Physiology I**

Cell structure and function; histology; nervous, muscular and skeletal systems; integument. Required for admission to the nursing program.
Not accepted for credit toward the biology major.
prereq: CHEM 10000, 10100
coreq: CHEM 12000, 12100
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
fall only

**BIOL 12200 - Anatomy and Physiology II**

Structure and function of circulatory, digestive, exetory, endoine and reproductive systems. Basic concepts of metabolism, embryology. Required for admission to the nursing program.
Not accepted for credit toward the biology major.
prereq: BIOL 12000 or equiv.
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
spring only

Humanities:

**BIOL 23000 - Fundamentals of Microbiology**
Topics include scope, historical aspects, taxonomy, survey of the microbial world, viruses, infectious diseases, control of microorganisms and immunology. Required for admission to the nursing program.

Not accepted for credit toward the biology Major I.

**prereq:** CHEM 10000, 10100, 12000, 12100 or equiv; BIOL 12000

**coreq:** BIOL 12200

5 hrs (2 lec, 3 lab)

3 cr.

**spring only**

**NURS 20000 - Introduction to Nursing**

Introduction to essential theories, concepts, and values of the nursing profession. Emphasis on understanding the practice and principles of nursing. The principles of service-learning are introduced.

**prereq:** CHEM 10100; STAT 11300

**coreq:** Generic Pathway: NURS 21000; NURS 24000

Accelerated 2nd Degree: NURS 21000; NURS 22000; NURS 33100

30 hrs

2 cr.

offered fall

**NURS 21000 - Nursing Fundamentals and Health Assessment**

This course is designed to provide students with the tools required to perform a comprehensive physical assessment and review of a client’s history. The course will also introduce students to the nursing process, principles of infection control, and safety promotion. Students will learn inspection, auscultation, palpation, and percussion techniques. Emphasis is placed upon assessment of the well person with common health problems. Health promotion and maintenance strategies are highlighted for all age groups.

**prereq:** CHEM 10000/10100; STAT 11300

**coreq:** (Generic): NURS 20000; NURS 24000;

(A2D): NURS 20000; NURS 22000; NURS 33100

30 hrs Lecture; 30 hrs Health Assessment Lab; 45 hrs Clinical

4 cr.

**NURS 22000 - Adult Health and Illness**

This class provides a knowledge base for effective nursing care of adult clients. Students will gain insight into the management of chronic illnesses. Through utilization of the nursing process, the student's role as client advocate, patient educator, and caregiver are further actualized. Methods of systematic analysis of research are introduced. Experimental learning in a variety of setting provide an opportunity for the student to promote, maintain and/or restore an optimum level of wellness in adult clients and families in collaboration with other members of the health team.

**prereq:** (Generic): NURS 20000; NURS 21000; NURS 24000; (A2D): CHEM 10000/10100; STAT 11300

**coreq:** NURS 33100, NURS 20000; NURS 21000; NURS 33100

22.5 hrs Lecture, 30 hrs Lab, 67.5 hrs. Clinical

4 cr.

**NURS 24000 - Foundations of Genetics for Nurses**
This course explores the implications of genetics on nursing practice. The basic principles of gene action and inheritance models are reviewed. Innovations in genetics and genomics research are examined and consideration is given to potential future clinical applications. This course will highlight the integration of genetic information into nursing practice including ethical, legal, and social issues.

\textit{prereq: CHEM 10000/10100; STAT 11300} \\
\textit{coreq: NURS 20000; NURS 21000} \\
30 hrs. lecture \\
2 cr.

\textbf{NURS 33100 - Pharmacology I}

The first course presenting essential pharmacological information with a focus on respiratory, cardiovascular, renal, gastrointestinal, and neurological systems. Emphasis is placed upon clinical applications and the nurse's role in drug therapy.

\textit{prereq: 1. Generic Program: NURS 20000; NURS 21000; NURS 24000} \\
2. Accelerated 2nd Degree: CHEM 10000/10100; STAT 11300 \\
\textit{coreq: 1. Generic Program: NURS 22000} \\
2. Accelerated 2nd Degree: NURS 20000; NURS 21000; NURS 22000 \\
3 hrs. \\
3 cr.

\textbf{NURS 33200 - Normal and Therapeutic Nutrition in the Nursing Process}

This course introduces students to the principles of nutrition and their application to professional nursing practice. Examines macro- and micro-nutrients, the role of nutrition in disease prevention and health promotion throughout the life span. Nutrition-related nursing interventions are discussed for acute and critically ill patients and for patients with selected disorders including gastrointestinal and cardiovascular diseases, diabetes, cancer and HIV/AIDS.

\textit{prereq: NURS 22000} \\
30 hrs. \\
2 cr.

\textbf{NURS 33900 - Pharmacology II}

This course is designed to further explore essential pharmacological information. The class will build upon information provided in NURS 33100 and provide insight into additional topics in pharmacotherapy, including substance abuse, chemotherapy, alternative medicine, and medications acting on the immune and endocrine systems.

\textit{prereq: NURS 22000; NURS 33100} \\
\textit{coreq: NURS 33200; NURS 35200; NURS 38000} \\
45 hrs. lecture \\
3 hrs.

\textbf{NURS 34300 - Pathophysiology and Nursing Care}

This course examines biological mechanisms producing disruptions in homeostasis and resulting alterations in physiologic function. The course synthesizes knowledge and theories from nursing, psychosocial, and biological sciences as a foundation for the study of pathophysiology. Emphasis is placed on the molecular basis of illness, the resulting clinical manifestations, and key nursing interventions.
prereq: 1. Generic Program: NURS 22000; NURS 24000; NURS 33900; NURS 38000
2. Accelerated 2nd Degree: NURS 22000; NURS 33900
coreq: 1. Generic Program: NURS 34900; NURS 36000
2. Accelerated 2nd Degree: NURS 35200; NURS 36000; NURS 38000
45 hrs
3 cr.

**NURS 34900 - Foundations of Ethics and End-of-Life Care**

Core professional values and excellences, foundational ethical principles, and essential topics in end of life care will be introduced and explored during this course. Emphasis will be on acquiring generalized knowledge to enable the novice nurse to 1) apply ethical principles to practice, 2) develop the skills to practice with moral comportment and courage, and 3) understand the needs of the dying patient (and loved ones) in order to provide quality end of life care. At the completion of this course with required attendance for all modules, students will be designated “ELNEC Trained.”

prereq: NURS 22000, NURS 24000, NURS 38000
coreq: NURS 34300; NURS 36000
45 hrs. lecture
3 hrs.

**NURS 35200 - Nursing Care of Women and Childbearing Families**

The course focuses on the assessment, care, counseling, and education of women and childbearing families. Didactic and clinical learning opportunities focus on nursing practice with expectant mothers, neonates and their families in classroom and selected health care settings. This course provides the theoretical basis for the nursing management of healthy and high risk women and childbearing families. Standards and Guidelines for Professional Nursing Practice in the Care of Women and Newborns (7th edition) (2009) developed by the Association for Women's Health, Obstetric and Neonatal Nursing will be utilized to emphasize the nurse's key role in providing evidence-based care that is developmentally and culturally appropriate.

prereq: NURS 22000; NURS 33100
coreq: (Generic) NURS 33200; NURS 33900; NURS 38000
(A2D) NURS 34300; NURS 36000; NURS 38000;
30 hrs. Lecture, 90 hrs. Clinical
4 cr.

**NURS 36000 - Nursing Care of Infants, Children, and Adolescents**

This course provides an analysis of the biological, psychological, social, cultural and spiritual dimensions of the pediatric client as a member of a family system within a changing society. The learner is taught to provide care in the context of the client's developmental stage. Emphasis is on the application of the nursing process in health promotion, maintenance and/or restoration to optimum levels of wellness. Experiential learning in a wide variety of settings provides the opportunity for the student to collaborate with other members of the nursing team.

prereq: NURS 22000; NURS 33100
coreq: (Generic) NURS 34300; NURS 34900
(A2D) NURS 34300; NURS 35200; NURS 38000
22.5 hrs: Lecture; 30 hrs: Lab; 67.5 hrs: Clinical
4 cr.

**NURS 38000 - Nursing Research and Theory**
Introduction to theory development and research in nursing. for Generic Program: NURS 20000, 31000
prereq: Generic Program: NURS 22000
Accelerated 2nd Degree: NURS 22000
RN Program: STAT 11300; NURS 37900
coreq: Generic Program: NURS 33200; NURS 33900; NURS 35200
Accelerated 2nd Degree: NURS 34300; NURS 35200; NURS 36000
RN Program: None
45 hrs
3 cr.

NURS 42200 - Health Policy and Leadership

This final-semester course examines the roles of the professional nurse in leading and managing health care services within a complex and evolving health system. The course examines trends in health care delivery and health policy, as well as registered nurses' accountability for delivering and overseeing the provision of safe, quality health care services. Principles of coordinating care, delegation and assignment of nursing tasks and functions, and collaboration with other health professions are addressed. The course examines nurses' roles in advocating on behalf of patients, themselves and the profession.
prereq: NURS 45500; NURS 46000
coreq: NURS 47000; NURS 49000; NURS 49200
45 hrs: Lecture
3 cr.

NURS 45500 - Public Health Nursing

In lectures and in supervised clinical experiences, the student examines the roles of nurses in planning, delivering and evaluating health programs and services for families, communities and populations. The impact of social, economic and environmental determinants of human health is explored, as are tools for assessing the health status of communities and populations. The course introduces students to the global context of public and community health and examines nursing practice in areas including home health, environmental and school health. The role of nurses in preparing communities to plan for and recover from natural and human-made disasters is also examined.
prereq: NURS 35200; NURS 36000
coreq: NURS 46000
30 hrs: Lecture, 90 hrs: Clinical
4 cr.

NURS 46000 - Mental and Behavioral Health Nursing

This course introduces the learner to assessment and common interventions for care of patients across the lifespan who require mental and behavioral health care, including biological, psychological, social, cultural and spiritual dimensions of individuals. Disease/illness trajectories and their translation into clinical practice guidelines and standard procedures are considered in relation to their impact on providing culturally sensitive, person-centered care. Classroom, laboratory and clinical learning experiences in a variety of settings provide an opportunity for the student to practice delivering high quality and safe client care in collaboration with other members of the health team.
prereq: NURS 35200; NURS 36000
coreq: NURS 45500
30 hrs: Lecture, 15 hrs: Lab; 67.5 hrs Clinical
4 cr.

NURS 47000 - Adult Acute Illness/ Immersion Clinical
This course includes in-depth study of the biological, social, cultural and spiritual dimensions of the acutely and critically ill adults. Experiential learning in acute care settings provides an opportunity for the student to promote, maintain and/or restore an optimum level of health for these adults and their families in collaboration with other members of the health care team. Methods of systematic analysis of relevant research are discussed.

**prereq:** NURS 45500; NURS 46000  
**coreq:** (Generic) NURS 42200; NURS 49000; NURS 49200  
(A2D) NURS 42000; NURS 49000; NURS 49200  
22.5 hrs: Lecture; 112.5 hrs: Clinical  
4 cr.

### NURS 49000 - Gerontological Nursing

This course provides a knowledge and skill base for effective nursing care of older adults. Evidence-based practice and theories guide the student in assisting the older adult and his/her family in understanding and managing health related issues in the aging process. The course includes an in-depth study of the biological, psychological, social, cultural and spiritual dimensions of the older adult client as a member of families and community systems within a changing society. The students learn to do a comprehensive assessment of the older adult using valid and reliable assessment tools. The nursing process is used as the foundation to assist the older adult to attain an optimal level of health. Concepts from related disciplines are explored as they impact on the promotion, maintenance and/or restoration of health. Experiential learning in a variety of settings provides the opportunity for the student to collaborate with interdisciplinary health teams.

**prereq:** NURS 45500; NURS 46000  
**coreq:** (Generic) NURS 42200; NURS 47000; NURS 49200  
(A2D) NURS 42000; NURS 47000; NURS 49200  
30 hrs: Lecture; 90 hrs: Clinical  
4 cr.

### NURS 49200 - Advanced Synthesis of Nursing Knowledge

This course will serve as a review of essential concepts and skills from the nursing curriculum. Students will focus on those concepts that they need to improve for the successful practice of professional nursing. Students will utilize the Hunter-Bellevue School of Nursing Learning Laboratory to review clinical skills practiced throughout the nursing curriculum. Students will also take a comprehensive examination to determine their mastery of professional nursing content.

**prereq:** NURS 45500; NURS 46000  
**coreq:** (Generic) NURS 42200; NURS 47000; NURS 49000  
NURS 42000; NURS 47000; NURS 49000  
22.5 hrs: Lecture, 30 hrs: Lab  
2 cr.

- Nursing Elective 2 cr.  
- P&D: 6 cr.  
- GER : 9 cr.  
- Total Nursing Program Credits: 90 cr.  
- Total for Degree Credits: 120 cr.

### Repeating a Course

*Note: Students who fail a core prerequisite course in a nursing sequence may not proceed to the next course in the sequence without repeating the failed course. In order to continue in the Nursing major, students must receive*
minimum grades of “C” in all required nursing courses. Students who receive a grade of "D" or lower, or who fail any segment of a clinical nursing course or lab will be allowed to repeat the course or segment only once. Students who fail a second required nursing course or clinical lab/segment will be dismissed from the nursing program. This policy applies even if a grade appeal is in progress. Students who fail the clinical portion of a course will receive an "F" for the entire course, regardless of the corresponding theory grade.

Leave of Absence Policy and Reserved Placement in a Clinical Course

A reserved placement in a clinical/field course will be held for the student for only one year from the date of the leave of absence. The School of Nursing cannot guarantee the placement for any longer period of time. It is the responsibility of the student to submit to the undergraduate program director a letter of intent, one semester prior to returning to the program and enrolling in the course (April 1 for a fall course). Students who fail to follow this procedure release the School of Nursing from reserving a clinical/field placement in a course for the student.

Nursing RN Program

Admission Criteria: RN Program

An overall college GPA of 3.0 in addition to other requirements is the minimum requirement for consideration of an application. Admission to the School of Nursing is competitive.

The program is designed to meet the special needs of the experienced RN student who has already completed a two- or three-year nursing program. All RN Program students admitted to the program are required to submit evidence of NYS RN licensure and current registration, liability insurance, health insurance, medical records with specified immunizations and CPR certification prior to entering the first semester of the nursing major.

Students awaiting their State Board licensing examination scores who have not yet been awarded the Registered Professional Nurse License are admitted conditionally. Proof of receipt of the RN license must be submitted to the Hunter-Bellevue School of Nursing by December 1 for students admitted in the fall. Students unable to document receiving the license will not be permitted to continue in the nursing major. Applicants to the RN Pathway Program must have completed 36 credits of liberal arts and sciences (including credits in progress) at an accredited college, plus the equivalent of 24 credits in nursing.

A maximum of 24 credits may be transferred for credit in the nursing curriculum upper division. Students transferring from any accredited associate degree program in the United States will be granted 24 nursing credits for advanced placements. The Nursing Regents College Examinations (RCE'S) in Adult Nursing, Maternal and Child Nursing, and Psychiatric/Mental Health Nursing at the baccalaureate level are required for applicants from schools without accreditation by recognized bodies, and by international graduates. A score of "C" or better is acceptable.

Students should download a current RN Program Fact Sheet, which details the admission process, from the Hunter-Bellevue School of Nursing website at http://www.hunter.cuny.edu/nursing.

Lower Division (General Education Requirements)

Students entering Hunter with an AAS degree are required to complete Core, Pluralism and Diversity, and one writing course. Transfer students will have their transcripts evaluated upon admission by the admissions office. Courses for which equivalency is granted need not be repeated. Some courses already taken may be used to satisfy Core requirements.
ENGL 12000 - Expository Writing

Hunter Core
English Comp (EC)
GER
1/A

Required of all students unless exempt; trains students to analyze, develop and evaluate ideas and to express themselves clearly and effectively. Introduction to documented research.

prereq: successful completion of developmental courses, if required
3 hrs + conf
3 cr.

STAT 11300 - Elementary Probability and Statistics

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

prereq: A grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: ENGL 12000
3 hrs
3 cr.

or

HIST 15200 - The United States from the Civil War Era to the Present (W)

Hunter Core
US Experience in its Diversity (USED)
GER
1/C or 2/B

American political, social and cultural history from the Civil War to the present. Courses at the 300-level and above not offered to freshmen.

prereq or coreq: ENGL 12000
3 hrs
3 cr.

or

POLSC 11000 - American Government: A Historical Introduction (W)

Hunter Core
US Experience in its Diversity (USED)
Overview of the American political system from a historical perspective, with emphasis on the Constitution and its enduring influence, development of party systems and citizen participation and evolving role of Congress, presidency and courts. Not open to students who have taken POLSC 11100.

*prereq or coreq: ENGL 12000 or its equivalent*

- 3 hrs
- 3 cr.

**ENGL 22000 - Introduction to Writing about Literature (W)**

**Hunter Core**

English Comp (EC)

**GER**

2/A

Analytical writing and close reading in British and American fiction, drama, poetry, and literary criticism, with an emphasis on further development of critical writing and research skills. Students gain a deeper understanding and appreciation of literature as well as more extensive experience with academic writing.

*prereq: ENGL 12000*

- 3 hrs + one additional conference hour
- 3 cr.

or other Stage 2: Group A course

**PSYCH 10000 - Introduction to Psychology**

**GER**

2/B

An introduction to the problems, methods and concepts of psychology, covering a range of topics which characterize the discipline, including history, methodology and professional ethics, biological foundations, perception, motivation and emotion, learning, memory and thinking, individual differences, intelligence, personality, behavior disorders and their treatment, group processes.

- 3 hrs
- 3 cr.

and

**PSYCH 15000 - Human Development**

**GER**

2/B

Development from conception to death; biological, physiological and social factors and their interactions at each stage.

*prereq: PSYC 10000*

- 3 hrs
- 3 cr.

- GER 2/C: Humanities 3 cr. (e.g., PHILO 10100, CLA 10100, or other Humanities course)
- GER 2/D: Arts 3 cr. (e.g., ARTH 11100)
- 2/E: Natural Sciences*

**CHEM 10000 (STEM) - Essentials of General Chemistry Lecture**
Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
GER 2/E

Essential facts, laws, and theories of general chemistry.
Note: Core credit awarded only if CHEM 10000 and CHEM 10100 are completed. Primarily for nursing, nutrition and food science and community health education students.
4 hrs (3 lec, 1 rec)
3 cr.

CHEM 10100 - Inquiries into the Nature of Matter

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
Pluralism and Diversity
GER 2/E

A laboratory-based introduction to chemistry for non-science and health science majors that focuses on the basic principles of matter, energy and the environment. CHEM 10100 satisfies the laboratory requirements for a one-semester general chemistry course for health science students.
Primarily for nursing, nutrition and food science and community health students.
Taken with CHEM 100, meets STEM, SW and LPS
prereq or coreq: CHEM 10000
3 hrs
1.5 cr.

*Plus an additional 12.5 cr. in other science or math courses
- GER 3/A: Humanities, Visual or Performing Arts 3 cr.
- GER 3/B: Social Science or Natural Science/Mathematics course 3 cr.
- Pluralism and Diversity 12 cr. (P/D Groups A-D)
- Additional courses will be required to meet the 120 credits needed for graduation. See your advisor. 22.5 cr.

Total lower division credits: 66

Upper Division (Major Requirements)

Students partially fulfill the major requirements with 24 credits of nursing, awarded through Regents College Exams or by having a CUNY or other regionally accredited associate degree in nursing. The remaining major courses and nine credits of electives are completed at Hunter:

NURS 37900 - Nursing and Societal Forces in the Health Care Delivery System

Open to RN Program students only. This is the first course in the RN Program curriculum and must be taken prior to or in conjunction with other required nursing courses depending on the pre/co requisites of the courses. Exploration of health care dilemmas through the integration of knowledge from nursing, social sciences and public health. Principles of service- learning are introduced.
3 hrs
3 cr.

NURS 38400 - Nursing Culturally Diverse Families
Pluralism and Diversity
PD/B
Open to RN Program students only. Explores the interrelationships between sociocultural factors and health care practices of families from diverse cultures as a basis for nursing practice. Principles of service-learning are reflected in the culturally competent interventions.
3 hrs
3 cr.
**Meets Pluralism and Diversity Requirement/Group B. Only open to nursing majors.

NURS 38100 - Health Assessment Throughout the Lifespan
Open to RN Program students only. Analysis of normal patterns of wellness for individual clients with emphasis on development of assessment skills.
Material Fee: $45
prereq: CHEM 10000, CHEM 10100
prereq or coreq: NURS 37900
6 hrs (3 lec, 3 lab)
4.5 cr.

NURS 38000 - Nursing Research and Theory
Introduction to theory development and research in nursing. for Generic Program: NURS 20000, 31000
prereq: Generic Program: NURS 22000
Accelerated 2nd Degree: NURS 22000
RN Program: STAT 11300; NURS 37900
coreq: Generic Program: NURS 33200; NURS 33900; NURS 35200
Accelerated 2nd Degree: NURS 34300; NURS 35200; NURS 36000
RN Program: None
45 hrs
3 cr.

NURS 48000 - Promotion of Wellness in the Community
Open to RN Pathway students only. Examination of family and community patterns as they relate to individual clients of all ages. Principles of service-learning are used in community-based clinical experiences to promote civic engagement.
prereq: NURS 37900, 38100, 38400
7.5 hrs (3 lec, 4.5 practicum)
4.5 cr.

NURS 48200 - Advancement of Roles and Relationships in Professional Nursing
Open to RN Program students only. Explores the roles and relationships in nursing with a focus on leadership as the key to the professionalism of nursing. Principles of service-learning are reflected in the ongoing development of the professional role. This is the last course in the RN Program.
prereq: NURS 37900
prereq or coreq: NURS 38000, 38100, 38400, 48000
3 hrs
3 cr.

Hunter nursing electives (9 cr.)
Nine credits from the following courses:

**NURS 34000 - Women’s Health**

*Pluralism and Diversity*

PD/C

Designed to identify and analyze those factors which impact on the health status of women: biological, sociological, psychological, environmental, political.

3 hrs
3 cr.

**NURS 34200 - Ethical Issues in Nursing Practice**

Open to RN Program and senior Generic Program students only. Examines ethical issues which arise from the practice of nursing in an interpersonal, professional, institutional and social context of diverse and competing values.

3 hrs
3 cr.

**NURS 34300 - Pathophysiology and Nursing Care**

This course examines biological mechanisms producing disruptions in homeostasis and resulting alterations in physiologic function. The course synthesizes knowledge and theories from nursing, psychosocial, and biological sciences as a foundation for the study of pathophysiology. Emphasis is placed on the molecular basis of illness, the resulting clinical manifestations, and key nursing interventions.

prereq: 1. Generic Program: NURS 22000; NURS 24000; NURS 33900; NURS 38000
2. Accelerated 2nd Degree: NURS 22000; NURS 33900

coreq: 1. Generic Program: NURS 34900; NURS 36000
2. Accelerated 2nd Degree: NURS 35200; NURS 36000; NURS 38000

45 hrs
3 cr.

**NURS 34500 - HIV/AIDS: An Interdisciplinary Perspective for Health Care Providers**

Examines the impact of the HIV epidemic on the biological, psychological and social dimensions of persons affected by HIV/AIDS.

3 hrs
3 cr.

**NURS 34600 - Death and Dying**

*Pluralism and Diversity*

P/D B

Provides an overview of current theories, concepts, and practices associated with death, dying and end-of-life care.

3 hrs
3 cr.
NURS 35000 - Independent Study in Nursing

An opportunity to explore a topic relevant to nursing which is of individual interest.
1-3 hrs
1-3 cr.

NURS 35100 - Gender, Science and Technology

Pluralism and Diversity
PD/C
Explores the complex relationship between women and the sciences.
cross-listed WGSS 35100
3 hrs
3 cr.

NURS 37900 - Nursing and Societal Forces in the Health Care Delivery System

Open to RN Program students only. This is the first course in the RN Program curriculum and must be taken prior to or in conjunction with other required nursing courses depending on the pre/co requisites of the courses. Exploration of health care dilemmas through the integration of knowledge from nursing, social sciences and public health. Principles of service- learning are introduced.
3 hrs
3 cr.

NURS 39998 - Urban Disaster Response and the Health Care Team

Provides the student with an understanding of the causes, prevention, and mitigation of disasters and insight into the disaster management system nationally and locally. The course will include content relevant to all disciplines in the disaster care continuum and focus on each individual health care member's role and responsibilities within these systems.
3 hrs
3 cr.

NURS 44000 - Stress Management for Nurses

An overview of stress and its effect upon behavior within the framework of the holistic man-wellness model.
3 hrs
3 cr.

NURS 44100 - Selected Studies in Nursing Research

Honors course. Utilization of basic knowledge in nursing research to critique and interpret studies and discuss their relevance and application in nursing.

prereq: NURS 31000, 31200, 33100, 33200, 38000, 38100
3 hrs.
3 cr.

NURS 44200 - Nursing Care of Acute and Critically Ill Clients
Examination of nursing knowledge and roles in caring for acute and critically ill clients and their families.
3 hrs
3 cr.

**NURS 44500 - Teaching-Learning Across the Developmental and Health Continua**

Pedagogical/androgogical principles of learning and instruction to enhance client teaching in the promotion, maintenance and/or restoration of health.
3 hrs
3 cr.

**NURS 45000 - Computer Concepts and Application in Nursing**

Study of computing concepts, principles, practices, and applications in nursing and health care.
3 hrs
3 cr.

**NURS 48300 - Politics of Health**

An analysis of the relationships between politics and health status, health services and health care providers.
3 hrs
3 cr.

**The following nursing courses meet pluralism and diversity:**

All courses used to satisfy Pluralism and Diversity requirements may simultaneously meet a student’s core requirements or the courses necessary for a major or minor area of study.

**Group B**

**NURS 38400 - Nursing Culturally Diverse Families**

**Pluralism and Diversity**
PD/B
Open to RN Program students only. Explores the interrelationships between sociocultural factors and health care practices of families from diverse cultures as a basis for nursing practice. Principles of service-learning are reflected in the culturally competent interventions.
3 hrs
3 cr.

**Group C**

**NURS 34000 - Women's Health**

**Pluralism and Diversity**
PD/C
Designed to identify and analyze those factors which impact on the health status of women: biological, sociological, psychological, environmental, political.
NURS 35100 - Gender, Science and Technology

Pluralism and Diversity
PD/C
Explores the complex relationship between women and the sciences.
cross-listed WGSS 35100
3 hrs
3 cr.

WGSS 35100 - Gender, Science, and Technology

Pluralism and Diversity
PD/C
Explores the complex relationship among gender, science, and technology.
cross-listed (Cross-listed with NURS 35100.)
prereq: ENGL 12000, at least one science course at the 100 level
3 hrs
3 cr.

Total upper division credits: 54

Total minimum credits required for degree: 120

Repeating a Course

Note: Students who fail a core prerequisite course in a nursing sequence may not proceed to the next course in the sequence without repeating the failed course. In order to continue in the Nursing major, students must receive minimum grades of “C” in all required nursing courses. Students who receive a grade of “D” or lower, or who fail any segment of a clinical nursing course or lab will be allowed to repeat the course or segment only once. Students who fail a second required nursing course or clinical lab/segment will be dismissed from the nursing program. This policy applies even if a grade appeal is in progress. Students who fail the clinical portion of a course will receive an “F” for the entire course, regardless of the corresponding theory grade.

Leave of Absence Policy and Reserved Placement in a Clinical Course

A reserved placement in a clinical/field course will be held for the student for only one year from the date of the leave of absence. The School of Nursing cannot guarantee the placement for any longer period of time. It is the responsibility of the student to submit to the undergraduate program director a letter of intent, one semester prior to returning to the program and enrolling in the course (April 1 for a fall course). Students who fail to follow this procedure release the School of Nursing from reserving a clinical/field placement in a course for the student.

Requirements
Nursing General Education Requirements

I. Generic and Accelerated Pathway General Education Requirements and Nursing Major Sequence

Lower Division General Education Requirements (66 credits):

Stage 1: Academic Foundations (9 credits)

Group A 3 cr.

**ENGL 12000 - Expository Writing**

**Hunter Core**

English Comp (EC)

**GER**

1/A

Required of all students unless exempt; trains students to analyze, develop and evaluate ideas and to express themselves clearly and effectively. Introduction to documented research.

*prereq: successful completion of developmental courses, if required*

3 hrs + conf

3 cr.

Group B 3 cr.

**STAT 11300 - Elementary Probability and Statistics**

**Hunter Core**

Math/Quantitative Reasoning

**GER**

1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

*prereq: A grade of C or better in MATH 10100 or appropriate score on placement exam*

*prereq or coreq: ENGL 12000*

3 hrs

3 cr.

(prereq. MATH 10100 or appropriate score on COMPASS)

Group C 3 cr.
HIST 15100 - The United States from the Colonial Era to the Civil War (W)

Hunter Core
US Experience in its Diversity (USED)
GER
1/C or 2/B

American political, social and cultural history from the time of the European settlements to the Civil War. Courses at the 300-level and above not offered to freshmen.
prereq or coreq: ENGL 12000
3 hrs
3 cr.

HIST 15200 - The United States from the Civil War Era to the Present (W)

Hunter Core
US Experience in its Diversity (USED)
GER
1/C or 2/B

American political, social and cultural history from the Civil War to the present. Courses at the 300-level and above not offered to freshmen.
prereq or coreq: ENGL 12000
3 hrs
3 cr.

-or-

POLSC 11000 - American Government: A Historical Introduction (W)

Hunter Core
US Experience in its Diversity (USED)
GER
1/C or 2/B

Overview of the American political system from a historical perspective, with emphasis on the Constitution and its enduring influence, development of party systems and citizen participation and evolving role of Congress, presidency and courts. Not open to students who have taken P0LSC 11100.
prereq or coreq: ENGL 12000 or its equivalent
3 hrs
3 cr.

Stage 2: Broad Exposure (24 credits)

Group A Survey of Literature Written in English 6 cr.

ENGL 22000 - Introduction to Writing about Literature (W)

Hunter Core
English Comp (EC)
GER
Analytical writing and close reading in British and American fiction, drama, poetry, and literary criticism, with an emphasis on further development of critical writing and research skills. Students gain a deeper understanding and appreciation of literature as well as more extensive experience with academic writing.

prereq: ENGL 12000
3 hrs + one additional conference hour
3 cr.

Group B Social Science: People and their Societies 6 cr.

Students accepted into the Nursing Program who are required to take PSYCH 10000 and PSYCH 15000 may use these courses to satisfy Stage 2/B of the General Education Requirement.

PSYCH 10000 - Introduction to Psychology

GER
2/B

An introduction to the problems, methods and concepts of psychology, covering a range of topics which characterize the discipline, including history, methodology and professional ethics, biological foundations, perception, motivation and emotion, learning, memory and thinking, individual differences, intelligence, personality, behavior disorders and their treatment, group processes.

3 hrs
3 cr.

PSYCH 15000 - Human Development

GER
2/B

Development from conception to death; biological, physiological and social factors and their interactions at each stage.

prereq: PSYC 10000
3 hrs
3 cr.

Group C Humanities: Culture and Ideas: Literature, Philosophy, Classics 3 cr.

Group D Visual and Performing Arts: Media, Art, Dance, Film, Music, Theatre 3 cr.

Group E Natural Science 9 cr.

CHEM 10000 (STEM) - Essentials of General Chemistry Lecture

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)

GER
GER 2/E
Essential facts, laws, and theories of general chemistry.
Note: Core credit awarded only if CHEM 10000 and CHEM 10100 are completed. Primarily for nursing, nutrition and food science and community health education students.
4 hrs (3 lec, 1 rec)
3 cr.

CHEM 10100 - Inquiries into the Nature of Matter

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
Pluralism and Diversity
GER 2/E
A laboratory-based introduction to chemistry for non-science and health science majors that focuses on the basic principles of matter, energy and the environment. CHEM 10100 satisfies the laboratory requirements for a one-semester general chemistry course for health science students.
Primarily for nursing, nutrition and food science and community health students.
Taken with CHEM 100, meets STEM, SW and LPS
prereq or coreq: CHEM 10000
3 hrs
1.5 cr.

CHEM 12000 (STEM) - Essentials of Organic Chemistry Lecture

Hunter Core
Life and Physical Sciences (LPS): Scientific World (SW)
Pluralism and Diversity
GER 2/E
Course presents essential facts, laws and theories of organic chemistry.
Core credit awarded only if CHEM 12000 and CHEM 12100 are completed. Primarily for nursing, nutrition and food science and community health education students.
prereq: CHEM 10000
4 hrs (3 lec, 1 rec)
3 cr.

CHEM 12100 (STEM) - Essentials of Organic Chemistry Laboratory

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
Pluralism and Diversity
GER 2/E
Experiments designed to illustrate fundamental laws and techniques of organic chemistry.
Core credit awarded only if CHEM 12000 and CHEM 12100 are completed. Primarily for nursing, nutrition and food science and community health students.
prereq: CHEM 10100
prereq or coreq: CHEM 12000
3 hrs (3 lab)
1.5 cr.

Stage 3: Focused Exposure

Group A Humanities or Visual and Performing Arts 3 cr.
Group B Social Science or Natural Science/Mathematics

BIOL 23000 - Fundamentals of Microbiology

GER
3/B

Topics include scope, historical aspects, taxonomy, survey of the microbial world, viruses, infectious diseases, control of microorganisms and immunology. Required for admission to the nursing program.
Not accepted for credit toward the biology Major I.

prereq: CHEM 10000, 10100, 12000, 12100 or equiv; BIOL 12000

coreq: BIOL 12200

5 hrs (2 lec, 3 lab)

3 cr.

spring only

Foreign Language Requirement

Exempt

Pluralism and Diversity Requirement 12 cr.

Group A 3 cr.

Non-European societies

Group B

Cultures in the USA

Group C

Women and/or issues of gender or sexual orientation

Group D

Europe

Writing Requirement

Up to 3 courses in significant writing ( "W" designated courses)

Additional Required Courses: 9 cr.

BIOL 12000 - Anatomy and Physiology I
Cell structure and function; histology; nervous, muscular and skeletal systems; integument. Required for admission to the nursing program. Not accepted for credit toward the biology major.

*prereq:* CHEM 10000, 10100
*coreq:* CHEM 12000, 12100
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
fall only

**BIOL 12200 - Anatomy and Physiology II**

Structure and function of circulatory, digestive, excretory, endocrine and reproductive systems. Basic concepts of metabolism, embryology. Required for admission to the nursing program. Not accepted for credit toward the biology major.

*prereq:* BIOL 12000 or equiv.
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
spring only

Open electives: 6 cr.

Total GER, other required courses and open electives 66 cr.

**II RN Pathway**

**Lower- and Upper-Division Course Requirements**

Transfer students from other colleges will have their transcripts evaluated upon admission by the Office of Admissions. Courses for which equivalency is granted need not be repeated.

**Lower Division**

Since most of this coursework will have been taken as part of the associate degree/RN program, the admissions office will evaluate the transcript and determine what still remains to be taken at the lower division.

Students entering Hunter with an RN/AAS degree are required to complete the core, pluralism and diversity and one writing course. Core courses required are:

**ENGL 12000 - Expository Writing**

*Hunter Core*

*ENGL 12000 - Expository Writing*

*Hunter Core*

English Comp (EC)
*GER*
1/A

Required of all students unless exempt; trains students to analyze, develop and evaluate ideas and to express themselves clearly and effectively. Introduction to documented research.

*prereq:* successful completion of developmental courses, if required
3 hrs + conf
3 cr.
STAT 11300 - Elementary Probability and Statistics

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

prereq: A grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: ENGL 12000
3 hrs
3 cr.

- US History

ENGL 22000 - Introduction to Writing about Literature (W)

Hunter Core
English Comp (EC)
GER
2/A

Analytical writing and close reading in British and American fiction, drama, poetry, and literary criticism, with an emphasis on further development of critical writing and research skills. Students gain a deeper understanding and appreciation of literature as well as more extensive experience with academic writing.

prereq: ENGL 12000
3 hrs + one additional conference hour
3 cr.

PSYCH 10000 - Introduction to Psychology

GER
2/B

An introduction to the problems, methods and concepts of psychology, covering a range of topics which characterize the discipline, including history, methodology and professional ethics, biological foundations, perception, motivation and emotion, learning, memory and thinking, individual differences, intelligence, personality, behavior disorders and their treatment, group processes.

3 hrs
3 cr.

PSYCH 15000 - Human Development

GER
2/B
Development from conception to death; biological, physiological and social factors and their interactions at each stage.

prereq: PSYC 10000
3 hrs
3 cr.

CHEM 10000 (STEM) - Essentials of General Chemistry Lecture

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
GER 2/E

Essential facts, laws, and theories of general chemistry.
Note: Core credit awarded only if CHEM 10000 and CHEM 10100 are completed. Primarily for nursing, nutrition and food science and community health education students.
4 hrs (3 lec, 1 rec)
3 cr.

CHEM 10100 - Inquiries into the Nature of Matter

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
Pluralism and Diversity
GER 2/E

A laboratory-based introduction to chemistry for non-science and health science majors that focuses on the basic principles of matter, energy and the environment. CHEM 10100 satisfies the laboratory requirements for a one-semester general chemistry course for health science students.
Primarily for nursing, nutrition and food science and community health students.
Taken with CHEM 100, meets STEM, SW and LPS
prereq or coreq: CHEM 10000
3 hrs
1.5 cr.

plus 12.5 credits of other courses in science and math, and two courses of Stage 3. All courses used to satisfy Pluralism and Diversity requirements may simultaneously meet a student’s core requirements or the courses necessary for a major or minor area of study. The following nursing courses meet pluralism and diversity:

The following courses meet pluralism and diversity:

NURS 38400 - Nursing Culturally Diverse Families

Pluralism and Diversity
PD/B
Open to RN Program students only. Explores the interrelationships between sociocultural factors and health care practices of families from diverse cultures as a basis for nursing practice. Principles of service-learning are reflected in the culturally competent interventions.
3 hrs
3 cr.

NURS 34000 - Women’s Health
Pluralism and Diversity
PD/C
Designed to identify and analyze those factors which impact on the health status of women: biological, sociological, psychological, environmental, political.

3 hrs
3 cr.

NURS 35100 - Gender, Science and Technology

Pluralism and Diversity
PD/C
Explores the complex relationship between women and the sciences.  
cross-listed WGSS 35100
3 hrs
3 cr.

Associate in Applied Science/Bachelor of Science

Nursing Dual/Joint Degree

This is a dual degree program. Students start out at Queensborough Community College. They are admitted to Hunter after their freshman year if they satisfy certain GPA and course requirements. See the Queensborough website for further information about this phase of the dual degree www.qcc.cuny.edu/nursing/dualJoint-hunterBellevue.html

The Hunter portion of the curriculum is as follows:

Nursing Major

NURS 37900 - Nursing and Societal Forces in the Health Care Delivery System

Open to RN Program students only. This is the first course in the RN Program curriculum and must be taken prior to or in conjunction with other required nursing courses depending on the pre/co requisites of the courses. Exploration of health care dilemmas through the integration of knowledge from nursing, social sciences and public health. Principles of service-learning are introduced.
3 hrs
3 cr.

NURS 38000 - Nursing Research and Theory

Introduction to theory development and research in nursing. for Generic Program: NURS 20000, 31000
prereq: Generic Program: NURS 22000
Accelerated 2nd Degree: NURS 22000
RN Program: STAT 11300; NURS 37900
coreq: Generic Program: NURS 33200; NURS 33900; NURS 35200
Accelerated 2nd Degree: NURS 34300; NURS 35200; NURS 36000
RN Program: None
NURS 38100 - Health Assessment Throughout the Lifespan

Open to RN Program students only. Analysis of normal patterns of wellness for individual clients with emphasis on development of assessment skills.
Material Fee: $45
prereq: CHEM 10000, CHEM 10100
prereq or coreq: NURS 37900
6 hrs (3 lec, 3 lab)
4.5 cr.

NURS 38400 - Nursing Culturally Diverse Families

Pluralism and Diversity
PD/B
Open to RN Program students only. Explores the interrelationships between sociocultural factors and health care practices of families from diverse cultures as a basis for nursing practice. Principles of service-learning are reflected in the culturally competent interventions.
3 hrs
3 cr.

NURS 48000 - Promotion of Wellness in the Community

Open to RN Pathway students only. Examination of family and community patterns as they relate to individual clients of all ages. Principles of service-learning are used in community-based clinical experiences to promote civic engagement.
prereq: NURS 37900, 38100, 38400
7.5 hrs (3 lec, 4.5 practicum)
4.5 cr.

NURS 48200 - Advancement of Roles and Relationships in Professional Nursing

Open to RN Program students only. Explores the roles and relationships in nursing with a focus on leadership as the key to the professionalism of nursing. Principles of service-learning are reflected in the ongoing development of the professional role. This is the last course in the RN Program.
prereq: NURS 37900
prereq or coreq: NURS 38000, 38100, 38400, 48000
3 hrs
3 cr.

Six credits of nursing electives: The following two courses are suggested. They meet PD/C requirements

NURS 34000 - Women’s Health

Pluralism and Diversity
PD/C
Designed to identify and analyze those factors which impact on the health status of women: biological, sociological, psychological, environmental, political.
3 hrs
3 cr.

**NURS 35100 - Gender, Science and Technology**

**Pluralism and Diversity**
PD/C
Explores the complex relationship between women and the sciences.
cross-listed WGSS 35100
3 hrs
3 cr.

**Total HC Nursing (24 cr.)**

**Nursing**

*Note: Students who fail a core prerequisite course in a nursing sequence may not proceed to the next course in the sequence without repeating the failed course. In order to continue in the Nursing major, students must receive minimum grades of “C” in all required nursing courses. Only one failed required nursing course is repeatable only once by students who have received a “D” or less. Students who fail a second required nursing course in the sequence may not repeat that course and may not continue in the major. This policy applies even though a grade appeal is in progress.*

**NURS 20000 - Introduction to Nursing**

Introduction to essential theories, concepts, and values of the nursing profession. Emphasis on understanding the practice and principles of nursing. The principles of service-learning are introduced.

*prereq: CHEM 10100; STAT 11300
coreq: Generic Pathway: NURS 21000; NURS 24000
Accelerated 2nd Degree: NURS 21000; NURS 22000; NURS 33100
30 hrs
2 cr.
dered

**NURS 21000 - Nursing Fundamentals and Health Assessment**

This course is designed to provide students with the tools required to perform a comprehensive physical assessment and review of a client’s history. The course will also introduce students to the nursing process, principles of infection control, and safety promotion. Students will learn inspection, auscultation, palpation, and percussion techniques. Emphasis is placed upon assessment of the well person with common health problems. Health promotion and maintenance strategies are highlighted for all age groups.

*prereq: CHEM 10000/10100; STAT 11300
coreq: (Generic): NURS 20000; NURS 24000;
(A2D): NURS 20000; NURS 22000; NURS 33100
30 hrs Lecture; 30 hrs Health Assessment Lab; 45 hrs Clinical
4 cr.

**NURS 22000 - Adult Health and Illness**
This class provides a knowledge base for effective nursing care of adult clients. Students will gain insight into the management of chronic illnesses. Through utilization of the nursing process, the student's role as client advocate, patient educator, and caregiver are further actualized. Methods of systematic analysis of research are introduced. Experimental learning in a variety of setting provide an opportunity for the student to promote, maintain and/or restore an optimum level of wellness in adult clients and families in collaboration with other members of the health team.

prereq: (Generic): NURS 20000; NURS 21000; NURS 24000; (A2D): CHEM 10000/10100; STAT 11300
coreq: NURS 33100, NURS 20000; NURS 21000; NURS 33100
22.5 hrs Lecture, 30 hrs Lab, 67.5 hrs. Clinical
4 cr.

NURS 24000 - Foundations of Genetics for Nurses

This course explores the implications of genetics on nursing practice. The basic principles of gene action and inheritance models are reviewed. Innovations in genetics and genomics research are examined and consideration is given to potential future clinical applications. This course will highlight the integration of genetic information into nursing practice including ethical, legal, and social issues.

prereq: CHEM 10000/10100; STAT 11300
coreq: NURS 20000; NURS 21000
30 hrs. lecture
2 cr.

NURS 31000 - Nursing I

Provides essential knowledge base for implementing the nursing process in the care of clients across the lifespan, with specific emphasis on the childbearing family. Principles of service-learning are applied.

Material Fee: $50
prereq: completion of lower-division sequence
coreq: NURS 20000
18 hrs (4 lec, 14 lab)
8 cr.
offered fall

NURS 31200 - Nursing II

Provides knowledge base for effective nursing care of clients from childhood through young adulthood. Community engagement learning experiences supporting the principles of service-learning are included.

Material Fee: $50
prereq: NURS 20000, 31000, 33100
18 hrs (4 lec, 14 lab)
8 cr.
offered spring

NURS 33100 - Pharmacology I

The first course presenting essential pharmacological information with a focus on respiratory, cardiovascular, renal, gastrointestinal, and neuromuscular systems. Emphasis is placed upon clinical applications and the nurse's role in drug therapy.

prereq: 1. Generic Program: NURS 20000; NURS 21000; NURS 24000
2. Accelerated 2nd Degree: CHEM 10000/10100; STAT 11300  
coreq: 1. Generic Program: NURS 22000  
2. Accelerated 2nd Degree: NURS 20000; NURS 21000; NURS 22000  
3 hrs  
3 cr.

**NURS 33200 - Normal and Therapeutic Nutrition in the Nursing Process**

This course introduces students to the principles of nutrition and their application to professional nursing practice. Examines macro- and micro-nutrients, the role of nutrition in disease prevention and health promotion throughout the life span. Nutrition-related nursing interventions are discussed for acute and critically ill patients and for patients with selected disorders including gastrointestinal and cardiovascular diseases, diabetes, cancer and HIV/AIDS.

*prereq:* NURS 22000  
30 hrs  
2 cr.

**NURS 33900 - Pharmacology II**

This course is designed to further explore essential pharmacological information. The class will build upon information provided in NURS 33100 and provide insight into additional topics in pharmacotherapy, including substance abuse, chemotherapy, alternative medicine, and medications acting on the immune and endocrine systems.

*prereq:* NURS 22000; NURS 33100  
coreq: NURS 33200; NURS 35200; NURS 38000  
45 hrs. lecture  
3 hrs.

**NURS 34300 - Pathophysiology and Nursing Care**

This course examines biological mechanisms producing disruptions in homeostasis and resulting alterations in physiologic function. The course synthesizes knowledge and theories from nursing, psychosocial, and biological sciences as a foundation for the study of pathophysiology. Emphasis is placed on the molecular basis of illness, the resulting clinical manifestations, and key nursing interventions.

*prereq:* 1. Generic Program: NURS 22000; NURS 24000; NURS 33900; NURS 38000  
2. Accelerated 2nd Degree: NURS 22000; NURS 33900  
coreq: 1. Generic Program: NURS 34900; NURS 36000  
2. Accelerated 2nd Degree: NURS 35200; NURS 36000; NURS 38000  
45 hrs  
3 cr.

**NURS 34900 - Foundations of Ethics and End-of-Life Care**

Core professional values and excellences, foundational ethical principles, and essential topics in end of life care will be introduced and explored during this course. Emphasis will be on acquiring generalized knowledge to enable the novice nurse to 1) apply ethical principles to practice, 2) develop the skills to practice with moral comportment and courage, and 3) understand the needs of the dying patient (and loved ones) in order to provide quality end of life care. At the completion of this course with required attendance for all modules, students will be designated “ELNEC Trained.”

*prereq:* NURS 22000, NURS 24000, NURS 38000
NURS 35200 - Nursing Care of Women and Childbearing Families

The course focuses on the assessment, care, counseling, and education of women and childbearing families. Didactic and clinical learning opportunities focus on nursing practice with expectant mothers, neonates and their families in classroom and selected health care settings. This course provides the theoretical basis for the nursing management of healthy and high risk women and childbearing families. Standards and Guidelines for Professional Nursing Practice in the Care of Women and Newborns (7th edition) (2009) developed by the Association for Women's Health, Obstetric and Neonatal Nursing will be utilized to emphasize the nurse's key role in providing evidence-based care that is developmentally and culturally appropriate.

prereq: NURS 22000; NURS 33100
coreq: (Generic) NURS 33200; NURS 33900; NURS 38000
(A2D) NURS 34300; NURS 36000; NURS 38000;
30 hrs. Lecture, 90 hrs. Clinical
4 cr.

NURS 36000 - Nursing Care of Infants, Children, and Adolescents

This course provides an analysis of the biological, psychological, social, cultural and spiritual dimensions of the pediatric client as a member of a family system within a changing society. The learner is taught to provide care in the context of the client's developmental stage. Emphasis is on the application of the nursing process in health promotion, maintenance and/or restoration to optimum levels of wellness. Experiential learning in a wide variety of settings provides the opportunity for the student to collaborate with other members of the nursing team.

prereq: NURS 22000; NURS 33100
coreq: (Generic) NURS 34300; NURS 34900
(A2D) NURS 34300; NURS 35200; NURS 38000
22.5 hrs: Lecture; 30 hrs: Lab; 67.5 hrs: Clinical
4 cr.

NURS 37900 - Nursing and Societal Forces in the Health Care Delivery System

Open to RN Program students only. This is the first course in the RN Program curriculum and must be taken prior to or in conjunction with other required nursing courses depending on the pre/co requisites of the courses. Exploration of health care dilemmas through the integration of knowledge from nursing, social sciences and public health. Principles of service- learning are introduced.

3 hrs
3 cr.

NURS 38000 - Nursing Research and Theory

Introduction to theory development and research in nursing. for Generic Program: NURS 20000, 31000

prereq: Generic Program: NURS 22000
Accelerated 2nd Degree: NURS 22000
RN Program: STAT 11300; NURS 37900
coreq: Generic Program: NURS 33200; NURS 33900; NURS 35200
Accelerated 2nd Degree: NURS 34300; NURS 35200; NURS 36000
RN Program: None
45 hrs
3 cr.

NURS 38100 - Health Assessment Throughout the Lifespan

Open to RN Program students only. Analysis of normal patterns of wellness for individual clients with emphasis on development of assessment skills.
Material Fee: $45
*prereq: CHEM 10000, CHEM 10100
*prereq or coreq: NURS 37900
6 hrs (3 lec, 3 lab)
4.5 cr.

NURS 38400 - Nursing Culturally Diverse Families

Pluralism and Diversity
PD/B
Open to RN Program students only. Explores the interrelationships between sociocultural factors and health care practices of families from diverse cultures as a basis for nursing practice. Principles of service-learning are reflected in the culturally competent interventions.
3 hrs
3 cr.

NURS 41000 - Nursing III

Provides a knowledge base for effective nursing care of middle-aged clients. Concepts and principles of service-learning are discussed and integrated into a professional practice paradigm.
Material Fee: $50
*prereq: NURS 20000, 31000, 31200, 33100, 33200
18 hrs (4 lec, 14 lab)
8
offered fall

NURS 41200 - Nursing IV

Provides knowledge base for effective nursing care of elderly clients. Principles of service-learning are integrated into selected community experiences to promote civic engagement.

*prereq: NURS 41000
18 hrs (4 lec, 14 lab)
8 cr.
offered spring

NURS 41900 - Nursing Management and Leadership in the Health Care System

Study of principles of nursing management, leadership, and research processes in health care system.
*prereq: NURS 20000, 31000, 31200, 33100, 33200
2 hrs
2 cr.
offered spring
NURS 42000 - Nursing Leadership and Ethics

In this course, students will examine the roles of the professional leadership in leading and managing health care services and ensuring ethical nursing practice. The course examines trends in health care delivery and health policy, as well as registered nurses' accountability for delivering and overseeing the provision of safe, quality health care services consistent with the ethical principles of the nursing profession. Students will be introduced to principles of coordinating care, including delegation and assignment of nursing tasks and functions. The course addresses nurses' roles in advocating on behalf of patients, themselves and the profession.

prereq: NURS 45500; NURS 46000  
coreq: NURS 47000; NURS 49000; NURS 49200  
3 hrs  
3 cr.

NURS 42100 - Nursing and Society

Analysis of issues and trends in nursing and health care from societal perspective, including opportunities for collaborative practice through service-learning.

prereq: NURS 20000, 31000, 31200, 33100, 33200, 41000, 41900  
2 hrs  
2 cr.

offered spring

NURS 42200 - Health Policy and Leadership

This final-semester course examines the roles of the professional nurse in leading and managing health care services within a complex and evolving health system. The course examines trends in health care delivery and health policy, as well as registered nurses' accountability for delivering and overseeing the provision of safe, quality health care services. Principles of coordinating care, delegation and assignment of nursing tasks and functions, and collaboration with other health professions are addressed. The course examines nurses' roles in advocating on behalf of patients, themselves and the profession.

prereq: NURS 45500; NURS 46000  
coreq: NURS 47000; NURS 49000; NURS 49200  
45 hrs: Lecture  
3 cr.

NURS 46000 - Mental and Behavioral Health Nursing

This course introduces the learner to assessment and common interventions for care of patients across the lifespan who require mental and behavioral health care, including biological, psychological, social, cultural and spiritual dimensions of individuals. Disease/illness trajectories and their translation into clinical practice guidelines and standard procedures are considered in relation to their impact on providing culturally sensitive, person-centered care. Classroom, laboratory and clinical learning experiences in a variety of settings provide an opportunity for the student to practice delivering high quality and safe client care in collaboration with other members of the health team.

prereq: NURS 35200; NURS 36000  
coreq: NURS 45500  
30 hrs: Lecture, 15 hrs: Lab; 67.5 hrs Clinical  
4 cr.

NURS 47000 - Adult Acute Illness/ Immersion Clinical
This course includes in-depth study of the biological, social, cultural and spiritual dimensions of the acutely and critically ill adults. Experiential learning in acute care settings provides an opportunity for the student to promote, maintain and/or restore an optimum level of health for these adults and their families in collaboration with other members of the health care team. Methods of systematic analysis of relevant research are discussed.

`prereq: NURS 45500; NURS 46000
coreq: (Generic) NURS 42200; NURS 49000; NURS 49200
(A2D) NURS 42000; NURS 49000; NURS 49200
22.5 hrs: Lecture; 112.5 hrs: Clinical
4 cr.`

**NURS 48000 - Promotion of Wellness in the Community**

Open to RN Pathway students only. Examination of family and community patterns as they relate to individual clients of all ages. Principles of service-learning are used in community-based clinical experiences to promote civic engagement.

`prereq: NURS 37900, 38100, 38400
7.5 hrs (3 lec, 4.5 practicum)
4.5 cr.`

**NURS 48200 - Advancement of Roles and Relationships in Professional Nursing**

Open to RN Program students only. Explores the roles and relationships in nursing with a focus on leadership as the key to the professionalism of nursing. Principles of service-learning are reflected in the ongoing development of the professional role. This is the last course in the RN Program.

`prereq: NURS 37900
prereq or coreq: NURS 38000, 38100, 38400, 48000
3 hrs
3 cr.`

**NURS 49000 - Gerontological Nursing**

This course provides a knowledge and skill base for effective nursing care of older adults. Evidence-based practice and theories guide the student in assisting the older adult and his/her family in understanding and managing health related issues in the aging process. The course includes an in-depth study of the biological, psychological, social, cultural and spiritual dimensions of the older adult client as a member of families and community systems within a changing society. The students learn to do a comprehensive assessment of the older adult using valid and reliable assessment tools. The nursing process is used as the foundation to assist the older adult to attain an optimal level of health. Concepts from related disciplines are explored as they impact on the promotion, maintenance and/or restoration of health. Experiential learning in a variety of settings provides the opportunity for the student to collaborate with inter-disciplinary health teams.

`prereq: NURS 45500; NURS 46000
coreq: (Generic) NURS 42200; NURS 47000; NURS 49200
(A2D) NURS 42000; NURS 47000; NURS 49200
30 hrs: Lecture; 90 hrs: Clinical
4 cr.`

**NURS 49200 - Advanced Synthesis of Nursing Knowledge**

This course will serve as a review of essential concepts and skills from the nursing curriculum. Students will focus on those concepts that they need to improve for the successful practice of professional nursing. Students will utilize the Hunter-Bellevue School of Nursing Learning Laboratory to review clinical skills practiced throughout the nursing
Students will also take a comprehensive examination to determine their mastery of professional nursing content.

**NURS 49500 - Writing for Health Professionals: A Course for Undergraduates**

In this course, students explore and refine their powers of observation, description, and expression through writing. Students engage in prompted narrative writing exercises and produce new out-of-class writings that are discussed in small groups and revised. The cultural and personal context in which writing is produced and read is emphasized. Scholarly and literary works are discussed, as are blogs. Students are guided to explore and test strategies for overcoming personal challenges to timely, effective writing.

**prereq:** ENGL 12000

45 hrs.

3 cr.

**Nursing: Electives**

**NURS 34000 - Women's Health**

*Pluralism and Diversity*  
PD/C  
Designed to identify and analyze those factors which impact on the health status of women: biological, sociological, psychological, environmental, political.

3 hrs

3 cr.

**NURS 34200 - Ethical Issues in Nursing Practice**

Open to RN Program and senior Generic Program students only. Examines ethical issues which arise from the practice of nursing in an interpersonal, professional, institutional and social context of diverse and competing values.

3 hrs

3 cr.

**NURS 34500 - HIV/AIDS: An Interdisciplinary Perspective for Health Care Providers**

Examines the impact of the HIV epidemic on the biological, psychological and social dimensions of persons affected by HIV/AIDS.

3 hrs

3 cr.
NURS 34600 - Death and Dying

Pluralism and Diversity
P/D B
Provides an overview of current theories, concepts, and practices associated with death, dying and end-of-life care.
3 hrs
3 cr.

NURS 35000 - Independent Study in Nursing

An opportunity to explore a topic relevant to nursing which is of individual interest.
1-3 hrs
1-3 cr.

NURS 35100 - Gender, Science and Technology

Pluralism and Diversity
PD/C
Explores the complex relationship between women and the sciences.
cross-listed WGSS 35100
3 hrs
3 cr.

NURS 39998 - Urban Disaster Response and the Health Care Team

Provides the student with an understanding of the causes, prevention, and mitigation of disasters and insight into the disaster management system nationally and locally. The course will include content relevant to all disciplines in the disaster care continuum and focus on each individual health care member's role and responsibilities within these systems.
3 hrs
3 cr.

NURS 44000 - Stress Management for Nurses

An overview of stress and its effect upon behavior within the framework of the holistic man-wellness model.
3 hrs
3 cr.

NURS 44100 - Selected Studies in Nursing Research

Honors course. Utilization of basic knowledge in nursing research to critique and interpret studies and discuss their relevance and application in nursing.
prereq: NURS 31000, 31200, 33100, 33200, 38000, 38100
3 hrs
3 cr.

NURS 44200 - Nursing Care of Acute and Critically Ill Clients
Examination of nursing knowledge and roles in caring for acute and critically ill clients and their families.

3 hrs
3 cr.

**NURS 44500 - Teaching-Learning Across the Developmental and Health Continua**

Pedagogical/andrological principles of learning and instruction to enhance client teaching in the promotion, maintenance and/or restoration of health.

3 hrs
3 cr.

**NURS 45000 - Computer Concepts and Application in Nursing**

Study of computing concepts, principles, practices, and applications in nursing and health care.

3 hrs
3 cr.

**NURS 48300 - Politics of Health**

An analysis of the relationships between politics and health status, health services and health care providers.

3 hrs
3 cr.

**Programs and Courses in Latin American & Caribbean Studies**

**Latin American and Caribbean Studies**

**About the Program**

Latin American and Caribbean Studies is an interdisciplinary program that offers students the opportunity to learn about the history, culture, politics, society, and political economy of the region and its relations with the United States. The LACS program has been able to develop an innovative outreach program with Afro-Latino and Caribbean non-governmental organizations (NGOs) in New York City and throughout the Latin American and Caribbean region. In collaboration with the Hunter College Study Abroad Office, the program offers a January semester abroad program with Universidade Salvador-UNIFACS in Bahia, Brazil. The course is taught in English and is titled “Reconstructing a Racial Identity.”

**Programs and Courses**

Programs and Courses in Latin American & Caribbean Studies

**Administration and Faculty**

Program Office:
Undergraduate Major

Latin American and Caribbean Studies - BA

The specialization in Latin American and Caribbean Studies as a major leading to a BA degree consists of 24 credits. The core courses for the major are drawn from the social sciences, humanities, and arts. Students select courses for the major in consultation with the program’s director or with a member of the Latin American and Caribbean Studies Faculty Advisory Committee.

The interdisciplinary specialization of the major will serve graduates well, whether they choose to seek employment in public or private organizations, pursue professional degrees, or go on to a graduate degree in the social sciences or humanities.

Language Requirement

Latin American and Caribbean Studies majors are required to demonstrate a reading knowledge of Spanish, Portuguese, or French, fulfilled at least one semester before graduation from the college.

Course Requirements for the Major

LACS students are required to take either LACS 33000 (a field course for students to study or intern in the region or intern in an institution in the New York area) or LACS 43400 (a course that comprises preparation of a major original research paper to be developed in close association with a mentor from the Latin American and Caribbean Studies Faculty Advisory Committee). ENGL 12000 is a prerequisite for program courses.

LACS 33000 - Latin America and the Caribbean Field Course/Internship

A field course for students to study in the region or who are interning in an institution either in the New York area or in the region. Major research paper based on field or internship experience. 3 cr.

LACS 43400 - Seminar in Latin American and Caribbean Studies

Open to sophomores, juniors, and seniors who have completed at least 18 credits in LACS or have instructor permission. Interdisciplinary reading, research, and discussion of selected topics involving cultural, economic, political,
and social problems. Research paper required. May be repeated for a maximum of 6 edits.

3 cr.

Departmental Honors

LACS majors with a GPA above 3.5 are eligible to receive the Lily Mage Award.

CR/NC Policy

No CR/NC grades will be accepted in courses to meet LACS major requirements.

Teaching

In addition to its distinguished regular Hunter faculty, LACS offers students courses by excellent adjunct faculty such as Dr. Marta Moreno Vega, Director of the Caribbean Cultural Center, producer of the documentary film When the Spirits Dance Mambo, as well as invited specialists on Latin American and Caribbean theatre, Haitian and Dominican literature and the political economy of the Caribbean and Latin America.

Mentoring

Faculty mentoring is very important to the LACS Program. Majors should maintain regular contact with their mentors/advisers.

Study Abroad

Study abroad is encouraged for LACS majors. Apart from the new Bahia, Brazil course, LACS students have studied in Hunter’s programs in Arequipa and Cuzco, Peru and Mar del Plata, Argentina.

Course Offerings for LACS

Course Offerings in LACS from Other Departments

Africana and Puerto Rican/Latino Courses

Courses from Africana and Puerto Rican Studies Department

**AFPRL 10200 - Latino Communities in the United States**

**Pluralism and Diversity**

PD/B

GER

2/B

Migration, ethnicity, community life and public policy issues of Latino groups compared to the Puerto Rican experience.

3 hrs

3 cr.
AFPRL 10300 - Conquest and Resistance: Puerto Rican Experiences in Comparative Perspective

Hunter Core
Individual and Society (Social Sciences) -I&S SS
Pluralism and Diversity
PD/B
GER
2/B

Introductory study of the Puerto Rican experience compared with experiences of Native and African Americans, Chicanos and Pacific Island peoples in the territorial expansion of the United States.
3 hrs
3 cr.

AFPRL 21000 - Introduction to Caribbean History: 1900 - Present

Hunter Core
World Culture and Global Issues
Pluralism and Diversity
PD/A
GER
2/B

Introduction to the major themes in Caribbean history after 1900.
prereq: ENGL 12000
3 hrs
3 cr.

AFPRL 23700 - African Caribbean Literature (W)

Pluralism and Diversity
PD/A or B
GER
2/A

Introduction to the historical development and major artistic preoccupations of Caribbean literature. The course is conducted in English; all course requirements are in English.
prereq: ENGL 12000
3 hrs
3 cr.

AFPRL 24100 - Puerto Rican History to 1897

Pluralism and Diversity
PD/A
GER
2/B

An examination of Taino society, Spanish colonialism, slave economy and the development of nationhood in the 19th century.
AFPRL 24200 - Puerto Rican History Since 1898

Pluralism and Diversity
PD/A
GER
2/B

Sociohistorical, political and economic analysis of Puerto Rico dating from the U.S. invasion to the present.
3 hrs
3 cr.

AFPRL 24300 - Puerto Rican Culture

Hunter Core
World Culture and Global Issues (WCGI)
Pluralism and Diversity
PD/A or B
GER
2/C

General study of Puerto Rican culture and ethnic mixtures that went into making of that culture.
3 hrs
3 cr.

AFPRL 24400 - Puerto Ricans in the United States

Pluralism and Diversity
PD/B
GER
2/B

Survey of the origins, contemporary and future development of Puerto Ricans in the United States.
3 hrs
3 cr.

AFPRL 25500 - Puerto Rican/Latino Children in North American Schools

Pluralism and Diversity
PD/B
Survey of educational system viewed as an acculturating institution.
3 hrs
3 cr.

AFPRL 29000 - Selected Topics in Africana and Puerto Rican/Latino Studies

Pluralism and Diversity
PD/A or B
Topics change according to instructor.
AFPRL 30800 - Contemporary International Relations of the African-Caribbean (W)

GER
3/B

Examination of the use of foreign policy for economic development in the Caribbean and as an instrument of transformation.
prereq: AFPRL 20700 or 21000 or perm instr.
3 hrs
3 cr.

AFPRL 31900 - Women in the African Diaspora (W)

Pluralism and Diversity
PD/B or C
GER
3/B

The cultural-historical role of women of African descent in North America and the Caribbean in relation to the family, to political resistance and in sustaining African culture and values.
cross-listed WGSC 32900 (W)
prereq: AFPRL 20400 or 20900 or 21000 or perm instr.
3 hrs
3 cr.

AFPRL 32000 - African-Caribbean Culture (W)

Pluralism and Diversity
PD/A or B
GER
3/A

prereq: AFPRL 20900 or 21000 or 22200
3 hrs
3 cr.

AFPRL 33700 - Caribbean Women Writers (W)

GER
3/A

A study of some of the major preoccupations of Caribbean fiction, such as history, migration/travel, creolization, memory and language, from the perspectives of selected women writers, paying close attention to the historical, intellectual and cultural contexts that stimulated the production of these works.
cross-listed WGS 33700 (W)
prereq: AFPRL 23600 or 23700 or ENGL 22000 or WGS 10000
AFPRL 35600 - Latino Literature in English (W)

Pluralism and Diversity
PD/B
GER
3/A

Latino writing in English in the U.S.; analysis of cultural, linguistic and ideological factors as found in the work of such authors as Sandra Cisneros (Chicana), Pedro Pietri (Puerto Rican) and Oscar Hijuelos (Cuban-American).

3 hrs
3 cr.

AFPRL 38700 - Puerto Rican/Latino Politics in the United States (W)

Pluralism and Diversity
PD/B
GER
3/B

An analysis of the political participation and leadership of Puerto Ricans and other Latinos in the United States.

prereq: either AFPRL 10200, 24200 or 24400 or perm. Instr.

3 hrs
3 cr.

AFPRL 39000 - Research Topics in Africana and Puerto Rican/Latino Studies (W)

GER
3/A or B

Topics change according to instructor.
Open to Jr/Sr only.

3 hrs
3 cr.

AFPRL 42800 - Selected Topics in Africana and Puerto Rican/Latino Studies:
Social Science

Pluralism and Diversity
PD/B
GER
3/A or B

Topics change according to instructor.
Pluralism and diversity requirements are dependent on the topic course.

prereq: perm dept.

3 hrs
3 cr.
AFPRL 44500 - Caribbean Short Story in Spanish: Readings and Theories

GER
3/A

A critical study of the short story genre in the Hispanic Caribbean viewed in conjunction with contemporary literary theory.
prereq or coreq: SPAN 20800
3 hrs
3 cr.

Anthropology

ANTHC 40100 - Seminars in Selected Topics

Topics TBA.

Economics

ECO 33000 - Economic Development

Pluralism and Diversity
PD/A
GER
3/B

Critical variables explaining the diversity of growth and economic and development outcomes across developing countries. Theories, case studies, measurement and policies.
prereq: ECO 20000
3 hrs
3 cr.

Geography

GEOG 27000 - Regional Geography of Mexico, Central America and the Caribbean

Pluralism and Diversity
PD/A
GER
3/B

Analysis of relationship of natural environment to economic, social and political life of Mexico, Central America and West Indies.
3 hrs
3 cr.

GEOG 27100 - Regional Geography of South America

Pluralism and Diversity
PD/A
Analysis of relationship of natural environment to economic, social and political life of South America.

3 hrs
3 cr.

History

HIST 27100 - Early History of Latin America

History and cultures of Amerindian groups in Central and South America and the Caribbean; encounter and multiple interactions of European and African cultures with indigenous societies; development of Iberian colonial systems and cultures within the Americas.
Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.

HIST 34122 - Latin American Political Economy

GER
3/B

courses at the 300-level and above not open to freshmen
3 hrs
3 cr.

HIST 34139 - African Influences in the Americas

GER
3/B

Courses at the 300-level and above not open to freshmen
3 hrs
3 cr.

Music

MUSHL 24000 - Music of the Caribbean and Latin America (W)

Pluralism and Diversity
GER 3/A PD/A
Origin and development of Caribbean and Latin American musical styles and their impact on the United States and other parts of the world.
prereq: ENGL 12000; one of the following: MUSHL 10100, 10700, 20500, MUSTH 101, or perm instr.
3 hrs
3 cr.

MUSHL 22100 - Black Music in the Americas (W)
Pluralism and Diversity
PD/B
GER
3/A

The origins, history, and evolutionary progression of Black music in the Americas; shared musical practices and resources in the multicultural matrix of the United States in particular and the hemisphere in general.
 prerequisite: ENGL 12000; one of the following: MUSHL 10100, 10700, 20500, MUSTH 10100, or perm instr.
3 hrs
3 cr.

Political Science

POLSC 25300 - Government and Politics in Latin America (W)

Pluralism and Diversity
PD/A
GER
3/B

Ideology, revolution, authoritarianism, democracy, institutions, class structure, distribution of wealth and power, political and economic development.
cross-listed LACS 43405
 prerequisite: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 26200 - Government and Politics in Central America (W)

Pluralism and Diversity
PD/A
GER
3/B

Political institutions, ideology, class and ethnic structure, economic development, distribution of wealth and power, foreign influences and revolutionary and evolutionary roads to modernization.
cross-listed LACS 43429
 prerequisite or coreq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 27100 - International Politics in the Americas (W)

Pluralism and Diversity
PD/A
GER
3/B

Dynamics of US relations with Latin American countries from the colonial era through the Cold War to the present, and of relations of Latin American countries with each other and with extra-hemispheric nations.
cross-listed LACS 43432
POLSC 28100 - Drugs, Politics and Public Policy (W)

GER
3/B

Examination of public policies addressing drug use and abuse in the United States and other countries with emphasis on political and cultural determinants, economic and market factors, constitutional implications and United States foreign policy.

prereq: ENGL 12000
3 hrs
3 cr.

Romance Languages - Spanish

SPAN 26400 - Contemporary Spanish Literature in Translation

Cela, Lorca, Unamuno, Ortega y Gasset.
Taught in English. This course is designed for students who want to become acquainted with Spanish culture. Cannot be credited toward the major and are not recommended for the minor.

prereq: ENGL 12000
3 hrs
3 cr.

SPAN 27600 - Readings in Modern Spanish- American Literature

Representative writers: Borges, Neruda, Cortazar, Garcia Mirquez.

prereq: SPAN 20200, 20300, 20800 211000 or four yrs high school Spanish or dept. perm.
3 hrs
3 cr.

SPAN 33600 - Latin American Civilization

GER
3/A

Geographical, historical, political, literary, artistic and economic evolution of Latin American nations. Given in Spanish.

prereq: SPAN 20800, 21100 or dept. perm
3 hrs
3 cr.

SPAN 34100 - Introduction to Hispanic Literature I

Pluralism and Diversity
PD/D
GER
3/A
Prerequisite or corequisite to most courses in major sequence. Basic interpretive and research skills for Spanish majors and other qualified students through study of key works of Spanish and Spanish-American authors.

prereq or coreq: SPAN 31100 or dept. perm
3 hrs
3 cr.

SPAN 34200 - Introduction to Hispanic Literature II

Pluralism and Diversity
PD/D
GER
3/A

prereq: SPAN 34100
coreq: SPAN 31200
3 hrs
3 cr.

SPAN 36400 - Spanish-American Modernism and Post-modernism

GER
3/A

Modernist and post-modernist authors.

prereq: SPAN 34100
3 hrs
3 cr.

SPAN 49100 - Honors Course in Spanish: Special Studies in Contemporary Latin American Literature

Open to Jr/Sr only. Group meetings, conferences, oral and written reports.

prereq: major GPA of 3.2, cum GPA of 2.8; perm adviser
3 hrs
3 cr.

Sociology

SOC 30700 - Migration

Pluralism and Diversity
PD/B
GER
3/B

Economic, demographic, political and cultural factors influencing migration and the consequences of migration.

prereq: SOC 10100
3 hrs
3 cr.
SOC 31800 - Sociology of Human Rights in Latin America

GER
3/B

Types of societies in which human rights are respected or violated with special emphasis on Latin American regimes in the last two decades. Human rights and diversity the rights of women and minorities. Movements to protect human rights. The emphasis is on actual social conditions which foster or impede the observance and protection of human rights.

prereq: SOC 10100
3 hrs
3 cr.

SOC 32502 - Sociology of Human Rights: Violation and Protection

GER
3/B

prereq: SOC 10100, perm instr.
3 hrs
3 cr.

SOC 32506 - Latin American Societies

GER
3/B

prereq: SOC 10100, perm instr.
3 hrs
3 cr.

SOC 32519 - Economic Development and Social Inequality in Latin America

GER
3/B

prereq: SOC 10100, perm instr.
3 hrs
3 cr.

SOC 36100 - Development and Modernization (W)

Pluralism and Diversity
PD/A
GER
3/B

Examinations of models of social change with a special focus on developing countries.

prereq: SOC 10100
3 hrs
3 cr.
Women and Gender Studies

WGSA 33700 - Caribbean Women Writers (W)

GER
3/A

A study of some of the major preoccupations of Caribbean fiction, such as history, migration/travel, colonialization, memory and language, from the perspectives of selected women writers, paying close attention to the historical, intellectual and cultural contexts that stimulated the production of these works.
cross-listed AFPRL 33700
prereq: AFPRL 23600 or 23700 or ENGL 22000 or WGS 10000
3 hrs
3 cr.

WGS 20005 - Dominican and Haitian Literature and Culture

3 hrs
3 cr.

Programs and Courses in Mathematics & Statistics

Mathematics and Statistics

About the Department

The Department of Mathematics and Statistics offers majors in mathematics and statistics that prepare students for careers in business, government, research, and teaching. Students considering such majors should consult an adviser during their first or second semester to plan the proper sequence of courses and should continue to consult the adviser at least once each semester. Minors in mathematics and statistics are also offered.

Credit and Course Exemption The department offers credit or course exemption based on standard examinations such as AP. Inquiries should be made at the department office.

Mathematics Proficiency and Placement

All students entering Hunter College must demonstrate proficiency in the basic skills through their scores on the first two parts of the COMPASS mathematics exam. Exemptions from these two parts are given for SATs, ACT, NY Regents, and for certain other entrance categories. The remaining parts of the COMPASS exam further assess a student’s preparedness for certain courses in mathematics, statistics, and other disciplines at the college. Students may enroll in these courses only if their scores on this entire placement exam are at appropriate levels or they have taken college courses in the required mathematics. Students who need to place into courses by examination and have not taken the remaining parts of the COMPASS mathematics exam are advised to schedule the test with the Testing Center, Room 150 Hunter North, 772-4868, http://admissions.hunter.cuny.edu/Testing.htm well in advance of registration. Subsequent placement into all mathematics and statistics courses is determined by the student’s score on the remaining parts of this exam. New students entering the college take this test in its entirety when they take the other
placement exams in reading and writing. Students should notice the mathematics and statistics prerequisites that are indicated in the descriptions of courses and majors so they can effectively plan their studies.

Programs and Courses

In planning their schedules, prospective majors should note that some advanced required courses are offered only once each year and several advanced elective courses are offered only once every other year. A rotation schedule for course offerings is available in the departmental office and on the departmental web site http://math.hunter.cuny.edu.

Prerequisites: Because of the nature of mathematics, the department recommends that students refrain from enrolling in any course that carries prerequisites unless these prerequisites have been completed with a grade of C or better.

**Hunter Core**
Math/Quantitative Reasoning
GER
1/B

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.

*prereq: grade of C or better in MATH 12500 or appropriate score on placement exam.*

4 hrs
4 cr.

**MATH 15500 (STEM) - Calculus with Analytic Geometry II**

**Hunter Core**
Math/Quantitative Reasoning
GER
1/B

Differentiation and integration of transcendental functions, integration techniques, infinite sequences and series, improper integrals, polar coordinates.

*prereq: grade of C or better in MATH 15000*

4 hrs
4 cr.

**Hunter Core Requirement**

Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

**Major**
The mathematics major introduces students to the fundamental areas of mathematics and provides some degree of specialization in one or more areas. It trains students in the analytic thinking characteristic of pure and applied mathematics and provides familiarity with rigorous methods of mathematical proof. In addition to the traditional major in mathematics, described below, the department also offers a number of specialized undergraduate tracks for students interested in pursuing careers in bioinformatics or in preparing for teaching: the concentration in Quantitative Biology, the concentration in Preparation for Adolescent Education (grades 7-12), and the concentration in Preparation for Childhood Education (grades 1-6).

To enter the traditional mathematics major, the student should have completed Foundational Courses: one year of calculus (MATH 15000 (STEM) and MATH 15500 (STEM), or the equivalent). The major consists of at least 33 credits of coursework: 24 credits of core curriculum courses taken by all mathematics majors except those enrolled in the Concentration in Preparation for Childhood Education (grades 1-6) and at least 9 credits of advanced elective courses, chosen by students according to their career plans.

Students interested in pursuing mathematics at the advanced graduate level are urged to participate in the BA/MA program in Mathematics. The BA/MA program in Preparation for Adolescent Education leads to professional certification in adolescent education (grades 7-12) in mathematics. Certification may also be received by completing the BA degree with a mathematics major and then completing the graduate Teacher Education Program (TEP) in Mathematics or the graduate Urban Teacher Residency in Mathematics.

- Mathematics Concentration in Preparation for Adolescent Education (Grades 7-12)
- Mathematics Major with a Concentration in Quantitative Biology
- Mathematics Concentration in Preparation for Childhood Education (Grades 1-6)

**Major Core Curriculum (24 cr)**

**MATH 15600 - Introduction to Mathematical Proof Workshop**

Techniques of proof will be introduced, among them the direct and indirect methods of proof, epsilon-delta arguments and induction. These will be applied to theorems in number theory, set theory and in differential and integral calculus. In planning their schedules, prospective majors should note that some advanced required courses are offered only once each year and several advanced elective courses are offered only once every other year. A rotation schedule for course offerings is available in the department office and on the departmental web site.

*prereq: MATH 15000. Because of the nature of mathematics, the department recommends that students refrain from enrolling in any course that carries prerequisites unless these prerequisites have been completed with a grade of C or better.*

2 hrs
1 cr.

**MATH 25000 - Calculus with Analytic Geometry III**

GER
3/B

Vector geometry, dot and cross products, partial derivatives, matrices, determinants, Jacobians, multiple integration.

*prereq: MATH 15500*

4 hrs
4 cr.

**MATH 25400 - Ordinary Differential Equations**
First-order equations, second-order linear equations and linear systems, power series solutions, transform and numerical methods, introduction to qualitative theory.

prereq: MATH 25000
3 hrs
3 cr.

**MATH 25500 - Vector Analysis**

Line and surface integrals, Green's Theorem, divergence theorem, Stokes' Theorem, generalized coordinates.

prereq: MATH 25000
3 hrs
3 cr.

**MATH 26000 - Linear Algebra**

Vector spaces, linear transformations, canonical forms, inner product spaces, bilinear forms, applications.

prereq: MATH 15600
prereq or coreq: MATH 25000
4 hrs
4 cr.

**MATH 31100 - Abstract Algebra I**

Introduction to the theory of groups and rings.

prereq: MATH 26000
3 hrs
3 cr.

**MATH 35100 - Mathematical Analysis I**

Rigorous treatment of foundations of calculus, including topology of real line and higher dimensional spaces. Basic results on continuous functions.

prereq: MATH 25000, 26000
3 hrs
3 cr.
STAT 21300 (STEM) - Introduction to Applied Statistics

**Hunter Core**
Math/Quantitative Reasoning

**GER**
1/B

Familiarity with the Windows computing environment encouraged. Sampling, estimation, tests of hypotheses, including one-and two-sample tests, two- and three-way tables for nominal and ordinal data, linear regression, analysis of variance through two-way with interaction, appropriate statistical software.

*prereq: MATH 12500 or appropriate score on placement exam.*

3 hrs
3 cr.

-or-

**STAT 31100 - Probability Theory**

**GER**
3/B

Combinatorics, distribution theory for discrete and continuous random variables, central limit theorems.

*prereq: MATH 25000.*

3 hrs
3 cr.

**Elective Courses**

The student must complete three 3-credit approved elective courses. The elective courses must be chosen from the 300- or 400-level courses in mathematics or statistics listed by the department. Factors affecting the choice of courses will include the student’s career goals (preparation for graduate study; education; careers in business, government service or industry), the student’s other major, where applicable, and the availability of courses due to the course rotation schedule. A 300-level course may be replaced by a graduate level course approved by a departmental adviser.

**Symbolic Computation Proficiency Requirement**

As a requirement for graduation with a BA in Mathematics, students must demonstrate entry level proficiency in symbolic computation. The requirement can be met in any of the following ways:

a) passing any of

**MATH 12600 - Precalculus Technology Laboratory**

Students are introduced to MATHEMATICA as a tool for exploring qualitative features of functions and solving pre-calculus problems: simplifying algebraic expressions, solving equations, plotting functions and curves, finding and approximating zeros and solving systems of equations. MATH 12600 cannot be taken for credit after a student has passed MATH 15000. Students who have passed MATH 15000 should register for MATH 15400 to satisfy the symbolic proficiency requirement.

*prereq: grade of C or better in MATH 10100 or appropriate score on placement exam

*prereq or coreq: MATH 12500*
2 hrs
1 cr.

**MATH 15100 - Calculus I with Symbolic Computation**

Combines MATH 15000 (Calculus I) with MATH 15400. Some previous experience with computers is desirable but not required.

*prereq: grade of C or better in MATH 12500 or appropriate score on placement exam*

6 hrs
5 cr.

**MATH 15400 - An Introduction to Symbolic Computation**

Laboratory introduction to machine-aided computation with an emphasis on examples related to calculus. Students use a symbolic computation package to investigate and solve problems numerically, analytically and graphically. The same package is used to create reports of their results. Some previous experience with computers is desirable but not required.

*prereq: MATH 15000*

2 hrs
1 hr.

**MATH 38500 - Numerical Methods I**

GER
3/B

Accuracy and precision, convergence, iterative and direct methods. Topics selected from: solution of polynomial equations and linear systems of equations, curve fitting and function approximation, interpolation, differentiation and integration, differential equations.

*prereq: MATH 25000 and MATH 26000 or permission of the instructor*

3 hrs
3 cr.

b) passing a departmental exam in a computer algebra system (currently we use MATHEMATICA or the equivalent)

**Honors**

A student majoring in mathematics or statistics may become a candidate for departmental honors by successfully completing MATH 490, by presenting a major GPA of at least 3.6 and by achieving a satisfactory rating on a comprehensive examination.

**MATH 49000 - Honors Seminar**

GER
3/B

*prereq: MATH 31100, 35100, perm dept.*

3 hrs
3 cr.
Minor in Mathematics

A minor in mathematics consists of a minimum of 12 credits selected from the following courses offered by the Department:

- MATH courses numbered 15000 or above (with the exception of MATH 26100)
- STAT 31100
- STAT 31200

Mathematics minors are required to take all necessary prerequisites. Students should consult the catalog to determine prerequisites necessary for them to enroll in courses that count toward the minor.

It is recommended that prospective mathematics minors consult with an undergraduate mathematics adviser concerning course selection.

Mathematics Concentration in Preparation for Adolescent Education (Grades 7-12)

Return to Programs and Courses in Mathematics & Statistics Mathematics - BA

Provisional certification for teaching mathematics in grades 7-12 may be obtained by:

- Completing the BA with a traditional mathematics major, and
- Completing the adolescent education sequence as prescribed by the School of Education.

Students following this concentration in the mathematics major should consult a departmental adviser as to which advanced elective courses are recommended to complete 33 or more credits in the major.

Mathematics Concentration in Preparation for Childhood Education (Grades 1-6)

Return to Programs and Courses in Mathematics & Statistics

This concentration constitutes a mathematics major for QUEST students. QUEST students majoring in mathematics are not exempt from the MATH 10400 (STEM) /MATH 10500 requirement. To enter this major, the student should have completed one semester of calculus (MATH 15000 (STEM) or the equivalent). The specified collateral major is childhood education. This mathematics major consists of at least 32 credits of coursework: 20 credits of major core curriculum courses and at least 12 additional credits, as described below.

Major Core Curriculum (20 credits)

**MATH 15400 - An Introduction to Symbolic Computation**

Laboratory introduction to machine-aided computation with an emphasis on examples related to calculus. Students use a symbolic computation package to investigate and solve problems numerically, analytically and graphically. The same package is used to create reports of their results. Some previous experience with computers is desirable but not required.

*prereq: MATH 15000
2 hrs
1 hr.*
MATH 15500 (STEM) - Calculus with Analytic Geometry II

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Differentiation and integration of transcendental functions, integration techniques, infinite sequences and series, improper integrals, polar coordinates.

prereq: grade of C or better in MATH 15000
4 hrs
4 cr.

MATH 15600 - Introduction to Mathematical Proof Workshop

Techniques of proof will be introduced, among them the direct and indirect methods of proof, epsilon-delta arguments and induction. These will be applied to theorems in number theory, set theory and in differential and integral calculus.

In planning their schedules, prospective majors should note that some advanced required courses are offered only once each year and several advanced elective courses are offered only once every other year. A rotation schedule for course offerings is available in the department office and on the departmental website.

prereq: MATH 15000. Because of the nature of mathematics, the department recommends that students refrain from enrolling in any course that carries prerequisites unless these prerequisites have been completed with a grade of C or better.

prereq or coreq: MATH 15500
2 hrs
1 cr.

MATH 16000 - Matrix Algebra

GER
1/B

Systems of linear equations, matrices, determinants, introduction to vector spaces and linear transformations, applications.

prereq: MATH 12500 or appropriate score on placement exam
3 hrs
3 cr.

MATH 25000 - Calculus with Analytic Geometry III

GER
3/B

Vector geometry, dot and cross products, partial derivatives, matrices, determinants, Jacobians, multiple integration.

prereq: MATH 15500
4 hrs
4 cr.

MATH 26000 - Linear Algebra
GER 3/B

Vector spaces, linear transformations, canonical forms, inner product spaces, bilinear forms, applications.

prereq: MATH 15600
prereq or coreq: MATH 25000

4 hrs
4 cr.

STAT 21300 (STEM) - Introduction to Applied Statistics

Hunter Core
Math/Quantitative Reasoning

GER 1/B

Familiarity with the Windows computing environment encouraged. Sampling, estimation, tests of hypotheses, including one- and two-sample tests, two- and three-way tables for nominal and ordinal data, linear regression, analysis of variance through two-way with interaction, appropriate statistical software.

prereq: MATH 12500 or appropriate score on placement exam.

3 hrs
3 cr.

Additional Required Courses (at least 12 credits)

STAT 21200 - Discrete Probability

Hunter Core
Math and Quantitative Reasoning (MQR)

GER 1/B

Combinations, permutations, discrete probability. Characteristics of probability distributions. Model building. Additional topics like sampling, random walks or game theory will be introduced from time to time.

prereq: MATH 12500 or STAT 11300 or appropriate score on placement exam.

3 hrs
3 cr.

STAT 22000 - Statistical Analysis in Forensics

GER 3/B

A second course in probability and statistics and the evaluation of evidence in the forensic sciences.

prereq: STAT 21200 and either STAT 21300 or 11300 by permission of instructor. One of the above, i.e., STAT 21200 or STAT 21300 or STAT 11300 by permission of instructor may be taken as a coreq.

3 hrs
3 cr.

• Two additional courses approved by a departmental adviser
Mathematics Major with a Concentration in Quantitative Biology

This program is for students intending to pursue research careers in biomedical sciences. It provides students with a working knowledge of computing and biological sciences for bioengineering careers in bioinformatics, the pharmaceutical industry, and the biotechnology industry.

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

Entry Requirements

MATH 12500 (STEM) - Precalculus

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Functions and their graphs: polynomial, rational, exponential, logarithmic and trigonometric functions; conic sections; topics in trigonometry; graphical and analytical solutions to systems of equations and inequalities. Not credited to students who have completed MATH 15000 or its equivalent.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
4 hrs
4 cr.

MATH 15000 (STEM) - Calculus with Analytic Geometry I

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.

prereq: grade of C or better in MATH 12500 or appropriate score on placement exam
4 hrs
4 cr.

MATH 15500 (STEM) - Calculus with Analytic Geometry II

Hunter Core
Math/Quantitative Reasoning
GER
1/B
Differentiation and integration of transcendental functions, integration techniques, infinite sequences and series, improper integrals, polar coordinates.

*prereq: grade of C or better in MATH 15000

4 hrs
4 cr.

The Following Courses with B- or better

In order to enroll in the quantitative biology concentration within the mathematics major, students must obtain an average of B- or better in the following courses:

**STAT 21300 (STEM) - Introduction to Applied Statistics**

**Hunter Core**
Math/Quantitative Reasoning

**GER**
1/B

Familiarity with the Windows computing environment encouraged. Sampling, estimation, tests of hypotheses, including one-and two-sample tests, two- and three-way tables for nominal and ordinal data, linear regression, analysis of variance through two-way with interaction, appropriate statistical software.

*prereq: MATH 12500 or appropriate score on placement exam.*

3 hrs
3 cr.

**CHEM 10400 (STEM) - General Chemistry II**

**Hunter Core**
Life and Physical Sciences (LPS) Scientific World (SW)

**GER**
2/E

In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.

Primarily for premed, medical laboratory sciences and science majors.

*prereq: CHEM 10200 with grade of C or better or CHEM 10000 with perm chair

5 hrs (4 lec, 1 rec)
4 cr.

**CHEM 10500 (STEM) - General Chemistry Laboratory II**

**Hunter Core**
Life and Physical Sciences (LPS) Scientific World (SW)

**Pluralism and Diversity**

**GER 2/E**

Laboratory experiments illustrating and applying theory of solutions to qualitative analysis.

Offered for transfer students who have completed only one semester of General Chemistry Laboratory.

*prereq: One semester of General Chemistry Laboratory.*

*prereq or coreq: CHEM 10400

3 hrs
1.5 cr.
CHEM 22200 - Organic Chemistry Lecture I

GER
GER 3/B

Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

prereq: CHEM 10400 with a grade of C or better
5-6 hrs (4 lec, 1-2 recitation/workshop)
4 cr.

BIOL 10000 (STEM) - Principles of Biology I

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
PD/C or D
GER
2/E

The chemical basis of life; basic structure and function of pro- and eucaryotic cells; bioenergetics; Mendelian and molecular genetics; development and mechanisms of control of gene expression at all levels; population genetics and evolution.
Material Fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.
prereq: MATH 12500, CHEM 10200
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
spring only

In addition, no more than one (1) of these four courses may be passed with a grade of C.

Requirements for the Math Major that also apply to bioinformatics

Symbolic Computation Proficiency Requirement

As a requirement for graduation with a BA in Mathematics, students must demonstrate entry level proficiency in symbolic computation. The requirement can be met in any of the following ways:

a) passing any of

MATH 12600 - Precalculus Technology Laboratory

Students are introduced to MATHEMATICA as a tool for exploring qualitative features of functions and solving precalculus problems: simplifying algebraic expressions, solving equations, plotting functions and curves, finding and approximating zeros and solving systems of equations. MATH 12600 cannot be taken for credit after a student has passed MATH 15000. Students who have passed MATH 15000 should register for MATH 15400 to satisfy the symbolic proficiency requirement.
prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: MATH 12500
MATH 15100 - Calculus I with Symbolic Computation

Combines MATH 15000 (Calculus I) with MATH 15400. Some previous experience with computers is desirable but not required.

prereq: grade of C or better in MATH 12500 or appropriate score on placement exam

6 hrs
5 cr.

MATH 15400 - An Introduction to Symbolic Computation

Laboratory introduction to machine-aided computation with an emphasis on examples related to calculus. Students use a symbolic computation package to investigate and solve problems numerically, analytically and graphically. The same package is used to create reports of their results. Some previous experience with computers is desirable but not required.

prereq: MATH 15000

2 hrs
1 hr.

MATH 38500 - Numerical Methods I

GER
3/B

Accuracy and precision, convergence, iterative and direct methods. Topics selected from: solution of polynomial equations and linear systems of equations, curve fitting and function approximation, interpolation, differentiation and integration, differential equations.

prereq: MATH 25000 and MATH 26000 or permission of the instructor

3 hrs
3 cr.

b) passing a departmental exam in a computer algebra system (currently we use MATHEMATICA or the equivalent)

Major Core Curriculum

MATH 15600 - Introduction to Mathematical Proof Workshop

Techniques of proof will be introduced, among them the direct and indirect methods of proof, epsilon-delta arguments and induction. These will be applied to theorems in number theory, set theory and in differential and integral calculus. In planning their schedules, prospective majors should note that some advanced required courses are offered only once each year and several advanced elective courses are offered only once every other year. A rotation schedule for course offerings is available in the department office and on the departmental web site.

prereq: MATH 15000. Because of the nature of mathematics, the department recommends that students refrain from enrolling in any course that carries prerequisites unless these prerequisites have been completed with a grade of C or better.

prereq or coreq: MATH 15500
2 hrs
1 cr.

MATH 25000 - Calculus with Analytic Geometry III

GER
3/B

Vector geometry, dot and cross products, partial derivatives, matrices, determinants, Jacobians, multiple integration.

prereq: MATH 15500

4 hrs
4 cr.

MATH 25400 - Ordinary Differential Equations

GER
3/B

First-order equations, second-order linear equations and linear systems, power series solutions, transform and numerical methods, introduction to qualitative theory.

prereq: MATH 25000

3 hrs
3 cr.

MATH 25500 - Vector Analysis

GER
3/B

Line and surface integrals, Green's Theorem, divergence theorem, Stokes' Theorem, generalized coordinates.

prereq: MATH 25000

3 hrs
3 cr.

MATH 26000 - Linear Algebra

GER
3/B

Vector spaces, linear transformations, canonical forms, inner product spaces, bilinear forms, applications.

prereq: MATH 15600

prereq or coreq: MATH 25000

4 hrs
4 cr.

MATH 31100 - Abstract Algebra I

GER
3/B

Introduction to the theory of groups and rings.
prereq: MATH 26000
3 hrs
3 cr.

MATH 35100 - Mathematical Analysis I

GER
3/B

Rigorous treatment of foundations of calculus, including topology of real line and higher dimensional spaces. Basic results on continuous functions.
prereq: MATH 25000, 26000
3 hrs
3 cr.

STAT 21300 (STEM) - Introduction to Applied Statistics

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Familiarity with the Windows computing environment encouraged. Sampling, estimation, tests of hypotheses, including one-and two-sample tests, two- and three-way tables for nominal and ordinal data, linear regression, analysis of variance through two-way with interaction, appropriate statistical software.

prereq: MATH 12500 or appropriate score on placement exam.
3 hrs
3 cr.

STAT 31100 - Probability Theory

GER
3/B

Combinatorics, distribution theory for discrete and continuous random variables, central limit theorems.
prereq: MATH 25000.
3 hrs
3 cr.

Additional Required Courses

STAT 31900 - Bayesian Statistical Inference in the Sciences

GER
3/B

CSCI 13200 - Practical UNIX and Programming, with Lab

Hunter Core
Scientific World (SW)
GER
2/E

An introduction to computer programming and the UNIX operating system using Perl. Conceptual overview of the UNIX operating system and programming environment, a practical introduction to shell programming, and the use of UNIX filters and utilities. A pragmatic course with an emphasis on skills acquisition.

This course cannot be counted towards the CSCI major.

prereq: none
3 hrs
3 cr.

CSCI 23200 - Relational Databases and SQL Programming, with Lab

GER
3/B

An introduction to elementary database concepts and SQL, the standard language for communicating with most database systems. A pragmatic course with an emphasis on skills acquisition; students will learn how to get things done quickly and easily in a database environment.

Required for computer science minors; open to computer science majors, but may not be used toward the computer science major.

prereq: CSCI 12700 or CSCI 13200
3 hrs
3 cr.

CHEM 10200 (STEM) - General Chemistry I

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
2/E

In-depth introduction to stoichiometric calculations, atomic and molecular structure and chemical bonding. Primarily for pre-med, medical laboratory sciences and science majors.

prereq or coreq: MATH 12500, 12600 or equiv.
5 hrs (4 lec, 1 rec)
4 cr.

CHEM 10400 (STEM) - General Chemistry II
**Hunter Core**
Life and Physical Sciences (LPS) Scientific World (SW)

**GER**
2/E

In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.

Primarily for premed, medical laboratory sciences and science majors.

*prereq: CHEM 10200 with grade of C or better or CHEM 10000 with perm chair*

5 hrs (4 lec, 1 rec)
4 cr.

**CHEM 10500 (STEM) - General Chemistry Laboratory II**

**Hunter Core**
Life and Physical Sciences (LPS) Scientific World (SW)

**Pluralism and Diversity**
GER 2/E

Laboratory experiments illustrating and applying theory of solutions to qualitative analysis.

Offered for transfer students who have completed only one semester of General Chemistry Laboratory.

*prereq: One semester of General Chemistry Laboratory.*

*prereq or coreq: CHEM 10400*

3 hrs
1.5 cr.

**CHEM 22200 - Organic Chemistry Lecture I**

**GER**
GER 3/B

Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

*prereq: CHEM 10400 with a grade of C or better*

5-6 hrs (4 lec, 1-2 recitation/workshop)
4 cr.

**BIOL 30000 - Biological Chemistry**

**GER**
3/B

Molecular aspects of cellular function; properties of biomolecules, their biosynthesis and breakdown; structure and function of proteins and enzymes, metabolites, membranes and nucleic acids; cellular mechanisms of energy transduction; integration and control of cell metabolism. Experiments cover a variety of modern techniques in molecular biology.

Material Fee: $10

*prereq: BIOL 20200, CHEM 22200, 22300*

*coreq: CHEM 22400*

7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.

*fall only*
BIOL 42500 - Computational Molecular Biology

GER
3/B

An introduction to the interdisciplinary field of computational molecular biology. Students are taught the scope and methods of in silico biology, i.e., the application of computational and statistical methods to solving problems in molecular biology. Topics will include homology searching, sequence alignment, molecular phylogenetics, comparative genomics, analysis of gene expression, and prediction of macromolecular structures. The course will be taught using a mixed format of lectures and hands-on workshops in a UNIX computer laboratory setting. Knowledge and skills in molecular biology, UNIX programming, and statistics are essential for success in this core course required for bioinformatics-concentration students from all majors.

prereq: BIOL 30000 or BIOL 30200 or CHEM 37600; STAT 21300; CSCI 13200 or CSCI 23500 or UNIX proficiency permitted by instructor.

3 hrs
3 cr.

Statistics - BA

The study of statistics provides the student with analytical tools that may find application in various fields within the sciences and social sciences. Bioinformatics is a rapidly developing area open to students in statistics with a working knowledge of computing and biological sciences. Actuarial science is one area open to students in statistics who also have backgrounds in such subjects as computer science, mathematics and economics. The BA/MA in Statistics and Applied Mathematics offered by the department provides enrichment for undergraduate statistics majors.

To enter the major the student must have completed MATH 15000 (STEM) and MATH 15500 (STEM). Normally, the statistics major consists of 32 credits as follows: 29 credits of core curriculum courses and any additional 3-credit statistics, mathematics, or computer science course approved by the statistics adviser. Modifications are permitted with the consent of the statistics adviser. For example, a student may elect to replace STAT 21200 with a more advanced course. With permission of the adviser, a student may take graduate courses in statistics and applied mathematics. Students interested in bioinformatics take the additional courses listed in the concentration in quantitative biology.

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students will appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

MATH 15000 (STEM) - Calculus with Analytic Geometry I

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.

prereq: grade of C or better in MATH 12500 or appropriate score on placement exam.

4 hrs
4 cr.

MATH 15500 (STEM) - Calculus with Analytic Geometry II
Differentiation and integration of transcendental functions, integration techniques, infinite sequences and series, improper integrals, polar coordinates.

*prereq:* grade of C or better in MATH 15000

4 hrs

4 cr.

**Hunter Core Requirement**

Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student's advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

**Major**

Major Core Curriculum (29 cr)

**MATH 25000 - Calculus with Analytic Geometry III**

**GER**

3/B

Vector geometry, dot and cross products, partial derivatives, matrices, determinants, Jacobians, multiple integration.

*prereq:* MATH 15500

4 hrs

4 cr.

**MATH 25400 - Ordinary Differential Equations**

**GER**

3/B

First-order equations, second-order linear equations and linear systems, power series solutions, transform and numerical methods, introduction to qualitative theory.

*prereq:* MATH 25000

3 hrs

3 cr.

or

**MATH 35400 - Dynamical Systems and Chaos**

**GER**

3/B

Linear flows, qualitative theory of low-dimensional nonlinear systems, introduction to chaos in discrete one-dimensional dynamical systems.

*prereq:* MATH 25000, 26000
3 hrs
3 cr.

MATH 26000 - Linear Algebra

GER
3/B

Vector spaces, linear transformations, canonical forms, inner product spaces, bilinear forms, applications.

prereq: MATH 15600
prereq or coreq: MATH 25000

4 hrs
4 cr.

STAT 21200 - Discrete Probability

Hunter Core
Math and Quantitative Reasoning (MQR)
GER
1/B

Combinations, permutations, discrete probability. Characteristics of probability distributions. Model building. Additional topics like sampling, random walks or game theory will be introduced from time to time.

prereq: MATH 12500 or STAT 11300 or appropriate score on placement exam.

3 hrs
3 cr.

STAT 21300 (STEM) - Introduction to Applied Statistics

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Familiarity with the Windows computing environment encouraged. Sampling, estimation, tests of hypotheses, including one- and two-sample tests, two- and three-way tables for nominal and ordinal data, linear regression, analysis of variance through two-way with interaction, appropriate statistical software.

prereq: MATH 12500 or appropriate score on placement exam.

3 hrs
3 cr.

STAT 21400 - Data Analysis Using Statistical Software

GER
3/B

Familiarity with the Windows computing environment encouraged. Analysis of variance, simple and multiple regression, nonparametric statistics, statistical model building

prereq: STAT 21300 or MATH 12500 and STAT 11300 with grade of C or better in each course.
STAT 3100 - Probability Theory

GER
3/B

Combinatorics, distribution theory for discrete and continuous random variables, central limit theorems.

*prereq: MATH 25000.*

STAT 31200 - Stochastic Processes

GER
3/B

Discrete and continuous stochastic processes including Markov chains, birth processes, queues and Brownian motion.

*prereq: STAT 31100*

STAT 31300 - Introduction to Mathematical Statistics

GER
3/B

Estimation, hypothesis testing, confidence limits for normal, binomial, Poisson and exponential random variables.

*prereq: STAT 31100*

Statistics Minor

A minor in statistics consists of at least 12 credits selected from STAT courses offered by the department. Statistics minors are required to take all necessary prerequisites. Students should consult the catalog to determine prerequisites necessary for them to enroll in courses that count toward the minor. It is recommended that prospective statistics minors consult with an undergraduate adviser concerning course selection.

Actuarial Sequence

A student interested in actuarial work should take the following courses. Students are also encouraged to take courses in accounting, economics and computer science. For information concerning examinations and prizes given to undergraduates by the Society of Actuaries, consult the departmental adviser.

MATH 15000 (STEM) - Calculus with Analytic Geometry I

Hunter Core
Math/Quantitative Reasoning
Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications. 
\textit{prereq: grade of C or better in MATH 12500 or appropriate score on placement exam.}
4 hrs
4 cr.

\textbf{MATH 15500 (STEM) - Calculus with Analytic Geometry II}

\textbf{Hunter Core}
Math/Quantitative Reasoning
\textbf{GER}
1/B

Differentiation and integration of transcendental functions, integration techniques, infinite sequences and series, improper integrals, polar coordinates. 
\textit{prereq: grade of C or better in MATH 15000}
4 hrs
4 cr.

\textbf{MATH 25000 - Calculus with Analytic Geometry III}

\textbf{GER}
3/B

Vector geometry, dot and cross products, partial derivatives, matrices, determinants, Jacobians, multiple integration. 
\textit{prereq: MATH 15500}
4 hrs
4 cr.

\textbf{MATH 26000 - Linear Algebra}

\textbf{GER}
3/B

Vector spaces, linear transformations, canonical forms, inner product spaces, bilinear forms, applications. 
\textit{prereq: MATH 15600}
\textit{prereq or coreq: MATH 25000}
4 hrs
4 cr.

\textbf{STAT 31100 - Probability Theory}

\textbf{GER}
3/B

Combinatorics, distribution theory for discrete and continuous random variables, central limit theorems. 
\textit{prereq: MATH 25000.}
3 hrs
3 cr.
STAT 31300 - Introduction to Mathematical Statistics

GER
3/B

Estimation, hypothesis testing, confidence limits for normal, binomial, Poisson and exponential random variables.

prereq: STAT 31100
3 hrs
3 cr.

Concentration

- Statistics Major with a Concentration in Quantitative Biology

Honors

A student majoring in mathematics or statistics may become a candidate for departmental honors by successfully completing MATH 49000, by presenting a major GPA of at least 3.6 and by achieving a satisfactory rating on a comprehensive examination.

Statistics Major with a Concentration in Quantitative Biology

For students intending to pursue research careers in biomedical sciences. It provides students with a working knowledge of computing and biological sciences for bioengineering careers in bioinformatics, the pharmaceutical industry, and the biotechnology industry.

Students interested in this concentration in the statistics major should consult the adviser. Information at http://www.hunter.cuny.edu/qubi/statistics-majors

For this concentration, the student must complete the entry requirement for the statistics major (MATH 15000 (STEM) and MATH 15500 (STEM)). This major consists of the following core curriculum and additional required courses:

Major Core Curriculum (29 credits)

MATH 25000 - Calculus with Analytic Geometry III

GER
3/B

Vector geometry, dot and cross products, partial derivatives, matrices, determinants, Jacobians, multiple integration.

prereq: MATH 15500
4 hrs
4 cr.

MATH 25400 - Ordinary Differential Equations

GER
3/B
First-order equations, second-order linear equations and linear systems, power series solutions, transform and numerical methods, introduction to qualitative theory.

*MATH 35400 - Dynamical Systems and Chaos*

**GER**
3/B

Linear flows, qualitative theory of low-dimensional nonlinear systems, introduction to chaos in discrete one-dimensional dynamical systems.

*prereq: MATH 25000, 26000*

3 hrs
3 cr.

*MATH 26000 - Linear Algebra*

**GER**
3/B

Vector spaces, linear transformations, canonical forms, inner product spaces, bilinear forms, applications.

*prereq: MATH 15600*

*prereq or coreq: MATH 25000*

4 hrs
4 cr.

*STAT 21200 - Discrete Probability*

**Hunter Core**
Math and Quantitative Reasoning (MQR)

**GER**
1/B

Combinations, permutations, discrete probability. Characteristics of probability distributions. Model building. Additional topics like sampling, random walks or game theory will be introduced from time to time.

*prereq: MATH 12500 or STAT 11300 or appropriate score on placement exam.*

3 hrs
3 cr.

*STAT 21300 (STEM) - Introduction to Applied Statistics*

**Hunter Core**
Math/Quantitative Reasoning

**GER**
1/B

Familiarity with the Windows computing environment encouraged. Sampling, estimation, tests of hypotheses,
including one-and two-sample tests, two- and three-way tables for nominal and ordinal data, linear regression, analysis of variance through two-way with interaction, appropriate statistical software.

*prereq: MATH 12500 or appropriate score on placement exam.*

3 hrs

3 cr.

**STAT 21400 - Data Analysis Using Statistical Software**

GER

3/B

Familiarity with the Windows computing environment encouraged. Analysis of variance, simple and multiple regression, nonparametric statistics, statistical model building

*prereq: STAT 21300 or MATH 12500 and STAT 11300 with grade of C or better in each course.*

3 hrs

3 cr.

**STAT 31100 - Probability Theory**

GER

3/B

Combinatorics, distribution theory for discrete and continuous random variables, central limit theorems.

*prereq: MATH 25000.*

3 hrs

3 cr.

**STAT 31200 - Stochastic Processes**

GER

3/B

Discrete and continuous stochastic processes including Markov chains, birth processes, queues and Brownian motion.

*prereq: STAT 31100*

3 hrs

3 cr.

**STAT 31300 - Introduction to Mathematical Statistics**

GER

3/B

Estimation, hypothesis testing, confidence limits for normal, binomial, Poisson and exponential random variables.

*prereq: STAT 31100*

3 hrs

3 cr.

**Additional Required Courses (30 credits)**

**CSCI 13200 - Practical UNIX and Programming, with Lab**
**Hunter Core**
Scientific World (SW)
**GER**
2/E

An introduction to computer programming and the UNIX operating system using Perl. Conceptual overview of the UNIX operating system and programming environment, a practical introduction to shell programming, and the use of UNIX filters and utilities. A pragmatic course with an emphasis on skills acquisition. This course cannot be counted towards the CSCI major.

*prereq: none*

3 hrs

3 cr.

**CSCI 23200 - Relational Databases and SQL Programming, with Lab**

**GER**
3/B

An introduction to elementary database concepts and SQL, the standard language for communicating with most database systems. A pragmatic course with an emphasis on skills acquisition; students will learn how to get things done quickly and easily in a database environment. Required for computer science minors; open to computer science majors, but may not be used toward the computer science major.

*prereq: CSCI 12700 or CSCI 13200*

3 hrs

3 cr.

**CHEM 10200 (STEM) - General Chemistry I**

**Hunter Core**
Scientific World (SW); Life and Physical Sciences (LPS)
**GER**
2/E

In-depth introduction to stoichiometric calculations, atomic and molecular structure and chemical bonding. Primarily for pre-med, medical laboratory sciences and science majors.

*prereq or coreq: MATH 12500, 12600 or equiv.*

5 hrs (4 lec, 1 rec)

4 cr.

**CHEM 10400 (STEM) - General Chemistry II**

**Hunter Core**
Life and Physical Sciences (LPS) Scientific World (SW)
**GER**
2/E

In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.

Primarily for premed, medical laboratory sciences and science majors.

*prereq: CHEM 10200 with grade of C or better or CHEM 10000 with perm chair*
CHEM 10600 (STEM) - General Chemistry Laboratory

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
GER 2/E
Experiments designed to illustrate the fundamental laws of chemistry. The course is equivalent one year of general chemistry laboratory.
Credit not given for CHEM 10600 and CHEM 10300 or CHEM 10500. Primarily for pre-med, medical laboratory sciences and science majors.

prereq: CHEM 10200
coreq: CHEM 10400
6 hrs
3 cr.
(or equivalent)

CHEM 22200 - Organic Chemistry Lecture I

GER
GER 3/B
Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

prereq: CHEM 10400 with a grade of C or better
5-6 hrs (4 lec, 1-2 recitation/workshop)
4 cr.

BIOL 10000 (STEM) - Principles of Biology I

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
PD/C or D
GER
2/E
The chemical basis of life; basic structure and function of pro- and eucaryotic cells; bioenergetics; Mendelian and molecular genetics; development and mechanisms of control of gene expression at all levels; population genetics and evolution.
Material Fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.

prereq: MATH 12500, CHEM 10200
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
spring only

BIOL 30000 - Biological Chemistry
Molecular aspects of cellular function; properties of biomolecules, their biosynthesis and breakdown; structure and function of proteins and enzymes, metabolites, membranes and nucleic acids; cellular mechanisms of energy transduction; integration and control of cell metabolism. Experiments cover a variety of modern techniques in molecular biology.

Material Fee: $10

prereq: BIOL 20200, CHEM 22200, 22300

coreq: CHEM 22400

7 hrs (3 lec, 3 lab, 1 disc)

4.5 cr.

fall only

or

BIOL 42500 - Computational Molecular Biology

An introduction to the interdisciplinary field of computational molecular biology. Students are taught the scope and methods of in silico biology, i.e., the application of computational and statistical methods to solving problems in molecular biology. Topics will include homology searching, sequence alignment, molecular phylogenetics, comparative genomics, analysis of gene expression, and prediction of macromolecular structures. The course will be taught using a mixed format of lectures and hands-on workshops in a UNIX computer laboratory setting. Knowledge and skills in molecular biology, UNIX programming, and statistics are essential for success in this core course required for bioinformatics-concentration students from all majors.

prereq: BIOL 30000 or BIOL 30200 or CHEM 37600; STAT 21300; CSCI 13200 or CSCI 23500 or UNIX proficiency permitted by instructor.

3 hrs

3 cr.

Undergraduate Major/Graduate Major

Mathematics or Statistics and Applied Mathematics - BA/MA

The BA/MA program offers promising students the opportunity to complete both the bachelor's and master's requirements with a minimum of 120 credits. Requirements are the same as those for a major in the department, plus 30 credits at the graduate level. Interested students should contact the graduate adviser for further information regarding eligibility and curriculum requirements.

Track 1: BA/MA Program in Mathematics

Students complete the BA with a traditional mathematics major, with 30 additional credits at the graduate level in pure mathematics approved by the departmental graduate adviser.

Track 2: BA/MA Program in Statistics and Applied Mathematics

Students complete the BA with a traditional major in statistics or mathematics, with 30 additional credits at the graduate level in applied mathematics, statistics, and computer science, approved by the departmental graduate adviser.
Mathematics Preparation for Adolescent Education (Grades 7-12) - BA/MA

Students interested in secondary school teaching may pursue a combined BA/MA program in teaching. This program requires a minimum of 141 credits.

**Admission Requirements for the BA/MA in Teaching**

- Completion of at least 45 credits with a GPA of 3.0.
- Completion of at least 10 credits in mathematics, including a year of calculus (MATH 15000 (STEM) and MATH 15500 (STEM), or the equivalent), with an average of 2.7 in these major courses.
- Admission to the School of Education.

**Degree Requirements for the BA/MA in Teaching**

The BA/MA program in the teaching of mathematics includes 47–48 credits in mathematics (in addition to the year of calculus described above) and 23 credits in teacher education courses, some of them taken at the undergraduate level and some at the graduate level. The required courses are:

- The 33 credits required for the BA in Mathematics OR the 32 credits required for the BA in Statistics.
- The following 15 graduate credits: MATH 62000, 63000, 63300, 63500, and STAT 61200 *or 61400.

*Although students are required to take either STAT 61200 or STAT 61400, they are encouraged to take both courses.

Also required is passing a comprehensive examination in mathematics consisting of three parts covering the material in MATH 620, 630, and 633. Students may sit for the comprehensive examination only after having taken all three courses. Students who fail any part of the examination need only retake that part of the examination. A student can take any part of the comprehensive exam in mathematics twice; after that, a committee formed by the Mathematics/Statistics Chairperson and consisting of members from the Department of Mathematics and Statistics and the Department of Curriculum and Teaching will decide if the student can take the examination a third and final time.

The student should consult the School of Education section of the graduate catalog for the sequence of teacher education courses.

**Undergraduate Minor**

**Minor in Mathematics**

A minor in mathematics consists of a minimum of 12 credits selected from the following courses offered by the Department:

- MATH courses numbered 15000 or above (with the exception of MATH 26100)
- STAT 31100
- STAT 31200

Mathematics minors are required to take all necessary prerequisites. Students should consult the catalog to determine prerequisites necessary for them to enroll in courses that count toward the minor.
It is recommended that prospective mathematics minors consult with an undergraduate mathematics adviser concerning course selection.

**Minor in Statistics**

A minor in statistics consists of at least 12 credits selected from STAT courses offered by the Department. Statistics minors are required to take all necessary prerequisites. Students should consult the catalog to determine prerequisites necessary for them to enroll in courses that count toward the minor. It is recommended that prospective statistics minors consult with an undergraduate statistics adviser concerning course selection.

**Mathematics and Statistics: Mathematics**

In planning their schedules, prospective majors should note that some advanced required courses are offered only once each year and several advanced elective courses are offered only once every other year. A rotation schedule for course offerings is available in the department office and on the departmental web site.

**Prerequisites:** Because of the nature of mathematics, the department recommends that students refrain from enrolling in any course that carries prerequisites unless these prerequisites have been completed with a grade of C or better.

**MATH 10000 - Basic Structures of Mathematics**

**Hunter Core**
Math/Quantitative Reasoning

**GER**

1/B

Not open to students who have received credit for any math or stat course that satisfies the GER 1/B requirement. Not recommended for students majoring in mathematics, statistics, computer science, or natural sciences. Symbolic logic, sets, number systems, relations and operations and topics in probability and statistics. This course is a terminal course and does not serve as a prerequisite to any other course in the department

*prereq: CUNY Math Proficiency*

3 hrs
3 cr.

**MATH 10100 - Algebra for College Students**

Topics in algebra, graphing and functions Includes: algebraic and graphical solutions to systems of equations and inequalities; absolute value, polynomial, rational and radical expressions and equations; complex numbers; the function concept; introduction to polynomial, rational and exponential functions and their graphs.

In planning their schedules, prospective majors should note that some advanced required courses are offered only once each year and several advanced elective courses are offered only once every other year. A rotation schedule for course offerings is available in the department office and on the departmental web site.

*prereq: appropriate score on placement exam or exit from appropriate departmental workshop*

4 hrs (2 lec, 2 lab)
3 cr.

**MATH 10200 - Mathematics and Everyday Life**

**Hunter Core**
Math/Quantitative Reasoning

**GER**
Students will learn how to model real world problems with mathematics, and learn techniques for solving them. Topics include personal finance, statistical reasoning, probability, exponential growth, and voting theory.

prereq: CUNY Math Proficiency
3 hours
3 credits

MATH 10400 (STEM) - Mathematics for Elementary Education I

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Fundamental and relevant mathematics as recommended by the NCTM for prospective elementary school teachers, including problem solving, sets, logic, numeration, computation, integers and number theory. Required of students planning to teach in elementary schools. Not open to other students.

prereq: grade of C or better in MATH 10100 or appropriate score on the placement exam
3 hrs
3 cr.

MATH 10500 - Mathematics for Elementary Education II

GER
1/B

Continuation of MATH 10400. Continuation of the content of the mathematics recommended by the NCTM for prospective elementary school teachers, including probability, statistics, plane and transformational geometry, congruence and similarity.

prereq: grade of C or better in MATH 10400
3 hrs
3 cr.

MATH 11000 - Topics in the Mathematical Sciences

GER
1/B

Not open to students who have completed MATH 10500, 16000 or 26000. Intended for liberal arts or social science students. Applications of topics selected from algebra, analysis, computer science, geometry, probability and statistics.

prereq: college-level mathematics or statistics course.
3 hrs
3 cr.

MATH 11100 - Matrices, Vectors and Linear Programming

GER
1/B

Not open to students who have completed MATH 16000 or 26000. Recommended for accounting students; not
recommended for students majoring in mathematics or statistics. Introduction to matrices and vectors, systems of linear equations and linear programming with applications.

prereq: MATH 10100 or appropriate score on placement exam
3 hrs
3 cr.

MATH 12500 (STEM) - Precalculus

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Functions and their graphs: polynomial, rational, exponential, logarithmic and trigonometric functions; conic sections; topics in trigonometry; graphical and analytical solutions to systems of equations and inequalities. Not credited to students who have completed MATH 15000 or its equivalent.
prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
4 hrs
4 cr.

MATH 12600 - Precalculus Technology Laboratory

Students are introduced to MATHEMATICA as a tool for exploring qualitative features of functions and solving pre-calculus problems: simplifying algebraic expressions, solving equations, plotting functions and curves, finding and approximating zeros and solving systems of equations. MATH 12600 cannot be taken for credit after a student has passed MATH 15000. Students who have passed MATH 15000 should register for MATH 15400 to satisfy the symbolic proficiency requirement.
prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: MATH 12500
2 hrs
1 cr.

MATH 15000 (STEM) - Calculus with Analytic Geometry I

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.
prereq: grade of C or better in MATH 12500 or appropriate score on placement exam.
4 hrs
4 cr.

MATH 15100 - Calculus I with Symbolic Computation

Combines MATH 15000 (Calculus I) with MATH 15400. Some previous experience with computers is desirable but not required
prereq: grade of C or better in MATH 12500 or appropriate score on placement exam
6 hrs
5 cr.
MATH 15400 - An Introduction to Symbolic Computation

Laboratory introduction to machine-aided computation with an emphasis on examples related to calculus. Students use a symbolic computation package to investigate and solve problems numerically, analytically and graphically. The same package is used to create reports of their results. Some previous experience with computers is desirable but not required.

**prereq:** MATH 15000

2 hrs

1 hr.

MATH 15500 (STEM) - Calculus with Analytic Geometry II

**Hunter Core**

Math/Quantitative Reasoning

**GER**

1/B

Differentiation and integration of transcendental functions, integration techniques, infinite sequences and series, improper integrals, polar coordinates.

**prereq:** grade of C or better in MATH 15000

4 hrs

4 cr.

MATH 15600 - Introduction to Mathematical Proof Workshop

Techniques of proof will be introduced, among them the direct and indirect methods of proof, epsilon-delta arguments and induction. These will be applied to theorems in number theory, set theory and in differential and integral calculus. In planning their schedules, prospective majors should note that some advanced required courses are offered only once each year and several advanced elective courses are offered only once every other year. A rotation schedule for course offerings is available in the department office and on the departmental web site.

**prereq:** MATH 15000. **Because of the nature of mathematics, the department recommends that students refrain from enrolling in any course that carries prerequisites unless these prerequisites have been completed with a grade of C or better.**

**prereq or coreq:** MATH 15500

2 hrs

1 cr.

MATH 16000 - Matrix Algebra

**GER**

1/B

Systems of linear equations, matrices, determinants, introduction to vector spaces and linear transformations, applications.

**prereq:** MATH 12500 or appropriate score on placement exam

3 hrs

3 cr.

MATH 25000 - Calculus with Analytic Geometry III
Vector geometry, dot and cross products, partial derivatives, matrices, determinants, Jacobians, multiple integration.

prereq: MATH 15500
4 hrs
4 cr.

MATH 25400 - Ordinary Differential Equations

First-order equations, second-order linear equations and linear systems, power series solutions, transform and numerical methods, introduction to qualitative theory.

prereq: MATH 25000
3 hrs
3 cr.

MATH 25500 - Vector Analysis

Line and surface integrals, Green's Theorem, divergence theorem, Stokes' Theorem, generalized coordinates.

prereq: MATH 25000
3 hrs
3 cr.

MATH 26000 - Linear Algebra

Vector spaces, linear transformations, canonical forms, inner product spaces, bilinear forms, applications.

prereq: MATH 15600
prereq or coreq: MATH 25000
4 hrs
4 cr.

MATH 26100 - Mathematics in Human History (W)

A historical treatment of themes in mathematics, probability and statistics, with applications in the arts and sciences. Roots of mathematics in non-Western cultures and contributions of women and minorities are included.

prereq: ENGL 12000, college-level mathematics course beyond MATH 10100
3 hrs
3 cr.
MATH 27500 - Intermediate Symbolic Logic

GER
3/B

Symbolization of statements in sentential and predicate notation, sentential derivations, interpretations, predicate derivations through logic of identity and definite descriptions. Cross-listed as PHIL 27500.

prereq: MATH 15600
3 hrs
3 cr.

MATH 29500 - Intermediate Topics in Mathematics

GER
3/B

May be repeated as topics vary, but not more than twice. Topics to be studied in any given term will be announced prior to registration.

prereq: MATH 15000; additional depend on specific course offered
3 hrs
3 cr.

MATH 30100 - Mathematical Methods for the Physical Sciences

GER
3/B

The solution of linear partial differential equations and boundary value problems. Solution techniques such as separation of variables, Fourier series, Green's functions and Laplace transforms are covered. These are applied to several equations which occur in physical applications such as the heat equation, the Laplace equation and the wave equation. Crosslisted as PHYS 30100.

prereq: MATH 25400
3 hrs
3 cr.

MATH 31100 - Abstract Algebra I

GER
3/B

Introduction to the theory of groups and rings.

prereq: MATH 26000
3 hrs
3 cr.

MATH 31200 - Abstract Algebra II

GER
3/B

Elements of Galois theory, construction with ruler and compass, advanced topics in ring theory and linear algebra.
prereq: MATH 31100
3 hrs
3 cr.

**MATH 31300 - Theory of Numbers**

GER
3/B

Congruences, quadratic residues, elementary Diophantine analysis, continued fractions, sums of squares.
prereq: MATH 26000
3 hrs
3 cr.

**MATH 33100 - Geometries**

GER
3/B

Topics in affine and projective geometry and/or topics in differential geometry.
prereq: MATH 26000
3 hrs
3 cr.

**MATH 34000 - Topology**

GER
3/B

Metric and topological spaces, continuity, homeomorphisms, compactness, connectedness, homotopy, fundamental group.
prereq: MATH 35100
3 hrs
3 cr.

**MATH 35100 - Mathematical Analysis I**

GER
3/B

Rigorous treatment of foundations of calculus, including topology of real line and higher dimensional spaces. Basic results on continuous functions.
prereq: MATH 25000, 26000
3 hrs
3 cr.

**MATH 35200 - Mathematical Analysis II**

GER
3/B
Integration, sequences and series, uniform convergence, differentiation of functions of several variables, inverse and implicit function theorems, formula for change of variables.

**MATH 35300 - Introduction To Complex Variables**

*GER*

3/B

Complex numbers, analytic functions, elementary functions, contour integrals, Cauchy integral theory, series.

*prereq: MATH 15600, 25500*

3 hrs

3 cr.

**MATH 35400 - Dynamical Systems and Chaos**

*GER*

3/B

Linear flows, qualitative theory of low-dimensional nonlinear systems, introduction to chaos in discrete one-dimensional dynamical systems.

*prereq: MATH 25000, 26000*

3 hrs

3 cr.

**MATH 37000 - Mathematical Logic**

*GER*

3/B

A survey of the central results and techniques of metalogic, principally mathematical induction, the soundness and completeness of theorems for first-order logic, the Skolem Theorem and Church's Theorem on undecidability. Cross-listed as PHIL 37500.

*prereq: MATH 26000 or perm instr.*

3 hrs

3 cr.

**MATH 37100 - Fundamental Concepts of Modern Mathematics**

*GER*

3/B

Axiomatic approach to set theory: axiom of choice, Zorn's Lemma, transfinite arithmetic.

*prereq: two of the following: MATH 26000, 31100, 35100, 35200*

3 hrs

3 cr.

**MATH 37600 - Philosophy of Mathematics (W)**
Study of such issues as the nature of demonstration or proof and the nature of mathematical knowledge and mathematical objects such as numbers and sets. Cross-listed as PHIL 37600.

_cross-listed PHIL 37600

_prereq: ENGL 12000; PHIL 10100, MATH 27500

3 hrs
3 cr.

**MATH 38500 - Numerical Methods I**

_accuracy and precision, convergence, iterative and direct methods. Topics selected from: solution of polynomial equations and linear systems of equations, curve fitting and function approximation, interpolation, differentiation and integration, differential equations.

_prereq: MATH 25000 and MATH 26000 or permission of the instructor

3 hrs
3 cr.

**MATH 39100 - Independent Study in Mathematics**

_Open to Jr/Sr only. Independent study and reading under direction of faculty member.

_prereq: perm dept.

1-3 hrs
1-3 cr.

**MATH 39200 - Independent Study in Mathematics**

_Open to Jr/Sr only. Independent study and reading under direction of faculty member.

_prereq: perm dept.

1-3 hrs
1-3 cr.

**MATH 39300 - Independent Study in Mathematics**

_Open to Jr/Sr only. Independent study and reading under direction of faculty member.

_prereq: perm dept.

1-3 hrs
1-3 cr.
MATH 39500 - Advanced Topics in Mathematics

GER  
3/B

Topics to be studied in any given term will be announced prior to registration. May be repeated as topics vary, but not more than twice.  
prereq: MATH 25000, 26000; additional depend on specific course offered  
3 hrs  
3 cr.

MATH 45400 - Calculus on Manifolds

GER  
3/B

Functions on Euclidean space, implicit function theorem, Fubini's Theorem, integration on chains and manifolds. 
prereq: MATH 35200  
3 hrs  
3 cr.

MATH 48500 - Numerical Methods II

GER  
3/B

Advanced topics in numerical solutions to partial differential equations, finite element method, von Neumann stability analysis, finite difference method. Examples from computational fluid dynamics and structural mechanics. 
cross-listed CSCI 48500 and PHYS 48500  
prereq: MATH 38500 or permission of instructor  
3 hrs  
3 cr.

MATH 49000 - Honors Seminar

GER  
3/B

prereq: MATH 31100, 35100, perm dept.  
3 hrs  
3 cr.

Mathematics and Statistics: Statistics

In planning their schedules, prospective majors should note that some advanced required courses are offered only once each year and several advanced elective courses are offered only once every other year. A rotation schedule for course offerings is available in the department office and on the departmental web site. 
Prerequisites: Because of the nature of mathematics, the department recommends that students refrain from enrolling in any course that carries prerequisites unless these prerequisites have been completed with a grade of C or better.
STAT 11000 - Selected Topics in Elementary Probability and Statistics as Applied to Popular Science and Current Events

GER
1/B

Topics to be studied in any given term will be announced prior to registration. This course does not serve as a prerequisite for any other mathematics or statistics course. This course is a topics course that serves as an introduction to selected topics in probability and statistics with applications to the real world.

prereq: CUNY Math Proficiency
3 hrs
3 cr

STAT 11300 - Elementary Probability and Statistics

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing.
Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

prereq: A grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: ENGL 12000
3 hrs
3 cr.

STAT 21200 - Discrete Probability

Hunter Core
Math and Quantitative Reasoning (MQR)
GER
1/B

Combinations, permutations, discrete probability. Characteristics of probability distributions. Model building. Additional topics like sampling, random walks or game theory will be introduced from time to time.

prereq: MATH 12500 or STAT 11300 or appropriate score on placement exam.
3 hrs
3 cr.

STAT 21300 (STEM) - Introduction to Applied Statistics

Hunter Core
Math/Quantitative Reasoning
GER
1/B
Familiarity with the Windows computing environment encouraged. Sampling, estimation, tests of hypotheses, including one-and two-sample tests, two- and three-way tables for nominal and ordinal data, linear regression, analysis of variance through two-way with interaction, appropriate statistical software.

prereq: MATH 12500 or appropriate score on placement exam.
3 hrs
3 cr.

STAT 21400 - Data Analysis Using Statistical Software

GER
3/B

Familiarity with the Windows computing environment encouraged. Analysis of variance, simple and multiple regression, nonparametric statistics, statistical model building

prereq: STAT 21300 or MATH 12500 and STAT 11300 with grade of C or better in each course.
3 hrs
3 cr.

STAT 22000 - Statistical Analysis in Forensics

GER
3/B

A second course in probability and statistics and the evaluation of evidence in the forensic sciences.

prereq: STAT 21200 and either STAT 21300 or 11300 by permission of instructor. One of the above, i.e., STAT 21200 or STAT 21300 or STAT 11300 by permission of instructor may be taken as a coreq.
3 hrs
3 cr.

STAT 29500 - Intermediate Topics in Statistics

GER
3/B

Topics to be studied in any given term will be announced prior to registration. May be repeated as topics vary, but not more than twice.

prereq: STAT 21300 or STAT 11300 and MATH 12500; additional prereqs. depend on specific course offered.
3 hrs
3 cr.

STAT 31100 - Probability Theory

GER
3/B

Combinatorics, distribution theory for discrete and continuous random variables, central limit theorems.

prereq: MATH 25000.
3 hrs
3 cr.
STAT 31200 - Stochastic Processes

GER
3/B

Discrete and continuous stochastic processes including Markov chains, birth processes, queues and Brownian motion.  
*prereq: STAT 31100  
3 hrs  
3 cr.

STAT 31300 - Introduction to Mathematical Statistics

GER
3/B

Estimation, hypothesis testing, confidence limits for normal, binomial, Poisson and exponential random variables.  
*prereq: STAT 31100  
3 hrs  
3 cr.

STAT 31900 - Bayesian Statistical Inference in the Sciences

GER
3/B

*prereq: MATH 15500; at least one of STAT 21200, STAT 21300 or STAT 21400 (or permission of instructor).  
Prerequisites waived for students who have passed STAT 311.  
Familiarity with matrix algebra (at the level of MATH 160) and with the Windows computing environment are encouraged.  
3 hrs  
3 cr

STAT 35100 - Advanced Biometrics

GER
3/B

A second course in statistics covering quantitative methods applicable in the life sciences. Topics include experimental design, life table analysis, ethical issues, survival analysis, logistic regression and Cox regression. Linear algebra recommended but not required. 
*prereq: math at level of MATH 12500, STAT 11300, 21300 or equiv. intro. statistics course  
3 hrs  
3 cr.

STAT 39100 - Independent Study
GER
3/B

Open to Jr/Sr majors only. Independent study in which a topic of interest is selected by the student. The study is carried out under the direction of a faculty member.

prereq: perm. dept.
1 hr.
1 cr.

STAT 39200 - Independent Study

GER
3/B

Open to Jr/Sr majors only. Independent study in which a topic of interest is selected by the student. The study is carried out under the direction of a faculty member.

prereq: perm. dept.
2 hrs.
2 cr.

STAT 39300 - Independent Study

GER
3/B

Open to Jr/Sr Majors only. Independent study in which a topic of interest is selected by the student. The study is carried out under the direction of a faculty member.

prereq: perm. dept.
3 hrs.
3 cr.

STAT 39500 - Advanced Topics in Statistics

GER
3/B

Topics to be studied in any given term will be announced prior to registration. May be repeated as topics vary, but not more than twice.

prereq: STAT 31100; STAT 31200 or 31300; additional prereqs. depend on specific course offered
3 hrs
3 cr.

STAT 48600 - Modeling and Visualization

GER
3/B

The development of continuous mathematical models, the resolution of the resulting differential equations by numerical techniques and the visualization of the simulated data. Problems come from various areas of the social, biological and physical sciences. Project required. Course may be used to qualify for departmental honors.

Curricula for the Bachelor of Science Degree

The Medical Laboratory Sciences (MLS) Program offers two majors: (1) Medical Laboratory Sciences: Clinical Science BS and 2) Medical Laboratory Sciences: Biomedical Science BS. The Clinical Science major is intended for students pursuing careers in the diagnostic laboratory and meets the requirements for NY State licensure of clinical laboratory technologists. The Biomedical Science major is appropriate for students seeking other careers or graduate education in the biomedical field.

Professional Outcomes

Entry-Level Positions Students completing the MLS degree are prepared for positions in a variety of settings. These include clinical (medical) technologists in diagnostic laboratories in hospitals and commercial environments, research assistants in medical center and university labs, pharmaceutical and biotechnology companies and public health laboratories. Personnel shortages are severe in several of these areas, and opportunities are predicted to grow. The Monthly Labor Review projects a growth rate of 23% for clinical laboratory positions through 2014.

The passage of the Clinical Laboratory Technology Practice Act in 2005 created a transparent professional pathway defining the education, experience and examination to qualify as a clinical technologist in New York State. http://www.op.nysed.gov/prof/clt/clplaw.htm. The course of study in the Medical Laboratory Sciences: Clinical Science major fulfills the educational and practice components for licensure. It is expected that status as licensed professionals will help to alleviate shortages in the field.

Further Education

MLS students are encouraged to plan for postbaccalaureate education, and guided to complete prerequisites. MLS alumni have been successful in medical and dental school, graduate programs in biomedical science (master's and PhD), management and clinical specialties (PA, forensic science, etc.) and advanced laboratory diagnostics such as cytotechnology.

Opportunities for Pre-Professional Experience

Professional Practice Qualified students planning for careers in the diagnostic lab enroll in MLS 410 to fulfill the practical experience requirement of the clinical technologist license. Students are assigned to hospital, reference or public health labs for summer or semester-long internship experience in an area consistent with their interests.

Biotechnology BS/MA

Qualified seniors may apply to the BS/MA collaboration Medical Laboratory Sciences with Specialization in Biotechnology - Accelerated BS/MA between MLS and the department of Biological Sciences. An intensive techniques workshop (BIOL 41000) is taken prior to graduation and upon successful completion, students may
continue with professional internship and the MA program, allowing MLS graduates to complete the degree at an accelerated pace.

**Student Research**

Qualified students are encouraged to participate in faculty research projects in such areas as cancer vaccine development, bacterial pathogenesis, gastric secretion and central nervous system myelination through independent study and honors courses. Several honors and awards are available to recognize excellent projects.

**Academic Advising**

MLS majors meet each semester with a faculty adviser to review progress and plan the next semester's program. The adviser helps students pace their studies appropriately. Counseling for graduate school, employment and reference support is ongoing for our alumni, and a strong professional network exists among MLS alumni.

**Admission Requirements**

The requirements for consideration for admission to Medical Laboratory Sciences - BS programs are as follows:

Completion of 60 credits before enrolling in MLS, including:
- 1 year general chemistry with lab (CHEM 10200 (STEM), CHEM 10400 (STEM), CHEM 10600 (STEM), or equiv)
- 1 year general biology with lab (BIOL 10000 (STEM), BIOL 10200 (STEM), or equiv)
- and overall GPA of at least 2.5. Students enter the Medical Laboratory Sciences Program in fall and spring semesters. Advisers welcome e-mail inquiries anytime. To apply both current Hunter College students and transfer students must complete a Transfer Application with the CUNY University Application Processing Center. Visit http://www.hunter.cuny.edu/prospectivestudents/ug_students/transfer.shtml and select On-Line Application from the choices. Be sure to select "Medical Laboratory Sciences" at Hunter College as the choice of curriculum. Use CUNY curriculum code 0344 when applying. Admissions take place on a rolling basis so students should apply as early as possible. Admission deadlines for fall and spring semesters are February 1 and September 15, respectively. Students are encouraged to complete most of their General Education Requirement (GER) before entering the program, but liberal arts classes can be interspersed with major courses.

*Meeting the minimum requirements does not guarantee acceptance into the program, which is based, by necessity, on the limitations of space and resources. The Hunter College Medical Lab Sciences Program is dedicated to equal opportunity for all applicants who meet admission requirements.*

**Course of Study** Candidates for the BS degree complete a total of 120 credits including the Hunter Core Requirement. See requirements for the two undergraduate majors offered in MLS (1) Medical Laboratory Sciences: Clinical Science BS and 2) Medical Laboratory Sciences: Biomedical Science BS.

**Scholastic Requirements** Student grades are reviewed each semester to determine eligibility for remaining in the program. Each student must maintain an overall GPA of 2.5 for each semester and a grade of C or better in each major course. Major courses must be taken for letter grades except, at the discretion of the chair, for clinic, field or independent study. Departmental permission is required in order to register for courses. Faculty advisers authorize course permissions during the pre-registration and registration periods.

**Medical Laboratory Sciences: Biomedical Science BS**

Go to Medical Laboratory Sciences - BS

The Medical Laboratory Sciences (MLS): Biomedical Science major prepares students for careers in biomedical laboratories and other health-related professions. The MLS curriculum builds upon the basic science courses required to enter the program. Courses in the major fall into the following categories:
1. fundamental lab skills

2. clinical subspecialties

3. advanced biomedical courses

Emphasis is placed on problem solving and development of laboratory strategies, in addition to theoretical knowledge and practical skills in each of the disciplines in the curriculum. The Biomedical Science major is appropriate for students seeking graduate education in biomedical or health-related fields. This major does not meet the requirements for NY State licensure of clinical laboratory technologists. For the licensure-qualifying program, please see the Medical Laboratory Sciences: Clinical Science BS major.

The academic demands of MLS courses often require students to carry lighter credit loads than they are accustomed to. Part-time attendance and some evening classes are mechanisms for assisting students to complete the challenging curriculum. See course descriptions and the MLS Web site for more detail.

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

**STAT 11300 - Elementary Probability and Statistics**

**Hunter Core**
Math/Quantitative Reasoning

**GER**
1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

*prereq: A grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: ENGL 12000
3 hrs
3 cr.*

-or-

**MATH 15000 (STEM) - Calculus with Analytic Geometry I**

**Hunter Core**
Math/Quantitative Reasoning

**GER**
1/B

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.

*prereq: grade of C or better in MATH 12500 or appropriate score on placement exam.
4 hrs
4 cr.*
BIOL 10000 (STEM) - Principles of Biology I

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
PD/C or D

GER
2/E

The chemical basis of life; basic structure and function of pro- and eucaryotic cells; bioenergetics; Mendelian and molecular genetics; development and mechanisms of control of gene expression at all levels; population genetics and evolution.

Material Fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.

prereq: MATH 12500, CHEM 10200

7 hrs (3 lec, 3 lab, 1 disc)

4.5 cr.

spring only

BIOL 10200 (STEM) - Principles of Biology II

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)

Pluralism and Diversity
PD/C or D

GER
2/E

Taxonomy; homeostasis; internal transport and gas exchange in plants and animals; plant hormones; osmoregulation; mechanisms of action in the muscular, nervous and neuroendocrine systems; the senses, behavior; ecology.

Material fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.

prereq: BIOL 10000 or perm instr, MATH 10100 or equiv.

7 hrs (3 lec, 3 lab, 1 disc)

4.5 cr.

fall only

MATH 12500 (STEM) - Precalculus

Hunter Core
Math/Quantitative Reasoning

GER
1/B

Functions and their graphs: polynomial, rational, exponential, logarithmic and trigonometric functions; conic sections; topics in trigonometry; graphical and analytical solutions to systems of equations and inequalities. Not credited to students who have completed MATH 15000 or its equivalent.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam

4 hrs

4 cr.

MATH 12600 - Precalculus Technology Laboratory
Students are introduced to MATHEMATICA as a tool for exploring qualitative features of functions and solving pre-calculus problems: simplifying algebraic expressions, solving equations, plotting functions and curves, finding and approximating zeros and solving systems of equations. MATH 12600 cannot be taken for credit after a student has passed MATH 15000. Students who have passed MATH 15000 should register for MATH 15400 to satisfy the symbolic proficiency requirement.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: MATH 12500
2 hrs
1 cr.

* these courses are prereqs to CHEM 10200 (STEM).

Hunter Core Requirement

Several courses leading to (Foundational - see above) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

Major in Medical Laboratory Sciences: Biomedical Science (120 cr.)

Allied Courses (22 cr.)

CHEM 10200 (STEM) - General Chemistry I

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
2/E

In-depth introduction to stoichiometric calculations, atomic and molecular structure and chemical bonding. Primarily for pre-med, medical laboratory sciences and science majors.

prereq or coreq: MATH 12500, 12600 or equiv.
5 hrs (4 lec, 1 rec)
4 cr.

CHEM 10400 (STEM) - General Chemistry II

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
GER
2/E

In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.

Primarily for premed, medical laboratory sciences and science majors.

prereq: CHEM 10200 with grade of C or better or CHEM 10000 with perm chair
5 hrs (4 lec, 1 rec)
4 cr.
CHEM 10600 (STEM) - General Chemistry Laboratory

**Hunter Core**
Life and Physical Sciences (LPS); Scientific World (SW)

**Pluralism and Diversity**
GER 2/E

Experiments designed to illustrate the fundamental laws of chemistry. The course is equivalent one year of general chemistry laboratory.

Credit not given for CHEM 10600 and CHEM 10300 or CHEM 10500. Primarily for pre-med, medical laboratory sciences and science majors.

*prereq: CHEM 10200
*coreq: CHEM 10400

6 hrs
3 cr.

CHEM 22200 - Organic Chemistry Lecture I

**GER**
GER 3/B

Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

*prereq: CHEM 10400 with a grade of C or better
5-6 hrs (4 lec, 1-2 recitation/workshop)
4 cr.

CHEM 22300 - Organic Chemistry Laboratory I

**GER**
GER 3/B

Various organic syntheses, Distillation, extraction, chromatography, qualitative analysis, spectroscopy.

*prereq: CHEM 10500 or CHEM 10600
*prereq or coreq: CHEM 22200

4 hrs
2.5 cr.

PHYS 11000 (STEM) - General Physics: Introductory Course in Mechanics, Heat, and Sound

**Hunter Core**
Life and Physical Sciences (LPS); Scientific World (SW)

**GER**
GER 2/E

First semester of two-semester introductory physics course using algebra.

*prereq: MATH 12500; pre-calculus or equiv. By math dept. exam.
7 hrs (3 lec, 3 lab, 1 rec)
4.5 cr.
Med Lab Sciences: Biomedical Science Curriculum (42 cr.)

**MLS 30000 - Fundamental Concepts and Techniques in the Medical Laboratory**

Function of the medical laboratory, data analysis and operation of basic laboratory equipment. Approximately 1-2 informal laboratory hours are required to practice the use of equipment. MLS 60000 is the graduate component of this course

*prereq: BIOL 10000, 10200, CHEM 10200, 10300, 10400, 10500 or equiv.*

3 hrs (2 lec, 1 lab)

3 cr.

**MLS 31200 - Human Physiology: Integration and Control**

Study of function at the cellular and systemic level, with emphasis on the integrated organism and associated control systems. Electronic resources are used extensively in this course.

*prereq: BIOL 10000 and 10200, CHEM 10400, 10500 or equiv.*

3 hrs

3 cr.

**MLS 34700 - Human Histology**

Structure and function of normal human tissues and cells, including systematic study of microscopic morphology.

*coreq: MLS 31200*

5 hrs (2 lec, 3 lab)

3 cr.

**MLS 34900 - Hematology**

Study of normal and pathological conditions of blood. Use of current diagnostic techniques to analyze peripheral blood and bone marrow, differential counting and blood banking.

*prereq or coreq: MLS 30000*

5 hrs (2 lec, 3 lab)

3 cr.

**MLS 35100 - Clinical Miobiology I**

Properties and mechanisms of pathogenesis of microorganisms associated with disease and the antimicrobial agents used to control them.

*prereq or coreq: MLS 30000*

5 hrs (2 lec, 3 lab)

3 cr.

**MLS 35200 - Clinical Miobiology II**

Continuation of MLS 35100 with particular emphasis on anaerobic bacteria, fungi, and viruses. Diagnostic strategies using classical, serological and molecular techniques.

*prereq: MLS 30000, 35100 or equiv.*

5 hrs (2 lec, 3 lab)

4 cr.
MLS 35400 - Clinical Biochemistry I: Biomolecules & Metabolism

Basic macromolecules of life, including amino acids, lipids, nucleic acids, and carbohydrates; membrane biochemistry and signal transduction; cellular metabolism and bioenergetics; clinical and biochemical laboratory methods.
*prereq: CHEM 22200*
5 hrs (2 lec, 3 lab)
3.5 cr.

MLS 35500 - Clinical Biochemistry II: Genes to Proteins

Structure and function of nucleic acids and proteins and the genetic basis of human disease. Laboratory methodologies include analysis of proteins, including enzymes in clinical samples, and manipulation of microbial nucleic acids.
*prereq: MLS 35400*
5 hrs (2 lec, 3 lab)
3.5 cr.

MLS 36100 - Computers and Data Processing in the Medical Laboratory

Study of computer integration in the medical and research lab, data compilation and medical information systems. Approximately 3 additional informal lab hours are required weekly.
*prereq: MATH 15000 or STAT 11300*
3 hrs (1 lec, 2 lab)
3 cr.

MLS 45000 - Cell and Tissue Culture

Cell and tissue culture theory and techniques, including starting primary cultures, passing and preservation of cells, cell cycle and growth factor assays and monoclonal antibody techniques. Several informal hours are required each week in the lab in addition to the scheduled class.
*prereq: MLS 35100*
*coreq: MLS 34700, 35200*
5 hrs (2 lec, 3 lab)
4 cr.

MLS 45700 - Senior Seminar

Oral presentations and written exercises (including research proposal) introduce students to the use and proper citation of the biomedical literature, research design, effective scientific communication and regulatory oversight of science.
*prereq: perm instr.*
2 hrs
3 cr.

MLS 46000 - Immunology

Cellular reactions in immunology, structure of antibodies and antigens, and laboratory determination of immune functions.
*prereq: MLS 34900, 35100*
*coreq: MLS 35200, 35400*
5 hrs (2 lec, 3 lab)
3 cr.
COMHE 33000 - Principles of Epidemiology

Methods of study of disease; risk factors; distribution, causes, prevention, and control of selected diseases.

prereq: Acceptance to the major, or permission of the instructor.
3 hrs
3 cr.

-or-

PHILO 25400 - Ethical Issues in Biology and Medical Care (W)

GER
3/B

Treats issues such as abortion, euthanasia, extraordinary means, confidentiality, human experimentation, genetic control and allocation of limited life-saving therapy.

prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

-or-

SOC 30100 - Medical Sociology

GER
3/B

Social and cultural factors related to health. Organization of health care services, social structure of the hospital.

prereq: SOC 10100
3 hrs
3 cr.

-or-

MLS 40000 - Topics in Biomedical Sciences

Topics vary from semester to semester and are announced before registration.
1-3 hrs
1-3 cr.

Recommended Electives (7-8 cr.)

MLS 40000 - Topics in Biomedical Sciences

Topics vary from semester to semester and are announced before registration.
1-3 hrs
1-3 cr.

MLS 48001-48003 - Independent Study

prereq or coreq: permission of program director
1-3
**MLS 49000 - Honors**

*prereq: perm director*

*hrs TBA*

*3 cr.*

**BIOL 41000 - Workshop in Biotechnology**

**GER**

*3/B*

A series of laboratory-intensive experimental projects, each lasting one week or more, which introduce current research techniques and include individual participation in planning and preparation of experiments. The focus is on a broad biotechnology topic such as the isolation, cloning and expression of a gene, utilizing the techniques of molecular genetics.

This course satisfies the research requirement for graduation with departmental honors and is a component of the interdisciplinary BS/MA (MLS/Biol) program in biotechnology.

*prereq: BIOL 20000, 20200, perm instr.*

*30 hrs/week for 4 weeks*

*4 cr.*

*winter/summer*

**CHEM 22400 - Organic Chemistry Lecture II**

**GER**

**GER 3/B**

Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

*prereq: CHEM 22200 with a grade of C or better*

*5-6 hrs (4 lec, 1-2 recitation/workshop)*

*4 cr.*

**CHEM 22500 - Organic Chemistry Laboratory II**

**GER**

**GER 3/B**

Continuation of CHEM 22300.

*prereq: CHEM 22300*

*prereq or coreq: CHEM 22400*

*4 hrs*

*2.5 cr*

**MATH 15500 (STEM) - Calculus with Analytic Geometry II**

**Hunter Core**

Math/Quantitative Reasoning

**GER**

*1/B*
Differentiation and integration of transcendental functions, integration techniques, infinite sequences and series, improper integrals, polar coordinates.

**prereq:** grade of C or better in MATH 15000

4 hrs

4 cr.

**STAT 11300 - Elementary Probability and Statistics**

**Hunter Core**

Math/Quantitative Reasoning

**GER**

1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

**prereq:** A grade of C or better in MATH 10100 or appropriate score on placement exam

**prereq or coreq:** ENGL 12000

3 hrs

3 cr.

**Medical Laboratory Sciences: Clinical Science BS**

Go to Medical Laboratory Sciences - BS

Medical Laboratory Sciences (MLS): Clinical Science is a pre-professional major, preparing students for careers in laboratories devoted to promoting, maintaining and restoring human health. The MLS curriculum builds upon the basic science courses required to enter the program. Courses in the major fall into

the following categories:

1. fundamental lab skills
2. clinical subspecialties
3. advanced biomedical courses
4. pre-professional practice

Emphasis is placed on problem solving and development of laboratory strategies, in addition to theoretical knowledge and practical skills in each of the disciplines in the curriculum. The Clinical Science major is intended for, but not limited to, students pursuing careers in the diagnostic laboratory and is designed to meet the requirements for NY State licensure of clinical laboratory technologists.

The academic demands of MLS courses often require students to carry lighter credit loads than they are accustomed to. Part-time attendance and some evening classes are mechanisms for assisting students to complete the challenging curriculum. See course descriptions and the MLS Web site: http://www.hunter.cuny.edu/mls for more detail.
Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

STAT 11300 - Elementary Probability and Statistics

**Hunter Core**  
Math/Quantitative Reasoning  
GER  
1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

**prereq:** A grade of C or better in MATH 10100 or appropriate score on placement exam  
**prereq or coreq:** ENGL 12000  
3 hrs  
3 cr.

BIOL 10000 (STEM) - Principles of Biology I

**Hunter Core**  
Life and Physical Sciences (LPS); Scientific World (SW)  
**Pluralism and Diversity**  
PD/C or D  
**GER**  
2/E

The chemical basis of life; basic structure and function of pro- and eucaryotic cells; bioenergetics; Mendelian and molecular genetics; development and mechanisms of control of gene expression at all levels; population genetics and evolution.  
Material Fee: $5  
PD credit awarded only upon completion of BIOL 10000 and 10200.  
**prereq:** MATH 12500, CHEM 10200  
7 hrs (3 lec, 3 lab, 1 disc)  
4.5 cr.  
**spring only**

BIOL 10200 (STEM) - Principles of Biology II

**Hunter Core**  
Scientific World (SW); Life and Physical Sciences (LPS)  
**Pluralism and Diversity**  
PD/C or D  
**GER**  
2/E
Taxonomy; homeostasis; internal transport and gas exchange in plants and animals; plant hormones; osmoregulation; mechanisms of action in the muscular, nervous and neuroendocrine systems; the senses, behavior; ecology.

Material fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.

prereq: BIOL 10000 or perm instr, MATH 10100 or equiv.
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
fell only

MATH 12500 (STEM) - Precalculus

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Functions and their graphs: polynomial, rational, exponential, logarithmic and trigonometric functions; conic sections; topics in trigonometry; graphical and analytical solutions to systems of equations and inequalities. Not credited to students who have completed MATH 15000 or its equivalent.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
4 hrs
4 cr.

MATH 12600 - Precalculus Technology Laboratory

Students are introduced to MATHEMATICA as a tool for exploring qualitative features of functions and solving precalculus problems: simplifying algebraic expressions, solving equations, plotting functions and curves, finding and approximating zeros and solving systems of equations. MATH 12600 cannot be taken for credit after a student has passed MATH 15000. Students who have passed MATH 15000 should register for MATH 15400 to satisfy the symbolic proficiency requirement.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: MATH 12500
2 hrs
1 cr.

* these courses are prereqs to CHEM 10200 (STEM)

Hunter Core Requirement

Several courses leading to (Foundational - see above) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

Major in Medical Laboratory Sciences: Clinical Science

Allied Courses (22 cr.)

CHEM 10200 (STEM) - General Chemistry I
Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)

GER
2/E

In-depth introduction to stoichiometric calculations, atomic and molecular structure and chemical bonding. Primarily for pre-med, medical laboratory sciences and science majors.

prereq or coreq: MATH 12500, 12600 or equiv.
5 hrs (4 lec, 1 rec)
4 cr.

**CHEM 10400 (STEM) - General Chemistry II**

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)

GER
2/E

In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.

Primarily for premed, medical laboratory sciences and science majors.

prereq: CHEM 10200 with grade of C or better or CHEM 10000 with perm chair
5 hrs (4 lec, 1 rec)
4 cr.

**CHEM 10600 (STEM) - General Chemistry Laboratory**

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
GER 2/E

Experiments designed to illustrate the fundamental laws of chemistry. The course is equivalent one year of general chemistry laboratory.

Credit not given for CHEM 10600 and CHEM 10300 or CHEM 1050. Primarily for pre-med, medical laboratory sciences and science majors.

prereq: CHEM 10200

coreq: CHEM 10400
6 hrs
3 cr.

**CHEM 22200 - Organic Chemistry Lecture I**

GER
GER 3/B

Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

prereq: CHEM 10400 with a grade of C or better
5-6 hrs (4 lec, 1-2 recitation/workshop)
4 cr.

**CHEM 22300 - Organic Chemistry Laboratory I**
Various organic syntheses, Distillation, extraction, chromatography, qualitative analysis, spectroscopy.

prereq: CHEM 10500 or CHEM 10600
prereq or coreq: CHEM 22200
4 hrs
2.5 cr.

PHYS 11000 (STEM) - General Physics: Introductory Course in Mechanics, Heat, and Sound

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
GER
2/E

First semester of two-semester introductory physics course using algebra.
prereq: MATH 12500; pre-calculus or equiv. By math dept. exam.
7 hrs (3 lec, 3 lab, 1 rec)
4.5 cr.

Med Lab Sciences: Clinical Science Curriculum (46-48 cr.)

MLS 30000 - Fundamental Concepts and Techniques in the Medical Laboratory

Function of the medical laboratory, data analysis and operation of basic laboratory equipment. Approximately 1-2 informal laboratory hours are required to practice the use of equipment.
MLS 60000 is the graduate component of this course
prereq: BIOL 10000, 10200, CHEM 10200, 10300, 10400, 10500 or equiv.
3 hrs (2 lec, 1 lab)
3 cr.

MLS 31200 - Human Physiology: Integration and Control

Study of function at the cellular and systemic level, with emphasis on the integrated organism and associated control systems. Electronic resources are used extensively in this course.
prereq: BIOL 10000 and 10200, CHEM 10400, 10500 or equiv.
3 hrs
3 cr.

MLS 34700 - Human Histology

Structure and function of normal human tissues and cells, including systematic study of microscopic morphology.
coreq: MLS 31200
5 hrs (2 lec, 3 lab)
3 cr.

MLS 34900 - Hematology
Study of normal and pathological conditions of blood. Use of current diagnostic techniques to analyze peripheral blood and bone marrow, differential counting and blood banking.

*prereq or coreq: MLS 30000
5 hrs (2 lec, 3 lab)
3 cr.*

**MLS 35100 - Clinical Microbiology I**

Properties and mechanisms of pathogenesis of microorganisms associated with disease and the antimicrobial agents used to control them.

*prereq or coreq: MLS 30000
5 hrs (2 lec, 3 lab)
3 cr.*

**MLS 35200 - Clinical Microbiology II**

Continuation of MLS 35100 with particular emphasis on anaerobic bacteria, fungi, and viruses. Diagnostic strategies using classical, serological and molecular techniques.

*prereq: MLS 30000, 35100 or equiv.
5 hrs (2 lec, 3 lab)
4 cr.*

**MLS 35400 - Clinical Biochemistry I: Biomolecules & Metabolism**

Basic macromolecules of life, including amino acids, lipids, nucleic acids, and carbohydrates; membrane biochemistry and signal transduction; cellular metabolism and bioenergetics; clinical and biochemical laboratory methods.

*prereq: CHEM 22200
5 hrs (2 lec, 3 lab)
3.5 cr.*

**MLS 35500 - Clinical Biochemistry II: Genes to Proteins**

Structure and function of nucleic acids and proteins and the genetic basis of human disease. Laboratory methodologies include analysis of proteins, including enzymes in clinical samples, and manipulation of microbial nucleic acids.

*prereq: MLS 35400
5 hrs (2 lec, 3 lab)
3.5 cr.*

**MLS 36100 - Computers and Data Processing in the Medical Laboratory**

Study of computer integration in the medical and research lab, data compilation and medical information systems. Approximately 3 additional informal lab hours are required weekly.

*prereq: MATH 15000 or STAT 11300
3 hrs (1 lec, 2 lab)
3 cr.*

**MLS 41000 - Professional Practice**

Directed full-time experience in clinical, research, public health or other biomedical laboratories. Arranged on an individual basis.
prereq: perm director 8 wks
3 cr.

**MLS 43000 - Immunohematology**

Study of the immunologic properties of blood associated with blood group systems, donor screening, transfusion reactions and hemolytic disease and laboratory techniques used to characterize antigen-antibody reactions.

*prereq: MLS 34900
3 hrs (2 lec, 1 lab)
3 cr.*

**MLS 45000 - Cell and Tissue Culture**

Cell and tissue culture theory and techniques, including starting primary cultures, passing and preservation of cells, cell cycle and growth factor assays and monoclonal antibody techniques. Several informal hours are required each week in the lab in addition to the scheduled class.

*prereq: MLS 35100
coreq: MLS 34700, 35200
5 hrs (2 lec, 3 lab)
4 cr.*

**MLS 45700 - Senior Seminar**

Oral presentations and written exercises (including research proposal) introduce students to the use and proper citation of the biomedical literature, research design, effective scientific communication and regulatory oversight of science.

*prereq: perm instr.
2 hrs
3 cr.*

**MLS 46000 - Immunology**

Cellular reactions in immunology, structure of antibodies and antigens, and laboratory determination of immune functions.

*prereq: MLS 34900, 35100
coreq: MLS 35200, 35400
5 hrs (2 lec, 3 lab)
3 cr.*

**COMHE 33000 - Principles of Epidemiology**

Methods of study of disease; risk factors; distribution, causes, prevention, and control of selected diseases.

*prereq: Acceptance to the major, or permission of the instructor.
3 hrs
3 cr.*

-or-

**PHILO 25400 - Ethical Issues in Biology and Medical Care (W)**

*GER
3/B*
Treats issues such as abortion, euthanasia, extraordinary means, confidentiality, human experimentation, genetic control and allocation of limited life-saving therapy.

**prereq:** ENGL 12000 and one previous course in philosophy.

3 hrs
3 cr.

-or-

**SOC 30100 - Medical Sociology**

**GER**
3/B

Social and cultural factors related to health. Organization of health care services, social structure of the hospital.

**prereq:** SOC 10100

3 hrs
3 cr.

-or-

**MLS 40000 - Topics in Biomedical Sciences**

Topics vary from semester to semester and are announced before registration.

1-3 hrs
1-3 cr.

**Recommended Electives (2 cr.)**

**MLS 40000 - Topics in Biomedical Sciences**

Topics vary from semester to semester and are announced before registration.

1-3 hrs
1-3 cr.

**MLS 48001-48003 - Independent Study**

**prereq or coreq:** permission of program director

1-3

**MLS 49000 - Honors**

**prereq:** perm director

hrs TBA
3 cr.

**BIOL 41000 - Workshop in Biotechnology**

**GER**
3/B

A series of laboratory-intensive experimental projects, each lasting one week or more, which introduce current research
techniques and include individual participation in planning and preparation of experiments. The focus is on a broad biotechnology topic such as the isolation, cloning and expression of a gene, utilizing the techniques of molecular genetics.
This course satisfies the research requirement for graduation with departmental honors and is a component of the interdisciplinary BS/MA (MLS/Biol) program in biotechnology.

**prereq:** BIOL 20000, 20200, perm instr.

30 hrs/week for 4 weeks
4 cr.

winter/summer

**CHEM 22400 - Organic Chemistry Lecture II**

**GER**

GER 3/B

Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

**prereq:** CHEM 22200 with a grade of C or better

5-6 hrs (4 lec, 1-2 recitation/workshop)
4 cr.

**CHEM 22500 - Organic Chemistry Laboratory II**

**GER**

GER 3/B

Continuation of CHEM 22300.

**prereq:** CHEM 22300

**prereq or coreq:** CHEM 22400

4 hrs
2.5 cr

**Medical Laboratory Science**

**MLS 30000 - Fundamental Concepts and Techniques in the Medical Laboratory**

Function of the medical laboratory, data analysis and operation of basic laboratory equipment. Approximately 1-2 informal laboratory hours are required to practice the use of equipment.
MLS 60000 is the graduate component of this course

**prereq:** BIOL 10000, 10200, CHEM 10200, 10300, 10400, 10500 or equiv.

3 hrs (2 lec, 1 lab)
3 cr.

**MLS 31200 - Human Physiology: Integration and Control**

Study of function at the cellular and systemic level, with emphasis on the integrated organism and associated control systems. Electronic resources are used extensively in this course.

**prereq:** BIOL 10000 and 10200, CHEM 10400, 10500 or equiv.

3 hrs
3 cr.
MLS 34700 - Human Histology

Structure and function of normal human tissues and cells, including systematic study of microscopic morphology.

*coreq: MLS 31200
5 hrs (2 lec, 3 lab)
3 cr.

MLS 34900 - Hematology

Study of normal and pathological conditions of blood. Use of current diagnostic techniques to analyze peripheral blood and bone marrow, differential counting and blood banking.

*prereq or coreq: MLS 30000
5 hrs (2 lec, 3 lab)
3 cr.

MLS 35100 - Clinical Miobiology I

Properties and mechanisms of pathogenesis of microorganisms associated with disease and the antimicrobial agents used to control them.

*prereq or coreq: MLS 30000
5 hrs (2 lec, 3 lab)
3 cr.

MLS 35200 - Clinical Miobiology II

Continuation of MLS 35100 with particular emphasis on anaerobic bacteria, fungi, and viruses. Diagnostic strategies using classical, serological and molecular techniques.

*prereq: MLS 30000, 35100 or equiv.
5 hrs (2 lec, 3 lab)
4 cr.

MLS 35400 - Clinical Biochemistry I: Biomolecules & Metabolism

Basic macromolecules of life, including amino acids, lipids, nucleic acids, and carbohydrates; membrane biochemistry and signal transduction; cellular metabolism and bioenergetics; clinical and biochemical laboratory methods.

*prereq: CHEM 22200
5 hrs (2 lec, 3 lab)
3.5 cr.

MLS 35500 - Clinical Biochemistry II: Genes to Proteins

Structure and function of nucleic acids and proteins and the genetic basis of human disease. Laboratory methodologies include analysis of proteins, including enzymes in clinical samples, and manipulation of microbial nucleic acids.

*prereq: MLS 35400
5 hrs (2 lec, 3 lab)
3.5 cr.

MLS 36100 - Computers and Data Processing in the Medical Laboratory
Study of computer integration in the medical and research lab, data compilation and medical information systems. Approximately 3 additional informal lab hours are required weekly.

prereq: MATH 15000 or STAT 11300
3 hrs (1 lec, 2 lab)
3 cr.

**MLS 40000 - Topics in Biomedical Sciences**

Topics vary from semester to semester and are announced before registration.

1-3 hrs
1-3 cr.

**MLS 40066 - Topics: Biohazards and Emergency Response**

This cross-listed undergraduate/masters class covers the biology of microorganisms and toxins most frequently considered in perpetrated attacks. It also considers technology for detection and control for first responders, lab practitioners and other healthcare professionals, emergency communication, and prevention. In addition to classroom activities, students participate in group projects to simulate bioterrorism events and responses; government regulation, chain of evidence, and related topics are covered.

cross-listed EOHS 77025
3 hours
3 credits

**MLS 41000 - Professional Practice**

Directed full-time experience in clinical, research, public health or other biomedical laboratories. Arranged on an individual basis.

prereq: perm director 8 wks
3 cr.

**MLS 43000 - Immunohematology**

Study of the immunologic properties of blood associated with blood group systems, donor screening, transfusion reactions and hemolytic disease and laboratory techniques used to characterize antigen-antibody reactions.

prereq: MLS 34900
3 hrs (2 lec, 1 lab)
3 cr.

**MLS 45000 - Cell and Tissue Culture**

Cell and tissue culture theory and techniques, including starting primary cultures, passing and preservation of cells, cell cycle and growth factor assays and monoclonal antibody techniques. Several informal hours are required each week in the lab in addition to the scheduled class.

prereq: MLS 35100
coreq: MLS 34700, 35200
5 hrs (2 lec, 3 lab)
4 cr.

**MLS 45400 - Parasitology**
Ecology, life cycle, physiology, and identification of intestinal, blood, tissue, and ectoparasites of humans.

**prereq:** MLS 35100

*5 hrs (2 lec, 3 lab)*

*3 cr.*

**MLS 45700 - Senior Seminar**

Oral presentations and written exercises (including research proposal) introduce students to the use and proper citation of the biomedical literature, research design, effective scientific communication and regulatory oversight of science.

**prereq:** perm instr.

*2 hrs*

*3 cr.*

**MLS 45900 - Viral Mechanisms in Human Disease**

Structure and replication of viruses, viruses as models in molecular biology, and the mechanism of interferon action in relation to human disease.

**prereq:** MLS 35100 and 35200 or equiv.

*2 hrs*

*2 cr.*

**MLS 46000 - Immunology**

Cellular reactions in immunology, structure of antibodies and antigens, and laboratory determination of immune functions.

**prereq:** MLS 34900, 35100

**coreq:** MLS 35200, 35400

*5 hrs (2 lec, 3 lab)*

*3 cr.*

**MLS 48001-48003 - Independent Study**

**prereq or coreq:** permission of program director

*1-3*

**MLS 49000 - Honors**

**prereq:** perm director

*hrs TBA*

*3 cr.*

**Programs and Courses in Music**

**Music**

**About the Department**
The Department of Music offers a wide variety of courses and degree programs tailored to the needs of students with different personal and professional objectives. Course offerings include a large selection of topics for both majors and non-majors covering many areas of music performance, theory, history, and literature. The BA degree can be completed evenings or days. In addition, the department sponsors numerous extracurricular events, including concerts, lectures, and master classes.

Private lessons in instruments and voice are provided to all performance majors and many other music majors by a distinguished roster of performance teachers. Financial aid is available to qualified performance majors and other majors who need to study with private teachers not on the staff.

Graduates of the department are active in classical and popular performance fields as singers, instrumentalists, and conductors. Concentration in music theory and composition can lead to career opportunities in orchestrating, choral or commercial arranging, film scoring, and music composing in contemporary and popular idioms. Concentration in music history paves the way for career opportunities in college teaching and musical scholarship, including such work as music journalism and criticism; lecturing; writing program and music-liner notes; editing, translating, and cataloging musical materials; and serving as a consultant to concert societies, opera houses, and publishers. Graduates of the BA/MA Degree in Education program are qualified to teach in the public elementary and high schools of New York State.

**Graduate Study**

Seniors of high academic standing who are recommended by the department may be permitted to take graduate courses for undergraduate credit. Seniors within 9 credits of graduation may apply to the Admissions Office for permission to take graduate courses creditable toward the MA degree.

60-Credit Major

This degree is designed for students planning to pursue careers as professional performers of music or as teachers of music performance. It provides intensive instruction in the student’s instrument or voice; solid training in music history and theory; and a broad, liberal arts education. Admission to this program is conditional on passing an audition (preferably before the student enters college) demonstrating a high level of skill in performance. Requirements are:

Music history:

MUSHL 20100 - Introduction to Music Research

Techniques of research and writing about music. Sources of information (reference books, monographs, periodicals, scores, recordings, Internet resources); types of writing (theoretical, historical, ethnomusicological, critical); writing issues specific to music.

*coreq: MUSHL 20500* or *coreq: ENGL 12000*

1 hr

1 cr.

offered fall

MUSHL 20500 - Music History I

Pluralism and Diversity

PD/D
For music majors. Survey of the history of music in the European tradition to 1600.
prereq: elementary knowledge of music history and literature, demonstrated by dept. exam
coreq: MUSHL 20100

3 hrs
3 cr.
offered fall

MUSHL 20600 - Music History II (W)

Pluralism and Diversity
PD/D
For music majors. Continuation of MUSHL 20500. Survey of the history of music in the European tradition from 1600 to 1800.
prereq: MUSHL 20100, 20500, ENGL 12000
prereq or coreq: MUSTH 22100, 23100

3 hrs
3 cr.
offered spring

MUSHL 30500 - Music History III (W)

Pluralism and Diversity
PD/D
Continuation of MUSHL 20600. Survey of the history of music in the European tradition from 1800 to the present.
prereq: MUSHL 20600, MUSTH 22100, 23100

3 hrs
3 cr.
offered fall

and any other 3-credit MUSHL course at the 300-level

Music theory:

MUSTH 20100 - Introduction to Music Technology

An introduction to basic music technology skills: music notation software, MIDI sequencing, and digital audio editing.
prereq or coreq: prereqs: MUSTH 22000 and 23000, or perm dept.

1 hr
1 cr.
offered spring

MUSTH 22000 - Music Theory I

Review of fundamentals of music theory; introduction to melodic, rhythmic, contrapuntal, harmonic, and formal organization of music.
prereq: ability to read music as demonstrated by dept. exam, perm dept.
coreq: MUSTH 23000

3 hrs
3 cr.
offered fall

MUSTH 22100 - Music Theory II
Continuation of MUSTH 22000.
prereq: MUSTH 22000
coreq: MUSTH 23100
3 hrs
3 cr.
offered spring

MUSTH 23000 - Musicianship I

Sight singing, ear training, and keyboard drill on materials studied in the corequisite course. Individual work in the Computer Assisted Instruction facility.
coreq: MUSTH 22000
3 hrs
2 cr.
offered fall

MUSTH 23100 - Musicianship II

Continuation of MUSTH 23000.
prereq: MUSTH 23000
coreq: MUSTH 22100
3 hrs
2 cr.
offered spring

MUSTH 32000 - Music Theory III

Intermediate-level study of melodic, rhythmic, contrapuntal, harmonic, and formal organization of music.
prereq: MUSTH 20100, MUSTH 22100
coreq: MUSTH 33000
3 hrs
3 cr.
offered fall

MUSTH 33000 - Musicianship III

Sight singing, ear training, and keyboard drill on materials studied in corequisite course. Individual work in the Computer Assisted Instruction facility.
prereq: MUSTH 23100
coreq: MUSTH 32000
3 hrs
2 cr.
offered fall
and any other 3-credit MUSTH course at the 300-level

Private lessons:

MUSPF 43100 - Individual Instruction in Instrument or Voice

Limited to students in the 60-credit BMus program and the BA/MA music program. Intensive study in instrumental or vocal techniques. Jury examination required.
May be taken 8 times.  
**prereq:** perm dept.  
1 hr  
3 cr.

**Performance ensembles:**

**For instrumentalists - 6 credits in instrumental ensembles**

Choose 6 credits from the following:

**MUSPF 23100 - Hunter Symphony**

Rehearsal and performance of orchestral works. May be taken 8 times.  
**prereq:** audition, perm instr.  
3 hrs  
1 cr.

**MUSPF 24900 - Jazz Ensemble**

Open to all instrumentalists by audition. Study and performance of popular forms of music, including dance, jazz, and musical comedy. May be taken 6 times.  
2 hrs  
1 cr.

**MUSPF 35500 - Chamber Music Workshop**

Rehearsal and public performance of instrumental chamber works. May be taken 6 times.  
**prereq:** audition, perm instr.  
2 hrs  
1 cr.

**MUSPF 25000 - Popular Music Combo**

Study and performance within a small ensemble context of the popular music genres, such as Pop, Rock, Hip-Hop, R & B, Country/Bluegrass, and Jazz. May be taken 6 times.  
**prereq or coreq:** prereqs: audition, perm dept.  
2 hrs  
1 cr.

**MUSPF 36500 - Topics in Piano Performance**

Seminar in performance for advanced piano students focusing on a different topic area each semester. The seminar will involve study and performance of representative works of piano repertoire relevant to the semester’s topic area. Each semester will also include individual attention to problems of public performance.  
May be taken 4 times.  
**coreq:** MUSPF 40100 or 43100  
2 hrs  
1 cr.
For singers

6 credits in vocal ensembles

**MUSPF 22100 - College Choir**

Open to all students. Rehearsal and public performance of major choral works. May be taken 8 times.
3 hrs
1 cr.

**MUSPF 25100 - Jazz Vocal Workshop Ensemble**

Jazz performance and improvisation. May be taken 6 times.
prereq: MUSPF 11100 or 21100 or 40100 in Voice, and audition
2 hrs
1 cr.

**MUSPF 35300 - Chamber Singers**

Study and public performance of solo and chamber chorus works from all musical eras. May be taken 6 times.
prereq: audition, perm instr.
2 hrs
1 cr.

**MUSPF 36900 - Topics in Vocal Performance**

Seminar in performance for advanced voice students, focusing on a different topic each semester. The seminar will involve study and performance of representative works of vocal repertoire relevant to the semester’s topic area. Each semester will also include individual attention to problems of public performance.
May be taken 4 times.
prereq: ENGL 12000
coreq: MUSPF 40100 or 43100
2 hrs
1 cr.

for singers, a minimum of 2 credits must be in MUSPF 36900

For pianists

A minimum of 2 credits must be in

**MUSPF 36500 - Topics in Piano Performance**

Seminar in performance for advanced piano students focusing on a different topic area each semester. The seminar will involve study and performance of representative works of piano repertoire relevant to the semester’s topic area. Each semester will also include individual attention to problems of public performance.
May be taken 4 times.
coreq: MUSPF 40100 or 43100
2 hrs
1 cr.
Electives:

- 4 credits in music courses above the 100-level.

Recital:

- A senior recital, for which no credit is given, is also required.

Piano Proficiency Requirement

All music majors must demonstrate elementary proficiency at the piano. Students should plan to fulfill this requirement during their first year of study. A passing grade on the piano proficiency examination is a prerequisite for the third semester of study in music theory (MUSTH 32000). Students entering Hunter with limited keyboard background may take MUSPF 21300-MUSPF 21400 (Piano I and II) for elective credit or private lessons in piano at their own expense. The Music Department office has a list of recommended piano teachers.

Music 25-Credit Major (BA)

This degree is designed for students who want to study music in the context of a general liberal arts education, but who do not plan to pursue careers in music. It may also be convenient for students who enter Hunter with a large number of transfer credits in music. Requirements are:

Foundational Courses

Foundational Courses include courses in English and prerequisites to these courses. These courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

Note: Several courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student's advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement

Music Bachelor's Degrees

Return to: Department of Music

• Music 25-Credit Major (BA)
• Music 42-Credit Major (BA)
• Music - BMus

Major Programs

The Department of Music offers three undergraduate and two BA/MA major programs to fit individual interests and requirements. Students must take three examinations before declaring a music major:

1. **Music notation, rudimentary theory, and basic musicianship skills.** This examination is prerequisite to MUSTH 22000 (Music Theory I).
   
   Students who do not pass it must take MUSTH 10100 (Music Theory Fundamentals) or learn the material on their own, then repeat the examination.

2. **Elementary music history and literature.** This examination is prerequisite to MUSHL 20500 (Music History I). Students who do not pass it must take MUSHL 10100 (Introduction to Music) or learn the material on their own, then repeat the examination.

3. **Performance audition on an instrument or voice.** This examination is prerequisite to MUSPF 40100 (Private Instruction in Instrument or Voice). Students whose performance skills fall below New York State School Music Association (NYSSMA) level 2, equivalent to about one year of study, must take MUSPF 21100-MUSPF 21200 (Voice I-II), MUSPF 21300-MUSPF 21400 (Piano III), or private lessons at their own expense (without credit), then repeat the examination. Students with no experience in performance may defer the audition until the end of their first semester of study.

Prospective majors should consult the Music Department’s undergraduate adviser as soon as possible to discuss these examinations and any prerequisite courses they may need before beginning the major.

Piano Proficiency Requirement

All music majors must demonstrate elementary proficiency at the piano. Students should plan to fulfill this requirement during their first year of study. A passing grade on the piano proficiency examination is a prerequisite for the third semester of study in music theory (MUSTH 32000). Students entering Hunter with limited keyboard background may
take MUSPF 21300-MUSPF 21400 (Piano I and II) for elective credit or private lessons in piano at their own expense. The Music Department office has a list of recommended piano teachers.

Minor in Music

The music minor consists of 15 credits in music:

**MUSTH 10100 - Music Theory Fundamentals**

*Hunter Core*
Creative Expression (CE)

*GER*
2/D

For non-majors. Introduction to music theory, sight singing, and ear training.

3 hrs

3 cr.

**MUSHL 10100 - Introduction to Music**

*Hunter Core*
Creative Expression (CE)

*Pluralism and Diversity*

*PD/D*

*GER*
2/D

For non-majors. Selected compositions primarily from the European tradition studied with aim to develop perceptive listening.

3 hrs

3 cr.

-or-

**MUSHL 10700 - The World of Music**

*Hunter Core*
Creative Expression (CE)

*Pluralism and Diversity*

*PD/A*

*GER*
2/D

For non-majors. Introduction to music from a spectrum of world cultures, including Africa, Asia, and the Caribbean.

3 hrs

3 cr.

- one course with an MUSHL prefix at the 200-level; and 6 credits of music electives, 3 of which must be at the 200-level or higher.

Prospective minors who have already mastered the material taught in the required 100-level courses MUSTH 10100 and/or MUSHL 10100 or MUSHL 10700) may be exempted from these courses by passing the same entrance examination that is required of prospective music majors (see above). Music minors may substitute
more advanced courses in any area of music study, including private lessons (subject to availability) and ensembles, for the courses from which they are exempt. PLEASE NOTE: Music minors who wish to take private lessons for credit (MUSPF 40100) must first pass both the performance audition and music theory portions of the entrance examination.

Grading Policies

Students must have grades of C or better in all prerequisite courses in order to take courses that are required for the major. The grade of CR may not be elected in major courses. In accordance with Hunter College policy, a course may not be taken more than twice without permission of the department.

Honors

To qualify for departmental honors in music, a student must have a 3.5 grade point average in major courses and complete an honors project, taken under the following course number. The project, which must be approved in advance by the Policy Committee, may be a research paper on a historical, theoretical, or other topic; an original composition; or a recital. All projects should demonstrate an advanced level, a broad scope, and a high quality, and must be done under the supervision of a faculty member of the Music Department.

**MUSTH 49100 - Honors Project**

Upper Jr/Sr only. Individual project of large scope in music history, theory, composition, or performance. 

*prereq: minimum music GPA of 3.5, perm undergrad adviser*

1 sem

3 cr.

**MUSTH 49200 - Honors Project**

*prereq: MUSTH 49100*

1 sem

3 cr.

Graduate Study

Seniors of high academic standing who are recommended by the department may be permitted to take graduate courses for undergraduate credit. Seniors within 9 credits of graduation may apply to the Admissions Office for permission to take graduate courses creditable toward the MA degree.

Undergraduate Major/Graduate Major

Music - BA/MA

4-Year Dual BA/MA Degree
The department offers unusually gifted students the opportunity to obtain a master’s degree in four years with a minimum of 120 credits. Requirements are the same as those for the 42-credit BA plus those for the MA in music (30 credits at the graduate level; see graduate catalog). Students may be admitted to this program only after they have completed at least 60 credits of college work, including at least 29 credits in music (three semesters of music history, four semesters of music theory, and four semesters of musicianship). At least 12 credits (including six in music) must have been taken at Hunter College, and students must have a cumulative GPA of at least 3.5 with no grade of less than B in any music course. At that time, they must fulfill all requirements for entry into the MA program except completion of the BA degree. The graduate adviser must be consulted about the MA requirements.

Music/Music Teacher Education Pre-K-12 - BA/MA

Major Programs

The Department of Music offers three undergraduate and two BA/MA major programs to fit individual interests and requirements. Students must take three examinations before declaring a music major:

1. **Music notation, rudimentary theory, and basic aural skills.** This examination is prerequisite to MUSTH 22000 (Music Theory I).

   Students who do not pass it must take MUSTH 10100 (Basic Musicianship) or learn the material on their own, then repeat the examination.

2. **Elementary music history and literature.** This examination is prerequisite to MUSHL 20500 (Music History I). Students who do not pass it must take MUSHL 10100 (Introduction to Music) or learn the material on their own, then repeat the examination.

3. **Performance audition on an instrument or voice.** This examination is prerequisite to MUSPF 40100 (Private Instruction in Instrument or Voice). Students whose performance skills fall below New York State School Music Association (NYSSMA) level 2, equivalent to about one year of study, must take MUSPF 21100-MUSPF 21200 (Voice I-II), MUSPF 21300-MUSPF 21400 (Piano III), or private lessons at their own expense (without credit), then repeat the examination. Students with no experience in performance may defer the audition until the end of their first semester of study.

Prospective majors should consult the Music Department’s undergraduate adviser as soon as possible to discuss these examinations and any prerequisite courses they may need before beginning the major.

Piano Proficiency Requirement

All music majors must demonstrate elementary proficiency at the piano. Students should plan to fulfill this requirement during their first year of study. A passing grade on the piano proficiency examination is a prerequisite for the second year of study in music theory (MUSTH 32000 and MUSTH 32100). Students entering Hunter with limited keyboard background may take MUSPF 21300-MUSPF 21400 (Piano I and II) for elective credit or private lessons in piano at their own expense. The Music Department office has a list of recommended piano teachers.

5- to 6-Year Dual BA/MA Degree in Teacher Education

Exceptionally qualified students may obtain a master’s degree in teacher education in 5-6 years with a minimum of 140 credits. Requirements are the same as those for the 42-credit BA plus requirements for the MA degree in music teacher education (see graduate catalog). Students may be admitted to this program only after they have completed at least 60 credits of college work, including at least 29 credits in music (three semesters of music history, four semesters of music theory, and four semesters of musicianship). At least 12 credits (including six in music) must have been taken at Hunter College, and students must have a cumulative GPA of at least 3.5 with no grade of less than B in any music course.
They must have passed the Music Department’s piano proficiency examination and an audition-interview demonstrating reasonable mastery of an instrument or voice. In addition, they must either have passed the LAST (Liberal Arts and Sciences Test) or fulfilled the following requirements of the School of Education:

a. Completion of developmental courses;

b. Grade of B- or better in ENGL 12000 or a 200-level English course;

c. Application, on-site essay, and interview with the School of Education;

d. Proof of negative result on TB test;

e. Maximum of 6 credits taken with CR/NC grades, or else calculation of those grades as C/F for computation of grade-point average.

Admission requires the consent of both the Music Department and the School of Education. See the School of Education section of both the undergraduate and graduate catalogs for more information.

Minor

For 25-credit music majors, the minor consists of 12 credits in a field of study leading to a BA degree and approved by the Music Department adviser. Double-majors and students in other music major programs are exempt from the minor requirement. Minor courses can be used without limit to satisfy stages 1, 2, and 3 of the GER.

Minor for non-Majors

For students minoring in music, the requirements are determined by the student’s major department. See your major adviser. The Music Department recommends the following courses. Because 300-level courses are intended primarily for music majors and have extensive prerequisites, students whose major departments require a 300-level course in the minor may, with permission of their adviser, substitute a 200-level course in the music minor.

**MUSTH 10100 - Music Theory Fundamentals**

**Hunter Core**

Creative Expression (CE)

**GER**

2/D

For non-majors. Introduction to music theory, sight singing, and ear training.

3 hrs

3 cr.

or

**MUSTH 22000 - Music Theory I**

Review of fundamentals of music theory; introduction to melodic, rhythmic, contrapuntal, harmonic, and formal organization of music.

*prereq: ability to read music as demonstrated by dept. exam, perm dept.
coreq: MUSTH 23000*

3 hrs

3 cr.

*offered fall*
MUSTH 23000 - Musicianship I

Sight singing, ear training, and keyboard drill on materials studied in the corequisite course. Individual work in the Computer Assisted Instruction facility.

1 sem
3 cr.

**Undergraduate Minor**

**Minor in Music**

The music minor consists of 15 credits in music: MUSTH 10100; MUSHL 10100 or MUSHL 10700; one course with an MUSHL prefix at the 200-level; and 6 credits of music electives, 3 of which must be at the 200-level or higher. Prospective minors who have already mastered the material taught in the required 100-level courses (MUSTH 10100 and/or MUSHL 10100 or 10700) may be exempted from these courses by passing the same entrance examination that is required of prospective music majors (see Music 25-Credit Major (BA)). Music minors must substitute more advanced courses in any area of music study, which may include private lessons and ensembles, for the courses from which they are exempt. PLEASE NOTE: Music minors who wish to take private lessons for credit (MUSPF 40100) must first pass both the performance audition and music theory portions of the entrance examination.

**Music: Introductory Courses**

**MUSHL 10100 - Introduction to Music**

_Hunter Core_
Creative Expression (CE)
_Pluralism and Diversity_
PD/D
_GER_
2/D

For non-majors. Selected compositions primarily from the European tradition studied with aim to develop perceptive listening.

3 hrs
3 cr.

MUSHL 24100 - Music of Asia (W)

Pluralism and Diversity
PD/A
GER
3/A

Music and its relationship to dance and drama in the major civilizations of East Asia, Southeast Asia, South Asia, Central Asia, and the Middle East.

Prereq: ENGL 12000; one of the following: MUSHL 10100, 10700, 20500, MUSTH 10100, or perm instr.

3 hrs
3 cr.

MUSHL 24300 - Music of the Middle East
This course is designed to introduce students to major art and folk music traditions, sounded religious practices, and popular musics of the Middle East and North Africa. Students learn to identify musics from these regions and cultural groups through exposure to their generic and formal qualities. Basic information about these regions’ languages, cultures, histories, and religions is presented and students learn to connect these contextual factors to the pertinent genres’ development. Emphasis is placed on issues of tradition, modernity, religion, gender, and politics.

**prereq or coreq:** MUSHL 10100, or MUSHL 10700, or MUSHL 20500, or MUST 10100, or permission of the instructor

3 hrs
3 cr

**MUSHL 24500 - Music of Africa (W)**

**Pluralism and Diversity**

**GER**

3/A

Introduction to traditional and popular African music and performance practices. Theoretical and methodological issues as defined by ethnomusicology.

**prereq:** ENGL 12000; one of the following: MUSHL 10100, 10700, 20500, MUST 10100, or perm instr.

3 hrs
3 cr.

**MUSHL 25000 - Women and Music (W)**

**Pluralism and Diversity**

**PD/C**

**GER**

3/A

An ethnomusicological study of women and music in cross-cultural perspective.

cross-listed WGS 25000 (W)

**prereq:** ENGL 12000; one of the following: MUSHL 10100, 10700, 20500, MUST 10100, WGS 10000, or perm. Instr.

3 hrs
3 cr.

**MUSHL 25200 - Film Music (W)**

**GER**

3/A

Introduction to the history, aesthetic, form and techniques of film music, for everyone interested in film or film music, from the casual viewer of television movies and videotapes to film and music majors.

**prereq:** ENGL 12000; one of the following: MUSHL 10100, 10700, 20500, MUST 10100, or perm instr.

3 hrs
3 cr.

**MUSHL 26100 - Special Topics in History and Literature of Music (W)**

**Pluralism and Diversity**

**PD/A or B or C**

**GER**
Study of works illustrating one specific genre, style, or period. Topics to be announced. May be taken 6 times. Depending on topic, may satisfy PD.

**prereq:** ENGL 12000; one of the following: MUSHL 10100, 10700, 20500, MUSTH 10100, or perm instr.

3 hrs

3 cr.

**MUSHL 26200 - Special Topics in Music (W)**

A study of a musical topic outside the traditional classifications of music history, theory, and performance. Topics to be announced.

**prereq:** ENGL 12000; MUSHL 10100, 10700, 20500, MUSTH 10100, or perm instr.

3 hrs

3 cr.

**MUSHL 30500 - Music History III (W)**

Pluralism and Diversity

PD/D

Continuation of MUSHL 20600. Survey of the history of music in the European tradition from 1800 to the present.

**prereq:** MUSHL 20600, MUSTH 22100, 23100

3 hrs

3 cr.

offered fall

**MUSHL 30600 - Music History IV (W)**

Pluralism and Diversity

PD/D

Central issues in the history of European music, such as the role of patronage in musical culture, relationships of musical style to instruments and performing ensembles, and the impact of historical consciousness on contemporary musical life.

**prereq:** MUSHL 30500

3 hrs

3 cr.

*prereq: MUSPF 12100  
2 hrs  
1 cr.*
MUSPF 13100 - Elementary Piano I

For non majors. Class lessons in piano: basic techniques, playing simple pieces.
prereq: MUSTH 10100 or perm dept.
2 hrs
1 cr.

MUSPF 13200 - Elementary Piano II

prereq: MUSPF 13100
2 hrs
1 cr.

MUSPF 21100 - Voice I

prereq: declared music major or perm dept.
2 hrs
1 cr.

MUSPF 21200 - Voice II

Continuation of MUSPF 21100.
prereq: MUSPF 21100 or perm dept.
2 hrs
1 cr.

MUSPF 21300 - Piano I

Basic piano techniques, scales and chords, exercises, simple pieces, and sight-reading.
prereq: declared music major or perm dept.
2 hrs
1 cr.

MUSPF 21400 - Piano II

Continuation of MUSPF 21300.
prereq: MUSPF 21300 or perm dept.
2 hrs
1 cr.

MUSPF 22100 - College Choir

Open to all students. Rehearsal and public performance of major choral works. May be taken 8 times.
3 hrs
1 cr.

MUSPF 23100 - Hunter Symphony
Rehearsal and performance of orchestral works. May be taken 8 times.

prereq: audition, perm instr.

3 hrs
1 cr.

MUSPF 24900 - Jazz Ensemble

Open to all instrumentalists by audition. Study and performance of popular forms of music, including dance, jazz, and musical comedy. May be taken 6 times.

2 hrs
1 cr.

MUSPF 25000 - Popular Music Combo

Study and performance within a small ensemble context of the popular music genres, such as Pop, Rock, Hip-Hop, R & B, Country/Bluegrass, and Jazz. May be taken 6 times.

prereq or coreq: prereqs: audition, perm dept.

2 hrs
1 cr.

MUSPF 25100 - Jazz Vocal Workshop Ensemble

Jazz performance and improvisation. May be taken 6 times.

prereq: MUSPF 11100 or 21100 or 40100 in Voice, and audition

2 hrs
1 cr.

MUSPF 34900 - Conducting I

Principles of choral and orchestral conducting: technique of the baton, interpretation, repertoire, and score reading.

prereq: MUSTH 33100 or perm instr.
coreq: audit MUSPF 22100 or 23100

3 hrs
2 cr.

MUSPF 35000 - Conducting II

Continuation of MUSPF 34900.

prereq: MUSPF 34900 and MUSTH 33100 or perm instr.
coreq: audit MUSPF 22100 or 23100

3 hrs
2 cr.

MUSPF 35300 - Chamber Singers

Study and public performance of solo and chamber chorus works from all musical eras. May be taken 6 times.

prereq: audition, perm instr.

2 hrs
1 cr.
MUSPF 35500 - Chamber Music Workshop

Rehearsal and public performance of instrumental chamber works. May be taken 6 times.  
*prereq: audition, perm instr.*

2 hrs  
1 cr.

MUSPF 36100 - Special Studies in Performance of Music

Number of works are studied, rehearsed, and performed. Topics to be announced.  
May be taken 4 times.  
*prereq: perm dept.*

1 cr.

MUSPF 36200 - Special Studies in Performance of Music

Number of works are studied, rehearsed, and performed. Topics to be announced.  
May be taken 4 times.  
*prereq: perm dept.*

2 cr.

MUSPF 36300 - Special Studies in Performance of Music

Number of works are studied, rehearsed, and performed. Topics to be announced.  
May be taken 4 times.  
*prereq: perm dept.*

3 cr.

MUSPF 36500 - Topics in Piano Performance

Seminar in performance for advanced piano students focusing on a different topic area each semester. The seminar will involve study and performance of representative works of piano repertoire relevant to the semester’s topic area. Each semester will also include individual attention to problems of public performance.  
May be taken 4 times.  
*coreq: MUSPF 40100 or 43100*  
2 hrs  
1 cr.

MUSPF 36900 - Topics in Vocal Performance

Seminar in performance for advanced voice students, focusing on a different topic each semester. The seminar will involve study and performance of representative works of vocal repertoire relevant to the semester’s topic area. Each semester will also include individual attention to problems of public performance.  
May be taken 4 times.  
*prereq: ENGL 12000*  
*coreq: MUSPF 40100 or 43100*  
2 hrs  
1 cr.

MUSPF 40100 - Individual Instruction in Instrument or Voice
Limited to the 42-credit BA music major, the 25-credit BA music major, the BA/MA music major and the music minor. Audition demonstrating performance skills equivalent to New York State School Music Association (NYSSMA) level 2 or higher. Students must make their own arrangements with department-listed teachers to receive credit for this course. Jury examination required. The jury examination following the second and subsequent semesters of private lessons must demonstrate performance skills equivalent to NYSSMA level 4 or higher. May be taken 8 times.

MUSPF 40200 - Individual Instruction in Second Instrument or Voice

Individual instruction in second instrument or voice. Limited to the 42-credit BA music major, 25-credit BA music major, 60-credit BMus major, BA/MA music major and the music minor. Audition demonstrating performance skills equivalent to New York State School Music Association (NYSSMA) level 2 or higher. Students must make their own arrangements with department-listed teachers to receive credit for this course. Jury examination required. May be taken 8 times.

MUSPF 43100 - Individual Instruction in Instrument or Voice

Limited to students in the 60-credit BMus program and the BA/MA music program. Intensive study in instrumental or vocal techniques. Jury examination required. May be taken 8 times.

Music Theory

MUSTH 20100 - Introduction to Music Technology

An introduction to basic music technology skills: music notation software, MIDI sequencing, and digital audio editing.

MUSTH 22000 - Music Theory I

Review of fundamentals of music theory; introduction to melodic, rhythmic, contrapuntal, harmonic, and formal organization of music.
MUSTH 22100 - Music Theory II

Continuation of MUSTH 22000.
prereq: MUSTH 22000
coreq: MUSTH 23100
3 hrs
3 cr.
offered spring

MUSTH 23000 - Musicianship I

Sight singing, ear training, and keyboard drill on materials studied in the corequisite course. Individual work in the Computer Assisted Instruction facility.
coreq: MUSTH 22000
3 hrs
2 cr.
offered fall

MUSTH 23100 - Musicianship II

Continuation of MUSTH 23000.
prereq: MUSTH 23000
coreq: MUSTH 22100
3 hrs
2 cr.
offered spring

MUSTH 32000 - Music Theory III

Intermediate-level study of melodic, rhythmic, contrapuntal, harmonic, and formal organization of music.
prereq: MUSTH 20100, MUSTH 22100
coreq: MUSTH 33000
3 hrs
3 cr.
offered fall

MUSTH 32100 - Music Theory IV

Continuation of MUSTH 32000.
prereq: MUSTH 32000
3 hrs
3 cr.

MUSTH 33000 - Musicianship III

Sight singing, ear training, and keyboard drill on materials studied in corequisite course. Individual work in the Computer Assisted Instruction facility.
prereq: MUSTH 23100
coreq: MUSTH 32000
3 hrs
MUSTH 33100 - Musicianship IV

Continuation of MUSTH 33000.
prereq: MUSTH 33000
coreq: MUSTH 32100
3 hrs
2 cr.
offered spring

MUSTH 33300 - Composition I

Practical study of music composition; traditional pitch materials; motivic materials; formal schemes. Students will write several short compositions and perform them in class.
prereq: MUSTH 22100 and 23100 or perm dept.
3 hrs
3 cr.

MUSTH 33400 - Composition II

Practical study of music composition. New pitch materials; composing for solo instruments; using contrast to build form. Students will write several short compositions and perform them in class.
May be taken before Composition I.
prereq: MUSTH 22100 and 23100 or perm dept.
3 hrs
3 cr.

MUSTH 33500 - Orchestration

Capabilities and limitations of the orchestral instruments; practice in scoring for small and large groups; instrument demonstrations and reading session.
prereq: MUSTH 22100 and 23100 or perm dept.
3 hrs
3 cr.

MUSTH 35100 - Computer Music

Making music with computers using technologies such as MIDI sequencing, hardware synthesis, and digital audio. Promises and limitations of these tools.
prereq: MUSTH 22100 and 23100 or perm dept.
3 hrs
3 cr.

MUSTH 36100 - Special Topics in Music Theory

Study of selected issues in music theory and analysis. Topics to be announced. May be taken two times.
prereq: variable
3 hrs
3 cr.
MUSTH 37000 - Jazz Techniques and Arranging

Study of jazz harmony and rhythm, jazz composition, and jazz arranging.

*prereq: MUSTH 20100, 22100 and 23100 or perm dept.*

3 hrs

3 cr

MUSTH 37100 - Jazz Improvisation

Study and performance of jazz improvisational techniques.

*prereq: MUSTH 37000 or perm dept.*

3 hrs

3 cr

MUSTH 38500 - Private Lessons in Composition

Intensive study of music composition for advanced students. May be taken four times.

*prereq: MUSTH 33300, 33400, perm dept.*

3 hrs

3 cr.

MUSTH 49100 - Honors Project

Upper Jr/Sr only. Individual project of large scope in music history, theory, composition, or performance.

*prereq: minimum music GPA of 3.5, perm undergrad adviser*

1 sem

3 cr.

MUSTH 49200 - Honors Project

**Programs and Courses in Philosophy**

**Philosophy**

**About the Department**

Philosophy studies the most fundamental questions that human beings ask — about individual and social action, the possibility and limits of knowledge, the truth and justification of beliefs, human nature and freedom, the existence of God and the operations of nature. Philosophy approaches these questions in a systematic way and philosophers have worked out more or less comprehensive theories to answer them (or show why they cannot be answered). The courses offered by the Philosophy Department are designed to introduce students to the main problems that philosophers study and to the main ideas of such profound and influential thinkers as Socrates, Plato, Aristotle, Augustine, Aquinas, Descartes, Hume and Kant.

Philosophy is one of the most important subjects a student can study because it develops the ability to reason clearly and critically, to write thoughtfully, to use intelligence and logic to deal with problems all too often ruled by emotion and prejudice. Philosophy also helps one develop intellectual flexibility and learn to appreciate ideas and beliefs other than those of one’s own time, place, class or group. Since it develops these intellectual abilities and habits, the study of philosophy, either in individual courses or as a major or minor, is excellent preparation for any profession or occupation.

Students of philosophy pursue careers in law, business, medicine, government and the arts. Some go on to study philosophy at the graduate level with the aim either of teaching philosophy or of obtaining an advanced degree to further their career objectives.

**Course Listings**

The department especially encourages students majoring in or interested in philosophy, both with fewer than 6 credits toward the major in philosophy, to consult with a departmental adviser about courses and their prerequisites at this stage of their academic stay at Hunter.

Hunter Core
Individual and Society (Social Science) -I&S SS
Pluralism and Diversity
PD/D
GER
2/C

Introduction to social and political philosophy.
3 hrs
3 cr.
offered each semester

Macaulay Honors students may take the following:

PHILO 20400 - Great Philosophers
Hunter Core
Individual and Society (Humanities) - I&S H

Pluralism and Diversity
PD/D
GER
2/C

A comprehensive study of major philosophical thinkers.
pre: ENGL 12000
3 hrs
3 cr.

Hunter Core Requirement

Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement

The Standard Concentration

consists of 30 credits distributed as follows:

1. Logic (3 cr.)

PHILO 17100 - Introduction to Symbolic Logic

Sentential logic, including the truth-functional connectives, truth tables, symbolizations, consistency trees. Predicate logic, including quantificational symbolizations and consistency trees for quantifiers.
3 hrs
3 cr.

2. History of Philosophy (9 cr.)

PHILO 21200 - Classical Greek Philosophy: Plato and Aristotle (W)

Pluralism and Diversity
PD/D
GER
3/A

Study of major works of Plato and Aristotle in the context of the philosophical thought of the ancient world.
pre: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 21500 - Foundations of Modern Philosophy (W)

Pluralism and Diversity
PD/D
GER
3/A

Study of major philosophers of the 17th and early 18th centuries such as Descartes, Spinoza, Leibniz, Locke, Berkeley and Hume.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

PHILO 21800 - Revolutions in Modern Philosophy (W)

Pluralism and Diversity
PD/D
GER
3/A

Study of major philosophers of the late 18th and 19th centuries such as Kant, Hegel, Schopenhauer, Feuerbach, Kierkegaard, Marx and Nietzsche.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

3. Ethics, Politics and Aesthetics (3 cr.)

any course from

PHILO 24400 - Moral Philosophy (W)

GER
3/A

Study of selected problems in philosophical ethics and moral psychology.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

PHILO 24600 - Political Philosophy (W)

GER
3/B

Study of selected philosophical problems in politics, law, economics and society.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

PHILO 25800 - Aesthetics (W)

GER
3/A
Study of philosophical issues that arise in our understanding and criticism of the arts. Topics include nature of expression, purpose and standards of criticism and aesthetic value.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

4. Metaphysics and Epistemology (3 cr.)

any course from

**PHILO 36000 - Metaphysics (W)**

GER
3/A

Study of major metaphysical views, such as materialism, idealism, nominalism and realism. The major question is: What is reality and how may it be known?

*prereq: Two courses in philosophy, at least one of which is at the 200 level.*

3 hrs
3 cr.

**PHILO 36200 - Theory of Knowledge (W)**

GER
3/A

Study of origin, structure, methods and foundations of human knowledge.

*prereq: Two courses in philosophy, at least one of which is at the 200 level.*

3 hrs
3 cr.

**PHILO 36400 - Philosophy of Language (W)**

GER
3/A

Inquiry into the philosophical significance of language, its structure, meaning, reference and use.

*prereq: Two courses in philosophy, at least one of which is at the 200 level.*

3 hrs
3 cr.

**PHILO 36600 - Philosophy of Mind (W)**

GER
3/A

Examination of the concept of mind and the person. Topics include thinking, intention, consciousness, supervenience, emotion, self-knowledge.

*prereq: Two courses in philosophy, at least one of which is at the 200 level.*

3 hrs
3 cr.
PHILO 37800 - Philosophy of Biology (W)

Philosophical problems of biology, including evolutionary biology, molecular biology and genetics, and neuroscience.  
prereq: ENGL 12000 and 2 courses in philosophy, at least one at the 200-level  
3 hrs  
3 cr.

PHILO 37900 - Philosophy of Science (W)

GER  
3/B

Study of foundations of knowledge in natural and social sciences.  
prereq: Two courses in philosophy, at least one of which is at the 200 level.  
3 hrs  
3 cr.

5. Intensive Study of a Major Philosopher (3 cr.)

any course from those offered under PHILO 38000 Major Figures in Philosophy (W)

6. Additional Credits (9 cr.)

- Chosen in consultation with an adviser. Students are required to select at least one course (3 cr.) at the 300-level. Also they are encouraged to select courses that acquaint them with philosophic traditions other than the dominant Western ones.

Concentration in Philosophy, Politics and Society

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

One previous course in philosophy. Students are encouraged to take:

PHILO 10600 - Philosophy, Politics and Society

Hunter Core  
Individual and Society (Social Science) -I&S SS  
Pluralism and Diversity  
PD/D  
GER  
2/C

Introduction to social and political philosophy.  
3 hrs  
3 cr.  
offered each semester
Macaulay Honors students may take the following:

**PHILO 20400 - Great Philosophers**

**Hunter Core**
- Individual and Society (Humanities) - I&S H

**Pluralism and Diversity**
- PD/D
- GER
- 2/C

A comprehensive study of major philosophical thinkers.

*prereq: ENGL 12000*

3 hrs

3 cr.

**Hunter Core Requirement**

Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

**The concentration in Philosophy, Politics and Society**

consists of 30 credits distributed as follows:

**History of Philosophy (9 cr.)**

**PHILO 21200 - Classical Greek Philosophy: Plato and Aristotle (W)**

**Pluralism and Diversity**
- PD/D
- GER
- 3/A

Study of major works of Plato and Aristotle in the context of the philosophical thought of the ancient world.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs

3 cr.

**PHILO 21500 - Foundations of Modern Philosophy (W)**

**Pluralism and Diversity**
- PD/D
- GER
- 3/A

Study of major philosophers of the 17th and early 18th centuries such as Descartes, Spinoza, Leibniz, Locke, Berkeley and Hume.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 21800 - Revolutions in Modern Philosophy (W)

Pluralism and Diversity
PD/D
GER
3/A

Study of major philosophers of the late 18th and 19th centuries such as Kant, Hegel, Schopenhauer, Feuerbach, Kierkegaard, Marx and Nietzsche.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

Political Philosophy (3 cr.)

PHILO 24600 - Political Philosophy (W)

GER
3/B

Study of selected philosophical problems in politics, law, economics and society.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

Social Philosophy (3 cr.)

PHILO 24800 - International Ethics (W)

GER
3/B

Study of the ethical dimensions of problems in contemporary international relations, such as war and peace, imperialism, national identity and development.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

-or-

PHILO 25000 - Problems of Ethics and Society (W)

GER
3/B

Study of the ethical dimensions of contemporary social problems, such as poverty, consumption, sexual deviance, racism and environmental destruction.
prereq: ENGL 12000 and one previous course in philosophy.
Intensive Study of a major philosopher, preferably concerning their political and/or social ideas (3 cr.)

offered under PHILO 38000 Major Figures in Philosophy (W)

Study of Recent Issues in Political and Social Philosophy (3 cr.)

PHILO 34600 - Contemporary Theories of Justice (W)

GER
3/B

A study of important contemporary theories of economic, political, and social justice, such as political liberalism, democratic socialism, communitarianism, and civic republicanism.

Electives (9 cr.)

chosen from 200- and 300-level PHIL courses (excluding PHILO 20300 and PHILO 20400, but including PHILO 17100); 6 credits of this requirement may be taken from the nondepartmental courses listed below. It is also recommended that 3 credits be taken on philosophical approaches to class, race, or gender; the following philosophy courses satisfy this recommendation: PHILO 31900 - Marxist and Critical Theory (W), PHILO 22600 - African-American Philosophy (W), or PHILO 23000 - Feminism: Philosophical Theory and Practice (W)

Nondepartmental courses to satisfy elective requirement

 AfroPRL 40100 - Pan-Africanism

GER
3/B

Seminar traces development of Pan-Africanism through the 20th century. Not open to freshmen.

prereq: AfroPRL 20200 or 20400 or 20600

3 hrs
3 cr.

AfroPRL 40200 - African American Political Thought

GER
3/B

Comparative theorists; methods and ideological currents.

prereq: AfroPRL 20300 or 20400 or 20500
HIST 33100 - European Culture in the 16th, 17th and 18th Centuries (W)

GER
3/B

The impact of the Reformation, Counter-Reformation, the Scientific Revolution and related movements. Courses at the 300-level and above not offered to freshmen.

prereq or coreq: ENGL 12000

3 hrs
3 cr.

HIST 33200 - Modern Culture from the 18th to the 20th Centuries

GER
3/B

From the impact of the Scientific Revolution and the Enlightenment to recent literature, art, religion and science. European political and social thought. Courses at the 300-level and above not offered to freshmen.

3 hrs
3 cr.

POLSC 20100 - Ancient to Early Modern Political Thought (W)

Pluralism and Diversity
PD/D
GER
3/B

The study of selected writers from the ancient Greeks to the Renaissance (e.g., Plato to Machiavelli), focusing on the political dimensions of such ideas as rationality, virtue, community, human nature and historical change.

prereq: ENGL 12000 or its equivalent

3 hrs
3 cr.

POLSC 20200 - Modern Political Thought (1600-1900) (W)

Pluralism and Diversity
PD/D
GER
3/B

The study of selected political writers (e.g., Hobbes to Nietzsche), with special emphasis given to the nature of and problems with, liberty, equality and justice in modern societies and states.

prereq: ENGL 12000 or its equivalent

3 hrs
3 cr.
POLSC 20300 - Political Thought Since 1900 (W)

Pluralism and Diversity
PD/D
GER
3/B

Exploration of concepts and thinkers in political theory since 1900. Topics include such traditional issues of political theory as the nature and scope of political regimes, justice, equality and changing concepts of human nature.

prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 20400 - Contemporary Issues in Political Theory

GER
3/B

Topics vary each semester. They have included democracy in America, totalitarianism, liberty and authority.

prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 20900 - Women and Gender in Western Political Thought (W)

Pluralism and Diversity
PD/C or D
GER
3/B

Examines history of political thought from the perspective of gender relations and the treatment of women.

cross-listed WGST 20900
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 30100 - American Political Thought (W)

GER
3/B

Examination of ideas that have shaped American politics from the Revolution to the present, including Federalists and Anti-Federalists, Progressivism and responses to industrialization and recent debates over the welfare state, political inclusion and democracy.

prereq: ENGL 12000 or its equivalent; one course in political theory or perm. instr.
3 hrs
3 cr.

POLSC 30300 - Democracy and Emergency (W)
This seminar in political theory examines the issue of emergency powers in constitutional democracies. It will examine various attempts to define what is an emergency, as well as the spirited debates over the legitimacy of extraordinary powers to manage such crises.

*prereq: ENGL 12000*

**POLSC 30400 - Contemporary Issues in Political Theory**

Selected topics in political theory.

*prereq: ENGL 12000 or its equivalent; one course in political theory subfield or perm instr*

3 hrs

3 cr.

**POLSC 30500 - Democratic Theory (W)**

A critical survey of different conceptions of democracy: issues include democracy as a political order, democracy and 'non-political' forms of life (e.g., business, family, religion), toleration, political representation, democracy and justice.

*prereq or coreq: ENGL 12000 or its equivalent; one course in political theory or perm instr.*

3 hrs

3 cr.

**POLSC 30700 - Theory of Revolution**

Traditional and modern revolutions. Conditions and objectives of socialist and communist revolutions.

*prereq: ENGL 12000 or its equivalent*

3 hrs

3 cr.

**POLSC 30900 - Feminist Political Theory (W)**

Readings in feminist ideas, both historical and contemporary, on issues of power, justice and equality. The course will emphasize different perspectives, including those of liberal, radical, postmodernist, women of color, third world and 'global' feminists.

*cross-listed WGST 30900 (W)*
**POLSC 31100 - Utopian Theory (W)**

GER
3/B

Political theorists often imagine ideal worlds, both to explore ideals and to criticize political realities. This course will explore utopias and dystopias as theories that explore political possibilities and challenge existing realities.

**POLSC 31600 - Political Theory of Human Rights (W)**

GER
3/B

A critical analysis of the intersection of academic and practical discourse of human rights with the central concerns of political theory, particularly as it engages relationships between ethics and power as well as theory and practice.

**PUPOL 40000 - Capstone Seminar**

This writing intensive course is the culminating experience in the Public Policy minor/certificate. It provides students with an opportunity to apply the knowledge and skills acquired in their other courses to a specific policy problem. An interdisciplinary course, it will require students to make an inquiry into a specific policy problem. The project will be overseen jointly by a faculty adviser who specializes in the substantive area of public policy chosen and another faculty adviser in the program by writing a formal paper.

Each student will write an appropriately revised 5-7 page research proposal and a 20-25 page research paper involving primary research.

These courses are only open to students enrolled in the program. They cannot be used to fulfill any other requirements.

This course is taken at the state of the art Roosevelt House.

**SOC 22100 - Classical Sociological Theory**

Pluralism and Diversity
PD/D

GER
3/B

Classical theorists and their contributions.

**prereq:** SOC 10100
3 hrs
3 cr.
SOC 22300 - Current Sociological Theory

GER
3/B

Significance of concepts and nature of evidence applied to leading theories. Theory construction.

prereq: SOC 10100, SOC 22100, major
3 hrs
3 cr.

SOC 36000 - Feminist Social Theory

Pluralism and Diversity
PD/C
GER
3/B

Introduces students to feminist theory developed by women from Western, Third World and other countries.

cross-listed WGS 36000
prereq: SOC 10100
3 hours
3 credits

Elective courses recommended for students with particular interests

Elective credits should be carefully chosen to focus students’ programs on their present interests and future needs. The following courses are recommended for students with particular interests.

Graduate study in philosophy

PHILO 17100 - Introduction to Symbolic Logic

Sentential logic, including the truth-functional connectives, truth tables, symbolizations, consistency trees. Predicate logic, including quantificational symbolizations and consistency trees for quantifiers.

3 hrs
3 cr.

PHILO 24400 - Moral Philosophy (W)

GER
3/A

Study of selected problems in philosophical ethics and moral psychology.

prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

Admission to law school

PHILO 17100 - Introduction to Symbolic Logic
Sentential logic, including the truth-functional connectives, truth tables, symbolizations, consistency trees. Predicate logic, including quantificational symbolizations and consistency trees for quantifiers.
3 hrs
3 cr.

PHILO 24400 - Moral Philosophy (W)

GER
3/A

Study of selected problems in philosophical ethics and moral psychology.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

Careers in public administration

PHILO 25000 - Problems of Ethics and Society (W)

GER
3/B

Study of the ethical dimensions of contemporary social problems, such as poverty, consumption, sexual deviance, racism and environmental destruction.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

Careers in foreign service

PHILO 24800 - International Ethics (W)

GER
3/B

Study of the ethical dimensions of problems in contemporary international relations, such as war and peace, imperialism, national identity and development.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

POLSC 31600 - Political Theory of Human Rights (W)

GER
3/B

A critical analysis of the intersection of academic and practical discourse of human rights with the central concerns of political theory, particularly as it engages relationships between ethics and power as well as theory and practice.
prereq: ENGL 12000 or its equivalent; one course in political theory or perm instr.
3 hrs
3 cr.
Careers in social welfare

**PHILO 25000 - Problems of Ethics and Society (W)**

**GER**

3/B

Study of the ethical dimensions of contemporary social problems, such as poverty, consumption, sexual deviance, racism and environmental destruction.  
*prereq: ENGL 12000 and one previous course in philosophy.*  
3 hrs  
3 cr.

**SOC 22100 - Classical Sociological Theory**

**Pluralism and Diversity**

**PD/D**

**GER**

3/B

Classical theorists and their contributions.  
*prereq: SOC 10100*  
3 hrs  
3 cr.

**SOC 22300 - Current Sociological Theory**

**GER**

3/B

Significance of concepts and nature of evidence applied to leading theories. Theory construction.  
*prereq: SOC 10100, SOC 22100, major*  
3 hrs  
3 cr.

**Note:**

*Certain new, ad hoc, or independent study courses may be taken in partial satisfaction of requirements listed above, if they are approved by the Philosophy, Politics and Society major concentration adviser.*

**Minors in Philosophy**

Students may declare an optional minor in Philosophy (the Standard concentration) or a minor in the Philosophy, Politics, Society concentration. In either case a minor in philosophy is comprised of 12 credits at the 200-level or above, including no fewer than 3 credits at the 300-level. Exceptions: PHILO 17100 may count toward the minor at the 200-level; and PHILO 20300 and PHILO 20400 shall not count. PHILO 20300 and 20400 are excluded from counting toward the minor, because they are, albeit advanced, introductory courses. A student must pass a minor in philosophy with a minimum GPA of 3.00.
When constructing a philosophy minor in either the standard or the PPS concentration, a student should always consult with a philosophy department advisor beforehand.

The Standard Minor

Students should follow their interests in choosing the courses taken to satisfy the minor. Usually this will involve choosing courses related to the student’s major. Ideally the minor will allow the student to study the philosophical issues associated with a field or period of history in increasing depth. Some suggested tracks are listed below:

Logic and Mathematics

four of

PHILO 17100 - Introduction to Symbolic Logic

Sentential logic, including the truth-functional connectives, truth tables, symbolizations, consistency trees. Predicate logic, including quantificational symbolizations and consistency trees for quantifiers.

3 hrs
3 cr.

PHILO 27500 - Intermediate Symbolic Logic

GER
3/B

Sentential derivations, interpretations, symbolizations involving operator symbols, identity, definite descriptions, predicate derivations through logic of identity and definite descriptions.

cross-listed MATH 27500
prereq: PHIL 17100
3 hrs
3 cr.

PHILO 27900 - Inductive Logic

GER
3/B

Deductive vs. inductive logic, basic forms of inductive inference, Mill's methods and controlled experiments, the probability calculus, interpretations of probability, the problem of induction, confirmation and disconfirmation of hypotheses.

prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 36400 - Philosophy of Language (W)

GER
3/A

Inquiry into the philosophical significance of language, its structure, meaning, reference and use.
prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 37500 - Advanced Symbolic Logic

GER
3/B

A survey of the central results and techniques of meta-logic, principally mathematical induction, the soundness and completeness of theorems for first-order logic, the Skolem theorem and Church's theorem on undecidability.
prereq: PHIL 27500 or equiv.
3 hrs
3 cr.

PHILO 37600 - Philosophy of Mathematics (W)

GER
3/B

Study of such issues as the nature of demonstration or proof and the nature of mathematical knowledge and mathematical objects such as numbers and sets. cross-listed with MATH 376.
prereq: ENGL 12000; one PHIL course and one PHIL or MATH course (precalculus or beyond)
3 hrs
3 cr.

Natural and Social Sciences

four of

PHILO 17100 - Introduction to Symbolic Logic

Sentential logic, including the truth-functional connectives, truth tables, symbolizations, consistency trees. Predicate logic, including quantificational symbolizations and consistency trees for quantifiers.
3 hrs
3 cr.

PHILO 21500 - Foundations of Modern Philosophy (W)

Pluralism and Diversity
PD/D
GER
3/A

Study of major philosophers of the 17th and early 18th centuries such as Descartes, Spinoza, Leibniz, Locke, Berkeley and Hume.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 26800 - Philosophical Psychology (W)
GER
3/B

Views of human nature underlying some major contemporary schools of psychology, such as Freudian psychoanalysis, behaviorism, existential psychoanalysis, Piaget's developmental psychology.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

**PHILO 27000 - Philosophy, Science and Culture (W)**

GER
3/B

Issues relating to the impact of modern science on philosophy, religion and culture.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

**PHILO 27500 - Intermediate Symbolic Logic**

GER
3/B

Sentential derivations, interpretations, symbolizations involving operator symbols, identity, definite descriptions, predicate derivations through logic of identity and definite descriptions.

*cross-listed MATH 27500*

*prereq: PHIL 17100*

3 hrs
3 cr.

**PHILO 27900 - Inductive Logic**

GER
3/B

Deductive vs. inductive logic, basic forms of inductive inference, Mill's methods and controlled experiments, the probability calculus, interpretations of probability, the problem of induction, confirmation and disconfirmation of hypotheses.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

**PHILO 37500 - Advanced Symbolic Logic**

GER
3/B

A survey of the central results and techniques of meta-logic, principally mathematical induction, the soundness and completeness of theorems for first-order logic, the Skolem theorem and Church's theorem on undecidability.

*prereq: PHIL 27500 or equiv.*
PHILO 37900 - Philosophy of Science (W)

GER
3/B

Study of foundations of knowledge in natural and social sciences.
prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

Psychology and Mind

four of

PHILO 20100 - Knowledge and Reality (W)

Pluralism and Diversity
PD/D
GER
3/A

Study of main problems of theory of knowledge and metaphysics such as personal identity, grounds of justified belief, existence of God, nature of free will and causality.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 21200 - Classical Greek Philosophy: Plato and Aristotle (W)

Pluralism and Diversity
PD/D
GER
3/A

Study of major works of Plato and Aristotle in the context of the philosophical thought of the ancient world.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 21500 - Foundations of Modern Philosophy (W)

Pluralism and Diversity
PD/D
GER
3/A

Study of major philosophers of the 17th and early 18th centuries such as Descartes, Spinoza, Leibniz, Locke, Berkeley and Hume.
PHILO 26800 - Philosophical Psychology (W)

GER 3/B

Views of human nature underlying some major contemporary schools of psychology, such as Freudian psychoanalysis, behaviorism, existential psychoanalysis, Piaget's developmental psychology.

PHILO 36600 - Philosophy of Mind (W)

GER 3/A

Examination of the concept of mind and the person. Topics include thinking, intention, consciousness, supervenience, emotion, self-knowledge.

Cognitive Psychology
	none of

PHILO 20100 - Knowledge and Reality (W)

Pluralism and Diversity

PD/D

GER 3/A

Study of main problems of theory of knowledge and metaphysics such as personal identity, grounds of justified belief, existence of God, nature of free will and causality.

PHILO 21500 - Foundations of Modern Philosophy (W)

Pluralism and Diversity

PD/D

GER 3/A

Study of major philosophers of the 17th and early 18th centuries such as Descartes, Spinoza, Leibniz, Locke, Berkeley
and Hume.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

**PHILO 26800 - Philosophical Psychology (W)**

*GER*

3/B

Views of human nature underlying some major contemporary schools of psychology, such as Freudian psychoanalysis, behaviorism, existential psychoanalysis, Piaget's developmental psychology.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.

**PHILO 36200 - Theory of Knowledge (W)**

*GER*

3/A

Study of origin, structure, methods and foundations of human knowledge.

*prereq: Two courses in philosophy, at least one of which is at the 200 level.*

3 hrs
3 cr.

**PHILO 37900 - Philosophy of Science (W)**

*GER*

3/B

Study of foundations of knowledge in natural and social sciences.

*prereq: Two courses in philosophy, at least one of which is at the 200 level.*

3 hrs
3 cr.

**English and the Arts**

four of

**PHILO 21200 - Classical Greek Philosophy: Plato and Aristotle (W)**

*Pluralism and Diversity*

*PD/D*  
*GER*

3/A

Study of major works of Plato and Aristotle in the context of the philosophical thought of the ancient world.

*prereq: ENGL 12000 and one previous course in philosophy.*

3 hrs
3 cr.
PHILO 21800 - Revolutions in Modern Philosophy (W)

Pluralism and Diversity
PD/D
GER
3/A

Study of major philosophers of the late 18th and 19th centuries such as Kant, Hegel, Schopenhauer, Feuerbach, Kierkegaard, Marx and Nietzsche.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 22800 - Existentialism (W)

Pluralism and Diversity
PD/D
GER
3/A

Philosophical writings of major existentialists. Topics include nature of subjectivity, moral value, freedom, authenticity.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 24400 - Moral Philosophy (W)

GER
3/A

Study of selected problems in philosophical ethics and moral psychology.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 25600 - Philosophical Ideas in Literature (W)

GER
3/A

Analysis of major philosophical themes in some classics of world literature.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

PHILO 25800 - Aesthetics (W)

GER
3/A
Study of philosophical issues that arise in our understanding and criticism of the arts. Topics include nature of expression, purpose and standards of criticism and aesthetic value.

PHILO 38083 Heidegger (W)
PHILO 38086 Foucault (W)

prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr

Minor in Philosophy, Politics and Society (PPS)

A student must take, as a prerequisite to the minor, PHILO 10600. This course does not count toward the PPS minor.

The PPS minor consists in taking 4 courses or 12 credits from the philosophy courses listed in the PPS major. Non-philosophy courses counting toward the PPS major concentration may not count toward the minor in philosophy.

Major Adviser

The Philosophy Department offers extensive advising services to majors, including: guidance for course selection and sequencing and devising a course of study; tracking progress and compliance with college, CUNY, and state regulations; career advice; planning for graduate and professional school applications; and information about special opportunities for philosophy students. Minors may also make use of these services.

Mentoring

Philosophy majors are encouraged to establish a relationship with a faculty mentor of their choice. This relationship can be distinct from the departmental advising relationship.

Honors
To be eligible for graduation with departmental honors in philosophy, a major must have at least a 3.50 GPA in philosophy, at least a 3.0 overall GPA. The student must register for the 3- or 6-credit PHILO 49400, which is taken in addition to and is not part of the 30 credits for the major. The student must write a substantial paper under the direction of a full-time faculty member. To receive departmental honors the completed paper must be submitted to a three-member committee who will judge whether it merits departmental honors. This committee will consist of the director of the student's Honors Tutorial and two other full-time philosophy faculty members appointed by the director.

**PHILO 49400 - Honors Tutorial in Philosophy**

Open to Jr/Sr only. Students must present a proposal for an individual project to be completed under faculty supervision. Successful completion is one requirement for departmental honors at graduation.

*prereq: 3.0 cum GPA and 3.50 major GPA; philosophy majors only, minor with perm instr; two 300-level PHIL courses, one of which may be taken concurrently; perm dept.*

*3 or 6 cr.*

**Independent Study**

Students may engage in independent study under the supervision of a member of the Philosophy department by receiving permission to take the following.

**PHILO 49200 - Independent Study in Philosophy**

Independent study of philosophical works under faculty supervision.

*prereq: one PHILO course at 300-level, perm instr. (see Program Prerequisites)*

*1-6 cr.*

**Undergraduate Minor**

**Minor in Philosophy Standard and PPS Concentration**

The philosophy minor requires 12 credits at the 200-level and above with no fewer than 3 credits at the 300-level. Exceptions: PHILO 17100 may count toward the minor at the 200-level. PHILO 20300 and PHILO 20400 shall not count.

Students seeking to minor in the Philosophy, Politics, Society (PPS) concentration must select from the approved list of philosophy courses (i.e., non-philosophy courses may not be applied).

A student must pass a minor in philosophy with a minimum GPA of 3.00.

Prerequisite to the minor: one of 6 introductory philosophy courses:

PHILO 10100

PHILO 10300

PHILO 10400

PHILO 10600
PHILO 20300
PHILO 20400 and
ENGL 12000

Note: When constructing a philosophy minor in either the standard or the PPS concentration, a student should always consult with a philosophy department adviser beforehand.

See Philosophy - BA for suggested tracks in the Standard Concentration

Humanities and The Arts

HUM 11000 - Map of Knowledge (W)

GER
2/C

Introduction to range of knowledge available in the curriculum. Discusses subject matter and methodology of various disciplines as well as their relations within and across the curriculum to aid students in making intelligent choices in their course of study.

3 hrs
3 cr.

Philosophy: Introductory Courses

PHILO 10100 - Introduction to Philosophy

Hunter Core
Individual and Society (Humanities) - I&S H

Pluralism and Diversity
PD/D
GER
3/A

A study of the main thinkers and ideas in ancient and medieval Neoplatonism, emphasizing Plotinus and Augustine.

*prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.*

PHILO 22500 - American Philosophy (W)

Pluralism and Diversity
PD/D
GER
3/A

Historical survey of major American philosophers such as Edwards, Emerson, Thoreau, Peirce, James, Royce, Santayana and Dewey.

*prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.*

PHILO 22600 - African-American Philosophy (W)

Pluralism and Diversity
PD/B
GER
3/A

Development of the African-American intellectual tradition. Study of the work of such figures as Equiano, Douglass, Cooper, Blyden, Du Bois and Hurston.

*prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.*

PHILO 22800 - Existentialism (W)
Pluralism and Diversity
PD/D
GER
3/A

Philosophical writings of major existentialists. Topics include nature of subjectivity, moral value, freedom, authenticity.

_prereq:_ ENGL 12000 and one previous course in philosophy.

3 hrs
3 cr.

**PHILO 23000 - Feminism: Philosophical Theory and Practice (W)**

Pluralism and Diversity
PD/C
GER
3/A

Analyses of feminist theories and their practical implications.

cross-listed WGST 23000 (W)

_prereq:_ ENGL 12000 and one previous course in philosophy.

3 hrs
3 cr.

**PHILO 31900 - Marxist and Critical Theory (W)**

Pluralism and Diversity
PD/D
GER
3/A

Study of 20th-century philosophers, such as Lucás, Adorno, and Marcuse, who attempted to develop a theory of historical materialism or a critical theory of society, as well as the sources of their ideas in the work of Marx, Weber, and Freud.

_prereq:_ ENGL 12000 and 2 courses in philosophy, 1 at the 200-level

3 hrs
3 cr.

**PHILO 32000 - Twentieth-Century Philosophy (W)**

GER
3/A

Survey of such movements as pragmatism, process philosophy, analytic philosophy, existentialism, phenomenology, feminism and post modernism through consideration of such representative figures as Dewey, Moore, Whitehead, Russell, Husserl, Heidegger, Wittgenstein, Ayer, Sartre, De Beauvoir, Quine, Rorty and Rawls.

_prereq:_ Two courses in philosophy, at least one of which is at the 200 level.

3 hrs
3 cr.

**PHILO 32200 - Modern Philosophical Idealism**
GER 3/A

Study of major works of Fichte, Schelling, Hegel, Bradley, Royce and their critics.

*prereq:* Two courses in philosophy, at least one of which is at the 200 level.

3 hrs
3 cr.

**Philosophy Courses: Logic**

**PHILO 17100 - Introduction to Symbolic Logic**

Sentential logic, including the truth-functional connectives, truth tables, symbolizations, consistency trees. Predicate logic, including quantificational symbolizations and consistency trees for quantifiers.

3 hrs
3 cr.

**PHILO 27500 - Intermediate Symbolic Logic**

GER 3/B

Sentential derivations, interpretations, symbolizations involving operator symbols, identity, definite descriptions, predicate derivations through logic of identity and definite descriptions.

*cross-listed* MATH 27500

*prereq:* PHIL 17100

3 hrs
3 cr.

**PHILO 27900 - Inductive Logic**

GER 3/B

Deductive vs. inductive logic, basic forms of inductive inference, Mill's methods and controlled experiments, the probability calculus, interpretations of probability, the problem of induction, confirmation and disconfirmation of hypotheses.

*prereq:* ENGL 12000 and one previous course in philosophy.

3 hrs
3 cr.

**PHILO 37500 - Advanced Symbolic Logic**

GER 3/B

A survey of the central results and techniques of meta-logic, principally mathematical induction, the soundness and completeness of theorems for first-order logic, the Skolem theorem and Church's theorem on undecidability.

*prereq:* PHIL 27500 or equiv.
Philosophy Courses: Major Philosophers

PHILO 38000 - Major Figures in Philosophy (W)

GER
3/A

Intensive study of the works and legacy of a major philosopher. The course may be repeated as different figures are offered. Figures include:
PHILO 38010 Plato (W)
PHILO 38011 Aristotle (W)
PHILO 38020 Plotinus (W)
PHILO 38063 Hume (W)
PHILO 38068 Kant (W)
PHILO 38070 Hegel (W)
PHILO 38076 Marx (W)
PHILO 38078 Nietzsche (W)
PHILO 38080 Wittgenstein (W)
PHILO 38083 Heidegger (W)
PHILO 38086 Foucault (W)

prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38010 - Plato (W)

GER
3A

Intensive study of the works and legacy of Plato.

prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38011 - Aristotle (W)

GER
3A

Intensive study of the works and legacy of Aristotle.

prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38020 - Plotinus (W)
GER
3A

Intensive study of the works and legacy of Plotinus.

prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38063 - Hume (W)

GER
3A

Intensive study of the works and legacy of Hume.
prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38068 - Kant (W)

GER
3A

Intensive study of the works and legacy of Kant.
prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38070 - Hegel (W)

GER
3A

Intensive study of the works of Hegel.
prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38076 - Marx (W)

GER
3A

Intensive study of the works and legacy of Marx (W)

prereq: Two courses in philosophy, at least one of which is at the 200 level
3 hrs
3 cr.

PHILO 38078 - Nietzsche (W)
Intensive study of the works and legacy of Nietzsche.
Prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38080 - Wittgenstein (W)

Intensive study of the works and legacy of Wittgenstein.
Prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38083 - Heidegger (W)

Intensive study of the works and legacy of Heidegger.
Prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

PHILO 38086 - Foucault (W)

Intensive study of the works and legacy of Foucault.
Prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

Philosophy Courses: Metaphysics and Epistemology

PHILO 20100 - Knowledge and Reality (W)

Study of main problems of theory of knowledge and metaphysics such as personal identity, grounds of justified belief, existence of God, nature of free will and causality.
prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

**PHILO 26200 - Philosophy of Religion (W)**

GER
3/A

Philosophical examination of some religious questions and beliefs.

prereq: one course in philosophy or religion (see statement under Program Prerequisites)
3 hrs
3 cr.

**PHILO 26800 - Philosophical Psychology (W)**

GER
3/B

Views of human nature underlying some major contemporary schools of psychology, such as Freudian psychoanalysis, behaviorism, existential psychoanalysis, Piaget's developmental psychology.

prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

**PHILO 27000 - Philosophy, Science and Culture (W)**

GER
3/B

Issues relating to the impact of modern science on philosophy, religion and culture.

prereq: ENGL 12000 and one previous course in philosophy.
3 hrs
3 cr.

**PHILO 36000 - Metaphysics (W)**

GER
3/A

Study of major metaphysical views, such as materialism, idealism, nominalism and realism. The major question is: What is reality and how may it be known?

prereq: Two courses in philosophy, at least one of which is at the 200 level.
3 hrs
3 cr.

**PHILO 36200 - Theory of Knowledge (W)**

GER
3/A
Study of origin, structure, methods and foundations of human knowledge.

prereq: Two courses in philosophy, at least one of which is at the 200 level.

3 hrs
3 cr.

PHILO 36400 - Philosophy of Language (W)

GER
3/A

Inquiry into the philosophical significance of language, its structure, meaning, reference and use.

prereq: Two courses in philosophy, at least one of which is at the 200 level.

3 hrs
3 cr.

PHILO 36600 - Philosophy of Mind (W)

GER
3/A

Examination of the concept of mind and the person. Topics include thinking, intention, consciousness, supervenience, emotion, self-knowledge.

prereq: Two courses in philosophy, at least one of which is at the 200 level.

3 hrs
3 cr.

PHILO 37600 - Philosophy of Mathematics (W)

GER
3/B

Study of such issues as the nature of demonstration or proof and the nature of mathematical knowledge and mathematical objects such as numbers and sets. cross-listed with MATH 376.

prereq: ENGL 12000; one PHIL course and one PHIL or MATH course (precalculus or beyond)

3 hrs
3 cr.

PHILO 37800 - Philosophy of Biology (W)

Philosophical problems of biology, including evolutionary biology, molecular biology and genetics, and neuroscience.

prereq: ENGL 12000 and 2 courses in philosophy, at least one at the 200-level

3 hrs
3 cr.

PHILO 37900 - Philosophy of Science (W)

GER
3/B

Study of foundations of knowledge in natural and social sciences.

prereq: Two courses in philosophy, at least one of which is at the 200 level.
Philosophy: Special Courses

PHILO 20000 - Topics in Philosophy

GER
3/A

Topics discussed vary from semester to semester.
prereq: variable (see Program Prerequisites)
3 hrs
3 cr.

PHILO 39300 - Philosophical Systems

GER
3/A

Study of writings of one or two major philosophers.
prereq: variable (see Program Prerequisites)
3 hrs
3 cr.

PHILO 39400 - Philosophical Problems

GER
3/A

Study of one or more major philosophical problems.
prereq: variable (see Program Prerequisites)
3 hrs
3 cr.

PHILO 49200 - Independent Study in Philosophy

Independent study of philosophical works under faculty supervision.
prereq: one PHILO course at 300-level, perm instr. (see Program Prerequisites)
1-6 cr.

PHILO 49400 - Honors Tutorial in Philosophy

Open to Jr/Sr only. Students must present a proposal for an individual project to be completed under faculty supervision. Successful completion is one requirement for departmental honors at graduation.
prereq: 3.0 cum GPA and 3.50 major GPA; philosophy majors only, minor with perm instr; two 300-level PHIL courses, one of which may be taken concurrently; perm dept.
3 or 6 cr.
PHILO 49800 - Internship

Open to Jr/Sr only. Philosophically relevant internship.

*prereq: philosophy major, minor with perm dept adviser; 2.5 cum GPA and 3.0 major GPA (see Program Prerequisites)*

1-6 cr.

Programs and Courses in Physics & Astronomy

Physics and Astronomy

About the Department

Physics is the study of the basic interactions that govern the behavior of the universe as we know it. As such, a knowledge of physics is necessary for the proper understanding of any science, and, of course, it is an exciting field of study in its own right.

The department offers comprehensive training in physics that can lead to a teaching position in grades 7-12; industrial, institutional and government work; and graduate study. The major includes lecture courses, laboratory courses, and a chance for qualified students to participate in research with faculty members.

Physics for Non-Physics Majors

A minimum of one year of physics is recommended for all majors in sciences and health sciences.

Medical and dental schools also require one year of physics. Students requiring one year of physics may take either the PHYS 11000 (STEM)-PHYS 12000 (STEM) sequence (9 cr) or the PHYS 11100 (STEM)-PHYS 12100 (STEM) sequence (11 cr). Although both sequences cover the same topics, PHYS 11100 (STEM)-PHYS 12100 (STEM) utilizes elementary calculus and meets for one additional lecture hour each week. It is recommended for science students and those premed students who satisfy the mathematics pre- or corequisite. PHYS 101 (4 cr) should be taken only by those who want a one semester terminal course in physics; it does not satisfy pre-professional requirements. Students should take no more than one first-semester course (PHYS 10100, PHYS 11000 (STEM), PHYS 11100 (STEM)) and no more than one second-semester course (PHYS 12000 (STEM), PHYS 12100 (STEM)) since they may receive credit for no more than one course from each group.

Physics and Astronomy Faculty

HEGIS Code: 1902

Undergraduate Major

Physics - BA

Major

One of the following 3 options (concentrations) may be taken.

- Physics Option 1
- Physics Option 2
- Physics Option 3

Graduate Study

The Department of Physics and Astronomy offers a number of advanced courses, listed in the graduate catalog, which give credit toward the degree of master of arts. Qualified undergraduate students may be admitted to these courses with the approval of the department chair.

Minor in Physics

A minor in Physics consists of a minimum of 12 credits of PHYS courses, including two courses numbered above 200 or one course numbered above 300.

Students who wish to enroll in the Physics Minor must have completed MATH 15000 (STEM) and MATH 15500 (STEM). The prerequisites for the 300-level courses include MATH 25000 and/or MATH 25400.

Honors Work

The opportunity for students to do individual research (experimental or theoretical) is offered in courses

PHYS 45300 - Introduction to Research
Independent theoretical or experimental research or independent study of approved topic.

**Prereq:** PHYS 33000, 33400, 33500, and 42700 or perm chair
1-3 cr.

**PHYS 45400 - Introduction to Research**

Independent theoretical or experimental research or independent study of approved topic.

**Prereq:** PHYS 45300 or perm chair
1 to 3 cr.

**Articulation Agreements**

**Articulation Agreement for Queensborough AAS Degree in Laser Technology**

An articulation agreement is in place for AAS graduates from Queensborough Community College with a degree in Laser Technology. Consult the physics department for further information.

**Articulation Agreement with New York City College of Technology**

An agreement is in place for students from New York City College of Technology (CUNY) who successfully complete an associate degree in science in Liberal Arts (LAS) with at least a 2.0 overall grade-point average to be accepted into the Hunter College BA program in Physics. Consult the physics and astronomy department for further information.

**Physics Option 1**

Return to Programs and Courses in Physics & Astronomy

For students in the BA/MA program, students intending to teach grades 7-12, and students intending to enter the medical profession.

**Foundational Courses**

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

**MATH 12500 (STEM) - Precalculus**

**Hunter Core**
Math/Quantitative Reasoning
**GER**
1/B

Functions and their graphs: polynomial, rational, exponential, logarithmic and trigonometric functions; conic sections; topics in trigonometry; graphical and analytical solutions to systems of equations and inequalities. Not credited to students who have completed MATH 15000 or its equivalent.

**Prereq:** grade of C or better in MATH 10100 or appropriate score on placement exam
MATH 12600 - Precalculus Technology Laboratory

Students are introduced to MATHEMATICA as a tool for exploring qualitative features of functions and solving pre-calculus problems: simplifying algebraic expressions, solving equations, plotting functions and curves, finding and approximating zeros and solving systems of equations. MATH 12600 cannot be taken for credit after a student has passed MATH 15000. Students who have passed MATH 15000 should register for MATH 15400 to satisfy the symbolic proficiency requirement.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: MATH 12500

2 hrs
1 cr.

MATH 15000 (STEM) - Calculus with Analytic Geometry I

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.

prereq: grade of C or better in MATH 12500 or appropriate score on placement exam.

4 hrs
4 cr.

Hunter Core Requirement Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

Option 1

The requirements consist of 8 credits of introductory physics courses

PHYS 11100 (STEM) and PHYS 12000 (STEM) preferred

and a 22-credit concentration in physics courses at the 200 level and higher:

PHYS 22100
PHYS 22200
PHYS 33000
PHYS 33400
PHYS 23000
PHYS 23500
PHYS 33500
Additionally, 15-24 credits of allied courses (mathematics and chemistry) are also required. Together, the introductory physics and the Option 1 concentration (30 credit total) satisfy the major requirement for initial certification as a teacher of physics in grades 7-12. Option 1, together with the MA (see the Accelerated BA/MA Program in Physics), is recommended for students planning to pursue a PhD in physics.

**Preparation for Teaching**

The Option 1 major in physics satisfies the requirements for NY State initial certification of at least 30 credits for teachers in adolescent education: physics (grades 7-12). Students planning to become physics teachers at the secondary level should take the 23-credit sequence in secondary education.

Students preparing to teach physics are advised to include the following courses or their equivalents in their undergraduate program:

**MATH 25400 - Ordinary Differential Equations**

**GER**

3/B

First-order equations, second-order linear equations and linear systems, power series solutions, transform and numerical methods, introduction to qualitative theory.

*prereq: MATH 25000*

3 hrs

3 cr.

**CHEM 10200 (STEM) - General Chemistry I**

**Hunter Core**

Scientific World (SW); Life and Physical Sciences (LPS)

**GER**

2/E

In-depth introduction to stoichiometric calculations, atomic and molecular structure and chemical bonding.

*Primarily for pre-med, medical laboratory sciences and science majors.*

*prereq or coreq: MATH 12500, 12600 or equiv.*

5 hrs (4 lec, 1 rec)

4 cr.

**CHEM 10400 (STEM) - General Chemistry II**

**Hunter Core**

Life and Physical Sciences (LPS) Scientific World (SW)

**GER**

2/E

In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.

*Primarily for premed, medical laboratory sciences and science majors.*

*prereq: CHEM 10200 with grade of C or better or CHEM 10000 with perm chair*

5 hrs (4 lec, 1 rec)

4 cr.
CHEM 10600 (STEM) - General Chemistry Laboratory

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
GER 2/E
Experiments designed to illustrate the fundamental laws of chemistry. The course is equivalent one year of general chemistry laboratory.
Credit not given for CHEM 10600 and CHEM 10300 or CHEM 10500. Primarily for pre-med, medical laboratory sciences and science majors.

prereq: CHEM 10200

coreq: CHEM 10400

6 hrs
3 cr.

ASTRO 10100 - Basic Concepts of Astronomy with Laboratory Exercises

GER
2/E with lab

An introductory, one-semester astronomy course designed for non-science majors. Topics include: basic observational features of the night sky, and their explanations; Kepler’s laws of planetary motion; Newton’s laws of motion and gravitation. Properties of light, and how it reveals the nature of its source. Origin, properties, and evolution of our solar system. The origin and evolution of stars, including giants, dwarfs, supernovae, neutron stars, and black holes. Structure of The Milky Way and other type of galaxies. Cosmology, Hubble’s Law and the expanding universe, from the Big Bang to the present, future scenarios.
The lab consists of traditional hardware experiments and virtual online experiments. Students taking this course will be required to submit online and hard-copy laboratory reports.

5 hrs
4 cr.

GEOL 10000 - Introductory to Geology

Hunter Core
Scientific World (SW)

GER
2/E

Introduction to Geology is the study of the physical aspects of our planet. The goal of this course is to provide students with a basic understanding of the forces continuously shaping the surface of our planet and the influence they have on our environment, so that their appreciation and interest in our planet is heightened. At the same time, this course provides a strong fundamental background for students who want to pursue more advanced geological and environmental studies courses.

3 hrs lec
3 cr.
Offered fall and spring.

BIOL 10000 (STEM) - Principles of Biology I

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
PD/C or D
GER
2/E

The chemical basis of life; basic structure and function of pro- and eukaryotic cells; bioenergetics; Mendelian and molecular genetics; development and mechanisms of control of gene expression at all levels; population genetics and evolution.

Material Fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.

prereq: MATH 12500, CHEM 10200
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
spring only

Physics Option 2

Return to Programs and Courses in Physics & Astronomy

(Biophysics concentration) is recommended for students planning to pursue graduate studies and industrial R&D in biological related areas in physics, chemistry, bioengineering, and material sciences. This concentration is designed to allow the students to gain a solid foundation in physics and biology, together with a specially-designed course in biophysics which demonstrates the disciplinary interface between the two. The concentration requirements consist of courses in physics (26 cr), mathematics (12 cr), chemistry (15 cr) and biology (18 cr) and 8 credits of electives (at least 4 must be in physics).

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

MATH 12500 (STEM) - Precalculus

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Functions and their graphs: polynomial, rational, exponential, logarithmic and trigonometric functions; conic sections; topics in trigonometry; graphical and analytical solutions to systems of equations and inequalities. Not credited to students who have completed MATH 15000 or its equivalent.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
4 hrs
4 cr.

MATH 12600 - Precalculus Technology Laboratory

Students are introduced to MATHEMATICA as a tool for exploring qualitative features of functions and solving precalculus problems: simplifying algebraic expressions, solving equations, plotting functions and curves, finding and approximating zeros and solving systems of equations. MATH 12600 cannot be taken for credit after a student has passed MATH 15000. Students who have passed MATH 15000 should register for MATH 15400 to satisfy the symbolic proficiency requirement.
prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: MATH 12500
2 hrs
1 cr.

**Hunter Core Requirement** Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

Option 2

Courses in Physics (26 credits)

**PHYS 11100 (STEM) - General Physics: Introductory Course in Mechanics, Heat, and Sound**

*Hunter Core*
Scientific World (SW) Life and Physical Sciences (LPS)
**GER**
2/E

For physics and other science majors. First semester of a two-semester introductory physics course using calculus.
*prereq or coreq: coreq (with perm dept.): MATH 15000*
8 hrs (4 lec, 3 lab, 1 rec)
5.5 cr.

**PHYS 12100 (STEM) - General Physics: Introductory Course in Electricity and Magnetism, Light, and Atomic Physics**

*Hunter Core*
Scientific World (SW); Life and Physical Sciences (LPS)
**GER**
2/E

Second semester of PHYS 11100 (STEM), a two-semester introductory physics course using calculus.
*prereq: PHYS 11000 or 11100*
*prereq or coreq: (with perm dept.): MATH 15500*
8 hrs (4 lec, 3 lab, 1 rec)
5.5 cr.

**PHYS 33000 - Atomic and Nuclear Physics**

Examines experimental evidence and develops modern view of structure of atom and nucleus.
*prereq: PHYS 12000 or 12100*
*prereq or coreq: MATH 25000*
4 hrs
4 cr.
PHYS 33400 - Intermediate Electricity and Magnetism

Electrostatics, currents, magnetism, and introduction to electromagnetic theory of light.
prereq: PHYS 12000 or 12100
prereq or coreq: MATH 25000
4 hrs
4 cr.

PHYS 33600 - Thermodynamics and Statistical Mechanics

Study of fundamental ideas of heat, reversibility, and entropy. Introduction to statistical nature of some physical laws.
prereq: PHYS 12000 or 12100; MATH 25000
4 hrs
4 cr.

PHYS 42000 - Introduction to Biophysics

A comprehensive introduction to the interface between physics and biology and the application of the techniques of physics to understanding biological systems, focusing on developing an understanding of the thermodynamics of living systems, on the physical kinematics of macromolecules and other biological structures and on the theory of physical techniques that are used in the study of biological systems.
prereq or coreq: PHYS 33000, PHYS 33600, BIOL 30000, CHEM 37600.
4 hrs
4 cr.

Mathematics (12 cr)

MATH 15000 (STEM) - Calculus with Analytic Geometry I

Hunter Core
Math/Quantitative Reasoning
GER 1/B

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.
prereq: grade of C or better in MATH 12500 or appropriate score on placement exam.
4 hrs
4 cr.

MATH 15500 (STEM) - Calculus with Analytic Geometry II

Hunter Core
Math/Quantitative Reasoning
GER 1/B

Differentiation and integration of transcendental functions, integration techniques, infinite sequences and series, improper integrals, polar coordinates.
prereq: grade of C or better in MATH 15000
4 hrs
4 cr.
MATH 25000 - Calculus with Analytic Geometry III

GER
3/B

Vector geometry, dot and cross products, partial derivatives, matrices, determinants, Jacobians, multiple integration.

prereq: MATH 15500
4 hrs
4 cr.

Chemistry (15 cr)

CHEM 10200 (STEM) - General Chemistry I

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
2/E

In-depth introduction to stoichiometric calculations, atomic and molecular structure and chemical bonding. Primarily for pre-med, medical laboratory sciences and science majors.

prereq or coreq: MATH 12500, 12600 or equiv.
5 hrs (4 lec, 1 rec)
4 cr.

CHEM 10400 (STEM) - General Chemistry II

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
GER
2/E

In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.

Primarily for premed, medical laboratory sciences and science majors.

prereq: CHEM 10200 with grade of C or better or CHEM 10000 with perm chair
5 hrs (4 lec, 1 rec)
4 cr.

CHEM 10600 (STEM) - General Chemistry Laboratory

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
Pluralism and Diversity
GER 2/E

Experiments designed to illustrate the fundamental laws of chemistry. The course is equivalent one year of general chemistry laboratory. Credit not given for CHEM 10600 and CHEM 10300 or CHEM 10500. Primarily for pre-med, medical laboratory sciences and science majors.

prereq: CHEM 10200
coreq: CHEM 10400
6 hrs
3 cr.

CHEM 22200 - Organic Chemistry Lecture I

GER
GER 3/B

Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

prereq: CHEM 10400 with a grade of C or better
5-6 hrs (4 lec, 1-2 recitation/workshop)
4 cr.

CHEM 22400 - Organic Chemistry Lecture II

GER
GER 3/B

Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

prereq: CHEM 22200 with a grade of C or better
5-6 hrs (4 lec, 1-2 recitation/workshop)
4 cr.

Biology (18 cr)

BIOL 10000 (STEM) - Principles of Biology I

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
Pluralism and Diversity
PD/C or D
GER
2/E

The chemical basis of life; basic structure and function of pro- and eucaryotic cells; bioenergetics; Mendelian and molecular genetics; development and mechanisms of control of gene expression at all levels; population genetics and evolution.
Material Fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.
prereq: MATH 12500, CHEM 10200
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
spring only

BIOL 10200 (STEM) - Principles of Biology II

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
Pluralism and Diversity
Taxonomy; homeostasis; internal transport and gas exchange in plants and animals; plant hormones; osmoregulation; mechanisms of action in the muscular, nervous and neuroendocrine systems; the senses, behavior; ecology.

Material fee: $5

PD credit awarded only upon completion of BIOL 10000 and 10200.

prereq: BIOL 10000 or perm instr, MATH 10100 or equiv.
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
fall only

**BIOL 30000 - Biological Chemistry**

GER
3/B

Molecular aspects of cellular function; properties of biomolecules, their biosynthesis and breakdown; structure and function of proteins and enzymes, metabolites, membranes and nucleic acids; cellular mechanisms of energy transduction; integration and control of cell metabolism. Experiments cover a variety of modern techniques in molecular biology.

Material Fee: $10

prereq: BIOL 20200, CHEM 22200, 22300
coreq: CHEM 22400
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
fall only

and 8 cr of electives

At least 4 credits must be in physics

**Physics Option 3**

Return to Programs and Courses in Physics & Astronomy

(Laser and fiber optics concentration) is recommended for those interested in a career in the telecommunications industry, as it includes a foundation in lasers and fiber optics.

**Foundational Courses**

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

**MATH 12500 (STEM) - Precalculus**

**Hunter Core**
Math/Quantitative Reasoning
GER
Functions and their graphs: polynomial, rational, exponential, logarithmic and trigonometric functions; conic sections; topics in trigonometry; graphical and analytical solutions to systems of equations and inequalities. Not credited to students who have completed MATH 15000 or its equivalent.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
4 hrs
4 cr.

**MATH 12600 - Precalculus Technology Laboratory**

Students are introduced to MATHEMATICA as a tool for exploring qualitative features of functions and solving pre-calculus problems: simplifying algebraic expressions, solving equations, plotting functions and curves, finding and approximating zeros and solving systems of equations. MATH 12600 cannot be taken for credit after a student has passed MATH 15000. Students who have passed MATH 15000 should register for MATH 15400 to satisfy the symbolic proficiency requirement.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: MATH 12500
2 hrs
1 cr.

**Hunter Core Requirement**

Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

**Option 3**

Eight (8) credits of introductory physics are required

Recommended

**PHYS 11100 (STEM) - General Physics: Introductory Course in Mechanics, Heat, and Sound**

**Hunter Core**

Scientific World (SW) Life and Physical Sciences (LPS)

GER

2/E

For physics and other science majors. First semester of a two-semester introductory physics course using calculus.

prereq or coreq: coreq (with perm dept.): MATH 15000
8 hrs (4 lec, 3 lab, 1 rec)
5.5 cr.

**PHYS 12100 (STEM) - General Physics: Introductory Course in Electricity and Magnetism, Light, and Atomic Physics**
Second semester of PHYS 11100 (STEM), a two-semester introductory physics course using calculus.

prereq: PHYS 11000 or 11100
prereq or coreq: (with perm dept.): MATH 15500
8 hrs (4 lec, 3 lab, 1 rec)
5.5 cr.

May be taken instead

PHYS 11000 (STEM) - General Physics: Introductory Course in Mechanics, Heat, and Sound

First semester of two-semester introductory physics course using algebra.

prereq: MATH 12500; pre-calculus or equiv. By math dept. exam.
7 hrs (3 lec, 3 lab, 1 rec)
4.5 cr.

PHYS 12000 (STEM) - General Physics: Introductory Course in Electricity and Magnetism, Light, and Atomic Physics

Second semester of PHYS 11000 (STEM), a two-semester introductory physics course using algebra.

prereq: PHYS 11000 or 11100
7 hrs (3 lec, 3 lab, 1 rec)
4.5 cr.

No more than 8 credits toward the major can be obtained from these courses. It is recommended that the following be taken, if the PHYS 110-120 sequence is taken instead of the PHYS 111-121 sequence.

PHYS 19000 - Tutorial in Mathematical Physics

Applications of differential and integral calculus to selected topics chosen from the major subfields of physics.
Completion of this course and its prerequisites is equivalent to completion of the calculus-based general physics sequence, PHYS 11100 and 12100.

prereq: MATH 15500, PHYS 12000
3 hrs (2 lec, 1 rec)
2 cr.
(15 cr) are required in addition to one year of high school chemistry or college chemistry

**MATH 15000 (STEM) - Calculus with Analytic Geometry I**

**Hunter Core**
Math/Quantitative Reasoning
**GER**
1/B

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.
*prereq: grade of C or better in MATH 12500 or appropriate score on placement exam.*
4 hrs
4 cr.

**MATH 15500 (STEM) - Calculus with Analytic Geometry II**

**Hunter Core**
Math/Quantitative Reasoning
**GER**
1/B

Differentiation and integration of transcendental functions, integration techniques, infinite sequences and series, improper integrals, polar coordinates.
*prereq: grade of C or better in MATH 15000*
4 hrs
4 cr.

**MATH 25000 - Calculus with Analytic Geometry III**

**GER**
3/B

Vector geometry, dot and cross products, partial derivatives, matrices, determinants, Jacobians, multiple integration.
*prereq: MATH 15500*
4 hrs
4 cr.

**MATH 25400 - Ordinary Differential Equations**

**GER**
3/B

First-order equations, second-order linear equations and linear systems, power series solutions, transform and numerical methods, introduction to qualitative theory.
*prereq: MATH 25000*
3 hrs
3 cr.

All four courses of the sequence are required
No more than 4 credits of the sequence PHYS 231-234 may be used toward the major.

**PHYS 23100 - Fundamentals of Laser and Fiber Optics**

**GER**

3/B

Topics in optics related to lasers and optical fiber and devices for modulating and directing signals from such devices. Geometrical optics with emphasis on ray tracing. Matrix methods in optics. Lenses thick and thin, mirrors, prisms and other passive optical elements and systems. Propagation of light in materials. Dispersion and its effects. Special topics in geometric and wave optics. Laboratory complements classwork.  
*prereq: PHYS 12000 or 12100 or equiv; MATH 12500*  
5 hrs  
4 cr.

**PHYS 23200 - Laser and Electro-Optics Technology**

**GER**

3/B

Wave optics, interference, coherence, polarization, birefringence, diffraction, gratings in two and three dimensions, power and energy measurements, basics of laser safety, ultra-fast pulse technology measurements, basics of laser safety, ultra-fast pulse technologies, electro-optics and acoustooptics switches, optical materials, non-linear optics. Laboratory complements classwork.  
*prereq: PHYS 23100*  
7 hrs  
5 cr.

**PHYS 23300 - Laser Electro-Optics Devices, Measurements and Applications**

**GER**

3/B

Laser as a device, principle of operation, cavity modes and their control (tuning elements, Q switching, mode-locking) and detection, laser design, types of lasers, includes discussion of laser types for medical, ranging and tracking, material processing, pollution monitoring, and optical memory applications, semiconductor laser. Laboratory complements class work.  
*prereq: PHYS 23100*  
6 hrs  
4 cr.

**PHYS 23400 - Fiber Optics Devices, Measurements, and Applications**

**GER**

3/B

*prereq: PHYS 23100*
Undergraduate Major/Graduate Major

Physics - BA/MA

This special program for a limited number of well qualified students leads to a bachelor of arts and a master of arts degree. Students are offered the opportunity to quickly reach a level where they are competitive for admission into any doctoral program in physics. The program requires 124-126 credits (including the 30 credits required for a physics major BA degree and 30 credits from the graduate curriculum). Because this program requires a large number of physics courses, many of which have other physics courses as prerequisites, students in this program should begin taking physics courses in their first or second semester. Students should consult with the department chair, undergraduate adviser or graduate adviser for details as early as possible.

Undergraduate Minor

Minor in Physics

A minor in Physics consists of a minimum of 12 credits of PHYS courses, including two courses numbered above 200 or one course numbered above 300. Students who wish to enroll in the Physics Minor must have completed:

- MATH 15000
- MATH 15500.

The prerequisites for the 300-level courses include MATH 25000 and/or MATH 25400.

Astronomy

Astronomy courses are offered by the Department of Physics and Astronomy

ASTRO 10000 - Basic Concepts in Astronomy

**Hunter Core**
Scientific World (SW)
GER
2/E

This is an introductory, one-semester astronomy course designed for non-science majors. The approach in this course is to emphasize the ideas of Astronomy and a qualitative understanding of the physical processes that shape the Universe.
3 hrs.
3 cr.

**ASTRO 10100 - Basic Concepts of Astronomy with Laboratory Exercises**

**GER**
2/E with lab

An introductory, one-semester astronomy course designed for non-science majors. Topics include: basic observational features of the night sky, and their explanations; Kepler’s laws of planetary motion; Newton’s laws of motion and gravitation. Properties of light, and how it reveals the nature of its source. Origin, properties, and evolution of our solar system. The origin and evolution of stars, including giants, dwarfs, supernovae, neutron stars, and black holes.
Structure of The Milky Way and other type of galaxies. Cosmology, Hubble’s Law and the expanding universe, from the Big Bang to the present; future scenarios.
The lab consists of traditional hardware experiments and virtual online experiments. Students taking this course will be required to submit online and hard-copy laboratory reports.

5 hrs
4 cr.

**ASTRO 10200 - Laboratory Explorations in Astronomy**

**Hunter Core**
Life and Physical Sciences (LPS)

**GER**
2/E

This is an introductory, one-semester astronomy course designed for non-science majors. The approach in this course is to emphasize the ideas of Astronomy and a qualitative understanding of the physical processes that shape the Universe via laboratory exercises. Each laboratory exercise is self-contained and accompanied with an introduction discussing the fundamental physical principle and methods used.

*prereq or coreq: ASTRO 10000*

3 hrs
3 cr.

**ASTRO 10300 - Laboratory Explorations in Astronomy**

This is an introductory, one-semester astronomy course designed for non-science majors. The approach in this course is to emphasize the ideas of Astronomy and a qualitative understanding of the physical processes that shape the Universe via laboratory exercises. Each laboratory exercise is self-contained and accompanied with an introduction discussing the fundamental physical principle and methods used.

*prereq: ASTRO 10000*

3 hr.
3 cr.

**ASTRO 10700 - Laboratory Exercises in Astronomy**

**GER**
2/E

Classroom and online experimental laboratory exercises in astronomy to observe the major features of the night sky, demonstrate the physical basis of astronomical instruments, and experiment with astronomical phenomena. Only offered to students who have previously taken ASTRO 100 which is no longer offered [ASTRO 100 + ASTRO 107 are
replaced by ASTRO 10100.

prereq or coreq: ASTRO 10000
2 hrs
1 cr.

Astronomy: Courses Less Frequently Offered

ASTRO 18100 - Astronomy of the Solar System

ASTRO 18200 - Stellar Astronomy

Physics

PHYS 10000 - Basic Concepts of Physics

Hunter Core
Scientific World (SW)
GER
2/E

This is an introductory, one-semester physics course designed for non-science majors. It minimizes the use of mathematics, beyond simple addition, multiplication, subtraction and division. The course will meet three hours per week in lecture. The contents are the lecture material of the existing PHYS 101 LC course. Topics include: Newton's laws of motion, linear motion and falling objects, momentum, energy, rotational motion, gravity, atomic structure, liquids, gases, heat, vibrations and waves, sound, electrostatics, electric current, magnetism, electromagnetic induction, light, color, reflection and refraction, an introduction to quantum mechanics, and radioactivity. This course is a co-requisite or pre-requisite of PHYS 10100, which consists of traditional lab experiments and guided problem-solving sessions, that are closely correlated with the lecture material covered in this course.
3 hrs
3 cr.

PHYS 10100 - Basic Concepts of Physics with Laboratory Exercises

Hunter Core
Life and Physical Sciences (LPS)
GER
2/E

Introductory one-semester physics lab-based course designed for non-science majors. The course emphasizes the basic concepts of physics, and a qualitative understanding of physics in everyday life.
prereq or coreq: PHYS 10000
3 hrs
3 cr.

PHYS 11000 (STEM) - General Physics: Introductory Course in Mechanics, Heat, and Sound
**PHYS 11100 (STEM) - General Physics: Introductory Course in Mechanics, Heat, and Sound**

**Hunter Core**  
Life and Physical Sciences (LPS); Scientific World (SW)  
GER  
2/E  

First semester of two-semester introductory physics course using algebra.  
*prereq: MATH 12500; pre-calculus or equiv. By math dept. exam.*  
7 hrs (3 lec, 3 lab, 1 rec)  
4.5 cr.

**PHYS 12000 (STEM) - General Physics: Introductory Course in Electricity and Magnetism, Light, and Atomic Physics**

**Hunter Core**  
Scientific World (SW) Life and Physical Sciences (LPS)  
GER  
2/E  

For physics and other science majors. First semester of a two-semester introductory physics course using calculus.  
*prereq or coreq: coreq (with perm dept.): MATH 15000*  
8 hrs (4 lec, 3 lab, 1 rec)  
5.5 cr.

**PHYS 12100 (STEM) - General Physics: Introductory Course in Electricity and Magnetism, Light, and Atomic Physics**

**Hunter Core**  
Scientific World (SW); Life and Physical Sciences (LPS)  
GER  
2/E  

Second semester of PHYS 11000 (STEM), a two-semester introductory physics course using algebra.  
*prereq: PHYS 11000 or 11100*  
7 hrs (3 lec, 3 lab, 1 rec)  
4.5 cr.

**PHYS 19000 - Tutorial in Mathematical Physics**
Applications of differential and integral calculus to selected topics chosen from the major subfields of physics. Completion of this course and its prerequisites is equivalent to completion of the calculus-based general physics sequence, PHYS 11100 and 12100.

**Prerequisite:** MATH 15500, PHYS 12000

3 hrs (2 lec, 1 rec)

2 cr.

**PHYS 20400 - Electrical Circuits and Laboratory**

**GER**

3/B

Passive electrical circuits and computer-based data acquisition and analysis, including basic circuit laws, methods of circuit analysis, circuit theorems, operational amplifiers, capacitors and inductors, sinusoids and phasors, sinusoidal steady state analysis, frequency response, and test and measurement instruments, virtual instruments, and data acquisition software.

**Prerequisite:** PHYS 12100

**Prerequisite or Corequisite:** MATH 25400

5 hrs (3 lec, 2 lab)

4 cr.

**PHYS 22100 - Electronics**

**GER**

3/B

**Prerequisite:** PHYS 12000 or PHYS 12100

4 hrs

4 cr.

**PHYS 22200 - Electronics Laboratory**

**GER**

3/B

Experiments are performed with passive devices (capacitors, inductors, resistors) and active devices (diodes, transistors). A variety of transistor amplifier and oscillator circuits are studied as well as integrated circuit applications.

**Prerequisite:** PHYS 22100

4 hrs

2 cr.

**PHYS 22400 - Analog and Digital Electronics and Laboratory**

**GER**

3/B

Semiconductor devices and circuits, including properties of semiconductors, diodes, transistors, amplifiers, oscillators, and digital circuits.

**Prerequisite:** PHYS 20400
PHYS 23000 - Classical Physics Laboratory

GER
3/B

Selected experiments of mechanics, electricity/magnetism, and thermodynamics. Experiments may include driven oscillator resonance, coupled oscillators, liquid nitrogen heat of vaporization, Fourier analysis/filtering, ferromagnetic hysteresis, and the nonlinear pendulum period. Elementary error analysis techniques and computer software for data analysis/graphing.

prereq: PHYS 12000 or 12100

PHYS 23100 - Fundamentals of Laser and Fiber Optics

GER
3/B

Topics in optics related to lasers and optical fiber and devices for modulating and directing signals from such devices. Geometrical optics with emphasis on ray tracing. Matrix methods in optics. Lenses thick and thin, mirrors, prisms and other passive optical elements and systems. Propagation of light in materials. Dispersion and its effects. Special topics in geometric and wave optics. Laboratory complements classwork.

prereq: PHYS 12000 or 12100 or equiv; MATH 12500

PHYS 23200 - Laser and Electro-Optics Technology

GER
3/B

Wave optics, interference, coherence, polarization, birefringence, diffraction, gratings in two and three dimensions, power and energy measurements, basics of laser safety, ultra-fast pulse technology measurements, basics of laser safety, ultra-fast pulse technologies, electro-optics and acoustooptics switches, optical materials, non-linear optics. Laboratory complements classwork.

prereq: PHYS 23100

PHYS 23300 - Laser Electro-Optics Devices, Measurements and Applications

GER
3/B

Laser as a device, principle of operation, cavity modes and their control (tuning elements, Q switching, mode-locking) and detection, laser design, types of lasers, includes discussion of laser types for medical, ranging and tracking, material processing, pollution monitoring, and optical memory applications, semiconductor laser. Laboratory complements class work.

prereq: PHYS 23100
PHYS 23400 - Fiber Optics Devices, Measurements, and Applications

GER
3/B

prereq: PHYS 23100
6 hrs
4 cr.

PHYS 23500 - Modern Physics Laboratory

GER
3/B

Selected experiments of quantum physics and optics. Experiments may include nuclear half-life, microwave diffraction, Bragg scattering of x-rays, nuclear multichannel scintillation, Franck-Hertz quantum levels, Millikan oil drop. Error analysis techniques including Gauss and Poisson distributions and correlation of data. Programming for data analysis.

prereq: PHYS 12000 or 12100
4 hrs
2 cr.

PHYS 30100 - Theoretical Physics

Analysis of mathematical techniques for solving partial differential equations occurring in physics. Cross-listed as MATH 301.

prereq: MATH 25400
4 hrs
4 cr.

PHYS 31100 - Introduction to Fluid Mechanics

This course covers the basic principles of fluid mechanics include statics, forces on plane and curve surfaces, kinematics of fluid motion, integral and differential representation of conservation of mass, linear momentum, the first Law of Thermodynamics, Bernoulli’s equation, dimensional analysis, and elementary viscous flow. Frictional losses in laminar flow and simple pipe flow analysis are covered. Understanding of the physical phenomena is stressed and vector notation is introduced and used whenever suitable.

cross-listed PGEOG 31100
prereq: PHYS 12100 or PHYS 12000 and MATH 15500

3 hrs
3 cr.

PHYS 33000 - Atomic and Nuclear Physics
Examines experimental evidence and develops modern view of structure of atom and nucleus.

**PHYS 33400 - Intermediate Electricity and Magnetism**

Electrostatics, currents, magnetism, and introduction to electromagnetic theory of light.

**PHYS 33500 - Intermediate Mechanics**

Study of laws of motion and coordinate systems; introduction to powerful analytical techniques.

**PHYS 33600 - Thermodynamics and Statistical Mechanics**

Study of fundamental ideas of heat, reversibility, and entropy. Introduction to statistical nature of some physical laws.

**PHYS 34200 - Optics**

Study of lenses, mirrors, interference, diffraction, and polarization, as well as lasers, holography, and Fourier optics.

**PHYS 38500 - Numerical Methods I**

Accuracy and precision, convergence, iterative and direct methods. Topics selected from: solution of polynomial equations and linear systems of equations, curve fitting and function approximation, interpolation, differentiation and integration, differential equations. Cross-listed as MATH 38500 and CSCI 38500 so that students in the mathematics and computer science departments can use the course toward the completion of their major requirements.

**PHYS 39900 - Senior Thesis (W)**

This course is to prepare the students for graduate research. Each student will undertake a research experience, experimental, theoretical, and/or computational, under the supervision of a department faculty member. A final oral as
well as written report will be required. The goals are that the student learns research skills in physics, written and oral communication skills, while furthering their knowledge in a topical area in physics.

prereq: PHYS 11100, 12100

prereq or coreq: ENGL 12000, and at least four 200-, 300-, or 400-level physics courses
3 cr.

PHYS 41100 - Theoretical Mechanics

Classical mechanics of particles and rigid bodies; special relativity; Hamilton's formulation; Liouville's theorem.
prereq: PHYS 33500
prereq or coreq: MATH 25400
3 hrs
3 cr.

PHYS 41500 - Electromagnetic Theory

Electrostatics; vector analysis, electrostatics, electric fields in matter, magnetostatics, magnetic fields in matter, electrodynamics based on Maxwell equations, and conservation laws.
prereq: PHYS 33400 or PHYS 12100 with permission
prereq or coreq: MATH 25400
3 hrs
3 cr.

PHYS 41600 - Electromagnetic Theory II

Electromagnetic waves, guided waves, potential and fields, radiation, electrodynamics and relativity.
prereq: PHYS 41500
3 hrs
3 cr.

PHYS 42000 - Introduction to Biophysics

A comprehensive introduction to the interface between physics and biology and the application of the techniques of physics to understanding biological systems, focusing on developing an understanding of the thermodynamics of living systems, on the physical kinematics of macromolecules and other biological structures and on the theory of physical techniques that are used in the study of biological systems.
prereq or coreq: PHYS 33000, PHYS 33600, BIOL 30000, CHEM 37600.
4 hrs
4 cr.

PHYS 42400 - Plasma Physics

Motion of charged particles in external magnetic and electrical field; fusion using tokamaks, mirrors, and lasers.
prereq: PHYS 33400
3 hrs
3 cr.

PHYS 42500 - Quantum Theory
From Bohr model and DeBroglie waves to Schrödinger wave equation; solutions for simple cases; transformations.

**Prerequisite:** PHYS 33000.

**Prerequisite or Corequisite:** MATH 25400

3 hrs

3 cr.

**PHYS 42700 - Intermediate Physics Laboratory**

Study of modern experimental techniques in variety of fields.

**Prerequisite:** PHYS 23500

4 hrs

2 cr.

**PHYS 42800 - Photonics and Laboratory**

Theoretical principles and practical training of selected subjects of modern optics and lasers.

**Prerequisite:** PHYS 33000, PHYS 22200 or 22400

**Corequisite:** PHYS 41600 or PHYS 33400

4 hrs

2 cr.

**PHYS 44500 - Solid State Physics**

Energy levels in atoms, molecules, and solids; crystal structure; properties of solids; semiconducting devices.

**Prerequisite:** PHYS 33000

3 hrs

3 cr.

**PHYS 45300 - Introduction to Research**

Independent theoretical or experimental research or independent study of approved topic.

**Prerequisite:** PHYS 33000, 33400, 33500, and 42700 or perm chair

1-3 cr.

**PHYS 45400 - Introduction to Research**

Independent theoretical or experimental research or independent study of approved topic.

**Prerequisite:** PHYS 45300 or perm chair

1 to 3 cr.

**PHYS 48500 - Numerical Methods II**

Topics in numerical methods selected from solutions of linear equations, interpolating functions, root finding methods, nonlinear equations, Fourier series and the fast Fourier transform, partial differential equations. A major term project will be assigned. Cross-listed as MATH 48500 and CSCI 48500 so that students in the mathematics and computer science departments can use the course toward the completion of their major requirements.

**Cross-listed:** CSCI 48500 and MATH 48500

**Prerequisite:** PHYS 38500

3 hrs

3 cr.
Physics: Courses Less Frequently Offered

PHYS 24000 - Physics of Biological Systems

Political Science Faculty  

HEGIS Code 2207  

Undergraduate Major  

Political Science - BA  

Major  

30 cr for students declaring after September 1, 2009  
Majors are required to take at least one course in each of the four following subfields of the discipline:  

1. American Government  
2. Political Theory  
3. Comparative Politics  
4. International Relations  

Students may distribute their remaining courses in the major as they see fit. However, students contemplating graduate work are encouraged to specialize appropriately in consultation with the department's faculty members.  

For students declaring after September 1, 2009, no more than two introductory (100-level) courses can be applied toward the major. Majors must complete at least three courses at the 300-level or above in any subfield.  

No more than 6 credits in internship, independent study, and/or experiential courses (such as Model United Nations) may be used to satisfy the 30 credits in the major. Also, such credits may not be used to satisfy the distribution requirements in the four fields. Courses taken for Credit/No Credit may not be applied toward the major.  

Hunter Core Requirement  

Several courses leading to or in this major fulfill parts of the Hunter Core Requirement (CUNY Common Core, Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student's advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path of the major. Details of the Hunter Core Requirement can be found here: Hunter Core Requirement.  

In the case of political science, the courses that meet CCC are:
Course

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLSC 11000</td>
<td>US Experience in its Diversity</td>
</tr>
<tr>
<td>POLSC 10000</td>

<tr>
<td>POLSC 25000</td>
<td>World Culture/Global Issues</td>
</tr>
<tr>
<td>POLSC 20000</td>
<td>Individual and Society</td>
</tr>
</tbody>
</table>

Please note that no more than two courses from any one department will count for the CUNY Common Core.

**Minor in Political Science**

Students minoring in political science must complete 12 credits in political science. No more than three credits can be at the 100-level. No more than three credits in independent study can be used to satisfy the minor. Internship credits may not be applied toward the minor.

The minor in Political Science is designed to provide students with solid grounding in political science and to encourage them to develop depth in the discipline in an area that will complement their major or develop expertise in an area of particular interest to them. To complete a minor in Political Science, students must complete 12 credits in Political Science with no more than 3 credits at the 100 level. Students may apply up to 3 credits of independent study in Political Science POLSC 29001-29003); however, internship credit may not be applied to the minor.

The minor in Political Science offers students considerable flexibility in designing a minor that will best serve their academic goals. Students may, for instance, wish to focus on courses dealing with European politics and foreign policy to complement a major in a European language and culture. Other students may wish to emphasize courses in international and public law in preparation for law school. Students may concentrate their courses in one field of political science, or spread them across several fields. Students may consult an advisor in the Department of Political Science about their goals as they choose courses to satisfy the minor.

**Interdepartmental Fields**

Political Science department faculty are actively involved in many interdisciplinary programs at Hunter College. Students who want to do work in political science as part of the following interdepartmental programs should refer to the appropriate programs in this catalog.

Minor in Asian American Studies,

Human Rights,

Jewish Studies - BA,

Latin American and Caribbean Studies - BA,

Public Policy,

Women and Gender Studies - BA

**Honors**
To complete the requirements for departmental honors in Political Science at graduation, students must have at least 30 credits in Political Science and be eligible for graduation in the semester that they formally complete department honors. At least 21 of these credits (or in exceptional cases, 18) must be taken in the Political Science Department at Hunter College. In the case of transfer students, the student’s faculty supervisor must recommend an exception to this policy; however, in no case should a student who has taken fewer than 15 credits in academic coursework (excluding internships or other experiential education courses) in political science at Hunter College be recommended for departmental honors.

In addition, students must 1) have a GPA in the major of not less than 3.5; 2) have completed at least two credits (but not more than 6) in coursework specifically designated for honors (POLSC 492xx); 3) work on the thesis with one Supervisor who must be a full-time political science faculty member.

The thesis should be a major paper of approximately 25 pages in length that reflects serious scholarship in an honors course. Students should enroll in POLSC 49202-49203 under the supervision of a faculty member with whom the student has done prior coursework and who has agreed to supervise the student’s honors project. Students seeking to graduate with departmental honors should begin to plan the sequence of honors work at least two semesters in advance of their expected graduation date.

Approval for Honors will come from the Supervisor. Once students have received the approval of the Sponsor, the thesis can be submitted for departmental honors. Successful completion of departmental honors includes a formal presentation of the thesis to the Honors Committee. Final papers must be deposited in the department office.

Pi Sigma Alpha

Students interested in joining this honor society should consult with Professor Leonard Feldman, 1702 Hunter West, (212)396-6246, lfeldman@hunter.cuny.edu.

Writing Corequisite and Prerequisites

Introductory, intermediate and advanced political science courses require significant expository writing and ENGL 12000 as a co- or prerequisite. To assure that students are ready for these courses, they should be enrolled in ENGL 12000 (or its equivalent) or have successfully completed the course. For all 100-level courses, ENGL 12000 (or its equivalent) is a prerequisite or co-requisite; for all 200-level, 300-level and 400-level courses, ENGL 12000 (or its equivalent) is a prerequisite.

Seminar/Internship Program in New York Government

This university-wide program is designed to bridge the gap between academic study and the practical world of government. Each year approximately 300 students are selected as CUNY interns. Hunter College students participate by enrolling in POLSC 22200/22300. Interns spend eight to ten hours a week in agencies, political offices or community groups working on administrative or research assignments related to urban affairs and services.

They attend a weekly classroom seminar at Hunter and monthly meetings of the entire program at the CUNY Graduate School. Prominent government officials, political leaders, community representatives and academic experts participate in both the weekly and monthly meetings. Students are advised to have taken prior coursework in American politics and to have at least a 3.0 GPA prior to being admitted to this program. For further information, consult the Department of Political Science.

Other Internships
Students may wish to consider internships in any field of political science, and receive credit through POLSC 29801-29806. The department does not offer internship credits to students in their first semester at Hunter College or to students who have never taken a political science course at Hunter. Up to 6 credits in internship work (POLSC 29801-29806) may be used to satisfy requirements for the major. As a general rule, a student who takes POLSC 29801-29806 must be supervised by a full-time faculty member with whom the student has done prior coursework and who has agreed to supervise the student’s internship. Additional internship credits may be used as electives toward graduation.

**Preparation for Graduate Study**

Many political science majors go on to graduate study. Students considering graduate work should consult members of the political science faculty.

**Awards and Prizes**

The Political Science Department confers recognition on its outstanding graduates through prizes and awards. The Katherine Duffy Prize and The Edgar Dawson Prize are presented annually to graduating political science majors.

**Scholarships**

The Political Science Department may award the Joan Pincus Scholarship to students majoring in political science who have achieved at least sophomore status, have an excellent academic record and have demonstrated financial need. For additional information, see the department chair or a departmental adviser.

**Undergraduate Minor**

**Minor in International Relations**

The International Relations (IR) minor is an inter-disciplinary course of study that allows students to examine international relations from different perspectives within a liberal arts curriculum. The International Relations minor introduces students to the major themes in IR: IR theories and approaches, peace and security, international political economy, foreign policy, and international norms and institutions.

**Requirements**

- 15 credit minor—Students are required to complete at least one course from Group A and at least one course from two of the other four categories (Groups B-E).
- Students can take no more than three courses from one department.
- Students must complete at least one 300-level course to fulfill the requirements of the IR minor.
- No more than two courses from the student’s major can be applied toward the IR minor.

Note: Though not a requirement for the IR minor, students are strongly encouraged to study a foreign language.

**A. IR Theories and Approaches**
These courses teach students the skills necessary to think and write clearly about IR.

**POLSC 27000 - International Relations: Conceptual Foundations and Current Issues (W)**

**GER**
3/B

Examines the conceptual foundations of international relations and their application to current issues. Topics include: anarchy, power, war and peace, international cooperation, the role of the state and non-state actors, international institutions, norms and human rights, and the global economy.

Students may not take both POLSC 11500 and POLSC 27000 at Hunter College for credit. (Transfer students may receive only 100-level credit for a course equivalent for POLSC 11500 after spring 2010, when POLSC 27000 becomes the prerequisite for most advanced courses in international relations.)

*prereq: ENGL 12000 or its equivalent*

3 hrs
3 cr.

**POLSC 37700 - Theories of International Politics (W)**

**GER**
3/B

An examination of the central concepts and issues in international politics that underpin the main theoretical debates in the field.

*prereq: POLSC 11500 or 27000 or 27500 or 28200 or perm. instr.*

*coreq: ENGL 12000 or its equivalent*

3 hrs
3 cr.

**ECO 20000 - Principles of Microeconomics**

**Hunter Core**
Scientific World (SW)

**GER**
2/B

May be taken prior to or concurrently with ECO 20100. Determination of prices and quantities of goods and services, including labor and other resources; competitive and imperfect markets; public policy implications.

*prereq: MATH 10100 or exemption from the course*

3 hrs
3 cr.

**ECO 20100 - Principles of Macroeconomics**

**Hunter Core**
Individual and Society (Social Sciences) - I&S SS

**GER**
2/B
May be taken prior to or concurrently with ECO 20000. Economic growth; fluctuations in the aggregate economy; inflation; monetary and fiscal policy.

prereq: MATH 10100 or exemption from the course

3 hrs
3 cr.

GEOG 24400 - Political Geography

GER
3/B

Political geography concerns the nature and consequences of human efforts to divide and control Earth. Major topics to be covered by this course include the origin and evolution of countries and their constituent political units; the defining and drawing of political boundaries; territorial conflicts and disputes; the impact of boundaries on personal and cultural identity; centripetal and centrifugal forces that encourage the success or failure of political units; jurisprudence, crime and punishment; electoral geography; war, piracy and terrorism; ownership of ocean floors and outer space; the environmental impacts of political power (zoning, incorporation, height restrictions, land tenure); and symbols of power in the landscape. Lectures and assignments will stress the relevancy of political geography to issues that affect our everyday life.

prereq: GEOG 10100 or GEOG 15000 or perm instr

3 hrs
3 cr.

B. Foreign Policy and Analysis

These courses emphasize the foreign policies of countries or regions and research design and methods in IR.

POLSC 20600 - Research Design in Political Science (W)

GER
3/B

Public opinion surveys, content analysis, legislative roll-call analysis, census data, election returns. Introduction to statistics. Uses Social Science Data Lab.

prereq: passing college proficiency exam in math or perm instr; ENGL 12000 or its equivalent

3 hrs
3 cr.

POLSC 27600 - Global Issues (W)

GER
3/B

Examination of current global issues using traditional and critical international relations perspectives. Topics vary each semester: population growth, food insecurity, human trafficking, the future of the euro, immigration challenges in Europe, climate change, resource shortages, global poverty, shared values, and other issues.

prereq: ENGL 12000 or its equivalent

3 hrs
3 cr.
POLSC 27400 - American Foreign Policy (W)

GER
3/B

Personalities and processes in making, administering and controlling our foreign policy.

prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 37800 - Russian National Interest: Past and Present (W)

Pluralism and Diversity
PD/D
GER
3/B

In a contemporary, historical and comparative context, this course explores the factors influencing debates on and definitions of Russia's national interests, the strategies for promoting those interests and the implications for Russia and the international system.

prereq: ENGL 12000 or equiv; POLSC 11500 or POLSC 11700 or perm instr.
3 hrs
3 cr.

ECO 22100 - Economic Statistics

Hunter Core
Mathematics and Quantitative Reasoning
GER
1/B

Probability and statistics in the context of economics, business and public policy; data analysis, probability distributions, and hypothesis testing.

prereq: MATH 12500 or exemption from the course
3 hrs
3 cr.

ACC 27100 - Accounting I

Basic accounting concepts; preparation of financial statements. Emphasis on income determination and financial position.

prereq: upper freshman standing
3 hrs
3 cr.

or

HIST 34100 - Topics in History

GER
3/B
Exploration of major trends, special controversies or significant events; topics vary each term. Courses at the 300-level and above not offered to freshmen.

3 hrs
3 cr.

C. International Norms and Institutions

These courses teach students how global cooperation has been achieved through the creation of international law, international norms, and international institutions.

**POLSC 27800 - International Organizations (W)**

**GER**
3/B

Powers, functions and effectiveness of international institutions; emphasis on United Nations and regional organizations.

*prereq: ENGL 12000 or its equivalent*

3 hrs
3 cr.

**POLSC 28100 - Drugs, Politics and Public Policy (W)**

**GER**
3/B

Examination of public policies addressing drug use and abuse in the United States and other countries with emphasis on political and cultural determinants, economic and market factors, constitutional implications and United States foreign policy.

*prereq: ENGL 12000*

3 hrs
3 cr.

**POLSC 37400 - International Human Rights (W)**

**GER**
3/B

An examination of the origins, substance and processes of human rights in international relations.

*prereq: ENGL 12000 or its equivalent*

3 hrs
3 cr.

**POLSC 37500 - International Law (W)**

**GER**
3/B

Case studies on nature, sources, practices and efficacy of international law, principles and rules.

*prereq: ENGL 12000 or its equivalent*
POLSC 38300 - Power Transitions, the U.S. and World Order (W)

GER
3/B
An examination of global power transitions and their consequences for international competition and order. Draws on theoretical insights to explain patterns in historical and contemporary cases, including the current rise of China and other "BRICS" countries.
prereq: ENGL 12000 (or equivalent), one course in international relations
4 hrs
4 cr.

GEOG 33500 - International Pollution Issues

GER
3/B
A study of international trans-boundary pollution and the science, source terms, transport pathways and international impacts of contamination events. The regional focus will change yearly pending current global environmental events.
prereq: GEOG 101 or GEOL 101 or P GEO 130 or perm instr.
3 hrs
3 cr.

PGEOG 36100 - Global Climatic Change

GER
3/B
Open to Jr/Sr only. An intensive introduction to the study of climate change with emphasis on modern climate change, anthropogenic forcing and measured and predicted consequences of this forcing. Students will develop an understanding of natural climate forcing, natural variability and feedbacks in the climate system while concurrently studying the Earth’s climate history, and modern climate change.
prereq: P GEO 13000 or GEOL 10100 or 10500
3 hrs
3 cr.

SOC 31800 - Sociology of Human Rights in Latin America

GER
3/B
Types of societies in which human rights are respected or violated with special emphasis on Latin American regimes in the last two decades. Human rights and diversity the rights of women and minorities. Movements to protect human rights. The emphasis is on actual social conditions which foster or impede the observance and protection of human rights.
prereq: SOC 10100
3 hrs
3 cr.
D. International Political Economy

These courses emphasize international trade, finance, and development.

**POLSC 27500 - Politics of the Global Economy (W)**

**GER**
3/B

Introduction to International Political Economy (IPE). Examines the dynamic interaction between politics and economics across national borders, including the politics of trade, development, finance, varieties of capitalism, globalization and environmental protection. Not open to students who have taken POLSC 37600.

*prereq: ENGL 12000 or its equivalent

3 hrs
3 cr.

**POLSC 37600 - International Political Economy (W)**

**GER**
3/B

Examination of the intersection of politics and economics at the international level through a careful reading and analysis of dominant theoretical approaches and their application to central debates concerning the politics of trade, money and finance, development and globalization.

*prereq: POLSC 11500 or 27000 or 27500; minimum of 45 credits and 9 credits in political science or permission of the instructor

*coreq: ENGL 12000 or its equivalent

4 hrs
4 cr.

**GEOG 22100 - Economic Geography and Globalization**

**GER**
2/B

An introduction to the sub-discipline of economic geography, which will include an exploration of the history of both economics and geography, and a rigorous global approach to the subjects. Students will come to understand the history of the development of economic thought, leading up to, and transformed, by today’s crisis, as well as the particularly geographical nature of economic phenomena and processes, and the immense contributions geographers have made to the understanding of economics. Course focus is on the dominant form of global economic activity today, which is capitalistic, and the way this economic structure plays out through different geographies at different historical moments in time.

Not open to freshmen

*prereq: GEOG 10100 or perm instr.

3 hrs
3 cr.

*Offered fall and spring

**GEOG 37000 - Geography of Sustainable Development in Developing Countries**
Pluralism and Diversity
PD/A
GER
3/B

Reviews the theories and approaches of international development. Themes include development theory, availability and distribution of resources, population growth, food production, water supply and forestry. The course will also highlight the development and environmental problems that challenge the achievement of sustainable development such as population growth, food and world economic crises, increasing number of the poor and climate change. The course will provide students with theory, methods, problems and analysis of factors that influence sustainable development in developing countries.

prereq: one of the following: GEOG 10100, 15000, 27000, 27100, 27500, 27700 or perm instr.
3 hrs
3 cr.

ECO 33000 - Economic Development

Pluralism and Diversity
PD/A
GER
3/B

Critical variables explaining the diversity of growth and economic and development outcomes across developing countries. Theories, case studies, measurement and policies.

prereq: ECO 20000
3 hrs
3 cr.

ECO 34000 - International Trade

GER
3/B

Theories of international trade and international trade policies.

prereq: ECO 20000
3 hrs
3 cr.

ECO 34100 - International Finance

GER
3/B

Theories of exchange-rate determination and open-economy macroeconomic theory and policy.

prereq: ECO 20100
3 hrs
3 cr.

SOC 36100 - Development and Modernization (W)

Pluralism and Diversity
PD/A
Examinations of models of social change with a special focus on developing countries.

*prereq: SOC 10100
3 hrs
3 cr.*

**SOC 30700 - Migration**

**Pluralism and Diversity**

*PD/B GER
3/B*

Economic, demographic, political and cultural factors influencing migration and the consequences of migration.

*prereq: SOC 10100
3 hrs
3 cr.*

**SOC 31100 - Population Dynamics**

*GER
3/B*

Comparative analysis of fertility, mortality, migration trends, and related social factors.

*prereq: SOC 10100
3 hrs
3 cr.*

**E. International Peace and Security**

These courses focus on peace, security, conflict, violence, war, and terrorism.

**POLSC 28200 - International Security (W)**

*GER
3/B*

An introduction to basic concepts and problems in the area of international security, this course will explore explanations for some of the central causes of security/insecurity and peace/war, as well as examine select contemporary security issues.

*prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.*

**POLSC 28300 - Terrorism (W)**

*GER
3/B*
The course will explore the types, causes, and strategies of terrorism as well as the effectiveness and civil liberty implications of counterterrorism strategies. Both contemporary and historical terrorist groups will be considered.

Not open to students who have completed POLSC 27353.

_prereq or coreq:_ ENGL 12000 or the equivalent

3 hrs

3 cr.

**POLSC 37900 - War and Strategy (W)**

**GER**

3/B

An examination of strategy and wars between states, within states, and between states and transnational groups. Focuses on how strategy affects the avoidance, outbreak, conduct, and consequences of war and the difficulty of devising strategies that successfully link political ends and military means.

_prereq:_ POLSC 11500 or 27000 or 28200; minimum of 45 credits and 9 credits in political science or permission of the instructor

_coreq:_ ENGL 12000 or the equivalent

4 hrs

4 cr.

**POLSC 38000 - European Security (W)**

**Pluralism and Diversity**

**PD/D**

**GER**

3/B

A theoretically informed examination of current and historical security problems in Europe, with a focus on the sources of war and peace, strategic calculations, alliances, institutions, democratization, norms, and ideological and identity conflicts. A principal aim is to establish a foundation for analyzing the prospects for a secure order in Europe in the first part of the 21st century.

_prereq:_ POLSC 11500 or 27000 or 28200; minimum of 45 credits and 9 credits in political science or permission of the instructor

_coreq:_ ENGL 12000 or its equivalent

4 hrs

4 cr.

**POLSC 38200 - Causes of War (W)**

**GER**

3/B

An analysis of the causes of war and peace for both civil and interstate wars including especially the role of bargaining, but also the roles alliances, arms races, rivalries, and institutions.

_prereq or coreq:_ ENGL 12000 or the equivalent; POLSC 27000 or POLSC 28200; minimum of 45 credits and 9 credits in political science or permission of the instructor.
Minor in Legal Studies

The Legal Studies minor is an interdisciplinary course of study that allows students to examine the role and development of law from different perspectives within a liberal arts curriculum. Legal studies students will be introduced to the study of judicial opinions, theories of law and legal interpretation, the structure and role of legal institutions, and the operation of law in history and everyday life.

Law is a central feature of political, social, and economic life. The legal studies minor will prepare students embarking on careers in government, business, or the non-profit sector to think broadly and critically about the nature of law. It will also be extremely helpful for any students planning to pursue graduate study focusing on law or legal institutions, in a wide variety of disciplines. The legal studies program places an emphasis on developing students’ communication skills, interdisciplinary scholarship and a commitment to connect undergraduate education to advanced career opportunities. The core of the legal studies minor, though, is a commitment to the study of law within the liberal arts tradition.

While there are many ways for students to prepare successfully for law school, an advantage of the legal studies minor is its ability to help the college identify students planning to apply to law school, to ensure that these students receive guidance on the application process as early as possible, and to give them a solid foundation when they enter law school.

Program Requirements

15-credit minor

Students are required to complete at least one course from within each of the three categories below. Students can take no more than three courses from one department.

No more than two courses from the student's major can be applied toward the Legal Studies minor. Courses used to fulfill the Legal Studies minor may be used to meet any other degree requirements, including the political science major. Students should be aware that courses listed for this minor may have prerequisites within their home departments.

Foundations of Legal Studies

These courses teach students foundational knowledge and skills that are important for thinking and writing clearly about law.

PHILO 10300 - Introduction to Logic and Critical Thinking

GER
2/C

Recognizing arguments; traditional logic including concepts, propositions, categorical, hypothetical and disjunctive syllogisms; argument structure, natural language argumentation, fallacies.

3 hrs
3 cr.
offered each semester
PHILO 10600 - Philosophy, Politics and Society

Hunter Core
Individual and Society (Social Science) - I&S SS
Pluralism and Diversity
PD/D
GER
2/C

Introduction to social and political philosophy.
3 hrs
3 cr.
offered each semester

POLSC 11000 - American Government: A Historical Introduction (W)

Hunter Core
Flexible Core: US Experience in its Diversity
GER
1/C or 2/B

Overview of the American political system from a historical perspective, with emphasis on the Constitution and its enduring influence, development of party systems and citizen participation and evolving role of Congress, presidency and courts. Not open to students who have taken POLSC 11100.
prereq or coreq: ENGL 12000 or its equivalent
3 hrs
3 cr.

Legal Institutions and Legal Processes

These courses emphasize the “law on the ground.” They tend to present a more external analysis of the role and operation of legal institutions, actors, and norms.

POLSC 21900 - Women and the Law (W)

Pluralism and Diversity
PD/C
GER
3/B

Overview of how local, state and federal laws treat people on the basis of sex.
cross-listed WGSP 21900
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 23800 - The American Legal System (W)

GER
3/B
Civil and criminal law, common law and equity, substantive and procedural law. Emphasis on federal and New York law.

**prereq:** ENGL 12000 or its equivalent

3 hrs

3 cr.

**POLSC 24000 - The American Judiciary (W)**

**GER**

3/B

The Supreme Court and other federal courts as part of policy-making process in American government.

**prereq:** ENGL 12000 or its equivalent

3 hrs

3 cr.

**POLSC 31000 - Comparative Legal Systems (W)**

**GER**

3/B

Comparative study of major legal traditions of the modern world, including common law, civil law, Soviet, Islamic, Chinese, tribal and hybrid systems.

**prereq:** POLSC 11000, 23800 or 34000 or 34100 or 34300 or 37500 or any course in comparative politics subfield, or perm instr; ENGL 12000 or its equivalent

3 hrs

3 cr.

**POLSC 37500 - International Law (W)**

**GER**

3/B

Case studies on nature, sources, practices and efficacy of international law, principles and rules.

**prereq:** ENGL 12000 or its equivalent

3 hrs

3 cr.

**ASIAN 39002 - Asian American Civil Rights and the Law**

**Pluralism and Diversity**

**PD/B**

Critical examination of major immigration and civil rights laws and Supreme Court cases that have affected Asian Americans.

3 hrs

3 cr.

**MEDIA 39400 - Mass Communications and the Law**
Relationship of mass media to significant constitutional problems.

prereq: MEDIA 18000
3 hrs
3 cr.

HIST 36400 - American Constitutional History, 1783 to 1900

Pluralism and Diversity
PD/D
GER
3/B
Development of constitutional thought from the framing of the Articles of Confederation to 1900. Courses at the 300-level and above not offered to freshmen.
3 hrs
3 cr.

SOC 31900 - Criminology

GER
3/B
Criminal behavior, arrest, and punishment. Problems of definition, administration of criminal justice.

prereq: SOC 10100
3 hrs
3 cr.

SOC 32000 - Law, Society and Civil Rights

GER
3/B
Examine from a sociological perspective the concept of law, and legal institutions and their relationship to society and culture, concentrating on the struggle for civil rights in America.

prereq: SOC 10100
3 hrs
3 cr.

The Theory and Practice of Legal Interpretation

These courses emphasize the “law on the books,” the way relative insiders, like legal theorists and judges, talk about the content of law. Courses in this category introduce students to judicial opinions as well as normative theories about the way law should be interpreted

POLSC 34000 - Constitutional Law: Organizing the Government (W)
Constitutional problems and Supreme Court decisions. Federalism, judicial review, separation of powers, foreign policy.

**prereq:** POLSC 11000 or 11100 or 23800

3 hrs

3 cr.

**POLSC 34100 - Constitutional Law: Civil Rights (W)**

**GER**

3/B

Constitutional problems and Supreme Court decisions regarding race and sex discrimination.

**prereq:** POLSC 11000 or 11100 or 23800

3 hrs

3 cr.

**POLSC 34200 - Constitutional Law: The First Amendment (W)**

**GER**

3/B

Constitutional problems and Supreme Court decisions regarding freedom of speech, press (media), religion and assembly.

**prereq:** POLSC 11000 or 11100 or 23800

3 hrs

3 cr.

**ECO 37000 - Law and Economics**

**GER**

3/B

Analytical tools of microeconomics are used to examine various aspects of the law, including property, contracts, torts, liability, and criminal and family law.

**prereq:** ECO 20000

3 hrs

3 cr.

**PHILO 25200 - Problems of Law and Morality**

**GER**

3/B

Philosophy of law and the relation of legal to ethical issues.

**prereq:** ENGL 12000 and one previous course in philosophy.

3 hrs

3 cr.

**PHILO 34600 - Contemporary Theories of Justice (W)**
A study of important contemporary theories of economic, political, and social justice, such as political liberalism, democratic socialism, communitarianism, and civic republicanism.

3 hrs
3 cr

Minor in Political Science

Students minoring in political science must complete 12 credits in political science. No more than three credits can be at the 100-level. No more than three credits in independent study (POLSC 29001-29003) can be used to satisfy the minor. Internship credits may not be applied toward the minor.

The minor in Political Science is designed to provide students with solid grounding in political science and to encourage them to develop depth in the discipline in an area that will complement their major or develop expertise in an area of particular interest to them.

The minor in Political Science allows students considerable flexibility in designing a minor that will best serve their academic goals. Students may, for instance, wish to focus on courses dealing with European politics and foreign policy to complement a major in a European language and culture. Students may concentrate their courses in one field of political science, or spread them across several fields. Students may consult an advisor in the Department of Political Science about their goals as they choose courses to satisfy the minor.

Political Science: Introductory Courses

The introductory courses acquaint the student with a particular segment of political science: American Government and Politics; Political Theory; Comparative Politics; and International Politics. Each will fulfill three credits of the Broad Exposure/Stage 2, Group B requirement in the social sciences. (POLSC 11000 can be used to fulfill GER 1/C or 2/B), although only one of these courses may be used for that purpose. Only two introductory courses can be applied toward the major. Students who have taken POLSC 11100 may not receive credit for POLSC 11000.

POLSC 10000 - Introduction to Politics: Democracy, Anarchy and the State (W)

Hunter Core
World Culture and Global Issues (WCGI)
GER
2/B

Introduction to some of the major questions, approaches, and texts of political science. Students will explore questions of power, coercion, virtue, democracy, conflict, and cooperation and read Plato, Aristotle, Weber, Lipset, Waltz, and Jervis, among others. Does not satisfy the major’s four subfield distribution requirement.

Prereq or coreq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 11000 - American Government: A Historical Introduction (W)
Overview of the American political system from a historical perspective, with emphasis on the Constitution and its enduring influence, development of party systems and citizen participation and evolving role of Congress, presidency and courts. Not open to students who have taken POLSC 11100.  
prereq or coreq: ENGL 12000 or its equivalent  
3 hrs  
3 cr.

**POLSC 11200 - Introduction to Political Theory (W)**

GER  
2/B  
Selected writings of the great political thinkers. Recurrent problems of politics from Plato to the present.  
prereq or coreq: ENGL 12000 or its equivalent  
3 hrs  
3 cr.

**Political Science: 200 Level Core Courses**

These core courses are foundational courses for their respective fields and the International Relations course is a prerequisite for many 300-level courses in international relations.

**POLSC 20000 - Interpreting Politics: An Introduction to Political Ideas (W)**

GER  
2/B or 3/B  
An introduction to interpreting major political ideas and their significance in the contemporary world. Competing understandings of concepts such as freedom, equality, justice, citizenship, and legitimacy will be explored, in part by applying them to concrete political issues such as multiculturalism, economic distribution, and the death penalty.  
prereq or coreq: ENGL 12000 or its equivalent  
3 hrs  
3 cr.

**POLSC 25000 - Comparing Countries (W)**

Hunter Core  
Flexible Core: World Culture and Global Issues  
Pluralism and Diversity  
PD/A  
GER  
3/B  
Examination of the core concepts, theories, and issues in the field of comparative relations. Topics include:  
Comparative analysis of democracies and democratization, revolution, and ethnicity and ethnic conflict. Cases will be
drawn from Africa, Asia, Western Europe, the Americas, Eastern Europe, and the Middle East.

prereq: ENGL 12000 or equivalent
3 hrs
3 cr.

POLSC 27000 - International Relations: Conceptual Foundations and Current Issues (W)

GER
3/B

Examines the conceptual foundations of international relations and their application to current issues. Topics include: anarchy, power, war and peace, international cooperation, the role of the state and non-state actors, international institutions, norms and human rights, and the global economy.

Students may not take both POLSC 11500 and POLSC 27000 at Hunter College for credit. (Transfer students may receive only 100-level credit for a course equivalent for POLSC 11500 after spring 2010, when POLSC 27000 becomes the prerequisite for most advanced courses in international relations.)

prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 29200 - Topics in Political Science

Topics in Political Science provides students the opportunity to apply their knowledge of political science through a variety of experiential learning activities. Students may take each Topics in Political Science one time.

prereq: ENGL 12000
1 hr.
1 cr.

POLSC 29400 - Topics in Political Science

Topics in Political Science provides students the opportunity to apply their knowledge of political science to real-world political issues and settings. Students may take each Topics in Political Science one time.

prereq: ENGL 12000
3 hrs.
3 cr.

Political Science: American Government and Politics

POLSC 11000 - American Government: A Historical Introduction (W)

Hunter Core
US Experience in its Diversity (USED)
GER
1/C or 2/B

Overview of the American political system from a historical perspective, with emphasis on the Constitution and its enduring influence, development of party systems and citizen participation and evolving role of Congress, presidency
and courts. Not open to students who have taken POLSC 11100.
prereq or coreq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 21100 - State Government and Politics (W)

GER 3/B

Comparative analysis of state governments. Power and role of governors, state legislatures, parties, lobbies.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 21200 - Urban Politics (W)

GER 3/B

Politics in New York City and other urban areas. Decentralization, suburbanization, race, ethnicity, reform.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 21300 - Political Parties and Elections (W)

GER 3/B

Organization, campaigns, nominations, voting behavior, issues, finances, reforms.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 21500 - Public Opinion and Political Participation (W)

GER 3/B

What American people think about politics and how they express it, from polls to elections to demonstrations.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 21700 - Contemporary Issues in American Politics

GER 3/B

Selected topics in American politics and government.
POLSC 21800 - Women and Politics (W)

**Prerequisites:** ENGL 12000 or equivalent

3 hrs
3 cr.

**Course Information:**

- **Title:** Women and Politics (W)
- **Category:** PD/C, GER
- **Credits:** 3/B

This course examines the constitutional and legal position of women, including ERA, affirmative action, marriage, divorce, property, and feminist causes.

*Cross-listed with WS1800 (W)*

**Prerequisites:** ENGL 12000 or equivalent

3 hrs
3 cr.

**Course Information:**

- **Title:** Women and the Law (W)
- **Category:** PD/C, GER
- **Credits:** 3/B

This course provides an overview of how local, state, and federal laws treat people on the basis of sex.

*Cross-listed with WS1900*

**Prerequisites:** ENGL 12000 or equivalent

3 hrs
3 cr.

**Course Information:**

- **Title:** U.S. Immigration Policy (W)
- **Category:** PD/B or PD/C, GER
- **Credits:** 3/B

This course focuses on the political development of federal immigration policy, historical and contemporary issues in policy design and implementation, and recent findings and debates arising from empirical analyses of immigration policy.

*Prerequisites:* ENGL 12000 or equivalent and POLSC 11000/11100 or HIST 15100/15200

3 hrs
3 cr.

**Course Information:**

- **Title:** Interest Group Politics (W)
- **Category:** GER
- **Credits:** 3/B

This course examines the organization and role of interest groups in American politics. It emphasizes the importance of organizational resources and the ability of interest groups to be “faithful advocates” of member interests in exercising influence in elections and policy-making.
prereq: ENGL 12000 or equivalent
3 hrs
3 cr.

POLSC 22700 - Political Parties (W)

GER
3/B

Theories, historical analysis, and contemporary views of the central institution that links citizens and office holders in the United States, with a focus on the role of parties as vehicles for expressing and pursuing policy goals.

Not open to students who completed POLSC 21400
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 22800 - Protest Movements in American Politics (W)

Pluralism and Diversity
P/D B or C
GER
3/B

Analysis of historical and contemporary protest movements in the context of American politics; includes key concepts and explanatory factors in social movement theory, and movements such as the anti-slavery, women's suffrage, labor, civil-rights, anti-war, feminist, environmental, gay-rights, pro-choice, pro-life, and Patriot movements.

prereq: ENGL 12000 or equivalent
3 hrs
3 cr.

POLSC 23000 - The American Presidency (W)

GER
3/B

Selection, election, role, functions and powers of the president.

prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 23500 - The American Congress (W)

GER
3/B

prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.
POLSC 23800 - The American Legal System (W)

GER
3/B

Civil and criminal law, common law and equity, substantive and procedural law. Emphasis on federal and New York law.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 24000 - The American Judiciary (W)

GER
3/B

The Supreme Court and other federal courts as part of policy-making process in American government.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 24400 - Energy and Environmental Politics and Public Policy (W)

GER
3/B

Examination of political processes and public policies shaping energy production and consumption in the U.S. with comparative reference to other countries. Emphasis on political, economic, social, environmental and foreign policy aspects.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 27400 - American Foreign Policy (W)

GER
3/B

Personalities and processes in making, administering and controlling our foreign policy.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 30100 - American Political Thought (W)

GER
3/B

Examination of ideas that have shaped American politics from the Revolution to the present, including Federalists and Anti-Federalists, Progressivism and responses to industrialization and recent debates over the welfare state, political inclusion and democracy.
prereq: ENGL 12000 or its equivalent; one course in political theory or perm. instr.
3 hrs
3 cr.

POLSC 31700 - Contemporary Issues in American Politics

GER
3/B

Selected topics in American politics and government. 
cross-listed WGS 39800 is cross-listed with POLSC 31707 Community Leadership Seminar
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 32000 - Ethnic Politics (W)

Pluralism and Diversity
PD/B
GER
3/B

Ethnicity in local and national politics. Major groups, how they affect government, what government does for them.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 32100 - American Political Economy (W)

GER
3/B

Critical analysis of the distribution of power between the state and the private sector. Theories about the government-
business relationship are tested through a series of case studies.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 32300 - Politics of Public Budgeting (W)

GER
3/B

This course sets the processes and techniques of public budgeting within the context of American political institutions
at the national, state and local levels.
prereq: ENGL 12000 or the equivalent; two political science courses at the 200- level or above or permission of the
instructor
4 hrs
4 cr.

POLSC 33000 - American Political Development (W)
Analysis of the historical development of American politics, including: the impact of the Constitution, ideas, and political culture; state building/unbuilding in different historical eras; and the evolution of citizenship and political participation.

prereq: ENGL 12000 or its equivalent, POLSC 11000 or perm. inst
4 hrs
4 cr.

POLSC 34000 - Constitutional Law: Organizing the Government (W)

Constitutional problems and Supreme Court decisions. Federalism, judicial review, separation of powers, foreign policy.
prereq: POLSC 11000 or 11100 or 23800
3 hrs
3 cr.

POLSC 34100 - Constitutional Law: Civil Rights (W)

Constitutional problems and Supreme Court decisions regarding race and sex discrimination.
prereq: POLSC 11000 or 11100 or 23800
3 hrs
3 cr.

POLSC 34200 - Constitutional Law: The First Amendment (W)

Constitutional problems and Supreme Court decisions regarding freedom of speech, press (media), religion and assembly.
prereq: POLSC 11000 or 11100 or 23800
3 hrs
3 cr.

POLSC 34300 - Criminal Law (W)

Constitutional problems and judicial decisions regarding search and seizure, right to counsel, self incrimination.
prereq: POLSC 11000 or 11100 or 23800
3 hrs
3 cr.

3/B

An examination of the nature of the relationship between the African state and civil society in the post-independence period and how this relationship influences governance and democracy.

prereq: ENGL 12000 or its equivalent; any course in comparative politics, or perm. instr.
3 hrs
3 cr.

POLSC 35300 - Social Movements, Civil Society and the State in Latin America (W)

Pluralism and Diversity
P/D A
GER
3/A

Analysis of the role of popular and opposition movements in Latin America and their relationship to the state, from the challenges to the dictatorships of the 1970s through the contemporary neoliberal economic order and democratic polities.

prereq: ENGL 12000 or the equivalent; a course in comparative politics; minimum of 45 credits and 9 credits in political science or permission of the instructor.
4 hrs
4 cr.
**POLSC 35600 - India’s Democratic Experiment (W)**

**Pluralism and Diversity**

P/D A

GER

3/B

Assesses the nature and durability of India's democratic political system. Examines key events, personalities, institutions, and movements in Indian politics from Independence (1947) to the present. Focuses on the challenge of adapting democratic institutions to circumstances of extreme social diversity and economic deprivation.

*prereq: ENG 12000 and any POLSC course at either the 200 or 300 level in comparative politics

4 hrs

4 cr.

**POLSC 36000 - Democracy & Development in a Globalizing World (W)**

**Pluralism and Diversity**

P/D A

GER

3/B

The relationship between democracy and development in post-colonial countries. Questions include: What relations of causality, in either direction, have political scientists sought to establish between democracy and development? What is the impact of globalization on these relations? How can historical analysis help to illuminate these and other issues, such as why some countries have been better at promoting per capita income growth than others? What efforts have been undertaken – by individual citizens, by civic groups, by aid donors – to plug the democratic deficits that arise in the course of pursuing development under 21st Century conditions?

*prereq: ENG 12000 and any POLSC course at either the 200 or 300 level in comparative politics

4 hrs

4 cr.

**POLSC 37200 - Contemporary Issues in Comparative Politics**

**GER**

3/B

Selected topics in comparative politics.

*prereq: ENGL 12000 or its equivalent; any course in comparative politics, or perm instr.

3 hrs

3 cr.

**POLSC 37800 - Russian National Interest: Past and Present (W)**

**Pluralism and Diversity**

PD/D

GER

3/B

In a contemporary, historical and comparative context, this course will explore the factors influencing debates on and definitions of Russia’s national interests, the strategies for promoting those interests and the implications for Russia and the international system.
prereq: POLSC 11500 or 11700 or 25000 or 27000 or perm instr.
coreq: ENGL 12000 or equivalent
3 hrs
3 cr.

POLSC 38400 - Comparative Foreign Policy (W)

An analysis of why states have different foreign policies and the sources of those differences. Various factors such as power, political culture, religion, regime type, history, economic and state development, and individuals will be explored.

POLSC 28000 - Women, War and Peace (W)

Pluralism and Diversity
PD/C
GER
3/B

The course examines the roles that women have played as subjects and objects in war and peace.
cross-listed WGSP 26200 (W)
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 28100 - Drugs, Politics and Public Policy (W)

GER
3/B

Examination of public policies addressing drug use and abuse in the United States and other countries with emphasis on political and cultural determinants, economic and market factors, constitutional implications and United States foreign policy.
prereq: ENGL 12000
3 hrs
3 cr.

POLSC 28200 - International Security (W)

GER
3/B

An introduction to basic concepts and problems in the area of international security, this course will explore explanations for some of the central causes of security/insecurity and peace/war, as well as examine select contemporary security issues.
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 28300 - Terrorism (W)

GER
3/B

The course will explore the types, causes, and strategies of terrorism as well as the effectiveness and civil liberty implications of counterterrorism strategies. Both contemporary and historical terrorist groups will be considered.

Not open to students who have completed POLSC 27353.
prereq or coreq: ENGL 12000 or the equivalent
3 hrs
3 cr.

**POLSC 37300 - Contemporary Issues in International Politics**

**GER**
3/B

Selected topics in international politics.

*prereq: ENGL 12000 or its equivalent; POLSC 27000 or 11500 (prior to 9/2010)*

3 hrs
3 cr.

**POLSC 37400 - International Human Rights (W)**

**GER**
3/B

An examination of the origins, substance and processes of human rights in international relations.

*prereq: ENGL 12000 or its equivalent*

3 hrs
3 cr.

**POLSC 37500 - International Law (W)**

**GER**
3/B

Case studies on nature, sources, practices and efficacy of international law, principles and rules.

*prereq: ENGL 12000 or its equivalent*

3 hrs
3 cr.

**POLSC 37600 - International Political Economy (W)**

**GER**
3/B

Examination of the intersection of politics and economics at the international level through a careful reading and analysis of dominant theoretical approaches and their application to central debates concerning the politics of trade, money and finance, development and globalization.

*prereq: POLSC 11500 or 27000 or 27500; minimum of 45 credits and 9 credits in political science or permission of the instructor*

*coreq: ENGL 12000 or its equivalent*

4 hrs
4 cr.

**POLSC 377000 - Theories of International Politics (W)**
An examination of the central concepts and issues in international politics that underpin the main theoretical debates in the field.

prereq: POLSC 11500 or 27000 or 27500 or 28200 or perm. instr.
coreq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 37800 - Russian National Interest: Past and Present (W)

Pluralism and Diversity

coreq: ENGL 12000 or the equivalent
4 hrs
4 cr.

POLSC 38000 - European Security (W)

Pluralism and Diversity
PD/D
GER
3/B

A theoretically informed examination of current and historical security problems in Europe, with a focus on the sources of war and peace, strategic calculations, alliances, institutions, democratization, norms, and ideological and identity conflicts. A principal aim is to establish a foundation for analyzing the prospects for a secure order in Europe in the first part of the 21st century.
prereq: POLSC 11500 or 27000 or 28200; minimum of 45 credits and 9 credits in political science or permission of the instructor
coreq: ENGL 12000 or its equivalent
4 hrs
4 cr.

POLSC 38100 - East Asia in World Politics (W)

Pluralism and Diversity
PD/A
GER
3/B

An examination of sources of stability and instability in East Asia, using social science theories and historical background.

prereq: ENGL 12000 or its equivalent; POLSC 27000 or perm instr.
3 hrs
3 cr.

POLSC 38200 - Causes of War (W)

GER
3/B

An analysis of the causes of war and peace for both civil and interstate wars including especially the role of bargaining, but also the roles alliances, arms races, rivalries, and institutions.

prereq or coreq: ENGL 12000 or the equivalent; POLSC 27000 or POLSC 28200; minimum of 45 credits and 9 credits in political science or permission of the instructor.
4 hrs
4 cr.

POLSC 38300 - Power Transitions, the U.S. and World Order (W)

GER
3/B

An examination of global power transitions and their consequences for international competition and order. Draws on theoretical insights to explain patterns in historical and contemporary cases, including the current rise of China and other "BRICS" countries.

prereq: ENGL 12000 (or equivalent), one course in international relations
4 hrs
4 cr.

Political Science: Political Theory

POLSC 11200 - Introduction to Political Theory (W)
Selected writings of the great political thinkers. Recurrent problems of politics from Plato to the present.

*prereq or coreq: ENGL 12000 or its equivalent*

3 hrs

3 cr.

**POLSC 20000 - Interpreting Politics: An Introduction to Political Ideas (W)**

**Hunter Core**
Individual and Society (Social Sciences) - I&S SS

**GER**
2/B or 3/B

An introduction to interpreting major political ideas and their significance in the contemporary world. Competing understandings of concepts such as freedom, equality, justice, citizenship, and legitimacy will be explored, in part by applying them to concrete political issues such as multiculturalism, economic distribution, and the death penalty.

*prereq or coreq: ENGL 12000 or its equivalent*

3 hrs

3 cr.

**POLSC 20100 - Ancient to Early Modern Political Thought (W)**

**Pluralism and Diversity**
PD/D

**GER**
3/B

The study of selected writers from the ancient Greeks to the Renaissance (e.g., Plato to Machiavelli), focusing on the political dimensions of such ideas as rationality, virtue, community, human nature and historical change.

*prereq: ENGL 12000 or its equivalent*

3 hrs

3 cr.

**POLSC 20200 - Modern Political Thought (1600-1900) (W)**

**Pluralism and Diversity**
PD/D

**GER**
3/B

The study of selected political writers (e.g., Hobbes to Nietzsche), with special emphasis given to the nature of and problems with, liberty, equality and justice in modern societies and states.

*prereq: ENGL 12000 or its equivalent*

3 hrs

3 cr.

**POLSC 20300 - Political Thought Since 1900 (W)**
Pluralism and Diversity
PD/D
GER
3/B

Exploration of concepts and thinkers in political theory since 1900. Topics include such traditional issues of political theory as the nature and scope of political regimes, justice, equality and changing concepts of human nature.

prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 20400 - Contemporary Issues in Political Theory

GER
3/B

Topics vary each semester. They have included democracy in America, totalitarianism, liberty and authority.

prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 20600 - Research Design in Political Science (W)

GER
3/B

Public opinion surveys, content analysis, legislative roll-call analysis, census data, election returns. Introduction to statistics. Uses Social Science Data Lab.

prereq: passing college proficiency exam in math or perm instr; ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 20700 - Data Analysis in Political Science (W)

GER
3/B

Computer applications and statistical analysis in political science. Students write a quantitative term paper. Uses Social Science Data Lab.

prereq: POLSC 20600 or perm instr.
3 hrs
3 cr.

POLSC 20900 - Women and Gender in Western Political Thought (W)

Pluralism and Diversity
PD/C or D
GER
3/B

Examines history of political thought from the perspective of gender relations and the treatment of women.

cross-listed WGST 20900
prereq: ENGL 12000 or its equivalent
3 hrs
3 cr.

POLSC 30100 - American Political Thought (W)

GER
3/B

Examination of ideas that have shaped American politics from the Revolution to the present, including Federalists and Anti-Federalists, Progressivism and responses to industrialization and recent debates over the welfare state, political inclusion and democracy.
prereq: ENGL 12000 or its equivalent; one course in political theory or perm. instr.
3 hrs
3 cr.

POLSC 30200 - Critical Theory and Politics (W)

GER
3/B

Intensive study in the core concepts and ideas in the tradition of Critical Theory. Thinkers include, among others, Kant, Hegel, Marx, Nietzsche, Adorno, Horkheimer, Marcuse, Fanon, and Foucault, as well as contemporary critical theorists. Themes and foci will vary by semester and will include: the nature and purpose of critique; political sociology and the analysis of liberalism, fascism and other political formations; mass culture and the fate of art; power and the psyche; reason and affect; violence and terror; the philosophy of history, and the politics of liberation.
prereq: ENGL 12000 or the equivalent; at least one 200-level course in political theory or permission of the instructor.
4 hrs
4 cr.

POLSC 30300 - Democracy and Emergency (W)

GER
3/B

This seminar in political theory examines the issue of emergency powers in constitutional democracies. It will examine various attempts to define what is an emergency, as well as the spirited debates over the legitimacy of extraordinary powers to manage such crises.
prereq: ENGL 12000
4

POLSC 30400 - Contemporary Issues in Political Theory

GER
3/B

Selected topics in political theory.
prereq: ENGL 12000 or its equivalent; one course in political theory subfield or perm instr
3 hrs
3 cr.
POLSC 30500 - Democratic Theory (W)

GER 3/B

A critical survey of different conceptions of democracy: issues include democracy as a political order, democracy and 'non-political' forms of life (e.g., business, family, religion), toleration, political representation, democracy and justice.

prereq or coreq: ENGL 12000 or its equivalent; one course in political theory or perm instr.

3 hrs

3 cr.

POLSC 30700 - Theory of Revolution

GER 3/B

Traditional and modern revolutions. Conditions and objectives of socialist and communist revolutions.

prereq: ENGL 12000 or its equivalent

3 hrs

3 cr.

POLSC 30900 - Feminist Political Theory (W)

Pluralism and Diversity

PD/C GER 3/B

Readings in feminist ideas, both historical and contemporary, on issues of power, justice and equality. The course will emphasize different perspectives, including those of liberal, radical, postmodernist, women of color, third world and 'global' feminists.

cross-listed WGST 30900 (W)

prereq: ENGL 12000 or its equivalent; one course in political theory or perm instr.

3 hrs

3 cr.

POLSC 31100 - Utopian Theory (W)

GER 3/B

Political theorists often imagine ideal worlds, both to explore ideals and to criticize political realities. This course will explore utopias and dystopias as theories that explore political possibilities and challenge existing realities.

prereq: ENGL 12000 or its equivalent; one course in political theory or perm dept.

3 hrs

3 cr.

POLSC 31600 - Political Theory of Human Rights (W)

GER 3/B
A critical analysis of the intersection of academic and practical discourse of human rights with the central concerns of political theory, particularly as it engages relationships between ethics and power as well as theory and practice.

**prereq:** ENGL 12000 or its equivalent; one course in political theory or perm instr.

3 hrs

3 cr.

### Political Science: Independent Study, Honors, Advanced Seminars

The following courses, which include independent studies, and honors independent studies, may not be used to fulfill the four subfield requirement. **No more than 6 credits in internship, independent study, and/or experiential courses** (such as Model United Nations) may be used to satisfy the 30 credits in the major.

#### POLSC 29001-29003 - Independent Study in Political Science

**GER**

3/B

Students may take independent study only with full-time members of the department. As a general rule, the students should have taken a prior course with this instructor. Departmental permission will not be granted without explicit approval by the instructor.

**prereq:** at least one course in appropriate field, perm dept.

1-3 cr

#### POLSC 29102-29103 - Directed Research (W)

This course is designed to teach individual students how to do research under the direction of a full-time faculty member. Students will participate in ongoing faculty research, and may do independent reading, library research, data collection and data analysis. The course will culminate in a research paper, literature review, or co-authored conference paper submitted for publication. Students will gain an understanding of the research methods utilized in the project, will gain hands-on experience in basic research, and will learn how to write the a research report with extensive feedback from their faculty supervisor.

**prereq or coreq:** ENGL 12000 or the equivalent; minimum of 60 credits and 15 credits in political science or permission of a full-time faculty supervisor.

2 or 3 hrs

2 or 3 cr.

#### POLSC 48000 - Seminar in Selected Problems of Political Science

Open to Jr/Sr only. Advanced seminar on selected topics.

**prereq:** perm dept.

3 hrs

3 cr.

#### POLSC 48600 - Senior Colloquium
Advanced seminar. Major project and/or paper required.

**prereq:** perm. dept.

3 hrs

3 cr.

**POLSC 49202-49203 - Honors Independent Study in Political Science**

Students may take independent study honors projects only with full-time faculty members of the department. As a general rule, the students should have taken a prior course with this instructor. Departmental permission will not be granted without explicit approval by the instructor.

**prereq:** at least one course in appropriate field, perm dept.

2-3 cr.

**POLSC 49300 - Conducting and Presenting Political Science Research**

This course is designed to refine students’ existing research skills so they can complete their honors theses. Concepts covered will include, but not be limited to literature reviews, finding sources, defining a topic, framing scholarly questions, developing hypotheses, using empirical evidence, citation, and presentation skills. **Concurrent enrollment in POLSC 492 is required.**

**coreq:** POLSC 49200

1 hr

1 cr.

**Political Science: Experiential Courses**

Experiential courses may not be used to fulfill the four subfield requirements. **No more than 6 credits in internship, independent study, and/or experiential courses** (such as Model United Nations) may be used to satisfy the 30 credits in the major.

**POLSC 22200/22300 - Seminar/Internship in New York City Government**

Practical experience in city government and politics. Weekly seminars, monthly university-wide meetings.

Students are advised to have completed at least 60 overall credits and 12 to 15 political science credits with at least one course in the field in which they are interested in taking the internship. Students should have at least a 3.0 grade point average in political science before applying.

**prereq:** perm dept.

4 hrs

4 cr.

**POLSC 29801-29806 - Internship in Political Science**

Students may take independent study internships only under the supervision of full-time members of the department. As a general rule, the students should have taken a prior course with this instructor. Departmental permission will not be granted without explicit approval by the instructor.

**prereq:** at least one course in appropriate field, perm dept.

1-6 cr.

Psychology Faculty

HEGIS Code: 2001

Undergraduate Major

Psychology - BA

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.
ENGL 12000 - Expository Writing

Hunter Core
English Comp (EC)
GER
1/A

Required of all students unless exempt; trains students to analyze, develop and evaluate ideas and to express themselves clearly and effectively. Introduction to documented research.
prereq: successful completion of developmental courses, if required
3 hrs + conf
3 cr.

PSYCH 10000 - Introduction to Psychology

GER
2/B

An introduction to the problems, methods and concepts of psychology, covering a range of topics which characterize the discipline, including history, methodology and professional ethics, biological foundations, perception, motivation and emotion, learning, memory and thinking, individual differences, intelligence, personality, behavior disorders and their treatment, group processes.
3 hrs
3 cr.

MATH 12500 (STEM) - Precalculus

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Functions and their graphs: polynomial, rational, exponential, logarithmic and trigonometric functions; conic sections; topics in trigonometry; graphical and analytical solutions to systems of equations and inequalities. Not credited to students who have completed MATH 15000 or its equivalent.
prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
4 hrs
4 cr.

-or-

STAT 11300 - Elementary Probability and Statistics

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to
analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

**prereq:** A grade of C or better in MATH 10100 or appropriate score on placement exam
**prereq or coreq:** ENGL 12000

3 hrs
3 cr.

**Hunter Core Requirement** Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student's advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

**Exemptions**

A student may be exempt from PSYCH 10000 by earning a score of 4 or 5 on the Advanced Placement Test taken in conjunction with a high school course in psychology or by passing the CLEP examination (College Level Education Program). Exemption from Child Psychology (PSYCH 21000) may be earned by a passing grade on the CLEP examination in Developmental Psychology. CLEP examinations are given at various testing centers. Interested students can obtain information and application forms at http://www.collegeboard.com or by contacting the Office of Student Services. A passing grade on either CLEP examination provides 3 credits. Information on exemption from the mathematics course requirement and on test administration is available from the Testing Center, North 150 (http://admissions.hunter.cuny.edu/Testing.htm).

**The Psychology Major**

**Preparation**

The psychology major is designed to provide students with training in both the evaluation and the generation of research data. For this reason, the core sequence of Psychological Statistics and Experimental Psychology is central to the program and is a prerequisite for all upper-level psychology courses. Performance in the Psychological Statistics/Experimental Psychology sequence will be greatly facilitated by proper preparation in mathematics and laboratory science and the development of excellent writing skills.

**PSYCH 24800 - Statistical Methods in Psychological Research**

**GER**

3/B

Open to declared majors only. Analysis and interpretation of quantified data. Descriptive and inferential statistics applied to psychological research.

PSYC 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

**prereq:** PSYCH 10000 and any other 3 cr PSYCH course, MATH 12500 or STAT 11300 with a C or or appropriate score on math placement exam
**coreq:** Writing Intensive

4 hrs
4 cr.
PSYCH 24900 - Experimental Psychology: Social

GER
3/B

Introduction to the principles of research methodology and experimental techniques. Required research reports involve laboratory and field exercises concerned with a variety of social psychological phenomena. (Students may take either PSYC 249 or 250, but not both.)

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

*prereq: ENGL 12000 with a minimum grade of C; one sem. acceptable lab science sequence with a passing grade; PSYC 24800 with a minimum grade of C
prereq or coreq: Writing Intensive
6 hrs (2 lec, 4 lab)
4 cr.

PSYCH 25000 - Experimental Psychology: General

GER
3/B

Open to declared majors only. Research and general experimental techniques in study of behavior. Introduction to the principles of research methodology and experimental techniques. Required research reports involve a variety of laboratory exercises related to the study of basic behavioral processes. (Students may take either PSYC 24900 or 25000, but not both.)

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

*prereq: ENGL 12000 with a minimum grade of C; one sem. acceptable lab science sequence with a passing grade; PSYC 24800 with a minimum grade of C
prereq or coreq: Writing Intensive
6 hrs (2 lec, 4 lab)
4 cr.

Course of Study

Completion of ENGL 12000 prior to declaration of the major in psychology is strongly recommended. ENGL 12000 is a pre or co-requisite for all 200-level classes below 24900. For any classes numbered 24900 and above, ENGL 12000 is a prerequisite. Students whose career goals include professional work in psychology, social work, or counseling should take the following courses, as appropriate. Note that each may be used only once to satisfy major requirements.

PSYCH 20100 - Independent Study in Psychology

May be applied to major once. Designed to meet the needs of individual students under the direction of a particular faculty sponsor. The course may involve independent readings, tutorials, work as an advising assistant or peer counselor, field placement, an individual research project, or participation in ongoing faculty research, any of these culminating in a written report.
prereq: PSYCH 10000 and any other 3 cr PSYCH course. perm dept.

prereq or coreq: ENGL 12000
3 hrs
3 cr.

**PSYCH 30600 - Seminar in Psychological Services I (A)**

Open to declared majors only. An integration of personality and abnormal psychology, the helping process and the role of the helper. Seminar and one day per week placement in mental health/community service setting.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

prereq: ENGL 12000, PSYCH 2200 or 32300, PSYCH 24900 or 25000, perm instr.
8 hrs
4 cr.

**PSYCH 30700 - Seminar in Psychological Services II (A)**

Integration of personality and abnormal psychology. Seminar and one day per week placement in mental health/community service setting.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

prereq: ENGL 12000, PSYCH 30600, perm instr.
3 hrs
3 cr.

**PSYCH 39500 - Independent Research in Psychology**

May be applied to the major once. Designed to meet the needs and interests of individual students under the direction of a particular instructor at a more advanced level than PSYCH 20100. Such study may involve independent reading, tutorials, independent research projects, or participation in ongoing faculty research, any of these culminating in an APA-style research report or literature review. Field Placements (internships) cannot be granted credit as PSYC 39500; however, supervised field Placement taken in conjunction with PSYCH 36100 - Psychological Tests (A) will be granted credit as PSYC 395.

prereq: ENGL 12000, PSYCH 24900 or 25000, perm instr.
3 hrs
3 cr.

-or-

**PSYCH 39600 - Honors in Psychology**

Independent, sponsored, empirical research and seminar. Students are expected to attend the regularly scheduled seminar. An APA-style research report or its equivalent (to be filed in the department) is a requirement of this course. To graduate with departmental honors, the student must receive a grade of A in PSYCH 39600. Honors in Psychology is typically a one-semester course; however, when a PSYCH 39600 research project extends beyond a single semester, the student may (with permission) register for a second semester as PSYCH 39800. If taken, the student must receive a grade of A in both PSYCH 39600 and 39800 to graduate with departmental honors.

prereq: ENGL 12000, PSYCH 24900 or 25000; 3.5 major GPA; 3.00 cumulative GPA; perm instr.
Declaration of Major

To declare a psychology major, the student must have completed Introduction to Psychology (PSYCH 10000) and any other 100-level psychology course with a minimum grade of B, a required mathematics course with a minimum grade of C or CR and have a minimum GPA of 2.00. The mathematics requirement may be satisfied by the following, or by earning exemption from the mathematics requirement. The major must be declared in person with an undergraduate psychology adviser. (Refer to website http://hunter.cuny.edu/psychology for schedule.) The student must bring his/her Hunter transcript (and where relevant, transcripts from all other colleges attended) when meeting with the adviser to declare a psychology major.

STAT 11300 - Elementary Probability and Statistics

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

prereq: A grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: ENGL 12000
3 hrs
3 cr.

-or-

MATH 12500 (STEM) - Precalculus

Hunter Core
Math/Quantitative Reasoning
GER
1/B

Functions and their graphs: polynomial, rational, exponential, logarithmic and trigonometric functions; conic sections; topics in trigonometry; graphical and analytical solutions to systems of equations and inequalities. Not credited to students who have completed MATH 15000 or its equivalent.

prereq: grade of C or better in MATH 10100 or appropriate score on placement exam
4 hrs
4 cr.

Psychology Major
• The major consists of 26 credits in psychology above the 100 level, including PSYCH 24800 - Statistical Methods in Psychological Research and PSYCH 24900 - Experimental Psychology: Social or PSYCH 25000 - Experimental Psychology: General. The major also requires at least one course in each of the following content areas:

Applications of Psychology (A):

• PSYCH 22100 - Psychoanalytic Theories (A; D/S)
• PSYCH 22300 - Abnormal Psychology (A; D/S)
• PSYCH 24000 - Applications of Psychology (A)
• PSYCH 24200 - Health Psychology (A)
• PSYCH 30600 - Seminar in Psychological Services I (A)
• PSYCH 30700 - Seminar in Psychological Services II (A)
• PSYCH 32300 - Developmental Psychopathology (A; D/S)
• PSYCH 32800 - States of Consciousness (A/C)
• PSYCH 34000 - Industrial and Organizational Psychology (A)
• PSYCH 34100 - Stress, Trauma, and Resilience (A)
• PSYCH 34200 - Emotion: Function and Dysfunction (A)
• PSYCH 34400 - Clinical Psychology (A)
• PSYCH 36100 - Psychological Tests (A)

Biopsychology (B):

• PSYCH 22500 - Ethology: Animal Behavior (B)
• PSYCH 30000 - Physiological Psychology (B)
• PSYCH 30100 - Sensation and Perception (B; C)
• PSYCH 30900 - Behavioral Neuroendocrinology (B; D/S)
• PSYCH 31600 - Cognitive Neuroscience (B/C)
• PSYCH 32000 Neuronal Basis of Behavior (Neuroethology) (B)
• PSYCH 32100 - Animal Orientation: Function and Mechanisms (B)
• PSYCH 32400 - Communication Behavior (B/C)
• PSYCH 32500 - Animal Cognition (B/C)
• PSYCH 32700 - Motivation and Emotion (B; C)
• PSYCH 36900 - Behavioral Pharmacology (B)

Cognitive Processes (C):

• PSYCH 24300 - Cognitive Processes (C)
• PSYCH 30100 - Sensation and Perception (B; C)
• PSYCH 31000 - Research Methods in Developmental Psychology (C; D/S)
• PSYCH 31600 - Cognitive Neuroscience (B/C)
• PSYCH 32200 - Psychology of Language (C)
• PSYCH 32400 - Communication Behavior (B/C)
• PSYCH 32500 - Animal Cognition (B/C)
• PSYCH 32700 - Motivation and Emotion (B; C)
• PSYCH 32800 - States of Consciousness (A/C)
• PSYCH 32900 - Cognitive Science (C)
• PSYCH 33000 - Memory and Attention (C)
• PSYCH 35000 - Learning (C)
• PSYCH 37000 - Cognitive Development (C; D/S)

Developmental/social psychology (D/S):

• PSYCH 21000 - Child Development (D/S)
• PSYCH 21200 - Exceptional Childhoods (D/S)
• PSYCH 22000 - Personality (D/S)
• PSYCH 22100 - Psychoanalytic Theories (A; D/S)
• PSYCH 22300 - Abnormal Psychology (A; D/S)
• PSYCH 23000 - Social Psychology (D/S)
• PSYCH 23500 - The Psychology of Women (D/S)
• PSYCH 30900 - Behavioral Neuroendocrinology (B; D/S)
• PSYCH 31000 - Research Methods in Developmental Psychology (C; D/S)
• PSYCH 31300 - Adolescence (D/S)
• PSYCH 31500 - Adult Development (D/S)
• PSYCH 32300 - Developmental Psychopathology (A; D/S)
• PSYCH 33200 - Attitudes and Persuasion (D/S)
• PSYCH 33300 - Advanced Social Psychology Theory and Methods (D/S)
• PSYCH 33400 - Cultural Psychology (D/S)
• PSYCH 35500 - Ethnic and Cultural Identity Theories (D/S)
• PSYCH 37000 - Cognitive Development (C; D/S)

(If a course meets requirements for more than one content area, the student may apply the course to only one of them.) All of the content-area courses must be at or above the 200 level and at least 2 of the content-area courses must be at or above the 300 level. Two additional (elective) courses in psychology, at the 200 level or higher, must be completed. Two semesters of laboratory science must also be completed. (See the Science Requirement for Graduation below.)

Qualified undergraduates in their last semester may register for graduate-level psychology courses with the permission of the instructor and the graduate adviser. Most psychology majors intending to attend graduate school take more than the minimum 26 credits in psychology and design their course of study in close consultation with a faculty mentor. Students should obtain a copy of "Psychology Major Requirements and Policies" from the undergraduate advising office as soon as they declare the major for up-to-date information on department resources, activities and faculty research interests.

Beginning in the spring 1998 semester, psychology courses taken on a Credit/No Credit basis may not be applied toward the major; PSYCH 24800, PSYCH 24900, PSYCH 25000 may not be taken on a Credit/No Credit basis.

Courses Taken on Permit and Courses Transferred into Hunter

Once the psychology major is declared, students may not take any psychology course that they wish to count toward the major on permit at another college. In contrast, psychology courses that were taken before the student enrolled at Hunter and that are deemed equivalent to a Hunter College course may count toward the major. The assessment of course equivalency is made by the Office of Admissions and by the undergraduate psychology advising office.
Prerequisites

Course prerequisites are strictly enforced. Students are responsible for meeting all course prerequisites, including satisfactory completion of courses in progress at the time of enrollment. Students enrolling in courses without necessary prerequisites will be dropped from the class by the registrar. The department screens for prerequisites and students may be dropped after the course begins. (See specific prerequisites for each course in Course Listings section.)

Prerequisites for PSYCH 24800 - Statistical Methods in Psychological Research. All students must have received at least a C or CR in STAT 11300 or MATH 12500 (STEM) or earned mathematics exemption and must have declared psychology as their major in the Psychology Department Advising Office at Hunter.

Prerequisites for PSYCH 24900 - Experimental Psychology: Social and PSYCH 25000 - Experimental Psychology: General. All students must be declared Psychology majors and have passed ENGL 12000 with C or higher, STAT 11300 or MATH 12500 with C or higher (or earned mathematics exemption), PSYC 24800 with C or higher, and 1 semester of laboratory science (see Science Requirement for Graduation, below).

As of fall 2011, only PSYCH 25000 will be offered

Science Requirement for Graduation

In order to graduate, psychology majors must have completed two semesters in laboratory science that were approved by the department. Students must take at least one semester of laboratory science before taking PSYCH 24900 or PSYCH 25000. Students may complete the laboratory science courses at any point in their studies, and the courses need not be taken in sequence. The science requirement may be met by any of the following courses, all of which meet the General Education Requirement Stage 2/E, Laboratory Science, requirement:

ANTHP 10100 (STEM) - Human Evolution

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
GER
2/E

The study of human origins and adaptation, through an understanding of evolutionary mechanisms, genetics, comparative primate biology, the fossil record, and modern human variation.

6 hrs (3 hrs lec, 3 hrs lab)
4 cr.
offered every sem.

ANTHP 10200 (STEM) - Human Variation

Hunter Core
Scientific World (SW) STEM; Life and Physical Sciences (LPS)
GER
2/E

Description and analysis of biological variation in living human populations. Both genetic and phenotypic variation will be examined. Lab experiments and demonstrations.

6 hrs (3 hrs lec, 3 hrs lab)
4 cr.
offered every sem.
ASTRO 10100 - Basic Concepts of Astronomy with Laboratory Exercises

GER
2/E with lab

An introductory, one-semester astronomy course designed for non-science majors. Topics include: basic observational features of the night sky, and their explanations; Kepler’s laws of planetary motion; Newton’s laws of motion and gravitation. Properties of light, and how it reveals the nature of its source. Origin, properties, and evolution of our solar system. The origin and evolution of stars, including giants, dwarfs, supernovae, neutron stars, and black holes. Structure of The Milky Way and other type of galaxies. Cosmology, Hubble’s Law and the expanding universe, from the Big Bang to the present; future scenarios. The lab consists of traditional hardware experiments and virtual online experiments. Students taking this course will be required to submit online and hard-copy laboratory reports.

5 hrs
4 cr.

BIOL 10000 (STEM) - Principles of Biology I

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
PD/C or D

GER
2/E

The chemical basis of life; basic structure and function of pro- and eucaryotic cells; bioenergetics; Mendelian and molecular genetics; development and mechanisms of control of gene expression at all levels; population genetics and evolution.

Material Fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.

prereq: MATH 12500, CHEM 10200
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.

spring only

BIOL 10200 (STEM) - Principles of Biology II

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)

Pluralism and Diversity
PD/C or D

GER
2/E

Taxonomy; homeostasis; internal transport and gas exchange in plants and animals; plant hormones; osmoregulation; mechanisms of action in the muscular, nervous and neuroendocrine systems; the senses, behavior; ecology.

Material fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.

prereq: BIOL 10000 or perm instr, MATH 10100 or equiv.
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.

fall only
BIOL 12000 - Anatomy and Physiology I

Cell structure and function; histology; nervous, muscular and skeletal systems; integument. Required for admission to the nursing program. Not accepted for credit toward the biology major.

prereq: CHEM 10000, 10100
coreq: CHEM 12000, 12100
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
fall only

BIOL 12200 - Anatomy and Physiology II

Structure and function of circulatory, digestive, excretory, endocrine and reproductive systems. Basic concepts of metabolism, embryology. Required for admission to the nursing program. Not accepted for credit toward the biology major.

prereq: BIOL 12000 or equiv.
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
spring only

BIOL 12500 (STEM) - Human Biology

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
GER
GER 2/E w/ lab

An introductory lecture/laboratory course for non-biology majors. BIOL 12500 explores the biology that underlies current health and disease topics (including diabetes, cancer, heart disease, sexually transmitted diseases, and nutrition). Using this topics approach, the course provides a survey of human anatomy and physiological function, along with the biological principles of genetics and cellular interactions that comprise our current understanding of the human organism. Laboratory exercises will introduce students to a scientific approach in studying human disease and physiology.

6 hrs
4.5 cr.
spring only

CHEM 10000 (STEM) - Essentials of General Chemistry Lecture

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
GER 2/E

Essential facts, laws, and theories of general chemistry.
Note: Core credit awarded only if CHEM 10000 and CHEM 10100 are completed. Primarily for nursing, nutrition and food science and community health education students.

4 hrs (3 lec, 1 rec)
3 cr.
CHEM 10100 - Inquiries into the Nature of Matter

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
Pluralism and Diversity
GER 2/E
A laboratory-based introduction to chemistry for non-science and health science majors that focuses on the basic principles of matter, energy and the environment. CHEM 10100 satisfies the laboratory requirements for a one-semester general chemistry course for health science students.
Primarily for nursing, nutrition and food science and community health students.
Taken with CHEM 100, meets STEM, SW and LPS
prereq or coreq: CHEM 10000
3 hrs
1.5 cr.

CHEM 10200 (STEM) - General Chemistry I

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
2/E
In-depth introduction to stoichiometric calculations, atomic and molecular structure and chemical bonding.
Primarily for pre-med, medical laboratory sciences and science majors.
prereq or coreq: MATH 12500, 12600 or equiv.
5 hrs (4 lec, 1 rec)
4 cr.

CHEM 10300 (STEM) - General Chemistry Laboratory I

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
Pluralism and Diversity
GER 2/E
Study of experiments designed to illustrate fundamental laws and techniques of chemistry.
Core credit awarded only if CHEM 10200 (STEM) and CHEM 10300 (STEM) are completed. Primarily for pre-med, medical laboratory sciences and science majors.
prereq or coreq: CHEM 10200
4 hrs (3 lab, 1 rec)
1.5 cr.

CHEM 10400 (STEM) - General Chemistry II

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
GER
2/E
In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.
Primarily for premed, medical laboratory sciences and science majors.
prereq: CHEM 10200 with grade of C or better or CHEM 10000 with perm chair
CHEM 10500 (STEM) - General Chemistry Laboratory II

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)

Pluralism and Diversity
GER 2/E

Laboratory experiments illustrating and applying theory of solutions to qualitative analysis.
Offered for transfer students who have completed only one semester of General Chemistry Laboratory.
prereq: One semester of General Chemistry Laboratory.
prereq or coreq: CHEM 10400
3 hrs
1.5 cr.

CHEM 11100 (STEM) - Chemical Principles

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
GER 2/E

In-depth introduction to chemical principles including measurement, stoichiometric calculations, inorganic nomenclature, gas laws, equilibrium, acids, bases and buffers. Emphasis is placed on problem-solving, oral presentations, and collaborative work. Laboratory and coursework emphasize analysis and evaluation of data. Primarily for pre-med, medical laboratory sciences and science majors.
prereq or coreq: MATH 12500 or equiv, MATH 12600
9 hrs (4 hrs lec, 3 hrs lab, 2 hrs workshop)
5.5
offered fall

CHEM 11200 (STEM) - Thermodynamics and Solution Chemistry

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)

GER
2/E

The study of quantum theory, atomic structure, periodic properties of the elements, kinetics, electrochemistry, and thermodynamics.
Primarily for pre-med, medical laboratory sciences and science majors.
prereq: CHEM 11100
9 hrs (4 hrs lec, 3 hrs lab, 2 hrs workshop)
5.5
offered spring

CHEM 12000 (STEM) - Essentials of Organic Chemistry Lecture

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
GER 2/E
Course presents essential facts, laws and theories of organic chemistry. Core credit awarded only if CHEM 12000 and CHEM 12100 are completed. Primarily for nursing, nutrition and food science and community health education students.

**CHEM 12100 (STEM) - Essentials of Organic Chemistry Laboratory**

**Hunter Core**
Life and Physical Sciences (LPS); Scientific World (SW)  
Pluralism and Diversity  
GER 2/E
Experiments designed to illustrate fundamental laws and techniques of organic chemistry. Core credit awarded only if CHEM 12000 and CHEM 12100 are completed. Primarily for nursing, nutrition and food science and community health students.

**prereq:** CHEM 10100  
**prereq or coreq:** CHEM 12000  
3 hrs (3 lab)  
1.5 cr.

**GEOL 10000 - Introductory to Geology**

**Hunter Core**
Scientific World (SW)  
GER 2/E
Introduction to Geology is the study of the physical aspects of our planet. The goal of this course is to provide students with a basic understanding of the forces continuously shaping the surface of our planet and the influence they have on our environment, so that their appreciation and interest in our planet is heightened. At the same time, this course provides a strong fundamental background for students who want to pursue more advanced geological and environmental studies courses.

3 hrs lec  
3 cr.  
Offered fall and spring.

**GEOL 10200 - Plate Tectonics and the Earth's Evolution**

GER 2/E
The second course in geology offered to non-geology majors. It is designed to familiarize students with the main concepts used in deciphering and interpreting earth’s evolution from the spatial and temporal perspective. Topics to be covered include: geologic time; geological principles; earth materials as recorders of past geologic processes; depositional environments and sedimentary rock record; igneous and metamorphic geologic environments and their rock records; evolution of the solar system; plate tectonics and life on earth; origin of the universe; life on earth and the fossil record; Precambrian, Paleozoic, Mesozoic, and Cenozoic life, history and tectonics. Field trips may be required; transportation fee.

**prereq:** GEOL 10100  
5 hrs (3 lec, 2 lab)
4 cr.
Offered fall.

PGEOG 13000 (STEM) - Weather and Climate

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
GER
2/E

Offers a basic understanding of how weather systems form, why certain regions have particular types of weather patterns, and what is known about climatic fluctuations across the globe. This includes an understanding of the basic physical principals that determine: how hot or cold a particular location is; how seasonal cycles vary in different parts of the world; and the types and amounts of precipitation. Students learn to analyze several types of weather maps and acquire a basic understanding of central issues related to global climate change, one of the most significant environmental issues of our time.
Material Fee: $ 5
5 hrs (3 lec, 2 lab)

4 cr.
Offered in the Fall and Spring

PGEOG 23100 - Physical Geography II: Principles of Geomorphology

See GEOL 23100

PHYS 11000 (STEM) - General Physics: Introductory Course in Mechanics, Heat, and Sound

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
GER
2/E

First semester of two-semester introductory physics course using algebra.
prereq: MATH 12500; pre-calculus or equiv. By math dept. exam.
7 hrs (3 lec, 3 lab, 1 rec)
4.5 cr.

PHYS 12000 (STEM) - General Physics: Introductory Course in Electricity and Magnetism, Light, and Atomic Physics

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
2/E

Second semester of PHYS 11000 (STEM), a two-semester introductory physics course using algebra.
prereq: PHYS 11000 or 11100
7 hrs (3 lec, 3 lab, 1 rec)
4.5 cr.
**Additional Information**

For transfer students, the laboratory science requirement may be met by courses taken at previous institutions only if they have been assigned the Hunter College course numbers in the above list. Transfer students should check with the psychology adviser after their courses have been formally evaluated by Hunter College to determine whether the science requirement has been met.

*Note: Students who declared a psychology major before January 1, 1998 are exempt from the science requirement within the Department of Psychology.*

**Special Programs**

**Field Placement Program**

Offered for one semester (PSYCH 30600) or as a 2-semester sequence, Psychological Services I and II (PSYCH 30600 and PSYCH 30700) give enrolled students practical supervised career experience one day per week in an approved mental health or community service setting in conjunction with a class that meets once each week. Students may also gain field experience in conjunction with academic work through Independent Study (PSYCH 20100) with a faculty sponsor. Permission of the instructor is required for these courses and students should start making arrangements by the preceding term before they plan to take the course (e.g., midspring for the fall term). The undergraduate adviser can inform students of the instructor who will be teaching PSYCH 30600 and PSYCH 30700, for which field placement referrals are made by the instructor. Students wishing to take PSYCH 20100 in conjunction with a field experience should meet with the college internship coordinator (by appointment in Career Development, Room 805 Hunter East) and with prospective faculty sponsors.

**The DIDARP Program (Diversity Institutional Drug Abuse Research Development Program)**

The overall goal of DIDARP is to develop the capacity of Hunter College to support drug abuse research through the following objectives: (1) provide faculty from diverse populations with drug abuse research knowledge and skill development through the conduct of research projects and other professional development activities, (2) encourage students from diverse populations to pursue drug abuse research careers by providing them with educational enrichment and research experiences; and (3) strengthen the underlying institutional infrastructure needed to support drug abuse research. Undergraduate students supported by DIDARP are highly qualified students from underrepresented populations. They must be interested in pursuing careers in drug abuse research and in working in the laboratory of a DIDARP investigator.

**BP-ENDURE**

The Blueprint Program for Enhancing Neuroscience Diversity through Undergraduate Education is designed to identify exceptionally talented undergraduates and prepare them to obtain doctoral degrees in neuroscience-related fields of study. The program offers specialized neuroscience courses, summer research experiences, and mentoring from senior faculty. For additional information, please visit www.bpendurehunternyu.info.

**Minor**

As of the spring of 2009, Hunter no longer requires that students have a minor. Those students wishing to do a minor should go directly to the department in which they are interested in doing a minor and declare it with that department.
Minor in Psychology

Declaring a Minor in Psychology

The minor in psychology is designed to expose students to a variety of content areas in the field of psychology and to provide the student with the ability to evaluate psychological research as a consumer.

To declare a psychology minor, the student must have completed PSYCH 10000 and any other 100-level psychology course with a minimum grade of C and a required mathematics course with a minimum grade of C or CR. The mathematics requirement may be satisfied by STAT 11300 or MATH 12500 (STEM), or by an appropriate score on the mathematics placement test.

The minor in Psychology consists of 15 credits in Psychology as follows:

**PSYCH 10000 - Introduction to Psychology**

**GER**
2/B

An introduction to the problems, methods and concepts of psychology, covering a range of topics which characterize the discipline, including history, methodology and professional ethics, biological foundations, perception, motivation and emotion, learning, memory and thinking, individual differences, intelligence, personality, behavior disorders and their treatment, group processes.

3 hrs
3 cr.

**PSYCH 21500 - Introduction to Research Methods in Psychology (W)**

**GER**
3/B

Evaluation of published research; research principles and the concepts which underlie them; how to evaluate and select research strategies.

*prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000*

3 hrs
3 cr.

Concentration

- Psychology: Concentration in Behavioral Neuroscience

**Psychology: Concentration in Behavioral Neuroscience**

Purpose

The Behavioral Neuroscience Concentration within Psychology provides interdisciplinary training for students preparing for academic or professional careers in neuroscience-related areas. The concentration brings together students from Psychology and Biology in a set of core courses and offers mentored research experience in faculty laboratories,
opportunities for student research presentations and talks by distinguished visiting neuroscientists. The neuroscience concentration is a particularly good option for students who plan to do graduate study in neuroscience or neuroscientierelated fields or attend medical school for neurology, neurosurgery, or psychiatry specialties. Because of the large number of required courses in the concentration, it is very important that interested students meet with the concentration adviser as early in their college career as possible-no later than the start of their Sophomore year. The concentration adviser is Prof. Philip Zeigler, ((212) 772-5363; Room 626 Hunter North).

Admission Requirements

Admission is by application at the end of the sophomore year. Applicants will need to have completed or be currently taking the following courses with a minimum GPA overall of 3.0 and of 3.5 in the major. Selection will be based upon a combination of grades and an interview, and the identification of a faculty sponsor in whose laboratory the student’s research will be carried out. Application forms and names of faculty contacts may be obtained from the Psychology adviser’s office.

BIOL 10000 (STEM) - Principles of Biology I

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
Pluralism and Diversity
PD/C or D
GER
2/E

The chemical basis of life; basic structure and function of pro- and eucaryotic cells; bioenergetics; Mendelian and molecular genetics; development and mechanisms of control of gene expression at all levels; population genetics and evolution.
Material Fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.
prereq: MATH 12500, CHEM 10200
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
spring only

BIOL 10200 (STEM) - Principles of Biology II

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
Pluralism and Diversity
PD/C or D
GER
2/E

Taxonomy; homeostasis; internal transport and gas exchange in plants and animals; plant hormones; osmoregulation; mechanisms of action in the muscular, nervous and neuroendocrine systems; the senses, behavior; ecology.
Material fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.
prereq: BIOL 10000 or perm instr, MATH 10100 or equiv.
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
fall only
CHEM 10200 (STEM) - General Chemistry I

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)
GER
2/E

In-depth introduction to stoichiometric calculations, atomic and molecular structure and chemical bonding. Primarily for pre-med, medical laboratory sciences and science majors.
prereq or coreq: MATH 12500, 12600 or equiv.
5 hrs (4 lec, 1 rec)
4 cr.

CHEM 10400 (STEM) - General Chemistry II

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)
GER
2/E

In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.
Primarily for premed, medical laboratory sciences and science majors.
prereq: CHEM 10200 with grade of C or better or CHEM 10000 with perm chair
5 hrs (4 lec, 1 rec)
4 cr.

PSYCH 10000 - Introduction to Psychology

GER
2/B

An introduction to the problems, methods and concepts of psychology, covering a range of topics which characterize the discipline, including history, methodology and professional ethics, biological foundations, perception, motivation and emotion, learning, memory and thinking, individual differences, intelligence, personality, behavior disorders and their treatment, group processes.
3 hrs
3 cr.

PSYCH 18000 - Brain and Behavior

GER
2/B

Brain structure, function and relation to behavior. Topics include the neural basis of perception, learning and memory, consciousness, motivation, emotion.
prereq: PSYC 10000
3 hrs
3 cr.

PSYCH 24800 - Statistical Methods in Psychological Research
GER
3/B

Open to declared majors only. Analysis and interpretation of quantified data. Descriptive and inferential statistics applied to psychological research.

PSYC 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)
prereq: PSYCH 10000 and any other 3 cr PSYCH course, MATH 12500 or STAT 11300 with a C or appropriate score on math placement exam
coreq: Writing Intensive
prereq or coreq: ENGL 12000
4 hrs
4 cr.

Course Requirements for the Undergraduate Concentration in Behavioral Neuroscience

In addition to completion of the psychology major and the introductory sequences in chemistry and biology, students in the concentration will take the introductory course in calculus, additional courses in biology and chemistry and an interdisciplinary Behavioral Neuroscience Seminar. A year of laboratory research is required and an undergraduate thesis based on this research will be eligible for consideration for Departmental Honors. Completion of the concentration meets the requirements for the minor in Biology. For continuation in the concentration, students must maintain the GPA required for entry.

Required Courses/Credits

PSYCH 10000 - Introduction to Psychology

GER
2/B

An introduction to the problems, methods and concepts of psychology, covering a range of topics which characterize the discipline, including history, methodology and professional ethics, biological foundations, perception, motivation and emotion, learning, memory and thinking, individual differences, intelligence, personality, behavior disorders and their treatment, group processes.
3 hrs
3 cr.

BIOL 10000 (STEM) - Principles of Biology I

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
Pluralism and Diversity
PD/C or D
GER
2/E

The chemical basis of life; basic structure and function of pro- and eucaryotic cells; bioenergetics; Mendelian and molecular genetics; development and mechanisms of control of gene expression at all levels; population genetics and evolution.
Material Fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.

prereq: MATH 12500, CHEM 10200
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
spring only

BIOL 10200 (STEM) - Principles of Biology II

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)

Prerequisite and Diversity
PD/C or D

GER
2/E

Taxonomy; homeostasis; internal transport and gas exchange in plants and animals; plant hormones; osmoregulation; mechanisms of action in the muscular, nervous and neuroendocrine systems; the senses, behavior; ecology.

Material fee: $5
PD credit awarded only upon completion of BIOL 10000 and 10200.
prereq: BIOL 10000 or perm instr, MATH 10100 or equiv.
7 hrs (3 lec, 3 lab, 1 disc)
4.5 cr.
fall only

CHEM 10200 (STEM) - General Chemistry I

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)

GER
2/E

In-depth introduction to stoichiometric calculations, atomic and molecular structure and chemical bonding. Primarily for pre-med, medical laboratory sciences and science majors.

prereq or coreq: MATH 12500, 12600 or equiv.
5 hrs (4 lec, 1 rec)
4 cr.

CHEM 10300 (STEM) - General Chemistry Laboratory I

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)

Prerequisite and Diversity
GER 2/E

Study of experiments designed to illustrate fundamental laws and techniques of chemistry.

Core credit awarded only if CHEM 10200 (STEM) and CHEM 10300 (STEM) are completed. Primarily for pre-med, medical laboratory sciences and science majors.

prereq or coreq: CHEM 10200
4 hrs (3 lab, 1 rec)
1.5 cr.

CHEM 10400 (STEM) - General Chemistry II
In-depth introduction to thermodynamics, redox reactions, electrochemistry and chemical equilibrium.

Primarily for premed, medical laboratory sciences and science majors.

**CHEM 10500 (STEM) - General Chemistry Laboratory II**

Laboratory experiments illustrating and applying theory of solutions to qualitative analysis.
Offered for transfer students who have completed only one semester of General Chemistry Laboratory.

**MATH 15000 (STEM) - Calculus with Analytic Geometry I**

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.

**PSYCH 18000 - Brain and Behavior**

Brain structure, function and relation to behavior. Topics include the neural basis of perception, learning and memory, consciousness, motivation, emotion.

**CHEM 22200 - Organic Chemistry Lecture I**
Structure, bonding, and reactions of organic molecules. Synthesis, stereochemistry, spectroscopy, reaction mechanisms.

_prereq: CHEM 10400 with a grade of C or better_
_5-6 hrs (4 lec, 1-2 recitation/workshop)_
_4 cr._

**PSYCH 24800 - Statistical Methods in Psychological Research**

**GER**

3/B

Open to declared majors only. Analysis and interpretation of quantified data. Descriptive and inferential statistics applied to psychological research.

PSYC 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

_prereq: PSYC 10000 and any other 3 cr PSYCH course, MATH 12500 or STAT 11300 with a C or an appropriate score on math placement exam_
_coreq: Writing Intensive

_4 hrs_

_4 cr._

**PSYCH 25000 - Experimental Psychology: General**

**GER**

3/B

Open to declared majors only. Research and general experimental techniques in study of behavior. Introduction to the principles of research methodology and experimental techniques. Required research reports involve a variety of laboratory exercises related to the study of basic behavioral processes. (Students may take either PSYC 24900 or 25000, but not both.)

PSYC 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

_prereq: ENGL 12000 with a minimum grade of C; one sem. acceptable lab science sequence with a passing grade; PSYC 24800 with a minimum grade of C_
_coreq: Writing Intensive_

_6 hrs (2 lec, 4 lab)_

_4 cr._

**PSYCH 39600 - Honors in Psychology**

Independent, sponsored, empirical research and seminar. Students are expected to attend the regularly scheduled seminar. An APA-style research report or its equivalent (to be filed in the department) is a requirement of this course. To graduate with departmental honors, the student must receive a grade of A in PSYCH 39600. Honors in Psychology is typically a one-semester course; however, when a PSYCH 39600 research project extends beyond a single semester, the student may (with permission) register for a second semester as PSYCH 39800. If taken, the student must receive a grade of A in both PSYCH 39600 and 39800 to graduate with departmental honors.

_prereq: ENGL 12000. PSYCH 24900 or 25000; 3.5 major GPA; 3.00 cumulative GPA; perm instr._
PSYCH 39800 - Honors in Psychology

Independent sponsored research and seminar. Attendance at regularly scheduled seminar and research report required. If taken, the student must receive a grade of A in both PSYCH 39600 and 39800 to graduate with departmental honors.

_prereq: PSYCH 39600, perm instr._

BIOL 47100 - Special Topics in Biology

GER

3/B

Specific area of contemporary interest in biology. Topics change from term to term. An oral presentation and a written paper are required.

_prereq: BIOL 30000

3 hrs (lec)

3 cr. per sem.

Electives

(9 credits, at least 3 of which must be Biology)

PSYCH 30000 - Physiological Psychology (B)

GER

3/B

Neural and endocrine mechanisms involved in learning, emotion, perception and other psychological processes. PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

_prereq: ENGL 12000. PSYCH 24900 or 25000

3 hrs

3 cr.

PSYCH 30100 - Sensation and Perception (B; C)

GER

3/B

Open to declared majors only. Methods, theories and empirical data relating to stimulus detection, encoding and perception as a function of variables including current stimuli and past history.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the
PSYCH 30900 - Behavioral Neuroendocrinology (B; D/S)

Pluralism and Diversity
PD/C
GER
3/B

Research and attitudes about sex-related behavior in human and nonhuman animals emphasizing evolutionary and neuroendocrinological processes and social-psychological processes; male-female differences and similarities, therapeutic strategy in sex-behavior pathology and sexual behavior and the law.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

prereq: ENGL 12000. PSYCH 24900 or 25000
3 hrs
3 cr.

PSYCH 32700 - Motivation and Emotion (B; C)

GER
3/B

The question of how behavior is initiated, maintained, directed and terminated. Human and non-human research evaluated.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

prereq: ENGL 12000. PSYCH 24900 or 25000
3 hrs
3 cr.

PSYCH 36900 - Behavioral Pharmacology (B)

GER
3/B

This course will provide information on the interrelationship of pharmacology and behavior. The relationship of licit, illicit and therapeutic drugs and their use and abuse will be explored in the context of their historical use and biological effects. Topics discussed include an overview of the nervous system, basic psychopharmacology, drug classification and specific drugs such as alcohol, nicotine, narcotics, marijuana, and psychotherapeutic agents.

prereq: ENGL 12000. PSYCH 24900 or 25000, PSYCH 30000 or perm instr.
3 hrs
3 cr.
BIOL 37000 - Physiology of the Nervous System

GER
3/B

A comprehensive introduction to neuroscience. Topics include how nerve cells (neurons) transmit electrical impulses, how neurons communicate with each other through synapses and how nerve pathways and networks determine many functions of the brain. The last portion of the course shall explore how developing neurons seek out targets and establish synapses.

prereq: BIOL 30000 or perm instr.
4 hrs (lec)
4 cr.
spring only

BIOL 37600 - Endocrinology

GER
3/B

Cellular organization of the endocrine system; molecular mechanisms of hormone action; hormonal physiology of metabolism and reproduction; integration of endocrine responses by the central nervous system.

prereq: BIOL 20200 or perm instr.
3 hrs (lec)
3 cr.
spring only

BIOL 38000 - Molecular Neurobiology

GER
3/B

Molecular components and molecular mechanisms involved in the cell biology of neurons and glia, neuronal signaling, neuronal development, learning, memory and diseases of the nervous system.

prereq: BIOL 30000 or perm instr.
3 lec hrs
3 cr.
fall only

Additional Information

For questions or further information see the concentration adviser: Prof. P. Zeigler, tel: (212) 772- 5363, hzeigler@hunter.cuny.edu

Undergraduate Minor

Minor in Psychology
The minor in psychology is designed to expose students to a variety of content areas in the field of psychology and to provide the student with the ability to evaluate psychology research as a consumer. To declare a psychology minor, the student must have completed any 100-level psychology course with a minimum grade of C and a required mathematics course with a minimum grade of C or CR. The mathematics requirement may be satisfied by STAT 11300 or MATH 12500 or by an appropriate score on the mathematics placement test. The minor in Psychology consists of 15 credits in Psychology, as follows: PSYCH 10000 and any other 3 cr. PSYC course; PSYCH 21500; and any 2 200-level PSYC courses below PSYCH 24800. The total number of credits to fulfill all minor requirements, including credits for all prerequisites, is 18: 15 credits in PSYC course and 3 credits in STAT 11300 or MATH 12500.

Psychology

Note: Letters in parentheses after course names refer to content areas: (A) = Applications of Psychology; (B) = Biopsychology; (C) = Cognitive Processes; (D/S) = Developmental/Social.

PSYCH 10000 - Introduction to Psychology

GER
2/B

An introduction to the problems, methods and concepts of psychology, covering a range of topics which characterize the discipline, including history, methodology and professional ethics, biological foundations, perception, motivation and emotion, learning, memory and thinking, individual differences, intelligence, personality, behavior disorders and their treatment, group processes.
3 hrs
3 cr.

PSYCH 14000 - Psychological Adjustment

GER
2/B

Styles of adjustment; social interaction; self-concept and self-esteem: stress management; alienation; failures of adjustment.

prereq: PSYC 10000
3 hrs
3 cr.

PSYCH 15000 - Human Development

GER
2/B

Development from conception to death; biological, physiological and social factors and their interactions at each stage.

prereq: PSYC 10000
3 hrs
3 cr.

PSYCH 16000 - Evolution and Behavior

GER
2/B
Aggression, sleep, learning, communication, emotion, motivation and social behavior in human and other species; underlying mechanisms, development, evolutionary history.

**prereq:** PSYC 10000

3 hrs

3 cr.

**PSYCH 17000 - Psychology of Human Sexuality**

**Pluralism and Diversity**

**PD/C**

**GER**

2/B

Psychological foundations, sexual development and response patterns; male and female roles; individual and social attitudes, legal issues.

**cross-listed** WGSS 17000

**prereq:** PSYCH 10000

3 hrs

3 cr.

**PSYCH 18000 - Brain and Behavior**

**GER**

2/B

Brain structure, function and relation to behavior. Topics include the neural basis of perception, learning and memory, consciousness, motivation, emotion.

**prereq:** PSYC 10000

3 hrs

3 cr.

**PSYCH 19000 - Development of Gender Roles**

**Pluralism and Diversity**

**PD/C**

**GER**

2/B

Social, cognitive, hormonal and personality factors in development of gender roles; determinants of behavioral and cognitive gender differences.

**cross-listed** WGSS 19000

**prereq:** PSYCH 10000

3 hrs

3 cr.

**PSYCH 19500 - Special Topics in Psychology I**

**GER**

2/B

Readings and discussions on a selected problem or topic area. Topics vary from semester to semester.
PSYCH 20100 - Independent Study in Psychology

May be applied to major once. Designed to meet the needs of individual students under the direction of a particular faculty sponsor. The course may involve independent readings, tutorials, work as an advising assistant or peer counselor, field placement, an individual research project, or participation in ongoing faculty research, any of these culminating in a written report.

prereq: PSYCH 10000 and any other 3 cr PSYCH course, perm dept.

prereq or coreq: ENGL 12000

PSYCH 20500 - The Profession of Psychology (W)

GER
3/B

Open to declared majors only. Introduction to and critical analysis of the profession of psychology; examination of theories and career options in major subfields of psychology. Students must have Internet access.

prereq: PSYCH 10000 and any other 3 cr PSYCH course, perm dept.
prereq or coreq: ENGL 12000

PSYCH 21000 - Child Development (D/S)

GER
3/B

Emotional, social, motor and cognitive development as influenced by genetic, cultural and individual factors during the first twelve years of life. (May not be taken for credit by students who have a collateral major, or a minor, in education.)

Writing Intensive

prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000

PSYCH 21200 - Exceptional Childhoods (D/S)

GER
3/B

Special problems of adjustment and training of exceptional children, including the gifted as well as the intellectually, emotionally and physically handicapped.

Writing Intensive

prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000
PSYCH 21500 - Introduction to Research Methods in Psychology (W)

GER
3/B
Evaluation of published research; research principles and the concepts which underlie them; how to evaluate and select research strategies.
prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000
3 hrs
3 cr.

PSYCH 22000 - Personality (D/S)

GER
3/B
Review of the contributions to the understanding of normal personality in the theories of the Freudian and other analytical schools; of Allport, of representative behaviorist groups and of constitutional typologists; also, methods of assessing and understanding individual personality.
writing intensive
prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000
3 hrs
3 cr.

PSYCH 22100 - Psychoanalytic Theories (A; D/S)

GER
3/B
Historical, theoretical and empirical approaches from Freud to the present; empirical evaluation and integration of these theories with learning and ethological theory.
writing intensive
prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000
3 hrs
3 cr.

PSYCH 22300 - Abnormal Psychology (A; D/S)

GER
3/B
Consideration of psychological abnormalities; symptoms, etiology, diagnostic procedures and therapy.
writing intensive
prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000
PSYCH 22400 - Neuroscience

The aim of this course is to introduce you to the biological and physiological aspect of the science of Psychology. Biopsychology is the subarea of Psychology that takes a biological approach to understanding behavior. Biopsychologists study the biological events - genetic, neural, endocrine- that underlie each and every one of our thoughts, feelings, and actions. This course will explore what is currently known about the biological basis of emotional responses, mental illness, sexual behavior, memory, states of consciousness, sensory perception, thought and language, and several neurological disorders.

prereq: PSYCH 10000 and any other 3 CR PSYCH Course; completion of ENGL 12000 with a minimum grade of C

3 hrs
3 cr.

PSYCH 22500 - Ethology: Animal Behavior (B)

Ger
3/B

Adaptation, survival, reproduction and evolution of behavior, emphasizing development and species-comparison.

writing intensive

prereq: PSYCH 10000 and any other 3 cr PSYCH course

prereq or coreq: ENGL 12000

3 hrs
3 cr.

PSYCH 23000 - Social Psychology (D/S)

Ger
3/B

Problems of human experience and behavior in the social context; theories and current methodology in research on the influence of the group on cognitive processes, motivation, personality structure and the self; attitudes and prejudice; leadership; group processes.

Writing Intensive

prereq: PSYCH 10000 and any other 3 cr PSYCH course

prereq or coreq: ENGL 12000

3 hrs
3 cr.

PSYCH 23500 - The Psychology of Women (D/S)

Pluralism and Diversity

PD/C

Ger
3/B

Psychological functioning of women; sexuality, pregnancy, social roles and status, aging, achievement, life styles, power.

Writing Intensive cross-listed WGSP 23500 (W)

prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000
3 hrs
3 cr.

PSYCH 24000 - Applications of Psychology (A)

GER
3/B

Psychological issues in business, law and medicine; consumer research, personnel selection and training, motivation and morale in industry, safety programs, testimony, lie detection and psychological issues in coping with physical illness.
Writing Intensive
prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000
3 hrs
3 cr.

PSYCH 24200 - Health Psychology (A)

GER
3/B

Psychological and behavioral factors related to physical illness and health promotion, including such areas as aging, stress and coping, pain, addiction and eating disorders.
Writing Intensive
prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000
3 hrs
3 cr.

PSYCH 24300 - Cognitive Processes (C)

GER
3/B

A survey of theoretical issues and empirical research on human cognition including attention, perception, memory, representation of knowledge, language, and problem solving.

prereq: 6 cr. in PSYCH including PSYCH 10000
3 hrs
3 cr.

PSYCH 24500 - History of Psychology (W)

GER
3/B

Introspective, behavioristic, gestalt, psychoanalytic and related viewpoints developed from early philosophic roots of psychology.
prereq: PSYCH 10000 and any other 3 cr PSYCH course
prereq or coreq: ENGL 12000
PSYCH 24800 - Statistical Methods in Psychological Research

GER
3/B

Open to declared majors only. Analysis and interpretation of quantified data. Descriptive and inferential statistics applied to psychological research.

PSYC 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

prereq: PSYCH 10000 and any other 3 cr PSYCH course, MATH 12500 or STAT 11300 with a C or appropriate score on math placement exam

coreq: Writing Intensive

prereq or coreq: ENGL 12000

4 hrs
4 cr.

PSYCH 24900 - Experimental Psychology: Social

GER
3/B

Introduction to the principles of research methodology and experimental techniques. Required research reports involve laboratory and field exercises concerned with a variety of social psychological phenomena. (Students may take either PSYC 249 or 250, but not both.)

PSYC 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

prereq: ENGL 12000 with a minimum grade of C; one sem. acceptable lab science sequence with a passing grade;
PSYC 24800 with a minimum grade of C

prereq or coreq: Writing Intensive

6 hrs (2 lec, 4 lab)

4 cr.

PSYCH 25000 - Experimental Psychology: General

GER
3/B

Open to declared majors only. Research and general experimental techniques in study of behavior. Introduction to the principles of research methodology and experimental techniques. Required research reports involve a variety of laboratory exercises related to the study of basic behavioral processes. (Students may take either PSYC 24900 or 25000, but not both.)

PSYC 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

prereq: ENGL 12000 with a minimum grade of C; one sem. acceptable lab science sequence with a passing grade;
PSYCH 24800 with a minimum grade of C
prereq or coreq: Writing Intensive
6 hrs (2 lec, 4 lab)
4 cr.

PSYCH 29500 - Special Topics in Psychology II

GER
3/B

Readings and discussion on a selected problem or topic area. Topics will vary from semester to semester.
PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)
prereq: ENGL 12000, PSYC 24900 or 25000 or perm instr.
3 hrs
3 cr.

PSYCH 30000 - Physiological Psychology (B)

GER
3/B

Neural and endocrine mechanisms involved in learning, emotion, perception and other psychological processes.
PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)
prereq: ENGL 12000, PSYC 24900 or 25000
3 hrs
3 cr.

PSYCH 30100 - Sensation and Perception (B; C)

GER
3/B

Open to declared majors only. Methods, theories and empirical data relating to stimulus detection, encoding and perception as a function of variables including current stimuli and past history.
PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)
prereq: ENGL 12000, PSYC 24900 or 25000
3 hrs
3 cr.

PSYCH 30600 - Seminar in Psychological Services I (A)

Open to declared majors only. An integration of personality and abnormal psychology, the helping process and the role of the helper. Seminar and one day per week placement in mental health/community service setting.
PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a
Psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

**prereq:** ENGL 12000, PSYCH 2200 or 32300, PSYCH 24900 or 25000, perm instr.

8 hrs
4 cr.

**PSYCH 30700 - Seminar in Psychological Services II (A)**

Integration of personality and abnormal psychology. Seminar and one day per week placement in mental health/community service setting.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

**prereq:** ENGL 12000, PSYCH 30600, perm instr.

3 hrs
3 cr.

**PSYCH 30900 - Behavioral Neuroendocrinology (B; D/S)**

**Pluralism and Diversity**

PD/C
GER
3/B

Research and attitudes about sex-related behavior in human and nonhuman animals emphasizing evolutionary and neuroendocrinological processes and social-psychological processes; male-female differences and similarities, therapeutic strategy in sex-behavior pathology and sexual behavior and the law.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

**prereq:** ENGL 12000, PSYCH 24900 or 25000

3 hrs
3 cr.

**PSYCH 31000 - Research Methods in Developmental Psychology (C; D/S)**

**GER**

3/B

Open to declared majors only. Theory and research in selected areas of developmental psychology.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

**prereq:** ENGL 12000, PSYCH 15000 or 21000, PSYCH 24900 or 25000, perm instr.

3 hrs
3 cr.

**PSYCH 31300 - Adolescence (D/S)**
This course reviews the physical, cognitive, emotional, and social changes that typically occur during adolescence. Topics include classic and contemporary theories of adolescent development and the interactions between adolescents and their social and cultural environments.

**prereq**: ENGL 12000, Completion of PSYCH 24900 or 25000
3 hrs
3 cr.

**PSYCH 31500 - Adult Development (D/S)**

**GER**
3/B

Open to declared majors only. Theories and research concerning the personal and social development of men and women in adulthood; ongoing changes with age related to physical growth and decline, including marital, parental and interpersonal relationships, occupational roles, leisure activities, disability and approaching death.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

**prereq**: ENGL 12000. PSYCH 15000 or 21000, PSYCH 24900 or 25000
3 hrs
3 cr.

**PSYCH 31600 - Cognitive Neuroscience (B/C)**

The course will address some of the central issues in contemporary cognitive neuroscience, describe old (clinical studies) and new (brain imaging) sources of information, their limitations and their contributions to our understanding of the neural mechanisms of cognition.

**prereq**: ENGL 12000, Completion of PSYCH 24900 or 25000
3 hrs
3 cr.

**PSYCH 32000 - Neuronal Basis of Behavior (Neuroethology) (B)**

This course is designed primarily for upper level undergraduates who already have an introductory background in animal behavior, neurobiology and Psychology. The course will review the rapidly expanding field of neuroethology, providing a general introduction to the subject and some of its many model systems.

**prereq**: ENGL 12000, Completion of PSYCH 24900 or 25000
3 hrs
3 cr.

**PSYCH 32100 - Animal Orientation: Function and Mechanisms (B)**

Finding mates, securing shelter and food, and returning to a familiar home are ubiquitous animal functions which often require complex navigational strategies. This course 1) explores historical attempts to develop an understanding of the role and determinants of these strategies, 2) reviews the complexity of orientation behavior across phyla mediated by simple taxes, landmark orientation, compass orientation, path integration and dead reckoning, and cognitive mapping, 3) discusses sensory control of orientation behavior, including multisensory integration, and sensory modality transposition, 4) reviews tools and models used by researchers of animal orientation, and 5) addresses physiological and molecular bases of selected behaviors. Laboratory exercises, field observations, visits to colleagues' laboratories in the metropolitan area, and attending relevant seminars at other institutions (inside or outside CUNY) will complement class room lectures and discussions.
prereq: ENGL 12000; Completion of PSYCH 24900 or 25000
3 hrs.
3 cr.

PSYCH 32200 - Psychology of Language (C)

GER
3/B

Psychological and psychophysical basis of language comprehension, production and acquisition from experimental and theoretical perspectives; the relationship between language and the cognitive processes of perception, memory and representation.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

prereq: ENGL 12000. PSYCH 24900 or 25000, PSYCH 27000 or perm instr.
3 hrs
3 cr.

PSYCH 32300 - Developmental Psychopathology (A; D/S)

GER
3/B

Survey and evaluation of empirical and theoretical approaches to the major psychological abnormalities that arise in childhood and adolescence; their characteristics, causes and treatments.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

prereq: ENGL 12000. PSYCH 21200 or 22300, PSYCH 24900 or 25000
3 hrs
3 cr.

PSYCH 32400 - Communication Behavior (B/C)

This course will examine behaviors that exchange information, the evolution of the signals that carry the message, and the senses that receive it. Both human nonverbal and animal communication systems will be analyzed. Students will conduct field and library research on specific communicative behaviors.

prereq: ENGL 12000, Completion of PSYCH 24900 or 25000
3 hrs
3 cr.

PSYCH 32500 - Animal Cognition (B/C)

This course will focus on various topics and readings in animal cognition within and across species from the perspectives of animal behavior, cognitive ethology and comparative cognition. In addition to familiarizing the students
with what is currently known, the course is designed to stimulate critical and creative thinking about how we investigate and understand the minds and behavior of animals as diverse as chimpanzees, dolphins, elephants, monkeys, pigeons and humans. It will focus on various topics and readings in animal cognition including categorization, discrimination learning, decision making, social learning, tool use, culture and communication.  

prereq: ENGL 12000, Completion of PSYCH 24900 or 25000  
3 hrs.  
3 cr.

**PSYCH 32700 - Motivation and Emotion (B; C)**

GER  
3/B

The question of how behavior is initiated, maintained, directed and terminated. Human and non-human research evaluated.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)  

prereq: ENGL 12000. PSYCH 24900 or 25000  
3 hrs  
3 cr.

**PSYCH 32800 - States of Consciousness (A/C)**

GER  
3/B

The subjective and physiological aspects of consciousness; the means by which it may be altered: hypnosis, dreams, drugs, meditation and mysticism; psychosis.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)  

prereq: ENGL 12000. PSYCH 24900 or 25000  
3 hrs  
3 cr.

**PSYCH 32900 - Cognitive Science (C)**

Introduction to cognitive science, the interdisciplinary study of the human mind from the perspectives of psychology, linguistics, computer science, neuroscience, and philosophy.  

prereq: PSYCH 24800 with a minimum grade of C; completion of PSYCH 24800 or 25000; declaration of the psychology major  
3 hrs  
3 cr.

**PSYCH 33000 - Memory and Attention (C)**

This course is intended to provide an introduction to the processes associated with memory, attention, and their development, with particular attention given to classic and contemporary theories, and to how they interact with factors such as biology, age, culture and experience.
PSYCH 33100 - Social Cognition of Gender

The course examines the social cognitive and motivational processes that a) underpin beliefs about and evaluations of men and women, b) affect behaviors toward and by men and women, and c) change or entrench attitudes and behaviors.

PSYCH 33200 - Attitudes and Persuasion (D/S)

This course examines both traditional and current theory and research on attitudes and attitude change in social psychology. The first third of the course covers the historical background of the field, the nature of attitudes, problems associated with the measurement of social attitudes and behavior, the conceptual structure and organization of attitudes, and the relation between attitudes and behavior. The middle third of the course explores one of the most-researched topics in attitude research: stereotyping, prejudice and discrimination. The final third of the course examines various social psychological theories of attitude change and persuasion, along with their diverse applications.

PSYCH 33300 - Advanced Social Psychology Theory and Methods (D/S)

In-depth training in the concepts and skills necessary for conducting scientific research in social psychology. Core concepts in social psychology are used as the basis for case-studies in which different methods for examining constructs are illustrated and compared.

PSYCH 33400 - Cultural Psychology (D/S)

As ours society becomes more multi-cultural, the question of how culture impacts psychological processes is increasingly important. The goal of this course is to expose students to the ways that cultural meanings, practices, and institutions influence and reflect individual human psychologies, with an emphasis on cultural variability in psychological theories and research findings. Topics include but are not limited to: a) What is cultural psychology; b) Research methods in cultural psychology; c) Historical and conceptual issues in cultural psychology d) cross-cultural models of self, attention, perception, morality, memory, human development and health, e) cultural differences in gender effects and f) policy implications of cultural psychology

PSYCH 34000 - Industrial and Organizational Psychology (A)
A review of research and theories on the effects of leadership, human relations, motivation and organizational structures on behavior in business and industrial settings; applications of personnel psychology, motivational psychology and human factors engineering in the work place; job analysis, employee selection, leadership, performance appraisal, power and authority, work motivation and organizational communication.

PSYCH 24800 and 24900 or 25000, one semester of an acceptable science sequence, ENGL 12000 and declaration of a psychology major are the minimum prerequisite for all courses above PSYCH 25000. (Students falling under the previous curriculum need not fulfill the science prerequisite.)

**PSYCH 34100 - Stress, Trauma, and Resilience (A)**

This course covers the interrelated topics of stress, trauma, and resilience. The course uses a clinical science perspective to explore both normative (healthy) and problematic physiological and psychological responses to stress and trauma, as well as factors that influence resilience.

**prereq:** ENGL 12000, Completion of PSYCH 24900 or 25000

3 hrs.

3 cr.

**PSYCH 34200 - Emotion: Function and Dysfunction (A)**

Focus of the course will be on understanding the role of emotion in both functional and dysfunctional contexts. Through readings, class discussion, and lecture, we will address how emotions can both be vital for survival yet at the heart of so many mental disorders.

**prereq:** ENGL 12000, Completion of PSYCH 24900 or 25000

3 hrs.

3 cr.

**PSYCH 34400 - Clinical Psychology (A)**

Clinical psychologists engage in a wide range of activities including research, teaching, assessment, administration, consultation. This course will discuss controversial issues regarding how to best define clinical psychology in a modern health practice context.

**prereq:** ENGL 12000, Completion of PSYCH 24900 or 250

3 hrs.

3 cr.

**PSYCH 34800 - Statistics Practicum in Psychology**

Apply and extend statistical knowledge and data analytic skills by tutoring students in PSYCH 24800 and serving as a teaching assistant for the course. Weekly seminar meetings provide training and support. Students prepare and give statistical presentations, write homework problems, help in computer labs, and evaluate homework problems or lab assignments.
prereq: PSYCH 24800 with a minimum grade of A-. perm instr.
3 hrs
3 cr.

PSYCH 35000 - Learning (C)

GER
3/B

Theoretical and experimental approaches to human and animal learning; the relationship between systematic theory models and methodology; analysis of the historical and contemporary major contributions to learning theories.
prereq: ENGL 12000. PSYCH 24900 or 25000
3 hrs
3 cr.

PSYCH 35500 - Ethnic and Cultural Identity Theories (D/S)

GER
3/B

Current research and theory on ethnic and racial identity development, including components of ethnic/racial/cultural identity; historical and conceptual issues; the state of theory and research on ethnic identity as it pertains to particular ethnic groups; racial and ethnic socialization; language and ethnic identity; applications of the ethnic identity construct.
prereq or coreq: Declared Psychology major; completion of PSYCH 24800 and either PSYCH 24900 or PSYCH 25000
3 hrs
3 cr.

PSYCH 36100 - Psychological Tests (A)

GER
3/B

Introduction to the principles of psychological assessment; major methods of measuring general ability, aptitude, achievement, interest, personality. Appraisal of psychological tests.
prereq: ENGL 12000. PSYCH 24900 or 25000
3 hrs
3 cr.

PSYCH 36900 - Behavioral Pharmacology (B)

GER
3/B

This course will provide information on the interrelationship of pharmacology and behavior. The relationship of licit, illicit and therapeutic drugs and their use and abuse will be explored in the context of their historical use and biological effects. Topics discussed include an overview of the nervous system, basic psychopharmacology, drug classification and specific drugs such as alcohol, nicotine, narcotics, marijuana, and psychotherapeutic agents.
prereq: ENGL 12000, PSYCH 24900 or 25000, PSYCH 30000 or perm instr.
PSYCH 37000 - Cognitive Development (C; D/S)

GER
3/B

A comparative information processing perspective on the development of mental structure and functioning, including perception, memory, problem solving, self-awareness of thinking, intelligence, concept formation and language development.

 prerequisite: ENGL 12000, PSYCH 24900 or 25000, PSYCH 27000 or perm instr.
3 hrs
3 cr.

PSYCH 38000 - Microcomputers in Psychological Research

GER
3/B

An introduction to the fundamentals of microcomputer programming and digital electronics, including the structure of a computer language (BASIC), digital logic, interfacing and computer memory. Students learn to program psychological experiments, collect data, perform statistical analyses and control peripheral devices by microcomputer. Designed for advanced undergraduates.

 prerequisite: ENGL 12000, PSYCH 24900 or 25000, perm instr.
3 hrs
3 cr.

PSYCH 39000 - Special Topics in Psychology III

GER
3/B

Readings and discussion on a selected problem or topic area. Topics vary from semester to semester.

 prerequisite: ENGL 12000, PSYCH 24900 or 25000, perm instr.
3 hrs
3 cr.

PSYCH 39500 - Independent Research in Psychology

May be applied to the major once. Designed to meet the needs and interests of individual students under the direction of a particular instructor at a more advanced level than PSYCH 20100. Such study may involve independent reading, tutorials, independent research projects, or participation in ongoing faculty research, any of these culminating in an APA-style research report or literature review. Field Placements (internships) cannot be granted credit as PSYC 39500; however, supervised field Placement taken in conjunction with PSYCH 36100 - Psychological Tests (A) will be granted credit as PSYC 395.

 prerequisite: ENGL 12000, PSYCH 24900 or 25000, perm instr.
3 hrs
3 cr.
PSYCH 39600 - Honors in Psychology

Independent, sponsored, empirical research and seminar. Students are expected to attend the regularly scheduled seminar. An APA-style research report or its equivalent (to be filed in the department) is a requirement of this course. To graduate with departmental honors, the student must receive a grade of A in PSYCH 39600. Honors in Psychology is typically a one-semester course; however, when a PSYCH 39600 research project extends beyond a single semester, the student may (with permission) register for a second semester as PSYCH 39800. If taken, the student must receive a grade of A in both PSYCH 39600 and 39800 to graduate with departmental honors.

prereq: ENGL 12000, PSYCH 24900 or 25000; 3.5 major GPA; 3.00 cumulative GPA; perm instr.
3 hrs
3 cr.

PSYCH 39800 - Honors in Psychology

Independent sponsored research and seminar. Attendance at regularly scheduled seminar and research report required. If taken, the student must receive a grade of A in both PSYCH 39600 and 39800 to graduate with departmental honors.

prereq: PSYCH 39600, perm instr.
3 hrs
3 cr.

PSYCH 40000 - Special Topics in Psychology IV

GER
3/B

Readings and discussion on a selected problem or topic area. Topics vary from semester to semester.

prereq: ENGL 12000, PSYCH 24900 or 25000, perm instr.
3 hrs
3 cr.

Undergraduate Major

French - BA

Major

The French major provides two concentrations:

a. French Literature (30 cr)

b. French Language and Civilization

Preparation for Teaching French, Spanish or Italian Adolescent Education (grades 7-12)

Students pursuing adolescent education must complete the 30 or 36 credit major in one of these languages and, in addition, complete the course in second language acquisition (3 cr). The 23-credit pedagogical sequence in adolescent education will serve as the minor. See the School of Education section of the catalog for further information.

Study Abroad
All study abroad programs are open to students from Hunter College and other accredited institutions. Majors and minors in the Department of Romance Languages are strongly encouraged to participate in study abroad programs (see adviser for GPA requirements).

Qualified students can apply for financial aid and STOCS grants.

The New York/Paris Exchange Program is open to students who wish to study a semester or a year at a French university in Paris. For the requirements and more details, contact Professor J. Przybos at (212) 772-5097. French in France is offered during June, July and August at Pau and Bayonne.

**Minor in French (15 credits)**

**a. French Literature and Culture**

This course of study provides the opportunity to deepen the knowledge of French language beyond the basic language sequence and to introduce students to French Culture trans-historically, in ways that could usefully complement a major in another field in the humanities, where a broad knowledge of French history or culture could be useful (for instance in the Arts).

The prerequisite for this minor consists either of

**FREN 20200 - Intermediate French II**

Language lab mandatory.

There are three options for students beginning French at Hunter. A regular sequence (FREN 10100, 10200, 20100, 20200), an intensive sequence (FREN 10300, 20300) which covers in two semesters material normally covered in four and a course for students who use French as a heritage language.

prereq: FREN 2000 or three yrs high school French

3 hrs
3 cr.

-or-

**FREN 20300 - Intensive Intermediate French**

Equivalent to material covered in 20100 and 20200. Language lab mandatory.

There are three options for students beginning French at Hunter. A regular sequence (FREN 10100, 10200, 20100, 20200), an intensive sequence (FREN 10300, 20300) which covers in two semesters material normally covered in four and a course for students who use French as a heritage language.

prereq: FREN 10200 or two yrs high school French

6 hrs
6 cr.

For the minor, 3 language courses to be chosen from

**FREN 21100 - Intermediate Grammar and Composition**

Continued study of grammar and syntax, with focus on reading and writing. Intended for French majors and minors.

prereq: FREN 202, 203, or placement by departmental adviser
3 hrs
3 cr.

FREN 22000 - Advanced French Conversation

prereq: FREN 20200 or four yrs high school French
3 hrs
3 cr.

FREN 31100 - Advanced French Grammar

prereq: FREN 20200
3 hrs
3 cr.

FREN 31200 - French Oral and Written Expression

prereq: FREN 20200 or equiv.
3 hrs
3 cr.

and 2 Culture and Civilization courses to be chosen from

FREN 33500 - French Culture I

Pluralism and Diversity
PD/D
Main intellectual and artistic currents from the Gauls to the French Revolution. Conducted in French.
prereq: FREN 20200 or four yrs high school French
3 hrs
3 cr.

FREN 33600 - French Culture II

Pluralism and Diversity
PD/D
Main intellectual and artistic currents from the French Revolution to 1958. Conducted in French.
prereq: FREN 20200 or four years of high school French
3 hrs
3 cr.

FREN 33700 - Contemporary French Culture

Contemporary French civilization and culture from 1958 to the present, as seen in its press. World events observed through the lens of French culture and politics. Comparison of current events coverage by French and U.S. Press.
prereq: FREN 31100 or 31200 or perm instr.
3 hrs
3 cr.
b. French Literature

This course of study provides the opportunity to deepen the knowledge of French language beyond the basic language sequence through the analysis of French Literature. Among undergraduates potentially interested in this track are our native-speakers, or students with a francophone background, whose majors are in another, non-related, discipline.

The prerequisite for this minor consists of

**FREN 21100 - Intermediate Grammar and Composition**

Continued study of grammar and syntax, with focus on reading and writing. Intended for French majors and minors.

*prereq: FREN 202, 203, or placement by departmental adviser*

3 hrs
3 cr.

For the minor, students must first complete

**FREN 34100 - Survey of French Literature from the Middle Ages to the End of the 17th Century**

*Pluralism and Diversity*  
*PD/D*  
*GER*  
3/A

*prereq: FREN 20200 or four yrs high school French*

3 hrs
3 cr.

**FREN 34200 - Survey of French Literature from the 18th Century to the Modern Period**

*Pluralism and Diversity*  
*PD/D*  
*GER*  
3/A

*prereq: FREN 20200 or four yrs high school French*

3 hrs
3 cr.

and then choose 3 courses from the following:

**FREN 34300 - Medieval and Renaissance French Literature**

*Pluralism and Diversity*  
*PD/D*  
*GER*
From medieval epics, lyrical poetry and mystery plays to writers such as See, Du Bellay, Ronsard, Rabelais and Montaigne.

FREN 34100 and 34200 are prerequisite to all courses numbered 34300 and above.

3 hrs
3 cr.

**FREN 34400 - 17th Century French Literature**

Pluralism and Diversity
PD/D
GER
3/A

Such authors as Boileau, Bossuet, Corneille, Cyrano de Bergerac, La Bruye, Mme de Lafayette, La Fontaine, Malherbe, Molire, Pascal, Racine, Mme de Sign Saint Simon.

Topics to be offered may include single authors, themes, genres, movements, or approaches.  
prereq: FREN 34100 and 34200  
3 hrs  
3 cr.

c. French Culture and Literature in Translation

This course of study provides the opportunity to students with no knowledge of the French language to be introduced to French Culture & Literature. This minor offers an interesting complement or context to studies in other fields (such as history, philosophy, political theory or women’s studies) that have benefited, historically, from French influences.
The courses in this minor are to be chosen from a selection of 200-level courses, taught in English, such as

**FREN 24100 - Early French Civilization: From Gothic to Revolution**

**Hunter Core**
World Culture and Global Issues (WCGI)

**Pluralism and Diversity**
PD/D
GER
2/C

Conducted in English; readings in English.
3 hrs
3 cr.

**FREN 24200 - Modern French Civilization: From Revolution to Present**

**Hunter Core**
World Cultures and Global Issues (WCGI)

**Pluralism and Diversity**
PD/D
GER
2/C

Conducted in English; readings in English.
There are three options for students beginning French at Hunter. A regular sequence (FREN 10100, 10200, 20100, 20200), an intensive sequence (FREN 10300, 20300) which covers in two semesters material normally covered in four and a course for students who use French as a heritage language.
3 hrs
3 cr.

**FREN 25100 - French Literature and the Arts**

**Pluralism and Diversity**
PD/D

Conducted in English; readings in English and French. Particular attention to theme, image and structure as they may be compared in literary and artistic works.
3 hrs
3 cr.

**FREN 25200 - From Symbolism to Surrealism in French Literature**

**GER**
3/A

Conducted in English; readings in English. Impressionist, symbolist, cubist, Dada and surrealist movements in literature and art from the late 19th to 20th century.
3 hrs
3 cr.
FREN 25300 - Modern French Theatre: Theory and Practice

Pluralism and Diversity
PD/D
GER
3/A

4 hrs
3 cr.

FREN 25400 - Film and the French Novel

Pluralism and Diversity
PD/D
GER
3/A

Conducted in English. Truffaut, Godard, Resnais, Robbe-Grillet and others.
4 hrs
3 cr.

FREN 25500 - New Approaches to Modern French Literature

GER
3/A

Conducted in English; readings in French and English. Investigation of various currents of 20th century literary and aesthetic criticism as practiced in France.
3 hrs
3 cr.

FREN 25600 - Dream and Image (W)

GER
3/A

Conducted in English. Analysis of literary representations of dreams. Exploration of the relationship between word and image in French Literature. Such authors as Flaubert, Maupassant, Nerval and Proust.
3 hrs
3 cr.

FREN 25700 - Literary Cross-Currents

PD/D
Readings in English; conducted in English. Development and evolution of French novel; its relationship to other literary genres.

3 hrs
3 cr.

FREN 26100 - Modern French Novel in Translation (1900-Present)

Pluralism and Diversity
PD/D
Conducted in English; readings in English. From Gide and Proust to present.

3 hrs
3 cr.

FREN 26200 - Perspectives on Women in French Literature

Pluralism and Diversity
PD/C or D
GER
3/A

The representation of women in literary texts from the Middle Ages to the present. Conducted in English. Readings in English translation.

3 hrs
3 cr.

Honors

Students qualified to graduate with departmental honors must take an honors course or equivalent approved by the departmental advisers. Departmental honors will be conferred upon a recommendation from the appropriate departmental committee. Candidates must present a paper of at least 7,000 typewritten words in the language of specialization. Consult the department for further information.

Graduate Study
Qualified seniors with a minimum GPA of 3.5 in their discipline may be admitted to graduate level courses. Permission must be secured from the chair and then forwarded to the dean. Consult the graduate catalog for requirements and regulations.

**French Language and Civilization**

Return to: French - BA

A concentration in French language as well as in French and Francophone literature, culture and civilization. 12 credits from the language sequence (Group A); 0-9 credits from Group B (offered in English); and 9-18 credits from Group C (offered in French).

**Foundational Courses**

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

**FREN 10100 - Elementary French I**

**Hunter Core**
World Culture and Global Issues (WCGI)
Language lab mandatory.

There are three options for students beginning French at Hunter. A regular sequence (FREN 10100, 10200, 20100, 20200), an intensive sequence (FREN 10300, 20300) which covers in two semesters material normally covered in four and a course for students who use French as a heritage language. FREN 10100 usually not credited without FREN 10200. For details about credit policy, please see Foreign Language Requirement.

3 hrs
3 cr.

**FREN 10200 - Elementary French II**

Language lab mandatory.

There are three options for students beginning French at Hunter. A regular sequence (FREN 10100, 10200, 20100, 20200), an intensive sequence (FREN 10300, 20300) which covers in two semesters material normally covered in four and a course for students who use French as a heritage language.

*prereq: ITAL 202 or equiv.*

3 hrs  
3 cr.

**Honors**

Students qualified to graduate with departmental honors must take an honors course or equivalent approved by the departmental advisers. Departmental honors will be conferred upon a recommendation from the appropriate departmental committee. Candidates must present a paper of at least 7,000 typewritten words in the language of specialization. Consult the department for further information.

**Graduate Study**

Qualified seniors with a minimum GPA of 3.5 in their discipline may be admitted to graduate level courses. Permission must be secured from the chair and then forwarded to the dean. Consult the graduate catalog for requirements and regulations.
Study Abroad

All study abroad programs are open to students from Hunter College and other accredited institutions. Majors and minors in the Department of Romance Languages are strongly encouraged to participate in study abroad programs (see adviser for GPA requirements).

Qualified students can apply for financial aid and STOCS grants.

Hunter in Italy: Summer Program in Pescara, June-July, at the University of Pescara; Italian Language courses and Italian literature and culture courses taught in English.

Winter Program Hunter in Florence, held during January intersession, offers courses and Italian Culture and Literature taught in English.

Italian Language and Civilization (30 cr.)

Return to: Italian - BA

A concentration on Italian language with an emphasis on oral and written communication.

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

3 hrs

3 cr.

- SEDC 712 (see graduate catalog)
Major concentration in Spanish-English/English-Spanish translation and interpretation (36 cr)

This program prepares students for careers in the growing translation field. Students take courses in Spanish language, literature and civilization in conjunction with specialized courses in translation/interpretation theory and practice. Allied courses in English and related fields of study are required and must be approved by the program adviser. Sufficient flexibility is built into the program so that students may tailor certain requirements to fit their individual needs and interests. An intensive internship in translation and/or interpretation serves as the student’s capstone experience and preparation for future professional settings. Please see the department of Romance Languages for more details regarding this new and innovative program of study.

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

coreq: THEA 26300
4 hrs
3 cr.

Romance Languages - BA
Foundational Courses

Foundational Courses must be completed before embarking upon the major. In the case of the major in Romance Languages, Foundational courses vary with the foreign languages selected for the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

Major (36 cr)

Intended for students who want to specialize in two Romance languages.

- Required: 34100 and 34200 in each of two chosen languages (12 cr)
- and -
- 9 credits in advanced literature in each of the two languages (18 cr)
- 3 credits in culture or translation in each of the two languages (6 cr)

Minor (12 cr)

Students majoring in one or more Romance languages take as a minor 12 credits in one field of study that leads to a BA degree, which must be approved by the departmental adviser.

Honors

Students qualified to graduate with departmental honors must take an honors course or equivalent approved by the departmental advisers. Departmental honors will be conferred upon a recommendation from the appropriate departmental committee. Candidates must present a paper of at least 7,000 typewritten words in the language of specialization. Consult the department for further information.

Graduate Study

Qualified seniors with a minimum GPA of 3.5 in their discipline may be admitted to graduate level courses. Permission must be secured from the chair and then forwarded to the dean. Consult the graduate catalog for requirements and regulations.

Study Abroad

All study abroad programs are open to students from Hunter College and other accredited institutions. Majors and minors in the Department of Romance Languages are strongly encouraged to participate in study abroad programs (see adviser for GPA requirements).

Qualified students can apply for financial aid and STOCS grants.

Spanish - BA

Preparation for Teaching French, Spanish or Italian Adolescent Education (grades 7-12)
Students pursuing adolescent education must complete the 30 or 36 credit major in one of these languages and, in addition, complete the course in second language acquisition (3 cr). The 23-credit pedagogical sequence in adolescent education will serve as the minor. See the School of Education section of the catalog for further information.

Major

The Spanish major provides two concentrations:

a. Spanish Literature

b. Major concentration in Spanish-English/English-Spanish translation and interpretation (36 cr)

Honors

Students qualified to graduate with departmental honors must take an honors course or equivalent approved by the departmental advisers. Departmental honors will be conferred upon a recommendation from the appropriate departmental committee. Candidates must present a paper of at least 7,000 typewritten words in the language of specialization. Consult the department for further information.

Minor in Spanish

1. Spanish Minor

The Spanish minor consists of 15 credits of courses that are taught entirely in Spanish and combines language, civilization, and literature.

   The prerequisite for a Spanish minor consists of either

**SPAN 20200 - Intermediate Spanish II**

Undergraduate Minor

Minor in French Culture and Literature in Translation

This course of study provides the opportunity to students with no knowledge of the French language to be introduced to French Culture & Literature. This minor offers an interesting complement or context to studies in other fields (such as history, philosophy, political theory or women’s studies) that have benefited, historically, from French influences.

The courses in this minor are to be chosen from a selection of 200-level courses, taught in English, such as

FREN 24100 - Early French Civilization: From Gothic to Revolution
FREN 24200 - Modern French Civilization: From Revolution to Present
FREN 25100 - French Literature and the Arts
FREN 25200 - From Symbolism to Surrealism in French Literature
FREN 25300 - Modern French Theatre: Theory and Practice
FREN 25400 - Film and the French Novel
FREN 25500 - New Approaches to Modern French Literature
FREN 25600 - Dream and Image (W)
FREN 25700 - Literary Cross-Currents
FREN 25800 - French Poetry in Translation
FREN 25900 - French Theatre in Translation
FREN 26000 - French Novel in Translation (1600-1900)
FREN 26100 - Modern French Novel in Translation (1900-Present)
FREN 26200 - Perspectives on Women in French Literature

**Minor in French Language & Culture**

The French minor consists of 15 credits:

**Prerequisite for the minor**

**FREN 20200 - Intermediate French II**

Programs and Courses in Sociology

Sociology

About the Department

A major in sociology provides the undergraduate with the opportunity to gain a distinct intellectual perspective and a method of inquiry. By continually testing conventional wisdom against evidence, the study of sociology encourages the development of critical judgment. By routinely considering the matrix of social and cultural facts, such study can lead students to an understanding of the conditions under which social facts emerge, and the consequences they have for individuals, groups, societies and social institutions. It can also help students better understand their own roles in the array of social institutions in which they are entwined.

Our courses provide a foundation for the student who desires to pursue advanced graduate studies in sociology leading to teaching positions. The department offers a wide range of specialties offering students flexibility in their choice of PhD programs. A major in sociology also helps to prepare students for many careers: social research, marketing, media, and other fields in the private sectors, as well as law, civil service and public policy, social work, the health professions, personnel work and other human-service areas.

Majors are encouraged to develop skills in observation, interviewing, and other data-collection techniques; data processing; statistical and content analysis; and trend analysis — all marketable skills in many career lines.

Undergraduate Major

Sociology

BA in Sociology

The department recommends a GPA of at least 2.3 when declaring the major. Prospective majors should also have already taken several sociology courses at Hunter.

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

SOC 10100 - Introduction to Sociology

Hunter Core
Individual and Society (Social Sciences) - I&S SS  
GER  
2/B

Development of sociological imagination through introduction and application of basic concepts incorporating global and comparative perspectives.

3 hrs  
3 cr.
Hunter Core Requirement

Note: Several courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student's advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here:

**Hunter Core Requirement**

In the case of Sociology, the course that meets CCC is:

<table>
<thead>
<tr>
<th>Course</th>
<th>CUNY Common Core</th>
<th>Foundational Or Major</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 10100</td>
<td>Individual and Society (Social Sciences) -I&amp;S SS</td>
<td>Foundational</td>
</tr>
</tbody>
</table>

*Please note that no more than two courses from any one department will count for the CUNY Common Core.*

**Major (27 credits)**

1. **Required Courses (6 cr.)**

**SOC 24000 - Introduction to Research Methods**

**GER**

3/B

Discussion of various research techniques and strategies including the survey method, field research, experiments, and content analysis. Firsthand involvement in the collection of quantitative data.

*prereq: SOC 10100*

3 hrs
3 cr.

**SOC 24100 - Social Statistics**

**GER**

3/B

Application of elementary statistical techniques. Introduction to statistical inference and sampling theory.

*prereq: SOC 10100*

3 hrs
3 cr.

2. **Sociological Theory (6 cr.)**

**SOC 22100 - Classical Sociological Theory**

**Pluralism and Diversity**

**PD/D**

**GER**

3/B
Classical theorists and their contributions.

 prereq: SOC 10100
 3 hrs
 3 cr.

**SOC 22300 - Current Sociological Theory**

**GER**

3/B

Significance of concepts and nature of evidence applied to leading theories. Theory construction.

 prereq: SOC 10100, SOC 22100, major
 3 hrs
 3 cr.

3. Electives (15 cr.)

Of the remaining 15 credits, at least 6 must be in courses at the 300 level or above. No more than 3 credits from the following may be used to satisfy this requirement.

**SOC 33100 - Field Placement in Social Work Agencies**

**GER**

3/B

Supervised work in social service agency, weekly seminar, preparation of weekly assignments and term paper.

 prereq: SOC 10100, perm instr.
 8 hrs per week
 3 cr.

**SOC 33200 - Advanced Field Placement in Social Work Agencies**

**GER**

3/B

Supervised work in social service agency, weekly seminar, agency-based research project.

 prereq: SOC 10100, SOC 33100 or documented equiv. experience in social work agency, perm instr.
 8 hrs per week
 3 cr.

**SOC 37101 - Independent Study**

**GER**

3/B

Completion of reading list and written assignment as proposed by student in consultation with full-time faculty sponsor.

Classical theorists and their contributions.
*prereq: SOC 10100*
3 hrs
3 cr.

as well as one additional course on the 200-level and one recommended on the 300-level

**Independent Study**

Students may pursue independent study through

**SOC 37101 - Independent Study**

GER
3/B

Completion of reading list and written assignment as proposed by student in consultation with full-time faculty sponsor.
*prereq: SOC 10100, perm instr.*
1 hr
1 cr

**SOC 37200 - Independent Study**

GER
3/B

Completion of reading list and written assignment as proposed by student in consultation with full-time faculty sponsor.
*prereq: SOC 10100, perm instr.*
3 cr. each sem

**SOC 47100 - Honors/Independent Study**
Advanced independent research project under direction of full-time member of department.

**SOC 47200 - Honors/Independent Study**

Advanced independent research project under direction of full-time member of department.

**Additional Information**

These options allow students to initiate and carry out a course of study of their own choosing under the guidance of a full-time faculty sponsor. Students must have a written proposal and a general plan of study to submit to the potential faculty mentor.

**Honors**

In order to graduate with departmental honors in sociology, students must have a 3.0 GPA overall and a 3.5 GPA in sociology; at least 21 of the credits toward the major should have been courses taken at Hunter College.

**Students must complete either an Honors Seminar**

**SOC 47300 - Honors Seminar**

Honors paper.

**SOC 47400 - Honors Seminar**

Honors paper.

or an Honors Independent Study
SOC 47100 - Honors/Independent Study

GER
3/B

Advanced independent research project under direction of full-time member of department.
prereq: SOC 10100, perm instr.
3 cr. each sem

SOC 47200 - Honors/Independent Study

GER
3/B

Advanced independent research project under direction of full-time member of department.
prereq: SOC 10100, perm instr.
3 cr. each sem

or a graduate course

SOC 42500 - Seminar in Selected Problems of Sociology

GER
3/B

Advanced seminar: reading, discussion, and papers on significant problems in sociology and in applied social research; in most cases cross-listed with graduate social research course or seminar.

prereq: SOC 10100, perm instr.
3 hrs
3 cr

Additional Information

Students whose GPAs are within this range are urged to consult their adviser before planning senior year programs of study, since honors seminars are generally offered only once per year, usually in the fall semester. In addition, students qualifying for departmental honors are eligible for membership in Alpha Kappa Delta, the International Sociology Honor Society. See adviser for more information.

Internships

Provided students secure approval of a full-time faculty member, internships can be carried out for 3 to 6 credits in the areas of marketing, media, and politics, with other areas provided faculty supervision can be secured. Interested students must meet the requirements listed under the SOC 49800 entry.

Awards
The Department of Sociology offers two prestigious awards to outstanding students in sociology and applied social research. The Norman Hecht Award of up to $300 is provided on an irregular basis for the best research concept developed by an undergraduate or graduate student studying applied social research. It can be granted to an individual student or a group of students. Once a year at the end of the spring term the Benjamin Ringer Award, carrying a cash stipend of $100, is granted for the best undergraduate paper in the areas of ethnic and race relations. The endowed Rosalyn Tough Award is granted with a cash stipend to outstanding sociology or social research students. Two Suzanne Keller Awards with a stipend of $250 each are granted at the end of the academic year. One goes to the graduating sociology major with the best academic record. The second Keller award is given to the best BA/MS graduate entering the field of applied social research. The annual Chicago Award with a $100 stipend is given to a work-study student or research assistant whose contribution to a faculty member’s work is acknowledged in the faculty member’s publication. For more information about the awards contact the departmental advisers.

Career Opportunities

Applied Social Research

Students interested in careers in research-related fields such as media and marketing research, policy analysis and evaluation, advertising, consumer behavior, and public opinion polling, as well as students who are contemplating graduate studies in sociology, are encouraged to gain research experience through selected coursework and independent research carried out under faculty supervision.

In addition to the following, which are required for the major,

**SOC 24000 - Introduction to Research Methods**

**GER**

3/B

Discussion of various research techniques and strategies including the survey method, field research, experiments, and content analysis. Firsthand involvement in the collection of quantitative data.

*prereq: SOC 10100*

3 hrs

3 cr.

**SOC 24100 - Social Statistics**

**GER**

3/B

Application of elementary statistical techniques. Introduction to statistical inference and sampling theory.

*prereq: SOC 10100*

3 hrs

3 cr.

Students interested in research should consider

**SOC 35000 - Qualitative Research Methods (W)**
An introduction to the most prevalent qualitative research approaches used in applied social research and sociology, including documentary analysis, participatory observation, ethnography, in-depth interviews, focus groups and related methods.

**prereq:** SOC 22100 or 22300

3 hrs
3 cr.

Select electives from the following:

**SOC 25900 - Mass Media, Communication and Public Opinion (W)**

**GER**
3/B

Impact of mass media on public opinion and government action.

**prereq:** SOC 10100 ENGL 12000

3 hrs
3 cr.

**SOC 31100 - Population Dynamics**

**GER**
3/B

Comparative analysis of fertility, mortality, migration trends, and related social factors.

**prereq:** SOC 10100

3 hrs
3 cr.

**SOC 31300 - Consumer Behavior**

**GER**
3/B

Individual and social perspectives on consumer decision making. Social patterns of consumption and consumer social movements.

**prereq:** SOC 10100

3 hrs
3 cr.

**SOC 36300 - Social Change**

**GER**
3/B

Process of development of institutions, communities, and nations.

**prereq:** SOC 10100
SOC 44100 - Advanced Research Methods

GER
3/B

Evaluates strategies and instruments available to sociologists such as socio-geographic mapping.

prereq: SOC 24000, 24100

SOC 33100 - Field Placement in Social Work Agencies

GER
3/B

Supervised work in social service agency, weekly seminar, preparation of weekly assignments and term paper.

prereq: SOC 10100, perm instr.

SOC 33200 - Advanced Field Placement in Social Work Agencies

GER
3/B

Supervised work in social service agency, weekly seminar, agency-based research project.

prereq: SOC 10100, SOC 33100 or documented equiv. experience in social work agency, perm instr.

Additional Information

The department has also participated in a number of programs that place qualified minority students in summer research internships at leading universities. See advisers for more information.

Social Work

Students interested in careers in social work or other human services are strongly encouraged to consult the pre-social work adviser (Prof. Poppendieck, Room 1603 Hunter West, (212) 772-5583, jpoppend@hunter.cuny.edu). The presocial work advising office offers information about graduate study in social work as well as help with program planning.

Pre-social work

Pre-social work students without work experience in the human services should plan to take the following courses that provide supervised field experience.

SOC 33100 - Field Placement in Social Work Agencies

GER
3/B

Supervised work in social service agency, weekly seminar, preparation of weekly assignments and term paper.

prereq: SOC 10100, perm instr.

SOC 33200 - Advanced Field Placement in Social Work Agencies

GER
3/B

Supervised work in social service agency, weekly seminar, agency-based research project.

prereq: SOC 10100, SOC 33100 or documented equiv. experience in social work agency, perm instr.
Ideally, this coursework should be completed by the end of the junior year, and students must meet with the instructor in the previous semester to arrange a placement.

Directly related to social work

While virtually all sociology courses are relevant to the practice of social work, several courses are directly related to social work.

**SOC 23100 - Introduction to Social Work Profession**

**GER**

3/B

Introduction to and critical analysis of the social work profession in American society.

_prereq: SOC 10100_

3 hrs

3 cr.

**SOC 23500 - Community Organization and Action**

**GER**

3/B

Evaluation of specific local and national action programs.

_prereq: SOC 10100_

3 hrs

3 cr.

**SOC 23700 - Social Welfare Policy**

**GER**

3/B

Development of welfare institutions. Consequences of welfare services for client and community.

_prereq: SOC 10100_

3 hrs

3 cr.

**SOC 23900 - Child Welfare (W)**

**GER**

3/B

Historical and contemporary perspectives on the impact of poverty on children and the social policies that deal with it.

_cross-listed WGSP 23900 (W)_

_prereq: SOC 10100, ENGL 12000_

3 hrs

3 cr.

Graduate Courses
Qualified undergraduates seeking more advanced or specialized work may, with the permission of the instructor, be permitted to take graduate courses. Consult the graduate catalog for course listings.

Major Areas of Study

Students may design their own areas of concentration but they are not required to do so.

1. Interpersonal Processes and Relations

**SOC 20100 - The Family**

**Pluralism and Diversity**

PD/C  
GER  
3/B  

Family functions and interaction. Factors affecting stability and instability.  
*cross-listed* WGSP 22300  
*prereq: SOC 10100*  
3 hrs  
3 cr.

**SOC 25100 - Interpersonal Behavior**

GER  
3/B  

Study of interactional processes and the emergence and maintenance of selves and identities.  
*prereq: SOC 10100*  
3 hrs  
3 cr.

**SOC 25300 - Deviance and Social Control**

GER  
3/B  

Theories of causation and analysis of particular types of deviance: sexual, criminal, political.  
*prereq: SOC 10100*  
3 hrs  
3 cr.

2. Social Inequality

**SOC 21700 - Race and Ethnicity**

**Pluralism and Diversity**

PD/B  
GER  
3/B
Dominant-subordinate relations among selected groups: Asians, Blacks, Hispanics, Jews, Indians, White ethnics.

**prereq:** SOC 10100

3 hrs

3 cr.

**SOC 21800 - Social Inequality**

**GER**

3/B

Examination of social inequality in contemporary society from various empirical and theoretical perspectives focusing on class, ethnic, gender, and other determinants of stratification.

**prereq:** SOC 10100

3 hrs

3 cr.

**SOC 21900 - American Society (W)**

**GER**

3/B

Analysis of social structures and culture of the contemporary USA.

**prereq:** SOC 10100, ENGL 12000

3 hrs

3 cr.

**SOC 25700 - Sex and Gender Roles**

**Pluralism and Diversity**

**PD/C**

**GER**

3/B

Sex role differentiation: femininity, masculinity, marriage, child rearing.

*cross-listed* WGSS 25700

**prereq:** SOC 10100

3 hrs

3 cr.

**SOC 31700 - Class, Status, and Power**

**GER**

3/B

Inquiry into the empirical and conceptual relation between the fundamental sociological constructs of 'class', 'status', and 'power' through a case study of the upper class in the United States. Review of current research and relevant theoretical approaches.

**prereq:** SOC 10100

3 hrs

3 cr.
3. Social Welfare and Policy

SOC 23100 - Introduction to Social Work Profession

GER
3/B

Introduction to and critical analysis of the social work profession in American society.
_prereq: SOC 10100
3 hrs
3 cr.

SOC 23500 - Community Organization and Action

GER
3/B

Evaluation of specific local and national action programs.
_prereq: SOC 10100
3 hrs
3 cr.

SOC 23700 - Social Welfare Policy

GER
3/B

Development of welfare institutions. Consequences of welfare services for client and community.
_prereq: SOC 10100
3 hrs
3 cr.

SOC 23900 - Child Welfare (W)

GER
3/B

Historical and contemporary perspectives on the impact of poverty on children and the social policies that deal with it.
_cross-listed WGSP 23900 (W)
_prereq: SOC 10100, ENGL 12000
3 hrs
3 cr.

4. International Studies

SOC 31300 - Consumer Behavior

GER
3/B
Individual and social perspectives on consumer decision making. Social patterns of consumption and consumer social movements.

**SOC 31800 - Sociology of Human Rights in Latin America**

**GER**

3/B

Types of societies in which human rights are respected or violated with special emphasis on Latin American regimes in the last two decades. Human rights and diversity the rights of women and minorities. Movements to protect human rights. The emphasis is on actual social conditions which foster or impede the observance and protection of human rights.

**prereq:** SOC 10100

3 hrs

3 cr.

**SOC 36100 - Development and Modernization (W)**

**Pluralism and Diversity**

**PD/A**

**GER**

3/B

Examinations of models of social change with a special focus on developing countries.

**prereq:** SOC 10100

3 hrs

3 cr.

**SOC 36200 - Sociology of Islam (W)**

**GER**

3/B

Introduction to Islam as religion and culture with emphasis on how misconceptions have permeated our understanding of Islam. Analysis from a historical perspective which serves as a framework for comprehending Islam's dogma, rituals, and legal system.

**prereq:** SOC 10100

3 hrs

3 cr.

5. Applied Social Research

**SOC 24000 - Introduction to Research Methods**

**GER**

3/B

Discussion of various research techniques and strategies including the survey method, field research, experiments, and
content analysis. Firsthand involvement in the collection of quantitative data.

**SOC 24100 - Social Statistics**

**GER**

3/B

Application of elementary statistical techniques. Introduction to statistical inference and sampling theory.

**prereq: SOC 10100**

3 hrs

3 cr.

**SOC 31100 - Population Dynamics**

**GER**

3/B

Comparative analysis of fertility, mortality, migration trends, and related social factors.

**prereq: SOC 10100**

3 hrs

3 cr.

**SOC 31300 - Consumer Behavior**

**GER**

3/B

Individual and social perspectives on consumer decision making. Social patterns of consumption and consumer social movements.

**prereq: SOC 10100**

3 hrs

3 cr.

**SOC 34100 - Research Practicum**

**GER**

3/B

Evaluates strategies and instruments available to sociologists such as socio-geographic mapping.

**prereq: SOC 24000, 24100**

3 hrs

3 cr.

**SOC 35000 - Qualitative Research Methods (W)**

**GER**

3/B
An introduction to the most prevalent qualitative research approaches used in applied social research and sociology, including documentary analysis, participatory observation, ethnography, in-depth interviews, focus groups and related methods.

**prereq:** SOC 22100 or 22300

3 hrs

3 cr.

### 6. Theory

**SOC 22100 - Classical Sociological Theory**

**Pluralism and Diversity**

PD/D

**GER**

3/B

Classical theorists and their contributions.

**prereq:** SOC 10100

3 hrs

3 cr.

**SOC 22300 - Current Sociological Theory**

**GER**

3/B

Significance of concepts and nature of evidence applied to leading theories. Theory construction.

**prereq:** SOC 10100, SOC 22100, major

3 hrs

3 cr.

### 7. Fieldwork and Experiential Learning

**SOC 33100 - Field Placement in Social Work Agencies**

**GER**

3/B

Supervised work in social service agency, weekly seminar, preparation of weekly assignments and term paper.

**prereq:** SOC 10100, perm instr.

8 hrs per week

3 cr.

**SOC 33200 - Advanced Field Placement in Social Work Agencies**

**GER**

3/B

Supervised work in social service agency, weekly seminar, agency-based research project.

**prereq:** SOC 10100, SOC 33100 or documented equiv. experience in social work agency, perm instr.
8 hrs per week
3 cr.

**SOC 37101 - Independent Study**

**GER**
3/B

Completion of reading list and written assignment as proposed by student in consultation with full-time faculty sponsor.

*prereq: SOC 10100, perm instr.*
1 hr
1 cr

**SOC 37200 - Independent Study**

**GER**
3/B

Completion of reading list and written assignment as proposed by student in consultation with full-time faculty sponsor.

*prereq: SOC 10100, perm instr.*
3 cr. each sem

**SOC 47100 - Honors/Independent Study**

**GER**
3/B

Advanced independent research project under direction of full-time member of department.

*prereq: SOC 10100, perm instr.*
3 cr. each sem

**SOC 47200 - Honors/Independent Study**

**GER**
3/B

Advanced independent research project under direction of full-time member of department.

*prereq: SOC 10100, perm instr.*
3 cr. each sem

**SOC 49800 - Internship**

**GER**
3/B

Open to advanced majors only. Placement of qualified sociology majors off campus in professional nonsocial service internship settings. Credits are based on analytic internship report, number of hours worked and by written evaluation by agency/company intern supervisor.

*prereq: SOC 22100 or 22300 and SOC 24000; major; perm supervising full-time faculty*
Undergraduate Major/Graduate Major

Sociology/Social Research - Accelerated BA/MS

Five-Year BA/MS Program

For a limited number of qualified students, the department offers an accelerated five-year program leading to a BA in sociology and an MS in social research. The program requires a total of 145 credits of college work (100 undergraduate, 45 graduate), a three month full-time supervised research internship in a non-academic setting (or part-time for six months), and a research paper. In order to be admitted to the program, students must complete their basic requirements, pass an honors course (independent study or honors seminar), and meet the requirements of the MS program as outlined in the graduate catalog except for the GRE examination. Undergraduate students are typically admitted to the program toward the end of their junior year when they have completed 100 credits and they begin their graduate work at the beginning of their senior year. Interested students should consult the program’s adviser at the earliest possible date.

Undergraduate Minor

Minor in Sociology

The minor in Sociology requires four courses with 12 credits which students have to pass with a GPA of at least 2.0. Students minoring in Sociology must take SOC 10100 - Introduction to Sociology, the prerequisite for all other sociology courses, SOC 22100 - Classical Sociological Theory and two additional courses selected from those offered on a regular basis. It is recommended but not required that one sociology course on the 300 or higher level be included.

Sociology: Lower Division

SOC 10100 - Introduction to Sociology

Hunter Core
Individual and Society (Social Sciences) -I&S SS
GER
2/B

Development of sociological imagination through introduction and application of basic concepts incorporating global and comparative perspectives.
SOC 20100 - The Family

Pluralism and Diversity
PD/C
GER
3/B

Family functions and interaction. Factors affecting stability and instability.
cross-listed WGSP 22300
prereq: SOC 10100
3 hrs
3 cr.

SOC 20300 - Education

GER
3/B

Education viewed cross-culturally and historically. Schools and colleges as social systems.
prereq: SOC 10100
3 hrs
3 cr.

SOC 20500 - Sociology of Religion

GER
3/B

Comparative study of religion in human societies. Analysis of beliefs, myths and sacred attitudes.
prereq: SOC 10100
3 hrs
3 cr.

SOC 20900 - Arts in Modern Society

Pluralism and Diversity
GER 3/B

Art as a universal social institution and as the expression of symbolic world of cultural life.
prereq: SOC 10100
3 hrs
3 cr.

SOC 21100 - Urban Sociology

GER
3/B

The relationships of space and society, with special attention to the nature and problems of urban life.
SOC 21300 - Political Sociology

GER
3/B

Power, authority, political ideologies, and patterns of participation. Articulation and resolution of political issues in contemporary societies in the context of globalization.

prereq: SOC 10100
3 hrs
3 cr.

SOC 21700 - Race and Ethnicity

Pluralism and Diversity
PD/B
GER
3/B

Dominant-subordinate relations among selected groups: Asians, Blacks, Hispanics, Jews, Indians, White ethnics.

prereq: SOC 10100
3 hrs
3 cr.

SOC 21800 - Social Inequality

GER
3/B

Examination of social inequality in contemporary society from various empirical and theoretical perspectives focusing on class, ethnic, gender, and other determinants of stratification.

prereq: SOC 10100
3 hrs
3 cr.

SOC 21900 - American Society (W)

GER
3/B

Analysis of social structures and culture of the contemporary USA.

prereq: SOC 10100, ENGL 12000
3 hrs
3 cr.

SOC 22100 - Classical Sociological Theory
Pluralism and Diversity
PD/D
GER
3/B

Classical theorists and their contributions.
prereq: SOC 10100
3 hrs
3 cr.

SOC 22300 - Current Sociological Theory

GER
3/B

Significance of concepts and nature of evidence applied to leading theories. Theory construction.
prereq: SOC 10100, SOC 22100, major
3 hrs
3 cr.

SOC 22500 - Seminar in Selected Problems of Sociology

GER
3/B

Lower-level seminar: reading, discussion, and papers on significant problems in sociology.
prereq: SOC 10100
3 hrs
3 cr.

SOC 23100 - Introduction to Social Work Profession

GER
3/B

Introduction to and critical analysis of the social work profession in American society.
prereq: SOC 10100
3 hrs
3 cr.

SOC 23500 - Community Organization and Action

GER
3/B

Evaluation of specific local and national action programs.
prereq: SOC 10100
3 hrs
3 cr.

SOC 23700 - Social Welfare Policy
Development of welfare institutions. Consequences of welfare services for client and community.
prereq: SOC 10100
3 hrs
3 cr.

**SOC 23900 - Child Welfare (W)**

Historical and contemporary perspectives on the impact of poverty on children and the social policies that deal with it.
cross-listed WGSP 23900 (W)
prereq: SOC 10100, ENGL 12000
3 hrs
3 cr.

**SOC 24000 - Introduction to Research Methods**

Discussion of various research techniques and strategies including the survey method, field research, experiments, and content analysis. Firsthand involvement in the collection of quantitative data.
prereq: SOC 10100
3 hrs
3 cr.

**SOC 24100 - Social Statistics**

Application of elementary statistical techniques. Introduction to statistical inference and sampling theory.
prereq: SOC 10100
3 hrs
3 cr.

**SOC 25100 - Interpersonal Behavior**

Study of interactional processes and the emergence and maintenance of selves and identities.
prereq: SOC 10100
3 hrs
3 cr.

**SOC 25300 - Deviance and Social Control**
Theories of causation and analysis of particular types of deviance: sexual, criminal, political.

prereq: SOC 10100
3 hrs
3 cr.

SOC 25500 - Youth and Adulthood

Youth and adult modes of adaptation, socialization, intergenerational relations, and career possibilities.

prereq: SOC 10100
3 hrs
3 cr.

SOC 25700 - Sex and Gender Roles

Pluralism and Diversity
PD/C
GER
3/B

Sex role differentiation: femininity, masculinity, marriage, child rearing.

cross-listed WGSS 25700
prereq: SOC 10100
3 hrs
3 cr.

SOC 25900 - Mass Media, Communication and Public Opinion (W)

Impact of mass media on public opinion and government action.

prereq: SOC 10100 ENGL 12000
3 hrs
3 cr.

Sociology: Upper Division

SOC 30100 - Medical Sociology

Social and cultural factors related to health. Organization of health care services, social structure of the hospital.
SOC 30700 - Migration

Pluralism and Diversity
PD/B
GER
3/B

Economic, demographic, political and cultural factors influencing migration and the consequences of migration.

SOC 30900 - Social Movements and Social Change (W)

GER
3/B

Analysis of emerging groups inducing or resisting social change often using unconventional means in historical and/or international perspective.

SOC 31100 - Population Dynamics

GER
3/B

Comparative analysis of fertility, mortality, migration trends, and related social factors.

SOC 31300 - Consumer Behavior

GER
3/B

Individual and social perspectives on consumer decision making. Social patterns of consumption and consumer social movements.

SOC 31400 - Culture and Consumption
The structure and patterning of everyday life as concerned with material well-being. Symbolic and moral dimensions of food and living arrangements, as well as commerce and the marketplace.

**SOC 31500 - Work and Society (W)**

Work in market economies, mechanisms of control and sources of stratification, gender and ethnic factors, role of education and trade unions.

*cross-listed* WGSL 31500

**Prerequisites:** SOC 10100

3 hrs

3 cr.

**SOC 31700 - Class, Status, and Power**

Inquiry into the empirical and conceptual relation between the fundamental sociological constructs of 'class', 'status', and 'power' through a case study of the upper class in the United States. Review of current research and relevant theoretical approaches.

**Prerequisites:** SOC 10100

3 hrs

3 cr.

**SOC 31800 - Sociology of Human Rights in Latin America**

Types of societies in which human rights are respected or violated with special emphasis on Latin American regimes in the last two decades. Human rights and diversity the rights of women and minorities. Movements to protect human rights. The emphasis is on actual social conditions which foster or impede the observance and protection of human rights.

**Prerequisites:** SOC 10100

3 hrs

3 cr.

**SOC 31900 - Criminology**

Criminal behavior, arrest, and punishment. Problems of definition, administration of criminal justice.
SOC 32000 - Law, Society and Civil Rights

GER
3/B

Examines from a sociological perspective the concept of law, and legal institutions and their relationship to society and culture, concentrating on the struggle for civil rights in America.

SOC 32000 - Law, Society and Civil Rights

SOC 32000 - Sociology of Organizations

GER
3/B

Organization, structure, and processes; relationship between individual and organization.

SOC 32100 - Sociology of Organizations

SOC 32200 - Drugs and Society

GER
3/B

The course focuses on the social, cultural and historical dimensions of drug use, and treats the causes and consequences of drug use and abuse as a social – rather than bio-physical phenomenon. Course topics may include: drug use as a universal phenomenon, regulatory issues related to drugs, especially in relation to race, class and subcultures; and drugs as a media phenomenon.

SOC 32500 - Seminar in Selected Problems of Sociology

GER
3/B

Upper-level seminar: reading, discussion, and papers on significant problems in sociology.

SOC 32502 - Sociology of Human Rights: Violation and Protection
SOC 32506 - Latin American Societies

Ger
3/B

Prereq: SOC 10100, perm instr.
3 hrs
3 cr.

SOC 32519 - Economic Development and Social Inequality in Latin America

Ger
3/B

Prereq: SOC 10100, perm instr.
3 hrs
3 cr.

SOC 33000 - Children and Public Policy (W)

Ger
3/B

Study of changes in children’s lives, including family composition, parental work, child care, and poverty, as well as the day-to-day lives of children living in poverty and immigrant families. The historical evolution of public policies and current policy issues are studied as they relate to children, particularly education, income support, and health policies. International policy comparisons are highlighted.

Prereq: ENGL 12000
3 hrs
3 cr.

SOC 33100 - Field Placement in Social Work Agencies

Ger
3/B

Supervised work in social service agency, weekly seminar, preparation of weekly assignments and term paper.

Prereq: SOC 10100, perm instr.
8 hrs per week
3 cr.

SOC 33200 - Advanced Field Placement in Social Work Agencies
Supervised work in social service agency, weekly seminar, agency-based research project.

prereq: SOC 10100, SOC 33100 or documented equiv. experience in social work agency, perm instr.
8 hrs per week
3 cr.

**SOC 34100 - Research Practicum**

GER
3/B

Evaluates strategies and instruments available to sociologists such as socio-geographic mapping.

prereq: SOC 24000, 24100
3 hrs
3 cr

**SOC 34500 - Sociology of Knowledge**

GER
3/B

Systematic analysis of the social basis of knowledge.

prereq: SOC 10100
3 hrs
3 cr.

**SOC 35000 - Qualitative Research Methods (W)**

GER
3/B

An introduction to the most prevalent qualitative research approaches used in applied social research and sociology, including documentary analysis, participatory observation, ethnography, in-depth interviews, focus groups and related methods.

prereq: SOC 22100 or 22300
3 hrs
3 cr.

**SOC 36000 - Feminist Social Theory**

Pluralism and Diversity
PD/C
GER
3/B

Introduces students to feminist theory developed by women from Western, Third World and other countries.

*cross-listed* WGS 36000

prereq: SOC 10100
3 hours
3 credits
SOC 36100 - Development and Modernization (W)

Pluralism and Diversity
PD/A
GER
3/B

Examinations of models of social change with a special focus on developing countries.
*prereq: SOC 10100
3 hrs
3 cr.

SOC 36200 - Sociology of Islam (W)

GER
3/B

Introduction to Islam as religion and culture with emphasis on how misconceptions have permeated our understanding of Islam. Analysis from a historical perspective which serves as a framework for comprehending Islam's dogma, rituals, and legal system.
*prereq: SOC 10100
3 hrs
3 cr.

SOC 36300 - Social Change

GER
3/B

Process of development of institutions, communities, and nations.
*prereq: SOC 10100
3 hrs
3 cr.

SOC 36400 - Globalism and Nationalism

GER
3/B

This course covers the emergence, spread, and decline of global cultural identities and practices in individual nation-states. It further explores the origin, character, and vicissitudes of nationalism in the global area.
*prereq: SOC 10100
3 hrs
3 cr.

SOC 37101 - Independent Study

GER
3/B
Completion of reading list and written assignment as proposed by student in consultation with full-time faculty sponsor.

**prereq:** SOC 10100, perm instr.

1 hr
1 cr

**SOC 37103 - Independent Study**

**GER**
3/B

Completion of written assignment as proposed by student as approved and supervised by full-time faculty sponsor.

**prereq:** SOC 10100, perm instr.

3 hrs
3 cr.

**SOC 37200 - Independent Study**

**GER**
3/B

Completion of reading list and written assignment as proposed by student in consultation with full-time faculty sponsor.

**prereq:** SOC 10100, perm instr.

3 cr. each sem

**SOC 42100 - Sociology of Organizations**

**GER**
3/B

Organization, structure, and processes; relationship between individual and organization.

**prereq:** SOC 101

3 hrs
3 cr.

**SOC 42500 - Seminar in Selected Problems of Sociology**

**GER**
3/B

Advanced seminar: reading, discussion, and papers on significant problems in sociology and in applied social research; in most cases cross-listed with graduate social research course or seminar.

**prereq:** SOC 10100, perm instr.

3 hrs
3 cr

**SOC 44100 - Advanced Research Methods**
Evaluates strategies and instruments available to sociologists such as socio-geographic mapping.

prereq: SOC 24000, 24100

3 hrs

3 cr.

SOC 47100 - Honors/Independent Study

Advanced independent research project under direction of full-time member of department.

prereq: SOC 10100, perm instr.

3 cr. each sem

SOC 47200 - Honors/Independent Study

Advanced independent research project under direction of full-time member of department.

prereq: SOC 10100, perm instr.

3 cr. each sem

SOC 47300 - Honors Seminar

Honors paper.

prereq: SOC 10100, perm instr.

3 cr. each sem

SOC 47400 - Honors Seminar

Honors paper.

prereq: SOC 10100, perm dept.

3 cr. each sem

SOC 49800 - Internship

Open to advanced majors only. Placement of qualified sociology majors off campus in professional nonsocial service internship settings. Credits are based on analytic internship report, number of hours worked and by written evaluation
by agency/company intern supervisor.
prereq: SOC 22100 or 22300 and SOC 24000; major; perm supervising full-time faculty
hrs TBA
3-6 cr.

Sociology Courses less frequently offered

SOC 20700 - Leisure, Recreation and Sports

GER
3/B

Role and social organization of leisure and recreation in traditional and modern society.
prereq: SOC 10100
3 hrs
3 cr.

SOC 21500 - Occupations and Professions

GER
3/B

Roles, structures, development of occupations and professions. Occupational socialization and professionalization.
prereq: SOC 10100
3 hrs
3 cr.

SOC 46100 - Comparative Ethnic and Race Relations

GER
3/B

Patterns of intergroup relations in various countries. Consequences of partition, separatism, pluralism, assimilation.
prereq: SOC 10100, 21700
3 hrs
3 cr.

Theatre Faculty

HEGIS Code: 1007

Undergraduate Major

Theatre - BA

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

ENGL 12000 - Expository Writing

Hunter Core
English Comp (EC)
GER
1/A
Required of all students unless exempt; trains students to analyze, develop and evaluate ideas and to express themselves clearly and effectively. Introduction to documented research.

**prereq:** successful completion of developmental courses, if required

3 hrs + conf

3 cr.

**THEA 10100 - Introduction to Theatre**

**Hunter Core**

Creative Expression (CE)

GER

2/D

Study of elements of theatre arts acting, directing, playwriting, design from standpoints of both viewer and participant.

3 hrs

3 cr.

**Hunter Core Requirement**

Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student's advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

**Major in Theatre (30 cr)**

Students must have earned at least 24 credits to declare a Theatre major.

**THEA 21100 - World Theatre I (W)**

**Hunter Core**

Creative Expression (CE)

Pluralism and Diversity

PD/D

GER

2/C

Survey of international theatre from its pre-Greek origins to the Spanish Golden Age.

**prereq:** ENGL 12000, THEA 10100

3 hrs

3 cr.

**THEA 21200 - World Theatre II (W)**

**Hunter Core**

Creative Expression (CE)

Pluralism and Diversity

PD/D

GER

2/C
Survey of international theatre from the Elizabethan period to Wagner.

prereq: ENGL 12000, THEA 10100
3 hrs
3 cr.

THEA 21300 - World Theatre III (W)

Hunter Core
Creative Expression (CE)
Pluralism and Diversity
PD/D
GER
2/C

Survey of international theatre from 19th-century Naturalism to the present day.

prereq: ENGL 12000, THEA 10100
3 hrs
3 cr.

THEA 25100 - Theatre Production

Introduction to the theory and practice of theatrical production. Includes required practical work on departmental productions

prereq: THEA 10100 or perm instr.

5 hrs
3 cr.

THEA 26100 - Acting II: American Realism

GER
3/A

Fundamentals of scene study focusing on text analysis, personalization, objective and action using American realism.

prereq: THEA 16100 or perm instr.

4 hrs
3 cr.

THEA 32100 - Play Analysis (W)

Pluralism and Diversity
PD/D
GER
3/A

Principles of play analysis; examination of play structure, theatrical form, and dramatic genre.

prereq: THEA 21100 or 21200 or 21300

3 hrs
3 cr.

THEA 28300 - Stagecraft
The theory and practice of executing scenery for the stage, including props construction, scenic painting, rigging, and new technologies. Includes required practical work on departmental productions.

*prereq: THEA 10100
3 hrs
3 cr.*

**THEA 28500 - Design Concepts for Theatre, Film, and Television**

**GER**

3/A

Theoretical and practical elements of design in theatre, film, and television.

*prereq: THEA 10100 or FILM 10100
3 hrs
3 cr.*

- Electives chosen from 300-level courses 6 cr.
- 2 production crews (not-for-credit)

**plus one course selected from the following:**

**THEA 38100 - Scene Design I**

**GER**

3/A

Theory and practice of scenic design for the stage. Includes practical work on departmental productions.

*prereq: THEA 28100
5 hrs
3 cr.*

**THEA 38300 - Costume Design I**

**GER**

3/A

Theory and practice of costume design for the stage. Includes practical work on departmental productions.

*prereq: THEA 28100
5 hrs
3 cr.*

**THEA 38400 - Stage Lighting Design**

**GER**

3/A

Principles, techniques, and practice of lighting for theatre, emphasizing its contribution to dramatic interpretation.

*prereq: THEA 28100
5 hrs
3 cr.*

**THEA 38500 - Production Design I for Theatre, Film, and Television**
GER 3/A

Theory and practice in scenic design for theatre, film, and television.
_prereq: THEA 10100 or FILM 10100 and THEA 28500_
4 hrs
3 cr.

THEA 38700 - Concepts of Light in Theatre, Film, and Television

GER 3/A

The aesthetics, styles, conventions, and vocabulary of lighting in theatre, film, and television: how light establishes style, mood, rhythm, and atmosphere as interpretive elements of performance.
_prereq: THEA 28100 or THEA 28500_
3 hrs
3 cr.

Minor

Theatre majors may select a minor from any department or program in the college that offers a program of study leading to a BA degree. Students should consult the departmental adviser regarding appropriate minor choices.

Minor in Theatre

A Minor in Theatre requires a minimum of 12 credits in the Department of Theatre at the 200-level or higher of which at least 3 credits must be at the 300-level (these are usually at least 3 credits). Minors are required to take all necessary prerequisites for these courses. Minors have access to all courses offered by the Department of Theatre. Minors are encouraged to participate in departmental and student productions. Interested students must meet with the undergraduate advisor in the Department of Theatre to declare a minor and to define their course of study.

Honors

Open to any qualified junior or senior with a 3.5 GPA in Theatre and an overall minimum GPA of 2.7 and permission of the chair. Individual work under faculty supervision. Departmental honors granted at graduation.

Undergraduate Minor

Minor in Theatre
A Minor in Theatre requires a minimum of 12 credits in the Department of Theatre at the 200-level or higher of which at least 3 credits must be at the 300-level (these are usually at least 3 credits). Minors are required to take all necessary prerequisites for these courses. Minors have access to all courses offered by the Department of Theatre. Minors are encouraged to participate in departmental and student productions. Interested students must meet with the undergraduate advisor in the Department of Theatre to declare a minor and to define their course of study.

**Theatre: Basic Courses**

**THEA 10100 - Introduction to Theatre**

**Hunter Core**
Creative Expression (CE)
**GER**
2/D

Study of elements of theatre arts acting, directing, playwriting, design from standpoints of both viewer and participant.

*3 hrs*
*3 cr.*

**THEA 15100 - Introduction to Theatre Production**

Lectures and practical backstage work in all aspects of production. Work on studio and major productions required.

*5 hrs*
*2 cr.*

**THEA 16100 - Acting I: Basic Acting Techniques**

For intended majors and non-majors. Exploration of the fundamentals of acting technique through exercises and improvisation.

*coreq: *

*3 hrs*
*3 cr.*

**Theatre: Intermediate Courses**

Hunter Core
Creative Expression (CE)
Pluralism and Diversity
PD/D
GER
2/C

Survey of international theatre from 19th-century Naturalism to the present day.

prereq: ENGL 12000, THEA 10100
3 hrs
3 cr.

THEA 21400 - Multicultural Perspectives in Theatrical Performance (W)

Pluralism and Diversity
PD/B
GER
3/A

Study of a selected minority theatre tradition in the United States: original roots, development, and influence on the cultural life of the group to be studied and on American culture in general. May be repeated for credit with a different topic.

prereq: THEA 10100
3 hrs
3 cr.

THEA 21500 - Black Theatre (W)

Pluralism and Diversity
PD/B
GER
Background and development, present practice, and future possibilities of Black theatre in America.

**prereq:** ENGL 12000, THEA 10100

3 hrs

3 cr.

**THEA 25100 - Theatre Production**

Introduction to the theory and practice of theatrical production. Includes required practical work on departmental productions

**prereq:** THEA 10100 or perm instr.

5 hrs

3 cr.

**THEA 26100 - Acting II: American Realism**

**GER**

3/A

Fundamentals of scene study focusing on text analysis, personalization, objective and action using American realism.

**prereq:** THEA 16100 or perm instr.

4 hrs

3 cr.

**THEA 26200 - Acting III: World Realism**

**GER**

3/A

Continuation of scene study focusing on text analysis, personalization, objective and action using the world realistic repertory, such as the plays of Chekhov, Ibsen and Strindberg.

**prereq:** THEA 26100 or perm instr.

**coreq:** THEA 26300

4 hrs

3 cr.

**THEA 26300 - Basic Voice and Movement for Performers**

Linklater-based training including alignment, breath, movement skills, vibrations of sound, freeing the channel for sound, resonance. Integration of body, voice and dramatic text is emphasized.

**coreq:** THEA 26200

3 hrs

2 cr.

**THEA 28100 - Visual Elements of Theatre**

**GER**

3/A

Introduction to the theory and practice of various design elements and their contribution to theatrical
production. Includes practical work on departmental productions.

*prereq:* THEA 10100

5 hrs
3 cr.

**THEA 28200 - Theatrical Design Techniques**

**GER**

3/A

Practical training in skills of drawing, painting, and model-making necessary for designing of scenery, costumes, and lights. Studio design work included. Prerequisite for all advanced design courses.

*prereq:* THEA 10100

**THEA 28300 - Stagecraft**

The theory and practice of executing scenery for the stage, including props construction, scenic painting, rigging, and new technologies. Includes required practical work on departmental productions.

*prereq:* THEA 10100

3 hrs
3 cr.

**THEA 28400 - Makeup for the Stage**

**GER**

3/A

Practical instruction in use of stage makeup.

*prereq:* THEA 10100

5 hrs
3 cr.

**THEA 28500 - Design Concepts for Theatre, Film, and Television**

**GER**

3/A

Theoretical and practical elements of design in theatre, film, and television.

*prereq:* THEA 10100 or FILM 10100

3 hrs
3 cr.

**Theatre: Upper-Level Courses**

**THEA 32100 - Play Analysis (W)**

Pluralism and Diversity
PD/D
Principles of play analysis; examination of play structure, theatrical form, and dramatic genre.  
prereq: THEA 21100 or 21200 or 21300  
3 hrs  
3 cr.

**THEA 32200 - Theatre Theory and Criticism (W)**

Pluralism and Diversity  
PD/D  
GER  
3/A

Major theatrical theories, with emphasis on modern, as applied to acting, design, directing, and playwriting.  
prereq: THEA 21100 or 21200 or 21300  
3 hrs  
3 cr.

**THEA 32300 - 20th Century Aesthetics in Theatre and Film (W)**

GER  
3/A

Points of interaction, mutual influence, and cross fertilization between theatre and film in theory and praxis.  
prereq: THEA 21300 or FILM 21100 or 21200; ENGL 12000  
4 hrs  
3 cr.

**THEA 32400 - Adaptation in Theatre and Film (W)**

GER  
3/A

Examination of examples of works adapted to the stage or seen from another medium.  
prereq: THEA 32100 or FILM 21100 or 21200; ENGL 12000  
4 hrs  
3 cr.

**THEA 33100 - Avant-Garde Theatre of the 20th Century (W)**

Pluralism and Diversity  
PD/D  
GER  
3/A

Departures from realism Expressionism, Artaud, Brecht, Grotowski from Alfred Jarry to the present.  
prereq or coreq: THEA 21100 or 21200 or 21300  
3 hrs  
3 cr.
THEA 33200 - Theatre of Realism and Naturalism

Pluralism and Diversity
PD/D
GER
3/A

Plays, theory, and stagecraft of realism and naturalism movements from the late 19th century to the present.
_prereq or coreq: THEA 21100 or 21200 or 21300
3 hrs
3 cr.

THEA 33300 - Alternative Performance

Pluralism and Diversity
PD/D
GER
3/A

Study of performance styles and practices using theatre and/or film in non-traditional modes.
_prereq: THEA 21300 or THEA 32300
3 hrs
3 cr.

THEA 35100 - Theatre Workshop

Individual assignments to backstage positions in production and management of departmental presentations.
_prereq: THEA 25200
5 hrs
2 cr.

THEA 36100 - Acting: Non-realism

GER
3/A

Advanced scene study from non-realistic works such as absurdist, expressionistic, and post-modern plays.

_prereq: THEA 10100, THEA 26200 or permission from instructor
4 hrs
3 cr.

THEA 36200 - Acting: Period Drama

Pluralism and Diversity
PD/D
GER
3/A

Advanced scene study from classical plays of the Elizabethan, French Neo-Classic, Restoration and ancient Greek periods.
THEA 21100 or 21200 or 21300; THEA 26200, 26300 or perm instr.

coreq: THEA 36300

4 hrs

3 cr.

THEA 36300 - Advanced Voice and Movement for Performers

GER
3/A

Continuation of training including increased capacity for breath, range, stamina, sound and movement, articulation, various classical text work. Integration of body, voice and dramatic text continues to be emphasized.

prereq: THEA 26300

coreq: THEA 36200

3 hrs

2 cr.

THEA 36400 - Mime and Masks

GER
3/A

Practical course in mime and mask exercises for actors, designed to open new avenues for emotional expression.

prereq: THEA 36300

4 hrs

3 cr.

THEA 36500 - Screen Acting

GER
3/A

Fundamental techniques unique to acting in film and television.

prereq: FILM 10100, THEA 26200

4 hrs

3 cr.

THEA 37100 - Directing I

GER
3/A

Principles of play production; directorial concepts; focusing audience attention on dramatic values.

prereq: THEA 2100 or 21200 or 21300, THEA 26100, 32100 or perm instr.

5 hrs

3 cr.

THEA 37200 - Directing II
Continued study of principles; incorporation of design elements; full laboratory production of one-act play by each student.

**Prerequisite:** THEA 37100 or perm instr.

3 hours

3 credits

**THEA 37600 - Playwriting I (W)**

3 credits

Study of problems in playwriting based on the student's own work.

**Prerequisite:** THEA 10100 or perm instr.

3 hours

3 credits

**THEA 37700 - Playwriting II**

3 credits

Continued study of playwriting techniques, with emphasis on the structure and form of the full length play.

**Prerequisite:** THEA 37600 or perm instr.

3 hours

3 credits

**THEA 38100 - Scene Design I**

3 credits

Theory and practice of scenic design for the stage. Includes practical work on departmental productions.

**Prerequisite:** THEA 28100

5 hours

3 credits

**THEA 38200 - Scene Design II**

3 credits

Continued study of theory and practice of scenic design for the stage. Includes practical work on departmental productions.

**Prerequisite:** THEA 38100

5 hours

3 credits

**THEA 38300 - Costume Design I**
TGY 3/A

Theory and practice of costume design for the stage. Includes practical work on departmental productions.

prereq: THEA 28100

5 hrs

3 cr.

THEA 38400 - Stage Lighting Design

GER 3/A

Principles, techniques, and practice of lighting for theatre, emphasizing its contribution to dramatic interpretation.

prereq: THEA 28100

5 hrs

3 cr.

THEA 38500 - Production Design I for Theatre, Film, and Television

GER 3/A

Theory and practice in scenic design for theatre, film, and television.

prereq: THEA 10100 or FILM 10100 and THEA 28500

4 hrs

3 cr.

THEA 38600 - Production Design II for Theatre, Film, and Television

GER 3/A

Theory and practice in costume design for theatre, film, and television.

prereq: THEA 10100 or FILM 10100 and THEA 28500

4 hrs

3 cr.

THEA 38700 - Concepts of Light in Theatre, Film, and Television

GER 3/A

The aesthetics, styles, conventions, and vocabulary of lighting in theatre, film, and television: how light establishes style, mood, rhythm, and atmosphere as interpretive elements of performance.

prereq: THEA 28100 or THEA 28500

3 hrs

3 cr.

THEA 38800 - Theatres and Movie Palaces: Contemporary Culture
Exploration of the architecture and evolution of selected 20th-century theatre and movie palaces.

*prereq: THEA 21300 or FILM 21100*

3 hrs
3 cr.

**THEA 39100 - Theatre Projects**

Experimental work in design or directing for advanced theatre students.

*prereq or coreq: THEA 37200, 38100, perm chair*

3 hrs
3 cr.

**Theatre: Special and Individual Studies Courses**

**THEA 25301 - Special Topics in Theatre Performance**

Credit for participation in the departmental production. This course may be taken up to three times for credit.

*prereq: perm instr*

5 hrs
3 cr.

**THEA 29700 - Special Topics in Theatre**

Not offered at all times. A specific topic will be listed in Schedule of Classes for a given semester.

*prereq: perm dept.*

1-3 hrs
1-3 cr.

**THEA 39700 - Studies in Theatre**

Not offered at all times. Specialized topics for majors will be listed in Schedule of Classes for a given semester.

*prereq: variable*

3 hrs
3 cr.
THEA 40100 - Seminar

GER
3/A

Not offered at all times. Readings, discussion, and papers on significant problems in theatre and film.

prereq: perm dept.

3 hrs
3 cr.

THEA 40200 - Independent Research

GER
3/A

Open to majors only. Directed program of reading, research, or creative presentation, arranged on an individual basis with a faculty mentor.

prereq: perm chair

1-3 hrs
1-3 cr.

THEA 49800 - Internship

GER
3/A

Placement in appropriate off-campus locations, arranged on an individual basis with a faculty mentor.

prereq: perm dept.

1-6 hrs
1 – 6

THEA 49900 - Honors Project

GER
3/A

Open to majors only. Individual work under faculty supervision, qualifies student for departmental honors at graduation.

prereq: 3.5 major GPA, 2.7 overall GPA, perm chair

3 hrs
3 cr.

Theatre: Courses offered only upon sufficient student demand

THEA 24100 - Creative Dramatics

GER
3/A
THEA 24200 - Theatre for Young Audiences

GER
3/A

THEA 24300 - Theatre for Young Audiences: Laboratory

GER
3/A

THEA 24400 - Drama and Disability

GER
3/A

THEA 34100 - Creative Drama Leadership Techniques: Special Groups

GER
3/A

THEA 34200 - Creative Drama in the Community

GER
3/A

THEA 37800 - Scriptwriting for Young Audiences: Theatre, Film, and Television

GER
3/A

Programs and Courses in Urban Affairs and Planning

Urban Affairs and Planning

About the Department

Hunter College Urban Affairs and Planning (UAP) is a department within the School of Arts & Sciences at Hunter College. The department is home to the undergraduate Urban Studies major which prepares students for graduate study and careers in public service. UAP offers two graduate degrees, an accredited Master in Urban Planning and a Master of Sciences in Urban Affairs.

Since its creation by advocacy planner Paul Davidoff in 1965, the department has consistently upheld a vision of urban affairs and planning as a multi-disciplinary field. In keeping with this vision, the department's faculty members represent a wide range of disciplines including architecture, economics, political science, public policy, social work, urban planning, and public health. They collectively bring a wealth of academic and professional expertise to their
teaching. The program also benefits greatly from a distinguished part-time faculty who bring practical experience and knowledge in both public and non-profit sectors into the classroom.

Urban Studies Major

Because 75 percent of the nation’s population is classified as urban, cities are important and relevant subjects for study and investigation. Urban studies courses do just that as they examine the forces that shape the institutions and quality of life in American metropolitan regions. Building on an understanding of economic, social, spatial, and political trends, urban studies provides a means to address current urban policy/planning issues and the diverse needs of the people who live in cities. The urban studies curriculum includes courses that develop qualitative and quantitative methods. Included into the curriculum are field-work experiences, an internship and studio class, which take students into the real world to test what is learned in the classroom. Because New York City is a vast urban laboratory, it is a powerful learning tool useful in the development of studio classes and the teaching of urban studies in general.

Preparation for Graduate Training and Employment

A substantial number of majors in urban studies pursue professional graduate study in urban planning, law, social work, public administration, architecture, and related fields. Students should discuss their professional goals with the adviser in their junior year in order to plan their programs accordingly. Others who graduate with an urban studies bachelor’s degree have found jobs with non-profits, government, and the private sector.

Public Service Scholars

The Public Service Scholar Program seeks to improve our cities and the lives of people by preparing talented students particularly women, minorities and immigrants for public service careers through internships with elected officials, government, and nonprofit organizations. The program runs for a full academic year and combines internship placements in the offices of senior officials and administrators with intensive seminars on public policy issues, social change, government and nonprofit organizations. The program is open to any Hunter College student, regardless of major, who has a minimum 3.0 GPA and who is within 45 credits of graduation at the beginning of the program in the fall semester. Admission of up to 24 students is competitive. Applications are accepted starting in November with a deadline of March 15th. Students accepted as Public Service Scholars receive 12 academic credits and a $6,000 stipend. Because women, minorities and immigrants have been traditionally underrepresented in public policy making and leadership positions, special efforts are taken to encourage them to apply for the program. Interested students should contact the Public Service Scholar Program, Room 1643 Hunter West, (212) 772-5599 or email ewalsh@hunter.cuny.edu.

Undergraduate Major

Urban Studies - BA

Hunter Core Requirement

Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student's advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

Major (30 credits)

The major's core curriculum begins with an introductory class, which teaches students to better understand city life socially, economically, physically, and politically. The other components of the core include courses about urban structure, policies and research methods. The major is also comprised of electives, an internship, and interdisciplinary courses offered in departments outside of the major.

A. Urban Studies Core 15 cr

URBS 10100 - Urban Life: Personal and Observational View (W)

Hunter Core
Individual & Society - Social Science I&S SS
GER
2/B

Introduction to urban studies allowing students to translate personal knowledge and experience of New York City to
more theoretical understanding of urbanism. Includes four projects dealing with mapping, immigration, census data analysis, and local development issues.

3 hrs
3 cr.

**URBS 10200 - Structure of Urban Region (W)**

**Hunter Core**
Individuai and Society Social Science (I&S SS)

**GER**
2/B

Introduction to forces shaping institutions and life of contemporary American urban regions. Focus on evolving metropolitan economic, social, demographic, spatial, and political systems, and their relevance to current policy.

*prereq: URBS 10100 or relevant intro course (e.g., ECO 10000 or 20100-20200; GEOG 10100, PLSC 11100, SOC 10100) or perm instr.*

3 hrs
3 cr.

**URBS 20100 - Urban Plans and Policies**

**GER**
2/B

Includes the study of the policy making process, major plans/policies (e.g. War on Poverty, urban renewal, neighborhood rezoning), “politics/power,” the role of non-profits in urban planning and policy making.

*prereq: URBS 10200 or 6 cr. intro social science courses or perm instr.*

3 hrs
3 cr.

**URBS 31000 - Methods of Urban Research and Policy Analysis**

**GER**
3/B

Survey of research skills necessary for analysis of contemporary urban issues. Includes review of data sources, methods of forecasting, use of computer, and methods of information presentation.

*prereq: URBS 10200 or perm instr.*

3 hrs
3 cr.

**URBS 31100 - Quantitative Approaches to Urban Analysis**

**GER**
3/B

A survey of quantitative methods used to analyze urban policy and plans. Students are taught about demography, data analysis, and benefits cost analysis.

*prereq: Open only urban studies majors who have completed the URBS 10100/10200 sequence or perm instr.*

3 hrs
3 cr.
B. Urban Studies Electives 6 cr

Any two (2) 400-level courses in Urban Studies may fulfill this requirement.

Examples:

**URBS 40100 - Managing Urban Physical Environment**

GER
3/B

Advanced study of the physical structure of cities which includes an analysis of zoning, land use, transportation, and the location of housing. The role of public and private agencies at local, state, and national levels in the planning and management of the physical environment is also considered.

*prereq: URBS 20100 or perm instr.*
3 hrs
3 cr.

**URBS 40200 - Urban Studies Studio**

GER
3/B

This course is structured as a site-based research project where the classroom will extend into the city to actual project. In particular, students will work to understand the structural elements of development as it is taking place in one location, for example, the Hudson Yards on the Far West side of Manhattan. A goal is to see how theory holds up to reality; how ideas are linked to practice.

*prereq: URBS 20100 or perm instr.*
3 hrs
3 cr.

**URBS 40300 - Selected Topics in Urban Affairs**

GER
3/B

Intensive examination or investigation of specialized topics or new developments in literature and research.
3 hrs
3 cr.

C. Fieldwork Component 3 cr

**URBS 40900 - Urban Studies Internship**

GER
3/B
Students gain first-hand experience by working in urban-related public, private, or non-profit agencies. The internships provide knowledge about urban planning or policy issues.

Open only to declared urban studies majors within 45 credits of graduation.

3 hrs
3 cr.

D. Basic Social Science Component 6 cr

Select two from:

**AFPRL 38400 - Poverty in Society (W)**

GER
3/B

Causes and effects of deprivation, with emphasis on policy and program approaches for African Americans and Puerto Ricans/Latinos.

_prereq: successful completion of any 2 AFPRL courses_

3 hrs
3 cr.

**AFPRL 42000 - The Black Church and Social Change**

GER
3/B

In-depth study of the sociopolitical role of Black church in political struggle of Black people with special emphasis on America.

_prereq: AFPRL 20300 or 20400 or 20500 or perm instr._

3 hrs
3 cr.

**ECO 33000 - Economic Development**

_Pluralism and Diversity_

PD/A
GER
3/B

Critical variables explaining the diversity of growth and economic and development outcomes across developing countries. Theories, case studies, measurement and policies.

_prereq: ECO 20000_

3 hrs
3 cr.

**GEOG 22700 - Environmental Conservation: Urban Problems**

GER
3/B
Covers topics related to environmental problems and their connection to urban areas. The course will begin with a survey of urban systems (transport, water, food, waste and energy) followed by investigating how these systems contribute to environmental problems and their solutions. This investigation will also include a discussion about the connections between rural and urban areas and urban planning that attempts to minimize environmental hazards.

3 hrs
3 cr.

**GEOG 24300 - Urban Geography**

**GER**
3/B

Open to Jr/Sr only. Spatial analysis of functions of metropolitan areas. Social and economic characteristics of cities and suburbs. Land use and transportation patterns.

*prereq: GEOG 10100 or GEOG 15000 or perm instr, Jr/Sr only
3 hrs
3 cr.*

**GEOG 35700 - Geography of New York City and Vicinity**

**GER**
3/B

Informed immersion in NYC is the main objective of this course. Students will learn by exploration and observation more than by media. The city is the laboratory to complement readings, lectures and discussion. Students will emerge from this class with an enhanced appreciation of the entire city. Study assignments include keeping a journal of walking assignments as well as readings. Field work will focus on the five boroughs of New York City. (Students with difficulties in walking or using public transportation or who have phobias regarding unfamiliar neighborhoods should consider this before registering.)

Open to Jr/Sr only.

*prereq: GEOG 10100
3 hrs
3 cr.
Offered fall.*

**HIST 31700 - History of the American City**

**Pluralism and Diversity**

**PD/D**

**GER**
3/B

History of the American city from the Colonial era to the present; development of the city as physical environment, social experience, political entity and cultural symbol. Courses at the 300-level and above not offered to freshmen.

*3 hrs
3 cr.*

**POLSC 21200 - Urban Politics (W)**
Politics in New York City and other urban areas. Decentralization, suburbanization, race, ethnicity, reform.

*prereq: ENGL 12000 or its equivalent*

3 hrs

3 cr.

**SOC 21100 - Urban Sociology**

The relationships of space and society, with special attention to the nature and problems of urban life.

*prereq: SOC 10100*

3 hrs

3 cr.

**SOC 21700 - Race and Ethnicity**

Pluralism and Diversity

PD/B

GER

3/B

Dominant-subordinate relations among selected groups: Asians, Blacks, Hispanics, Jews, Indians, White ethnics.

*prereq: SOC 10100*

3 hrs

3 cr.

**SOC 21800 - Social Inequality**

Examination of social inequality in contemporary society from various empirical and theoretical perspectives focusing on class, ethnic, gender, and other determinants of stratification.

*prereq: SOC 10100*

3 hrs

3 cr.

**SOC 23500 - Community Organization and Action**

Evaluation of specific local and national action programs.

*prereq: SOC 10100*

3 hrs

3 cr.
URBS 40100 - Managing Urban Physical Environment

**GER**
3/B

Advanced study of the physical structure of cities which includes an analysis of zoning, land use, transportation, and the location of housing. The role of public and private agencies at local, state, and national levels in the planning and management of the physical environment is also considered.

*prereq: URBS 20100 or perm instr.*

3 hrs
3 cr.

URBS 40200 - Urban Studies Studio

**GER**
3/B

This course is structured as a site-based research project where the classroom will extend into the city to actual project. In particular, students will work to understand the structural elements of development as it is taking place in one location, for example, the Hudson Yards on the Far West side of Manhattan. A goal is to see how theory holds up to reality; how ideas are linked to practice.

*prereq: URBS 20100 or perm instr.*

3 hrs
3 cr.

URBS 40300 - Selected Topics in Urban Affairs

**GER**
3/B

Intensive examination or investigation of specialized topics or new developments in literature and research.

3 hrs
3 cr.

Additional Information

Component D can also be met by another 300- or 400-level urban-related course if approved by the undergraduate adviser.

Departmental Honors: Eligibility Criteria

Overall GPA: 3.2 and above

Major GPA: 3.5 and above

Graduate Courses

The following graduate courses are open to senior urban studies majors. Other graduate-level courses may be taken by seniors with permission of the instructor:
URBP 70100 History of Planned Urban Development

URBP 70200 The Structure of the Urban Region

In addition to these two courses, there are cross-listed classes, offered each semester, that are open to undergraduate students.

**Urban Affairs and Planning**

**URBS 10100 - Urban Life: Personal and Observational View (W)**

**Hunter Core**

Individual & Society - Social Science I&S SS

**GER**

2/B

Introduction to urban studies allowing students to translate personal knowledge and experience of New York City to more theoretical understanding of urbanism. Includes four projects dealing with mapping, immigration, census data analysis, and local development issues.

*3 hrs
3 cr.*

**URBS 10200 - Structure of Urban Region (W)**

**Hunter Core**

Individual and Society Social Science (I&S SS)

**GER**

2/B

Introduction to forces shaping institutions and life of contemporary American urban regions. Focus on evolving metropolitan economic, social, demographic, spatial, and political systems, and their relevance to current policy.

*prereq: URBS 10100 or relevant intro course (e.g., ECO 10000 or 20100-20200; GEOG 10100, PLSC 11100, SOC 10100) or perm instr.*

*3 hrs
3 cr.*

**URBS 20100 - Urban Plans and Policies**

**GER**

2/B

Includes the study of the policy making process, major plans/policies (e.g. War on Poverty, urban renewal, neighborhood rezoning), “politics/power,” the role of non-profits in urban planning and policy making.

*prereq: URBS 10200 or 6 cr. intro social science courses or perm instr.*

*3 hrs
3 cr.*

**URBS 31000 - Methods of Urban Research and Policy Analysis**
Survey of research skills necessary for analysis of contemporary urban issues. Includes review of data sources, methods of forecasting, use of computer, and methods of information presentation.

*prereq:* URBS 10200 or perm instr.

3 hrs

3 cr.

**URBS 31100 - Quantitative Approaches to Urban Analysis**

A survey of quantitative methods used to analyze urban policy and plans. Students are taught about demography, data analysis, and benefits cost analysis.

*prereq:* Open only urban studies majors who have completed the URBS 10100/10200 sequence or perm instr.

3 hrs

3 cr.

**URBS 40100 - Managing Urban Physical Environment**

Advanced study of the physical structure of cities which includes an analysis of zoning, land use, transportation, and the location of housing. The role of public and private agencies at local, state, and national levels in the planning and management of the physical environment is also considered.

*prereq:* URBS 20100 or perm instr.

3 hrs

3 cr.

**URBS 40200 - Urban Studies Studio**

This course is structured as a site-based research project where the classroom will extend into the city to actual project. In particular, students will work to understand the structural elements of development as it is taking place in one location, for example, the Hudson Yards on the Far West side of Manhattan. A goal is to see how theory holds up to reality; how ideas are linked to practice.

*prereq:* URBS 20100 or perm instr.

3 hrs

3 cr.

**URBS 40300 - Selected Topics in Urban Affairs**

3/B
Intensive examination or investigation of specialized topics or new developments in literature and research.

3 hrs
3 cr.

URBS 40354 - Seminar on the City

GER
3/B

Provides an historical, political and economic context for the region's major policy issues. The course introduces students to the complexities of New York City's governance and its public service sectors. Students develop a framework and tools for addressing relevant questions about the functions of the city, drawing on lectures, speakers, readings, field visits, interviews and internship experiences.

This is a 3-credit per semester course. May be repeated one time with permission of the director of public service scholar program.

3 hrs
3 cr.

URBS 40900 - Urban Studies Internship

GER
3/B

Students gain first-hand experience by working in urban-related public, private, or non-profit agencies. The internships provide knowledge about urban planning or policy issues.

Open only to declared urban studies majors within 45 credits of graduation.

3 hrs
3 cr.

URBS 49803 - Urban Studies Internship

GER
3/B

Open only to declared urban studies major within 45 credits of graduation. Internship experience in urban-related public or nonprofit agency providing first-hand involvement in urban planning or policy issues, under careful supervision, in professional field setting.

3 hrs
3 cr.

URBS 49806 - Public Service Scholar In-Service Seminar

GER
3/B

The Public Service Scholar In-Service seminar identifies and examines the types of learning that occur in the internship, including development of skills in management, problem solving, policy analysis, networking, time management, fundraising and performance evaluation.

This is a year-long course. Students register each semester. No credit awarded for first semester unless both semesters
are successfully completed.
6 hrs (3 per semester for two semesters)
6 cr. (3 per semester for two semesters)

Programs and Courses in Urban Public Health

School of Urban Public Health

About the School of Urban Public Health

Hunter College's School of Urban Public Health is a consortial partner and the lead institution in the CUNY School of Public Health (SPH). The CUNY SPH is comprised of public health degree programs at Brooklyn College, Hunter College, Lehman College and the Graduate School and University Center (Graduate Center) of CUNY. To realize its mission, the school partners with communities, nonprofit and private organizations and government at all levels to build capacities and create the conditions necessary for people to lead healthier lives. Within the CUNY SPH, teaching, research and service are focused on four broad inter-related goals that reflect major health challenges in the current era:

1) creating healthier cities
2) promoting healthy aging through the lifespan
3) preventing chronic diseases and improving their management
4) promoting health equity

The CUNY School of Public Health is committed to teaching, research and service that creates a healthier New York City and helps promote equitable, efficient and evidence-based solutions to pressing health problems facing cities around the world. The programs in public health at the CUNY SPH educate public health professionals to promote health and prevent disease among urban populations. These programs prepare students to work with the diverse populations living in cities, and to serve in a variety of settings in government, non-profit organizations, businesses and communities.

The School of Urban Public Health offers undergraduate degrees in Community Health - BS and Nutrition and Food Science - BS, an Accelerated BS/MS in Nutrition (DPD), a master of public health (MPH) degree, with specializations in community health education (COMHE), environmental and occupational health sciences (EOHS-MPH), epidemiology and biostatistics (EPI-BIOS), public health policy and management (HPM) and nutrition (NUTR-MPH). It also offers a Master of Science (MS) degree, with specializations in environmental and occupational sciences (EOHS-MS) and Nutrition (NUTR-MS). The MS degree in Nutrition (NUTR-MS) is an accredited didactic program in dietetics (DPD), and is designed for individuals seeking to become eligible to sit for the national registration examination in dietetics to become credentialed as a Registered Dietitian (RD). With the Hunter-Bellevue School of Nursing, it also offers an MSN/MPH degree in community health nursing. (Please see the Graduate catalog catalog.hunter.cuny.edu/content.php).

With the Graduate Center, the School of Urban Public Health offers a doctor of public health (DPH) degree, with specializations in community society and health, epidemiology, environmental and occupational health, and public health policy and management. The DPH degree program can be found at the CUNY Graduate Center website www.gc.cuny.edu/.

Community Health - BS Completion of 60 credits; combined grade point average (GPA) of all postsecondary institutions attended of minimum 3.0; completion of prerequisite courses with at least a grade of "C". 
Nutrition and Food Science - BS Completion of 60 credits, including the following prerequisites: two semesters of anatomy and physiology with lab; one semester of general chemistry with lab; one semester of organic chemistry with lab; one semester of microbiology with lab; one semester of introductory food science; one semester of introductory nutrition. The introductory food science and nutrition courses may be completed in the summer session preceding entrance to the program. A grade of C or better must be earned in all prerequisites. The introductory food science and nutrition courses may be completed in the summer session preceding entrance to the program. An overall GPA of 2.8 is required for consideration. Owing to the competitive nature of the program, however, the actual GPA required for admission may be higher. Students who have completed 30 credits at Hunter College or at another City University institution at the time of the application will be given priority in the selection process. Students can attend on a full- or part-time basis during the day.

Accelerated BS/MS in Nutrition (DPD)

This pathway is for third year NFS majors who are interested in completing their degree and then continuing at Hunter to obtain a master's degree and verification statement (students will be provisionally accepted into the program in their junior year but must maintain grade requirements to matriculate into the MS-DPD program).

This accelerated pathway provides the opportunity for undergraduate students to remain at Hunter for their graduate coursework providing students the opportunity for academic acceleration to a graduate degree.

Since the MS-Nutrition curriculum meets the didactic program in dietetics (DPD) requirements established by the Commission on Accreditation for Dietetics Education (CADE), the credentialing arm of the American Dietetic Association (ADA), it will qualify students from this BS/MS accelerated track to apply for Dietetic Internships and continue their professional preparation for the Registered Dietitian (RD) credential.

Accelerated BS/MS in Nutrition (DPD)

This pathway is for third year NFS majors who are interested in completing their degree and then continuing at Hunter to obtain a master’s degree and verification statement (students will be provisionally accepted into the program in their junior year but must maintain grade requirements to matriculate into the MS-DPD program).

This accelerated pathway provides the opportunity for undergraduate students to remain at Hunter for their graduate coursework providing students the opportunity for academic acceleration to a graduate degree.

Since the MS-Nutrition curriculum meets the didactic program in dietetics (DPD) requirements established by the Commission on Accreditation for Dietetics Education (CADE), the credentialing arm of the American Dietetic Association (ADA), it will qualify students from this BS/MS accelerated track to apply for Dietetic Internships and continue their professional preparation for the Registered Dietitian (RD) credential.

To become an RD, students must have:

- Completed a minimum of a bachelor’s degree at a US regionally accredited university or college
- Completed the DPD coursework (didactic program in dietetics) approved by the Commission on Accreditation for Dietetics Education (CADE) of The American Dietetic Association (ADA).
- Completed a CADE-accredited supervised practice program such as a dietetic internship (DI). The Hunter DI is described in the graduate catalog and online at www.hunter.cuny.edu/schoolhp/nfs. For further information on the Hunter DI, contact Prof. Ann Gaba at agaba@hunter.cuny.edu.
- Pass a national examination administered by the Commission on Dietetic Registration (CDR).

Career Opportunities for students graduating with this accelerated BS/MS:

Dietetics is an allied health profession which focuses on the food and nutrition intake of individuals and its relationship to health. Registered dietitians are trained in the sciences and are able to translate scientific findings and help people live healthy lives. Major areas of practice include clinical, community, management, and consultant dietetics. More than half of all dietitians and nutritionists are found to work in hospitals, nursing homes, and physician’s offices and
clinics. More information about career opportunities may be found on the American Dietetic Association’s website at http://www.eatright.org

Academic Requirements for Entry into the MS-DPD in Junior Year

Upper-division undergraduates who have completed 96 credits (GER, electives, and prerequisite coursework for the NFS major) may qualify for this pathway if they:

1. are enrolled in the Hunter NFS major
2. have upper-division status and have fulfilled the prerequisite coursework by the end of spring semester of the Junior year (see “Prerequisite” chart below)
3. provide an official transcript verifying an overall grade point average of at least 3.5 and at least 3.2 GPA in all required sciences with no grade less “C” for the Sciences and Statistics and no grade less than a “B” for the Introductory Nutrition and Food Science courses.
4. have received the consent of the DPD Director, and provide a declaration of intent from the DPD Director showing a plan to complete the DPD requirements and receive a BS/MS degree.

Prerequisite courses

**CHEM 10000 (STEM) - Essentials of General Chemistry Lecture**

**Hunter Core**
Scientific World (SW); Life and Physical Sciences (LPS)
GER
GER 2/E

Essential facts, laws, and theories of general chemistry.
Note: Core credit awarded only if CHEM 10000 and CHEM 10100 are completed. Primarily for nursing, nutrition and food science and community health education students.
4 hrs (3 lec, 1 rec)
3 cr.

**CHEM 10100 - Inquiries into the Nature of Matter**

**Hunter Core**
Life and Physical Sciences (LPS) Scientific World (SW)
**Pluralism and Diversity**
GER 2/E

A laboratory-based introduction to chemistry for non-science and health science majors that focuses on the basic principles of matter, energy and the environment. CHEM 10100 satisfies the laboratory requirements for a one-semester general chemistry course for health science students.
Primarily for nursing, nutrition and food science and community health students.
Taken with CHEM 100, meets STEM, SW and LPS prereq or coreq: CHEM 10000
3 hrs
1.5 cr.

**CHEM 12000 (STEM) - Essentials of Organic Chemistry Lecture**
Hunter Core
Life and Physical Sciences (LPS): Scientific World (SW)
Pluralism and Diversity
GER 2/E
Course presents essential facts, laws and theories of organic chemistry.
Core credit awarded only if CHEM 12000 and CHEM 12100 are completed. Primarily for nursing, nutrition and food science and community health education students.
prereq: CHEM 10000
4 hrs (3 lec, 1 rec)
3 cr.

CHEM 12100 (STEM) - Essentials of Organic Chemistry Laboratory

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)
Pluralism and Diversity
GER 2/E
Experiments designed to illustrate fundamental laws and techniques of organic chemistry.
Core credit awarded only if CHEM 12000 and CHEM 12100 are completed. Primarily for nursing, nutrition and food science and community health students.
prereq: CHEM 10100
prereq or coreq: CHEM 12000
3 hrs (3 lab)
1.5 cr.

BIOL 12000 - Anatomy and Physiology I

Cell structure and function; histology; nervous, muscular and skeletal systems; integument. Required for admission to the nursing program.
Not accepted for credit toward the biology major.
prereq: CHEM 10000, 10100
coreq: CHEM 12000, 12100
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
fall only

BIOL 12200 - Anatomy and Physiology II

Structure and function of circulatory, digestive, excretory, endocrine and reproductive systems. Basic concepts of metabolism, embryology. Required for admission to the nursing program.
Not accepted for credit toward the biology major.
prereq: BIOL 12000 or equiv.
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
spring only

BIOL 23000 - Fundamentals of Microbiology

GER
3/B
Topics include scope, historical aspects, taxonomy, survey of the microbial world, viruses, infectious diseases, control
of microorganisms and immunology. Required for admission to the nursing program. Not accepted for credit toward the biology Major I.

**prereq:** CHEM 10000, 10100, 12000, 12100 or equiv; BIOL 12000

**coreq:** BIOL 12200

5 hrs (2 lec, 3 lab)

3 cr.

*spring only*

### NFS 14100 - Nutrition

Fundamentals of the science of nutrition as they apply to individuals and society. Open to all students.

*3 hrs*  
*3 cr.*

### NFS 13100 - Food Science I

Basic principles of the chemical and physical nature of foods, food sanitation and safety; the nutritional value of food in relation to storage, processing and preparation. Open to all students.

*3 hrs*  
*3 cr.*

### STAT 11300 - Elementary Probability and Statistics

**Hunter Core**  
Math/Quantitative Reasoning  
**GER**  
1/B

Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

**prereq:** A grade of C or better in MATH 10100 or appropriate score on placement exam  
**prereq or coreq:** ENGL 12000

*3 hrs*  
*3 cr.*

-or-

### MATH 15000 (STEM) - Calculus with Analytic Geometry I

**Hunter Core**  
Math/Quantitative Reasoning  
**GER**  
1/B

Limits, continuity, differentiation and integration of elementary functions and trigonometric functions, applications.
Students take graduate courses after completing 96 credits

Students must have completed 96 credits before they can start taking graduate courses. An overall GPA (combined grade point average from all postsecondary institutions attended) of 3.5 (upon completion of 96 cr) is required for consideration. Because of the competitive nature of the applicant pool and the small size of the incoming class, the admission process may favor applicants with an overall GPA greater than 3.5.

Undergraduates admitted to the program take graduate courses during their senior year and will be able to complete the MS-DPD degree one year after they complete the requirements for the BS (NFS) degree. These students will be admitted directly into the MS-DPD program without having to take the GRE exam. Upon completion of the requirements for the MS degree, both the BS and MS degrees will be awarded. These students will pay undergraduate tuition rates up to the number of credits required to earn a baccalaureate degree (120 cr) and credits taken after that number toward the combined dual degree will be paid at the graduate level. Students interested in this accelerated program should speak to the adviser in the Nutrition track during their sophomore year to review the curriculum path for the five-year program.

Students who have been provisionally accepted into the MS-DPD program but who do not maintain the required GPA will not be admitted to the MS-DPD program but will be eligible to receive a BS (NFS) degree from Hunter provided that they fulfill all other academic requirements for their undergraduate degree.

Curriculum Requirements

The accelerated BS/MS is a 137-credit program

For a list of the graduate courses, consult hunter.acalogadmin.com/preview/preview_program.php

Community Health - BS

Community Health

Program Coordinator:

Meredith Manze, PhD, MPH
Assistant Professor, Community Health
2180 Third Avenue, Office #523
Phone: (212) 396-7736
E-mail: meredith.manze@hunter.cuny.edu
Website: http://cuny.edu/site/sph/hunter-college/a-programs/undergraduate/community-health.html

Community Health Program Description:

*Why are children in East Harlem hospitalized for asthma at twice the rate elsewhere in NYC? How can we assess if gun violence is a health priority for members of our community and ensure their expertise informs local public health efforts? How can social media be leveraged to reduce sexually transmitted infections?*

Students in the Community Health program will develop the skills needed to be able to effectively answer these types of public health questions through a social justice lens. Community health professionals work to improve the health and
wellbeing of entire communities. While clinical health professionals might treat an elderly diabetic patient, a community health professional will work to understand and reduce a community's elevated risk for diabetes. At Hunter College, students in the Bachelor of Science program in Community Health will learn to analyze how both social structures (including poverty, racism and environmental exposures) and behavioral choices shape a community's health. They will take courses in health disparities, epidemiology, public health biology, and community health assessment to develop their analytic skills and courses in health communications and social media to learn tools for addressing public health problems. Fieldwork experience and a research seminar give students the opportunity to apply what they have learned in a real-world setting on a community health topic of their choosing. This program is designed to prepare students for work in community-based and human rights organizations, family planning clinics, mental health centers, homeless shelters, research centers, media organizations, as well as in city, state and national health departments. This is a competitive, 51-credit major, taken after 60 credits are completed of undergraduate study (see pre-requisites & application information below).

Admission Requirements

Admission into the COMHE major is competitive and students enter in the Fall semester only (no Spring admission). Students may apply during the semester that they are completing prerequisites for the program. All applicants, including current Hunter College students, must apply for admission to the program. The prerequisites for admission into the COMHE major are:

1. Completion of 60 credits at the time of admission (courses can still be in progress the spring and summer after applying and before entering that fall)
2. A combined GPA of 3.0 from all postsecondary institutions attended
3. Submission of a 500 word essay
4. At least a grade of "C" in the prerequisite courses listed below
5. Completion of the following courses:
   - English Composition (ENGL 12000) - 3 cr.
   - Intro level statistics (STAT 11300 or STAT 21300 (STEM)) , PSYCH 24800, SOC 24100 , ECO 22100 or equivalent) - 3 cr.
   - Any lab science in the Natural Sciences (Preferred: ANTHP 10100 (STEM) or ANTHP 10200 (STEM) ; BIOL 10000 (STEM) , BIOL 10200 (STEM) or BIOL 16000 ) -4 to 4.5 cr.
   - Intro to Sociology (SOC 10100) - 3 cr.
   - Intro level Psychology OR Anthropology (PSYCH 10000 , PSYCH 15000, ANTHC 10100) -3 cr
   - Any upper level course (at least 200 level) in the social sciences (e.g., anthropology (ANTHC), community health, psychology, sociology or urban studies, women and gender studies, or human rights. (Note: The statistics prerequisite cannot meet this requirement.) -3 cr.

For details on admissions process, see http://www.cuny.edu/site/sph/hunter-college/a-programs/undergraduate/community-health/admissions-info.html

Hunter Core Requirement

Several courses leading to or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student’s advantage to choose courses that count toward the Hunter Core Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement

Community Health Major Curriculum Requirements (51 crs.)

SOC 30100 - Medical Sociology
GER
3/B

Social and cultural factors related to health. Organization of health care services, social structure of the hospital.

prereq: SOC 10100
3 hrs
3 cr.

COMHE 30100 - Introduction to Community and Public Health

An introduction to the study of structural inequalities that contribute to health disparities with an emphasis on communities – geographic, identity-based, or virtual, as the focus for research and intervention.

prereq: acceptance to the COMHE major, or permission of the instructor.
3 hrs
3 cr.

COMHE 30200 - Principles of Health Promotion

Introduction to community health methods; presentation skills, learning theories.

prereq: acceptance to the COMHE major, or permission of instructor
3 hrs
3 cr.

COMHE 30300 - Social Structure and Health (W)

An exploration of the roles of economic structure and social linkages that shape health -- including power relations, interactions between subgroups within society, and tensions within groups over institutional control and individual agency.

prereq: acceptance to the COMHE major, or permission of the instructor
3 hrs
3 cr.

COMHE 30400 - Introduction to Health Communication Theory and Practice

An introduction to the field of health communication with a particular emphasis on theoretical constructs, case studies and U.S. and international practical models and applications. Highlights the multidisciplinary and multifaceted nature of health communication and its contribution to the achievement of behavioral, social and organizational objectives as one of the keys to public health interventions.

prereq: acceptance to the COMHE major, or permission of the instructor
3 hrs
3 cr.

COMHE 30600 - Social Disparities in Health

In depth examination of the social, cultural and political factors that influence and lead to health disparities and health inequalities. Course explores demographic trends in mortality and morbidity and the role of history, race, class, policy,
and socioeconomic and cultural factors, and health literacy levels in the development and continuation of disparities in health. This course uses a social justice lens to understand health, health care and health disparities.

**prereq:** acceptance to the COMHE major or permission of the instructor.

3 hrs
3 cr.

### COMHE 32500 - Environmental Public Health

Impact of environmental problems associated with urbanization, e.g., water quality, air and noise pollution, waste disposal and radiation hazards.

**prereq:** acceptance to the COMHE major, or permission of the instructor

3 hrs
3 cr.

### COMHE 32800 - Public Health Biology

Introduction to population biology and ecological principles underlying public health and the relationship of biology to public health. Offers a basic understanding of the biological basis of core public health issues including infectious diseases, vaccines, genetic illnesses, neoplastic processes and environmental illnesses.

**prereq:** acceptance to the COMHE major or permission of the instructor

3 hrs
3 cr.

### COMHE 33000 - Principles of Epidemiology

Methods of study of disease; risk factors; distribution, causes, prevention, and control of selected diseases.

**prereq:** Acceptance to the major, or permission of the instructor.

3 hrs
3 cr.

### COMHE 40500 - Health Care Systems and Health Policy

Overview of U.S. health care system, official and voluntary agencies; introduction to administrative skills, especially those skills necessary for working the the health care field.

**prereq:** Acceptance to the COMHE major or permission of the instructor.

3 hrs
3 cr.

### COMHE 40800 - Digital Media and Health

An introduction to key technological advances and current use of new media (Internet and other digital media, mobile technology, etc.) to communicate about health issues as part of broad community based public health and health communication interventions. It also provides students with practical skills in creating media for health promotion.

**prereq:** Acceptance to the COMHE major or permission of the instructor

3 hrs
3 cr.

### COMHE 41100 - Community Health Assessment
Introduction to assessing health needs of communities and populations, in preparation for fieldwork.

**prereq:** acceptance to the COMHE major or permission of the instructor

3 hrs

3 cr.

**COMHE 41200 - Directed Fieldwork Practicum**

**prereq:** acceptance to the COMHE major or permission of instructor

3 hrs

3 cr.

**COMHE 41300 - Research Symposium**

Data analysis, evaluation and write up of fieldwork research projects culminating in production of e-Portfolio.

**prereq:** acceptance to the COMHE major or permission of the instructor

3 hrs

3 cr.

**NFS 14100 - Nutrition**

Fundamentals of the science of nutrition as they apply to individuals and society.
Open to all students.

3 hrs

3 cr.

- Two electives (300 or 400 level) in COMHE, SOC or ANTHC; or NFS 131 - 3 cr. each

**Nutrition**

Nutrition and Food Science - BS

Accelerated BS/MS in Nutrition (DPD)

**Nutrition and Food Science - BS**

School of Urban Public Health

**Nutrition and Food Science**

**Program Coordinator:**

Khursheed Navder, PhD, RD

Crystal Mancha  
(212) 396 7778  
cmancha@hunter.cuny.edu

The Nutrition and Food Science (NFS) major at Hunter College is a diverse science-based program where students learn about food and its effect on our health. It offers a comprehensive study of the fundamental principles of food preparation and safety, nutrition, food service management, and community nutrition education. This is accomplished through the application of a variety of sciences. Students who like physical and biological sciences, are interested in good health, enjoy working with people, and are concerned about the nutritional well-being of people and communities will find interesting and challenging career opportunities within health care fields or in the food industry. The NFS major at Hunter develops these interests and prepares students for challenging opportunities after graduation.

This major is designed for students who plan to enter the workforce directly out of college. The BS in NFS may be a terminal degree, or NFS graduates may elect to continue on for additional education. Students in the NFS major will take courses in nutrition, food science, food service management, research methods, community nutrition education, and epidemiology.

Along with providing students with a good preparation in nutrition, this major is also a good undergraduate preparation for those who might want to go into allied health fields, social work, or other human service professions. The elective courses also allow these undergraduate students who may wish to pursue medicine, nursing, physical therapy or other health careers to take additional science and other pre-requisite coursework for those programs.

Career Opportunities: The BS in NFS degree provides graduates with a wide variety of career opportunities. Foods and nutrition majors frequently work with athletes, weight control and fitness programs, or other special groups like WIC (Women, Infants & Children in community settings). Industries like hotels, airlines, universities, food service chains, and industrial cafeterias employ food service managers. Graduates can become food science technical specialists and conduct research, development and quality control of food products for food companies. It is also possible to use foods and nutrition knowledge for jobs in advertising, marketing and in the mass media. Students can become consultants to television programs, or write articles on food for newspapers. Students may take steps after graduation to enter a graduate didactic program in dietetics to become registered dietitians.

Note: This major is not a didactic program in dietetics (DPD) and does NOT prepare the student to become a registered dietitian.

Admission Requirements

Students planning to apply for admission to the School of Health Sciences Nutrition and Food Science track should attend a group orientation session for prospective students held every October and February. Individual appointments with a faculty adviser may also be requested by calling (212) 481-5111.

After completion of 45 credits and most of the General Education Requirements (GER), Hunter students may see an NFS adviser for pre-NFS major advising; however, pre-major status does not guarantee later acceptance into the major. Pre-majors must follow the same application procedures as any other student. Students enter the program in the fall semester and can attend on a full-time or part-time basis during the day. The Hunter College GER should be met before entrance into the NFS major. The requirements for admission into the NFS major are completion of 60 credits, including the following courses: two semesters of anatomy and physiology with lab; one semester of general chemistry with lab; one semester of organic chemistry with lab; one semester of microbiology with lab; one semester of introductory food science; one semester of introductory nutrition. A grade of C or better must be earned in all science prerequisites, and a grade of B or better in the two nutrition and food science courses.
The prerequisite courses must be completed by the end of the summer session preceding entrance into the NFS major. An overall GPA (combined grade point average from all postsecondary institutions attended) of 2.8 is required for consideration. Because of the competitive nature of the applicant pool and the small size of the incoming class, the admission process may favor applicants with an overall GPA greater than 2.8. Students who have completed 30 credits at Hunter College or at another City University institution at the time of application will be given priority in the selection process.

All applicants, including those currently enrolled at Hunter College, must file a City University of New York (CUNY) Transfer (Advanced Standing) application. The application may be obtained at Hunter’s 68th Street campus in the college’s Welcome Center, Room 100 North Building, (212) 772-4490, online at http://admissions.hunter.cuny.edu, at CUNY’s Office of Admission Services, 1114 Avenue of the Americas, New York NY 10036, (212) 997-2869 and at all CUNY campuses. You can also apply online at www.cuny.edu.

The transfer application and required supporting academic records must be mailed to the University Application Processing Center, PO Box 359023, Brooklyn, New York, 11235-9023 by March 1. Applications that arrive after March 1 are not given priority consideration and are processed on a space available basis. Applicants with completed applications by the deadline date can expect to be notified no later than May 1.

Students who have not completed the prerequisite course requirements to be considered for admission to the NFS major may wish to transfer to Hunter College as liberal arts and science students. These students should follow the same transfer admission process detailed above for the following year.

CUNY students with an earned AA or AS degree in fall 2003 and after are exempt from the Core requirements of the GER but must fulfill the graduation requirements of significant writing, and pluralism and diversity. Students must have successfully completed the other prerequisites before applying as a NFS major. Transfer students who have not earned a degree, or who have earned an associate degree from a non-CUNY institution are required to complete the Hunter GER requirements in order to graduate.

Requirements for Graduation with a BS in Nutrition and Food Science (120 credits)

General Education Requirement 39-51 cr

The Hunter General Education Requirement consists of a three-stage Core requirement and Graduation Requirement

- List of Approved Courses for GER Core Stage 1: Academic Foundations
- List of Approved Courses for GER Core Stage 2: Broad Exposure
- List of Approved Courses for GER Core Stage 3: Focused Exposure

As students complete their GER, they should include the prerequisites for NFS, which may also be applied to the college’s graduation requirements of writing and pluralism and diversity (foreign language not required for NFS major). They may select from the courses in the lists above except where indicated below:

Stage 1: Academic Foundations

Stage 1/B

STAT 11300 - Elementary Probability and Statistics

Hunter Core
Math/Quantitative Reasoning
GER
Not open to students who have completed STAT 21300 (STEM) or PSYCH 24800. Not credited for majors in statistics or mathematics unless minor is elementary education. An introduction to applied statistics and statistical computing. Hands-on data analysis. Graphical inference. The five number summary, box plots, scatterplots, normal probability plots. Elementary probability. Statistical estimation and hypothesis testing. Linear regression. Students are expected to analyze real data sets and write reports. Students who have taken calculus or place into calculus by the placement exam should take STAT 21300 instead of STAT 11300.

prereq: A grade of C or better in MATH 10100 or appropriate score on placement exam
prereq or coreq: ENGL 12000
3 hrs
3 cr.

Stage 2: Broad Exposure

Stage 2/A

ENGL 22000 - Introduction to Writing about Literature (W)

Hunter Core
English Comp (EC)
GER
2/A

Analytical writing and close reading in British and American fiction, drama, poetry, and literary criticism, with an emphasis on further development of critical writing and research skills. Students gain a deeper understanding and appreciation of literature as well as more extensive experience with academic writing.

prereq: ENGL 12000
3 hrs + one additional conference hour
3 cr.

Stage 2/B

ECO 10000 - Introduction to Economics

Hunter Core
Individual and Society (Social Sciences) -I&S SS
GER
2/B

Introduction to economic principles, issues, and policy. Recommended for students who want a broad, one-semester overview.
Not open to students who have taken or are currently enrolled in ECO 20000 or 20100 or their equivalents. Cannot be credited towards the Economics major.

3 hrs
3 cr.

PSYCH 10000 - Introduction to Psychology
An introduction to the problems, methods and concepts of psychology, covering a range of topics which characterize the discipline, including history, methodology and professional ethics, biological foundations, perception, motivation and emotion, learning, memory and thinking, individual differences, intelligence, personality, behavior disorders and their treatment, group processes.

3 hrs
3 cr.

Stage 2/E

CHEM 10000 (STEM) - Essentials of General Chemistry Lecture

Hunter Core
Scientific World (SW); Life and Physical Sciences (LPS)

GER
GER 2/E

Essential facts, laws, and theories of general chemistry.
Note: Core credit awarded only if CHEM 10000 and CHEM 10100 are completed. Primarily for nursing, nutrition and food science and community health education students.

4 hrs (3 lec, 1 rec)
3 cr.

CHEM 10100 - Inquiries into the Nature of Matter

Hunter Core
Life and Physical Sciences (LPS) Scientific World (SW)

Pluralism and Diversity
GER 2/E

A laboratory-based introduction to chemistry for non-science and health science majors that focuses on the basic principles of matter, energy and the environment. CHEM 10100 satisfies the laboratory requirements for a one-semester general chemistry course for health science students.
Primarily for nursing, nutrition and food science and community health students.
Taken with CHEM 100, meets STEM, SW and LPS

prereq or coreq: CHEM 10000

3 hrs
1.5 cr.

CHEM 12000 (STEM) - Essentials of Organic Chemistry Lecture

Hunter Core
Life and Physical Sciences (LPS); Scientific World (SW)

Pluralism and Diversity
GER 2/E

Course presents essential facts, laws and theories of organic chemistry.
Core credit awarded only if CHEM 12000 and CHEM 12100 are completed. Primarily for nursing, nutrition and food science and community health education students.

prereq: CHEM 10000

4 hrs (3 lec, 1 rec)
3 cr.
CHEM 12100 (STEM) - Essentials of Organic Chemistry Laboratory

**Hunter Core**

Life and Physical Sciences (LPS); Scientific World (SW)

**Pluralism and Diversity**

GER 2/E

Experiments designed to illustrate fundamental laws and techniques of organic chemistry. Core credit awarded only if CHEM 12000 and CHEM 12100 are completed. Primarily for nursing, nutrition and food science and community health students.

*prereq: CHEM 10100
prereq or coreq: CHEM 12000
3 hrs (3 lab)
1.5 cr.*

**Allied Courses**

**BIOL 12000 - Anatomy and Physiology I**

Cell structure and function; histology; nervous, muscular and skeletal systems; integument. Required for admission to the nursing program.

Not accepted for credit toward the biology major.

*prereq: CHEM 10000, 10100
coreq: CHEM 12000, 12100
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
fall only*

**BIOL 12200 - Anatomy and Physiology II**

Structure and function of circulatory, digestive, excretory, endocrine and reproductive systems. Basic concepts of metabolism, embryology. Required for admission to the nursing program.

Not accepted for credit toward the biology major.

*prereq: BIOL 12000 or equiv.
7hrs (3hr Lecture, 1hr Recitation, 3hr Lab)
4.5 cr.
spring only*

**BIOL 23000 - Fundamentals of Microbiology**

**GER**

3/B

Topics include scope, historical aspects, taxonomy, survey of the microbial world, viruses, infectious diseases, control of microorganisms and immunology. Required for admission to the nursing program.

Not accepted for credit toward the biology Major I.

*prereq: CHEM 10000, 10100, 12000, 12100 or equiv; BIOL 12000
coreq: BIOL 12200
5 hrs (2 lec, 3 lab)
3 cr.
spring only*
Pluralism and Diversity 0-12 cr*

List of Approved Courses for the Pluralism and Diversity Requirement

*all courses used to satisfy P&D requirements may simultaneously meet other GER

Writing 0-9 cr*

List of Approved Courses for the Writing Requirement

• up to 3 courses in significant writing “W” designated courses
*courses meeting Significant writing may also meet other GER.

Required DPD Courses 30 cr

Prerequisite courses (open to non-majors)

**NFS 13100 - Food Science I**

Basic principles of the chemical and physical nature of foods, food sanitation and safety; the nutritional value of food in relation to storage, processing and preparation.
Open to all students.
3 hrs
3 cr.

**NFS 14100 - Nutrition**

Fundamentals of the science of nutrition as they apply to individuals and society.
Open to all students.
3 hrs
3 cr.

Open to majors only

**NFS 33300 - Nutrition Education**

Introduction to the theories and principles of the teaching-learning process in the field of nutrition.
Open to NFS majors only and need department permission.
prereq: NFS 13100, 14100
3 hrs
3 cr.

**NFS 33500 - Institutional Management**

Overview of the theories, functions and tasks of management. Discussion of labor and effective methods for directing an operation with applications drawn from food service.
Open to NFS majors only and need department permission.
prereq: NFS 13100, 14100, ECO 10000
NFS 34200 - Nutrition and Human Development

Nutritional needs throughout the life cycle: pregnancy, infancy, childhood, adolescence, adulthood and later years. Open to NFS majors only and need department permission.

prereq: NFS 13100, 14100
3 hrs
3 cr.

NFS 40200 - Seminar in Nutrition and Food Science

Research in nutrition and food science; examination of professional goals. Open to NFS majors only and need department permission.

prereq: NFS 13100, 14100
3 hrs
3 cr.

NFS 43500 - Food Service Systems

The organization and administration of a food service operation from the systems approach on the tactical and strategic level, stressing learning activities and competencies required by the American Dietetic Association. Open to NFS majors only and need department permission.

prereq: NFS 13100, 14100
3 hrs
3 cr.

NFS 44100 - Community Nutrition

Analysis of nutrition services, legislation and policy; role and function of community nutritionists; nutrition education in a community setting. Open to NFS majors only and need department permission.

prereq: NFS 13100, 14100
3 hrs
3 cr.

NFS 44351 - Practicum in Nutrition and Food Science

Practicum in institutions, agencies, business and research firms; projects. Open to NFS majors only and need department permission.

prereq: NFS 13100, 14100
7 hrs (1 lec, 6 lab)
3 cr.

COMHE 33000 - Principles of Epidemiology

Methods of study of disease; risk factors; distribution, causes, prevention, and control of selected diseases.

prereq: Acceptance to the major, or permission of the instructor.
3 hrs
3 cr.
Elective Courses 18 to 39 cr.

Summary 120 cr.

Total Credits 120

**COMHE 15000 - Introduction to the Health Care System**

A survey of the organization of the United States health care system, the perspectives of consumers, providers and organizers. Various health professions will be examined as well as the major health concerns that exist today.

*prereq: none*

3 hrs
3 cr.

**COMHE 15200 - Bodies Using Bodies**

GER

2/B

This course addresses the medical, technical, organizational, and ethical issues that arise when human beings make use of the bodies, organs, tissues, or cells of other people to enhance their own well-being. The course takes a cross-disciplinary approach to contemporary issues in the health sector that involve the use of human bodies for the benefit of others. It is aimed at pre-majors or students interested in issues in the area of society and health.

3 hrs
3 cr.

**COMHE 20000 - Controversial Issues in Health and Health Care**

A contemporary health controversy examined through the disciplines of community and public health and health care.

*prereq: none*

3 hrs
3 cr.

**COMHE 20400 - AIDS and Society**
The HIV/AIDS pandemic examined from a variety of perspectives: epidemiology, sociology, and media. 
3 hrs
3 cr.

**COMHE 30100 - Introduction to Community and Public Health**

An introduction to the study of structural inequalities that contribute to health disparities with an emphasis on communities – geographic, identity-based, or virtual, as the focus for research and intervention.

*prereq: acceptance to the COMHE major, or permission of the instructor.*

3 hrs
3 cr.

**COMHE 30200 - Principles of Health Promotion**

Introduction to community health methods; presentation skills, learning theories.

*prereq: acceptance to the COMHE major, or permission of instructor*

3 hrs
3 cr.

**COMHE 30300 - Social Structure and Health (W)**

An exploration of the roles of economic structure and social linkages that shape health -- including power relations, interactions between subgroups within society, and tensions within groups over institutional control and individual agency.

*prereq: acceptance to the COMHE major, or permission of the instructor*

3 hrs
3 cr.

**COMHE 30400 - Introduction to Health Communication Theory and Practice**

An introduction to the field of health communication with a particular emphasis on theoretical constructs, case studies and U.S. and international practical models and applications. Highlights the multidisciplinary and multifaceted nature of health communication and its contribution to the achievement of behavioral, social and organizational objectives as one of the keys to public health interventions.

*prereq: acceptance to the COMHE major, or permission of the instructor*

3 hrs
3 cr.

**COMHE 30600 - Social Disparities in Health**

In depth examination of the social, cultural and political factors that influence and lead to health disparities and health inequalities. Course explores demographic trends in mortality and morbidity and the role of history, race, class, policy, and socioeconomic and cultural factors, and health literacy levels in the development and continuation of disparities in health. This course uses a social justice lens to understand health, health care and health disparities.

*prereq: acceptance to the COMHE major or permission of the instructor.*
3 hrs
3 cr.

**COMHE 32100 - Addictions and Dependencies**

Recent research on alcohol, narcotics and other chemical dependencies. Strategies for intervention, prevention, and treatment, with emphasis on role of health education.

*prereq: none
3 hrs
3 cr.*

**COMHE 32200 - Maternal and Child Health**

Social, behavioral, and medical factors involved in contraception counseling, abortion and sterilization, prenatal care, childbirth, child health, parenting, and prevention of family violence. Effect of public, social welfare, and public health policy on mothers and children.

*prereq: none
3 hrs
3 cr.*

**COMHE 32300 - Health and Aging**

Demography, epidemiology, and sociology of aging. Public health policy and recent legislation affecting seniors and older adults in the U.S. and globally.

*prereq: none
3 hrs
3 cr.*

**COMHE 32400 - Human Sexuality**

Study of interaction of social, affective, and behavioral dimensions of sexuality, including gender identity, with a particular focus on the way sexuality shapes community health.

*prereq: none
3 hrs
3 cr.*

**COMHE 32500 - Environmental Public Health**

Impact of environmental problems associated with urbanization, e.g., water quality, air and noise pollution, waste disposal and radiation hazards.

*prereq: acceptance to the COMHE major, or permission of the instructor
3 hrs
3 cr.*

**COMHE 32600 - HIV/AIDS: An Interdisciplinary Perspective for Health Care Providers**

Interdisciplinary perspective on the impact of the HIV epidemic on the biological, psychological and social dimensions of people affected by HIV/AIDS.

*prereq: none
COMHE 32800 - Public Health Biology

Introduction to population biology and ecological principles underlying public health and the relationship of biology to public health. Offers a basic understanding of the biological basis of core public health issues including infectious diseases, vaccines, genetic illnesses, neoplastic processes and environmental illnesses.

prereq: acceptance to the COMHE major or permission of the instructor

3 hrs
3 cr.

COMHE 33000 - Principles of Epidemiology

Methods of study of disease; risk factors; distribution, causes, prevention, and control of selected diseases.

prereq: Acceptance to the major, or permission of the instructor.

3 hrs
3 cr.

COMHE 40000 - Topics in Community Health and Public Health

Content varies from semester to semester to address changing needs of profession.

prereq: none

3 hrs
3 cr.

COMHE 40500 - Health Care Systems and Health Policy

Overview of U.S. health care system, official and voluntary agencies; introduction to administrative skills, especially those skills necessary for working in the health care field.

prereq: Acceptance to the COMHE major or permission of the instructor.

3 hrs
3 cr.

COMHE 40800 - Digital Media and Health

An introduction to key technological advances and current use of new media (Internet and other digital media, mobile technology, etc.) to communicate about health issues as part of broad community based public health and health communication interventions. It also provides students with practical skills in creating media for health promotion.

prereq: Acceptance to the COMHE major or permission of the instructor

3 hrs
3 cr.

COMHE 41100 - Community Health Assessment

Introduction to assessing health needs of communities and populations, in preparation for fieldwork.

prereq: acceptance to the COMHE major or permission of the instructor

3 hrs
3 cr.
COMHE 41200 - Directed Fieldwork Practicum

prereq: acceptance to the COMHE major or permission of instructor
3 hrs
3 cr.

COMHE 41300 - Research Symposium

Data analysis, evaluation and write up of fieldwork research projects culminating in production of e-Portfolio.
prereq: acceptance to the COMHE major or permission of the instructor
3 hrs
3 cr.

COMHE 42000 - Introduction to Clinical Medicine

Role of health professionals in treatment, management and control of disease.
prereq: BIOL 12000 or 12200 or equiv.
3 hrs
3 cr.

COMHE 48010 - Independent Study

Total credits in independent study courses and honors may not exceed 6.
prereq: perm director
hrs TBA
1-3 cr. respectively

COMHE 48020 - Independent Study

Total credits in independent study courses and honors may not exceed 6.
prereq: perm director
hrs TBA
1-3 cr. respectively

COMHE 48030 - Independent Study

Total credits in independent study courses and honors may not exceed 6.
prereq: perm director
hrs TBA
1-3 cr. respectively

COMHE 49000 - Honors

Total credits in independent study courses and honors may not exceed 6.
prereq: perm director
hrs TBA
3 cr.

NFS 13100 - Food Science I
Basic principles of the chemical and physical nature of foods, food sanitation and safety; the nutritional value of food in relation to storage, processing and preparation.
Open to all students.
3 hrs
3 cr.

**NFS 14100 - Nutrition**

Fundamentals of the science of nutrition as they apply to individuals and society.
Open to all students.
3 hrs
3 cr.

**NFS 33200 - Cultural Aspects of Food and Nutrition**

Study of the way in which cultural, social and technological factors influence food behavior and dietary patterns.
Open to NFS majors only and need department permission.
prereq: NFS 13100, 14100, ANTHP 10100, SOC 101)
3 hrs
3 cr.

**NFS 33300 - Nutrition Education**

Introduction to the theories and principles of the teaching-learning process in the field of nutrition.
Open to NFS majors only and need department permission.
prereq: NFS 13100, 14100
3 hrs
3 cr.

**NFS 33500 - Institutional Management**

Overview of the theories, functions and tasks of management. Discussion of labor and effective methods for directing an operation with applications drawn from food service.
Open to NFS majors only and need department permission.
prereq: NFS 13100, 14100, ECO 10000
3 hrs
3 cr.

**NFS 34200 - Nutrition and Human Development**

Nutritional needs throughout the life cycle: pregnancy, infancy, childhood, adolescence, adulthood and later years.
Open to NFS majors only and need department permission.
prereq: NFS 13100, 14100
3 hrs
3 cr.

**NFS 36100 - Food and the Consumer**

Food issues; food services available to the consumer; responsibilities of the private and public sectors.
Open to NFS majors only and need department permission.
prereq: NFS 13100, 14100, 33100, ECO 10000
NFS 40100 - Techniques of Communication in Nutrition

Theory/practice of communications skills for nutritionists/food scientists. Includes food demonstrations, public relations, and advertising.
Open to NFS majors only and need department permission.
 prerequisite: NFS 33300
3 hrs
3 cr.

NFS 40200 - Seminar in Nutrition and Food Science

Research in nutrition and food science; examination of professional goals.
Open to NFS majors only and need department permission.
 prerequisite: NFS 13100, 14100
3 hrs
3 cr.

NFS 43100 - Experimental Foods

Scientific approach to food testing; use of instruments and techniques in food and nutrition laboratories.
Open to NFS majors only and need department permission.
 prerequisite: NFS 33100, 34100
5 hrs (2 lec, 3 lab)
3 cr.

NFS 43400 - Nutrition and the Elderly

Psychological, psychosocial, and economic problems of the elderly; how needs are met by government and private agencies. Application of nutrition to these problems.
Open to NFS majors only and need department permission.
 prerequisite or corequisite: NFS 34200, PSYCH 10000, SOC 10100
3 hrs
3 cr.

NFS 43500 - Food Service Systems

The organization and administration of a food service operation from the systems approach on the tactical and strategic level, stressing learning activities and competencies required by the American Dietetic Association.
Open to NFS majors only and need department permission.
 prerequisite: NFS 13100, 14100
3 hrs
3 cr.

NFS 44100 - Community Nutrition

Analysis of nutrition services, legislation and policy; role and function of community nutritionists; nutrition education in a community setting.
Open to NFS majors only and need department permission.
prereq: NFS 13100, 14100
3 hrs
3 cr.

NFS 44351 - Practicum in Nutrition and Food Science

Practicum in institutions, agencies, business and research firms; projects.
Open to NFS majors only and need department permission.
prereq: NFS 13100, 14100
7 hrs (1 lec, 6 lab)
3 cr.

NFS 44352 - Practicum in Nutrition and Food Science

Practicum in institutions, agencies, business and research firms; projects.
Open to NFS majors only and need department permission.
prereq: NFS 44200
7 hrs (1 lec, 6 lab)
3 cr.

NFS 44354 - Practicum in Nutrition and Food Science

Practicum in institutions, agencies, business and research firms; projects.
Open to NFS majors only and need department permission.
prereq: NFS 44200
7 hrs (1 lec, 6 lab)
3 cr.

NFS 44355 - Practicum in Nutrition and Food Science

Practicum in institutions, agencies, business and research firms; projects.
Open to NFS majors only and need department permission.
prereq: NFS 44200
7 hrs (1 lec, 6 lab)
3 cr.

NFS 44356 - Practicum in Nutrition and Food Science

Practicum in institutions, agencies, business and research firms; projects.
Open to NFS majors only and need department permission.
prereq: NFS 44200
7 hrs (1 lec, 6 lab)
3 cr.

NFS 48031 - Independent Study in Nutrition and Food Science

Open to NFS majors only and need department permission.
prereq: NFS 44200, perm dept. chair
hrs TBA
1 – 3 cr.
Respectively may be taken 1 or 2 sem.
NFS 48032 - Independent Study in Nutrition and Food Science

Open to NFS majors only and need department permission.

prereq: NFS 44200, perm dept. chair
hrs TBA
1 – 3 cr.
Respectively may be taken 1 or 2 sem.

NFS 49000 - Honors in Nutrition and Food Science

Supervised independent research project. A written report or suitable presentation is required. Proposal must be presented the semester before work is done.

prereq: NFS 44200, perm NFS coordinator
hrs TBA
3 cr.

NURS 45500 - Public Health Nursing

In lectures and in supervised clinical experiences, the student examines the roles of nurses in planning, delivering and evaluating health programs and services for families, communities and populations. The impact of social, economic and environmental determinants of human health is explored, as are tools for assessing the health status of communities and populations. The course introduces students to the global context of public and community health and examines nursing practice in areas including home health, environmental and school health. The role of nurses in preparing communities to plan for and recover from natural and human-made disasters is also examined.

prereq: NURS 35200; NURS 36000
coreq: NURS 46000
30 hrs: Lecture, 90 hrs: Clinical
4 cr.

Programs and Courses in Women and Gender Studies

Women and Gender Studies

About the Program

Program Description

Programs and Courses

Programs and Courses in Women and Gender Studies

Administration and Faculty

Program Office:
Faculty

Women and Gender Studies Faculty

HEGIS Code: 4903

Undergraduate Major

Women and Gender Studies - BA

Foundational Courses

Foundational Courses must be completed before embarking upon the major. Students with appropriate background may be exempted from some or all Foundational Courses. See department for proper placement.

ENGL 12000 - Expository Writing

Hunter Core

English Comp (EC)

GER

1/A

Required of all students unless exempt; trains students to analyze, develop and evaluate ideas and to express themselves clearly and effectively. Introduction to documented research.

prereq: successful completion of developmental courses, if required
3 hrs + conf
3 cr.

Hunter Core Requirement Courses leading to (foundational) or within this major may fulfill parts of the Hunter Core Requirement (CUNY Common Core [CCC], Hunter Focus, Concurrent Requirements). When selecting courses, it may be to a student's advantage to choose courses that count toward the Hunter Core
Requirement and also advance the student on the path to the major. Details on the Hunter Core Requirement can be found here: Hunter Core Requirement.

Major

The Women and Gender Studies Program offers a 27-credit major. The 27 required credits are distributed as follows:

Core 12 cr

A. 3 Credits

WGS 10000 - Introduction to Gender and Sexuality Studies

Hunter Core
Individual and Society (I&S)
Pluralism and Diversity
PD/C
GER
2/B

The course will introduce students to the political and theoretical debates in the discipline of gender and sexuality. We will cover historical struggles for the women's enfranchisement, the abolitionist movements, sex wars, and the queer rights movement. The course introduces students to feminist contribution to the debate that considers sex as biology and gender as culture, critical race theory, and queer theory. In addition the course will also deal with structural and institutional forms of disenfranchisement by examining the relationship between gender and the state, colonialism, law and capital.

3 hrs
3 cr.

B. 3 Credits

WGS 20100 - Classics in Feminist Thought (W)

Pluralism and Diversity
PD/C
GER
3/A or B

The course covers the historical debates within the ‘women’s movement’ in the United States by examining some of the ‘classical’ texts by Mary Wollstonecraft, John Adams, and Sojourner Truth. The course also covers the political and intellectual contribution by women of color to the discipline by reading Gloria Anzuldua, bell hooks, Audre Lorde, Patricia Williams, Kimberley Crenshaw among others. ‘Foundational’ texts by Gayle Rubin, Judith Butler, and Adrienne Rich offer a deeper understanding of queer theory’s influence to the discipline. Even as the course reads ‘classic’ texts of the discipline, we will critically examine the formation of a cannon.

prereq: WGS 10000, ENGL 12000 or equiv.
C. 3 credits

WGS 24400 - Transnational Feminisms

Pluralism and Diversity
PD/C
GER
3/A or B

Exploring the gender dynamics of racial, ethnic, and economic relations of power in domestic, international, and transnational settings. We will examine feminist scholarship produced by and about American women of color, Third World women, and other social and political actors whose experiences and thinking have shaped contemporary ideas about gender in different parts of the world.

prereq: WGS 10000, ENGL 12000

D. 3 credits

WGS 31000 - Research Seminar: Feminist Theory and Methodology

Open to Jr/Sr only. Study of the theoretical models that feminist scholars create to guide their work and application of feminist methodology to a research project. To graduate with honors in Women's Studies, majors must enroll in this seminar.

Note: Students may take WGS 31000 or 32000 to satisfy the Senior Seminar requirement in the major; students may also opt to take both courses. Since both classes are not taught every semester, students are urged to consult the program director in advance to plan their senior seminar

prereq: WGS 10000, 20100, at least one other WGS course at 200-level or higher

AREA OF CONCENTRATION- 9 Credits

Students will choose one from among the 6 areas of concentration listed as follows:

Please go to the WGS website schedule of classes (http://www.hunter.cuny.edu/wgsprogram/schedule-of-classes) for a complete list of cross-listed courses that fulfill each of the 6 areas of concentration.

I. Women and Gender Studies: Feminist Thought and Theory

II. Women and Gender Studies: Sexualities

III. Women and Gender Studies: Gender & Public Policy

IV. Women and Gender Studies: Gender, Literature and the Arts

V. Women and Gender Studies: Labor, Migration and Globalization
VI. Women and Gender Studies: Women in Culture and Society

Electives - 6 credits

Students will be required to take two elective classes (6 credits). One (3 credits) of the two elective classes MUST be in an alternative Area of Concentration than their primary one. At least one of the classes in the student’s Area of Concentration or elective must be 300 level or above.

Minor in Women and Gender Studies - 12 credits

The Minor in Women and Gender Studies requires students to take 12 credits: Introduction to Gender and Sexuality Studies (WGS 10000), Classics in Feminist Thought (WGS 20100), Transnational Feminisms (WGS 24400) and one elective course from one of the six areas of concentration.

WGS 10000 - Introduction to Gender and Sexuality Studies, must be completed before WGS 20100 - Classics in Feminist Thought (W) and WGS 24400 - Transnational Feminisms.

Internships

Majors may satisfy the Senior Seminar requirement by interning in organizations that relate to the needs or concerns of women, and by simultaneously enrolling in WGPS 32000 Internship Seminar, where their internship experiences and assigned readings will be discussed. Majors may also take the research seminar at the same time. The internship option is available to minors as well as majors. Interested students should consult with the program director before registering for the internship seminar. Students who wish to undertake an independently arranged internship outside of the formal internship seminar may enroll in WGIS 29800 with the permission of the program director.

Research Seminar

Majors may satisfy the Senior Seminar requirement of the major by enrolling in the Research Seminar (WGS 31000), a capstone course in which they will apply feminist theory and methodology to a significant research project resulting in a substantial paper. Students who wish to qualify for honors in Women and Gender Studies must enroll in the research seminar.

Honors

In order to graduate with honors in Women and Gender Studies, a student must have a 3.5 GPA in the Women and Gender Studies major and a college-wide cumulative index of at least 3.0. Students should submit a 18-20 page paper written for any Women and Gender Studies 300 level class including but not limited to the Research Seminar (WGS 31000). The student must submit the paper by March 15 (for June graduation) and October 15 (for December graduation) to be considered for program honors. The papers will be read by a faculty committee to judge whether it merits honors.

Undergraduate Minor

Minor in Women and Gender Studies
The Minor in Women and Gender Studies requires students to take 12 credits: *Introduction to Gender and Sexuality Studies* (WGS 10000), *Classics in Feminist Thought* (WGS 20100), *Transnational Feminisms* (WGS 24400) and one elective course from one of the six areas of concentration.

WGS 10000 - Introduction to Gender and Sexuality Studies, must be completed before WGS 20100 - Classics in Feminist Thought (W) and WGS 24400 - Transnational Feminisms.

**Women and Gender Studies: Required Courses**

**WGS 10000 - Introduction to Gender and Sexuality Studies**

**Hunter Core**
Individial and Society (I&S)

**Pluralism and Diversity**
PD/C
GER
2/B

The course will introduce students to the political and theoretical debates in the discipline of gender and sexuality. We will cover historical struggles for the women's enfranchisement, the abolitionist movements, sex wars, and the queer rights movement. The course introduces students to feminist contribution to the debate that considers sex as biology and gender as culture, critical race theory, and queer theory. In addition the course will also deal with structural and institutional forms of disenfranchisement by examining the relationship between gender and the state, colonialism, law and capital.

3 hrs
3 cr.

**WGS 20100 - Classics in Feminist Thought (W)**

**Pluralism and Diversity**
PD/C
GER
3/A or B

The course covers the historical debates within the ‘women’s movement’ in the United States by examining some of the ‘classical’ texts by Mary Wollstonecraft, John Adams, and Sojourner Truth. The course also covers the political and intellectual contribution by women of color to the discipline by reading Gloria Anzuldua, bell hooks, Audre Lorde, Patricia Williams, Kimberley Crenshaw among others. ‘Foundational’ texts by Gayle Rubin, Judith Butler, and Adrienne Rich offer a deeper understanding of queer theory’s influence to the discipline. Even as the course reads ‘classic’ texts of the discipline, we will critically examine the formation of a cannon.

prereq: WGS 10000, ENGL 12000 or equiv.
3 hrs
3 cr.

**Women and Gender Studies: Feminism**
WGS 21600 - Women Philosophers of the Past

**Pluralism and Diversity**  
**PD/C**  
**GER**  
3/A

Study of the writings and ideas of selected women philosophers who lived before the contemporary feminist movement.  
*cross-listed PHILO 21600*  
*prereq: ENGL 12000, one course in philosophy*  
3  
3

WGS 24400 - Transnational Feminisms

**Pluralism and Diversity**  
**PD/C**  
**GER**  
3/A or B

Exploring the gender dynamics of racial, ethnic, and economic relations of power in domestic, international, and transnational settings. We will examine feminist scholarship produced by and about American women of color, Third World women, and other social and political actors whose experiences and thinking have shaped contemporary ideas about gender in different parts of the world.  
*prereq: WGS 10000, ENGL 12000*  
3 hrs  
3 cr.

WGS 36000 - Feminist Social Theory

**Pluralism and Diversity**  
**PD/C**  
**GER**  
3/B

An introduction to feminist theory developed by women from Western, Third World and other countries.  
*cross-listed SOC 36000*  
*prereq: SOC 10100 or perm instr.*  
3 hrs  
3 cr.

WGST 20900 - Women and Gender in Western Political Thought (W)

**Pluralism and Diversity**  
**PD/C or D**  
**GER**  
3/B
The history of political thought from the perspective of gender relations and the treatment of women.

cross-listed POLSC 20900
prereq: ENGL 12000 or equiv.
3 hrs
3 cr.

WGST 23000 - Feminism: Philosophical Theory and Practice (W)

Pluralism and Diversity
PD/C
GER
3/A

Analysis of feminist theories and their practical implications.

GER
3/A

Conducted in English. An interdisciplinary approach to contemporary women's literature and cinema from Spanish America focusing on gender issues.

cross-listed SPAN 26900
prereq: ENGL 12000
3 hrs
3 cr.
WGSA 31900 - Advanced Topics in Literature by Women (W)

Pluralism and Diversity
PD/C
GER
3/A

Selected works by women in relation to a special theme, technique, genre, theoretical issue or cultural consideration. May be repeated once for credit with a different topic.
cross-listed ENGL 31900
prereq: ENGL 22000
3 hrs
3 cr.

WGSA 33700 - Caribbean Women Writers (W)

GER
3/A

A study of some of the major preoccupations of Caribbean fiction, such as history, migration/travel, colonialization, memory and language, from the perspectives of selected women writers, paying close attention to the historical, intellectual and cultural contexts that stimulated the production of these works.
cross-listed AFPRL 33700
prereq: AFPRL 23600 or 23700 or ENGL 22000 or WGS 10000
3 hrs
3 cr.

WGSA 36100 - Russian Women Writers

Pluralism and Diversity
PD/C
GER
3/A

cross-listed RUSS 36000
prereq: RUSS 20200 or equiv.
3 hrs
3 cr.

WGSA 38400 - Women and Media (W)

Pluralism and Diversity
PD/C
GER
3/A

Examination, from historical and formal perspective, of ways in which women have been represented by mass media in America since mid-19th century. Exploration of how feminists for 100 years have challenged these images and posed alternative modes of cultural representation and production.
Women and Gender Studies: Gender and Public Policy

WGSP 21900 - Women and the Law

Women and Gender Studies: Gender and Sexuality

WGSC 30100 - Gender in Anthropological Perspective

Pluralism and Diversity
PD/C
GER
3/B

Men and women in different societies, division of labor, socialization, stratification, political activism and gender construction.
cross-listed ANTHC 30100
prereq: ANTHC 10100 or perm instr.
3 hrs
3 cr.

WGSS 15000 - Introduction to LGBTQI Studies

Pluralism and Diversity
PD/C
GER
2/B

Psychological foundations, sexual development and response patterns; male and female roles; individual and social attitudes, legal issues.

3 hrs
3 cr.

WGSS 17000 - Psychology of Human Sexuality

Pluralism and Diversity
PD/C
GER
2/B
Psychological foundations, sexual development and response patterns; male and female roles; individual and social attitudes, legal issues.  

prereq: PSYCH 10000  
3 hrs  
3 cr.

**Pluralism and Diversity**  
PD/C  
GER  
2/B  

Social, cognitive, hormonal and personality factors in development of gender roles; determinants of behavioral and cognitive gender differences.  

cross-listed PSYCH 19000  
3 hrs  
3 cr.  

**WGSS 25700 - Sex and Gender Roles**  

**Pluralism and Diversity**  
PD/C  
GER  
3/B  

Sex role differentiation: femininity, masculinity, marriage, child rearing.  

cross-listed SOC 25700  
prereq: SOC 10100 or perm instr.  
3 hrs  
3 cr.  

**WGSS 28700 - Masculinities**  

**Pluralism and Diversity**  
P/D C  
GER  
3/B  

The aim of this course is for students to develop an understanding of how knowledge about masculinities changes the way we see most areas of scholarship and daily life. This course engages scholarship on masculinities from the interdisciplinary study of sex and gender systems drawing on feminist literature; we will also study a variety of present day men’s movements and understand how they relate to feminist movements.  

prereq: ENGL 12000  

**WGSS 38700 - Queer Theory**  

**Pluralism and Diversity**  
PD/C  
GER  
3/B
Examination of recent contemporary queer theory and politics in the United States, with particular attention paid to its intersections with feminism, critical race theory, class analysis and religion. Course time will also be dedicated to learning to write effectively about political theory.

prereq: WGS 10000
3 hrs
3 cr.

**Women and Gender Studies: Labor, Migration and Globalization**

**WGSL 20017 - Globalization and Gender**

Globalization has been the subject of intense debate within both academic and journalistic spheres. These debates have questioned whether globalization ‘works for the greater good or not.’ In this course we will examine globalization critically by looking at some of the academic debates. We will examine the claim that globalization has heralded the end of the nation-state, review the implications of globalization on gender and sexuality, and consider the formation of a ‘global middle class.’

prereq: WGS 10000 and ENGL 12000
3 hrs
3 cr.

**WGSL 20600 - Gender and Immigration**

**Pluralism and Diversity**

PD/B

GER

3/B

A study of the historical and contemporary aspects of United States immigration patterns and policy with a particular focus on gender and race.

prereq: WGS 10000 and ENGL 12000
3 hrs
3 cr.

**WGSL 31500 - Work and Society (W)**

GER

3/B

Work in market economies, mechanisms of control and sources of stratification, gender and ethnic factors, role of education and trade unions.

cross-listed SOC 31500

prereq: SOC 10100
3 hrs
3 cr.

**WGSL 32100 - Women and Globalization**
The situation of women from less developed countries with attention to the local and global forces shaping their lives. Topics include migration, the international division of labor, and worldwide adoption. Includes both theoretical approaches and practical issues related to improving women's place in society.

cross-listed ANTHC 32100

 prereq: ANTHC 10100 or perm instr.
3 hrs
3 cr.

WGSL 34500 - Women and Men in the Labor Market

Pluralism and Diversity
PD/C
GER
3/B

Demand for labor, determination of wages and allocation of time between paid and unpaid activities, 'human capital' investments, labor market policy issues.

cross-listed ECO 34500

 prereq: ECO 20000
3 hrs
3 cr.

Women and Gender Studies: Sexualities

WGSS 26600 - Our Bodies, Our Politics

Pluralism and Diversity
PD/C

Sex and sexuality are commonly understood as an innate drive, but as science has recently begun to show, the way we experience sexuality is better understood as a series of connected cultural practices. It is the constructed meaning attached to the act of sex that make up the foundation of our sexuality. This meaning changes across cultures and communities and has historically been a subject of political and legal struggle. From the battle for reproductive rights to laws limiting dildo ownership in Texas, our own bodies and the way we experience them are legislated and controlled.

 prereq: ENGL 12000
3 hrs
3 cr.

Women and Gender Studies: Women in Culture and Society

WGS 20005 - Dominican and Haitian Literature and Culture

3 hrs
3 cr.
WGS 21100 - Women in the 3rd World

Study of the historical, political, social, and economical status of women in the developing world.
3 hrs
3 cr.

WGS 22100 - Women in the Islamic World

Overview of the role of gender in Islam.

Progress Standards

1. Students must maintain a minimum overall GPA of 2.8 and an education sequence index of 2.8.

2. Any student who receives a grade of B-, C+, C or D in student teaching must apply to the department chairperson for permission to reregister for that course, which may be repeated only once.

3. Any student who receives a grade of D+ or D in a course in the education sequence will be required to repeat that course. Students are permitted to repeat a course only once.

4. Any student who receives a grade of F in any course in the pedagogical sequence (including student teaching) will not be permitted to continue in the program.

5. Any student who has more than two grades of IN will be permitted to register for only one course the following semester.

Students will be permitted to register for the second methods course in their subject area only after having met the following requirements:

1. Completion of 18 credits of study in the major subject area;

2. Approval of the major department adviser; and

3. Maintenance of an overall GPA of 2.8 and an education sequence index of 2.8.

Students should register to take the Liberal Arts and Sciences Test (LAST) of the New York State Teacher Certification Examinations during their junior year. Students will not be allowed to enroll in student teaching until their scores on the
LAST have been received by the School of Education. Students who do not pass the LAST at least partly because of low scores on subtest 4 and/or 5 must enroll in a college writing course before being allowed to register for any additional courses.

**Undergraduate Courses**

DANED 30200 - Theory and Practice of Teaching Dance (pre-K-12)

HED 31400 - Health Education for the Classroom Teacher

Psychology Department Description

Psychology is concerned with all aspects of the study of behavioral, developmental and cognitive processes and employs a broad spectrum of approaches, from the social to the biological, to understand them. The Hunter College psychology program reflects the diversity of psychology as a science and a profession. Course offerings range from clinical, social and developmental psychology to experimental psychology, ethology, biopsychology and behavioral neuroscience.

Although Psychology is a large department, students have personal contact with faculty members through an extensive advisement system, involvement in departmental activities and committees, supervised field placement and participation in research laboratories under the guidance of faculty mentors as part of our independent study, honors, BP-ENDURE, MARC (Minority Access to Research Careers), DIDARP (Diversity Institutional Drug Abuse Research Development Program) & MBRS/RISE (Minority Biomedical Research Support/Research Initiative for Scientific Enhancement) programs.

A broad range of applied and research opportunities are available within the department in developmental psychology, social psychology, human adjustment, animal behavior, physiological psychology and abnormal psychology. Departmental affiliations with mental health and community organizations make it possible for students to integrate...
their academic studies of personality, abnormal and child psychology with supervised practical experience by means of field placements and opportunities for applied research. The faculty and facilities of various subprograms within the CUNY Psychology doctoral program and our master's program in General Psychology and in Animal Behavior and Conservation are integral parts of the Hunter College psychology program. These programs provide course concentrations in a number of different areas within psychology and offer undergraduate students research and other opportunities to interact with graduate students. Qualified students in their last semester may be admitted to graduate courses with the approval of the instructor and the department's graduate adviser.

The psychology major, as part of the bachelor's degree program, prepares the student for many career possibilities in psychology, education, social and welfare services, health services and industry and fulfills the course requirements for entering most psychology graduate programs. A background in psychology combined with special training in other disciplines within the college may be especially useful in preparing for careers in human resources, medicine, law, nursing, speech pathology, social work, special education, counseling and music, art and dance therapy.
Our undergraduate and graduate advisers provide students with additional guidance and information regarding career opportunities and graduate study.

Public Policy Program Faculty Advisory Committee

Public Safety, College Regulations and Policies
Re-Admission

Return to General Information

Students who have previously attended Hunter College may apply for readmission to their former status. These applicants should apply for readmission to the college well in advance of the semester for which they wish to return. Priority consideration will be given to applications filed prior to November 1 for spring admission, October 1 for winter, April 1 for summer and May 1 for fall admission. Applications filed after these dates will be considered on a space-available basis.

All students who are readmitted to Hunter College after an absence of 10 or more years must adhere to the undergraduate Catalog requirements in effect at the time of their readmission to Hunter College. They are also required to fulfill their major department's current course/degree requirements.

Applications for degree and nondegree readmission are available on the Hunter College web site www.hunter.cuny.edu or can be obtained at the Hunter College Welcome Center. Students in good academic standing are generally readmitted to the college, whereas students who were dismissed for academic reasons or who left with a grade point average below 2.0 may be considered for readmission on a probationary basis. Readmission on probation is predicated on the expectation that the student will raise his/her grade point average above 2.0 within a reasonable amount of time.

SEEK students who have not been in attendance for four or more semesters and/or have been in the program for 10 semesters will not be readmitted to SEEK. Students who do not wish to return to SEEK

Regulations Published by the Hunter College Senate

Return to Academic Regulations

The Hunter College Senate, with authority granted to it by the CUNY Board of Trustees, determines all academic rules and regulations and approves all curricula. The Senate publishes the Senate News Bulletin to announce changes in rules and regulations. Students should also consult the Office of the Registrar's Web site for any changes in regulations at http://registrar.hunter.cuny.edu. Students who believe that their individual circumstances warrant a variance from the rules and regulations listed in this catalog must proceed to obtain permission from the appropriate college authority. Only through the procedures listed below are such variations permitted.

Students should obtain written documentation for any such variations. Students should be wary of informal advice or undocumented claims that they can be exempt from any college rules.

1. Inquiries concerning college regulations in general should be directed to the Office of Advising Services, Room 1119 East Building. Appeals for administrative exceptions to academic rules and regulations (for example, exceptions to approved academic program loads) are heard in the Office of Advising Services.
2. Inquiries concerning the major should be directed to the departmental adviser in the major department or program and inquiries concerning a minor should be directed to the adviser in the minor department or program.

3. Inquiries concerning the GER Core Requirement and the Foreign Language Requirement should be addressed to the appropriate departmental adviser or an adviser in the Office of Advising Services, Room 1119 East Building. (Note: Students who matriculated prior to fall 2001 and follow the regulations for the Distribution Requirement should also see a departmental adviser or an adviser in the Office of Advising Services.) Students who entered Hunter under the Distribution Requirement and have been absent for 10 years or more must follow the GER or contact Advising Services, Room 1119 East Building, for information on appealing to follow Distribution.

4. Authorization for substitutions for specific Pluralism & Diversity course requirements must be made by the Senate's GER Appeals Committee. Students should consult the procedure for appeals outlined below and go to the Office of the Hunter College Senate, Room 1018 East Building, to obtain the proper forms for filing an appeal.

5. The procedure for Grade Appeals appears below.

6. Every student is obliged to determine that all requirements for the degree have been met before the date of graduation. No changes may be made to the student record transcript after the graduation date. Graduates who wish to take additional courses at Hunter should see the Office of Undergraduate Admissions room 203 Hunter North, to open a new record. Any "STOPS" not cleared by the graduation date will result in the withholding of diploma and transcripts. Incomplete (IN) grades received in the final semester must be completed by the graduation date. If not, an application to graduate for the following semester must be filed with the Degree Audit unit of the Office of the Registrar, room 217 North Building. Additional information on the degree audit for graduation can be found at registrar.hunter.cuny.edu/forms/Degreeaudit/undergrad.htm. Students who are uncertain about the interpretation of any matter may learn under whose authority the matter rests by inquiring in the Office of Advising Services, Room 1119 East Building. This catalog covers the general academic requirements consonant with earning a degree at Hunter College when this catalog went to press in 2012. Students are responsible for knowing all current regulations.

**Religion**

Return to the Faculty of the School of Arts and Sciences

**Ronald Long**, Associate Professor, History; AB Kenyon, MA, MPhil, PhD Columbia

**Wendy Raver**, Lecturer, Religion; MA NYU

**Barbara Sproul**, Associate Professor, Religion; BA Sarah Lawrence, MA, PhD Columbia

Return to Religion

**Religion Program Description**

Return to Religion
In the program in Religion, students examine the nature of religion and the forms its various expressions have taken. Religion is studied as an academic discipline and the program's approach reflects no doctrinal bias. The purposes of the program are to introduce the field of religion in general; to present the thoughts, documents and history of major religious traditions (both Eastern and Western, ancient and modern, missionary and tribal); and to give students insight into specific religious issues and thinkers.

The program in Religion consists of a series of core courses taught by specialists in the field, augmented by other religion courses offered by faculty in 8 participating departments or divisions: Anthropology, Africana and Puerto Rican/Latino Studies, Chinese, Classics, Hebrew, History, Philosophy and Sociology.

The program is divided into four categories of courses: Introduction to the field of religion (basic introductory courses); Theoretical studies in religion (courses focusing on different methodological approaches to the study of religion); Issues in religion (courses dealing with religious experience, faith, ethics, religion and the arts); and Religious traditions (courses in major religious traditions).

Repeating Courses (F repeat)

Return to the Grading System

Repeating Courses

1. Students shall not be permitted to repeat a course in which they have received a grade of A, B, C or CR unless that course has been designated as repeatable in the course description of the college catalog.
2. Students may repeat a course in which a D was received. The credit for that course will be applied toward the degree once, but both the grade of D and the second grade earned are calculated in the grade point average. If the course is part of a sequence, it should be repeated before continuing the sequence.
3. A student who has received a grade of D may re register for the course only with the permission of the department offering the course.
4. If a student receives a failing grade (F, WU, FIN) in a course and then retakes that course and receives a grade of A, B, C or CR, the initial failing grade will remain on his/her academic record, but will no longer be computed into the grade point average. This adjustment to the GPA will occur automatically at the end of the semester when the student has retaken the course and received a grade of A, B, C, or CR. The original course in which the failing grade was received must have been taken after September 1, 1984 and repeated after September 1, 1990.
   - No more than 16 credits may be deleted from the calculation of the cumulative grade point average.
   - If two or more failing grades have been received for the same course and a grade of C, CR or better is subsequently earned, all of the failing grades for that course will be deleted from the grade point average, subject to the 16-credit limit.
   - The 16-credit limit applies cumulatively to courses taken at all CUNY colleges.
   - The repeated course must be taken at the same college as the initially failed course.

EXPLANATION: With the implementation of CUNYFirst, the college now has the facility to implement the F repeat policy automatically the end of each semester and, therefore, it is no longer necessary for the student to complete the form.

REQUIREMENTS FOR GRADUATION: Hunter Core and Major Field of Study
REQUIREMENTS FOR GRADUATION: Hunter Core and Major Field of Study

A student at Hunter College must earn a total of 120 credits to graduate with a bachelor's degree. These 120 credits must include credits to satisfy the Hunter Core Requirement (up to 42 credits) and to satisfy the requirements of a major field of study (major).

ADDITIONAL COURSES: Minor Field of Study, Certificates, and Electives

Credits for the Hunter Core and for a major usually do not add up to 120. A student may reach the necessary 120 credits by completing an additional major, a minor field of study (minor), a certificate program, or by taking elective courses.

MAJORS

A major is a concentration of courses in a particular subject area. A major for a BA usually consists of 24 to 42 credits; a major for a BS is approximately 60 credits. To earn a Hunter degree, students must complete at least half of their major credits at Hunter.

In order to graduate, a student must have a minimum GPA of 2.0 in the courses designated for the major. Many major departments have higher requirements.

All majors offered by Hunter College have been authorized by the New York State Education Department. See Inventory of Registered Programs www.nysed.gov/heds/irps11.html.

Some advanced courses and career opportunities (such as internships) may be available to students only after they have declared a major.

Major Courses and Hunter Core Courses

A course taken to satisfy a major requirement often may satisfy a Hunter Common Core requirement. However, students are not allowed to take more than two courses from one department or program to fulfill CUNY Common Core categories (note: English Composition 1 will not be counted as an English course in this context).

More than One Major

BA students have the option of declaring up to three majors by filing a signed and stamped major declaration form for each approved major. Courses cannot be shared between majors, nor between majors and minors. Majors cannot be changed during the graduating term.

To graduate with more than one major, a student must satisfy the sequence of study for both majors and complete all of the Hunter Core Requirement. The double major must consist of liberal arts courses as defined by the New York State Education Department.

Advising

Hunter College is concerned that students select their major with careful consideration and with good knowledge of the range of options. For students who are nearing the 60-credit point and remain undecided about their choice of major, there are a number of avenues of assistance. Designated faculty advisors in each academic department will inform prospective majors about their undergraduate programs and related career possibilities. Also, the counselors in the Office of Student Services and Career Development Services offer assistance in choosing a major.

Each department has advisers to help students with such matters as course content, when a course is expected to be given, how a course is conducted (lecture, discussion) and the textbook(s) to be used. Students may want to discuss majoring in a subject before they make their official decision or to inquire about graduate schools. Majors should see the department advisers frequently to discuss their interests.
Declaring a Major

To declare or change a major, students should print a Major Declaration Approval form at registrar.hunter.cuny.edu/subpages/forms.shtml, and confer with an adviser in the major department who will review the program of study and must sign and stamp the form.

All matriculated students must declare a major no later than the semester in which the combination of credits earned and credits for which they are currently registered totals 60 or greater. Transfer students entering with 60 credits or more must declare their major before the end of their first semester of attendance at Hunter.

Choosing a Major and TAP Financial Aid

Under New York State guidelines, students who have not declared a major by the 60-credit point, or changed their major/program, by the end of the drop/add period of the semester are ineligible for TAP financial aid.

TYPES OF MAJORS OFFERED FOR THE BACHELOR'S DEGREE

Departmental Majors

BA Degree These are majors concentrated within one department. The major for a BA usually consists of 24 to 42 credits. In order to graduate, a student must have a minimum GPA of 2.0 in the courses designated for the major. Major departments may have higher requirements. Each student should consult the major department for details and also check the department's description of the major in the catalog.

The following are departments and/or programs that offer majors leading to the BA degree.

- Africana and Puerto Rican/Latino Studies
- Hebrew
- Anthropology
- History
- Art
- Italian
- Biology
- Latin
- Chemistry
- Mathematics
- Chinese
- Music
- Classical Studies
- Philosophy
- Computer Science
- Physics and Astronomy
- Dance
- Political Science
- Economics
- Psychology
- English
- Romance Languages
- Film and Media Studies
- Russian
- French
- Sociology
- Geography
- Spanish
- German
- Statistics
- Greek
- Theatre
Interdepartmental Majors

**BA Degree** The following programs leading to the BA degree involve courses in more than one department. For details and names of advisers, see the listing in the departmental section of this catalog. In addition to the interdepartmental fields of study, the college also offers individual interdisciplinary courses in the humanities, social sciences, sciences and mathematics and health sciences.

Archaeology

Religion

Comparative Literature

Urban Studies

Jewish Studies

Women and Gender Studies

Professional and Pre-Professional Majors: BS, BFA and BMus Degrees

These programs, each requiring approximately 60 credits in the area of specialization, lead to the BS, BFA or BMus degree. While BS majors may declare up to two BA minors, it is practically not possible to graduate with a double major combining a BS and BA degree.

The following programs are available. For details and names of advisers, see the listing in the departmental section of this catalog.

Accounting BS (Economics Department) Studio Art BFA

Community Health BS Music BMus

Medical Laboratory Sciences BS Nursing BS

Nutrition and Food Science BS

*As of summer 2009 BS majors may declare up to two BA minors. See the minor department.

THE MINOR

Fulfilling the requirements for a minor is an option for students who want to document abilities in an academic field in addition to their major(s). A minor program consists of a set of courses that are defined as a minor by an academic department or program. A minor encompasses at least 12 and at most 18 credits. It is left to the decision of individual departments or programs whether they offer a set of courses leading to a minor. Interdisciplinary minors may be established between two or more departments.

In order to graduate with a minor in a specific field, a student must maintain a grade point average of at least 2.0 in the courses taken in that field. Minors require that at least one half of the credits be taken at Hunter College. Courses from the minor may be used without limit to satisfy Hunter Core Requirements as well as Writing and Pluralism & Diversity requirements.

It is possible to declare up to two minors. To declare or change a minor, a student should print a Minor Declaration Approval form at registrar.hunter.cuny.edu/subpages/forms.shtml and confer with an adviser in the minor department.

Adolescent Education

Students who want to become teachers in secondary schools must complete the adolescent education sequence of 23 credits and may also have to take some liberal arts courses beyond those required for the Hunter Core Requirement. In order to be admitted to this program, students must apply to the School of Education. See School of Education for the admission process. The adolescent education program leads to initial NYS certification.

ELECTIVE (or OPTIONAL) CREDITS
These are credits needed to complete the degree beyond those taken to fulfill the Hunter Core Requirement and the major and minor. Students may choose as electives any courses for which they have the necessary prerequisites. They may take more courses in their major or minor, study another foreign language they will need for graduate work or explore new horizons. The choice is the student's. No course may be repeated unless it is so stated in the course description in the catalog.

Note: Students may earn credit for the first semester foreign language course (level 101) without completing the second course (level 102), only once.

UNDERGRADUATES TAKING GRADUATE COURSES

Upon the recommendation of the student's undergraduate major or program adviser and with the approval of the adviser of the graduate program offering the course, highly qualified undergraduate degree students may take graduate level courses for credit toward the bachelor's degree. Both the undergraduate and graduate degree adviser must approve the course and provide the student with a letter on department stationery stating that the student may register for the graduate course and the semester being approved. The student then brings the letter signed by the department chairperson or deputy chairperson to the Oasis, Room 217 HN. If it is determined that the courses were not used for the bachelor's degree and the graduate transfer is acceptable, then the student will be charged the difference between the undergraduate and graduate tuition rates at the time the student took the course. No course may be applied to both the undergraduate degree and the graduate degree.

Note: Written permission to use specific graduate level courses toward undergraduate requirement must be submitted by the major and/or minor academic department chairperson or deputy chairperson to the Office of the Registrar, Room 217 HN.

Accelerated Bachelor's/Master's Degrees

These programs enable highly qualified students to earn the bachelor's and master's degrees in a shorter period of time than is required for taking the degrees separately. The following programs are available.

- Adolescent Biology, Grades 7-12 - BA/MA
- Adolescent Chemistry, Grades 7-12 - BA/MA
- Adolescent Earth Science, Grades 7-12 - BA/MA
- Adolescent Mathematics, Grades 7-12 - BA/MA
- Adolescent Physics, Grades 7-12 - BA/MA
- Anthropology - BA/MA
- Biological Sciences with Specialization in Biotechnology - Accelerated BA/MA
- Biological Sciences/Environmental and Occupational Health Sciences - Accelerated BA/MS
- Dance Pre-K - 12 - BA
- Economics - Accelerated BA/MA
- Five-Year BA/MA Program in Environmental Studies and Adolescent Education: Earth Science (Grade 7-12)
- Mathematics or Statistics and Applied Mathematics - BA/MA
- Mathematics Preparation for Adolescent Education (Grades 7-12) - BA/MA
- Medical Laboratory Sciences/Biological Sciences with Specialization in Biotechnology - BS/MA
- Music - BA/MA
- Music/Music Teacher Education Pre-K-12 - BA/MA
- Physics - BA/MA
- Biological Sciences/Environmental and Occupational Health Sciences - Accelerated BA/MS
- Accelerated BS/MS in Nutrition (DPD)
- Sociology/Social Research - Accelerated BA/MS
Retention on the Basis of Grade Point Average and Probation

Return to the Grading System

Retention Based on Grade Point Average

General scholarship is indicated by a college GPA (also referred to as the "cumulative index" or "index"). Each student is expected to know how to figure the GPA and is expected to compute it each semester. Students admitted with advanced standing or transfer credits cannot use previous grades earned at other colleges in the computation of the GPA, but the number of their transfer credits will be added to the total Hunter College credits to determine retention. This means that students must have achieved a given GPA by the time they have completed a certain number of credits or they will be placed on probation and if insufficient improvement is made within a specified period, they will be subject to dismissal for poor scholarship. The standards guiding these decisions are as follows:

Retention and Probation-Undergraduate

The grade point average earned over the total period of a student's attendance indicates the adequacy of each student's scholarship. Below you will find minimum standards for retention and probation. Students who fail to achieve the required academic standards will be placed on academic probation. During this probationary period students who make satisfactory academic progress will continue to maintain their academic standing with the college and their concurrent eligibility for financial aid. Students who fail to achieve the required academic standards while on probation will be dismissed from Hunter College and the university system. Reminder: Academic requirements are the student's responsibility. A student is automatically on probation when he/she fails to achieve the required standards, whether he/she has received notification of such probation from the college or not. Therefore, always be aware of your cumulative GPA. Students on academic probation should visit the Center for Student Achievement, Room 417 Hunter West.

The following table shows the minimum grade point average which each undergraduate student must meet:

<table>
<thead>
<tr>
<th>Total Credits Attempted</th>
<th>Cumulative GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(Index)</td>
</tr>
<tr>
<td>0-12</td>
<td>1.5</td>
</tr>
<tr>
<td>13-24</td>
<td>1.75</td>
</tr>
<tr>
<td>25+</td>
<td>2.0</td>
</tr>
</tbody>
</table>

The academic probation status remains on students' record for the entire semester on which the code was placed. Change of grades will only affect students' probation status at the end of the semester in which the change of grade is posted. For example if a change of grade is submitted mid-semester resulting in the student's GPA being raised to the required GPA the probation code will not be removed. Conversely, if the change of grade results the student's grade point average dropping below the required GPA the student will not be placed on probation mid-semester. The probation code is removed at the end of the semester if the student's GPA reaches the required GPA.

Summer sessions are considered part of the following fall semester, therefore, grades earned during the summer sessions will impact students' probation status at the end of the following fall semester.
Hunter's normal probation appeals procedure will continue to consider individual cases and to make such exception to these policies as circumstances may warrant.

Students dropped from the college may not be readmitted until they have been separated from the university for at least one semester or equivalent calendar time. Students must obtain an application for readmission at the Office of Undergraduate Admissions, Room 203 Hunter North. Students who are separated from the college may not enroll for credit-bearing courses in any unit of the university in any status.

Retention Standards and Grading Definition

Students are to be graded in courses according to the traditional system of letter grades (A, B, C, D and F).

Note: Hunter College implemented plus/minus grading in spring 1996 for undergraduate courses and in fall 1996 for graduate courses. We modified the undergraduate course GPA values and eliminated the grades "C-" and "D+" in spring 2000. These charts have also been updated to include the "WN" grade effective fall 2008.

Retention Standards The Board of Trustees has mandated uniform student retention standards for all the colleges that are part of the City University system. Under these standards, decisions about whether or not students may continue in a CUNY college are made on the basis of the grade point average (GPA). In order to make these decisions, course grades are assigned quality points (which count toward the GPA), as shown in the following table:

<table>
<thead>
<tr>
<th>Quality Points</th>
<th>Grade Definition</th>
<th>GPA Index</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>

**Marithelma Costa**, Professor, Romance Languages (Spanish); BA SUNY (Albany), MA Columbia, PhD CUNY

**Anselmo Di Iorio**, Associate Professor, Romance Languages; BA Grinnell, MA, PhD Pennsylvania

**Maria Luisa Fischer**, Associate Professor, Romance Languages (Spanish); Licenciatura en Literatura General (Chile), PhD Boston

**Maria Hernandez-Ojeda**, Associate Professor, Romance Languages; BA Madrid (Spain), MA, PhD Florida State
Rolando Perez, Associate Professor, MA, SUNY at Stony Brook, PhD, CUNY

Magdalena Perkowska, Associate Professor, Romance Languages (Spanish); BA Jagellon, MA Simon Bolivar, PhD Rutgers

Rosa A. Ramos, Associate Professor, Romance Languages; PhD Pennsylvania

Monica Schinaider, Lecturer, BA Hunter, MPh, CUNY

Julie Van Peteghem, Assistant Professor, Romance Languages; Licenciate, Ghent University, MA, University of Leuven, MA, MPhil, PhD, Columbia

Return to the Department of Romance Languages

Romance Languages Department Description

The Department of Romance Languages at Hunter College offers language, culture and literature courses in French, Italian, Spanish, as well as literature and culture courses in English. Our degrees include the undergraduate major and master's degrees in French, Italian and Spanish. We also offer a Romance Languages major that combines knowledge and understanding of two Romance literatures and cultures. Besides these offerings, the department has recently added a major concentration in Spanish-English/English-Spanish Translation and Interpretation, an expansion of its vision of providing professional training within the context of traditional liberal arts.

In addition, the department is committed to equipping students for professional life: it has continued Hunter's tradition in teacher preparation, and, in conjunction with the School of Education, it sponsors TEP (Teacher Education Program), a selective scholarship-cum-practicum program leading to an MA in Spanish/Education.

Most students majoring in one or two Romance languages pursue careers in education. Others enter careers in the fields of commerce, tourism, interpretation and translation and international affairs, among others.

The Comprehensive Examination may be taken twice. Students may request a third attempt by sending a letter of appeal to the Graduate Faculty Committee.

SciMON (Science and Mathematics Opportunities Network) Network Enrichment Program

SciMON is an innovative institutional initiative out of the office of the Provost designed to inform students about the many extraordinary research and mentoring programs available to those who study science and mathematics at Hunter College. Hunter currently has several large institutional grants that provide unique educational opportunities for students who have been traditionally underrepresented in science and math, particularly members of racial/ethnic minorities, students with disabilities, women, those who are the first generation of their family to attend college, veterans, and students with demonstrated financial need.

These programs offer students critical resources such as mentors, professional development workshops, tuition coverage, stipends, and much more to help them succeed as they pursue their undergraduate degree—and prepare them for graduate study and careers in research, teaching or the health professions.

Some SciMON resources include:

- Helping students determine which research and mentoring programs they may be eligible for
- Information about research experiences available at Hunter and elsewhere and

  - Opportunities for professional growth and development (e.g., presenting a poster at a professional conference, and applying for fellowships)

SciMON offers students an easy way for students to find out about ALL of the research and mentoring programs available at Hunter College via our web portal: www.hunter.cuny.edu/scimon

AstroCom NYC
The AstroCom NYC program is for students who have an interest in pursuing a career in physics and astronomy. The program matches students with long-term mentors to work with peers on real astrophysics research. The program offers training on all aspects of the field, offering summer research experience, a fellowship that stretches through the academic year and summer, a personal research laptop, and support for travel to observatories and conferences around the world. For more information, please visit http://cunyastro.org/astrocom.html.

BP-ENDURE
The BP-ENDURE program is designed to encourage and prepare undergraduate students from diverse backgrounds to enter into and succeed in PhD programs in the neurosciences. The BP-ENDURE program, administered through Hunter College, is conducted in partnership with New York University, Brown University, University of Michigan, and Vanderbilt University to expose BP-ENDURE-trainees to a research-intensive curriculum and an environment of active research. During the academic year students will work with a research mentor at Hunter or NYU and during the summer in one of the partnering institutions. The BP-ENDURE program selects students from both Hunter College and NYU to participate. Hunter students will receive funding in the form of tuition remission and a stipend during the academic year and will also receive summer funding.

CATALYST
The Catalyst Scholarship program provides financial assistance and academic enrichment to students who demonstrate academic excellence in Earth Science, Computer Science, Mathematics, Statistics or Physics. For additional information, please visit www.hunter.cuny.edu/catalyst

DIDARP
Through educational enrichment and research experience, DIDARP (Diversity Institutions' Drug Abuse Research
Development program; formerly "MIDARP") encourages minority students to pursue careers in drug abuse research. Students work in the laboratory of a DIDARP investigator. For additional information, please contact Vanya Quinones-Jenab at vanya.quinones@hunter.cuny.edu or visit www.hunter.cuny.edu/psychology/undergraduate-studies/copy_of_special-undergraduate-research-programs.

HHMI

Hunter/Howard Hughes Medical Institute offers economically disadvantaged undergraduate biology majors the opportunity to work in a faculty member's research lab at Hunter College as Hunter/HHMI Undergraduate Scholars. Hunter/HHMI also offers two summer research internships for undergraduate Biology majors: the Marine Biological Laboratory in Woods Hole, MA, and the Cold Springs Harbor Laboratory on Long Island. For more information, please contact Dan Kleinman at kleinman@genectr.hunter.cuny.edu and/or visit http://www.hunterhhmi.com

IGERT

In partnership with the Memorial Sloan-Kettering Cancer Center, the Integrative Graduate Education & Research Trainee (IGERT) program adds a radiochemistry component to students' doctoral training. The program features include a sub-discipline concentration in nanotechnology, organic, inorganic, analytical, physical, and biochemistry. For additional information, please visit www.hunter.cuny.edu/chemistry/igert

LSAMP

The Louis Stokes Alliance for Minority Participation is an alliance of 17 CUNY colleges and the CUNY Graduate Center. Students participate in faculty research and receive mentoring from senior faculty. For additional information, please contact Angela Padilla at npadilla@hunter.cuny.edu and/or visit nyc.amp.cuny.edu.

MARC

The MARC program trains talented students in biomedical research and encourages them to pursue PhDs in this field. Students are offered a short introductory course in biomedical research, the opportunity to participate in faculty research, and the opportunity to present at the Annual Biomedical Research Conference for Minority Students. For additional information, please visit marcmbrs.hunter.cuny.edu.

MBRS-RISE

The MBRS-RISE program offers research experience and academic and financial support for undergraduate and graduate students at Hunter. For additional information visit rise.hunter.cuny.edu.

McNAIR

The Ronald E. McNair program prepares eligible undergraduates for doctoral studies through involvement in research and scholarly activity. Participants acquire the skills and knowledge required for admission to graduate school and the successful completion of graduate studies. For additional information, please visit www.hunter.cuny.edu/mcnair

McNulty

At the core of the McNulty Scholars program is the determination to create challenging learning environments that will inspire ambitious young people to reach the top ranks of science and math professions. The McNulty Scholars program aims to encourage students who are motivated in science and math to aspire to leadership positions across industry and academia. The McNulty Scholars program endeavors to support students who have a commitment to the advancement of women in math and science. For more information please visit www.hunter.cuny.edu/scimon/mcnulty.

MIND ALLIANCE

The primary goal of the MIND Alliance is to increase the quality and quantity of students with disabilities—-from racial and ethnic minority backgrounds receiving associate and baccalaureate degrees in STEM disciplines and entering the
STEM workforce or graduate school. For additional information, please contact Deborah Brinkley at dbrinkle@hunter.cuny.edu and/or visit www.mystem.org/home/index.aspx.

**NOYCE**

The Noyce program provides tuition and stipends for Biology, Chemistry, Earth Science, Physics or Mathematics majors who intend to teach in middle schools or high schools in New York City. For additional information, please visit www.hunter.cuny.edu/noyce or email noyce@hunter.cuny.edu

**QUBI**

The QUBI gives students majoring in Biology, Chemistry, Computer Science, Mathematics or Statistics the opportunity to add a bioinformatics concentration to their major. Students receive training and mentoring by a multidisciplinary team of research scientists and have access to competitive scholarships, national bioinformatics workshops, and internships at CUNY and neighboring institutions. For additional information, please visit http://www.hunter.cuny.edu/qubi

**RAISE-W**

The RAISE-W (Resource Assisted Initiatives in Science Empowerment for Women) program seeks to address training, productivity, and skills acquisition in all students interested in the empowerment and retention of women in the science, technology, engineering, and mathematics (STEM) fields. Program participants engage in 15-20 hours weekly hands-on research training in laboratory experiments with a faculty mentor. Students also interact with successful scientists during workshop sessions and receive private one-on-one executive coaching. There will be a one-day program orientation during the month of August. Students will have 8 sessions with their executive coach, and must attend semi-annual group meetings (one fall, the other Spring). The coaching sessions are scheduled based on individual student schedules and in consultation with coaches. This is a two year commitment. All students who are engaged in a research lab are eligible to apply.

**Verizon Scholars**

The Verizon Scholars program supports STEM students in their junior and senior years with a special focus on students with a demonstrated financial need who are majoring in engineering, computer science and mathematics. Applications from Biology and Chemistry majors are also accepted. The scholarships can be used to fund tuition, books, and other costs associated with attending college. Scholars attend two receptions during the academic year at which Verizon executives address and advise students and attend a Verizon webinar that offers tips on interviewing for jobs.

**SEEK Faculty**

Return to SEEK Program

*Sandra Granizo Cruz,* Lecturer, BA, MSW Hunter

*Jorge Fuentes,* Assistant Professor, BA City, MS Lehman, EdD Grambling

*Fredericka C. Liggins,* Lecturer, BA Hunter, MS Fordham

*Patricia Hamilton Martin,* Lecturer, BS Southern, MA Hunter, PhD CUNY

*Maria Rodriguez,* Associate Professor, BS Catholic (Puerto Rico), MS, PhD SUNY Albany
Senior Citizens

New York State residents 60 years of age or older may audit undergraduate courses at Hunter College on a tuition-free, space-available basis. Auditors receive neither grades nor academic credit for their courses. Individuals enrolling under this program pay fees totaling approximately $80 each semester. Along with verification of having reached the age of 60 and New York State residency, applicants must file the undergraduate nondegree application to be considered for this program. Individuals over the age of 60 who do not wish to audit their courses may receive academic credit provided the appropriate tuition is paid.

Sexual Assault And Other Crimes Of Violence: Definitions and Background Information

Return to CUNY Sexual Assault Policy

Sexual assault is a crime. Under Article 130 of the New York State Penal Law, it is a sex offense to engage in sexual contact or to engage in sexual intercourse, sodomy or sexual abuse by contact without the consent of the victim or where the victim is incapable of giving consent. Criminal sex offenses are classified in degree according to the seriousness of sexual activity, the degree of force used, the age of the victim and the physical and mental capacity of the offender and victim.

Stalking is also a crime. Under Article 120 of the New York State Penal Law, a person is guilty of stalking when he/she intentionally, and for no legitimate purpose, engages in a course of conduct directed at a specific person, and knows or should know that such conduct is likely to cause fear of material harm to the health, safety or property of the victim. Examples of such conduct are following, telephoning or initiating communication or contact (i.e. via email) with the victim. Dating and domestic violence is controlling, abusive, and aggressive behavior in a romantic relationship, and often involves illegal conduct on the part of the aggressor, including sex offenses, stalking and/or harassment.

A. Sexual Assault
Sexual assault is a crime of power, aggression and violence. Terms such as “date rape” and “acquaintance rape” tend to minimize the fact that the act of rape, or any sexual assault, is a serious crime.

There is never an excuse or a reason for a person to rape, assault or even touch another person’s private parts without consent. The impact on survivors of such an attack can cause severe and lasting physical, mental and emotional damage.

- **Who is a perpetrator?** Many people think that sexual assaults are only perpetrated by vicious strangers on dark, deserted streets. In fact, studies indicate that between 80 and 90 percent of all people who have been raped know their perpetrator(s). This is called “date rape” or “acquaintance rape.” “Date rape” is not a legally distinct or lesser category of rape. It refers to a relationship and situational context in which rape occurs on a date. Rape or any sexual offense, whether on a date or not, is the same criminal offense involving the same elements of force, exploited helplessness or underage participation. With sexual assaults where the victim knows the perpetrator, alcohol use is often involved on the part of either the victim or the perpetrator. However, a sexual assault is still a crime regardless of the intoxication of the perpetrator or the victim.

- **Who is a victim?**

Anyone can be a victim, regardless of gender, age, race, sexual orientation, religion, ethnicity, class or national origin. Though women and girls are primary targets of these crimes, men and boys are sexually victimized too, and have been found to suffer the same aftermath as women. Regardless of whether the victim was abusing alcohol and/or underage, she or he is still the victim of the sex offense.  

- **When is there lack of consent?** Under New York law, lack of consent to a sexual contact may be demonstrated in the following ways: (1) forcible compulsion including the use of physical force or threat (express or implied) which places the person in fear of physical injury to self or another; (2) incapacity to consent on the part of the victim; (3) circumstances in which the victim does not expressly or impliedly acquiesce in the actor’s conduct; or (4) circumstances in which the victim clearly expressed by words or actions that he or she did not consent to engage in such sexual act and a reasonable person would have understood such person’s words or actions as an expression of lack of consent to such conduct.  

A person is deemed incapable of giving consent if she/he is (a) under the age of 17, (b) mentally incapacitated (which may include incapacity due to the victim’s ingestion of alcohol or drugs), (c) physically disabled or (d) physically helpless (asleep, unconscious or for any other reason physically unable to communicate unwillingness to act, which may also include incapacity due to the victim’s ingestion of alcohol or drugs).

- **Who is responsible for a sexual attack?**

In the absence of consent, the attacker is always responsible for having committed the sexual assault regardless of the victim’s appearance, behavior, or conduct on previous occasions. An attacker cannot assume that the way a person dresses or acts is an invitation for sexual advances. A person may welcome some forms of sexual contact and be opposed to others. The more impaired a person is from alcohol or drugs, the less likely she/he can give consent; having sex with someone who is “passed out” or sleeping is rape. And regardless of previous sexual activity, if someone refuses sexual contact, the failure to respect that limit constitutes non-consensual sex.

- **Who can prevent a sexual attack from occurring?**

Every member of the CUNY community, by recognizing situations where sexual violence occurs, by acknowledging that anyone can be a victim of sexual assault, and by becoming active, positive and responsible community members who look out for other members of the CUNY community.

**B. Stalking**

Stalking generally refers to harassing or threatening behavior that an individual engages in repeatedly, such as following a person, appearing at a person’s home or place of business, making harassing calls, or leaving written messages or objects. Unlike other crimes, which normally consist of a single illegal act, stalking is a series of actions that, when taken individually, may be perfectly legal. For instance, sending a birthday card or flowers or standing
across the street from someone’s house is not a crime. When these actions are part of a course of conduct that is intended to instill fear in a victim, however, they may be considered illegal behavior.

• Who is a stalker?

Nearly 90% of stalkers are male, and most stalkers know their victims (60% are current or former intimate partners.) Most stalkers are in their late teens to middle-aged, and stalkers may come from every socio-economic background. Stalkers are motivated by obsession and a desire for control, which stem from either a real or imagined relationship with the victim.

• Who is a victim of stalking? In stalking cases, more than half of the victims are between 18 and 29 years old and 75% of victims are female. Male victims are stalked by male and female offenders at the same rate, and tend to be stalked by strangers and acquaintances rather than intimates. According to a 2000 study, more than 13% of college women indicated that they have been stalked in one college year.

• What are the consequences of stalking? Stalking often causes pervasive, intense fear and can be extremely disruptive for the victim. In addition to presenting a continual threat of physical and/or sexual violence, the stalker can erode the victim’s sense of safety and personal control. Stalking causes victims to miss work and school. And stalking in dating and domestic violence cases is often related to more severe violence.

• Is stalking a common occurrence on college campuses? Research shows that stalking has become a common occurrence on today’s college campuses. Some of the very aspects that make campus life appealing aid the potential stalker. The campus is a closed environment where it is easy to determine a student’s schedule; it is a highly social atmosphere where stalking behavior may be confused with positive, romantic attention at first; student movement through the campus is predictable, and access to academic buildings may be quite easy. One can easily find information about a selected student through the campus directory, including the student’s address, telephone number and email address. As a result of obtaining students’ email addresses, cyber-stalking has become common, which can lead to other forms of stalking and is equally as frightening for victims.

C. Dating and Domestic Violence

Dating and Domestic violence is a pattern of abusive behavior in any relationship that is used by one partner to gain or maintain power and control over another intimate partner. Domestic violence can be physical, sexual, emotional, economic, or psychological actions or threats of actions that influence another person. This includes any behaviors that intimidate, manipulate, humiliate, isolate, frighten, terrorize, coerce, threaten, blame, or injure someone.

Intimate partner includes persons legally married to one another; persons formerly married to one another; persons who have a child in common, regardless of whether such persons are married or have lived together any time; couples who live together or have lived together; or persons who are dating or who have dated in the past, including same sex couples.

Some of the forms of domestic and dating abuse include:

• Physical Abuse: Hitting, slapping, shoving, grabbing, pinching, hair-pulling, biting, etc. Physical abuse also includes denying a partner medical care or forcing alcohol and/or drug use.

• Sexual Abuse: Coercing or attempting to coerce any sexual contact or behavior without consent. Sexual abuse includes, but is certainly not limited to marital rape, attacks on sexual parts of the body, forcing sex after physical violence has occurred, or treating one in a sexually demeaning manner.

• Emotional Abuse: Undermining an individual’s sense of self-worth and/or self-esteem. This may include, but is not limited to, constant criticism, diminishing one’s abilities, name-calling, or damaging one’s relationship with his or her children.
• **Economic Abuse**: Making or attempting to make an individual financially dependent by maintaining total control over financial resources, withholding one’s access to money, or forbidding one’s attendance at school or employment.

• **Psychological Abuse**: Causing fear by intimidation; threatening physical harm to self, partner, children, or partner’s family or friends; destruction of pets and property; or forcing isolation from family, friends, or school and/or work.

Dating and Domestic violence can happen to anyone regardless of race, age, religion, or gender, and affects people of all socioeconomic backgrounds and education levels. Domestic violence occurs in both opposite-sex and same-sex relationships and can happen to intimate partners who are married, living together, or dating. Dating and domestic violence can be difficult to identify because violence can occur in cycles that alternate with the perpetrator’s expressed devotion and love for the partner. This is all part of the cycle of manipulation and control.

<td>A person is guilty when he or she intentionally, and for no legitimate purpose, engages in a course of conduct directed at a specific person, and knows or reasonably should know that such conduct is likely to cause reasonable fear of material harm to the physical health, safety or property of such person, a member of such person’s immediate family or a third party with whom such person is acquainted; or causes material harm to the mental or emotional health of such person, where such conduct consists of following, telephoning or initiating communication or contact with such person, a member of such person’s family or a 3rd party with whom...</td>
<td>Is a class B misdemeanor, with penalties up to three months in jail.</td>
</tr>
</tbody>
</table>
such person is acquainted and the actor was previously clearly informed to cease that conduct.

**Stalking in the third degree**
(PL § 120.55)

A person is guilty when he/she commits the crime of stalking in the 4th degree against three or more persons, in three or more separate transactions, for which the actor has not been previously convicted, or with intent to harass, annoy or alarm a specific person, engages in a course of conduct directed at such person which is likely to cause such person to reasonably fear physical injury or serious physical injury, the commission of a sex offense against, or the kidnapping, unlawful imprisonment or death of such person or a member of such person’s family; or commits the crime of stalking in the 4th degree and has been previously convicted within the preceding ten years of stalking in the fourth degree.

Is a class A misdemeanor, with penalties up to one year in jail.

**Stalking in the first degree**
(PL §120.60)

A person is guilty when he/she commits the crime of stalking in the 2nd or 3rd degree and in the furtherance thereof, he/she intentionally or recklessly causes physical injury to the victim, or commits a class A misdemeanor defined in Article 130, a class E felony defined in section 130.25, 130.40, or 130.85, or a class D felony defined in section 130.30 or 130.45.

Is a class D felony, with penalties up to 7 years in prison.

For a full listing of all sex offenses and the definitions of sex offenses, please refer to:

http://public.leginfo.state.ny.us/menugetf.cgi?COMMONQUERY=LAWS

Crime statistics are reported annually by every college pursuant to the Jeanne Clery Act. This information can be obtained from your campus Public Safety Department.

In addition, “Megan’s Law” protects our communities and universities by mandating that convicted sex offenders register with the State through the Division of Criminal Justice Services. Such information can be obtained from your local police precinct, and from the Division of Criminal Justice Services website:

http://www.criminaljustice.state.ny.us/ (for level 3 offenders.)

**Sexual Harassment Policy and Procedure**

Return to Public Safety, College Regulations and Policies

Sexual harassment is illegal. It is a form of sex discrimination in violation of Title VII of the 1964 Civil Rights Act, Title IX of the Education Amendments Act if 1972 and the official policy of The City University of New York. The City University of New York issued a policy in 1982 which was revised and reissued in January 2005.

The policy prohibits sexual harassment of faculty, staff and students:
Policy Statement

It is the policy of The City University of New York to promote a cooperative work and academic environment in which there exists mutual respect for all University students, faculty, and staff. Harassment of employees or students based upon sex is inconsistent with this objective and contrary to the University's non-discrimination policy. Sexual harassment is illegal under Federal, State, and City laws, and will not be tolerated within the University.

The University, through its colleges, will disseminate this policy and take other steps to educate the University community about sexual harassment. The University will establish procedures to ensure that investigations of allegations of sexual harassment are conducted in a manner that is prompt, fair, thorough, and as confidential as possible under the circumstances, and that appropriate corrective and/or disciplinary action is taken as warranted by the circumstances when sexual harassment is determined to have occurred. Members of the University community who believe themselves to be aggrieved under this policy are strongly encouraged to report the allegations of sexual harassment as promptly as possible. Delay in making a complaint of sexual harassment may make it more difficult for the college to investigate the allegations.

A. Prohibited Conduct

It is a violation of University policy for any member of the University community to engage in sexual harassment or to retaliate against any member of the University community for raising an allegation of sexual harassment, for filing a complaint alleging sexual harassment, or for participating in any proceeding to determine if sexual harassment has occurred.

B. Definition of Sexual Harassment

For purposes of this policy, sexual harassment is defined as unwelcome sexual advances, requests for sexual favors, and other oral or written communications or physical conduct of a sexual nature when:

1. submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment or academic standing;
2. submission to or rejection of such conduct by an individual is used as a basis for employment or academic decisions affecting such individual; or
3. such conduct has the purpose or effect of unreasonably interfering with an individual’s work or academic performance or creating an intimidating, hostile or abusive work or academic environment.

Sexual harassment can occur between individuals of different sexes or of the same sex. Relationships between individuals of unequal power (such as between faculty member and student or employee or, supervisor and employee), have the potential to be coercive and CUNY policy specifically addresses intimate relationships between faculty, student or employees or between supervisors and employees generally prohibiting or discouraging such relationships. The CUNY Policy Against Sexual Harassment can be found at the following link:
http://www.cuny.edu/about/administration/offices/ohrm/policies-procedures/finalnondeiscrimpolicy121213.pdf.

Sexual harassment may also occur between individuals of equal power (such as between fellow students or co-workers), or in some circumstances even where it appears that the harasser has less power than the individual harassed (for example, a student sexually harassing a faculty member). A lack of intent to harass may be relevant to, but will not be determinative of, whether sexual harassment has occurred.

To implement CUNY's policy, Hunter College has created a Sexual Harassment Awareness and Intake Committee. The Committee is responsible for reviewing all complaints of sexual harassment; and for making efforts to resolve those complaints informally, if possible. When informal resolution is not possible, the committee coordinator will fully investigate the complaint and report the results of the investigation to the college president (and dean of students, if the accused is a student).
Any student or other member of Hunter College may report allegations of sexual harassment to any member of the Sexual Harassment Awareness and Intake Committee. The names and contact information for the committee members are available in the coordinator's office, departments and offices in the college and the college website. The complaint will be promptly investigated and will be handled as confidentially as possible. Retaliation against complainants is specifically prohibited. Students, faculty or staff who are found, following applicable disciplinary proceedings, to have violated the CUNY Policy Against Sexual Harassment are subject to various penalties, including termination of employment and permanent dismissal from the university.

The official policy and procedures can be found in every department of the college as well as on the college's website. Additional information on the Sexual Harassment Awareness and Intake Committee is available in the Coordinator's office. The Committee Coordinator is:

Special Academic Programs

Honors Programs

Pre-Professional Programs

Other Opportunities Program

Special Admissions Programs and Categories for Freshmen

CUNY Macaulay Honors College at Hunter College

The Hunter Honors College attracts students with outstanding academic records who seek intellectual challenges in a supportive environment. Using the undergraduate online application available through the CUNY Web site (www.cuny.edu/apply), students select the Honors College and then indicate Hunter College as their desired campus.

A student must enter the Honors College as a first semester freshman and may seek admission through either Early Decision (application by November 1) or regular decision (application by December 1). For more information on the Hunter Honors College, see Special Academic Programs of this catalog or inquire at the Honors College Office, Room 140 Hunter North, (212) 650-3556.

Early Admission

Students with superior high school records may apply for admission to the college upon completion of the third year of high school. An interview with the Admissions Committee is required, as well as a high school average of at least 90%, minimum SAT scores of 600 verbal and 600 math and three high school recommendations. Students are admitted only in the fall semester. Applications must be filed directly with the Hunter Admissions Office before April 1.

ESL (English as a Second Language) Designation

Students whose secondary school education includes at least one year in a high school where a language other than English is the primary language of instruction are designated as ESL students. ESL students who are admitted to Hunter may be permitted to register even if they received failing scores on the CUNY skills assessment tests in reading and/or writing. (A passing score on the CUNY Math Assessment Test (CMAT) is required for ESL designation.

These students are tested for placement in appropriate developmental courses and receive special advisement regarding program planning. ESL students may take developmental English courses for two semesters and are permitted to enroll at Hunter for an additional two semesters before being required to pass the skills test. Additional information about placement and program planning for ESL students is available at the Office of Student Services.
SEEK Program (Search for Education, Elevation and Knowledge)

SEEK is a higher education opportunity program at the senior (four year) CUNY colleges. It was established to provide comprehensive academic support to assist capable students who otherwise might not be able to attend college due to their educational and financial circumstances. Students are admitted without regard to age, sex, sexual orientation, race, disability, or creed. The SEEK Program at Hunter provides individualized educational and support services. Eligible participants receive a stipend to help defray educational expenses. Students apply for entry to the SEEK Program through the standard freshman admission process. See the Financial Aid section for additional information on requirements for admission to the SEEK Program and visit the program's website, http://www.hunter.cuny.edu/seek.

Student Eligibility

To be eligible for federal and state aid, a student must be a United States citizen or an eligible non-citizen who is making satisfactory academic progress toward a degree. Students who have defaulted on a loan or owe a repayment of a federal grant at any post secondary school must make satisfactory repayment arrangements with that institution before they will be eligible to receive aid at Hunter College.

Satisfactory Academic Progress

All recipients of financial aid must be making satisfactory progress toward a degree. There are two different formulas used to make this determination, one for state aid and another for federal aid.

State Program Eligibility

In order to receive assistance from the Tuition Assistance Program (TAP) and the Aid for Part-time Study (APTS) Program, students must complete a minimum number of credits the prior semester, complete the appropriate number of cumulative credits and have the appropriate grade point average at the beginning of each semester of state-supported study. The chart below outlines these requirements. For example, to receive the fifth payment of TAP, a student would have to have completed 9 credits the prior semester for a total of at least 31 cumulative credits with a minimum grade point average of 2.00.

Waiver of Academic Standing Requirements

Students who become academically ineligible to receive assistance from state programs because of an unusual circumstance for which documentation can be provided (e.g., illness) may apply for a onetime waiver of the Satisfactory Academic Progress requirements. For further information, contact the Financial Aid Office at (212) 772-4882.

To qualify for a New York State Tuition Assistance Program (TAP) award, undergraduate students must meet the applicable New York State Satisfactory Academic Progress (SAP) standards. Students are evaluated based on when they received their first TAP payment and whether or not they are in a remedial program. The following charts explain
the New York State Education Department guidelines which detail the SAP standards a student must meet to be certified for each TAP payment.

The following TAP academic progress and program pursuit charts are for undergraduate students

To qualify for a New York State Tuition Assistance Program (TAP) award, undergraduate students must meet the applicable New York State Satisfactory Academic Progress (SAP) standards. Students are evaluated based on when they received their first TAP payment and whether or not they are in a remedial program. The following charts explain the New York State Education Department guidelines which detail the SAP standards a student must meet to be certified for each TAP payment.

The Hunter College traditional academic retention standards remain in effect and supersede any other grade point average (gpa) requirements. The following SAP standards are only used to determine TAP eligibility.

### 1981 SAP Standards - First TAP award before summer 2006

#### C Average Requirement for State Funded Student Financial Aid Eligibility Effective Fall 1996

Effective with the 1996-97 academic year, Education Law section 661 requires that a student have at least a cumulative C average (2.0 on a 4.0 scale, or the equivalent) after the student has completed the second academic year of study. In practice, this requirement is interpreted to mean that a student must have a C average or better after the student has accumulated 24 payment points (received 4 semester payments or the equivalent) to be eligible for further awards. In other words, a student seeking a fifth semester award payment must have a C average.

#### Transfer Students

Institutions generally accept transfer courses in which grades of C or better were earned. Therefore, students with transferable credits who have already received four semester payments are presumed to meet the C average requirement and are eligible for the initial term at the new institution.

To determine the eligibility of transfer students, an institution may elect to include, for financial aid purposes, the grades earned for courses accepted in transfer providing this policy is applied to all financial aid applicants.

#### Readmitted Students

A student readmitted to an institution attended previously who has received two or more years of award payments must have a C average or better to receive further State student aid. The student's cumulative grade point average would be based on prior grades earned at the institution.

#### New Course Repeat Rule for NY State Financial Aid

As of May 1987, if a student repeats a course in which a passing grade acceptable to the institution has already been received, the course cannot be included as part of the student's minimum full time or part-time course load for financial aid purposes. When such courses are included in meeting the minimum requirement, they render the student ineligible for a State award. In the following instances, repeated courses may count toward full-time or part-time study: (1) when a failed course is repeated; (2) when a grade received is passing at the institution but is unacceptable in a particular curriculum; and (3) when a course may be repeated and credit earned each time.
A student who earned a passing grade in a course but wishes to repeat the course in the hopes of improving the grade and overall grade point average cannot count the repeated course as part of the minimum course load.

**Notice to students changing their enrollment status or withdrawing after the third week of classes:**

If you change your enrollment status or withdraw after the third week of classes, your financial aid may be affected. Each financial aid program is different. Please obtain an Application to Withdraw form from the OASIS, Room 217 Hunter North and read it before withdrawing from class(es).

**Federal Program Eligibility**

The federal Satisfactory Academic Progress standard applies to students seeking assistance from all federal student financial aid programs available at Hunter College. To be eligible for federal aid, an undergraduate student must achieve at least the GPA required for probationary status at Hunter after two years of enrollment at the college; at least a C average or academic standing consistent with the requirements for graduation; and must also accumulate credits toward the degree according to the following standards:

1. Attempted credits are not more than 150% of the credits normally required for completion of the degree. — and —
2. Accumulated credits are equal to or greater than two-thirds of the cumulative credits attempted at the institution.

If the standard in paragraph B is not met, eligibility may be retained by meeting conditional standards:

3. For students who are pursuing a baccalaureate degree, the accumulated credits must be equal to or greater than (75 percent times the cumulative credits attempted) minus 18.

Students will be measured against the satisfactory academic progress standard at the end of the spring term to determine eligibility for receipt of Title IV student financial assistance for the upcoming year.

This chart would be used by a student pursuing a BA degree requiring 126 credits. In this example, if you have attempted 36 credits, you must successfully complete at least 24. To maintain conditional eligibility, you must successfully complete 9 credits.

**Student Services**

**Return to Services for Students**

**The Office of Advising Services**

1119 East  
(212) 772-4882  
http://www.hunter.cuny.edu/studentservices/advising

Academic advising at Hunter College teaches students the information, skills and competencies necessary to make informed choices about their college experience. Through a variety of venues, including orientation, individual advising, group advising, and electronic communications, advisers help students to understand academic requirements,
clarify their goals, and devise action plans. Realizing that connections to the Hunter community contribute to student success, Advising Services staff members prepare students to engage with faculty, staff and fellow students. In addition to the services listed above, resources in the Office of Advising Services include the First Year Advising and Orientation Program, Transfer Programs, the Sylvia E. Fishman Student Center, and the Center for Student Achievement.

First-Year Advising and Orientation

First-Year Advising and Orientation facilitates the first-year student's transition into Hunter College. A comprehensive orientation introduces students to the college and prepares them to succeed inside and outside the classroom. Each new student is then assigned a professional academic adviser who provides guidance and support during the student's first year. Please see our Web site for more information at www.hunter.cuny.edu/studentservices/fao

Transfer Programs

Through advising services and orientation, the office of Transfer Programs promotes student transition into Hunter College. At orientation, new transfers learn about academic requirements, course transferability, and paths to successful degree completion. Academic advisers are available to help transfer students understand degree requirements, develop meaningful short- and long-term academic plans, explore majors and locate critical resources. Please see our Web site for more information at http://www.hunter.cuny.edu/studentservices/transfers.

Career Development Services

805 East
(212) 772-4850
www.hunter.cuny.edu/studentservices/cds

The Office of Career Development helps Hunter College students to compete in the job market through a variety of services:

**Career Counseling** Career counseling is an interactive process where students are assisted in discovering the career that will provide optimum personal satisfaction. Counselors meet with students individually and in small groups to explore and evaluate the student's academic strengths and concentration, additional training, work history, interests, skills and personal traits. Counselors help uncover underlying factors that may impede progress toward decision making. Counselors also help the student develop a resumé, interviewing skills and job search skills. Alumni are also encouraged to use the services for assistance in job search and career change.

**Internships** Internships provide the opportunity to gain pre-professional work experience in a setting related to a student's major course of study. Interns work in corporations, government agencies and nonprofit organizations. In addition to gaining work-related skills, students develop contacts for future employment and acquire job related experience to enhance their resume and interview presentation and earn academic credit or stipends.

**Employer Recruiting** Representatives from corporations, banks, brokerage houses, accounting firms, insurance companies, retail stores, computer and software companies, nonprofit organizations and government agencies recruit on and off campus in the fall and spring by interviewing students for a variety of professional positions.

**Employer Visits** Employers and successful professionals, including alumni, come to Hunter to discuss career opportunities in their respective areas. Panelists explore current trends in various fields, offer suggestions for preparing
for the competitive job market and describe their own careers. From these experiences, students learn about specific companies, their products and services, hiring trends and career opportunities.

**The On Campus Recruiting Program** Graduating seniors have the opportunity to enroll in the On Campus Recruiting Program. Approved resumes are made available to participating employers for review. Employers select those candidates in whom they are interested and conduct interviews on and off campus.

**CAREERHUNTER Job and Internship Data Base** Businesses, industries, government agencies, schools, hospitals and nonprofit organizations post part- and full-time jobs and internships with the Career Development Services office. Students and alumni can register in CAREERHUNTER, create a profile, upload a resume, access the listings, and send the resume directly to employers.

**Career Resource Library** A wide variety of career information is available: reference books, periodicals, directories and guide books on career planning and job search preparation and strategies.

**Counseling & Wellness Services**

**Counseling Services** offers free and confidential assessment and short-term counseling to enrolled Hunter College students. Professional counselors assist students with personal and emotional difficulties that may interfere with academic progress and success. Additional services include crisis intervention and referrals to community agencies and resources. Counselors are also available to provide consultation services to the entire Hunter College community.

1123 East (212) 772-4931
hunter.cuny.edu/studentservices/pcs

**Wellness Services** maintains two divisions: *Health Services* and *Health Promotion & Education*.

*Health Services* is responsible for processing student immunization records, and also offers a variety of preventative health screens and access to health-related resources. In addition, Health Services distributes physical activity cards (PAC) required for use in all recreation programs and facilities.

307 North 212.772.4800

*Health Promotion & Education* aims to enhance and advance the health and wellness of students in support of personal and academic success. Health Educators conduct outreach to educate students about health-related topics and the relationship between mental health and wellbeing and academic functioning and success, equip students with knowledge and skills to make informed and proactive decisions regarding their health, and assist in developing healthy lifestyle habits.

307 North 212.772.4909

**Office of AccessABILITY (for Students with Disabilities)**
In compliance with the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1975, the Office of AccessABILITY ensures the availability of variety of accommodations and services for students with documented disabilities or medical conditions who are currently registered at Hunter College. Disabilities include (but may not be limited to):

- Medical and psychological conditions, learning disabilities, deafness and hard of hearing, visual impairment, mobility impairment and other conditions that cause you to have mobility difficulties or result in your using a cane or wheelchair.

- Assistance to students with temporary disabilities due to an accident or short-term health conditions is also available. To be eligible for reasonable accommodations, it is necessary for students to provide a written statement with supporting documentation of a disability from a "qualified professional" (physician, psychiatrist, psychologist, or clinical social worker).

Under the auspices of the Office of AccessABILITY, the Access and Technology Center, Room 205 Thomas Hunter Hall, is a resource facility for students with disabilities. The center houses equipment with adaptive software and hardware technologies.

For more information, please call (212) 772-4857/VRS (646) 755-3129 or go to our Web site.

The Section 504 Coordinator at Hunter College, Professor Tamara Green is responsible for enforcement of the provisions of Section 504. She may be contacted in 1429 Hunter West, (212) 772-5061. There is a 504 Grievance Procedure for students with disabilities at Hunter College. Students may obtain the necessary form, which contains instructions for filing, from the Office of Student Services in Room 1119 Hunter East. Students with disabilities at the School of Social Work may contact the director of admissions at (212) 396-7574 for assistance.

**International Students Office**

Room 1109 Hunter East; (212) 772-4864, E-mail: intlss@hunter.cuny.edu
Web site: http://www.hunter.cuny.edu/studentservices/is and for more information, visit the International Students online tutorial: https://ww3.hunter.cuny.edu/is/tutorial/

The International Students Office (ISO) provides vital immigration related information to all international students, including F-1 and J-1 Exchange Visitor statuses or visa holders and other students with questions about their statuses to help them to learn immigration status maintenance. The ISO refers all international students to Academic Advising for timely graduation from Hunter College. The office is an important source of information regarding immigration matters, such as the requirements for compliance with the Student Exchange and Visitors Information System (SEVIS). The ISO issues SEVIS I-20 or DS2019 forms to all newly admitted international students. It also provides individualized advising and holds small group discussions throughout the academic year on such topics as employment options, immigration law, tax issues, and adaptation to both the United States (U.S.) educational systems and to the U.S.

**Children's Learning Center**

The Children's Learning Center at Hunter College offers a rich, developmentally appropriate environment for your child while you attend classes. The staff members are highly qualified to provide experiences and activities necessary for your child's development. The Center has two programs: Preschool (aged 2.5 -5), and After-school (aged 6-12). Any Hunter student who is the parent or legal guardian of a child is eligible for this program. Students can be part time, full time, undergraduate, or graduate. Fees operate on a sliding scale and financial assistance is available to eligible students. Apply in person or online.
The Sylvia E. Fishman Student Center

417 Hunter West; (212) 650-3282
www.hunter.cuny.edu/studentservices/sefsc

The Sylvia E. Fishman Student Center was created to provide a safe, friendly, educational, and supportive environment for all students and to help them create a strong foundation for their education. It offers programs, activities and services to enhance the academic experience for students. One of these is the Peer Advising Leadership Program, where trained student peer advisors provide assistance on understanding the Hunter's general liberal arts requirements and the many academic resources offered at the college. Many of the Peer Advisors are also involved in a variety of campus activities, such as officers of student clubs, and members of athletic teams, social, and academic honor societies. They offer a unique perspective on what it is like to be a Hunter student. In addition to academic advising, the Center is often reserved by other student services areas to provide information about their programs. These include sessions on career exploration, internship opportunities, Pre-Law information, and other student-based events. For more information see our Web site.

Center for Student Achievement

417 Hunter West; (212) 772-4890
http://www.hunter.cuny.edu/studentservices/csa

The Center for Student Achievement provides students with opportunities to develop and enhance their study methods. The Center provides assistance to students on academic probation. By offering programs such as Project Success and the Academic Success Coaching program we give students the opportunity to improve their academic skills. Project Success is a weekly seminar for students on academic probation, while the Academic Success Coaching program offers students who are academically at-risk individual meetings with a trained staff member. For more information about the services and resources, visit our Web site.

Campus Housing

Department of Residence Life

Residence Hall Office: (212) 481-4310
www.hunter.cuny.edu/livingathunter

Hunter College residences have the unique opportunity to enrich their learning experiences by becoming involved in the Residence Life community. Residents are involved in a number of social, educational, and cultural programs designed to enhance their out-of-the-classroom education and to promote positive relationships within the residences and the community at large.

Only a limited number of Hunter's 23,000 students have the opportunity to live in our residences. Scholar groups are given priority access, and are assigned to a specific residence to better build community among them.

The Brookdale Residence Hall is located at 425 East 25th Street and houses approximately 700 undergraduate students. All rooms are single occupancy and contain basic furnishings. Each floor has a main lounge, bathroom facilities and a kitchen.
97th Street Residence is located at 1760 3rd Avenue at 97th Street, and houses 99 undergraduate residents. This updated residence hall is equipped with everything you would expect plus a concierge, high tech gym, laundry facility.

92nd Street Residence is located at 1395 Lexington Ave (at 92nd Street), and houses 36 undergraduate residents. This location offers a full, complimentary membership to the 92nd Street's May Center for Health, Fitness & Sport, two weight-training rooms, two gyms, an indoor track, racquetball courts, steam rooms, saunas and a 25-yard ozone-purified swimming pool. Residents can also attend 92nd Street programs, events and classes at a discount.

Sports, Recreation and Fitness

Hunter Athletics
B317 Hunter West; (212) 772-4782
www.hunter.cuny.edu/athletics

The Hunter College Athletic program is the premier benchmark intercollegiate program in the New York Metropolitan region and City University of New York Athletic Conference (CUNYAC). With 18 sponsored men's and women's teams, the Hawks compete on the NCAA Division III level with a commitment to athletic and academic progress and development each year. Student-athletes benefit from an outstanding and supportive academic environment, highly qualified coaches and superior facilities for competition and practice. Over the last fifteen years Hunter College has won 10 CUNY Athletic Conference Commissioner's Cups, an award presented to the best athletic program in the conference. Since 1990, Hunter Athletics has also won 125 CUNYAC Championships, joining a dozen other athletic programs to reach the 100 championship pinnacle.

The athletic program also maintains an impressive average GPA of higher than a 3.0 among student athletes each year. Furthermore, 60% of student-athletes boast a 3.0 GPA or better.

Hunter College offers a multi-million dollar athletics facility which is equipped with "state of the art" renovated competition and practice gymnasiums, wrestling room, fencing/yoga room, men's and women's locker rooms, swimming pool, athletic training room, state-of-the-art weight room, racquetball courts and the smart classroom for student use. The Brookdale campus also houses a swimming pool, weight room, gymnasium, tennis courts and bowling alley for official athletic and recreation use. For more information on the Hunter Athletic program, log onto www.huntercollegeathletics.com or call 212-772-4782.

Women's sports include basketball, cross country, fencing, indoor track, outdoor track, softball, swimming, tennis and volleyball. Men's sports include basketball, cross country, fencing, indoor track, outdoor track, soccer, tennis, volleyball and wrestling.

Recreation, Fitness and Intramurals

B315 Hunter West; (212) 772-4912

Hunter College's recreation, fitness and intramural programs are designed to promote physical fitness, relaxation, wellness and enjoyment for members of the college. Open to students, faculty, staff and alumni, the Recreation and Intramural and Fitness programs are flexible and provide for a variety of healthful and enjoyable experiences at all levels of skill and participation. Activities offered include a fitness center, open swimming, basketball, volleyball, tennis and racquetball. Non-credit group fitness classes such as yoga, Pilates, cardio kickboxing, cardio spin, Zumba &
Tai Chi are also offered.

Intramural sports provide Hunter students with the opportunity to compete in various organized activities, games and sports against members of the college community. Some of the more popular sports include flag football, basketball, volleyball, soccer, racquetball, handball, dodge ball, and the annual Turkey Trot.

Student Life: Clubs, Organizations and Activities

Student life at Hunter is enriched by a wide array of organizations and clubs — approximately 150 in number — which provide opportunities for participation in academic, political, recreational, ethnic, religious and social activities. Student organizations sponsor events and activities, which include hosting guest speakers, concerts, movies, attending conferences, assisting charities and social gatherings. All student clubs and publications are administered by the membership through their elected officers. Students are encouraged to join and become active in at least one organization so they have an opportunity to meet other students and develop interpersonal, leadership and managerial skills.

The Office of Student Activities, a unit of the Office of Student Affairs, encourages student involvement and supports clubs and organizations on campus by conducting a series of student leadership colloquia and other leadership development workshops, facilitating club events and opening doors to community service opportunities.

The office is also a resource for free and discount tickets to theater, concerts and other performances. A complete listing of student organizations and additional information regarding student activities can be obtained by contacting the Office of Student Services/Student Life, Room C001 Hunter North (212) 772-4908.

Assembly and Meeting Hours

A block of time is set aside each week during which no classes are scheduled. Called "Dean's Hours," this time block is reserved for official college assemblies, guidance meetings and other academic and administrative purposes and for meetings of student organizations. Generally, Dean's Hours are scheduled on Wednesdays, from 1:10-3:00 p.m.

Study Abroad Grading

Return to the Grading System

Grades for courses taken by Hunter College students through the Education Abroad office that are not taught by Hunter faculty will appear in the "Comments" section of the official Hunter College transcript. These grades will not be included in the calculation of the student's Grade Point Average.

Grades for courses taken by Hunter College students through the Education Abroad office will not be calculated into their Hunter College GPA. Exceptions include Education Abroad courses taken through other CUNY colleges. For more information, visit the Education Abroad web page at http://www.hunter.cuny.edu/educationabroad
Degree Students

Degree seeking students enrolling at Hunter College must demonstrate proficiency in reading, writing and mathematics at the time of application, as outlined by the City University of New York. Students can demonstrate that they meet the CUNY proficiency skills requirements in reading, writing and mathematics based on SAT, ACT, or NY State Regents test scores. Students may also demonstrate CUNY proficiency requirements based on a bachelor's degree or higher from an accredited program that is approved by the Office of Admissions. Otherwise, students must take the appropriate CUNY Assessment Test to demonstrate proficiency requirements.

Students may demonstrate proficiency in reading and writing based on the following SAT, ACT, or NY State Regents test scores:

**Reading and Writing**

Students are considered proficient in reading and writing if they provide official documentation on any one of the following:

- SAT I Verbal score of 480 or higher or Critical Reading score of 480 or higher
- ACT English score of 20 or higher
- NY State English Regents score of 75 or higher

Students may demonstrate proficiency in reading and writing based on the following CUNY Assessment Test scores:

- Reading: a scaled score of 70 or higher.
- Writing: a total score of 56 or higher.

To be eligible to register for the first college-level composition course, students must be proficient in both reading and writing.

In addition, transfer students from outside of CUNY may demonstrate that they meet the City University of New York’s proficiency requirement in reading and writing by documenting successful completion of a 3-credit college-level English course with a grade of C or better from an accredited college or university. Transfer students from another CUNY college may demonstrate that they meet the City University of New York’s proficiency requirement in reading and writing by documenting successful completion of a 3-credit college-level English course with a grade of C or better from a CUNY college.

Students may demonstrate proficiency in mathematics based on the following SAT, ACT, or NY State Regents test scores:
Mathematics
Students are considered proficient in mathematics if they provide official documentation on any one of the following:

- SAT Math score of 500 or higher
- ACT Math score of 21 or higher
- NY State Regents score of 80 or higher in Integrated Algebra, Geometry, OR Algebra 2/Trigonometry AND successful completion of the Algebra 2/Trigonometry or a higher-level course.
- Math A or Math B, Sequential II or III NY State Regents score of 75 or higher

Students may demonstrate proficiency in mathematics based on the following CUNY Assessment Test score:

Algebra (M2) score of 40 or higher

In addition, transfer students from outside of CUNY can demonstrate that they meet the CUNY math proficiency requirement by documenting successful completion of a 3 credit college-level math course with a grade of C or better from an accredited college or university. Transfer students from another CUNY college can demonstrate that they meet the CUNY mathematics proficiency requirement by documenting successful completion of Elementary Algebra or a 3 credit college-level math course at a CUNY college.

Nondegree Students

Non-degree students may attempt up to 12 credits at Hunter College without demonstrating the CUNY proficiency requirements unless it is required for a particular course. Non-degree students are required to demonstrate CUNY proficiency requirements once 12 credits have been attempted; non-degree students must demonstrate proficiency requirements based on the same criteria set forth for Degree Students. Non-degree students who fail to demonstrate the CUNY proficiency requirements and who take and fail any part of the CUNY Assessment Tests before reaching the 12-credit limit will not be permitted to enroll in additional courses at Hunter College until they have met CUNY proficiency requirements at a CUNY community college.

Mathematics Placement Test

The Mathematics Placement Test is an untimed, multiple choice, computer-based test composed of four sections: Pre-Algebra, Algebra, College Algebra and Trigonometry. Starting with algebra, the test covers progressively advanced topics with placement into more advanced mathematics or mathematics-related courses. Students must take the Math Placement Test before they may register for math, science and certain liberal arts courses at Hunter College. SAT, ACT and New York State Regents test scores do not exempt a student from this test. Test results will be used to place students appropriately in coursework at Hunter College. The exam does not affect acceptance to Hunter College. Students may only take this exam one time throughout the City University of New York (CUNY).

The CUNY Assessment Test (CAT) and Mathematics Placement Test are administered in the Hunter College Testing Center, Room 150 Hunter North. Visit the Hunter College Testing Center's website at https://www.hunter.cuny.edu/testingcenter for available dates and times to take examinations. Inquiries pertaining to testing at Hunter College may be addressed by calling the Testing Center at 212-772-4868 or sending an email to testing@hunter.cuny.edu. For sample questions and related information about the CAT and placement into advanced mathematics courses visit the CUNY website at https://www.cuny.edu/academics/testing/cuny-assessment-tests.html

The Academic Program

Return to Academic Programs and Policies
The Bachelor of Arts (BA) degree encompasses sciences, humanities and the arts and the social sciences. BA programs prepare students for positions in profit, nonprofit and government organizations as well as for graduate programs.

The Bachelor of Science (BS) degree programs provides training for a particular career and are therefore considered professional degrees. Hunter offers BS degrees in five fields.

The Bachelor of Fine Arts (BFA) degree is a concentration in art for highly qualified students. The Studio Art - BFA is described in detail in the section devoted to the Art and Art History Department.

The Bachelor of Music (BMus) degree is designed for students who intend to perform professionally or to teach the performance of music. The Music - BMus program is described in detail in the section devoted to the Music Department.

The Bachelors/Masters degree programs are designed for highly qualified students in particular areas of study; they enable full-time students to complete both the bachelor's and master's degrees in 4-5 years. Students in combined programs will pay undergraduate tuition rates up to the number of credits required to earn a baccalaureate degree (120 credits]. Any credits taken toward the combined degree after 120 credits are charged at the graduate tuition rate. Some programs offer teacher certification at the master's level. Nineteen programs are available.

See Programs of Study for a list of programs

The CUNY (City University of New York) Baccalaureate degree is a university-wide program. This degree, awarded by CUNY rather than by a specific undergraduate CUNY college, may be a BS or BA degree and is intended for students who have well formulated individual academic and career goals. Students who are accepted work out their programs with a faculty committee of their choice that is willing to support the student's plan of study. Students pursue their studies at one or more colleges in CUNY, according to their interests. Students must complete at least 15 but not more than 90 credits to be considered for admission to this program. Further information can be obtained from the CUNY/BA adviser in the Office of Advising Services, Room 1119 East Building.

Policy on Remediation

Beginning January 2000, students enrolling at Hunter College must prove their proficiency in reading, writing and mathematics through SAT scores, Regents scores or assessment tests prior to registration. Remedial courses are no longer offered by the college. ESL and non-proficient SEEK students are exempt from this policy, but must adhere to the following guidelines (see the Admissions section of this catalog for information about ESL and SEEK designations): SEEK students must enroll in the appropriate basic skills workshop(s) prior to enrolling in their first semester at Hunter. SEEK students who do not gain proficiency in the pre-first semester workshops must take additional basic skills workshops during the semester. SEEK students must demonstrate proficiency within one year of enrollment at Hunter. SEEK students needing basic skills coursework must consult with the director of the SEEK Program for course access and availability. ESL students are placed in an appropriate developmental reading and/or writing course during their first semester and may continue taking developmental courses in their second semester, if needed. ESL students must demonstrate proficiency by the end of their fourth consecutive semester at Hunter. ESL students should see the ESL adviser in the English Department, Room 1212 Hunter West, for details about basic skills proficiency requirements.

College Preparatory Initiative

Students who graduated from high school in spring 1993 or later are required to satisfy a set of prescribed educational competencies known as the College Preparatory Initiative (CPI). Students who do not satisfy the Initiative through coursework taken while in high school take appropriate college-level courses to meet the requirement. See the Admissions section of this catalog for CPI requirements.
The Block Program

First-year students entering in the fall semester have the opportunity to begin their college careers by enrolling in a specially designed block of courses. Freshman Blocks are clusters of introductory-level courses designed to help students explore possible areas of interest within a community of 22 students. Each block section or course cluster has a general theme, and each course within the block section satisfies one or more college requirements. Since each course cluster provides a solid foundation for any major at the college, participation in any of the blocks does not limit a student’s future area of study. For more information on the Block Program, visit http://www.hunter.cuny.edu/studentservices/fao/blockprogram

The Bursar’s Office

Return to Enrollment, Tuition and Fees, Financial Aid

238 Hunter North
(212) 772-4401
www.hunter.cuny.edu/bursar; bursar@hunter.cuny.edu

The bursar’s office collects all tuition and fees and other funds for the college. The bursar’s receipt/paid bill is the only valid proof of registration payment.

**Method of Payment for Tuition and Fees** Students may pay for tuition and fees by cash, check, money order or acceptable credit card (MasterCard, American Express or Discover). The VISA card is not accepted. All checks and money orders must be made payable to Hunter College in U.S. currency only and mailed to the Bursar’s Office, N238. The college will only accept payments of cash, checks and money orders at the Bursar’s Office cashier windows. Students can make payments online using their credit card or an electronic funds transfer from their bank checking/savings account. Additional details concerning payment options are available online at www.hunter.cuny.edu/bursar. A tuition payment plan can be arranged through TuitionPay for a $16.75 enrollment fee. Sallie Mae Tuition Pay permits students to pay semester expenses over a five-month period for the fall and spring terms and a three-month period for the summer.

For more information, please log on to www.tuitionpay.com/cuny or call 1-866-267-CUNY.

**Financial Obligations** Students are expected to settle their bill by the college’s designated due dates. Pursuant to CUNY policy, students who have unsettled bills are cancelled for non-payment. Student accounts that remain unpaid for one semester or more are turned over to the university’s collection agency. Students who have an unpaid balance or have not completed entrance/exit interviews for loan programs or other specific requirements of the college or an appropriate state or federal agency for which the university acts as either a disbursing or certifying agent will not be permitted to register for classes or obtain a transcript.

The City University of New York Policy on Acceptable Use of Computer Resources
Return to Public Safety, College Regulations and Policies

Introduction

CUNY’s computer resources are dedicated to the support of the university’s mission of education, research and public service. In furtherance of this mission, CUNY respects, upholds and endeavors to safeguard the principles of academic freedom, freedom of expression and freedom of inquiry.

CUNY recognizes that there is a concern among the university community that because information created, used, transmitted or stored in electronic form is by its nature susceptible to disclosure, invasion, loss, and similar risks, electronic communications and transactions will be particularly vulnerable to infringements of academic freedom. CUNY’s commitment to the principles of academic freedom and freedom of expression includes electronic information. Therefore, whenever possible, CUNY will resolve doubts about the need to access CUNY computer resources in favor of a user’s privacy interest.

However, the use of CUNY computer resources, including for electronic transactions and communications, like the use of other university-provided resources and activities, is subject to the requirements of legal and ethical behavior. This policy is intended to support the free exchange of ideas among members of the CUNY community and between the CUNY community and other communities, while recognizing the responsibilities and limitations associated with such exchange.

Applicability

This policy applies to all users of CUNY computer resources, whether affiliated with CUNY or not, and whether accessing those resources on a CUNY campus or remotely.

This policy supersedes the CUNY policy titled “CUNY Computer User Responsibilities” and any college policies that are inconsistent with this policy.

Definitions

“CUNY Computer resources” refers to all computer and information technology hardware, software, data, access and other resources owned, operated, or contracted by CUNY. This includes, but is not limited to, personal computers, handheld devices, workstations, mainframes, minicomputers, servers, network facilities, databases, memory, and associated peripherals and software, and the applications they support, such as e-mail and access to the Internet.

“E-mail” includes point-to-point messages, postings to newsgroups and listservs, and other electronic messages involving computers and computer networks.

Rules for Use of CUNY Computer Resources

1. **Authorization** Users may not access a CUNY computer resource without authorization or use it for purposes beyond the scope of authorization. This includes attempting to circumvent CUNY computer resource system protection facilities by hacking, cracking or similar activities, accessing or using another person’s computer account, and allowing another person to access or use the user’s account. This provision shall not prevent a user from authorizing a colleague or clerical assistant to access information under the user’s account on the
user’s behalf while away from a CUNY campus or because of a disability. CUNY computer resources may not be used to gain unauthorized access to another computer system within or outside of CUNY. Users are responsible for all actions performed from their computer account that they permitted or failed to prevent by taking ordinary security precautions.

2. **Purpose** Use of CUNY computer resources is limited to activities relating to the performance by CUNY employees of their duties and responsibilities. For example, use of CUNY computer resources for private commercial or not-for-profit business purposes, for private advertising of products or services, or for any activity meant solely to foster personal gain, is prohibited. Similarly, use of CUNY computer resources for partisan political activity is also prohibited.

   Except with respect to CUNY employees other than faculty, where a supervisor has prohibited it in writing, incidental personal use of computer resources is permitted so long as such use does not interfere with CUNY operations, does not compromise the functioning of CUNY computer resources, does not interfere with the user’s employment or other obligations to CUNY, and is otherwise in compliance with this policy.

3. **Compliance with Law** CUNY computer resources may not be used for any purpose or in any manner that violates CUNY rules, regulations or policies, or federal, state or local law. Users who engage in electronic communications with persons in other states or countries or on other systems or networks may also be subject to the laws of those other states and countries, and the rules and policies of those other systems and networks. Users are responsible for ascertaining, understanding, and complying with the laws, rules, policies, contracts, and licenses applicable to their particular use.

   Examples of applicable federal and state laws include the laws of libel, obscenity and child pornography, as well as the following:

   - Family Educational Rights and Privacy Act
   - Electronic Communications Privacy Act
   - Computer Fraud and Abuse Act
   - New York State Freedom of Information Law

   New York State Law with respect to the confidentiality of library records Examples of applicable CUNY rules and policies include the following:

   - Sexual Harassment Policy
   - Policy on Maintenance of Public Order
   - Web Site Privacy Policy
   - Gramm-Leach-Bliley Information Security Program
   - University Policy on Academic Integrity
   - Information Security policies

4. **Licenses and Intellectual Property** Users of CUNY computer resources may use only legally obtained, licensed data or software and must comply with applicable licenses or other contracts, as well as copyright, trademark and other intellectual property laws.

   Much of what appears on the internet and/or is distributed via electronic communication is protected by copyright law, regardless of whether the copyright is expressly noted. Users of CUNY computer resources should generally assume that material is copyrighted unless they know otherwise, and not copy, download or distribute copyrighted material without permission unless the use does not exceed fair use as defined by the federal Copyright Act of 1976. Protected material may include, among other things, text, photographs, audio, video, graphic illustrations, and computer software.

5. **False Identity and Harassment** Users of CUNY computer resources may not employ a false identity, mask the identity of an account or computer, or use computer resources to engage in abuse of others, such as sending harassing, obscene, threatening, abusive, deceptive, or anonymous messages within or outside...
6. **Confidentiality** Users of CUNY computer resources may not invade the privacy of others by, among other things, viewing, copying, modifying or destroying data or programs belonging to or containing personal or confidential information about others, without explicit permission to do so. CUNY employees must take precautions to protect the confidentiality of personal or confidential information encountered in the performance of their duties or otherwise.

7. **Integrity of Computer Resources** Users may not install, use or develop programs intended to infiltrate or damage a computer resource, or which could reasonably be expected to cause, directly or indirectly, excessive strain on any computing facility. This includes, but is not limited to, programs known as computer viruses, Trojan horses, and worms. Users should consult with the IT director at their college before installing any programs that they are not sure are safe.

8. **Disruptive Activities** CUNY computer resources must not be used in a manner that could reasonably be expected to cause or does cause, directly or indirectly, unwarranted or unsolicited interference with the activity of other users. This provision explicitly prohibits chain letters, virus hoaxes or other intentional e-mail transmissions that disrupt normal e-mail service. Also prohibited are spamming, junk mail or other unsolicited mail that is not related to CUNY business and is sent without a reasonable expectation that the recipient would welcome receiving it, as well as the inclusion of members of the CUNY community on lists related to CUNY business. CUNY has the right to require users of CUNY computer resources to limit or refrain from other specific uses if, in the opinion of the IT director at the user’s college, such use interferes with efficient operations of the system, subject to appeal to the President or, in the case of central office staff, to the Chancellor.

9. **CUNY Names and Trademarks** CUNY names, trademarks and logos belong to the university and are protected by law. Users of CUNY computer resources may not state or imply that they speak on behalf of CUNY or use a CUNY name, trademark or logo without authorization to do so. Affiliation with CUNY does not, by itself, imply authorization to speak on behalf of CUNY.

10. **Security** CUNY employs various measures to protect the security of its computer resources and of users’ accounts. However, CUNY cannot guarantee such security. Users are responsible for engaging in safe computing practices such as guarding and not sharing their passwords, changing passwords regularly, logging out of systems at the end of use, and protecting private information, as well as for following CUNY’s Information Security policies and procedures. Users must report incidents of Information Security policy non-compliance or other security incidents to CUNY’s Chief Information Officer and Chief Information Security Officer, and the IT director at the affected user’s college.

11. Filtering CUNY reserves the right to install spam, virus and spyware filters and similar devices if necessary in the judgment of CUNY’s Office of Information Technology or a college IT director to protect the security and integrity of CUNY computer resources. Notwithstanding the foregoing, CUNY will not install filters that restrict access to e-mail, instant messaging, chat rooms or websites based solely on content.

12. **Confidential Research Information** Principal investigators and others who use CUNY computer resources to store or transmit research information that is required by law or regulation to be held confidential or for which a promise of confidentiality has been given, are responsible for taking steps to protect confidential research information from unauthorized access or modification. In general, this means storing the information on a computer that provides strong access controls (passwords) and encrypting files, documents, and messages for protection against inadvertent or unauthorized disclosure while in storage or in transit over data networks. Robust encryption is strongly recommended for information stored electronically on all computers, especially portable devices such as notebook computers, Personal Digital Assistants (PDAs), and portable data storage (e.g., memory sticks) that are vulnerable to theft or loss, as well as for information transmitted over public networks. Software and protocols used should be reviewed and approved by CUNY’s Office of
Information Technology.

13. CUNY Access to Computer Resources CUNY does not routinely monitor, inspect, or disclose individual usage of its computer resources without the user’s consent. In most instances, if the university needs information located in a CUNY computer resource, it will simply request it from the author or custodian. However, CUNY IT professionals and staff do regularly monitor general usage patterns as part of normal system operations and maintenance and might, in connection with these duties, observe the contents of Web sites, e-mail or other electronic communications. Except as provided in this policy or by law, these individuals are not permitted to seek out contents or transactional information, or disclose or otherwise use what they have observed. Nevertheless, because of the inherent vulnerability of computer technology to unauthorized intrusions, users have no guarantee of privacy during any use of CUNY computer resources or in any data in them, whether or not a password or other entry identification or encryption is used. Users may expect that the privacy of their electronic communications and of any materials contained in computer storage in any CUNY electronic device dedicated to their use will not be intruded upon by CUNY except as outlined in this policy.

CUNY may specifically monitor or inspect the activity and accounts of individual users of CUNY computer resources, including individual login sessions, e-mail and other communications, without notice, in the following circumstances:

a. When the user has voluntarily made them accessible to the public, as by posting to Usenet or a Web page;

b. When it is reasonably necessary to do so to protect the integrity, security, or functionality of CUNY or other computer resources, as determined by the college chief information officer or his or her designee, after consultation with CUNY’s chief information officer or his or her designee;

c. When it is reasonably necessary to diagnose and resolve technical problems involving system hardware, software, or communications, as determined by the college chief information officer or his or her designee, after consultation with CUNY’s chief information officer or his or her designee;

d. When it is reasonably necessary to protect CUNY from liability, or when failure to act might result in significant bodily harm, significant property loss or damage, or loss of significant evidence, as determined by the college president or a vice president designated by the president, after consultation with the Office of General Counsel and the Chair of the University Faculty Senate (if a CUNY faculty member’s account or activity is involved) or Vice Chair if the Chair is unavailable;

e. When there is a reasonable basis to believe that CUNY policy or federal, state or local law has been or is being violated, as determined by the college president or a vice president designated by the president, after consultation with the Office of General Counsel and the Chair of the University Faculty Senate (if a CUNY faculty member’s account or activity is involved) or Vice Chair if the Chair is unavailable;

f. When an account appears to be engaged in unusual or unusually excessive activity, as indicated by the monitoring of general activity and usage patterns, as determined by the college president or a vice president designated by the president and the college chief information officer or his or her designee, after consultation with CUNY’s chief information officer or his or her designee, the Office of General Counsel, and the Chair of the University Faculty Senate (if a CUNY faculty member’s account or activity is involved) or Vice Chair if the Chair is unavailable; or

g. As otherwise required by law.

In those situations in which the Chair of the University Faculty Senate is to be consulted prior to monitoring or inspecting an account or activity, the following procedures shall apply: (i) the college president shall report the
completion of the monitoring or inspection to the Chair and the CUNY employee affected, who shall also be told the reason for the monitoring or inspection, except where specifically forbidden by law; and (ii) if the monitoring or inspection of an account or activity requires physical entry into a faculty member’s office, the faculty member shall be advised prior thereto and shall be permitted to be present to observe, except where specifically forbidden by law.

A CUNY employee may apply to the General Counsel for an exemption from some or all of the circumstances under which CUNY may inspect and monitor computer resource activity and accounts, pursuant to subparagraphs (a)-(f) above, with respect to a CUNY computer resource used solely for the collection, examination, analysis, transmission or storage of confidential research data. In considering such application, the General Counsel shall have the right to require the employee to affirm in writing that the computer resource will be used solely for the confidential research. Any application for exemption should be made prior to using the computer resource for the confidential research.

CUNY, in its discretion, may disclose the results of any general or individual monitoring or inspection to appropriate CUNY personnel or agents, or law enforcement or other agencies. The results may be used in college disciplinary proceedings, discovery proceedings in legal actions, or otherwise as is necessary to protect the interests of the university.

In addition, users should be aware that CUNY may be required to disclose to the public under the New York State Freedom of Information Law communications made by means of CUNY computer resources in conjunction with university business.

Any disclosures of activity of accounts of individual users to persons or entities outside of CUNY, whether discretionary or required by law, shall be approved by the General Counsel and shall be conducted in accordance with any applicable law. Except where specifically forbidden by law, CUNY employees subject to such disclosures shall be informed promptly after the disclosure of the actions taken and the reasons for them.

The Office of General Counsel shall issue an annual statement of the instances of account monitoring or inspection that fall within categories (d) through (g) above. The statement shall indicate the number of such instances and the cause and result of each. No personally identifiable data shall be included in this statement.

See CUNY’s Web Site Privacy Policy for additional information regarding data collected by CUNY from visitors to the CUNY website at www.cuny.edu.

14. **Enforcement** Violation of this policy may result in suspension or termination of an individual’s right of access to CUNY computer resources, disciplinary action by appropriate CUNY authorities, referral to law enforcement authorities for criminal prosecution, or other legal action, including action to recover civil damages and penalties.

Violations will normally be handled through the university disciplinary procedures applicable to the relevant user. For example, alleged violations by students will normally be investigated, and any penalties or other discipline will normally be imposed, by the Office of Student Affairs.

CUNY has the right to temporarily suspend computer use privileges and to remove from CUNY computer resources material it believes violates this policy, pending the outcome of an investigation of misuse or finding of violation. This power may be exercised only by the President of each college or the Chancellor.

15. **Additional Rules** Additional rules, policies, guidelines and/or restrictions may be in effect for specific computers, systems, or networks, or at specific computer facilities at the discretion of the directors of those facilities. Any such rules which potentially limit the privacy or confidentiality of electronic communications or information contained in or delivered by or over CUNY computer resources will be subject to the substantive and procedural safeguards provided by this policy.

16. **Disclaimer** CUNY shall not be responsible for any damages, costs or other liabilities of any nature whatsoever with regard to the use of CUNY computer resources. This includes, but is not limited to, damages caused by unauthorized access to CUNY computer resources, data loss, or other damages resulting from
delays, non-deliveries, or service interruptions, whether or not resulting from circumstances under the
CUNY’s control.

Users receive and use information obtained through CUNY computer resources at their own risk. CUNY makes no
warranties (expressed or implied) with respect to the use of CUNY computer resources. CUNY accepts no
responsibility for the content of Web pages or graphics that are linked from CUNY Web pages, for any advice or
information received by a user through use of CUNY computer resources, or for any costs or charges incurred by a user
as a result of seeking or accepting such advice or information.

CUNY reserves the right to change this policy and other related policies at any time. CUNY reserves any rights and
remedies that it may have under any applicable law, rule or regulation. Nothing contained in this policy will in any way
act as a waiver of such rights and remedies.

The Cost of Education

Return to Financial Aid

CUNY 7th Day Financial Aid Certification Date policy

Beginning fall 2014 CUNY has implemented the 7th day Financial Aid Certification Date policy. Students’ credit load
as of the end of the 7th day of the semester will determine their financial aid status and eligibility for federal and state
aid programs they may qualify to receive for the semester.

If applicants are required to verify 2013 income, applicants must request a 2013 IRS Tax Return Transcript from the
Internal Revenue Service (IRS) www.irs.gov or by calling 1-800-908-9946.

IRS Data Retrieval Tool

The IRS Data Retrieval Tool allows applicants who have already filed their federal income tax returns to prefill the
answers to some questions on the Free Application for Federal Student Aid (FAFSA) by transferring data from their
federal income tax returns. This can save the family some time in completing the FAFSA. It may also reduce the
likelihood that your FAFSA will be selected for verification.

Applicants must have filed their federal income tax returns before they can use the IRS Data Retrieval Tool. The IRS
Data Retrieval Tool can be used 1-2 weeks after the federal income tax return is filed if the return is filed electronically
and 6-8 weeks after filing a paper return.

Federal Pell Grant eligibility is restricted to a maximum of 12 full-time semesters (600%).

The calculation of the duration of your Pell grant eligibility will include ALL years you received Federal Pell grant
funding. Your Pell grant duration will be determined by adding together each of your annual percentages of the
scheduled award that were disbursed to you. A student enrolled full-time throughout the fall and spring semesters
would earn 100% of their Pell Grant each year.

Satisfactory Academic Progress Standards for federal financial aid are more restrictive.

Effective July 1, 2012, if you are placed on academic probation you will be ineligible for Pell Grant. SEOG, Federal
Work-Study. Federal Perkins and Federal Direct Student Loans. If you can demonstrate exceptional or extenuating
circumstances resulted in your failure to satisfy academic requirements you may appeal to receive federal funding. The student's academic advisor must submit an "academic action plan" that indicates it will be possible for the student to regain eligibility for the next semester.

**Undergraduate Direct Subsidized loan interest rate**

Effective July 1, 2014 the Federal Direct Stafford subsidized loan will remain interest-free while undergraduate students are enrolled in school at least half-time, however the interest rate will be 4.66%.

**Subsidized loans for graduate students are no longer available.**

Graduate students will no longer be eligible for subsidized loans. While the total annual loan limit that students can borrow will remain at $20,500, the full amount will be unsubsidized, accruing a 6.21% interest while in school.

**The Cost of Education**

Cost must be considered when a student is making decisions about whether, where and when to attend college. A student budget is used as an estimate of the amount of money it will cost a student to attend college. The budget includes allowances for tuition, fees, books, transportation, housing, food and personal expenses. Additional allowances may be made for unusual expenses such as dependent care costs.

Student budgets are set each year by CUNY. They reflect the average expenses of all students who are living with their parents or living away from their parents. Students with disabilities should speak to a financial aid counselor about budget adjustments for their special needs.

The 2014-2015 Hunter College budgets for full-time undergraduate students who are charged the NY State resident tuition rate are can be seen by logging into: www.hunter.cuny.edu/onestop.

*Note: Tuition charges are estimates for full-time New York State residents based on 2014-2015 tuition charges. Actual tuition charges for New York State residents, out-of-state residents and international students for full-time and part-time study can be found at www.hunter.cuny.edu/onestop.*

*The Housing component of the Living Away from Parent budget is derived using average housing costs for a rental apartment in metropolitan New York and using the assumption that the student is sharing the cost of housing with a roommate. The Personal component includes an allowance for medical expenses and/or health insurance.*

**Student Resources**

In reviewing the student budget, a prospective student should consider the resources they will have from earnings and savings, the amount that parents can contribute and any benefits the prospective student receives, such as Social Security, veteran's benefits, unemployment or public assistance. Summer employment can help to meet the first costs of enrollment and the prospective student should plan to save money from summer earnings. Cash will be needed at the beginning of the school year for books, supplies and transportation.

**Packaging**

Rather than using one source of funds to finance their education, students may receive a combination of funds from a number of programs for which they are eligible. This system for allocating aid is called packaging. Funds will be
allocated first to meet the basic costs of attendance (tuition, books, transportation). If funding permits, other living expenses will then be addressed.

Applications for financial aid must be filed each year. FAFSA on the Web for the coming academic year is available starting on January 1.

**Study Abroad**

Students who enroll in an overseas program of study approved by Hunter College are eligible to receive federal financial aid and, in some cases, state aid. The coursework for which they enroll must be applicable to their degree at Hunter College. Contact the Office of Programs Abroad at (212) 772-4983 for further information about study abroad.

**The Grading System**

Return to Academic Regulations

1. Credit/ No Credit Policy
2. Retention Standards and Grading Definition
3. Taking Courses at Other Accredited Institutions (e Permit)
4. Study Abroad Grading
5. Graduation-in-Absentia
6. Retention on the Basis of Grade Point Average and Probation
7. Dismissal from the College and the City University
8. Incomplete Work in a Course
9. Repeating Courses (F repeat)
10. Grading Policy for Nursing Courses

**The Registrar's Office**

Return to Enrollment, Tuition and Fees, Financial Aid

217 Hunter North
Web site: http://registrar.hunter.cuny.edu

The Office of the Registrar designs and implements efficient systems for student registration, class scheduling, and room assignments; creates and maintains accurate academic records, and ensures the integrity of the Hunter College degree.

The Office of the Registrar also accepts, processes or issues:

a. Withdrawals with a grade of W up to the first day of the tenth week of class;

b. Permit application requests to attend classes at non-CUNY colleges;

c. Academic department-approved Major declaration forms;

d. Change of Name and Address forms;
e. Certification of attendance or graduation;

f. Degree Audit application for Graduation forms;

g. Electronic transcript requests. There is a fee of $7 per transcript, except for transcripts sent to other units of the City University, which are free.

h. Grades at the end of each term.

**Theatre**

Return to the Faculty of the School of Arts and Sciences

**Joel Bassin**, Associate Professor and Chair, Theatre; BA Lake Forest, MFA Rutgers, PhD CUNY

**Barbara Bosch**, Professor, Theatre; BA California (Riverside), MFA SMU, PhD California (Berkeley)

**Dong-Shin Chang**, Assistant Professor, Theatre; BA, MA National Taiwan University, PhD NYU

**Deepsikha Chatterje**, Lecturer, Theatre; BA Fashion Design, NIFT, India; BS University of Madras, India; MFA Florida State

**Ian R. Calderon**, Professor, Theatre; BA Hunter, MFA Yale

**Mira Felner**, Professor, Theatre; BA, MA, PhD NYU

**Judith Jablonka**, Lecturer, Theatre; BA Elmira, MA, MFA Case Western Reserve

**Jonathan Kalb**, Professor, Theatre; BA Wesleyan, MFA, DFA Yale

**Claudia Orenstein**, Associate Professor, Theatre; BA Southern California, PhD Stanford

**Mia Rovegno**, Assistant Professor, BA Northwestern, MFA Brown

**Michael E. Rutenberg**, Professor, Theatre; BA Brooklyn, MFA, DFA Yale

**Louisa Thompson**, Associate Professor, Theatre; BFA Rhode Island School of Design, MFA Yale

Return to the Theatre Department

**Theatre Department Description**

Return to Theatre Department

The Department of Theatre studies stage production, the history and theory of theatre and drama, and the relationship among text, theory and performance. Theatre courses include acting, playwriting, directing, history, theory, design,
production, creative drama and interdisciplinary performance. The curriculum was developed with an emphasis on professional standards within a liberal arts context.

The theatre major requires courses in practical hands-on work, as well as study of theoretical, critical, and historical approaches to theatre. Interdisciplinary courses include acting, lighting and design for theatre, film and television, adaptation for theatre and film, and comparative aesthetics. Students pursuing a major in theatre must work on theatre productions as part of their requirements for graduation. Advanced undergraduate playwrights may have their work produced by Hunter Playwrights.

Many students who graduate from the theatre program work as actors, directors, stage managers, and designers. Some of our students continue their creative study in conservatory or MFA programs. Others continue their education in history and theory as MA or PhD students.

The department maintains associations with major theatre institutions. Students have opportunities for placement as interns and apprentices with various professional groups.

**Thomas Hunter Honors Program**

Return to the Faculty of the School of Arts and Sciences

**Philip Alcabes**, Associate Professor, Health Sciences; BA Union, MA California (Berkeley), MPh Columbia, PhD Johns Hopkins

**Spiro Alexandratos**, Professor, Chemistry; BS Manhattan College, PhD California (Berkeley)

**Elizabeth Beaujour**, Professor, Russian and Slavic Division, Classical and Oriental Studies; BA Vassar, MA Certificate of Russian Institute, PhD Columbia

**Richard Belsky**, Associate Professor, History; BA Massachusetts (Amherst), MA Cornell, PhD Harvard

**Anthony Browne**, Associate Professor, Africana and Puerto Rican/Latino Studies; BA Cornell, MA California (Los Angeles), MA, PhD Columbia

**Richard Burke**, Associate Professor, Music; BA, MA Hunter, PhD CUNY

**Martin Chodorow**, Professor, Psychology; BA Texas (Austin), PhD MIT

**Diana Conchado**, Associate Professor, Romance Languages (Spanish); BA Hunter, MA, PhD Brown

**Lynne Greenberg**, Associate Professor, English; BA Brown, JD Chicago, PhD CUNY

**Nico Israel**, Associate Professor, English; BA California (Los Angeles), PhD Yale

**Bernadette McCauley**, Associate Professor, History; BA Hunter, MA, PhD Columbia
Transfer (Advanced Standing) Admission

Students who attended a regionally accredited college or university after graduation from high school must file a CUNY Transfer (Advanced Standing) application. Transfer applicants are considered for admission with advanced standing if they have a minimum of a 2.5 average; some programs may be higher. Applicants with fewer than 24 credits must also satisfy freshman admission criteria.

Nondegree students who are in attendance at Hunter College as well as those who were previously enrolled, in addition to meeting the above stated criteria, must have had a minimum grade point average of 2.0 in their Hunter coursework.

Transfer admissions decisions and determinations of advanced standing are made by the Hunter College Admissions Office on the basis of work done as a matriculated student at regionally accredited two- and four-year colleges and universities. Only courses in which a student has earned a grade of C or better (D from CUNY colleges) can be accepted for transfer. Transfer credit will not be granted for any remedial, developmental or ESL coursework.

Graduate coursework is not transferrable to the undergraduate degree program.

Transfer students from CUNY community colleges who have earned an AA or AS degree are admitted to the college, awarded junior status and considered to have satisfied core course requirements. However, depending upon the major selected at Hunter, some students may need more than 60 additional credits in order to complete Hunter's bachelor's degree requirements. Transfer students from CUNY colleges who have not earned a two-year AA or AS degree and transfer students from non-CUNY colleges are awarded credit for previous work on a course-by-course basis. All transfer students, including those entering with CUNY AA and AS degrees, must fulfill the college's foreign language and Pluralism and Diversity, and Writing requirements.
The maximum total number of credits that may be transferred to Hunter College is 90. There is a 70-credit limit on the number of credits that may be transferred from two-year institutions.

Applicants are required to report and provide transcripts for all previous college coursework including coursework that was in progress at the time of application. Failure to do so may result in disciplinary action and the denial of transfer credit.

**Tuition and Fees**

Return to Enrollment, Tuition and Fees, Financial Aid

**Effective Fall 2014**

All tuition and fee charges listed in this catalog and in any registration materials issued by the college are subject to change by action of the Trustees of the City University of New York without prior notice.

Please note: Veterans who are not New York State residents are charged the same tuition rate as New York State residents for a period of 18 months from the first date of attendance at a CUNY college.

Readmission (except non-matriculated) $20.00
Readmission (non-matriculated) $125.00
Returned check/EFT Reprocessing Fee $20.00
Duplicate Diploma Fee $30.00

Material Fee

Certain courses such as laboratory or studio courses, have a material fee. These fees are listed in the course description for each applicable course. The fees will be included in the student's bill and are payable to the bursar.

Refunds

Cancellation Policy

The college's cancellation policy is both published on our website (www.hunter.cuny.edu/bursar/tuition-fees/cancellation-of-classes) and detailed on student's online bills. The policy is also outlined in the schedule of classes.

CUNY Policy
This policy relates to all students who withdraw from courses prior to the 1st day of the 4th week of class. The refund policy is as follows:

100% tuition and fees prior to 1st official day of classes

75% tuition only prior to 1st day of 2nd week of classes

50% tuition only prior to 1st day of 3rd week of classes

25% tuition only prior to 1st day of 4th week of classes

Federal Title IV Funds/Pro-Rata Refunds
Students who completely and officially withdraw or unofficially withdraw from ALL their class(es) and who receive Federal Financial Aid are subject to a Return of Title IV Funds Calculation. The college will calculate how much Title IV aid has been earned by the student based on a period of attendance. The unearned portion of the Title IV funds must be returned to the Department of Education by the college and the student. It is recommended that all students who have financial aid and plan to withdraw from classes seek the advice of the Bursar's Office before taking any action.

Special Provisions for Students in the Military

The following policies apply to students who leave CUNY to fulfill military obligations. Military personnel for whom these provisions apply must register each semester with the Veterans Affairs representative in Student Affairs, Room 1119 Hunter East.

Students called up to the reserves or drafted before the end of the semester
1. **Grades** In order to obtain a grade, a student must attend 13 weeks (five weeks for summer session).

2. **Refunds** A student called up to the reserves or drafted who does not attend for a sufficient time to qualify for a grade is entitled to a 100% refund of tuition and all other fees except application fees.

**Students who volunteer (enlist) for the military**

1. **Grades** Same provision as for students called up to the reserves. In order to obtain a grade, a student must attend 13 weeks (five weeks for summer session).

2. **Refunds** The amount of the refund depends upon whether the withdrawal is before the 5th week of classes.
   1. Withdrawal before beginning of the 5th calendar week (3rd calendar week for summer session): 100% refund of tuition and all other fees except application fees.
   2. Withdrawal thereafter: 50% refund.

**Other Provisions for Military Service:**

1. **Resident Tuition Rates** These lower rates are applicable to all members of the armed services, their spouses and their dependent children, on full-time active duty and stationed in the State of New York.

2. **Re-enrollment of Veterans** Veterans who are returning students are given preferred treatment in the following ways:
   1. Veterans who were former students with unsatisfactory scholastic records, may be readmitted with a probationary program.
   2. Veterans, upon their return, may register even after normal registration periods, without late fees.
   3. Granting of college credit for military service and armed forces instructional courses.
   4. Veterans returning too late to register may audit classes without charge.

3. **Late Admissions** Veterans with no previous college experience are permitted to file applications up to the date of registration and are allowed to begin classes pending completion of their application and provision of supporting documents.

4. **Readmission Fee** Upon return from military service, a student will not be charged a Readmission Fee to register at the same college.

5. **Veterans Tuition Deferrals** Veterans are entitled to defer the payment of tuition pending receipt of veterans' benefits.

6. **New York National Guard Tuition Waivers** Active members of the New York National Guard, who are legal residents of New York State and who do not have a baccalaureate degree, are eligible for a tuition waiver for undergraduate study.

7. For additional information, see the CUNY policy of military service. policy.cuny.edu/text/toc/mgp/ARTICLE%20VII/Policy%207.10/

The primary role of the Financial Aid Processing Center (FAPC) is to help students fulfill their tuition obligation by processing financial aid in coordination with the Bursar's and Financial Aid Offices. Additionally, this office administers the Federal Work Study and Federal Perkins Loan Programs, processes emergency loans and maintains accountability over all financial aid funded book advances.

Visiting Students

Students currently in attendance at other than CUNY colleges who wish to take courses at Hunter College may enroll as visiting students. Visiting students attend Hunter in a nondegree classification and are subject to the same rules and regulations. Along with the Application for Nondegree Admission, visiting students must present to the Office of Admissions a college transcript indicating the completion of at least 24 academic credits.

CUNY students wishing to take courses at Hunter should file an E-Permit at their home school.

Laura Keating, Associate Professor and Chair, Philosophy; BA Michigan State, MA, PhD Ohio State
The Hunter College Women and Gender Studies Program is an interdisciplinary academic program that seeks to preserve, expand and share knowledge about women and gender. The Program reexamines the historical record to make visible women's contributions to the world's knowledge and cultures. The Women and Gender Studies Program
seeks to create an understanding of the ways in which gender intersects with race, religion, class, ethnicity, ability and sexual orientation to shape all human experience, including the pursuit of learning.

The Women and Gender Studies Program includes a broad community of faculty, affiliated faculty, students, and staff and is administered by a director and a policy committee of elected faculty and student representatives. Most courses in the program are cross-listed in an academic department; these have been developed through the initiative of Women and Gender Studies-affiliated faculty throughout the college.

The Women and Gender Studies Program draws on the commitment and expertise of feminist scholars in more than 15 academic departments for our wide range of course offerings. The Women and Gender Studies major is useful, directly and indirectly, in all fields involving an analysis of society and social interaction. Women and Gender Studies graduates may seek employment in any field, including such areas as health care, counseling, advertising, market research, publishing, teaching, public service, advocacy or administrative work. The major is an appropriate preparation for professional schools and for postgraduate work in Women and Gender Studies or in one of the many disciplines from which the major draws its curriculum.
