- ____ ____ Additional General Education Credits **3 Credit Hours**

Total General Education Credits Required: 18

Core Courses

ARH 2402 - Art History: Modern Art

3 Credit Hours ❖ † ¶
(Fall, Spring)

Surveys and analyzes the major artistic periods and movements from 18th century Neo-Classicism to present. Required for all Art majors. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ART 1201C - Two-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with the principles of organization and the elements of design in a two-dimensional format. This is a foundation course for all of the graphic arts: painting, printmaking, and the two-dimensional crafts. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1300C - Drawing I

3 Credit Hours
(Fall, Spring)

Basic drawing course covering different drawing media, line, form, shape, value and spatial relationships. Drawing problems involving a variety of subject matter will be explored. Emphasis is on value, drawing techniques, spatial relationships between shapes and composition. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2500C - Painting I

3 Credit Hours
(Fall, Spring)

Course will include design elements, composition and spatial relationships. Emphasis is on color theory, color mixing, and execution thereof within a variety of subject matter. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2602C - Digital Imaging I

4 Credit Hours
(Offered as needed)

A digital illustration production course with a strong emphasis on concept development and image making skills. Students will create complex imagery based on manipulations of photographs or traditional drawings and paintings with an industry-standard image editing/manipulation software. Access to an appropriate high quality digital camera is required. It Is recommended that students take PGY 1801C at the same time or prior to taking this course.

▲Technology-Across-the-Curriculum Course.

GRA 1151C - Illustration I

3 Credit Hours
(Offered as needed)

A beginning course to develop basic technical and conceptual skills with a focus on an industry-standard vector-based drawing program. Students will create logos and illustrations typical of graphic design challenges.

▲Technology-Across-the-Curriculum Course.

GRA 2190C - Graphic Design I

3 Credit Hours
(Offered as needed)

An intermediate Graphic Design course that focuses on using an industry standard page layout software application. Students will be exposed to the ideas and aesthetics involved in the production of print publications. Access to a high quality digital camera required. It is recommended that students take PGY 1801C at the same time or prior to taking this course.

▲Technology-Across-the-Curriculum Course.

PGY 1801C - Digital Photography I

4 Credit Hours
(Offered as needed)

A beginning course in photography with an emphasis on digital darkroom production techniques. Students will be exposed to procedures and aesthetic concerns relating to photography and digital image production. Access to an appropriate high-quality camera required.

▲Technology-Across-the-Curriculum Course.

Total Core Credits Required: 26

Technical Elective Courses

Select 20 credits from the following:

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ART 1301C - Drawing II

3 Credit Hours
(Fall, Spring)

Continued study of drawing techniques explored in Drawing I. Provides experience with more complex drawing problems. Emphasis is on self-expression, value, color theory, and composition. A variety of subject matter and drawing media will be explored.

Prerequisite(s): ART 1300C. Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 1203C - Three-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with principles of organization and the elements of design in a 3-dimensional format. Various materials, tools, and surfaces are used to explore 3-D form. This is a foundation course. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2701C - Sculpture I

3 Credit Hours
(Spring)

An introductory course in the technical and aesthetic consideration of sculptural forms. Includes a wide range of materials and expressions, representing past and present sculptural methods. Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2703C - Sculpture II

3 Credit Hours
(Spring)

Allows continued experience in more complex three-dimensional techniques; emphasis on individual projects and conceptual approach.

Prerequisite(s): ART 2701C. Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2501C - Painting II

3 Credit Hours
(Fall, Spring)

This course is a continuation of Painting I ART 2500C with emphasis on further exploration of student’s personal style and original techniques. Further experimentation in abstraction and emotional aspects of form and color are explored

and expressed.

Prerequisite(s): ART 2500C. Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2955 - Portfolio Development

3 Credit Hours
(Spring)

Development of a working portfolio through studio project aimed at fulfilling the general requirements the average company, university, art school or advertising agency looks for in a portfolio presentation.

Prerequisite(s): ART 1201C, ART 1203C, ART 1300C, ART 1301C.

GRA 1152C - Illustration II

3 Credit Hours
(Offered as needed)

An advanced graphic design course building upon the skills covered in Illustration I; the course includes increased challenges relating to conceptual skills and multi-software integration relating to typical print-based design problems. Access to an appropriate high quality digital camera is required.

Prerequisite(s): GRA 1151C.

College Credit Certificate

Graphic Design Production (CCC)

Admission Program of Study Code GRDP
State CIP Code 0611080303

Students who successfully complete this certificate may be eligible to receive credits towards the Graphics Technology (Graphic Design) A.S. Degree (State CIP Code 1611080300).

Core Courses

ART 2602C - Digital Imaging I

4 Credit Hours
(Offered as needed)

A digital illustration production course with a strong emphasis on concept development and image making skills. Students will create complex imagery based on manipulations of photographs or traditional drawings and paintings with an industry-standard image editing/manipulation software. Access to an appropriate high quality digital camera is required. It Is recommended that students take PGY 1801C at the same time or prior to taking this course.

▲Technology-Across-the-Curriculum Course.

ART 2603C - Digital Imaging II

4 Credit Hours
(Offered as needed)

A continuing course which expands upon the technical and conceptual foundation laid in Digital Imaging I. Students will explore advanced software techniques and greater challenges of personal or commercial expression in digital media. Access to an appropriate high quality digital camera required.

Prerequisite(s): ART 2602C, PGY 1801C.

▲Technology-Across-the-Curriculum Course.

GRA 1151C - Illustration I

3 Credit Hours
(Offered as needed)

A beginning course to develop basic technical and conceptual skills with a focus on an industry-standard vector-based drawing program. Students will create logos and illustrations typical of graphic design challenges.

▲Technology-Across-the-Curriculum Course.

GRA 1152C - Illustration II

3 Credit Hours
(Offered as needed)

An advanced graphic design course building upon the skills covered in Illustration I; the course includes increased challenges relating to conceptual skills and multi-software integration relating to typical print-based design problems. Access to an appropriate high quality digital camera is required.

Prerequisite(s): GRA 1151C.

▲Technology-Across-the-Curriculum Course.

GRA 2190C - Graphic Design I

3 Credit Hours
(Offered as needed)

An intermediate Graphic Design course that focuses on using an industry standard page layout software application. Students will be exposed to the ideas and aesthetics involved in the production of print publications. Access to a high quality digital camera required. It is recommended that students take PGY 1801C at the same time or prior to taking this course.

- ____ ____ Mathematics **3 Credit Hours**

BSC 2020C - Human Structure and Function

4 Credit Hours
(Fall, Spring, Summer)

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

- ____ ____ Social Sciences **3 Credit Hours**
- ____ ____ Additional General Education Credits **2 Credit Hours**

Total General Education Credits Required: 18

Core Courses

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ENC 2210 - Technical Report Writing

3 Credit Hours
(Spring)

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Prerequisite(s): passing score on placement test.

HSA 1100 - Introduction to Health Care

3 Credit Hours
(Fall)

This course provides an overview of the United States Healthcare System, including the economic, social, political, and technological forces that shape the industry. The role of state and federal government and regulatory agencies in healthcare delivery is examined. The fundamental roles and responsibilities of healthcare team members are surveyed. Healthcare safety, security, and infection control procedures will also be discussed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1100 - Health Education

3 Credit Hours
(Spring)

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1400 - First Aid

3 Credit Hours
(Spring)

Preparation to meet emergencies that occur in the school, home or on the highway. Instruction and practice in dressing and bandaging, care of wounds, shock, bone and joint injuries, cardiopulmonary resuscitation, transportation of the injured oral poisoning and other medical emergencies.

HSC 1531 - Medical Terminology

3 Credit Hours
(Fall)

An introduction to prefixes, suffixes, root words, combining forms, Latin and Greek forms, spelling, and pronunciation, with emphasis on building a working medical vocabulary based on body systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1161 - Customer Service

3 Credit Hours
(Fall)

Designed to build and maintain the critical skills necessary to be a dynamic and successful professional. Students and front-line individuals who work with customers every day will develop strategies to create positive customer relationships. This course provides a practical approach to the thorny issues of customer dissatisfaction and will enable managers to keep service personnel focused on the organization's goals and objectives.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1345 - Supervision I

3 Credit Hours
(Spring)

The course presents the functions of a personnel manager, philosophy of general management, organizational structure, employer socioeconomic climate and career information. Included also are job descriptions and specifications, recruiting practices, applications, resumes, interviewing, placement, performance appraisals, wage

and salary administration and other related topics.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

SPC 2300 - Interpersonal Communication

3 Credit Hours †
(Fall, Spring)

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

or

OST 2335 - Business Communications

3 Credit Hours
(Fall, Spring)

Business Communications is a comprehensive coverage of language structure and particular emphasis on writing superior business letters and reports. Instruction in principle, then illustration, and practice in applying the principles. A fundamental concept of the appearance, language and style, tone and psychology of effective business letters.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Total Core Credits Required: 27

Technical Elective Courses

Select 15 credits from the following:

GEB 1011 - Introduction to Business

3 Credit Hours
(Fall)

Designed to give students a broad understanding of the nature of business and a preliminary idea of the various areas of business specialization.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2430 - Business Ethics

3 Credit Hours
(Fall)

This course addresses the legal, moral, and societal issues of ethical conduct in the business environment. Actual case studies are used to illustrate appropriate relationships among employers, employees, customers, stockholders, and other business stakeholders. Topics include: codes of ethics, laws and regulations related to ethics, conflict of

interest, and moral philosophies associated with ethical conduct.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1000 - Health Information and Delivery Systems

3 Credit Hours
(Fall, Spring)

Orientation to medical records history and professional associations. Confidentiality, filing, retrieving, indexing, numbering, storage and content of the medical record is also discussed. The course includes job search skills and professional job performance.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1012 - Health Care and Legal Compliance

3 Credit Hours
(Fall, Spring)

In-depth study of federal, state, local laws governing preparation, and use of the healthcare record in the healthcare delivery system.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2021 - Management

3 Credit Hours
(Fall)

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAR 2011 - Introduction to Marketing

3 Credit Hours
(Fall)

An introductory course in the field of marketing including a look at marketing as it exists in our economy today. Consideration of the market, the product, distribution channels. Special emphasis on the study of human behavior in marketing promotion.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1346 - Supervision II

3 Credit Hours
(Offered as needed)

The course presents a continuing study of the functions of a personnel manager, philosophy of general management, employee socioeconomic climate and other information. Included are orientation, training, labor unions, safety, health and other related topics.

Prerequisite(s): MNA 1345 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2100 - Organizational Behavior

3 Credit Hours
(Spring)

Designed to help students develop an understanding of how they may be motivated to work together in greater harmony in all kinds of organizations. The basis of human motivation and how it is influenced by leadership, the organization itself, and the social environment in which the organization exists.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Total Technical Elective Credits Required: 15

Total Program Credits Required: 60

Note(s):

***** *Anatomy & Physiology I with Anatomy & Physiology II may be substituted for BSC 2020C.*

*** Students who have successfully completed a health related program such as dental assisting, practical nursing, or surgical technology may challenge the Medical Terminology course. Contact the Division Director for further information.*

Culinary Management (AS)

Culinary Management

Admission Program of Study code: CUL

State CIP Code 1252090101

The Emerald Coast is one of the top tourist beach destinations in the U.S. and tourism is one of the leading industries in Northwest Florida. Northwest Florida State College's Culinary A.S. Degree Program is designed to support the tourism industry by preparing students for employment in the culinary and restaurant industry. Students will gain employability skills and knowledge through classroom instruction and culinary lab experience in the following courses Sanitation and Safety; Maintenance and Operation of Equipment; Methods of Preparation an d Cooking; Perform Different Types of Food Services; Nutrition; Baking; and Dining Room and Beverage Management. Students will also receive training in communications, leadership and human relations skills. This program focuses on broad, transferable skills and stresses understanding and demonstration of elements of the culinary industry. Careers include culinary manager, food and beverage manager, pantry cook, executive chef and many more.

Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in :

Chef's Apprentice (CCC)

Core Courses

FOS 2201 - Food Service Sanitation Management

3 Credit Hours
(Offered as Needed)

This course acquaints students with the Food and Drug Administration's Food Code as well as the challenges and opportunities facing hospitality managers in the area of sanitation management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Control Point Program (HACCP), and provides a basic understanding of quality sanitation management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 1001 - Culinary Techniques

3 Credit Hours
(Fall)

Emphasis in this course will be placed on the basic methods and chemistry of cooking. Students study ingredients, cooking, theories, terminology, equipment, technology, weights and measures, formula conversions and work on cooking skills and procedures.

Prerequisite(s): FOS 2201

FSS 1120 - Food and Beverage Purchasing

3 Credit Hours
(Offered as Needed)

Students will learn the fundamentals involved in purchasing food and beverages in quantity. The course emphasizes standardizing, grading and estimating, selecting, receiving and storing foods and beverages, as well as the practical application in writing specifications and in developing purchasing techniques.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 1202L - Food Production I

3 Credit Hours
(Fall)

Students will acquire knowledge and skill in the preparation of food. Included are basic principles and techniques of food preparation, management of resources, use of recipes, use and care of equipment, and evaluation of food products. The course emphasizes safety and sanitation practices.

Prerequisite(s): FOS 2201

FSS 1221L - Food Production II

3 Credit Hours
(Fall)

Students will focus on the knowledge and preparation of meats, poultry, seafood, as well as starches, fruits and vegetables. Students will learn to prepare menus for special dietary needs. This course will utilize all dry and moist methods of cooking. Menu selection and balance will be studied. The course emphasizes safety and sanitation procedures.

Prerequisite(s): FSS 1202L

FSS 1246L - Baking and Pastries I

3 Credit Hours
Students apply the fundamentals of baking science and pastry preparation to produce a variety of bread products and pastries. Special emphasis is given to the application of advanced techniques in bakery management and the use and care of equipment found in bake shops. Preparation of breads and rolls, classical cakes and icings. Student must pass written and practical baking examination covering a variety of techniques and procedures.

Prerequisite(s): FOS 2201

FSS 2100 - Food Plans and Menu Preparation

3 Credit Hours
(Fall)

Emphasizes the preparation of a nutritionally balanced cycle menu, portion control, use of leftovers and waste control. Students will study and prepare menus supporting the various food service and beverage industries.

FSS 2242L - International and Regional Cuisine

3 Credit Hours
(Fall)

Emphasis is placed on learning to use various condiments and seasonings that are indigenous to different parts of the world in food preparation. Topics may include Far East cuisine, Middle Eastern, Mediterranean, North African cuisine, Continental cuisine. Lectures, demonstrations and preparations will also cover American regional cooking. Student must successfully pass written and practical examination covering a variety of cooking techniques.

Prerequisite(s): FSS 1221L

FSS 2251 - Food and Beverage Management

3 Credit Hours
(Fall)

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

FSS 2284 - Catering, Banquet and Event Management

3 Credit Hours
(Fall)

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for various types of banquets, theme buffets, and physical management of floor lay-out and table setup.

Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

FSS 2500 - Food and Beverage Cost Control

3 Credit Hours
(Fall)

Emphasis given to methods of menu pricing, systems of controlling and accounting for food and beverage costs and methods of controlling sales income, through cost control systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 2942 - Culinary Internship

3 Credit Hours
(Fall)

The Program Director has the discretion to provide override approval as it relates to the waiver of required program/discipline-related courses. This course provides a planned work-based experience that will provide students with an opportunity to fine-tune skills learned in coursework and enhance workplace skills through supervised practical experiences related to their career objectives. Internship requires a minimum of 135 clock hours of work. May be repeated for credit, but grade forgiveness cannot be applied.

Prerequisite(s): Satisfactory completion of all General Education Classes, a minimum 2.0 institutional or overall GPA; and complete FSS 1202L , HFT 1000 , and FSS 1221L with a grade of "D" or better.

HFT 1000 - Introduction to Hospitality Management

3 Credit Hours
(Fall)

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

SLS 1101 - College Success

3 Credit Hours
(Fall, Spring, Summer)

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Total Core Credits Required: 42

Total Program Credits Required: 60

Suggested Academic Plan

This program admits students in the fall/spring/summer semester(s). Below is a sample academic plan for these students admitted in the identified semester.

Core Courses

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

FOS 2201 - Food Service Sanitation Management

3 Credit Hours
(Offered as Needed)

This course acquaints students with the Food and Drug Administration's Food Code as well as the challenges and opportunities facing hospitality managers in the area of sanitation management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Control Point Program (HACCP), and provides a basic understanding of quality sanitation management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 1250 - Dining Room Management

3 Credit Hours
(Offered Spring)

The various types of service appropriate to coffee shops, dining rooms, luncheons, banquets, and buffets.
The relationship between menu, equipment, supplies, merchandising, and personnel and patron acceptance.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 2251 - Food and Beverage Management

3 Credit Hours
(Fall)

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

FSS 2284 - Catering, Banquet and Event Management

3 Credit Hours
(Fall)

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for various types of banquets, theme buffets, and physical management of floor lay-out and table setup. Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

HFT 1000 - Introduction to Hospitality Management

3 Credit Hours
(Fall)

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1250 - Hotel and Resort Operations

3 Credit Hours
(Spring)

This course acquaints students with the operation of a hotel, motel and resort including front office procedures in registering, accounting for and checking out guests, promotional and sales practices, housekeeping, interior decoration, purchase of furniture, carpeting, linens and supplies, maintenance and engineering of a practical nature, facilities specifications, purchasing and storage.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1300 - Managing Housekeeping

3 Credit Hours
(Fall, As Needed)

Provides an overview of the fundamentals of housekeeping management. Describes management functions, tools, and practices required in today's lodging and institutional housekeeping departments.

HFT 1410 - Front Office Management

3 Credit Hours
(Fall)

This course guides students through all the skills including directing the activities and solving the complex problems, needed to properly manage the front office of a hotel/motel/resort. The course also acquaints students with the operation of all the departments as they apply to their primary responsibility of selling rooms and serving guests.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1500 - Marketing and Sales in the Hospitality Industry

3 Credit Hours
(Offered Fall, as needed)

How to sell and promote the many services the food service/lodging industries offer guests. How to operate a sales and convention department.

HFT 2210 - Hospitality Management

3 Credit Hours
(Spring)

Training in the techniques involved in the supervision of employees, developing sound relations with other departments, group discussions, and methods of improvement and development of cost consciousness. Job Analysis and job description techniques are developed. The course explores issues that make managing tourism and hospitality (T&H) businesses different to businesses in other sectors. These issues are faced by small and large T&H businesses alike: from owner-operator cafés, motels or tourism businesses to multi-national hotel chains, international airlines or tour companies.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2223 - Human Relations and Supervisory Development

3 Credit Hours
(Spring)

Designed to provide specific application of proven training systems and methods for managers in the hospitality industry.

HFT 2942 - Hospitality Internship

3 Credit Hours
(Offered Fall, Spring, Summer)

This course, an extension of Hospitality Internship (HFT2941), consists of on-the-job work experience supplied by the hotel, motel, resort and restaurant industries. Students will concentrate on 3 specific areas or functions that are career-goal oriented. Job placement will be dependent upon availability of participating hospitality institutions. The course consists of 90 hours of on-the-job instruction.

Prerequisite(s): HFT 1000 - Introduction to Hospitality Management **3 Credit Hours**
and FOS 2201 - Food Service Sanitation Management **3 Credit Hours**

SLS 1101 - College Success

3 Credit Hours
(Fall, Spring, Summer)

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

(Fall)

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

FSS 2284 - Catering, Banquet and Event Management

3 Credit Hours
(Fall)

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for various types of banquets, theme buffets, and physical management of floor lay-out and table setup. Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

FSS 2500 - Food and Beverage Cost Control

3 Credit Hours
(Fall)

Emphasis given to methods of menu pricing, systems of controlling and accounting for food and beverage costs and methods of controlling sales income, through cost control systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1000 - Introduction to Hospitality Management

3 Credit Hours
(Fall)

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2210 - Hospitality Management

3 Credit Hours
(Spring)

Training in the techniques involved in the supervision of employees, developing sound relations with other departments, group discussions, and methods of improvement and development of cost consciousness. Job Analysis and job description techniques are developed. The course explores issues that make managing tourism and

hospitality (T&H) businesses different to businesses in other sectors. These issues are faced by small and large T&H businesses alike: from owner-operator cafés, motels or tourism businesses to multi-national hotel chains, international airlines or tour companies.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2223 - Human Relations and Supervisory Development

3 Credit Hours
(Spring)

Designed to provide specific application of proven training systems and methods for managers in the hospitality industry.

HFT 2942 - Hospitality Internship

3 Credit Hours
(Offered Fall, Spring, Summer)

This course, an extension of Hospitality Internship (HFT2941), consists of on-the-job work experience supplied by the hotel, motel, resort and restaurant industries. Students will concentrate on 3 specific areas or functions that are career-goal oriented. Job placement will be dependent upon availability of participating hospitality institutions. The course consists of 90 hours of on-the-job instruction.

Prerequisite(s): HFT 1000 - Introduction to Hospitality Management **3 Credit Hours**
and FOS 2201 - Food Service Sanitation Management **3 Credit Hours**

Total Program Credits Required: 30

Suggested Academic Plan

This program admits students in the fall/spring/summer semester(s). Below is a sample academic plan for these students admitted in the identified semester

Admission Program of Study Code FBOP
State CIP Code 0252090508

Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism (AS) degree (State CIP Code 1252090101)

Core Courses

FOS 2201 - Food Service Sanitation Management

3 Credit Hours
(Offered as Needed)

This course acquaints students with the Food and Drug Administration's Food Code as well as the challenges and opportunities facing hospitality managers in the area of sanitation management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Control Point Program (HACCP), and provides a basic understanding of quality sanitation management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 1250 - Dining Room Management

3 Credit Hours
(Offered Spring)

The various types of service appropriate to coffee shops, dining rooms, luncheons, banquets, and buffets.
The relationship between menu, equipment, supplies, merchandising, and personnel and patron acceptance.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 2251 - Food and Beverage Management

3 Credit Hours
(Fall)

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

FSS 2284 - Catering, Banquet and Event Management

Core Courses

Required Course

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ETI 1710 - Occupational Safety

3 Credit Hours
(Spring, Summer, Fall)

A basic course in occupational safety and health covering such topics as: theories of accident causation, workplace hazards, hazard analysis and prevention, accident reporting, OSHA, ergonomics, product safety, workers' compensation, and stress on the job.

ETI 2110 - Total Quality Tools

3 Credit Hours
(Fall, Spring, Summer)

This course prepares students to effectively solve business/process/product problems, track process performance, find process and product improvement opportunities, and validate improvements made, using the necessary intellectual tools and procedures including: Five-S, flow charting, Pareto analysis, cause and effect diagrams, histograms, check sheets, scatter diagrams, stratification, statistical process control, failure mode and effects analysis.

GEB 1214 - Business and Supervision Terminology

2 Credit Hours
(Fall)

This course is designed for students to achieve mastery of the special vocabulary, jargon, and concept terminology associated with general business and supervision in the modern workplace. Students will apply the terms in common workplace scenarios and hypothetical situations, as well as in standard written documents and assignments.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2021 - Management

3 Credit Hours
(Fall)

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2300 - Personnel Management

3 Credit Hours
(Spring)

An introduction to personnel practices and procedures. Topics include the personnel management system, maximizing employee potential, organizational behavior, and labor management relations.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1345 - Supervision I

3 Credit Hours
(Spring)

The course presents the functions of a personnel manager, philosophy of general management, organizational structure, employer socioeconomic climate and career information. Included also are job descriptions and specifications, recruiting practices, applications, resumes, interviewing, placement, performance appraisals, wage and salary administration and other related topics.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2100 - Organizational Behavior

3 Credit Hours
(Spring)

Designed to help students develop an understanding of how they may be motivated to work together in greater harmony in all kinds of organizations. The basis of human motivation and how it is influenced by leadership, the organization itself, and the social environment in which the organization exists.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MTB 1103 - Business Mathematics

3 Credit Hours
(Fall)

This course presents basic principles used to solve everyday business problems, including a review of basic skills and business terminology. Topics in the course include the following: base, rate and percentage, trade and cash discounts, wage and salary administration, insurance (fire and automobile), depreciation and business profits, distribution of corporate dividends, simple interest and bank discount, and buying and selling of corporation bonds and stocks.

Prerequisite(s): completion of MAT 0028 with a "C" or better or satisfactory test scores. Knowledge of basic computer and keyboarding skills are strongly recommended.

Total Core Credits Required: 29

Technical Elective Courses

Select 13 credits from the following:

ACG 2011 - Accounting II

3 Credit Hours
(Spring)

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2071 - Managerial Accounting

3 Credit Hours
(Spring)

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Corequisite(s): ACG 2011 with instructor/department approval.

BUL 2241 - Business Law I

3 Credit Hours
(Fall, Spring)

Introductory course in business law with objective of presenting the law underlying business transactions. Course includes the study of the Law of Contracts, the Law of Bailments, and the Law of Sales based on the Uniform Commercial Code. Recommended for Business degree students.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2104 - Introduction to Windows

3 Credit Hours
(Spring)

An introduction to operating systems in general with emphasis on Windows.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

GEB 1011 - Introduction to Business

3 Credit Hours
(Fall)

Designed to give students a broad understanding of the nature of business and a preliminary idea of the various

areas of business specialization.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1940 - Internship - Business

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

This course may be taken up to two times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

GEB 2430 - Business Ethics

3 Credit Hours
(Fall)

This course addresses the legal, moral, and societal issues of ethical conduct in the business environment. Actual case studies are used to illustrate appropriate relationships among employers, employees, customers, stockholders, and other business stakeholders. Topics include: codes of ethics, laws and regulations related to ethics, conflict of interest, and moral philosophies associated with ethical conduct.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2947 - Academic Learning Field Studies I

1 Credit Hour
(Offered as Needed)

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2948 - Academic Learning Field Studies II

2 Credit Hours
(Offered as Needed)

This course gives students the opportunity to understand the relationship of theory to practice through participation in

a service-learning experience.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2949 - Academic Learning Field Studies III

3 Credit Hours
(Offered as Needed)

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1161 - Customer Service

3 Credit Hours
(Fall)

Designed to build and maintain the critical skills necessary to be a dynamic and successful professional. Students and front-line individuals who work with customers every day will develop strategies to create positive customer relationships. This course provides a practical approach to the thorny issues of customer dissatisfaction and will enable managers to keep service personnel focused on the organization's goals and objectives.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2335 - Business Communications

3 Credit Hours
(Fall, Spring)

Business Communications is a comprehensive coverage of language structure and particular emphasis on writing superior business letters and reports. Instruction in principle, then illustration, and practice in applying the principles. A fundamental concept of the appearance, language and style, tone and psychology of effective business letters.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

SPC 2300 - Interpersonal Communication

3 Credit Hours †
(Fall, Spring)

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

Total Technical Elective Credits Required: 13

Total Program Credits Required: 60

Suggested Two Year Academic Plan

This program admits students in the fall/spring/summer semester(s). Below is a sample academic plan for these students admitted in the identified semester.

Industrial Management Technology (AS) (INDU)

Medical Coder/Biller

College Credit Certificate

Medical Coder/Biller (CCC)

Admission Program of Study Code MEDB
State CIP Code 0351070714

Core Courses

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

with

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

OR

BSC 2020C - Human Structure and Function

4 Credit Hours
(Fall, Spring, Summer)

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

HSC 1531 - Medical Terminology

3 Credit Hours
(Fall)

An introduction to prefixes, suffixes, root words, combining forms, Latin and Greek forms, spelling, and pronunciation, with emphasis on building a working medical vocabulary based on body systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1000 - Health Information and Delivery Systems

3 Credit Hours
(Fall, Spring)

Orientation to medical records history and professional associations. Confidentiality, filing, retrieving, indexing, numbering, storage and content of the medical record is also discussed. The course includes job search skills and professional job performance.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1012 - Health Care and Legal Compliance

3 Credit Hours
(Fall, Spring)

In-depth study of federal, state, local laws governing preparation, and use of the healthcare record in the healthcare delivery system.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1432 - Pathopharmacology

3 Credit Hours
(Fall)

Introduction to the nature, cause, and treatment of disease entities and the body's defense mechanisms. Commonly used drugs will also be discussed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2253 - CPT Coding - Part 1

3 Credit Hours
(Spring)

Instruction and practice in basic CPT coding conventions, principles of classifying physician services using current procedural terminology (CPT-4), APC, and auditing procedures. Ethical standards of practice will be analyzed.

Prerequisite(s): HSC 1531 and HIM 1432 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites: BSC 2020C OR (BSC 1085C AND BSC 1086C)

(Previously listed as HIM1253)

HIM 2272 - Healthcare Reimbursement

3 Credit Hours
(Summer)

Emphasis on billing regulations for the State of Florida. Course content includes LMRPS, Workers' Compensation laws, Florida Medicare, and claims for automobile accident injuries.

Prerequisite(s): HIM 2253 and HIM 2724 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2291 - CPT Coding Part 2

3 Credit Hours
(Spring)

This is an advanced course in ICD, CPT and HCPCS coding systems. Students will learn guidelines and applications to more complex case studies and health records according to current ethical standards of practice, inpatient and outpatient prospective payment systems, encoding software and RBRVs.

Prerequisite(s): HIM 2253 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2724 - ICD Coding Part 1

3 Credit Hours
(Fall)

This course provides a foundation using ICD-10-CM/PCS coding conventions, rules, methodology and sequencing, data sets, documentation requirements, and coding resources.

Prerequisite(s): HSC 1531 and HIM 1432 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites: BSC 2020C OR (BSC 1085C AND BSC 1086C)

HIM 2729 - ICD Coding Part 2

3 Credit Hours
(Fall)

This course focuses on assigning appropriate ICD, DRG, and Level II (HCPCS) codes to a wide range of original source medical documents. This course increases the quality of code selection by applying the decision process in problem solving using well-defined medical record review methods and guidelines. Ethical practices will be discussed.

Prerequisite(s): HIM 2724 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2815C - Professional Practice Experience

3 Credit Hours
(Summer)

Working in a simulated, online environment, students will endeavor to code and bill using nationally recognized, American Health Information Management Association (AHIMA) simulation software.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s): HIM 2291 and HIM 2729

Total Core Credits Required: 37

Total Program Credits Required: 37

Notes:

- Students must earn a grade of "C" or higher in each course in the curriculum in order to progress through the curriculum.
- Students must have a High School Diploma or GED to graduate from this program.

Suggested Academic Plan

This program admits students in the fall/spring/summer semester(s). Below is a sample academic plan for these students admitted in the identified semester.

Music Production Technology

Associate in Science

Music Production Technology (AS)

Admission Program Objective Code MUSC
State CIP Code 1650091300

Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in Audio Technology (Recording Arts) (CCC) (State CIP Code 0650060209).

General Education

Select one course from each category; see the AS Degree General Education Requirements section of catalog for specific course listings:

- ____ ____ Communication Skills **3 Credit Hours**
- ____ ____ Humanities **3 Credit Hours**

- ____ ____ Mathematics **3 Credit Hours**
- ____ ____ Natural Sciences **3 Credit Hours**
- ____ ____ Social Sciences **3 Credit Hours**
- ____ ____ Additional General Education Credits **3 Credit Hours**

Total General Education Credits Required: 18

Core Courses

MUM 1620 - Audio and Acoustic Fundamentals

3 Credit Hours
(Fall, Spring, Summer)

Audio and Acoustic Fundamentals explores the basics of audio systems and equipment and the acoustical environment in which they are used. Emphasis is placed on equipment terminology, function and acoustical listening. The two basic fundamentals are summed together to begin laying the basic foundation required to operate audio and recording equipment.

MUM 2300 - Introduction to the Music Industry

3 Credit Hours
(Summer)

This course is an introduction to the history, principles, and practices of the music industry. Topics will include music publishing, copyright, distribution, industry organization, producing, and general business functions.

MUM 2600 - Recording Techniques I

3 Credit Hours
(Fall, Spring, Summer)

This course is designed as an introduction to basic audio engineering and studio practices. Listening exercises, phychoacoustics, microphone characteristics, and studio etiquette will be studied. In addition the student will study techniques and practices and procedures of multi-track recording, acoustical balancing, editing, and over dubbing in a variety of situations.

Prereq/Corequisites: MUM 1620

MUM 2601 - Recording Techniques II

3 Credit Hours
(Fall, Spring, Summer)

This course explores advanced multi-track recording skills and audio production techniques, edits, use of outboard equipment and live multi-track recording.

Prerequisite(s): MUM 1620, MUM 2600.

MUM 2604 - Multi-Track Mixdown (Post Production)

3 Credit Hours
(Fall, Spring, Summer)

This course explores the application of signal processing equipment as it relates to multi-track master mixdowns. In addition, software and hardware application of mixdown is applied to post-production practices.

Prerequisite(s): MUM 1620, MUM 2600, MUM 2601.

Total Core Credits Required: 15

Technical Elective Courses

Select 31 credits from the following:

MUL 1010 - Music Appreciation

3 Credit Hours † ♦ ¶
(Fall, Spring, Summer)

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUT 1111 - Music Theory I

3 Credit Hours
(Fall, Spring)

A study of the fundamentals of basic musicianship, music notation, simple rhythms, key signatures, intervals, major and minor scales, intervals, triads, 7^{th} chords, polyphonic composition and elementary keyboard work. This course also introduces students to tools necessary for analyzing musical compositions of the 17^{th} & 18^{th} centuries.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1241

MUT 1112 - Music Theory II

3 Credit Hours
(Fall, Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, species counterpoint, chord structures, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1111

Corequisite(s): MUT 1242

MUT 2116 - Music Theory III

3 Credit Hours
(Fall)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including secondary chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1112

Corequisite(s): MUT 2246

MUT 2117 - Music Theory IV

3 Credit Hours
(Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including modulation, non-tonicizing fully diminished 7th chords, augmented 6th chords, mode mixture, Neapolitan chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries while providing an introduction to Romantic period and chromatic musical structures.

Prerequisite(s): MUT 2116

MUT 1241 - Ear Training and Sight Singing I

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1111

MUT 1242 - Ear Training and Sight Singing II

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1241

Corequisite(s): MUT 1112

MUT 2246 - Ear Training and Sight Singing III

1 Credit Hour
(Fall)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1242

Corequisite(s): MUT 2116

MUT 2247 - Ear Training and Sight Singing IV

1 Credit Hour
(Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 2246

Corequisite(s): MUT 2117

Natural Gas Operations and Distribution

Vocational Certificate

Natural Gas Operations and Distribution (PSAV)

Admission Program of Study Code GAS

State CIP Code 0647000002

Basic Skills Requirements: The student must be exempt or attain a **9th grade level** on each section of the TABE exam: Math, Language and Reading.

Core Courses

PMT 0106C - Welder Helper

150 Clock Hours
(Fall, Spring)

This course provides instruction in shop safety, the use of safety procedures and protective equipment needed in a welding shop. Course incudes basic shop math, shop safety, welding equipment setup/teardown procedures.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0111C - Metal Preparation

150 Clock Hours
(Fall, Summer)

This course provides instruction in different metal preparation processes including: thermal preparation (oxygen/fuel cutting, carbon arc cutting, plasma torch cutting). The student will also learn mechanical preparation (band saw, grinder, power brush, and other metal prep equipment).

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

TRA 0080 - Tractor Trailer Truck Driver

320 Clock Hours
(Spring)

This course prepares students for entry into the trucking and logistics industry. Students explore career opportunities and requirements of a professional tractor trailer driver. Students study vehicle safety, accident prevention, operating regulations, cargo handling, documentation procedures, pre-trip

preparation, vehicle inspection, maintenance, service, control procedures, backing, coupling, uncoupling, maneuvering, road and hazardous driving skills, and licensing requirements.

TRA 0086 - Tractor Operator

150 Clock Hours
(Fall)

This course is designed to build on the skills and knowledge students learned in the Heavy Equipment Maintenance Technician course for entry into the Heavy Equipment Operations industry. Content emphasizes beginning skills and concepts as a recommended requisite. Students study pneumatic and crawler-type tractor operations.

TRA 0650 - Natural Gas Distribution I

75 Clock Hours
(Fall)

This course prepares students for work as general technicians in the natural gas distribution industry. Students learn to comply with safety procedures, operate basic tools and equipment and provide customer assistance.

TRA 0651 - Natural Gas Distribution II

150 Clock Hours
(Fall)

This course prepares students for work as general technicians in the natural gas distribution industry. Students complete customer compliance orders and assist in inspections. Content includes construction mathematics and reading.

Prerequisite(s): TRA 0650

TRA 0652 - Natural Gas Distribution III

150 Clock Hours
(Fall)

This course prepares students for work as general technicians in the natural gas distribution industry. Students complete customer compliance orders and assist in inspections. Content includes construction mathematics and reading.

Total Program Hours Required: 1220

Suggested Academic Plan

This program admits students in the fall/spring/summer. Below is a sample academic plan for these students in this clock hour program.

Total General Education Credits Required: 18

Core Courses

CET 2660 - Network Security

3 Credit Hours
(Fall, Spring)

This course provides an in-depth study of network security concepts and techniques. Students examine theoretical concepts that make computer network security unique. This course provides a practical, hands-on approach when examining networking security techniques. Students examine different network strategies, explore the advancement of network implementation, and study timeless problem solving strategies. The course is also intended to assist with preparation for the CompTIA Security+ certification.

Prerequisite(s): Knowledge of networking basic computer, and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1134 - Network Foundations

3 Credit Hours
(Fall)

This course is designed to introduce students to the terminology and concepts of the network industry, including data communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 1600C - Networking Fundamentals

3 Credit Hours
(Fall, Spring)

This course introduces the student to the basics of Internetworking technology. This is also the first of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study networks and layers, networking devices, IP addressing, ARP and RARP, media and design, topology, structured cabling, electricity, and electronics and network management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 1610C - Routing Protocols and Concepts

3 Credit Hours
(Fall, Spring)

Basic Router terminology and configurations are studied in this course. The student will study router components, router configuration, IOS, TCP/IP, IP addressing, and router protocols. This is one of the four courses designed to prepare a student to take the CISCO Certified Network Associate Exam (CCNA).

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites: CET 1600C is required.

▲Technology-Across-the-Curriculum Course.

CET 1675C - Introduction to IP Telephony

3 Credit Hours
(Fall)

This course explains how companies are using IP Telephony equipment and software to efficiently upgrade existing telephone systems. In addition, the course will give the student a fundamental understanding of the architecture of voice communication and how signaling, call quality and public switched telephone networks operate in a LAN/WAN networking environment. The use of IP Telephony products will be discussed and how software allows companies to cost-effectively upgrade and eventually replace existing (legacy) telephone systems with more cost-effective and easy-to-use telephone equipment.

Prerequisite(s): CET 1600C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 1854C - Introduction to Wireless Technology

3 Credit Hours
(Fall)

This course teaches key wireless networking topics, including wireless technology and architecture network design, types of wireless networks, and applications. Special focus on technical matters, wireless communication products, wireless networking products, and wireless LANS products. It is recommended that all students have a least a basic knowledge of networking, including protocol, the OSI module, and TCIP/IP.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2682C - Cisco Voice over IP (VoIP)

3 Credit Hours
(Spring)

Instruction includes, but is not limited to, Voice over Internet Protocol (VoIP) theory, Voice Gateway configuration in a IP Telephony (IPT) solution, IP Phone configuration, design of VoIP networks and troubleshooting IPT networks. Students will design and configure various VoIP networks using case studies and laboratory equipment.

Prerequisite(s): CET 1675C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

Total Core Credits Required: 21

Technical Elective Courses

Select 21 credits from the following:

CAP 2134C - Database Security

3 Credit Hours
(Spring)

This course is designed to provide the student with an understanding of database security concepts and practices. The objective of the course is to provide hands-on instruction in various database tasks that relate to securing the confidentiality, integrity and availability of information that is stored in a database. The student will be able to perform administrative tasks in different database management systems, as well as manage database user profiles, privileges, and roles. Different database application security models will be explored, as will the security advantages of utilizing virtual private databases. Finally, the process of database auditing will be explored, including auditing methods using various database management systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites: CET 2660

▲Technology-Across-the-Curriculum Course.

CET 2179C - PC Operating Systems A+

3 Credit Hours
(Fall)

This course is designed to help prepare the student to take the A+ Certification exams by making the student proficient in personal computer operating systems, including Win 2000, Win XP, and Win Vista. Major topics include disk and file management, system configurations, menu driven processing, graphical user interfaces, boot files, disk caching, virtual memory, device drivers, remote assistance, and security essentials and security practices.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2182C - PC Hardware A+

3 Credit Hours
(Spring)

This course is designed to prepare the student to take the A+ Certification exam, by teaching the student basic technical skills needed to understand the function and operation of the major elements of personal computer systems, and how to localize and correct common hardware and software problems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2615C - LAN Switching and Wireless

3 Credit Hours
(Spring)

This course introduces the student to fundamentals of LAN configurations. This is also the third of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study LAN Switching, VLANS, OSPF, EIGRP, VTP, classless routing and Access Lists.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2620C - Accessing the WAN

3 Credit Hours
(Spring)

This course introduces the student to advanced router configurations and network design. This is also the last of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study WAN technology and design, PPP, ISDN, Frame Relay, and network management.

Prerequisite(s): CET 2615C isrequired. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2685C - Fundamentals of Network Security

3 Credit Hours
(Spring)

Introduction to network security and overall security processes. This hands-on, skill-based course focuses on the design and implementation of security solutions to reduce the vulnerability of the network, using VPNs, network routers and a firewall. This course helps prepare the student for the CISCO Security Specialist certification.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2854C - Fundamentals of Wireless LANs

3 Credit Hours
(Offered as needed)

Develop, implement and troubleshoot wireless networks. This hands-on, skill-based course focuses on the design, planning and operation of wireless networks, with an overview of technologies, security, and design best practices. This course helps prepare the student for the CISCO Wireless Certification.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2891C - Wireless Network Security Certification

3 Credit Hours
(Offered as needed)

This course prepares students to secure wireless networks and protect valuable data from intruders. The following subjects are covered: intrusion tools and techniques, detection systems, WPA/WPA2/802.11i security, enterprise wireless gateways, encryption gateways, secure wireless bridging, and wireless VPN routers. This course prepares students for the compTIA wireless certification exam.

Prerequisite(s): CET 1854C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2940 - Computer Engineering Internship

1 Credit Hour
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): active enrollment in an appropriate degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

This course may be taken up to four times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.
▲Technology-Across-the-Curriculum Course.

CTS 1156C - Desktop Support

3 Credit Hours
(Fall)

This course introduces the helpdesk skills to troubleshoot hardware or software operation and application problems for end users on the desktop or client-side, based on the Windows operating system. It is designed to help prepare the student to take the two core exams (70-620 and 70-622) required for certification as an MCITP: Enterprise Support Technician students should have user-level competency with Windows and MS Office.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2163C - Windows 10 Client Operating System

3 Credit Hours
(Spring)

This course addresses the implementation and desktop support needs of the MS client software, including installation, configuration and management of hardware and file systems, user profiles, remote users, and monitoring of resources and performance. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2314C - Network Defense and Countermeasures

3 Credit Hours
(Spring)

This course will explore concepts of network defense and countermeasures as well as hardware and software required to design, configure and implement secure networks. Security topics covered in this course include firewalls, Intrusion Detection Systems (IDS), Virtual Private Networks (VPN) and policy creation using the Windows Operating System (OS), Transmission Control Protocol/Internet Protocol (TCP/IP) packet and signature analysis. The student will get hands-on instruction installing the network defense mechanisms and countermeasure applications. Software will be used for collecting, monitoring and auditing various activities; students will analyze threats and intrusions.

Prerequisite(s): CET 2660 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

Digital Forensics (CCC)

Admission Program of Study Code DGFO
State CIP Code 0511100119

Students who successfully complete this certificate may be eligible to receive credits towards the Network Systems Technology (AS) degree (State CIP Code 1511100112).

Core Courses

CET 1600C - Networking Fundamentals

3 Credit Hours
(Fall, Spring)

This course introduces the student to the basics of Internetworking technology. This is also the first of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study networks and layers, networking devices, IP addressing, ARP and RARP, media and design, topology, structured cabling, electricity, and electronics and network management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 1610C - Routing Protocols and Concepts

3 Credit Hours
(Fall, Spring)

Basic Router terminology and configurations are studied in this course. The student will study router components, router configuration, IOS, TCP/IP, IP addressing, and router protocols. This is one of the four courses designed to prepare a student to take the CISCO Certified Network Associate Exam (CCNA).

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites: CET 1600C is required.

▲Technology-Across-the-Curriculum Course.

CET 2660 - Network Security

3 Credit Hours
(Fall, Spring)

This course provides an in-depth study of network security concepts and techniques. Students examine theoretical

concepts that make computer network security unique. This course provides a practical, hands-on approach when examining networking security techniques. Students examine different network strategies, explore the advancement of network implementation, and study timeless problem solving strategies. The course is also intended to assist with preparation for the CompTIA Security+ certification.

Prerequisite(s): Knowledge of networking basic computer, and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2182C - PC Hardware A+

3 Credit Hours
(Spring)

This course is designed to prepare the student to take the A+ Certification exam, by teaching the student basic technical skills needed to understand the function and operation of the major elements of personal computer systems, and how to localize and correct common hardware and software problems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2880C - Digital Forensics Fundamentals

3 Credit Hours
(Spring)

This course offers a solid foundation to computer forensics investigations: preparing students to acquire and analyze digital evidence. the course covers tools and techniques and explains topics such as file structure, data recovery, e-mail and network investigations, and expert witness testimony. In addition, the student will gain practical knowledge in conducting digital investigations and preserving digital evidence that maybe used in court or corporate inquiries.

Prerequisite(s): CTS 1134 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2881C - Digital Forensics II

3 Credit Hours
(Summer)

Digital Forensics II builds upon the foundational knowledge learned in digital forensics fundamentals. Students will utilize industry standard tools to conduct examinations of various digital media and document their findings. Devices to be studied include computers (server, desktop, laptop), mobile devices (tablets, cell phones, smart phones, mp3 players, gps), and devices such as dvr's and routers. Emphasis will be placed upon real-world digital forensics scenarios and the investigative thought process. At the conclusion of the class, students will be prepared to take the accessdata certified examiner (ace) examination.

Prerequisite(s): CET 2880C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2314C - Network Defense and Countermeasures

3 Credit Hours
(Spring)

This course will explore concepts of network defense and countermeasures as well as hardware and software required to design, configure and implement secure networks. Security topics covered in this course include firewalls, Intrusion Detection Systems (IDS), Virtual Private Networks (VPN) and policy creation using the Windows Operating System (OS), Transmission Control Protocol/Internet Protocol (TCP/IP) packet and signature analysis. The student will get hands-on instruction installing the network defense mechanisms and countermeasure applications. Software will be used for collecting, monitoring and auditing various activities; students will analyze threats and intrusions.

Prerequisite(s): CET 2660 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1134 - Network Foundations

3 Credit Hours
(Fall)

This course is designed to introduce students to the terminology and concepts of the network industry, including data communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Technical Elective Courses

Select 8 credits from the following:

CET 2615C - LAN Switching and Wireless

3 Credit Hours
(Spring)

This course introduces the student to fundamentals of LAN configurations. This is also the third of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study LAN Switching, VLANS, OSPF, EIGRP, VTP, classless routing and Access Lists.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2620C - Accessing the WAN

3 Credit Hours
(Spring)

This course introduces the student to advanced router configurations and network design. This is also the last of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study WAN technology and design, PPP, ISDN, Frame Relay, and network management.

Prerequisite(s): CET 2615C isrequired. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2685C - Fundamentals of Network Security

3 Credit Hours
(Spring)

Introduction to network security and overall security processes. This hands-on, skill-based course focuses on the design and implementation of security solutions to reduce the vulnerability of the network, using VPNs, network routers and a firewall. This course helps prepare the student for the CISCO Security Specialist certification.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2854C - Fundamentals of Wireless LANs

3 Credit Hours
(Offered as needed)

Develop, implement and troubleshoot wireless networks. This hands-on, skill-based course focuses on the design, planning and operation of wireless networks, with an overview of technologies, security, and design best practices. This course helps prepare the student for the CISCO Wireless Certification.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CIS 2352C - Ethical Hacking Fundamentals

3 Credit Hours
(Fall)

This course is designed to provide the student with an understanding of the techniques and methodologies of security penetration testing. This course provides hands-on instruction using the various tools and methods that security professionals use to analyze an information system in order to discover vulnerabilities and protect against information loss, cyber-terrorism, and corporate espionage. The student will be introduced to fundamental security testing concepts, gain practical knowledge of computer programming, learn how to properly document a security test, and explore the legal and ethical ramifications of penetration testing. Students will also learn how to apply the appropriate countermeasures in order to reduce the risk that an organization faces.

Prerequisite(s): CTS 1134 is required. Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

Total Technical Elective Credits Required: 8

Total Program Credits Required: 32

3 Credit Hours
(Offered as needed)

Develop, implement and troubleshoot wireless networks. This hands-on, skill-based course focuses on the design, planning and operation of wireless networks, with an overview of technologies, security, and design best practices. This course helps prepare the student for the CISCO Wireless Certification.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1106 - Fundamentals of UNIX

3 Credit Hours
(Spring)

This course is designed to introduce the UNIX operating system to new users. The student will learn fundamental features of the operating system, including file system navigation, file permissions, editors, command shells, and basic network use. Provides a foundation for more advanced courses in administration and certification.

Prerequisite(s): Knowledge of networking, basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1134 - Network Foundations

3 Credit Hours
(Fall)

This course is designed to introduce students to the terminology and concepts of the network industry, including data communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1156C - Desktop Support

3 Credit Hours
(Fall)

This course introduces the helpdesk skills to troubleshoot hardware or software operation and application problems for end users on the desktop or client-side, based on the Windows operating system. It is designed to help prepare the student to take the two core exams (70-620 and 70-622) required for certification as an MCITP: Enterprise

Support Technician students should have user-level competency with Windows and MS Office.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2321 - UNIX Administration

3 Credit Hours
(Offered as needed)

This course is designed for network administrators in a UNIX operating environment. UNIX operating system concepts, architecture and administration will be explored using Linux. Includes shell programming, database managements, rapid application development, and programming tools such as PERL and C++.

Prerequisite(s): CTS 1134 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s): CTS 1106

CET 2660 - Network Security

3 Credit Hours
(Fall, Spring)

This course provides an in-depth study of network security concepts and techniques. Students examine theoretical concepts that make computer network security unique. This course provides a practical, hands-on approach when examining networking security techniques. Students examine different network strategies, explore the advancement of network implementation, and study timeless problem solving strategies. The course is also intended to assist with preparation for the CompTIA Security+ certification.

Prerequisite(s): Knowledge of networking basic computer, and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2685C - Fundamentals of Network Security

3 Credit Hours
(Spring)

Introduction to network security and overall security processes. This hands-on, skill-based course focuses on the design and implementation of security solutions to reduce the vulnerability of the network, using VPNs, network routers and a firewall. This course helps prepare the student for the CISCO Security Specialist certification.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2892C - Advanced Network Security

3 Credit Hours
(Spring)

This course examines advanced network security topics including, but not limited to, advanced topics in integration of hardware firewalls, advanced topics in Intrusion Detection Systems (IDS), advanced topics in Internet Protocol-security (IPSec), and advanced topics in Virtual Private Networking (VPN) in network security design. Students will implement designs using equipment in a laboratory setting.

Prerequisite(s): CET 2660 is required and knowledge of basic computer and keyboarding skills are strongly

recommended.

▲Technology-Across-the-Curriculum Course.

COP 1000 - Introduction to Programming Concepts and Logic

3 Credit Hours
(Fall, Spring, Summer)

General survey of programming/problem solving techniques. Includes an introduction to structured programming. Algorithm development will employ the use of a modern programming language.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1134 - Network Foundations

3 Credit Hours
(Fall)

This course is designed to introduce students to the terminology and concepts of the network industry, including data communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

Total Core Credits Required: 24

Technical Elective Courses

Select 6 credits from the following:

CET 1854C - Introduction to Wireless Technology

3 Credit Hours
(Fall)

This course teaches key wireless networking topics, including wireless technology and architecture network design, types of wireless networks, and applications. Special focus on technical matters, wireless communication products, wireless networking products, and wireless LANS products. It is recommended that all students have a least a basic knowledge of networking, including protocol, the OSI module, and TCIP/IP.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2615C - LAN Switching and Wireless

3 Credit Hours
(Spring)

This course introduces the student to fundamentals of LAN configurations. This is also the third of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study LAN Switching, VLANS, OSPF, EIGRP, VTP, classless routing and Access Lists.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2620C - Accessing the WAN

3 Credit Hours
(Spring)

This course introduces the student to advanced router configurations and network design. This is also the last of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study WAN technology and design, PPP, ISDN, Frame Relay, and network management.

Prerequisite(s): CET 2615C isrequired. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2891C - Wireless Network Security Certification

3 Credit Hours
(Offered as needed)

This course prepares students to secure wireless networks and protect valuable data from intruders. The following subjects are covered: intrusion tools and techniques, detection systems, WPA/WPA2/802.11i security, enterprise wireless gateways, encryption gateways, secure wireless bridging, and wireless VPN routers. This course prepares students for the compTIA wireless certification exam.

Prerequisite(s): CET 1854C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2314C - Network Defense and Countermeasures

3 Credit Hours
(Spring)

This course will explore concepts of network defense and countermeasures as well as hardware and software required to design, configure and implement secure networks. Security topics covered in this course include firewalls, Intrusion Detection Systems (IDS), Virtual Private Networks (VPN) and policy creation using the Windows Operating System (OS), Transmission Control Protocol/Internet Protocol (TCP/IP) packet and signature analysis. The student will get hands-on instruction installing the network defense mechanisms and countermeasure applications. Software will be used for collecting, monitoring and auditing various activities; students will analyze threats and intrusions.

Prerequisite(s): CET 2660 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CIS 2352C - Ethical Hacking Fundamentals

3 Credit Hours
(Fall)

This course is designed to provide the student with an understanding of the techniques and methodologies of security penetration testing. This course provides hands-on instruction using the various tools and methods that security professionals use to analyze an information system in order to discover vulnerabilities and protect against information loss, cyber-terrorism, and corporate espionage. The student will be introduced to fundamental security testing concepts, gain practical knowledge of computer programming, learn how to properly document a security test, and explore the legal and ethical ramifications of penetration testing. Students will also learn how to apply the appropriate countermeasures in order to reduce the risk that an organization faces.

Prerequisite(s): CTS 1134 is required. Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

Network Server Administration (CCC)

Admission Program of Study Code NNSA
State CIP Code 0511100112

Students who successfully complete this certificate may be eligible to receive credits towards the Network Systems Technology A.S. degree (State CIP Code 1511100112).

Core Courses

CET 2660 - Network Security

3 Credit Hours
(Fall, Spring)

This course provides an in-depth study of network security concepts and techniques. Students examine theoretical concepts that make computer network security unique. This course provides a practical, hands-on approach when examining networking security techniques. Students examine different network strategies, explore the advancement of network implementation, and study timeless problem solving strategies. The course is also intended to assist with preparation for the CompTIA Security+ certification.

Prerequisite(s): Knowledge of networking basic computer, and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1134 - Network Foundations

3 Credit Hours
(Fall)

This course is designed to introduce students to the terminology and concepts of the network industry, including data

communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2163C - Windows 10 Client Operating System

3 Credit Hours
(Spring)

This course addresses the implementation and desktop support needs of the MS client software, including installation, configuration and management of hardware and file systems, user profiles, remote users, and monitoring of resources and performance. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2302C - Windows Active Directory

3 Credit Hours
(Spring)

This course focuses on a Windows server directory service environment, including forest and domain structure, DNS, site topology and replication, organizational unit structure and delegation of administration, Group Policy, and user/group/computer account strategies. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Prerequisite(s): CTS 1156C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2390C - Installing and Configuring Windows Server 2016

3 Credit Hours
(Spring)

This course is the first of a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server 2016 infrastructure in an existing enterprise environment. The three courses in total collectively cover implementing, managing, maintaining, and provisioning services and infrastructure in a Windows Server 2016 environment. While there is some cross-over in skill set and tasks across the courses, this course primarily covers the initial implementation and configuration of those core services, such as Active Directory Domain Services, networking services, and initial Hyper-V configuration and is also preparation material for, Exam 70-410: Installing and Configuring Windows Server 2016.

Prerequisite(s): CTS 1156C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

Total Program Credits Required: 15

Technical Requirement Courses

CET 2182C - PC Hardware A+

3 Credit Hours
(Spring)

This course is designed to prepare the student to take the A+ Certification exam, by teaching the student basic technical skills needed to understand the function and operation of the major elements of personal computer systems, and how to localize and correct common hardware and software problems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2391C - Administering Windows Server 2016

3 Credit Hours
(Spring)

This course is the second in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server 2016 infrastructure in an existing enterprise environment. The three courses in total will collectively cover implementing, managing, maintaining and provisioning services and infrastructure in a Windows Server 2016 environment. While there is some cross-over in skills and tasks across the courses, this course will primarily cover the administration tasks necessary to maintain a Windows Server 2016 infrastructure, such as user and group management, network access and data security and is also preparation material for, Exam 70-411: Administering Windows Server 2016.

Prerequisite(s): CTS 2390C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2392C - Configuring Advanced Windows Server 2016

3 Credit Hours
(Summer)

This course is the third in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server 2016 Infrastructure in an existing enterprise environment. While there is some cross-over in skill sets and tasks across the three courses this course will primarily cover advanced configuration and services tasks necessary to deploy, manage and maintain a Windows Server 2016 infrastructure, such as identity management and identity federation, network load balancing, business continuity and disaster recovery, fault tolerance and rights management. This course is also preparation material, and maps directly to, Exam 70-412: Configuring Advanced Windows Server 2016 Services.

Prerequisite(s): CTS 2391C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

Total Technical Requirement Credits Required: 9

Total Program Credits Required: 24

Suggested Academic Plan

Nursing

Associate in Science

Nursing (AS)

Admission Program Objective Code NURS
State CIP Code 1351380100

This program is a Selective Admission program subject to additional program policies and licensure requirements stipulated in the "Nursing Program Student Handbook." Policies are strictly enforced and students should work with the Nursing Program staff rather than self-advise. The admission criteria and process are subject to change; students should contact the Associate Degree Nursing Program office for the most current information.

General Education

Unless otherwise noted, select one course from each category; see the AS Degree General Education Requirements section of catalog for specific course listings:

ENC 1101 - English Composition I

3 Credit Hours ♦ ▲ ¶
(Fall, Spring, Summer)

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

▲ Technology-Across-the-Curriculum Course

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

- ____ ____ Humanities **3 Credit Hours**
- ____ ____ Any core Mathematics course **3 Credit Hours**

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

SYG 2000 - Sociology

3 Credit Hours ❖ ♦
(Fall, Spring, Summer)

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or PSY 2012 - Psychology **3 Credit Hours ♦**

Total General Education Credits Required: 20

Core Courses

DEP 2004 - Human Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

NUR 1021C - Nursing Process I

6 Credit Hours
(Fall, Spring)

This course introduces concepts and principles of holistic nursing care. Students will build on knowledge obtained in the biophysical and psycho-social sciences in this first of four required clinical nursing courses in the nursing curriculum. Theory content includes an introduction to healthcare systems ethical-legal aspects of nursing practice, health and illness, communications, functional health patterns of clients, stress-adaptation, professional behaviors, and all steps of the nursing process with emphasis on assessment of older adult clients. Students begin socialization into the role of the Associate Degree Nurse as a member of an interdisciplinary healthcare team.

Prerequisite(s): Admission to the AS Nursing Program, BSC 1085C, ENC 1101, (MAC 1105 OR STA 2023)

Corequisite(s): NUR 1021L

Prereq/Corequisites: BSC 1086C, HUN 2201

Special Nursing Program policies may apply to this course.

NUR 1021L - Nursing Process I Clinical Experience

4 Credit Hours
(Fall, Spring)

This course introduces students to the role of the Associate Degree Nurse in providing direct, holistic nursing care to young, middle-aged and older adults who are hospitalized or in community settings. Students are introduced to all steps of the nursing process with a focus on assessment skills. Students will identify self-learning needs and set their own goals for improvement. Critical thinking and working effectively with peers and other healthcare professionals as a team member is expected. The demonstration of caring behaviors and therapeutic communication as a provider of bedside, technical nursing care is emphasized. Students must demonstrate safe performance of basic nursing skills, including but not limited to medication administration, physical assessment, and comfort care.

Prerequisite(s): Admission to the AS Nursing Program

Corequisite(s): NUR 1021C.

Special Nursing Program policies may apply to this course.

NUR 1141 - Pharmacologic Principles in Nursing I

1 Credit Hour
(Fall, Spring)

This course introduces students to concepts and principles of pharmacology related to safe administration of therapeutic agents within the nursing process framework. Students begin to learn major drug classifications and selected exemplars along with principles of safe, effective administration of drugs. Students will learn dosage calculations, factors that affect the absorption, excretion, distribution, and metabolism of drugs, as well as drug actions, adverse effects, and interactions.

Prerequisite(s): Admission to the AS Nursing Program

Special Nursing Program policies may apply to this course.

NUR 1142 - Pharmacologic Principles in Nursing II

1 Credit Hour
(Fall, Spring)

An introduction to the role of the associate degree nurse in providing direct, holistic nursing care to young, middle-aged and elderly adults who are hospitalized or receiving care in community settings. Emphasis is on applying all steps of the nursing process with focus on assessment skills. Pre-requisite college foundation and nursing courses provide theoretical bases for nursing care. Critical thinking is an expected behavior along with skills in working ethically and effectively with peers and other health care professionals as a team member; demonstrate caring behaviors and therapeutic communication with clients as a provider of bedside, technical nursing care. The student is expected to demonstrate safe performance of basic nursing skills, e.g., medication administration, physical assessment and comfort care of hospitalized adults and nursing home residents.

Prerequisite(s): NUR 1141 or LPN licensure and admission to the Nursing Program

Corequisite(s): NUR 1231C and NUR 1750L

Special Nursing Program policies may apply to this course.

NUR 1231C - Nursing Process II

5 Credit Hours
(Fall, Spring)

Application of the nursing process continues with emphasis on the planning and implementation of nursing care for clients experiencing threats to functional health patterns. Development of professional behaviors, such as developing therapeutic relationships continues with students working clients through life interactions. Students further develop critical thinking skills through case studies and simulation scenarios designed to provide students with problem solving skills in analyzing, planning and prioritizing care for clients whose health problems are more acute or chronic; the client with psycho-emotional dysfunctions, dysfunctional support systems situations, grief, and loss. Students learn basic management skills as a team member caring for a limited number of clients in hospitals with emphasis on coordination of nursing care and discharge planning. Conflict management skills are highlighted as the student increases role as client advocate.

Prerequisite(s): NUR 1021L NUR 1021C and NUR 1141;or LPN licensure; admission to the AS Nursing Program or permission from the program director

Corequisite(s): NUR 1750L and NUR 1142

Prereq/Corequisites: DEP 2004

Special Nursing Program policies may apply to this course.

NUR 1750L - Nursing Process II - Clinical Experience

4 Credit Hours
(Fall, Spring)

This course builds on competencies presented in Nursing Process I regarding the role of the Associate Degree Nurse in providing direct, holistic nursing care for adult clients experiencing dysfunctional health patterns. Clinical experiences in hospitals, clinics, and community settings provide students with opportunities to apply the nursing process in care of clients, including the older adult. Students continue to develop management skills through conflict

management and other professional behaviors. Students demonstrate safe performance of all basic and more complex nursing skills.

Prerequisite(s): NUR 1021L or LPN licensure

Corequisite(s): NUR 1231C.

Special Nursing Program policies may apply to this course.

NUR 2233C - Nursing Process III

6 Credit Hours
(Fall, Spring)

Students continue to use the nursing process and critical thinking with emphasis on primary and secondary prevention as nursing interventions in clients experiencing threats to functional health patterns, including during the childbearing process and children whose normal lines of defense have been invaded by stressors to the degree that hospitalization is necessary. Nursing practice issues continue to focus on ethical-legal issues related to acute and/or chronic illness and disability. Management skills include delegation and career development.

Prerequisite(s): NUR 1231C & NUR 1142 or approval from the program director.

Corequisite(s): NUR 2233L

Prereq/Corequisites: MCB 2010C

Special Nursing Program policies may apply to this course.

NUR 2233L - Nursing Process III – Clinical Experience

4 Credit Hours
(Fall, Spring)

Students continue to apply knowledge and skills learned in previous nursing courses in providing nursing care for the hospitalized child, the family during the maternity cycle, and adults whose health problems are more complex and/or chronic. Clinical sites include hospitals, health departments, clinics, physician offices, schools and other community settings. Conflict resolution skills are applied, as needed, to meet client and/or peer learning goals. Delegation skills with peers are also practiced. Students demonstrate continuation of all previously learned nursing skills and must perform safely all advanced nursing skills in this clinical course.

Prerequisite(s): NUR 1750L

Corequisite(s): NUR 2233C.

Special Nursing Program policies may apply to this course.

NUR 2241C - Nursing Process IV

5 Credit Hours
(Fall, Spring)

Students integrate knowledge and principles of the biophysical and psychosocial sciences to solve life-threatening problems that affect a limited number of critically ill clients in a variety of clinical settings. Students differentiate

holistic nursing care therapies in primary, secondary and tertiary care settings. Students become proficient in applying all steps in the nursing process with emphasis on evaluating nursing care outcomes. Students apply critical thinking skills in exploring case-based practice situations and work together in simulation seminars to select effective client care improvement processes. Self-evaluation is part of the socialization process to prepare students for the work world as competent, caring staff nurses. Nursing practice issues include licensure standards and continued professional development.

Prerequisite(s): Permission from the Director of Nursing or NUR 2233C; MAC 1105 or STA 2023

Corequisite(s): NUR 2241L, NUR 2811L

Prereq/Corequisites: SYG 2000

Special Nursing program policies may apply to this course.

NUR 2241L - Nursing Process IV – Clinical Experience

3 Credit Hours
(Fall, Spring)

Students apply knowledge and principles of the biophysical and psychosocial sciences to assess, plan, implement and evaluate holistic nursing care of critically ill adults in hospitals, ambulatory care settings, and the home. Students will expand on management of care skills in preparation for their four-week clinical practicum prior to graduation from the program. Students will also shadow a home health/hospice nurse in observing treatment and palliative care of adults and children. Other clinical activities will include experiences in the emergency department and critical care units. Students must demonstrate competency in all behaviors required for an Associate Degree Nursing graduate.

Prerequisite(s): NUR 2233L

Corequisite(s): NUR 2241C, NUR 2811L

Special Nursing Program policies may apply to this course.

NUR 2811L - Nursing Practicum

3 Credit Hours
(Fall, Spring)

This course is a capstone course and provides a time during the last four weeks of the nursing program in which students begin to transition from the student role into the graduate role as an associate degree nurse. Students attend seminar hours and complete standardized testing for evaluation in proficiency in applying all steps in the nursing process with emphasis on evaluating safe nursing care outcomes. Students complete clinical practice hours with an experienced registered nurse preceptor to provide holistic nursing care for a limited number of clients. The focus is on demonstration of all professional behaviors and competencies expected of the associate degree registered nurse graduate at entry level. Clinical experiences provide hands-on learning opportunities, enhancing clinical thinking, safe nursing judgment, and clinical confidence in skills. Clinical experiences take place in a variety of clinical settings and work schedules.

Prerequisite(s): NUR 2233L

Corequisite(s): NUR 2241C, NUR 2241L

Special Nursing Program policies may apply to this course.

LPNs who successfully complete NUR 1142, NUR 1231C, NUR 1750L, NUR 2233C and NUR 2233L will receive credit for NUR 1021C, NUR 1021L, and NUR 1141.

Total Core Credits Required: 52

Technical Electives (Not Required)

NSP 2049L - Nursing Practice Readiness

1 Credit Hour
(Fall, Spring)

This elective laboratory course assists the nursing student to prepare for the RN licensure examination (NCLEX-RN). Web-based instructional methodologies allow the student to complete the course within a self-paced time frame. Students practice test taking skills, self-evaluation and other strategies to gain confidence in sitting for the NCLEX-RN.

Prerequisite(s): NUR 2241C or permission from Nursing Program Director.

Special Nursing Program policies may apply to this course.

NUR 1940L - Nursing Clinical Externship

3 Credit Hours
(Summer)

This elective course is designed to offer students the opportunity to gain additional clinical skills practice during the summer semester. Working with a preceptor and the nursing faculty in area hospitals, clinics, or community settings , the student will be able to perform all skills learned in successfully completed nursing courses.

Prerequisite(s): admission to the AS Nursing Program; NUR 1750L

Special Nursing Program policies may apply to this course.

NUR 2931 - Special Topics in Associate Degree Nursing

1 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

NUR 2932 - Special Topics in Associate Degree Nursing

2 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree

Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

NUR 2933 - Special Topics in Associate Degree Nursing

3 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

NUR 2934 - Special Topics in Associate Degree Nursing

4 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

NUR 2935 - Special Topics in Associate Degree Nursing

5 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

Total Program Credits Required: 72

Core Courses

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ENC 2210 - Technical Report Writing

3 Credit Hours
(Spring)

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Prerequisite(s): passing score on placement test.

GEB 1011 - Introduction to Business

3 Credit Hours
(Fall)

Designed to give students a broad understanding of the nature of business and a preliminary idea of the various areas of business specialization.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 1107 - Word Processing I

3 Credit Hours
(Fall)

Integration of basic keyboarding and word processing – learning the keyboard, creating, editing, saving, and other word processing functions.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

OST 1355 - Records Management

3 Credit Hours
(Spring)

Methods and systems of filing used in business offices, filing equipment, and time-and-motion skills. Filing practice sets are used.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2117 - Word Processing II

3 Credit Hours
(Spring)

Continuation of Typing and Word Processing I – develop keyboarding and document processing using a microcomputer.

Prerequisite(s): OST 1107 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

OST 2335 - Business Communications

3 Credit Hours
(Fall, Spring)

Business Communications is a comprehensive coverage of language structure and particular emphasis on writing superior business letters and reports. Instruction in principle, then illustration, and practice in applying the principles.

A fundamental concept of the appearance, language and style, tone and psychology of effective business letters.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2401 - General Office Management

3 Credit Hours
(Spring)

Study of practices and procedures in the modern office. Emphasis on exercising judgment, handling incoming calls and callers, processing mail, word processing systems, editing and composing techniques, travel arrangements, banking procedures, employment applications and resumes.

Prerequisite(s): OST 2117 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

Total Core Credits Required: 27

Technical Elective Courses

Select 15 credits from the following:

BUL 2241 - Business Law I

3 Credit Hours
(Fall, Spring)

Introductory course in business law with objective of presenting the law underlying business transactions. Course includes the study of the Law of Contracts, the Law of Bailments, and the Law of Sales based on the Uniform Commercial Code. Recommended for Business degree students.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 2242 - Business Law II

3 Credit Hours
Offered as needed

Course context explores laws relative to negotiable instruments, agency, partnerships, (includes study of Uniform Partnership Act), corporation law, creditors rights, consumer protection and insurance. Based on Uniform Commercial Code.

Prerequisite(s): BUL 2241 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 1030 - Computer Basics

3 Credit Hours
(Fall, Spring)

This is an introductory course for basic computer use, including the Internet. It addresses the use of computers for personal, business, and college purposes. It introduces the Windows operating system and Microsoft Office

applications, including Word, Excel, and PowerPoint. Hands-on use of a personal computer is required.

Prerequisite(s): none

CGS 1550 - Introduction to World Wide Web

3 Credit Hours
(Fall)

This course provides an introduction to the required hardware, software, procedures, uses and building web pages on the World Wide Web and the Internet.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

GEB 1940 - Internship - Business

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

This course may be taken up to two times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

GEB 2430 - Business Ethics

3 Credit Hours
(Fall)

This course addresses the legal, moral, and societal issues of ethical conduct in the business environment. Actual case studies are used to illustrate appropriate relationships among employers, employees, customers, stockholders, and other business stakeholders. Topics include: codes of ethics, laws and regulations related to ethics, conflict of interest, and moral philosophies associated with ethical conduct.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1000 - Health Information and Delivery Systems

3 Credit Hours
(Fall, Spring)

Orientation to medical records history and professional associations. Confidentiality, filing, retrieving, indexing, numbering, storage and content of the medical record is also discussed. The course includes job search skills and professional job performance.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1100 - Health Education

3 Credit Hours
(Spring)

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1531 - Medical Terminology

3 Credit Hours
(Fall)

An introduction to prefixes, suffixes, root words, combining forms, Latin and Greek forms, spelling, and pronunciation, with emphasis on building a working medical vocabulary based on body systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1345 - Supervision I

3 Credit Hours
(Spring)

The course presents the functions of a personnel manager, philosophy of general management, organizational structure, employer socioeconomic climate and career information. Included also are job descriptions and specifications, recruiting practices, applications, resumes, interviewing, placement, performance appraisals, wage and salary administration and other related topics.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MTB 1103 - Business Mathematics

3 Credit Hours
(Fall)

This course presents basic principles used to solve everyday business problems, including a review of basic skills and business terminology. Topics in the course include the following: base, rate and percentage, trade and cash discounts, wage and salary administration, insurance (fire and automobile), depreciation and business profits, distribution of corporate dividends, simple interest and bank discount, and buying and selling of corporation bonds and stocks.

Prerequisite(s): completion of MAT 0028 with a "C" or better or satisfactory test scores. Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1005 - Legal Terminology

3 Credit Hours
(Offered as Needed)

This course is designed to give an explanation of the common legal vocabulary involved in the broad, general principles of substantive and common law.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1013 - Introduction to the Legal System

3 Credit Hours
(Offered as Needed)

A practical introduction to the US legal system, types and sources of law, the courts, and related topics; a beginning course for students seeking careers in legal secretary technology or legal assisting.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1800 - Introduction to Family Law

3 Credit Hours
(Spring)

An introduction to practices as they relate to family law.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Total Technical Elective Credits Required: 15

Total Program Credits Required: 60

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CJL 1100 - Criminal Law

3 Credit Hours
(Fall)

Includes the study of the fundamentals of Criminal Law to include historical background and development, jurisdiction, the criminal act and responsibility, as well as, classification and analysis of Florida Statutes.

CJL 1400 - Criminal Procedure

3 Credit Hours
(Spring)

Includes the study of the fundamentals of constitutional, criminal and civil law; principles, duties and mechanics of criminal procedures in Florida as applied to arrest, search, seizure, and court processing; and a functional analysis of the rules of evidence in court procedures.

CJL 2500 - Courts and the Judicial Process

3 Credit Hours
(Fall)

This course is designed to teach the student the major structures and basic legal concepts of the American criminal court system. The students shall learn the components, personnel, and inherent social issues in our present criminal court system.

LIS 2004 - Introduction to Internet Research

1 Credit Hour ▲
(Offered as needed)

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Prerequisite(s): a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

OST 1355 - Records Management

3 Credit Hours
(Spring)

Methods and systems of filing used in business offices, filing equipment, and time-and-motion skills. Filing practice sets are used.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 2949 - Internship - Paralegal

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): completion of a minimum of 12 credit hours in the appropriate discipline, including PLA 1003 and permission of the instructor is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

*This college credit course is not intended for transfer and may not be applied toward the AA degree.

Total Technical Elective Credits Required: 15

Total Program Credits Required: 60

Suggested Two Year Academic Plan

This program admits students in the fall/spring/summer semester(s). Below is a sample academic plan for these students admitted in the identified semester.

Paralegal Studies (AS) (PARA)
First Year

Radiography

Associate in Science

Radiography (AS)

Admission Program Objective Code RADT
State CIP Code 1351090700

The Radiography program is based on selective admission, subject to additional policies and licensure requirements. Students attend classes at the Niceville Campus, and are assigned to clinical rotations at various healthcare facilities in the district. Graduates are eligible to sit for the ARRT certification exam. For additional information contact the Health Technology Department at (850) 729-6444.

Please note: In order to be a part of the **Radiography program applicant pool**, students must declare Radiography as their intended major on the online admissions application.

General Education

Unless otherwise noted, select one course from each category; see the AS Degree General Education Requirements section of catalog for specific course listings:

- ____ ____ - Communication Skills **3 Credit Hours**

- ____ ____ - Humanities **3 Credit Hours**

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

DEP 2004 - Human Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

MAC 1105 - College Algebra , an equivalent, or higher level math course **3 Credit Hours**

Total General Education Credits Required: 20

Core Courses

RTE 1000 - Introduction to Radiologic Technology

2 Credit Hours
(Summer, Offered as needed)

This course is designed to provide an overview of the history of radiography and the role and scope of practice of the practitioner in the healthcare delivery system. Organizations, accreditation, federal agencies, regulatory agencies (including OSHA) and professional credentialing will be discussed. Content includes a fundamental background in medical law, ethics, human diversity and patient consent. The student will examine a variety of ethical issues and dilemmas found in clinical practice, as well as developing a better understanding of patients, the patient's families, and professional peers through comparison of diverse populations based on value systems, cultural and ethnic influences, communication styles and socioeconomic influences. Radiographic medical terminology and pharmacology will be covered. Site specific clinical education paperwork will be completed and students will perform required clinical observations in imaging departments. Background check, drug screening, training and clinical site approval mandatory.

Prerequisite(s): admission to the Radiography Program.

RTE 1111 - Introduction to Radiographic Patient Care

2 Credit Hours
(Fall)

This course is designed to prepare radiography students to provide basic patient care. Basic concepts of patient care will be described, as well as infection control procedures and standard precautions. This course includes hospital specific training. Health risks, life stages, HIV/AIDs and domestic violence will be discussed. This course also includes an introduction to medical and radiographic terminology. Topics include vital signs, venipuncture, body mechanics and transport, verbal/nonverbal communication, and some pharmacology.

Prerequisite(s): admission to the Radiography Program.

RTE 1418 - Radiographic Techniques I

3 Credit Hours
(Fall)

This course is designed to establish a knowledge base in factors that govern and influence the production and recording of radiographic images. This course introduces the student to a comprehensive study and theory of the production of x-rays and primary exposure factors of radiographic imaging. The image parameters of density, contrast, recorded detail, image distortion and blur will be studied as well as ancillary devices and equipment required to produce a quality radiographic image. Digital imaging with related accessories will be emphasized. Class demonstrations and exercises are used to demonstrate application of theory.

Prerequisite(s): MAC 1105 or other Gordon Rule math course and admission to the Radiography Program.

RTE 1457C - Radiographic Techniques II

4 Credit Hours
(Spring)

This course is a continuation of RTE 1418 Radiographic Techniques I. Course content includes the basics of magnetism, electricity, motors, generators, rectifying systems, x-ray tube and filament circuitry. Topics in electromagnetism such as self and mutual induction, high voltage transformation, and AC rectification will be emphasized. An introduction of special radiographic methods will include automatic exposure control, computers, fluoroscopy and image intensification, subtraction radiography, conventional tomography, digital image receptors, and digital image acquisition and manipulation.

Prerequisite(s): RTE 1418.

Corequisite(s): RTE 1513C

RTE 1503C - Radiographic Procedures I

4 Credit Hours
(Fall)

This course is designed to provide the Radiography student with instruction in radiographic examinations of the chest, abdomen, upper extremity and lower extremity. An introduction to medical and radiographic terminology, radiographic anatomy, and image critique are also included.

Prerequisite(s): BSC 1085C and admission to the Radiography program.

RTE 1513C - Radiographic Procedures II

4 Credit Hours
(Spring)

This course is a continuation of RTE 1503C. It is designed to provide the student with instruction in radiographic procedures and anatomy in the distal extremities, hip region, spine, ribs, and sternum and the cranium. Critical thinking, medical and radiographic terminology, as well as image critique are emphasized.

Prerequisite(s): RTE 1503C, RTE 1804L , and BSC 1086C

Corequisite(s): RTE 1814L.

RTE 1804L - Radiography Clinical Education I

3 Credit Hours
(Fall)

This course involves the practical application of the theories covered in RTE 1503C and RTE 1000. Rotations provide experience with various imaging systems, protocols, and patient care. Students observe, assist and perform basic radiographic procedures (chest, abdomen and extremities) under direct supervision. This course emphasizes patient care and critical thinking. This course meets at the affiliate hospitals. Uniforms, name badges and radiographic markers required.

Prerequisite(s): RTE 1000

Corequisite(s): RTE 1503C

RTE 1814L - Radiography Clinical Education II

3 Credit Hours
(Spring)

This course is a continuation of Radiography Clinical Education I. This clinical training emphasizes lower and upper extremity. Medical and radiographic terminology, patient care, critical thinking and communication skills are emphasized. This course meets at the affiliate hospitals. Uniforms, name badges and radiographic markers required.

Prerequisite(s): RTE 1804L

Corequisite(s): RTE 1513C.

RTE 1824L - Radiography Clinical Education III

4 Credit Hours
(Summer)

This course is a continuation of Radiography Clinical Education II. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I and II. The student will gain experience and develop clinical competence in general radiographic procedures such as the cranium and specialized contrast studies. Advanced

patient care skills, critical thinking, imaging and exposure techniques, radiation protection application and image processing will be emphasized. This rotation covers clinical experience in all phases of fundamental radiologic procedures and image critique. Students will rotate through ancillary departments in this course.

Prerequisite(s): RTE 1814L

Corequisite(s): RTE 2523C.

RTE 2061 - Radiographic Preparation for Practice

4 Credit Hours
(Spring)

This course is designed review information in preparation for the student to take the American Registry of Radiologic Technologist (ARRT) registry examination. The course will cover patient care and education, image production, equipment operation and maintenance, radiographic procedures and radiation protection. The student will also be given simulated registry examinations for practice and assessment purposes.

Prerequisite(s): RTE 2844L

Corequisite(s): RTE 2854L.

RTE 2385 - Radiographic Protection and Biology

3 Credit Hours
(Fall)

This course is designed to provide the student with an overview of the principles of interaction of ionizing radiation with living systems. Ionizing effects on molecules, cells, tissues and the body as a whole are presented, along with factors affecting biological response, including; acute, chronic, stochastic and non-stochastic effects. This course is also designed to present an overview of the principles of radiation protection including the responsibilities of the radiographer for patients, personnel and the public. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies and healthcare organizations are incorporated, as are the various methods of monitoring radiation exposure and acceptable dose limit values.

Prerequisite(s): RTE 1000, RTE 1418, RTE 1457C, RTE 2523C

Corequisite(s): RTE 2844L.

RTE 2473 - Radiographic Quality Assurance

2 Credit Hours
(Fall)

This course is designed to introduce the radiography student to evaluation methodology of radiographic systems to assure consistency in the production of quality images. Image critique, fluoroscopy, malfunctions, and specifications are some of the topics covered in the course.

Prerequisite(s): RTE 1418, RTE 1457C

Corequisite(s): RTE 2844L.

RTE 2523C - Radiographic Procedures III

3 Credit Hours
(Summer)

This course is a continuation of RTE 1513C covering cranium procedures and positioning. It is designed to provide the student with instruction in more complex radiographic procedures such as fluoroscopy, urinary studies, bone age, trauma, pediatrics, mobile and surgical radiography. Included is instruction in additional modalities and studies such as CT, MRI, arthography, myelography, and vascular studies. Attention will be given to the specialized equipment, contrast media, critical thinking and techniques necessary to perform these procedures. Radiographic anatomy, pathology, and critique of images are included in this course.

Prerequisite(s): RTE 1513C

Corequisite(s): RTE 1824L.

RTE 2533C - Radiographic Procedures IV

2 Credit Hours
(Fall)

This is a continuation of RTE 2523C, with emphasis on special procedures and additional modalities. Students are required to complete observations hours within specialty areas.

Prerequisite(s): RTE 2523C

Corequisite(s): RTE 2844L

RTE 2571 - Introduction to Computed Tomography

1 Credit Hour
(Spring)

This course is designed to provide entry-level radiography students with an introduction to and basic understanding of the operation of a computed tomography (CT) device. Content is not intended to result in clinical competency.

Prerequisite(s): RTE 1457C

RTE 2782 - Radiographic Pathology

3 Credit Hours
(Spring)

This course is designed to introduce theories of disease causation and the pathophysiologic disorder that compromise healthy persons. Etiology, pathophysiologic responses, clinical manifestations, and radiographic appearance of alterations in body systems will be presented. Emphasis will be placed on pathological findings on diagnostic radiographic images.

Prerequisite(s): RTE 2523C

Corequisite(s): RTE 2854L.

RTE 2844L - Radiography Clinical Education IV

5 Credit Hours
(Fall)

This course is a continuation of RTE 1824L. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I, II and III. The student will gain experience and develop clinical competence in specialized imaging procedures, and mobile, surgical and trauma radiography. Advanced imaging skills and exposure techniques will continue to be provided. Rotations through ancillary areas continue.

Prerequisite(s): RTE 1824L

Corequisite(s): RTE 2385.

RTE 2854L - Radiography Clinical Education V

5 Credit Hours
(Spring)

This course is a continuation of RTE 2844L. The terminal objective for this course is to prepare the student for employment as an entry level technologist. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I-IV and trauma radiography. Advanced imaging skills and exposure techniques will continue to be provided. Rotations through ancillary areas continue.

Prerequisite(s): RTE 2844L

Corequisite(s): RTE 2061.

> **All RTE courses must be completed with a grade of 75 or higher to progress in the Radiography Program.**

Total Core Credits Required: 57

Total Program Credits Required: 77

- ____ ____ Communication Skills **3 Credit Hours**
- ____ ____ Humanities **3 Credit Hours**
- ____ ____ Mathematics **3 Credit Hours**
- ____ ____ Natural Sciences **3 Credit Hours**
- ____ ____ Social Sciences **3 Credit Hours**
- ____ ____ Additional General Education Credits **3 Credit Hours**

Total General Education Credits Required: 18

Core Courses

HLP 1081 - Wellness: Practice and Theory

3 Credit Hours
(Fall, Spring, Summer)

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

HSC 1100 - Health Education

3 Credit Hours
(Spring)

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1400 - First Aid

3 Credit Hours
(Spring)

Preparation to meet emergencies that occur in the school, home or on the highway. Instruction and practice in dressing and bandaging, care of wounds, shock, bone and joint injuries, cardiopulmonary resuscitation, transportation of the injured oral poisoning and other medical emergencies.

LEI 1544 - Outdoor Recreation Management

3 Credit Hours
(Fall, Spring)

This course examines the fundamental influences on outdoor recreation. The course also provides information on hazards, conservation considerations, and safety factors in planning and organizing outdoor recreations. Basic first aid, CPR, and AED training is incorporated as it pertains to outdoor recreation. Field trips may be assigned as warranted.

PEM 1131A - Strength Training

3 Credit Hours
(Offered as needed)

This course is a high intensity lecture/demonstration and flexible lab hour weight training program designed to increase the size, strength, and endurance of the skeletal muscle system. Instruction includes, but is not limited to, weight training safety, etiquette, history, and nutrition. Instruction will be given in the design of progressive resistance programs to increase total body efficiency and to meet the objectives of the individual student. Students are responsible for determining fitness for training, and those with medical problems which restrict personal activities are encouraged to obtain medical clearance before enrolling in the course.

PET 1000 - Introduction to Physical Education

3 Credit Hours
(Offered as needed)

A study of the history of physical education and sport with particular emphasis placed on present practices and trends.

PET 2622 - Care and Prevention of Athletic Injuries

3 Credit Hours
(Offered as needed)

Designed to provide students with a basic knowledge of the care, prevention, and rehabilitation of injuries received during participation in physical education activities to include the effects and dangers of drug use including performance enhancing drugs.

Total Core Credits Required: 21

Technical Elective Courses

Select 21 credits from the following:

CCJ 1020 - Introduction to Criminal Justice

3 Credit Hours
(Fall)

An introduction to the philosophical and historical background of law enforcement and the administration of criminal justice. Organization and jurisdiction of local, state, and federal law enforcement agencies, court and criminal procedures, career opportunities in the Criminal Justice field are also covered.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

CLP 1001 - Personal Adjustment

3 Credit Hours
(Fall, Spring, Summer)

Psychology of adjustment, application of psychological theory for problem solving and better mental health. An examination of psychological defense mechanisms and adaptive behavior.

CLP 2140 - Abnormal Psychology

3 Credit Hours
(Fall, Spring, Summer)

A study of the different problems in psychopathology, including anxiety, depression, social deviance, psychosis, schizophrenia, mental retardation and general brain dysfunction of both children and adults, with emphasis on descriptive etiology, known causes, and treatments.

Prerequisite(s): PSY 2012.

DEP 2004 - Human Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

EEX 2010 - Introduction to Exceptional Children

3 Credit Hours
(Offered as needed)

Study of incidence, nature, etiology and services available in connection with exceptional children including: hearing and speech problems, learning disabilities, mental retardation, blind, physically handicapped, gifted, emotional conflicts, and parents of exceptional children.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

LIN 1670 - Writing and Grammar

3 Credit Hours
(Fall, Spring, Summer)

The course includes practice in writing short essays and encompasses a comprehensive review of grammar and

mechanics. This course is strongly recommended for students who have completed Developmental Writing, those who want a preparation for Composition, or those who score 103-116 on the PERT.

Prerequisite(s): A passing score on the standardized placement test measuring communications/verbal achievement, successful completion of any required developmental English coursework with a minimum grade of "C", or exemption from placement testing.

MAN 2021 - Management

3 Credit Hours
(Fall)

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAT 1033A - Intermediate Algebra

4 Credit Hours
(Fall, Spring, Summer)

This is an intermediate algebra course designed to prepare students for general education mathematics/statistics courses. This course emphasizes concepts, techniques, and applications of the following major topics; factoring, algebraic functions, radicals and rational exponents, complex numbers, quadratic equations, rational equations, two-variable linear equations/inequalities and their graphs, systems of linear equations and inequalities, and an introduction to functions. This course may be used as an elective, but does not meet Gordon Rule requirements for B.A.S., A.A., or A.S. transfer students.

Prerequisite(s): a passing score on the standardized placement test measuring mathematics achievement, successful completion of MAT 0028 with a grade of "C" or better, or exemption from placement testing.

MNA 2100 - Organizational Behavior

3 Credit Hours
(Spring)

Designed to help students develop an understanding of how they may be motivated to work together in greater harmony in all kinds of organizations. The basis of human motivation and how it is influenced by leadership, the organization itself, and the social environment in which the organization exists.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PEM 2108 - Fitness Lab

1 Credit Hour
(Offered as needed)

Instruction and participation in an exercise program with emphasis on muscle endurance, strength and flexibility.

Prerequisite(s): HLP 1081 or approved wellness assessment by the department chair.

This course may be taken up to four times for credit.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

3 Credit Hours †
(Fall, Spring)

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SYG 2000 - Sociology

3 Credit Hours ❖ ♦
(Fall, Spring, Summer)

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

SYG 2010 - Social Problems

3 Credit Hours ❖ ¶
(Fall, Spring, Summer)

Introduction to the sociological study of the nature of social problems to insure understanding of their impact on the individual, the group and social institutions in societal and cultural settings. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2000 - Theatre Appreciation

3 Credit Hours † ♦ ¶
(Fall, Spring, Summer)

An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

- ____ ____ Additional General Education Credits **3 Credit Hours**

Total General Education Credits Required: 18

A proficiency exam may be required in major emphasis area(s).

Core Courses

TPA 1210 - Stagecraft

3 Credit Hours
(Fall)

This course is an introduction to the principles of stagecraft: stage terminology, stage safety, instruction in proper use of shop tools, basic theater construction methods, understanding of theatrical rigging, and understanding of general background practices.

THE 2000 - Theatre Appreciation

3 Credit Hours † ♦ ¶
(Fall, Spring, Summer)

An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

TPA 2232 - Introduction to Costuming Technology

3 Credit Hours
(Fall, Spring)

An introduction to costume techniques and wardrobe practices. Topics span a wide range: costume construction techniques, problems in costumes, costume history, construction styles, sewing machine practices, seam finishes, flat pattern layout and production techniques. This course is intended to develop practical experiences in theater costumes.

Total Core Credits Required: 9

Technical Required Courses

THE 2304 - Script Analysis

3 Credit Hours
(Offered as Needed)

An introduction to the examination and analysis of play scripts as preparation for production. Students will read plays from various periods and genres, and analyze such dramatic elements as plot, theme, character, dialogue, and style.

TPP 1190 - Rehearsal and Performance I

3 Credit Hours
(Fall, Spring, Summer)

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Prerequisite(s): experience in high school or a desire to learn.

TPP 1191 - Rehearsal and Performance II

3 Credit Hours
(Fall, Spring, Summer)

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Prerequisite(s): TPP 1190.

TPP 1940 - Internship in Theatre Performance

3 Credit Hours
(Offered as Needed)

The emphasis of this course is on applied learning and vocational experience in the theatre performance field.

TPP 2110 - Acting I

3 Credit Hours
(Fall, Spring)

Through in-class performance the student will develop an understanding and proficiency of those skills of movement, voice, and expression which are required of a theatrical performer.

TPP 2111 - Acting II

3 Credit Hours
(Fall, Spring)

Through in-class performance, the student develops an understanding and proficiency in styles of acting from classic through modern.

Prerequisite(s): TPP 2110.

TPP 2120 - Improvisation

3 Credit Hours
Offered as needed

This course explores the use of creativity and imagination, engaging the actor in a wide variety of improvisational theatre games.

TPP 2141 - Acting in Shakespeare

3 Credit Hours
(Offered as needed)

This course is an introduction to the concepts, principles, and skills needed to develop characters in Shakespeare's plays. The course focuses on the hidden clues in the text to discover character choices and meaning. Specific analysis and the techniques of scansion are introduced as they relate to character interpretation. Application of these techniques will be presented in scenes and monologues.

TPP 2150 - Advanced Scene Study

3 Credit Hours
(Fall)

This course is a continuation of the processes and concepts of TPP 2111, Acting II, with the addition of new techniques to create dynamic and engaging characterizations through performance.

TPP 2220 - Auditioning

3 Credit Hours
(Offered as Needed)

This course explores audition techniques for the stage. Students will be better prepared to audition in professional settings.

TPP 2533 - Stage Combat I (Unarmed & Rapier)

3 Credit Hours
(Spring)

Through in-class study and performance the student will develop an understanding of and proficiency in the safe techniques of unarmed and rapier stage combat which are required of a theatrical performer. Application of these techniques will be presented in two scenes, one for unarmed and one for rapier.

Total Technical Credits Required: 33

Total Program Credits Required: 60

Suggested Two-Year Academic Plan

This program admits students in the fall/spring/summer semester(s). Below is a sample academic plan for these students admitted in the identified semester.

This course is intended to develop practical experiences in theater costumes.

Total Core Credits Required: 9

Technical Required Courses

HUM 1905A - Independent Study – Arts and Humanities

1 Credit Hour
(Fall, Spring, Summer)

A defined independent study which is pursued under supervision of a faculty directing teacher and recorded through departmental procedures. Designed to permit a student to pursue nonscheduled academic and laboratory work which

may be of a specialized or advanced nature and not available through classes or courses available on a college schedule. Departmental approval is required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is also required.

Prerequisite(s): approval from department chair, a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

THE 2304 - Script Analysis

3 Credit Hours
(Offered as Needed)

An introduction to the examination and analysis of play scripts as preparation for production. Students will read plays from various periods and genres, and analyze such dramatic elements as plot, theme, character, dialogue, and style.

TPA 1290 - Technical Theatre Lab I

1 Credit Hour
(Offered as Needed)

This course is designed to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

TPA 1291 - Technical Theatre Lab II

1 Credit Hour
(Offered as Needed)

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Prerequisite(s): TPA 1290

TPA 1940 - Internship in Theatre Design or Production

3 Credit Hours
(Offered as Needed)

The emphasis of this course is on applied learning and vocational experience in the technical theatre field.

TPA 2063 - Principles of Scenic Design

3 Credit Hours
(Offered as Needed)

This course is a detailed introduction to the principles and techniques used in scene design. The course will include the discussion and practice in analyzing scripts, visualizing a design concept, drafting, paint elevations and rendering and/or modeling techniques.

Prerequisite(s): TPA 2343

TPA 2220 - Lighting Design

3 Credit Hours
(Spring)

An introduction to stage lighting. Topics include history of stage lighting, fundamentals of light and illumination, lighting control, and lighting practices.

Corequisite(s): TPA 1210

TPA 2331 - Costume Construction

3 Credit Hours
(Offered as needed)

An introduction to costume construction techniques and wardrobe design. Topics span a wide range: costume construction techniques, problems in costumes, costume history, construction styles, sewing machine practices, seam finishes, flat pattern layout and production techniques. This course is intended to develop practical experiences in costume construction.

Prerequisite(s): TPA 2232

TPP 1190 - Rehearsal and Performance I

3 Credit Hours
(Fall, Spring, Summer)

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Prerequisite(s): experience in high school or a desire to learn.

TPP 1191 - Rehearsal and Performance II

3 Credit Hours
(Fall, Spring, Summer)

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Prerequisite(s): TPP 1190.

TPP 1192 - Rehearsal and Performance III

3 Credit Hours
(Fall, Spring, Summer)

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Prerequisite(s): TPP 1191.

TPP 2110 - Acting I

3 Credit Hours
(Fall, Spring)

Through in-class performance the student will develop an understanding and proficiency of those skills of movement, voice, and expression which are required of a theatrical performer.

TPP 2930 - Theater Performance – Special Topics

3 Credit Hours
(Fall, Spring, Summer)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

This course may be taken up to four times for credit.

Technical Required Courses

Select 33 credits from the following:

DAA 1104 - Modern I for Majors

2 Credit Hours
(Fall, Spring, Summer)

This dance class is designed to affect an understanding of the art of the modern dance. It includes a brief history of the dance; instruction and practice in basic dance techniques, improvisation, and dance forms. Performance, research and individual projects comprise the remaining class time. This course maybe taken 4 times for credit.

This course may be taken up to four times for credit.
(to be completed twice for program credit)

DAA 1200 - Fundamentals of Ballet

2 Credit Hours
(Fall, Spring, Summer)

This beginning dance course is designed to serve as an introduction to the tradition and discipline of the art of classical ballet. Physical development of the body as an expressive instrument for ballet movement will be stressed as strength, flexibility, balance, alignment, agility, turnout, control, elevation and sensitivity to line are studied.

This course may be taken up to four times for credit.

DAA 1204 - Ballet I for Majors

2 Credit Hours
(Fall, Spring, Summer)

A beginning dance course designed to serve as an introduction to the tradition and discipline of the art of the classical ballet. Physical development of the body as an expressive instrument for ballet movement will be stressed as strength, flexibility, balance, agility, alignment, turn-out, control, elevation and sensitivity to line are studied. Performance, research and individual projects comprise the remaining class time.

This course may be taken up to four times for credit.
(to be completed twice for program credit)

DAA 1504 - Jazz I for Majors

2 Credit Hours
(Fall, Spring, Summer)

The course includes a brief history of the jazz dance and instruction and practice in jazz dance techniques exploring popular dance idioms. Performance, research and individual projects comprise the remaining class time.

This course may be taken up to four times for credit.
(to be completed twice for program credit)

DAA 1520 - Tap I

1 Credit Hour
(Fall, Spring)

This course includes instruction in tap dance technique and the introduction of time steps commonly used in musical theater auditions.

This course may be taken up to four times for credit.
(to be completed twice for program credit)

DAA 1681 - Dance Ensemble

1 Credit Hour
(Fall, Spring)

The student shall participate in the preparation and performance of original dance compositions to include Dance Line and Show Choir performances.

Prerequisite(s): level of competency determined by audition.

This course may be taken up to four times for credit.

(to be completed three times for audit)

DAA 2105 - Modern II for Majors

2 Credit Hours
(Fall, Spring, Summer)

This dance class is designed to further the student's understanding of the art of the modern dance. It includes continued study in history of the dance; instruction and practice in intermediate level dance techniques, improvisation, and dance forms. Performance, research and individual projects comprise the remaining class time.

This course may be taken up to four times for credit.

DAA 2205 - Ballet II for Majors

2 Credit Hours
(Fall, Spring, Summer)

This dance course is designed to serve as an further training in the tradition and discipline of the art of the classical ballet. Physical development of the body as an expressive instrument for ballet movement will be stressed as strength, flexibility, balance, agility, alignment, turn-out, control, elevation and sensitivity to line are studied. Performance, research and individual projects comprise the remaining class time.

This course may be taken up to four times for credit.

DAA 2610 - Dance Composition

2 Credit Hours
(Fall, Spring)

An introduction and practice in the application of compositional tools encourages the student to explore and compose dance. By studying the body's movement in time and space the student will improve technical skills, develop improvisation and choreographic skills and enhance overall dance performance. Previous dance experience is helpful.

This course may be taken up to four times for credit.

DAA 2683 - Performance Dance, (Repertory and/or Original Choreography)

1 Credit Hour
(Fall, Spring)

This course includes the continuation of study and participation in all rehearsals of selected works of dance repertory and/or original choreography culminating in public performance.

This course may be taken up to four times for credit.
(to be completed twice for program credit)

DAN 1750 - Dance Conditioning

1 Credit Hour
(Fall, Spring)

Dance Conditioning is an excellent course in which to begin your dance training. It is designed to improve fundamentals for the beginning/intermediate student through daily practice in floor work, yoga, and Pilates exercises. This movement class will get you ready to meet the challenges of other dance classes by toning, strengthening and preparing the body to move.

This course may be taken up to four times for credit.
(to be completed twice for program credit)

DAN 2120 - Dance Appreciation

3 Credit Hours
(Offered as needed)

This course is a study of the development of dance as an art form, as entertainment, and how it relates to the history of cultures and societies, emphasizing the evolution of dance in the specific genres such as ballet, modern dance, jazz dance, and world dance forms. Designed to heighten student awareness of dance as an integral part of society and establish an appreciation of dance's impact on the making of art. This course will give the student a foundation level understanding of dance as an art form and its historical and cultural significance. The major periods of dance history, master choreographers, and their works will be explored through lecture, discussion and media presentation. DAN 2120 is not an activity course.

This course may be taken up to four times for credit.
(to be completed twice for program credit)

DAA 1680 - Dance Workshop

1 Credit Hour
(Fall, Spring)

This course includes instruction and participation in dance as required by specific productions, i.e., Theater/Show Choir.

This course may be taken up to four times for credit.
(to be completed four times for **audit**)

- MUN ____ - Music Ensembles (to be completed four times for **audit**)

MUT 1111 - Music Theory I

3 Credit Hours
(Fall, Spring)

A study of the fundamentals of basic musicianship, music notation, simple rhythms, key signatures, intervals, major and minor scales, intervals, triads, 7th chords, polyphonic composition and elementary keyboard work. This course also introduces students to tools necessary for analyzing musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1241

MUT 1241 - Ear Training and Sight Singing I

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1111

MVV 1211 - Applied Music – Voice I

1 Credit Hour
(Fall, Spring, Summer)

Private instruction in voice, as a secondary instrument, consisting of one half-hour session per week, with a minimum of one hour daily practice.

This course may be taken up to four times for credit.

MVV 1311 - Applied Music - Voice I for Majors

2 Credit Hours
(Fall, Spring, Summer)

Private instruction in voice in the freshman year of study as the student's principal performing medium. This one hour weekly lesson is for intended voice majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which four memorized selections from standard literature will be required.

Prerequisite(s): MVV 1211 and Division Chair approval.

This course may be taken up to four times for credit.

MVV 2221 - Applied Music – Voice II

1 Credit Hour
(Fall, Spring, Summer)

Private instruction in voice, as a secondary instrument, consisting of one half-hour lesson per week, with a minimum of one hour daily practice.

Prerequisite(s): MVV 1211.

This course may be taken up to four times for credit.

MVV 2322 - Applied Music - Voice II for Majors

2 Credit Hours
(Offered as needed)

Private instruction in voice in the sophomore year of study as the student's principal performing medium. This one hour, weekly lesson is for intended voice majors, and requires Division Chair Approval. A major component of this class is a required juried performance at the end of the semester for which six memorized selections from standard literature will be required.

Prerequisite(s): MVV 1211, MVV 1311 and Division Chair approval.

This course may be taken up to four times for credit.

TPP 1940 - Internship in Theatre Performance

3 Credit Hours
(Offered as Needed)

The emphasis of this course is on applied learning and vocational experience in the theatre performance field.

TPP 2110 - Acting I

3 Credit Hours
(Fall, Spring)

Through in-class performance the student will develop an understanding and proficiency of those skills of movement, voice, and expression which are required of a theatrical performer.

TPP 2111 - Acting II

3 Credit Hours
(Fall, Spring)

Through in-class performance, the student develops an understanding and proficiency in styles of acting from classic through modern.

Prerequisite(s): TPP 2110.

TPP 2220 - Auditioning

3 Credit Hours
(Offered as Needed)

This course explores audition techniques for the stage. Students will be better prepared to audition in professional settings.

TPP 2250 - Introduction to Musical Theatre

3 Credit Hours
(Fall)

Introduction to the study of Musical Theater analysis, creation, and performance with an emphasis on singing, dancing, and acting.

Total Technical Elective Credits Required: 33

Total Program Credits Required: 60

Suggested Two Year Academic Plan

This program admits students in the fall/spring/summer semester(s). Below is a sample academic plan for these students admitted in the identified semester.

Theater and Entertainment Technology - Music Theater Specialization Option (AS) (THTM)
Summer Semester Speech General Education Course **3 Credit Hours** DAA 1200 - Fundamentals of Ballet **2 Credit Hours** **Total Semester Hours: 5**
First Year
Fall Semester Communications General Education Course **3 Credit Hours** MUT 1111 - Music Theory I **3 Credit Hours** MUT 1241 - Ear Training and Sight Singing I **1 Credit Hour** DAA 1500 - Jazz I for Non-Majors **1 Credit Hour** DAA 1680 - Dance Workshop - **Audit** MUN XXXX - Ensemble - **Audit** MVV 1211 - Applied Music – Voice I **1 Credit Hour**

Admission Program Objective Code THTT
State CIP Code 1650050202

Students who successfully complete selected courses from this program of study may be eligible to receive the Stage Technology (Theater & Entertainment) (CCC) certificate (State CIP Code 0650050201).

General Education

Select one course from each category; see the AS Degree General Education Requirements section of catalog for specific course listings:

- ____ ____ Communication Skills **3 Credit Hours**
- ____ ____ Humanities **3 Credit Hours**
- ____ ____ Mathematics **3 Credit Hours**
- ____ ____ Natural Sciences **3 Credit Hours**
- ____ ____ Social Sciences **3 Credit Hours**
- ____ ____ Additional General Education Credits **3 Credit Hours**

Total General Education Credits Required: 18

A proficiency exam may be required in major emphasis area(s).

Core Courses

TPA 1210 - Stagecraft

3 Credit Hours
(Fall)

This course is an introduction to the principles of stagecraft: stage terminology, stage safety, instruction in proper use of shop tools, basic theater construction methods, understanding of theatrical rigging, and understanding of general background practices.

THE 2000 - Theatre Appreciation

3 Credit Hours † ♦ ¶
(Fall, Spring, Summer)

An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

TPA 2232 - Introduction to Costuming Technology

3 Credit Hours
(Fall, Spring)

An introduction to costume techniques and wardrobe practices. Topics span a wide range: costume construction techniques, problems in costumes, costume history, construction styles, sewing machine practices, seam finishes, flat pattern layout and production techniques. This course is intended to develop practical experiences in theater costumes.

Total Core Credits Required: 9

Technical Required Courses

THE 2304 - Script Analysis

3 Credit Hours
(Offered as Needed)

An introduction to the examination and analysis of play scripts as preparation for production. Students will read plays from various periods and genres, and analyze such dramatic elements as plot, theme, character, dialogue, and style.

TPA 1290 - Technical Theatre Lab I

1 Credit Hour
(Offered as Needed)

This course is designed to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

TPA 2276C - Entertainment Technology - Crafts

3 Credit Hours
(Spring)

This course presents the practices and principles of advanced woodworking, welding, smithing, casting, ceramics, plaster work, fiberglass and plastic technology for the entertainment industry. State of the art tool technology, shop and field practice, health and safety standards will be emphasized. These crafts are entertainment industry oriented that will use items created in a realized production.

Prerequisite(s): TPA 1210.

TPA 2600 - Stage Management

3 Credit Hours
(Offered as needed)

This course is an introduction to the study and application of stage management as it relates to the manager portfolio, the stage manager morgue, rules and regulations relating to I.A.T.S.E., rules related to contracts, competence in stage management, proper communication with directors, technical directors, designers, cast members and crews, competence in technical discussion areas and basic first aid.

TPA 1291 - Technical Theatre Lab II

1 Credit Hour
(Offered as Needed)

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Prerequisite(s): TPA 1290

TPA 1940 - Internship in Theatre Design or Production

3 Credit Hours
(Offered as Needed)

The emphasis of this course is on applied learning and vocational experience in the technical theatre field.

TPA 2063 - Principles of Scenic Design

3 Credit Hours
(Offered as Needed)

This course is a detailed introduction to the principles and techniques used in scene design. The course will include the discussion and practice in analyzing scripts, visualizing a design concept, drafting, paint elevations and rendering and/or modeling techniques.

Prerequisite(s): TPA 2343

TPA 2212 - Sound Production for the Stage

3 Credit Hours
(Offered as Needed)

This course is an introduction to audio production and reinforcement for the stage. Students will learn how to use and maintain equipment, record and edit sound effects, and mixing live sound. Emphasis will be placed on digital audio techniques and equipment.

TPA 2220 - Lighting Design

3 Credit Hours
(Spring)

An introduction to stage lighting. Topics include history of stage lighting, fundamentals of light and illumination, lighting control, and lighting practices.

Corequisite(s): TPA 1210

TPA 2292 - Technical Theatre Lab III

2 Credit Hours
(Offered as Needed)

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Prerequisite(s): TPA 1291

TPA 2301 - Technical Theatre Lab IV

2 Credit Hours
(Offered as Needed)

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Prerequisite(s): TPA 2292

TPA 2343 - CAD for the Theatre

3 Credit Hours
(Offered as Needed)

This course is project oriented covering fundamental through advanced material in computer aided drafting and design and its application for the theatre.

TPP 2110 - Acting I

3 Credit Hours
(Fall, Spring)

Through in-class performance the student will develop an understanding and proficiency of those skills of movement, voice, and expression which are required of a theatrical performer.

Total Technical Elective Credits Required: 33

Total Program Credits Required: 60

Total Core Credits Required: 17

Total Program Credits Required: 17

Welding

Vocational Certificate

Welding Technology (PSAV)

Admission Program of Study Code WELT
State CIP Code 0648050805

This program offers a broad foundation of knowledge and skills to prepare students for employment in the welding industry.

Basic Skills Requirements: The student must be exempt or attain a **9th grade level** on each section of the TABE exam: Math, Language and Reading.

The night welding program is not accepting new students during the 2018-19 academic year.

Core Courses

PMT 0106C - Welder Helper

150 Clock Hours
(Fall, Spring)

This course provides instruction in shop safety, the use of safety procedures and protective equipment needed in a welding shop. Course incudes basic shop math, shop safety, welding equipment setup/teardown procedures.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0111C - Metal Preparation

150 Clock Hours
(Fall, Summer)

This course provides instruction in different metal preparation processes including: thermal preparation (oxygen/fuel cutting, carbon arc cutting, plasma torch cutting). The student will also learn mechanical preparation (band saw, grinder, power brush, and other metal prep equipment).

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0121C - Introductory Shielded Metal Arc Welding (SMAW)

75 Clock Hours
(Fall, Spring)

This course provides instruction and demonstration using Shielded Metal Arc Welding (SMAW). Topics include visually inspect of welds, and basic SMAW technical terminology. Basic structural welding techniques will be demonstrated in accordance with American Welding Society (AWS) D1.1 Structural Welding Code. Tack welding and metal joint fit of carbon steel is covered in this course.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0122C - Basic Shielded Metal Arc Welding (SMAW)

75 Clock Hours
(Fall, Spring)

This course introduces structural fillet welds in different joint positions in accordance with AWS D1.1 Structural Welding Code. Fillet welds will be performed on carbon steel plate of various thicknesses.

Prerequisite(s): PMT 0121C

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0126C - Intermediate Shielded Metal Arc Welding (SMAW)

75 Clock Hours
(Fall, Spring)

This course provides the student with instruction on joint design, joint preparation, and fit-up, and performance of groove welds with backing. Emphasis is placed on safe operation of welding equipment. Upon completion, students should be able to identify the proper joint design, joint preparation and fit-up of groove welds with backing and make acceptable groove welds with backing using Shielded Metal Arc Welding (SMAW) in accordance with AWS D1.1 welding code.

Prerequisite(s): PMT 0122C

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0127C - Advanced Shielded Metal Arc Welding (SMAW)

75 Clock Hours
(Spring, Summer)

This course provides the student with advanced instruction on joint design, joint preparation, and fit-up, and performance of open groove welds. Emphasis is placed on safe operation of welding equipment. Upon completion, students should be able to identify the proper joint design, joint preparation and fit-up of open groove welds and make acceptable open groove welds in all positions using Shielded Metal Arc Welding (SMAW) in accordance with AWS D1.1 welding code.

Prerequisite(s): PMT 0126C

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0134C - Gas Metal Arc Welding (GMAW)

50 Clock Hours
(Spring, Summer)

This course provides instruction and demonstration using the various transfer methods and techniques of Gas Metal

Arc Welding (GMAW). Topics included are safety, equipment set-up, joint design and preparation, and gases.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0145C - Flux-Core Arc Welding (FCAW)

240 Clock Hours
(Offered as Needed)

This course provides instruction and demonstration using the various transfer methods and techniques to flux cored arc welds. Topics included are safety, equipment set-up, joint design and preparation, and gases. Students study basic Flux-Core Arc Welding (FCAW) and basic understanding of pipe welding. Welding symbols and blueprint reading are covered in this course.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0155C - Gas Tungsten Arc Welding (GTAW)

160 Clock Hours
(Offered as Needed)

This course provides instruction and demonstration using the various transfer methods and techniques to gas tungsten arc welds. Topics included are safety, equipment set-up, joint design and preparation, and gases. Students study basic Gas Tungsten Arc Welding (GTAW), and basic understanding of pipe welding.

Total Program Hours Required: 1050

Suggested Academic Plan

This program admits students in the fall/spring/summer. Below is a sample academic plan for these students in this clock hour program.

Welding Technology - Advanced (PSAV)

Admission Program of Study Code WELA
State CIP Code 0648050806

This program offers a broad foundation of knowledge and skills to prepare students for employment in the welding industry.

Core Courses

PMT 0165C - Shielded Metal Arc Weld (SMAW) Pipe Welding

200 Clock Hours
(Offered as needed)

This course introduces the student to the practices and procedures of welding carbon steel pipe using the Shielded Metal Arc Weld (SMAW) process. Emphasis is placed on pipe positions, electrode selection, joint geometry, joint preparation and fit-up. Upon completion, students should be able to demonstrate pipe positions, proper electrodes selection, proper joint geometry, joint preparation, fit-up, and proper SMAW pipe welding techniques in accordance with applicable codes.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0171C - SMAW-GTAW Pipe Welding

400 Clock Hours
(Offered as needed)

This course is designed to provide the students with skills in welding carbon steel pipe using Shielded Metal Arc Weld process and Gas Tungsten Arc Weld (GTAW) processes using proper filler metals in the 2G, 5G, and 6G positions. Upon completion, students should be able to perform shielded metal arc welding process and gas tungsten arc welding on carbon steel pipe with the prescribed filler metals in the 2G, 5G, and 6G position in accordance with the applicable code.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0173C - Specialty Pipe Welding

150 Clock Hours
(Offered as needed)

This courses covers advanced pipe welding and is designed to build advanced GTAW skills. This course covers advanced Gas Tungsten Arc Welding (GTAW) on alloy pipe and heavy wall carbon pipe.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Unmanned Vehicle/Drone

Associate in Science

Unmanned Vehicle Systems Operations - Business Development Specialization (AS)

Admission Program of Study Code DRO2

State CIP Code 1615080102

General Education

ENC 1101 - English Composition I

3 Credit Hours ♦ ▲ ¶
(Fall, Spring, Summer)

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

▲ Technology-Across-the-Curriculum Course

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear,

quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHI 2600 - Introduction to Ethics

3 Credit Hours ❖ † ¶
(Fall, Spring, Summer)

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHY 1020 - Physical Science

3 Credit Hours ♦
(Fall, Spring, Summer)

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

POS 1041 - American Government

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a

Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

SLS 2505 - Critical Thinking

3 Credit Hours
(Fall, Spring)

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Total General Education Credits Required: 18

Core Courses

ASC 2560C - Unmanned Aerial Vehicles & Systems

5 Credit Hours
(Spring)

This course is a survey of unmanned aerial vehicles (UAV) and systems, emphasizing the military and commercial history, growth and applications of UAVs. Course will include basic acquisition, use and operation of UAVs with an emphasis on operations.

Prerequisite(s): ATT 1100

ASC 2564C - Unmanned Vehicle Security

4 Credit Hours
(Spring)

Participants will develop an understanding of the digital operations of an unmanned vehicle. Methods of securing digital information during the upload and downloading functions will be explored.

ASC 2949C - Unmanned Systems Practicum

4 Credit Hours
(Spring)

Practical application in a clinical setting of knowledge acquired in the classroom.

ATT 1100 - Private Pilot Ground School

3 Credit Hours
(Fall)

An introductory survey of the subjects pertaining to flight; aircraft operation and performance, weather, pilotage, air traffic control and Federal Aviation Regulations in preparation for the Federal Aviation Administration Private Pilot Written examination.

ENC 2210 - Technical Report Writing

3 Credit Hours
(Spring)

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Prerequisite(s): passing score on placement test.

ETM 1005C - Basic Mechanical Operations

3 Credit Hours
(Spring)

This course introduces the student to basic mechanic fundamentals. Instructional topics will include hand tool identification and application, power tool identification and application and shop safety.

ETI 1710 - Occupational Safety

3 Credit Hours
(Spring, Summer, Fall)

A basic course in occupational safety and health covering such topics as: theories of accident causation, workplace hazards, hazard analysis and prevention, accident reporting, OSHA, ergonomics, product safety, workers' compensation, and stress on the job.

PGY 1801C - Digital Photography I

4 Credit Hours
(Offered as needed)

A beginning course in photography with an emphasis on digital darkroom production techniques. Students will be exposed to procedures and aesthetic concerns relating to photography and digital image production. Access to an appropriate high-quality camera required.

▲Technology-Across-the-Curriculum Course.

Total Core Credits Required: 29

Specialization Elective Courses

BUL 2241 - Business Law I

3 Credit Hours
(Fall, Spring)

Introductory course in business law with objective of presenting the law underlying business transactions. Course includes the study of the Law of Contracts, the Law of Bailments, and the Law of Sales based on the Uniform Commercial Code. Recommended for Business degree students.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

SBM 2000 - Small Business Management

3 Credit Hours
(Spring)

This course provides students the opportunity to learn hands-on technical applications regarding entrepreneurship. It is designed for the student who is interested in the ownership and management of a small business enterprise.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAR 2011 - Introduction to Marketing

3 Credit Hours
(Fall)

An introductory course in the field of marketing including a look at marketing as it exists in our economy today. Consideration of the market, the product, distribution channels. Special emphasis on the study of human behavior in marketing promotion.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GIS 1040C - Introduction to Geographic Information Systems

3 Credit Hours
(Offered as Needed)

This course will provide students with an introduction to Geographic Information Systems (GIS). Lectures will include: What is GIS, GIS applications, fundamentals such as map projections, vector versus raster data models, creating and maintaining geographic databases, spatial analysis and modeling, cartography and map production. Lab Sessions will include the hands on use of the ArcGIS software. Students will receive a 180-day version of the software with their textbook that they can use at home to complete assignments.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GIS 2401 - GIS Applications in Social Science

3 Credit Hours
(Offered as Needed)

This course surveys the use of GIS for solving spatial problems in the social sciences. Examples from the fields of health, economic geography and real estate, housing, transportation, criminology, among others are used to illustrate how spatial techniques are used to address problems in a GIS environment. Special consideration will be given to the data needs of such operations, the implementation of methods in a GIS environment, and understanding the spatial assumptions and issues that underpin analyses.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Total Core Credits Required: 29

Specialization Elective Courses

DSC 1250 - Unmanned Vehicles Fundamentals for Disaster Management

3 Credit Hours
(Spring)

This course examines the protocol and interagency support concepts for the utilization of unmanned vehicles in preparation and response of catastrophic events. Students will be introduced to the development of an emergency response plan which will include unmanned vehicle concepts such as observation, communications, safety, training, and also integration between Public safety agencies.

DSC 2900 - Development of Unmanned Vehicle Applications

3 Credit Hours
(Fall, Spring, Summer)

Students complete a project that demonstrates excellence by applying the knowledge of unmanned drones gained from the public safety core courses. Successful completion of the course requires demonstration of the achievement of program objectives and learning outcomes.

EMS 2350 - Unmanned Vehicles Applications and Operations for EMS

3 Credit Hours
(Summer)

This course examines the response of Emergency Medical Services to unsecure scenes with the aid of unmanned vehicles. Students will explore EMS protocols for the utilization of unmanned vehicles in catastrophic events with

mass casualties requiring triage and multiple agency responses. Participants will be introduced to the concepts of the utilization of unmanned vehicles for support during large scale public events such as; conventions, festivals, athletic events, protest, and special team support.

FFP 1691 - Fundamentals of Firefighting & Unmanned Vehicles

3 Credit Hours
(Summer)

Course introduces the fundamentals of unmanned vehicle applications for firefighting with prioritization of manpower and equipment utilization. Fire officers explore the use of unmanned vehicles for fire ground commanders for tactical operations for all levels of fire. Emphasis for fire investigators on utilization of unmanned vehicles in the investigation process. Course introduces determination of fire cause and origin with collection of evidence by unmanned vehicles during fire scene investigation. Participants will explore the use unmanned vehicles for planning, responding, and evaluating HAZMAT incidents.

FFP 2692 - Unmanned Vehicles Applications and Search & Rescue

3 Credit Hours
(Fall)

This course examines the utilization of unmanned vehicles by public safety in various search and rescue operations. Students will be introduced to the utilization of unmanned vehicles during searches for suspects eluding capture. Course will examine the response protocol and interagency support utilizing unmanned vehicles in urban, water, and various terrain search and rescue operations. Students will be introduced to the operations of unmanned vehicles for silver and amber alerts.

Specialization Elective Courses

CJE 1735 - Unmanned Vehicle Legal Requirements and Case Law

3 Credit Hours
(Fall)

This course examines the legal requirements and limits of drone operation by law enforcement. The course will also introduce the student to case studies, guidelines, laws, and protocols for law enforcement operations in contrast to use by private citizens. Additionally, this case will examine and define expectations of privacy, based on case law as set forth by the United States Supreme Court. Case studies and Supreme Court decisions from the last century

based on the fourth amendment and due process of law, will be studied for class projects. Each student will be required to submit a research paper on a specific related topic as assigned by the instructor.

CJE 2736 - Law Enforcement Applications of Unmanned Vehicles for 21st Century

3 Credit Hours
(Fall)

This course will introduce students to current law enforcement uses and abilities of unmanned vehicle systems, along with new and developing applications for exclusive use in law enforcement actions. Students will understand and explain the definitions of privacy expectations as related to law enforcement actions governed by the fourth amendment. Students will be required to participate in a course project, in which students will develop, justify and define futuristic uses on drone technologies in the law enforcement field. In this team project, a presentation is required to defend the positions and uses of drone technologies as related in the project results.

DSC 1250 - Unmanned Vehicles Fundamentals for Disaster Management

(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHI 2600 - Introduction to Ethics

3 Credit Hours ❖ † ¶
(Fall, Spring, Summer)

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHY 1020 - Physical Science

3 Credit Hours ♦
(Fall, Spring, Summer)

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

POS 1041 - American Government

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

SLS 2505 - Critical Thinking

3 Credit Hours
(Fall, Spring)

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Total General Education Credits Required: 18

Core Courses

ASC 2560C - Unmanned Aerial Vehicles & Systems

5 Credit Hours
(Spring)

This course is a survey of unmanned aerial vehicles (UAV) and systems, emphasizing the military and commercial history, growth and applications of UAVs. Course will include basic acquisition, use and operation of UAVs with an emphasis on operations.

Prerequisite(s): ATT 1100

ASC 2564C - Unmanned Vehicle Security

4 Credit Hours
(Spring)

Participants will develop an understanding of the digital operations of an unmanned vehicle. Methods of securing digital information during the upload and downloading functions will be explored.

ASC 2949C - Unmanned Systems Practicum

4 Credit Hours
(Spring)

Practical application in a clinical setting of knowledge acquired in the classroom.

ATT 1100 - Private Pilot Ground School

3 Credit Hours
(Fall)

An introductory survey of the subjects pertaining to flight; aircraft operation and performance, weather, pilotage, air traffic control and Federal Aviation Regulations in preparation for the Federal Aviation Administration Private Pilot Written examination.

ENC 2210 - Technical Report Writing

3 Credit Hours
(Spring)

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Prerequisite(s): passing score on placement test.

ETM 1005C - Basic Mechanical Operations

3 Credit Hours
(Spring)

This course introduces the student to basic mechanic fundamentals. Instructional topics will include hand tool identification and application, power tool identification and application and shop safety.

ETI 1710 - Occupational Safety

3 Credit Hours
(Spring, Summer, Fall)

A basic course in occupational safety and health covering such topics as: theories of accident causation, workplace hazards, hazard analysis and prevention, accident reporting, OSHA, ergonomics, product safety, workers' compensation, and stress on the job.

PGY 1801C - Digital Photography I

4 Credit Hours
(Offered as needed)

A beginning course in photography with an emphasis on digital darkroom production techniques. Students will be exposed to procedures and aesthetic concerns relating to photography and digital image production. Access to an appropriate high-quality camera required.

▲Technology-Across-the-Curriculum Course.

Total Core Credits Required: 29

Specialization Elective Courses

ETD 2364C - SolidWorks I

3 Credit Hours
(Fall)

A basic course in Parametric Solid Design using SolidWorks Software. Topics include: basic concepts of parametric part sketching 3D part creation, Revolve, Sweep and Lofted features, shell and coil, surface creation, sheet metal and orthographic drawing production.

▲Technology-Across-the-Curriculum Course.

ETD 2371C - 3D Printing I

3 Credit Hours
(Fall, Spring, Summer)

This course will develop elements of creative thinking and problem solving used in the design process, including the techniques and methods used to construct prototypes and models. In the project aspect of this course, the students select a field of specialization to explore methods and materials in a number of options in industrial environment with the use of computer simulation, modeling, and rapid prototyping.

Prerequisite(s): ETD 2364C or ETD 1355C or ETD 2357C or permission of instructor.

ETD 2372C - 3D Printing II

3 Credit Hours
(Fall, Spring, Summer)

The student will continue to develop elements of creative thinking and problem solving used in the design process, including the techniques and methods used to construct prototypes and models. In the project aspect of this course, the students expand their knowledge in the methods and materials and of computer simulation, modeling, and rapid prototyping.

Prerequisite(s): ETD 2371C or permission of the instructor.

PMT 1203C - Introduction to Machining

3 Credit Hours
(Fall, Spring, Summer)

This course introduces the student to basic mechanic fundamentals. Instructional topics will include hand tool identification and application, power tool identification and application and shop safety.

PMT 1250C - Introduction to CNC Machining

3 Credit Hours
(Fall, Spring, Summer)

The history and development of CNC (computer numerical control). Programming methods are reviewed with the emphasis of skills placed on programming, milling, drilling and turning with M and G code preparation. Manual and computer assisted programming are also reviewed. Students will program, set up and operate full size CNC machines found in our manufacturing lab. Projects will be assigned to students with an expectation of performing these tasks on manufacturing equipment.

Total Specialization Elective Credits Required: 15

Total Program Credits Required: 62

Suggested Two Year Academic Plan

This program admits students in the fall/spring/summer semester(s). Below is a sample academic plan for these students admitted in the identified semester.

Unmanned Vehicle Systems Operations (AS)
First Year
Fall Semester ENC 1101 - English Composition I **3 Credit Hours ♦ ▲ ¶** ATT 1100 - Private Pilot Ground School **3 Credit Hours** PHI 2600 - Introduction to Ethics **3 Credit Hours ❖ † ¶** ETI 1710 - Occupational Safety **3 Credit Hours** SLS 2505 - Critical Thinking **3 Credit Hours** **Total Semester Hours: 15**

Total Program Hours: 62

Developmental Education

Developmental Education Overview

Developmental education courses are designed to improve students' skills and thus prepare them for success in their college level courses, career fields, and/or the workplace. These courses develop students' skills in English, reading and math in addition to SLS 1101 - College Success, a course that improves the more general abilities students need to succeed in college, such as time-management, test-taking, and note-taking.

Free instructional support also is provided with walk-in Math tutoring in the Math Lab and individual tutoring appointments for a variety of subjects in the Academic Success Center. Online tutoring is also available through RaiderNet.

Successful completion of the developmental requirement is defined as:

- A grade of "C" or higher in each required developmental course and
- Attainment of a passing score on each required developmental exit examination.

Students enrolled in developmental courses may, at the same time, take college credit courses for which they are qualified. In this manner, a student may begin earning credits that apply toward his/her program of study while completing developmental requirements.

Placement Testing

A student's placement test scores ensure accurate placement in Developmental courses. However, some students are exempt from placement testing, although they may opt to take the placement test in order to gauge their readiness for college-level work.

Exempt Students

Exempt students are defined by Florida Administrative Code 6A-10.0315 and Florida Statute 1008.30 as Active Duty Military students or students who have graduated from a Florida high school since 2007 and are not required to take a placement test or take Developmental Education courses. Exempt students who choose to take a placement test to measure their college readiness are not bound by the scores to enter developmental education; however, they may elect to enroll in developmental education. See the Placement Chart below for course placement scores. Any advisor or the appropriate department chair can provide the permission required for some courses.

Non-Exempt Students

Non-exempt students whose entry level placement scores are below the levels specified in Florida Administrative Code are required to enroll in the appropriate developmental courses. They must take the placement test and will be placed based on their scores, as outlined in the Placement Chart.

Math Courses Flow Chart

Math Courses Flow Chart

Placement Chart

Math Placement Levels

COURSES	PERT	ACT	SAT Taken prior to 3/1/2016	SAT Taken on or after 3/1/2016
MAT 0018 - Developmental Mathematics I	50-95	< 19 PERT Required	< 440 PERT Required	< 24 PERT Required
MAT 0028 - Developmental Mathematics II	96-113	< 19 PERT Required	< 440 PERT Required	< 24 PERT Required
MAT 0157 - Modularized Developmental Mathematics II	96-113	< 19 PERT Required	< 440 PERT Required	< 24 PERT Required
MAT 0056 - Developmental Mathematics Module	105-109	< 19 PERT Required	< 440 PERT Required	< 24 PERT Required
MAT 1033A - Intermediate Algebra *	114-122	19-20	400-499	24-26
MAC 1105 - College Algebra **STA 2023 - Statistics** **MGF 1106 - Practical Applications of Mathematics** **MGF 1107 - Math in Society**	123-150 (Students scoring a 133 or greater may take the CLM to place in a higher level math course)	21-36 (Students scoring a 21 or greater may take the CLM to place in a higher level math course)	500-800 (Students scoring a 500 or greater may take the CLM to place in a higher level math course)	> 26 (Students scoring a 26.5 or greater may take the CLM to place in a higher level math course)

*Students scoring 110-113 on the PERT Math test may enroll in MAT 1033A if they also enroll in MAT 1033L. Please see an academic advisor.

Reading Placement Levels				
TEST	**ENC 0017 - Integrated Reading and Writing I**	**ENC 0027 - Integrated Reading and Writing II**	**REA 0056 - Developmental Reading Module**	**ENC 1101 - English Composition I**
PERT	50-83	84-105	96-105	106-150 & Writing 103-150

ACT	≤ 18 PERT Required	≤ 18 PERT Required	≤ 18 PERT Required	Reading ≥ 19 & English ≥ 17
SAT - Critical Reading Taken prior to 3/1/2016	≤ 439 PERT Required	≤ 439 PERT Required	≤ 439 PERT Required	440
SAT - Reading Taken on or after 3/1/2016	<24 PERT Required	<24 PERT Required	<24 PERT Required	24 and above

English Placement Levels					
TEST	**ENC 0017 - Integrated Reading and Writing I**	**ENC 0027 - Integrated Reading and Writing II**	**ENC 1101L - English Composition I Lab ***	**LIN 1670 - Writing and Grammar**	**ENC 1101 - English Composition I ***
PERT	50-89	90-102	100-116	103-116 Strongly Recommended	103-150 & Reading 106-150
ACT	≤ 16 PERT Required	≤ 16 PERT Required	≤ 16 PERT Required	17-20	17
SAT - Critical Reading Taken prior to 3/1/2016	≤ 439 PERT Required	≤ 439 PERT Required	≤ 439 PERT Required	440-499	440
SAT - Writing and Language Taken on or after 3/1/2016	<25 PERT Required	<25 PERT Required	<25 PERT Required	25 and above	25 and above

*Students scoring 100-102 on the PERT English test may enroll in ENC 1101 if they also enroll in ENC 1101L. Please see an academic advisor.

Note: Students are required to enroll in the course based on their lowest PERT score in either Reading or English.

Alternative Developmental Instruction

Florida law requires that all students whose placement test scores indicate the need for remediation be given the opportunity to satisfy the remediation requirement through developmental instruction or through alternate instructional options. Examples of alternate options include independent study, non-credit courses, and instruction through other colleges and private providers. Students who elect to pursue one of the alternate options must meet with an Academic Advisor prior to registration in order to discuss the impact of the choice on his/her degree progress.

Repeat Enrollments and Attempts in Developmental Courses

Per Florida Statute, a student is eligible for no more than three attempts to successfully complete a given developmental course. All official enrollments after Summer of 1997 are considered attempts, regardless of the grade received. In documented cases of hardship or extenuating circumstances, an exception to the requirement may be granted. Exceptions must be appealed through the Registrar prior to registration. However, if a withdrawal is processed prior to the close of the Drop/Add period, or if audit status is granted prior to the close of the Drop/Add period, the enrollment will not be counted as an attempt. Students may not audit a developmental course unless advance approval is granted through the Office of Academic Affairs. If a student receives a grade of D, F, W, X, or U in a developmental course, he/she may repeat the course to improve the grade and meet developmental requirements. On the third attempt, however, the student will be awarded the letter grade earned (A, B, C, D, F, S, U, or P) and will not be allowed to withdraw or to re-enroll. The prohibition for re-enrollment extends to any public postsecondary institution in Florida.

Once a student has exhausted his/her course attempts in a given developmental area, the only ways to satisfy the developmental requirement are: a) retake the placement examination and demonstrate a score above the established minimum for that subject area, or b) provide documentation of successful completion of an equivalent or higher-level course at a private postsecondary institution. Students not eligible to re-enroll in a given developmental course may, however, continue enrollment at the college in other developmental courses, or in other courses for which they are eligible. In the latter case, an appeal through Enrollment Services may be necessary to continue enrollment.

3rd and 4th Attempts

Florida Statutes also mandate that after the second attempt in a given developmental course, a student will be required to pay the full cost of instruction (approximately four times the usual matriculation fees) to repeat the course. In documented cases of financial hardship or extenuating circumstances, an exception to the full cost requirement may be granted. Exceptions must be appealed through the Registrar prior to registration.

Alternatives for Students No Longer Eligible for College Developmental Enrollment

Once a student has exhausted their course attempts in a given developmental area, the only ways to satisfy the developmental requirement are a) retake the placement examination and demonstrate a score above the established minimum for that subject area or b) provide documentation of successful completion of an equivalent or higher-level course at a postsecondary institution.

NWF State College is committed to student success and has developed several strategies for students in this circumstance. The student should work closely with an Academic Advisor to identify alternatives for which he/she is eligible and to develop a plan for continued study. These strategies are also appropriate for an individual who is subject to the full cost requirement and is unable to afford the increased cost of enrollment.

1. The student may continue enrollment in other appropriate developmental courses, or continue enrollment in other appropriate developmental and college credit courses and pursue one of or a combination of the following strategies. After an appropriate skill-building effort, the student may then retake the placement exam.
    - Enroll in an appropriate alternate developmental course in the subject area
    - Enroll in an adult basic education class(es) to build skills in the given area
    - Pursue individualized study in the Academic Success Center and/or Math Lab to build skills in the given area
    - Work with a college tutor to build skills in the given area
    - Enroll in a college non-credit basic skill refresher course in the given subject/skill area
    - Attend a Skill Refresher Workshop(s) in the given subject/skill area
2. The student may consider a revised program of study which does not carry a developmental requirement. The college offers several college credit and vocational certificates for which placement testing and developmental instruction are not applicable. Students pursuing an A.S. degree may wish to change to a companion college credit certificate which offers the technical skills needed for employment. After completion of the certificate courses, the student may acquire sufficient skills to perform better on the placement examination and eventually progress to an associate degree program of study. See the "Certificates" section of this catalog.
3. The student may temporarily "stop-out" of credit courses, concentrate on skill development, through his/her own resources, then retake the placement examination.
4. The student may enroll in an equivalent or higher level course in the subject area at another postsecondary institution. Upon successful completion of that course work, the student may transfer the course back to NWF State College and/or re-take the placement exam. Students wishing to pursue this option should work closely with an advisor to be sure the alternate course(s) selected will satisfy the developmental requirement. Ideally, the student should submit a transient study form and secure advance approval. Depending on the nature and level of the transfer course, the student may still need to demonstrate minimum skills through the placement exam.

College and Personal Success Classes

Courses focusing on college and personal success strategies are beneficial to a student's academic career and can be used as an elective in some degree programs. NWF State College offers the following college credit courses:

- SLS 1101 - College Success is a recommended course for all students enrolled in the first level of developmental instruction of reading, mathematics or English, or for any student that is required to take any two or more developmental courses regardless of the level.
- SLS 1201 - Service Learning Seminar is required for Honors Scholarship students.

Adult Education

- ABE
- GED
- ESOL
- Transition to College

NWF State College offers a comprehensive program of non-credit instruction designed to improve the employability and life skills of adult students. Courses are offered in Adult Basic Education (ABE), English for Speakers of Other Languages (ESOL), and GED preparation. Each adult education course is offered for a small set fee each semester, which includes materials and supplies. The adult education program is designed for adults who have academic skills below the ninth grade level, those who do not have a high school diploma or those who have a primary language other than English. Special program emphasis is placed on preparing the student to become college ready. Students enrolled in adult education will receive free transition services to become college ready. These services include preparation for the college placement test, career exploration and assessment, developing a career pathway, financial aid and scholarship assistance, and career readiness skills. Visit the Adult Education/GED Preparation webpage or call the Adult Education Department at (850) 729-5387 for more information.

Adult Basic Education (ABE)

Adult Basic Education (ABE) at NWF State College consists of small group instruction with lab support leading to the mastery of the basic skills needed by adults to function in today's complex society. ABE classes are designed for students who want to improve their basic skills in reading, writing, and mathematics. The curriculum is divided into four literacy levels: beginning, basic, intermediate, and advanced.

General Education Development (GED) Preparation

GED classes prepare students to take the General Education Development examination, which leads to the State of Florida High School Diploma. Instruction is targeted at the secondary level with subject content in the areas of writing, social studies, science, reading, and mathematics.

The NWF State College Testing Center offers the Official GED Examination throughout the academic year. Students must register in advance for the exam and pay an examination fee. Testing is offered at the Niceville Campus.

English for Speakers of Other Languages (ESOL)

ESOL classes are eligible to students who have a primary language other than English. ESOL classes are designed to prepare students to communicate effectively in a multi-faceted society. This course is divided into six literacy levels. Students are administered the Comprehensive Adult Student Assessment Systems (CASAS) test for placement into a literacy level. Course content is compatible with principles of language acquisition for adult learners of English and includes skills useful in both workplace life and academic applications.

Transition Services to Postsecondary Education

College credit transition services are available to GED graduates and adult education students preparing for the GED. College readiness services include the development of a transition plan that includes career assessment, academic tutoring, peer mentoring by college credit students, as well as scholarship, financial aid, and college credit admissions assistance.

Professional and Continuing Education

- Community Education
- Costa Leadership Institute
- Fitness and Wellness
- Jr. Raiders Kid's Programs
- Personal Enrichment
- Online Learning
- Meeting and Special Event Facilities

The Professional and Continuing Education Department at Northwest Florida State College offers a variety of quality non-credit programs. These programs include personal enrichment for the lifelong learner, business skills training for professionals, online classes, special event space rentals, fitness and wellness classes, kid's programs and community programs. Taught by experienced professionals, these programs are for all ages and offered during the morning, afternoon, evening and weekends, convenient for people with busy lives. Our programs are conducted throughout Okaloosa and Walton Counties and include:

Community Education

In partnership with community organizations, ecotourism programs and state/court mandated program (Motorcycle Safety, Advanced Motorcycle Rider, Divorce Classes, Guardianship Classes, Eco Tours with Choctawhatchee Basin Alliance, American Heart Association CPR trainings, and more)

Costa Leadership Institute

The Costa Leadership Institute provides professional and business skills training (Computer/Technology, Leadership, Communications, Preparation Exam/Certification Courses, Certification Exams, Continuing Education Units for Designated Professionals, and more)

Fitness and Wellness

Group aerobic and wellness classes at our Niceville Campus and DeFuniak Springs Center (Ballroom Dancing, Zumba, Tia Chi, Yoga and more). *The Niceville Campus also offers gym memberships to the Raider Wellness Center, Niceville Campus.*

Jr. Raiders Kid's Programs

Summer Kid's On Campus, Sports Camps (June and July Kid's On Campus and basketball, baseball and softball sports campus conducted by NWFSC Raider's coaches)

Personal Enrichment

A variety of non-credit personal enrichment courses are available throughout the year. Topics range from computer skills, finance, consumer education and a variety of courses to meet the needs of the community. Fees vary with the length and type of course offered; most classes are held on the Niceville Campus.

Online Learning

Online workforce training and personal enrichment classes offered through Ed2go

Meeting and Special Event Facilities

Offering meeting and special event facilities at our main campus in Niceville and centers in Fort Walton Beach, Crestview, DeFuniak Springs and South Walton.

Articulation Agreements

- Florida Statewide Articulation for AA Degree
- Local NWF Agreements with Other Institutions
- Local NWF Internal Agreements
- NWF Certificate to AS Degree Career Paths
- Statewide Articulation Agreements

What is an Articulation Agreement?

Florida has instituted a variety of methods to facilitate student transfer of credit, otherwise known as articulation agreements. The Statewide Articulation Manual provides statewide standards for awarding advanced placement credits, high school dual enrollment credit, transfer of credit between institutions, and related topics. The Florida Department of Education, through the Articulation Coordinating Committee (ACC), also facilitates statewide consistency among institutions that award credit for certain professional credentials, such as industry certifications, licenses, and certificates. In addition to statewide articulation agreements, NWF State College has local articulation agreements with various other institutions, as well as internal agreements for specific NWF State College programs.

Florida Statewide Articulation Agreement for AA Degree (State Board of Education Rule 6A-10.024)

Florida Community College **Associate in Arts (AA)** graduates are guaranteed the following rights under the Statewide Articulation Agreement (State Board of Education Rule 6A-10.024):

- Admission to one of the state universities, except to Limited Access* programs.
- Acceptance of at least 60 credit hours by the state university toward the baccalaureate degree.
- Adherence to university requirements and policies based on the catalog in effect at the time the student first entered a community college, provided the student maintains continuous enrollment.
- Transfer of equivalent courses under the Statewide Course Numbering System.
- Acceptance by the state universities of credit earned in accelerated programs (e.g., CLEP, DANTES, AP, PEP, Dual Enrollment, Early Admission and International Baccalaureate).
- No additional General Education Core requirements.
- Advance knowledge of selection criteria for Limited Access* programs.
- Equal opportunity with native university students to enter Limited Access* programs.

Should any guarantee be denied, students have the right of appeal. Each state university, and state college shall make available established appeal procedures through the respective articulation officers. At NWF State College, students may contact the Vice President of Academic Affairs or the Dean of Students.

** Limited Access is the designation given to programs that require additional admission requirements which are more selective than general admission requirements. These may include the following: increased total GPA and test scores; additional courses and prerequisites; and auditions and portfolios.*

NWF State College Certificate to AS Degree Career Paths

Many of the technical certificate programs offered by NWF State College provide the initial step in meeting selected course requirements for an A.S. degree in a related area. Courses from those certificates are the same as or equivalent to comparable courses in the companion degree program. Likewise, courses used in the degree program may be applied to a certificate in a related area; in many cases, completion of the technical courses in the degree program can automatically qualify the student to receive the companion certificate.

A list of all AS degrees and corresponding articulated certificates is shown on the Certificate to AS Degree Career Paths page.

For a side by side view of the AS degrees and corresponding certificates see the AS Degree - Companion Certificates 2017-18 [.pdf]

Local NWF State College Agreements With Other Institutions

Embry-Riddle Aeronautical University and NWF State College

- Admission criteria and transfer of credits -- Embry-Riddle Academic Agreement

Florida A&M University and NWF State College

- NWFSC Associate of Arts degree and Florida A&M University (FAMU) School of Architecture **-** Pre-Architecture Articulation

Florida State University - Panama City and NWF State College

- NWFSC Associate of Arts degree and Florida State University - Panama City - FSU-Panama City Articulation Agreement

NWF2UWF

NWF2UWF Articulation Agreement

The NWF2UWF Program offers collaborative academic advising from UWF Transfer Advisors and an on-site NWF2UWF Program Coordinator located on the NWF State College's Niceville campus. Students will also receive access to UWF services and benefits before they enroll. Students who complete an associate of arts degree at NWF State College are guaranteed admissions at UWF, contingent upon meeting the minimum transfer requirements.

- Admission to UWF with no application fee
- Convenient transfer of academic records and courses from NWF State College
- Affordable bachelor's degree from an accredited and respected public university
- Options to complete a bachelor's degree at one of three University of West Florida's locations:
    - Main Campus - Pensacola
    - Emerald Coast - Ft. Walton Beach
    - Online Campus
- Faculty and staff committed to academic success
- Flexible class schedules to meet busy lifestyles
- Experienced academic advisors to assist in satisfying degree requirements
- Library privileges at both institutions
- UWF email account
- UWF ID card

To participate in a 2UWF Program a student must:

- Meet current admission criteria at a state college partner
- Complete an associate of arts degree with a minimum overall combined 2.0 GPA as computed by UWF. (Individual departmental requirements may be higher)
- Be in compliance with the code of conduct at a state college and is in good academic standing.
- Not attend another institution between the time you graduate from your current state college and enroll at UWF.
- Formally enroll in UWF within one year of having completed an associate of arts degree.

- Not have previously graduated from a state college partner.
- Apply via www.uwf.edu/pathways

University of West Florida and NWF State College

- NWF State College Bachelor of Applied Science in Project Management - Acquisitions (BAS) and UWF Master of Science Degree in Administration -- Acquisition and Contract Administration Articulation Agreement

Local NWF State College Internal Articulation Agreements

Internal Articulation Agreements

Public Safety

Law Enforcement and/or Correctional Officer (PSAV) certificates to the Criminal Justice Technology (AS) degree

- Firefighter (PSAV) certificates to the Emergency Administration & Management (AS) degree
- Florida State Fire Marshall Firefighter I Certification to NWF State College course FFP 0010
- Emergency Medical Technician (EMT-Basic) (CCC) and/or Paramedic (EMT-P) (CCC) certificates to the Emergency Medical Services (AS) degree
- American Council on Education Special Forces Advanced Tactical Practitioner/18 Delta to the Paramedic (CCC) certificate

Health Sciences

- Dental Assisting (PSAV) certificate to Health Services Management (AS) degree
    - Students who successfully complete the Dental Assisting program and pass the Dental Assisting National Board (DANB) Certificate (CDA) may apply credits towards the requirements for the Health Services Management AS Degree.
- NWF State College Nursing Department Articulation Plan.
    - LPN to Nursing (AS) degree

Early Childhood Education

- Child Development AS Degree to requirements for the Early Childhood Education, Birth through Four BS degree

Statewide Articulation Agreements

The State Board of Education approved the Statewide Career and Technical Education Articulation Agreements which are based on industry certification. This supports the Department's Next Generation Areas of Focus effort Number 3 —"to expand opportunities for postsecondary degrees and certificates." These agreements are intended to be a minimum guarantee of articulated credit and do not preclude institutions from granting additional credit based on local agreements. Individual agreements are listed below.

Statewide Articulation Agreements

AS to Baccalaureate Degree Articulation Agreements

In Florida, A.S. degree curricula regularly include technical skills and theoretical knowledge, as well as, a required general education component that are designed to prepare an individual either for entry into the workforce or transfer into a related baccalaureate program. It is this combination of theory and practice that distinguishes the A.S. degree from the A.A. degree, with its traditional focus on the liberal arts and sciences. This valuable combination of knowledge and skills need not disqualify A.S. degree courses from transferability. Indeed, the competencies taught in the lower division at two-year colleges often duplicate competencies taught at universities in the upper division (in nursing, for example, or in certain information technology fields). The learning outcomes embedded in the A.S. degree programs often embody similar technical knowledge and skill sets. A complete list of articulated programs and hours can be viewed in the Florida Department of Education Career Ladder Agreements document.

Industry Certification to Associate in Applied Science (AAS) / Associate in Science (AS) Articulation Agreements

There are several acceleration methods associated with Industry Certification. These acceleration opportunities allow students who are progressing to the next level of education to earn a guaranteed number of college credits toward the AAS or AS degree. Each acceleration opportunity requires the student to demonstrate mastery of a specified level of competency. One example of this method is the Gold Standard Articulation Agreement, which includes identified industry certifications. As new agreements are developed they are added to the articulation list.

The Gold Standard Career pathways Articulation Agreements of Industry Certification provides information on the identified industry certifications approved by the Florida State Board of Education. Contact Ms. La'Terica Clark, Coordinator of Career and Technical Education at (850) 729-4956 for specific industry certification articulation options at NWF State College.

ATD to AAS/AS Articulation Agreements

The Applied Technology Diploma (ATD) consists of a course of study that is part of an associate in science (AS) or an associate in applied science degree (AAS), is less than sixty (60) credit hours, is approximately fifty (50) percent of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either clock hour credit or college credit. The transfer of the applied technology diploma to an associate degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma. For a listing of specific statewide ATD to AAS/AS articulation agreements approved by the ACC, see: ATD to AAS/AS Articulation Agreements.

High School Career Pathways Programs

To determine competency alignment between secondary and postsecondary programs/courses, Florida Department of Education staff review the secondary curriculum frameworks, textbooks, additional materials and equipment used, and the knowledge and skills sets students acquire in the secondary program. From this information, college administration and faculty determine to which courses and/or programs, if any, the secondary programs can be articulated, and identify what courses a student (having successfully completed a Career Pathways program) may receive upon high school graduation and college enrollment. At NWF State College, students may earn credits through the Jump Start Articulation Agreement program based upon high school coursework completed at a school in Okaloosa or Walton County.

Transfer Agreement with Independent Colleges and Universities in Florida

The Florida College System has a transfer agreement with many of the Independent Colleges and Universities of Florida (ICUF). This allows AA degree graduates to transfer into a private college or university with the guarantee that a student will enter as a junior, receive at least 60 credit hours toward the bachelor's degree, and receive recognition

for the general education core that was completed at an institution within the Florida College System. Most of the 31 ICUF institutions have recognized this agreement. To view a copy of the ICUF articulation agreement with the Florida College System, see: Independent Colleges and Universities Articulation Agreement.

Other Statewide Agreements

The Florida College System also has established articulation agreements with private colleges and other universities. To view specific agreements, see: http://www.fldoe.org/articulation/articulation-agreement.asp.

Accreditations

- Southern Association of Colleges and Schools Commission on Colleges
- Dental Assisting (PSAV)
- Law Enforcement (PSAV)
- Nursing (BSN)
- Paramedic (CCC)
- Welding Technology (PSAV)

College Accreditation

Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)

Northwest Florida State College is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award baccalaureate and associate degrees, certificates and diplomas. Contact the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, www.sacscoc.org, or call 404-679-4500 for questions about the accreditation of Northwest Florida State College.

Program Accreditations

Dental Assisting (PSAV)

The Dental Assisting program is accredited by the Commission on Dental Accreditation and has been granted accreditation status of approval with reporting requirements. The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at (312) 440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611-2678. The Commission's web address is: http://www.ada.org/100.aspx.

Law Enforcement (PSAV)

The following NWF State College instructional programs are certified by the Florida Criminal Justice Standards and Training Commission (CJSTC) through the Florida Department of Law Enforcement (FDLE). The programs underwent a re-accreditation review process in 2015 and were all re-certified for a five (5) year period. The Florida Criminal Justice Standards and Training Commission can be contacted at (850) 410-7000. The website for the Criminal Justice Standards & Training Commission is: http://www.fdle.state.fl.us/Content/CJST/Menu/cjst-index/CJSTC-Home-Page.aspx.

- Auxiliary Law Enforcement Officer Basic (PSAV)
- Correctional Officer Basic (PSAV)
- Crossover from Corrections to Law Enforcement Program (PSAV)
- Law Enforcement Officer Basic (PSAV)

Nursing (BSN)

The baccalaureate Nursing program is accredited by the Commission on Collegiate Nursing Education, One DuPont Circle, NW, Suite 530, Washington DC 20036, (202)887-6791. For more information regarding disclosure, please review pages 15-16 of the CCNE Procedures for Accreditation of Baccalaureate and Graduate Degree Nursing Programs (http://www.aacn.nche.edu/ccne-accreditation/Procedures.pdf).

Paramedic (CCC)

The NWF State College Paramedic program is accredited by the Commission on Accreditation of Allied Health Education Programs (http://www.caahep.org) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP), Commission on Accreditation of Allied Health Education Programs, 1361 Park Street, Clearwater, FL 33756. Telephone (727) 210-2350.

Welding Technology (PSAV)

The Welding Technology program is accredited by the National Center for Construction Education and Research as a Journey-level Professional Welder. The program's accreditation was most recently awarded during February 2014 and re-evaluation occurs every three years. As the accrediting body for the industry, NCCER establishes the benchmark for quality training and assessments. The National Center for Construction Education and Research can be contacted at (888) 622-3720 or at 13614 Progress Boulevard, Alachua FL 32615. NCCER's web address is: http://nccer.org/new-to-nccer.

Course Descriptions

- All Courses
- Adult Education Courses
- Developmental Education Courses
- Directed Independent Study
- General Course Information
- Lower Division College Credit Courses
- Upper Division College Credit Courses
- Vocational Courses

Courses by Type (Subject Area)

Accounting

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

ACG 2011 - Accounting II

3 Credit Hours
(Spring)

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2021 - Financial Accounting

3 Credit Hours
(Summer)

This course is an introduction to financial accounting that specializes in the processes and principles used to prepare financial statements. This course will focus on the purpose and content of the four basic financial statements including the preparation of these statements as well as interpreting information for decision-making.

Prerequisite(s): MAC 1105 - College Algebra **3 Credit Hours** ♦, equivalent, or higher

ACG 2071 - Managerial Accounting

3 Credit Hours
(Spring)

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Corequisite(s): ACG 2011 with instructor/department approval.

ACG 2450 - Computer Applications for Accounting

3 Credit Hours
(Spring)

An introductory course in computerized integrated accounting procedures found in the microcomputer environment. Includes application of software designed for general ledger, accounts payable and receivable, financial statement analysis, purchasing and sales order processing, fixed assets, payroll, inventory and departmental accounting.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ACG 3083 - Accounting: Concepts and Practice

3 Credit Hours
(Fall, Spring)

This course explores the preparation and use of accounting information. Topics include mathematical procedures related to business decisions; terms and processes associated with the accounting cycle; financial statements for the sole-proprietorship, partnership and corporation; and foundations of managerial accounting.

Prerequisite(s): upper division standing and ACG 2001 and MAC 2233 are recommended. Knowledge of basic computer and keyboarding skills are strongly recommended.

ACO 1806 - Payroll Accounting

3 Credit Hours
(Spring)

Introduction to the theory, laws and procedures related to payroll activities of a business. Topics include payroll and personnel records, federal payroll laws, payroll operations, computerized payroll systems, and preparation of payroll registers, earnings records, and payroll tax forms.

Prerequisite(s): ACG 2001 is strongly recommended and knowledge of basic computer and keyboarding skills are strongly recommended.

TAX 2000 - Federal Income Tax: Individual

3 Credit Hours
(Spring)

Federal Income Taxes. Determine income tax for individuals, interpretations of Internal Revenue Code and Regulation, tax planning and advisory service. Brief introduction to partnership, corporation, estate and gift taxes. Extensive practice problems in individual income tax returns and research in tax questions.

Prerequisite(s): MTB 1103 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

Adult Basic Education (ABE)

ABX 01__ - Adult Basic Education - Mathematics

The Adult Basic Education (ABE) Mathematics course is a non-credit course designed to develop literacy skills necessary to be successful workers, citizens and family members. Career and College Readiness (CCR) standards have been incorporated into this class. A student enrolled in the ABE program should be enrolled in all of the following courses: Mathematics, Language Arts, and Reading. ABE prepares students to enroll in a GED® Preparation course.

ABX 02__ - Adult Basic Education - Reading

The Adult Basic Education (ABE) Reading course is a non-credit course designed to develop literacy skills necessary to be successful workers, citizens and family members. Career and College Readiness (CCR) standards have been incorporated into this class. A student enrolled in the ABE program should be enrolled in all of the following courses: Mathematics, Language Arts, and Reading. ABE prepares students to enroll in a GED® Preparation course.

ABX 03__ - Adult Basic Education - Language Arts

The Adult Basic Education (ABE) Language Arts course is a non-credit course designed to develop literacy skills necessary to be successful workers, citizens and family members. Career and College Readiness (CCR) standards have been incorporated into this class. A student enrolled in the ABE program should be enrolled in all of the following courses: Mathematics, Language Arts, and Reading. ABE prepares students to enroll in a GED® Preparation course.

Aeronautical Science

ASC 2560C - Unmanned Aerial Vehicles & Systems

5 Credit Hours
(Spring)

This course is a survey of unmanned aerial vehicles (UAV) and systems, emphasizing the military and commercial history, growth and applications of UAVs. Course will include basic acquisition, use and operation of UAVs with an emphasis on operations.

Prerequisite(s): ATT 1100

ASC 2564C - Unmanned Vehicle Security

4 Credit Hours
(Spring)

Participants will develop an understanding of the digital operations of an unmanned vehicle. Methods of securing digital information during the upload and downloading functions will be explored.

ASC 2949C - Unmanned Systems Practicum

4 Credit Hours
(Spring)

Practical application in a clinical setting of knowledge acquired in the classroom.

ATT 1100 - Private Pilot Ground School

3 Credit Hours
(Fall)

An introductory survey of the subjects pertaining to flight; aircraft operation and performance, weather, pilotage, air traffic control and Federal Aviation Regulations in preparation for the Federal Aviation Administration Private Pilot Written examination.

Anthropology, Archeology

ANT 2000 - Introduction to Anthropology

3 Credit Hours ❖ ♦
(Offered as needed)

Introduction to the fundamental principles, concepts, methods and theories in Anthropology. Includes a brief introduction to the subdisciplines of anthropology: cultural anthropology, biological anthropology, archaeology, and linguistics. A cross-cultural perspective will be paramount in the study of anthropology.

Prereq/Corequisites: ❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ANT 2100 - Introduction to Archaeology

3 Credit Hours ❖
(Offered as needed)

Introduction to the fundamental principles, methods, and theories in archaeology. Includes a history of the development of archaeology, and examination of the nature of archaeological data and research, an introduction to

archaeological data and analysis, and an examination of approaches to synthesis and interpretation. North and South American archeology is studied, but non-western examples are also studied to enhance an understanding of the development of the discipline in Europe and the Americas.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

ANT 2159C - Florida Southeast US Archaeology

3 Credit Hours
(Offered as needed)

Introduction to special topics in anthropology and archaeology. Example: field experience in archaeology, brief introduction to prehistoric native American cultures in Florida and the southeastern United States and field experience excavating a prehistoric site in Okaloosa County.

Architectural Drafting

BCN 1230 - Building Construction Materials and Processes

3 Credit Hours
(Fall)

Course designed to introduce the student to terminology, methods, procedures, materials, and processes used in the construction industry.

BCN 1272 - Blueprint Reading for Commercial Construction

3 Credit Hours
(Fall, Spring)

A course to familiarize non-drafting students with techniques of blueprint reading and the fundamentals of construction methods that make blueprint reading meaningful.

BCN 1520 - Electrical Systems in Construction

3 Credit Hours
(Fall, Spring, Summer)

A course to familiarize students with electrical terminology, practices, methods, code requirements and safety and health in construction.

BCN 1567 - Plumbing and Gas Construction Practices

3 Credit Hours
(Fall, Spring, Summer)

A course to familiarize students with Plumbing and Gas code requirements, terminology, methods, practices, processes and safety and health used in building construction.

BCN 2231 - Building Construction Materials and Processes II

3 Credit Hours
(Spring)

Course designed to introduce the student to terminology, methods, procedures, materials, and processes used in the construction industry. The focus of the course will cover Divisions 9 through 16 of the construction industry.

BCN 2560 - Mechanical Systems in Construction

3 Credit Hours
(Fall, Spring, Summer)

A course to familiarize students with mechanical trades terminology, methods, practices, code requirements processes, and safety and health criteria in mechanical construction.

BCN 2721 - Construction Management/Planning

3 Credit Hours
(Fall, Spring, Summer)

The course covers project development and organization from pre-construction site investigation to final completion. The course will include the management of project estimates, plans, schedules, operations and safety. The student will become knowledgeable about documents used in the construction industry for bid, contracts, zoning, permits, bonds, loans specifications and drawings. Cost engineering, procurement, value engineering and quality assurance will be covered. Cost management through job cost analysis and purchase order systems will also be covered.

BCT 1763 - Construction Safety and Health

3 Credit Hours
(Fall, Spring, Summer)

A basic course in construction safety and health, covering such topics as: theories of accident causation; workplace hazards; hazard analysis and prevention; accident reporting; OSHA construction standard and safety practices; environmental safety; violence in the workplace; ergonomics; ethics and safety; workers' compensation; and stress on the job.

BCT 2761 - Structural Systems in Construction

3 Credit Hours
(Fall, Spring, Summer)

A course to familiarize students with structural terminology, practices, methods, code requirements and safety, and health criteria in construction.

BCT 2770 - Construction Estimating

3 Credit Hours
(Fall, Spring)

A course in estimating as it relates to the construction industry covering references, estimating methods, take-off organization and presentation; material take-off, cost estimating in heavy construction, mathematical formulas for estimating, quantity take-off from plan review, and computer estimating overview.

Prerequisite(s): BCN 1230, BCN 1272.

TAR 2121C - Architectural Drafting

3 Credit Hours
(Offered as needed)

Architectural design and development of residential and light commercial buildings to include: development and construction of good architectural freehand lettering, VA and FHA approved residential house plans, “Good Sense” house plans as defined in the Arkansas Plan, and heat loss/heat gain calculations.

Prerequisite(s): ETD 1102 or ETD 1112 or equivalent.

Architecture

ARC 1131 - Architectural Presentation

3 Credit Hours
(Summer)

This course introduces basic ideas and presentation techniques directed towards developing design skills, such as drawing, perspective sketching, and graphics using a variety of media to include: pencil, ink, colored pencils, markers, and model building to be used in architectural presentations. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

ARC 1301C - Design 1.1

4 Credit Hours
(Fall)

The primary foci of this course are the development of two and three-dimensional graphic skills and the ability to think spatially and to manipulate elements in space. Analysis and design exercises are located primarily in abstract two/three dimensional space and deal with topics such as figure/ground relationships, line/plane/mass, the idea of systems, networks, repetition, and the relation of part to the whole. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

ARC 1302C - Design 1.2

4 Credit Hours
(Spring)

This course continues the emphasis and topics studied in Design 1.1, with increased expectation with regard to graphic and spatial manipulation ability. Students study exemplary works of architecture and art, beginning the process of developing an understanding of the role history plays in their creative explorations. By the end of the course, site and the human being are part of the design environment. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Prerequisite(s): ARC 1301C.

ARC 2201 - Theory of Architecture

3 Credit Hours
(Fall, Spring)

An introduction to architectural theory, selected contemporary architectural theories and movements, and their evolution and historical basis. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Prerequisite(s): ETD 1102.

ARC 2303A - Design 2.1

6 Credit Hours
(Fall)

Application of two and three-dimensional design principles learned in first-year design, in preparation for whole building design in third year. Small building projects adding programmatic responsibilities to the design agenda. Emphasis on programmatic issues internal to the building such as function, circulation structure, resolution of form, space and place making. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Prerequisite(s): ARC 2201.

ARC 2304 - Design 2.2

6 Credit Hours
(Spring)

Application of two and three-dimensional design principles learned in first-year design, in preparation for whole building design in third year. Small building projects adding programmatic responsibilities to the design agenda. Emphasis on programmatic issues internal to the building such as function, circulation structure, resolution of form, space and place making, and human behavior.

Prerequisite(s): ARC 2303A.

ARC 2472 - Introduction to the Technology of Architecture

4 Credit Hours
(Summer)

This course is the beginning of the technology sequence in the areas of structures, environment technology, and materials and methods of construction. It introduces themes such as the response of buildings to the natural environment, the strength, stiffness, and durability in building materials, and the quantitative method of analysis and design of building assemblies and support systems. It explores the relationship between building technology and the social, aesthetic, environmental and economic aspects of the settings in which buildings are located, and how these factors relate to the process of architectural design. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

ARC 2501 - Architectural Structures I

3 Credit Hours
(Offered as needed)

The emphasis of the course is on the development of the principles of statics and the application of these principles to the analysis and design of structural systems, primarily column, beam, slab systems, and the truss systems. The course builds on the basic ideas of structural form and material properties developed in Introduction to the Technology of Architecture.

Prerequisite(s): any college level physics or calculus course, and concurrent enrollment in ARC 2472. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

ARC 2701 - Survey of History of Architecture, Part I

3 Credit Hours
(Offered as needed)

A critical exploration of the history and theory of architecture from pre-history through the end of the 13th century. Examination of the making and intent of significant buildings and sites tracing the developments that have given meaning to the built environment and brought order to the tectonics of architecture. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Art

ART 1201C - Two-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with the principles of organization and the elements of design in a two-dimensional format. This is a foundation course for all of the graphic arts: painting, printmaking, and the two-dimensional crafts. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1203C - Three-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with principles of organization and the elements of design in a 3-dimensional format. Various materials, tools, and surfaces are used to explore 3-D form. This is a foundation course. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1300C - Drawing I

3 Credit Hours
(Fall, Spring)

Basic drawing course covering different drawing media, line, form, shape, value and spatial relationships. Drawing problems involving a variety of subject matter will be explored. Emphasis is on value, drawing techniques, spatial relationships between shapes and composition. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1301C - Drawing II

3 Credit Hours
(Fall, Spring)

Continued study of drawing techniques explored in Drawing I. Provides experience with more complex drawing problems. Emphasis is on self-expression, value, color theory, and composition. A variety of subject matter and drawing media will be explored.

Prerequisite(s): ART 1300C. Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 1750C - Pottery I

3 Credit Hours
(Fall, Spring, Summer)

The students shall be exposed to the production of pottery utilizing all known hand building techniques. Also includes introduction to potter's wheel and basic wheel fundamentals. The first half of course is hand building, the second half is devoted to development of skills on the potter's wheel. Students also learn how to glaze pottery and make glass. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1751C - Pottery II

3 Credit Hours
(Fall, Spring, Summer)

Continues hand building of Pottery I, but major emphasis is placed upon development skills utilizing the potter's wheel. Additional glazing experimentation is also emphasized.

Prerequisite(s): ART 1750C. Please refer to catalog section regarding audit enrollment.

ART 1905A - Independent Study – Art

1 Credit Hour
(Fall, Spring, Summer)

A defined independent study which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule. Departmental approval is required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is also required.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

ART 2330C - Figure Drawing I

3 Credit Hours
(Fall, Spring)

The development of technical skills and self-expression through drawing the figure; course begins with anatomy

studies, progresses to conceptualization of human form. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2331C - Figure Drawing II

3 Credit Hours
(Fall, Spring)

This class is a continuation of Figure Drawing I. Emphasis is on composition and self-expression in relation to the human figure. Exploration of media and content will be encouraged.

Prerequisite(s): ART 2330C. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2500C - Painting I

3 Credit Hours
(Fall, Spring)

Course will include design elements, composition and spatial relationships. Emphasis is on color theory, color mixing, and execution thereof within a variety of subject matter. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2501C - Painting II

3 Credit Hours
(Fall, Spring)

This course is a continuation of Painting I ART 2500C with emphasis on further exploration of student's personal style and original techniques. Further experimentation in abstraction and emotional aspects of form and color are explored and expressed.

Prerequisite(s): ART 2500C. Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2540C - Water Color I

3 Credit Hours
(Fall, Spring)

An introduction to water media techniques applied to various subject matter through demonstrations and various lab experiences. Open to all students. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2541C - Water Color II

3 Credit Hours
(Fall, Spring)

Allows continued experience in more complex water color technique and subject matter. Emphasis is on composition and individual expression.

Prerequisite(s): ART 2540C. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2602C - Digital Imaging I

4 Credit Hours
(Offered as needed)

A digital illustration production course with a strong emphasis on concept development and image making skills. Students will create complex imagery based on manipulations of photographs or traditional drawings and paintings with an industry-standard image editing/manipulation software. Access to an appropriate high quality digital camera is required. It Is recommended that students take PGY 1801C at the same time or prior to taking this course.

▲Technology-Across-the-Curriculum Course.

ART 2603C - Digital Imaging II

4 Credit Hours
(Offered as needed)

A continuing course which expands upon the technical and conceptual foundation laid in Digital Imaging I. Students will explore advanced software techniques and greater challenges of personal or commercial expression in digital media. Access to an appropriate high quality digital camera required.

Prerequisite(s): ART 2602C, PGY 1801C.

▲Technology-Across-the-Curriculum Course.

ART 2701C - Sculpture I

3 Credit Hours
(Spring)

An introductory course in the technical and aesthetic consideration of sculptural forms. Includes a wide range of materials and expressions, representing past and present sculptural methods. Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2703C - Sculpture II

3 Credit Hours
(Spring)

Allows continued experience in more complex three-dimensional techniques; emphasis on individual projects and conceptual approach.

Prerequisite(s): ART 2701C. Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2834C - Gallery Practices

3 Credit Hours
(Offered as needed)

The principles of Art Gallery practices and operations. Both theoretical and practical experiences will be obtained through lectures, field trips and class projects.

ART 2930 - Art - Special Topics

3 Credit Hours
(Fall, Spring Summer)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

ART 2955 - Portfolio Development

3 Credit Hours
(Spring)

Development of a working portfolio through studio project aimed at fulfilling the general requirements the average company, university, art school or advertising agency looks for in a portfolio presentation.

Prerequisite(s): ART 1201C, ART 1203C, ART 1300C, ART 1301C.

Art History

ARH 1000 - Art Appreciation

3 Credit Hours ❖ † ♦ ¶
(Fall, Spring, Summer)

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2050 - Art History: Pre-Renaissance

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2060 - Architecture History

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in architecture from prehistoric to modern times. Architecture will be considered in terms of stylistic qualities, structural type, and intended usage. Topics will be addressed according to historical content, societal background, and geographical location. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2402 - Art History: Modern Art

3 Credit Hours ❖ † ¶
(Fall, Spring)

Surveys and analyzes the major artistic periods and movements from 18th century Neo-Classicism to present. Required for all Art majors. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2930 - Art History – Special Topics

3 Credit Hours
(Offered as needed)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Astronomy

AST 1002 - Descriptive Astronomy

3 Credit Hours ♦
(Fall, Spring, Summer)

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

Biology

BSC 1005 - General Biology

3 Credit Hours ♦
(Fall, Spring, Summer)

The principles of biology are included. Human Biology is emphasized. Man's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1005C - General College Biology

5 Credit Hours (1 HC)
(Fall, Spring, Summer)

The principles of biology are included. Human Biology is emphasized. Man's effect on the environment is considered wherever appropriate. General biology uses experimental methodology and technique and includes a survey of bacteria, protist, fungi, plants and animals. The lab content will include a survey of organisms, dissection of plants, invertebrates and vertebrates.

(NWFSC Collegiate High School Students Only)

BSC 1005L - Biology Lab

1 Credit Hour
(Fall, Spring)

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Prereq/Corequisites: BSC 1005 or equivalent.

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

BSC 1080 - Essentials of Anatomy and Physiology

3 Credit Hours
(Fall, Spring)

This course surveys basic structure and function of the human body with emphasis on terminology and anatomy.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

BSC 1905 - Independent Study – Biology

1 Credit Hour
(Fall, Spring, Summer)

A course designed to (1) allow a student to complete part of a course taken elsewhere and thereby complete general education requirements, (2) to go deeper into special areas of interest.

This course may be taken up to four times for credit.

BSC 2020C - Human Structure and Function

4 Credit Hours
(Fall, Spring, Summer)

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

Botany

BOT 1010C - Botany

4 Credit Hours
(Spring)

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Business

FIN 4402 - Financial and Economic Management

3 Credit Hours
(Fall, Spring)

This course addresses the application of contemporary theory and practice in business resource allocation. Topics include: capital budgeting, equity and capital financing, capital management, analysis of financial statements, pricing theory, management of working capital and other topics relevant to the acquisition, financing and management of business assets and business decision making. Both the economic and financial perspectives will be presented.

Prerequisite(s): upper division standing and ACG 3083 are required. ECO 2013, STA 2023, and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1011 - Introduction to Business

3 Credit Hours
(Fall)

Designed to give students a broad understanding of the nature of business and a preliminary idea of the various areas of business specialization.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1214 - Business and Supervision Terminology

2 Credit Hours
(Fall)

This course is designed for students to achieve mastery of the special vocabulary, jargon, and concept terminology associated with general business and supervision in the modern workplace. Students will apply the terms in common workplace scenarios and hypothetical situations, as well as in standard written documents and assignments.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1940 - Internship - Business

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

This course may be taken up to two times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

GEB 1942 - Internship Business

1 Credit Hour
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

GEB 2430 - Business Ethics

3 Credit Hours
(Fall)

This course addresses the legal, moral, and societal issues of ethical conduct in the business environment. Actual case studies are used to illustrate appropriate relationships among employers, employees, customers, stockholders, and other business stakeholders. Topics include: codes of ethics, laws and regulations related to ethics, conflict of interest, and moral philosophies associated with ethical conduct.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2947 - Academic Learning Field Studies I

1 Credit Hour
(Offered as Needed)

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2948 - Academic Learning Field Studies II

2 Credit Hours
(Offered as Needed)

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2949 - Academic Learning Field Studies III

3 Credit Hours
(Offered as Needed)

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3031 - Contemporary Business Practices

3 Credit Hours
(Fall)

This course includes an orientation to and examination of opportunities and challenges facing managers in contemporary business organizations. Introduces the competencies of teamwork, communication, creative thinking, adapting to change, decision making and customer service through application to issues and problems across the general business spectrum.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3213 - Business and Administrative Communication

3 Credit Hours
(Fall)

A comprehensive course in effective and efficient communications in the business world; includes preparation of reports, proposals and presentations, technical writing skills, composition of standard business documents including persuasive messages, sales letters, customer service correspondence, instructional memoranda, and policy and procedure development.

Prerequisite(s): upper division standing and ENC 1101 or departmental permission are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3434 - Ethics for Business Leaders

3 Credit Hours
(Fall)

This course uses a case study approach to focus on the significant ethical and legal issues facing today's business leaders. The theoretical and philosophical background will be presented along with real-life examples of ethics in the workplace. Cases and readings will be used to develop both analysis and application skills in the following areas: corporate and personal decision making, organizational culture and reputation, social responsibility and social reporting, customer relations, employee relations, financial reporting, technology, privacy/confidentiality and communications.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3444 - Business Trends and Issues

3 Credit Hours
(Fall)

This course builds on the traditional themes and concepts of the general business area through specialized readings on trends and issues facing today's business and industry leaders. Students will read opinion pieces by noted in-field experts, as well as conduct basic research on contemporary issues such as information and workplace security, diversity in the workplace, outsourcing functions/services and global competition, with an eye to improving business operations.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3930 - Business Project and Acquisitions Terms and Concepts

1 Credit Hour
(Fall)

Students will apply specialized terminology of project and acquisitions management in various communication venues including short written documents and summary analyses. Emphasis will be placed upon the latest terms, abbreviations and jargon applicable to the field. Students will research selected terms and concepts in various contemporary periodicals and publications.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3933 - Business Research

1 Credit Hour
(Fall)

This seminar-style course, offered in group or individual format, provides an introduction to various references, databases, periodicals, journals and other publications essential to the research of contemporary business issues; also included are methods of accessing resources via the Internet, designing search strategies, citing Internet resources and evaluating research materials.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4454 - Business in a High Technology Environment

3 Credit Hours
(Spring)

Presents the special challenges and opportunities of managing a high technology firm or a traditional entity operating in the high technology environment; addresses software/information security, recruiting technical personnel, outsourcing, equipment security, updating equipment, telecommuting and similar issues.

Prerequisite(s): upper division standing and GEB 3031 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4930 - Special Topics: Project Management

3 Credit Hours
(Offered as needed)

An individual or group course designed to provide students with the opportunity to pursue a special topic(s) in depth; may be repeated as topics change.

Prerequisite(s): upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4933 - Special Topics: Management

3 Credit Hours
(Offered as needed)

An individual or group course designed to provide students with the opportunity to pursue a special topic(s) in depth; may be repeated as topics change.

Prerequisite(s): upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4934 - Special Topics: Business Administration

3 Credit Hours
(Offered as needed)

An individual or group course designed to provide students with the opportunity to pursue a special topic(s) from the area of business administration in depth; may be repeated as topics change.

Prerequisite(s): upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4941 - Internship: Business

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GIS 1040C - Introduction to Geographic Information Systems

3 Credit Hours
(Offered as Needed)

This course will provide students with an introduction to Geographic Information Systems (GIS). Lectures will include: What is GIS, GIS applications, fundamentals such as map projections, vector versus raster data models, creating and maintaining geographic databases, spatial analysis and modeling, cartography and map production. Lab Sessions will include the hands on use of the ArcGIS software. Students will receive a 180-day version of the software with their textbook that they can use at home to complete assignments.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

GIS 2401 - GIS Applications in Social Science

3 Credit Hours
(Offered as Needed)

This course surveys the use of GIS for solving spatial problems in the social sciences. Examples from the fields of health, economic geography and real estate, housing, transportation, criminology, among others are used to illustrate how spatial techniques are used to address problems in a GIS environment. Special consideration will be given to the data needs of such operations, the implementation of methods in a GIS environment, and understanding the spatial assumptions and issues that underpin analyses.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

QMB 3250 - Quantitative Methods for Business Decisions

3 Credit Hours
(Fall, Spring)

An examination of the quantitative methods used in business and economics, including methods of maximization and minimization objective functions, the analysis and use of statistic methods for planning, decision making, and forecasting.

Prerequisite(s): upper division standing is required and Knowledge of basic computer and keyboarding skills are strongly recommended.

TRA 3132 - Procurement Management

3 Credit Hours
(Offered as Needed)

Purchasing is required by all types of goods-producing & service-providing organizations in such sectors as manufacturing, agriculture, health care, & government. This professional business function tries to buy the right good or service at the right quality, in the right quantity, at the right time, at the right price, from the right source, with delivery at the right place.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

TRA 4203 - Principles of Logistics

3 Credit Hours
(Offered as Needed)

Overview of logistics function within a firm and in the context of integrated vertical systems. Topics include customer service, information flow, inventory control, materials management, order processing, packaging, physical distribution.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Business Law

BUL 2241 - Business Law I

3 Credit Hours
(Fall, Spring)

Introductory course in business law with objective of presenting the law underlying business transactions. Course includes the study of the Law of Contracts, the Law of Bailments, and the Law of Sales based on the Uniform Commercial Code. Recommended for Business degree students.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 2242 - Business Law II

3 Credit Hours
Offered as needed

Course context explores laws relative to negotiable instruments, agency, partnerships, (includes study of Uniform Partnership Act), corporation law, creditors rights, consumer protection and insurance. Based on Uniform Commercial Code.

Prerequisite(s): BUL 2241 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 3320 - Law and Business

3 Credit Hours
(Fall, Spring)

An introduction to the legal setting in which modern business operates; emphasis is on public and regulatory law, basic contract law, the processes of administrative, statutory and common law and interstate commerce issues; includes an overview of the UCC and intellectual property.

Prerequisite(s): upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 4333 - Contract Formation and Administration

3 Credit Hours
(Fall, Spring)

Students will be exposed to the differences in the public and private sector contracting environments. Emphasis will be placed on the fundamentals of contract formation including sealed bidding, negotiations, and best value methods. Students will learn the fundamentals of contract administration including inspection and acceptance, quality control, contract changes, and disputes.

Prerequisite(s): upper division standing. Knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 4931 - Acquisition Law Seminar

3 Credit Hours
(Spring)

This course addresses contract law as applicable to formation and administration of contracts with private and governmental agencies, with emphasis on the federal government. The following topics are also included: concepts of responsiveness and responsibility, bidding procedures, mistakes, negotiation procedures, changes, claims and dispute resolution. Students will explore the typical contracting problems that can lead to litigation.

Prerequisite(s): upper division standing and BUL 4333 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Chemistry

CHM 1020 - Chemical Science

3 Credit Hours ♦
(Fall, Spring, Summer)

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1032C - General Chemistry for Life Sciences

4 Credit Hours
(Fall, Spring, Summer)

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Prerequisite(s): MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

CHM 2211C - Organic Chemistry II

4 Credit Hours
(Spring)

In continuation of CHM 2210C - Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Prerequisite(s): CHM 2210C.

Chinese

CHI 1120 - Mandarin Chinese I

4 Credit Hours ❖
(Fall)

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

CHI 1121 - Mandarin Chinese II

4 Credit Hours
(Spring)

This course is a continuation of Mandarin Chinese I with additional vocabulary and grammar. Pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language.

Prerequisite(s): CHI 1120 or an equivalent course with a minimum grade of "C".

❖ This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

Coaching

PEO 2004 - Theory and Practice of Teaching a Specific Sport

3 Credit Hours
(Offered as needed)

This course is designed to provide knowledge of the rules, teaching progressions and strategies for competition. The course includes acceptable behavior and ethics for coaches. This course will be offered for the following specific sports: baseball/softball, basketball, football, golf, soccer, swimming, tennis, track and field/cross country, volleyball and wrestling.

PEO 2005 - Coaching Theory

3 Credit Hours
(Offered as needed)

This course is designed to provide knowledge of the characteristics, principles, ethics, and theories related to coaching sports in educational and recreational settings. Emphasis is placed on preparing coaches to train athletes to achieve optimal levels of performance.

College Success

SLS 1101 - College Success

3 Credit Hours
(Fall, Spring, Summer)

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

SLS 1201 - Service Learning Seminar

1 Credit Hour
(Offered as needed)

A seminar course designed to enhance and reinforce the value of civic responsibility and to provide students with a community service program opportunity by volunteering in community agencies in the public and private sectors.

SLS 2505 - Critical Thinking

3 Credit Hours
(Fall, Spring)

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking

skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Computer Science

CAP 2134C - Database Security

3 Credit Hours
(Spring)

This course is designed to provide the student with an understanding of database security concepts and practices. The objective of the course is to provide hands-on instruction in various database tasks that relate to securing the confidentiality, integrity and availability of information that is stored in a database. The student will be able to perform administrative tasks in different database management systems, as well as manage database user profiles, privileges, and roles. Different database application security models will be explored, as will the security advantages of utilizing virtual private databases. Finally, the process of database auditing will be explored, including auditing methods using various database management systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites: CET 2660

▲Technology-Across-the-Curriculum Course.

CAP 2762 - Data Mining

3 Credit Hours
(Offered as needed)

This course offers exploration of data mining methodologies. Topics may include decision tables, decision trees, classification rules, association rules, clustering, statistical modeling, and linear models and will focus on data warehousing, data mining and data drilling.

Prerequisite(s): CGS 2541 or any programming language are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 1600C - Networking Fundamentals

3 Credit Hours
(Fall, Spring)

This course introduces the student to the basics of Internetworking technology. This is also the first of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study networks and layers, networking devices, IP addressing, ARP and RARP, media and design, topology, structured cabling, electricity, and electronics and network management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 1610C - Routing Protocols and Concepts

3 Credit Hours
(Fall, Spring)

Basic Router terminology and configurations are studied in this course. The student will study router components, router configuration, IOS, TCP/IP, IP addressing, and router protocols. This is one of the four courses designed to prepare a student to take the CISCO Certified Network Associate Exam (CCNA).

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites: CET 1600C is required.

▲Technology-Across-the-Curriculum Course.

CET 1675C - Introduction to IP Telephony

3 Credit Hours
(Fall)

This course explains how companies are using IP Telephony equipment and software to efficiently upgrade existing telephone systems. In addition, the course will give the student a fundamental understanding of the architecture of voice communication and how signaling, call quality and public switched telephone networks operate in a LAN/WAN networking environment. The use of IP Telephony products will be discussed and how software allows companies to cost-effectively upgrade and eventually replace existing (legacy) telephone systems with more cost-effective and easy-to-use telephone equipment.

Prerequisite(s): CET 1600C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 1854C - Introduction to Wireless Technology

3 Credit Hours
(Fall)

This course teaches key wireless networking topics, including wireless technology and architecture network design, types of wireless networks, and applications. Special focus on technical matters, wireless communication products, wireless networking products, and wireless LANS products. It is recommended that all students have a least a basic knowledge of networking, including protocol, the OSI module, and TCIP/IP.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2179C - PC Operating Systems A+

3 Credit Hours
(Fall)

This course is designed to help prepare the student to take the A+ Certification exams by making the student

proficient in personal computer operating systems, including Win 2000, Win XP, and Win Vista. Major topics include disk and file management, system configurations, menu driven processing, graphical user interfaces, boot files, disk caching, virtual memory, device drivers, remote assistance, and security essentials and security practices.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2182C - PC Hardware A+

3 Credit Hours
(Spring)

This course is designed to prepare the student to take the A+ Certification exam, by teaching the student basic technical skills needed to understand the function and operation of the major elements of personal computer systems, and how to localize and correct common hardware and software problems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2615C - LAN Switching and Wireless

3 Credit Hours
(Spring)

This course introduces the student to fundamentals of LAN configurations. This is also the third of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study LAN Switching, VLANS, OSPF, EIGRP, VTP, classless routing and Access Lists.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2620C - Accessing the WAN

3 Credit Hours
(Spring)

This course introduces the student to advanced router configurations and network design. This is also the last of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study WAN technology and design, PPP, ISDN, Frame Relay, and network management.

Prerequisite(s): CET 2615C isrequired. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2660 - Network Security

3 Credit Hours
(Fall, Spring)

This course provides an in-depth study of network security concepts and techniques. Students examine theoretical concepts that make computer network security unique. This course provides a practical, hands-on approach when examining networking security techniques. Students examine different network strategies, explore the advancement of network implementation, and study timeless problem solving strategies. The course is also intended to assist with preparation for the CompTIA Security+ certification.

Prerequisite(s): Knowledge of networking basic computer, and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2682C - Cisco Voice over IP (VoIP)

3 Credit Hours
(Spring)

Instruction includes, but is not limited to, Voice over Internet Protocol (VoIP) theory, Voice Gateway configuration in a IP Telephony (IPT) solution, IP Phone configuration, design of VoIP networks and troubleshooting IPT networks. Students will design and configure various VoIP networks using case studies and laboratory equipment.

Prerequisite(s): CET 1675C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2685C - Fundamentals of Network Security

3 Credit Hours
(Spring)

Introduction to network security and overall security processes. This hands-on, skill-based course focuses on the design and implementation of security solutions to reduce the vulnerability of the network, using VPNs, network routers and a firewall. This course helps prepare the student for the CISCO Security Specialist certification.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2854C - Fundamentals of Wireless LANs

3 Credit Hours
(Offered as needed)

Develop, implement and troubleshoot wireless networks. This hands-on, skill-based course focuses on the design, planning and operation of wireless networks, with an overview of technologies, security, and design best practices. This course helps prepare the student for the CISCO Wireless Certification.

Prerequisite(s): CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2880C - Digital Forensics Fundamentals

3 Credit Hours
(Spring)

This course offers a solid foundation to computer forensics investigations: preparing students to acquire and analyze digital evidence. the course covers tools and techniques and explains topics such as file structure, data recovery, e-mail and network investigations, and expert witness testimony. In addition, the student will gain practical knowledge in conducting digital investigations and preserving digital evidence that maybe used in court or corporate inquiries.

Prerequisite(s): CTS 1134 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2881C - Digital Forensics II

3 Credit Hours
(Summer)

Digital Forensics II builds upon the foundational knowledge learned in digital forensics fundamentals. Students will utilize industry standard tools to conduct examinations of various digital media and document their findings. Devices to be studied include computers (server, desktop, laptop), mobile devices (tablets, cell phones, smart phones, mp3 players, gps), and devices such as dvr's and routers. Emphasis will be placed upon real-world digital forensics scenarios and the investigative thought process. At the conclusion of the class, students will be prepared to take the accessdata certified examiner (ace) examination.

Prerequisite(s): CET 2880C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2891C - Wireless Network Security Certification

3 Credit Hours
(Offered as needed)

This course prepares students to secure wireless networks and protect valuable data from intruders. The following subjects are covered: intrusion tools and techniques, detection systems, WPA/WPA2/802.11i security, enterprise wireless gateways, encryption gateways, secure wireless bridging, and wireless VPN routers. This course prepares students for the compTIA wireless certification exam.

Prerequisite(s): CET 1854C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2892C - Advanced Network Security

3 Credit Hours
(Spring)

This course examines advanced network security topics including, but not limited to, advanced topics in integration of hardware firewalls, advanced topics in Intrusion Detection Systems (IDS), advanced topics in Internet Protocol-security (IPSec), and advanced topics in Virtual Private Networking (VPN) in network security design. Students will implement designs using equipment in a laboratory setting.

Prerequisite(s): CET 2660 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CET 2905 - Independent Study, Computer Engineering

1 Credit Hour
(Offered as needed)

This is a directed study course to provide computer engineering students with individual projects designed to meet specific needs in areas of computer engineering technology for which present course availability is limited.

Prerequisite(s): instructor or departmental chair approval. Knowledge of basic computer and keyboarding skills are strongly recommended.

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.
▲Technology-Across-the-Curriculum Course.

CET 2940 - Computer Engineering Internship

1 Credit Hour
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): active enrollment in an appropriate degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

This course may be taken up to four times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.
▲Technology-Across-the-Curriculum Course.

CET 2941 - Computer Engineering Internship

2 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

This course may be taken up to four times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.
▲Technology-Across-the-Curriculum Course.

CET 2942 - Computer Engineering Internship

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

This course may be taken up to four times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.
▲Technology-Across-the-Curriculum Course.

CGS 1030 - Computer Basics

3 Credit Hours
(Fall, Spring)

This is an introductory course for basic computer use, including the Internet. It addresses the use of computers for personal, business, and college purposes. It introduces the Windows operating system and Microsoft Office applications, including Word, Excel, and PowerPoint. Hands-on use of a personal computer is required.

Prerequisite(s): none

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

CGS 1550 - Introduction to World Wide Web

3 Credit Hours
(Fall)

This course provides an introduction to the required hardware, software, procedures, uses and building web pages on the World Wide Web and the Internet.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CGS 1843 - Introduction to E-Commerce

3 Credit Hours
(Offered as needed)

This course is designed to provide students with an overview of the dynamics of electronic commerce and how it links information technology to business objectives. Course may not transfer to all State University System institutions.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CGS 2541 - Introduction to Database Concepts

3 Credit Hours
(Fall)

This course will provide an introduction to data modeling and the design and implementation of relational databases and extend the students' understanding of the principles and techniques used in the design and implementation of

modern database systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CGS 2544 - Advanced Database Concepts

3 Credit Hours
(Summer)

The aim of this course is to explore advanced database concepts including an advanced exploration of data modeling and the design and implementation of relational databases. This course will extend the students' understanding of advanced principles and techniques used in the design and implementation of modern database systems and explore database problems and potential solutions.

Prerequisite(s): CGS 2541 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CGS 2820 - Web Design

3 Credit Hours
(Fall)

This course introduces programming in techniques associated with web-based languages. The student will learn to create innovative and useful window programs. Topics to be discussed include variables, string handling, loops and arrays, formatting techniques, labels, buttons, menus, loading and saving, error handling, graphics and linking applications.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CIS 1000 - Introduction to Computer Science

3 Credit Hours
(Fall, Spring, Summer)

A broad survey of computing and computer science topics appropriate for computer science, computer engineering, and information systems students. Math placement at the college algebra level strongly advised.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CIS 1940 - Internship in Computer Studies

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

This course may be taken up to two times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.
▲Technology-Across-the-Curriculum Course.

CIS 2352C - Ethical Hacking Fundamentals

3 Credit Hours
(Fall)

This course is designed to provide the student with an understanding of the techniques and methodologies of security penetration testing. This course provides hands-on instruction using the various tools and methods that security professionals use to analyze an information system in order to discover vulnerabilities and protect against information loss, cyber-terrorism, and corporate espionage. The student will be introduced to fundamental security testing concepts, gain practical knowledge of computer programming, learn how to properly document a security test, and explore the legal and ethical ramifications of penetration testing. Students will also learn how to apply the appropriate countermeasures in order to reduce the risk that an organization faces.

Prerequisite(s): CTS 1134 is required. Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 1000 - Introduction to Programming Concepts and Logic

3 Credit Hours
(Fall, Spring, Summer)

General survey of programming/problem solving techniques. Includes an introduction to structured programming. Algorithm development will employ the use of a modern programming language.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2010 - Visual Basic Programming

3 Credit Hours
(Spring)

This course introduces programming in Visual Basic.Net. The student will learn to create innovative and dynamic data structures using Rapid Application Development techniques. Topics to be discussed include: graphical user interface

development and object-oriented programming.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2011 - Advanced Applications Programming in Visual Basic

3 Credit Hours
(Summer)

This course introduces the advanced features of Visual Basic.Net. The student will learn to create advanced versions of innovative and useful Windows programs using Rapid Application Development techniques. Topics to be discussed include: basic and advanced graphical user interface development; sequential file processing; advanced object-oriented programming; ActiveX components; advanced database management development including interfacing to external applications and Visual Basic's internal database manager; multimedia, networking; and advanced data structures.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2030 - Programming In Python

3 Credit Hours
(Offered as needed)

An Introduction to Python programming language using microcomputers. Topics include Python basics, use of Python control and data structures, use of Python function, Python 110, and implementation of basic programming tasks.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2176 - Visual Basic ADO.Net

3 Credit Hours
(Offered as needed)

The aim of this course is to provide an advanced level of knowledge in database programming using Visual Basic's ADO.Net, using normalization, object and relational types, modeling, data validation, and structured query language (SQL) in creating database applications.

Prerequisite(s): COP 2010 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s): CGS 2544, COP 2011.

▲Technology-Across-the-Curriculum Course.

COP 2220 - Programming in C

3 Credit Hours
(Spring)

An introduction to C programming language using microcomputers.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2222 - Advanced Programming in C

3 Credit Hours
(Offered as needed)

An advanced exploration of the C programming language using microcomputers.

Prerequisite(s): COP 2220 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2224 - Programming in C++

3 Credit Hours
(Spring)

An introduction to C++ programming using microcomputers.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2228 - Advanced Programming in C++

3 Credit Hours
(Summer)

An advanced exploration of the C++ programming language using microcomputers.

Prerequisite(s): COP 2224 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2360 - Programming in C Sharp (C#)

3 Credit Hours
(Offered as needed)

An introduction to the C# programming language using microcomputers.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2362 - Advanced Programming in C Sharp (C#)

3 Credit Hours
(Offered as needed)

This hands-on course examines how to utilize advanced features in the .NET Framework using the C# programming language, in order to build sophisticated applications. Students will work with advanced object-oriented programming topics, including inheritance, partial classes and generics.

Prerequisite(s):

COP 2360 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2654 - Programming for Mobile Devices: iOS (iPhone/iPad)

3 Credit Hours
(Offered as needed)

This class teaches the fundamentals and provides a broad perspective of the iPhone SDK platform. It begins with an overview of the Objective-C language and progresses into the details of the UIKit, as well as several other frameworks essential for development on the iPhone and iPad.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2658 - Advanced Programming for Mobile Devices: iOS (iPhone/iPad)

3 Credit Hours
(Offered as needed)

This class teaches the advanced IOS programming topics and provides a broad perspective of the IPhone SDK platform. It begins with an overview of the Objective-C language and progressed into the advanced details of the UIKit, as well as several other frameworks essential for advanced development of the iPhone and iPad.

Prerequisite(s): COP 2654 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2660 - Programming for Mobile Devices: Android

3 Credit Hours
(Offered as needed)

This class teaches the fundamentals and provides a broad perspective of the Android development platform. It begins with an overview of the Java language and progresses into the details of the developing for Android-based mobile devices and tablets. The curriculum also covers several other frameworks essential for development on the Android platform.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2662 - Advanced Programming for Mobile Devices: Android

3 Credit Hours
(Offered as needed)

This class teaches advanced concepts and provides a broad perspective of the Android development platform. It begins with an overview of the Java language and progresses into the details of the developing for Android-based mobile devises and tablets. The curriculum also covers several other frameworks essential for development on the Android platform.

Prerequisite(s): COP 2660 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2700 - Introduction to SQL

3 Credit Hours
(Spring)

An introduction to SQL and the design and creation of object-oriented databases (using SQL). Topics include storing, retrieving, updating and displaying data using Structured Query Language (SQL).

Prerequisite(s): COP 1000 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2702 - Introduction to PL-SQL

3 Credit Hours
(Offered as needed)

An introduction to PL-SQL and the design and creation of object-oriented databases (using PL-SQL). Topics include storing, retrieving, updating and displaying data using PL-SQL and Oracle.

Prerequisite(s): COP 1000 and CTS 2440 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2800 - Introduction to Java Programming

3 Credit Hours
(Fall, Spring)

An introduction to programming using the Java language. Students will develop and apply individual programs.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2805 - Advanced Java Programming

3 Credit Hours
(Spring)

An advanced level programming course using advanced Java techniques.

Prerequisite(s): COP 2800 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

COP 2833 - Databasing for Internet Applications

3 Credit Hours
(Offered as needed)

This course will expose students to basic relational database concepts used in web programming, including structuring data and making queries.

Prerequisite(s): CGS 2541 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s): CGS 2820

▲Technology-Across-the-Curriculum Course.

COP 2840 - Web-based Programming I

3 Credit Hours
(Spring)

This course is designed to extend the student's understanding of web-based programming techniques, and give them practical experience in the use of a range of technologies for creating e-Commerce applications.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1106 - Fundamentals of UNIX

3 Credit Hours
(Spring)

This course is designed to introduce the UNIX operating system to new users. The student will learn fundamental features of the operating system, including file system navigation, file permissions, editors, command shells, and basic network use. Provides a foundation for more advanced courses in administration and certification.

Prerequisite(s): Knowledge of networking, basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1134 - Network Foundations

3 Credit Hours
(Fall)

This course is designed to introduce students to the terminology and concepts of the network industry, including data communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 1156C - Desktop Support

3 Credit Hours
(Fall)

This course introduces the helpdesk skills to troubleshoot hardware or software operation and application problems for end users on the desktop or client-side, based on the Windows operating system. It is designed to help prepare the student to take the two core exams (70-620 and 70-622) required for certification as an MCITP: Enterprise Support Technician students should have user-level competency with Windows and MS Office.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2104 - Introduction to Windows

3 Credit Hours
(Spring)

An introduction to operating systems in general with emphasis on Windows.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2143C - CompTIA Server+

3 Credit Hours
(Spring)

This course provides advanced concepts in server hardware components and troubleshooting in a non-vendor-specific environment. Introduction to server installation, server storage concepts, administering services, server roles, virtualization, performance monitoring, security, data protection, and maintenance.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2163C - Windows 10 Client Operating System

3 Credit Hours
(Spring)

This course addresses the implementation and desktop support needs of the MS client software, including installation, configuration and management of hardware and file systems, user profiles, remote users, and monitoring of resources and performance. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2302C - Windows Active Directory

3 Credit Hours
(Spring)

This course focuses on a Windows server directory service environment, including forest and domain structure, DNS, site topology and replication, organizational unit structure and delegation of administration, Group Policy, and user/group/computer account strategies. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Prerequisite(s): CTS 1156C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2314C - Network Defense and Countermeasures

3 Credit Hours
(Spring)

This course will explore concepts of network defense and countermeasures as well as hardware and software required to design, configure and implement secure networks. Security topics covered in this course include firewalls, Intrusion Detection Systems (IDS), Virtual Private Networks (VPN) and policy creation using the Windows Operating System (OS), Transmission Control Protocol/Internet Protocol (TCP/IP) packet and signature analysis. The student will get hands-on instruction installing the network defense mechanisms and countermeasure applications. Software will be used for collecting, monitoring and auditing various activities; students will analyze threats and intrusions.

Prerequisite(s): CET 2660 is required. Knowledge of basic computer and keyboarding skills are strongly

recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2321 - UNIX Administration

3 Credit Hours
(Offered as needed)

This course is designed for network administrators in a UNIX operating environment. UNIX operating system concepts, architecture and administration will be explored using Linux. Includes shell programming, database managements, rapid application development, and programming tools such as PERL and C++.

Prerequisite(s): CTS 1134 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s): CTS 1106

▲Technology-Across-the-Curriculum Course.

CTS 2346C - Windows Server 2016 Administrator

3 Credit Hours
(Offered as needed)

This course will provide students with the opportunity to develop the skills required to manage accounts and resources, maintain server resources, monitor server performance, and safeguard data. Recommended knowledge level: A+, Network +, Security + and Win client operating system. This course prepares the student for the MCITP exam.

Prerequisite(s): CTS 1156C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2347C - Windows Network Infrastructure 2010

3 Credit Hours
(Spring)

This course addresses the configuration of Windows Server network infrastructure. Topics covered include: routing and remote access, network access protection, network authentication, IPv4 and IPv6 addressing, DHCP, DNS, WINS, DFS, IPSec, and security. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Prerequisite(s): Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2390C - Installing and Configuring Windows Server 2016

3 Credit Hours
(Spring)

This course is the first of a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server 2016 infrastructure in an existing enterprise environment. The three courses in total collectively cover implementing, managing, maintaining, and provisioning services and infrastructure in a Windows Server 2016 environment. While there is some cross-over in skill set and tasks across the courses, this course primarily covers the initial implementation and configuration of those core services, such as Active Directory Domain Services, networking services, and initial Hyper-V configuration and is also preparation material for, Exam 70-410: Installing and Configuring Windows Server 2016.

Prerequisite(s): CTS 1156C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2391C - Administering Windows Server 2016

3 Credit Hours
(Spring)

This course is the second in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server 2016 infrastructure in an existing enterprise environment. The three courses in total will collectively cover implementing, managing, maintaining and provisioning services and infrastructure in a Windows Server 2016 environment. While there is some cross-over in skills and tasks across the courses, this course will primarily cover the administration tasks necessary to maintain a Windows Server 2016 infrastructure, such as user and group management, network access and data security and is also preparation material for, Exam 70-411: Administering Windows Server 2016.

Prerequisite(s): CTS 2390C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2392C - Configuring Advanced Windows Server 2016

3 Credit Hours
(Summer)

This course is the third in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server 2016 Infrastructure in an existing enterprise environment. While there is some cross-over in skill sets and tasks across the three courses this course will primarily cover advanced configuration and services tasks necessary to deploy, manage and maintain a Windows Server 2016 infrastructure, such as identity management and identity federation, network load balancing, business continuity and disaster recovery, fault tolerance and rights management. This course is also preparation material, and maps directly to, Exam 70-412: Configuring Advanced Windows Server 2016 Services.

Prerequisite(s): CTS 2391C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2437 - Administering SQL Server Database

3 Credit Hours
(Offered as needed)

This course provides students with the skills required to install, configure, administer and troubleshoot the client-server database management system of Microsoft SQL Server. This is preparation for the MCP exam, an elective requirement for Windows MCSA/MCSE.

Prerequisite(s): CTS 1134 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2438 - Advanced SQL Server Database

3 Credit Hours
(Offered as needed)

This course provides students with advanced topics required to install, configure, administer and troubleshoot the client-server database management system of Microsoft SQL Server. This course is designed to prepare the student for certification, an elective requirement for the Windows MCSA/MCSE.

Prerequisite(s): CTS 2437 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CTS 2440 - Introduction to Oracle

3 Credit Hours
(Offered as needed)

An introduction to Oracle and the design and creation of relational databases (using Oracle). Topics include storing, retrieving, updating and displaying data using Structured Query Language (SQL) integrated into Stored Procedures, Functions, Packages and Triggers (PL/SQL Programming).

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ISM 3220 - Network Technologies for Information Professionals

3 Credit Hours
(Fall)

This course is designed to give the student an understanding of the various networking technologies and their practical application in the management of a business. The course also covers the technical issues involved in designing and implementing an efficient network for voice, data, and information networks.

Prerequisite(s): upper division standing and at least two information technology or computer science courses at a college or university level.

ISM 3232 - Software Essentials

3 Credit Hours
(Fall)

This course covers a broad range of software topics as they apply to software management and systems analysis and design. Topics include, but are not limited to programming, the systems development life cycle (SDLC), systems management, interface design and Internet technology.

Prerequisite(s): upper division standing and at least two information technology or computer science courses at a college or university level.

ISM 3323 - Applications in Information Security

3 Credit Hours
(Spring)

This course helps develop the important security concepts relative to software application development and access control that provide the knowledge and skills necessary for the successful management of information security in an organization. Students will understand the environment where software is designed and developed as well as the critical role software plays in providing security to an organization's information systems. The course focuses on software development concepts that relate to security, and how access control methodologies fit into the entire enterprise architecture.

Prerequisite(s): upper division standing and at least two information technology or computer science courses at a college or university level.

ISM 4011 - Information Systems Management

3 Credit Hours
(Spring)

This course provides a study of the language, concepts, structures, and processes involved in management of information systems, including the fundamentals of computer-based technology and the use of business-based software for support of managerial decisions.

Prerequisite(s): upper division standing and at least two information technology or computer science courses at a college or university level.

ISM 4480 - Electronic Commerce Systems and Strategies

3 Credit Hours
(Offered as needed)

This course is designed to familiarize the student with the management approach to defining and implementing e-commerce (EC) systems. The course addresses the digital economy, EC strategy and marketing, EC models (Business to Business, Business to Consumer, etc.) as well as EC architectures. The course will cover management and regulatory issues in EC such as internationalization, electronic payment methods, Internet fraud, mobile e-commerce, and current implementation technologies. Architectures and inter-dependence (i.e. integration) of systems will be covered.

Prerequisite(s): upper division standing and at least two information technology or computer science courses at a college or university level.

ISM 4930 - Special Topics - Technology Management

3 Credit Hours
(Offered as needed)

This is an individual or group course designed to provide students with the opportunity to pursue a special topic(s) in depth; may be repeated as topics change.

Prerequisite(s): Upper division standing and permission of instructor.

This course may be taken up to two times for credit.

ISM 4931 - Internship - Technology Management

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): upper division standing and permission of instructor.

Corrections

CJK 0340 - Corrections PSAV Physical Fitness

30 Clock Hours
(Offered as needed)

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to encourage students to improve their overall physical fitness, improve their score on the final fitness evaluation, and adopt a foundation for lifelong fitness. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy or Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Criminal Justice

CCJ 1010 - Introduction to Criminology

3 Credit Hours
(Spring)

A study of the nature and causes of crime and delinquency; the development of delinquent and criminal behavior; theory development in criminology, crime rates and trends, victimology and particular crime pattern areas.

CCJ 1020 - Introduction to Criminal Justice

3 Credit Hours
(Fall)

An introduction to the philosophical and historical background of law enforcement and the administration of criminal justice. Organization and jurisdiction of local, state, and federal law enforcement agencies, court and criminal procedures, career opportunities in the Criminal Justice field are also covered.

CCJ 1941 - Internship – Criminal Justice

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): Permission of the instructor

This course may be taken up to two times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CCJ 2509 - Introduction to Gangs and Crime

3 Credit Hours
(Fall, Spring, Summer)

This course provides students with an overview of street gangs, the social factors, and the general classifications necessary for the law enforcement, corrections, and public safety professional. This course explores the history, membership, activity, current trends, and influence of street gangs. Students will be challenged to define community-based solutions and strategies to combat the criminal activity associated with street gangs.

CCJ 2934 - Special Topics in Criminal Justice

2 Credit Hours
(Fall, Spring, Summer)

This course centers around topics of current interest or of special interest to students or instructors. Topics or focus may vary from semester to semester.

*This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CJC 2000 - Introduction to Corrections

3 Credit Hours
(Fall)

Theories of punishment and incarceration; the organization of correction programs and institutions, principles of probation and parole, role of parole and probation officers, legal implications; and problems of rehabilitation are covered. This course may be used in transfer to UWF and may be accepted at other upper division schools. Students should consult the department for program planning.

CJE 1642C - Introduction to Crime Scene Technology

3 Credit Hours
(Fall, Spring, Summer)

This course explains and discusses the principals and theories in crime scene technology. The course covers specialized collection procedures for biological evidence, weapons, traffic crash evidence, arson evidence, gunshot residue, blood splatter and bodies.

CJE 1735 - Unmanned Vehicle Legal Requirements and Case Law

3 Credit Hours
(Fall)

This course examines the legal requirements and limits of drone operation by law enforcement. The course will also introduce the student to case studies, guidelines, laws, and protocols for law enforcement operations in contrast to use by private citizens. Additionally, this case will examine and define expectations of privacy, based on case law as set forth by the United States Supreme Court. Case studies and Supreme Court decisions from the last century based on the fourth amendment and due process of law, will be studied for class projects. Each student will be required to submit a research paper on a specific related topic as assigned by the instructor.

CJE 2300 - Police Administration and Organization

3 Credit Hours
(Fall, Spring, Summer)

This course presents the principles of organization and administration in law enforcement including functions and activities, planning and research, public relations, personnel and training, inspection and control, records and communications and custody.

CJE 2330 - Ethics in Criminal Justice

3 Credit Hours
(Fall, Spring, Summer)

This course is a detailed exploration of ethical issues in Criminal justice with special emphasis on morality and the law, human behavior, and ethical decision making in law enforcement, corrections and the courts.

CJE 2400 - Police and Community Relations

3 Credit Hours
(Fall, Spring, Summer)

A study of the relationship of the Justice Administration agencies to the surrounding community. Examines the effect of social change and the consequences that it produces upon law enforcement, corrections, and the courts.

CJE 2600 - Criminal Investigations

3 Credit Hours
(Offered as needed)

Fundamentals of investigation; duties and responsibilities of the detective; interrogation techniques; search and techniques of protecting the crime scene; collection and preservation of evidence; modus operandi systems; scientific aids and other sources of information; court preparation and case follow-up.

CJE 2736 - Law Enforcement Applications of Unmanned Vehicles for 21st Century

3 Credit Hours
(Fall)

This course will introduce students to current law enforcement uses and abilities of unmanned vehicle systems, along with new and developing applications for exclusive use in law enforcement actions. Students will understand and explain the definitions of privacy expectations as related to law enforcement actions governed by the fourth amendment. Students will be required to participate in a course project, in which students will develop, justify and define futuristic uses on drone technologies in the law enforcement field. In this team project, a presentation is required to defend the positions and uses of drone technologies as related in the project results.

CJJ 1002 - Juvenile Delinquency

3 Credit Hours
(Offered as needed)

A study of the nature and cause of juvenile delinquency, the development of the delinquent and criminal behavior, specific criminal justice subsystem (law enforcement, judicial, corrections) problems dealing with juvenile delinquents from initial contact through final disposition and treatment. This course may be used in transfer to UWF and may be accepted at other upper division schools. Students should consult the department for program planning.

CJK 0001 - Introduction to Law Enforcement

12 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It is designed to introduce the student to law enforcement, the process for becoming a certified law enforcement officer, and the requirements of the academy program. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0012 - Legal

63 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It is designed to introduce the student to the criminal justice system, the chain-of-command system in law enforcement, Constitutional Law, Florida Statutes, and the Police Code of Ethics. This course includes classroom instruction and scenario-based training exercises. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0013 - Interactions in a Diverse Community

42 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It is designed to enhance student awareness and understanding of human diversity issues and to teach students skills to enable them to effectively interact with people of diverse backgrounds. This course includes classroom instruction and scenario-based training exercises. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0014 - Interviewing and Report Writing

54 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It is designed to help the student learn vital communication skills including interviewing, note-taking, statement taking, and report writing. It also helps the student to develop survival skills, stress management skills, and problem solving skills utilizing the SECURE model. This course includes classroom instruction and scenario-based training exercises. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an

approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0020 - Law Enforcement CMS Vehicle Operations

48 Clock Hours
(Offered as needed)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. This course is designed to prepare prospective police officers to apply vehicle operations knowledge, principles and techniques to the police driving environment. This course includes classroom instruction and practical application on the driving range. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy or the Corrections Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0031 - CMS First Aid for Criminal Justice Officers

48 Clock Hours
(Offered as needed)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. This course is designed to prepare prospective police officers to apply first responder knowledge and techniques to medical emergency situations. This course includes classroom instruction and hands-on practical demonstration. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy or the Corrections Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0040 - CMS Firearms

81 Clock Hours
(Offered as needed)

This course is a component of the Law Enforcement/Corrections Florida CMS Basic Recruit Academy. This course is designed to give the student basic skills and knowledge needed to safely operate a firearm, and shoot a handgun, and shotgun and/or rifle with a prescribed degree of accuracy. This course includes classroom instruction and firing range practice/qualification. This course is open only to students admitted to the Law Enforcement Florida CMS or Corrections Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to

college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0051 - Defensive Tactics

81 Clock Hours
(Offered as needed)

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to prepare prospective officers to control subjects and defend themselves using appropriate defensive tactics in accordance with Florida State Statue, the United States Constitution, and case law. This course includes classroom instruction and practical physical exercises and demonstrations. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy or Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0064 - Fundamentals of Patrol

36 Clock Hours
(Offered Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It is designed to enable students to understand Community Oriented Policing and how it is implemented as a problem solving model, and identify the SECURE problem solving model and its application in real life situations; understand officer safety issues, identify and avoid fatal errors, identify and manage stress, maintain mental and physical fitness; respond to a call, approach a suspect, make an arrest, transport a prisoner and process the prisoner at a detention facility; and understand how to direct traffic, how to enforce traffic citations, identify how to respond to alarms and conduct a building search, and search inventory and impound vehicles. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0065 - Calls for Service

36 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It is designed to enable students to respond to calls for service, disturbances, people in distress and court orders. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to

college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0077 - Criminal Investigations

51 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It is designed to prepare the student to respond appropriately to a person or property crime victim, witness, and suspect; conduct a preliminary investigation on crimes against persons and crimes against property offenses; conduct a follow-up investigation to establish a suspect's identity and/or ascertain facts of the case; and, give testimony in different types of court proceedings. It includes classroom instruction and practical exercises. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0078 - Crime Scene to Courtroom

36 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It is designed to prepare the student to respond to a crime scene, protect and survey a crime scene, process a crime scene, dust for latent prints, and document a crime scene by sketching. This course includes classroom instruction and scenario-based training exercises. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0084 - DUI Traffic Stops

33 Clock Hours
(Offered Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It introduces the student to the basic rules for conducting safe and effective DUI stops, including identifying a driver under the influence of alcohol and drugs, conducting field sobriety tests, and completing a DUI investigation. It includes classroom instruction and practical proficiency exercises. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to

college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0087 - Traffic Stops

30 Clock Hours
(Offered Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It introduces the student to the basic rules for conducting safe and effective traffic stops, including ethical consideration, safety considerations, citation and warning procedures, and dealing with abandoned vehicles. It includes classroom instruction and practical proficiency exercises. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0088 - Traffic Crash Investigations

33 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It introduces the student to traffic crash investigations, laws pertaining to traffic crashes and procedures for responding to a traffic crash. It includes classroom instruction and practical exercises. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0092 - Critical Incidents

45 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS Basic Recruit Academy. It is designed to enable students to identify the crowd control procedures to safely and effectively disperse or control a large group of people; understand local emergency response plans; respond to a bomb threat, assesses the scene, search and evacuate a building or suspected bomb sight, identify Weapons of Mass Destruction and properly respond to a WMD incident. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0096A - Criminal Justice Physical Fitness I

31 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to encourage students to improve their overall physical fitness, improve their score on the final fitness evaluation, and adopt a foundation for lifelong fitness. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0096B - Criminal Justice Physical Fitness II

32 Clock Hours
(Fall, Spring, Summer)

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to encourage students to improve their overall physical fitness, improve their score on the final fitness evaluation, and adopt a foundation for lifelong fitness. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0300 - Introduction to Corrections

33 Clock Hours
(Offered as needed)

This course introduces students to the legal and ethical responsibilities of a correctional officer. Legal terms and definitions are explained. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0305 - CJSTC Communications

42 Clock Hours
(Offered as needed)

This course covers the entire report writing process. Topics include interview and interrogation, interpersonal communication, and practical exercises. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0310 - Officer Safety

12 Clock Hours
(Offered as needed)

Correctional officer safety procedures are learned. Students will learn to identify potential hazards and learn how to safely respond. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0315 - Facility and Equipment

12 Clock Hours
(Offered as needed)

Students learn the appropriate procedures for inspecting a correctional facility and equipment. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0320 - Intake and Release

18 Clock Hours
(Offered as needed)

Students learn the appropriate procedures for admitting and releasing inmates in a correctional facility. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0325 - Supervising in a Correctional Facility

42 Clock Hours
(Offered as needed)

Students learn the appropriate procedures for supervising inmates in a correctional facility. They also learn to detect crimes and rule violations in various correctional facility settings. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0330 - Supervising Special Populations

21 Clock Hours
(Offered as needed)

Students learn how to identify and supervise special population groups, such as threat groups, juveniles, elderly, and mentally ill inmates. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0335 - Responding to Incidents and Emergencies

18 Clock Hours
(Offered as needed)

Students learn how to identify and respond to situations involving escapes, riots, bomb threats, fires, and medical emergencies in a correctional facility. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0422 - Dart-Firing Stun Gun

9 Clock Hours
(Offered as needed)

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to prepare students in the proper use of the Dart Firing Stun in accordance with the Florida State Statutes, the United States Constitution, and case law. It includes classroom instruction and practical physical

exercises and demonstrations. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy or Correctional Officer Basic Recruit Academy.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0780 - Cross-Over Law Enforcement to Corrections

16 Clock Hours
(Offered as needed)

This course is a component of the Corrections Cross-Over Basic Recruit Academy. This course is designed to enhance Law Enforcement recruits' awareness and understanding of corrections and to teach student skills which will enable them to cross-train into the corrections profession. This course includes classroom instruction. This course is open only to students who have successfully completed the Law Enforcement Basic Recruit Academy and passed the state certification examination for Law Enforcement.

Prerequisite(s): Law Enforcement Basic Recruit Training Program.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJL 1100 - Criminal Law

3 Credit Hours
(Fall)

Includes the study of the fundamentals of Criminal Law to include historical background and development, jurisdiction, the criminal act and responsibility, as well as, classification and analysis of Florida Statutes.

CJL 1400 - Criminal Procedure

3 Credit Hours
(Spring)

Includes the study of the fundamentals of constitutional, criminal and civil law; principles, duties and mechanics of criminal procedures in Florida as applied to arrest, search, seizure, and court processing; and a functional analysis of the rules of evidence in court procedures.

CJL 2130 - Criminal Evidence and Procedure

3 Credit Hours
(Fall, Spring, Summer)

This course provides students with an overview of criminal procedure particularly applied to search and seizure and evaluation of evidence.

CJL 2500 - Courts and the Judicial Process

3 Credit Hours
(Fall)

This course is designed to teach the student the major structures and basic legal concepts of the American criminal court system. The students shall learn the components, personnel, and inherent social issues in our present criminal court system.

Dance

DAA 1100 - Fundamentals of Modern Dance

2 Credit Hours
(Fall, Spring,, Summer)

This beginning dance class serves as an introduction to the art of contemporary dance. It includes instruction and practice in basic modern dance techniques, improvisation, dance forms and brief historical overview.

This course may be taken up to four times for credit.

DAA 1101 - Modern Dance II for Non-Majors

2 Credit Hours
(Fall, Spring, Summer)

This course includes a continued analysis of the modern dance at an intermediate level. Instruction and practice in specific contemporary dance techniques and performance qualities will be stressed.

This course may be taken up to four times for credit.

DAA 1104 - Modern I for Majors

2 Credit Hours
(Fall, Spring, Summer)

This dance class is designed to affect an understanding of the art of the modern dance. It includes a brief history of the dance; instruction and practice in basic dance techniques, improvisation, and dance forms. Performance, research and individual projects comprise the remaining class time. This course maybe taken 4 times for credit.

This course may be taken up to four times for credit.

DAA 1200 - Fundamentals of Ballet

2 Credit Hours
(Fall, Spring, Summer)

This beginning dance course is designed to serve as an introduction to the tradition and discipline of the art of classical ballet. Physical development of the body as an expressive instrument for ballet movement will be stressed as strength, flexibility, balance, alignment, agility, turnout, control, elevation and sensitivity to line are studied.

This course may be taken up to four times for credit.

DAA 1201 - Ballet II for Non-Majors

2 Credit Hours
(Fall, Spring, Summer)

Intermediate Ballet is designed to train the student in the tradition of the art of the classical ballet beyond the basics. Continued development of the body as an expressive instrument for ballet movement will be stressed as students reach the proficiency level necessary to perform the more complicated steps of an intermediate class.

This course may be taken up to four times for credit.

DAA 1204 - Ballet I for Majors

2 Credit Hours
(Fall, Spring, Summer)

A beginning dance course designed to serve as an introduction to the tradition and discipline of the art of the classical ballet. Physical development of the body as an expressive instrument for ballet movement will be stressed as strength, flexibility, balance, agility, alignment, turn-out, control, elevation and sensitivity to line are studied. Performance, research and individual projects comprise the remaining class time.

This course may be taken up to four times for credit.

DAA 1500 - Jazz I for Non-Majors

1 Credit Hour
(Fall, Spring, Summer)

The course includes a brief history of the jazz dance and instruction and practice in jazz dance techniques exploring popular dance idioms.

This course may be taken four times for credit.

DAA 1500A - Beginning Jazz

1 Credit Hour
(Fall, Spring, Summer)

This course includes a brief history of the jazz dance and instruction and practice in jazz dance techniques exploring popular dance idioms.

This course may be taken up to four times for credit.

DAA 1504 - Jazz I for Majors

2 Credit Hours
(Fall, Spring, Summer)

The course includes a brief history of the jazz dance and instruction and practice in jazz dance techniques exploring popular dance idioms. Performance, research and individual projects comprise the remaining class time.

This course may be taken up to four times for credit.

DAA 1520 - Tap I

1 Credit Hour
(Fall, Spring)

This course includes instruction in tap dance technique and the introduction of time steps commonly used in musical theater auditions.

This course may be taken up to four times for credit.

DAA 1521 - Tap II

1 Credit Hour
(Fall, Spring)

The Tap II dance class includes a more in-depth history of tap dance, instruction and practice utilizing tap and exploring its various styles.

Prerequisite(s): DAA 1520.

This course may be taken up to four times for credit.

DAA 1580 - Musical Theater Dance I

1 Credit Hour
(Summer)

This beginning course covers the study of musical theater dance techniques and styles as related to a specific performance experience, usually Creative Dramatics. Students must participate in designated rehearsals and performances.

Prerequisite(s): level of competency determined by audition.

This course may be taken up to four times for credit.

DAA 1680 - Dance Workshop

1 Credit Hour
(Fall, Spring)

This course includes instruction and participation in dance as required by specific productions, i.e., Theater/Show Choir.

This course may be taken up to four times for credit.

DAA 1681 - Dance Ensemble

1 Credit Hour
(Fall, Spring)

The student shall participate in the preparation and performance of original dance compositions to include Dance Line and Show Choir performances.

Prerequisite(s): level of competency determined by audition.

This course may be taken up to four times for credit.

DAA 2105 - Modern II for Majors

2 Credit Hours
(Fall, Spring, Summer)

This dance class is designed to further the student's understanding of the art of the modern dance. It includes continued study in history of the dance; instruction and practice in intermediate level dance techniques, improvisation, and dance forms. Performance, research and individual projects comprise the remaining class time.

This course may be taken up to four times for credit.

DAA 2205 - Ballet II for Majors

2 Credit Hours
(Fall, Spring, Summer)

This dance course is designed to serve as an further training in the tradition and discipline of the art of the classical ballet. Physical development of the body as an expressive instrument for ballet movement will be stressed as strength, flexibility, balance, agility, alignment, turn-out, control, elevation and sensitivity to line are studied. Performance, research and individual projects comprise the remaining class time.

This course may be taken up to four times for credit.

DAA 2505 - Jazz II for Majors

2 Credit Hours
(Fall, Spring)

The course includes a brief history of the jazz dance and instruction and practice in jazz dance techniques exploring popular dance idioms. Performance, research and individual projects comprise the remaining class time. This course may be taken 4 times for credit.

Prerequisite(s): DAA 1504

DAA 2581 - Musical Theater Dance II

1 Credit Hour
(Summer)

The continued study of Musical Theater dance techniques and styles as related to a specific performance experience, usually Summer Ensemble Workshop. Students must participate in rehearsals and performances.

Prerequisite(s): level of competency determined by audition.

This course may be taken up to four times for credit.

DAA 2610 - Dance Composition

2 Credit Hours
(Fall, Spring)

An introduction and practice in the application of compositional tools encourages the student to explore and compose dance. By studying the body's movement in time and space the student will improve technical skills, develop improvisation and choreographic skills and enhance overall dance performance. Previous dance experience is helpful.

This course may be taken up to four times for credit.

DAA 2682 - Dance Workshop II

1 Credit Hour
(Fall, Spring)

This course includes continued instruction and participation in dance as required by specific productions, i.e., Theater/Show Choir.

Prerequisite(s): A demonstration of competency determined by audition.

This course may be taken up to four times for credit.

DAA 2683 - Performance Dance, (Repertory and/or Original Choreography)

1 Credit Hour
(Fall, Spring)

This course includes the continuation of study and participation in all rehearsals of selected works of dance repertory and/or original choreography culminating in public performance.

This course may be taken up to four times for credit.

DAN 1750 - Dance Conditioning

1 Credit Hour
(Fall, Spring)

Dance Conditioning is an excellent course in which to begin your dance training. It is designed to improve fundamentals for the beginning/intermediate student through daily practice in floor work, yoga, and Pilates exercises. This movement class will get you ready to meet the challenges of other dance classes by toning, strengthening and preparing the body to move.

This course may be taken up to four times for credit.

DAN 2120 - Dance Appreciation

3 Credit Hours
(Offered as needed)

This course is a study of the development of dance as an art form, as entertainment, and how it relates to the history of cultures and societies, emphasizing the evolution of dance in the specific genres such as ballet, modern dance, jazz dance, and world dance forms. Designed to heighten student awareness of dance as an integral part of society

and establish an appreciation of dance's impact on the making of art. This course will give the student a foundation level understanding of dance as an art form and its historical and cultural significance. The major periods of dance history, master choreographers, and their works will be explored through lecture, discussion and media presentation. DAN 2120 is not an activity course.

Dental Assisting

DEA 0020 - Pre-Clinical Procedures Theory

60 Clock Hours
(Offered as needed)

This course is designed to provide an introduction to the dental assisting profession to include orientation to four handed dentistry and general dental office procedures including, but not limited to basic principles of disease prevention, patient data collection and assessment, and instrumentation. Emphasis is on adhering to safety guidelines as specified by OSHA.

Corequisite(s): DEA 0020L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0020L - Pre-Clinical Practice Lab

90 Clock Hours
(Offered as needed)

This is a comprehensive chair side competency based course. The course provides the skills practice necessary for dental assisting students entering four handed dentistry practice including but not limited to infection control, taking and recording vital signs, assisting with operative procedures, principles of preventive dentistry, instrument identification, and use and maintenance of equipment. Emphasis is on aseptic technique and clinical competency with procedures performed in a contemporary dental practice.

Corequisite(s): DEA 0020, DES 0103L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0130 - Oral Pathology

30 Clock Hours
(Offered as needed)

This course is a general study of the scientific and clinical concepts that include additional knowledge base necessary to the practice of dental assisting. Students will study the normal and abnormal conditions of the oral cavity such as dental caries prevention, the dental caries process and recognition of various common pathological conditions. Oral

pathology, histology and embryology are included. Emphasis is on the interrelationship of the information presented with the clinical practice of dental assisting.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0803L - Clinical Practice I

150 Clock Hours
(Offered as needed)

This competency based clinical course provides a real world setting in which to integrate the laboratory and clinical skills learned in the classroom. The student receives closely supervised hands on training in chair side dental assisting through rotations at community dental offices. Progress is evaluated using predetermined competency guidelines. Students must provide their own transportation, current CPR training, and up-to-date immunization records. Specific procedure requirements and 90 clinical rotation hours (minimum) must be fulfilled to successfully complete this course.

Corequisite(s): DEA 0020, DEA 0020L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0851L - Clinical Practice III

180 Clock Hours
(Offered as needed)

This course is a continuation of Clinical Practice II, providing a real world setting for students to practice the training and clinical skills learned in class including x-ray film placement and cone positioning. The student is assigned to various offices in the community including specialty offices and general dentistry offices. Students assist the dentist and staff with various function of a Dental Assistant at a more advanced level of proficiency. Students must provide their own transportation and must have current CPR training along with up-to-date immunizations. Specific procedure requirements and 180 clinical rotation hours (minimum) must be fulfilled to successfully complete this course.

Prerequisite(s): DEA 0803L, DEA 0852L, DES 0205, DES 0205L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0852L - Clinical Practice II

180 Clock Hours
(Offered as needed)

This course is a continuation of Clinical Practice I. It provides a real world setting for students to receive additional training in the clinical skills learned in class. Students are assigned to various offices in the community including but not limited to general dentists, oral surgeons, orthodontists, periodontists, and endodontists. Performance evaluations are utilized to measure competency and provide feedback from the local dental offices to the instructor regarding the students' competency level. Skills are strengthened in Seminar Lab. Students must provide their own transportation, current CPR training, and up-to-date immunization records. Specific procedure requirements and 150 clinical rotation hours (minimum) must be fulfilled to successfully complete this course.

Prerequisite(s): DEA 0803L, DES 0400

Corequisite(s): DES 0830, DES 0830L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0936 - Dental Assisting Seminar

60 Clock Hours
(Offered as needed)

This course is designed to provide a review of materials commonly covered on the Dental Assisting National Board (DANB) Exam. Topics include but are not limited to infection control, general chair side procedures, and radiographic technique. The seminar will provide a mock board examination, and opportunities for review, problem solving, and strengthening skills. The course also serves as an opportunity for feedback from students' Clinical Practice.

Prerequisite(s): DEA 0852L, DEA 0803L, DES 0205, DES 0205L

Corequisite(s): DEA 0803L, DES 0206L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0103 - Dental Materials

60 Clock Hours
(Offered as needed)

This course is a comprehensive study of the theory of manipulation, physical and chemical properties of materials used in the diagnosis, prevention and treatment of oral disease. The competency based lab that accompanies this course includes exercises to illustrate application and use of selected materials. Students will study various materials including but not limited to impression materials, waxes, filled and unfilled resins, dental amalgams, gypsum, as well as acrylic plastics. Students will become familiar with various pieces of dental laboratory equipment and their uses.

Corequisite(s): DES 0103L, DEA 0020L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an

approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0103L - Dental Materials Lab

90 Clock Hours
(Offered as needed)

This course is a comprehensive study of the manipulation, physical and chemical properties of materials used in the diagnosis, prevention and treatment of oral disease. Emphasis is on practical application as it relates to the role of the dental assistant in the contemporary dental practice. It is a competency based lab that accompanies the theory course and includes exercises to illustrate application and uses of selected materials. Students practice the use of various materials including but not limited to impression materials, waxes, filled and unfilled resins, dental amalgams, gypsum, and acrylic plastics.

Corequisite(s): DES 0103, DEA 0020L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0205 - Dental Radiology Lecture

60 Clock Hours
(Offered as needed)

This course is designed to introduce the theory, application and principles of radiographic exposure and processing techniques used in dentistry. Students will receive instruction including but not limited to historical data, radiation safety, exposure, processing, mounting and error prevention. Image interpretation of radiographic anatomical structures will be included.

Prerequisite(s): DES 0400, DEA 0020, DEA 0020L

Corequisite(s): DES 0205L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0205L - Dental Radiology Laboratory I

60 Clock Hours
(Offered as needed)

This laboratory course assists students in radiographic performance techniques using DXTR manikins to achieve competency prior to exposure of various patients with varied dentitions. Students practice exposing, mounting, radiographic interpretation, safe darkroom procedures, identification of landmarks and distinguishing radiographic

pathology from normal landmarks. Clinical radiographic skills necessary to produce diagnostic quality radiographs including bitewings, periapical radiographs, and panoramic x-rays will be covered. Emphasis is on patient and operator safety guidelines and producing diagnostic quality radiographs.

Prerequisite(s): DES 0400, DEA 0020, DEA 0020L

Corequisite(s): DES 0205.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0206L - Dental Radiology Laboratory II

60 Clock Hours
(Offered as needed)

This laboratory course assists students in additional radiographic performance techniques to include surveys on patients with varied dentitions. Students practice more advanced radiographic exposure techniques, interpretation, additional darkroom procedures, identification of landmarks and distinguishing various radiographic pathology. Clinical radiographic skills necessary to produce diagnostic quality x-rays including but not limited to bitewings, periapical radiographs, and panoramic surveys on actual patients will be covered. Emphasis is placed on patient and operator safety guidelines and producing diagnostic quality radiographs during this course.

Prerequisite(s): DES 0400, DEA 0020, DEA 0020L, DES 0205L

Corequisite(s): DEA 0851L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0324 - Interpersonal Communications Skills

30 Clock Hours
(Offered as needed)

This course is designed to implement interpersonal and effective communication skills in the practice of dentistry. It includes team building strategies, oral and written communications skills with the correct use of terminology commonly used in dentistry. Professionalism in verbal and nonverbal communications is emphasized. Students will be introduced to the legal and ethical scope of responsibilities for dental assistants and interpersonal relations in the dental office. Providing oral health instructions and post operative instructions for patients will be introduced. Scenario-based role playing is used to augment student learning of course content.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0400 - Dental Anatomy

90 Clock Hours
(Offered as needed)

This course provides a detailed study of the orofacial and related structures of the head and neck including, but not limited to the eruption, identification and function of the human dentition, study of bony, circulatory, muscular and nervous systems of the head, neck and surrounding structures associated with the oral cavity. A brief introduction to oral histology and embryology will be included.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0501 - Dental Practice Management

60 Clock Hours
(Offered as needed)

This course includes theory and content relating to practical administrative duties performed in the dental office. Lectures and role playing activities are related to the responsibilities of the dental assistant. Topics include but are not limited to appointment scheduling, billing, collections, record keeping, clerical and dental supply inventory. Students are introduced to the use of dental practice software with hands on computer experience. Legal responsibilities, interpersonal relations, and interview skills are included.

Prerequisite(s): DES 0205, DES 0205L

Corequisite(s): DEA 0936.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0602 - Pharmacology and Dental Office Emergencies

30 Clock Hours
(Offered as needed)

This course is designed to familiarize the dental assisting student with the basic concepts and considerations regarding pharmacology and pharmaceutics used in dentistry. Topics presented include nitrous oxide monitoring, emergency procedures and protocol. Lectures will include recognition of emergency conditions in the dental office, not limited to syncope, anaphylaxis, and cardiovascular incidents. Emphasis is placed on the role of the dental assistant in the prevention and management of dental office emergencies.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0830 - Expanded Function Theory

30 Clock Hours
(Offered as needed)

This course introduces the dental assisting student to the dental specialty practices and more advanced clinical skills. It also provides the theory of dental specialty practice administration as it relates to the role of the dental assistant including ethical and legal ramifications. Lectures relate topics including but not limited to dental specialty procedures, instruments used in the specialty practices and duties delegated to dental assistants according to the rules and regulations of the Florida Dental Practice Act. Role playing and problem solving activities using case studies relate to duties delegated to dental assistants.

Prerequisite(s): DEA 0020, DEA 0020L, DES 0400

Corequisite(s): DES 0830L.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0830L - Expanded Functions Lab

60 Clock Hours
(Offered as needed)

This laboratory course accompanies the clinical practice lecture course DES 0830 and provides opportunity for students to practice application of the duties delegated to dental assistants according to the Florida Dental Practice Act. Students become more proficient in more advanced skills. Competencies containing information and behavioral objectives allow students to master each skill before advancing to the next.

Prerequisite(s): DEA 0020, DEA 0020L, DES 0400

Corequisite(s): DES 0830.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0844 - Infection Control for Dental Assistants

30 Clock Hours
(Offered as needed)

This course is a general study in biomedical sciences of preventive dentistry to familiarize the dental assisting student with basic principles of microbiology, basic body structures, and their functions and effects as manifested in the oral cavity. The course also covers the effects of nutrition and the role of microorganisms in dental health and blood borne pathogens.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an

approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Domestic Security

DSC 1002 - Domestic and International Terrorism

3 Credit Hours
(Offered as needed)

This course is designed to assist students in recognizing and understanding the elements and objectives of terrorism and 4th Generation Warfare and how they affect public safety planning and response operations.

DSC 1004 - Introduction to NRF and NIMS

3 Credit Hours
(Offered as needed)

Designed to inform emergency responders and planners of the key elements in the National Response Framework (NRF) and the National Incident Management System (NIMS) and their relationship to planning and response operations. The curriculum includes classroom exercises.

DSC 1222 - Psychological Management of Disaster Victims

3 Credit Hours
(Offered as needed)

This course introduces students to a general overview of terrorism and the potential psychological effect of terrorist events on victims.

DSC 1250 - Unmanned Vehicles Fundamentals for Disaster Management

3 Credit Hours
(Spring)

This course examines the protocol and interagency support concepts for the utilization of unmanned vehicles in preparation and response of catastrophic events. Students will be introduced to the development of an emergency response plan which will include unmanned vehicle concepts such as observation, communications, safety, training, and also integration between Public safety agencies.

DSC 1552 - Critical Infrastructure Protection

3 Credit Hours
(Offered as needed)

This course introduces participants to the Critical Infrastructure Protection (CIP) process to secure the effective protection of the people, physical entities, and cyber systems that are critical. The CIP course will guide leaders in the systematic protection of critical infrastructures. More basically, the course will introduce decision sequence that

assists leaders and future leaders in ultimately determining exactly what really needs protection as well as when. The course will introduce a time-efficient and resource-restrained practice that ensures the protection of only those infrastructures upon which survivability, continuity of operations, and mission success depend.

DSC 1562 - Homeland Security Threat Strategy

3 Credit Hours
(Offered as needed)

This course addresses problems of terrorism from a criminal justice perspective. It is designed to provide students with an understanding of the major issues associated with responding to terrorism in a democratic society. The course focuses on the threat of terrorism to the United States and will review specific strategies to deter terrorist threats to the U.S. The course will assess the relative effectiveness of anti-terrorist activities.

DSC 1631 - Planning Considerations for Terror Prevention

3 Credit Hours
(Offered as needed)

This course introduces participants to various aspects of planning for potential terrorist activity. The student will be introduced to basic principles of emergency management, communications, security threats, and the effects these operations may have on personnel. The student will learn techniques for evaluating their own jurisdiction's vulnerability against terrorist attacks. Students will gain knowledge of the roles and responsibilities of local agencies during terrorism responses. The course introduces participants to various aspects of emergency management of terrorist activity.

DSC 1751 - Homeland Security Policy and Law

3 Credit Hours
(Offered as needed)

This course introduces participants to the major debates about balancing democratic freedoms with security from the Patriot Act to Supreme Court decisions on detention powers. The course provides insight into legal strategies necessary to confront ongoing national security threats. The course examines laws designed to preserve both our security and our democratic way of life.

DSC 2055 - Issues in Disaster Response

1 Credit Hour
(Offered as needed)

This course serves as an introduction to disaster response and mitigation for the first responder. Students will be introduced to legislation that has had a major impact on disaster and incident response, the role of local, tribal, state and federal government response to incident and disaster declarations and a brief introduction to the National Incident Management System, National Response Plan and the Incident Management System.

DSC 2056 - Disaster Response Operations

3 Credit Hours
(Offered as needed)

This course examines the response protocol, logistics, responsibilities, interagency support, and concepts of front

end planning involved in preparation for a catastrophic event. Students will be introduced to the development of an emergency response plan that will include concepts such as lookout, awareness, communications, escape, safety (laces), training, and various agency relationships.

DSC 2900 - Development of Unmanned Vehicle Applications

3 Credit Hours
(Fall, Spring, Summer)

Students complete a project that demonstrates excellence by applying the knowledge of unmanned drones gained from the public safety core courses. Successful completion of the course requires demonstration of the achievement of program objectives and learning outcomes.

Drafting and Design

EGN 1111C - Engineering Graphics

3 Credit Hours
(Fall, Spring, Summer)

Covers the use of instruments, lettering practice; geometric construction; multiview projection and conventions, auxiliary views, section views, axonometric and oblique projections, rotation, patterns and development, and methods of reproduction.

Prerequisite(s): ETD 1102 or equivalent: prerequisite only applies to Architectural Drafting and Design students.

EGN 1130C - Descriptive Geometry

3 Credit Hours
(Fall, Spring, Summer)

Covers basic principles of orthographic projection, auxiliary views and rotation as they apply to points, lines and planes in space; addition of coplanar and non-coplanar vectors; intersections and developments; and selected abstract, exponometric and oblique projection, and practical problems.

Prerequisite(s): EGN 1111C or equivalent.

ETD 1102 - Introduction to Technical Drawing

3 Credit Hours
(Spring, Summer, Fall)

A course in the fundamental principles of the graphic language (the language of industry) and is developed for students without previous mechanical drawing experience. Topics include: use and care of instruments, lettering, geometric construction, multiview projection, sketching techniques, inking, and methods of reproduction.

ETD 1112 - Mechanical Drafting I

4 Credit Hours
(Offered as needed)

The second of a sequence of courses in drafting which includes basic use of instruments, freehand lettering, geometric construction, orthographic projection, sections and conventional revolutions, dimensioning, inking, mechanical lettering, methods of reproduction, and developing computer-aided drafting skills.

Prerequisite(s): ETD 1102 and ETD 1320C or equivalent

ETD 1217 - Fundamentals of Dimensioning and Tolerancing

4 Credit Hours
(Fall, Spring)

A course designed to help students develop the basic fundamentals of dimensioning and tolerancing. Topics include: dimensioning systems such as; metric, decimal, fractional-inch, foot and inch, tolerancing methods, limits and tolerances, tolerancing accumulation, dimensioning practices, and standards fits.

ETD 1320C - AutoCAD I

3 Credit Hours
(Fall, Spring, Summer)

A basic course on the use of AutoCAD Software to include: introduction to AutoCAD, drawing commands, display and inquiry commands, modify commands, dimensioning and annotation, data exchange and output files.

▲Technology-Across-the-Curriculum Course.

ETD 1340C - AutoCAD II

3 Credit Hours
(Fall, Spring, Summer)

The second course in a series designed to develop skill and proficiency in the use of AutoCAD software to include: additional drawing commands, editing commands, modify commands, advanced display and inquiry commands, advanced dimensioning and annotation, advanced layering, block, attributes and X-Ref, paper space, UCS, data exchange and output files.

Prerequisite(s): ETD 1320C or equivalent.

▲Technology-Across-the-Curriculum Course.

ETD 1355C - AutoCAD 3-D Modeling I

3 Credit Hours
(Fall, Spring)

A basic course in mechanical design using basic computer geometry techniques. Topics will include: orthographic projections, space relationships of points, lines, planes and revolution of objects. Additional coverage will include principles of surface generation, intersections, wire modeling, and solid modeling techniques.

Prerequisite(s): ETD 1340C or equivalent.

▲Technology-Across-the-Curriculum Course.

ETD 1801C - Technical Illustration

3 Credit Hours
(Fall)

The purpose of this course is to help students develop the skills, knowledge, and attitudes necessary to be job entry-level qualified as technical illustrators.

Prerequisite(s): ETD 1112 or EGN 1130C, and ETD 1340C.

▲Technology-Across-the-Curriculum Course.

ETD 2150 - Industrial Print Reading

3 Credit Hours
(Fall, Spring, Summer)

The beginning level aspects of reading industrial prints such as drawing notes, title blocks, revision blocks, legends, schedules, multiviews, and parts list.

ETD 2218 - Geometric Dimensioning and Tolerancing

4 Credit Hours
(Fall, Summer)

An introductory course in geometric dimensioning and tolerancing using the geometric method nationally accepted according to ASMEY 14.5M. Topics covered include: definition and terms, symbols, datum referencing, locational tolerancing, form tolerancing, profile tolerancing, orientation and runout tolerancing, and math for positional tolerancing.

Prerequisite(s): ETD 1217 or equivalent.

ETD 2350C - AutoCAD III

3 Credit Hours
(Fall, Spring, Summer)

An advanced course designed to help students develop proficiency in the area of computer aided drafting and systems drafting. Topics covered include: transfer drawings, digitized drawings, explanatory drawings, multiview projections, exploded assemblies, pictorial drawings, auxiliary views, sections, details, geometric dimensioning and tolerancing, and CADD concepts.

Prerequisite(s): ETD 1340C.

▲Technology-Across-the-Curriculum Course.

ETD 2357C - Inventor I

3 Credit Hours
(Spring)

A basic course in Parametric Solid Design using AutoDesk Inventor Software. Topics include: basic concepts of

parametric part sketching 3D part creation, Revolve, Sweep and Lofted features, shell and coil, surface creation, sheet metal and orthographic drawing production.

▲Technology-Across-the-Curriculum Course.

ETD 2358C - Inventor II

3 Credit Hours
(Summer)

The second course in a series designed to develop skill and proficiency in Parametric Solid Design, using Inventor Software. Topics include: sheet metal modeling, assembly concepts, assembly modeling approach and tools, advanced constraints, motion simulation, adaptive technology and drawing presentation.

Prerequisite(s): ETD 2357C.

▲Technology-Across-the-Curriculum Course.

ETD 2364C - SolidWorks I

3 Credit Hours
(Fall)

A basic course in Parametric Solid Design using SolidWorks Software. Topics include: basic concepts of parametric part sketching 3D part creation, Revolve, Sweep and Lofted features, shell and coil, surface creation, sheet metal and orthographic drawing production.

▲Technology-Across-the-Curriculum Course.

ETD 2368C - SolidWorks II

3 Credit Hours
(Spring)

The second course in a series designed to develop skill and proficiency in Parametric Solid Design, using SolidWorks Software. Topics include: sheet metal modeling, assembly concepts, assembly modeling approach and tools, advanced constraints, motion simulation, adaptive technology and drawing presentation.

Prerequisite(s): ETD 2364C or higher or equivalent.

▲Technology-Across-the-Curriculum Course.

ETD 2377C - 3D Studio Max I

3 Credit Hours
(Offered as needed)

Course is designed to use 3D Studio in rendering, and animation as a dynamic visualization tool for AutoCAD design images. Upon completion of this course, the user will be able to navigate through the modules of the program, model simple projects, set up scenes for rendering and animation, assign materials to objects, and define simple motion paths, input and output techniques.

Prerequisite(s): ETD 1355C or equivalent.

ETD 2731 - Mechanical Drafting II

4 Credit Hours
(Offered as needed)

A course that continues and completes the student's study of the fundamentals intrinsic to all types of drafting. Topics covered include isometric, diametric, trimetric, oblique, and perspective projection, descriptive geometry, auxiliary views, related mathematics, precision dimensioning developing computer-aided drafting skills.

Prerequisite(s): ETD 1112 or equivalent.

ETD 2735 - Mechanical Drafting III

4 Credit Hours
(Offered as needed)

A course that continues and completes the student's study of the fundamentals intrinsic to all types of drafting. Topics covered include: isometric, diametric, trimetric, oblique, and perspective projection, descriptive geometry, auxiliary views, related mathematics, and precision dimensioning developing computer-aided drafting skills.

Prerequisite(s): ETD 2218 and ETD 2731 or equivalent.

ETD 2802C - Technical Illustration II

3 Credit Hours
(Spring)

The purpose of this course is to help students develop advanced skills, knowledge, and attitudes necessary as technical illustrators, to include oblique, and axiometric projections, perspective and exploded pictorial drawings, and related techniques.

Prerequisite(s): ETD 1340C or equivalent.

ETD 2905 - Independent Study – Drafting

1 Credit Hour
(Fall, Spring, Summer)

Practical treatment of special geometry, graphics, and design with emphasis on individual work projects utilizing such graphical techniques as orthographic projection, perspective drawing, auxiliary views, topographic drawing, and graphing.

Prerequisite(s): EGN 1111C and ETD 1112 or permission of instructor.

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.
* This course may be taken up to four times for credit.

ETG 1941 - Internship

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): permission of the instructor

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

Early Childhood Education

DEP 2100 - Child Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

This course covers the growth and development of the child from conception through age five, including the physical, social, emotional and mental development of the young child, influence of environment, and principles and theories of development.

EEC 1001 - Introduction to Early Childhood Education

3 Credit Hours
(Fall)

Study of principles and practices of programs for young children; current research in early childhood education, role of the teacher, and selection and use of equipment and materials for groups of young children.

EEC 1002 - Early Childhood Program Administration

3 Credit Hours
(Fall, Spring, Summer)

This course provides the student with management and administrative skills related to child care services. Instruction includes: director responsibilities; staff selection, supervision, and evaluation; planning for budget, nutritional services, facility maintenance, health, and safety; and marketing techniques.

EEC 1201 - Infants and Toddlers

3 Credit Hours
(Fall, Spring, Summer)

This course provides the student with information pertinent to the care of infants and toddlers. Special attention is given to selection of developmentally appropriate curriculum. Course work satisfies the Child Development Associate competency standards for Infant/Toddler.

EEC 1309 - Early Childhood Education Foundations

3 Credit Hours
(Fall, Summer, Spring)

Study of the techniques of using language arts, science, art, social studies, music, mathematics, and physical activities with young children.

EEC 1401 - The Family In Early Childhood Education

3 Credit Hours
(Fall, Spring, Summer)

This course is comprehensive in scope, emphasizing skills and concepts of parenting which include: adjustment to parental roles; parent-child communication, care, growth, and development of children; cultivating strong families; special concerns; alternative family structures; educational institutions working effectively with parents; and agencies and legislation affecting children and parents.

EEC 1601 - Assessment in Early Childhood Education

3 Credit Hours
(Fall, Spring)

Designed to increase objectivity and proficiency in observing and interpreting children's behavior in addition to increase awareness of normative patterns of children from birth through five years of age. Current background check (fingerprinting) as required by the Early Childhood program in which the field experience will take place is required for this course.

EEC 1750 - Guidance for Young Children

3 Credit Hours
(Fall, Spring Summer)

A study of principles, methods, guidance and discipline techniques used to promote positive social development in young children; influence of environment and developmental level of child on social behavior.

EEC 1949 - Internship, Early Childhood Education

3 Credit Hours
(Fall, Spring, Summer)

On-the-job training (OJT) in the Associate in Science degree program in which the student is enrolled. The student is under the supervision, at work, of a qualified supervisor appointed by the respective agency, who works with the NWFSC instructor regarding student's OJT objectives based on student's goals and prior training. The supervisor will rate the student's performance, knowledge, comprehension, dependability, initiative, cooperativeness based on OJT performance. NWFSC instructor will evaluate student OJT experience in consultation with agency supervisor regarding OJT performance and project paper on approved project submitted two weeks prior to close of semester. This course may be repeated four times for a total of 12 semester hours. Current background check (fingerprinting) as required by the Early Childhood program in which the field experience will take place is required for this course.

Prereq/Corequisites: EEC 1309 or EEC 1201.

EEC 2220 - Language and Literacy Instruction In Early Childhood Education

3 Credit Hours
(Spring)

Study of the principles, methods, and materials used to assist young children acquire basic skills to use language effectively and competently; evaluation and development of appropriate teaching materials to use with young children.

Prerequisite(s): EEC 1309

EEC 2222 - Math and Science Instruction In Early Childhood Education

3 Credit Hours
(Spring and as needed)

Study of the basic concepts, methods, and materials of mathematics and science appropriate to the education of young children. Identification of the role of staff members in the center for the education of young children. Assignment with young children in community agencies.

Prerequisite(s): EEC 1309.

EEC 2732 - Child Nutrition, Health and Safety

3 Credit Hours
(Fall, Spring, Summer)

Methods of meeting physical needs of young children through nutrition and good health practices. Recognition of childhood diseases and care of the handicapped child.

EEC 3213 - Teaching the Language Arts In Early Childhood Education

4 Credit Hours
(Offered as needed)

The focus of this course will be on the development of language and literacy in children ages birth through age four. Emphasis will be placed on understanding the process of emergent literacy including vocabulary and language, phonological awareness, print knowledge and comprehension; and on designing a developmentally appropriate language arts program in relation to the early learning and developmental standards. This course will require observing and participating in an early childhood classroom.

EEC 3227 - Art, Music, and Movement

3 Credit Hours
(Offered as needed)

The focus of this course will be on developing an understanding of the creative developmental process in the life of children from birth through four years old. Emphasis will be placed on the teacher's role in developing opportunities and materials for young children to express themselves creatively through music, drama, dance and two- and three-dimensional art and on providing varied opportunities for young children to gain an appreciation of art, music, drama, and dance in ways that reflect cultural diversity in relation to the early learning and developmental standards. This course will require observing and participating in an early childhood classroom.

EEC 3320 - Principles and Methods for Teaching Early Childhood Social Studies

3 Credit Hours
(Offered as needed)

This course is designed to prepare students to teach social studies In the early childhood classroom. Emphasis is on implementing the project approach to investigate components of social studies to include: individual development and identity; people, places, and environments, technology and our world; and civic ideals and practices. The student will increase and apply knowledge and skills in the Florida Early Learning and Developmental Standards relevant to this content area.

EEC 3511 - Curriculum for Infants and Toddlers

3 Credit Hours
(Offered as needed)

The focus of this course will be on the design, implementation and evaluation of programming and curriculum that promotes growth and development of young children birth to three years old and aligns with the early learning and developmental standards. Study of typical and atypical development will be included. Emphasis will be on working effectively with families of infants and toddlers.

EEC 3524 - Professionalism/Program Development

4 Credit Hours
(Offered as needed)

Focus of this course will be on management and leadership in early childhood education programs. Topics will include mentoring adults, professional development, staff assessment, program evaluation, and child advocacy. Career options in the field of early childhood education will be explored. This course will require observing and participating in a program or agency related to early childhood education.

EEC 4404 - Families and Diversity

3 Credit Hours
(Offered as needed)

This course will focus on building positive relationships with families through communication and involvement. Focus will include developing an awareness of diversity and multicultural considerations in working with families of young children. The course will explore the role of the family and the influence of the community on the development of young children in a diverse society; and will prepare the student to work effectively with families and communities.

EEC 4421 - Teaching Math and Science in Early Childhood Education

4 Credit Hours
(Offered as needed)

The focus of this course will be on developing an understanding of how concepts, skills and attitudes in early childhood mathematics and science are developed in young children ages birth through age four. Math topics will include number sense and operations, patterns, geometry, and measurement. Science topics will include scientific inquiry, physical science, life science and earth science. Emphasis will be on the alignment of the Early Learning and Developmental Standards with a developmentally appropriate approach to teaching math and science in the early childhood classroom. This course will require observing and participating in an early childhood classroom.

EEC 4613 - Systematic Observation and Assessment

3 Credit Hours
(Offered as needed)

The focus of this course will be on understanding the purpose of child assessment, implementing developmentally appropriate practices in formal and informal child assessment, and using assessment results to support learning, to identify special needs, to evaluate programs, and to respond to program accountability requirements. A field experience is required to practice various methods of assessment in an early childhood setting.

EEC 4940 - Internship

9 Credit Hours
(Fall, Spring)

Supervised teaching in an assigned Early Childhood Education setting. Student teaching assignments will be made by the Department of Teacher Education Office. This course requires a minimum grade of "C". Current background check (fingerprinting) is required for this course.

Prerequisite(s): Upper Division standing with permission of Department Chair

EEX 3604 - Classroom Management in Early Childhood Education

3 Credit Hours
(Offered as needed)

The focus of this course is on implementing effective classroom management practices including establishing an appropriate physical environment, setting up appropriate classroom routines and rules and creating a positive classroom community. Emphasis will be on strategies for guiding children's behavior, teaching social problem-solving skills and responding appropriately to challenging behaviors.

EEX 4201 - Young Children with Special Needs

3 Credit Hours
(Offered as needed)

The focus of this course will be on working with young children birth through age four in an inclusive early childhood classroom. Emphasis will be on identifying typical and atypical development, creating an inclusive early childhood learning environment, understanding special education law, developing an awareness of resources for inclusive practice to meet the needs of young children and their families.

Earth Science

ESC 1000 - Earth Science

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ESC 1000L - Earth Science Lab

1 Credit Hour
(Fall, Spring, Summer)

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Economics

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

Education

EDE 4223 - Integrating Art, Music, and Physical Education

3 Credit Hours
(Summer)

This integrative course provides students with critical understanding of art, music, and physical education. Emphasis is placed on the effective integrative lesson planning and modeling techniques to art, music, and physical education in elementary schools. This course requires a minimum grade of "C".

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

EDE 4226C - Integrated Language Arts, Social Science and Literature

3 Credit Hours
(Fall, Spring)

This course is designed to prepare candidates to teach language arts and social science in elementary classrooms. Teacher candidates will develop units of study that integrate literature, language arts, with social science content. Emphasis is on constructivist principles and methodology. Teacher candidates will plan and deliver standards-based language arts and social science lessons designed to meet the needs of diverse learners including English language learners (ELLs) and students with exceptionalities. This course requires 18 hours of field experience in a K-6 classroom setting. Current background check (fingerprinting) acceptable to the district in which the field experience will take place is required for this course. This course requires a grade of "C" or better.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

EDE 4930C - Seminar in Elementary Education

1 Credit Hour
(Fall, Spring)

This course is designed to prepare the pre-service teacher to transition into the workplace. Includes resume writing, professional dress and demeanor, interview techniques, refining professional portfolio, class discussion of issues common to teacher interns, and review strategies for certification exams. This course requires a grade of "C" or better.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

EDF 1005A - Introduction to the Teaching Profession - A

3 Credit Hours
(Fall, Spring, Summer)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. This course is intended for those students that are not planning to enter a degree program leading to teacher certification. An additional fingerprinting cost may be associated with this course. If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

EDF 1006 - Field Experience in Education

1 Credit Hour
(Offered as needed)

This Educational Field Experience course allows students to work in an educational setting for a semester to meet requirements for admission to the BSE program. This course requires a minimum grade of "C". Current background check (fingerprints) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): permission of department chair.

EDF 1006A - Field Experience in Education

2 Credit Hours
(Offered as needed)

This Educational Field Experience course allows students to work in an educational setting for a semester to meet requirements for admission to the BSE program. This course requires a minimum grade of "C". Current background check (fingerprints) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): permission of department director.

EDF 2085 - Introduction to Diversity for Educators

3 Credit Hours
(Fall, Spring)

This course will provide the student with the opportunity to explore personal values and attitudes toward cultural diversity. Designed for the prospective educator, the theoretical component will examine the issues of teaching in culturally diverse classrooms. An eighteen-hour field experience and examination of educational materials will enhance the student's understanding of multiculturalism. An additional fingerprinting cost may be associated with this course. This course requires a minimum grade of "C" if used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

EDF 3214 - Human Development and Learning

3 Credit Hours
(Summer)

This course is designed to cover the principles of learning and student development with applications to learning/teaching situations. Identification and analysis of students' academic, physical, cognitive, emotional, motivational, and social development is to be emphasized. This course requires a grade of "C" or better.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

EDF 3430 - Measurement, Evaluation, and Assessment in Education

3 Credit Hours
(Fall, Spring)

This course studies the basic principles and methods of measurement, evaluation, and methods of test construction. Students will interpret standardized test scores, construct teacher-made tests and other classroom assessments, and evaluate portfolio and performance assessment. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

EDF 3910A - Projects in Teacher Education

1 Credit Hour
(Offered as needed)

Directed study and individual projects designed to meet the needs of Teacher Education students completing an artifact required in the B.S.E. program. This course requires a grade of "C" or better.

Prerequisite(s): upper division standing

EDF 3910P - Projects in Teacher Education – Field Placement

1 Credit Hour
(Offered as needed)

Directed study and individual projects designed to meet the needs of Teacher Education students completing field experience in the B.S.E. program. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

EDG 3343 - Instructional Strategies

3 Credit Hours
(Fall, Spring)

This course provides an overview of instructional models and strategies. Emphasis is placed on principles of state standards, instructional methods, and lesson planning and instruction. Students will develop knowledge of instructional models and lesson plan construction for effective implementation including the diverse student populations. This course requires a grade of "C" or better.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C

EDG 3410 - Classroom Management, School Safety, Law, and Ethics

3 Credit Hours
(Fall, Spring) Online Only

Practicing teachers are provided strategies for managing a safe, stimulating learning environment for all learners. This course emphasizes school safety, law, and ethics as they apply to schools, districts, and the learning environment. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better. This course is restricted to practicing teachers.

Prerequisite(s): upper division standing.

EDG 3410C - Classroom Management, School Safety, Law, and Ethics

3 Credit Hours
(Fall, Spring)

Pre-service teachers are provided strategies for managing a safe, stimulating learning environment for all learners. This course emphasizes school safety, law, and ethics as they apply to schools, districts, and the learning environment. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

EDG 4940 - Internship

9 Credit Hours
(Offered as needed)

Supervised teaching in a public or private school. Student teaching assignments will be made by the department of teacher education field placement coordinator. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing with permission of department chair.
EDE 4223, EDE 4226C, EDF 3214, EDF 3430, EDG 3410C, EDG 3343, EEX 3070, LAE 4343C, MAE 3350C, RED 3309C, RED 3511C, RED 4312, RED 4519C, SCE 3350C, TSL 3081C, TSL 4140C

EEX 2010 - Introduction to Exceptional Children

3 Credit Hours
(Offered as needed)

Study of incidence, nature, etiology and services available in connection with exceptional children including: hearing and speech problems, learning disabilities, mental retardation, blind, physically handicapped, gifted, emotional conflicts, and parents of exceptional children.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

EEX 3070 - Methods of Inclusion and Collaboration

3 Credit Hours
(Summer)

This course examines the basic identification techniques and strategies used to promote academic and social integration and interaction of "mainstreamed" exceptional students. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

EME 2040 - Introduction to Technology for Educators

3 Credit Hours
(Fall, Spring Summer)

This course will develop competencies necessary to integrate technology into classroom instruction. Students will survey a variety of instructional technology materials, software, and systems, as well as learn to use these in the classroom environment. This course requires a minimum grade of “C” if used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program.

EME 3410C - Integrating Technology in the Classroom

3 Credit Hours
(Fall, Spring)

In this course students will learn how to design a technology-rich classroom while contemplating the changing role of the teacher as a mentor/guide and student as a self-directed learner. Students will explore models of technology integration, classroom management, and administrative tasks that can be performed more efficiently using technology and learn strategies to select software and deal with legal and ethical issues when planning for technology integration. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3343 and EDG 3410C

EVR 3949 - Extended Internship, Environmental Science

4 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved

projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): Minimum Grade of "B" in any college-level science course and permission of instructor.

LAE 4343C - Writing Across the Curriculum

3 Credit Hours
(Offered as needed)

This course prepares pre-service teachers by developing an understanding of the foundations of writing through the use of writers workshops and instructional strategies necessary to provide adequate instruction to emergent, novice, and transitional writers. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

MAE 3350C - Principles and Methods for Teaching Mathematics K-8

3 Credit Hours
(Fall, Spring)

In this course, students will apply knowledge of teaching strategies, methods and materials for teaching mathematics in grades K-8. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

MAE 4312C - How Children Learn Math

3 Credit Hours
(Offered as needed)

This course is designed to develop the skills and concepts necessary to deliver the mathematics curriculum effectively in the classroom. The content strongly reflects the curriculum emphases of the National Council of Teacher of Mathematics, and topics are presented using a process-oriented approach. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

MAE 4930C - Seminar in Math Education

1 Credit Hour
(Fall, Spring)

This course is designed to prepare the pre-service teacher to transition into the workplace, and includes resume writing, professional dress and demeanor, interview techniques, refining professional portfolio, class discussion of issues common to teacher interns in mathematics, and review strategies for certification exams. This course requires a grade of "C" or better.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

MAE 4940C - Teaching Methods in Middle Grades Math Field Experience

1 Credit Hour
(Fall, Spring)

In this course, students will apply knowledge of teaching strategies, methods and materials for teaching mathematics in a middle school classroom. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

MAE 4945 - Internship - Middle Grades Math

9 Credit Hours
(Offered as needed)

Supervised teaching of Middle Grades Math in an assigned school. Student teaching assignments will be made by the Department of Teacher Education Field Placement Coordinator. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): Upper division standing with permission of department chair.
EDF 3214, EDF 3430 , EDG 3410C, EDG 3343, EEX 3070, EME 3410C, MAC 2312, MAD 3107, MAE 3350C , MAE 4312C, MAE 4940C , MHF 4404, MTG 2206, RED 3324C, RED 3335C, STA 2023, and TSL 3081C

RED 3309C - Early and Emergent Literacy K-2

3 Credit Hours
(Fall, Spring)

This course is designed to increase the understanding of early literacy development and the conditions which promote total literacy from birth through lower elementary grades. Language theory and current research are used to shape informed practices regarding literacy development. Connections are made among all aspects of literacy learning: reading, writing, listening, speaking and attitude development. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

RED 3324C - Teaching in the Middle Grades Curriculum

3 Credit Hours
(Fall, Spring)

This course presents theory and methodology for teaching reading at the middle school level with emphasis on strategies for vocabulary and comprehension, evaluating student progress in reading, and integrating reading and study skills into content area instruction across the middle school curriculum. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

RED 3335C - Teaching Reading in the Content Areas

3 Credit Hours
(Fall, Spring)

This course addresses strategies, materials, and skills for teaching reading in content areas. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): RED 3324C and upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

RED 3511 - Intermediate Literacy 3-6: Reading and Thinking

3 Credit Hours
(Fall, Spring)

This course combines the theory and practice in the teaching of reading/ literacy in the elementary intermediate grades. Procedures for meeting individual differences, differentiated instruction, selected use of materials, and classroom organizations will be examined. This course requires a minimum grade of "C" or better and is restricted to practicing teachers.

Prerequisite(s): RED 3309C and upper division standing

Prereq/Corequisites: EDG 3410C, EDG 3343

RED 3511C - Intermediate Literacy 3-6: Reading and Thinking

3 Credit Hours
(Fall, Spring)

This course combines the theory and practice in the teaching of reading/literacy in the elementary intermediate grades. Procedures for meeting individual differences, differentiated instruction, selected use of materials, and classroom organizations will be examined. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): RED 3309C and upperdivision standing

Prereq/Corequisites: EDG 3410C and EDG 3343

RED 4312 - Integration of Assessment into Classroom Reading

3 Credit Hours
(Summer)

This course introduces formal and informal methods and materials used to identify reading strengths and weaknesses of students. Emphasis is placed on integrating assessments into the curriculum to strengthen instructional strategies and student success. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better.

Prerequisite(s): RED 3309C, RED 3511C and upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

RED 4519C - Diagnostic and Instructional Interventions in Reading

3 Credit Hours
(Fall, Spring)

This course introduces formal and informal methods and materials used to identify reading strengths and weaknesses of students. Emphasis is placed on diagnosis of reading problems, administration of assessments, evaluation of results and planning instructional interventions to remediate reading difficulties. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): RED 3309C, RED 3511C and upperdivision standing

Prereq/Corequisites: EDG 3410C and EDG 3343

RED 4854C - Reading Field Experience

2 Credit Hours
(Fall, Spring)

This course provides application of knowledge of reading development to reading instruction. Emphasis is placed on increased reading proficiency for struggling students, including students with disabilities and students from diverse populations. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): RED 3309C, RED 3511C, RED 4312, RED 4519C, upper division standing with permission of department chair

SCE 3350C - Principles and Methods for Teaching Science K-8

3 Credit Hours
(Fall, Spring)

This course provides techniques, methods and materials of instruction for teaching science in grades K-8. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

SCE 4930C - Seminar in Science Education

1 Credit Hour
(Fall, Spring)

This course is designed to prepare the pre-service teacher to transition into the workplace, and includes resume writing, professional dress and demeanor, interview techniques, refining professional portfolio, class discussion of issues common to teacher interns in science, and review strategies for certification exams. This course requires a grade of "C" or better.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

SCE 4940C - Teaching Methods in Middle Grades Science Field Experience

1 Credit Hour
(Fall, Spring)

In this course, students will apply knowledge of teaching strategies, methods and materials for teaching science in a middle school classroom. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

SCE 4945 - Internship - Middle Grades Science

9 Credit Hours
(Offered as needed)

Supervised teaching of Middle Grades Science in an assigned school. Student teaching assignments will be made by the Department of Teacher Education Field Placement Coordinator. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): Upper division standing with permission of department chair.

EDF 3214, EDF 3430, EDG 3343, EDG 3410C, EME 3410C, EEX 3070, ESC 1000, EVR 3949, ISC 4145, MET 1010C, RED 3324C, RED 3335C, SCE 3350C, SCE 4940C, TSL 3081C, and CHM 1020 or PHY 1020

TSL 3081 - TESOL Issues and Practices

3 Credit Hours
(Fall, Spring)

This course is designed to integrate the theories and principles of the Teaching of English to Speakers of Other Languages and applying them to classroom instruction. ESOL methodology and curriculum will be emphasized as they relate to current best practice in ESOL instruction. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a minimum grade of "C." Neither field experience or a background check/fingerprinting are required for current teachers enrolled in this course.

Prerequisite(s): Upper division standing

Prereq/Corequisites: EDG 3410C, EDG 3343

TSL 3081C - TESOL Issues and Practice

3 Credit Hours
(Fall, Spring)

This course is designed to integrate the theories and principles of the Teaching of English to Speakers of Other Languages and applying them to classroom instruction. ESOL methodology and curriculum will be emphasized as they relate to current best practice in ESOL instruction. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

TSL 4140C - ESOL Methods, Curriculum and Assessment

3 Credit Hours
(Fall, Spring)

This course is designed to build on the candidate's knowledge of applied linguistics and cross cultural communication. Candidates will extend their understanding of the role of language and culture in the classroom. This course will prepare candidates for effective planning, instruction, and assessment of ELLs in the classroom. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Prerequisite(s): TSL 3081C and upper division standing

Prereq/Corequisites: EDG 3410C and EDG 3343

Electronics

EET 1015C - Electricity/Electronics I, DC Circuits

3 Credit Hours
(Fall, Spring)

This is the first course required for Electronics Aide certificate. This course introduces the theories, concepts, and relationships of voltage, current, and power in DC series, parallel, and series/parallel circuits containing common circuit elements with single and multiple sources. Students are introduced to Ohm's Law, Kirchoff's voltage and current Laws, Thieving's, Norton's, super-position, and maximum transfer of power theorems and their uses in DC circuit analysis. Students will learn how to use a digital multimeter to trouble shoot and analysis DC circuits.

Prerequisite(s): EET 1084C

EET 1025C - Electricity/Electronics II, AC Circuits

3 Credit Hours
(Fall, Spring)

This is the second course required for Electronics Aide certificate. This course introduces the theories, concepts, and relationships of voltage, current, and power in AC series, parallel, and series/parallel circuits containing common circuit elements with single and 3-phase sources. Students will apply Ohm's Law, Kirchoff's voltage and current Laws, Thieving's, Norton's, super-position, and maximum transfer of power theorems and their uses in AC circuit analysis. Included will be the use of a multimeter and oscilloscope for experimentation with and trouble shooting AC circuits.

Prerequisite(s): EET 1015C

EET 1141C - Solid State Electronics

3 Credit Hours
(Fall, Spring)

This is the third course required for Electronics Aide certificate. This course introduces the student to the concept, components, and uses of solid state electronics. Topics include semiconductor devices; thyristors and diodes, transistors, amplifiers, power supplies, oscillators, and optoelectronics. The use of capacitors and inductors in solid state electronics will be also covered. The design, set-up, and troubleshooting solid state circuits and devices using various power supplies and function generators will be dispersed throughout the class.

Prerequisite(s): EET 1025C

EET 1180C - Industrial Electronic Troubleshooting

3 Credit Hours
(Fall, Spring)

This course covers troubleshooting procedures for a variety of electronic equipment and circuits common to industrial applications. The student will develop and implement trouble shooting protocols and plans, equipment monitoring plans, a preventive maintenance plan, and select appropriate test and monitoring equipment. Safety in an industrial setting will be stressed and reinforced through a series of lab exercises throughout the course.

Prerequisite(s): EET 1084C

EET 2155C - Linear Integrated Circuits

3 Credit Hours
(Fall, Spring)

This course covers the fundamentals and applications of linear integrated circuits and operational amplifiers. The course covers includes inverting and non-inverting amplifiers, comparators, signal generators, differential and instrumentation amplifiers, operational amplifier specifications, active filters, modulator-demodulator integrated circuits, timers, analog to digital converters (ADC), and digital to analog converters (DAC) and measurement and analysis of linear circuits and devices.

Prerequisite(s): EET 1015C, EET 1025C

ETS 1511C - Motors and Controls

3 Credit Hours
(Fall, Spring)

This course explores the theory and application of AC and DC motors, types of single-phase motors, three-phase power, three-phase motors, remote and local control, forward and reversing motor starters, and various motor control circuits. Wiring and troubleshooting exercises of electric three-phase motor control circuits are emphasized in a wide range of applications.

Prerequisite(s): EET 1084C

Environmental Sciences

ENV 4610 - Sustainable Logistics

3 Credit Hours
(Spring)

This course introduces students to current and future trends in logistics technology, policy and sustainability. Topics include, source sustainability, environmental impacts of existing and emerging technologies, and local environmental conditions and the global climate.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

EVR 1001C - Environmental Science

4 Credit Hours ♦
(Offered as needed)

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

EVR 1940 - Internship, Environmental Science

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): Minimum grade of "B" in any college level science course and permission of instructor.

Engineering Technology

EEL 2603C - Robotics-Mechanics and Controls

3 Credit Hours
(Fall)

This course introduces the student to robotics. Instructional topics will include robot classifications, applications, Input/Output (I/O) and sensor interfacing.

Prerequisite(s): ETS 1542C

EET 1084C - Introduction to Electronics

3 Credit Hours
(Fall, Spring)

This course introduces the fundamentals, terminology, and applications used in the electronics industry. The topic coverage will include circuit theory principles, electronic components, transistor usage, amplifiers, power supplies, digital logic techniques, and electronic instruments. The course will also include some basic laboratory exercises to strengthen the topic coverage as it pertains to measurement involving both analog and digital circuits.

ETD 2371C - 3D Printing I

3 Credit Hours
(Fall, Spring, Summer)

This course will develop elements of creative thinking and problem solving used in the design process, including the techniques and methods used to construct prototypes and models. In the project aspect of this course, the students select a field of specialization to explore methods and materials in a number of options in industrial environment with the use of computer simulation, modeling, and rapid prototyping.

Prerequisite(s): ETD 2364C or ETD 1355C or ETD 2357C or permission of instructor.

ETD 2372C - 3D Printing II

3 Credit Hours
(Fall, Spring, Summer)

The student will continue to develop elements of creative thinking and problem solving used in the design process, including the techniques and methods used to construct prototypes and models. In the project aspect of this course,

the students expand their knowledge in the methods and materials and of computer simulation, modeling, and rapid prototyping.

Prerequisite(s): ETD 2371C or permission of the instructor.

ETI 4205 - Applied Logistics

3 Credit Hours
(Offered as Needed)

Introduction to logistics. Emphasis on practical applications. Includes systems engineering, cost/ systems effectiveness, reliability, maintainability, system functional analysis, logistic support analysis, life cycle cost analysis.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

ETM 1005C - Basic Mechanical Operations

3 Credit Hours
(Spring)

This course introduces the student to basic mechanic fundamentals. Instructional topics will include hand tool identification and application, power tool identification and application and shop safety.

ETM 1010C - Mechanical Measurement and Instrumentation

3 Credit Hours
(Fall, Spring)

This course provides the foundation for mechanical and electronic measurement techniques used in manufacturing environments. The course will integrate the concepts, principles, and techniques of mechanical measurement with the use of various types of instruments including micrometers, verniers, calipers, height gages, digital multimeters and other types of measuring equipment.

ETM 1315C - Hydraulics & Pneumatics Fundamentals

3 Credit Hours
(Spring)

This course introduces the student to basic hydraulic and pneumatic fundamentals. Instructional topics will include components, fluid pressure and flow and basic circuit design and application.

ETS 1542C - Introduction to Programmable Logic Controllers

3 Credit Hours
(Fall)

This is an introductory course in Programmable Logic Controllers (PLCs.) The student will learn basic concepts with a focus on programming and practical applications.

Prerequisite(s): EET 1084C

English

CRW 2001 - Creative Writing I

3 Credit Hours
(Fall, Spring, Summer)

Instruction and practice in writing fiction and poetry. Students will submit a poetry portfolio and complete at least one short story.

CRW 2002 - Creative Writing II

3 Credit Hours
(Fall, Spring, Summer)

Advanced work in poetry and prose modes with emphasis on revision. Students will submit a poetry portfolio and write and revise at least one complete short story. Students will prepare creative work for publisher market.

CRW 2100 - Introduction to Fiction Writing

3 Credit Hours
(Offered as needed)

Practice in writing fiction using various points-of-view. Students will submit completed short stories for workshop. Upon agreement with the instructor, students may elect to develop novel chapters with synopsis. Students will prepare creative work for publisher market.

CRW 2201 - Introduction to Creative Nonfiction

3 Credit Hours
(Offered as needed)

This writing course examines the narrative possibilities of creative nonfiction. We will explore structure, technique, and authorial presence in representative works of established sub-genres, including literary journalism, travel and/or food writing, memoir, the lyric essay and collage.

CRW 2300 - Introduction to Poetry Writing

3 Credit Hours
(Offered as needed)

Practice in writing poetic forms employing poetic techniques. Students will workshop completed poems and submit a portfolio of revised poetry. Students will prepare creative work for publisher market.

CRW 2302 - Intermediate Poetry Writing

3 Credit Hours
(Offered as needed)

This course builds on poetry writing skills developed in CRW 2300. Students will examine styles and techniques of contemporary poets and develop a portfolio of original work with attention to the revision process. Students will

prepare creative work for publisher market.

Prerequisite(s): CRW 2300.

ENC 0056 - Developmental Writing Module

2 College Prep Credits
(Offered as Needed)

This course is designed to develop written language skills for students whose entry placement scores do not meet requirements for degree credit courses (not applicable for degree completion). Conducted in a lab setting, this course is self-paced course, designed to allow students to focus on their individual grammar, usage, and writing needs to prepare for successful entry into college credit English courses (not applicable for degree completion). This course may be taken in place of ENC 0027 if a student has a placement score of 98-102 on the PERT. Students may exit Developmental Writing Module by passing the coursework and by obtaining a passing score on the Departmental Exit Exam.

Prerequisite(s): Students must score 98-102 on the PERT or on an elective basis score 103 or higher on the PERT.

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

ENC 1101 - English Composition I

3 Credit Hours ♦ ▲ ¶
(Fall, Spring, Summer)

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

▲ Technology-Across-the-Curriculum Course

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 1101L - English Composition I Lab

1 Credit Hour
(Fall, Spring, Summer)

An instructor directed writing workshop designed to improve student's opportunity for success in ENC1101. Students will strengthen writing and grammar skills necessary to master the topics and concepts covered in ENC1101. Areas of focus include, but are not limited to, the following: expository and argumentative writing; appropriate diction;

conventions of Standard American English grammar, punctuation, sentence structure; conventions of MLA.

Prerequisite(s): ENC0025 and REA0017 or equivalent with a "C" or better grade, or a score of 100-116 on the PERT, or on an elective basis with a score of 103 or higher on the PERT.

Corequisite(s): ENC 1101

ENC 1102 - English Composition II

3 Credit Hours ¶
(Fall, Spring, Summer)

Interpretative and critical reading of fiction, drama, and poetry. The student will write analytic discourse and research papers as part of the essay process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of ENC 1101 or an equivalent course with a grade of "C" or better.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 2210 - Technical Report Writing

3 Credit Hours
(Spring)

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Prerequisite(s): passing score on placement test.

ENG 1001 - Research Papers

1 Credit Hour
(Fall, Spring, Summer)

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

LIN 1670 - Writing and Grammar

3 Credit Hours
(Fall, Spring, Summer)

The course includes practice in writing short essays and encompasses a comprehensive review of grammar and mechanics. This course is strongly recommended for students who have completed Developmental Writing, those who want a preparation for Composition, or those who score 103-116 on the PERT.

Prerequisite(s): A passing score on the standardized placement test measuring communications/verbal achievement, successful completion of any required developmental English coursework with a minimum grade of "C", or exemption from placement testing.

English as a Second Language (ESOL)

XEL 01___ - ESOL I

This course provides small group and individualized instruction in both oral and written English communication skills at the beginning level. The course is designed for non-native English speakers.

* Course number varies with number of instructional contact hours.

XEL 02___ - ESOL II

This course provides small group and individualized instruction in both oral and written English communication skills at the low beginning level. The course is designed for non-native English speakers.

* Course number varies with number of instructional contact hours.

XEL 03___ - ESOL III

This course provides small group and individualized instruction in both oral and written English communication skills at the high beginning level. The course is designed for non-native English speakers.

* Course number varies with number of instructional contact hours.

XEL 04___ - ESOL IV

This course provides small group and individualized instruction in both oral and written English communication skills at the low intermediate level. The course is designed for non-native English speakers.

* Course number varies with number of instructional contact hours.

XEL 05___ - ESOL V

This course provides small group and individualized instruction in both oral and written English communication skills at the high intermediate level. The course is designed for non-native English speakers.

* Course number varies with number of instructional contact hours.

XEL 06___ - ESOL VI

This course provides small group and individualized instruction in both oral and written English communication skills at the advanced level. The course is designed for non-native English speakers.

* Course number varies with number of instructional contact hours.

Entrepreneurship

ENT 2931 - Selected Studies in Entrepreneurship

1 Credit Hour
(Spring)

In this course, topics of current interest are presented in group instruction.

Fire Science

FFP 0010 - Firefighting I

206 Clock Hours
(Offered as needed)

This course is the first part of the Basic Fire Recruit Academy and prepares students for a career as a volunteer firefighter. Classroom instruction includes a variety of fire related topics which are reinforced and enhanced through practical skills activities. Upon completion, the student is eligible to test for certification as a volunteer firefighter through the Florida State Fire College and may elect to continue training in Firefighter II to pursue state certification as a career firefighter. Permission of the Public Safety Division is required.

Corequisite(s): FFP 0077 unless previous certification has been obtained for first responder, EMT, or paramedic.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 0020 - Firefighting II

192 Clock Hours
(Offered as needed)

This course is the second part of the Basic Fire Recruit Academy and prepares students for a career as a firefighter. The delivery of instruction includes a variety of training in practical skills necessary for the mastery of the basic competencies required in the program. Upon successful completion of this course, the student is eligible to take the Bureau of Fire Standards and Training written and practical examination. Permission of the Public Safety Division is required.

Prerequisite(s): FFP 0010 or FFP 0077

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 0077 - First Responder for Public Safety Personnel

45 Clock Hours
(Fall, Spring, Summer)

This course trains public safety members who are the first to arrive at an emergency in providing efficient and accurate pre-hospital care. Students assess patients for wounds to determine if trauma, shock, burns or closed airways are a problem and how to address those issues by dressing wounds, stabilizing the person or administering oxygen. They immobilize patients and address common emergency medical issues with basic treatments. This course includes hands-on, practical experience and is necessary to be eligible for first responder certification.

This course is a co-requisite course for students entering the Firefighting Certificate program who do not have certification for first responder, EMT, or paramedic.
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 1140 - First Responder for Public Safety Personnel

3 Credit Hours
(Offered as needed)

This course introduces the student to the skills and techniques used for first response to medical emergencies. Classroom instruction includes a variety of medical related topics encountered by public safety personnel. Practical exercises and scenarios are included to enhance classroom instruction and skill development.

FFP 1301 - Fire Service Hydraulics

3 Credit Hours
(Offered as needed)

Introduction to the study and characteristics of hydrostatics and hydrodynamics in the fire service; to include basic hydraulic measuring units, facts, theories, and formulas for problem solving. The course covers the relationship between flow and pressure and mathematical hydraulic formulas.

FFP 1505 - Fire Prevention Practices

3 Credit Hours
(Fall, Spring, Summer)

This course is a survey of the principles of fire prevention and investigation. It includes a study of fire hazards in various occupancies; a review of fire prevention codes; a study of procedures and techniques of fire prevention inspection, to include surveying and mapping, recognition and elimination of fire hazards, public relations, methods of determining the area of fire origin, fire cause, fire spread and location and preservation of evidence.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 1540 - Private Fire Protection Systems

3 Credit Hours
(Fall, Spring, Summer)

This course is a survey of the principles of fire prevention and investigation. It includes a study of fire hazards in various occupancies; a review of fire prevention codes; a study of procedures and techniques of fire prevention inspection, to include surveying and mapping, recognition and elimination of fire hazards, public relations, methods of determining the area of fire origin, fire cause, fire spread and location and preservation of evidence.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 1691 - Fundamentals of Firefighting & Unmanned Vehicles

3 Credit Hours
(Summer)

Course introduces the fundamentals of unmanned vehicle applications for firefighting with prioritization of manpower and equipment utilization. Fire officers explore the use of unmanned vehicles for fire ground commanders for tactical operations for all levels of fire. Emphasis for fire investigators on utilization of unmanned vehicles in the investigation process. Course introduces determination of fire cause and origin with collection of evidence by unmanned vehicles during fire scene investigation. Participants will explore the use unmanned vehicles for planning, responding, and evaluating HAZMAT incidents.

FFP 1702 - Principles of Emergency Services

3 Credit Hours
(Fall, Spring, Summer)

This course provides an overview to fire protection; career opportunities in fire protection and related fields; philosophy and history of fire protection/services; fire loss analysis, organization and function of public and private fire protection services; fire departments as part of local government; laws and regulations affecting the fire service; fire service nomenclature; specific fire protection functions; basic fire chemistry and physics; introduction to fire protection systems; introduction to fire strategy and tactics.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 1740 - Fire Service Course Delivery

3 Credit Hours
(Fall, Spring, Summer)

The curriculum draws from many recognized authorities in exploring the methods and mechanics of imparting information and adult learning principles. The course emphasizes techniques which have wide application in teaching situations, as well as devices for specific areas. Also stressed are measuring teaching effectiveness, the use of media and visual aids.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 1800 - Disaster Education for Individuals and the Community

3 Credit Hours
(Offered as needed)

This course provides a study of the design, development, and delivery of public disaster safety education and programs including: methods of identification of disaster safety programs, the selection of target programs and

strategies of affect reduction, methods of designing and implementing information and educational programs, and methods of evaluating a program's impact. Studies include theoretical and practical skills training in individual, group, and mass media communications, instructional skills, planning priorities, and evaluation techniques.

FFP 1801 - Introduction to Emergency Management Administration

3 Credit Hours
(Offered as needed)

This course will discuss emergency management practices and how they relate to natural and man-made disasters. It is designed to help the student develop an understanding of overall emergency management principles, practices, and standards in the local, national, and international environments.

FFP 1810 - Firefighting Tactics and Strategy I

3 Credit Hours
(Fall, Spring, Summer)

This course is a study of the principles utilized on the fire ground for maximum manpower and equipment utilization; fire ground administration starting with a small fire on up through major conflagrations. Emphasis will be on developing thinking skills in relation to crises.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 1826 - Incident Management

3 Credit Hours
(Offered as needed)

This course contrasts the major forms of Incident Management/Incident Command Systems. It illuminates these differences and offers a fresh perspective on the concepts on which these systems are founded in order to make them more accessible and user-friendly. It bridges the gap between their theoretical and academic foundations and their real-world applications, and makes them more applicable to the professional's daily needs.

FFP 1881 - Emergency Management Leadership

3 Credit Hours
(Offered as needed)

This course provides the student with the knowledge and skills necessary for effective interpersonal relationships, including conflict management and the use of power and influence as they apply to emergency administration and leadership. It addresses the budget process and related administrative duties of an emergency management program manager.

FFP 1890 - Emergency Management Principles for Tourism and Hospitality Industry

3 Credit Hours
(Offered as needed)

This course analyzes emergency management functions and responsibilities within the tourism and hospitality industry. Particular emphasis is placed in the areas of administration, organization, communications, and human

relations. Students will learn how historical mistakes can influence human response to disaster situations, and some of the current legal and human challenges posed when dealing with disasters.

FFP 2120 - Fire Service Building Construction

3 Credit Hours
(Fall, Spring, Summer)

The curriculum draws from many recognized authorities in exploring the methods and mechanics of imparting information and adult learning principles. The course emphasizes techniques which have wide application in teaching situations, as well as devices for specific areas. Also stressed are measuring teaching effectiveness, the use of media and visual aids.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 2610 - Fire Behavior and Combustion

3 Credit Hours
(Fall, Spring, Summer)

Study of cause and origin of fires with emphasis on fire inspector's or fire officer's role in the investigation process. The course deals with determination of fire cause and origin, collection of evidence, and investigator's preparation for trial.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 2692 - Unmanned Vehicles Applications and Search & Rescue

3 Credit Hours
(Fall)

This course examines the utilization of unmanned vehicles by public safety in various search and rescue operations. Students will be introduced to the utilization of unmanned vehicles during searches for suspects eluding capture. Course will examine the response protocol and interagency support utilizing unmanned vehicles in urban, water, and various terrain search and rescue operations. Students will be introduced to the operations of unmanned vehicles for silver and amber alerts.

FFP 2720 - Company Officer

3 Credit Hours
(Fall, Spring, Summer)

Designed to assist fire officers in solving the varied problems and situations they will be required to manage effectively in today's ever changing fire service. The curriculum includes a review of fire department organization and administration, management theory, leadership, communication, motivation, and small group dynamics.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 2770 - Ethical and Legal Issues for the Fire Service

3 Credit Hours
(Fall, Spring, Summer)

This course teaches the federal, state, and local laws that regulate emergency services, national standards influencing emergency services, standard of care, tort, liability, and a review of relevant court cases. It also includes labor relations, human rights and diversity, conflicts of interest and frameworks for ethical decision-making.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 2780 - Fire Department Administration

3 Credit Hours
(Fall, Spring, Summer)

The course is designed to present the principles of management theory, and its application in the fire service. The course is intended for officers whose area of responsibility encompasses long and short range planning, budgeting and administration.

Prerequisite(s): FFP 0010 and FFP 0020

FFP 2820 - Emergency Preparedness

3 Credit Hours
(Offered as needed)

This course teaches all aspects of emergency preparedness and planning related to natural and man-made disasters, and basic principles of emergency management. Planning concepts and the planning process will be discussed.

FFP 2823 - Technical Applications in Emergency Management

3 Credit Hours
(Offered as needed)

This course explores issues and problems associated with the use of technology in emergency management. It examines strategies to overcome these issues and problems. Some of the subjects treated are use of the Internet, spatial analysis applications in vulnerability analysis, decision support systems, and emerging technologies.

FFP 2834 - Societal Issues in Disaster Management

3 Credit Hours
(Offered as needed)

This course examines human response to disaster events, including political and economic factors influencing vulnerability. It examines how individuals and institutions make decisions at all levels of disaster response, it is an introduction to current research pertaining to the sociological aspects of disaster, and it will provide increased awareness of the potential and difficulties in using social science research as a basis for modifying public policy.

FFP 2841 - Contingency Planning for the Private Sector

3 Credit Hours
(Offered as needed)

This course is designed to assist students in developing effective public sector plans by using the National Incident

Management System and the Incident Command System templates. The curriculum includes case studies and development procedures for private sector logistics management and employee support planning.

French

FRE 1120 - French I

4 Credit Hours ❖
(Fall)

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

FRE 1121 - French II

4 Credit Hours
(Spring)

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading and writing. Covers all basic structures of the language.

Prerequisite(s): FRE 1120 or an equivalent course with a grade of “C” or better.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

General Education Diploma (GED)

XGE 14__ - GED 2014 Comprehensive

The GED 2014 Comprehensive Preparation Program provides skills and knowledge building for each of the four content-area assessments of the Official GED 2014 Tests: Reasoning through Language Arts, Mathematics Reasoning, Science, and Social Studies. The purpose of the program is to prepare students to obtain the knowledge and skills necessary to pass the Official GED Tests and be awarded a State of Florida High School Diploma. An additional performance level will certify that the adult student is career and college ready. This program strives to motivate students not only to obtain a GED diploma, but to continue their education to earn a postsecondary degree, certificate, or industry certification.

*Course number varies with number of instructional contact hours.

Geography

GEA 1000 - World Regional Geography

3 Credit Hours ❖
(Offered as needed)

The course introduces the student to geographic regional studies. It will combine the concepts of physical geography and cultural, economic, and human geography as it applies to the differing regions of the world. It will show the relationships between the regional environment and the people who live there, between settlement patterns, economic patterns and cultural patterns within each region; and, using current events, it will show the impact of other phenomena upon those regions and their people.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

Geology

GLY 2010C - Principles of Geology I

4 Credit Hours
(Fall, Spring)

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth's interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

GLY 2100C - Principles of Geology II

4 Credit Hours
(Fall, Spring)

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

GLY 2601C - Introduction to Paleontology

4 Credit Hours
(Fall or Spring)

This course is a survey of prehistoric life. Topics include fossilization, systematics, evolution, ecology, extinction, and the geological history of life. Laboratory work covers the anatomy, classification, and ecology of major phyla of both extinct and extant organisms, including monerans, protists, plant, macroinvertebrates, and vertebrate animals. The course involves local and regional fossil collecting trips.

Graphic Design

GRA 1151C - Illustration I

3 Credit Hours
(Offered as needed)

A beginning course to develop basic technical and conceptual skills with a focus on an industry-standard vector-based drawing program. Students will create logos and illustrations typical of graphic design challenges.

▲Technology-Across-the-Curriculum Course.

GRA 1152C - Illustration II

3 Credit Hours
(Offered as needed)

An advanced graphic design course building upon the skills covered in Illustration I; the course includes increased challenges relating to conceptual skills and multi-software integration relating to typical print-based design problems. Access to an appropriate high quality digital camera is required.

Prerequisite(s): GRA 1151C.

▲Technology-Across-the-Curriculum Course.

GRA 2140C - Multimedia I

4 Credit Hours
(Fall, Spring, Summer)

An advanced course covering the development of multimedia projects incorporating a variety of digital media elements. Students will learn an industry standard digital video editing application and the aesthetic and technical considerations involved in content acquisition. Access to a miniDV camcorder suggested.

Prerequisite(s): ART 2602C, GRA 1151C and PGY 1801C.

▲Technology-Across-the-Curriculum Course.

GRA 2141C - Multimedia II

4 Credit Hours
(Offered as needed)

An advanced course covering principles of design and information architecture surrounding interactive multimedia presentations. Students will learn an industry standard interactive DVD media authoring software application. Students will produce a finished interactive DVD.

Prerequisite(s): GRA 2140C.

▲Technology-Across-the-Curriculum Course.

GRA 2190C - Graphic Design I

3 Credit Hours
(Offered as needed)

An intermediate Graphic Design course that focuses on using an industry standard page layout software application. Students will be exposed to the ideas and aesthetics involved in the production of print publications. Access to a high

quality digital camera required. It is recommended that students take PGY 1801C at the same time or prior to taking this course.

▲Technology-Across-the-Curriculum Course.

GRA 2191C - Graphic Design II

3 Credit Hours
(Offered as needed)

An advanced Graphic Design course covering the aesthetics and challenges associated with producing complex multi-page printed communications. Access to an appropriate high quality digital camera required.

Prerequisite(s): GRA 1151C, GRA 2190C, PGY 1801C.

▲Technology-Across-the-Curriculum Course.

GRA 2900 - Independent Study – Graphic Art

1 Credit Hour
(Offered as needed)

This course covers the practical treatment of Graphics/Printing Technology. Emphasis is on individual work projects.

Prerequisite(s): GRA 1151C or PGY 1801C

GRA 2905 - Independent Study – Graphic Design

1 Credit Hour
(Offered as needed)

The student will initiate independent computer related work, utilizing various software and hardware. The course may be taken four times for credit.

Prerequisite(s): GRA 1151C or PGY 1801C

▲Technology-Across-the-Curriculum Course.

GRA 2941A - Internship, Graphic Design

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): GRA 1151C, GRA 2190C, PGY 1801C and permission of the instructor.

GRA 2950C - Advanced Graphic Projects

4 Credit Hours
(Offered as needed)

An advanced Graphic Design course addressing common Graphic Design problems. Students will explore advanced software application functionality and creative, aesthetic, and portfolio development. Access to a high quality digital camera required.

Prerequisite(s): ART 2602C, ART 2603C, GRA 1151C, GRA 2190C, PGY 1801C.

▲Technology-Across-the-Curriculum Course.

Health Education

HIM 1000 - Health Information and Delivery Systems

3 Credit Hours
(Fall, Spring)

Orientation to medical records history and professional associations. Confidentiality, filing, retrieving, indexing, numbering, storage and content of the medical record is also discussed. The course includes job search skills and professional job performance.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1012 - Health Care and Legal Compliance

3 Credit Hours
(Fall, Spring)

In-depth study of federal, state, local laws governing preparation, and use of the healthcare record in the healthcare delivery system.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1432 - Pathopharmacology

3 Credit Hours
(Fall)

Introduction to the nature, cause, and treatment of disease entities and the body's defense mechanisms. Commonly used drugs will also be discussed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1442 - Pharmacology for HIM Professionals

2 Credit Hours
(Offered as needed)

Pharmacology for HIM Professionals provides an overview of the pronunciation, spelling, actions and side effects of the most commonly prescribed medications. The course will examine pharmacological terms, abbreviations, and symbols used by healthcare providers to write prescriptions.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2253 - CPT Coding - Part 1

3 Credit Hours
(Spring)

Instruction and practice in basic CPT coding conventions, principles of classifying physician services using current procedural terminology (CPT-4), APC, and auditing procedures. Ethical standards of practice will be analyzed.

Prerequisite(s): HSC 1531 and HIM 1432 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites: BSC 2020C OR (BSC 1085C AND BSC 1086C)

(Previously listed as HIM1253)

HIM 2272 - Healthcare Reimbursement

3 Credit Hours
(Summer)

Emphasis on billing regulations for the State of Florida. Course content includes LMRPS, Workers' Compensation laws, Florida Medicare, and claims for automobile accident injuries.

Prerequisite(s): HIM 2253 and HIM 2724 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2291 - CPT Coding Part 2

3 Credit Hours
(Spring)

This is an advanced course in ICD, CPT and HCPCS coding systems. Students will learn guidelines and applications to more complex case studies and health records according to current ethical standards of practice, inpatient and outpatient prospective payment systems, encoding software and RBRVs.

Prerequisite(s): HIM 2253 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2724 - ICD Coding Part 1

3 Credit Hours
(Fall)

This course provides a foundation using ICD-10-CM/PCS coding conventions, rules, methodology and sequencing, data sets, documentation requirements, and coding resources.

Prerequisite(s): HSC 1531 and HIM 1432 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites: BSC 2020C OR (BSC 1085C AND BSC 1086C)

HIM 2729 - ICD Coding Part 2

3 Credit Hours
(Fall)

This course focuses on assigning appropriate ICD, DRG, and Level II (HCPCS) codes to a wide range of original source medical documents. This course increases the quality of code selection by applying the decision process in problem solving using well-defined medical record review methods and guidelines. Ethical practices will be discussed.

Prerequisite(s): HIM 2724 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2815C - Professional Practice Experience

3 Credit Hours
(Summer)

Working in a simulated, online environment, students will endeavor to code and bill using nationally recognized, American Health Information Management Association (AHIMA) simulation software.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s): HIM 2291 and HIM 2729

HIM 2931C - Special Topics in Health Information Technology

1 Credit Hour
(Summer)

This course is a review of skills and work processes to support classification and coding to become nationally certified in-field. Effective test-taking strategies for certification exams and employability skills will be discussed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s): HIM 2291 and HIM 2729

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

HSA 3110 - Health Care Organization and Management

3 Credit Hours
(Spring)

This course focuses on the structure and management of health care organizations, and the fundamental issues facing the U.S. health care system. Key topics include health status, the organization of health services, manpower, public health, financing, facilities, utilization, quality, regulation, and national health policy.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 3111 - Introduction to Health Care Management

3 Credit Hours
(Fall)

This course studies the administration, organization and delivery of health care in the United States. Topics to be examined include health care leadership, management, strategy, performance improvement, information technology, insurance, financial and human resources management, as well as ethical and legal concepts.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 3113 - Contemporary Issues in Health Care

3 Credit Hours
(Spring)

This course is designed to introduce students to a range of issues related to health and health care in the United States. Course content will give students the opportunity to explore differing perspectives as they develop a deeper understanding of the issues and enhance their research and communication skills. The course will enable students to analyze and evaluate evidence regarding controversial issues. Students will develop and practice skills in formulating and writing well-informed, well-articulated arguments and reflections.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 4191 - Health Information Systems

3 Credit Hours
(Fall)

This course focuses on the theories, concepts and principles of health information systems and development of critical thinking skills for use in practice/working in health care informatics. Current trends and issues in using, designing, and managing heath care information systems will be examined. Students, applying evidence-based knowledge, will analyze the design and implementation of health care information systems.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 4922 - Capstone: Health Care Management

3 Credit Hours
(Spring)

This course integrates the information, skills, and abilities provided throughout the Health Administration Program in a capstone project. Students complete a project that demonstrates excellence by applying the knowledge gained from the core courses and materials studied throughout the program. Successful completion of the course requires demonstration of the achievement of program objectives and learning outcomes.

Prerequisite(s): senior standing and completion of or concurrent enrollment in remaining program core and emphasis courses. Knowledge of basic computer and keyboarding skills are strongly recommended.

History

AMH 2010 - American History I

3 Credit Hours ¶
(Fall, Spring, Summer)

American History to 1877; describes the social, political, and economic development of the American people against the geographical background of the New World. Particular emphasis on American intellectual and political thought leading to the emergence of basic American character, ideas and attitudes. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AMH 2020 - American History II

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

WOH 1012 - World Civilization I

3 Credit Hours ❖ ¶
(Fall)

A study of world history from 4000 BC to 1650 AD as it relates to the development of western civilization. History is analyzed in terms of social, religious, philosophical, political, and economic concepts rather than chronological facts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

WOH 1022 - World Civilization II

3 Credit Hours ❖ ¶
(Spring)

A study of history from 1650 AD to the present as it relates to the development of the modern world. History is analyzed in terms of social, religious, philosophical, political, and economic concepts rather than chronological facts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Hospitality Management

FOS 2201 - Food Service Sanitation Management

3 Credit Hours
(Offered as Needed)

This course acquaints students with the Food and Drug Administration's Food Code as well as the challenges and opportunities facing hospitality managers in the area of sanitation management. The class presents a systems

approach to sanitation management, utilizing the Hazard Analysis Control Point Program (HACCP), and provides a basic understanding of quality sanitation management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FS 2251 - Food and Beverage Management

3 Credit Hours
(Fall)

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

FSS 1001 - Culinary Techniques

3 Credit Hours
(Fall)

Emphasis in this course will be placed on the basic methods and chemistry of cooking. Students study ingredients, cooking, theories, terminology, equipment, technology, weights and measures, formula conversions and work on cooking skills and procedures.

Prerequisite(s): FOS 2201

FSS 1120 - Food and Beverage Purchasing

3 Credit Hours
(Offered as Needed)

Students will learn the fundamentals involved in purchasing food and beverages in quantity. The course emphasizes standardizing, grading and estimating, selecting, receiving and storing foods and beverages, as well as the practical application in writing specifications and in developing purchasing techniques.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 1202L - Food Production I

3 Credit Hours
(Fall)

Students will acquire knowledge and skill in the preparation of food. Included are basic principles and techniques of food preparation, management of resources, use of recipes, use and care of equipment, and evaluation of food products. The course emphasizes safety and sanitation practices.

Prerequisite(s): FOS 2201

FSS 1221L - Food Production II

3 Credit Hours
(Fall)

Students will focus on the knowledge and preparation of meats, poultry, seafood, as well as starches, fruits and vegetables. Students will learn to prepare menus for special dietary needs. This course will utilize all dry and moist methods of cooking. Menu selection and balance will be studied. The course emphasizes safety and sanitation procedures.

Prerequisite(s): FSS 1202L

FSS 1246L - Baking and Pastries I

3 Credit Hours
Students apply the fundamentals of baking science and pastry preparation to produce a variety of bread products and pastries. Special emphasis is given to the application of advanced techniques in bakery management and the use and care of equipment found in bake shops. Preparation of breads and rolls, classical cakes and icings. Student must pass written and practical baking examination covering a variety of techniques and procedures.

Prerequisite(s): FOS 2201

FSS 1250 - Dining Room Management

3 Credit Hours
(Offered Spring)

The various types of service appropriate to coffee shops, dining rooms, luncheons, banquets, and buffets.
The relationship between menu, equipment, supplies, merchandising, and personnel and patron acceptance.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 2100 - Food Plans and Menu Preparation

3 Credit Hours
(Fall)

Emphasizes the preparation of a nutritionally balanced cycle menu, portion control, use of leftovers and waste control. Students will study and prepare menus supporting the various food service and beverage industries.

FSS 2240L - Classical Cuisine

3 Credit Hours
(Fall)

Students prepare and learn the skills and management theories involved in classical dishes. Concentration is on the basics of classical cuisine, such as stocks, soups, and sauces. Attention is given to the management tasks of portion control, costing and presentation. Special emphasis is given to classics such as emulsion sauces, thickening agents, and sauces derived from the Mother sauces. Student must successfully pass written and practical examination covering a variety of techniques and procedures.

Prerequisite(s): FSS 1221L

FSS 2242L - International and Regional Cuisine

3 Credit Hours
(Fall)

Emphasis is placed on learning to use various condiments and seasonings that are indigenous to different parts of the world in food preparation. Topics may include Far East cuisine, Middle Eastern, Mediterranean, North African cuisine, Continental cuisine. Lectures, demonstrations and preparations will also cover American regional cooking. Student must successfully pass written and practical examination covering a variety of cooking techniques.

Prerequisite(s): FSS 1221L

FSS 2251 - Food and Beverage Management

3 Credit Hours
(Fall)

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

FSS 2284 - Catering, Banquet and Event Management

3 Credit Hours
(Fall)

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for various types of banquets, theme buffets, and physical management of floor lay-out and table setup. Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

FSS 2500 - Food and Beverage Cost Control

3 Credit Hours
(Fall)

Emphasis given to methods of menu pricing, systems of controlling and accounting for food and beverage costs and methods of controlling sales income, through cost control systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

FSS 2942 - Culinary Internship

3 Credit Hours
(Fall)

The Program Director has the discretion to provide override approval as it relates to the waiver of required program/discipline-related courses. This course provides a planned work-based experience that will provide students with an opportunity to fine-tune skills learned in coursework and enhance workplace skills through supervised practical experiences related to their career objectives. Internship requires a minimum of 135 clock hours of work. May be repeated for credit, but grade forgiveness cannot be applied.

Prerequisite(s): Satisfactory completion of all General Education Classes, a minimum 2.0 institutional or overall GPA; and complete FSS 1202L , HFT 1000 , and FSS 1221L with a grade of "D" or better.

HFT 1000 - Introduction to Hospitality Management

3 Credit Hours
(Fall)

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1250 - Hotel and Resort Operations

3 Credit Hours
(Spring)

This course acquaints students with the operation of a hotel, motel and resort including front office procedures in registering, accounting for and checking out guests, promotional and sales practices, housekeeping, interior decoration, purchase of furniture, carpeting, linens and supplies, maintenance and engineering of a practical nature, facilities specifications, purchasing and storage.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1300 - Managing Housekeeping

3 Credit Hours
(Fall, As Needed)

Provides an overview of the fundamentals of housekeeping management. Describes management functions, tools, and practices required in today's lodging and institutional housekeeping departments.

HFT 1410 - Front Office Management

3 Credit Hours
(Fall)

This course guides students through all the skills including directing the activities and solving the complex problems, needed to properly manage the front office of a hotel/motel/resort. The course also acquaints students with the operation of all the departments as they apply to their primary responsibility of selling rooms and serving guests.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1500 - Marketing and Sales in the Hospitality Industry

3 Credit Hours
(Offered Fall, as needed)

How to sell and promote the many services the food service/lodging industries offer guests. How to operate a sales and convention department.

HFT 2210 - Hospitality Management

3 Credit Hours
(Spring)

Training in the techniques involved in the supervision of employees, developing sound relations with other departments, group discussions, and methods of improvement and development of cost consciousness. Job Analysis and job description techniques are developed. The course explores issues that make managing tourism and hospitality (T&H) businesses different to businesses in other sectors. These issues are faced by small and large T&H businesses alike: from owner-operator cafés, motels or tourism businesses to multi-national hotel chains, international airlines or tour companies.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2223 - Human Relations and Supervisory Development

3 Credit Hours
(Spring)

Designed to provide specific application of proven training systems and methods for managers in the hospitality industry.

HFT 2600 - Hospitality Law

3 Credit Hours
(Offered as needed)

Nature and function of our legal system as it applies to the operation of an INN. Innkeeper-guest relationship, contracts, torts, civil rights and insurable risks are emphasized.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2940 - Hospitality Internship

1 Credit Hour
(Offered Fall, Spring, Summer)

This course guides students through all the skills including directing the activities and solving the complex problems, needed to properly manage the front office of a hotel/motel/resort. The course also acquaints students with the operation of all the departments as they apply to their primary responsibility of selling rooms and serving guests.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2941 - Hospitality Internship

2 Credit Hours
(Offered Fall, Spring, Summer)

This course consists of on-the-job experience supplied by the hotel-motel-resort- restaurant industries. Job placement will be dependent upon the availability of participating hospitality institutions. The course consists of 60 hours per semester of on-the-job instruction accompanied by a seminar class.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2942 - Hospitality Internship

3 Credit Hours
(Offered Fall, Spring, Summer)

This course, an extension of Hospitality Internship (HFT2941), consists of on-the-job work experience supplied by the hotel, motel, resort and restaurant industries. Students will concentrate on 3 specific areas or functions that are career-goal oriented. Job placement will be dependent upon availability of participating hospitality institutions. The course consists of 90 hours of on-the-job instruction.

Prerequisite(s): HFT 1000 - Introduction to Hospitality Management **3 Credit Hours**
and FOS 2201 - Food Service Sanitation Management **3 Credit Hours**

Humanities

HUM 1020 - Humanities – Introduction

3 Credit Hours ❖ † ♦ ¶
(Fall, Spring, Summer)

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1905A - Independent Study – Arts and Humanities

1 Credit Hour
(Fall, Spring, Summer)

A defined independent study which is pursued under supervision of a faculty directing teacher and recorded through departmental procedures. Designed to permit a student to pursue nonscheduled academic and laboratory work which may be of a specialized or advanced nature and not available through classes or courses available on a college schedule. Departmental approval is required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is also required.

Prerequisite(s): approval from department chair, a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

HUM 2250 - Humanities – A Contemporary Perspective

3 Credit Hours ❖ † ¶
(Fall, Spring, Summer)

This course is an integrated study of the artistic, cultural, philosophic, religious, social, and technological influences that shape modern western cultures in the modern era. The focus will begin with the 20th century and follow, chronologically, the issues of the modern era. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2700 - Humanities – Foreign Study

3 Credit Hours ❖ ¶
(Offered as needed)

A variable humanities content course designed to allow students first-hand learning experiences outside the United States. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2920 - Humanities Colloquium

1 Credit Hour
(Fall, Spring, Summer)

Humanities Colloquium is a lab designed to introduce students to critical visual and listening skills to become an intelligent arts consumer. Initial lecture sessions are devoted to discussions of the elements of analysis of art works, music pieces, theater performances, and dance presentations. Students will be required to attend selected NWFSC Visual and Performance Arts presentations and to write a short critical review of each. Topics may vary.

Prerequisite(s): placement test may be required.

HUM 2930 - Humanities – Special Topics

3 Credit Hours
(Offered as needed)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

IDS 2220 - Issues in Science and Religion

3 Credit Hours
(Fall, Spring, Summer)

This course will explore and relate scientific and religious conceptions of the natural world. Survey of major scientific discoveries and theories that both challenge and inform religious belief (including Big Bang cosmology, geologic time, evolutionary biology and paleontology, and Earth systems/global change). Survey of the historic role of religion and religious cosmologies in the rise of science, types of religious experience, concepts of God and divine action, the idea of the sacred as the ground for meaning in nature, natural theology and theology of nature, intelligent design, varieties of creationism, and various metascientific proposals (Anthropic Principle, Gaia Hypothesis, Biophylia, Deep Ecology). Emphasis is placed on integrating and harmonizing scientific and religious understandings to develop a more meaningful and informative, contemporary worldview.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

Legal Assisting

PLA 1003 - Introduction to Paralegal Studies

3 Credit Hours
(Fall)

This course is designed to give students a broad understanding of the nature of the paralegal profession and the elements contained within the profession, as well as its responsibility.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1005 - Legal Terminology

3 Credit Hours
(Offered as Needed)

This course is designed to give an explanation of the common legal vocabulary involved in the broad, general principles of substantive and common law.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1013 - Introduction to the Legal System

3 Credit Hours
(Offered as Needed)

A practical introduction to the US legal system, types and sources of law, the courts, and related topics; a beginning course for students seeking careers in legal secretary technology or legal assisting.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1114 - Legal Research and Writing

3 Credit Hours
(Spring)

This course is designed to provide the student with necessary skills and knowledge required in legal research/case analysis and legal writing.

Prerequisite(s): PLA 1003 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1203 - Civil Procedure

3 Credit Hours
(Spring)

This course provides an insight into the system of dispute resolution for private parties and the government provided by the court systems of the various states and the federal government in a non-criminal setting.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1600 - Wills, Trusts, and Probate

3 Credit Hours
(Fall)

This course is designed to provide the student with an introductory knowledge of estate planning, wills, and probate administration.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1800 - Introduction to Family Law

3 Credit Hours
(Spring)

An introduction to practices as they relate to family law.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 2273 - Tort Law

3 Credit Hours
(Fall)

This course is designed to provide the student with an introductory knowledge of tort law with objectives centered on personal injury torts.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 2949 - Internship - Paralegal

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): completion of a minimum of 12 credit hours in the appropriate discipline, including PLA 1003 and permission of the instructor is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

*This college credit course is not intended for transfer and may not be applied toward the AA degree.

Library Science

LIS 1001 - Library Skills

1 Credit Hour
(Offered as needed)

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

LIS 2004 - Introduction to Internet Research

1 Credit Hour ▲
(Offered as needed)

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Prerequisite(s): a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

Literature

AML 2010 - American Literature I

3 Credit Hours ¶
(Fall)

A course in American Literature from the pre-Colonial period to the Civil War. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): ENC 1101.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AML 2020 - American Literature II

3 Credit Hours ¶
(Spring)

A course in American Literature from Civil War to present. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): ENC 1101. (Note: AML 2010 is not a prerequisite for this course)

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2012A - English Literature I

3 Credit Hours ¶
(Offered as needed)

A study of English literature from the Old English period, Beowulf, through the late Eighteenth century, the Age of Enlightenment, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): ENC 1101.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2022 - English Literature II

3 Credit Hours ¶
(Offered as needed)

A study of English literature from the Romantics through the modern era, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is required.

Prerequisite(s): ENC 1101. (Note: ENL 2012A is not a prerequisite for this course)

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2090 - Contemporary Literature

3 Credit Hours ❖ ¶
(Offered as needed)

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): ENC 1101.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2100 - World Literature I

3 Credit Hours ❖ ¶
(Fall)

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from antiquity through the Renaissance, that reflect cultural and intellectual heritage. May be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet the Gordon Rule requirements for general education, a minimum grade of "C" is required.

Prerequisite(s): ENC 1101.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2120 - World Literature II

3 Credit Hours ❖ ¶
(Spring)

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from the Renaissance to the present, that reflect cultural and intellectual heritage. May be used as a humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): ENC 1101. (Note: LIT 2100 is not a prerequisite for this course)

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2335 - Introduction to Children's and Adolescent Literature

3 Credit Hours ❖
(Offered as needed)

Designed to explore the range and diversity of the children's literary canon, surveying the historical development of children's and adolescent literature (pre-school to eighth grade) and the construction of socio-cultural influences. While the focus is predominantly on classic works from the tradition of American and British fiction, poetry, folklore and fairy tales, drama, and picture books, the course nonetheless addresses multi-cultural issues and texts in order to broaden the cultural vision provided by the literary study. This course will be a General Education elective, but will not meet the Humanities or English General Education requirements. Course has international/diversity focus for Teacher Education program common prerequisites.

Prerequisite(s): ENC 1101.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

LIT 2603 - Literature of War in the 20th Century

3 Credit Hours ❖
(Offered as needed)

Designed to investigate the historical, psychological, and universal issues that face societies in times of war, through

analysis of a range of literary genre and texts, including fiction, poetry, drama, letters, and memoirs focusing on wars of the modern era. The approach is global, but concentrates heavily on the war experiences of the United States. This course will be a General Education elective, but will not meet Humanities or English General Education requirements. Course has International/Diversity focus for Teacher Ed program common prerequisites.

Prerequisite(s): ENC 1101.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

Machining/CNC

ETI 2419C - Advanced Concepts of CNC Machines and CNC Machining Practices

3 Credit Hours
(Offered as needed)

This course is designed to provide the student with advanced concepts in CNC machines and CNC machining to include: theory, operation, setup, safety, and practices.

Prerequisite(s): PMT 2261C or PMT 2262C

PMT 1203C - Introduction to Machining

3 Credit Hours
(Fall, Spring, Summer)

This course introduces the student to basic mechanic fundamentals. Instructional topics will include hand tool identification and application, power tool identification and application and shop safety.

PMT 1250C - Introduction to CNC Machining

3 Credit Hours
(Fall, Spring, Summer)

The history and development of CNC (computer numerical control). Programming methods are reviewed with the emphasis of skills placed on programming, milling, drilling and turning with M and G code preparation. Manual and computer assisted programming are also reviewed. Students will program, set up and operate full size CNC machines found in our manufacturing lab. Projects will be assigned to students with an expectation of performing these tasks on manufacturing equipment.

PMT 2213C - Machining I

3 Credit Hours
(Fall, Spring, Summer)

In this course students will continue to develop basic machining skills and better utilize machine tool accessories to assist in different machining operations to include: Set up and utilize machine tool accessories, Vertical knee milling operation, manual lathe operations, manual lathe threading and drill press operations.

Prerequisite(s): PMT 1203C and ETD 2218 or equivalent experience

PMT 2261C - CNC Machining I

3 Credit Hours
(Fall, Spring, Summer)

This course provides training in CNC machine operation and programming. The student will gain technical knowledge and programming methods employed in CNC machining centers. CNC Machine programming, set-up and operations are taught using computer and hands on applications. Metal fabrication processes are taught through lectures, demonstration and student generated projects. Completion of this course offers students technical skills as a CNC operator processes to be applied in various machining and fabrication industries. MasterCam–Lathe is taught to provide the student programming application in CNC machining.

Prerequisite(s): PMT 1250C or equivalent experience.

PMT 2262C - CNC Machining II

3 Credit Hours
(Fall, Spring, Summer)

This course will offer students a working knowledge of MasterCam Mill 2-D and Solidworks. This is the second class offered which teaches the student 3-D design using solidworks. An in-depth study of CAD/CAM software, CNC processing methods and the set-up of CNC machining centers. The course lectures and lab offer students hands-on applications using Solidworks generated projects processed with Mastercam tool path software to generate various projects. The student will also learn to calculate machining feeds and Speeds, edit CNC programs and part production for Mill and Lathe.

Prerequisite(s): PMT 2261C or eqivalent experience.

Management

HUS 4950 - Capstone: Human Resources Management

3 Credit Hours
(Spring)

This capstone will build upon and integrate the primary human resource management skills introduced in prior emphasis courses. Students will have the opportunity to work on a hands-on project to demonstrate, apply, and develop their knowledge in the field of human resources.

Prerequisite(s): Senior standing and completion of or concurrent enrollment in remaining program core and emphasis courses. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2021 - Management

3 Credit Hours
(Fall)

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as

management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2300 - Personnel Management

3 Credit Hours
(Spring)

An introduction to personnel practices and procedures. Topics include the personnel management system, maximizing employee potential, organizational behavior, and labor management relations.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3052 - Management Philosophy and Practice

3 Credit Hours
(Fall)

A comprehensive study of contrasting philosophies of management, current theories of leadership, management and supervision, as well as current trends and issues for business managers; focuses on applications and cases for development of competencies across all business functions and units; emphasis is placed on the cross-functional aspects of management, as well as the manager's need for a general business perspective.

Prerequisite(s): upper division standing is required. Concurrent or prior enrollment in GEB 3031 and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3120 - Leadership and Group Dynamics

3 Credit Hours
(Spring)

An applied leadership course with a focus on case studies, projects and group interaction; includes theoretical background on group dynamics, small group behavior and motivation, power, types of groups, verbal and non-verbal communication skills and team-building. Emphasis will be placed on sociological and psychological dimensions of inter-group relations, including analysis and problem-solving through simulations, cases and similar activities which reflect a general business perspective, as well as leadership and group dynamics across a variety of business units/functions.

Prerequisite(s): upper division standing is required. Concurrent or prior enrollment in GEB 3031 and MAN 3052, and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3240 - Organizational Behavior

3 Credit Hours
(Spring)

Designed to develop student understanding of individual, group and organizational issues that affect and shape businesses. Topics include motivation, communication, decision making, leadership, power, organizational structure, team performance, organization diversity and change management.

Prerequisite(s): upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3294 - Strategy and Innovation

3 Credit Hours
(Offered as needed)

This course explores the concepts and tools used by businesses to create and sustain competitive advantage under dynamic market conditions. Topics will include strategy formulation, understanding core capabilities, examining external competitive forces and evaluating goals. Emphasis will also be placed on understanding the process of innovation and challenges faced by innovative organizations.

Prerequisite(s): Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3310 - Issues in Human Resource Management

3 Credit Hours
(Fall)

Introduces the full range of human resource management functional areas, including recruiting and hiring staff, performance evaluations, employment regulations, discipline and termination, downsizing, compensation and benefits, job analysis, the organized labor setting, equity/diversity issues, and policy design. Approach will focus on current issues and applications.

Prerequisite(s): upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3320 - Employee Staffing and Benefits

3 Credit Hours
(Fall)

An intermediate level course in employment staffing issues focusing on staffing patterns, organizational structures, job analysis and design, staffing efficiencies, employee assistance programs, staff projection models, and employee services.

Prerequisite(s): upper division standing and MAN 3310 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3350 - Training and Development

3 Credit Hours
(Fall)

Covers various staff training and development models, effective workshop techniques, designing and implementing company-wide training and development programs. Assessment of training needs, training and development as a benefit and setting development goals; students will design and conduct at least one workshop/training session for fellow students.

Prerequisite(s): upper division standing and GEB 3213 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3505 - Production Operations and Logistics Management

3 Credit Hours
(Spring)

This course examines the integration of production operations and logistics management and how this enables an organization to compete successfully in business. Special emphasis is placed on the relationships that exist between operations and the supply chain to include operations and supply chain strategies, business processes, project management, product design and development, and inventory management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3574 - Acquisition Management

3 Credit Hours
(Spring)

Students will be exposed to the fundamentals of government acquisitions. This course provides conceptual material on government acquisitions, to include program planning, execution, and control. Students will be introduced to the elements of program risk and learn risk management techniques. The systems engineering process will be emphasized to include work breakdown structures, cost -- benefit analysis, and scheduling.

Prerequisite(s): upper division standing and GEB 3031 or MAN 3052 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3583 - Project Management

3 Credit Hours
(Spring)

In this introductory Project Management course, students will be exposed to the fundamentals of general project management. This course provides conceptual material on project management techniques appropriate in system/subsystems management. Topics include project management functions, project manager roles and responsibilities, the project life cycle, and conflict resolution. Emphasis will be placed on project oversight issues across the various business units and functions.

Prerequisite(s): upper division standing and GEB 3031 or MAN 3052 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3593 - Logistics and Supply Chain Management

3 Credit Hours
(Fall)

Logistics and Supply Chain Management provides an introduction to logistics concepts in both the business and government environment. The student will gain an appreciation of the various logistics missions encountered both in the business world and government acquisition and support programs. The key concept is that logistics is a process that adds value to the end product whether it is a commercial item for a customer or a system used by the government which must achieve a desired state of readiness through an established or acquired infrastructure.

Emphasis will be placed on the challenges related to providing logistical support for procurement, manufacturing, and life cycle support. The course will focus on supply chain strategies, logistics information systems, order fulfillment, inventory, demand forecasting, and collaborative planning. In addition, the student will be introduced to transportation constraints, third party logistics (3PL), warehousing, materials handling, international logistics and facility planning.

Prerequisite(s): Upper division standing and MAN 3052 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3610 - Global Logistics Management

3 Credit Hours
(Offered as Needed)

Examines selected industrial relations systems of Western Europe, Asia and the Americas, with special emphasis on differences among systems and the reasons such differences exist. The industrial relations significance of the multinational enterprise and management problems associated with operations in diverse systems are analyzed.

Prerequisite(s): Upper division standing and MAN 3593 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3786 - Sustainable Enterprise Planning

3 Credit Hours
(Offered as Needed)

This course introduces students to assessment tools, design and construction considerations, and operating planning requirements for sustainable enterprises. Students will learn about the ecological and economic benefits of sustainability/green practices. Additionally, they will learn how product, process, and service decisions affect sustainable enterprise concepts. Today's enterprises focus on social and environmental challenges, marketing, supply chain decisions, recycling, reusing, reconditioning, and other product and service decisions in order to realize a competitive advantage. This course will focus on best practices, case studies, evolving trends, and experimental efforts regarding sustainable/green systems.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3903 - Operations Research

3 Credit Hours
(Fall)

Operations Research is a science of modeling and optimization. It allows to model real-world problems by using mathematics, statistics and computers. It provides us the tools and theories to solve real-world problems by finding the optimal solutions to models subject to constraints of time, labor, resource, materials and business rules. With Operations Research, people make intelligent decisions to develop and manage their processes and businesses.

Prerequisite(s): Upper division standing is required. STA 2023, MAC 1140, and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4162 - Customer Relations for Managers

3 Credit Hours
(Offered as needed)

This course focuses on relationship building for all customers of an organization. The impact of culture and diversity on business relationships, successful negotiation strategies, and promotion of the organization through media relations are discussed. Emphasis is placed on the manager's role in improving customer relationships by creating a customer-focused, organizational climate.

Prerequisite(s): upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4401 - Labor Relations

3 Credit Hours
(Offered as needed)

This course explores the impact of employee organizations on labor relations, current problems, conflicts and trends and includes the development of managerial approaches to achieve labor management cooperation.

Prerequisite(s): upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4520 - Quality Management

3 Credit Hours
(Spring)

This course examines the significance of quality as a primary competitive strategy for tomorrow's successful business organizations. The impact of quality focus on increasing customer satisfaction is changing the manner in which business organizations functions. Students will recognize that quality focused business organizations are evolving into very different environments in which to work and manage. This quality imperative is relevant for both industrial and service sector organizations. Students will be exposed to the critical issues of total quality management through reading, case studies, class discussion, field trips and outside speakers. The students are expected to gain insight and understanding regarding the meaning of quality, how organizations develop a quality focus, and the continuous nature of quality management. This course is appropriate for students who have an interest in: (1) managing the total quality program in a business organization, and/or (2) working for a business organization which already made a strong commitment to total quality management.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4555 - Quality Certification: ISO 9000

3 Credit Hours
(Fall)

A comprehensive study of internationally uniform quality standards (ISO 9000 and the steps to individual and organizational certification; includes management responsibility, quality system documentation, contract review, design control, process control, inspection and testing, corrective actions and other certification topics.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4570 - Purchasing and Materials Management

3 Credit Hours
(Fall)

The management of purchasing and the materials for production processes. Cost/price analysis, computer systems, forecasting, materials requirements, negotiations, and contracting are included.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4594 - Reverse Logistics

3 Credit Hours
(Offered as Needed)

In this course forward-moving logistics is compared to reverse-moving logistics. Both goods and information are discussed. Topics include federal and state regulations, waste management, recycled materials, technology, financial controls, stakeholders, and performance measurement.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4595 - Logistics Technology

3 Credit Hours
(Offered as Needed)

This course provides an overview of the use of technology (bar codes, gps, and radio frequency identification tags) in logistics to control recalls, returns, recycling, and waste management. Management functions, data synchronization, and interrelationships between different technologies to capture data regarding products moving in a logistics system are also discussed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4720 - Strategic Planning and Management

3 Credit Hours
(Spring)

This course addresses the integration of organizational functions to achieve competitive advantage and organizational harmony through strategy formulation, implementation and evaluation. Activities include case studies and a strategic planning simulation. Topics include change theory, decision-making, planning models, and strategic planning processes as applied in a variety of business settings, units, and functions.

Prerequisite(s): upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4930 - Capstone: Acquisition Management

3 Credit Hours
(Spring)

In this seminar, students will have the opportunity to participate in hands-on projects applying the techniques in MAN

3574 - Acquisition Management. Emphasis will be on government acquisition management. Students will create a work-breakdown structure, a project schedule, and perform a cost-benefit analysis of alternatives. Earned value management will be introduced as a method of program control. Students will also identify potential risk areas and suggest mitigation plans.

Prerequisite(s): upper division standing and MAN 3574 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4931 - Capstone: Project Management

3 Credit Hours
(Spring)

This seminar will build on the basic project management skills by introducing the basic tools used by project managers. The student will learn management techniques for project planning, budgeting, scheduling and control techniques, cost estimating and project management software applications. Students will be exposed to the relationship of purchasing and contracting with project management.

Prerequisite(s): senior standing and completion of MAN 3583 are required. Concurrent enrollment in remaining program core and emphasis courses. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4932 - Contract Negotiations Seminar

3 Credit Hours
(Offered as needed)

This seminar will refine the negotiation skills of the student through the use of readings, class discussions, case analyses, and practical exercises. Students will be introduced to goals, objectives, and strategies, as well as using appropriate tactics and methods to achieve them. The course will also help students understand the role of communication, power, and personality in the negotiation process and facilitate them assessing their personal abilities and traits as they relate to negotiation. While the course will focus on negotiation of defense-related contracts, the principles covered will apply to the entire range of interpersonal relationships.

Prerequisite(s): upper division standing and BUL 4333 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4933 - Best-Value Source Selection Seminar

3 Credit Hours
(Offered as needed)

Focus is on the best-value source selection process. Students will walk through the acquisition cycle. Topics will include acquisition strategy, pre-solicitation activity, preparation for evaluation, initial proposal evaluation, discussions or negotiations, final proposal revision and recommendations and decisions.

Prerequisite(s): upper division standing and MAN 3574 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4934 - Logistics Management Seminar

3 Credit Hours
(Offered as needed)

A special topics course conducted in group or individual format; focus is on the terms, concepts and processes associated with logistics and distribution in the contemporary business environment.

Prerequisite(s): upper division standing and MAN 3583 or MAN 3574. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4940 - Capstone: Supervision

3 Credit Hours
(Spring)

This capstone course will build upon and integrate the primary management skills and concepts introduced in prior emphasis courses. Students will have the opportunity to work on a hands-on project to demonstrate, apply, and develop their knowledge. This course will also cover basic entrepreneurial principles, which will be integrated throughout the student-led projects.

Prerequisite(s): Senior standing and completion of or concurrent enrollment in remaining core and emphasis business courses. Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1161 - Customer Service

3 Credit Hours
(Fall)

Designed to build and maintain the critical skills necessary to be a dynamic and successful professional. Students and front-line individuals who work with customers every day will develop strategies to create positive customer relationships. This course provides a practical approach to the thorny issues of customer dissatisfaction and will enable managers to keep service personnel focused on the organization's goals and objectives.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1345 - Supervision I

3 Credit Hours
(Spring)

The course presents the functions of a personnel manager, philosophy of general management, organizational structure, employer socioeconomic climate and career information. Included also are job descriptions and specifications, recruiting practices, applications, resumes, interviewing, placement, performance appraisals, wage and salary administration and other related topics.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1346 - Supervision II

3 Credit Hours
(Offered as needed)

The course presents a continuing study of the functions of a personnel manager, philosophy of general management, employee socioeconomic climate and other information. Included are orientation, training, labor unions, safety, health and other related topics.

Prerequisite(s): MNA 1345 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2100 - Organizational Behavior

3 Credit Hours
(Spring)

Designed to help students develop an understanding of how they may be motivated to work together in greater harmony in all kinds of organizations. The basis of human motivation and how it is influenced by leadership, the organization itself, and the social environment in which the organization exists.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2141 - Leadership Techniques

3 Credit Hours
(Offered as needed)

This interdisciplinary course addresses leadership in a group setting and focuses on leadership development through discussion, readings, group and individual projects and other applied activities.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Marketing

MAR 2011 - Introduction to Marketing

3 Credit Hours
(Fall)

An introductory course in the field of marketing including a look at marketing as it exists in our economy today. Consideration of the market, the product, distribution channels. Special emphasis on the study of human behavior in marketing promotion.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MAR 4333 - Marketing Strategy

3 Credit Hours
(Fall)

This upper-level marketing course is aimed at the marketing functions of a business, with emphasis on how strategies are developed and how the marketing mix is created to meet the wants and needs of consumers.

Prerequisite(s): Upper division standing required and knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2021 - Professional Selling

3 Credit Hours
(Fall)

Selling, correct attitudes and personal attributes for dealing with the public on a business or professional basis.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2041 - Retail Management

3 Credit Hours
(Spring)

This course covers retail store management, location, buying merchandise, control policies, services, pricing, expenses, profits, training and supervision of retail sales forces, and administrative problems. Also includes a variety of current perspectives in retailing management.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2511 - Introduction to Advertising

3 Credit Hours
(Spring)

Advertising as a marketing tool, its planning, creation, and use. A survey of copy writing, layout, and media (newspapers, magazines, radio, television, films, etc.)

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Mathematics

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1105L - College Algebra Lab

1 Credit Hour
(Fall, Spring, Summer)

A hands-on lab designed to improve students' success rates in the MAC 1105 - College Algebra course. Students will work on all topics covered in MAC 1105. Emphasis will be placed on strengthening algebraic skills through a variety of nontraditional approaches to learning, including small group collaboration and computer-based interactive learning. Meets specific general education requirements. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): MAT 1033A or equivalent with a "C" or better, or appropriate placement scores

Corequisite(s): MAC 1105.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of "C" or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of "C" or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

3 Credit Hours
(Fall)

This course is designed for those students who are majoring in computer science, mathematics, engineering,

mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a grade of "C" or better in MAC 1140. A course in programming is recommended.

MAD 3107 - Applied Discrete Mathematics

3 Credit Hours
(Fall)

This course builds on the foundation established in Introduction to Discrete Mathematics with further exploration in logic, mathematical reasoning, and mathematical proof writing. Topics include logic, set theory, boolean algebra, combinatorics, and graph theory with applications.

Prerequisite(s): Completion of MAC 2312 with a grade of “C” or better or concurrent enrollment in MAC 2312.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

3 Credit Hours
(Offered as needed)

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade or “C” or better, or equivalent.

MAT 0018 - Developmental Mathematics I

3 College Prep Credits
(Offered as needed)

This course is designed for students whose entry level placement test scores do not meet requirements for degree credit (not applicable for degree completion). It is designed to reinforce the knowledge of operations and applications of fractions, decimals, percents, and signed numbers. An introduction to algebra will also be covered. Students must pass this class with a "C" or better to move on to MAT 0028.

Prerequisite(s): A score of 50-95 on the PERT.

Corequisite(s): SLS 1101.

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0022 - Developmental Mathematics Combined

6 Credit Hours
(Fall, Spring, Summer)

A course designed to satisfy the requirements of both MAT0018 and MAT0028 in one semester and prepare students for MAT1033A. Topics to be studied include computations with decimals, percents, integers, operations with rational and polynomial expressions, linear equations and inequalities in one variable, factoring, and basic linear graphing. This course will teach the student to understand and communicate concepts of algebra in the language of mathematics, both orally and written. Due to the nature of this course, calculators are not permitted. A grade of "C" or better is required for successful completion of this course. College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

Prerequisite(s): score of 50-95 on the PERT

Prereq/Corequisites: SLS 1101

MAT 0028 - Developmental Mathematics II

4 College Prep Credits
(Fall, Spring, Summer)

This course is designed for students whose entry level placement test scores do not meet requirements for degree credit (not applicable for degree completion). This course emphasizes concepts, techniques, and applications of the following topics: operations with real numbers, linear equations and inequalities in one variable, rational expressions, properties of exponents, polynomials, radical expressions, and graphs of lines.

Prerequisite(s): Grade of "C" or better in MAT 0018 or score of 96-113 on the PERT or on an elective basis a score of 114 or higher on the PERT

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0056 - Developmental Mathematics Module

2 College Prep Credits
(Fall, Spring, Summer)

This course is designed for students whose entry level placement test scores do not meet requirements for degree credit. This course emphasizes concepts, techniques, and applications of the following topics: operations with real numbers, linear equations and inequalities in one variable, rational expressions; properties of exponents, polynomials, radical expressions, and graphs of lines. Student may exit Developmental Mathematics Module by passing the coursework and by obtaining a passing score on the Exit Exam.

Prerequisite(s): score of 105-109 on the PERT or elective basis score 110 or higher on the PERT

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0157 - Modularized Developmental Mathematics II

4 College Prep Credits
(Fall, Spring)

This course is designed to help students develop computational & algebra skills needed for success in college level mathematics. This course uses a modular format in a lecture/lab setting. Students will take a diagnostic test in class to identify skills that have not been mastered and to determine placement into the appropriate modules. Each student will have an individualized learning plan such that he or she works only on skills not yet mastered. Possible topics in the learning plan include operations on signed numbers, solving linear equations and inequalities in one variable, graphing linear equations, operations with exponents and polynomial expressions, factoring polynomials and solving quadratic equations, introduction to rational expressions, and operations with square roots. Students will use computerized instruction as well as guided instruction by the instructor. Successful completion of this course requires mastery of the material in each module and a passing score of the department final exam. Course cannot be used toward AA or AS degree.

Prerequisite(s): MAT 0018 with a grade of "C" or better or a score of 96-113 on the PERT.

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 1033A - Intermediate Algebra

4 Credit Hours
(Fall, Spring, Summer)

This is an intermediate algebra course designed to prepare students for general education mathematics/statistics courses. This course emphasizes concepts, techniques, and applications of the following major topics; factoring, algebraic functions, radicals and rational exponents, complex numbers, quadratic equations, rational equations, two-variable linear equations/inequalities and their graphs, systems of linear equations and inequalities, and an introduction to functions. This course may be used as an elective, but does not meet Gordon Rule requirements for B.A.S., A.A., or A.S. transfer students.

Prerequisite(s): a passing score on the standardized placement test measuring mathematics achievement, successful completion of MAT 0028 with a grade of "C" or better, or exemption from placement testing.

MAT 1033L - Intermediate Algebra Laboratory

1 Credit Hour
(Fall, Spring, Summer)

A hands-on lab designed to improve students' chance for success in the MAT1033A Intermediate Algebra course. Students will work to strengthen skills required to master the topics covered in Intermediate Algebra. The topics include, but are not limited to, factoring, algebraic functions, radicals and rational exponents, complex numbers, quadratic equations, rational equations, two-variable linear equations/inequalities and their graphs, systems of linear equations and inequalities, and an introduction to functions

Prerequisite(s): MAT 0028 or equivalent with a grade of "C" or better, or a score of 110-122 on the PERT, or on an elective basis with a score of 123 or higher on the PERT.

Corequisite(s): MAT 1033A

*Students scoring 110-113 on the PERT may enroll in MAT 1033A if they also enroll in MAT 1033L. Students should see an academic advisor.

MAT 2905 - Applied Teaching Techniques for Mathematics

4 Credit Hours
(Summer)

The goals of this course are: refinement or acquisition of mathematics skills and connections between mathematics topics needed for successfully tutoring in an academic setting; acquisition of general methods of tutoring as well as specific tutoring techniques needed for specific courses. Teacher-tutor seminars, teacher-tutor conferences, and formal instruction will supplement the extensive tutoring experiences. Prerequisite: Consent of the department. A minimum grade of "C" is required.

Prerequisite(s): Admission to the BS Middle Grades Math degree program

MGF 1106 - Practical Applications of Mathematics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Students who are exempt from placement testing may enroll in this course with no prerequisites.
Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following:
(1) 114 or higher on the math section of the PERT OR
(2) successful completion of MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MGF 1107 - Math in Society

3 Credit Hours ♦
(Fall, Spring, Summer)

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s):
Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following:
(1) 123 or higher on the math section of the PERT OR
(2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MHF 4404 - History of Mathematics

3 Credit Hours
(Offered as needed)

This course is for students pursuing an education degree with an emphasis in middle school and secondary mathematics. This course covers the evolution of mathematics from early number systems through modern mathematics. If used to meet NWFSC Teacher Education program requirements, this course requires a grade of "C" or better.

Prerequisite(s): Completion of MAC 2311 with a grade of "C" or better or concurrent enrollment in MAC 2311.

MTB 1103 - Business Mathematics

3 Credit Hours
(Fall)

This course presents basic principles used to solve everyday business problems, including a review of basic skills and business terminology. Topics in the course include the following: base, rate and percentage, trade and cash discounts, wage and salary administration, insurance (fire and automobile), depreciation and business profits, distribution of corporate dividends, simple interest and bank discount, and buying and selling of corporation bonds and stocks.

Prerequisite(s): completion of MAT 0028 with a "C" or better or satisfactory test scores. Knowledge of basic computer and keyboarding skills are strongly recommended.

MTG 2206 - College Geometry

3 Credit Hours
(Spring)

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 or equivalent with a “C” or better.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2122 - Statistical Applications

4 Credit Hours
(Offered as needed)

This course is designed for students pursuing psychology, education, and some specialized degrees. The course is an introduction to understanding and applying statistical concepts. Topics include: descriptive statistics, probability distributions, one and two sample hypothesis testing, confidence interval estimation, correlation, regression, and analysis of variance. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): MAT 1033A or equivalent with a “C” or better, or appropriate placement score.

Medical Office Skills

HSA 1100 - Introduction to Health Care

3 Credit Hours
(Fall)

This course provides an overview of the United States Healthcare System, including the economic, social, political, and technological forces that shape the industry. The role of state and federal government and regulatory agencies in healthcare delivery is examined. The fundamental roles and responsibilities of healthcare team members are surveyed. Healthcare safety, security, and infection control procedures will also be discussed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1100 - Health Education

3 Credit Hours
(Spring)

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1400 - First Aid

3 Credit Hours
(Spring)

Preparation to meet emergencies that occur in the school, home or on the highway. Instruction and practice in dressing and bandaging, care of wounds, shock, bone and joint injuries, cardiopulmonary resuscitation, transportation of the injured oral poisoning and other medical emergencies.

HSC 1531 - Medical Terminology

3 Credit Hours
(Fall)

An introduction to prefixes, suffixes, root words, combining forms, Latin and Greek forms, spelling, and pronunciation,

with emphasis on building a working medical vocabulary based on body systems.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 1107 - Word Processing I

3 Credit Hours
(Fall)

Integration of basic keyboarding and word processing – learning the keyboard, creating, editing, saving, and other word processing functions.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

OST 1355 - Records Management

3 Credit Hours
(Spring)

Methods and systems of filing used in business offices, filing equipment, and time-and-motion skills. Filing practice sets are used.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2117 - Word Processing II

3 Credit Hours
(Spring)

Continuation of Typing and Word Processing I – develop keyboarding and document processing using a microcomputer.

Prerequisite(s): OST 1107 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

OST 2335 - Business Communications

3 Credit Hours
(Fall, Spring)

Business Communications is a comprehensive coverage of language structure and particular emphasis on writing superior business letters and reports. Instruction in principle, then illustration, and practice in applying the principles. A fundamental concept of the appearance, language and style, tone and psychology of effective business letters.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2401 - General Office Management

3 Credit Hours
(Spring)

Study of practices and procedures in the modern office. Emphasis on exercising judgment, handling incoming calls and callers, processing mail, word processing systems, editing and composing techniques, travel arrangements, banking procedures, employment applications and resumes.

Prerequisite(s): OST 2117 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

Meteorology

MET 1010C - Introduction to Meteorology

4 Credit Hours
(Fall, Spring, Summer)

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Military Science (ROTC)

MSL 1001 - Foundations of Officership

1 Credit Hour
(Fall)

This course examines the unique duties and responsibilities of officers, organization and role of the Army, reviews skills pertaining to fitness and communication, and analyzes Army values and expected ethical behavior. Requires participation in a weekly one-hour leadership laboratory. Students are required to participate in a one-hour physical training session three times a week and will be evaluated on their performance of the Army Physical Fitness Test.

MSL 1002 - Basic Leadership

1 Credit Hour
(Spring)

This course presents fundamental leadership concepts and doctrine, the practice of basic skills that underlie effective problem solving, and examines the officer experience. This course requires participation in a weekly one-hour leadership laboratory. Students are required to participate in a one-hour physical training session three times a week and will be evaluated on their performance of the Army Physical Fitness Test.

MSL 2101 - Individual Leadership Studies

2 Credit Hours
(Fall)

This course develops knowledge of self-confidence and individual leadership skills. It develops problem solving and critical thinking skills, as well as how to apply communication, feedback, and conflict resolution skills. This course requires participation in a weekly one-hour leadership laboratory. Students are required to participate in a one-hour

physical training session three times a week and will be evaluated on their performance of the Army Physical Fitness Test.

MSL 2102 - Leadership and Teamwork

2 Credit Hours
(Spring)

This course focuses on self-development guided by knowledge of self and group processes, challenges current beliefs, knowledge, and skills. This course requires participation in a weekly one-hour leadership laboratory. Students are required to participate in a one-hour physical training session three times a week and will be evaluated on their performance of the Army Physical Fitness Test.

MSL 3201 - Adaptive Team Leadership

3 Credit Hours
(Fall)

Examines skills that underlie effective problem solving, analyze military missions and plan military operations, execute squad battle drills.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 3202 - Leadership in Changing Environments

3 Credit Hours
(Spring)

Probes leader responsibilities that foster an ethical command climate, develop cadet leadership competencies, and apply principles and techniques of effective written and oral communication.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 3203 - The Joint Environment

3 Credit Hours
(Offered as Needed)

Provides an introduction to the joint military environment. The course provides an overview of the development of national and regional policy through the national Security Council and national security system.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 4301 - Developing Adaptive Leaders

3 Credit Hours
(Fall)

Discuss staff organization, functions, and processes, analyze counseling responsibilities and methods, and apply

leadership and problem solving principles to a complex case study/simulation.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 4302 - Leadership in a Complex World

3 Credit Hours
(Spring)

Capstone course to explore topics relevant to second lieutenants entering the army, describe legal aspects of decision making and leadership, analyze army organization from tactical to strategic level.

Prerequisite(s): Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Music

MUH 2930 - Music Humanities – Special Topics

3 Credit Hours
(Offered as needed)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

MUL 1010 - Music Appreciation

3 Credit Hours † ♦ ¶
(Fall, Spring, Summer)

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUM 1620 - Audio and Acoustic Fundamentals

3 Credit Hours
(Fall, Spring, Summer)

Audio and Acoustic Fundamentals explores the basics of audio systems and equipment and the acoustical environment in which they are used. Emphasis is placed on equipment terminology, function and acoustical listening. The two basic fundamentals are summed together to begin laying the basic foundation required to operate audio and recording equipment.

MUM 2300 - Introduction to the Music Industry

3 Credit Hours
(Summer)

This course is an introduction to the history, principles, and practices of the music industry. Topics will include music publishing, copyright, distribution, industry organization, producing, and general business functions.

MUM 2600 - Recording Techniques I

3 Credit Hours
(Fall, Spring, Summer)

This course is designed as an introduction to basic audio engineering and studio practices. Listening exercises, phychoacoustics, microphone characteristics, and studio etiquette will be studied. In addition the student will study techniques and practices and procedures of multi-track recording, acoustical balancing, editing, and over dubbing in a variety of situations.

Prereq/Corequisites: MUM 1620

MUM 2601 - Recording Techniques II

3 Credit Hours
(Fall, Spring, Summer)

This course explores advanced multi-track recording skills and audio production techniques, edits, use of outboard equipment and live multi-track recording.

Prerequisite(s): MUM 1620, MUM 2600.

MUM 2604 - Multi-Track Mixdown (Post Production)

3 Credit Hours
(Fall, Spring, Summer)

This course explores the application of signal processing equipment as it relates to multi-track master mixdowns. In addition, software and hardware application of mixdown is applied to post-production practices.

Prerequisite(s): MUM 1620, MUM 2600, MUM 2601.

MUN 1000 - Summer Ensemble Workshop

3 Credit Hours
(Summer)

An ensemble workshop open to any student who desires to improve vocal and physical presentation skills. A variety of musical physical styles will be studied and performed. Students participating in Summer Ensemble Workshop will be expected to participate in several scheduled performances.

Prerequisite(s): experience in high school or a desire to learn.

MUN 1001 - Summer Ensemble Workshop II

3 Credit Hours
(Summer)

An ensemble workshop and performance to improve vocal and physical presentation skills. A variety of musical physical styles will be studied and performed. Students participating in Summer Ensemble Workshop II will be expected to participate in several scheduled performances.

Prerequisite(s): MUN 1000.

MUN 1002 - Summer Ensemble Workshop III

3 Credit Hours
(Summer)

An ensemble workshop open to any student who desires to improve vocal and physical presentation skills. A variety of musical physical styles will be studied. Students participating in Summer Ensemble Workshop will be expected to participate in several scheduled performances.

Prerequisite(s): MUN 1000, MUN 1001.

MUN 1140C - Wind Ensemble I

1 Credit Hour
(Fall, Spring)

An instrumental ensemble providing an outlet and learning experience to study and perform standard wind band literature, to improve individual instrumental skills, and to sharpen ensemble techniques. The Wind Ensemble performs in both on and off campus venues.

Prerequisite(s): experience in high school or community band programs.

This course may be taken up to four times for credit.

MUN 1310 - Women's Ensemble

1 Credit Hour
(Fall, Spring)

A music organization open through auditions to any student having experience in reading music. A variety of musical styles will be studied and performed. Students electing NWFSC Chorus will be expected to participate in scheduled

performances.

Prerequisite(s): Experience in high school choruses or choirs.

This course may be taken up to four times for credit.

MUN 1340A - NWFSC Show Choir I

1 Credit Hour
(Fall, Spring)

A study of the fundamental techniques and principles of integrating dance, voice, music and acting into a performance show choir. Training in voice, jazz movement, character interpretation and personality presentation is covered. Membership is open to all part-time or full-time students on a credit or audit basis. All music majors and performance majors must participate. The show choir appears in public performances at frequent intervals throughout the year.

Prerequisite(s): Audition, consent of department, music or performance minor.

This course may be taken up to four times for credit.

MUN 1360 - Madrigal Singers I

1 Credit Hour
(Offered Fall, Spring)

Auditioned a cappella ensemble teaching choral styles that range from the Renaissance madrigal to present day, such as vocal jazz, spirituals and contemporary choral works. This course if for the "first year" student.

Prerequisite(s): Audition based on vocal quality, musicianship and sight reading ability.

This course may be taken up to four times for credit.

MUN 1390 - Symphony Chorale I

1 Credit Hour
(Fall, Spring)

A music organization open through auditions to any student. The Symphonic Chorus will study and perform literature for the large sized chorus.

Prerequisite(s): audition or permission of instructor.

This course may be taken up to four times for credit.

MUN 1421 - Flute Ensemble

1 Credit Hour
(Fall, Spring)

The study and performance of flute ensemble and flute choir music in a musical group.

Prerequisite(s): audition or instructor recommendation only.

This course may be taken up to four times for credit.

MUN 1710A - Rock and Jazz Ensembles I

1 Credit Hour
(Fall, Spring)

Music performing organization open to any student who wants to develop his or her performance repertoire. Laboratory studies include techniques of performing music, literature, practices, styles and media applicable to designated organized ensemble.

Prerequisite(s): Some experience in high school bands, etc.

This course may be taken up to four times for credit.

MUN 1720A - Rock and Jazz Ensembles II

1 Credit Hour
(Fall, Spring)

Music performing organization open to any student who wants to develop his/her performance repertoire. Laboratory studies include techniques of performing music, literature, practices, styles and media applicable to designated organized ensemble.

Prerequisite(s): experience in high school bands.

This course may be taken up to four times for credit.

MUN 2141C - Wind Ensemble II

1 Credit Hour
(Fall, Spring)

An instrumental ensemble providing an outlet and learning experience to study and perform standard wind band literature, to improve individual instrumental skills, and to sharpen ensemble techniques. The Wind Ensemble performs in both on and off campus venues.

Prerequisite(s): experience in high school or community band programs.

This course may be taken up to four times for credit.

MUN 2311 - Women's Ensemble II

1 Credit Hour
(Fall, Spring)

A music organization open through auditions to any student having experience in reading music. A variety of musical styles will be studied and performed. Students electing Women's Ensemble will be expected to participate in scheduled performances.

Prerequisite(s): MUN 1310

This course may be taken up to four times for credit.

MUN 2361 - Madrigal Singers II

1 Credit Hour
(Fall, Spring)

Auditioned a cappella ensemble teaching choral styles that range from the Renaissance madrigal to present day, such as vocal jazz, spirituals and contemporary choral works. This course is for the "second year" student.

Prerequisite(s): MUN 1360.

This course may be taken up to four times for credit.

MUN 2371 - NWFSC Show Choir II

1 Credit Hour
(Fall, Spring)

A study of the fundamental techniques and principles of integrating dance, voice, music and acting into a performance show choir. Training in voice, jazz movement, character interpretation and personality presentation is covered. Membership is open to all part-time or full-time students on a credit or audit basis. All music majors and performance majors must participate. The show choir appears in public performances at frequent intervals throughout the year.

Prerequisite(s): MUN 1340A.

This course may be taken up to four times for credit.

MUN 2392 - Symphony Chorale II

1 Credit Hour
(Fall, Spring)

A music organization open through auditions to any student. The Symphony Chorus will study and perform literature for the large sized chorus.

Prerequisite(s): MUN 1390.

This course may be taken up to four times for credit.

MUS 1905A - Independent Study – Music

1 Credit Hour
(Offered as needed)

A defined independent study which is pursued under supervision of a faculty directing teacher and recorded through departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized or advanced nature and not available through classes or courses available on a college schedule. Departmental approval required. Placement test is required. The course includes Writing-Across-

The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of “C” is also required.

Prerequisite(s): Approval from department chair, a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 and REA 0017.

MUS 2930 - Music – Special Topics

3 Credit Hours
(Fall, Spring)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

*This course may be taken up to four times for credit.

MUT 1001 - Fundamentals of Music

3 Credit Hours
(Fall, Spring, Summer)

A pre-theory course for the music major, non-music major, or for the elementary education major.

MUT 1111 - Music Theory I

3 Credit Hours
(Fall, Spring)

A study of the fundamentals of basic musicianship, music notation, simple rhythms, key signatures, intervals, major and minor scales, intervals, triads, 7^{th} chords, polyphonic composition and elementary keyboard work. This course also introduces students to tools necessary for analyzing musical compositions of the 17^{th} & 18^{th} centuries.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1241

MUT 1112 - Music Theory II

3 Credit Hours
(Fall, Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, species counterpoint, chord structures, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17^{th} & 18^{th} centuries.

Prerequisite(s): MUT 1111

Corequisite(s): MUT 1242

MUT 1241 - Ear Training and Sight Singing I

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1111

MUT 1242 - Ear Training and Sight Singing II

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1241

Corequisite(s): MUT 1112

MUT 2116 - Music Theory III

3 Credit Hours
(Fall)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including secondary chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17^{th} & 18^{th} centuries.

Prerequisite(s): MUT 1112

Corequisite(s): MUT 2246

MUT 2117 - Music Theory IV

3 Credit Hours
(Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including modulation, non-tonicizing fully diminished 7^{th} chords, augmented 6^{th} chords, mode mixture, Neapolitan chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17^{th} & 18^{th} centuries while providing an introduction to Romantic period and chromatic musical structures.

Prerequisite(s): MUT 2116

MUT 2246 - Ear Training and Sight Singing III

1 Credit Hour
(Fall)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1242

Corequisite(s): MUT 2116

MUT 2247 - Ear Training and Sight Singing IV

1 Credit Hour
(Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 2246

Corequisite(s): MUT 2117

MVB 1201 - Applied Music Secondary – Brass I

1 Credit Hour
(Fall, Spring)

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For nonmusic majors and music majors.

This course may be taken up to four times for credit.

MVB 2202 - Applied Music Secondary – Brass II

1 Credit Hour
(Fall, Spring)

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For nonmusic majors and music majors.

Prerequisite(s): MVB 1201.

This course may be taken up to four times for credit.

MVK 1211 - Applied Music – Piano I

1 Credit Hour
(Fall, Spring)

Private instruction in piano, as secondary instrument, consisting of one half-hour lesson per week. Minimum of one hour daily practice is required.

This course may be taken up to four times for credit.

MVK 1311 - Applied Music - Piano I for Majors

2 Credit Hours
(Fall, Spring, Summer)

Private instruction in Piano in the freshman year of study as the student's principal performing medium. This one hour, weekly lesson is for intended piano majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which three-four memorized selections from standard literature will be required.

Prerequisite(s): MVK 1211 and Division Chair approval.

This course may be taken up to four times for credit.

MVK 2221 - Applied Music – Piano II

1 Credit Hour
(Fall, Spring, Summer)

Private instruction in piano, as a secondary instrument, consisting of one half-hour lesson per week. Minimum of one hour daily practice is required.

Prerequisite(s): MVK 1211.

This course may be taken up to four times for credit.

MVK 2321 - Applied Music - Piano II for Majors

2 Credit Hours
(Offered as needed)

Private instruction in Piano in the sophomore year of study as the student's principal performing medium. This one hour, weekly lesson is for intended piano majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which a memorized sonata movement and three-four memorized selections from standard literature will be required.

Prerequisite(s): MVK 1211, MVK 1311 and Division Chair approval.

This course may be taken up to four times for credit.

MVP 1201 - Applied Music Secondary – Percussion I

1 Credit Hour
(Fall, Spring)

Private instruction in percussion instruments to develop the student's performance ability in an applied area. One half-hour private lesson per week. Minimum of one hour daily practice is required.

This course may be taken up to four times for credit.

MVP 2202 - Applied Music Secondary – Percussion II

1 Credit Hour
(Fall, Spring)

Private instruction in percussion instruments to develop the student's performance ability in an applied area. One half-hour private lesson per week. Minimum of one hour daily practice.

Prerequisite(s): MVP 1201.

This course may be taken up to four times for credit.

MVS 1016 - Applied Strings – Guitar I

1 Credit Hour
(Fall, Spring, Summer)

Private instruction on guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

This course may be taken up to four times for credit.

MVS 1017 - Applied Strings – Bass Guitar I

1 Credit Hour
(Fall, Spring)

Private instruction in guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

This course may be taken up to four times for credit.

MVS 1201 - Applied Music Secondary – Strings I

1 Credit Hour
(Fall, Spring, Summer)

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

This course may be taken up to four times for credit.

MVS 2026 - Applied Strings – Guitar II

1 Credit Hour
(Fall, Spring, Summer)

Private instruction in guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Prerequisite(s): MVS 1016.

This course may be taken up to four times for credit.

MVS 2027 - Applied Strings – Bass Guitar II

1 Credit Hour
(Fall, Spring)

Private instruction in guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Prerequisite(s): MVS 1017.

This course may be taken up to four times for credit.

MVS 2202 - Applied Music Secondary – Strings II

1 Credit Hour
(Fall, Spring)

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Prerequisite(s): MVS 1201.

This course may be taken up to four times for credit.

MVV 1211 - Applied Music – Voice I

1 Credit Hour
(Fall, Spring, Summer)

Private instruction in voice, as a secondary instrument, consisting of one half-hour session per week, with a minimum of one hour daily practice.

This course may be taken up to four times for credit.

MVV 1311 - Applied Music - Voice I for Majors

2 Credit Hours
(Fall, Spring, Summer)

Private instruction in voice in the freshman year of study as the student's principal performing medium. This one hour weekly lesson is for intended voice majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which four memorized selections from standard literature will be required.

Prerequisite(s): MVV 1211 and Division Chair approval.

This course may be taken up to four times for credit.

MVV 2221 - Applied Music – Voice II

1 Credit Hour
(Fall, Spring, Summer)

Private instruction in voice, as a secondary instrument, consisting of one half-hour lesson per week, with a minimum of one hour daily practice.

Prerequisite(s): MVV 1211.

This course may be taken up to four times for credit.

MVV 2322 - Applied Music - Voice II for Majors

2 Credit Hours
(Offered as needed)

Private instruction in voice in the sophomore year of study as the student's principal performing medium. This one hour, weekly lesson is for intended voice majors, and requires Division Chair Approval. A major component of this class is a required juried performance at the end of the semester for which six memorized selections from standard literature will be required.

Prerequisite(s): MVV 1211, MVV 1311 and Division Chair approval.

This course may be taken up to four times for credit.

MVW 1201 - Applied Music Secondary – Woodwinds I

1 Credit Hour
(Fall, Spring)

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

This course may be taken up to four times for credit.

MVW 2202 - Applied Music Secondary – Woodwinds II

1 Credit Hour
(Fall, Spring)

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Prerequisite(s): MVW 1201.

This course may be taken up to four times for credit.

TPA 1291 - Technical Theatre Lab II

1 Credit Hour
(Offered as Needed)

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Prerequisite(s): TPA 1290

Nursing

NSP 2049L - Nursing Practice Readiness

1 Credit Hour
(Fall, Spring)

This elective laboratory course assists the nursing student to prepare for the RN licensure examination (NCLEX-RN). Web-based instructional methodologies allow the student to complete the course within a self-paced time frame. Students practice test taking skills, self-evaluation and other strategies to gain confidence in sitting for the NCLEX-RN.

Prerequisite(s): NUR 2241C or permission from Nursing Program Director.

Special Nursing Program policies may apply to this course.

NSP 3640 - Nursing Care of Military and Veteran Populations

3 Credit Hours
(Spring)

This course is designed to identify the unique healthcare needs of military and veteran populations in the United States in order to prepare students and practicing nurses to develop competence in designing nursing interventions within civilian and government agencies in which military members and veterans seek healthcare. In accordance with the ANA's pledge (2012) to raise awareness of the unique conditions and needs of military veterans and their families, this course supports the Joining Forces initiative to further nursing training to include specialized topics such as traumatic brain injury, posttraumatic stress disorder, trauma rehabilitation, and understanding the military and veteran's healthcare delivery system.

NSP 4275 - Introduction to Critical Care Nursing

3 Credit Hours
(Offered as Needed)

This course examines the needs of the critically ill client. As part of the human experience, the integrity of the individual and family may be disrupted by a critical illness. During such time, the critical care nurse assists the individual and family to restore life processes to a state of dynamic equilibrium. This course emphasizes the involvement through use of scientific rationale and application of the nursing process in providing care to the individual client and family. Critical care concepts and skills for promoting client and family well-being are stressed.

NSP 4625C - Transcultural Nursing Immersion Course

3 Credit Hours
(Offered as needed)

This course unfolds in two phases: a comprehensive Orientation and Education Phase (I) and a Population Service Phase (II). The two stages are designed to be synergistic in nature. Phase I helps students to develop a deeper appreciation for an underserved region of the world. Phase I will set the stage for the immersion and learning that will take place during Phase II when students will provide basic healthcare and health education to an instructor chosen underserved population in the world. Air and ground travel are required. Current/valid Florida Registered Nursing License, good health, and a clear Background Check/Drug Screen are required. An International Passport may be required. Expenses associated with the course are the responsibility of the student.

Prerequisite(s): Student must be a Registered Nurse and have a clear background check/drug screen.

NSP 4869 - The Professional Nurse Manager and Leader

3 Credit Hours
(Offered as needed)

This course outlines the roles and functions of nurses in executive practice using the competencies identified by the American Organization of Nurse Executives (AONE). Successful nurse leaders and managers exercise complex leadership responsibilities that directly affect the quality of patient and family care in today's multifaceted healthcare management systems. This course will address competencies in communication, knowledge of the healthcare environment, business skills and principles, and professionalism. The course content also provides a review of the material covered in the Certified Nurse Manager and Leader examination conducted by the American Organization of Nurse Executives Credentialing Center that is available to BSN prepared Registered Nurses.

Prerequisite(s): Student must be a Registered Nurse to take this course.

NUR 1021C - Nursing Process I

6 Credit Hours
(Fall, Spring)

This course introduces concepts and principles of holistic nursing care. Students will build on knowledge obtained in the biophysical and psycho-social sciences in this first of four required clinical nursing courses in the nursing curriculum. Theory content includes an introduction to healthcare systems ethical-legal aspects of nursing practice, health and illness, communications, functional health patterns of clients, stress-adaptation, professional behaviors, and all steps of the nursing process with emphasis on assessment of older adult clients. Students begin socialization into the role of the Associate Degree Nurse as a member of an interdisciplinary healthcare team.

Prerequisite(s): Admission to the AS Nursing Program, BSC 1085C, ENC 1101, (MAC 1105 OR STA 2023)

Corequisite(s): NUR 1021L

Prereq/Corequisites: BSC 1086C, HUN 2201

Special Nursing Program policies may apply to this course.

NUR 1021L - Nursing Process I Clinical Experience

4 Credit Hours
(Fall, Spring)

This course introduces students to the role of the Associate Degree Nurse in providing direct, holistic nursing care to young, middle-aged and older adults who are hospitalized or in community settings. Students are introduced to all steps of the nursing process with a focus on assessment skills. Students will identify self-learning needs and set their own goals for improvement. Critical thinking and working effectively with peers and other healthcare professionals as a team member is expected. The demonstration of caring behaviors and therapeutic communication as a provider of bedside, technical nursing care is emphasized. Students must demonstrate safe performance of basic nursing skills, including but not limited to medication administration, physical assessment, and comfort care.

Prerequisite(s): Admission to the AS Nursing Program

Corequisite(s): NUR 1021C.

Special Nursing Program policies may apply to this course.

NUR 1141 - Pharmacologic Principles in Nursing I

1 Credit Hour
(Fall, Spring)

This course introduces students to concepts and principles of pharmacology related to safe administration of therapeutic agents within the nursing process framework. Students begin to learn major drug classifications and selected exemplars along with principles of safe, effective administration of drugs. Students will learn dosage calculations, factors that affect the absorption, excretion, distribution, and metabolism of drugs, as well as drug actions, adverse effects, and interactions.

Prerequisite(s): Admission to the AS Nursing Program

Special Nursing Program policies may apply to this course.

NUR 1142 - Pharmacologic Principles in Nursing II

1 Credit Hour
(Fall, Spring)

An introduction to the role of the associate degree nurse in providing direct, holistic nursing care to young, middle-aged and elderly adults who are hospitalized or receiving care in community settings. Emphasis is on applying all steps of the nursing process with focus on assessment skills. Pre-requisite college foundation and nursing courses provide theoretical bases for nursing care. Critical thinking is an expected behavior along with skills in working ethically and effectively with peers and other health care professionals as a team member; demonstrate caring behaviors and therapeutic communication with clients as a provider of bedside, technical nursing care. The student is expected to demonstrate safe performance of basic nursing skills, e.g., medication administration, physical assessment and comfort care of hospitalized adults and nursing home residents.

Prerequisite(s): NUR 1141 or LPN licensure and admission to the Nursing Program

Corequisite(s): NUR 1231C and NUR 1750L

Special Nursing Program policies may apply to this course.

NUR 1231C - Nursing Process II

5 Credit Hours
(Fall, Spring)

Application of the nursing process continues with emphasis on the planning and implementation of nursing care for clients experiencing threats to functional health patterns. Development of professional behaviors, such as developing therapeutic relationships continues with students working clients through life interactions. Students further develop critical thinking skills through case studies and simulation scenarios designed to provide students with problem solving skills in analyzing, planning and prioritizing care for clients whose health problems are more acute or chronic; the client with psycho-emotional dysfunctions, dysfunctional support systems situations, grief, and loss. Students learn basic management skills as a team member caring for a limited number of clients in hospitals with emphasis on coordination of nursing care and discharge planning. Conflict management skills are highlighted as the student increases role as client advocate.

Prerequisite(s): NUR 1021L NUR 1021C and NUR 1141;or LPN licensure; admission to the AS Nursing Program or permission from the program director

Corequisite(s): NUR 1750L and NUR 1142

Prereq/Corequisites: DEP 2004

Special Nursing Program policies may apply to this course.

NUR 1750L - Nursing Process II - Clinical Experience

4 Credit Hours
(Fall, Spring)

This course builds on competencies presented in Nursing Process I regarding the role of the Associate Degree Nurse in providing direct, holistic nursing care for adult clients experiencing dysfunctional health patterns. Clinical experiences in hospitals, clinics, and community settings provide students with opportunities to apply the nursing process in care of clients, including the older adult. Students continue to develop management skills through conflict management and other professional behaviors. Students demonstrate safe performance of all basic and more complex nursing skills.

Prerequisite(s): NUR 1021L or LPN licensure

Corequisite(s): NUR 1231C.

Special Nursing Program policies may apply to this course.

NUR 1940L - Nursing Clinical Externship

3 Credit Hours
(Summer)

This elective course is designed to offer students the opportunity to gain additional clinical skills practice during the summer semester. Working with a preceptor and the nursing faculty in area hospitals, clinics, or community settings , the student will be able to perform all skills learned in successfully completed nursing courses.

Prerequisite(s): admission to the AS Nursing Program; NUR 1750L

Special Nursing Program policies may apply to this course.

NUR 2233C - Nursing Process III

6 Credit Hours
(Fall, Spring)

Students continue to use the nursing process and critical thinking with emphasis on primary and secondary prevention as nursing interventions in clients experiencing threats to functional health patterns, including during the childbearing process and children whose normal lines of defense have been invaded by stressors to the degree that hospitalization is necessary. Nursing practice issues continue to focus on ethical-legal issues related to acute and/or chronic illness and disability. Management skills include delegation and career development.

Prerequisite(s): NUR 1231C & NUR 1142 or approval from the program director.

Corequisite(s): NUR 2233L

Prereq/Corequisites: MCB 2010C

Special Nursing Program policies may apply to this course.

NUR 2233L - Nursing Process III – Clinical Experience

4 Credit Hours
(Fall, Spring)

Students continue to apply knowledge and skills learned in previous nursing courses in providing nursing care for the hospitalized child, the family during the maternity cycle, and adults whose health problems are more complex and/or chronic. Clinical sites include hospitals, health departments, clinics, physician offices, schools and other community settings. Conflict resolution skills are applied, as needed, to meet client and/or peer learning goals. Delegation skills with peers are also practiced. Students demonstrate continuation of all previously learned nursing skills and must perform safely all advanced nursing skills in this clinical course.

Prerequisite(s): NUR 1750L

Corequisite(s): NUR 2233C.

Special Nursing Program policies may apply to this course.

NUR 2241C - Nursing Process IV

5 Credit Hours
(Fall, Spring)

Students integrate knowledge and principles of the biophysical and psychosocial sciences to solve life-threatening problems that affect a limited number of critically ill clients in a variety of clinical settings. Students differentiate holistic nursing care therapies in primary, secondary and tertiary care settings. Students become proficient in applying all steps in the nursing process with emphasis on evaluating nursing care outcomes. Students apply critical thinking skills in exploring case-based practice situations and work together in simulation seminars to select effective client care improvement processes. Self-evaluation is part of the socialization process to prepare students for the work world as competent, caring staff nurses. Nursing practice issues include licensure standards and continued professional development.

Prerequisite(s): Permission from the Director of Nursing or NUR 2233C; MAC 1105 or STA 2023

Corequisite(s): NUR 2241L, NUR 2811L

Prereq/Corequisites: SYG 2000

Special Nursing program policies may apply to this course.

NUR 2241L - Nursing Process IV – Clinical Experience

3 Credit Hours
(Fall, Spring)

Students apply knowledge and principles of the biophysical and psychosocial sciences to assess, plan, implement and evaluate holistic nursing care of critically ill adults in hospitals, ambulatory care settings, and the home. Students will expand on management of care skills in preparation for their four-week clinical practicum prior to graduation from the program. Students will also shadow a home health/hospice nurse in observing treatment and palliative care of adults and children. Other clinical activities will include experiences in the emergency department and critical care units. Students must demonstrate competency in all behaviors required for an Associate Degree Nursing graduate.

Prerequisite(s): NUR 2233L

Corequisite(s): NUR 2241C, NUR 2811L

Special Nursing Program policies may apply to this course.

NUR 2811L - Nursing Practicum

3 Credit Hours
(Fall, Spring)

This course is a capstone course and provides a time during the last four weeks of the nursing program in which students begin to transition from the student role into the graduate role as an associate degree nurse. Students attend seminar hours and complete standardized testing for evaluation in proficiency in applying all steps in the nursing process with emphasis on evaluating safe nursing care outcomes. Students complete clinical practice hours with an experienced registered nurse preceptor to provide holistic nursing care for a limited number of clients. The focus is on demonstration of all professional behaviors and competencies expected of the associate degree registered nurse graduate at entry level. Clinical experiences provide hands-on learning opportunities, enhancing clinical thinking, safe nursing judgment, and clinical confidence in skills. Clinical experiences take place in a variety of clinical settings and work schedules.

Prerequisite(s): NUR 2233L

Corequisite(s): NUR 2241C, NUR 2241L

Special Nursing Program policies may apply to this course.

NUR 2931 - Special Topics in Associate Degree Nursing

1 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

NUR 2932 - Special Topics in Associate Degree Nursing

2 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

NUR 2933 - Special Topics in Associate Degree Nursing

3 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

NUR 2934 - Special Topics in Associate Degree Nursing

4 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

NUR 2935 - Special Topics in Associate Degree Nursing

5 Credit Hours
(Offered as needed)

Students work individually to enhance nursing knowledge and skills applicable to selected topics in Associate Degree Nursing. AD nursing competencies provide the framework for learning prescriptions which include critical thinking and problem-solving. Seminars, journals, CAI, written assignments and student – instructor conferences guide students in meeting course objectives. Flexible schedule.

Prerequisite(s): admission to the AS Nursing program; permission of Nursing program Director.

NUR 3067C - Health Assessment

3 Credit Hours
(Fall, Summer)

This course is designed to develop the student's knowledge for obtaining and recording a systematic, comprehensive health history, psychosocial assessment, and physical examination of the adult. The course involves the synthesis of nursing, biologic, psychologic, and sociocultural knowledge and theories as they apply to the findings obtained in the comprehensive health assessment of clients of various ages. During the fieldwork experience, emphasis will be placed on collection of a database through physical assessment, history taking and interviewing.

Prerequisite(s): Admission to the BSN program and meets all enrollment conditions.

NUR 3071 - Writing for Success in Nursing

1 Credit Hour
(Fall, Spring, Summer)

This course Is designed to develop the student's knowledge for writing at the upper division nursing level. The course includes information regarding use of APA format and scholarly writing resources.

Prerequisite(s): Student must be a Registered Nurse to take this course.

NUR 3080 - Dimensions of Baccalaureate Nursing Practice

3 Credit Hours
(Fall, Summer)

This course will provide Registered Nurses, who are returning to school to earn a Baccalaureate degree, an opportunity to advance professional practice concepts. As designed, the course engages the student intellectually in an ongoing professional dialogue and journey with peers, colleagues, and instructors that serves to broaden the student's professional development and builds on preexisting knowledge and experiences. The course curriculum is written for adult learners with the characteristics of self-direction, prior experience, applicability to practice, and motivation to meet the challenge to expand their knowledge base and to utilize advanced critical thinking skills.

Prerequisite(s): Admission to the BSN program and meets all enrollment conditions.

NUR 3678 - Nursing Care of Vulnerable Populations

3 Credit Hours
(Offered as needed)

Caring for the vulnerable members of society is a function nurses perform without regard for their own ambitions, personal safety, and financial security. This course is designed to pull together material from different cultures and at risk groups of individuals considered vulnerable populations. Key concepts will be discussed that will provide a basic structure for caring for the vulnerable, the relevance of nursing theories to vulnerable populations, nursing research showing the kinds of phenomena nurses study, and many ideas about learning to work with and advocate for vulnerable individuals.

NUR 3767 - Nursing Care of Complex Clients

3 Credit Hours
(Spring)

This course assists the RN to BSN student in the assimilation of pathophysiology, assessment, and pharmacological nursing concepts with variety complex client issues. This course provides expanded concepts related to nursing care for individuals experiencing complex alterations in health problems as they progress through a variety of healthcare delivery systems and environments.

Prerequisite(s): NUR 3067C, NUR 3080.

NUR 3826 - Nursing Ethics

3 Credit Hours
(Offered as needed)

This course provides an in-depth exploration of ethical principles and moral reasoning as the foundation of nursing practice. The ANA Code of Ethics will be used as a framework for examining current issues in healthcare delivery across the age span from reproductive issues to end-of-life care.

Prerequisite(s): Must be an RN or ASN student.

NUR 3837 - Health Care Issues

2 Credit Hours
(Fall, Spring)

This course provides a forum for the exploration and evaluation of concerns germane to contemporary nursing. The focus of this course is on the nursing profession and current major issues and problems that concern it. Social forces influencing changes in the nursing profession are analyzed in terms of historical antecedents and their current manifestations. Recently passed, and pending legislature at both the national and state levels is emphasized.

Prerequisite(s): Current RN Licensure.

NUR 3955 - Portfolio I

1 Credit Hour
(Fall, Summer)

This course will provide RN to BSN students an opportunity to develop an electronic professional portfolio to express one's professional nursing expertise and proficiency.

Prerequisite(s): Admission to the BSN program and meets all enrollment conditions.

NUR 4125 - Clinical Pathophysiology

3 Credit Hours
(Fall, Spring)

This course examines in detail the underlying process involved in the development, evolution, manifestations, and complications of common clinical diseases across the life span, and compares normal and abnormal states. The biological bases for therapeutic clinical actions are examined.

Prerequisite(s): NUR 3067C

NUR 4165 - Evidence-Based Practice: Incorporating Nursing Research

3 Credit Hours
(Fall, Spring)

This course is designed to provide the RN to BSN student with an introduction to the research process and evidence based practice. The purpose of the course is to stimulate interest in nursing research; to enable students to understand and judge the usefulness of scientific findings; and to develop an understanding of how clinical proficiency is combined with experimental proof to produce nursing practices based upon evidence. An on-line teaching method is used with optional workshops available to students.

Prerequisite(s): STA 2023.

NUR 4615C - Family and Community Health

5 Credit Hours
(Fall, Spring)

The Family and Community Health Nursing course is designed to facilitate the conceptualizing of family, population groups, and community as units of care from diverse cultures, ethnic, and social backgrounds. The student is provided a fieldwork opportunity to assess the health needs of selected families and groups in the community setting with selected health promotion, risk reduction, and disease prevention. The nursing process is used to examine multiple influences impacting life-course experiences of families and communities to enhance functioning.

Prerequisite(s): NUR 3067C, NUR 3080, admission to the BSN program and completion of all General Education requirements.

NUR 4827C - Nursing Leadership and Management

5 Credit Hours
(Spring, Summer)

This course provides students with an evidence-based study of leadership, collaboration, and coordination in healthcare settings. Students develop an evidence based paper to deal with key leadership and management issues related to professional goals. Nursing leadership and management fieldwork focuses on the roles and functions of the professional nurse in these roles. Issues associated with healthcare delivery are explored. Fieldwork provides an opportunity to plan, implement and evaluate a change in the practice of nursing.

Prerequisite(s): NUR 3080,NUR 4165, NUR 3067C, NUR 4615C.

NUR 4956 - Portfolio II

1 Credit Hour
(Spring, Summer)

This course will provide students an opportunity to complete and evaluate their electronic professional portfolio to express their professional nursing expertise and proficiency.

Prerequisite(s): NUR 3955, NUR 3080; Pre or Corequisite: NUR 4827C.

SPN 3036 - Spanish for Health Care Providers

3 Credit Hours
(Offered as needed)

Spanish for Health Care Providers is designed for individuals majoring in nursing or working in health-related areas. The course focuses on vocabulary needed for the healthcare workplace, with grammar taught as a task-based practical skill. Students will learn phrases used to complete health assessments which include conducting interviews, filling out forms, writing reports, and reading and understanding medical articles and brochures. Prevalent disease processes will be discussed as well as cultural practices that affect health care, specifically the health care of Spanish-speaking patients. This course does not fulfill any part of the Florida state language requirements.

Nutrition

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Oceanography

OCE 1001C - Oceanography

4 Credit Hours
(Fall, Spring)

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

OCE 1013C - Aquatic Environmental Science

4 Credit Hours
(Offered as needed)

This course will investigate living and non-living components of aquatic ecosystems. Students will learn how aquatic ecosystems function naturally as well as how human activity can alter these ecosystems. The course is built around field trip(s) and lab work during which students will obtain water quality data from a local aquatic environment. Through field trip(s) and lab work, students will gain appreciation for the local relevance of course material. For both majors and non-majors, a key outcome of such experiences will be gaining experience in using inquiry and reasoning through the scientific method and becoming comfortable with data, technology, and instrumentation. Problem-solving, interpretation of data, and class discussions will be key.

Paramedics

EMS 0119 - Emergency Medical Technician for Firefighters

140 Clock Hours
(Fall, Spring, Summer)

Emergency Medical Technician is designed to prepare the student with the necessary fundamental knowledge to be successful in meeting Emergency Medical Technician certification and licensing requirements. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Prerequisite(s): Permission of the EMS Director

Corequisite(s): FFP 0010, FFP 0020, EMS 0119L

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 0119L - Emergency Medical Technician Lab for Firefighters

160 Clock Hours
(Fall, Spring, Summer)

This course provides an integrated experience that is designed to allow the student to apply practical experience to material learned in Emergency Medical Technician. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic in the laboratory environment, area hospitals and advanced life support EMS ambulances. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Prerequisite(s): Permission of the EMS Director.

Corequisite(s): FFP 0010, FFP 0020, EMS 0119

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 1119C - Emergency Medical Technician

6 Credit Hours
(Offered as needed)

Emergency Medical Technician is designed to prepare the student with the necessary fundamental knowledge to be successful in meeting Emergency Medical Technician certification and licensing requirements. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic. There is emphasis on assessment based learning and complies with National DOT EMT Basic curriculum.

Prerequisite(s): permission of the EMS Director and AHA CPR for the Healthcare Provider

Corequisite(s): EMS 1401L.

EMS 1335 - Emergency Vehicle Operators Course

1 Credit Hour
(Offered as needed)

Students receive basic education and information on the safe and effective operation of emergency vehicles.

Prerequisite(s): permission of the EMS Program Director.

EMS 1337 - Defensive Tactics

1 Credit Hour
(Offered as needed)

Designed to provide EMS personnel with fundamental knowledge of the recognition of aggressive/violent behavior, and use of appropriate verbal and physical skills to control aggressive behavior in the course of providing emergency care.

Prerequisite(s): admission to the Paramedic program or permission of instructor.

EMS 1401L - EMT Lab

6 Credit Hours
(Offered as needed)

An integrated experience that is designed to allow the student to apply practical experience to material learned in Emergency Medical Technician. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic in the laboratory environment, area hospitals and advanced life support EMS ambulances. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Prerequisite(s): permission of the EMS Director and AHA CPR for the Healthcare Provider

Corequisite(s): EMS 1119C.

EMS 2231C - Paramedic Processes I

5 Credit Hours
(Fall)

First course in the sequence necessary for Paramedic program completion. Designed to integrate concepts and clinical skills learned at the EMT level with advanced life support concepts and skills. Emphasis on patient assessment, pulmonary anatomy and physiology, advanced airway management, pathophysiology and clinical management of shock, medical emergencies and traumatic injuries. Course is consistent with most current Department of Transportation (DOT) curriculum.

Prerequisite(s): admission to the Paramedic program.

EMS 2232C - Paramedic Processes II

5 Credit Hours
(Spring)

Second course in the sequence necessary for Paramedic program completion. Integrates and reinforces concepts and clinical skills learned in Paramedic Processes I, with emphasis on pharmacology, cardiology and Advanced Cardiac Life Support (ACLS) skills. Other topics include assessment and management of OB/GYN emergencies, psychiatric emergencies, pediatric emergencies, musculoskeletal injuries and mass casualty situations. Consistent with the most current DOT curriculum.

Corequisite(s): EMS 2436L.

EMS 2233 - Paramedic Processes III

2 Credit Hours
(Spring)

The final course necessary for Paramedic program completion. Designed to prepare the student for both Florida State Board and National Registry examinations. Emphasizes the integration of paramedic knowledge, attitudes and behaviors. Course consistent with the most current DOT curriculum.

Corequisite(s): EMS 2425L.

EMS 2342 - Advanced Extrication

1 Credit Hour
(Offered as needed)

Focus is on advanced principles of gaining access to and disentanglement of victims of vehicular crashes. Emphasis is placed on victim and rescuer safety. Actual use of available rescue tools is included. Packaging of patients to protect against possible spinal injury is demonstrated and assessed. The course takes place with a mock scene and "junk" cars are used for experience with rescue tools.

EMS 2350 - Unmanned Vehicles Applications and Operations for EMS

3 Credit Hours
(Summer)

This course examines the response of Emergency Medical Services to unsecure scenes with the aid of unmanned vehicles. Students will explore EMS protocols for the utilization of unmanned vehicles in catastrophic events with mass casualties requiring triage and multiple agency responses. Participants will be introduced to the concepts of the utilization of unmanned vehicles for support during large scale public events such as; conventions, festivals, athletic events, protest, and special team support.

EMS 2425L - Paramedic Externship

4 Credit Hours
(Spring)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college

instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): permission of the instructor

Corequisite(s): EMS 2233.

EMS 2435L - Paramedic Lab I

5 Credit Hours
(Fall)

The clinical and skills laboratory companion course to EMS 2231C. Designed to provide instruction in advanced paramedic skills and the opportunity to apply these skills in the clinical setting. By state rule, the instructor-to-students ratio will not exceed six students to one instructor.

Prerequisite(s): admission to the Paramedic program

Corequisite(s): EMS 2231C.

EMS 2436L - Paramedic Lab II

5 Credit Hours
(Spring)

This course is the clinical companion course to EMS 2232C, Paramedic Processes II. It is designed to provide instruction in the advanced paramedic skills and the opportunity to apply them in the clinical setting. By state rule, the instructor-to-student ratio will not exceed six students to one instructor.

Prerequisite(s): EMS 2435L

Corequisite(s): EMS 2232C.

EMS 2438C - Advanced Clinical Internship

2 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): EMS 2232C, EMS 2436L and permission of the instructor

EMS 2526 - Twelve-Lead EKG Interpretation

1 Credit Hour
(Offered as needed)

Designed for the EMS student. Fundamentals of twelve-lead electrocardiogram (EKG) interpretation. Emphasis on scenario-based and case-based learning that reinforces the concept that 12-lead EKG technology is the best tool for visualization of the surfaces of the heart, identification of sites of ischemia, injury and infarction, as well as various intricate conduction abnormalities.

Prerequisite(s): EMT certificate or permission of the instructor.

EMS 2552 - Advanced Cardiac Life Support (ACLS)

1 Credit Hour
(Offered as needed)

An intense overview of the guidelines for emergency cardiac care and cardiac arrest management as published by the American Heart Association. Students must successfully pass a written examination and a skills proficiency performance examination to receive the "ACLC Provider" and successfully pass the course.

Prerequisite(s): EMT certificate and CPR for Health Care Providers certification.

EMS 2553 - Pediatric Advanced Life Support (PALS)

1 Credit Hour
(Offered as needed)

Designed for the EMS student. Fundamentals of recognizing infants and children who are at risk for cardiopulmonary arrest, including the strategies that are needed to prevent cardiopulmonary arrest in infants and children and the cognitive and psychomotor skills needed to resuscitate and stabilize infants and children in respiratory failure, shock or cardiopulmonary arrest.

Prerequisite(s): EMT certificate or permission of the instructor.

EMS 2555 - International Trauma Life Support (ITLS)

1 Credit Hour
(Offered as needed)

Fundamentals of managing traumatic injuries at the basic and advanced levels in accordance with the national Basic Trauma Life Support committee. The recognition and treatment of specific traumatic injuries such as pneumothorax, closed head injury, hemothorax, compensated and decompensated shock, fractures, uncontrolled bleeding, internal injuries of the abdomen and thorax. Emphasis is on rapid assessment, management and transport with discussion on mechanism of injury and kinematics of trauma.

Prerequisite(s): EMT certification or permission from the instructor.

EMS 2940 - Internship: Emergency Medical Services

3 Credit Hours
(Offered as needed)

This is an individualized internship course that provides the student with supervised professional experience utilizing

skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Prerequisite(s): permission of the instructor.

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

Philosophy

PHI 2010 - Introduction to Philosophy

3 Credit Hours ❖ † ♦ ¶
(Fall, Spring, Summer)

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2600 - Introduction to Ethics

3 Credit Hours ❖ † ¶
(Fall, Spring, Summer)

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of

"C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2930 - Philosophy – Special Topics

3 Credit Hours
(Offered as needed)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Photography

PGY 1220C - Commercial Photography I

4 Credit Hours
(Offered as needed)

A beginning course that introduces students to the procedures and aesthetics of developing photographic illustrations for industrial and advertising use. Students will gain experience using a high quality digital studio camera, electronic lighting, and digital applications of their work. It is recommended that students take PGY 1801C prior to or at the same time as this course.

PGY 1401C - Basic Photography

3 Credit Hours
(Fall, Spring)

A beginning course in black and white photographic and darkroom technique. Students will learn the functions of their camera and darkroom equipment. Students will apply their technical knowledge to various artistic challenges. Access to a 35mm camera with manual mode required.

PGY 1405C - Advanced Black and White Photography

3 Credit Hours
(Fall, Spring)

An advanced course in black and white photography. Students will be presented with more demanding creative challenges and will be exposed to a variety of advanced procedures in the darkroom. Access to a 35mm camera with manual mode required.

Prerequisite(s): PGY 1401C or equivalent.

PGY 1801C - Digital Photography I

4 Credit Hours
(Offered as needed)

A beginning course in photography with an emphasis on digital darkroom production techniques. Students will be exposed to procedures and aesthetic concerns relating to photography and digital image production. Access to an appropriate high-quality camera required.

▲Technology-Across-the-Curriculum Course.

PGY 2221C - Commercial Photography II

4 Credit Hours
(Offered as needed)

As advanced a course that allows the student to expand their skill set in producing photographic illustrations for industrial and advertising use. Students may explore product, portrait, and on-location commercial photographic projects.

Prerequisite(s): PGY 1220C and PGY 1801C.

▲Technology-Across-the-Curriculum Course.

PGY 2802C - Digital Photography II

4 Credit Hours
(Offered as needed)

An intermediate-level photography course where creative idea generation and composition in photography are emphasized. Students research more deeply the history of photography and apply new skills to creative digital photographic work. Access to an appropriate high-quality camera required.

Prerequisite(s): PGY 1801C.

▲Technology-Across-the-Curriculum Course.

PGY 2804C - Digital Photography III

4 Credit Hours
(Offered as needed)

An advanced-level photography courses where creative idea generation and composition in photography are emphasized. Students research more deeply the history of photography and apply new skills to creative digital photographic work. Access to an appropriate high-quality camera required.

Prerequisite(s): PGY 2802C.

▲Technology-Across-the-Curriculum Course.

Physical Education

HLP 1081 - Wellness: Practice and Theory

3 Credit Hours
(Fall, Spring, Summer)

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

PEL 1212A - Advanced Softball

1 Credit Hour
(Offered as needed)

Instruction, practice, and participation in advanced softball. The continuous development of physical skills is of major importance in this course.

PEL 1213 - Advanced Softball II

1 Credit Hour
(Offered as needed)

This course is a continuation of Advanced Softball, which consists of instruction, practice, and participation in advanced softball. The continuous development of physical skills is of major importance in this course.

Prerequisite(s): PEL 1212A (Athletes)

PEL 1217A - Advanced Baseball

1 Credit Hour
(Offered as needed)

Instruction, practice, and participation in advanced baseball. The continuous development of physical skills is of major importance in this course.

PEL 1219 - Advanced Baseball II

1 Credit Hour
(Offered as needed)

This course is a continuation of Advanced Baseball, which consists of instruction, practice, and participation in advanced baseball. The continuous development of physical skills is of major importance in this course.

Prerequisite(s): PEL 1217A (Athletes)

PEL 1624M - Advanced Basketball (Men)

1 Credit Hour
(Offered as needed)

This course is a high intensity, drill-oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that

students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

PEL 1624W - Advanced Basketball (Women)

1 Credit Hour
(Offered as needed)

This course is a high intensity, drill oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including: rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

PEL 1626M - Advanced Basketball II (Men)

1 Credit Hour
(Offered as needed)

This course is a continuation of Advanced Basketball for Men, which consists of a high intensity, drill -oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Prerequisite(s): PEL 1624M (Athletes)

PEL 1626W - Advanced Basketball II (Women)

1 Credit Hour
(Offered as needed)

This course is a continuation of Advanced Basketball for Women, which consists of a high intensity, drill -oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Prerequisite(s): PEL 1624W (Athletes)

PEM 1131A - Strength Training

3 Credit Hours
(Offered as needed)

This course is a high intensity lecture/demonstration and flexible lab hour weight training program designed to increase the size, strength, and endurance of the skeletal muscle system. Instruction includes, but is not limited to,

weight training safety, etiquette, history, and nutrition. Instruction will be given in the design of progressive resistance programs to increase total body efficiency and to meet the objectives of the individual student. Students are responsible for determining fitness for training, and those with medical problems which restrict personal activities are encouraged to obtain medical clearance before enrolling in the course.

PEM 2108 - Fitness Lab

1 Credit Hour
(Offered as needed)

Instruction and participation in an exercise program with emphasis on muscle endurance, strength and flexibility.

Prerequisite(s): HLP 1081 or approved wellness assessment by the department chair.

This course may be taken up to four times for credit.

PET 1000 - Introduction to Physical Education

3 Credit Hours
(Offered as needed)

A study of the history of physical education and sport with particular emphasis placed on present practices and trends.

PET 2622 - Care and Prevention of Athletic Injuries

3 Credit Hours
(Offered as needed)

Designed to provide students with a basic knowledge of the care, prevention, and rehabilitation of injuries received during participation in physical education activities to include the effects and dangers of drug use including performance enhancing drugs.

Physical Science

AST 1005 - Introduction to Astrobiology

3 Credit Hours
(Spring)

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

3 Credit Hours
(Fall, Spring, Summer)

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

ISC 4145 - Environmental Systems

3 Credit Hours
(Offered as needed)

Environmental Systems will expose students to a broad overview of the structure and processes occurring on Earth. Students will gain a broad understanding of the interactions between the atmosphere, biosphere, lithosphere, and hydrosphere. Course topics will be related to current environmental issues and our local ecosystems. This course is focused on Earth System Science content with development of methods specific to teaching middle school science as a secondary objective.

Prerequisite(s): (1) any two-course laboratory sequence in the natural sciences (i.e., Principles of Biology I & II, Principles of Geology I & II, College Chemistry I & II, Physics I & II, College Physics I & II, Anatomy & Physiology I & II); (2) any GLY course; (3) and either CHM1020 (Chemical Science) or PHY1020 (Physical Science).

PHY 1020 - Physical Science

3 Credit Hours ♦
(Fall, Spring, Summer)

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PSC 2905 - Independent Study – Physical Science

1 Credit Hour
(Fall, Spring, Summer)

Directed study and individual projects designed to meet the needs of students interested in a specialized area of the physical sciences for which present course availability is limited. Meets specific general education requirements.

This course may be taken up to four times for credit.

Physics

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 1054C - General Physics Without Calculus II

4 Credit Hours
(Spring)

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

Political Science

POS 1041 - American Government

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

POT 1002 - History and Ideas of Political Science

3 Credit Hours ❖
(Offered as needed)

This course reviews classical ideas, political theory and institutions from a historical and comparative viewpoint. It examines the rise of the State, its organization, economic systems, the use of force, and persuasion. This course qualifies as having an international and/or diversity focus for Teacher Education programs common prerequisites.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

Public Administration

PAD 3003 - Public Service Operations

3 Credit Hours
(Offered as Needed)

An introduction to public administration and policy in America. This course is designed to provide undergraduate students a basic understanding and appreciation of the administration of the public sector. It is intended to provide an overview of public administration for students interested in public service and for students, who as good citizens, want an appreciation of the complexities of public management.

Prerequisite(s): upper division standing.

PAD 3393 - Advanced Emergency Management

3 Credit Hours
(Offered as needed)

This course examines functional demands that emergency managers should be aware of in crafting emergency management policies and programs. Students investigate how public policy choices impact emergency planning and the consequences of a disaster. It is designed to help the student develop an in-depth understanding of overall emergency management principles, practices, and standards in the local, national, and international environments.

Prerequisite(s): upper division standing.

PAD 3820 - Public Safety System Integration

3 Credit Hours
(Offered as needed)

This course compares and contrasts the various components of the public safety sector. The course examines the working relationship between public safety organizations and the effectiveness of the various service delivery models.

Prerequisite(s): upper division standing.

PAD 3874 - Community Relations

3 Credit Hours
(Offered as Needed)

This course will expose the student to community relations theory and practice within a broad range of public safety organizations. Students will understand why positive community perception of public safety is critical to funding and operational effectiveness. Students will explore the public safety responsibility in establishing business continuity both in preplanning and following a disaster. Each student will gain the insight and skills necessary to be effective in the community relations function of public safety administration.

PAD 3882 - Issues in Public Service Administration

3 Credit Hours
(Offered as Needed)

This course focuses on current issues and trends in the field of public service administration. The course is structured to introduce management and administrative topics in public service, examine the implications to the field, and reformulate recommendations. This course will begin developing skills in project design and presentation. This course will enhance critical thinking skills.

Prerequisite(s): upper division standing.

PAD 4878 - Capstone: Public Service

3 Credit Hours
(Offered as Needed)

This course provides an opportunity for the student to complete a professional project and apply information and skills studied in core and concentration program courses under the direction of the professor. Successful completion of the course requires demonstration of achievement of the program's learning outcomes. This course should be completed in the last term before graduation.

Prerequisite(s): upper division standing.

PAD 4933 - Special Topics in Public Administration

3 Credit Hours
(Offered as needed)

This is an individual or group course designed to provide students with the opportunity to pursue a special topic(s) from the area of public administration in depth; may be repeated as topics change.

Prerequisite(s): Upper division standing and permission of the instructor.

This course may be taken up to three times for credit.

Psychology

CLP 1001 - Personal Adjustment

3 Credit Hours
(Fall, Spring, Summer)

Psychology of adjustment, application of psychological theory for problem solving and better mental health. An examination of psychological defense mechanisms and adaptive behavior.

CLP 2140 - Abnormal Psychology

3 Credit Hours
(Fall, Spring, Summer)

A study of the different problems in psychopathology, including anxiety, depression, social deviance, psychosis, schizophrenia, mental retardation and general brain dysfunction of both children and adults, with emphasis on descriptive etiology, known causes, and treatments.

Prerequisite(s): PSY 2012.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

Radiography

RTE 1000 - Introduction to Radiologic Technology

2 Credit Hours
(Summer, Offered as needed)

This course is designed to provide an overview of the history of radiography and the role and scope of practice of the practitioner in the healthcare delivery system. Organizations, accreditation, federal agencies, regulatory agencies (including OSHA) and professional credentialing will be discussed. Content includes a fundamental background in medical law, ethics, human diversity and patient consent. The student will examine a variety of ethical issues and dilemmas found in clinical practice, as well as developing a better understanding of patients, the patient's families, and professional peers through comparison of diverse populations based on value systems, cultural and ethnic influences, communication styles and socioeconomic influences. Radiographic medical terminology and pharmacology will be covered. Site specific clinical education paperwork will be completed and students will perform required clinical observations in imaging departments. Background check, drug screening, training and clinical site approval mandatory.

Prerequisite(s): admission to the Radiography Program.

RTE 1111 - Introduction to Radiographic Patient Care

2 Credit Hours
(Fall)

This course is designed to prepare radiography students to provide basic patient care. Basic concepts of patient care will be described, as well as infection control procedures and standard precautions. This course includes hospital specific training. Health risks, life stages, HIV/AIDs and domestic violence will be discussed. This course also includes an introduction to medical and radiographic terminology. Topics include vital signs, venipuncture, body mechanics and transport, verbal/nonverbal communication, and some pharmacology.

Prerequisite(s): admission to the Radiography Program.

RTE 1418 - Radiographic Techniques I

3 Credit Hours
(Fall)

This course is designed to establish a knowledge base in factors that govern and influence the production and recording of radiographic images. This course introduces the student to a comprehensive study and theory of the production of x-rays and primary exposure factors of radiographic imaging. The image parameters of density, contrast, recorded detail, image distortion and blur will be studied as well as ancillary devices and equipment required to produce a quality radiographic image. Digital imaging with related accessories will be emphasized. Class demonstrations and exercises are used to demonstrate application of theory.

Prerequisite(s): MAC 1105 or other Gordon Rule math course and admission to the Radiography Program.

RTE 1457C - Radiographic Techniques II

4 Credit Hours
(Spring)

This course is a continuation of RTE 1418 Radiographic Techniques I. Course content includes the basics of magnetism, electricity, motors, generators, rectifying systems, x-ray tube and filament circuitry. Topics in electromagnetism such as self and mutual induction, high voltage transformation, and AC rectification will be emphasized. An introduction of special radiographic methods will include automatic exposure control, computers, fluoroscopy and image intensification, subtraction radiography, conventional tomography, digital image

receptors, and digital image acquisition and manipulation.

Prerequisite(s): RTE 1418.

Corequisite(s): RTE 1513C

RTE 1503C - Radiographic Procedures I

4 Credit Hours
(Fall)

This course is designed to provide the Radiography student with instruction in radiographic examinations of the chest, abdomen, upper extremity and lower extremity. An introduction to medical and radiographic terminology, radiographic anatomy, and image critique are also included.

Prerequisite(s): BSC 1085C and admission to the Radiography program.

RTE 1513C - Radiographic Procedures II

4 Credit Hours
(Spring)

This course is a continuation of RTE 1503C. It is designed to provide the student with instruction in radiographic procedures and anatomy in the distal extremities, hip region, spine, ribs, and sternum and the cranium. Critical thinking, medical and radiographic terminology, as well as image critique are emphasized.

Prerequisite(s): RTE 1503C, RTE 1804L , and BSC 1086C

Corequisite(s): RTE 1814L.

RTE 1804L - Radiography Clinical Education I

3 Credit Hours
(Fall)

This course involves the practical application of the theories covered in RTE 1503C and RTE 1000. Rotations provide experience with various imaging systems, protocols, and patient care. Students observe, assist and perform basic radiographic procedures (chest, abdomen and extremities) under direct supervision. This course emphasizes patient care and critical thinking. This course meets at the affiliate hospitals. Uniforms, name badges and radiographic markers required.

Prerequisite(s): RTE 1000

Corequisite(s): RTE 1503C

RTE 1814L - Radiography Clinical Education II

3 Credit Hours
(Spring)

This course is a continuation of Radiography Clinical Education I. This clinical training emphasizes lower and upper extremity. Medical and radiographic terminology, patient care, critical thinking and communication skills are

emphasized. This course meets at the affiliate hospitals. Uniforms, name badges and radiographic markers required.

Prerequisite(s): RTE 1804L

Corequisite(s): RTE 1513C.

RTE 1824L - Radiography Clinical Education III

4 Credit Hours
(Summer)

This course is a continuation of Radiography Clinical Education II. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I and II. The student will gain experience and develop clinical competence in general radiographic procedures such as the cranium and specialized contrast studies. Advanced patient care skills, critical thinking, imaging and exposure techniques, radiation protection application and image processing will be emphasized. This rotation covers clinical experience in all phases of fundamental radiologic procedures and image critique. Students will rotate through ancillary departments in this course.

Prerequisite(s): RTE 1814L

Corequisite(s): RTE 2523C.

RTE 2061 - Radiographic Preparation for Practice

4 Credit Hours
(Spring)

This course is designed review information in preparation for the student to take the American Registry of Radiologic Technologist (ARRT) registry examination. The course will cover patient care and education, image production, equipment operation and maintenance, radiographic procedures and radiation protection. The student will also be given simulated registry examinations for practice and assessment purposes.

Prerequisite(s): RTE 2844L

Corequisite(s): RTE 2854L.

RTE 2385 - Radiographic Protection and Biology

3 Credit Hours
(Fall)

This course is designed to provide the student with an overview of the principles of interaction of ionizing radiation with living systems. Ionizing effects on molecules, cells, tissues and the body as a whole are presented, along with factors affecting biological response, including; acute, chronic, stochastic and non-stochastic effects. This course is also designed to present an overview of the principles of radiation protection including the responsibilities of the radiographer for patients, personnel and the public. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies and healthcare organizations are incorporated, as are the various methods of monitoring radiation exposure and acceptable dose limit values.

Prerequisite(s): RTE 1000, RTE 1418, RTE 1457C, RTE 2523C

Corequisite(s): RTE 2844L.

RTE 2473 - Radiographic Quality Assurance

2 Credit Hours
(Fall)

This course is designed to introduce the radiography student to evaluation methodology of radiographic systems to assure consistency in the production of quality images. Image critique, fluoroscopy, malfunctions, and specifications are some of the topics covered in the course.

Prerequisite(s): RTE 1418, RTE 1457C

Corequisite(s): RTE 2844L.

RTE 2523C - Radiographic Procedures III

3 Credit Hours
(Summer)

This course is a continuation of RTE 1513C covering cranium procedures and positioning. It is designed to provide the student with instruction in more complex radiographic procedures such as fluoroscopy, urinary studies, bone age, trauma, pediatrics, mobile and surgical radiography. Included is instruction in additional modalities and studies such as CT, MRI, arthography, myelography, and vascular studies. Attention will be given to the specialized equipment, contrast media, critical thinking and techniques necessary to perform these procedures. Radiographic anatomy, pathology, and critique of images are included in this course.

Prerequisite(s): RTE 1513C

Corequisite(s): RTE 1824L.

RTE 2533C - Radiographic Procedures IV

2 Credit Hours
(Fall)

This is a continuation of RTE 2523C, with emphasis on special procedures and additional modalities. Students are required to complete observations hours within specialty areas.

Prerequisite(s): RTE 2523C

Corequisite(s): RTE 2844L

RTE 2571 - Introduction to Computed Tomography

1 Credit Hour
(Spring)

This course is designed to provide entry-level radiography students with an introduction to and basic understanding of the operation of a computed tomography (CT) device. Content is not intended to result in clinical competency.

Prerequisite(s): RTE 1457C

RTE 2782 - Radiographic Pathology

3 Credit Hours
(Spring)

This course is designed to introduce theories of disease causation and the pathophysiologic disorder that compromise healthy persons. Etiology, pathophysiologic responses, clinical manifestations, and radiographic appearance of alterations in body systems will be presented. Emphasis will be placed on pathological findings on diagnostic radiographic images.

Prerequisite(s): RTE 2523C

Corequisite(s): RTE 2854L.

RTE 2844L - Radiography Clinical Education IV

5 Credit Hours
(Fall)

This course is a continuation of RTE 1824L. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I, II and III. The student will gain experience and develop clinical competence in specialized imaging procedures, and mobile, surgical and trauma radiography. Advanced imaging skills and exposure techniques will continue to be provided. Rotations through ancillary areas continue.

Prerequisite(s): RTE 1824L

Corequisite(s): RTE 2385.

RTE 2854L - Radiography Clinical Education V

5 Credit Hours
(Spring)

This course is a continuation of RTE 2844L. The terminal objective for this course is to prepare the student for employment as an entry level technologist. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I-IV and trauma radiography. Advanced imaging skills and exposure techniques will continue to be provided. Rotations through ancillary areas continue.

Prerequisite(s): RTE 2844L

Corequisite(s): RTE 2061.

RTE 2910 - Radiographic Evidence Based Practice

1 Credit Hour
(Fall)

This course is designed to develop the student's research, writing and oral presentation skills; while completing assignments, both independently and collaboratively, with minimal direction and supervision. Methods of research, appropriate style of writing, citing work, and using APA format will be covered.

Prerequisite(s): RTE 2523C

Corequisite(s): RTE 2844L.

♦This college credit course may not be applied toward the A.A. degree and normally is not intended for transfer unless the student transfers to a baccalaureate in radiologic sciences degree program that is specified under the Florida Statewide AS to BS Articulation Agreement.

Reading

REA 1205 - Reading Across the Genres I

3 Credit Hours
(Offered as needed)

This college-level reading course employs a variety of literary genres as the source material for building student skills in comprehension, context clues, reading speed, critical analysis, vocabulary, and other related reading skills. Students will be exposed to numerous styles and levels of reading material including novels, short stories, critical essays, drama, news reporting. Students will also develop a personal reading preference profile and learn how to identify books, magazines and other reading material commensurate with that profile.

Prerequisite(s): PERT placement score of 106 or higher.

Religion

REL 2300 - Introduction to World Religions

3 Credit Hours ❖ ¶
(Fall, Spring, Summer)

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

REL 2930 - Religion – Special Topics

3 Credit Hours
(Offered as needed)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Safety and Quality Control

ETI 1420 - Properties of Materials and Processes

3 Credit Hours
(Offered as needed)

This course is designed to provide the student with an introduction to the basic properties of materials, principles and processes in the metal working, tools and machinery involved in the manufacture of metals. This course covers non-chip producing and chip producing manufacturing processes.

ETI 1710 - Occupational Safety

3 Credit Hours
(Spring, Summer, Fall)

A basic course in occupational safety and health covering such topics as: theories of accident causation, workplace hazards, hazard analysis and prevention, accident reporting, OSHA, ergonomics, product safety, workers' compensation, and stress on the job.

ETI 2110 - Total Quality Tools

3 Credit Hours
(Fall, Spring, Summer)

This course prepares students to effectively solve business/process/product problems, track process performance, find process and product improvement opportunities, and validate improvements made, using the necessary intellectual tools and procedures including: Five-S, flow charting, Pareto analysis, cause and effect diagrams, histograms, check sheets, scatter diagrams, stratification, statistical process control, failure mode and effects analysis.

ETI 2408C - Welding Fundamentals

3 Credit Hours
(Summer)

This course teaches basic welding processes and techniques for entry-level maintenance technician positions. Students learn welding safety, fundamental practices of shielded arc welding, arc welding with consumable and non-consumable electrodes, brazing, soldering, and plasma cutting.

Sign Language

ASL 1140 - American Sign Language I

4 Credit Hours ❖
(Fall, Spring)

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

ASL 1150 - American Sign Language II

4 Credit Hours
(Fall, Spring)

This course increases the student's American Sign Language vocabulary and uses more complex expression of thoughts, ideas, and emotions and increases the receptive and expressive proficiency of the student in both sign and finger spelling.

Prerequisite(s): ASL 1140 or an equivalent course with a grade of "C" or better

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ASL 2160 - American Sign Language III

4 Credit Hours
(Summer)

A conversational course in American Sign Language utilizing skills and vocabulary from American Sign Language I and II and building on these to form more complex expressions in American Sign Language. Impromptu and planned stories, dialogues and skits will be performed. Receptive and expressive finger spelling will be advanced. No voice will be used for the majority of classroom time.

Prerequisite(s): ASL 1150 or an equivalent course with a grade of "C" or better.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

Small Business Management

SBM 2000 - Small Business Management

3 Credit Hours
(Spring)

This course provides students the opportunity to learn hands-on technical applications regarding entrepreneurship. It is designed for the student who is interested in the ownership and management of a small business enterprise.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

Sociology

SYG 2000 - Sociology

3 Credit Hours ❖ ♦
(Fall, Spring, Summer)

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

SYG 2010 - Social Problems

3 Credit Hours ❖ ¶
(Fall, Spring, Summer)

Introduction to the sociological study of the nature of social problems to insure understanding of their impact on the individual, the group and social institutions in societal and cultural settings. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

SYG 2430 - The Family and Society

3 Credit Hours
(Fall, Spring, Summer)

An examination of the problems which arise out of participation in marriage, family and community situations. Designed to provide students with a basic understanding of the dynamics of family interaction, the effects upon the children, and the family's relationship to and participation in the community.

Social Sciences

DEP 2004 - Human Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

ISS 1905 - Independent Study – Social Science

1 Credit Hour
(Offered as needed)

Directed study and individual projects designed to meet the needs of students interested in a specialized area of the social sciences for which present course availability is limited.

This course may be taken up to four times for credit.

Spanish

SPN 1120 - Spanish I

4 Credit Hours ❖
(Fall, Spring, Summer)

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

SPN 1121 - Spanish II

4 Credit Hours
(Fall, Spring, Summer)

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading and writing. Covers all basic structures of the language.

Prerequisite(s): SPN 1120 or an equivalent course with a grade of “C” or better.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

SPN 2220 - Spanish III

4 Credit Hours
(Offered as needed)

Intermediate level review of grammar, readings in Spanish Literature, and development of conversational and writing skills.

Prerequisite(s): SPN 1121 or an equivalent course with a grade of “C” or better.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

SPN 2221 - Spanish IV

4 Credit Hours
(Offered as needed)

Completion of intermediate level review of grammar, readings in Spanish literature, and development of conversational and writing skills.

Prerequisite(s):
SPN 2220 or an equivalent course with a grade of “C” or better.

❖This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

Speech and Debate

SPC 1006 - Essentials of Speech

1 Credit Hour †
(Offered as needed)

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

3 Credit Hours †
(Fall, Spring)

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

Sports, Fitness & Recreation

LEI 1544 - Outdoor Recreation Management

3 Credit Hours
(Fall, Spring)

This course examines the fundamental influences on outdoor recreation. The course also provides information on hazards, conservation considerations, and safety factors in planning and organizing outdoor recreations. Basic first aid, CPR, and AED training is incorporated as it pertains to outdoor recreation. Field trips may be assigned as warranted.

Theater

THE 1905A - Independent Study – Theater

1 Credit Hour
(Offered as needed)

A defined independent study which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule. Departmental approval required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is also required.

Prerequisite(s): Approval from department chair, a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 and REA 0017.

THE 2000 - Theatre Appreciation

3 Credit Hours † ♦ ¶
(Fall, Spring, Summer)

An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

3 Credit Hours † ¶
(Fall, Spring, Summer)

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 and REA 0017.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

3 Credit Hours † ¶
(Fall, Spring)

Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): ENC 1101

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2304 - Script Analysis

3 Credit Hours
(Offered as Needed)

An introduction to the examination and analysis of play scripts as preparation for production. Students will read plays from various periods and genres, and analyze such dramatic elements as plot, theme, character, dialogue, and style.

THE 2820 - Musical Theater Workshop

3 Credit Hours
(Summer)

An introduction to creative dramatics and children's theater. Topics span a wide range of interests; creative experience, children and theater, workshop procedure, script selection, rehearsal and performance.

THE 2821 - Musical Theater Workshop II

3 Credit Hours
(Summer)

Creative dramatics introduces the many elements of theater: dance, voice and musical theater. Topics span a wide range of interests: the creative process, workshop procedures, rehearsal and performance. Creative Dramatics will focus on producing a final performance.

Prerequisite(s): THE 2820.

THE 2930 - Theater – Special Topics

3 Credit Hours
(Fall, Spring)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

This course may be taken up to four times for credit.

TPA 1210 - Stagecraft

3 Credit Hours
(Fall)

This course is an introduction to the principles of stagecraft: stage terminology, stage safety, instruction in proper use of shop tools, basic theater construction methods, understanding of theatrical rigging, and understanding of general background practices.

TPA 1290 - Technical Theatre Lab I

1 Credit Hour
(Offered as Needed)

This course is designed to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

TPA 1940 - Internship in Theatre Design or Production

3 Credit Hours
(Offered as Needed)

The emphasis of this course is on applied learning and vocational experience in the technical theatre field.

TPA 2063 - Principles of Scenic Design

3 Credit Hours
(Offered as Needed)

This course is a detailed introduction to the principles and techniques used in scene design. The course will include the discussion and practice in analyzing scripts, visualizing a design concept, drafting, paint elevations and rendering

and/or modeling techniques.

Prerequisite(s): TPA 2343

TPA 2170 - Introduction to Theatre Production Documentation

3 Credit Hours
(Offered as Needed)

This course is an introduction to the presentation of information necessary to document the design and production process.

TPA 2212 - Sound Production for the Stage

3 Credit Hours
(Offered as Needed)

This course is an introduction to audio production and reinforcement for the stage. Students will learn how to use and maintain equipment, record and edit sound effects, and mixing live sound. Emphasis will be placed on digital audio techniques and equipment.

TPA 2220 - Lighting Design

3 Credit Hours
(Spring)

An introduction to stage lighting. Topics include history of stage lighting, fundamentals of light and illumination, lighting control, and lighting practices.

Corequisite(s): TPA 1210

TPA 2232 - Introduction to Costuming Technology

3 Credit Hours
(Fall, Spring)

An introduction to costume techniques and wardrobe practices. Topics span a wide range: costume construction techniques, problems in costumes, costume history, construction styles, sewing machine practices, seam finishes, flat pattern layout and production techniques. This course is intended to develop practical experiences in theater costumes.

TPA 2276C - Entertainment Technology - Crafts

3 Credit Hours
(Spring)

This course presents the practices and principles of advanced woodworking, welding, smithing, casting, ceramics, plaster work, fiberglass and plastic technology for the entertainment industry. State of the art tool technology, shop and field practice, health and safety standards will be emphasized. These crafts are entertainment industry oriented that will use items created in a realized production.

Prerequisite(s): TPA 1210.

TPA 2292 - Technical Theatre Lab III

2 Credit Hours
(Offered as Needed)

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Prerequisite(s): TPA 1291

TPA 2301 - Technical Theatre Lab IV

2 Credit Hours
(Offered as Needed)

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Prerequisite(s): TPA 2292

TPA 2331 - Costume Construction

3 Credit Hours
(Offered as needed)

An introduction to costume construction techniques and wardrobe design. Topics span a wide range: costume construction techniques, problems in costumes, costume history, construction styles, sewing machine practices, seam finishes, flat pattern layout and production techniques. This course is intended to develop practical experiences in costume construction.

Prerequisite(s): TPA 2232

TPA 2343 - CAD for the Theatre

3 Credit Hours
(Offered as Needed)

This course is project oriented covering fundamental through advanced material in computer aided drafting and design and its application for the theatre.

TPA 2600 - Stage Management

3 Credit Hours
(Offered as needed)

This course is an introduction to the study and application of stage management as it relates to the manager portfolio, the stage manager morgue, rules and regulations relating to I.A.T.S.E., rules related to contracts, competence in stage management, proper communication with directors, technical directors, designers, cast members and crews, competence in technical discussion areas and basic first aid.

TPP 1190 - Rehearsal and Performance I

3 Credit Hours
(Fall, Spring, Summer)

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Prerequisite(s): experience in high school or a desire to learn.

TPP 1191 - Rehearsal and Performance II

3 Credit Hours
(Fall, Spring, Summer)

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Prerequisite(s): TPP 1190.

TPP 1192 - Rehearsal and Performance III

3 Credit Hours
(Fall, Spring, Summer)

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Prerequisite(s): TPP 1191.

TPP 1940 - Internship in Theatre Performance

3 Credit Hours
(Offered as Needed)

The emphasis of this course is on applied learning and vocational experience in the theatre performance field.

TPP 2110 - Acting I

3 Credit Hours
(Fall, Spring)

Through in-class performance the student will develop an understanding and proficiency of those skills of movement, voice, and expression which are required of a theatrical performer.

TPP 2111 - Acting II

3 Credit Hours
(Fall, Spring)

Through in-class performance, the student develops an understanding and proficiency in styles of acting from classic

through modern.

Prerequisite(s): TPP 2110.

TPP 2120 - Improvisation

3 Credit Hours
Offered as needed

This course explores the use of creativity and imagination, engaging the actor in a wide variety of improvisational theatre games.

TPP 2141 - Acting in Shakespeare

3 Credit Hours
(Offered as needed)

This course is an introduction to the concepts, principles, and skills needed to develop characters in Shakespeare's plays. The course focuses on the hidden clues in the text to discover character choices and meaning. Specific analysis and the techniques of scansion are introduced as they relate to character interpretation. Application of these techniques will be presented in scenes and monologues.

TPP 2150 - Advanced Scene Study

3 Credit Hours
(Fall)

This course is a continuation of the processes and concepts of TPP 2111, Acting II, with the addition of new techniques to create dynamic and engaging characterizations through performance.

TPP 2220 - Auditioning

3 Credit Hours
(Offered as Needed)

This course explores audition techniques for the stage. Students will be better prepared to audition in professional settings.

TPP 2250 - Introduction to Musical Theatre

3 Credit Hours
(Fall)

Introduction to the study of Musical Theater analysis, creation, and performance with an emphasis on singing, dancing, and acting.

TPP 2301 - Directing I

3 Credit Hours
(Offered as needed)

A beginning course in the study, development and training in directing for the theater. Although not a prerequisite, students are encouraged to take Acting I and II before Directing I.

TPP 2302 - Directing II

3 Credit Hours
(Offered as needed)

Directing II is a continued study of the basic principles of directing for the theater with emphasis in the continued study, development and training in directing for the theater.

Prerequisite(s): TPP 2301.

TPP 2533 - Stage Combat I (Unarmed & Rapier)

3 Credit Hours
(Spring)

Through in-class study and performance the student will develop an understanding of and proficiency in the safe techniques of unarmed and rapier stage combat which are required of a theatrical performer. Application of these techniques will be presented in two scenes, one for unarmed and one for rapier.

TPP 2930 - Theater Performance – Special Topics

3 Credit Hours
(Fall, Spring, Summer)

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

This course may be taken up to four times for credit.

Transportation and Logistics

TRA 0080 - Tractor Trailer Truck Driver

320 Clock Hours
(Spring)

This course prepares students for entry into the trucking and logistics industry. Students explore career opportunities and requirements of a professional tractor trailer driver. Students study vehicle safety, accident prevention, operating regulations, cargo handling, documentation procedures, pre-trip preparation, vehicle inspection, maintenance, service, control procedures, backing, coupling, uncoupling, maneuvering, road and hazardous driving skills, and licensing requirements.

TRA 0086 - Tractor Operator

150 Clock Hours
(Fall)

This course is designed to build on the skills and knowledge students learned in the Heavy Equipment Maintenance Technician course for entry into the Heavy Equipment Operations industry. Content emphasizes beginning skills and concepts as a recommended requisite. Students study pneumatic and crawler-type tractor operations.

TRA 0650 - Natural Gas Distribution I

75 Clock Hours
(Fall)

This course prepares students for work as general technicians in the natural gas distribution industry. Students learn to comply with safety procedures, operate basic tools and equipment and provide customer assistance.

TRA 0650B - Natural Gas Distribution IB

75 Clock Hours
(Fall)

This course is prepares students for work as general technicians in the natural gas distribution industry. Students learn to comply with safety procedures, operate basic tools and equipment and provide customer assistance. This course continues the knowledge acquired in the TRA0650.

TRA 0651 - Natural Gas Distribution II

150 Clock Hours
(Fall)

This course prepares students for work as general technicians in the natural gas distribution industry. Students complete customer compliance orders and assist in inspections. Content includes construction mathematics and reading.

Prerequisite(s): TRA 0650

TRA 0652 - Natural Gas Distribution III

150 Clock Hours
(Fall)

This course prepares students for work as general technicians in the natural gas distribution industry. Students complete customer compliance orders and assist in inspections. Content includes construction mathematics and reading.

Welding

PMT 0106C - Welder Helper

150 Clock Hours
(Fall, Spring)

This course provides instruction in shop safety, the use of safety procedures and protective equipment needed in a welding shop. Course incudes basic shop math, shop safety, welding equipment setup/teardown procedures.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0111C - Metal Preparation

150 Clock Hours
(Fall, Summer)

This course provides instruction in different metal preparation processes including: thermal preparation (oxygen/fuel cutting, carbon arc cutting, plasma torch cutting). The student will also learn mechanical preparation (band saw, grinder, power brush, and other metal prep equipment).

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0121C - Introductory Shielded Metal Arc Welding (SMAW)

75 Clock Hours
(Fall, Spring)

This course provides instruction and demonstration using Shielded Metal Arc Welding (SMAW). Topics include visually inspect of welds, and basic SMAW technical terminology. Basic structural welding techniques will be demonstrated in accordance with American Welding Society (AWS) D1.1 Structural Welding Code. Tack welding and metal joint fit of carbon steel is covered in this course.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0122C - Basic Shielded Metal Arc Welding (SMAW)

75 Clock Hours
(Fall, Spring)

This course introduces structural fillet welds in different joint positions in accordance with AWS D1.1 Structural Welding Code. Fillet welds will be performed on carbon steel plate of various thicknesses.

Prerequisite(s): PMT 0121C

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0126C - Intermediate Shielded Metal Arc Welding (SMAW)

75 Clock Hours
(Fall, Spring)

This course provides the student with instruction on joint design, joint preparation, and fit-up, and performance of groove welds with backing. Emphasis is placed on safe operation of welding equipment. Upon completion, students should be able to identify the proper joint design, joint preparation and fit-up of groove welds with backing and make acceptable groove welds with backing using Shielded Metal Arc Welding (SMAW) in accordance with AWS D1.1 welding code.

Prerequisite(s): PMT 0122C

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0127C - Advanced Shielded Metal Arc Welding (SMAW)

75 Clock Hours
(Spring, Summer)

This course provides the student with advanced instruction on joint design, joint preparation, and fit-up, and performance of open groove welds. Emphasis is placed on safe operation of welding equipment. Upon completion, students should be able to identify the proper joint design, joint preparation and fit-up of open groove welds and make acceptable open groove welds in all positions using Shielded Metal Arc Welding (SMAW) in accordance with AWS D1.1 welding code.

Prerequisite(s): PMT 0126C

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0134C - Gas Metal Arc Welding (GMAW)

50 Clock Hours
(Spring, Summer)

This course provides instruction and demonstration using the various transfer methods and techniques of Gas Metal Arc Welding (GMAW). Topics included are safety, equipment set-up, joint design and preparation, and gases.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0145C - Flux-Core Arc Welding (FCAW)

240 Clock Hours
(Offered as Needed)

This course provides instruction and demonstration using the various transfer methods and techniques to flux cored arc welds. Topics included are safety, equipment set-up, joint design and preparation, and gases. Students study basic Flux-Core Arc Welding (FCAW) and basic understanding of pipe welding. Welding symbols and blueprint reading are covered in this course.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0155C - Gas Tungsten Arc Welding (GTAW)

160 Clock Hours
(Offered as Needed)

This course provides instruction and demonstration using the various transfer methods and techniques to gas tungsten arc welds. Topics included are safety, equipment set-up, joint design and preparation, and gases. Students study basic Gas Tungsten Arc Welding (GTAW), and basic understanding of pipe welding.

PMT 0165C - Shielded Metal Arc Weld (SMAW) Pipe Welding

200 Clock Hours
(Offered as needed)

This course introduces the student to the practices and procedures of welding carbon steel pipe using the Shielded Metal Arc Weld (SMAW) process. Emphasis is placed on pipe positions, electrode selection, joint geometry, joint preparation and fit-up. Upon completion, students should be able to demonstrate pipe positions, proper electrodes selection, proper joint geometry, joint preparation, fit-up, and proper SMAW pipe welding techniques in accordance with applicable codes.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0171C - SMAW-GTAW Pipe Welding

400 Clock Hours
(Offered as needed)

This course is designed to provide the students with skills in welding carbon steel pipe using Shielded Metal Arc Weld process and Gas Tungsten Arc Weld (GTAW) processes using proper filler metals in the 2G, 5G, and 6G positions. Upon completion, students should be able to perform shielded metal arc welding process and gas tungsten arc welding on carbon steel pipe with the prescribed filler metals in the 2G, 5G, and 6G position in accordance with the applicable code.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0173C - Specialty Pipe Welding

150 Clock Hours
(Offered as needed)

This courses covers advanced pipe welding and is designed to build advanced GTAW skills. This course covers advanced Gas Tungsten Arc Welding (GTAW) on alloy pipe and heavy wall carbon pipe.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Zoology

ZOO 1010C - Zoology

4 Credit Hours
(Offered as needed)

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Reading/English Developmental Ed.

ENC 0017 - Integrated Reading and Writing I

4 Credit Hours
(Fall, Spring, Summer)

This course is designed to develop reading comprehension and writing language skills for students whose entry level placement scores do not meet requirements for degree credit (not applicable for degree completion). The course includes a thorough review of English grammar and conventions and practice in writing paragraphs and essays while building skills in vocabulary and academic reading comprehension. Students must pass the class with a "C" or better grade.

Prerequisite(s): Appropriate score on PERT or other approved assessment.

*College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

ENC 0027 - Integrated Reading and Writing II

4 Credit Hours
(Fall, Spring, Summer)

This course is designed to develop reading comprehension and writing language skills for students whose entry level placement scores do not meet requirements for degree credit (not applicable for degree completion). The course includes a review of English grammar and convention and practice in writing persuasive essays while building skills in vocabulary and academic reading comprehension. Student must pass the class with a "C" or better grade.

Prerequisite(s): Minimum grade of "C" in ENC 0017 or appropriate PERT or other approved assessment score.

*College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

REA 0056 - Developmental Reading Module

2 College Prep Credits
(Fall, Spring, Summer)

This course is designed to increase the student's ability to comprehend college-level, written material (not applicable for degree completion). Conducted in a lab setting, this course is self-paced, designed to allow students to focus on their individual development of higher level reading skills and vocabulary needed for literal and critical interpretation of passages similar to those used in college texts. This course may be taken in place of REA 0017. Students must pass the class with a "C" or better and obtain a passing score on the end of course exam.

Prerequisite(s): Students must score 96-105 on the PERT or elective basis score 106 or higher on the PERT.

*College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

The provisions of this publication are not to be construed as a contract between the student and Northwest Florida State College. The college reserves the right to change any provision or requirement when such action becomes necessary. Official announcements are available through the Office of Academic Affairs, Student Affairs and are posted in the Student Services Center, and when possible, listed in the Schedule of Classes. Students are responsible for meeting, in full, the appropriate requirements for graduation or program completion and are advised to work closely with counselors/advisors in planning of a program of study. Students are expected to familiarize themselves with all rules and regulations of the college.

Notice of Equal Access / Equal Opportunity and Nondiscrimination

Northwest Florida State College is dedicated to the concepts of equity and equal opportunity. It is the specific intention of the college not to discriminate on the basis of age, color, ethnicity, disability, marital status, national origin, race, pregnancy, religion, genetic information, or gender, in its employment practices or in the admission and treatment of students in its programs or activities.

Title IX of the Education Amendments of 1972 (20 U.S.C. ss1681) is an all-encompassing federal law that prohibits discrimination based on the sex of students, employees, and third parties when appropriate, of educational institutions which receive federal financial assistance. Sexual harassment of students, which includes acts of sexual violence, is a form of sex discrimination prohibited by Title IX. Northwest Florida State College complies with all

aspects of this and other federal and state laws regarding non-discrimination.

Anyone with questions about compliance or a complaint regarding harassment or discrimination, including sexual harassment and sexual violence of Title IX, should contact the College's Equity Coordinator using the following contact information:

Roberta Mackey

Executive Director of Human Resources, Equity Coordinator
100 College Blvd. Niceville, FL 32578
Building: 320
Phone: (850) 729-5337

AA Major Fields of Interest

AA Major Fields of Interest categorize similar academic degrees so that students can find like career fields and university transfer programs. The AA Transfer Majors indicate the courses needed for transfer into specific university programs at the institutions listed. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

The following list indicates the AA transfer majors that can be completed taking courses at NWFSC. It is not a complete list of all university transfer majors. The Common Course Prerequisite Manual lists all university transfer programs available in the State of Florida.

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Associate in Arts Degree

The Associate in Arts degree is equivalent to the first two years of a bachelor's degree program and is offered for those students planning to transfer to a four-year institution or to remain at NWF State College to complete the last two years of a bachelor's degree program. The AA degree is awarded upon satisfactory completion of 60 credit hours of general education and college credit electives, attainment of the appropriate minimum grade point averages, and completion of all other applicable college graduation requirements, including the Speaking-Across-the-Curriculum and Technology-Across-the-Curriculum requirements. Although the number of credits and specific courses required for a bachelor's degree may vary across upper-division schools, the Florida community colleges and universities enjoy an articulation agreement, which guarantees certain transfer rights for students who complete the AA degree.

A.A. degree students should work closely with an Academic Advisor or faculty advisor to select the appropriate courses to meet their degree goals.

Graduation Requirements for the AA Degree

The A.A. degree curriculum requires the following.

- Complete a minimum of 60 college credits per the following distribution as outlined in the AA Degree General Education Requirements:
    - Complete 36 credit hours of general education courses distributed appropriately across the Communications, Humanities, Social Sciences, Mathematics, Natural Sciences, and General Education Elective categories presented in the AA Degree General Education Requirements section of the catalog for specific courses.
    - Completion of two sequential credits in high school foreign language, a minimum of 6 credit hours in one foreign language at the college level or an appropriate score on an approved CLEP examination.
    - Complete 24 credit hours of college credit electives. (Students should consult with a counselor or advisor to select the electives most appropriate to their intended baccalaureate program.)
- Meet the Gordon Rule (FAC Rule 6A-10.030) minimum grade and writing requirements:
    - Attain a grade of "C" or higher in each Gordon Rule writing course (any general education course from the Communications or Humanities categories, and those designated as Gordon Rule in the Social Science category) whether credits in such courses are earned at NWF State College or elsewhere.
    - Complete the Gordon Rule writing requirement (students who complete 6 credits each from the Communications and Humanities categories and an additional Gordon Rule Social Science course will satisfy this requirement).

    - Attain a grade of "C" or higher in each Gordon Rule Mathematics course (any course from the Mathematics category that is used to meet AA general education requirements), whether credits in such courses are earned at NWF State College or elsewhere.
- Meet the Civic Literacy Competency (FAC Rule 6A-10.02413). All first-time-in college students beginning in the 2018-19 academic year must demonstrate civic literacy competency prior to graduation either through successful completion (with a grade of "C" or higher) of POS 1041 or AMH 2020 or by achieving a passing score on an assessment.

Assessment	Standard Score
AP Government and Politics: United States	3
AP United States History	4
CLEP: American Government	50

- Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued at NWF State College.
- Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued, whether at NWF State College or by transfer.
- Complete applicable admission requirements for the program. See the Admissions section of the catalog.
- Complete at least 25% of the course work towards the program at NWFSC.
- Satisfy all outstanding obligations to the college.
- Apply to graduate by the published deadline.

Transferring to another Four-Year College or University within the State of Florida:

Faculty members, counselors and advisors will gladly assist students in achieving a smooth transfer to other institutions in Florida. Liaison representatives from the respective public institutions in the state are eager to help. Several of the liaisons make regular visits to campus and will meet directly with students to answer questions. The names of the liaisons and dates of upcoming visits are available in the Advising Center in the Student Services Center on the Niceville Campus. In addition, Common Prerequisite Manuals for the Florida State University System are available on RaiderNet or at www.flvc.org.

It is desirable that students transferring to a senior institution plan their program so that common prerequisites can be completed for the upper-division transfer school for their major. It is best for the student to complete the entire two-year degree program prior to transfer, as A.A. graduates who transfer to one of the institutions in the Florida State University System (SUS) enjoy certain protections under the statewide articulation agreement. These rights are presented in the "Student Bill of Rights".

NWF State College offers the necessary prerequisites for most of the State of Florida University Baccalaureate Programs. Students are encouraged to consult a current catalog from the upper-division school where they plan to transfer in addition to meeting with a college advisor or faculty member to acquire an official program plan of study for their intended major.

Special Foreign Language Requirements for Entry into Upper-Level Florida Universities:

Effective August 1, 1990, according to requirements of the Florida Board of Regents, new applicants to any of the state universities must have completed two sequential credits in high school foreign language, a minimum of 6 credit hours in one foreign language at the college level or an appropriate score on an approved CLEP examination. There are two exceptions to this requirement: 1) students who received an A.A. degree prior to September 1, 1989, or 2) students who enrolled in a program leading to an A.A. degree prior to August 1, 1989 and maintained continuous enrollment. Students who are not exempt but fail to satisfy the requirement, may be admitted to the university as part of the 5% admissions exceptions group but will be required to complete eight-ten credit hours in one foreign language as a graduation requirement, regardless of the requirements in the student's major. Students transferring into the Florida SUS without an A.A. degree or fewer than 60 transferable credits must meet this foreign language requirement before going on to the upper division. NWF State College offers the necessary coursework in French, Spanish, Chinese and American Sign Language (ASL) to meet the Florida SUS admission requirements.

Student Bill of Rights

Florida Community College Associate in Arts (AA) Degree graduates are guaranteed rights under the Statewide Articulation Agreement (State Board of Education Rule 6A-10.024).

AA Transfer Majors

AA Transfer Majors indicate the required courses needed to be eligible to be admitted to the university program at the institutions listed. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

The following list indicates the AA transfer majors that can be completed taking courses at NWF State College. It is not a complete list of all university transfer majors. The Common Course Prerequisite Manual lists all university transfer programs available in the State of Florida.

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWF **State College** *recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.*

Associate Degree

AA - Associate in Arts General Degree

Admission Program Objective Code AAGD
State CIP Code 1192401010

The AA is primarily intended as a transfer degree for students continuing to a 4 year bachelor's program at a university or state college. The AA Transfer Programs indicate the required courses needed to be eligible to be admitted to the university program at the institutions listed.

Associate in Arts students must complete 60 college credits to complete the degree; 36 of these credits must be general education credits distributed across five subject area categories. A student must satisfy the required number of credits in each category. The remaining 24 elective credits should be selected in consultation with an advisor, who will assist with selecting the college credits most advantageous to the student's educational goals.

General Education

In consultation with an advisor, choose appropriate General Education courses that fulfill your AA Degree Concentration for University Transfer Major. Select courses from each area as listed below; see the AA Degree General Education Requirements section of catalog for specific course listings:

- ____ ____ - Communication Skills **3 Credit Hours**
- ____ ____ - Communication Skills **3 Credit Hours**
- ____ ____ - Core Humanities **3 Credit Hours**
- ____ ____ - General or Core Humanities **3 Credit Hours**
- ____ ____ - Core Mathematics **3 Credit Hours**
- ____ ____ - General or Core Mathematics **3 Credit Hours**
- ____ ____ - Biological Sciences **3 Credit Hours****
- ____ ____ - Physical Sciences **3 Credit Hours****
- ____ ____ - Behavioral Social Sciences **3 Credit Hours*****
- ____ ____ - History/Government Social Sciences **3 Credit Hours*****
- ____ ____ - Additional General Education Credits **6 Credit Hours**

** One or both of the Biological or Physical Sciences must come from a core group. See AA Degree General Education Requirements for details.

*** One or both of the Social Sciences must come from a core group. See AA Degree General Education Requirements for details.

Total General Education Credits Required: 36

Foreign Language

A minimum of 6 credit hours must be earned in one foreign language at the college level, or successful completion of two sequential credits in high school foreign language, or an appropriate score on an approved CLEP examination.

- ___-____ - Foreign Language
- ___-____ - Foreign Language

AA Elective Requirements

In consultation with an advisor, select appropriate AA degree college credit electives that fulfull your AA Degree Concentration for University Transfer Major:

- ____ ____ - Elective **3 Credit Hours**
- ____ ____ - Elective **3 Credit Hours**
- ____ ____ - Elective **3 Credit Hours**
- ____ ____ - Elective **3 Credit Hours**
- ____ ____ - Elective **3 Credit Hours**
- ____ ____ - Elective **3 Credit Hours**
- ____ ____ - Elective **3 Credit Hours**
- ____ ____ - Elective **3 Credit Hours**

Total Elective Credits Required: 24

Total Program Credits Required: 60

Suggested Two Year Academic Plan

This program admits students in the fall/spring/summer semester(s). Below is a sample academic plan for these students admitted in the identified semester.

AA General Degree (AA) (AAGD)

First Year

Fall Semester

Core Mathematics **- 3 Credit Hours**

ENC 1101 - English Composition I **3 Credit Hours ♦ ▲ ¶**

Core Humanities **- 3 Credit Hours**

Elective **- 3 Credit Hours**

Physical Science* **- 4 Credit Hours**

History/Government Social Science** **- 3 Credit Hours** Elective or Additional General Education Hours*** **- 4 Credit Hours** Elective **- 3 Credit Hours** **Total Semester Hours: 14**
Total Program Hours: 60
* At least one Science course must come from the core. ** At least one Social Science course must come from the core. *** Students who have already satisfied the 36 hour General Education requirement may take a general Elective.

AA Degree Checklist:

- Have you completed a minimum of 60 credit hours in the following areas?
    - 36 Hours of General Education
        - 6 hours in Communications ("C" or better)
        - 6 hours in Mathematics ("C" or better)
        - 6 hours in Humanities ("C" or better)
        - 8 hours in Natural Science
        - 6 hours in Social Sciences ("C" or better in History/Government Social Science category)
        - 4 hours in Additional General Education Credits (if needed)
    - 24 hours of college credit A.A. transferable electives
- Have you completed at least 15 of the 60 credits at NWF State College?
- Have you completed the foreign language requirement?
- Have you met the minimum 2.0 GPA requirements for the A.A.?
- Have you met the Civic Literacy Competency requirement for the A.A?
- Have you applied for graduation by the advertised deadline?

AA Major Field of Interest: Arts, Humanities, Communication & Design

AA Transfer Major: Art History & Appreciation

Admission Program Objective Code: ARTA
State CIP Code: 1192401010

Offered at FIU, FSU, UF, UNF, USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 500703
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

ART 1201C - Two-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with the principles of organization and the elements of design in a two-dimensional format. This is a foundation course for all of the graphic arts: painting, printmaking, and the two-dimensional crafts. Audit enrollment In studio art classes is permitted on a space-available basis only.

or

ART 1203C - Three-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with principles of organization and the elements of design in a 3-dimensional format. Various materials, tools, and surfaces are used to explore 3-D form. This is a foundation course. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1300C - Drawing I

3 Credit Hours
(Fall, Spring)

Basic drawing course covering different drawing media, line, form, shape, value and spatial relationships. Drawing problems involving a variety of subject matter will be explored. Emphasis is on value, drawing techniques, spatial relationships between shapes and composition. Audit enrollment In studio art classes is permitted on a space-available basis only.

or

ART 1301C - Drawing II

3 Credit Hours
(Fall, Spring)

Continued study of drawing techniques explored in Drawing I. Provides experience with more complex drawing problems. Emphasis is on self-expression, value, color theory, and composition. A variety of subject matter and drawing media will be explored.

Prerequisite(s): ART 1300C. Audit enrollment in studio art classes is permitted on a space-available basis only.

ARH 2050 - Art History: Pre-Renaissance

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Transfer Major Required Courses*

ART 1201C - Two-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with the principles of organization and the elements of design in a two-dimensional format. This is a foundation course for all of the graphic arts: painting, printmaking, and the two-dimensional crafts. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1203C - Three-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with principles of organization and the elements of design in a 3-dimensional format. Various materials, tools, and surfaces are used to explore 3-D form. This is a foundation course. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1300C - Drawing I

3 Credit Hours
(Fall, Spring)

Basic drawing course covering different drawing media, line, form, shape, value and spatial relationships. Drawing problems involving a variety of subject matter will be explored. Emphasis is on value, drawing techniques, spatial relationships between shapes and composition. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1301C - Drawing II

3 Credit Hours
(Fall, Spring)

Continued study of drawing techniques explored in Drawing I. Provides experience with more complex drawing problems. Emphasis is on self-expression, value, color theory, and composition. A variety of subject matter and drawing media will be explored.

Prerequisite(s): ART 1300C. Audit enrollment in studio art classes is permitted on a space-available basis only.

or

ART 2330C - Figure Drawing I

3 Credit Hours
(Fall, Spring)

The development of technical skills and self-expression through drawing the figure; course begins with anatomy

studies, progresses to conceptualization of human form. Audit enrollment In studio art classes is permitted on a space-available basis only.

ARH 2050 - Art History: Pre-Renaissance

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

MUT 1111 - Music Theory I

3 Credit Hours
(Fall, Spring)

A study of the fundamentals of basic musicianship, music notation, simple rhythms, key signatures, intervals, major and minor scales, intervals, triads, 7th chords, polyphonic composition and elementary keyboard work. This course also introduces students to tools necessary for analyzing musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1241

MUT 1112 - Music Theory II

3 Credit Hours
(Fall, Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, species counterpoint, chord structures, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1111

Corequisite(s): MUT 1242

MUT 2116 - Music Theory III

3 Credit Hours
(Fall)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including secondary chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1112

Corequisite(s): MUT 2246

MUT 2117 - Music Theory IV

3 Credit Hours
(Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including modulation, non-tonicizing fully diminished 7th chords, augmented 6th chords, mode mixture, Neapolitan chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries while providing an introduction to Romantic period and chromatic musical structures.

Prerequisite(s): MUT 2116

MUT 1241 - Ear Training and Sight Singing I

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1111

MUT 1242 - Ear Training and Sight Singing II

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1241

Corequisite(s): MUT 1112

MUT 2246 - Ear Training and Sight Singing III

1 Credit Hour
(Fall)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1242

Corequisite(s): MUT 2116

MUT 2247 - Ear Training and Sight Singing IV

1 Credit Hour
(Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 2246

Corequisite(s): MUT 2117

- MUNXXXX - Any course with MUN prefix **4 Credit Hours**
- MV(K/S/V) XX1X (Applied Music course) **2-4 Credit Hours**

(Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including modulation, non-tonicizing fully diminished 7th chords, augmented 6th chords, mode mixture, Neapolitan chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries while providing an introduction to Romantic period and chromatic musical structures.

Prerequisite(s): MUT 2116

MUT 1241 - Ear Training and Sight Singing I

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1111

MUT 1242 - Ear Training and Sight Singing II

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic

dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1241

Corequisite(s): MUT 1112

MUT 2246 - Ear Training and Sight Singing III

1 Credit Hour
(Fall)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1242

Corequisite(s): MUT 2116

MUT 2247 - Ear Training and Sight Singing IV

1 Credit Hour
(Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 2246

Corequisite(s): MUT 2117

- MUNXXXX - Any course with MUN prefix
- MV(K/S/V) XX1X (Applied Music course)
- MV(K/S/V) XX2X (Applied Music course)
- XXXXXXX

AA Transfer Major: Music Studies (USF)

Admission Program Objective Code: MSTU
State CIP Code: 1192401010

Offered at USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 509999
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

MUT 1111 - Music Theory I

3 Credit Hours
(Fall, Spring)

A study of the fundamentals of basic musicianship, music notation, simple rhythms, key signatures, intervals, major and minor scales, intervals, triads, 7th chords, polyphonic composition and elementary keyboard work. This course also introduces students to tools necessary for analyzing musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1241

MUT 1112 - Music Theory II

3 Credit Hours
(Fall, Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, species counterpoint, chord structures, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1111

Corequisite(s): MUT 1242

MUT 2116 - Music Theory III

3 Credit Hours
(Fall)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including secondary chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1112

Corequisite(s): MUT 2246

MUT 2117 - Music Theory IV

3 Credit Hours
(Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including modulation, non-tonicizing fully diminished 7^{th} chords, augmented 6^{th} chords, mode mixture, Neapolitan chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17^{th} & 18^{th} centuries while providing an introduction to Romantic period and chromatic musical structures.

Prerequisite(s): MUT 2116

MUT 1241 - Ear Training and Sight Singing I

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1111

MUT 1242 - Ear Training and Sight Singing II

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1241

Corequisite(s): MUT 1112

MUT 2246 - Ear Training and Sight Singing III

1 Credit Hour
(Fall)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1242

Corequisite(s): MUT 2116

MUT 2247 - Ear Training and Sight Singing IV

1 Credit Hour
(Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 2246

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

POS 1041 - American Government

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of

"C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

* See Notes on Common Course Prerequisite Manual

Transfer Major Required Courses*

ART 1201C - Two-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with the principles of organization and the elements of design in a two-dimensional format. This is a foundation course for all of the graphic arts: painting, printmaking, and the two-dimensional crafts. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1203C - Three-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with principles of organization and the elements of design in a 3-dimensional format. Various materials, tools, and surfaces are used to explore 3-D form. This is a foundation course. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1300C - Drawing I

3 Credit Hours
(Fall, Spring)

Basic drawing course covering different drawing media, line, form, shape, value and spatial relationships. Drawing problems involving a variety of subject matter will be explored. Emphasis is on value, drawing techniques, spatial relationships between shapes and composition. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1301C - Drawing II

3 Credit Hours
(Fall, Spring)

Continued study of drawing techniques explored in Drawing I. Provides experience with more complex drawing problems. Emphasis is on self-expression, value, color theory, and composition. A variety of subject matter and drawing media will be explored.

Prerequisite(s): ART 1300C. Audit enrollment in studio art classes is permitted on a space-available basis only.

or

ART 2330C - Figure Drawing I

3 Credit Hours
(Fall, Spring)

The development of technical skills and self-expression through drawing the figure; course begins with anatomy studies, progresses to conceptualization of human form. Audit enrollment In studio art classes is permitted on a space-available basis only.

ARH 2050 - Art History: Pre-Renaissance

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Offered at FIU*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 500901
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

MUT 1111 - Music Theory I

3 Credit Hours
(Fall, Spring)

A study of the fundamentals of basic musicianship, music notation, simple rhythms, key signatures, intervals, major and minor scales, intervals, triads, 7th chords, polyphonic composition and elementary keyboard work. This course also introduces students to tools necessary for analyzing musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1241

MUT 1112 - Music Theory II

3 Credit Hours
(Fall, Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, species counterpoint, chord structures, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1111

Corequisite(s): MUT 1242

MUT 2116 - Music Theory III

3 Credit Hours
(Fall)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and

advanced harmonic structures including secondary chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Prerequisite(s): MUT 1112

Corequisite(s): MUT 2246

MUT 2117 - Music Theory IV

3 Credit Hours
(Spring)

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including modulation, non-tonicizing fully diminished 7th chords, augmented 6th chords, mode mixture, Neapolitan chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries while providing an introduction to Romantic period and chromatic musical structures.

Prerequisite(s): MUT 2116

MUT 1241 - Ear Training and Sight Singing I

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s): MUT 1111

MUT 1242 - Ear Training and Sight Singing II

1 Credit Hour
(Fall, Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1241

Corequisite(s): MUT 1112

MUT 2246 - Ear Training and Sight Singing III

1 Credit Hour
(Fall)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 1242

Corequisite(s): MUT 2116

MUT 2247 - Ear Training and Sight Singing IV

1 Credit Hour
(Spring)

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Prerequisite(s): MUT 2246

Corequisite(s): MUT 2117

- MUNXXXX - Any course with MUN prefix
- MV(K/S/V) XX1X (Applied Music course)
- MV(K/S/V) XX2X (Applied Music course)
- XXXXXXX
- Secondary Piano Proficiency (exam)

AA Major Field of Interest: Business

AA Transfer Major: Accounting

Admission Program Objective Code: ACCO
State CIP Code: 1192401010

Offered at FAMU, FAU, FGCU, FIU, FSU*, IRSC, UCF, UF*, UNF, USF*, USFSM*, USFSP*, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 520301
* See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

ACG 2011 - Accounting II

3 Credit Hours
(Spring)

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2071 - Managerial Accounting

3 Credit Hours
(Spring)

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Corequisite(s): ACG 2011 with instructor/department approval.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Advertising

Admission Program Objective Code: ADVE
State CIP Code: 1192401010

Offered at UCF*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 090903
* See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Agricultural (Food & Resource) Economics

Admission Program Objective Code: AGRI
State CIP Code: 1192401010

Offered at UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Major Required Courses

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

ACG 2011 - Accounting II

3 Credit Hours
(Spring)

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

BSC 1005 - General Biology

3 Credit Hours ♦
(Fall, Spring, Summer)

The principles of biology are included. Human Biology is emphasized. Man's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1005L - Biology Lab

1 Credit Hour
(Fall, Spring)

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Prereq/Corequisites: BSC 1005 or equivalent.

CHM 1032C - General Chemistry for Life Sciences

4 Credit Hours
(Fall, Spring, Summer)

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Prerequisite(s): MAT 1033A or appropriate placement test scores.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2071 - Managerial Accounting

3 Credit Hours
(Spring)

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Corequisite(s): ACG 2011 with instructor/department approval.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

Transfer Major Required Courses*

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

ACG 2011 - Accounting II

3 Credit Hours
(Spring)

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2071 - Managerial Accounting

3 Credit Hours
(Spring)

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the

economic framework of the entity.

Corequisite(s): ACG 2011 with instructor/department approval.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

AA Transfer Major: Parks & Recreation Management

Admission Program Objective Code: PRKF
State CIP Code: 1192401010

Offered at FIU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 310301, track 6/6
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

DEP 2004 - Human Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

AA Transfer Major: Parks & Recreation Management - Hospitality, Recreation & Resort Management

Admission Program Objective Code: PRKH
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 310301, track 5/6
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

HFT 1000 - Introduction to Hospitality Management

3 Credit Hours
(Fall)

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

AA Transfer Major: Parks & Recreation Management - Instruction

Admission Program Objective Code: PKRE
State CIP Code: 1192401010

Offered at FIU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 310301, track 1/6

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

DEP 2004 - Human Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Parks & Recreation Management - Recreation and Tourism

Admission Program Objective Code: PRKT
State CIP Code: 1192401010

Offered at UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 310301, track 3/6
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

SYG 2000 - Sociology

3 Credit Hours ❖ ♦
(Fall, Spring, Summer)

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

DEP 2004 - Human Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

AA Transfer Major: Parks & Recreation Management - Recreation, Tourism & Events

Admission Program Objective Code: PRKR
State CIP Code: 1192401010

Offered at FSU*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

AMH 2010 - American History I

3 Credit Hours ¶
(Fall, Spring, Summer)

American History to 1877; describes the social, political, and economic development of the American people against the geographical background of the New World. Particular emphasis on American intellectual and political thought leading to the emergence of basic American character, ideas and attitudes. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AMH 2020 - American History II

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

POS 1041 - American Government

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Restaurant and Food Service Management

Admission Program Objective Code: REST
State CIP Code: 1192401010

Offered at UCF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 520905
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

No required courses for this Transfer Major.

AA Transfer Major: Sustainability Management - BAS

Admission Program Objective Code: SUST
State CIP Code: 1192401010

Offered at SPC

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 030299
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

Students with the following Associate in Science (AS) degrees will be admitted: Environmental Science Technology, Architectural Design & Construction Technology, Drafting and Design Technology or Engineering Technology.

Students who do not have one of the AS degrees listed will be required to take 15 credits in related coursework which mirrors coursework for SPC's AS in Environmental Science Technology degree requirements.

- The courses include: ARCXXXX, CHMXXXX, ECO 2013, ECO 2023, EETXXXX, ETM 1010C, ESCXXXX, EVRXXXX, GLYXXXX, GIS 1040C, OCEXXXX, PHYXXXX

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Transportation Management

Admission Program Objective Code: TRAN
State CIP Code: 1192401010

Offered at UNF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 520209
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

ACG 2011 - Accounting II

3 Credit Hours
(Spring)

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2071 - Managerial Accounting

3 Credit Hours
(Spring)

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Corequisite(s): ACG 2011 with instructor/department approval.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1550 - Introduction to World Wide Web

3 Credit Hours
(Fall)

This course provides an introduction to the required hardware, software, procedures, uses and building web pages on the World Wide Web and the Internet.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Major Field of Interest: Education

AA Transfer Major: Agricultural Teacher Education (Vocational)

Admission Program Objective Code: AGTE
State CIP Code: 1192401010

Offered at UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131301
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

ENC 2210 - Technical Report Writing

3 Credit Hours
(Spring)

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral

reporting.

Prerequisite(s): passing score on placement test.

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of "C" or better, or equivalent; or appropriate placement score.

BSC 1005 - General Biology

3 Credit Hours ♦
(Fall, Spring, Summer)

The principles of biology are included. Human Biology is emphasized. Man's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1005L - Biology Lab

1 Credit Hour
(Fall, Spring)

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Prereq/Corequisites: BSC 1005 or equivalent.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1020 - Physical Science

3 Credit Hours ♦
(Fall, Spring, Summer)

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

AA Transfer Major: Art Teacher Education

Admission Program Objective Code: ARTT
State CIP Code: 1192401010

Offered at FIU, UCF, UF*, UNF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131302
* See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. ** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses

ART 1300C - Drawing I

3 Credit Hours
(Fall, Spring)

Basic drawing course covering different drawing media, line, form, shape, value and spatial relationships. Drawing problems involving a variety of subject matter will be explored. Emphasis is on value, drawing techniques, spatial relationships between shapes and composition. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1201C - Two-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with the principles of organization and the elements of design in a two-dimensional format. This is a foundation course for all of the graphic arts: painting, printmaking, and the two-dimensional crafts. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1301C - Drawing II

3 Credit Hours
(Fall, Spring)

Continued study of drawing techniques explored in Drawing I. Provides experience with more complex drawing problems. Emphasis is on self-expression, value, color theory, and composition. A variety of subject matter and drawing media will be explored.

Prerequisite(s): ART 1300C. Audit enrollment in studio art classes is permitted on a space-available basis only.
or

ART 2330C - Figure Drawing I

3 Credit Hours
(Fall, Spring)

The development of technical skills and self-expression through drawing the figure; course begins with anatomy studies, progresses to conceptualization of human form. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1203C - Three-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with principles of organization and the elements of design in a 3-dimensional format. Various materials, tools, and surfaces are used to explore 3-D form. This is a foundation course. Audit enrollment In studio art classes is permitted on a space-available basis only.

ARH 2050 - Art History: Pre-Renaissance

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AA Transfer Major: Business Teacher Education/Business Technology Education

Admission Program Objective Code: BTEA
State CIP Code: 1192401010

Offered at SPC

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131303
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

ACG 2011 - Accounting II

3 Credit Hours
(Spring)

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

- XXXXXXX - Elective in Business Administration*
  * See Notes on Common Course Prerequisite Manual

AA Transfer Major: Drama Education

Admission Program Objective Code: DRAM
State CIP Code: 1192401010

Offered at FAMU, USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 500501, track 1/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

AA Transfer Major: Education of Blind & Visually Handicapped

Admission Program Objective Code: EDBL
State CIP Code: 1192401010

Offered at FSU*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131009
*See note on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

ENC 1101 - English Composition I

3 Credit Hours ♦ ▲ ¶
(Fall, Spring, Summer)

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

▲ Technology-Across-the-Curriculum Course

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 1102 - English Composition II

3 Credit Hours ¶
(Fall, Spring, Summer)

Interpretative and critical reading of fiction, drama, and poetry. The student will write analytic discourse and research papers as part of the essay process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of ENC 1101 or an equivalent course with a grade of "C" or better.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

HSC 1100 - Health Education

3 Credit Hours
(Spring)

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Jr. High/Middle School Teacher Ed - Middle Grade English/Middle Grade Social Science Ed

Admission Program Objective Code: MTES
State CIP Code: 1192401010

Offered at UNF, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of "C" or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

and

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of "C" or better, or equivalent; or appropriate placement score.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

STA 2122 - Statistical Applications

4 Credit Hours
(Offered as needed)

This course is designed for students pursuing psychology, education, and some specialized degrees. The course is an introduction to understanding and applying statistical concepts. Topics include: descriptive statistics, probability distributions, one and two sample hypothesis testing, confidence interval estimation, correlation, regression, and analysis of variance. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): MAT 1033A or equivalent with a “C” or better, or appropriate placement score.

- AMLXXXX - Any course with the AML prefix
  or

This course is designed for students pursuing psychology, education, and some specialized degrees. The course is an introduction to understanding and applying statistical concepts. Topics include: descriptive statistics, probability distributions, one and two sample hypothesis testing, confidence interval estimation, correlation, regression, and analysis of variance. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): MAT 1033A or equivalent with a “C” or better, or appropriate placement score.

ESC 1000 - Earth Science

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

- GLYXXXXC - Any course with the GLY prefix that includes a lab
  or
- METXXXXC - Any course with the MET prefix that includes a lab
  or
- OCEXXXXC - Any course with the OCE prefix that includes a lab

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Jr. High/Middle School Teacher Ed - Middle Grade Math/Middle Grade Social Science Ed

Admission Program Objective Code: MTSS
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131203, track 4/7
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this

course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

and

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements

for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

STA 2122 - Statistical Applications

4 Credit Hours
(Offered as needed)

This course is designed for students pursuing psychology, education, and some specialized degrees. The course is an introduction to understanding and applying statistical concepts. Topics include: descriptive statistics, probability distributions, one and two sample hypothesis testing, confidence interval estimation, correlation, regression, and analysis of variance. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): MAT 1033A or equivalent with a “C” or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables,

partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

- A laboratory based science course for science majors* (BSC 1010C, BSC 1011C, CHM 1045C, CHM 1046C, GLY 2010C, GLY 2100C, PHY 2048C, PHY 2049C)
  * See Notes on Common Course Prerequisite Manual

course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

or

PET 2622 - Care and Prevention of Athletic Injuries

3 Credit Hours
(Offered as needed)

Designed to provide students with a basic knowledge of the care, prevention, and rehabilitation of injuries received during participation in physical education activities to include the effects and dangers of drug use including performance enhancing drugs.

- PELXXXX - 4-5 credit hours of courses with the PEL prefix
- PEMXXXX - 3 hours of courses with the PEM prefix

  * See Notes on Common Course Prerequisite Manual

AA Transfer Major: Pre-Elementary/Early Childhood Teacher Ed - Age 3 through Grade 3

Admission Program Objective Code: ECHA
State CIP Code: 1192401010

Offered at CCF, FGC, FGCU, FSCJ, FSU*, MDC, NWFSC, PSC, SCFMS, SFC, SJRSC, UCF, UNF, UWF, SPC, USF, USFSM, FIU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131210
* See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

AA Transfer Major: Science Teacher Education - Biology Teacher Ed (BC, CC, DSC, FSWSC, IRSC, NWFSC, SPC, MDC)

Admission Program Objective Code: SCIB
State CIP Code: 1192401010

Offered at BC, CC, DSC, FSWSC, IRSC, NWFSC, SPC, MDC

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131322
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically

about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

Any two of the following:

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 1054C - General Physics Without Calculus II

4 Credit Hours
(Spring)

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Science Teacher Education - Biology Teacher Education (FAMU, FAU, UCF, UNF, USF)

Admission Program Objective Code: STEB
State CIP Code: 1192401010

Offered at FAU, UCF, UNF, USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131316, track 1/5

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Science Teacher Education - Physics Teacher Education

Admission Program Objective Code: STEP
State CIP Code: 1192401010

Offered at FAU, UCF, UNF, USF

Offered at DSC, MDC - CIP code 131329

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131316, track 4/5
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus,

area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Secondary Teacher Ed - English

Admission Program Objective Code: SETE
State CIP Code: 1192401010

Offered at UCF, UNF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131205, track 1/6
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

- LITXXXX - Any course with the LIT prefix
  or
- AMLXXXX - Any course with the AML prefix

ENL 2012A - English Literature I

3 Credit Hours ¶
(Offered as needed)

A study of English literature from the Old English period, Beowulf, through the late Eighteenth century, the Age of Enlightenment, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course

may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): ENC 1101.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

or

ENL 2022 - English Literature II

3 Credit Hours ¶
(Offered as needed)

A study of English literature from the Romantics through the modern era, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is required.

Prerequisite(s): ENC 1101. (Note: ENL 2012A is not a prerequisite for this course)

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Secondary Teacher Ed - Social Science

Admission Program Objective Code: SESS
State CIP Code: 1192401010

Offered at FAMU, UCF, UNF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131205, track 2/6

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

AMH 2010 - American History I

3 Credit Hours ¶
(Fall, Spring, Summer)

American History to 1877; describes the social, political, and economic development of the American people against the geographical background of the New World. Particular emphasis on American intellectual and political thought leading to the emergence of basic American character, ideas and attitudes. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AMH 2020 - American History II

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

POS 1041 - American Government

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

Select one course from the following:

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

Select one course from the following:

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

or

PHY 1054C - General Physics Without Calculus II

4 Credit Hours
(Spring)

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 1053C or equivalent.
or

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.
* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Secondary Teacher Education - Chemistry Teacher Education (Track 5/6) (UCF)

Admission Program Objective Code: CTED
State CIP Code: 1192401010

Offered at UCF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.
* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Secondary Teacher Education - Secondary Mathematics Teacher Education (Track 3/6) (UCF)

Admission Program Objective Code: SMTE
State CIP Code: 1192401010

Offered at UCF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131205, track 3/6
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of "C" or better or equivalent.

Select one course from the following:
MAC XXXX
or MTG XXXX
or MAS XXXX

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Social Sciences Teacher Ed (History, Social Science, Economics, and Political Science)

Admission Program Objective Code: SSTE
State CIP Code: 1192401010

Offered at FAMU, FAU, FSU, UCF, USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131317
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

AMH 2010 - American History I

3 Credit Hours ¶
(Fall, Spring, Summer)

American History to 1877; describes the social, political, and economic development of the American people against the geographical background of the New World. Particular emphasis on American intellectual and political thought leading to the emergence of basic American character, ideas and attitudes. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AMH 2020 - American History II

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

POS 1041 - American Government

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

ART 1300C - Drawing I

3 Credit Hours
(Fall, Spring)

Basic drawing course covering different drawing media, line, form, shape, value and spatial relationships. Drawing problems involving a variety of subject matter will be explored. Emphasis is on value, drawing techniques, spatial relationships between shapes and composition. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1201C - Two-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with the principles of organization and the elements of design in a two-dimensional format. This is a foundation course for all of the graphic arts: painting, printmaking, and the two-dimensional crafts. Audit enrollment In studio art classes is permitted on a space-available basis only.

Select one course from the following:

ART 1301C - Drawing II

3 Credit Hours
(Fall, Spring)

Continued study of drawing techniques explored in Drawing I. Provides experience with more complex drawing problems. Emphasis is on self-expression, value, color theory, and composition. A variety of subject matter and drawing media will be explored.

Prerequisite(s): ART 1300C. Audit enrollment in studio art classes is permitted on a space-available basis only.

or

ART 2330C - Figure Drawing I

3 Credit Hours
(Fall, Spring)

The development of technical skills and self-expression through drawing the figure; course begins with anatomy studies, progresses to conceptualization of human form. Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 1203C - Three-Dimensional Design

3 Credit Hours
(Fall, Spring)

An introductory course, both theoretical and applied, dealing with principles of organization and the elements of design in a 3-dimensional format. Various materials, tools, and surfaces are used to explore 3-D form. This is a foundation course. Audit enrollment In studio art classes is permitted on a space-available basis only.

ARH 2050 - Art History: Pre-Renaissance

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

3 Credit Hours ❖ † ¶
(Fall, Spring)

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Behavioral Healthcare

Admission Program Objective Code: BEHA
State CIP Code: 1192401010

Offered at USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 440000
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

- STAXXXX - Any course with the STA prefix

SYG 2000 - Sociology

3 Credit Hours ❖ ♦
(Fall, Spring, Summer)

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

SYG 2010 - Social Problems

3 Credit Hours ❖ ¶
(Fall, Spring, Summer)

Introduction to the sociological study of the nature of social problems to insure understanding of their impact on the individual, the group and social institutions in societal and cultural settings. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Cardiopulmonary Science

Admission Program Objective Code: CARD
State CIP Code: 1192401010

Offered at FSWSC, VC*, FAMU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 510908
*See notes in Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1005 - General Biology

3 Credit Hours ♦
(Fall, Spring, Summer)

The principles of biology are included. Human Biology is emphasized. Man's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

- CGSX060 (required at FAMU only)
  * See Notes on Common Course Prerequisite Manual

AA Transfer Major: Community Health

Admission Program Objective Code: COMH
State CIP Code: 1192401010

Offered at FGCU, UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 512208
* See Notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Community Health Liaison

Admission Program Objective Code: CMHL
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 511504
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

HSC 1100 - Health Education

3 Credit Hours
(Spring)

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

SYG 2000 - Sociology

3 Credit Hours ❖ ♦
(Fall, Spring, Summer)

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

- STAXXXX - Any course with the STA prefix

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

AA Transfer Major: Dental Hygiene (BAS)

Admission Program Objective Code: DEHY
State CIP Code: 1192401010

Offered at SPC

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 510602
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

No required courses for this Transfer Major.

AA Transfer Major: Dietetics/Nutritional Services

Admission Program Objective Code: DIET
State CIP Code: 1192401010

Offered at FIU*, FSU, UNF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 513101, track 1/2
* See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

CHM 1032C - General Chemistry for Life Sciences

4 Credit Hours
(Fall, Spring, Summer)

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Prerequisite(s): MAT 1033A or appropriate placement test scores.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Dietetics/Nutritional Services - Dietetics

Admission Program Objective Code: DIEN
State CIP Code: 1192401010

Offered at UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 513101, track 2/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required.

The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Exercise Science (FAU, UNF)

Admission Program Objective Code: EXFA
State CIP Code: 1192401010

Offered at FAU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 310505, track 1/2
Common Course Prerequisite Manual

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

or

HSC 1100 - Health Education

3 Credit Hours
(Spring)

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

or

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

HSC 1400 - First Aid

3 Credit Hours
(Spring)

Preparation to meet emergencies that occur in the school, home or on the highway. Instruction and practice in dressing and bandaging, care of wounds, shock, bone and joint injuries, cardiopulmonary resuscitation, transportation of the injured oral poisoning and other medical emergencies.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Exercise Science (FGCU only)

Admission Program Objective Code: EXFG
State CIP Code: 1192401010

Offered at FGCU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Exercise Science (USF only)

Admission Program Objective Code: EXUS
State CIP Code: 1192401010

Offered at USF*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 131314, track 2/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

or

HSC 1100 - Health Education

3 Credit Hours
(Spring)

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear,

quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

or

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Health and Physical Education, General - Exercise Science

Admission Program Objective Code: HPEE
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course

Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 310501, track 3/4
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

or

HSC 1100 - Health Education

3 Credit Hours
(Spring)

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

HSC 1400 - First Aid

3 Credit Hours
(Spring)

Preparation to meet emergencies that occur in the school, home or on the highway. Instruction and practice in dressing and bandaging, care of wounds, shock, bone and joint injuries, cardiopulmonary resuscitation, transportation of the injured oral poisoning and other medical emergencies.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Health and Physical Education, General - Health, Leisure, and Fitness Studies

Admission Program Objective Code: HPEH
State CIP Code: 1192401010

Offered at FAMU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Education Required Courses

EDF 1005 - Introduction to the Teaching Profession

3 Credit Hours
(Fall, Spring)

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education, BS Middle Grades Math, or BS Middle Grades General Science). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Prerequisite(s): ENC 1101 AND (MAC 1105 or STA 2023)

** See Notes on Common Course Prerequisite Manual, link above

Transfer Major Required Courses*

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

- 4 Credit hours in Skill Development Courses in Physical Activities
  * See Notes on Common Course Prerequisite Manual

AA Transfer Major: Health Information Management

Admission Program Objective Code: HEIM
State CIP Code: 1192401010

Offered at FAMU, UCF*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 510706
*See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

ACG 2011 - Accounting II

3 Credit Hours
(Spring)

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2071 - Managerial Accounting

3 Credit Hours
(Spring)

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Corequisite(s): ACG 2011 with instructor/department approval.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

- CGSXXXX - Any course with the CGS prefix
  * See Notes on Common Course Prerequisite Manual

AA Transfer Major: Health Science (Track 5/7) (SSCF, FGCU)

Admission Program Objective Code: HESC
State CIP Code: 1192401010

Transfer Major Required Courses*

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

- STAXXXX - Any course with the STA prefix
  * See Notes on Common Course Prerequisite Manual

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of "C" or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Health Services Administration

Admission Program Objective Code: HLSR
State CIP Code: 1192401010

Offered at SFC, FAMU, FAU, FGCU, FIU, IRSC, SCFMS, UCF, UNF, USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 510701
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

ACG 2011 - Accounting II

3 Credit Hours
(Spring)

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2071 - Managerial Accounting

3 Credit Hours
(Spring)

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the

economic framework of the entity.

Corequisite(s): ACG 2011 with instructor/department approval.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Health Services Administration (BAS)

Admission Program Objective Code: HSAD
State CIP Code: 1192401010

Offered at EFSC, SPC

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 512211
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

No required courses for this Transfer Major.

AA Transfer Major: Nursing (Track 1/2)

Admission Program Objective Code: NRSN
State CIP Code: 1192401010

Offered at FAMU*, FAU*, FGCU*, FIU*, FSU*, UCF*, UF*, UNF*, USF*, UWF*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 513801, Track 1/2
* See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

- BSCXXXX - Any course with the BSC prefix
  or
- CHMXXXX - Any course with the CHM prefix
  or
- PHYXXXX - Any course with the PHY prefix

DEP 2004 - Human Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

- SYGXXXX - Any course with the SYG prefix

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

STA 2122 - Statistical Applications

4 Credit Hours
(Offered as needed)

This course is designed for students pursuing psychology, education, and some specialized degrees. The course is an introduction to understanding and applying statistical concepts. Topics include: descriptive statistics, probability distributions, one and two sample hypothesis testing, confidence interval estimation, correlation, regression, and analysis of variance. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): MAT 1033A or equivalent with a “C” or better, or appropriate placement score.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Nursing - AS to BS (NWF)

Admission Program Objective Code: NUR1
State CIP Code: 1192401010

Offered at BC, CC, CCF, DSC*, FAMU*, FAU*, FSCJ, FSWSC, GCSC, NWFSC, PBSC, PESC, PHSC, PSC, SCFMS, SFC, SFSC, IRSC, SPC, SJRSC, TCC, FGCU*, FIU*, FSU*, FGC, MDC, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 513801, track 2/2
* See notes on Common Course Prerequisite Manual

HFT 1000 - Introduction to Hospitality Management

3 Credit Hours
(Fall)

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

or

- ECOXXXX - Any course with the ECO prefix (ECO 2013 or ECO 2023)

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PET 2622 - Care and Prevention of Athletic Injuries

3 Credit Hours
(Offered as needed)

Designed to provide students with a basic knowledge of the care, prevention, and rehabilitation of injuries received during participation in physical education activities to include the effects and dangers of drug use including performance enhancing drugs.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Health Science (Track 1/7) (FAU, UF*, USF, USFSP, UWF)

Admission Program Objective Code: HSCI
State CIP Code: 1192401010

Offered at FAU, UF*, USF, USFSP, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Major Required Courses*

Select one course from the following:

BSC 1005C - General College Biology

5 Credit Hours (1 HC)
(Fall, Spring, Summer)

The principles of biology are included. Human Biology is emphasized. Man's effect on the environment is considered wherever appropriate. General biology uses experimental methodology and technique and includes a survey of bacteria, protist, fungi, plants and animals. The lab content will include a survey of organisms, dissection of plants, invertebrates and vertebrates.

(NWFSC Collegiate High School Students Only)

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

BSC 2020C - Human Structure and Function

4 Credit Hours
(Fall, Spring, Summer)

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

STA 2122 - Statistical Applications

4 Credit Hours
(Offered as needed)

This course is designed for students pursuing psychology, education, and some specialized degrees. The course is an introduction to understanding and applying statistical concepts. Topics include: descriptive statistics, probability distributions, one and two sample hypothesis testing, confidence interval estimation, correlation, regression, and analysis of variance. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): MAT 1033A or equivalent with a “C” or better, or appropriate placement score.

DEP 2004 - Human Growth and Development

3 Credit Hours
(Fall, Spring, Summer)

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

or

CLP 2140 - Abnormal Psychology

3 Credit Hours
(Fall, Spring, Summer)

A study of the different problems in psychopathology, including anxiety, depression, social deviance, psychosis, schizophrenia, mental retardation and general brain dysfunction of both children and adults, with emphasis on descriptive etiology, known causes, and treatments.

Prerequisite(s): PSY 2012.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ENC 2210 - Technical Report Writing

3 Credit Hours
(Spring)

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Prerequisite(s): passing score on placement test.
* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Health Science - Interdisciplinary Medical Science (Track 7/7) (FSU)

Admission Program Objective Code: MESI
State CIP Code: 1192401010

Offered at FSU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 510000, Track 7/7
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

Select from the following:

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and

incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

BSC 1005 - General Biology

3 Credit Hours ♦
(Fall, Spring, Summer)

The principles of biology are included. Human Biology is emphasized. Man's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of "C" or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ENC 1101 - English Composition I

3 Credit Hours ♦ ▲ ¶
(Fall, Spring, Summer)

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

▲ Technology-Across-the-Curriculum Course

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.
* See Notes on Common Course Prerequisite Manual

AA Major Field of Interest: Industry/Manufacturing & Construction

AA Transfer Major: Architecture - FAMU/NWF Pre-Articulation Agreement

Admission Program Objective Code FAMU
State CIP Code 1192401010

Articulation Agreement with the Florida A&M University (FAMU) School of Architecture:

An articulation agreement between NWF State College and Florida A&M University (FAMU) School of Architecture allows students to earn an Associate in Arts (A.A.) degree that could qualify them for entrance to the upper-division of the Bachelor of Science in Architectural Studies degree program at FAMU. It is highly recommended that, in addition to the common prerequisites listed below, students should consult the current catalog from FAMU. Some SUS programs have restricted access or are considered Limited Access programs. Students are responsible for completing the specific requirements for admissions. For more information on the FAMU A.A. to B.S. articulation, contact Mr. Ray Rickman at 729-5218 or rickmanr@nwfsc.edu.

Associate in Arts Degree/Pre-Architecture FAMU Prerequisites

Please consult the Course Description section of the catalog for the required prerequisites of all courses needed to satisfy the requirements of this program. Students must meet NWFSC A.A. degree graduation requirements.

General Education

Undesignated courses are to be selected from the General Education Requirements listed in the AA Degree General Education Requirements section of catalog for specific courses.

ENC 1101 - English Composition I

3 Credit Hours ♦ ▲ ¶
(Fall, Spring, Summer)

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

▲ Technology-Across-the-Curriculum Course

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 1102 - English Composition II

3 Credit Hours ¶
(Fall, Spring, Summer)

Interpretative and critical reading of fiction, drama, and poetry. The student will write analytic discourse and research papers as part of the essay process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general

education.

Prerequisite(s): Completion of ENC 1101 or an equivalent course with a grade of "C" or better.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2090 - Contemporary Literature

3 Credit Hours ❖ ¶
(Offered as needed)

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): ENC 1101.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 1000 - Art Appreciation

3 Credit Hours ❖ † ♦ ¶
(Fall, Spring, Summer)

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of "C" or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

GEA 1000 - World Regional Geography

3 Credit Hours ❖
(Offered as needed)

The course introduces the student to geographic regional studies. It will combine the concepts of physical geography and cultural, economic, and human geography as it applies to the differing regions of the world. It will show the relationships between the regional environment and the people who live there, between settlement patterns, economic patterns and cultural patterns within each region; and, using current events, it will show the impact of other phenomena upon those regions and their people.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and

monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1005 - General Biology

3 Credit Hours ♦
(Fall, Spring, Summer)

The principles of biology are included. Human Biology is emphasized. Man's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

OCE 1001C - Oceanography

4 Credit Hours
(Fall, Spring)

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Total General Education Credits Required: 36

Program Electives

ARC 1131 - Architectural Presentation

3 Credit Hours
(Summer)

This course introduces basic ideas and presentation techniques directed towards developing design skills, such as drawing, perspective sketching, and graphics using a variety of media to include: pencil, ink, colored pencils, markers, and model building to be used in architectural presentations. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

ARC 1301C - Design 1.1

4 Credit Hours
(Fall)

The primary foci of this course are the development of two and three-dimensional graphic skills and the ability to think spatially and to manipulate elements in space. Analysis and design exercises are located primarily in abstract two/three dimensional space and deal with topics such as figure/ground relationships, line/plane/mass, the idea of systems, networks, repetition, and the relation of part to the whole. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

ARC 1302C - Design 1.2

4 Credit Hours
(Spring)

This course continues the emphasis and topics studied in Design 1.1, with increased expectation with regard to graphic and spatial manipulation ability. Students study exemplary works of architecture and art, beginning the process of developing an understanding of the role history plays in their creative explorations. By the end of the course, site and the human being are part of the design environment. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Prerequisite(s): ARC 1301C.

ARC 2201 - Theory of Architecture

3 Credit Hours
(Fall, Spring)

An introduction to architectural theory, selected contemporary architectural theories and movements, and their evolution and historical basis. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Prerequisite(s): ETD 1102.

ARC 2303A - Design 2.1

6 Credit Hours
(Fall)

Application of two and three-dimensional design principles learned in first-year design, in preparation for whole building design in third year. Small building projects adding programmatic responsibilities to the design agenda. Emphasis on programmatic issues internal to the building such as function, circulation structure, resolution of form, space and place making. This course is designed as part of an articulation agreement with Florida A&M University;

students interested in transferring to another upper division school should consult with an advisor.

Prerequisite(s): ARC 2201.

ARC 2304 - Design 2.2

6 Credit Hours
(Spring)

Application of two and three-dimensional design principles learned in first-year design, in preparation for whole building design in third year. Small building projects adding programmatic responsibilities to the design agenda. Emphasis on programmatic issues internal to the building such as function, circulation structure, resolution of form, space and place making, and human behavior.

Prerequisite(s): ARC 2303A.

ARC 2472 - Introduction to the Technology of Architecture

4 Credit Hours
(Summer)

This course is the beginning of the technology sequence in the areas of structures, environment technology, and materials and methods of construction. It introduces themes such as the response of buildings to the natural environment, the strength, stiffness, and durability in building materials, and the quantitative method of analysis and design of building assemblies and support systems. It explores the relationship between building technology and the social, aesthetic, environmental and economic aspects of the settings in which buildings are located, and how these factors relate to the process of architectural design. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

ARC 2501 - Architectural Structures I

3 Credit Hours
(Offered as needed)

The emphasis of the course is on the development of the principles of statics and the application of these principles to the analysis and design of structural systems, primarily column, beam, slab systems, and the truss systems. The course builds on the basic ideas of structural form and material properties developed in Introduction to the Technology of Architecture.

Prerequisite(s): any college level physics or calculus course, and concurrent enrollment in ARC 2472. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

ETD 1320C - AutoCAD I

3 Credit Hours
(Fall, Spring, Summer)

A basic course on the use of AutoCAD Software to include: introduction to AutoCAD, drawing commands, display and inquiry commands, modify commands, dimensioning and annotation, data exchange and output files.

▲Technology-Across-the-Curriculum Course.

Total Program Elective Credits Required: 36

Total Articulation Program Credits Required: 72

AA Transfer Major: Construction Engineering

Admission Program Objective Code: CONS
State CIP Code: 1192401010

Offered at UCF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 140803
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric

substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Surveying

- COPXXXX - A scientific programming course designed for computer science majors* (COP 2011, COP 2222, COP 2228, COP 2362, COP 2658 , COP 2662, COP 2805, COP 2833, COP 2840)

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic

graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Aerospace Engineering

Admission Program Objective Code: AERO
State CIP Code: 1192401010

Offered at UCF, UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 140201
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Agricultural Engineering

Admission Program Objective Code: AGRE
State CIP Code: 1192401010

Offered at FAMU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 140301
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

ENC 1101 - English Composition I

3 Credit Hours ♦ ▲ ¶
(Fall, Spring, Summer)

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

▲ Technology-Across-the-Curriculum Course

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 1102 - English Composition II

3 Credit Hours ¶
(Fall, Spring, Summer)

Interpretative and critical reading of fiction, drama, and poetry. The student will write analytic discourse and research papers as part of the essay process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of ENC 1101 or an equivalent course with a grade of "C" or better.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems,

mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Agriculture Science

Admission Program Objective Code: AGRS
State CIP Code: 1192401010

Offered at UFAMU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 010000
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

SPC 1608 - Public Speaking

3 Credit Hours †
(Fall, Spring, Summer)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

SYG 2000 - Sociology

3 Credit Hours ❖ ♦
(Fall, Spring, Summer)

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Applied Physiology and Kinesiology

Admission Program Objective Code: APPK
State CIP Code: 1192401010

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Offered at FSU, UF
Transfer Program CIP code: 260908
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals

and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

HUN 2201 - Nutrition

3 Credit Hours
(Fall, Spring, Summer)

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Applied Science

Admission Program Objective Code: APPL
State CIP Code: 1192401010

Offered at FGCU, UCF, USF, USFSM

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 240102

Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of "C" or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of "C" or better or equivalent.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Biochemistry

Admission Program Objective Code: BICY
State CIP Code: 1192401010

Offered at FGCU, FSU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 260202
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure,

evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.
or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 2211C - Organic Chemistry II

4 Credit Hours
(Spring)

In continuation of CHM 2210C - Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Prerequisite(s): CHM 2210C.

or

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

or

PHY 1054C - General Physics Without Calculus II

4 Credit Hours
(Spring)

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 1053C or equivalent.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum

grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Biological & Physical Sciences - Interdisciplinary Natural Sciences

Admission Program Objective Code: BIOP
State CIP Code: 1192401010

Offered at USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 300101, track 16/16
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

No required courses for this Transfer Major.

AA Transfer Major: Biological & Physical Sciences Interdisciplinary Studies - Biology & Chemistry

Admission Program Objective Code: BICH
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 300101, track 1/16
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Program Required Courses

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

ZOO 1010C - Zoology

4 Credit Hours
(Offered as needed)

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

or

BOT 1010C - Botany

4 Credit Hours
(Spring)

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general

chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health

profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

4 Credit Hours
(Spring)

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Biological & Physical Sciences Interdisciplinary Studies - Biology & Physics

Admission Program Objective Code: BIPH
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 300101, track 5/16
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

ZOO 1010C - Zoology

4 Credit Hours
(Offered as needed)

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

or

BOT 1010C - Botany

4 Credit Hours
(Spring)

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general

chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Biological & Physical Sciences Interdisciplinary Studies - Chemistry & Computer Science

Admission Program Objective Code: CHCO
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 300101, track 6/16
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

- COPXXXX - Introductory programming in Ada, C, C++, Pascal or equivalent language* (COP 2010, COP 2030, COP 2176, COP 2220, COP 2224, COP 2360, COP 2654, COP 2660, COP 2700, COP 2702)

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic

graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

Transfer Major Required Courses

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.
or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite

sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

AA Transfer Major: Biological & Physical Sciences Interdisciplinary Studies - Computer & Earth Sciences

Admission Program Objective Code: CMEA
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 300101, track 10/16
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

ZOO 1010C - Zoology

4 Credit Hours
(Offered as needed)

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is

recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

- COPXXXX - Introductory programming in Ada, C, C++, Pascal or equivalent language* (COP 2010, COP 2030, COP 2176, COP 2220, COP 2224, COP 2360, COP 2654, COP 2660, COP 2700, COP 2702)

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Biological & Physical Sciences Interdisciplinary Studies - Computer Science & Math

Admission Program Objective Code: CMMA
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Major Required Courses*

- COPXXXX - Introductory programming in Ada, C, C++, Pascal or equivalent language* (COP 2010, COP 2030, COP 2176, COP 2220, COP 2224, COP 2360, COP 2654, COP 2660, COP 2700, COP 2702)

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables,

partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of "C" or better or equivalent.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Biology, General

Admission Program Objective Code: BIOL
State CIP Code: 1192401010

Offered at FAMU, FAU, FGCU, FIU, FSU, IRSC, MDC, SPC, UCF, UF, UNF, USF, USFSP, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 260101, track 1/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular

growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

or

ZOO 1010C - Zoology

4 Credit Hours
(Offered as needed)

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

or

BOT 1010C - Botany

4 Credit Hours
(Spring)

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

or

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Biology, General - FSU - Teach

Admission Program Objective Code: BIOF
State CIP Code: 1192401010

Offered at FSU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 260101, track 2/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.
or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

CHM 2211C - Organic Chemistry II

4 Credit Hours
(Spring)

In continuation of CHM 2210C - Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Prerequisite(s): CHM 2210C.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

or

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 140501
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

CHM 2211C - Organic Chemistry II

4 Credit Hours
(Spring)

In continuation of CHM 2210C - Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Prerequisite(s): CHM 2210C.

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Biotechnology

Admission Program Objective Code: BITC
State CIP Code: 1192401010

Offered at FGSU, SFC, UCF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 261201
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

CHM 2211C - Organic Chemistry II

4 Credit Hours
(Spring)

In continuation of CHM 2210C - Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Prerequisite(s): CHM 2210C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

or

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Botany, General

Admission Program Objective Code: BOTA
State CIP Code: 1192401010

Offered at UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 260301
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of "C" or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.
and

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of "C" or better, or equivalent; or appropriate placement score.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

AA Transfer Major: Chemical Engineering

Admission Program Objective Code: CHEN
State CIP Code: 1192401010

Offered at FIU, FAMU, FSU, USF, UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 140701
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Chemical Sciences - Chemical Sciences

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

Transfer Major Physical Sciences Required Courses*

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

CHM 2211C - Organic Chemistry II

4 Credit Hours
(Spring)

In continuation of CHM 2210C - Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Prerequisite(s): CHM 2210C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

**Required for Bachelor in Science degree.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to

have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

*** May be used for Bachelor in Arts degree only.

* See Notes on Common Course Prerequisite Manual, link above.

AA Transfer Major: Chemistry Teacher Education

Admission Program Objective Code: CHTE
State CIP Code: 1192401010

Offered at FIU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 400501, track 2/3
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of "C" or better or equivalent.

Transfer Major Physical Sciences Required Courses*

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

AA Transfer Major: Civil Engineering

Admission Program Objective Code: CIVI
State CIP Code: 1192401010

Offered at FAMU, FAU, FGCU, FSU, UCF, UNF, FIU, UF, USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 140801
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and

planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Computational Biology

Admission Program Objective Code: BICP
State CIP Code: 1192401010

Offered at FSU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 261104
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

Transfer Major Physical Sciences Required Courses

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Computer & Information Science - Information Science (UNF only)

Admission Program Objective Code: CUNF
State CIP Code: 1192401010

Offered at UNF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 110101, track 4/6
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

- COPXXXX - Introductory programming in C, C++, Java or equivalent language. * (COP 2010, COP 2030 , COP 2176, COP 2220, COP 2224, COP 2360, COP 2654, COP 2660, COP 2700, COP 2702, COP 2800)

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

or

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Computer & Information Science - Information Technology

Admission Program Objective Code: CIIT
State CIP Code: 1192401010

Offered at UNF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 110101, track 5/6

Transfer Major Required Courses*

- COPXXXX - High level programming language course*

ACG 2001 - Accounting I

3 Credit Hours
(Fall)

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Prerequisite(s): MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

▲Technology-Across-the-Curriculum Course.

or

ACG 2021 - Financial Accounting

3 Credit Hours
(Summer)

This course is an introduction to financial accounting that specializes in the processes and principles used to prepare financial statements. This course will focus on the purpose and content of the four basic financial statements including the preparation of these statements as well as interpreting information for decision-making.

Prerequisite(s): MAC 1105 - College Algebra **3 Credit Hours ♦**, equivalent, or higher

ACG 2071 - Managerial Accounting

3 Credit Hours
(Spring)

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Corequisite(s): ACG 2011 with instructor/department approval.

CGS 1100 - Microcomputer Applications

3 Credit Hours ▲
(Fall, Spring)

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Prerequisite(s): none

▲ Courses listed with this symbol address NWFSC's **Technology-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic technology use.

or

CGS 1570 - Computer Applications for Business

3 Credit Hours
(Fall, Spring)

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

STA 2122 - Statistical Applications

4 Credit Hours
(Offered as needed)

This course is designed for students pursuing psychology, education, and some specialized degrees. The course is an introduction to understanding and applying statistical concepts. Topics include: descriptive statistics, probability distributions, one and two sample hypothesis testing, confidence interval estimation, correlation, regression, and analysis of variance. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): MAT 1033A or equivalent with a “C” or better, or appropriate placement score.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Computer Criminology

Admission Program Objective Code: CMCR
State CIP Code: 1192401010

Offered at FSU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 430116
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

- COP2XXX - Any computer programming course*

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

AA Transfer Major: Computer Engineering - Computer & Information Engineering

Admission Program Objective Code: CMPE
State CIP Code: 1192401010

Offered at FAMU, FAU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 140901, track 2/3
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

- COPXXXX - Introductory programming in Ada, C, C++, Pascal or equivalent language* (COP 2010, COP 2030, COP 2176, COP 2220, COP 2224, COP 2360, COP 2654, COP 2660, COP 2700, COP 2702)
  * See Notes on Common Course Prerequisite Manual

AA Transfer Major: Computer Engineering - Computer Engineering

Admission Program Objective Code: CMEN
State CIP Code: 1192401010

Offered at FAMU, UF, FAU, FIU, FSU, UCF, USF*, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 140901, track 1/3
*See notes in Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Electrical, Electronics Engineering

Admission Program Objective Code: ELEL
State CIP Code: 1192401010

Offered at UF, FAMU, FAU, FSU, UCF, UNF, USF, FIU, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 141001, track 1/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Electronic Engineering Technology - Electrical & Computer Engineering Technology

Admission Program Objective Code: ELEC
State CIP Code: 1192401010

Offered at FAMU, VC, MDC

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

AA Transfer Major: Energy Technology Management (BAS)

Admission Program Objective Code: ENRG
State CIP Code: 1192401010

Offered at SCFMS

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 150503
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Engineering Technology

Admission Program Objective Code: ENGN
State CIP Code: 1192401010

Offered at DSC

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 159999
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

COP 2220 - Programming in C

3 Credit Hours
(Spring)

An introduction to C programming language using microcomputers.

Prerequisite(s): COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

▲Technology-Across-the-Curriculum Course.

AA Transfer Major: Entomology

Admission Program Objective Code: ENTM
State CIP Code: 1192401010

Offered at UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 260702
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

or

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Environmental Health Engineering

Admission Program Objective Code: ENVR
State CIP Code: 1192401010

Offered at FIU, FGCU, UCF, UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 141401
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Environmental Science

Admission Program Objective Code: ENVS
State CIP Code: 1192401010

Offered at FSU (BA only), UF, USF, USFSP, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 030104, track 1/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

BOT 1010C - Botany

4 Credit Hours
(Spring)

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med,

and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.
or

ZOO 1010C - Zoology

4 Credit Hours
(Offered as needed)

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1020 - Physical Science

3 Credit Hours ♦
(Fall, Spring, Summer)

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

or

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

or

MAC 1105 - College Algebra

3 Credit Hours ♦
(Fall, Spring, Summer)

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

POS 1041 - American Government

3 Credit Hours ♦ ¶
(Fall, Spring, Summer)

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

GLY 2010C - Principles of Geology I

4 Credit Hours
(Fall, Spring)

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth's interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Environmental Science - Geography/Environmental Management

Admission Program Objective Code: ENVG
State CIP Code: 1192401010

Offered at UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 130104, track 2/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1005 - General Biology

3 Credit Hours ♦
(Fall, Spring, Summer)

The principles of biology are included. Human Biology is emphasized. Man's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1005L - Biology Lab

1 Credit Hour
(Fall, Spring)

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Prereq/Corequisites: BSC 1005 or equivalent.

BOT 1010C - Botany

4 Credit Hours
(Spring)

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

GLY 2010C - Principles of Geology I

4 Credit Hours
(Fall, Spring)

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth's interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Food Science & Technology - Dietetics

Admission Program Objective Code: FSTD
State CIP Code: 1192401010

Offered at UF*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 011001, track 2/2
* See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of "C" or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of "C" or better, or equivalent; or appropriate placement score.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Food Science & Technology - Food Science

Admission Program Objective Code: FOOD
State CIP Code: 1192401010

Offered at UF*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 011001, track 1/2

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry,

coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

CHM 2211C - Organic Chemistry II

4 Credit Hours
(Spring)

In continuation of CHM 2210C - Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Prerequisite(s): CHM 2210C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is

recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

AA Transfer Major: Forest Resources & Conservation - Wildlife Ecology & Conservation

Admission Program Objective Code: FORW
State CIP Code: 1192401010

Offered at UF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 030501, track 1/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals

and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Geology

Admission Program Objective Code: GEOT
State CIP Code: 1192401010

Offered at FAU, FIU, FSU, UF, USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 400601, track 1/2
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general

chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

GLY 2010C - Principles of Geology I

4 Credit Hours
(Fall, Spring)

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

PHY 1053C - General Physics Without Calculus I

4 Credit Hours ♦
(Fall)

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Prerequisite(s): MAC 1114 or equivalent

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

GLY 2100C - Principles of Geology II

4 Credit Hours
(Fall, Spring)

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Geology - Earth Science Teacher Education

Admission Program Objective Code: GEEA
State CIP Code: 1192401010

Offered at FIU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used

to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body

dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Geoscience - FSU Teach

Admission Program Objective Code: GEOS
State CIP Code: 1192401010

Offered at FSU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Industrial/Manufacturing Engineering

Admission Program Objective Code: INDS
State CIP Code: 1192401010

Offered at FAMU, FSU, UCF, USF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 143501
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Information Sciences and Studies - Computer Information Systems EN EIF

Admission Program Objective Code: INSC
State CIP Code: 1192401010

Offered at EFSC

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 110401
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

- COPXXXX - Introductory programming in C, C++, Java or equivalent language. * (COP 2010, COP 2030 , COP 2176, COP 2220, COP 2224, COP 2360, COP 2654, COP 2660, COP 2700, COP 2702, COP 2800)

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See notes on Common Course Prerequisite Manual

AA Transfer Major: Information Technology (BC, FAMU, FIU, FSU, USF, UWF)

Admission Program Objective Code: INTB
State CIP Code: 1192401010

Offered at BC, FAMU, FIU, FSU, USF, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 110103, track 2/4
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

PSY 2012 - Psychology

3 Credit Hours ♦
(Fall, Spring, Summer)

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

STA 2122 - Statistical Applications

4 Credit Hours
(Offered as needed)

This course is designed for students pursuing psychology, education, and some specialized degrees. The course is an introduction to understanding and applying statistical concepts. Topics include: descriptive statistics, probability distributions, one and two sample hypothesis testing, confidence interval estimation, correlation, regression, and analysis of variance. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): MAT 1033A or equivalent with a “C” or better, or appropriate placement score.

PHI 2600 - Introduction to Ethics

3 Credit Hours ❖ † ¶
(Fall, Spring, Summer)

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

❖ Courses listed with this symbol have an **international and/or diversity focus** and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's **Speaking-Across-the Curriculum** student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet **writing requirements** outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

- CGSXXXX - Any database course* (CGS 2541 ,CGS 2544)*
- COPXXXX - Any computer programming course*
- COPXXXX - COPXXXX - Any object-oriented computer programming course* (COP 2224, COP 2228, COP 2360, COP 2362, COP 2654, COP 2658, COP 2660, COP 2662, COP 2800, COP 2805, COP 2833)
- MACXXXX Pre-Calculus course or Discrete Math
  * See Notes on Common Course Prerequisite Manual

AA Transfer Major: Information Technology (UCF, USFSM, DSC)

Admission Program Objective Code: INTA
State CIP Code: 1192401010

Offered at UCF, USF, USFSM, DSC

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 110103, track 1/4
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

- PSYXXXX - Any course with the PSY prefix

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2013 - Economics I

3 Credit Hours ♦
(Fall, Spring)

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAD 2104 - Introduction to Discrete Mathematics

3 Credit Hours
(Fall)

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): a grade of "C" or better in MAC 1140. A course in programming is recommended.

- CGSXXXX - Any database course* (CGS 2541 ,CGS 2544)
- COP2XXX - Any computer programming course*
- PHYXXXX - Any course with the PHY prefix
- COPXXXX - Any object-oriented computer programming course* (COP 2224, COP 2228, COP 2360, COP 2362, COP 2654, COP 2658, COP 2660, COP 2662, COP 2800, COP 2805, COP 2833)
  * See Notes on Common Course Prerequisite Manual

AA Transfer Major: Interdisciplinary Studies

Admission Program Objective Code: INTE
State CIP Code: 1192401010

Offered at UF*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 309999
*See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

MAC 1114 - Trigonometry

3 Credit Hours
(Fall, Spring, Summer)

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1140 with a grade of "C" or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

3 Credit Hours
(Fall, Spring, Summer)

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 1105 with a grade of "C" or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

or

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate

placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 1020 - Physical Science

3 Credit Hours ♦
(Fall, Spring, Summer)

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

ECO 2023 - Economics II

3 Credit Hours
(Spring)

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Prerequisite(s): ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Marine/Aquatic Biology

Admission Program Objective Code: MARI
State CIP Code: 1192401010

Offered at FIU, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 261302
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1011C - Principles of Biology II

4 Credit Hours
(Fall, Spring)

This course is a continuation of BSC 1010C. It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): BSC 1010C.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

or

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

or

MAC 2233 - Business Calculus

3 Credit Hours
(Fall, Spring, Summer)

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business

applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

or

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Mathematics General - Mathematics General

Admission Program Objective Code: MATH
State CIP Code: 1192401010

Offered at FAMU, FAU, FGCU, FIU, FSU, UCF, UF, UNF, USF, UWF

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 270101, track 1/4
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

- COPXXXX - A scientific programming course designed for computer science majors* (Please check with your transfer institution for the appropriate course)

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

- A laboratory based science course for science majors* (BSC 1010C, BSC 1011C, CHM 1045C, CHM 1046C, GLY 2010C, GLY 2100C, PHY 2048C, PHY 2049C)
  * See Notes on Common Course Prerequisite Manual

AA Transfer Major: Mathematics, General - FSU - Teach

Admission Program Objective Code: MFSU
State CIP Code: 1192401010

Offered at FSU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 270101, track 3/4
Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

- COPXXXX - A scientific programming course designed for computer science majors* (COP 2011, COP 2222, COP 2228, COP 2362, COP 2658 , COP 2662, COP 2805, COP 2833, COP 2840)

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Transfer Major Required Courses

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

4 Credit Hours
(Fall, Spring, Summer)

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2312 with a grade of “C” or better or equivalent.

MAP 2302 - Differential Equations

3 Credit Hours
(Fall, Spring)

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313. Equivalent courses from other institutions may be used to meet the prerequisite.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AA Transfer Major: Medical Technology/Clinical Laboratory Sciences

Admission Program Objective Code: MEDC
State CIP Code: 1192401010

Offered at USF, SFC, FGCU, UCF*, UWF*

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 511005
* See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

BSC 1010C - Principles of Biology I

4 Credit Hours ♦
(Fall, Spring)

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Prerequisite(s): high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1085C - Anatomy and Physiology I

4 Credit Hours ♦
(Fall, Spring, Summer)

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

BSC 1086C - Anatomy and Physiology II

4 Credit Hours
(Fall, Spring, Summer)

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Prerequisite(s): MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

CHM 1046C - College Chemistry II

4 Credit Hours
(Fall, Spring, Summer)

Continuation of CHM 1045C. Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Prerequisite(s): CHM 1045C.

CHM 2210C - Organic Chemistry I

4 Credit Hours
(Fall)

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Prerequisite(s): CHM 1046C.

CHM 2211C - Organic Chemistry II

4 Credit Hours
(Spring)

In continuation of CHM 2210C - Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Prerequisite(s): CHM 2210C.

MCB 2010C - Microbiology, Allied Health

4 Credit Hours
(Fall, Spring, Summer)

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Prerequisite(s): CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C.

STA 2023 - Statistics

3 Credit Hours ♦
(Fall, Spring, Summer)

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

* See Notes on Common Course Prerequisite Manual

AA Transfer Major: Meteorology - Meteorology

Admission Program Objective Code: METE
State CIP Code: 1192401010

Offered at FSU

Individual course requirements at specific institutions may sometimes differ from the published Common Course Prerequisite Manual. NWFSC recommends students see an academic advisor as well as contact their transfer institution to confirm program requirements.

Transfer Program CIP code: 400401, track 1/2
* See notes on Common Course Prerequisite Manual

The following courses are required for admission into the University Transfer Program. Please see the AA - Associate in Arts General Degree as well as the AA Degree General Education Requirements pages for complete AA degree requirements.

Transfer Major Required Courses*

MAC 2311 - Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of

differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

MAC 2312 - Calculus II

4 Credit Hours
(Fall, Spring, Summer)

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Prerequisite(s): completion of MAC 2311 with a grade of “C” or better or equivalent.

PHY 2048C - General Physics With Calculus I

4 Credit Hours ♦
(Fall, Spring, Summer)

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Prereq/Corequisites: MAC 2311.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state **Core General Education** requirements.

PHY 2049C - General Physics with Calculus II

4 Credit Hours
(Spring, Summer)

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Prerequisite(s): PHY 2048C

Prereq/Corequisites: MAC 2312 or equivalent

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

CHM 1045C - College Chemistry I

4 Credit Hours ♦
(Fall, Spring, Summer)
