¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2012A - English Literature: Old English through the Enlightenment

A study of English literature from the Old English period, Beowulf, through the late Eighteenth century, the Age of Enlightenment, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required

if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2022 - English Literature: Romantic Period Through the Present

A study of English literature from the Romantic period through the present, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: ENL 2012A is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2250 - Humanities – A Contemporary Perspective

This course is an integrated study of the artistic, cultural, philosophic, religious, social, and technological influences that shape modern western cultures in the modern era. The focus will begin with the 20th century and follow, chronologically, the issues of the modern era. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2700 - Humanities – Foreign Study

A variable humanities content course designed to allow students first-hand learning experiences outside the United States. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2090 - Contemporary Literature

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2100 - World Literature: Antiquity through the Renaissance

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from antiquity through the Renaissance, that reflect cultural and intellectual heritage. May be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet the Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2120 - World Literature: Renaissance through the Present

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from the Renaissance to the present, that reflect cultural and intellectual heritage. May be used as a humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered, Fall, Spring, Summer) Prerequisite(s):

ENC 1101 . (Note: LIT 2100 is not a prerequisite for this course)

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2600 - Introduction to Ethics

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

REL 2300 - Introduction to World Religions

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their

historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

† Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements

Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

ENC 1101

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Core Humanities

ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from

placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

REL 2300 - Introduction to World Religions

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

† Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements

Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

ENC 1101

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Core Humanities

ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUL 1010 - Music Appreciation

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2010 - Introduction to Philosophy

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2000 - Theatre Appreciation

♦ Core General Education † Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements
An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the-Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

General Humanities

AML 2010 - American Literature: 1492 - 1865

A course in American Literature from the pre-Colonial period to the Civil War. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):
ENC 1101 .

Note:
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

† Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements
Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):
ENC 1101

Note:
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Additional General Education Credits: 6

ASL 1140 - American Sign Language I
Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

BSC 1005L - Biology Lab
Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:
BSC 1005 or equivalent.

CGS 1100 - Microcomputer Applications
This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
none

CHI 1120 - Mandarin Chinese I
This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ENG 1001 - Research Papers
A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program.

Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking (students transferring to FSU are advised to take SPC 1608)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPN 1120 - Spanish I

___ ____ - Any A.A. General Education Communications, Mathematics, Humanities, Natural Science, or Social Science course

♦ Core General Education

† Speaking-Across-the Curriculum

International and/or diversity focus

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

SLS 2505 - Critical Thinking

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Social Sciences: 6

Behavioral Social Sciences

ANT 2000 - Introduction to Anthropology

Introduction to the fundamental principles, concepts, methods and theories in Anthropology. Includes a brief introduction to the subdisciplines of anthropology: cultural anthropology, biological anthropology, archaeology, and linguistics. A cross-cultural perspective will be paramount in the study of anthropology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Offered as needed) Prereq/Corequisites:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ANT 2100 - Introduction to Archaeology

Introduction to the fundamental principles, methods, and theories in archaeology. Includes a history of the development of archaeology, and examination of the nature of archaeological data and research, an introduction to archaeological data and analysis, and an examination of approaches to synthesis and interpretation. North and South American archeology is studied, but non-western examples are also studied to enhance an understanding of the development of the discipline in Europe and the Americas.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

DEP 2004 - Human Growth and Development

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ECO 2013 - Economics I

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GEA 1000 - World Regional Geography

The course introduces the student to geographic regional studies. It will combine the concepts of physical geography and cultural, economic, and human geography as it applies to the differing regions of the world. It will show the relationships between the regional environment and the people who live there, between settlement patterns, economic patterns and cultural patterns within each region; and, using current events, it will show the impact of other phenomena upon those regions and their people.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

PSY 2012 - Psychology

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

SYG 2000 - Sociology

♦ Core General Education International and/or diversity focus

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

History/Government Social Sciences

AMH 2010 - American History I

American History to 1877; describes the social, political, and economic development of the American people against the geographical background of the New World. Particular emphasis on American intellectual and political thought leading to the emergence of basic American character, ideas and attitudes. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AMH 2020 - American History II

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.
Ω Courses listed with this symbol have a Civic Literacy Competency.

POS 1041 - American Government

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Core Mathematics

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and

consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are

required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

Natural Sciences: 6

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):
MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the

damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science

majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A.

requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons

orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction

to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Additional General Education Credits: 6

ASL 1140 - American Sign Language I

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

BSC 1005L - Biology Lab

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:

BSC 1005 or equivalent.

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CHI 1120 - Mandarin Chinese I

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ENG 1001 - Research Papers

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:

This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening,

speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking (students transferring to FSU are advised to take SPC 1608)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPN 1120 - Spanish I

___ ____ - Any A.A. General Education Communications, Mathematics, Humanities, Natural Science, or Social Science course

♦ Core General Education

† Speaking-Across-the Curriculum

International and/or diversity focus

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

SLS 2505 - Critical Thinking

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Mathematics: 6

Core Mathematics

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt

from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
completion of MAC 1105 or equivalent with a “C” or better.

General Mathematics

MAC 1114 - Trigonometry
This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra
This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus
This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II
This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III
This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics
This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations
This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra
This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry
This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
completion of MAC 1105 or equivalent with a “C” or better.

Natural Sciences: 6

Biological Sciences

BOT 1010C - Botany
This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology
The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I
A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):
high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education
An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases,

stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the

damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science

majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):
MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves.

Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases,

stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the

damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science

majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Communications: 6

ENC 1101 - English Composition I

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 1102 - English Composition II

♦ Core General Education ¶ Writing requirements

Interpretative and critical reading of fiction, drama, and poetry. The student will write analytic discourse and research papers as part of the essay process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of ENC 1101 or an equivalent course with a grade of "C" or better.

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Mathematics: 6

Core Mathematics

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR

(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

Social Sciences: 6

Behavioral Social Sciences

ANT 2000 - Introduction to Anthropology

Introduction to the fundamental principles, concepts, methods and theories in Anthropology. Includes a brief introduction to the subdisciplines of anthropology: cultural anthropology, biological anthropology, archaeology, and linguistics. A cross-cultural perspective will be paramount in the study of anthropology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Offered as needed) Prereq/Corequisites:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ANT 2100 - Introduction to Archaeology

Introduction to the fundamental principles, methods, and theories in archaeology. Includes a history of the development of archaeology, and examination of the nature of archaeological data and research, an introduction to archaeological data and analysis, and an examination of approaches to synthesis and interpretation. North and South American archeology is studied, but non-western examples are also studied to enhance an understanding of the development of the discipline in Europe and the Americas.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

DEP 2004 - Human Growth and Development

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ECO 2013 - Economics I

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GEA 1000 - World Regional Geography

The course introduces the student to geographic regional studies. It will combine the concepts of physical geography and cultural,

economic, and human geography as it applies to the differing regions of the world. It will show the relationships between the regional environment and the people who live there, between settlement patterns, economic patterns and cultural patterns within each region; and, using current events, it will show the impact of other phenomena upon those regions and their people.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

PSY 2012 - Psychology

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

SYG 2000 - Sociology

♦ Core General Education International and/or diversity focus

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

History/Government Social Sciences

AMH 2010 - American History I

American History to 1877; describes the social, political, and economic development of the American people against the geographical background of the New World. Particular emphasis on American intellectual and political thought leading to the emergence of basic American character, ideas and attitudes. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AMH 2020 - American History II

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as

meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.
Ω Courses listed with this symbol have a Civic Literacy Competency.

POS 1041 - American Government

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.
Ω Courses listed with this symbol have a Civic Literacy Competency.

SYG 2010 - Social Problems

Introduction to the sociological study of the nature of social problems to insure understanding of their impact on the individual, the group and social institutions in societal and cultural settings. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

WOH 1012 - World Civilization: Early Humans through Global Expansion

A study of world history from 4000 BC to 1650 AD as it relates to the development of western civilization. History is analyzed in terms of social, religious, philosophical, political, and economic concepts rather than chronological facts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communication/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

WOH 1022 - World Civilization: The Modern Period and Renaissance to the Present

♦ Core General Education
International and/or diversity focus
¶ Writing requirements

Ω Civic Literacy Compentency
A study of history from 1650 AD to the present as it relates to the development of the modern world. History is analyzed in terms of social, religious, philosophical, political, and economic concepts rather than chronological facts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

Mathematics: 6

Core Mathematics

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and

ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling

distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

Humanities: 6

Core Humanities

ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUL 1010 - Music Appreciation

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2010 - Introduction to Philosophy

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2000 - Theatre Appreciation

♦ Core General Education † Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements
An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the-Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

General Humanities

AML 2010 - American Literature: 1492 - 1865

A course in American Literature from the pre-Colonial period to the Civil War. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AML 2020 - American Literature: 1865 - Present

A course in American Literature from Civil War to present. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: AML 2010 is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2050 - Art History: Pre-Renaissance

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2060 - Architecture History

Survey of significant contributions in architecture from prehistoric to modern times. Architecture will be considered in terms of

stylistic qualities, structural type, and intended usage. Topics will be addressed according to historical content, societal background, and geographical location. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2402 - Art History: Modern Art

Surveys and analyzes the major artistic periods and movements from 18th century Neo-Classicism to present. Required for all Art majors. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2012A - English Literature: Old English through the Enlightenment

A study of English literature from the Old English period, Beowulf, through the late Eighteenth century, the Age of Enlightenment, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2022 - English Literature: Romantic Period Through the Present

A study of English literature from the Romantic period through the present, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: ENL 2012A is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2250 - Humanities – A Contemporary Perspective

This course is an integrated study of the artistic, cultural, philosophic, religious, social, and technological influences that shape modern western cultures in the modern era. The focus will begin with the 20th century and follow, chronologically, the issues of the modern era. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2700 - Humanities – Foreign Study

A variable humanities content course designed to allow students first-hand learning experiences outside the United States. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2090 - Contemporary Literature

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2100 - World Literature: Antiquity through the Renaissance

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from antiquity through the Renaissance, that reflect cultural and intellectual heritage. May be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet the Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2120 - World Literature: Renaissance through the Present

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from the Renaissance to the present, that reflect cultural and intellectual heritage. May be used as a humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered, Fall, Spring, Summer) Prerequisite(s):

ENC 1101 . (Note: LIT 2100 is not a prerequisite for this course)

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2600 - Introduction to Ethics

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

REL 2300 - Introduction to World Religions

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful

completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

† Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements
Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

ENC 1101

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2060 - Architecture History

Survey of significant contributions in architecture from prehistoric to modern times. Architecture will be considered in terms of stylistic qualities, structural type, and intended usage. Topics will be addressed according to historical content, societal background, and geographical location. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2402 - Art History: Modern Art

Surveys and analyzes the major artistic periods and movements from 18th century Neo-Classicism to present. Required for all Art majors. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2012A - English Literature: Old English through the Enlightenment

A study of English literature from the Old English period, Beowulf, through the late Eighteenth century, the Age of Enlightenment, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a

Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2022 - English Literature: Romantic Period Through the Present

A study of English literature from the Romantic period through the present, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: ENL 2012A is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2250 - Humanities – A Contemporary Perspective

This course is an integrated study of the artistic, cultural, philosophic, religious, social, and technological influences that shape modern western cultures in the modern era. The focus will begin with the 20th century and follow, chronologically, the issues of the modern era. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2700 - Humanities – Foreign Study

A variable humanities content course designed to allow students first-hand learning experiences outside the United States. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2090 - Contemporary Literature

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2100 - World Literature: Antiquity through the Renaissance

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from antiquity through the Renaissance, that reflect cultural and intellectual heritage. May be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet the Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2022 - English Literature: Romantic Period Through the Present

A study of English literature from the Romantic period through the present, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: ENL 2012A is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2250 - Humanities – A Contemporary Perspective

This course is an integrated study of the artistic, cultural, philosophic, religious, social, and technological influences that shape modern western cultures in the modern era. The focus will begin with the 20th century and follow, chronologically, the issues of the modern era. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2700 - Humanities – Foreign Study

A variable humanities content course designed to allow students first-hand learning experiences outside the United States. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2090 - Contemporary Literature

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2100 - World Literature: Antiquity through the Renaissance

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from antiquity through the Renaissance, that reflect cultural and intellectual heritage. May be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet the Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2120 - World Literature: Renaissance through the Present

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from the Renaissance to the present, that reflect cultural and intellectual heritage. May be used as a humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered, Fall, Spring, Summer) Prerequisite(s):

ENC 1101 . (Note: LIT 2100 is not a prerequisite for this course)

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C"

when used for General Education credit.

PHI 2600 - Introduction to Ethics

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

REL 2300 - Introduction to World Religions

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

† Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements

Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

ENC 1101

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Core Humanities

ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUL 1010 - Music Appreciation

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for

general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2010 - Introduction to Philosophy

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2000 - Theatre Appreciation

♦ Core General Education † Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements
An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the-Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

General Humanities

AML 2010 - American Literature: 1492 - 1865

A course in American Literature from the pre-Colonial period to the Civil War. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AML 2020 - American Literature: 1865 - Present

A course in American Literature from Civil War to present. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: AML 2010 is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2050 - Art History: Pre-Renaissance

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

REL 2300 - Introduction to World Religions

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule

requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

† Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements
Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

ENC 1101

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

General Humanities

AML 2010 - American Literature: 1492 - 1865

A course in American Literature from the pre-Colonial period to the Civil War. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AML 2020 - American Literature: 1865 - Present

A course in American Literature from Civil War to present. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: AML 2010 is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2050 - Art History: Pre-Renaissance

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2060 - Architecture History

Survey of significant contributions in architecture from prehistoric to modern times. Architecture will be considered in terms of stylistic qualities, structural type, and intended usage. Topics will be addressed according to historical content, societal background, and geographical location. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2402 - Art History: Modern Art

Surveys and analyzes the major artistic periods and movements from 18th century Neo-Classicism to present. Required for all Art majors. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common

prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2012A - English Literature: Old English through the Enlightenment

A study of English literature from the Old English period, Beowulf, through the late Eighteenth century, the Age of Enlightenment, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2022 - English Literature: Romantic Period Through the Present

A study of English literature from the Romantic period through the present, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: ENL 2012A is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2250 - Humanities – A Contemporary Perspective

This course is an integrated study of the artistic, cultural, philosophic, religious, social, and technological influences that shape modern western cultures in the modern era. The focus will begin with the 20th century and follow, chronologically, the issues of the modern era. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2700 - Humanities – Foreign Study

A variable humanities content course designed to allow students first-hand learning experiences outside the United States. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2090 - Contemporary Literature

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2100 - World Literature: Antiquity through the Renaissance

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from antiquity through the Renaissance, that reflect cultural and intellectual heritage. May be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet the Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2120 - World Literature: Renaissance through the Present

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from the Renaissance to the present, that reflect cultural and intellectual heritage. May be used as a humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered, Fall, Spring, Summer) Prerequisite(s):

ENC 1101 . (Note: LIT 2100 is not a prerequisite for this course)

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2600 - Introduction to Ethics

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

REL 2300 - Introduction to World Religions

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

† Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements

Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive

investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

ENC 1101

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Core Humanities

ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUL 1010 - Music Appreciation

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2010 - Introduction to Philosophy

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2000 - Theatre Appreciation

♦ Core General Education † Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements
An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the-Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

General Humanities

AML 2010 - American Literature: 1492 - 1865

A course in American Literature from the pre-Colonial period to the Civil War. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AML 2020 - American Literature: 1865 - Present

A course in American Literature from Civil War to present. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: AML 2010 is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2050 - Art History: Pre-Renaissance

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2090 - Contemporary Literature

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2100 - World Literature: Antiquity through the Renaissance

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from antiquity through the Renaissance, that reflect cultural and intellectual heritage. May be used as a Humanities credit. This is a Gordon Rule writing course and is part of the

college's Writing-Across-the-Curriculum program. If used to meet the Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s): ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2120 - World Literature: Renaissance through the Present

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from the Renaissance to the present, that reflect cultural and intellectual heritage. May be used as a humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered, Fall, Spring, Summer) Prerequisite(s): ENC 1101 . (Note: LIT 2100 is not a prerequisite for this course)

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2600 - Introduction to Ethics

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

REL 2300 - Introduction to World Religions

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s): a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C"

when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

† Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements
Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

ENC 1101

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Additional General Education Credits: 6

ASL 1140 - American Sign Language I

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

BSC 1005L - Biology Lab

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:

BSC 1005 or equivalent.

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CHI 1120 - Mandarin Chinese I

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced

development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ENG 1001 - Research Papers

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:

This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking (students transferring to FSU are advised to take SPC 1608)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPN 1120 - Spanish I

___ ____ - Any A.A. General Education Communications, Mathematics, Humanities, Natural Science, or Social Science course

♦ Core General Education

† Speaking-Across-the Curriculum

International and/or diversity focus

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

SLS 2505 - Critical Thinking

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Communications: 6

ENC 1101 - English Composition I

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 1102 - English Composition II

♦ Core General Education ¶ Writing requirements

Interpretative and critical reading of fiction, drama, and poetry. The student will write analytic discourse and research papers as part of the essay process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of ENC 1101 or an equivalent course with a grade of "C" or better.

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Mathematics: 6

Core Mathematics

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics

course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is

some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

Natural Sciences: 6

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):
MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):
PHY 2048C

Prereq/Corequisites:
MAC 2312 or equivalent

Note:
In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):
high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II
A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function
A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education
An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Physical Sciences

AST 1002 - Descriptive Astronomy
This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science
Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences
This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I
Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):
MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A.

requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons

orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth's interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health

profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:
MAC 2312 or equivalent

Note:
In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology
This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Biological Sciences

BOT 1010C - Botany
This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology
The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I
A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):
high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II
This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
BSC 1010C .

BSC 1085C - Anatomy and Physiology I
A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as

meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Mathematics: 6

Core Mathematics

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A

minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for

general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

Natural Sciences: 6

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education
An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied

health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis,

hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and

demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Physical Sciences

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1045C .

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves.

Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

♦ Core General Education

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

Biological Sciences

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

BSC 1010C .

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

ZOO 1010C - Zoology

♦ Core General Education

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Mathematics: 6

Core Mathematics

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical

proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

General Mathematics

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

Additional General Education Credits: 6

ASL 1140 - American Sign Language I

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

BSC 1005L - Biology Lab

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:

BSC 1005 or equivalent.

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CHI 1120 - Mandarin Chinese I

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced

development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ENG 1001 - Research Papers

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:

This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking (students transferring to FSU are advised to take SPC 1608)

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPN 1120 - Spanish I

___ ____ - Any A.A. General Education Communications, Mathematics, Humanities, Natural Science, or Social Science course

♦ Core General Education

† Speaking-Across-the Curriculum

International and/or diversity focus

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

SLS 2505 - Critical Thinking

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Total AA General Education Credits Required: 36

Early Childhood Education, Birth through Four (BS)

Admission Program Objective Code BSEB State CIP Code 1101312102
*This program is available fully online
The Bachelor of Science in Early Childhood Education, Birth through Four is designed to prepare students to work in programs serving children ages 0-4 years. Graduates will be prepared for advancement in the Early Childhood career field. The degree offers a career ladder for students earning the Associate of Science in Early Childhood Education at NWF State College, which includes one state-mandated prerequisite courses. A.S. students will complete an additional 18 hours of General Education classes during their upper division coursework, after admission to the Early Childhood Education program. Students earning an A.A. may also enter this program after completing the state-mandated prerequisite courses. These students will complete technical classes during their upper division coursework after admission to the Early Childhood Education program. For a detailed summary of graduation requirements for this degree program, see the Bachelor of Science graduation requirement section.
Substitutions for any coursework in this program of study must be approved by the Teacher Education Program Director. Please note that some courses below may require lower division prerequisites not specified as program requirements.

Suggested Two Year Academic Plan

AS Degree General Education Requirements

All A.S. degree programs at NWF State College require a minimum of 18 college credits in general education. Unless otherwise specified in the program requirements, students must complete one course from each of the following categories to meet general education requirements.
To assure that graduates of the state university and state college systems share a common base of General Education requirements, the State of Florida has designated general education core course options (designated with ♦) in each of five areas of study—Communication, Humanities, Mathematics, Natural Sciences, and Social Sciences. The A.S. degree programs provide flexibility for entering the job market or continuing education. Students who take general education courses are guaranteed transfer of those courses when continuing their education within the Florida College and University System.
NWF State College has embedded the core competencies of speaking, writing, and technology in both the AA and AS programs of study; by program design, all AA and AS graduates take courses that allow them to demonstrate their abilities in these important life skills.

Communications: 3

ENC 1101 - English Composition I

___ ____ - Any other AA General Education Communications Course
♦ Core General Education ¶ Writing requirements
Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Mathematics: 3

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR

(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

___ ____ - Any other AA General Education Mathematics course

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Humanities: 3

ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUL 1010 - Music Appreciation

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2010 - Introduction to Philosophy

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2000 - Theatre Appreciation

___ ____ - Any other AA General Education Humanities course with the † symbol or any General Education Humanities course AND another course with the † symbol.

♦ Core General Education † Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements

An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the-Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Social Sciences: 3

AMH 2020 - American History II

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.
Ω Courses listed with this symbol have a Civic Literacy Competency.

ANT 2000 - Introduction to Anthropology

Introduction to the fundamental principles, concepts, methods and theories in Anthropology. Includes a brief introduction to the subdisciplines of anthropology: cultural anthropology, biological anthropology, archaeology, and linguistics. A cross-cultural perspective will be paramount in the study of anthropology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Offered as needed) Prereq/Corequisites:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ECO 2013 - Economics I

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

POS 1041 - American Government

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.
Ω Courses listed with this symbol have a Civic Literacy Competency.

PSY 2012 - Psychology

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

SYG 2000 - Sociology

___ ____ - Any other AA General Education Social Science course
♦ Core General Education
International and/or diversity focus
¶ Writing requirements
Ω Civic Literacy Compentency
An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Mathematics: 3

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

___ ____ - Any other AA General Education Mathematics course

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Natural Sciences: 3

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of

sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2048C - General Physics With Calculus I

___ ____ - Any other AA General Education Natural Science course

♦ Core General Education

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Additional General Education Credits: 3

ASL 1140 - American Sign Language I

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

BSC 1005L - Biology Lab

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:

BSC 1005 or equivalent.

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CHI 1120 - Mandarin Chinese I

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ENG 1001 - Research Papers

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:

This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite

internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPN 1120 - Spanish I

___ ____ - Any other AA General Education course

♦ Core General Education

International and/or diversity focus

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

SLS 2505 - Critical Thinking

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Natural Sciences: 3

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2048C - General Physics With Calculus I

___ ____ - Any other AA General Education Natural Science course

♦ Core General Education

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Additional General Education Credits: 3

ASL 1140 - American Sign Language I

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

BSC 1005L - Biology Lab

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:

BSC 1005 or equivalent.

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
none

CHI 1120 - Mandarin Chinese I

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ENG 1001 - Research Papers

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPN 1120 - Spanish I

___ ____ - Any other AA General Education course

♦ Core General Education

International and/or diversity focus

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

SLS 2505 - Critical Thinking

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Social Sciences: 3

AMH 2020 - American History II

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Ω Courses listed with this symbol have a Civic Literacy Competency.

ANT 2000 - Introduction to Anthropology

Introduction to the fundamental principles, concepts, methods and theories in Anthropology. Includes a brief introduction to the subdisciplines of anthropology: cultural anthropology, biological anthropology, archaeology, and linguistics. A cross-cultural perspective will be paramount in the study of anthropology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Offered as needed) Prereq/Corequisites:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ECO 2013 - Economics I

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

POS 1041 - American Government

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Ω Courses listed with this symbol have a Civic Literacy Competency.

PSY 2012 - Psychology

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

SYG 2000 - Sociology

___ ____ - Any other AA General Education Social Science course

♦ Core General Education

International and/or diversity focus

¶ Writing requirements
Ω Civic Literacy Compentency
An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Additional General Education Credits: 3

ASL 1140 - American Sign Language I

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

BSC 1005L - Biology Lab

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:

BSC 1005 or equivalent.

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CHI 1120 - Mandarin Chinese I

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ENG 1001 - Research Papers

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:

This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Total AS General Education Credits Required: 18

Communications: 3

ENC 1101 - English Composition I

___ ____ - Any other AA General Education Communications Course

♦ Core General Education ¶ Writing requirements

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Footnote Legend

AS Degree Checklist:

Humanities: 3

ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of

medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUL 1010 - Music Appreciation

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2010 - Introduction to Philosophy

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2000 - Theatre Appreciation

___ ____ - Any other AA General Education Humanities course with the † symbol or any General Education Humanities course AND another course with the † symbol.

♦ Core General Education † Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements

An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the-Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

AS Degree Checklist:

AA - Associate in Arts General Degree

Admission Program Objective Code AAGD State CIP Code 1192401010

*This program is available fully online

The AA is primarily intended as a transfer degree for students continuing to a 4 year bachelor's program at a university or state college.

Associate in Arts students must complete 60 college credits to complete the degree; 36 of these credits must be general education

credits distributed across five subject area categories. A student must satisfy the required number of credits in each category. The remaining 24 elective credits should be selected in consultation with an advisor, who will assist with selecting the college credits most advantageous to the student's educational goals.

AA Degree Checklist:

Engineering Technology - Electronics Specialization Option (AS)

Admission Program Objective Code ETES State CIP Code 1615000001
The purpose of this program is to prepare students for employment or provide additional training for persons previously or currently employed in the manufacturing, electronics, aerospace, or other related industries. This degree is a planned sequence of instruction consisting of the five specializations: Mechanical Design and Fabrication, Digital Design and Modeling, Advanced Technology, Digital Manufacturing and Electronics with one common core. It is recommended that students complete the core before advancing to the courses in the next level of specialization. The coverage includes communication skills, technical competency, safe and efficient work practices and a combination of theory and laboratory activities to gain the necessary cognitive and manipulative skills to support engineering design, processes, production, testing, and product quality.
The 18 credit hours core has been aligned with the Manufacturing Skills Standards Council's (MSSC) skills standards. The MSSC skill standards define the knowledge, skills, and performance needed for positions in manufacturing. After completing this core and the General Education requirements, the students will be eligible to take the exam for the MSSC Production Technician Certification.
Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in Engineering Technology Support Specialist (CCC) (State CIP Code 0615000007).

Technical Required Courses

EET 1141C - Solid State Electronics

This is the third course required for Electronics Aide certificate. This course introduces the student to the concept, components, and uses of solid state electronics. Topics include semiconductor devices; thyristors and diodes, transistors, amplifiers, power supplies, oscillators, and optoelectronics. The use of capacitors and inductors in solid state electronics will be also covered. The design, set-up, and troubleshooting solid state circuits and devices using various power supplies and function generators will be dispersed throughout the class.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
EET 1025C

EET 1180C - Industrial Electronic Troubleshooting

This course covers troubleshooting procedures for a variety of electronic equipment and circuits common to industrial applications. The student will develop and implement trouble shooting protocols and plans, equipment monitoring plans, a preventive maintenance plan, and select appropriate test and monitoring equipment. Safety in an industrial setting will be stressed and reinforced through a series of lab exercises throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
EET 1084C

EET 2155C - Linear Integrated Circuits

This course covers the fundamentals and applications of linear integrated circuits and operational amplifiers. The course covers includes inverting and non-inverting amplifiers, comparators, signal generators, differential and instrumentation amplifiers, operational amplifier specifications, active filters, modulator-demodulator integrated circuits, timers, analog to digital converters (ADC), and digital to analog converters (DAC) and measurement and analysis of linear circuits and devices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
EET 1015C , EET 1025C

ETS 1542C - Introduction to Programmable Logic Controllers

This is an introductory course in Programmable Logic Controllers (PLCs.) The student will learn basic concepts with a focus on programming and practical applications.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

EET 1015C , EET 1025C

ETS 1542C - Introduction to Programmable Logic Controllers

This is an introductory course in Programmable Logic Controllers (PLCs.) The student will learn basic concepts with a focus on programming and practical applications.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
EET 1084C

Total Technical Credits Required: 12

Total Technical Credits Required: 12

Total Technical Credits Required: 12

Suggested Two Year Academic Plan

Welding Technology (CCP)

Admission Program of Study Code WELT State CIP Code 0648050805
This program offers a broad foundation of knowledge and skills to prepare students for employment in the welding industry. Basic Skills Requirements: The student must be exempt or attain a 9th grade level on each section of the TABE exam: Math, Language and Reading.

Core Courses

PMT 0153C - Metal Preparation and Thermal Cutting Processes

This course enables the student to set up, inspect, operate, and perform oxy/fuel cutting equipment, air carbon arc and plasma arc cutting activities. Students will learn methods for piercing, slotting, squaring, and beveling plain carbon steel, aluminum, and stainless steel.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0121C - Basic Shielded Metal Arc Welding (SMAW)

This course provides instruction and demonstration using shielded metal arc welding (SMAW). Topics include visually inspect of welds, and basic SMAW technical terminology. Basic structural welding techniques will be demonstrated in accordance with American Welding Society (AWS) D1.1 structural welding code. Tack welding and metal joint fit of carbon steel is covered in this course.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0126C - Intermediate Shielded Metal Arc Welding (SMAW)

This course will enable the student to identify metals using visual, magnetic and spark methods, identify and interpret welding symbols, demonstrate the ability to identify and use the correct filler metals and shielding gases and fabricate parts from a drawing or sketch using intermediate SMAW techniques.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

PMT 0122C [Inactive]

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0127C - Advanced Shielded Metal Arc Welding (SMAW)

This course will provide the student with hands-on skills performing tests, examining metal surfaces, and setting up shielded metal arc (SMAW) equipment to make groove welds, all positions on plain carbon steel. The student will perform lab/shop procedures to safely prepare the area, demonstrating the ability to identify and use filler metals and shielding gases as well as performing visual and destructive analysis in the qualification testing of welds on carbon steels.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

PMT 0126C

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0134C - Gas Metal Arc Welding (GMAW)

An introduction to metal inert gas welding (MIG). Emphasizes the principles involved in the operating of MIG equipment.
A beginning course in welding principles of MIG.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college

credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0143C - Flux-Core Arc Welding

Students will be able to make quality welds using the FCAW in the flat, horizontal, vertical and over-head positions. This course also includes instructions in metal transfer and shielding gases associated with the FCAW process. Students will use information contained in the textbook, instructions, and demonstrations by the instruction.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as Needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0137C - Gas Tungsten Arc Welding

An advanced course in welding principles of TIG welding.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as Needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0101C - Blueprint Reading For Welders

This course provides students with the understanding and fundamentals of industrial blueprint reading including blueprint symbols, dimensions, joints, fabrication and welding symbols.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0102C - Introduction to Welding and Industrial Safety

An introduction to the welding skills including safety, measuring, communication, leadership, use of tools, and equipment.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0182C - Weld Inspection Fundamentals

Fundamentals of welder inspection and development of welding procedure specifications in accordance with American Welding Society (A.W.S.) and the American Society of Mechanical Engineers (A.S.M.E.) used to prepare students to pass nationally recognized welder certification tests.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Prereq/Corequisites:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Total Program Hours Required: 1050

Suggested Academic Plan

Welding Technology - Advanced (CCP)

Admission Program of Study Code WELA State CIP Code 0648050806
This program offers a broad foundation of knowledge and skills to prepare students for employment in the welding industry.

A student wishing to be admitted into the Welding Technology – Advanced certificate program at Northwest Florida State College must meet one of the following prerequisites:
Pass a 10 panel drug screening (same requirement for admissions into Welding Technology program) AND one of the following:
Have completed a Welding Technology certificate program at an accredited institution. OR
Possess an AWS certification or a company sponsored weld certification, in plate welding using the SMAW process OR
Demonstrate their abilities by passing a SMAW plate weld test to AWS standards

Core Courses

PMT 0165C - Shielded Metal Arc Weld (SMAW) Pipe Welding

This course emphasizes principles of welding pipe using the shielded metal arc (SMAW) process. Fabrication and welding of pipe in the 1, 2, 5, and 6 g positions are stressed.

Credit Hour(s): 210 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0172C - Gas Tungsten Arc / Shielded Metal Arc (Combo) Pipe Welding

This course emphasizes principles of welding pipe using the gas tungsten arc (GTAW) process combined with the shielded metal arc (SMAW) process. Fabrication and welding of various size and thickness pipe in the 1, 2, 5, and 6 g positions are stressed.

Credit Hour(s): 270 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0173C - Specialty Pipe Welding

This course presents technical information on gas tungsten arc welding preparation for welding pipe and pipe welding defects. The training develops the manual skills necessary to produce high quality groove welds on stainless steel pipe in the 2g, 5g and 6g positions.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0174C - Introduction to Pipefitting and Pipe Fabrication

This course introduces students the fundimentals of fabrication of pipe systems using tees, flanges and other fittings.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved

articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0190C - Emerging Technologies In Welding

This course will provide instruction on emerging techniques in welding, including pulse welding, robotics, submerged welding, adaptive welding and hybrid laser-arc welding. The content emphasizes specific careers and workforce needs in the welding industry.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Total Program Hours Required: 750

Suggested Academic Plan

Firefighter/Emergency Medical Technician-Combined (CCP)

Admission Program of Study Code FIEM State CIP Code 0743020313
Basic Skills Requirements: The student must be exempt or attain a 10th grade level on each section of the TABE exam: Math, Language and Reading.
Entry into the Firefighter/Emergency Medical Technician-Combined Program requires meeting the standards established by the Florida Division of State Fire Marshal, Bureau of Fire Standards and Training. A copy of these requirements is available through the Public Safety Division of NWF State College.
Firefighters are trained to extinguish and control fires in response to situations where property, life, or the environment is in danger. At the scene of an emergency, firefighters perform tasks assigned by their commanding officer. Depending on the situation, they may need to provide medical attention, break through debris, operate fire hoses, or enter a burning building. Firefighters are often first responders to car accidents, heart attack scenes, and other medical emergencies that do not involve fire.
Graduates of this program will be eligible to apply for the examinations to become both a Florida Certified Emergency Medical Technician/National Registry Emergency Medical Technician Basic and Florida Fire Standards. This will allow graduates to obtain employment as a firefighter EMT after 2 semesters of training.
The Firefighter/EMT Certificate program is two semester program that consists of Firefighter standards and EMT training. Applicants to this program must have a high school diploma or GED and meet other applicable admission criteria. If the number of qualified applicants to the program exceeds the number of openings, students will be accepted using a combination of application points . Contact the Emergency Services Office at (850) 729-5378 for additional information.

Core Courses

FFP 0010 - Firefighting I

This course is the first part of the Basic Fire Recruit Academy and prepares students for a career as a volunteer firefighter. Classroom instruction includes a variety of fire related topics which are reinforced and enhanced through practical skills activities. Upon completion, the student is eligible to test for certification as a volunteer firefighter through the Florida State Fire College and may elect to continue training in Firefighter II to pursue state certification as a career firefighter. Permission of the Public Safety Division is required.

Credit Hour(s): 201 Clock Hours When Offered: (Offered as needed) Corequisite(s):

FFP 0077 unless previous certification has been obtained for first responder, EMT, or paramedic.

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 0020 - Firefighting II

This course is the second part of the Basic Fire Recruit Academy and prepares students for a career as a firefighter. The delivery of instruction includes a variety of training in practical skills necessary for the mastery of the basic competencies required in the program. Upon successful completion of this course, the student is eligible to take the Bureau of Fire Standards and Training written and practical examination. Permission of the Public Safety Division is required.

Credit Hour(s): 295 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

FFP 0010 or FFP 0077

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 0119 - Emergency Medical Technician for Firefighters

Emergency Medical Technician is designed to prepare the student with the necessary fundamental knowledge to be successful in meeting Emergency Medical Technician certification and licensing requirements. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Credit Hour(s): 140 Clock Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Permission of the EMS Director

Corequisite(s):

FFP 0010, FFP 0020, EMS 0119L

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 0119L - Emergency Medical Technician Lab for Firefighters

This course provides an integrated experience that is designed to allow the student to apply practical experience to material learned in Emergency Medical Technician. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic in the laboratory environment, area hospitals and advanced life support EMS ambulances. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Credit Hour(s): 160 Clock Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Permission of the EMS Director.

Corequisite(s):

FFP 0010, FFP 0020, EMS 0119

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Total Program Hours Required: 796

Suggested Academic Plan

Hospitality and Tourism Management (AS)

Hospitality and Tourism
Admission Program of Study Code HSTR
State CIP Code 1252090101
The Hospitality and Tourism program prepares students for employment in management positions in the hospitality industry and/or provides supplemental training for persons previously or currently employed in these occupations. The hospitality industry as addressed in this program includes the hotel, motel, bed and breakfast, resort, club, marina, and other lodging organizations. Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in :
Event Planning Management (CCC)
Food and Beverage Management (CCC)
Food and Beverage Operations (CCC)
Guest Services Specialist (CCC)
Rooms Division Management (CCC)
Rooms Division Operations (CCC)

General Education

Total General Education Credits Required: 21

Core Courses

HFT 1000 - Introduction to Hospitality Management

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1250 - Hotel and Resort Operations

This course acquaints students with the operation of a hotel, motel and resort including front office procedures in registering, accounting for and checking out guests, promotional and sales practices, housekeeping, interior decoration, purchase of furniture, carpeting, linens and supplies, maintenance and engineering of a practical nature, facilities specifications, purchasing, and storage.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 1410 - Front Office Management

This course guides students through all the skills including directing the activities and solving the complex problems, needed to properly manage the front office of a hotel/motel/resort. The course also acquaints students with the operation of all the departments as they apply to their primary responsibility of selling rooms and serving guests.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 2210 - Hospitality Management

Training in the techniques involved in the supervision of employees, developing sound relations with other departments, group discussions, and methods of improvement and development of cost consciousness. Job Analysis and job description techniques are developed. The course explores issues that make managing tourism and hospitality (T&H) businesses different to businesses in other sectors. These issues are faced by small and large T&H businesses alike: from owner-operator cafés, motels or tourism businesses to multi-national hotel chains, international airlines or tour companies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 2223 - Human Relations and Supervisory Development

Designed to provide specific application of proven training systems and methods for managers in the hospitality industry.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

HFT 1500 - Marketing and Sales in the Hospitality Industry

How to sell and promote the many services the food service/lodging industries offer guests. Prepare and present the fundamentals of a marketing plan.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

HFT 2600 - Hospitality Law

Nature and function of our legal system as it applies to the operations of the hospitality industry. Innkeeper-Guest relationship, Contracts, Condominium Association contracts, Torts, Civil Rights, insurable risks are emphasized.

Credit Hour(s): 2 Credit Hours When Offered: (Fall)

HFT 2942 - Hospitality Internship

This course, an extension of Hospitality Internship (HFT2941), consists of on-the-job work experience supplied by the hotel, motel, resort and restaurant industries. Students will concentrate on 3 specific areas or functions that are career-goal oriented. Job placement will be dependent upon availability of participating hospitality institutions. The course consists of 150 hours of on-the-job instruction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

HFT 1000 , FOS 2201 , HFT 1410 , and HFT 1250

FOS 2201 - Food Service Sanitation Management

Acquaints students with the National Restaurant Associations' ServSafe® Food Protection Manager Certification information, Food and Drug Administration's Food Code as well as the challenges and opportunities facing the hospitality and culinary industries in the areas of sanitation and safety management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Critical Control Point Program (HACCP), and provides a basic understanding of quality sanitation management. The curriculum is based on the National Restaurant Associations' ServSafe® Food Protection Manager Certification information. Students will sit for the ServSafe® Food Protection Manager exam at the end of this course.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

FSS 1250C - Dining Room Management & Service

The class will learn and implement the service appropriate for restaurant a la carte dining. Focus on principles for dining service, sanitation and presentation of the dining room, review of menus and customer expectations and guest service will be covered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall)

FSS 2284C - Catering, Banquet and Event Management

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for various types of banquets, theme buffets, and physical management of floor lay-out and table setup. Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

FSS 2251 - Food and Beverage Management

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

HFT 2401 - Hospitality Industry Financial Accounting

Basic understanding of financial accounting and specifically Hospitality Industry accounting concepts and procedures used in

hotels, restaurants. Utilize POS system in class activities.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

Total Core Credits Required: 39

Total Program Credits Required: 60

Suggested Academic Plan

Applied Management (AAS)

Admission Program of Study Code APMG
State CIP Code 0552020107
*This program is available fully online
The A.A.S. degree in Applied Management examines the ways in which management skills are used in a variety of businesses. Students interested in a broad range of technical fields will be able to prepare for leadership roles in the Business Management and Administration professions.

General Education

Total General Education Credits Required: 18

Core Courses

ACG 2001 - Accounting I

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

MAN 2021 - Management

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2300 - Personnel Management

An introduction to personnel practices and procedures. Topics include the personnel management system, maximizing employee potential, organizational behavior, and labor management relations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1345 - Supervision I

The course presents the functions of a personnel manager, philosophy of general management, organizational structure, employer socioeconomic climate and career information. Included also are job descriptions and specifications, recruiting practices, applications, resumes, interviewing, placement, performance appraisals, wage and salary administration and other related topics.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2335 - Business Communications

Business Communications is a comprehensive coverage of language structure and particular emphasis on writing superior business letters and reports. Instruction in principle, then illustration, and practice in applying the principles. A fundamental concept of the appearance, language and style, tone and psychology of effective business letters.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

APA 1000 - Accounting Fundamentals I

Or

Introduction to the principles used in measuring organization performance and reporting the results of organizational activities. Recommended for non-accounting majors.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Total Core Credits Required: 15

Technical Elective Courses

ACG 2011 - Accounting II

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2071 - Managerial Accounting

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Corequisite(s):

ACG 2011 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 2241 - Business Law I

Introductory course in business law with objective of presenting the law underlying business transactions. Course includes the study of the Law of Contracts, the Law of Bailments, and the Law of Sales based on the Uniform Commercial Code. Recommended for Business degree students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 1100 - Microcomputer Applications

or

This is a hands-on course using computer software including discussion and practical applications of the Windows operating

system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CGS 1570 - Computer Applications for Business

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2104 - Introduction to Windows

An introduction to operating systems in general with emphasis on Windows.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

ENC 2210 - Technical Report Writing

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

passing score on placement test.

GEB 1940 - Internship - Business

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

This course may be taken up to two times for credit.

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

HFT 1000 - Introduction to Hospitality Management

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAR 2011 - Introduction to Marketing

An introductory course in the field of marketing including a look at marketing as it exists in our economy today. Consideration of the market, the product, distribution channels. Special emphasis on the study of human behavior in marketing promotion.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2021 - Professional Selling

Selling, correct attitudes and personal attributes for dealing with the public on a business or professional basis.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2041 - Retail Management

This course covers retail store management, location, buying merchandise, control policies, services, pricing, expenses, profits,

training and supervision of retail sales forces, and administrative problems. Also includes a variety of current perspectives in retailing management.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2511 - Introduction to Advertising

Advertising as a marketing tool, its planning, creation, and use. A survey of copy writing, layout, and media (newspapers, magazines, radio, television, films, etc.)

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1161 - Customer Service

Designed to build and maintain the critical skills necessary to be a dynamic and successful professional. Students and front-line individuals who work with customers every day will develop strategies to create positive customer relationships. This course provides a practical approach to the thorny issues of customer dissatisfaction and will enable managers to keep service personnel focused on the organization's goals and objectives.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2100 - Organizational Behavior

Designed to help students develop an understanding of how they may be motivated to work together in greater harmony in all kinds of organizations. The basis of human motivation and how it is influenced by leadership, the organization itself, and the social environment in which the organization exists.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MTB 1103 - Business Mathematics

____ ____ Other Approved College Credits (Requires Dept. Chair Approval)

This course presents basic principles used to solve everyday business problems, including a review of basic skills and business terminology. Topics in the course include the following: base, rate and percentage, trade and cash discounts, wage and salary administration, insurance (fire and automobile), depreciation and business profits, distribution of corporate dividends, simple interest and bank discount, and buying and selling of corporation bonds and stocks.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

completion of MAT 0028 with a "C" or better or satisfactory test scores. Knowledge of basic computer and keyboarding skills are strongly recommended.

Total Technical Elective Credits Required: 27

Total Program Credits Required: 60

Suggested Two Year Academic Plan

AAS Degree General Education Requirements

All A.A.S. degree programs at NWF State College require a minimum of 18 college credits in general education. Unless otherwise specified in the program requirements, students must complete one course from each of the following categories to meet general education requirements.

To assure that graduates of the state university and state college systems share a common base of General Education requirements, the State of Florida has designated general education core course options (designated with ♦) in each of five areas of study—Communication, Humanities, Mathematics, Natural Sciences, and Social Sciences. The A.A.S. degree programs provide flexibility for entering the job market or continuing education. Students who take general education courses are guaranteed transfer

of those courses when continuing their education within the Florida College and University System.
NWF State College has embedded the core competencies of speaking, writing, and technology in both the AA, AS, and AAS programs of study; by program design, all AA and AS graduates take courses that allow them to demonstrate their abilities in these important life skills.

Communications: 3

LIN 1670 - Writing and Grammar

___ ____ - Any other AA General Education Communications Course

♦ Core General Education ¶ Writing requirements

The course includes practice in writing short essays and encompasses a comprehensive review of grammar and mechanics. This course is strongly recommended for students who have completed Developmental Writing, those who want a preparation for Composition, or those who score 103-116 on the PERT.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communications/verbal achievement, successful completion of any required developmental English coursework with a minimum grade of "C", or exemption from placement testing.

Humanities: 3

ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUL 1010 - Music Appreciation

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2010 - Introduction to Philosophy

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2000 - Theatre Appreciation

Rich Text Editor, text_description, Press ALT 0 for help
___ ____ - Any other AA General Education Humanities course with the † symbol or any General Education Humanities course AND another course with the † symbol.
♦ Core General Education † Speaking-Across-the Curriculum International and/or diversity focus ¶ Writing requirements
An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the-Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Mathematics: 3

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAT 1033A - Intermediate Algebra

This is an intermediate algebra course designed to prepare students for general education mathematics/statistics courses. This course emphasizes concepts, techniques, and applications of the following major topics; factoring, algebraic functions, radicals and rational exponents, complex numbers, quadratic equations, rational equations, two-variable linear equations/inequalities and their graphs, systems of linear equations and inequalities, and an introduction to functions. This course may be used as an elective, but does not meet Gordon Rule requirements for B.A.S., A.A., or A.S. transfer students.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring mathematics achievement, successful completion of MAT 0028 with a grade of "C" or better, or exemption from placement testing.

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting,

probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

STA 2023 - Statistics

___ ____ - Any other AA General Education Mathematics course

♦ Core General Education

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Natural Sciences: 3

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as

meeting the state Core General Education requirements.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2048C - General Physics With Calculus I

___ ____ - Any other AA General Education Natural Science course

♦ Core General Education

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Social Sciences: 3

AMH 2020 - American History II

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Ω Courses listed with this symbol have a Civic Literacy Competency.

ANT 2000 - Introduction to Anthropology

Introduction to the fundamental principles, concepts, methods and theories in Anthropology. Includes a brief introduction to the subdisciplines of anthropology: cultural anthropology, biological anthropology, archaeology, and linguistics. A cross-cultural perspective will be paramount in the study of anthropology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Offered as needed) Prereq/Corequisites:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ECO 2013 - Economics I

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

POS 1041 - American Government

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.
Ω Courses listed with this symbol have a Civic Literacy Competency.

PSY 2012 - Psychology

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

SYG 2000 - Sociology

___ ____ - Any other AA General Education Social Science course
♦ Core General Education International and/or diversity focus ¶ Writing requirements
Ω Civic Literacy Compentency

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Additional General Education Credits: 3

ASL 1140 - American Sign Language I

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

BSC 1005L - Biology Lab

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:

BSC 1005 or equivalent.

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CHI 1120 - Mandarin Chinese I

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ENG 1001 - Research Papers

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:

This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPN 1120 - Spanish I

___ ____ - Any other AA General Education course

♦ Core General Education

† Speaking-Across-the Curriculum

International and/or diversity focus

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

SLS 2505 - Critical Thinking

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Total AAS General Education Credits Required: 18

AAS Degree Checklist:

Business Development and Entrepreneurship (CCC)

Admission Program of Study Code BMDE State CIP Code 0552070306
*This program is available fully online
Students who successfully complete this certificate may be eligible to receive credits towards the Business Administration (AS) degree.

Core Courses

ACG 2001 - Accounting I

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

BUL 2241 - Business Law I

Introductory course in business law with objective of presenting the law underlying business transactions. Course includes the study of the Law of Contracts, the Law of Bailments, and the Law of Sales based on the Uniform Commercial Code. Recommended for Business degree students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1011 - Introduction to Business

Designed to give students a broad understanding of the nature of business and a preliminary idea of the various areas of business specialization.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2430 - Business Ethics

This course addresses the legal, moral, and societal issues of ethical conduct in the business environment. Actual case studies are used to illustrate appropriate relationships among employers, employees, customers, stockholders, and other business stakeholders. Topics include: codes of ethics, laws and regulations related to ethics, conflict of interest, and moral philosophies associated with ethical conduct.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2021 - Management

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2300 - Personnel Management

An introduction to personnel practices and procedures. Topics include the personnel management system, maximizing employee potential, organizational behavior, and labor management relations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2335 - Business Communications

Business Communications is a comprehensive coverage of language structure and particular emphasis on writing superior business letters and reports. Instruction in principle, then illustration, and practice in applying the principles. A fundamental concept of the appearance, language and style, tone and psychology of effective business letters.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

SBM 2000 - Small Business Management

This course provides students the opportunity to learn hands-on technical applications regarding entrepreneurship. It is designed for the student who is interested in the ownership and management of a small business enterprise.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

ENT 2931 - Selected Studies in Entrepreneurship

In this course, topics of current interest are presented in group instruction.

Credit Hour(s): 1 Credit Hour When Offered: (Spring)

Total Program Credits Required: 25

Suggested Academic Plan

Event Planning Management (CCC)

Admission Program of Study Code (EPMG)
State CIP Code 0252090905
Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101).

Core Courses

HFT 1000 - Introduction to Hospitality Management

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2210 - Hospitality Management

Training in the techniques involved in the supervision of employees, developing sound relations with other departments, group discussions, and methods of improvement and development of cost consciousness. Job Analysis and job description techniques are developed. The course explores issues that make managing tourism and hospitality (T&H) businesses different to businesses in other sectors. These issues are faced by small and large T&H businesses alike: from owner-operator cafés, motels or tourism

businesses to multi-national hotel chains, international airlines or tour companies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 2223 - Human Relations and Supervisory Development

Designed to provide specific application of proven training systems and methods for managers in the hospitality industry.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

HFT 1500 - Marketing and Sales in the Hospitality Industry

How to sell and promote the many services the food service/lodging industries offer guests. Prepare and present the fundamentals of a marketing plan.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

FOS 2201 - Food Service Sanitation Management

Acquaints students with the National Restaurant Associations' ServSafe® Food Protection Manager Certification information, Food and Drug Administration's Food Code as well as the challenges and opportunities facing the hospitality and culinary industries in the areas of sanitation and safety management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Critical Control Point Program (HACCP), and provides a basic understanding of quality sanitation management. The curriculum is based on the National Restaurant Associations' ServSafe® Food Protection Manager Certification information. Students will sit for the ServSafe® Food Protection Manager exam at the end of this course.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

FSS 1250C - Dining Room Management & Service

The class will learn and implement the service appropriate for restaurant a la carte dining. Focus on principles for dining service, sanitation and presentation of the dining room, review of menus and customer expectations and guest service will be covered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall)

FSS 2284C - Catering, Banquet and Event Management

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for various types of banquets, theme buffets, and physical management of floor lay-out and table setup. Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

FSS 2251 - Food and Beverage Management

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

Total Program Credits Required: 25

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

FSS 1120 - Food and Beverage Purchasing

Study of purchasing and inventory control functions used for the proper acquisition of all foods, beverages and disposables used in the hospitality industry. This includes the development of purchase specifications, determination of order quantities, executing supplier price comparisons, employing proper receiving procedures, managing product storage functions, and developing proper product issuing procedures. Emphasis on product cost analysis, yields, pricing formulas, controls, and record-keeping at each stage of the purchasing cycle.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

FSS 2500 - Food and Beverage Cost Control

This course focuses on the principles and procedures involved in an effective control of food, beverage and labor costs for the hospitality industry. This course provides the fundamentals for gathering information, developing performance goals and procedures, assessing and evaluating the information and applying the results to maintain efficient food, beverage and labor cost control. This course includes the examination and analysis of hospitality Profit and Loss Statements used to evaluate operational performance.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

FSS 1001 - Culinary Techniques

Emphasis in this course will be placed on the basic methods and chemistry of cooking. Students study ingredients, cooking, theories, terminology, equipment, technology, weights and measures, formula conversions and work on cooking skills and procedures.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

FOS 2201

Corequisite(s):
FSS 1202L

FSS 1202L - Food Production I

Students will acquire knowledge and skill in the preparation of food. Included are basic principles and techniques of food preparation, management of resources, use of recipes, use and care of equipment, and evaluation of food products. The course emphasizes safety and sanitation practices.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
FOS 2201

Corequisite(s):
FSS 1001

FSS 1221L - Food Production II

Students will focus on the knowledge and preparation of meats, poultry, seafood, as well as starches, fruits and vegetables. Students will learn to prepare menus for special dietary needs. This course will utilize all dry and moist methods of cooking. Menu selection and balance will be studied. The course emphasizes safety and sanitation procedures.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
FOS 2201 and FSS 1202L with a grade of "C" or better.

FSS 1246L - Baking and Pastries I

Students apply the fundamentals of baking science and pastry preparation to produce a variety of bread products and pastries. Special emphasis is given to the application of advanced techniques in bakery management and the use and care of equipment found in bake shops. Preparation of breads and rolls, classical cakes and icings. Student must pass written and practical baking examination covering a variety of techniques and procedures.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
FOS 2201

FSS 2241L - International and Regional Cuisine

Students will learn quantity food production by preparing multi-course ethnic meals typical of several cultures during the semester to live guests.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
FOS 2201 (Sanitation and Safety Management), FSS 1202L (Food Production I) with a C or Better, FSS 1221L (Food Production II) with a C or Better

FSS 2284C - Catering, Banquet and Event Management

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Engineering Technology - Maintenance Technician Specialization Option (AS)

Admission Program Objective Code ENMT State CIP Code 1615000001

The purpose of this program is to prepare students for employment or provide additional training for persons previously or currently employed in the manufacturing, electronics, aerospace, or other related industries. Instruction in electrical/electronic principles, basic mechanic fundamentals, robotics and machine repair prepare the student to meet the demands and develop the skills required to maintain and troubleshoot high-tech manufacturing equipment. The coverage includes communication skills, technical competency, safe and efficient work practices and a combination of theory and laboratory activities to gain the necessary cognitive and manipulative skills to support engineering design, processes, production, testing, and product quality. Candidates interested in this program should be interested in working with their hands and enjoy the challenges of programming and troubleshooting electrical and mechanical equipment.

The core of this degree has been aligned with the Manufacturing Skills Standards Council's (MSSC) skills standards. The MSSC skill standards define the knowledge, skills, and performance needed for positions in manufacturing. The course sequence is designed to prepare students for successful completion of the four exams that make up the MSSC Production Technician Certification. The exams are embedded within four of the courses with the outcome of the exam influencing the final grade in the selected courses.

Students who successfully complete selected core courses from this program of study may be eligible to receive the Engineering Technology Support Specialist (CCC) (State CIP Code 0615000007) certificate.

Technical Required Courses

ETI 2408C - Welding Fundamentals

This course teaches basic welding processes and techniques for entry-level maintenance technician positions. Students learn welding safety, fundamental practices of shielded arc welding, arc welding with consumable and non-consumable electrodes, brazing, soldering, and plasma cutting.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

ETS 1542C - Introduction to Programmable Logic Controllers

This is an introductory course in Programmable Logic Controllers (PLCs.) The student will learn basic concepts with a focus on programming and practical applications.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
EET 1084C

ETM 1315C - Hydraulics & Pneumatics Fundamentals

This course introduces the student to basic hydraulic and pneumatic fundamentals. Instructional topics will include components, fluid pressure and flow and basic circuit design and application.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

EEL 2603C - Robotics-Mechanics and Controls

This course introduces the student to robotics. Instructional topics will include robot classifications, applications, Input/Output (I/O) and sensor interfacing.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
ETS 1542C

Total Technical Credits Required: 12

Suggested Two Year Academic Plan

Rooms Division Operations (CCC)

Admission Program of Study Code RMOP State CIP Code 0252090406

Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101).

Core Courses

HFT 1000 - Introduction to Hospitality Management

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1250 - Hotel and Resort Operations

This course acquaints students with the operation of a hotel, motel and resort including front office procedures in registering, accounting for and checking out guests, promotional and sales practices, housekeeping, interior decoration, purchase of furniture, carpeting, linens and supplies, maintenance and engineering of a practical nature, facilities specifications, purchasing, and storage.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 1410 - Front Office Management

This course guides students through all the skills including directing the activities and solving the complex problems, needed to properly manage the front office of a hotel/motel/resort. The course also acquaints students with the operation of all the

departments as they apply to their primary responsibility of selling rooms and serving guests.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 1500 - Marketing and Sales in the Hospitality Industry

How to sell and promote the many services the food service/lodging industries offer guests. Prepare and present the fundamentals of a marketing plan.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

HFT 2942 - Hospitality Internship

This course, an extension of Hospitality Internship (HFT2941), consists of on-the-job work experience supplied by the hotel, motel, resort and restaurant industries. Students will concentrate on 3 specific areas or functions that are career-goal oriented. Job placement will be dependent upon availability of participating hospitality institutions. The course consists of 150 hours of on-the-job instruction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):
HFT 1000 , FOS 2201 , HFT 1410 , and HFT 1250

FOS 2201 - Food Service Sanitation Management

Acquaints students with the National Restaurant Associations' ServSafe® Food Protection Manager Certification information, Food and Drug Administration's Food Code as well as the challenges and opportunities facing the hospitality and culinary industries in the areas of sanitation and safety management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Critical Control Point Program (HACCP), and provides a basic understanding of quality sanitation management. The curriculum is based on the National Restaurant Associations' ServSafe® Food Protection Manager Certification information. Students will sit for the ServSafe® Food Protection Manager exam at the end of this course.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

HFT 2401 - Hospitality Industry Financial Accounting

Basic understanding of financial accounting and specifically Hospitality Industry accounting concepts and procedures used in hotels, restaurants. Utilize POS system in class activities.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

Total Program Credits Required: 21

Suggested Academic Plan

Rooms Division Management (CCC)

Admission Program of Study Code RMMG State CIP Code 0252090402

Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101).

Core Courses

HFT 1000 - Introduction to Hospitality Management

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1250 - Hotel and Resort Operations

This course acquaints students with the operation of a hotel, motel and resort including front office procedures in registering, accounting for and checking out guests, promotional and sales practices, housekeeping, interior decoration, purchase of furniture, carpeting, linens and supplies, maintenance and engineering of a practical nature, facilities specifications, purchasing, and storage.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 1410 - Front Office Management

This course guides students through all the skills including directing the activities and solving the complex problems, needed to properly manage the front office of a hotel/motel/resort. The course also acquaints students with the operation of all the departments as they apply to their primary responsibility of selling rooms and serving guests.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 2210 - Hospitality Management

Training in the techniques involved in the supervision of employees, developing sound relations with other departments, group discussions, and methods of improvement and development of cost consciousness. Job Analysis and job description techniques are developed. The course explores issues that make managing tourism and hospitality (T&H) businesses different to businesses in other sectors. These issues are faced by small and large T&H businesses alike: from owner-operator cafés, motels or tourism businesses to multi-national hotel chains, international airlines or tour companies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 2223 - Human Relations and Supervisory Development

Designed to provide specific application of proven training systems and methods for managers in the hospitality industry.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

HFT 1500 - Marketing and Sales in the Hospitality Industry

How to sell and promote the many services the food service/lodging industries offer guests. Prepare and present the fundamentals of a marketing plan.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

HFT 2942 - Hospitality Internship

This course, an extension of Hospitality Internship (HFT2941), consists of on-the-job work experience supplied by the hotel, motel, resort and restaurant industries. Students will concentrate on 3 specific areas or functions that are career-goal oriented. Job placement will be dependent upon availability of participating hospitality institutions. The course consists of 150 hours of on-the-job instruction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s): HFT 1000 , FOS 2201 , HFT 1410 , and HFT 1250

FOS 2201 - Food Service Sanitation Management

Acquaints students with the National Restaurant Associations' ServSafe® Food Protection Manager Certification information, Food and Drug Administration's Food Code as well as the challenges and opportunities facing the hospitality and culinary industries in the areas of sanitation and safety management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Critical Control Point Program (HACCP), and provides a basic understanding of quality sanitation management. The curriculum is based on the National Restaurant Associations' ServSafe® Food Protection Manager Certification information. Students will sit for the ServSafe® Food Protection Manager exam at the end of this course.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

FSS 2284C - Catering, Banquet and Event Management

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for various types of banquets, theme buffets, and physical management of floor lay-out and table setup. Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 2401 - Hospitality Industry Financial Accounting

Basic understanding of financial accounting and specifically Hospitality Industry accounting concepts and procedures used in hotels, restaurants. Utilize POS system in class activities.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

Total Program Credits Required: 30

Suggested Academic Plan

Unmanned Vehicle Systems Operations (AS)

Admission Program of Study Code DRO3
State CIP Code 1615080102
The program will offer a core of courses that will develop an operational knowledge of UAS design, limitations, operations, and maintenance as well as proper aeronautical decision making.
The sixty-two (62) credit hour curriculum framework focuses instruction on the knowledge and skills required to meet the Airman Certification Standards published by the FAA to obtain a Remote Pilot Certificate. Intellectual knowledge focuses on the theory, practice, information security, regulatory requirements, and execution of commercial UAS operations. Aviation law and regulations, aviation meteorology, aerodynamics, national airspace structure, vehicle design and control, and human factor considerations are all components of the classroom delivery. UAS operational skills are developed and are refined through hands-on instruction for practical application.

Specialization Elective Courses

ENC 2210 - Technical Report Writing

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

passing score on placement test.

MAN 2021 - Management

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

ASC 2562C - UAS Operations and Cross Country Data Entry

This course will address the use of the various systems and navigation equipment that exists on unmanned aircraft. Students will learn to analyze and identify the different systems that are employed on unmanned aircraft. They will identify the appropriate navigational system packages that are employed on various unmanned aircraft. Unmanned aircraft employ navigation systems that are, in many ways, significantly different than manned aircraft. These systems include navigation by ground observers; navigation using GPS determined position on a ground-based moving map display; and fully-autonomous GPS-based navigation. Students will differentiate the types of navigation systems available; and use the appropriate procedure to enter the navigation data into the unmanned aircraft's navigational system.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2563C - UAS Applications in Aerial Photography

This course will familiarize the student with guidelines, regulatory standards, and practical operational considerations for aerial photography and videography techniques specific to the use of unmanned aircraft systems (UAS). Current procedures and relevant practical application methods will provide a basis for commercial applications that leverage future UAS technologies.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Total Specialization Elective Credits Required: 13

Total Program Credits Required: 63

Food and Beverage Management (CCC)

Admission Program of Study Code FBMG State CIP Code 0252090503

Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101).

Credit Hour(s): 3 Credit Hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

HFT 1000 , FOS 2201 , HFT 1410 , and HFT 1250

FOS 2201 - Food Service Sanitation Management

Acquaints students with the National Restaurant Associations' ServSafe® Food Protection Manager Certification information, Food and Drug Administration's Food Code as well as the challenges and opportunities facing the hospitality and culinary industries in the areas of sanitation and safety management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Critical Control Point Program (HACCP), and provides a basic understanding of quality sanitation management.

The curriculum is based on the National Restaurant Associations' ServSafe® Food Protection Manager Certification information. Students will sit for the ServSafe® Food Protection Manager exam at the end of this course.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

FSS 1250C - Dining Room Management & Service

The class will learn and implement the service appropriate for restaurant a la carte dining. Focus on principles for dining service, sanitation and presentation of the dining room, review of menus and customer expectations and guest service will be covered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall)

FSS 2284C - Catering, Banquet and Event Management

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for various types of banquets, theme buffets, and physical management of floor lay-out and table setup. Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

FSS 2251 - Food and Beverage Management

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

HFT 2401 - Hospitality Industry Financial Accounting

Basic understanding of financial accounting and specifically Hospitality Industry accounting concepts and procedures used in hotels, restaurants. Utilize POS system in class activities.

Core Courses

CET 2179C - PC Operating Systems A+

This course is designed to help prepare the student to take the A+ Certification exams by making the student proficient in personal computer operating systems, including Windows. Major topics include disk and file management, system configurations, menu driven processing, graphical user interfaces, boot files, disk caching, virtual memory, device drivers, remote assistance, and security essentials and security practices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2182C - PC Hardware A+

This course is designed to prepare the student to take the A+ Certification exam, by teaching the student basic technical skills needed to understand the function and operation of the major elements of personal computer systems, and how to localize and correct common hardware and software problems.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CGS 2541 - Introduction to Database Concepts

This course will provide an introduction to data modeling and the design and implementation of relational databases and extend the students' understanding of the principles and techniques used in the design and implementation of modern database systems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

COP 1000 - Introduction to Programming Concepts and Logic

General survey of programming/problem solving techniques. Includes an introduction to structured programming. Algorithm development will employ the use of a modern programming language.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 1156C - Desktop Support

This course introduces the helpdesk skills to troubleshoot hardware or software operation and application problems for end users on the desktop or client-side, based on the Windows operating system. It is designed to help prepare the student to take the two core exams (70-620 and 70-622) required for certification as an MCITP: Enterprise Support Technician students should have user-level competency with Windows and MS Office.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 1134 - Network Foundations

This course is designed to introduce students to the terminology and concepts of the network industry, including data communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2163C - Windows Client Operating System

This course addresses the implementation and desktop support needs of the MS client software, including installation, configuration and management of hardware and file systems, user profiles, remote users, and monitoring of resources and performance. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

KNOWLEDGE OF NETWORKING, BASIC COMPUTER, AND KEYBOARDING SKILLS ARE STRONGLY RECOMMENDED.

CTS 1142 - Information Technology Project Management

This introductory course teaches the essentials of information technology project management. This course provides an introduction to the project management body of knowledge, as specified by CompTIA project+. The course discusses the processes, methods, techniques and tools that organizations use to manage information systems projects. The course covers a systematic methodology for initiating, planning, executing, controlling, and closing projects and emphasizes the important special considerations which apply to information technology projects.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

Total Program Credits Required: 27

Suggested Academic Plan

Information Technology Support Specialist (CCC)

Information Technology Support Specialist
Admission Program Objective Code ITSS

State CIP Code 0511010311

Core Courses

CET 1600C - Networking Fundamentals

This course introduces the student to the basics of Internetworking technology. This is also the first of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study networks and layers, networking devices, IP addressing, ARP and RARP, media and design, topology, structured cabling, electricity, and electronics and network management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Core Courses

COP 1000 - Introduction to Programming Concepts and Logic

General survey of programming/problem solving techniques. Includes an introduction to structured programming. Algorithm development will employ the use of a modern programming language.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2654 - Programming for Mobile Devices: iOS (iPhone/iPad)

This class teaches the fundamentals and provides a broad perspective of the iPhone SDK platform. It begins with an overview of the Objective-C language and progresses into the details of the UIKit, as well as several other frameworks essential for development on the iPhone and iPad.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2660 - Programming for Mobile Devices: Android

This class teaches the fundamentals and provides a broad perspective of the Android development platform. It begins with an overview of the Java language and progresses into the details of the developing for Android-based mobile devices and tablets. The curriculum also covers several other frameworks essential for development on the Android platform.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2840 - Web-based Programming I

This course is designed to extend the student's understanding of web-based programming techniques, and give them practical experience in the use of a range of technologies for creating e-Commerce applications.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2104 - Introduction to Windows

An introduction to operating systems in general with emphasis on Windows.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2163C - Windows Client Operating System

This course addresses the implementation and desktop support needs of the MS client software, including installation, configuration and management of hardware and file systems, user profiles, remote users, and monitoring of resources and performance. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

KNOWLEDGE OF NETWORKING, BASIC COMPUTER, AND KEYBOARDING SKILLS ARE STRONGLY RECOMMENDED.

COP 2650 - Introduction to Mobile Programming

A broad survey of the development of mobile applications and the use of mobile devices. This course will help the student understand the development process for mobile devices, security measures that should be taken and will provide an overview of developing for both the Android and iOS mobile environments.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

COP 1000 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2145 - Cloud Essentials

The course covers cloud concepts and models; virtualization; cloud infrastructure; resource management; security; and systems management. It includes implementation, maintenance and delivery of cloud technologies and infrastructures while ensuring proper security measures are maintained to mitigate risks and threats.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

The Associate in Science (A.S.) Physical Therapist Assistant (PTA) program at Northwest Florida State College is currently pursuing accreditation through the Commission on Accreditation in Physical Therapy Education (CAPTE).

Graduation from a physical therapist assistant education program accredited by CAPTE is necessary for eligibility to sit for the

national licensure examination, which is required in all states. Per USDE regulations, all credits and degrees earned and issued by a program holding candidacy are considered to be from an accredited program.
Effective November 3, 2020, Northwest Florida State College has been granted Candidate for Accreditation status by the Commission on Accreditation in Physical Therapy Education (3030 Potomac Ave., Suite 100, Alexandria, VA, 22305-3085; phone: 703-706-3245; email: accreditation@apta.org). If needing to contact the program/institution directly, please call 850-863-6511 or email pta@nwfsc.edu.
Candidate for Accreditation is an accreditation status of affiliation with the Commission on Accreditation in Physical Therapy Education that indicates the program may matriculate students in technical/professional courses. Achievement of Candidate for Accreditation status does not assure that the program will be granted Initial Accreditation.
This program is a Selective Admission program subject to additional program policies. Policies are strictly enforced and students should work with a Student Success Navigator rather than self-advise. The admission criteria and process are subject to change; students should refer to the Selective Programs Admissions/Physical Therapist Assistant (AS) webpage for the most current information. All PTA technical courses are held at the Fort Walton Beach Campus and students are assigned to clinical practices at various healthcare facilities and outpatient clinics in the region.

Core Courses

HSC 1531 - Medical Terminology

An introduction to prefixes, suffixes, root words, combining forms, Latin and Greek forms, spelling, and pronunciation, with emphasis on building a working medical vocabulary based on body systems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

PHT 1007 - Topics in Physical Therapy

An introduction of the physical therapy profession, to include the history, ethics, settings, trends and professional issues. Delineation of the roles of the health care team, physical therapy personnel, and communication skills required as a healthcare provider. Various regulatory agencies, practice rules and regulations are also included. The student will also explore the psychological and sociological effects of disabilities, including the impact of culture and economics on the patient and family. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Admission to the PTA Technical Program.

PHT 1128 - Functional Anatomy and Kinesiology

An in-depth study of the structure and function of the musculoskeletal system, with emphasis on the biomechanical principles of human motion. To include the organization and function of the nervous system and how it interacts with the musculoskeletal system for control and balanced mobility of the human body. Foundations of functional motions will be covered, such as biomechanics of muscle action, levers and torques in relation to human body, and basic physics concepts that applies to physical therapy. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Admission to the PTA Technical Program.

Corequisite(s):

PHT 1128L

PHT 1128L - Functional Anatomy and Kinesiology Lab

An in-depth study of the structure and function of the musculoskeletal system, with emphasis on the biomechanical principles of human motion. To include the organization and function of the nervous system and how it interacts with the musculoskeletal system for control and balanced mobility of the human body. Foundations of functional motions will be covered, such as biomechanics of muscle action, levers and torques in relation to human body, and basic physics concepts that applies to physical therapy. This course requires a grade of C or higher.
This course requires a Lab Fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):

ADMISSION TO THE PTA TECHNICAL PROGRAM

Corequisite(s):

PHT 1128

PHT 1200 - Basic Patient Care

Introduces the student to basic patient care skills, patient positioning and draping, treatment area preparation, transfers, wheelchair management, and data collection skills. Wound care principles are introduced including types of wounds/burns and other integumentary issues, stages of healing, treatment/dressings, and care/prevention of pressure ulcers. This course is intended to provide an in-depth exposure to the basic skills necessary in the clinic setting and appropriate professorial behaviors. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 1007 , PHT 1128 , PHT 1128L

Admission to the Physical Therapy Program.

Corequisite(s):

PHT 1200L

PHT 1200L - Basic Patient Care Lab

This lab course allows the practice and refinement of the concepts learned in PHT 1200 lecture on simulated patients. Use of equipment commonly found in physical therapy settings, proper body mechanics in moving, lifting, and transferring patients, wheelchair management, aseptic techniques and principles of wound care. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 1007 , PHT 1128 , PHT 1128L

Admission to the Physical Therapy Program.

Corequisite(s):

PHT 1200

PHT 1211 - Physical Therapy Principles and Procedures

Instructs the student in the theory, physiology and application of biophysical agents used for therapeutic treatment of tissue. Knowledge of the physical principles, physiological effects, medical physics, indications, and contraindications of heat, cold, light, traction, compression, electricity, and hydrotherapy. Selected tests and measures are taught related to the safe application of these agents. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):

PHT 1800L and admission to the Physical Therapy Program.

Corequisite(s):

PHT 1211L

PHT 1211L - Physical Therapy Principles and Procedures Lab

This lab course allows the practice and refinement of the concepts learned in PHT 1211 on simulated patients. The application of biophysical agents and data collection skills required for safe application of these modalities. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):

Admission to the Physical Therapy Program.

PHT 1800L

Corequisite(s):

PHT 1211

PHT 1224 - Therapeutic Techniques and Disabilities

An overview of principles and techniques of basic physical therapy interventions, with emphasis on physiological changes and effects in commonly seen disorders across the lifespan. Will include therapeutic exercises, gait training with assistive devices, manual therapy, postural analysis, aerobic conditioning and airway clearance techniques. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 1007 , PHT 1128 , PHT 1128L

Corequisite(s):

PHT 1224L

PHT 1224L - Therapeutic Techniques and Disabilities Lab

This lab course allows the practice and refinement of the concepts learned In PHT 1224 on simulated patients. Students will

receive hands-on experience with a variety of exercise equipment and practice in performing, assisting, and teaching of therapeutic exercises. Selected tests and measures will be introduced in this course. This course requires a grade of C or higher. This course requires lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 1007 , PHT 1128 , PHT 1128L

Corequisite(s):
PHT 1224

PHT 1800L - Physical Therapy Clinical Practice I

A supervised clinical experience, 2 concurrent weeks of full time clinical education exposure for an introductory experience. Students observe and implement physical therapy services under the close supervision of a clinical instructor. This course requires a passing grade on a Pass/ Fail scale. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 1200 , PHT 1200L , PHT 1224 , PHT 1224L , PHT 1931 , PHT 2301

Prereq/Corequisites:
PHT 1931

PHT 1931 - PTA Seminar

An orientation to the physical therapy clinic environment. The course covers professional clinical expectations, treatment preparation, risk management, the medical record and medical documentation. This course requires a grade of C or higher.

Credit Hour(s): 1 Credit Hour When Offered: (Fall) Prerequisite(s):
PHT 1007 , PHT 1128 , PHT 1128L

PHT 2162 - Neurological Disabilities and Treatment

A comprehensive review of the human nervous system and selected neurological disabilities encountered frequently in physical therapy practice. The course addresses knowledge and application of a variety of therapeutic techniques utilized with patients across the lifespan that have chronic neurological conditions. Stages of motor development and movement strategies are also discussed. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2162L

PHT 2162L - Neurological Disabilities and Treatment Lab

This lab course allows the practice and refinement of the concepts learned in PHT 2162 on simulated patients. Clinical scenarios that require critical thinking skills to develop treatment, progress and follow-up plans for patients with various neurological conditions. Students will also learn about various assessment techniques including sensory, balance and coordination, reflexes, gait analysis, functional and environmental assessment, and perceptual and cognitive deficit assessment. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2162

PHT 2252 - Orthopedic Disabilities and Treatment

Concepts of orthopedic physical therapy management as well as the therapeutic applications related to bone, cartilage, muscle and soft tissue healing processes. Various musculoskeletal diseases and orthopedic conditions will be introduced including their related pathology and treatment plans. Various surgical precautions, tests and measures, common orthotics, gait deviations, joint mobilizations, soft tissue techniques, and use of modalities for orthopedic conditions. Diagnostic tools such as plain film radiography, computed tomography, diagnostic ultrasound, and magnetic resonance imaging will be introduced. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):

PHT 2252L

PHT 2252L - Orthopedic Disabilities and Treatment Lab

This lab course allows the practice and refinement of the concepts learned in PHT 2252. Clinical scenarios that require data collection and therapeutic applications for common orthopedic conditions. The development of critical thinking, clinical problem solving, and effective treatment plans for various orthopedic conditions. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 1 Credit Hour When Offered: (Spring) Prerequisite(s):

PHT 1800L

Corequisite(s):

PHT 2252

PHT 2301 - Pathological Conditions in PT

This course introduces the pathophysiology of selected disease processes. Disease signs, symptoms, complications, as well as clinical, typical pharmacologic agents and laboratory findings are reviewed by body system. Emphasis will be placed on conditions typically encountered in the physical therapy setting. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 1007 , PHT 1128 , PHT 1128L

PHT 2704 - Advanced Rehab Concepts in PT

Designed to provide a variety of therapeutic principles and techniques utilized in the clinical setting to address special populations with advanced rehab needs. This includes accessibility to home and community for all patients, women's health, pediatric conditions, bariatrics, geriatrics, and advanced management of amputation and prosthetics. Patient education and the education of others about physical therapy are included. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Summer) Prerequisite(s):

PHT 2810L

Corequisite(s):

PHT 2704L

PHT 2704L - Advanced Rehab Concepts in PT Lab

This lab course allows the practice and refinement of the concepts learned in PHT 2704 on simulated patients. Students will engage in patient education and utilize appropriate teaching methods for their target audience. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 1 Credit Hour When Offered: (Summer) Prerequisite(s):

PHT 2810L

Corequisite(s):

PHT 2704

PHT 2810L - Physical Therapy Clinical Practice II

A supervised clinical experience, 4 concurrent weeks of full time clinical education exposure for an integrated clinical education experience. Students implement physical therapy services under the close supervision of a clinical instructor. Students will be expected to perform specific therapeutic procedures covered in prior coursework. This course requires a passing grade on a Pass/ Fail scale. This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHT 1800L , PHT 1211 , PHT 1211L , PHT 2252 , PHT 2252L , PHT 2162 , PHT 2162L

PHT 2820L - Physical Therapy Clinical Practice III

The final supervised clinical experience, 8 concurrent weeks of full time clinical education designed to prepare PTA students for entry into the profession of physical therapy. Student will have the opportunity to refine all treatment interventions and data collection skills, plus demonstrate professional behaviors throughout the clinical experience. This course requires a passing grade on a Pass/Fail scale.This course requires a lab fee.

Credit Hour(s): 8 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 2810L , PHT 2704 , PHT 2704L

PHT 2930 - Trends in Physical Therapy

This course broadens the scope of the student's understanding of the health care system. Topics include trends in healthcare and their influence on physical therapy, administrative procedures utilized in physical therapy, and ethical problem solving. Community

service, citizenship and advocacy will be addressed. The course will include mock quizzes and a timed mock examination in preparation for the NPTE. Students will also develop skills necessary for employment including interview techniques and developing a resume and cover letter. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 2704 , PHT 2704L

Total Core Credits Required: 54

Total Program Credits Required: 74

Suggested Two Year Academic Plan

Medical Laboratory Technology (AS)

Admission Program Objective Code MLTP State CIP Code 1351100405
The AS MLT program at Northwest Florida State College is currently seeking accreditation through the National Accrediting Agency for Clinical Laboratory Science (NAACLS), https://www.naacls.org/about.aspx.
This program is a Selective Admission Program subject to additional program policies. Policies are strictly enforced and students should work with a Student Success Navigator rather than self-advise. The admission criteria and process are subject to change; students should refer to the Selective Programs Admissions/Medical Laboratory Technology (AS) web-page for the most current information. All MLT technical courses are held at the Fort Walton Beach Campus and students are assigned to clinical practicums at various medical laboratories in the region.

Core Courses

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MCB 2010C - Microbiology, Allied Health

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C .

MLT 1022C - Introduction to Medical Laboratory Technology

This course outlines the role of the medical laboratory technician and covers the basic principles, techniques, and vocabulary applicable to medical laboratory technology. It also provides overviews of the major regulatory agencies, professional associations, and safety practices. Students will learn basic laboratory mathematics, medical laboratory ethics, specimen collection and handling, and phlebotomy and venipuncture procedures. Admittance to the MLT program is required. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1221C - Urinalysis and Body Fluids

This course covers clinical testing and evaluation of urine and other body fluids. Students will learn to correlate physical, chemical, and microscopic lab findings with disease conditions. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1300C - Hematology I

This course overviews the theories and techniques involved in routine hematology. Topics include the hematopoietic system and blood cell physiology, maturation, and morphology. Students will learn blood cell enumeration, identification, hemoglobin analysis, and clinical correlations. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1302C - Hematology II

This course is a continuation of Hematology I and presents advanced hematology topics as well as the principles and procedures of blood coagulation. Students will examine the role of blood vessels, platelets, and coagulation factors, as well as hematology and hemostasis disease factors. This course requires a grade of C or higher. This requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
MLT 1300C , ADMITTANCE TO MLT PROGRAM

MLT 1401C - Medical Microbiology

This course presents students with principles and methods used in clinical microbiology including taxonomy, isolation, identification, clinical relevance, and antibiotic susceptibility testing of pathogenic bacteria. Students will also receive an introduction to medical parasitology, mycology, and virology. Admittance to the MLT program is required. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 6 Credit Hours When Offered: (Fall) Prerequisite(s):
MCB 2010C , admittance to the MLT program

MLT 1500C - Immunology/Serology

This course covers basic concepts and laboratory practices related to clinical immunology with an emphasis on antibody-antigen interaction in specific diseases. Students will learn about the immune system and its components along with diagnostic principles and procedures involving serological and molecular testing related to immunity and immune disorders. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1525C - Immunohematology

This course overviews the basic theory and concepts of antigen-antibody reactions associated with blood cell transfusions and relates the concepts of immunology to blood banking procedures using the guidelines of the American Association of Blood Bank. Students will examine genetics, the structure of blood group antigens, the role of antibodies in transfusion, complement interactions, and compatibility testing. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
MLT 1022C , MLT 1300C , MLT 1500C

MLT 1610C - Clinical Chemistry

This course outlines the theory, clinical correlations, and laboratory procedures related to the chemical analysis of clinical specimens. Students will receive in-depth instruction on specimen processing, analysis, test interpretation, and quality control procedures used in manual and automated clinical chemistry testing. Admittance to the MLT program is required. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 6 Credit Hours When Offered: (Spring) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 2800L - Clinical Practicum I

Students will be assigned to a clinical affiliate for supervised clinical laboratory experience in either the core laboratory, blood bank,

or microbiology department. This learning experience allows students to perform routine analytical procedures, develop their laboratory skills, and apply program knowledge. This course requires a grade of C or higher.

Credit Hour(s): 4 Credit Hours When Offered: (Summer) Prerequisite(s):

MLT 1022C , MLT 1221C , MLT 1300C , MLT 1302C , MLT 1401C , MLT 1500C , MLT 1525C , MLT 1610C , and admittance to the Medical Laboratory Technology program.

MLT 2807L - Clinical Practicum II

Students will be assigned to a clinical affiliate for supervised clinical laboratory experience in the blood bank either the core laboratory, microbiology department, or blood bank. This learning experience allows students to perform routine blood banking procedures, develop their laboratory skills, and apply program knowledge. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):

MLT 1022C , MLT 1300C , MLT 1221C , MLT 1401C , MLT 1525C and admittance to the Medical Laboratory Technology program.

MLT 2811L - Clinical Practicum III

Students will be assigned to a clinical affiliate for supervised clinical laboratory experience in either the core laboratory, blood bank, or microbiology department. This learning experience allows students to perform routine analytical procedures, develop their laboratory skills, and apply program knowledge. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):

MLT 1401C and admittance to the Medical Laboratory Technology program.

MLT 2930 - Medical Laboratory Technology Capstone

This online course allows students to apply their MLT knowledge to case studies and to review major areas of the MLT curriculum in preparation to become licensed professionals. Students will discuss and review material in hematology, urinalysis, microbiology, clinical chemistry, immunohematology, immunology, molecular methods, laboratory operations, medical ethics, and laboratory safety precautions.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

MLT 1221C , MLT 1401C , MLT 1302C , MLT 1610C , MLT 1525C , MLT 1500C , and admittance to the Medical Laboratory Technology program.

General Education

Total General Education Credits Required: 18

Core Courses

CET 2660 - Network Security

This course provides an in-depth study of network security concepts and techniques. Students examine theoretical concepts that make computer network security unique. This course provides a practical, hands-on approach when examining networking security techniques. Students examine different network strategies, explore the advancement of network implementation, and study timeless problem solving strategies. The course is also intended to assist with preparation for the CompTIA Security+ certification.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of networking basic computer, and keyboarding skills are strongly recommended.

CET 2179C - PC Operating Systems A+

This course is designed to help prepare the student to take the A+ Certification exams by making the student proficient in personal computer operating systems, including Windows. Major topics include disk and file management, system configurations, menu driven processing, graphical user interfaces, boot files, disk caching, virtual memory, device drivers, remote assistance, and security essentials and security practices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2182C - PC Hardware A+

This course is designed to prepare the student to take the A+ Certification exam, by teaching the student basic technical skills needed to understand the function and operation of the major elements of personal computer systems, and how to localize and correct common hardware and software problems.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 2541 - Introduction to Database Concepts

This course will provide an introduction to data modeling and the design and implementation of relational databases and extend the students' understanding of the principles and techniques used in the design and implementation of modern database systems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 1106 - Fundamentals of UNIX

This course is designed to introduce the UNIX operating system to new users. The student will learn fundamental features of the operating system, including file system navigation, file permissions, editors, command shells, and basic network use. Provides a foundation for more advanced courses in administration and certification.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of networking, basic computer and keyboarding skills are strongly recommended.

CTS 1156C - Desktop Support

This course introduces the helpdesk skills to troubleshoot hardware or software operation and application problems for end users on the desktop or client-side, based on the Windows operating system. It is designed to help prepare the student to take the two core exams (70-620 and 70-622) required for certification as an MCITP: Enterprise Support Technician students should have user-level competency with Windows and MS Office.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2104 - Introduction to Windows

An introduction to operating systems in general with emphasis on Windows.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 1134 - Network Foundations

This course is designed to introduce students to the terminology and concepts of the network industry, including data communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2163C - Windows Client Operating System

This course addresses the implementation and desktop support needs of the MS client software, including installation, configuration and management of hardware and file systems, user profiles, remote users, and monitoring of resources and performance. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
KNOWLEDGE OF NETWORKING, BASIC COMPUTER, AND KEYBOARDING SKILLS ARE STRONGLY RECOMMENDED.

CTS 2390C - Installing and Configuring Windows Server

This course is the first of a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server infrastructure in an existing enterprise environment. The three courses in total collectively cover implementing, managing, maintaining, and provisioning services and infrastructure in a Windows Server environment. While there is some cross-over in skill set and tasks across the courses, this course primarily covers the initial implementation and configuration of those core services, such as Active Directory Domain Services, networking services, and initial Hyper-V configuration and is also preparation material for.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 1142 - Information Technology Project Management

This introductory course teaches the essentials of information technology project management. This course provides an introduction to the project management body of knowledge, as specified by CompTIA project+. The course discusses the processes, methods, techniques and tools that organizations use to manage information systems projects. The course covers a systematic methodology for initiating, planning, executing, controlling, and closing projects and emphasizes the important special considerations which apply to information technology projects.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

CTS 2145 - Cloud Essentials

The course covers cloud concepts and models; virtualization; cloud infrastructure; resource management; security; and systems management. It includes implementation, maintenance and delivery of cloud technologies and infrastructures while ensuring proper security measures are maintained to mitigate risks and threats.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

Total Core Credits Required: 36

Technical Elective Courses

CET 1600C - Networking Fundamentals

This course introduces the student to the basics of Internetworking technology. This is also the first of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study networks and layers, networking devices, IP addressing, ARP and RARP, media and design, topology, structured cabling, electricity, and electronics and network management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

COP 1000 - Introduction to Programming Concepts and Logic

General survey of programming/problem solving techniques. Includes an introduction to structured programming. Algorithm development will employ the use of a modern programming language.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2654 - Programming for Mobile Devices: iOS (iPhone/iPad)

This class teaches the fundamentals and provides a broad perspective of the iPhone SDK platform. It begins with an overview of the Objective-C language and progresses into the details of the UIKit, as well as several other frameworks essential for development on the iPhone and iPad.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2660 - Programming for Mobile Devices: Android

This class teaches the fundamentals and provides a broad perspective of the Android development platform. It begins with an overview of the Java language and progresses into the details of the developing for Android-based mobile devices and tablets. The curriculum also covers several other frameworks essential for development on the Android platform.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2840 - Web-based Programming I

This course is designed to extend the student's understanding of web-based programming techniques, and give them practical experience in the use of a range of technologies for creating e-Commerce applications.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2347C - Windows Network Infrastructure

This course addresses the configuration of Windows Server network infrastructure. Topics covered include: routing and remote access, network access protection, network authentication, IPv4 and IPv6 addressing, DHCP, DNS, WINS, DFS, IPSec, and security. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed) Prerequisite(s):

Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

CTS 2302C - Windows Active Directory

This course focuses on a Windows server directory service environment, including forest and domain structure, DNS, site topology and replication, organizational unit structure and delegation of administration, Group Policy, and user/group/computer account strategies. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

CTS 1156C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2346C - Windows Server Administrator

This course will provide students with the opportunity to develop the skills required to manage accounts and resources, maintain server resources, monitor server performance, and safeguard data. Recommended knowledge level: A+, Network +, Security + and Win client operating system. This course prepares the student for the MCITP exam.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2391C - Administering Windows Server

This course is the second in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server infrastructure in an existing enterprise environment. The three courses in total will collectively cover implementing, managing, maintaining and provisioning services and infrastructure in a Windows Server environment. While there is some cross-over in skills and tasks across the courses, this course will primarily cover the administration tasks necessary to maintain a Windows Server infrastructure, such as user and group management, network access and data security and is also preparation material for, Exam 70-411: Administering Windows Server.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

CTS 2390C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2392C - Configuring Advanced Windows Server

This course is the third in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server Infrastructure in an existing enterprise environment. While there is some cross-over in skill sets and tasks across the three courses this course will primarily cover advanced configuration and services tasks necessary to deploy, manage and maintain a

Windows Server infrastructure, such as identity management and identity federation, network load balancing, business continuity and disaster recovery, fault tolerance and rights management. This course is also preparation material, and maps directly to, Exam 70-412: Configuring Advanced Windows Server Services.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

CTS 2391C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2650 - Introduction to Mobile Programming

A broad survey of the development of mobile applications and the use of mobile devices. This course will help the student understand the development process for mobile devices, security measures that should be taken and will provide an overview of developing for both the Android and iOS mobile environments.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

COP 1000 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Total Technical Elective Credits Required: 6

Total Program Credits Required: 60

Two-Year Suggested Academic Plan

Professional Pilot Technology (AS)

Admission Program of Study Code (AS-AIRP)
State CIP Code 1649010200

This program provides students with the skills and knowledge needed to earn the FAA pilot certificates required to begin their flying careers. Students may start taking course leading to the degree, however, they must first obtain a private pilot certificate prior to starting in flight training courses. Students completing the degree will earn a Commercial Pilot certificate with single and multi-engine, and instrument rating. Student may also earn a Flight Instructor certificate as an elective. Students already holding pilot certificates and/or ratings may receive college credit for those certificates as determined by Northwest Florida State College program policies and the Federal Aviation Administration rules which may include an evaluation of the student's certificates, training received, and conducting flight proficiency checks. Additionally, this is a high cost program and it requires the student to first obtain the appropriate medical certificate prior to the start of flight training. Successful completion of the program will allow graduates to start in entry-level jobs as pilots or as flight instructors to enable building the required flight hours for more advanced flying careers.

Technical Core Courses

ENC 2210 - Technical Report Writing

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

passing score on placement test.

ATT 1100 - Private Pilot Ground School

An introductory survey of the subjects pertaining to flight; aircraft operation and performance, weather, pilotage, air traffic control and Federal Aviation Regulations in preparation for the Federal Aviation Administration Private Pilot Written examination.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 1610C - Aircraft Systems and Components

This course provides students with a basic understanding of the various types of aircraft engines, systems, and structures in use in both general aviation and transport category aircraft (airliners). Students will learn about engine types and their construction,

operating procedures, and performance. Aircraft structures and construction methods will also be examined, along with an overview of hydraulic, electric, pressurization, fuel, and anti-ice systems.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ATT 1120 - Instrument Rating Ground School

This course provides the classroom instruction required for instrument flight training and the FAA Instrument-Airplane Knowledge Test. Topics include flight by instrument reference, flight physiology, IFR aircraft operations and procedures, radio navigation, in-route charts, instrument approach procedures, flight planning, weather, and IFR regulations. Students who complete the course satisfactorily may earn the required endorsement to take the FAA Instrument Rating Knowledge Test. Students are required to be enrolled in, or have completed, this course prior to beginning Instrument flight training. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Students must hold a Private Pilot, Airplane Single-Engine Land certificate

ATF 2201L - Commercial Flight I

This is the first of three courses needed to complete the training required for the FAA Commercial Pilot certificate for single-engine airplanes. This course covers the first phase of commercial pilot training: cross-country navigation and flight review. It includes 33 hours of solo flight, 11 hours of dual flight instruction, and five hours of ground instruction and pre-/post flight briefings with an FAA-approved flight instructor. After completing this course, students take Commercial Flight II and III to meet the requirements for the Commercial Pilot certificate. It should be noted that the hours above are based on FAA-syllabus minimums, and students may exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:

1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.

Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

Students must hold a Private Pilot, Airplane Single-Engine Land certificate

Prereq/Corequisites:

Must be enrolled in, or have completed ATT 2110

ATF 2202L - Commercial Flight II

This is the second of three courses needed to complete the training required for the FAA Commercial Pilot certificate for single-engine airplanes. This course covers the second and third phases of commercial pilot training: cross-country time-building. It includes 32 hours of solo flight, 14 hours of dual flight instruction, and five hours of ground instruction and pre-/post flight briefings with an FAA-approved flight instructor. After completing this course, students take Commercial Flight III to complete the requirements for the Commercial Pilot certificate. It should be noted that the hours above are based on FAA-syllabus minimums, and students may exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:

1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.

Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

Students must hold a Private Pilot, Airplane Single-Engine Land certificate

Prereq/Corequisites:

ATF 2201L

ATF 2203L - Commercial Flight III

This is the third of three courses needed to complete the training required for the FAA Commercial Pilot certificate for single-engine

airplanes. This course covers the fourth and fifth phases of commercial pilot training: commercial maneuvers and complex airplane training. It includes 30 hours of dual instruction including 10 hours in a complex airplane, and 12 hours of ground instruction and pre-/post flight briefings with an FAA approved flight instructor. The course requirements are met when the student earns his or her Commercial Pilot certificate for single-engine airplanes. It should be noted that the hours above are based on FAA-syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs. Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

Students must hold a Private Pilot, Airplane Single-Engine Land certificate

Prereq/Corequisites:

ATF 2202L

ATF 2305L - Instrument Pilot Flight I

This course provides the training required for the FAA Instrument Airplane rating. It includes 38 hours of dual flight instruction and 9 hours of ground instruction and pre-/post flight briefings with an FAA-approved flight instructor. The course requirements are met when the students earns his or her Instrument rating. It should be noted that the hours above are based on FAA syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs. Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

Students must hold a Private Pilot, Airplane Single-Engine Land certificate.

Prereq/Corequisites:

Must be enrolled in, or have completed ATT 1120 .

ASC 1320 - Aviation Laws and Regulations

Upon completion of the course, the student will be able to describe and explain the activities and roles played by federal, state, and local aviation entities. Will be able to outline the manner in which the FAA enforces aviation administrative regulations. Will be able to differentiate between the public and private sectors of aviation liability and describe methods to minimize risk. Will be able to compare and contrast domestic and international aviation law.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 1870 - Aviation Safety

The primary goal of this course is to provide aspiring aviation professionals with a comprehensive understanding and enhanced awareness of aviation safety. Class participation in analyzing the probable cause of selected aviation accidents, field trips, and guest speakers will be featured. Federal agencies which regulate aviation, with emphasis on those concerned with safety, will be studied. Information on how flight affects the human body and actions to minimize adverse effects.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2210 - Aviation Meteorology

This introductory level course acquaints the aviation student with the fundamentals of the Earth's atmosphere, current theories on meteorology, and the effects of weather on aircraft and air traffic control. Particular emphasis will be given to the acquisition and interpretation of weather reports and forecasts from various weather information sources. Aviation weather is specifically designed for the aviation student wishing to improve his knowledge and understanding of aviation weather (both theory and services) beyond that necessary for any of the FAA computer-based pilot knowledge tests.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2473 - Human Factors and Resource Management

This course provides an introduction to the field of human factors, which focuses on the interaction between humans and machines in the complex aviation environment. Human physiology and human performance within the flight environment are examined in depth. Students apply human factors concepts to single pilot resource management (SRM) and crew resource management (CRM) within the framework of threat and error management (tem). Professionalism in aviation is a major focus of the course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2550 - Aerodynamics

An analysis of the physical laws and aerodynamic principles which govern the flight and performance of aircraft stability and control, weight and balance, and aircraft instruments affecting flight operational considerations of controllable pitch propellers, retractable gear, weather, and precision maneuvers.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prereq/Corequisites:

PHY 1020

ATF 2400L - Multi Engine Flight I

This course provides both the ground and flight training needed to earn the FAA Multi-Engine rating. It includes 10 hours of dual flight instruction and 18 hours of ground instruction and pre-/post flight briefings with an FAA approved flight instructor. The course requirements are met when the student earns his or her Multi-Engine Commercial rating. It should be noted that the hours above are based on FAA-syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass.

This course also has special requirements, which students must meet prior to enrolling:

1. students must hold a Private Pilot, Airplane Single-Engine Land certificate,
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.

Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prereq/Corequisites:

ATF 2203L

ATF 2500L - Certified Flight Instructor I

This course provides the training needed to earn the FAA Certified Flight Instructor certificate for airplanes. It includes 25 hours of dual flight instruction and 6 hours of ground instruction and pre-/post flight briefings with an FAA approved flight instructor. The course requirements are met when the students earns his or her Certified Flight Instructor certificate for airplanes. It should be noted that the hours above are based on FAA-syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:

1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.

Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prereq/Corequisites:

ATT 2131

ATT 2110 - Commercial Pilot Ground School

This course provides the classroom instruction required for Commercial Pilot flight training and the FAA Commercial Pilot-Airplane Knowledge Test. Topics include advanced aircraft systems, high performance engines, retractable landing gear, and environmental systems, advanced performance charts, maximizing aircraft performance, and regulations relating to commercial operations. Students who complete the course satisfactorily may earn the required endorsement to take the FAA Commercial Pilot-Airplane Knowledge Test. Students are required to be enrolled in, or have completed, this course prior to beginning Commercial Pilot flight training. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Students must hold a Private Pilot, Airplane Single-Engine Land certificate

ATT 2131 - Certified Flight Instructor Ground

This course provides the classroom instruction required for Certified Flight Instructor training and both the FAA Fundamentals of Instructing and Flight Instructor-Airplane Knowledge Tests. Topics include the learning process, elements of effective teaching, student evaluation and testing, course development, lesson planning, and classroom training techniques. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ATF 2203L

Total Technical Core Credits Required: 39

Specialization Elective Courses

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
none

MAN 2021 - Management

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

ASC 2560C - Unmanned Aerial Vehicles & Systems

This course is a survey of unmanned aerial vehicles (UAV) and systems, emphasizing the military and commercial history, growth and applications of UAVs. Course will include basic acquisition, use and operation of UAVs with an emphasis on operations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
ATT 1100

ATT 2111 - Aircraft Systems Advanced

This course enhances the classroom instruction required for Commercial Pilot flight training. Topics include advanced aircraft systems, high performance engines, retractable landing gear, and environmental systems, advanced performance charts, maximizing aircraft performance, and regulations relating to commercial operations.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ATF 2530L - Certified Flight Instructor Instrument

This course provides a study of the aeronautical skills and abilities required for the Certified Flight Instructor Airplane Certificate. Students apply skills from prior classes to explain, demonstrate, and analyze flight maneuvers and resource management skills involved with Private Pilot, Commercial Pilot, and Flight Instructor Certificates. The course also provides practical flight instruction experiences. Students must complete the appropriate flight lessons and pass the Federal Aviation Administration's Flight Instructor Airplane Single Engine Practical Exam to satisfactorily complete the course. Flight training fees (in addition to the cost of tuition) are required and must be paid in advance of the course start date. Flight training fees for this course are based on 25 hours of flight training, which is the minimum number of flight hours allowed by the FAA for completion of the Flight Instructor - Airplane Certification. Any additional training required beyond the FAA minimum is the financial responsibility of the student. This course also has special requirements, which students must meet prior to enrolling

1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)

3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs. Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

ATF 2500L and ATF 2305L

Total Specialization Elective Credits Required: 7

Total Program Credits Required: 64

Suggested Two-Year Academic Plan

Aviation Airframe Mechanics (CCP)

Admission Program of Study Code (VC-AIRF)
State CIP Code 0647060703

The Aviation Airframe Mechanics certificate program provides the training leading to eligibility to test for the written, and oral and practical exams required to obtain the Federal Aviation Administration (FAA) Airframe Mechanics license. This program provides instruction consisting of a sequence of courses that involves the theoretical knowledge and practical laboratory training to develop the skills necessary to fulfill the FAA eligibility requirement for testing.
This training is highly intensive in developing the academic, technical, and professional skills, knowledge and attitudes required for success in the aviation maintenance field. It is a clock hour program which is approximately 15 months in length, and is designed to meet the FAA standards which dictates a rigid class attendance and grading policy. Subjects will include inspect, service, repair, and overhaul of various airframe systems and components to include aircraft structures, hydraulics, electrical and electronics, flight controls, landing gear and brakes, aircraft instruments and cabin environmental systems.
Successful completion of the program, and acquiring the FAA airframe license will provide career opportunities within general aviation, commercial airlines, repair stations, airframe manufacturing, as well as maintenance support of military aircraft.

Core Courses

AMT 0701 - Aviation Maintenance Technology General I

This course introduces basic information necessary for an entering student in aviation maintenance technology. Emphasis is placed on math and physics and Federal Aviation Administration (FAA) and manufacturers' technical and legal publications.

Credit Hour(s): 110 Clock Hours When Offered: (Offered as needed)

AMT 0702 - Aviation Maintenance Technology General II

This course introduces aircraft drawings/charts & graphs, aircraft hardware and materials, precision measuring tools, fluid lines and fittings, safety wire methods. Emphasis is on studying aircraft drawings/charts & graphs, identification and selection of aircraft hardware, fabrication and inspection of flexible and rigid fluid lines, safety wiring on bolts and turnbuckles.

Credit Hour(s): 110 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

AMT 0701

AMT 0703 - Aviation Maintenance Technology General III

This course provides a study in basic electricity. Emphasis is placed on alternating current (AC) and direct current (DC) circuits and controls, electrical measurements, electrical test equipment, aircraft batteries, fundamental electronics, and semi-conductor devices.

Credit Hour(s): 110 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0702

Prereq/Corequisites:
AMT 0702

AMT 0704 - Aviation Maintenance Technology General IV

This course introduces aircraft ground operations, fuels, cleaning and corrosion control methods, weight & balance, and performance of non-destructive testing. The student must achieve a minimum Final Comprehensive exam grade of 70% or above to pass the course and the Course Average must be a 70% or above to pass the course.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0703

Prereq/Corequisites:
AMT 0703

AMT 0712 - Aviation Maintenance Technology Airframe I

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft structural assembly and rigging, aircraft non-metallic, and aircraft electrical systems.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0701 , AMT 0702 , AMT 0703 , AMT 0704 . Successful completion of all General subject courses.

Prereq/Corequisites:
AMT 0701, AMT 0702, AMT 0703, AMT 0704

AMT 0713 - Aviation Maintenance Technology Airframe II

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft finishes and fabric covering, wood structures, assembly and repair of sheet metal structures, and introduction to aircraft welding techniques.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0712

AMT 0714 - Aviation Maintenance Technology Airframe III

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft hydraulics and pneumatics, landing gear systems, aircraft cabin atmospheric control systems.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0713

Prereq/Corequisites:
AMT 0713

AMT 0717 - Aviation Maintenance Technology Airframe IV

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft airframe fuel, ice and rain control, and fire detection, protection and extinguishing systems; instrument, position and warning, pitot static, and communications and navigation systems.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0714

Prereq/Corequisites:
AMT 0714

Suggested Academic Plan

Total Program Contact Hours: 1350

Emergency Medical Technician (ATD)

Admission Program Objective Code: EMTA
State CIP Code 0351090413
This is an instructional program that prepares students for employment as emergency medical technicians and treat various medical/trauma conditions using appropriate equipment and materials. The program prepares students for certification as EMT's in accordance with Chapter 64J of the Florida Administrative Code. This is the initial level for a career in emergency medical services and the primary prerequisite for paramedic training and certification.
Contact the Public Safety Training Center at (850) 729-5378 for more information.

Core Courses

EMS 0110 - Emergency Medical Technician

This is an instructional program that prepares students for employment as emergency medical technicians and treat various medical/trauma conditions using appropriate equipment and materials. The program prepares students for certification as EMT's in accordance with Chapter 64J of the Florida Administrative Code. This is the initial level for a career in emergency medical services and the primary prerequisite for paramedic training and certification.

Credit Hour(s): 300 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Total Program Hours: 300 Clock Hours

Building Construction Specialist (CCC)

Admission Program of Study Code BUCO State CIP Code 0615100103

The purpose of this program is to prepare students for employment in the building construction field or to provide additional training for persons previously or currently employed in the construction or other related industries. The coverage includes communication skills, technical competency, safe and efficient work practices, and a combination of theory and laboratory activities to gain the necessary cognitive and manipulative skills to support building construction activities. Candidates interested in this program should be interested in working with their hands and the satisfaction of knowing they played a part in a newly constructed or remodeled facility.

Core Courses

BCN 1272C - Blueprint Reading for Commercial Construction

A course to familiarize non-drafting students with techniques of blueprint reading and the fundamentals of construction methods that make blueprint reading meaningful.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 1520C - Electrical Systems in Construction

A course to familiarize students with electrical terminology, practices, methods, code requirements and safety and health in construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 1567C - Plumbing and Gas Construction Practices

A course to familiarize students with Plumbing and Gas code requirements, terminology, methods, practices, processes and safety and health used in building construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 2560C - Mechanical Systems in Construction

A course to familiarize students with mechanical trades terminology, methods, practices, code requirements processes, and safety and health criteria in mechanical construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 2721 - Construction Management/Planning

The course covers project development and organization from pre-construction site investigation to final completion. The course will include the management of project estimates, plans, schedules, operations and safety. The student will become knowledgeable about documents used in the construction industry for bid, contracts, zoning, permits, bonds, loans specifications and drawings. Cost engineering, procurement, value engineering and quality assurance will be covered. Cost management through job cost analysis and purchase order systems will also be covered.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCT 2761C - Structural Systems in Construction

A course to familiarize students with structural terminology, practices, methods, code requirements and safety, and health criteria in construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCT 2770 - Construction Estimating

A course in estimating as it relates to the construction industry covering references, estimating methods, take-off organization and presentation; material take-off, cost estimating in heavy construction, mathematical formulas for estimating, quantity take-off from plan review, and computer estimating overview.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

BCN 1230 , BCN 1272C .

Total Program Credits Required: 21

Suggested Academic Plan

Business Specialist (Human Resources) (CCC)

Admission Program of Study Code: BMHR State CIP Code 0552020103 Students who successfully complete this certificate may be eligible to receive credits toward the Business Administration (AS) degree (CIP Code 1552020102).

Core Courses

MAN 2021 - Management

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2300 - Personnel Management

An introduction to personnel practices and procedures. Topics include the personnel management system, maximizing employee potential, organizational behavior, and labor management relations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1345 - Supervision I
The course presents the functions of a personnel manager, philosophy of general management, organizational structure, employer socioeconomic climate and career information. Included also are job descriptions and specifications, recruiting practices, applications, resumes, interviewing, placement, performance appraisals, wage and salary administration and other related topics.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2100 - Organizational Behavior
Designed to help students develop an understanding of how they may be motivated to work together in greater harmony in all kinds of organizations. The basis of human motivation and how it is influenced by leadership, the organization itself, and the social environment in which the organization exists.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

Course Descriptions

All Courses
Developmental Education Courses
Directed independent study provides opportunities for students to earn college credits in standard courses by working with a college instructor on an independent basis. Students enrolling for courses under Directed Independent Study (DIS) are expected to accomplish the goals and objectives as specified in the course syllabus and are expected to attend such class meetings, group sessions, and working conferences as specified by the instructor. Courses are scheduled on a flexible basis as approved by the instructor, the department chair, and by the Vice President of Academic Affairs with the understanding that final exams will be taken and grades awarded during the term in which they begin. All regular fees apply to DIS courses.
DIS course enrollments are authorized under the following conditions:
A documented need exists for the student(s) to enroll for the course immediately rather than taking an alternate course or waiting until the next term in which the desired course would be offered.
The student is able to identify an instructor who is willing to teach the course as DIS.
The student understands the extensive burden which he or she is undertaking.
Enrollment is approved by the Department Chair and Vice President of Academic Affairs.
When it is not feasible for the course/section to be scheduled concurrently and taught at the same time and locations as another course/section.

Florida's Statewide Course Numbering System

Courses in this catalog are identified by prefixes and numbers that were assigned by Florida's Statewide Course Numbering System (SCNS). This numbering system is used by all public postsecondary institutions in Florida and by participating nonpublic institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions. Students and administrators can use the online SCNS to obtain course descriptions and specific information about course transfer between participating Florida institutions. This information is at the SCNS website at http://scns.fldoe.org. Each participating institution controls the title, credit, and content of its own courses and recommends the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course numbers are assigned by members of faculty discipline committees appointed for that purpose by the Florida Department of Education in Tallahassee. Individuals nominated to serve on these committees are selected to maintain a representative balance as to type of institution and discipline field or specialization.

The course prefix and each digit in the course number have a meaning in the SCNS. The listing of prefixes and associated courses is referred to as the "SCNS taxonomy." Descriptions of the content of courses are referred to as "statewide course profiles."

Examples of Course Identifiers

Prefix	Level Code (first digit)	Century Digit (second digit)	Decade Digit (third digit)	Unit Digit (fourth digit)	Lab Code
ENC	1	1	0	1	English Composition

General Rule for Course Equivalencies

Equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course number and are guaranteed to be transferable between participating institutions that offer the course, with a few exceptions, as listed below in Exceptions to the General Rule for Equivalency.
For example, a freshman composition skills course is offered by 84 different public and nonpublic postsecondary institutions. Each institution uses "ENC_101" to identify its freshman composition skills course. The level code is the first digit and represents the year in which students normally take the course at a specific institution. In the SCNS taxonomy, "ENC" means "English Composition," the century digit "1" represents "Freshman Composition," the decade digit "0" represents "Freshman Composition Skills," and the unit digit "1" represents "Freshman Composition Skills I."
In the sciences and certain other areas, a "C" or "L" after the course number is known as a lab indicator. The "C" represents a combined lecture and laboratory course that meets in the same place at the same time. The "L" represents a laboratory course or the laboratory part of a course that has the same prefix and course number but meets at a different time or place.
Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course to be transferred is equivalent to one offered by the receiving institution. Equivalencies are established by the same prefix and last three digits and comparable faculty credentials at both institutions. For example, ENC 1101 is offered at a community college. The same course is offered at a state university as ENC 2101. A student who has successfully completed ENC 1101 at a Florida College System institution is guaranteed to receive transfer credit for ENC 2101 at the state university if the student transfers. The student cannot be required to take ENC 2101 again since ENC 1101 is equivalent

to ENC 2101. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving institution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to the native students. It is the prerogative of the receiving institution, however, to offer transfer credit for courses successfully completed that have not been designated as equivalent. NOTE: Credit generated at institutions on the quarter-term system may not transfer the equivalent number of credits to institutions on the semester-term system. For example, 4.0 quarter hours often transfers as 2.67 semester hours.

The Course Prefix

The course prefix is a three-letter designator for a major division of an academic discipline, subject matter area, or subcategory of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix to identify the course.

Authority for Acceptance of Equivalent Courses

Section 1007.24(7), Florida Statutes, states:
Any student who transfers among postsecondary institutions that are fully accredited by a regional or national accrediting agency recognized by the United States Department of Education and that participate in the statewide course numbering system shall be awarded credit by the receiving institution for courses satisfactorily completed by the student at the previous institutions. Credit shall be awarded if the courses are judged by the appropriate statewide course numbering system faculty committees representing school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educational institutions to be academically equivalent to courses offered at the receiving institution, including equivalency of faculty credentials, regardless of the public or nonpublic control of the previous institution. The Department of Education shall ensure that credits to be accepted by a receiving institution are generated in courses for which the faculty possess credentials that are comparable to those required by the accrediting association of the receiving institution. The award of credit may be limited to courses that are entered in the statewide course numbering system. Credits awarded pursuant to this subsection shall satisfy institutional requirements on the same basis as credits awarded to native students.

Exceptions to the General Rule for Equivalency

Since the initial implementation of the SCNS, specific disciplines

or types of courses have been excepted from the guarantee of transfer for equivalent courses. These include courses that must be evaluated individually or courses in which the student must be evaluated for mastery of skill and technique. The following courses are exceptions to the general rule for course equivalencies and may not transfer. Transferability is at the discretion of the receiving institution.
Courses not offered by the receiving institution.
For courses at nonregionally accredited institutions, courses offered prior to the established transfer date of the course in question.
Courses in the _900-999 series are not automatically transferable, and must be evaluated individually. These include such courses as Special Topics, Internships, Apprenticeships, Practica, Study Abroad, Theses, and Dissertations.
Graduate courses.
Internships, apprenticeships, practica, clinical experiences, and study abroad courses with numbers other than those ranging from 900-999.
Applied courses in the performing arts (Art, Dance, Interior Design, Music, and Theatre) and skills courses in Criminal Justice (academy certificate courses) are not guaranteed as transferable. These courses need evidence of achievement (e.g., portfolio, audition, interview, etc.).

Courses at Nonregionally Accredited Institutions

The SCNS makes available on its home page (http://scns.fldoe.org) a report entitled "Courses at Nonregionally Accredited Institutions" that contains a comprehensive listing of all nonpublic institution courses in the SCNS inventory, as well as each course's transfer level and transfer effective date. This report is updated monthly.
Questions about the SCNS and appeals regarding course credit transfer decisions should be directed to Northwest Florida State College, Office of the Vice President of Academic Affairs or to the Florida Department of Education, Office of Articulation, 1401 Turlington Building, Tallahassee, Florida 32399-0400. Special reports and technical information may be requested by calling the SCNS office at (850) 245-0427 or at http://scns.fldoe.org.

Lower Division College Credit Courses
Upper Division College Credit Courses
Vocational Courses

Courses by Type (Subject Area)

Accounting ACG 2001 - Accounting I

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of

professional ethics will be highlighted throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

ACG 2011 - Accounting II

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2021 - Financial Accounting

This course is an introduction to financial accounting that specializes in the processes and principles used to prepare financial statements. This course will focus on the purpose and content of the four basic financial statements including the preparation of these statements as well as interpreting information for decision-making.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
MAC 1105 - College Algebra , equivalent, or higher

ACG 2071 - Managerial Accounting

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Corequisite(s):
ACG 2011 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2450 - Computer Applications for Accounting

An introductory course in computerized integrated accounting procedures found in the microcomputer environment. Includes application of software designed for general ledger, accounts payable and receivable, financial statement analysis, purchasing and sales order processing, fixed assets, payroll, inventory and departmental accounting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 3083 - Accounting: Concepts and Practice

This course explores the preparation and use of accounting information. Topics include mathematical procedures related to business decisions; terms and processes associated with the accounting cycle; financial statements for the sole-proprietorship, partnership and corporation; and foundations of managerial accounting. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Upper division standing and ACG 2001 and MAC 2233 are recommended. Knowledge of basic computer and keyboarding skills are strongly recommended.

ACO 1806 - Payroll Accounting

Introduction to the theory, laws and procedures related to payroll activities of a business. Topics include payroll and personnel records, federal payroll laws, payroll operations, computerized payroll systems, and preparation of payroll registers, earnings records, and payroll tax forms.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ACG 2001 is strongly recommended and knowledge of basic computer and keyboarding skills are strongly recommended.

APA 1000 - Accounting Fundamentals I

Introduction to the principles used in measuring organization performance and reporting the results of organizational activities. Recommended for non-accounting majors.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

TAX 2000 - Federal Income Tax: Individual

Federal Income Taxes. Determine income tax for individuals, interpretations of Internal Revenue Code and Regulation, tax planning and advisory service. Brief introduction to partnership, corporation, estate and gift taxes. Extensive practice problems in individual income tax returns and research in tax questions.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

MTB 1103 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

Adult Basic Education (ABE) ABX 01__ - Adult Basic Education - Mathematics

The Adult Basic Education (ABE) Mathematics course is a non-credit course designed to develop literacy skills necessary to be successful workers, citizens and family members. Career and College Readiness (CCR) standards have been incorporated into this class. A student enrolled in the ABE program should be enrolled in all of the following courses: Mathematics, Language Arts, and Reading. ABE prepares students to enroll in a GED® Preparation course.

ABX 02__ - Adult Basic Education - Reading

The Adult Basic Education (ABE) Reading course is a non-credit course designed to develop literacy skills necessary to be successful workers, citizens and family members. Career and College Readiness (CCR) standards have been incorporated into this class. A student enrolled in the ABE program should be enrolled in all of the following courses: Mathematics, Language Arts, and Reading. ABE prepares students to enroll in a GED® Preparation course.

ABX 03__ - Adult Basic Education - Language Arts

The Adult Basic Education (ABE) Language Arts course is a non-credit course designed to develop literacy skills necessary to be successful workers, citizens and family members. Career and College Readiness (CCR) standards have been incorporated into this class. A student enrolled in the ABE program should be enrolled in all of the following courses: Mathematics, Language Arts, and Reading. ABE prepares students to enroll in a GED® Preparation course.

Aeronautical Science AMT 0701 - Aviation Maintenance Technology General I

This course introduces basic information necessary for an entering student in aviation maintenance technology. Emphasis is placed on math and physics and Federal Aviation Administration (FAA) and manufacturers' technical and legal publications.

Credit Hour(s): 110 Clock Hours When Offered: (Offered as needed)

AMT 0702 - Aviation Maintenance Technology General II

This course introduces aircraft drawings/charts & graphs, aircraft hardware and materials, precision measuring tools, fluid lines and fittings, safety wire methods. Emphasis is on studying aircraft drawings/charts & graphs, identification and selection of aircraft hardware, fabrication and inspection of flexible and rigid fluid lines, safety wiring on bolts and turnbuckles.

Credit Hour(s): 110 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

AMT 0701

AMT 0703 - Aviation Maintenance Technology General III

This course provides a study in basic electricity. Emphasis is placed on alternating current (AC) and direct current (DC) circuits and controls, electrical measurements, electrical test equipment, aircraft batteries, fundamental electronics, and semi-conductor devices.

Credit Hour(s): 110 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

AMT 0702

Prereq/Corequisites:

AMT 0702

AMT 0704 - Aviation Maintenance Technology General IV

This course introduces aircraft ground operations, fuels, cleaning and corrosion control methods, weight & balance, and performance of non-destructive testing. The student must achieve a minimum Final Comprehensive exam grade of 70% or above to pass the course and the Course Average must be a 70% or above to pass the course.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

AMT 0703

Prereq/Corequisites:

AMT 0703

AMT 0712 - Aviation Maintenance Technology Airframe I

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft structural assembly and

rigging, aircraft non-metallic, and aircraft electrical systems.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

AMT 0701 , AMT 0702 , AMT 0703 , AMT 0704 . Successful completion of all General subject courses.

Prereq/Corequisites:

AMT 0701, AMT 0702, AMT 0703, AMT 0704

AMT 0713 - Aviation Maintenance Technology Airframe II

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft finishes and fabric covering, wood structures, assembly and repair of sheet metal structures, and introduction to aircraft welding techniques.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

AMT 0712

AMT 0714 - Aviation Maintenance Technology Airframe III

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft hydraulics and pneumatics, landing gear systems, aircraft cabin atmospheric control systems.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

AMT 0713

Prereq/Corequisites:

AMT 0713

AMT 0717 - Aviation Maintenance Technology Airframe IV

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft airframe fuel, ice and rain control, and fire detection, protection and extinguishing systems; instrument, position and warning, pitot static, and communications and navigation systems.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

AMT 0714

Prereq/Corequisites:

AMT 0714

ASC 1320 - Aviation Laws and Regulations

Upon completion of the course, the student will be able to describe and explain the activities and roles played by federal, state, and local aviation entities. Will be able to outline the manner in which the FAA enforces aviation administrative regulations. Will be able to differentiate between the public and private sectors of aviation liability and describe methods to minimize risk. Will be able to compare and contrast domestic and international aviation law.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 1610C - Aircraft Systems and Components

This course provides students with a basic understanding of the various types of aircraft engines, systems, and structures in use in both general aviation and transport category aircraft (airliners). Students will learn about engine types and their construction, operating procedures, and performance. Aircraft structures and construction methods will also be examined, along with an overview of hydraulic, electric, pressurization, fuel, and anti-ice systems.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 1870 - Aviation Safety

The primary goal of this course is to provide aspiring aviation professionals with a comprehensive understanding and enhanced awareness of aviation safety. Class participation in analyzing the probable cause of selected aviation accidents, field trips, and guest speakers will be featured. Federal agencies which regulate aviation, with emphasis on those concerned with safety, will be studied. Information on how flight affects the human body and actions to minimize adverse effects.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2210 - Aviation Meteorology

This introductory level course acquaints the aviation student with the fundamentals of the Earth's atmosphere, current theories on meteorology, and the effects of weather on aircraft and air traffic control. Particular emphasis will be given to the acquisition and interpretation of weather reports and forecasts from various weather information sources. Aviation weather is specifically designed for the aviation student wishing to improve his knowledge and understanding of aviation weather (both theory and services) beyond that necessary for any of the FAA computer-based pilot knowledge tests.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2473 - Human Factors and Resource Management

This course provides an introduction to the field of human factors, which focuses on the interaction between humans and machines in the complex aviation environment. Human physiology and human performance within the flight environment are examined in depth. Students apply human factors concepts to single pilot resource management (SRM) and crew resource management (CRM) within the framework of threat and error management (tem). Professionalism in aviation is a major focus of the course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2550 - Aerodynamics

An analysis of the physical laws and aerodynamic principles which govern the flight and performance of aircraft stability and control, weight and balance, and aircraft instruments affecting flight operational considerations of controllable pitch propellers, retractable gear, weather, and precision maneuvers.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prereq/Corequisites:

PHY 1020

ASC 2560C - Unmanned Aerial Vehicles & Systems

This course is a survey of unmanned aerial vehicles (UAV) and systems, emphasizing the military and commercial history, growth and applications of UAVs. Course will include basic acquisition, use and operation of UAVs with an emphasis on operations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

ATT 1100

ASC 2561C - Unmanned Aerial Systems Operations

This course serves as follow-on to the introductory Unmanned Aerial Systems (UAS) course. It builds on the student's understanding of UAS history, technology, and regulations and builds on those to provide a basis for operating small UAS platforms (<55 pounds). Students will gain additional exposure to a variety of UASs operations, including aerial imaging, and search and rescue operations. Additional flight operations will be conducted in a controlled environment to provide exposure to real-world situations, with the intent of preparing the student for the FAA's UAS operator certificate.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

ASC 2560C

ASC 2562C - UAS Operations and Cross Country Data Entry

This course will address the use of the various systems and navigation equipment that exists on unmanned aircraft. Students will learn to analyze and identify the different systems that are employed on unmanned aircraft. They will identify the appropriate navigational system packages that are employed on various unmanned aircraft. Unmanned aircraft employ navigation systems that are, in many ways, significantly different than manned aircraft. These systems include navigation by ground observers; navigation using GPS determined position on a ground-based moving map display; and fully-autonomous GPS-based navigation. Students will differentiate the types of navigation systems available; and use the appropriate procedure to enter the navigation data into the unmanned aircraft's navigational system.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2563C - UAS Applications in Aerial Photography

This course will familiarize the student with guidelines, regulatory standards, and practical operational considerations for aerial photography and videography techniques specific to the use of unmanned aircraft systems (UAS). Current procedures and relevant practical application methods will provide a basis for commercial applications that leverage future UAS technologies.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

ASC 2564C - Unmanned Vehicle Security

Participants will develop an understanding of the digital operations of an unmanned vehicle. Methods of securing digital information during the upload and downloading functions will be explored.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

ATT 1100

ASC 2566C - Remote Pilot Operations

This course provides the basic knowledge and skills to establish a firm foundation for a career as a professional remote pilot through the practical application of regulations and flight planning for fixed wing and rotor unmanned aircraft. This course also provides a foundation and understanding of the essential elements of risk management and decision making as required by the unmanned aviation industry.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

ATF 2201L - Commercial Flight I

This is the first of three courses needed to complete the training required for the FAA Commercial Pilot certificate for single-engine airplanes. This course covers the first phase of commercial pilot training: cross-country navigation and flight review. It includes 33 hours of solo flight, 11 hours of dual flight instruction, and five hours of ground instruction and pre-/post flight briefings with an FAA-approved flight instructor. After completing this course, students take Commercial Flight II and III to meet the requirements for the Commercial Pilot certificate. It should be noted that the hours above are based on FAA-syllabus minimums, and students may exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

Students must hold a Private Pilot, Airplane Single-Engine Land certificate

Prereq/Corequisites:

Must be enrolled in, or have completed ATT 2110

ATF 2202L - Commercial Flight II

This is the second of three courses needed to complete the training required for the FAA Commercial Pilot certificate for single-engine airplanes. This course covers the second and third phases of commercial pilot training: cross-country time-building. It includes 32 hours of solo flight, 14 hours of dual flight instruction, and five hours of ground instruction and pre-/post flight briefings with an FAA-approved flight instructor. After completing this course, students take Commercial Flight III to complete the requirements for the Commercial Pilot certificate. It should be noted that the hours above are based on FAA-syllabus minimums, and students may exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

Students must hold a Private Pilot, Airplane Single-Engine Land certificate

Prereq/Corequisites:

ATF 2201L

ATF 2203L - Commercial Flight III

This is the third of three courses needed to complete the training required for the FAA Commercial Pilot certificate for single-engine airplanes. This course covers the fourth and fifth phases of commercial pilot training: commercial maneuvers and complex airplane training. It includes 30 hours of dual instruction including 10 hours in a complex airplane, and 12 hours of ground instruction and pre-/post flight briefings with an FAA approved flight instructor. The course requirements are met when the student earns his or her Commercial Pilot certificate for single-engine airplanes. It should be noted that the hours above are based on FAA-syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive

the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

Students must hold a Private Pilot, Airplane Single-Engine Land certificate

Prereq/Corequisites:

ATF 2202L

ATF 2305L - Instrument Pilot Flight I

This course provides the training required for the FAA Instrument Airplane rating. It includes 38 hours of dual flight instruction and 9 hours of ground instruction and pre-/post flight briefings with an FAA-approved flight instructor. The course requirements are met when the students earns his or her Instrument rating. It should be noted that the hours above are based on FAA syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

Students must hold a Private Pilot, Airplane Single-Engine Land certificate.

Prereq/Corequisites:

Must be enrolled in, or have completed ATT 1120 .

ATF 2400L - Multi Engine Flight I

This course provides both the ground and flight training needed to earn the FAA Multi-Engine rating. It includes 10 hours of dual flight instruction and 18 hours of ground instruction and pre-/post flight briefings with an FAA approved flight instructor. The course requirements are met when the student earns his or her Multi-Engine Commercial rating. It should be noted that the hours above are based on FAA-syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass.
This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate,
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prereq/Corequisites:

ATF 2203L

ATF 2500L - Certified Flight Instructor I

This course provides the training needed to earn the FAA Certified Flight Instructor certificate for airplanes. It includes 25 hours of dual flight instruction and 6 hours of ground instruction and pre-/post flight briefings with an FAA approved flight instructor. The course requirements are met when the students earns his or her Certified Flight Instructor certificate for airplanes. It should be noted that the hours above are based on FAA-syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prereq/Corequisites:
ATT 2131

ATF 2530L - Certified Flight Instructor Instrument

This course provides a study of the aeronautical skills and abilities required for the Certified Flight Instructor Airplane Certificate. Students apply skills from prior classes to explain, demonstrate, and analyze flight maneuvers and resource management skills involved with Private Pilot, Commercial Pilot, and Flight Instructor Certificates. The course also provides practical flight instruction experiences. Students must complete the appropriate flight lessons and pass the Federal Aviation Administration's Flight Instructor Airplane Single Engine Practical Exam to satisfactorily complete the course. Flight training fees (in addition to the cost of tuition) are required and must be paid in advance of the course start date. Flight training fees for this course are based on 25 hours of flight training, which is the minimum number of flight hours allowed by the FAA for completion of the Flight Instructor - Airplane Certification. Any additional training required beyond the FAA minimum is the financial responsibility of the student. This course also has special requirements, which students must meet prior to enrolling

1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.

Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
ATF 2500L and ATF 2305L

ATT 1100 - Private Pilot Ground School

An introductory survey of the subjects pertaining to flight; aircraft operation and performance, weather, pilotage, air traffic control and Federal Aviation Regulations in preparation for the Federal Aviation Administration Private Pilot Written examination.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ATT 1120 - Instrument Rating Ground School

This course provides the classroom instruction required for instrument flight training and the FAA Instrument-Airplane Knowledge Test. Topics include flight by instrument reference, flight physiology, IFR aircraft operations and procedures, radio navigation, in-route charts, instrument approach procedures, flight planning, weather, and IFR regulations. Students who complete the course satisfactorily may earn the required endorsement to take the FAA Instrument Rating Knowledge Test. Students are required to be enrolled in, or have completed, this course prior to beginning Instrument flight training. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Students must hold a Private Pilot, Airplane Single-Engine Land certificate

ATT 2110 - Commercial Pilot Ground School

This course provides the classroom instruction required for Commercial Pilot flight training and the FAA Commercial Pilot-Airplane Knowledge Test. Topics include advanced aircraft systems, high performance engines, retractable landing gear, and environmental systems, advanced performance charts, maximizing aircraft performance, and regulations relating to commercial operations. Students who complete the course satisfactorily may earn the required endorsement to take the FAA Commercial Pilot-Airplane Knowledge Test. Students are required to be enrolled in, or have completed, this course prior to beginning Commercial Pilot flight training. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Students must hold a Private Pilot, Airplane Single-Engine Land certificate

ATT 2111 - Aircraft Systems Advanced

This course enhances the classroom instruction required for Commercial Pilot flight training. Topics include advanced aircraft systems, high performance engines, retractable landing gear, and environmental systems, advanced performance charts, maximizing aircraft performance, and regulations relating to commercial operations.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ATT 2131 - Certified Flight Instructor Ground

This course provides the classroom instruction required for Certified Flight Instructor training and both the FAA Fundamentals of Instructing and Flight Instructor-Airplane Knowledge Tests. Topics include the learning process, elements of effective teaching, student evaluation and testing, course development, lesson planning, and classroom training techniques. NWFSC does not waive

the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ATF 2203L

Anthropology, Archeology ANT 2000 - Introduction to Anthropology
Introduction to the fundamental principles, concepts, methods and theories in Anthropology. Includes a brief introduction to the subdisciplines of anthropology: cultural anthropology, biological anthropology, archaeology, and linguistics. A cross-cultural perspective will be paramount in the study of anthropology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Offered as needed) Prereq/Corequisites:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ANT 2100 - Introduction to Archaeology
Introduction to the fundamental principles, methods, and theories in archaeology. Includes a history of the development of archaeology, and examination of the nature of archaeological data and research, an introduction to archaeological data and analysis, and an examination of approaches to synthesis and interpretation. North and South American archeology is studied, but non-western examples are also studied to enhance an understanding of the development of the discipline in Europe and the Americas.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

Architectural Drafting BCN 1230 - Building Construction Materials and Processes
Course designed to introduce the student to terminology, methods, procedures, materials, and processes used in the construction industry.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

BCN 1272C - Blueprint Reading for Commercial Construction
A course to familiarize non-drafting students with techniques of blueprint reading and the fundamentals of construction methods that make blueprint reading meaningful.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 1520C - Electrical Systems in Construction
A course to familiarize students with electrical terminology, practices, methods, code requirements and safety and health in construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 1567C - Plumbing and Gas Construction Practices
A course to familiarize students with Plumbing and Gas code requirements, terminology, methods, practices, processes and safety and health used in building construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 2231 - Building Construction Materials and Processes II
Course designed to introduce the student to terminology, methods, procedures, materials, and processes used in the construction industry. The focus of the course will cover Divisions 9 through 16 of the construction industry.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

BCN 2560C - Mechanical Systems in Construction
A course to familiarize students with mechanical trades terminology, methods, practices, code requirements processes, and safety and health criteria in mechanical construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 2721 - Construction Management/Planning

The course covers project development and organization from pre-construction site investigation to final completion. The course will include the management of project estimates, plans, schedules, operations and safety. The student will become knowledgeable about documents used in the construction industry for bid, contracts, zoning, permits, bonds, loans specifications and drawings. Cost engineering, procurement, value engineering and quality assurance will be covered. Cost management through job cost analysis and purchase order systems will also be covered.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCT 1763 - Construction Safety and Health

A basic course in construction safety and health, covering such topics as: theories of accident causation; workplace hazards; hazard analysis and prevention; accident reporting; OSHA construction standard and safety practices; environmental safety; violence in the workplace; ergonomics; ethics and safety; workers' compensation; and stress on the job.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

BCT 2761C - Structural Systems in Construction

A course to familiarize students with structural terminology, practices, methods, code requirements and safety, and health criteria in construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCT 2770 - Construction Estimating

A course in estimating as it relates to the construction industry covering references, estimating methods, take-off organization and presentation; material take-off, cost estimating in heavy construction, mathematical formulas for estimating, quantity take-off from plan review, and computer estimating overview.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

BCN 1230 , BCN 1272C .

TAR 2121C - Architectural Drafting

Architectural design and development of residential and light commercial buildings to include: development and construction of good architectural freehand lettering, VA and FHA approved residential house plans, “Good Sense” house plans as defined in the Arkansas Plan, and heat loss/heat gain calculations.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

ETD 1102 or ETD 1112 or equivalent.

Architecture ARC 1131 - Architectural Presentation

This course introduces basic ideas and presentation techniques directed towards developing design skills, such as drawing, perspective sketching, and graphics using a variety of media to include: pencil, ink, colored pencils, markers, and model building to be used in architectural presentations. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

ARC 1301C - Design 1.1

The primary foci of this course are the development of two and three-dimensional graphic skills and the ability to think spatially and to manipulate elements in space. Analysis and design exercises are located primarily in abstract two/three dimensional space and deal with topics such as figure/ground relationships, line/plane/mass, the idea of systems, networks, repetition, and the relation of part to the whole. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 4 Credit Hours When Offered: (Fall)

ARC 1302C - Design 1.2

This course continues the emphasis and topics studied in Design 1.1, with increased expectation with regard to graphic and spatial manipulation ability. Students study exemplary works of architecture and art, beginning the process of developing an understanding of the role history plays in their creative explorations. By the end of the course, site and the human being are part of the design environment. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

ARC 1301C .

ARC 2201 - Theory of Architecture

An introduction to architectural theory, selected contemporary architectural theories and movements, and their evolution and

historical basis. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ETD 1102 .

ARC 2303A - Design 2.1

Application of two and three-dimensional design principles learned in first-year design, in preparation for whole building design in third year. Small building projects adding programmatic responsibilities to the design agenda. Emphasis on programmatic issues internal to the building such as function, circulation structure, resolution of form, space and place making. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 6 Credit Hours When Offered: (Fall) Prerequisite(s):
ARC 2201 .

ARC 2304 - Design 2.2

Application of two and three-dimensional design principles learned in first-year design, in preparation for whole building design in third year. Small building projects adding programmatic responsibilities to the design agenda. Emphasis on programmatic issues internal to the building such as function, circulation structure, resolution of form, space and place making, and human behavior.

Credit Hour(s): 6 Credit Hours When Offered: (Spring) Prerequisite(s):
ARC 2303A .

ARC 2472 - Introduction to the Technology of Architecture

This course is the beginning of the technology sequence in the areas of structures, environment technology, and materials and methods of construction. It introduces themes such as the response of buildings to the natural environment, the strength, stiffness, and durability in building materials, and the quantitative method of analysis and design of building assemblies and support systems. It explores the relationship between building technology and the social, aesthetic, environmental and economic aspects of the settings in which buildings are located, and how these factors relate to the process of architectural design. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 4 Credit Hours When Offered: (Summer)

Art ART 1201C - Two-Dimensional Design

An introductory course, both theoretical and applied, dealing with the principles of organization and the elements of design in a two-dimensional format. This is a foundation course for all of the graphic arts: painting, printmaking, and the two-dimensional crafts. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 1203C - Three-Dimensional Design

An introductory course, both theoretical and applied, dealing with principles of organization and the elements of design in a 3-dimensional format. Various materials, tools, and surfaces are used to explore 3-D form. This is a foundation course. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 1300C - Drawing I

Basic drawing course covering different drawing media, line, form, shape, value and spatial relationships. Drawing problems involving a variety of subject matter will be explored. Emphasis is on value, drawing techniques, spatial relationships between shapes and composition. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 1301C - Drawing II

Continued study of drawing techniques explored in Drawing I. Provides experience with more complex drawing problems. Emphasis is on self-expression, value, color theory, and composition. A variety of subject matter and drawing media will be explored.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ART 1300C . Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 1750C - Pottery I

The students shall be exposed to the production of pottery utilizing all known hand building techniques. Also includes introduction to

potter’s wheel and basic wheel fundamentals. The first half of course is hand building, the second half is devoted to development of skills on the potter’s wheel. Students also learn how to glaze pottery and make glass. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ART 1751C - Pottery II

Continues hand building of Pottery I, but major emphasis is placed upon development skills utilizing the potter’s wheel. Additional glazing experimentation is also emphasized.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

ART 1750C . Please refer to catalog section regarding audit enrollment.

ART 1905A - Independent Study – Art

A defined independent study which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule. Departmental approval is required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is also required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

ART 2330C - Figure Drawing I

The development of technical skills and self-expression through drawing the figure; course begins with anatomy studies, progresses to conceptualization of human form. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 2331C - Figure Drawing II

This class is a continuation of Figure Drawing I. Emphasis is on composition and self-expression in relation to the human figure. Exploration of media and content will be encouraged.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

ART 2330C . Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2500C - Painting I

Course will include design elements, composition and spatial relationships. Emphasis is on color theory, color mixing, and execution thereof within a variety of subject matter. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 2501C - Painting II

This course is a continuation of Painting I ART 2500C with emphasis on further exploration of student’s personal style and original techniques. Further experimentation in abstraction and emotional aspects of form and color are explored and expressed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

ART 2500C . Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2602C - Digital Imaging I

A digital illustration production course with a strong emphasis on concept development and image making skills. Students will create complex imagery based on manipulations of photographs or traditional drawings and paintings with an industry-standard image editing/manipulation software. Access to an appropriate high quality digital camera is required. It Is recommended that students take PGY 1801C at the same time or prior to taking this course.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

ART 2603C - Digital Imaging II

A continuing course which expands upon the technical and conceptual foundation laid in Digital Imaging I. Students will explore advanced software techniques and greater challenges of personal or commercial expression in digital media. Access to an appropriate high quality digital camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

ART 2602C , PGY 1801C .

ART 2701C - Sculpture I

An introductory course in the technical and aesthetic consideration of sculptural forms. Includes a wide range of materials and expressions, representing past and present sculptural methods. Audit enrollment in studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

ART 2703C - Sculpture II

Allows continued experience in more complex three-dimensional techniques; emphasis on individual projects and conceptual approach.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

ART 2701C . Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2930 - Art - Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ART 2955 - Portfolio Development

Development of a working portfolio through studio project aimed at fulfilling the general requirements the average company, university, art school or advertising agency looks for in a portfolio presentation.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

ART 1201C , ART 1203C , ART 1300C , ART 1301C .

Art History ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2050 - Art History: Pre-Renaissance

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2060 - Architecture History

Survey of significant contributions in architecture from prehistoric to modern times. Architecture will be considered in terms of stylistic qualities, structural type, and intended usage. Topics will be addressed according to historical content, societal background, and geographical location. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2402 - Art History: Modern Art

Surveys and analyzes the major artistic periods and movements from 18th century Neo-Classicism to present. Required for all Art majors. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Astronomy AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Biology BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1005L - Biology Lab

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:

BSC 1005 or equivalent.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

BSC 1010C .

BSC 1080 - Essentials of Anatomy and Physiology

This course surveys basic structure and function of the human body with emphasis on terminology and anatomy.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 1905 - Independent Study – Biology

A course designed to (1) allow a student to complete part of a course taken elsewhere and thereby complete general education

requirements, (2) to go deeper into special areas of interest.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:

This course may be taken up to four times for credit.

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

MCB 2010C - Microbiology, Allied Health

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C .

Botany BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

Business FIN 4402 - Financial and Economic Management

This course addresses the application of contemporary theory and practice in business resource allocation. Topics include: capital budgeting, equity and capital financing, capital management, analysis of financial statements, pricing theory, management of working capital and other topics relevant to the acquisition, financing and management of business assets and business decision making. Both the economic and financial perspectives will be presented. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Upper division standing and ACG 3083 are required. ECO 2013 , STA 2023 , and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1011 - Introduction to Business

Designed to give students a broad understanding of the nature of business and a preliminary idea of the various areas of business specialization.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1214 - Business and Supervision Terminology

This course is designed for students to achieve mastery of the special vocabulary, jargon, and concept terminology associated with general business and supervision in the modern workplace. Students will apply the terms in common workplace scenarios and hypothetical situations, as well as in standard written documents and assignments.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1940 - Internship - Business

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

This course may be taken up to two times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

GEB 1942 - Internship Business

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

GEB 2430 - Business Ethics

This course addresses the legal, moral, and societal issues of ethical conduct in the business environment. Actual case studies are used to illustrate appropriate relationships among employers, employees, customers, stockholders, and other business stakeholders. Topics include: codes of ethics, laws and regulations related to ethics, conflict of interest, and moral philosophies associated with ethical conduct.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2947 - Academic Learning Field Studies I

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as Needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2948 - Academic Learning Field Studies II

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2949 - Academic Learning Field Studies III

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3031 - Contemporary Business Practices

This course includes an orientation to and examination of opportunities and challenges facing managers in contemporary business organizations. Introduces the competencies of teamwork, communication, creative thinking, adapting to change, decision making and customer service through application to issues and problems across the general business spectrum. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3213 - Business and Administrative Communication

A comprehensive course in effective and efficient communications in the business world; includes preparation of reports, proposals and presentations, technical writing skills, composition of standard business documents including persuasive messages, sales letters, customer service correspondence, instructional memoranda, and policy and procedure development. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and ENC 1101 or departmental permission are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3434 - Ethics for Business Leaders

This course uses a case study approach to focus on the significant ethical and legal issues facing today's business leaders. The

theoretical and philosophical background will be presented along with real-life examples of ethics in the workplace. Cases and readings will be used to develop both analysis and application skills in the following areas: corporate and personal decision making, organizational culture and reputation, social responsibility and social reporting, customer relations, employee relations, financial reporting, technology, privacy/confidentiality and communications. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3444 - Business Trends and Issues

This course builds on the traditional themes and concepts of the general business area through specialized readings on trends and issues facing today's business and industry leaders. Students will read opinion pieces by noted in-field experts, as well as conduct basic research on contemporary issues such as information and workplace security, diversity in the workplace, outsourcing functions/services and global competition, with an eye to improving business operations. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3930 - Business Project and Acquisitions Terms and Concepts

Students will apply specialized terminology of project and acquisitions management in various communication venues including short written documents and summary analyses. Emphasis will be placed upon the latest terms, abbreviations and jargon applicable to the field. Students will research selected terms and concepts in various contemporary periodicals and publications.

Credit Hour(s): 1 Credit Hour When Offered: (Fall) Prerequisite(s):

upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3933 - Business Research

This seminar-style course, offered in group or individual format, provides an introduction to various references, databases, periodicals, journals and other publications essential to the research of contemporary business issues; also included are methods of accessing resources via the Internet, designing search strategies, citing Internet resources and evaluating research materials.

Credit Hour(s): 1 Credit Hour When Offered: (Fall) Prerequisite(s):

upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4454 - Business in a High Technology Environment

Presents the special challenges and opportunities of managing a high technology firm or a traditional entity operating in the high technology environment; addresses software/information security, recruiting technical personnel, outsourcing, equipment security, updating equipment, telecommuting and similar issues. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

upper division standing and GEB 3031 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4930 - Special Topics: Project Management

An individual or group course designed to provide students with the opportunity to pursue a special topic(s) in depth; may be repeated as topics change.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4933 - Special Topics: Management

An individual or group course designed to provide students with the opportunity to pursue a special topic(s) in depth; may be repeated as topics change.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4934 - Special Topics: Business Administration

An individual or group course designed to provide students with the opportunity to pursue a special topic(s) from the area of business administration in depth; may be repeated as topics change.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are

strongly recommended.

GEB 4941 - Internship: Business

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

QMB 3250 - Quantitative Methods for Business Decisions

An examination of the quantitative methods, statistical concepts, and procedures used in business and finance including methods of maximization and minimization objective functions, the analysis and use of statistic methods for planning, decision making, and forecasting. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

TRA 3132 - Procurement Management

Purchasing is required by all types of goods-producing & service-providing organizations in such sectors as manufacturing, agriculture, health care, & government. This professional business function tries to buy the right good or service at the right quality, in the right quantity, at the right time, at the right price, from the right source, with delivery at the right place.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

TRA 4203 - Principles of Logistics

Overview of logistics function within a firm and in the context of integrated vertical systems. Topics include customer service, information flow, inventory control, materials management, order processing, packaging, physical distribution.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Business Law BUL 2241 - Business Law I

Introductory course in business law with objective of presenting the law underlying business transactions. Course includes the study of the Law of Contracts, the Law of Bailments, and the Law of Sales based on the Uniform Commercial Code. Recommended for Business degree students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 2242 - Business Law II

Course context explores laws relative to negotiable instruments, agency, partnerships, (includes study of Uniform Partnership Act), corporation law, creditors rights, consumer protection and insurance. Based on Uniform Commercial Code.

Credit Hour(s): 3 Credit Hours When Offered: Offered as needed Prerequisite(s):

BUL 2241 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 3320 - Law and Business

An introduction to the legal setting in which modern business operates; emphasis is on public and regulatory law, basic contract law, the processes of administrative, statutory and common law and interstate commerce issues; includes an overview of the UCC and intellectual property. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 4333 - Contract Formation and Administration

Students will be exposed to the differences in the public and private sector contracting environments. Emphasis will be placed on the fundamentals of contract formation including sealed bidding, negotiations, and best value methods. Students will learn the fundamentals of contract administration including inspection and acceptance, quality control, contract changes, and disputes. This

course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing and BUL 3320 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 4931 - Acquisition Law Seminar

This course addresses contract law as applicable to formation and administration of contracts with private and governmental agencies, with emphasis on the federal government. The following topics are also included: concepts of responsiveness and responsibility, bidding procedures, mistakes, negotiation procedures, changes, claims and dispute resolution. Students will explore the typical contracting problems that can lead to litigation. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing and BUL 4333 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Chemistry CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

CHM 1045C .

CHM 2210C - Organic Chemistry I

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):

CHM 1046C .

CHM 2211C - Organic Chemistry II

In continuation of Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

CHM 2210C .

Chinese CHI 1120 - Mandarin Chinese I

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

CHI 1121 - Mandarin Chinese II

This course is a continuation of Mandarin Chinese I with additional vocabulary and grammar. Pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

CHI 1120 or an equivalent course with a minimum grade of "C".

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

Coaching PEO 2004 - Theory and Practice of Teaching a Specific Sport

This course is designed to provide knowledge of the rules, teaching progressions and strategies for competition. The course includes acceptable behavior and ethics for coaches. This course will be offered for the following specific sports: baseball/softball, basketball, football, golf, soccer, swimming, tennis, track and field/cross country, volleyball and wrestling.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PEO 2005 - Coaching Theory

This course is designed to provide knowledge of the characteristics, principles, ethics, and theories related to coaching sports in educational and recreational settings. Emphasis is placed on preparing coaches to train athletes to achieve optimal levels of performance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

College Success SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SLS 1201 - Service Learning Seminar

A seminar course designed to enhance and reinforce the value of civic responsibility and to provide students with a community service program opportunity by volunteering in community agencies in the public and private sectors.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

SLS 2505 - Critical Thinking

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Computer Science CAP 2134C - Database Security

This course is designed to provide the student with an understanding of database security concepts and practices. The objective of the course is to provide hands-on instruction in various database tasks that relate to securing the confidentiality, integrity and

availability of information that is stored in a database. The student will be able to perform administrative tasks in different database management systems, as well as manage database user profiles, privileges, and roles. Different database application security models will be explored, as will the security advantages of utilizing virtual private databases. Finally, the process of database auditing will be explored, including auditing methods using various database management systems.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:

CET 2660

CAP 2762 - Data Mining

This course offers exploration of data mining methodologies. Topics may include decision tables, decision trees, classification rules, association rules, clustering, statistical modeling, and linear models and will focus on data warehousing, data mining and data drilling.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

CGS 2541 or any programming language are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 1600C - Networking Fundamentals

This course introduces the student to the basics of Internetworking technology. This is also the first of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study networks and layers, networking devices, IP addressing, ARP and RARP, media and design, topology, structured cabling, electricity, and electronics and network management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 1610C - Routing Protocols and Concepts

Basic Router terminology and configurations are studied in this course. The student will study router components, router configuration, IOS, TCP/IP, IP addressing, and router protocols. This is one of the four courses designed to prepare a student to take the CISCO Certified Network Associate Exam (CCNA).

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:

CET 1600C is required.

CET 1675C - Introduction to IP Telephony

This course explains how companies are using IP Telephony equipment and software to efficiently upgrade existing telephone systems. In addition, the course will give the student a fundamental understanding of the architecture of voice communication and how signaling, call quality and public switched telephone networks operate in a LAN/WAN networking environment. The use of IP Telephony products will be discussed and how software allows companies to cost-effectively upgrade and eventually replace existing (legacy) telephone systems with more cost-effective and easy-to-use telephone equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

CET 1600C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CET 1854C - Introduction to Wireless Technology

This course teaches key wireless networking topics, including wireless technology and architecture network design, types of wireless networks, and applications. Special focus on technical matters, wireless communication products, wireless networking products, and wireless LANS products. It is recommended that all students have a least a basic knowledge of networking, including protocol, the OSI module, and TCIP/IP.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2179C - PC Operating Systems A+

This course is designed to help prepare the student to take the A+ Certification exams by making the student proficient in personal computer operating systems, including Windows. Major topics include disk and file management, system configurations, menu driven processing, graphical user interfaces, boot files, disk caching, virtual memory, device drivers, remote assistance, and security essentials and security practices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2182C - PC Hardware A+

This course is designed to prepare the student to take the A+ Certification exam, by teaching the student basic technical skills needed to understand the function and operation of the major elements of personal computer systems, and how to localize and correct common hardware and software problems.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2615C - LAN Switching and Wireless

This course introduces the student to fundamentals of LAN configurations. This is also the third of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study LAN Switching, VLANS, OSPF, EIGRP, VTP, classless routing and Access Lists.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2620C - Accessing the WAN

This course introduces the student to advanced router configurations and network design. This is also the last of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study WAN technology and design, PPP, ISDN, Frame Relay, and network management.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 2615C isrequired. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2660 - Network Security

This course provides an in-depth study of network security concepts and techniques. Students examine theoretical concepts that make computer network security unique. This course provides a practical, hands-on approach when examining networking security techniques. Students examine different network strategies, explore the advancement of network implementation, and study timeless problem solving strategies. The course is also intended to assist with preparation for the CompTIA Security+ certification.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of networking basic computer, and keyboarding skills are strongly recommended.

CET 2685C - Fundamentals of Network Security

Introduction to network security and overall security processes. This hands-on, skill-based course focuses on the design and implementation of security solutions to reduce the vulnerability of the network, using VPNs, network routers and a firewall. This course helps prepare the student for the CISCO Security Specialist certification.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2854C - Fundamentals of Wireless LANs

Develop, implement and troubleshoot wireless networks. This hands-on, skill-based course focuses on the design, planning and operation of wireless networks, with an overview of technologies, security, and design best practices. This course helps prepare the student for the CISCO Wireless Certification.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2880C - Digital Forensics Fundamentals

This course offers a solid foundation to computer forensics investigations: preparing students to acquire and analyze digital evidence. the course covers tools and techniques and explains topics such as file structure, data recovery, e-mail and network investigations, and expert witness testimony. In addition, the student will gain practical knowledge in conducting digital investigations and preserving digital evidence that maybe used in court or corporate inquiries.

Credit Hour(s): 3 Credit Hours When Offered: (Fall and Spring) Prerequisite(s):
CET 2660 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2881C - Digital Forensics II

Digital Forensics II builds upon the foundational knowledge learned in digital forensics fundamentals. Students will utilize industry standard tools to conduct examinations of various digital media and document their findings. Devices to be studied include computers (server, desktop, laptop), mobile devices (tablets, cell phones, smart phones, mp3 players, gps), and devices such as

DVRs and routers. Emphasis will be placed upon real-world digital forensics scenarios and the investigative thought process. At the conclusion of the class, students will be prepared to take the accessdata certified examiner (ace) examination.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

CET 2880C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2891C - Wireless Network Security Certification

This course prepares students to secure wireless networks and protect valuable data from intruders. The following subjects are covered: intrusion tools and techniques, detection systems, WPA/WPA2/802.11i security, enterprise wireless gateways, encryption gateways, secure wireless bridging, and wireless VPN routers. This course prepares students for the compTIA wireless certification exam.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

CET 1854C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2892C - Advanced Network Security

This course examines advanced network security topics including, but not limited to, advanced topics in integration of hardware firewalls, advanced topics in Intrusion Detection Systems (IDS), advanced topics in Internet Protocol-security (IPSec), and advanced topics in Virtual Private Networking (VPN) in network security design. Students will implement designs using equipment in a laboratory setting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

CET 2660 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2940 - Computer Engineering Internship

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

active enrollment in an appropriate degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

This course may be taken up to four times for credit.

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CET 2941 - Computer Engineering Internship

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

This course may be taken up to four times for credit.

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CET 2942 - Computer Engineering Internship

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship

experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

This course may be taken up to four times for credit.

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CGS 1030 - Computer Basics

This is an introductory course for basic computer use, including the Internet. It addresses the use of computers for personal, business, and college purposes. It introduces the Windows operating system and Microsoft Office applications, including Word, Excel, and PowerPoint. Hands-on use of a personal computer is required.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

none

CGS 1550 - Introduction to World Wide Web

This course provides an introduction to the required hardware, software, procedures, uses and building web pages on the World Wide Web and the Internet.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 1570 - Computer Applications for Business

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 1843 - Introduction to E-Commerce

This course is designed to provide students with an overview of the dynamics of electronic commerce and how it links information technology to business objectives. Course may not transfer to all State University System institutions.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 2541 - Introduction to Database Concepts

This course will provide an introduction to data modeling and the design and implementation of relational databases and extend the students' understanding of the principles and techniques used in the design and implementation of modern database systems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 2544 - Advanced Database Concepts

The aim of this course is to explore advanced database concepts including an advanced exploration of data modeling and the design and implementation of relational databases. This course will extend the students' understanding of advanced principles and techniques used in the design and implementation of modern database systems and explore database problems and potential solutions.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

CGS 2541 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 2820 - Web Design

This course introduces programming in techniques associated with web-based languages. The student will learn to create

innovative and useful window programs. Topics to be discussed include variables, string handling, loops and arrays, formatting techniques, labels, buttons, menus, loading and saving, error handling, graphics and linking applications.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CIS 1000 - Introduction to Computer Science

A broad survey of computing and computer science topics appropriate for computer science, computer engineering, and information systems students. Math placement at the college algebra level strongly advised.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CIS 1531 - Scripting for Cybersecurity Professionals

Scripting for Cybersecurity Professionals introduces the student to a variety of scripting languages. These scripting languages are an integral part of modern penetration testing tools. The course starts with an introduction to flowcharting, windows batch files and Linux shell scripting. With the importance of web attacks, the students will cover html and JavaScript. As a prerequisite course to offensive security (advanced penetrating testing), this curriculum covers ruby and python scripting, concluding with a brief overview of assembly, debugging and disassembly.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CIS 1940 - Internship in Computer Studies

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

This course may be taken up to two times for credit.

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CIS 2352C - Ethical Hacking Fundamentals

This course is designed to provide the student with an understanding of the techniques and methodologies of security penetration testing. This course provides hands-on instruction using the various tools and methods that security professionals use to analyze an information system in order to discover vulnerabilities and protect against information loss, cyber-terrorism, and corporate espionage. The student will be introduced to fundamental security testing concepts, gain practical knowledge of computer programming, learn how to properly document a security test, and explore the legal and ethical ramifications of penetration testing. Students will also learn how to apply the appropriate countermeasures in order to reduce the risk that an organization faces.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

CTS 1134 is required. Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

COP 1000 - Introduction to Programming Concepts and Logic

General survey of programming/problem solving techniques. Includes an introduction to structured programming. Algorithm development will employ the use of a modern programming language.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2010 - Visual Basic Programming

This course introduces programming in Visual Basic.Net. The student will learn to create innovative and dynamic data structures using Rapid Application Development techniques. Topics to be discussed include: graphical user interface development and object-oriented programming.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2011 - Advanced Applications Programming in Visual Basic

This course introduces the advanced features of Visual Basic.Net. The student will learn to create advanced versions of innovative and useful Windows programs using Rapid Application Development techniques. Topics to be discussed include: basic and advanced graphical user interface development; sequential file processing; advanced object-oriented programming; ActiveX components; advanced database management development including interfacing to external applications and Visual Basic's internal database manager; multimedia, networking; and advanced data structures.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2030 - Programming In Python

An Introduction to Python programming language using microcomputers. Topics include Python basics, use of Python control and data structures, use of Python function, Python 110, and implementation of basic programming tasks.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2176 - Visual Basic ADO.Net

The aim of this course is to provide an advanced level of knowledge in database programming using Visual Basic's ADO.Net, using normalization, object and relational types, modeling, data validation, and structured query language (SQL) in creating database applications.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 2010 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s):

CGS 2544 , COP 2011 .

COP 2220 - Programming in C

An introduction to C programming language using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2222 - Advanced Programming in C

An advanced exploration of the C programming language using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 2220 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2224 - Programming in C++

An introduction to C++ programming using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2228 - Advanced Programming in C++

An advanced exploration of the C++ programming language using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

COP 2224 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2360 - Programming in C Sharp (C#)

An introduction to the C# programming language using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2362 - Advanced Programming in C Sharp (C#)

This hands-on course examines how to utilize advanced features in the .NET Framework using the C# programming language, in order to build sophisticated applications. Students will work with advanced object-oriented programming topics, including inheritance, partial classes and generics.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 2360 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2650 - Introduction to Mobile Programming

A broad survey of the development of mobile applications and the use of mobile devices. This course will help the student

understand the development process for mobile devices, security measures that should be taken and will provide an overview of developing for both the Android and iOS mobile environments.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

COP 1000 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2654 - Programming for Mobile Devices: iOS (iPhone/iPad)

This class teaches the fundamentals and provides a broad perspective of the iPhone SDK platform. It begins with an overview of the Objective-C language and progresses into the details of the UIKit, as well as several other frameworks essential for development on the iPhone and iPad.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2658 - Advanced Programming for Mobile Devices: iOS (iPhone/iPad)

This class teaches the advanced IOS programming topics and provides a broad perspective of the IPhone SDK platform. It begins with an overview of the Objective-C language and progressed into the advanced details of the UIKit, as well as several other frameworks essential for advanced development of the iPhone and iPad.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 2654 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2660 - Programming for Mobile Devices: Android

This class teaches the fundamentals and provides a broad perspective of the Android development platform. It begins with an overview of the Java language and progresses into the details of the developing for Android-based mobile devices and tablets. The curriculum also covers several other frameworks essential for development on the Android platform.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2662 - Advanced Programming for Mobile Devices: Android

This class teaches advanced concepts and provides a broad perspective of the Android development platform. It begins with an overview of the Java language and progresses into the details of the developing for Android-based mobile devises and tablets. The curriculum also covers several other frameworks essential for development on the Android platform.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 2660 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2700 - Introduction to SQL

An introduction to SQL and the design and creation of object-oriented databases (using SQL). Topics include storing, retrieving, updating and displaying data using Structured Query Language (SQL).

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

COP 1000 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2702 - Introduction to PL-SQL

An introduction to PL-SQL and the design and creation of object-oriented databases (using PL-SQL). Topics include storing, retrieving, updating and displaying data using PL-SQL and Oracle.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COP 1000 IS REQUIRED AND KNOWLEDGE OF BASIC COMPUTER AND KEYBOARDING SKILLS ARE STRONGLY RECOMMENDED.

COP 2800 - Introduction to Java Programming

An introduction to programming using the Java language. Students will develop and apply individual programs.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2805 - Advanced Java Programming

An advanced level programming course using advanced Java techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

COP 2800 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2840 - Web-based Programming I

This course is designed to extend the student's understanding of web-based programming techniques, and give them practical

experience in the use of a range of technologies for creating e-Commerce applications.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 1106 - Fundamentals of UNIX

This course is designed to introduce the UNIX operating system to new users. The student will learn fundamental features of the operating system, including file system navigation, file permissions, editors, command shells, and basic network use. Provides a foundation for more advanced courses in administration and certification.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of networking, basic computer and keyboarding skills are strongly recommended.

CTS 1134 - Network Foundations

This course is designed to introduce students to the terminology and concepts of the network industry, including data communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 1142 - Information Technology Project Management

This introductory course teaches the essentials of information technology project management. This course provides an introduction to the project management body of knowledge, as specified by CompTIA project+. The course discusses the processes, methods, techniques and tools that organizations use to manage information systems projects. The course covers a systematic methodology for initiating, planning, executing, controlling, and closing projects and emphasizes the important special considerations which apply to information technology projects.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

CTS 1156C - Desktop Support

This course introduces the helpdesk skills to troubleshoot hardware or software operation and application problems for end users on the desktop or client-side, based on the Windows operating system. It is designed to help prepare the student to take the two core exams (70-620 and 70-622) required for certification as an MCITP: Enterprise Support Technician students should have user-level competency with Windows and MS Office.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2104 - Introduction to Windows

An introduction to operating systems in general with emphasis on Windows.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2127 - Certified Information Systems Security Professional (CISSP)

This course covers security topics from a management perspective to include, security and risk management, asset security, security architecture and engineering, communication and network security, identity and access management, security assessment and testing, security operations, and software development security. This course will prepare students for management level security responsibilities. This course will prepare the student for the industry certification by ISC2: Certified Information System Security Professional (CISSP) exam.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 2660 is required and knowledge of basic computer and keyboarding skills are strongly recommended

CTS 2143C - CompTIA Server+

This course provides advanced concepts in server hardware components and troubleshooting in a non-vendor-specific environment. Introduction to server installation, server storage concepts, administering services, server roles, virtualization, performance monitoring, security, data protection, and maintenance.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2145 - Cloud Essentials

The course covers cloud concepts and models; virtualization; cloud infrastructure; resource management; security; and systems management. It includes implementation, maintenance and delivery of cloud technologies and infrastructures while ensuring proper security measures are maintained to mitigate risks and threats.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

CTS 2163C - Windows Client Operating System

This course addresses the implementation and desktop support needs of the MS client software, including installation, configuration and management of hardware and file systems, user profiles, remote users, and monitoring of resources and performance. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

KNOWLEDGE OF NETWORKING, BASIC COMPUTER, AND KEYBOARDING SKILLS ARE STRONGLY RECOMMENDED.

CTS 2302C - Windows Active Directory

This course focuses on a Windows server directory service environment, including forest and domain structure, DNS, site topology and replication, organizational unit structure and delegation of administration, Group Policy, and user/group/computer account strategies. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

CTS 1156C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2314C - Network Defense and Countermeasures

This course will explore concepts of network defense and countermeasures as well as hardware and software required to design, configure and implement secure networks. Security topics covered in this course include firewalls, Intrusion Detection Systems (IDS), Virtual Private Networks (VPN) and policy creation using the Windows Operating System (OS), Transmission Control Protocol/Internet Protocol (TCP/IP) packet and signature analysis. The student will get hands-on instruction installing the network defense mechanisms and countermeasure applications. Software will be used for collecting, monitoring and auditing various activities; students will analyze threats and intrusions.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

CET 2660 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2321 - UNIX Administration

This course is designed for network administrators in a UNIX operating environment. UNIX operating system concepts, architecture and administration will be explored using Linux. Includes shell programming, database managements, rapid application development, and programming tools such as PERL and C++.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

CTS 1134 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s):

CTS 1106

CTS 2346C - Windows Server Administrator

This course will provide students with the opportunity to develop the skills required to manage accounts and resources, maintain server resources, monitor server performance, and safeguard data. Recommended knowledge level: A+, Network +, Security + and Win client operating system. This course prepares the student for the MCITP exam.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2347C - Windows Network Infrastructure

This course addresses the configuration of Windows Server network infrastructure. Topics covered include: routing and remote access, network access protection, network authentication, IPv4 and IPv6 addressing, DHCP, DNS, WINS, DFS, IPSec, and security. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed) Prerequisite(s):

Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

CTS 2390C - Installing and Configuring Windows Server

This course is the first of a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server infrastructure in an existing enterprise environment. The three courses in total collectively cover implementing, managing, maintaining, and provisioning services and infrastructure in a Windows Server environment. While there is some cross-over in skill set and tasks across the courses, this course primarily covers the initial implementation and configuration of those core services, such as Active Directory Domain Services, networking services, and initial Hyper-V configuration and is also preparation material for.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2391C - Administering Windows Server

This course is the second in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server infrastructure in an existing enterprise environment. The three courses in total will collectively cover implementing, managing, maintaining and provisioning services and infrastructure in a Windows Server environment. While there is some cross-over in skills and tasks across the courses, this course will primarily cover the administration tasks necessary to maintain a Windows Server infrastructure, such as user and group management, network access and data security and is also preparation material for, Exam 70-411: Administering Windows Server.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

CTS 2390C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2392C - Configuring Advanced Windows Server

This course is the third in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server Infrastructure in an existing enterprise environment. While there is some cross-over in skill sets and tasks across the three courses this course will primarily cover advanced configuration and services tasks necessary to deploy, manage and maintain a Windows Server infrastructure, such as identity management and identity federation, network load balancing, business continuity and disaster recovery, fault tolerance and rights management. This course is also preparation material, and maps directly to, Exam 70-412: Configuring Advanced Windows Server Services.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

CTS 2391C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2437 - Administering SQL Server Database

This course provides students with the skills required to install, configure, administer and troubleshoot the client-server database management system of Microsoft SQL Server. This is preparation for the MCP exam, an elective requirement for Windows MCSA/MCSE.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

CTS 1134 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2438 - Advanced SQL Server Database

This course provides students with advanced topics required to install, configure, administer and troubleshoot the client-server database management system of Microsoft SQL Server. This course is designed to prepare the student for certification, an elective requirement for the Windows MCSA/MCSE.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

CTS 2437 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ISM 3220 - Network Technologies for Information Professionals

This course is designed to give the student an understanding of the various networking technologies and their practical application in the management of a business. The course also covers the technical issues involved in designing and implementing an efficient network for voice, data, and information networks. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and at least two information technology or computer science courses at a college or university level.

ISM 3232 - Software Essentials

This course covers a broad range of software topics as they apply to software management and systems analysis and design. Topics include, but are not limited to programming, the systems development life cycle (SDLC), systems management, interface design and Internet technology. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and at least two information technology or computer science courses at a college or university level. Knowledge of basic computer and keyboarding skills are strongly recommended.

ISM 3323 - Applications in Information Security

This course helps develop the important security concepts relative to software application development and access control that provide the knowledge and skills necessary for the successful management of information security in an organization. Students will understand the environment where software is designed and developed as well as the critical role software plays in providing security to an organization's information systems. The course focuses on software development concepts that relate to security, and how access control methodologies fit into the entire enterprise architecture. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing and at least two information technology or computer science courses at a college or university level. Knowledge of basic computer and keyboarding skills are strongly recommended.

ISM 4011 - Information Systems Management

This course provides a study of the language, concepts, structures, and processes involved in management of information systems, including the fundamentals of computer-based technology and the use of business-based software for support of managerial decisions. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing and at least two information technology or computer science courses at a college or university level.

Corrections CJK 0340 - Corrections CCP Physical Fitness

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to encourage students to improve their overall physical fitness, improve their score on the final fitness evaluation, and adopt a foundation for lifelong fitness. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy or Correctional Officer Basic Recruit Academy.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Criminal Justice CCJ 1010 - Introduction to Criminology

A study of the nature and causes of crime and delinquency; the development of delinquent and criminal behavior; theory development in criminology, crime rates and trends, victimology and particular crime pattern areas.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

CCJ 1020 - Introduction to Criminal Justice

An introduction to the philosophical and historical background of law enforcement and the administration of criminal justice. Organization and jurisdiction of local, state, and federal law enforcement agencies, court and criminal procedures, career opportunities in the Criminal Justice field are also covered.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

CCJ 1941 - Internship – Criminal Justice

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Permission of the instructor

Note:

This course may be taken up to two times for credit.

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CCJ 2509 - Introduction to Gangs and Crime

This course provides students with an overview of street gangs, the social factors, and the general classifications necessary for the law enforcement, corrections, and public safety professional. This course explores the history, membership, activity, current trends, and influence of street gangs. Students will be challenged to define community-based solutions and strategies to combat the criminal activity associated with street gangs.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CCJ 2934 - Special Topics in Criminal Justice

This course centers around topics of current interest or of special interest to students or instructors. Topics or focus may vary from semester to semester.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
*This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CJC 2000 - Introduction to Corrections

Theories of punishment and incarceration; the organization of correction programs and institutions, principles of probation and parole, role of parole and probation officers, legal implications; and problems of rehabilitation are covered. This course may be used in transfer to UWF and may be accepted at other upper division schools. Students should consult the department for program planning.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

CJE 1642C - Introduction to Crime Scene Technology

This course explains and discusses the principals and theories in crime scene technology. The course covers specialized collection procedures for biological evidence, weapons, traffic crash evidence, arson evidence, gunshot residue, blood splatter and bodies.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CJE 1735 - Unmanned Vehicle Legal Requirements and Case Law

This course examines the legal requirements and limits of drone operation by law enforcement. The course will also introduce the student to case studies, guidelines, laws, and protocols for law enforcement operations in contrast to use by private citizens. Additionally, this case will examine and define expectations of privacy, based on case law as set forth by the United States Supreme Court. Case studies and Supreme Court decisions from the last century based on the fourth amendment and due process of law, will be studied for class projects. Each student will be required to submit a research paper on a specific related topic as assigned by the instructor.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

CJE 2300 - Police Administration and Organization

This course presents the principles of organization and administration in law enforcement including functions and activities, planning and research, public relations, personnel and training, inspection and control, records and communications and custody.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CJE 2330 - Ethics in Criminal Justice

This course is a detailed exploration of ethical issues in Criminal justice with special emphasis on morality and the law, human behavior, and ethical decision making in law enforcement, corrections and the courts.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CJE 2400 - Police and Community Relations

A study of the relationship of the Justice Administration agencies to the surrounding community. Examines the effect of social change and the consequences that it produces upon law enforcement, corrections, and the courts.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CJE 2600 - Criminal Investigations

Fundamentals of investigation; duties and responsibilities of the detective; interrogation techniques; search and techniques of protecting the crime scene; collection and preservation of evidence; modus operandi systems; scientific aids and other sources of information; court preparation and case follow-up.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

CJE 2736 - Law Enforcement Applications of Unmanned Vehicles for 21st Century

This course will introduce students to current law enforcement uses and abilities of unmanned vehicle systems, along with new and developing applications for exclusive use in law enforcement actions. Students will understand and explain the definitions of

privacy expectations as related to law enforcement actions governed by the fourth amendment. Students will be required to participate in a course project, in which students will develop, justify and define futuristic uses on drone technologies in the law enforcement field. In this team project, a presentation is required to defend the positions and uses of drone technologies as related in the project results.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

CJJ 1002 - Juvenile Delinquency

A study of the nature and cause of juvenile delinquency, the development of the delinquent and criminal behavior, specific criminal justice subsystem (law enforcement, judicial, corrections) problems dealing with juvenile delinquents from initial contact through final disposition and treatment. This course may be used in transfer to UWF and may be accepted at other upper division schools. Students should consult the department for program planning.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

CJK 0002 - Introduction to Law Enforcement

This course is a component of the Florida Law Enforcement Academy. It is designed to introduce the student to law enforcement, the process for becoming a certified law enforcement officer, and the requirements of the academy program. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 12 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0016 - Communication

This course is a component of the Florida Law Enforcement Academy. It is designed to enhance student awareness and understanding of communication and to teach students skills to enable them to effectively interact with people of diverse backgrounds. This course includes classroom instruction and scenario-based training exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 24 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0018 - Legal

This course includes the continuation of study and participation in all rehearsals of selected works of dance repertory and/or original choreography culminating in public performance.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:

This course may be taken up to four times for credit.

DAN 1750 - Dance Conditioning

Dance Conditioning is an excellent course in which to begin your dance training. It is designed to improve fundamentals for the

beginning/intermediate student through daily practice in floor work, yoga, and Pilates exercises. This movement class will get you ready to meet the challenges of other dance classes by toning, strengthening and preparing the body to move.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:

This course may be taken up to four times for credit.

Dental Assisting DEA 0020 - Pre-Clinical Procedures Theory

This course is designed to provide an introduction to the dental assisting profession to include orientation to four handed dentistry and general dental office procedures including, but not limited to basic principles of disease prevention, patient data collection and assessment, and instrumentation. Emphasis is on adhering to safety guidelines as specified by OSHA.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Corequisite(s):

DEA 0020L .

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0020L - Pre-Clinical Practice Lab

This is a comprehensive chair side competency based course. The course provides the skills practice necessary for dental assisting students entering four handed dentistry practice including but not limited to infection control, taking and recording vital signs, assisting with operative procedures, principles of preventive dentistry, instrument identification, and use and maintenance of equipment. Emphasis is on aseptic technique and clinical competency with procedures performed in a contemporary dental practice.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Corequisite(s):

DEA 0020 , DES 0103L and DES 0103

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0130 - Oral Pathology

This course is a general study of the scientific and clinical concepts that include additional knowledge base necessary to the practice of dental assisting. Students will study the normal and abnormal conditions of the oral cavity such as dental caries prevention, the dental caries process and recognition of various common pathological conditions. Oral pathology, histology and embryology are included. Emphasis is on the interrelationship of the information presented with the clinical practice of dental assisting.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DES 0400

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0132 - Dental Nutrition

This is a comprehensive course designed to integrate nutrition into diagnosis, care and treatment of dental patients. It also focuses on the relationships between dental disease, lifestyles, eating habits and oral health.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Corequisite(s):

DES 0400

DEA 0803L - Clinical Practice I

This competency based clinical course provides a real world setting in which to integrate the laboratory and clinical skills learned in

the classroom. The student receives closely supervised hands on training in chair side dental assisting through rotations at community dental offices. Progress is evaluated using predetermined competency guidelines. Students must provide their own transportation, current CPR training, and up-to-date immunization records. Specific procedure requirements and 90 clinical rotation hours (minimum) must be fulfilled to successfully complete this course.

Credit Hour(s): 150 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DEA 0020 , DEA 0020L , DES 0103 , DES 0103L , DES 0400 , DES 0844

Corequisite(s):

DES 0205 , DES 0205L , DES 0830

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0852L - Clinical Practice II

This course is a continuation of Clinical Practice I. It provides a real world setting for students to receive additional training in the clinical skills learned in class. Students are assigned to various offices in the community including but not limited to general dentists, oral surgeons, orthodontists, periodontists, and endodontists. Performance evaluations are utilized to measure competency and provide feedback from the local dental offices to the instructor regarding the students' competency level. Skills are strengthened in Seminar Lab. Students must provide their own transportation, current CPR training, and up-to-date immunization records. Specific procedure requirements and 150 clinical rotation hours (minimum) must be fulfilled to successfully complete this course.

Credit Hour(s): 180 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DES 0205 DES 0205L DEA 0020 DEA 0020L DES 0103 DES 0103L DEA 0803L DES 0400 DES 0844 DES 0602

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0936 - Dental Assisting Seminar

This course is designed to provide a review of materials commonly covered on the Dental Assisting National Board (DANB) Exam. Topics include but are not limited to infection control, general chair side procedures, and radiographic technique. The seminar will provide a mock board examination, and opportunities for review, problem solving, and strengthening skills. The course also serves as an opportunity for feedback from students' Clinical Practice.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DEA 0852L , DEA 0803L , DES 0205 , DES 0205L

Corequisite(s):

DEA 0803L , DES 0206L .

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0103 - Dental Materials

This course is a comprehensive study of the theory of manipulation, physical and chemical properties of materials used in the diagnosis, prevention and treatment of oral disease. The competency based lab that accompanies this course includes exercises to illustrate application and use of selected materials. Students will study various materials including but not limited to impression materials, waxes, filled and unfilled resins, dental amalgams, gypsum, as well as acrylic plastics. Students will become familiar with various pieces of dental laboratory equipment and their uses.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Corequisite(s):

DES 0103L

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0103L - Dental Materials Lab

This course is a comprehensive study of the manipulation, physical and chemical properties of materials used in the diagnosis, prevention and treatment of oral disease. Emphasis is on practical application as it relates to the role of the dental assistant in the contemporary dental practice. It is a competency based lab that accompanies the theory course and includes exercises to illustrate application and uses of selected materials. Students practice the use of various materials including but not limited to impression materials, waxes, filled and unfilled resins, dental amalgams, gypsum, and acrylic plastics.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Corequisite(s):

DES 0103

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0205 - Dental Radiology I

This course is designed to introduce the theory, application and principles of radiographic exposure and processing techniques used in dentistry. Students will receive instruction including but not limited to historical data, radiation safety, exposure, processing, mounting and error prevention. Image interpretation of radiographic anatomical structures will be included.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DES 0400 , DEA 0020 , DEA 0020L

Corequisite(s):

DES 0205L .

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0205L - Dental Radiology Laboratory I

This laboratory course assists students in radiographic performance techniques using DXTR manikins to achieve competency prior to exposure of various patients with varied dentitions. Students practice exposing, mounting, radiographic interpretation, safe darkroom procedures, identification of landmarks and distinguishing radiographic pathology from normal landmarks. Clinical radiographic skills necessary to produce diagnostic quality radiographs including bitewings, periapical radiographs, and panoramic x-rays will be covered. Emphasis is on patient and operator safety guidelines and producing diagnostic quality radiographs.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DES 0400 , DEA 0020 , DEA 0020L

Corequisite(s):

DES 0205 .

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take

advantage of this opportunity.

DES 0206 - Dental Radiology Theory II

Students will learn to identify the normal landmarks of intraoral and extra oral images. They will also be able to demonstrate the ability to interpret x-rays and recognize and identify abnormalities on dental images. Students will learn how to discuss their finding with a dentist, without overstepping the boundaries of diagnosing, from a dental image. Students will be able to explain the differences in cancellous and cortical bone. Students will be able to use an x-ray to identify different restoration types and irregularities in those restorations. Students will be able to point and identify trauma, pulpal lesions and periapical lesions on an x-ray.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DEA 0020 , DEA 0020L , DES 0205 , DES 0205L , and DES 0400

Corequisite(s):

DES 0206L

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0206L - Dental Radiology Laboratory II

This laboratory course assists students in additional radiographic performance techniques to include surveys on patients with varied dentitions. Students practice advanced radiographic exposure techniques, interpretation, additional darkroom procedures, identification of landmarks and distinguishing various radiographic pathology. Clinical radiographic skills necessary to produce diagnostic quality x-rays including bitewing, radiographs, periapical radiographs, and panoramic surveys on actual patients are implemented. Emphasis is placed on patient and operator safety guideline and producing diagnostic quality radiographs. This course will involve live patients, scheduling appointments and presenting prescriptions for x-rays from local dentist.

Credit Hour(s): 30 Clock Hours When Offered: (Summer) Prerequisite(s):

DES 0400 , DES 0205 , DES 0205L

Corequisite(s):

DES 0206

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0400 - Dental Anatomy

This course provides a detailed study of the orofacial and related structures of the head and neck including, but not limited to the eruption, identification and function of the human dentition, study of bony, circulatory, muscular and nervous systems of the head, neck and surrounding structures associated with the oral cavity. A brief introduction to oral histology and embryology will be included.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0501 - Dental Practice Management

This course includes theory and content relating to practical administrative duties performed in the dental office. Lectures and role playing activities are related to the responsibilities of the dental assistant. Topics include but are not limited to appointment scheduling, billing, collections, record keeping, clerical and dental supply inventory. Students are introduced to the use of dental practice software with hands on computer experience. Legal responsibilities, interpersonal relations, and interview skills are included.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DEA 0020 , DEA 0020L

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0602 - Pharmacology and Dental Office Emergencies

This course is designed to familiarize the dental assisting student with the basic concepts and considerations regarding pharmacology and pharmaceutics used in dentistry. Topics presented include nitrous oxide monitoring, emergency procedures and protocol. Lectures will include recognition of emergency conditions in the dental office, not limited to syncope, anaphylaxis, and cardiovascular incidents. Emphasis is placed on the role of the dental assistant in the prevention and management of dental office emergencies.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DEA 0020

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0830 - Expanded Function Theory

This course introduces the dental assisting student to the dental specialty practices and more advanced clinical skills. It also provides the theory of dental specialty practice administration as it relates to the role of the dental assistant including ethical and legal ramifications. Lectures relate topics including but not limited to dental specialty procedures, instruments used in the specialty practices and duties delegated to dental assistants according to the rules and regulations of the Florida Dental Practice Act. Role playing and problem solving activities using case studies relate to duties delegated to dental assistants.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DEA 0020 , DEA 0020L , DES 0400 , DES 0103 , DES 0103L

Corequisite(s):
DES 0830L

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0830L - Expanded Functions Lab

This laboratory course accompanies the clinical practice lecture course DES 0830 and provides opportunity for students to practice application of the duties delegated to dental assistants according to the Florida Dental Practice Act. Students become more proficient in more advanced skills. Competencies containing information and behavioral objectives allow students to master each skill before advancing to the next.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DEA 0020 DEA 0020L DES 0103 DES 0103L DES 0400

Corequisite(s):
DES 0830

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college

credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0844 - Infection Control for Dental Assistants

This course is a general study in biomedical sciences of preventive dentistry to familiarize the dental assisting student with basic principles of microbiology, basic body structures, and their functions and effects as manifested in the oral cavity. The course also covers the effects of nutrition and the role of microorganisms in dental health and blood borne pathogens.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Corequisite(s):

DEA 0020 , DEA 0020L

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Domestic Security DSC 1002 - Domestic and International Terrorism

This course is designed to assist students in recognizing and understanding the elements and objectives of terrorism and 4th Generation Warfare and how they affect public safety planning and response operations.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1004 - Introduction to NRF and NIMS

Designed to inform emergency responders and planners of the key elements in the National Response Framework (NRF) and the National Incident Management System (NIMS) and their relationship to planning and response operations. The curriculum includes classroom exercises.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1222 - Psychological Management of Disaster Victims

This course introduces students to a general overview of terrorism and the potential psychological effect of terrorist events on victims.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1250 - Unmanned Vehicles Fundamentals for Disaster Management

This course examines the protocol and interagency support concepts for the utilization of unmanned vehicles in preparation and response of catastrophic events. Students will be introduced to the development of an emergency response plan which will include unmanned vehicle concepts such as observation, communications, safety, training, and also integration between Public safety agencies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

DSC 1552 - Critical Infrastructure Protection

This course introduces participants to the Critical Infrastructure Protection (CIP) process to secure the effective protection of the people, physical entities, and cyber systems that are critical. The CIP course will guide leaders in the systematic protection of critical infrastructures. More basically, the course will introduce decision sequence that assists leaders and future leaders in ultimately determining exactly what really needs protection as well as when. The course will introduce a time-efficient and resource-restrained practice that ensures the protection of only those infrastructures upon which survivability, continuity of operations, and mission success depend.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1562 - Homeland Security Threat Strategy

This course addresses problems of terrorism from a criminal justice perspective. It is designed to provide students with an understanding of the major issues associated with responding to terrorism in a democratic society. The course focuses on the threat of terrorism to the United States and will review specific strategies to deter terrorist threats to the U.S. The course will assess the relative effectiveness of anti-terrorist activities.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1631 - Planning Considerations for Terror Prevention

This course introduces participants to various aspects of planning for potential terrorist activity. The student will be introduced to basic principles of emergency management, communications, security threats, and the effects these operations may have on

personnel. The student will learn techniques for evaluating their own jurisdiction's vulnerability against terrorist attacks. Students will gain knowledge of the roles and responsibilities of local agencies during terrorism responses. The course introduces participants to various aspects of emergency management of terrorist activity.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1751 - Homeland Security Policy and Law

This course introduces participants to the major debates about balancing democratic freedoms with security from the Patriot Act to Supreme Court decisions on detention powers. The course provides insight into legal strategies necessary to confront ongoing national security threats. The course examines laws designed to preserve both our security and our democratic way of life.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 2055 - Issues in Disaster Response

This course serves as an introduction to disaster response and mitigation for the first responder. Students will be introduced to legislation that has had a major impact on disaster and incident response, the role of local, tribal, state and federal government response to incident and disaster declarations and a brief introduction to the National Incident Management System, National Response Plan and the Incident Management System.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

DSC 2056 - Disaster Response Operations

This course examines the response protocol, logistics, responsibilities, interagency support, and concepts of front end planning involved in preparation for a catastrophic event. Students will be introduced to the development of an emergency response plan that will include concepts such as lookout, awareness, communications, escape, safety (laces), training, and various agency relationships.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 2900 - Development of Unmanned Vehicle Applications

Students complete a project that demonstrates excellence by applying the knowledge of unmanned drones gained from the public safety core courses. Successful completion of the course requires demonstration of the achievement of program objectives and learning outcomes.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

Drafting and Design EGN 1111C - Engineering Graphics

Covers the use of instruments, lettering practice; geometric construction; multiview projection and conventions, auxiliary views, section views, axonometric and oblique projections, rotation, patterns and development, and methods of reproduction.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

ETD 1102 or equivalent: prerequisite only applies to Architectural Drafting and Design students.

ETD 1102 - Introduction to Technical Drawing

A course in the fundamental principles of the graphic language (the language of industry) and is developed for students without previous mechanical drawing experience. Topics include: use and care of instruments, lettering, geometric construction, multiview projection, sketching techniques, inking, and methods of reproduction.

Credit Hour(s): 3 Credit Hours When Offered: (Spring, Summer, Fall)

ETD 1112 - Mechanical Drafting I

The second of a sequence of courses in drafting which includes basic use of instruments, freehand lettering, geometric construction, orthographic projection, sections and conventional revolutions, dimensioning, inking, mechanical lettering, methods of reproduction, and developing computer-aided drafting skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

ETD 1102 and ETD 1320C or equivalent

ETD 1217 - Fundamentals of Dimensioning and Tolerancing

A course designed to help students develop the basic fundamentals of dimensioning and tolerancing. Topics include: dimensioning systems such as; metric, decimal, fractional-inch, foot and inch, tolerancing methods, limits and tolerances, tolerancing accumulation, dimensioning practices, and standards fits.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ETD 1320C - AutoCAD I

A basic course on the use of AutoCAD Software to include: introduction to AutoCAD, drawing commands, display and inquiry

commands, modify commands, dimensioning and annotation, data exchange and output files.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ETD 1340C - AutoCAD II

The second course in a series designed to develop skill and proficiency in the use of AutoCAD software to include: additional drawing commands, editing commands, modify commands, advanced display and inquiry commands, advanced dimensioning and annotation, advanced layering, block, attributes and X-Ref, paper space, UCS, data exchange and output files.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ETD 1320C or equivalent.

ETD 1355C - AutoCAD 3-D Modeling I

A basic course in mechanical design using basic computer geometry techniques. Topics will include: orthographic projections, space relationships of points, lines, planes and revolution of objects. Additional coverage will include principles of surface generation, intersections, wire modeling, and solid modeling techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ETD 1340C or equivalent.

ETD 1801C - Technical Illustration

The purpose of this course is to help students develop the skills, knowledge, and attitudes necessary to be job entry-level qualified as technical illustrators.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
ETD 1112 or EGN 1130C [Inactive], and ETD 1340C .

ETD 2150 - Industrial Print Reading

The beginning level aspects of reading industrial prints such as drawing notes, title blocks, revision blocks, legends, schedules, multiviews, and parts list.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ETD 2218 - Geometric Dimensioning and Tolerancing

An introductory course in geometric dimensioning and tolerancing using the geometric method nationally accepted according to ASMEY 14.5M. Topics covered include: definition and terms, symbols, datum referencing, locational tolerancing, form tolerancing, profile tolerancing, orientation and runout tolerancing, and math for positional tolerancing.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Summer) Prerequisite(s):
ETD 1217 or equivalent.

ETD 2350C - AutoCAD III

An advanced course designed to help students develop proficiency in the area of computer aided drafting and systems drafting. Topics covered include: transfer drawings, digitized drawings, explanatory drawings, multiview projections, exploded assemblies, pictorial drawings, auxiliary views, sections, details, geometric dimensioning and tolerancing, and CADD concepts.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ETD 1340C .

ETD 2357C - Inventor I

A basic course in Parametric Solid Design using AutoDesk Inventor Software. Topics include: basic concepts of parametric part sketching 3D part creation, Revolve, Sweep and Lofted features, shell and coil, surface creation, sheet metal and orthographic drawing production.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

ETD 2358C - Inventor II

The second course in a series designed to develop skill and proficiency in Parametric Solid Design, using Inventor Software. Topics include: sheet metal modeling, assembly concepts, assembly modeling approach and tools, advanced constraints, motion simulation, adaptive technology and drawing presentation.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
ETD 2357C .

ETD 2364C - SolidWorks I

A basic course in Parametric Solid Design using SolidWorks Software. Topics include: basic concepts of parametric part sketching 3D part creation, Revolve, Sweep and Lofted features, shell and coil, surface creation, sheet metal and orthographic drawing

production.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

ETD 2368C - SolidWorks II

The second course in a series designed to develop skill and proficiency in Parametric Solid Design, using SolidWorks Software. Topics include: sheet metal modeling, assembly concepts, assembly modeling approach and tools, advanced constraints, motion simulation, adaptive technology and drawing presentation.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

ETD 2364C or higher or equivalent.

ETD 2731 - Mechanical Drafting II

A course that continues and completes the student's study of the fundamentals intrinsic to all types of drafting. Topics covered include isometric, diametric, trimetric, oblique, and perspective projection, descriptive geometry, auxiliary views, related mathematics, precision dimensioning developing computer-aided drafting skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

ETD 1112 or equivalent.

ETD 2735 - Mechanical Drafting III

A course that continues and completes the student's study of the fundamentals intrinsic to all types of drafting. Topics covered include: isometric, diametric, trimetric, oblique, and perspective projection, descriptive geometry, auxiliary views, related mathematics, and precision dimensioning developing computer-aided drafting skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

ETD 2218 and ETD 2731 or equivalent.

ETD 2905 - Independent Study – Drafting

Practical treatment of special geometry, graphics, and design with emphasis on individual work projects utilizing such graphical techniques as orthographic projection, perspective drawing, auxiliary views, topographic drawing, and graphing.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):

EGN 1111C and ETD 1112 or permission of instructor.

Note:

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.
* This course may be taken up to four times for credit.

Early Childhood Education DEP 2100 - Child Growth and Development

This course covers the growth and development of the child from conception through age five, including the physical, social, emotional and mental development of the young child, influence of environment, and principles and theories of development.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EEC 1001 - Introduction to Early Childhood Education

Study of principles and practices of programs for young children; current research in early childhood education, role of the teacher, and selection and use of equipment and materials for groups of young children.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

EEC 1002 - Early Childhood Program Administration

This course provides the student with management and administrative skills related to child care services. Instruction includes: director responsibilities; staff selection, supervision, and evaluation; planning for budget, nutritional services, facility maintenance, health, and safety; and marketing techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EEC 1201 - Infants and Toddlers

This course provides the student with information pertinent to the care of infants and toddlers. Special attention is given to selection of developmentally appropriate curriculum. Course work satisfies the Child Development Associate competency standards for Infant/Toddler.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EEC 1309 - Early Childhood Education Foundations

Study of the techniques of using language arts, science, art, social studies, music, mathematics, and physical activities with young children.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Summer, Spring)

EEC 1401 - The Family In Early Childhood Education

This course is comprehensive in scope, emphasizing skills and concepts of parenting which include: adjustment to parental roles; parent-child communication, care, growth, and development of children; cultivating strong families; special concerns; alternative family structures; educational institutions working effectively with parents; and agencies and legislation affecting children and parents.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EEC 1601 - Assessment in Early Childhood Education

Designed to increase objectivity and proficiency in observing and interpreting children's behavior in addition to increase awareness of normative patterns of children from birth through five years of age. Current background check (fingerprinting) as required by the Early Childhood program in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

EEC 1750 - Guidance for Young Children

A study of principles, methods, guidance and discipline techniques used to promote positive social development in young children; influence of environment and developmental level of child on social behavior.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring Summer)

EEC 1949 - Internship, Early Childhood Education

On-the-job training (OJT) in the Associate in Science degree program in which the student is enrolled. The student is under the supervision, at work, of a qualified supervisor appointed by the respective agency, who works with the NWFSC instructor regarding student's OJT objectives based on student's goals and prior training. The supervisor will rate the student's performance, knowledge, comprehension, dependability, initiative, cooperativeness based on OJT performance. NWFSC instructor will evaluate student OJT experience in consultation with agency supervisor regarding OJT performance and project paper on approved project submitted two weeks prior to close of semester. This course may be repeated four times for a total of 12 semester hours. Current background check (fingerprinting) as required by the Early Childhood program in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

EEC 1309 or EEC 1201 .

EEC 2220 - Language and Literacy Instruction In Early Childhood Education

Study of the principles, methods, and materials used to assist young children acquire basic skills to use language effectively and competently; evaluation and development of appropriate teaching materials to use with young children.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

EEC 1309

EEC 2222 - Math and Science Instruction In Early Childhood Education

Study of the basic concepts, methods, and materials of mathematics and science appropriate to the education of young children. Identification of the role of staff members in the center for the education of young children. Assignment with young children in community agencies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring and as needed) Prerequisite(s):

EEC 1309 .

EEC 2732 - Child Nutrition, Health and Safety

Methods of meeting physical needs of young children through nutrition and good health practices. Recognition of childhood diseases and care of the handicapped child.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EEC 3213 - Teaching the Language Arts In Early Childhood Education

The focus of this course will be on the development of language and literacy in children ages birth through age four. Emphasis will be placed on understanding the process of emergent literacy including vocabulary and language, phonological awareness, print knowledge and comprehension; and on designing a developmentally appropriate language arts program in relation to the early learning and developmental standards. This course will require observing and participating in an early childhood classroom.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

EEC 3227 - Art, Music, and Movement

The focus of this course will be on developing an understanding of the creative developmental process in the life of children from birth through four years old. Emphasis will be placed on the teacher's role in developing opportunities and materials for young children to express themselves creatively through music, drama, dance and two- and three-dimensional art and on providing varied opportunities for young children to gain an appreciation of art, music, drama, and dance in ways that reflect cultural diversity in relation to the early learning and developmental standards. This course will require observing and participating in an early childhood classroom.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEC 3320 - Principles and Methods for Teaching Early Childhood Social Studies

This course is designed to prepare students to teach social studies In the early childhood classroom. Emphasis is on implementing the project approach to investigate components of social studies to include: individual development and identity; people, places, and environments, technology and our world; and civic ideals and practices. The student will increase and apply knowledge and skills in the Florida Early Learning and Developmental Standards relevant to this content area.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEC 3511 - Curriculum for Infants and Toddlers

The focus of this course will be on the design, implementation and evaluation of programming and curriculum that promotes growth and development of young children birth to three years old and aligns with the early learning and developmental standards. Study of typical and atypical development will be included. Emphasis will be on working effectively with families of infants and toddlers.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEC 3524 - Professionalism/Program Development

Focus of this course will be on management and leadership in early childhood education programs. Topics will include mentoring adults, professional development, staff assessment, program evaluation, and child advocacy. Career options in the field of early childhood education will be explored. This course will require observing and participating in a program or agency related to early childhood education.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

EEC 4404 - Families and Diversity

This course will focus on building positive relationships with families through communication and involvement. Focus will include developing an awareness of diversity and multicultural considerations in working with families of young children. The course will explore the role of the family and the influence of the community on the development of young children in a diverse society; and will prepare the student to work effectively with families and communities.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEC 4421 - Teaching Math and Science in Early Childhood Education

The focus of this course will be on developing an understanding of how concepts, skills and attitudes in early childhood mathematics and science are developed in young children ages birth through age four. Math topics will include number sense and operations, patterns, geometry, and measurement. Science topics will include scientific inquiry, physical science, life science and earth science. Emphasis will be on the alignment of the Early Learning and Developmental Standards with a developmentally appropriate approach to teaching math and science in the early childhood classroom. This course will require observing and participating in an early childhood classroom.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

EEC 4613 - Systematic Observation and Assessment

The focus of this course will be on understanding the purpose of child assessment, implementing developmentally appropriate practices in formal and informal child assessment, and using assessment results to support learning, to identify special needs, to evaluate programs, and to respond to program accountability requirements. A field experience is required to practice various methods of assessment in an early childhood setting.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEC 4714 - Facilitating Social Development In The Classroom

The focus of this course is on implementing effective classroom management practices including establishing an appropriate physical environment, setting up appropriate classroom routines and rules and creating a positive classroom community. Emphasis will be on strategies for guiding children's behavior, teaching social problem-solving skills and responding appropriately to challenging behaviors.

Credit Hour(s): 3 Credit Hours When Offered: (Spring, as needed) Prerequisite(s):

Upper Division Standing

EEC 4940 - Internship

Supervised teaching in an assigned Early Childhood Education setting. Student teaching assignments will be made by the Department of Teacher Education Office. This course requires a minimum grade of "C". Current background check (fingerprinting) is required for this course.

Credit Hour(s): 9 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Upper Division standing with permission of Department Chair

EEX 4201 - Young Children with Special Needs

The focus of this course will be on working with young children birth through age four in an inclusive early childhood classroom. Emphasis will be on identifying typical and atypical development, creating an inclusive early childhood learning environment, understanding special education law, developing an awareness of resources for inclusive practice to meet the needs of young children and their families.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

Earth Science ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

Economics ECO 2013 - Economics I

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

ECO 2023 - Economics II

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

Education EDE 4223 - Integrating Art, Music, and Physical Education

This integrative course provides students with critical understanding of art, music, and physical education. Emphasis is placed on the effective integrative lesson planning and modeling techniques to art, music, and physical education in elementary schools. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

EDE 4226C - Integrated Language Arts, Social Science and Literature

This course is designed to prepare candidates to teach language arts and social science in elementary classrooms. Teacher candidates will develop units of study that integrate literature, language arts, with social science content. Emphasis is on constructivist principles and methodology. Teacher candidates will plan and deliver standards-based language arts and social

science lessons designed to meet the needs of diverse learners including English language learners (ELLs) and students with exceptionalities. This course requires 18 hours of field experience in a K-6 classroom setting. Current background check (fingerprinting) acceptable to the district in which the field experience will take place is required for this course. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

EDE 4930C - Professional Elementary Educator

This course is designed to prepare the pre-service teacher to transition into the workplace. Includes resume writing, professional dress and demeanor, interview techniques, refining professional portfolio, class discussion of issues common to teacher interns, and review strategies for certification exams. This course requires a grade of "C" or better.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

EDF 1005 - Introduction to the Teaching Profession

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

ENC 1101 AND (MAC 1105 or STA 2023)

EDF 1005A - Introduction to the Teaching Profession - A

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. This course is intended for those students that are not planning to enter a degree program leading to teacher certification. An additional fingerprinting cost may be associated with this course. If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EDF 1006 - Field Experience in Education

This Educational Field Experience course allows students to work in an educational setting for a semester to meet requirements for admission to the BSE program. This course requires a minimum grade of "C". Current background check (fingerprints) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

permission of department chair.

EDF 2085 - Introduction to Diversity for Educators

This course will provide the student with the opportunity to explore personal values and attitudes toward cultural diversity. Designed for the prospective educator, the theoretical component will examine the issues of teaching in culturally diverse classrooms. An eighteen-hour field experience and examination of educational materials will enhance the student's understanding of multiculturalism. An additional fingerprinting cost may be associated with this course. This course requires a minimum grade of "C" if used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

EDF 3214 - Human Development and Learning

This course is designed to cover the principles of learning and student development with applications to learning/teaching situations. Identification and analysis of students' academic, physical, cognitive, emotional, motivational, and social development is to be emphasized. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

EDF 3430 - Measurement, Evaluation, and Assessment in Education

This course studies the basic principles and methods of measurement, evaluation, and methods of test construction. Students will interpret standardized test scores, construct teacher-made tests and other classroom assessments, and evaluate portfolio and performance assessment. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

EDF 3910A - Projects in Teacher Education

Directed study and individual projects designed to meet the needs of Teacher Education students completing an artifact required in the B.S.E. program. This course requires a grade of "C" or better.

Credit Hour(s): 1-4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Upper division standing with permission of department Chair

EDF 3910P - Projects in Teacher Education – Field Placement

Directed study and individual projects designed to meet the needs of Teacher Education students completing field experience in the B.S.E. program. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 1-4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Upper division standing with permission of department Chair

EDG 3343 - Instructional Strategies

This course provides an overview of instructional models and strategies. Emphasis is placed on principles of state standards, instructional methods, and lesson planning and instruction. Students will develop knowledge of instructional models and lesson plan construction for effective implementation including the diverse student populations. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C

EDG 3410 - Classroom Management, School Safety, Law, and Ethics

Practicing teachers are provided strategies for managing a safe, stimulating learning environment for all learners. This course emphasizes school safety, law, and ethics as they apply to schools, districts, and the learning environment. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better. This course is restricted to practicing teachers.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Online Only Prerequisite(s):
upper division standing.

EDG 3410C - Classroom Management, School Safety, Law, and Ethics

Pre-service teachers are provided strategies for managing a safe, stimulating learning environment for all learners. This course emphasizes school safety, law, and ethics as they apply to schools, districts, and the learning environment. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

EDG 4940 - Internship

Supervised teaching in a public or private school. Student teaching assignments will be made by the department of teacher

education field placement coordinator. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 9 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

upper division standing with permission of department chair.
EDE 4223 , EDE 4226C , EDF 3214 , EDF 3430 , EDG 3410C , EDG 3343 , EEX 3070 , LAE 4343C , MAE 3350C , RED 3309C , RED 3511C , RED 4312 , RED 4519C , SCE 3350C , TSL 3081C , TSL 4140C

EEX 2010 - Introduction to Exceptional Children

Study of incidence, nature, etiology, law and services available in connection with learners with disabilities such as: intellectual and developmental disabilities, learning disabilities, attention deficit hyperactive disorder, emotional or behavioral disorder, autism spectrum disorder, communication disorders, deaf or hard of hearing, blind, physical disabilities, other health impairments, and gifted and talented.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

EEX 3070 - Methods of Inclusion and Collaboration

This course examines the basic identification techniques and strategies used to promote academic and social integration and interaction of "mainstreamed" exceptional students. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

EME 2040 - Introduction to Technology for Educators

This course will develop competencies necessary to integrate technology into classroom instruction. Students will survey a variety of instructional technology materials, software, and systems, as well as learn to use these in the classroom environment. This course requires a minimum grade of “C” if used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring Summer)

EME 3410 - Integrating Technology in the Classroom

In this course, students will learn specific methods to design a technology-rich classroom for the 21st Century Learner. Students will explore models of technology integration, within math and science curricula, apps for classroom management, and technology tools for assistive/differentiated instruction. Students will learn how to perform administrative tasks more efficiently using cloud/web-based apps. Students will create technology-based products for the classroom utilizing learning management systems and applications. Individualization will allow each student to select and develop materials in their disciplines. The course requires a minimum grade of a "C."."

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3343 and EDG 3410C

EVR 3949 - Extended Internship, Environmental Science

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Minimum Grade of "B" in any college-level science course and permission of instructor.

LAE 4343C - Writing Across the Curriculum

This course prepares pre-service teachers by developing an understanding of the foundations of writing through the use of writers workshops and instructional strategies necessary to provide adequate instruction to emergent, novice, and transitional writers. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAE 3350C - Principles and Methods for Teaching Mathematics K-6

In this course, students will apply knowledge of teaching strategies, methods and materials for teaching mathematics in grades K-6. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAE 4312C - How Children Learn Math

This course is designed to develop the skills and concepts necessary to deliver the mathematics curriculum effectively in the classroom. The content strongly reflects the curriculum emphases of the National Council of Teacher of Mathematics, and topics are presented using a process-oriented approach. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAE 4930C - Professional Math Educator

This course is designed to prepare the pre-service teacher to transition into the workplace, and includes resume writing, professional dress and demeanor, interview techniques, refining professional portfolio, class discussion of issues common to teacher interns in mathematics, and review strategies for certification exams. This course requires a grade of "C" or better.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAE 4940C - Teaching Methods in Middle Grades Math Field Experience

In this course, students will apply knowledge of teaching strategies, methods and materials for teaching mathematics in a middle school classroom. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAE 4945 - Internship - Middle Grades Math

Supervised teaching of Middle Grades Math in an assigned school. Student teaching assignments will be made by the Department of Teacher Education Field Placement Coordinator. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 9 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Upper division standing with permission of department chair.
EDF 3214 , EDF 3430 , EDG 3410C , EDG 3343 , EEX 3070 , EME 3410 , MAC 2312 , MAD 3107 , MAE 3350C , MAE 4312C , MAE 4940C , MHF 4404 , MTG 2206 , RED 3324C , RED 3335C , STA 2023 , and TSL 3081C

RED 3309C - Early and Emergent Literacy K-2

This course is designed to increase the understanding of early literacy development and the conditions which promote total literacy from birth through lower elementary grades. Language theory and current research are used to shape informed practices regarding literacy development. Connections are made among all aspects of literacy learning: reading, writing, listening, speaking and attitude development. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

RED 3324C - Teaching in the Middle Grades Curriculum

This course presents theory and methodology for teaching reading at the middle school level with emphasis on strategies for vocabulary and comprehension, evaluating student progress in reading, and integrating reading and study skills into content area instruction across the middle school curriculum. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

RED 3335C - Teaching Reading in the Content Areas

This course addresses strategies, materials, and skills for teaching reading in content areas. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

RED 3324C and upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

RED 3511 - Intermediate Literacy 3-6: Reading and Thinking

This course combines the theory and practice in the teaching of reading/ literacy in the elementary intermediate grades. Procedures for meeting individual differences, differentiated instruction, selected use of materials, and classroom organizations will be examined. This course requires a minimum grade of "C" or better and is restricted to practicing teachers.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

RED 3309C and upper division standing

Prereq/Corequisites:

EDG 3410C , EDG 3343

RED 3511C - Intermediate Literacy 3-6: Reading and Thinking

This course combines the theory and practice in the teaching of reading/literacy in the elementary intermediate grades. Procedures for meeting individual differences, differentiated instruction, selected use of materials, and classroom organizations will be examined. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

RED 3309C and upperdivision standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

RED 4312 - Integration of Assessment into Classroom Reading

This course introduces formal and informal methods and materials used to identify reading strengths and weaknesses of students.

Emphasis is placed on integrating assessments into the curriculum to strengthen instructional strategies and student success. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

RED 3309C , RED 3511C and upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

RED 4519C - Diagnostic and Instructional Interventions in Reading

This course introduces formal and informal methods and materials used to identify reading strengths and weaknesses of students. Emphasis is placed on diagnosis of reading problems, administration of assessments, evaluation of results and planning instructional interventions to remediate reading difficulties. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

RED 3309C , RED 3511C and upperdivision standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

RED 4854C - Reading Field Experience

This course provides application of knowledge of reading development to reading instruction. Emphasis is placed on increased reading proficiency for struggling students, including students with disabilities and students from diverse populations. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

RED 3309C , RED 3511C , RED 4312 , RED 4519C , upper division standing with permission of department chair

SCE 3350C - Principles and Methods for Teaching Science K-6

This course provides techniques, methods and materials of instruction for teaching science in grades K-6. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

SCE 4930C - Professional Science Educator

This course is designed to prepare the pre-service teacher to transition into the workplace, and includes resume writing, professional dress and demeanor, interview techniques, refining professional portfolio, class discussion of issues common to teacher interns in science, and review strategies for certification exams. This course requires a grade of "C" or better.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

SCE 4940C - Teaching Methods in Middle Grades Science Field Experience

In this course, students will apply knowledge of teaching strategies, methods and materials for teaching science in a middle school classroom. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

SCE 4945 - Internship - Middle Grades Science

Supervised teaching of Middle Grades Science in an assigned school. Student teaching assignments will be made by the

Department of Teacher Education Field Placement Coordinator. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 9 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Upper division standing with permission of department chair.
EDF 3214 , EDF 3430 , EDG 3343 , EDG 3410C , EME 3410 , EEX 3070 , ESC 1000 , EVR 3949 , ISC 4145 , MET 1010C , RED 3324C , RED 3335C , SCE 3350C , SCE 4940C , TSL 3081C , and CHM 1020 or PHY 1020

TSL 3081 - TESOL Issues and Practices

This course is designed to integrate the theories and principles of the Teaching of English to Speakers of Other Languages and applying them to classroom instruction. ESOL methodology and curriculum will be emphasized as they relate to current best practice in ESOL instruction. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a minimum grade of "C." Neither field experience or a background check/fingerprinting are required for current teachers enrolled in this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Upper division standing

Prereq/Corequisites:

EDG 3410C , EDG 3343

TSL 3081C - TESOL Issues and Practice

This course is designed to integrate the theories and principles of the Teaching of English to Speakers of Other Languages and applying them to classroom instruction. ESOL methodology and curriculum will be emphasized as they relate to current best practice in ESOL instruction. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

TSL 4140C - ESOL Methods, Curriculum and Assessment

This course is designed to build on the candidate's knowledge of applied linguistics and cross cultural communication. Candidates will extend their understanding of the role of language and culture in the classroom. This course will prepare candidates for effective planning, instruction, and assessment of ELLs in the classroom. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

TSL 3081C and upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

Electronics EET 1015C - Electricity/Electronics I, DC Circuits

This course introduces the theories, concepts, and relationships of voltage, current, and power in DC series, parallel, and series/parallel circuits containing common circuit elements with single and multiple sources. Students are introduced to Ohm's Law, Kirchoff's voltage and current Laws, Thieving's, Norton's, super-position, and maximum transfer of power theorems and their uses in DC circuit analysis. Students will learn how to use a digital multimeter to troubleshoot and analyze DC circuits.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

EET 1025C - Electricity/Electronics II, AC Circuits

This course introduces the theories, concepts, and relationships of voltage, current, and power in AC series, parallel, and series/parallel circuits containing common circuit elements with single and 3-phase sources. Students will apply Ohm's Law, Kirchoff's voltage and current Laws, Thieving's, Norton's, super-position, and maximum transfer of power theorems and their uses in AC circuit analysis. Included will be the use of a multimeter and oscilloscope for experimentation with and troubleshooting AC circuits.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prereq/Corequisites:

ETM 1005C and EET 1015C

EET 1141C - Solid State Electronics

This is the third course required for Electronics Aide certificate. This course introduces the student to the concept, components, and uses of solid state electronics. Topics include semiconductor devices; thyristors and diodes, transistors, amplifiers, power supplies, oscillators, and optoelectronics. The use of capacitors and inductors in solid state electronics will be also covered. The design, set-up, and troubleshooting solid state circuits and devices using various power supplies and function generators will be dispersed throughout the class.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
EET 1025C

EET 1180C - Industrial Electronic Troubleshooting

This course covers troubleshooting procedures for a variety of electronic equipment and circuits common to industrial applications. The student will develop and implement trouble shooting protocols and plans, equipment monitoring plans, a preventive maintenance plan, and select appropriate test and monitoring equipment. Safety in an industrial setting will be stressed and reinforced through a series of lab exercises throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
EET 1084C

EET 2155C - Linear Integrated Circuits

This course covers the fundamentals and applications of linear integrated circuits and operational amplifiers. The course covers includes inverting and non-inverting amplifiers, comparators, signal generators, differential and instrumentation amplifiers, operational amplifier specifications, active filters, modulator-demodulator integrated circuits, timers, analog to digital converters (ADC), and digital to analog converters (DAC) and measurement and analysis of linear circuits and devices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
EET 1015C , EET 1025C

Engineering Technology EEL 2603C - Robotics-Mechanics and Controls

This course introduces the student to robotics. Instructional topics will include robot classifications, applications, Input/Output (I/O) and sensor interfacing.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
ETS 1542C

EET 1084C - Introduction to Electronics

This course introduces the fundamentals, terminology, and applications used in the electronics industry. The topic coverage will include circuit theory principles, electronic components, transistor usage, amplifiers, power supplies, digital logic techniques, and electronic instruments. The course will also include some basic laboratory exercises to strengthen the topic coverage as it pertains to measurement involving both analog and digital circuits.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ETD 2371C - 3D Printing I

This course will develop elements of creative thinking and problem solving used in the design process, including the techniques and methods used to construct prototypes and models. In the project aspect of this course, the students select a field of specialization to explore methods and materials in a number of options in industrial environment with the use of computer simulation, modeling, and rapid prototyping.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ETD 2364C or ETD 1355C or ETD 2357C or permission of instructor.

ETD 2372C - 3D Printing II

The student will continue to develop elements of creative thinking and problem solving used in the design process, including the techniques and methods used to construct prototypes and models. In the project aspect of this course, the students expand their knowledge in the methods and materials and of computer simulation, modeling, and rapid prototyping.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ETD 2371C or permission of the instructor.

ETI 4205 - Applied Logistics

Introduction to logistics. Emphasis on practical applications. Includes systems engineering, cost/ systems effectiveness, reliability, maintainability, system functional analysis, logistic support analysis, life cycle cost analysis.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

ETM 1005C - Basic Mechanical Operations

This course takes a hands-on approach to the identification, use, care of tools, equipment, blueprint reading, geometric dimensioning, and tolerances used in all aspects of operations and manufacturing.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prereq/Corequisites:

ETI 1420

ETM 1010C - Mechanical Measurement and Instrumentation

This course provides the foundation for mechanical and electronic measurement techniques used in manufacturing environments. The course will integrate the concepts, principles, and techniques of mechanical measurement with the use of various types of instruments including micrometers, verniers, calipers, height gages, digital multimeters and other types of measuring equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ETM 1315C - Hydraulics & Pneumatics Fundamentals

This course introduces the student to basic hydraulic and pneumatic fundamentals. Instructional topics will include components, fluid pressure and flow and basic circuit design and application.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

ETS 1542C - Introduction to Programmable Logic Controllers

This is an introductory course in Programmable Logic Controllers (PLCs.) The student will learn basic concepts with a focus on programming and practical applications.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

EET 1084C

English CRW 2001 - Creative Writing I

Instruction and practice in writing fiction and poetry. Students will submit a poetry portfolio and complete at least one short story.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CRW 2002 - Creative Writing II

Advanced work in poetry and prose modes with emphasis on revision. Students will submit a poetry portfolio and write and revise at least one complete short story. Students will prepare creative work for publisher market.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CRW 2100 - Introduction to Fiction Writing

Practice in writing fiction using various points-of-view. Students will submit completed short stories for workshop. Upon agreement with the instructor, students may elect to develop novel chapters with synopsis. Students will prepare creative work for publisher market.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

CRW 2201 - Introduction to Creative Nonfiction

This writing course examines the narrative possibilities of creative nonfiction. We will explore structure, technique, and authorial presence in representative works of established sub-genres, including literary journalism, travel and/or food writing, memoir, the lyric essay and collage.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

CRW 2300 - Introduction to Poetry Writing

Practice in writing poetic forms employing poetic techniques. Students will workshop completed poems and submit a portfolio of revised poetry. Students will prepare creative work for publisher market.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ENC 0056 - Developmental Writing Module

This course is designed to develop written language skills for students whose entry placement scores do not meet requirements for degree credit courses (not applicable for degree completion). Conducted in a lab setting, this course is self-paced course, designed to allow students to focus on their individual grammar, usage, and writing needs to prepare for successful entry into college credit English courses (not applicable for degree completion). This course may be taken in place of ENC 0027 if a student has a placement score of 98-102 on the PERT. Students may exit Developmental Writing Module by passing the coursework and by obtaining a passing score on the Departmental Exit Exam.

Credit Hour(s): 2 College Prep Credits When Offered: (Offered as Needed) Prerequisite(s):

Students must score 98-102 on the PERT or on an elective basis score 103 or higher on the PERT.

Note:

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

ENC 1101 - English Composition I

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 1101L - English Composition I Lab

An instructor directed writing workshop designed to improve student's opportunity for success in ENC1101. Students will strengthen writing and grammar skills necessary to master the topics and concepts covered in ENC1101. Areas of focus include, but are not limited to, the following: expository and argumentative writing; appropriate diction; conventions of Standard American English grammar, punctuation, sentence structure; conventions of MLA.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):

ENC0025 and REA0017 or equivalent with a "C" or better grade, or a score of 100-116 on the PERT, or on an elective basis with a score of 103 or higher on the PERT.

Corequisite(s):

ENC 1101

ENC 1102 - English Composition II

Interpretative and critical reading of fiction, drama, and poetry. The student will write analytic discourse and research papers as part of the essay process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of ENC 1101 or an equivalent course with a grade of "C" or better.

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 2210 - Technical Report Writing

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

passing score on placement test.

ENG 1001 - Research Papers

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:

This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

LIN 1670 - Writing and Grammar

The course includes practice in writing short essays and encompasses a comprehensive review of grammar and mechanics. This course is strongly recommended for students who have completed Developmental Writing, those who want a preparation for Composition, or those who score 103-116 on the PERT.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communications/verbal achievement, successful completion of any required developmental English coursework with a minimum grade of "C", or exemption from placement testing.

English as a Second Language (ESOL) XEL 01___ - ESOL I

This course provides small group and individualized instruction in both oral and written English communication skills at the beginning level. The course is designed for non-native English speakers.

Note:

* Course number varies with number of instructional contact hours.

XEL 02___ - ESOL II

This course provides small group and individualized instruction in both oral and written English communication skills at the low beginning level. The course is designed for non-native English speakers.

Note:

* Course number varies with number of instructional contact hours.

XEL 03___ - ESOL III

This course provides small group and individualized instruction in both oral and written English communication skills at the high beginning level. The course is designed for non-native English speakers.

Note:

* Course number varies with number of instructional contact hours.

XEL 04___ - ESOL IV

This course provides small group and individualized instruction in both oral and written English communication skills at the low intermediate level. The course is designed for non-native English speakers.

Note:

* Course number varies with number of instructional contact hours.

XEL 05___ - ESOL V

This course provides small group and individualized instruction in both oral and written English communication skills at the high intermediate level. The course is designed for non-native English speakers.

Note:

* Course number varies with number of instructional contact hours.

XEL 06___ - ESOL VI

This course provides small group and individualized instruction in both oral and written English communication skills at the advanced level. The course is designed for non-native English speakers.

Note:

* Course number varies with number of instructional contact hours.

Entrepreneurship ENT 2931 - Selected Studies in Entrepreneurship

In this course, topics of current interest are presented in group instruction.

Credit Hour(s): 1 Credit Hour When Offered: (Spring)

Environmental Sciences ENV 4610 - Sustainable Logistics

This course introduces students to current and future trends in logistics technology, policy and sustainability. Topics include, source sustainability, environmental impacts of existing and emerging technologies, and local environmental conditions and the global climate.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as

meeting the state Core General Education requirements.

EVR 1940 - Internship, Environmental Science

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Minimum grade of "B" in any college level science course and permission of instructor.

Fire Science FFP 0010 - Firefighting I

This course is the first part of the Basic Fire Recruit Academy and prepares students for a career as a volunteer firefighter. Classroom instruction includes a variety of fire related topics which are reinforced and enhanced through practical skills activities. Upon completion, the student is eligible to test for certification as a volunteer firefighter through the Florida State Fire College and may elect to continue training in Firefighter II to pursue state certification as a career firefighter. Permission of the Public Safety Division is required.

Credit Hour(s): 201 Clock Hours When Offered: (Offered as needed) Corequisite(s):

FFP 0077 unless previous certification has been obtained for first responder, EMT, or paramedic.

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 0020 - Firefighting II

This course is the second part of the Basic Fire Recruit Academy and prepares students for a career as a firefighter. The delivery of instruction includes a variety of training in practical skills necessary for the mastery of the basic competencies required in the program. Upon successful completion of this course, the student is eligible to take the Bureau of Fire Standards and Training written and practical examination. Permission of the Public Safety Division is required.

Credit Hour(s): 295 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

FFP 0010 or FFP 0077

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 0077 - First Responder for Public Safety Personnel

This course trains public safety members who are the first to arrive at an emergency in providing efficient and accurate pre-hospital care. Students assess patients for wounds to determine if trauma, shock, burns or closed airways are a problem and how to address those issues by dressing wounds, stabilizing the person or administering oxygen. They immobilize patients and address common emergency medical issues with basic treatments. This course includes hands-on, practical experience and is necessary to be eligible for first responder certification.

Credit Hour(s): 45 Clock Hours When Offered: (Fall, Spring, Summer) Note:

This course is a co-requisite course for students entering the Firefighting Certificate program who do not have certification for first responder, EMT, or paramedic.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 1140 - First Responder for Public Safety Personnel

This course introduces the student to the skills and techniques used for first response to medical emergencies. Classroom instruction includes a variety of medical related topics encountered by public safety personnel. Practical exercises and scenarios are included to enhance classroom instruction and skill development.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 1505 - Fire Prevention Practices

This course is a survey of the principles of fire prevention and investigation. It includes a study of fire hazards in various occupancies; a review of fire prevention codes; a study of procedures and techniques of fire prevention inspection, to include surveying and mapping, recognition and elimination of fire hazards, public relations, methods of determining the area of fire origin, fire cause, fire spread and location and preservation of evidence.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

FFP 0010 and FFP 0020

FFP 1540 - Private Fire Protection Systems

This course is a survey of the principles of fire prevention and investigation. It includes a study of fire hazards in various occupancies; a review of fire prevention codes; a study of procedures and techniques of fire prevention inspection, to include surveying and mapping, recognition and elimination of fire hazards, public relations, methods of determining the area of fire origin, fire cause, fire spread and location and preservation of evidence.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

FFP 0010 and FFP 0020

FFP 1691 - Fundamentals of Firefighting & Unmanned Vehicles

Course introduces the fundamentals of unmanned vehicle applications for firefighting with prioritization of manpower and equipment utilization. Fire officers explore the use of unmanned vehicles for fire ground commanders for tactical operations for all levels of fire. Emphasis for fire investigators on utilization of unmanned vehicles in the investigation process. Course introduces determination of fire cause and origin with collection of evidence by unmanned vehicles during fire scene investigation. Participants will explore the use unmanned vehicles for planning, responding, and evaluating HAZMAT incidents.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

FFP 1702 - Principles of Emergency Services

This course provides an overview to fire protection; career opportunities in fire protection and related fields; philosophy and history of fire protection/services; fire loss analysis, organization and function of public and private fire protection services; fire departments as part of local government; laws and regulations affecting the fire service; fire service nomenclature; specific fire protection functions; basic fire chemistry and physics; introduction to fire protection systems; introduction to fire strategy and tactics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

FFP 0010 and FFP 0020

FFP 1740 - Fire Service Course Delivery

The curriculum draws from many recognized authorities in exploring the methods and mechanics of imparting information and adult learning principles. The course emphasizes techniques which have wide application in teaching situations, as well as devices for specific areas. Also stressed are measuring teaching effectiveness, the use of media and visual aids.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

FFP 0010 and FFP 0020

FFP 1800 - Disaster Education for Individuals and the Community

This course provides a study of the design, development, and delivery of public disaster safety education and programs including: methods of identification of disaster safety programs, the selection of target programs and strategies of affect reduction, methods of designing and implementing information and educational programs, and methods of evaluating a program's impact. Studies include theoretical and practical skills training in individual, group, and mass media communications, instructional skills, planning priorities, and evaluation techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 1801 - Introduction to Emergency Management Administration

This course will discuss emergency management practices and how they relate to natural and man-made disasters. It is designed to help the student develop an understanding of overall emergency management principles, practices, and standards in the local, national, and international environments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 1810 - Firefighting Tactics and Strategy I

This course is a study of the principles utilized on the fire ground for maximum manpower and equipment utilization; fire ground administration starting with a small fire on up through major conflagrations. Emphasis will be on developing thinking skills in relation to crises.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 1890 - Emergency Management Principles for Tourism and Hospitality Industry

This course analyzes emergency management functions and responsibilities within the tourism and hospitality industry. Particular emphasis is placed in the areas of administration, organization, communications, and human relations. Students will learn how historical mistakes can influence human response to disaster situations, and some of the current legal and human challenges posed when dealing with disasters.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 2120 - Fire Service Building Construction

The curriculum draws from many recognized authorities in exploring the methods and mechanics of imparting information and adult learning principles. The course emphasizes techniques which have wide application in teaching situations, as well as devices for specific areas. Also stressed are measuring teaching effectiveness, the use of media and visual aids.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 2610 - Fire Behavior and Combustion

Study of cause and origin of fires with emphasis on fire inspector's or fire officer's role in the investigation process. The course deals with determination of fire cause and origin, collection of evidence, and investigator's preparation for trial.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 2692 - Unmanned Vehicles Applications and Search & Rescue

This course examines the utilization of unmanned vehicles by public safety in various search and rescue operations. Students will be introduced to the utilization of unmanned vehicles during searches for suspects eluding capture. Course will examine the response protocol and interagency support utilizing unmanned vehicles in urban, water, and various terrain search and rescue operations. Students will be introduced to the operations of unmanned vehicles for silver and amber alerts.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

FFP 2780 - Fire Department Administration

The course is designed to present the principles of management theory, and its application in the fire service. The course is intended for officers whose area of responsibility encompasses long and short range planning, budgeting and administration.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 2820 - Emergency Preparedness

This course teaches all aspects of emergency preparedness and planning related to natural and man-made disasters, and basic principles of emergency management. Planning concepts and the planning process will be discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 2823 - Technical Applications in Emergency Management

This course explores issues and problems associated with the use of technology in emergency management. It examines strategies to overcome these issues and problems. Some of the subjects treated are use of the Internet, spatial analysis applications in vulnerability analysis, decision support systems, and emerging technologies.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 2834 - Societal Issues in Disaster Management

This course examines human response to disaster events, including political and economic factors influencing vulnerability. It examines how individuals and institutions make decisions at all levels of disaster response, it is an introduction to current research pertaining to the sociological aspects of disaster, and it will provide increased awareness of the potential and difficulties in using social science research as a basis for modifying public policy.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 2841 - Contingency Planning for the Private Sector

This course is designed to assist students in developing effective public sector plans by using the National Incident Management System and the Incident Command System templates. The curriculum includes case studies and development procedures for private sector logistics management and employee support planning.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

French FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

FRE 1121 - French II

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

FRE 1120 or an equivalent course with a grade of "C" or better.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

General Education Diploma (GED) XGE 14__ - GED 2014 Comprehensive

The GED 2014 Comprehensive Preparation Program provides skills and knowledge building for each of the four content-area assessments of the Official GED 2014 Tests: Reasoning through Language Arts, Mathematics Reasoning, Science, and Social Studies. The purpose of the program is to prepare students to obtain the knowledge and skills necessary to pass the Official GED Tests and be awarded a State of Florida High School Diploma. An additional performance level will certify that the adult student is career and college ready. This program strives to motivate students not only to obtain a GED diploma, but to continue their education to earn a postsecondary degree, certificate, or industry certification.

Note:

*Course number varies with number of instructional contact hours.

Geography GEA 1000 - World Regional Geography

The course introduces the student to geographic regional studies. It will combine the concepts of physical geography and cultural, economic, and human geography as it applies to the differing regions of the world. It will show the relationships between the regional environment and the people who live there, between settlement patterns, economic patterns and cultural patterns within each region; and, using current events, it will show the impact of other phenomena upon those regions and their people.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

Geology GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and

geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2601C - Introduction to Paleontology

This course is a survey of prehistoric life. Topics include fossilization, systematics, evolution, ecology, extinction, and the geological history of life. Laboratory work covers the anatomy, classification, and ecology of major phyla of both extinct and extant organisms, including monerans, protists, plant, macroinvertebrates, and vertebrate animals. The course involves local and regional fossil collecting trips.

Credit Hour(s): 4 Credit Hours When Offered: (Fall or Spring)

Graphic Design GRA 1151C - Illustration I

A beginning course to develop basic technical and conceptual skills with a focus on an industry-standard vector-based drawing program. Students will create logos and illustrations typical of graphic design challenges.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

GRA 1152C - Illustration II

An advanced graphic design course building upon the skills covered in Illustration I; the course includes increased challenges relating to conceptual skills and multi-software integration relating to typical print-based design problems. Access to an appropriate high quality digital camera is required.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

GRA 1151C .

GRA 2140C - Multimedia I

An advanced course covering the development of multimedia projects incorporating a variety of digital media elements. Students will learn an industry standard digital video editing application and the aesthetic and technical considerations involved in content acquisition. Access to a miniDV camcorder suggested.

Credit Hour(s): 4 Credit Hours When Offered: (As Needed) Prerequisite(s):

ART 2602C , GRA 1151C and PGY 1801C .

GRA 2141C - Multimedia II

An advanced course covering principles of design and information architecture surrounding interactive multimedia presentations. Students will learn an industry standard interactive DVD media authoring software application. Students will produce a finished interactive DVD.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

GRA 2140C .

GRA 2181C - Graphic Design Portfolio Development

A final semester course where students will develop a professional portfolio that demonstrates their technical and creative skills. Students will evaluate prior work for inclusion, and determine needs for new work that will enhance their portfolio. Students will develop new work exhibiting illustration, photography, and graphic design skills.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

PGY 1801C , GRA 2190C , ART 2602C , GRA 1151C

GRA 2190C - Graphic Design I

An intermediate graphic design course that focuses on using an industry standard page layout software application. Students will be exposed to the ideas and aesthetics involved in the production of print publications. Access to a high quality camera digital camera is required. It is recommended that students take PGY1801C at the same time or prior to taking this course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

GRA 2191C - Graphic Design II

An advanced Graphic Design course covering the aesthetics and challenges associated with producing complex multi-page printed communications. Access to an appropriate high quality digital camera required.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

GRA 1151C , GRA 2190C , PGY 1801C .

GRA 2900 - Independent Study – Graphic Art

This course covers the practical treatment of Graphics/Printing Technology. Emphasis is on individual work projects.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

GRA 1151C or PGY 1801C

GRA 2905 - Independent Study – Graphic Design

The student will initiate independent computer related work, utilizing various software and hardware. The course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

GRA 1151C or PGY 1801C

GRA 2950C - Advanced Graphic Projects

An advanced Graphic Design course addressing common Graphic Design problems. Students will explore advanced software application functionality and creative, aesthetic, and portfolio development. Access to a high quality digital camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

ART 2602C , ART 2603C , GRA 1151C , GRA 2190C , PGY 1801C .

Health Education HIM 1000 - Health Information and Delivery Systems

Orientation to medical records history and professional associations. Confidentiality, filing, retrieving, indexing, numbering, storage and content of the medical record is also discussed. The course includes job search skills and professional job performance.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1012 - Health Care and Legal Compliance

In-depth study of federal, state, local laws governing preparation, and use of the healthcare record in the healthcare delivery system.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1432 - Pathopharmacology

Introduction to the nature, cause, and treatment of disease entities and the body's defense mechanisms. Commonly used drugs will also be discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2253 - CPT Coding - Part 1

Instruction and practice in basic CPT coding conventions, principles of classifying physician services using current procedural terminology (CPT-4), APC, and auditing procedures. Ethical standards of practice will be analyzed.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

HSC 1531 and HIM 1432 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:

BSC 2020C OR (BSC 1085C AND BSC 1086C)

Note:

(Previously listed as HIM1253)

HIM 2272 - Healthcare Reimbursement

Emphasis on billing regulations for the State of Florida. Course content includes LMRPS, Workers' Compensation laws, Florida Medicare, and claims for automobile accident injuries.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

HIM 2253 and HIM 2724 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2291 - CPT Coding Part 2

This is an advanced course in ICD, CPT and HCPCS coding systems. Students will learn guidelines and applications to more complex case studies and health records according to current ethical standards of practice, inpatient and outpatient prospective payment systems, encoding software and RBRVs.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

HIM 2253 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

HIM 2724 - ICD Coding Part 1

This course provides a foundation using ICD-10-CM/PCS coding conventions, rules, methodology and sequencing, data sets, documentation requirements, and coding resources.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

HSC 1531 and HIM 1432 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:

BSC 2020C OR (BSC 1085C AND BSC 1086C)

HIM 2729 - ICD Coding Part 2

This course focuses on assigning appropriate ICD, DRG, and Level II (HCPCS) codes to a wide range of original source medical documents. This course increases the quality of code selection by applying the decision process in problem solving using well-defined medical record review methods and guidelines. Ethical practices will be discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

HIM 2724 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2815C - Professional Practice Experience

Working in a simulated, online environment, students will endeavor to code and bill using nationally recognized, American Health Information Management Association (AHIMA) simulation software.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:

HIM 2291 HIM 2729

HIM 2931C - Special Topics in Health Information Technology

This course is a review of skills and work processes to support classification and coding to become nationally certified in-field. Effective test-taking strategies for certification exams and employability skills will be discussed.

Credit Hour(s): 1 Credit Hour When Offered: (Summer) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s):

HIM 2291 and HIM 2729

Note:

* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

HSA 3110 - Health Care Organization and Management

This course focuses on the structure and management of health care organizations, and the fundamental issues facing the U.S. health care system. Key topics include health status, the organization of health services, manpower, public health, financing, facilities, utilization, quality, regulation, and national health policy. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 3111 - Introduction to Health Care Management

This course studies the administration, organization and delivery of health care in the United States. Topics to be examined include health care leadership, management, strategy, performance improvement, information technology, insurance, financial and human resources management, as well as ethical and legal concepts. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 3113 - Contemporary Issues in Health Care

This course is designed to introduce students to a range of issues related to health and health care in the United States. Course content will give students the opportunity to explore differing perspectives as they develop a deeper understanding of the issues and enhance their research and communication skills. The course will enable students to analyze and evaluate evidence regarding

controversial issues. Students will develop and practice skills in formulating and writing well-informed, well-articulated arguments and reflections.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed) Prerequisite(s):

upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 4191 - Health Information Systems

This course focuses on the theories, concepts and principles of health information systems and development of critical thinking skills for use in practice/working in health care informatics. Current trends and issues in using, designing, and managing heath care information systems will be examined. Students, applying evidence-based knowledge, will analyze the design and implementation of health care information systems. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 4922 - Capstone: Health Care Management

This course integrates the information, skills, and abilities provided throughout the Health Administration Program in a capstone project. Students complete a project that demonstrates excellence by applying the knowledge gained from the core courses and materials studied throughout the program. Successful completion of the course requires demonstration of the achievement of program objectives and learning outcomes. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

HSA 3110 , HSA 3111 , HSA 4191 , and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

History AMH 2010 - American History I

American History to 1877; describes the social, political, and economic development of the American people against the geographical background of the New World. Particular emphasis on American intellectual and political thought leading to the emergence of basic American character, ideas and attitudes. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AMH 2020 - American History II

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.
Ω Courses listed with this symbol have a Civic Literacy Competency.

WOH 1012 - World Civilization: Early Humans through Global Expansion

A study of world history from 4000 BC to 1650 AD as it relates to the development of western civilization. History is analyzed in terms of social, religious, philosophical, political, and economic concepts rather than chronological facts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to

meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communication/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

WOH 1022 - World Civilization: The Modern Period and Renaissance to the Present

A study of history from 1650 AD to the present as it relates to the development of the modern world. History is analyzed in terms of social, religious, philosophical, political, and economic concepts rather than chronological facts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Hospitality Management FOS 2201 - Food Service Sanitation Management

Acquaints students with the National Restaurant Associations' ServSafe® Food Protection Manager Certification information, Food and Drug Administration's Food Code as well as the challenges and opportunities facing the hospitality and culinary industries in the areas of sanitation and safety management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Critical Control Point Program (HACCP), and provides a basic understanding of quality sanitation management. The curriculum is based on the National Restaurant Associations' ServSafe® Food Protection Manager Certification information. Students will sit for the ServSafe® Food Protection Manager exam at the end of this course.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

FSS 1001 - Culinary Techniques

Emphasis in this course will be placed on the basic methods and chemistry of cooking. Students study ingredients, cooking, theories, terminology, equipment, technology, weights and measures, formula conversions and work on cooking skills and procedures.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

FOS 2201

Corequisite(s):

FSS 1202L

FSS 1120 - Food and Beverage Purchasing

Study of purchasing and inventory control functions used for the proper acquisition of all foods, beverages and disposables used in the hospitality industry. This includes the development of purchase specifications, determination of order quantities, executing supplier price comparisons, employing proper receiving procedures, managing product storage functions, and developing proper product issuing procedures. Emphasis on product cost analysis, yields, pricing formulas, controls, and record-keeping at each stage of the purchasing cycle.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

FSS 1202L - Food Production I

Students will acquire knowledge and skill in the preparation of food. Included are basic principles and techniques of food preparation, management of resources, use of recipes, use and care of equipment, and evaluation of food products. The course emphasizes safety and sanitation practices.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
FOS 2201

Corequisite(s):
FSS 1001

FSS 1221L - Food Production II

Students will focus on the knowledge and preparation of meats, poultry, seafood, as well as starches, fruits and vegetables. Students will learn to prepare menus for special dietary needs. This course will utilize all dry and moist methods of cooking. Menu selection and balance will be studied. The course emphasizes safety and sanitation procedures.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
FOS 2201 and FSS 1202L with a grade of "C" or better.

FSS 1246L - Baking and Pastries I

Students apply the fundamentals of baking science and pastry preparation to produce a variety of bread products and pastries. Special emphasis is given to the application of advanced techniques in bakery management and the use and care of equipment found in bake shops. Preparation of breads and rolls, classical cakes and icings. Student must pass written and practical baking examination covering a variety of techniques and procedures.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
FOS 2201

FSS 1250C - Dining Room Management & Service

The class will learn and implement the service appropriate for restaurant a la carte dining. Focus on principles for dining service, sanitation and presentation of the dining room, review of menus and customer expectations and guest service will be covered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall)

FSS 2030C - Contemporary Cuisine

Emphasis is placed on learning to use various condiments and seasonings that are indigenous to different parts of the world in food preparation. Topics may include Far East cuisine, Middle Eastern, Mediterranean, North African cuisine, Continental cuisine. Lectures, demonstrations and preparations will also cover American regional cooking, farm to table, trends in the culinary industry and greenhouse procedures. Greenhouse will be used for the lab portion of this class. Alternative diet recipes to be explored. Student must successfully pass written and practical examination covering a variety of cooking techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
FOS 2201

FSS 2240L - Classical Cuisine

Students prepare and learn the skills and management theories involved in classical dishes. Concentration is on the basics of classical cuisine, such as stocks, soups, and sauces. Attention is given to the management tasks of portion control, costing and presentation. Special emphasis is given to classics such as emulsion sauces, thickening agents, and sauces derived from the Mother sauces. Student must successfully pass written and practical examination covering a variety of techniques and procedures.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
FSS 1221L

FSS 2241L - International and Regional Cuisine

Students will learn quantity food production by preparing multi-course ethnic meals typical of several cultures during the semester to live guests.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
FOS 2201 (Sanitation and Safety Management), FSS 1202L (Food Production I) with a C or Better, FSS 1221L (Food Production II) with a C or Better

FSS 2251 - Food and Beverage Management

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

FSS 2284C - Catering, Banquet and Event Management

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for

various types of banquets, theme buffets, and physical management of floor lay-out and table setup. Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

FSS 2500 - Food and Beverage Cost Control

This course focuses on the principles and procedures involved in an effective control of food, beverage and labor costs for the hospitality industry. This course provides the fundamentals for gathering information, developing performance goals and procedures, assessing and evaluating the information and applying the results to maintain efficient food, beverage and labor cost control. This course includes the examination and analysis of hospitality Profit and Loss Statements used to evaluate operational performance.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

FSS 2941 - Culinary Internship

This course provides a planned work-based experience that will provide students with an opportunity to fine- tune skills learned in coursework and enhance workplace skills through supervised practical experiences related to their career objectives. Internship requires a minimum of 135 clock hours of work. May be repeated for credit, but grade forgiveness cannot be applied.

Credit Hour(s): 2 Credit hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s): FOS 2201 , FSS 1202L , FSS 1221L

FSS 2942 - Culinary Internship

The Program Director has the discretion to provide override approval as it relates to the waiver of required program/discipline-related courses. This course provides a planned work-based experience that will provide students with an opportunity to fine- tune skills learned in coursework and enhance workplace skills through supervised practical experiences related to their career objectives. Internship requires a minimum of 135 clock hours of work. May be repeated for credit, but grade forgiveness cannot be applied.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s): FOS 2201 ,FSS 1202L with a grade of "C" or better, and FSS 1221L with a grade of "C" or better.

HFT 1000 - Introduction to Hospitality Management

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s): Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1250 - Hotel and Resort Operations

This course acquaints students with the operation of a hotel, motel and resort including front office procedures in registering, accounting for and checking out guests, promotional and sales practices, housekeeping, interior decoration, purchase of furniture, carpeting, linens and supplies, maintenance and engineering of a practical nature, facilities specifications, purchasing, and storage.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 1410 - Front Office Management

This course guides students through all the skills including directing the activities and solving the complex problems, needed to properly manage the front office of a hotel/motel/resort. The course also acquaints students with the operation of all the departments as they apply to their primary responsibility of selling rooms and serving guests.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 1500 - Marketing and Sales in the Hospitality Industry

How to sell and promote the many services the food service/lodging industries offer guests. Prepare and present the fundamentals of a marketing plan.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

HFT 2210 - Hospitality Management

Training in the techniques involved in the supervision of employees, developing sound relations with other departments, group discussions, and methods of improvement and development of cost consciousness. Job Analysis and job description techniques are developed. The course explores issues that make managing tourism and hospitality (T&H) businesses different to businesses in other sectors. These issues are faced by small and large T&H businesses alike: from owner-operator cafés, motels or tourism

businesses to multi-national hotel chains, international airlines or tour companies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 2223 - Human Relations and Supervisory Development

Designed to provide specific application of proven training systems and methods for managers in the hospitality industry.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

HFT 2401 - Hospitality Industry Financial Accounting

Basic understanding of financial accounting and specifically Hospitality Industry accounting concepts and procedures used in hotels, restaurants. Utilize POS system in class activities.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

HFT 2600 - Hospitality Law

Nature and function of our legal system as it applies to the operations of the hospitality industry. Innkeeper-Guest relationship, Contracts, Condominium Association contracts, Torts, Civil Rights, insurable risks are emphasized.

Credit Hour(s): 2 Credit Hours When Offered: (Fall)

HFT 2941 - Hospitality Internship

This course consists of on-the-job experience supplied by the hotel-motel-resort- restaurant industries. Job placement will be dependent upon the availability of participating hospitality institutions. The course consists of 60 hours per semester of on-the-job instruction accompanied by a seminar class.

Credit Hour(s): 2 Credit Hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2942 - Hospitality Internship

This course, an extension of Hospitality Internship (HFT2941), consists of on-the-job work experience supplied by the hotel, motel, resort and restaurant industries. Students will concentrate on 3 specific areas or functions that are career-goal oriented. Job placement will be dependent upon availability of participating hospitality institutions. The course consists of 150 hours of on-the-job instruction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):

HFT 1000 , FOS 2201 , HFT 1410 , and HFT 1250

Humanities HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1905A - Independent Study – Arts and Humanities

A defined independent study which is pursued under supervision of a faculty directing teacher and recorded through departmental procedures. Designed to permit a student to pursue nonscheduled academic and laboratory work which may be of a specialized or advanced nature and not available through classes or courses available on a college schedule. Departmental approval is required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is also required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):

approval from department chair, a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

HUM 2250 - Humanities – A Contemporary Perspective

This course is an integrated study of the artistic, cultural, philosophic, religious, social, and technological influences that shape modern western cultures in the modern era. The focus will begin with the 20th century and follow, chronologically, the issues of the modern era. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2700 - Humanities – Foreign Study

A variable humanities content course designed to allow students first-hand learning experiences outside the United States. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Legal Assisting PLA 1003 - Introduction to Paralegal Studies

This course is designed to give students a broad understanding of the nature of the paralegal profession and the elements contained within the profession, as well as its responsibility.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1005 - Legal Terminology

This course is designed to give an explanation of the common legal vocabulary involved in the broad, general principles of substantive and common law.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1013 - Introduction to the Legal System

A practical introduction to the US legal system, types and sources of law, the courts, and related topics; a beginning course for students seeking careers in legal secretary technology or legal assisting.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1114 - Legal Research and Writing

This course is designed to provide the student with necessary skills and knowledge required in legal research/case analysis and legal writing.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

PLA 1003 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1203 - Civil Procedure

This course provides an insight into the system of dispute resolution for private parties and the government provided by the court systems of the various states and the federal government in a non-criminal setting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1600 - Wills, Trusts, and Probate

This course is designed to provide the student with an introductory knowledge of estate planning, wills, and probate administration.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1800 - Introduction to Family Law

An introduction to practices as they relate to family law.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 2273 - Tort Law

This course is designed to provide the student with an introductory knowledge of tort law with objectives centered on personal injury torts.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 2949 - Internship - Paralegal

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of a minimum of 12 credit hours in the appropriate discipline, including PLA 1003 and permission of the instructor is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

*This college credit course is not intended for transfer and may not be applied toward the AA degree.

Library Science LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

Literature AML 2010 - American Literature: 1492 - 1865

A course in American Literature from the pre-Colonial period to the Civil War. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AML 2020 - American Literature: 1865 - Present

A course in American Literature from Civil War to present. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: AML 2010 is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2012A - English Literature: Old English through the Enlightenment

A study of English literature from the Old English period, Beowulf, through the late Eighteenth century, the Age of Enlightenment, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2022 - English Literature: Romantic Period Through the Present

A study of English literature from the Romantic period through the present, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: ENL 2012A is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2090 - Contemporary Literature

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2100 - World Literature: Antiquity through the Renaissance

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from antiquity through the Renaissance, that reflect cultural and intellectual heritage. May be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet the Gordon Rule requirements for general education, a minimum

grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s): ENC 1101 .

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2120 - World Literature: Renaissance through the Present

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from the Renaissance to the present, that reflect cultural and intellectual heritage. May be used as a humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered, Fall, Spring, Summer) Prerequisite(s): ENC 1101 . (Note: LIT 2100 is not a prerequisite for this course)

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Machining/CNC ETI 2419C - Advanced Concepts of CNC Machines and CNC Machining Practices

This course is designed to provide the student with advanced concepts in CNC machines and CNC machining to include: theory, operation, setup, safety, and practices.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s): PMT 2261C or PMT 2262C

PMT 1203C - Introduction to Machining

This course introduces the student to basic mechanic fundamentals. Instructional topics will include hand tool identification and application, fabrication machine identification and application, drill press identification and application, and shop safety.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PMT 1250C - Introduction to CNC Machining

The history and development of CNC (computer numerical control). Programming methods are reviewed with the emphasis of skills placed on programming, milling, drilling and turning with M and G code preparation. Manual and computer assisted programming are also reviewed. Students will program, set up and operate full size CNC machines found in our manufacturing lab. Projects will be assigned to students with an expectation of performing these tasks on manufacturing equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PMT 2213C - Machining I

In this course students will continue to develop basic machining skills and better utilize machine tool accessories to assist in different machining operations to include: Set up and utilize machine tool accessories, vertical knee milling operation, manual lathe operations, manual lathe threading and drill operations.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s): PMT 1203C and ETD 2218

PMT 2261C - CNC Machining I

This course provides training in cnc machine operation and programming. The student will gain technical knowledge and programming methods employed in cnc machining centers. CNC machine programming, set-up and operations are taught using computer and hands on applications. Metal fabrication processes are taught through lectures, demonstration and student generated projects. Completion of this course offers students technical skills as a cnc operator processes to be applied in various

machining and fabrication industries.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

PMT 1250C or equivalent.

PMT 2262C - CNC Machining II

This course will offer students a working knowledge of Solidworks and Solidworks Cam. An in-depth study of Cad/Cam software, CNC processing methods and the set-up of CNC machining centers. The course lectures and lab offer students hands-on applications using Solidworks generated projects processed with Solidworks cam tool path software to generate various projects. The student will also learn to calculate machining feeds and speeds, edit CNC programs and part production for mill and lathe.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

PMT 2261C or eqivalent experience.

Management HUS 4950 - Capstone: Human Resources Management

This capstone will build upon and integrate the primary human resource management skills introduced in prior emphasis courses. Students will have the opportunity to work on a hands-on project to demonstrate, apply, and develop their knowledge in the field of human resources.
This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

MAN 3310 , MAN 3320 , MAN 3350 , and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2021 - Management

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2300 - Personnel Management

An introduction to personnel practices and procedures. Topics include the personnel management system, maximizing employee potential, organizational behavior, and labor management relations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3052 - Management Philosophy and Practice

A comprehensive study of contrasting philosophies of management, current theories of leadership, management and supervision, as well as current trends and issues for business managers; focuses on applications and cases for development of competencies across all business functions and units; emphasis is placed on the cross-functional aspects of management, as well as the manager's need for a general business perspective. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing is required. Concurrent or prior enrollment in GEB 3031 and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3120 - Leadership and Group Dynamics

An applied leadership course with a focus on case studies, projects and group interaction; includes theoretical background on group dynamics, small group behavior and motivation, power, types of groups, verbal and non-verbal communication skills and team-building. Emphasis will be placed on sociological and psychological dimensions of inter-group relations, including analysis and problem-solving through simulations, cases and similar activities which reflect a general business perspective, as well as leadership and group dynamics across a variety of business units/functions. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing is required. Concurrent or prior enrollment in GEB 3031 and MAN 3052 , and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3240 - Organizational Behavior

Designed to develop student understanding of individual, group and organizational issues that affect and shape businesses. Topics include motivation, communication, decision making, leadership, power, organizational structure, team performance, organization

diversity and change management. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3310 - Issues in Human Resource Management

Introduces the full range of human resource management functional areas, including recruiting and hiring staff, performance evaluations, employment regulations, discipline and termination, downsizing, compensation and benefits, job analysis, the organized labor setting, equity/diversity issues, and policy design. Approach will focus on current issues and applications. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3320 - Employee Staffing and Benefits

An intermediate level course in employment staffing issues focusing on staffing patterns, organizational structures, job analysis and design, staffing efficiencies, employee assistance programs, staff projection models, and employee services. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Upper division standing and MAN 3310 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3350 - Training and Development

Covers various staff training and development models, effective workshop techniques, designing and implementing company-wide training and development programs. Assessment of training needs, training and development as a benefit and setting development goals; students will design and conduct at least one workshop/training session for fellow students. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and GEB 3213 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3505 - Production Operations and Logistics Management

This course examines the integration of production operations and logistics management and how this enables an organization to compete successfully in business. Special emphasis is placed on the relationships that exist between operations and the supply chain to include operations and supply chain strategies, business processes, project management, product design and development, and inventory management.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3574 - Acquisition Management

Students will be exposed to the fundamentals of government acquisitions. This course provides conceptual material on government acquisitions, to include program planning, execution, and control. Students will be introduced to the elements of program risk and learn risk management techniques. The systems engineering process will be emphasized to include work breakdown structures, cost -- benefit analysis, and scheduling. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing and GEB 3031 or MAN 3052 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3583 - Project Management

In this introductory Project Management course, students will be exposed to the fundamentals of general project management. This course provides conceptual material on project management techniques appropriate in system/subsystems management. Topics include project management functions, project manager roles and responsibilities, the project life cycle, and conflict resolution. Emphasis will be placed on project oversight issues across the various business units and functions. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing and GEB 3031 or MAN 3052 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3593 - Logistics and Supply Chain Management

Logistics and Supply Chain Management provides an introduction to logistics concepts in both the business and government

environment. The student will gain an appreciation of the various logistics missions encountered both in the business world and government acquisition and support programs. The key concept is that logistics is a process that adds value to the end product whether it is a commercial item for a customer or a system used by the government which must achieve a desired state of readiness through an established or acquired infrastructure. Emphasis will be placed on the challenges related to providing logistical support for procurement, manufacturing, and life cycle support. The course will focus on supply chain strategies, logistics information systems, order fulfillment, inventory, demand forecasting, and collaborative planning. In addition, the student will be introduced to transportation constraints, third party logistics (3PL), warehousing, materials handling, international logistics and facility planning. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing and MAN 3052 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3610 - Global Logistics Management

Examines selected industrial relations systems of Western Europe, Asia and the Americas, with special emphasis on differences among systems and the reasons such differences exist. The industrial relations significance of the multinational enterprise and management problems associated with operations in diverse systems are analyzed.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Upper division standing and MAN 3593 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3786 - Sustainable Enterprise Planning

This course introduces students to assessment tools, design and construction considerations, and operating planning requirements for sustainable enterprises. Students will learn about the ecological and economic benefits of sustainability/green practices. Additionally, they will learn how product, process, and service decisions affect sustainable enterprise concepts. Today's enterprises focus on social and environmental challenges, marketing, supply chain decisions, recycling, reusing, reconditioning, and other product and service decisions in order to realize a competitive advantage. This course will focus on best practices, case studies, evolving trends, and experimental efforts regarding sustainable/green systems.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3903 - Operations Research

Operations Research is a science of modeling and optimization. It allows to model real-world problems by using mathematics, statistics and computers. It provides us the tools and theories to solve real-world problems by finding the optimal solutions to models subject to constraints of time, labor, resource, materials and business rules. With Operations Research, people make intelligent decisions to develop and manage their processes and businesses. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing is required. STA 2023 , MAC 1140 , and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4162 - Customer Relations for Managers

This course focuses on relationship building for all customers of an organization. The impact of culture and diversity on business relationships, successful negotiation strategies, and promotion of the organization through media relations are discussed. Emphasis is placed on the manager's role in improving customer relationships by creating a customer-focused, organizational climate.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4401 - Labor Relations

This course explores the impact of employee organizations on labor relations, current problems, conflicts and trends and includes the development of managerial approaches to achieve labor management cooperation.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4520 - Quality Management

This course examines the strategic role of quality within an organization, as well as strategic issues involved in managing quality. Topics include assessing customer requirements, developing customer focus and measuring quality performance. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (As Needed) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4555 - Quality Certification: ISO 9000

A comprehensive study of internationally uniform quality standards (ISO 9000 and the steps to individual and organizational certification; includes management responsibility, quality system documentation, contract review, design control, process control, inspection and testing, corrective actions and other certification topics. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (As Needed) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4570 - Purchasing and Materials Management

The management of purchasing and the materials for production processes. Cost/price analysis, computer systems, forecasting, materials requirements, negotiations, and contracting are included.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4594 - Reverse Logistics

In this course forward-moving logistics is compared to reverse-moving logistics. Both goods and information are discussed. Topics include federal and state regulations, waste management, recycled materials, technology, financial controls, stakeholders, and performance measurement.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4595 - Logistics Technology

This course provides an overview of the use of technology (bar codes, gps, and radio frequency identification tags) in logistics to control recalls, returns, recycling, and waste management. Management functions, data synchronization, and interrelationships between different technologies to capture data regarding products moving in a logistics system are also discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4720 - Strategic Planning and Management

This course addresses the integration of organizational functions to achieve competitive advantage and organizational harmony through strategy formulation, implementation and evaluation. Activities include case studies and a strategic planning simulation. Topics include change theory, decision-making, planning models, and strategic planning processes as applied in a variety of business settings, units, and functions. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4930 - Capstone: Acquisition Management

In this seminar, students will have the opportunity to participate in hands-on projects applying the techniques in Acquisition Management. Emphasis will be on government acquisition management. Students will create a work-breakdown structure, a project schedule, and perform a cost-benefit analysis of alternatives. Earned value management will be introduced as a method of program control. Students will also identify potential risk areas and suggest mitigation plans. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

BUL 4333 , BUL 4931 , MAN 3574 and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4931 - Capstone: Project Management

This seminar will build on the basic project management skills by introducing the basic tools used by project managers. The student will learn management techniques for project planning, budgeting, scheduling and control techniques, cost estimating and project management software applications. Students will be exposed to the relationship of purchasing and contracting with project management. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Project Management Emphasis: BUL 4333 , GEB 4454 , MAN 3120 , MAN 3583 , and senior standing are required. Knowledge

of basic computer and keyboarding skills are strongly recommended.
Quality Improvement Emphasis: MAN 3583 , MAN 3593 , MAN 4520 , MAN 4555 , and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4940 - Capstone: Supervision

This capstone course will build upon and integrate the primary management skills and concepts introduced in prior emphasis courses. Students will have the opportunity to work on a hands-on project to demonstrate, apply, and develop their knowledge. This course will also cover basic entrepreneurial principles, which will be integrated throughout the student-led projects. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

MAN 3593 , MAN 3903 , MAN 4720 , and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1161 - Customer Service

Designed to build and maintain the critical skills necessary to be a dynamic and successful professional. Students and front-line individuals who work with customers every day will develop strategies to create positive customer relationships. This course provides a practical approach to the thorny issues of customer dissatisfaction and will enable managers to keep service personnel focused on the organization's goals and objectives.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1345 - Supervision I

The course presents the functions of a personnel manager, philosophy of general management, organizational structure, employer socioeconomic climate and career information. Included also are job descriptions and specifications, recruiting practices, applications, resumes, interviewing, placement, performance appraisals, wage and salary administration and other related topics.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2100 - Organizational Behavior

Designed to help students develop an understanding of how they may be motivated to work together in greater harmony in all kinds of organizations. The basis of human motivation and how it is influenced by leadership, the organization itself, and the social environment in which the organization exists.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2141 - Leadership Techniques

This interdisciplinary course addresses leadership in a group setting and focuses on leadership development through discussion, readings, group and individual projects and other applied activities.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

SBM 2000 - Small Business Management

This course provides students the opportunity to learn hands-on technical applications regarding entrepreneurship. It is designed for the student who is interested in the ownership and management of a small business enterprise.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Marketing MAR 2011 - Introduction to Marketing

An introductory course in the field of marketing including a look at marketing as it exists in our economy today. Consideration of the market, the product, distribution channels. Special emphasis on the study of human behavior in marketing promotion.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MAR 4333 - Marketing Strategy

This upper-level marketing course is aimed at the marketing functions of a business, with emphasis on how strategies are

developed and how the marketing mix is created to meet the wants and needs of consumers. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing required and knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2021 - Professional Selling

Selling, correct attitudes and personal attributes for dealing with the public on a business or professional basis.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2041 - Retail Management

This course covers retail store management, location, buying merchandise, control policies, services, pricing, expenses, profits, training and supervision of retail sales forces, and administrative problems. Also includes a variety of current perspectives in retailing management.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2511 - Introduction to Advertising

Advertising as a marketing tool, its planning, creation, and use. A survey of copy writing, layout, and media (newspapers, magazines, radio, television, films, etc.)

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

Mathematics MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is

some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAD 3107 - Applied Discrete Mathematics

This course builds on the foundation established in Introduction to Discrete Mathematics with further exploration in logic, mathematical reasoning, and mathematical proof writing. Topics include logic, set theory, boolean algebra, combinatorics, and graph theory with applications.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Completion of MAC 2312 with a grade of “C” or better or concurrent enrollment in MAC 2312 .

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

completion of MAC 2312 with a grade or “C” or better, or equivalent.

MAT 0018 - Developmental Mathematics I

This course is designed for students whose entry level placement test scores do not meet requirements for degree credit (not applicable for degree completion). It is designed to reinforce the knowledge of operations and applications of fractions, decimals, percents, and signed numbers. An introduction to algebra will also be covered. Students must pass this class with a "C" or better to move on to MAT 0028 .

Credit Hour(s): 3 College Prep Credits When Offered: (Offered as needed) Prerequisite(s):

A score of 50-95 on the PERT.

Note:

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0022 - Developmental Mathematics Combined

A course designed to satisfy the requirements of both MAT0018 and MAT0028 in one semester and prepare students for MAT1033A. Topics to be studied include computations with decimals, percents, integers, operations with rational and polynomial expressions, linear equations and inequalities in one variable, factoring, and basic linear graphing. This course will teach the student to understand and communicate concepts of algebra in the language of mathematics, both orally and written. Due to the nature of this course, calculators are not permitted. A grade of "C" or better is required for successful completion of this course. College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

Credit Hour(s): 6 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

score of 50-95 on the PERT

MAT 0028 - Developmental Mathematics II

This course is designed for students whose entry level placement test scores do not meet requirements for degree credit (not applicable for degree completion). This course emphasizes concepts, techniques, and applications of the following topics: operations with real numbers, linear equations and inequalities in one variable, rational expressions, properties of exponents, polynomials, radical expressions, and graphs of lines.

Credit Hour(s): 4 College Prep Credits When Offered: (Fall, Spring, Summer) Prerequisite(s):

Grade of "C" or better in MAT 0018 or score of 96-113 on the PERT or on an elective basis a score of 114 or higher on the PERT

Note:

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0056 - Developmental Mathematics Module

This course is designed for students whose entry level placement test scores do not meet requirements for degree credit. This course emphasizes concepts, techniques, and applications of the following topics: operations with real numbers, linear equations and inequalities in one variable, rational expressions; properties of exponents, polynomials, radical expressions, and graphs of lines. Student may exit Developmental Mathematics Module by passing the coursework and by obtaining a passing score on the Exit Exam.

Credit Hour(s): 2 College Prep Credits When Offered: (Fall, Spring, Summer) Prerequisite(s):

score of 105-109 on the PERT or elective basis score 110 or higher on the PERT

Note:

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0157 - Modularized Developmental Mathematics II

This course is designed to help students develop computational & algebra skills needed for success in college level mathematics. This course uses a modular format in a lecture/lab setting. Students will take a diagnostic test in class to identify skills that have not been mastered and to determine placement into the appropriate modules. Each student will have an individualized learning plan

such that he or she works only on skills not yet mastered. Possible topics in the learning plan include operations on signed numbers, solving linear equations and inequalities in one variable, graphing linear equations, operations with exponents and polynomial expressions, factoring polynomials and solving quadratic equations, introduction to rational expressions, and operations with square roots. Students will use computerized instruction as well as guided instruction by the instructor. Successful completion of this course requires mastery of the material in each module and a passing score of the department final exam. Course cannot be used toward AA or AS degree.

Credit Hour(s): 4 College Prep Credits When Offered: (Fall, Spring) Prerequisite(s):

MAT 0018 with a grade of "C" or better or a score of 96-113 on the PERT.

Note:

* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 1033A - Intermediate Algebra

This is an intermediate algebra course designed to prepare students for general education mathematics/statistics courses. This course emphasizes concepts, techniques, and applications of the following major topics; factoring, algebraic functions, radicals and rational exponents, complex numbers, quadratic equations, rational equations, two-variable linear equations/inequalities and their graphs, systems of linear equations and inequalities, and an introduction to functions. This course may be used as an elective, but does not meet Gordon Rule requirements for B.A.S., A.A., or A.S. transfer students.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring mathematics achievement, successful completion of MAT 0028 with a grade of "C" or better, or exemption from placement testing.

MAT 1033L - Intermediate Algebra Laboratory

A hands-on lab designed to improve students' chance for success in the MAT1033A Intermediate Algebra course. Students will work to strengthen skills required to master the topics covered in Intermediate Algebra. The topics include, but are not limited to, factoring, algebraic functions, radicals and rational exponents, complex numbers, quadratic equations, rational equations, two-variable linear equations/inequalities and their graphs, systems of linear equations and inequalities, and an introduction to functions

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 0028 or equivalent with a grade of "C" or better, or a score of 110-122 on the PERT, or on an elective basis with a score of 123 or higher on the PERT.

Corequisite(s):

MAT 1033A

Note:

*Students scoring 110-113 on the PERT may enroll in MAT 1033A if they also enroll in MAT 1033L. Students should see an academic advisor.

MAT 2905 - Applied Teaching Techniques for Mathematics

The goals of this course are: refinement or acquisition of mathematics skills and connections between mathematics topics needed for successfully tutoring in an academic setting; acquisition of general methods of tutoring as well as specific tutoring techniques needed for specific courses. Teacher-tutor seminars, teacher-tutor conferences, and formal instruction will supplement the extensive tutoring experiences. Prerequisite: Consent of the department. A minimum grade of "C" is required.

Credit Hour(s): 4 Credit Hours When Offered: (Summer) Prerequisite(s):

Admission to the BS Middle Grades Math degree program

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MHF 4404 - History of Mathematics

This course is for students pursuing an education degree with an emphasis in middle school and secondary mathematics. This course covers the evolution of mathematics from early number systems through modern mathematics. If used to meet NWFSC Teacher Education program requirements, this course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Completion of MAC 2311 with a grade of "C" or better or concurrent enrollment in MAC 2311 .

MTB 1103 - Business Mathematics

This course presents basic principles used to solve everyday business problems, including a review of basic skills and business terminology. Topics in the course include the following: base, rate and percentage, trade and cash discounts, wage and salary administration, insurance (fire and automobile), depreciation and business profits, distribution of corporate dividends, simple interest and bank discount, and buying and selling of corporation bonds and stocks.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

completion of MAT 0028 with a "C" or better or satisfactory test scores. Knowledge of basic computer and keyboarding skills are strongly recommended.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

completion of MAC 1105 or equivalent with a “C” or better.

STA 2023 - Statistics

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Medical Laboratory Technnology MLT 1022C - Introduction to Medical Laboratory Technology

This course outlines the role of the medical laboratory technician and covers the basic principles, techniques, and vocabulary applicable to medical laboratory technology. It also provides overviews of the major regulatory agencies, professional associations, and safety practices. Students will learn basic laboratory mathematics, medical laboratory ethics, specimen collection and handling, and phlebotomy and venipuncture procedures. Admittance to the MLT program is required. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1221C - Urinalysis and Body Fluids

This course covers clinical testing and evaluation of urine and other body fluids. Students will learn to correlate physical, chemical, and microscopic lab findings with disease conditions. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1300C - Hematology I

This course overviews the theories and techniques involved in routine hematology. Topics include the hematopoietic system and blood cell physiology, maturation, and morphology. Students will learn blood cell enumeration, identification, hemoglobin analysis, and clinical correlations. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1302C - Hematology II

This course is a continuation of Hematology I and presents advanced hematology topics as well as the principles and procedures of blood coagulation. Students will examine the role of blood vessels, platelets, and coagulation factors, as well as hematology and hemostasis disease factors. This course requires a grade of C or higher. This requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
MLT 1300C , ADMITTANCE TO MLT PROGRAM

MLT 1401C - Medical Microbiology

This course presents students with principles and methods used in clinical microbiology including taxonomy, isolation, identification, clinical relevance, and antibiotic susceptibility testing of pathogenic bacteria. Students will also receive an introduction to medical parasitology, mycology, and virology. Admittance to the MLT program is required. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 6 Credit Hours When Offered: (Fall) Prerequisite(s):
MCB 2010C , admittance to the MLT program

MLT 1500C - Immunology/Serology

This course covers basic concepts and laboratory practices related to clinical immunology with an emphasis on antibody-antigen interaction in specific diseases. Students will learn about the immune system and its components along with diagnostic principles and procedures involving serological and molecular testing related to immunity and immune disorders. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1525C - Immunohematology

This course overviews the basic theory and concepts of antigen-antibody reactions associated with blood cell transfusions and relates the concepts of immunology to blood banking procedures using the guidelines of the American Association of Blood Bank. Students will examine genetics, the structure of blood group antigens, the role of antibodies in transfusion, complement interactions, and compatibility testing. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
MLT 1022C , MLT 1300C , MLT 1500C

MLT 1610C - Clinical Chemistry

This course outlines the theory, clinical correlations, and laboratory procedures related to the chemical analysis of clinical specimens. Students will receive in-depth instruction on specimen processing, analysis, test interpretation, and quality control procedures used in manual and automated clinical chemistry testing. Admittance to the MLT program is required. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 6 Credit Hours When Offered: (Spring) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 2800L - Clinical Practicum I

Students will be assigned to a clinical affiliate for supervised clinical laboratory experience in either the core laboratory, blood bank,

or microbiology department. This learning experience allows students to perform routine analytical procedures, develop their laboratory skills, and apply program knowledge. This course requires a grade of C or higher.

Credit Hour(s): 4 Credit Hours When Offered: (Summer) Prerequisite(s):

MLT 1022C , MLT 1221C , MLT 1300C , MLT 1302C , MLT 1401C , MLT 1500C , MLT 1525C , MLT 1610C , and admittance to the Medical Laboratory Technology program.

MLT 2807L - Clinical Practicum II

Students will be assigned to a clinical affiliate for supervised clinical laboratory experience in the blood bank either the core laboratory, microbiology department, or blood bank. This learning experience allows students to perform routine blood banking procedures, develop their laboratory skills, and apply program knowledge. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):

MLT 1022C , MLT 1300C , MLT 1221C , MLT 1401C , MLT 1525C and admittance to the Medical Laboratory Technology program.

MLT 2811L - Clinical Practicum III

Students will be assigned to a clinical affiliate for supervised clinical laboratory experience in either the core laboratory, blood bank, or microbiology department. This learning experience allows students to perform routine analytical procedures, develop their laboratory skills, and apply program knowledge. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):

MLT 1401C and admittance to the Medical Laboratory Technology program.

MLT 2930 - Medical Laboratory Technology Capstone

This online course allows students to apply their MLT knowledge to case studies and to review major areas of the MLT curriculum in preparation to become licensed professionals. Students will discuss and review material in hematology, urinalysis, microbiology, clinical chemistry, immunohematology, immunology, molecular methods, laboratory operations, medical ethics, and laboratory safety precautions.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

MLT 1221C , MLT 1401C , MLT 1302C , MLT 1610C , MLT 1525C , MLT 1500C , and admittance to the Medical Laboratory Technology program.

Medical Office Skills HSA 1100 - Introduction to Health Care

This course provides an overview of the United States Healthcare System, including the economic, social, political, and technological forces that shape the industry. The role of state and federal government and regulatory agencies in healthcare delivery is examined. The fundamental roles and responsibilities of healthcare team members are surveyed. Healthcare safety, security, and infection control procedures will also be discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1100 - Health Education

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1400 - First Aid

Preparation to meet emergencies that occur in the school, home or on the highway. Instruction and practice in dressing and bandaging, care of wounds, shock, bone and joint injuries, cardiopulmonary resuscitation, transportation of the injured oral poisoning and other medical emergencies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HSC 1531 - Medical Terminology

An introduction to prefixes, suffixes, root words, combining forms, Latin and Greek forms, spelling, and pronunciation, with emphasis on building a working medical vocabulary based on body systems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 1107 - Word Processing I

Integration of basic keyboarding and word processing – learning the keyboard, creating, editing, saving, and other word processing functions.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 1355 - Records Management

Methods and systems of filing used in business offices, filing equipment, and time-and-motion skills. Filing practice sets are used.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2117 - Word Processing II

Continuation of Typing and Word Processing I – develop keyboarding and document processing using a microcomputer.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

OST 1107 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2335 - Business Communications

Business Communications is a comprehensive coverage of language structure and particular emphasis on writing superior business letters and reports. Instruction in principle, then illustration, and practice in applying the principles. A fundamental concept of the appearance, language and style, tone and psychology of effective business letters.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2401 - General Office Management

Study of practices and procedures in the modern office. Emphasis on exercising judgment, handling incoming calls and callers, processing mail, word processing systems, editing and composing techniques, travel arrangements, banking procedures, employment applications and resumes.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

OST 2117 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

Meteorology MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

Military Science (ROTC) MSL 3201 - Adaptive Team Leadership

Examines skills that underlie effective problem solving, analyze military missions and plan military operations, execute squad battle drills.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 3202 - Leadership in Changing Environments

Probes leader responsibilities that foster an ethical command climate, develop cadet leadership competencies, and apply principles and techniques of effective written and oral communication.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 3203 - The Joint Environment

Provides an introduction to the joint military environment. The course provides an overview of the development of national and regional policy through the national Security Council and national security system.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 4301 - Developing Adaptive Leaders

Discuss staff organization, functions, and processes, analyze counseling responsibilities and methods, and apply leadership and problem solving principles to a complex case study/simulation.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 4302 - Leadership in a Complex World

Capstone course to explore topics relevant to second lieutenants entering the army, describe legal aspects of decision making and leadership, analyze army organization from tactical to strategic level.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Music MUL 1010 - Music Appreciation

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUM 1620 - Audio and Acoustic Fundamentals

Audio and Acoustic Fundamentals explores the basics of audio systems and equipment and the acoustical environment in which they are used. Emphasis is placed on equipment terminology, function and acoustical listening. The two basic fundamentals are summed together to begin laying the basic foundation required to operate audio and recording equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MUM 2300 - Introduction to the Music Industry

This course is an introduction to the history, principles, and practices of the music industry. Topics will include music publishing, copyright, distribution, industry organization, producing, and general business functions.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

MUM 2600 - Recording Techniques I

This course is designed as an introduction to basic audio engineering and studio practices. Listening exercises, phychoacoustics, microphone characteristics, and studio etiquette will be studied. In addition the student will study techniques and practices and procedures of multi-track recording, acoustical balancing, editing, and over dubbing in a variety of situations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MUM 1620

MUM 2601 - Recording Techniques II

This course explores advanced multi-track recording skills and audio production techniques, edits, use of outboard equipment and live multi-track recording.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MUM 1620 , MUM 2600 .

MUM 2604 - Multi-Track Mixdown (Post Production)

This course explores the application of signal processing equipment as it relates to multi-track master mixdowns. In addition, software and hardware application of mixdown is applied to post-production practices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MUM 1620 , MUM 2600 , MUM 2601 .

MUN 1000 - Summer Ensemble Workshop

An ensemble workshop open to any student who desires to improve vocal and physical presentation skills. A variety of musical physical styles will be studied and performed. Students participating in Summer Ensemble Workshop will be expected to participate in several scheduled performances.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

experience in high school or a desire to learn.

MUN 1001 - Summer Ensemble Workshop II

An ensemble workshop and performance to improve vocal and physical presentation skills. A variety of musical physical styles will be studied and performed. Students participating in Summer Ensemble Workshop II will be expected to participate in several scheduled performances.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

MUN 1000 .

MUN 1002 - Summer Ensemble Workshop III

An ensemble workshop open to any student who desires to improve vocal and physical presentation skills. A variety of musical physical styles will be studied. Students participating in Summer Ensemble Workshop will be expected to participate in several scheduled performances.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

MUN 1000 , MUN 1001 .

MUN 1140C - Wind Ensemble I

An instrumental ensemble providing an outlet and learning experience to study and perform standard wind band literature, to improve individual instrumental skills, and to sharpen ensemble techniques. The Wind Ensemble performs in both on and off campus venues.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

experience in high school or community band programs.

Note:

This course may be taken up to four times for credit.

MUN 1310 - Women's Ensemble

A music organization open through auditions to any student having experience in reading music. A variety of musical styles will be studied and performed. Students electing NWFSC Chorus will be expected to participate in scheduled performances.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

Experience in high school choruses or choirs.

Note:

This course may be taken up to four times for credit.

MUN 1340A - NWFSC Show Choir I

A study of the fundamental techniques and principles of integrating dance, voice, music and acting into a performance show choir. Training in voice, jazz movement, character interpretation and personality presentation is covered. Membership is open to all part-time or full-time students on a credit or audit basis. All music majors and performance majors must participate. The show choir appears in public performances at frequent intervals throughout the year.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

Audition, consent of department, music or performance minor.

Note:

This course may be taken up to four times for credit.

MUN 1360 - Madrigal Singers I

Auditioned a cappella ensemble teaching choral styles that range from the Renaissance madrigal to present day, such as vocal jazz, spirituals and contemporary choral works. This course if for the "first year" student.

Credit Hour(s): 1 Credit Hour When Offered: (Offered Fall, Spring) Prerequisite(s):

Audition based on vocal quality, musicianship and sight reading ability.

Note:

This course may be taken up to four times for credit.

MUN 1390 - Symphony Chorale I

A music organization open through auditions to any student. The Symphonic Chorus will study and perform literature for the large sized chorus.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
audition or permission of instructor.

Note:
This course may be taken up to four times for credit.

MUN 1710A - Rock and Jazz Ensembles I

Music performing organization open to any student who wants to develop his or her performance repertoire. Laboratory studies include techniques of performing music, literature, practices, styles and media applicable to designated organized ensemble.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
Some experience in high school bands, etc.

Note:
This course may be taken up to four times for credit.

MUN 1720A - Rock and Jazz Ensembles II

Music performing organization open to any student who wants to develop his/her performance repertoire. Laboratory studies include techniques of performing music, literature, practices, styles and media applicable to designated organized ensemble.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
experience in high school bands.

Note:
This course may be taken up to four times for credit.

MUN 2311 - Women's Ensemble II

A music organization open through auditions to any student having experience in reading music. A variety of musical styles will be studied and performed. Students electing Women's Ensemble will be expected to participate in scheduled performances.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUN 1310

Note:
This course may be taken up to four times for credit.

MUN 2361 - Madrigal Singers II

Auditioned a cappella ensemble teaching choral styles that range from the Renaissance madrigal to present day, such as vocal jazz, spirituals and contemporary choral works. This course is for the "second year" student.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUN 1360 .

Note:
This course may be taken up to four times for credit.

MUN 2371 - NWFSC Show Choir II

A study of the fundamental techniques and principles of integrating dance, voice, music and acting into a performance show choir. Training in voice, jazz movement, character interpretation and personality presentation is covered. Membership is open to all part-time or full-time students on a credit or audit basis. All music majors and performance majors must participate. The show choir appears in public performances at frequent intervals throughout the year.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUN 1340A .

Note:
This course may be taken up to four times for credit.

MUN 2392 - Symphony Chorale II

A music organization open through auditions to any student. The Symphony Chorus will study and perform literature for the large sized chorus.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUN 1390 .

Note:

This course may be taken up to four times for credit.

MUS 1905A - Independent Study – Music

A defined independent study which is pursued under supervision of a faculty directing teacher and recorded through departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized or advanced nature and not available through classes or courses available on a college schedule. Departmental approval required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of “C” is also required.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

Approval from department chair, a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

MUS 1934 - Music - Special Topics

A defined special topics which is pursued under supervision of a faculty member and recorded through usual departmental procedures. This course may be taken up to four (4) times for credit.

Credit Hour(s): 3 When Offered: (Offered Fall, Spring)

MUS 2930 - Music – Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Note:

*This course may be taken up to four times for credit.

MUT 1001 - Fundamentals of Music

A pre-theory course for the music major, non-music major, or for the elementary education major.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MUT 1111 - Music Theory I

A study of the fundamentals of basic musicianship, music notation, simple rhythms, key signatures, intervals, major and minor scales, intervals, triads, 7th chords, polyphonic composition and elementary keyboard work. This course also introduces students to tools necessary for analyzing musical compositions of the 17th & 18th centuries.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s):

MUT 1241

MUT 1112 - Music Theory II

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, species counterpoint, chord structures, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

MUT 1111

Corequisite(s):

MUT 1242

MUT 1241 - Ear Training and Sight Singing I

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s):

MUT 1111

MUT 1242 - Ear Training and Sight Singing II

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

MUT 1241

Corequisite(s):

MUT 1112

MUT 2116 - Music Theory III

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including secondary chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

MUT 1112

Corequisite(s):

MUT 2246

MUT 2117 - Music Theory IV

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including modulation, non-tonicizing fully diminished 7th chords, augmented 6th chords, mode mixture, Neapolitan chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries while providing an introduction to Romantic period and chromatic musical structures.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

MUT 2116

MUT 2246 - Ear Training and Sight Singing III

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Credit Hour(s): 1 Credit Hour When Offered: (Fall) Prerequisite(s):

MUT 1242

Corequisite(s):

MUT 2116

MUT 2247 - Ear Training and Sight Singing IV

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Credit Hour(s): 1 Credit Hour When Offered: (Spring) Prerequisite(s):

MUT 2246

Corequisite(s):

MUT 2117

MVB 1201 - Applied Music Secondary – Brass I

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For nonmusic majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:

This course may be taken up to four times for credit.

MVB 2202 - Applied Music Secondary – Brass II

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For nonmusic majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

MVB 1201.

Note:
This course may be taken up to four times for credit.

MVK 1211 - Applied Music – Piano I

Private instruction in piano, as secondary instrument, consisting of one half-hour lesson per week. Minimum of one hour daily practice is required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

MVK 1311 - Applied Music - Piano I for Majors

Private instruction in Piano in the freshman year of study as the student's principal performing medium. This one hour, weekly lesson is for intended piano majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which three-four memorized selections from standard literature will be required.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVK 1211 and Division Chair approval.

Note:
This course may be taken up to four times for credit.

MVK 2221 - Applied Music – Piano II

Private instruction in piano, as a secondary instrument, consisting of one half-hour lesson per week. Minimum of one hour daily practice is required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVK 1211.

Note:
This course may be taken up to four times for credit.

MVK 2321 - Applied Music - Piano II for Majors

Private instruction in Piano in the sophomore year of study as the student's principal performing medium. This one hour, weekly lesson is for intended piano majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which a memorized sonata movement and three-four memorized selections from standard literature will be required.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
MVK 1211 , MVK 1311 and Division Chair approval.

Note:
This course may be taken up to four times for credit.

MVP 1201 - Applied Music Secondary – Percussion I

Private instruction in percussion instruments to develop the student's performance ability in an applied area. One half-hour private lesson per week. Minimum of one hour daily practice is required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

MVP 2202 - Applied Music Secondary – Percussion II

Private instruction in percussion instruments to develop the student's performance ability in an applied area. One half-hour private lesson per week. Minimum of one hour daily practice.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MVP 1201 .

Note:
This course may be taken up to four times for credit.

MVS 1016 - Applied Strings – Guitar I

Private instruction on guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

MVS 1017 - Applied Strings – Bass Guitar I

Private instruction in guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

MVS 1201 - Applied Music Secondary – Strings I

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

MVS 2026 - Applied Strings – Guitar II

Private instruction in guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVS 1016 .

Note:
This course may be taken up to four times for credit.

MVS 2027 - Applied Strings – Bass Guitar II

Private instruction in guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MVS 1017 .

Note:
This course may be taken up to four times for credit.

MVS 2202 - Applied Music Secondary – Strings II

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MVS 1201 .

Note:
This course may be taken up to four times for credit.

MVV 1211 - Applied Music – Voice I

Private instruction in voice, as a secondary instrument, consisting of one half-hour session per week, with a minimum of one hour daily practice.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

MVV 1311 - Applied Music - Voice I for Majors

Private instruction in voice in the freshman year of study as the student's principal performing medium. This one hour weekly lesson is for intended voice majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which four memorized selections from standard literature will be required.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVV 1211 and Division Chair approval.

Note:
This course may be taken up to four times for credit.

MVV 2221 - Applied Music – Voice II

Private instruction in voice, as a secondary instrument, consisting of one half-hour lesson per week, with a minimum of one hour daily practice.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVV 1211 .

Note:
This course may be taken up to four times for credit.

MVV 2322 - Applied Music - Voice II for Majors

Private instruction in voice in the sophomore year of study as the student's principal performing medium. This one hour, weekly

lesson is for intended voice majors, and requires Division Chair Approval. A major component of this class is a required juried performance at the end of the semester for which six memorized selections from standard literature will be required.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

MVV 1211 , MVV 1311 and Division Chair approval.

Note:

This course may be taken up to four times for credit.

MVW 1201 - Applied Music Secondary – Woodwinds I

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:

This course may be taken up to four times for credit.

MVW 2202 - Applied Music Secondary – Woodwinds II

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):

MVW 1201 .

Note:

This course may be taken up to four times for credit.

TPA 1291 - Technical Theatre Lab II

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as Needed) Prerequisite(s):

TPA 1290

Nursing NSP 3640 - Nursing Care of Military and Veteran Populations

This course is designed to identify the unique healthcare needs of military and veteran populations in the United States in order to prepare students and practicing nurses to develop competence in designing nursing interventions within civilian and government agencies in which military members and veterans seek healthcare. In accordance with the ANA's pledge (2012) to raise awareness of the unique conditions and needs of military veterans and their families, this course supports the Joining Forces initiative to further nursing training to include specialized topics such as traumatic brain injury, posttraumatic stress disorder, trauma rehabilitation, and understanding the military and veteran's healthcare delivery system.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

RN LICENSURE

NSP 4275 - Introduction to Critical Care Nursing

This course examines the needs of the critically ill client. As part of the human experience, the integrity of the individual and family may be disrupted by a critical illness. During such time, the critical care nurse assists the individual and family to restore life processes to a state of dynamic equilibrium. This course emphasizes the involvement through use of scientific rationale and application of the nursing process in providing care to the individual client and family. Critical care concepts and skills for promoting client and family well-being are stressed.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

RN LICENSURE

NUR 1021C - Nursing Process I

This course introduces concepts and principles of holistic nursing care. Students will build on knowledge obtained in the biophysical and psycho-social sciences in this first of four required theory courses in the nursing curriculum. Content includes an introduction to healthcare systems, ethical-legal aspects of nursing practice, health and illness, communications, functional health patterns of clients, stress-adaptation, professional behaviors, and all steps of the nursing process with emphasis on assessment of older adult clients. Students begin socialization into the role of the Associate Degree Nurse as a member of an interdisciplinary healthcare team.

Credit Hour(s): 6 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

Admission to the AS Nursing Program; BSC 1085C , ENC 1101 , Core College Level Math

Corequisite(s):
NUR 1021L , NUR 1141

Prereq/Corequisites:
BSC 1086C , HUN 2201

Note:
Special Nursing Program policies may apply to this course.

NUR 1021L - Nursing Process I Clinical Experience
This course introduces students to the role of the Associate Degree Nurse in providing direct, holistic nursing care to young, middle-aged and older adults who are hospitalized or in community settings. Students are introduced to all steps of the nursing process with a focus on assessment skills. Students will identify self-learning needs and set their own goals for improvement. Critical thinking and working effectively with peers and other healthcare professionals as a team member is expected. The demonstration of caring behaviors and therapeutic communication as a provider of bedside, technical nursing care is emphasized. Students must demonstrate safe performance of basic nursing skills, including but not limited to medication administration, physical assessment, and comfort care.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ADMISSION TO THE AS NURSING PROGRAM; BSC 1085C , ENC 1101 , CORE COLLEGE LEVEL MATH

Corequisite(s):
NUR 1021C , NUR 1141

Prereq/Corequisites:
BSC 1086C , HUN 2201

Note:
Special Nursing Program policies may apply to this course.

NUR 1141 - Pharmacologic Principles in Nursing I
This course introduces students to concepts and principles of pharmacology related to safe administration of therapeutic agents within the nursing process framework. Students begin to learn major drug classifications and selected exemplars along with principles of safe, effective administration of drugs. Students will learn dosage calculation, as well as factors that affect the absorption, excretion, distribution, and metabolism of drugs, and drug actions, adverse effects and interactions.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
Admission to the AS Nursing Program

Corequisite(s):
NUR 1021C , NUR 1021L

Note:
Special Nursing Program policies may apply to this course.

NUR 1142 - Pharmacologic Principles in Nursing II
Students will continue to learn about medications and their effects on different body systems. The conceptual and mathematical operations necessary for safe and effective administration of medications are emphasized.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
NUR 1141 or LPN licensure and admission to the Nursing Program

Corequisite(s):
NUR 1231C and NUR 1750L

Note:
Special Nursing Program policies may apply to this course.

NUR 1231C - Nursing Process II
Application of the nursing process continues with emphasis on the planning and implementation of nursing care for clients experiencing threats to functional health patterns. Development of professional behaviors, such as developing therapeutic relationships continues with students working clients through life interactions. Students further develop critical thinking skills through case studies and simulation scenarios designed to provide students with problem solving skills in analyzing, planning and prioritizing care for clients whose health problems are more acute or chronic; the client with psycho-emotional dysfunctions, dysfunctional support systems situations, grief, and loss. Students learn basic management skills as a team member caring for a limited number of clients in hospitals with emphasis on coordination of nursing care and discharge planning. Conflict management

skills are highlighted as the student increases role as client advocate.

Credit Hour(s): 5 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

NUR 1021L , NUR 1021C , AND NUR 1141 OR LPN LICENSURE, BSC 1086C

Corequisite(s):

NUR 1750L , NUR 1142

Prereq/Corequisites:

DEP 2004

Note:

Special Nursing Program policies may apply to this course.

NUR 1750L - Nursing Process II - Clinical Experience

This course builds on competencies presented in Nursing Process I regarding the role of the Associate Degree Nurse in providing direct, holistic nursing care for adult clients experiencing dysfunctional health patterns. Clinical experiences in hospitals, clinics, and community settings provide students with opportunities to apply the nursing process in care of clients, including the older adult. Students continue to develop management skills through conflict management and other professional behaviors. Students demonstrate safe performance of all basic and more complex nursing skills.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

NUR 1021L , NUR 1021C , NUR 1141 OR LPN LICENSURE, BSC 1086C

Corequisite(s):

NUR 1231C , NUR 1142

Prereq/Corequisites:

DEP 2004

Note:

Special Nursing Program policies may apply to this course.

NUR 1940L - Nursing Clinical Externship

This elective course is designed to offer students the opportunity to gain additional clinical skills practice during the summer semester. Working with a preceptor and the nursing faculty in area hospitals, clinics, or community settings, the student will be able to perform all skills learned in successfully completed nursing courses. Core Course in these Programs

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

admission to the AS Nursing Program; NUR 1750L or NUR 1021L

NUR 2233C - Nursing Process III

Students continue to use the nursing process and critical thinking with emphasis on primary and secondary prevention as nursing interventions in clients experiencing threats to functional health patterns, including during the childbearing process and children whose normal lines of defense have been invaded by stressors to the degree that hospitalization is necessary. Nursing practice issues continue to focus on ethical-legal issues related to acute and/or chronic illness and disability. Management skills include delegation and career development. Core Course in these Programs

Credit Hour(s): 6 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

NUR 1231C , NUR 1750L & NUR 1142 OR APPROVAL FROM PROGRAM DIRECTOR

Corequisite(s):

NUR 2233L

Prereq/Corequisites:

MCB 2010C

NUR 2233L - Nursing Process III – Clinical Experience

Students continue to apply knowledge and skills learned in previous nursing courses in providing nursing care for the hospitalized child, the family during the maternity cycle, and adults whose health problems are more complex and/or chronic. Clinical sites include hospitals, health departments, clinics, physician offices, schools and other community settings. Conflict resolution skills are applied, as needed, to meet client and/or peer learning goals. Delegation skills with peers are also practiced. Students demonstrate continuation of all previously learned nursing skills and must perform safely all advanced nursing skills in this clinical course.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

NUR 1750L , NUR 1231C , NUR 1142

Corequisite(s):
NUR 2233C .

Prereq/Corequisites:
MCB 2010C

Note:
Special Nursing Program policies may apply to this course.

NUR 2241C - Nursing Process IV
Students integrate knowledge and principles of the biophysical and psychosocial sciences to solve life-threatening problems that affect a limited number of critically ill clients in a variety of clinical settings. Students differentiate holistic nursing care therapies in primary, secondary and tertiary care settings. Students become proficient in applying all steps in the nursing process with emphasis on evaluating nursing care outcomes. Students apply critical thinking skills in exploring case-based practice situations and work together in learning seminars to select effective client care improvement processes. Self-evaluation is part of the socialization process to prepare students for the work world as competent, caring staff nurses. Nursing practice issues include licensure standards and continued professional development.

Credit Hour(s): 5 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
NUR 2233L , NUR 2233C , MCB 2010C

Corequisite(s):
NUR 2241L , NUR 2811L

Prereq/Corequisites:
SYG 2000 OR PSY 2012

Note:
Special Nursing program policies may apply to this course.

NUR 2241L - Nursing Process IV – Clinical Experience
Students integrate knowledge and principles of the biophysical and psychosocial sciences to solve life-threatening problems that affect a limited number of critically ill clients in a variety of clinical settings. Students differentiate holistic nursing care therapies in primary, secondary and tertiary care settings. Students become proficient in applying all steps in the nursing process with emphasis on evaluating nursing care outcomes. Students apply critical thinking skills in exploring case-based practice situations and work together in learning seminars to select effective client care improvement processes. Self-evaluation is part of the socialization process to prepare students for the work world as competent, caring staff nurses. Nursing practice issues include licensure standards and continued professional development.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
NUR 2233L, NUR 2233C, MCB 2010C

Corequisite(s):
NUR 2241C , NUR 2811L

Prereq/Corequisites:
SYG 2000 OR PSY 2012

Note:
Special Nursing Program policies may apply to this course.

NUR 2811L - Nursing Capstone
This capstone course provides a time during the last four weeks of the nursing program in which students begin to transition from the student role into the graduate role as an associate degree nurse. Students attend seminar hours and complete standardized testing for evaluation in proficiency in applying all steps in the nursing process with emphasis on evaluating safe nursing care outcomes. Students complete clinical practice hours with an experienced registered nurse preceptor to provide holistic nursing care for a limited number of clients. The focus is on demonstration of all professional behaviors and competencies expected of the associate degree registered nurse graduate at entry level. Clinical experiences provide hands-on learning opportunities, enhancing clinical thinking, safe nursing judgment, and clinical confidence in skills. Clinical experiences take place in a variety of clinical settings and work schedules.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
NUR 2233L , NUR 2233C

Corequisite(s):

NUR 2241C , NUR 2241L

Prereq/Corequisites:

SYG 2000 or PSY 2012

Note:

Special Nursing Program policies may apply to this course.

NUR 3067C - Health Assessment

This course is designed to develop the student's knowledge for obtaining and recording a systematic, comprehensive health history, psychosocial assessment, and physical examination of the adult. The course involves the synthesis of nursing, biologic, psychologic, and sociocultural knowledge and theories as they apply to the findings obtained in the comprehensive health assessment of clients of various ages. During the experiential learning component, emphasis will be placed on collection of a database through physical assessment, history taking and interviewing.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Admission to the BSN program, clear background check and drug screen, and documented completion of required immunizations and CPR.

NUR 3071 - Writing for Success in Nursing

This course is designed to develop the student's knowledge for writing at the upper division nursing level. The course includes information regarding use of APA format and scholarly writing resources.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):

Student must be a Registered Nurse to take this course.

NUR 3080 - Dimensions of Baccalaureate Nursing Practice

This course will provide Registered Nurses, who are returning to school to earn a Baccalaureate degree, an opportunity to advance professional practice concepts. As designed, the course engages the student intellectually in an ongoing professional dialogue and journey with peers, colleagues, and instructors that serves to broaden the student's professional development and builds on preexisting knowledge and experiences. The course curriculum is written for adult learners with the characteristics of self-direction, prior experience, applicability to practice, and motivation to meet the challenge to expand their knowledge base and to utilize advanced critical thinking skills.

Credit Hour(s): 3 Credit Hours When Offered: (All) Prerequisite(s):

Admission to the BSN program and meets all enrollment conditions.

NUR 3826 - Nursing Ethics

This course provides an in-depth exploration of ethical principles and moral reasoning as the foundation of nursing practice. The ANA Code of Ethics will be used as a framework for examining current issues in healthcare delivery across the age span from reproductive issues to end-of-life care.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Must be an RN or ASN student.

NUR 3837 - Health Care Issues

This course provides a forum for the exploration and evaluation of concerns germane to contemporary nursing. The focus of this course is on the nursing profession and current major issues and problems that concern it. Social forces influencing changes in the nursing profession are analyzed in terms of historical antecedents and their current manifestations. Recently passed, and pending legislature at both the national and state levels is emphasized.

Credit Hour(s): 2 Credit Hours When Offered: (All) Prerequisite(s):

CURRENT RN LICENSURE. ADMISSION TO THE BSN PROGRAM AND ALL ENROLLMENT CONDITIONS MET.

NUR 3955 - Portfolio I

This course will provide RN to BSN students an opportunity to develop an electronic professional portfolio to express one's professional nursing expertise and proficiency

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Summer) Prerequisite(s):

Admission to the BSN program and meets all enrollment conditions.

NUR 4125 - Clinical Pathophysiology

This course examines in detail the underlying process involved in the development, evolution, manifestations, and complications of common clinical diseases across the life span, and compares normal and abnormal states. The biological bases for therapeutic clinical actions are examined.

Credit Hour(s): 3 Credit Hours When Offered: (All) Prerequisite(s):
NUR 3067C

NUR 4165 - Evidence-Based Practice: Incorporating Nursing Research

This course examines in detail the underlying process involved in the development, evolution, manifestations, and complications of common clinical diseases across the life span, and compares normal and abnormal states. The biological bases for therapeutic clinical actions are examined.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
STA 2023 .

NUR 4615C - Family and Community Health Nursing

The Family and Community Health Nursing course is designed to facilitate the conceptualizing of family, population groups, and community as units of care from diverse cultures, ethnic, and social backgrounds. The student is provided an experiential learning component to assess the health needs of selected families and groups in the community setting with selected health promotion, risk reduction, and disease prevention. The nursing process is used to examine multiple influences impacting life-course experiences of families and communities to enhance functioning.

Credit Hour(s): 5 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
NUR 3067C , NUR 3080 , admission to the BSN program, completion of all General Education requirements, and continued compliance with drug screening, immunization, and CPR requirements.

NUR 4827C - Nursing Leadership and Management

This course provides students with an evidence-based study of leadership, collaboration, and coordination in healthcare settings. Students develop an evidence based paper to deal with key leadership and management issues related to professional goals. The nursing leadership and management experiential learning component focuses on the roles and functions of the professional nurse in these roles. Issues associated with healthcare delivery are explored. The experiential learning component provides an opportunity to plan, implement and evaluate a change in the practice of nursing.

Credit Hour(s): 5 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):
NUR 3080 ,NUR 4165 , NUR 3067C , NUR 4615C , and continued compliance with drug screening, immunization, and CPR requirements.

NUR 4956 - Portfolio II

This course will provide students an opportunity to complete and evaluate their electronic professional portfolio to express their professional nursing expertise and proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Summer) Prerequisite(s):
NUR 3955 ; NUR 3080

Corequisite(s):
NUR 4827C

SPN 3036 - Spanish for Health Care Providers

Spanish for Health Care Providers is designed for individuals majoring in nursing or working in health-related areas. The course focuses on vocabulary needed for the healthcare workplace, with grammar taught as a task-based practical skill. Students will learn phrases used to complete health assessments which include conducting interviews, filling out forms, writing reports, and reading and understanding medical articles and brochures. Prevalent disease processes will be discussed as well as cultural practices that affect health care, specifically the health care of Spanish-speaking patients. This course does not fulfill any part of the Florida state language requirements.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

Nutrition HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

Oceanography OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A.

requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

Paramedics EMS 0002 - 911 Public Safety Telecommunicator

The purpose of this course is to prepare students for employment as a dispatcher: police, fire, ambulance and meets the standards set by the Florida Department of Health for certification.

Credit Hour(s): 232 Clock Hours When Offered: (Fall, Spring, Summer) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 0110 - Emergency Medical Technician

This is an instructional program that prepares students for employment as emergency medical technicians and treat various medical/trauma conditions using appropriate equipment and materials. The program prepares students for certification as EMT's in accordance with Chapter 64J of the Florida Administrative Code. This is the initial level for a career in emergency medical services and the primary prerequisite for paramedic training and certification.

Credit Hour(s): 300 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 0119 - Emergency Medical Technician for Firefighters

Emergency Medical Technician is designed to prepare the student with the necessary fundamental knowledge to be successful in meeting Emergency Medical Technician certification and licensing requirements. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Credit Hour(s): 140 Clock Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Permission of the EMS Director

Corequisite(s):

FFP 0010, FFP 0020, EMS 0119L

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 0119L - Emergency Medical Technician Lab for Firefighters

This course provides an integrated experience that is designed to allow the student to apply practical experience to material learned in Emergency Medical Technician. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic in the laboratory environment, area hospitals and advanced life support EMS ambulances. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Credit Hour(s): 160 Clock Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Permission of the EMS Director.

Corequisite(s):

FFP 0010, FFP 0020, EMS 0119

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved

articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 1119C - Emergency Medical Technician

Emergency Medical Technician is designed to prepare the student with the necessary fundamental knowledge to be successful in meeting Emergency Medical Technician certification and licensing requirements. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic. There is emphasis on assessment based learning and complies with National DOT EMS Education Standards.

Credit Hour(s): 6 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

permission of the EMS Director and AHA CPR for the Healthcare Provider

Corequisite(s):

EMS 1401L .

EMS 1337 - Defensive Tactics

Designed to provide EMS personnel with fundamental knowledge of the recognition of aggressive/violent behavior, and use of appropriate verbal and physical skills to control aggressive behavior in the course of providing emergency care.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

admission to the Paramedic program or permission of instructor.

EMS 1401L - EMT Lab

An integrated experience that is designed to allow the student to apply practical experience to material learned in Emergency Medical Technician. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic in the laboratory environment, area hospitals and advanced life support EMS ambulances. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Credit Hour(s): 6 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

permission of the EMS Director and AHA CPR for the Healthcare Provider

Corequisite(s):

EMS 1119C .

EMS 2231 - Paramedic Processes I

First course in the sequence necessary for Paramedic program completion. Designed to integrate concepts and clinical skills learned at the EMT level with advanced life support concepts and skills. Emphasis on patient assessment, pulmonary anatomy and physiology, advanced airway management, pathophysiology and clinical management of shock, medical emergencies and traumatic injuries. Course is consistent with most current Department of Transportation (DOT) curriculum.

Credit Hour(s): 7 Credit Hours When Offered: (Fall and Spring) Prerequisite(s):

BSC 2020C - Human Structure and Function OR BSC 1085C - Anatomy and Physiology I AND BSC 1086C - Anatomy and Physiology II HSC 1531 - Medical Terminology

Corequisite(s):

EMS 2435L

EMS 2232C - Paramedic Processes II

Second course in the sequence necessary for Paramedic program completion. Integrates and reinforces concepts and clinical skills learned in Paramedic Processes I, with emphasis on pharmacology, cardiology and Advanced Cardiac Life Support (ACLS) skills. Other topics include assessment and management of OB/GYN emergencies, psychiatric emergencies, pediatric emergencies, musculoskeletal injuries and mass casualty situations. Consistent with the most current DOT curriculum.

Credit Hour(s): 6 Credit Hours When Offered: (Spring) Corequisite(s):

EMS 2436L .

EMS 2233 - Paramedic Processes III

The final course necessary for Paramedic program completion. Designed to prepare the student for both Florida State Board and National Registry examinations. Emphasizes the integration of paramedic knowledge, attitudes and behaviors. Course consistent with the most current DOT curriculum.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Corequisite(s):

EMS 2425L [Inactive].

EMS 2342 - Advanced Extrication

Focus is on advanced principles of gaining access to and disentanglement of victims of vehicular crashes. Emphasis is placed on victim and rescuer safety. Actual use of available rescue tools is included. Packaging of patients to protect against possible spinal injury is demonstrated and assessed. The course takes place with a mock scene and "junk" cars are used for experience with rescue tools.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

EMS 2350 - Unmanned Vehicles Applications and Operations for EMS

This course examines the response of Emergency Medical Services to unsecure scenes with the aid of unmanned vehicles. Students will explore EMS protocols for the utilization of unmanned vehicles in catastrophic events with mass casualties requiring triage and multiple agency responses. Participants will be introduced to the concepts of the utilization of unmanned vehicles for support during large scale public events such as; conventions, festivals, athletic events, protest, and special team support.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

EMS 2435L - Paramedic Lab I

The clinical and skills laboratory companion course to EMS 2231C. Designed to provide instruction in advanced paramedic skills and the opportunity to apply these skills in the clinical setting. By state rule, the instructor-to-students ratio will not exceed six students to one instructor.

Credit Hour(s): 5 Credit Hours When Offered: (Fall) Prerequisite(s):

admission to the Paramedic program

Corequisite(s):

EMS 2231 .

EMS 2436L - Paramedic Lab II

This course is the clinical companion course to EMS 2232C, Paramedic Processes II. It is designed to provide instruction in the advanced paramedic skills and the opportunity to apply them in the clinical setting. By state rule, the instructor-to-student ratio will not exceed six students to one instructor.

Credit Hour(s): 5 Credit Hours When Offered: (Spring) Prerequisite(s):

EMS 2435L

Corequisite(s):

EMS 2232C .

EMS 2438C - Advanced Clinical Internship

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments. This is the capstone course for the Paramedic Program.
Instructor permission is required.

Credit Hour(s): 6 Credit Hours When Offered: (Summer) Prerequisite(s):

EMS 2232C , EMS 2436L and permission of the instructor

EMS 2552 - Advanced Cardiac Life Support (ACLS)

An intense overview of the guidelines for emergency cardiac care and cardiac arrest management as published by the American Heart Association. Students must successfully pass a written examination and a skills proficiency performance examination to receive the "ACLC Provider" and successfully pass the course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

EMT certificate and CPR for Health Care Providers certification.

EMS 2553 - Pediatric Advanced Life Support (PALS)

Designed for the EMS student. Fundamentals of recognizing infants and children who are at risk for cardiopulmonary arrest, including the strategies that are needed to prevent cardiopulmonary arrest in infants and children and the cognitive and psychomotor skills needed to resuscitate and stabilize infants and children in respiratory failure, shock or cardiopulmonary arrest.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

EMT certificate or permission of the instructor.

EMS 2555 - Prehospital Trauma Life Support

Fundamentals of managing traumatic injuries at the basic and advanced levels in accordance with the NAEMT PHTLS guidelines. The recognition and treatment of specific traumatic injuries such as pneumothorax, closed head injury, hemothorax, compensated and decompensated shock, fractures, uncontrolled bleeding, internal injuries of the abdomen and thorax. Emphasis is on rapid assessment, management and transport with discussion on mechanism of injury and kinematics of trauma.

Credit Hour(s): 1 Credit Hour When Offered: (Summer) Prerequisite(s):

EMT Certification or instructor permission

Philosophy PHI 2010 - Introduction to Philosophy

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2600 - Introduction to Ethics

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2930 - Philosophy – Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

Photography PGY 1220C - Commercial Photography I

A beginning course that introduces students to the procedures and aesthetics of developing photographic illustrations for industrial and advertising use. Students will gain experience using a high quality digital studio camera, electronic lighting, and digital applications of their work. It is recommended that students take PGY 1801C prior to or at the same time as this course.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

PGY 1401C - Basic Photography

A beginning course in black and white photographic and darkroom technique. Students will learn the functions of their camera and darkroom equipment. Students will apply their technical knowledge to various artistic challenges. Access to a 35mm camera with manual mode required.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

PGY 1405C - Advanced Black and White Photography

An advanced course in black and white photography. Students will be presented with more demanding creative challenges and will be exposed to a variety of advanced procedures in the darkroom. Access to a 35mm camera with manual mode required.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

PGY 1401C or equivalent.

PGY 1801C - Digital Photography I

A beginning course in photography with an emphasis on digital darkroom production techniques. Students will be exposed to procedures and aesthetic concerns relating to photography and digital image production. Access to an appropriate high-quality camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

PGY 2221C - Commercial Photography II

As advanced a course that allows the student to expand their skill set in producing photographic illustrations for industrial and advertising use. Students may explore product, portrait, and on-location commercial photographic projects.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

PGY 1220C and PGY 1801C .

PGY 2802C - Digital Photography II

An intermediate-level photography course where creative idea generation and composition in photography are emphasized. Students research more deeply the history of photography and apply new skills to creative digital photographic work. Access to an appropriate high-quality camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

PGY 1801C .

PGY 2804C - Digital Photography III

An advanced-level photography courses where creative idea generation and composition in photography are emphasized. Students research more deeply the history of photography and apply new skills to creative digital photographic work. Access to an appropriate high-quality camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

PGY 2802C .

Physical Education HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

PEL 1212A - Advanced Softball

Instruction, practice, and participation in advanced softball. The continuous development of physical skills is of major importance in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

PEL 1213 - Advanced Softball II

This course is a continuation of Advanced Softball, which consists of instruction, practice, and participation in advanced softball. The continuous development of physical skills is of major importance in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

PEL 1212A (Athletes)

PEL 1217A - Advanced Baseball

Instruction, practice, and participation in advanced baseball. The continuous development of physical skills is of major importance

in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

PEL 1219 - Advanced Baseball II

This course is a continuation of Advanced Baseball, which consists of instruction, practice, and participation in advanced baseball. The continuous development of physical skills is of major importance in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
PEL 1217A (Athletes)

PEL 1624M - Advanced Basketball (Men)

This course is a high intensity, drill-oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

PEL 1624W - Advanced Basketball (Women)

This course is a high intensity, drill oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including: rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

PEL 1626M - Advanced Basketball II (Men)

This course is a continuation of Advanced Basketball for Men, which consists of a high intensity, drill -oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
PEL 1624M (Athletes)

PEL 1626W - Advanced Basketball II (Women)

This course is a continuation of Advanced Basketball for Women, which consists of a high intensity, drill -oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
PEL 1624W (Athletes)

PEM 1131A - Strength Training

This course is a high intensity lecture/demonstration and flexible lab hour weight training program designed to increase the size, strength, and endurance of the skeletal muscle system. Instruction includes, but is not limited to, weight training safety, etiquette, history, and nutrition. Instruction will be given in the design of progressive resistance programs to increase total body efficiency and to meet the objectives of the individual student. Students are responsible for determining fitness for training, and those with medical problems which restrict personal activities are encouraged to obtain medical clearance before enrolling in the course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PEM 2108 - Fitness Lab

Instruction and participation in an exercise program with emphasis on muscle endurance, strength and flexibility.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):

HLP 1081 or approved wellness assessment by the department chair.

Note:

This course may be taken up to four times for credit.

PET 1000 - Introduction to Physical Education

A study of the history of physical education and sport with particular emphasis placed on present practices and trends.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PET 2622 - Care and Prevention of Athletic Injuries

Designed to provide students with a basic knowledge of the care, prevention, and rehabilitation of injuries received during participation in physical education activities to include the effects and dangers of drug use including performance enhancing drugs.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

Physical Science AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ISC 4145 - Environmental Systems

Environmental Systems will expose students to a broad overview of the structure and processes occurring on Earth. Students will gain a broad understanding of the interactions between the atmosphere, biosphere, lithosphere, and hydrosphere. Course topics will be related to current environmental issues and our local ecosystems. This course is focused on Earth System Science content with development of methods specific to teaching middle school science as a secondary objective.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

(1) any two-course laboratory sequence in the natural sciences (i.e., Principles of Biology I & II, Principles of Geology I & II, College Chemistry I & II, Physics I & II, College Physics I & II, Anatomy & Physiology I & II); (2) any GLY course; (3) and either CHM1020 (Chemical Science) or PHY1020 (Physical Science).

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PSC 2905 - Independent Study – Physical Science

Directed study and individual projects designed to meet the needs of students interested in a specialized area of the physical sciences for which present course availability is limited. Meets specific general education requirements.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:

This course may be taken up to four times for credit.

Physical Therapist Assistant PHT 1007 - Topics in Physical Therapy

An introduction of the physical therapy profession, to include the history, ethics, settings, trends and professional issues. Delineation of the roles of the health care team, physical therapy personnel, and communication skills required as a healthcare provider. Various regulatory agencies, practice rules and regulations are also included. The student will also explore the psychological and sociological effects of disabilities, including the impact of culture and economics on the patient and family. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Admission to the PTA Technical Program.

PHT 1128 - Functional Anatomy and Kinesiology

An in-depth study of the structure and function of the musculoskeletal system, with emphasis on the biomechanical principles of human motion. To include the organization and function of the nervous system and how it interacts with the musculoskeletal system for control and balanced mobility of the human body. Foundations of functional motions will be covered, such as biomechanics of muscle action, levers and torques in relation to human body, and basic physics concepts that applies to physical therapy. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

Admission to the PTA Technical Program.

Corequisite(s):

PHT 1128L

PHT 1128L - Functional Anatomy and Kinesiology Lab

An in-depth study of the structure and function of the musculoskeletal system, with emphasis on the biomechanical principles of human motion. To include the organization and function of the nervous system and how it interacts with the musculoskeletal system for control and balanced mobility of the human body. Foundations of functional motions will be covered, such as biomechanics of muscle action, levers and torques in relation to human body, and basic physics concepts that applies to physical therapy. This course requires a grade of C or higher.
This course requires a Lab Fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):

ADMISSION TO THE PTA TECHNICAL PROGRAM

Corequisite(s):

PHT 1128

PHT 1200 - Basic Patient Care

Introduces the student to basic patient care skills, patient positioning and draping, treatment area preparation, transfers, wheelchair management, and data collection skills. Wound care principles are introduced including types of wounds/burns and other integumentary issues, stages of healing, treatment/dressings, and care/prevention of pressure ulcers. This course is intended to provide an in-depth exposure to the basic skills necessary in the clinic setting and appropriate professorial behaviors. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 1007 , PHT 1128 , PHT 1128L
Admission to the Physical Therapy Program.

Corequisite(s):

PHT 1200L

PHT 1200L - Basic Patient Care Lab

This lab course allows the practice and refinement of the concepts learned in PHT 1200 lecture on simulated patients. Use of equipment commonly found in physical therapy settings, proper body mechanics in moving, lifting, and transferring patients, wheelchair management, aseptic techniques and principles of wound care. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 1007 , PHT 1128 , PHT 1128L
Admission to the Physical Therapy Program.

Corequisite(s):

PHT 1200

PHT 1211 - Physical Therapy Principles and Procedures

Instructs the student in the theory, physiology and application of biophysical agents used for therapeutic treatment of tissue.

Knowledge of the physical principles, physiological effects, medical physics, indications, and contraindications of heat, cold, light, traction, compression, electricity, and hydrotherapy. Selected tests and measures are taught related to the safe application of these agents. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):

PHT 1800L and admission to the Physical Therapy Program.

Corequisite(s):

PHT 1211L

PHT 1211L - Physical Therapy Principles and Procedures Lab

This lab course allows the practice and refinement of the concepts learned in PHT 1211 on simulated patients. The application of biophysical agents and data collection skills required for safe application of these modalities. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):

Admission to the Physical Therapy Program.
PHT 1800L

Corequisite(s):

PHT 1211

PHT 1224 - Therapeutic Techniques and Disabilities

An overview of principles and techniques of basic physical therapy interventions, with emphasis on physiological changes and effects in commonly seen disorders across the lifespan. Will include therapeutic exercises, gait training with assistive devices, manual therapy, postural analysis, aerobic conditioning and airway clearance techniques. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 1007 , PHT 1128 , PHT 1128L

Corequisite(s):

PHT 1224L

PHT 1224L - Therapeutic Techniques and Disabilities Lab

This lab course allows the practice and refinement of the concepts learned In PHT 1224 on simulated patients. Students will receive hands-on experience with a variety of exercise equipment and practice in performing, assisting, and teaching of therapeutic exercises. Selected tests and measures will be introduced in this course. This course requires a grade of C or higher. This course requires lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 1007 , PHT 1128 , PHT 1128L

Corequisite(s):

PHT 1224

PHT 1800L - Physical Therapy Clinical Practice I

A supervised clinical experience, 2 concurrent weeks of full time clinical education exposure for an introductory experience. Students observe and implement physical therapy services under the close supervision of a clinical instructor. This course requires a passing grade on a Pass/ Fail scale. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

PHT 1200 , PHT 1200L , PHT 1224 , PHT 1224L , PHT 1931 , PHT 2301

Prereq/Corequisites:

PHT 1931

PHT 1931 - PTA Seminar

An orientation to the physical therapy clinic environment. The course covers professional clinical expectations, treatment preparation, risk management, the medical record and medical documentation. This course requires a grade of C or higher.

Credit Hour(s): 1 Credit Hour When Offered: (Fall) Prerequisite(s):

PHT 1007 , PHT 1128 , PHT 1128L

PHT 2162 - Neurological Disabilities and Treatment

A comprehensive review of the human nervous system and selected neurological disabilities encountered frequently in physical therapy practice. The course addresses knowledge and application of a variety of therapeutic techniques utilized with patients

across the lifespan that have chronic neurological conditions. Stages of motor development and movement strategies are also discussed. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2162L

PHT 2162L - Neurological Disabilities and Treatment Lab

This lab course allows the practice and refinement of the concepts learned in PHT 2162 on simulated patients. Clinical scenarios that require critical thinking skills to develop treatment, progress and follow-up plans for patients with various neurological conditions. Students will also learn about various assessment techniques including sensory, balance and coordination, reflexes, gait analysis, functional and environmental assessment, and perceptual and cognitive deficit assessment. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2162

PHT 2252 - Orthopedic Disabilities and Treatment

Concepts of orthopedic physical therapy management as well as the therapeutic applications related to bone, cartilage, muscle and soft tissue healing processes. Various musculoskeletal diseases and orthopedic conditions will be introduced including their related pathology and treatment plans. Various surgical precautions, tests and measures, common orthotics, gait deviations, joint mobilizations, soft tissue techniques, and use of modalities for orthopedic conditions. Diagnostic tools such as plain film radiography, computed tomography, diagnostic ultrasound, and magnetic resonance imaging will be introduced. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2252L

PHT 2252L - Orthopedic Disabilities and Treatment Lab

This lab course allows the practice and refinement of the concepts learned in PHT 2252. Clinical scenarios that require data collection and therapeutic applications for common orthopedic conditions. The development of critical thinking, clinical problem solving, and effective treatment plans for various orthopedic conditions. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 1 Credit Hour When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2252

PHT 2301 - Pathological Conditions in PT

This course introduces the pathophysiology of selected disease processes. Disease signs, symptoms, complications, as well as clinical, typical pharmacologic agents and laboratory findings are reviewed by body system. Emphasis will be placed on conditions typically encountered in the physical therapy setting. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 1007 , PHT 1128 , PHT 1128L

PHT 2704 - Advanced Rehab Concepts in PT

Designed to provide a variety of therapeutic principles and techniques utilized in the clinical setting to address special populations with advanced rehab needs. This includes accessibility to home and community for all patients, women's health, pediatric conditions, bariatrics, geriatrics, and advanced management of amputation and prosthetics. Patient education and the education of others about physical therapy are included. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Summer) Prerequisite(s):
PHT 2810L

Corequisite(s):
PHT 2704L

PHT 2704L - Advanced Rehab Concepts in PT Lab

This lab course allows the practice and refinement of the concepts learned in PHT 2704 on simulated patients. Students will engage in patient education and utilize appropriate teaching methods for their target audience. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 1 Credit Hour When Offered: (Summer) Prerequisite(s):
PHT 2810L

Corequisite(s):
PHT 2704

PHT 2810L - Physical Therapy Clinical Practice II

A supervised clinical experience, 4 concurrent weeks of full time clinical education exposure for an integrated clinical education experience. Students implement physical therapy services under the close supervision of a clinical instructor. Students will be expected to perform specific therapeutic procedures covered in prior coursework. This course requires a passing grade on a Pass/ Fail scale. This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L , PHT 1211 , PHT 1211L , PHT 2252 , PHT 2252L , PHT 2162 , PHT 2162L

PHT 2820L - Physical Therapy Clinical Practice III

The final supervised clinical experience, 8 concurrent weeks of full time clinical education designed to prepare PTA students for entry into the profession of physical therapy. Student will have the opportunity to refine all treatment interventions and data collection skills, plus demonstrate professional behaviors throughout the clinical experience. This course requires a passing grade on a Pass/Fail scale.This course requires a lab fee.

Credit Hour(s): 8 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 2810L , PHT 2704 , PHT 2704L

PHT 2930 - Trends in Physical Therapy

This course broadens the scope of the student's understanding of the health care system. Topics include trends in healthcare and their influence on physical therapy, administrative procedures utilized in physical therapy, and ethical problem solving. Community service, citizenship and advocacy will be addressed. The course will include mock quizzes and a timed mock examination in preparation for the NPTE. Students will also develop skills necessary for employment including interview techniques and developing a resume and cover letter. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 2704 , PHT 2704L

Physics PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):
MAC 1114 or equivalent

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves.

Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

Political Science POS 1041 - American Government

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Ω Courses listed with this symbol have a Civic Literacy Competency.

Psychology CLP 1001 - Personal Adjustment

Psychology of adjustment, application of psychological theory for problem solving and better mental health. An examination of psychological defense mechanisms and adaptive behavior.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CLP 2140 - Abnormal Psychology

A study of the different problems in psychopathology, including anxiety, depression, social deviance, psychosis, schizophrenia, mental retardation and general brain dysfunction of both children and adults, with emphasis on descriptive etiology, known causes, and treatments.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

PSY 2012 .

PSY 2012 - Psychology

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Public Administration PAD 3003 - Public Service Operations

An introduction to public administration and policy in America. This course is designed to provide undergraduate students a basic

understanding and appreciation of the administration of the public sector. It is intended to provide an overview of public administration for students interested in public service and for students, who as good citizens, want an appreciation of the complexities of public management.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

upper division standing.

PAD 3882 - Issues in Public Service Administration

This course focuses on current issues and trends in the field of public service administration. The course is structured to introduce management and administrative topics in public service, examine the implications to the field, and reformulate recommendations. This course will begin developing skills in project design and presentation. This course will enhance critical thinking skills.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

upper division standing.

PAD 4878 - Capstone: Public Service

This course provides an opportunity for the student to complete a professional project and apply information and skills studied in core and concentration program courses under the direction of the professor. Successful completion of the course requires demonstration of achievement of the program's learning outcomes. This course should be completed in the last term before graduation.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):

upper division standing.

Radiography RTE 1000 - Introduction to Radiologic Technology

This course is designed to provide an overview of the history of radiography and the role and scope of practice of the practitioner in the healthcare delivery system. Organizations, accreditation, federal agencies, regulatory agencies (including OSHA) and professional credentialing will be discussed. Content includes a fundamental background in medical law, ethics, human diversity and patient consent. The student will examine a variety of ethical issues and dilemmas found in clinical practice, as well as developing a better understanding of patients, the patient's families, and professional peers through comparison of diverse populations based on value systems, cultural and ethnic influences, communication styles and socioeconomic influences. Radiographic medical terminology and pharmacology will be covered. Site specific clinical education paperwork will be completed. Background check, drug screening, training and clinical site approval mandatory.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, offered as needed) Prerequisite(s):

Admission to the Radiography Program.

RTE 1111 - Introduction to Radiographic Patient Care

This course is designed to prepare radiography students to provide basic patient care. Basic concepts of patient care will be described, as well as infection control procedures and standard precautions. This course includes hospital specific training. Health risks, life stages, HIV/AIDs and domestic violence will be discussed. This course also includes an introduction to medical and radiographic terminology. Topics include vital signs, venipuncture, body mechanics and transport, verbal/nonverbal communication, and some pharmacology.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

admission to the Radiography Program.

RTE 1418 - Radiographic Techniques I

This course is designed to establish a knowledge base in factors that govern and influence the production and recording of radiographic images. This course introduces the student to a comprehensive study and theory of the production of x-rays and primary exposure factors of radiographic imaging. The image parameters of density, contrast, recorded detail, image distortion and blur will be studied as well as ancillary devices and equipment required to produce a quality radiographic image. Digital imaging with related accessories will be emphasized. Class demonstrations and exercises are used to demonstrate application of theory.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

MAC 1105 or other Gordon Rule math course and admission to the Radiography Program.

RTE 1457C - Radiographic Techniques II

This course is a continuation of RTE 1418 Radiographic Techniques I. Course content includes the basics of magnetism, electricity, motors, generators, rectifying systems, x-ray tube and filament circuitry. Topics in electromagnetism such as self and mutual induction, high voltage transformation, and AC rectification will be emphasized. An introduction of special radiographic methods will include automatic exposure control, computers, fluoroscopy and image intensification, subtraction radiography, conventional tomography, digital image receptors, and digital image acquisition and manipulation.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
RTE 1418 .

Corequisite(s):
RTE 1513C

RTE 1503C - Radiographic Procedures I

This course is designed to provide the Radiography student with instruction in radiographic examinations of the chest, abdomen, upper extremity and lower extremity. An introduction to medical and radiographic terminology, radiographic anatomy, and image critique are also included.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
BSC 1085C and admission to the Radiography program.

RTE 1513C - Radiographic Procedures II

This course is a continuation of RTE 1503C . It is designed to provide the student with instruction in radiographic procedures and anatomy in the distal extremities, hip region, spine, ribs, and sternum and the cranium. Critical thinking, medical and radiographic terminology, as well as image critique are emphasized.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
RTE 1503C , RTE 1804L , and BSC 1086C

Corequisite(s):
RTE 1814L .

RTE 1804L - Radiography Clinical Education I

This course involves the practical application of the theories covered in RTE 1503C and RTE 1000 . Rotations provide experience with various imaging systems, protocols, and patient care. Students observe, assist and perform basic radiographic procedures (chest, abdomen and extremities) under direct supervision. This course emphasizes patient care and critical thinking. This course meets at the affiliate hospitals. Uniforms, name badges and radiographic markers required.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
RTE 1000

Corequisite(s):
RTE 1503C

RTE 1814L - Radiography Clinical Education II

This course is a continuation of Radiography Clinical Education I. This clinical training emphasizes lower and upper extremity. Medical and radiographic terminology, patient care, critical thinking and communication skills are emphasized. This course meets at the affiliate hospitals. Uniforms, name badges and radiographic markers required.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
RTE 1804L

Corequisite(s):
RTE 1513C .

RTE 1824L - Radiography Clinical Education III

This course is a continuation of Radiography Clinical Education II. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I and II. The student will gain experience and develop clinical competence in general radiographic procedures such as the cranium and specialized contrast studies. Advanced patient care skills, critical thinking, imaging and exposure techniques, radiation protection application and image processing will be emphasized. This rotation covers clinical experience in all phases of fundamental radiologic procedures and image critique. Students will rotate through ancillary departments in this course.

Credit Hour(s): 4 Credit Hours When Offered: (Summer) Prerequisite(s):
RTE 1814L

Corequisite(s):
RTE 2523C .

RTE 2061 - Radiographic Preparation for Practice

This course is designed review information in preparation for the student to take the American Registry of Radiologic Technologist (ARRT) registry examination. The course will cover patient care and education, image production, equipment operation and maintenance, radiographic procedures and radiation protection. The student will also be given simulated registry examinations for

practice and assessment purposes.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

RTE 2844L

Corequisite(s):

RTE 2854L .

RTE 2385 - Radiographic Protection and Biology

This course is designed to provide the student with an overview of the principles of interaction of ionizing radiation with living systems. Ionizing effects on molecules, cells, tissues and the body as a whole are presented, along with factors affecting biological response, including; acute, chronic, stochastic and non-stochastic effects. This course is also designed to present an overview of the principles of radiation protection including the responsibilities of the radiographer for patients, personnel and the public. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies and healthcare organizations are incorporated, as are the various methods of monitoring radiation exposure and acceptable dose limit values.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

RTE 1000 , RTE 1418 , RTE 1457C , RTE 2523C

Corequisite(s):

RTE 2844L .

RTE 2473 - Radiographic Quality Assurance

This course is designed to introduce the radiography student to evaluation methodology of radiographic systems to assure consistency in the production of quality images. Image critique, fluoroscopy, malfunctions, and specifications are some of the topics covered in the course.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

RTE 1418 , RTE 1457C

Corequisite(s):

RTE 2844L .

RTE 2523C - Radiographic Procedures III

This course is a continuation of RTE 1513C covering cranium procedures and positioning. It is designed to provide the student with instruction in more complex radiographic procedures such as fluoroscopy, urinary studies, bone age, trauma, pediatrics, mobile and surgical radiography. Included is instruction in additional modalities and studies such as CT, MRI, arthography, myelography, and vascular studies. Attention will be given to the specialized equipment, contrast media, critical thinking and techniques necessary to perform these procedures. Radiographic anatomy, pathology, and critique of images are included in this course.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

RTE 1513C

Corequisite(s):

RTE 1824L .

RTE 2533C - Radiographic Procedures IV

This is a continuation of RTE 2523C, with emphasis on special procedures and additional modalities. Students are required to complete observations hours within specialty areas.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

RTE 2523C

Corequisite(s):

RTE 2844L

RTE 2571 - Introduction to Computed Tomography

This course is designed to provide entry-level radiography students with an introduction to and basic understanding of the operation of a computed tomography (CT) device. Content is not intended to result in clinical competency.

Credit Hour(s): 1 Credit Hour When Offered: (Spring) Prerequisite(s):

RTE 1418

RTE 2782 - Radiographic Pathology

This course is designed to introduce theories of disease causation and the pathophysiologic disorder that compromise healthy persons. Etiology, pathophysiologic responses, clinical manifestations, and radiographic appearance of alterations in body systems

will be presented. Emphasis will be placed on pathological findings on diagnostic radiographic images.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

RTE 2523C

Corequisite(s):

RTE 2854L .

RTE 2844L - Radiography Clinical Education IV

This course is a continuation of RTE 1824L . The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I, II and III. The student will gain experience and develop clinical competence in specialized imaging procedures, and mobile, surgical and trauma radiography. Advanced imaging skills and exposure techniques will continue to be provided. Rotations through ancillary areas continue.

Credit Hour(s): 5 Credit Hours When Offered: (Fall) Prerequisite(s):

RTE 1824L

Corequisite(s):

RTE 2385 .

RTE 2854L - Radiography Clinical Education V

This course is a continuation of RTE 2844L . The terminal objective for this course is to prepare the student for employment as an entry level technologist. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I-IV and trauma radiography. Advanced imaging skills and exposure techniques will continue to be provided. Rotations through ancillary areas continue.

Credit Hour(s): 5 Credit Hours When Offered: (Spring) Prerequisite(s):

RTE 2844L

Corequisite(s):

RTE 2061 .

Reading REA 1205 - Reading Across the Genres I

This college-level reading course employs a variety of literary genres as the source material for building student skills in comprehension, context clues, reading speed, critical analysis, vocabulary, and other related reading skills. Students will be exposed to numerous styles and levels of reading material including novels, short stories, critical essays, drama, news reporting. Students will also develop a personal reading preference profile and learn how to identify books, magazines and other reading material commensurate with that profile.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

PERT placement score of 106 or higher.

Reading/English Developmental Ed. ENC 0017 - Integrated Reading and Writing I

This course is designed to develop reading comprehension and writing language skills for students whose entry level placement scores do not meet requirements for degree credit (not applicable for degree completion). The course includes a thorough review of English grammar and conventions and practice in writing paragraphs and essays while building skills in vocabulary and academic reading comprehension. Students must pass the class with a "C" or better grade.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Appropriate score on PERT or other approved assessment.

Note:

*College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

ENC 0027 - Integrated Reading and Writing II

This course is designed to develop reading comprehension and writing language skills for students whose entry level placement scores do not meet requirements for degree credit (not applicable for degree completion). The course includes a review of English grammar and convention and practice in writing persuasive essays while building skills in vocabulary and academic reading comprehension. Student must pass the class with a "C" or better grade.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

Minimum grade of "C" in ENC 0017 or appropriate PERT or other approved assessment score.

Note:

*College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

REA 0056 - Developmental Reading Module

This course is designed to increase the student's ability to comprehend college-level, written material (not applicable for degree completion). Conducted in a lab setting, this course is self-paced, designed to allow students to focus on their individual development of higher level reading skills and vocabulary needed for literal and critical interpretation of passages similar to those used in college texts. This course may be taken in place of REA 0017. Students must pass the class with a "C" or better and obtain a passing score on the end of course exam.

Credit Hour(s): 2 College Prep Credits When Offered: (Fall, Spring, Summer) Prerequisite(s):

Students must score 96-105 on the PERT or elective basis score 106 or higher on the PERT.

Note:

*College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

Religion REL 2300 - Introduction to World Religions

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

 Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Safety and Quality Control ETI 1420 - Properties of Materials and Processes

This course is designed to provide the student with an introduction to the basic properties of materials, principles and processes in the metal working, tools and machinery involved in the manufacture of metals. This course covers non-chip producing and chip producing manufacturing processes.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ETI 1710 - Occupational Safety

A basic course in occupational safety and health covering such topics as: theories of accident causation, workplace hazards, hazard analysis and prevention, accident reporting, OSHA, ergonomics, product safety, workers' compensation, and stress on the job.

Credit Hour(s): 3 Credit Hours When Offered: (Spring, Summer, Fall)

ETI 2110 - Total Quality Tools

This course prepares students to effectively solve business/process/product problems, track process performance, find process and product improvement opportunities, and validate improvements made, using the necessary intellectual tools and procedures including: Five-S, flow charting, Pareto analysis, cause and effect diagrams, histograms, check sheets, scatter diagrams, stratification, statistical process control, failure mode and effects analysis. Pre-requisite ETM 1010C and co-requisite ETD 2150 .

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prereq/Corequisites:

ETM 1010C and ETD 2150

ETI 2408C - Welding Fundamentals

This course teaches basic welding processes and techniques for entry-level maintenance technician positions. Students learn welding safety, fundamental practices of shielded arc welding, arc welding with consumable and non-consumable electrodes, brazing, soldering, and plasma cutting.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

Sign Language ASL 1140 - American Sign Language I

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:

 Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ASL 1150 - American Sign Language II

This course increases the student's American Sign Language vocabulary and uses more complex expression of thoughts, ideas, and emotions and increases the receptive and expressive proficiency of the student in both sign and finger spelling.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

ASL 1140 or an equivalent course with a grade of "C" or better

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ASL 2160 - American Sign Language III

A conversational course in American Sign Language utilizing skills and vocabulary from American Sign Language I and II and building on these to form more complex expressions in American Sign Language. Impromptu and planned stories, dialogues and skits will be performed. Receptive and expressive finger spelling will be advanced. No voice will be used for the majority of classroom time.

Credit Hour(s): 4 Credit Hours When Offered: (Summer) Prerequisite(s):

ASL 1150 or an equivalent course with a grade of "C" or better.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

Social Sciences DEP 2004 - Human Growth and Development

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SOW 2020 - Introduction to Social Work

This course will familiarize students with roles, functions, and tasks Social Workers perform in a variety of settings. Students are introduced to primary skills and practices of a generalist Social Worker. Students are exposed to issues of diversity, oppression, and social justice influencing economic, social, and political change. Core values of ethics, collaboration, and multi-method approaches will be paramount, shaping the foundations of Social Work for those students who may be interested in this discipline as a career path.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

Sociology SYG 2000 - Sociology

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

SYG 2010 - Social Problems

Introduction to the sociological study of the nature of social problems to insure understanding of their impact on the individual, the group and social institutions in societal and cultural settings. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common

prerequisites.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

SYG 2430 - The Family and Society

An examination of the problems which arise out of participation in marriage, family and community situations. Designed to provide students with a basic understanding of the dynamics of family interaction, the effects upon the children, and the family's relationship to and participation in the community.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

Spanish SPN 1120 - Spanish I

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

SPN 1121 - Spanish II

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

SPN 1120 or an equivalent course with a grade of "C" or better.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

SPN 2220 - Spanish III

Intermediate level review of grammar, readings in Spanish Literature, and development of conversational and writing skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

SPN 1121 or an equivalent course with a grade of "C" or better.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

SPN 2221 - Spanish IV

Completion of intermediate level review of grammar, readings in Spanish literature, and development of conversational and writing skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COMPLETION OF SPN2220 OR AN EQUIVALENT COURSE WITH A GRADE OF "C" OR BETTER.

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

Speech and Debate SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

Sports, Fitness & Recreation LEI 1544 - Outdoor Recreation Management

This course examines the fundamental influences on outdoor recreation. The course also provides information on hazards, conservation considerations, and safety factors in planning and organizing outdoor recreations. Basic first aid, CPR, and AED training is incorporated as it pertains to outdoor recreation. Field trips may be assigned as warranted.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

Theater THE 2000 - Theatre Appreciation

An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the-Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

Note:

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):
ENC 1101

Note:
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2304 - Script Analysis

An introduction to the examination and analysis of play scripts as preparation for production. Students will read plays from various periods and genres, and analyze such dramatic elements as plot, theme, character, dialogue, and style.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

THE 2820 - Musical Theater Workshop

An introduction to creative dramatics and children's theater. Topics span a wide range of interests; creative experience, children and theater, workshop procedure, script selection, rehearsal and performance.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

THE 2821 - Musical Theater Workshop II

Creative dramatics introduces the many elements of theater: dance, voice and musical theater. Topics span a wide range of interests: the creative process, workshop procedures, rehearsal and performance. Creative Dramatics will focus on producing a final performance.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
THE 2820 .

THE 2930 - Theater – Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

TPA 1210 - Stagecraft

This course is an introduction to the principles of stagecraft: stage terminology, stage safety, instruction in proper use of shop tools, basic theater construction methods, understanding of theatrical rigging, and understanding of general background practices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

TPA 1290 - Technical Theatre Lab I

This course is designed to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as Needed)

TPA 1940 - Internship in Theatre Design or Production

The emphasis of this course is on applied learning and vocational experience in the technical theatre field.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPA 2063 - Principles of Scenic Design

This course is a detailed introduction to the principles and techniques used in scene design. The course will include the discussion and practice in analyzing scripts, visualizing a design concept, drafting, paint elevations and rendering and/or modeling techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
TPA 2343

TPA 2212 - Sound Production for the Stage

This course is an introduction to audio production and reinforcement for the stage. Students will learn how to use and maintain equipment, record and edit sound effects, and mixing live sound. Emphasis will be placed on digital audio techniques and equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPA 2220 - Lighting Design

An introduction to stage lighting. Topics include history of stage lighting, fundamentals of light and illumination, lighting control, and lighting practices.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Corequisite(s):
TPA 1210

TPA 2232 - Introduction to Costuming Technology

An introduction to costume techniques and wardrobe practices. Topics span a wide range: costume construction techniques, problems in costumes, costume history, construction styles, sewing machine practices, seam finishes, flat pattern layout and production techniques. This course is intended to develop practical experiences in theater costumes.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

TPA 2276C - Entertainment Technology - Crafts

This course presents the practices and principles of advanced woodworking, welding, smithing, casting, ceramics, plaster work, fiberglass and plastic technology for the entertainment industry. State of the art tool technology, shop and field practice, health and safety standards will be emphasized. These crafts are entertainment industry oriented that will use items created in a realized production.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
TPA 1210 .

TPA 2292 - Technical Theatre Lab III

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
TPA 1291

TPA 2301 - Technical Theatre Lab IV

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
TPA 2292

TPA 2331 - Costume Construction

An introduction to costume construction techniques and wardrobe design. Topics span a wide range: costume construction techniques, problems in costumes, costume history, construction styles, sewing machine practices, seam finishes, flat pattern layout and production techniques. This course is intended to develop practical experiences in costume construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
TPA 2232

TPA 2343 - CAD for the Theatre

This course is project oriented covering fundamental through advanced material in computer aided drafting and design and its application for the theatre.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPA 2600 - Stage Management

This course is an introduction to the study and application of stage management as it relates to the manager portfolio, the stage manager morgue, rules and regulations relating to I.A.T.S.E., rules related to contracts, competence in stage management, proper communication with directors, technical directors, designers, cast members and crews, competence in technical discussion areas and basic first aid.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

TPP 1190 - Rehearsal and Performance I

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
experience in high school or a desire to learn.

TPP 1191 - Rehearsal and Performance II

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
TPP 1190 .

TPP 1192 - Rehearsal and Performance III

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
TPP 1191 .

TPP 1940 - Internship in Theatre Performance

The emphasis of this course is on applied learning and vocational experience in the theatre performance field.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPP 2110 - Acting I

Through in-class performance the student will develop an understanding and proficiency of those skills of movement, voice, and expression which are required of a theatrical performer.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

TPP 2111 - Acting II

Through in-class performance, the student develops an understanding and proficiency in styles of acting from classic through modern.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
TPP 2110 .

TPP 2120 - Improvisation

This course explores the use of creativity and imagination, engaging the actor in a wide variety of improvisational theatre games.

Credit Hour(s): 3 Credit Hours When Offered: Offered as needed

TPP 2141 - Acting in Shakespeare

This course is an introduction to the concepts, principles, and skills needed to develop characters in Shakespeare's plays. The course focuses on the hidden clues in the text to discover character choices and meaning. Specific analysis and the techniques of scansion are introduced as they relate to character interpretation. Application of these techniques will be presented in scenes and monologues.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

TPP 2150 - Advanced Scene Study

This course is a continuation of the processes and concepts of TPP 2111, Acting II, with the addition of new techniques to create dynamic and engaging characterizations through performance.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

TPP 2220 - Auditioning

This course explores audition techniques for the stage. Students will be better prepared to audition in professional settings.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPP 2250 - Introduction to Musical Theatre

Introduction to the study of Musical Theater analysis, creation, and performance with an emphasis on singing, dancing, and acting.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

TPP 2301 - Directing I

A beginning course in the study, development and training in directing for the theater. Although not a prerequisite, students are encouraged to take Acting I and II before Directing I.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

TPP 2533 - Stage Combat I (Unarmed & Rapier)

Through in-class study and performance the student will develop an understanding of and proficiency in the safe techniques of unarmed and rapier stage combat which are required of a theatrical performer. Application of these techniques will be presented in two scenes, one for unarmed and one for rapier.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

TPP 2930 - Theater Performance – Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Note:

This course may be taken up to four times for credit.

Transportation and Logistics TRA 0080 - Tractor Trailer Truck Driver

This course prepares students for entry into the trucking and logistics industry. Students explore career opportunities and requirements of a professional tractor trailer driver. Students study vehicle safety, accident prevention, operating regulations, cargo handling, documentation procedures, pre-trip preparation, vehicle inspection, maintenance, service, control procedures, backing, coupling, uncoupling, maneuvering, road and hazardous driving skills, and licensing requirements.

Credit Hour(s): 320 Clock Hours When Offered: (Spring)

TRA 0086 - Tractor Operator

This course is designed to build on the skills and knowledge students learned in the Heavy Equipment Maintenance Technician course for entry into the Heavy Equipment Operations industry. Content emphasizes beginning skills and concepts as a recommended requisite. Students study pneumatic and crawler-type tractor operations.

Credit Hour(s): 150 Clock Hours When Offered: (Fall)

TRA 0650 - Natural Gas Distribution I

This course prepares students for work as general technicians in the natural gas distribution industry. Students learn to comply with safety procedures, operate basic tools and equipment and provide customer assistance.

Credit Hour(s): 75 Clock Hours When Offered: (Fall)

TRA 0650B - Natural Gas Distribution IB

This course is prepares students for work as general technicians in the natural gas distribution industry. Students learn to comply with safety procedures, operate basic tools and equipment and provide customer assistance. This course continues the knowledge acquired in the TRA0650.

Credit Hour(s): 75 Clock Hours When Offered: (Fall)

TRA 0651 - Natural Gas Distribution II

This course prepares students for work as general technicians in the natural gas distribution industry. Students complete customer compliance orders and assist in inspections. Content includes construction mathematics and reading.

Credit Hour(s): 150 Clock Hours When Offered: (Fall) Prerequisite(s):

TRA 0650

TRA 0652 - Natural Gas Distribution III

This course prepares students for work as general technicians in the natural gas distribution industry. Students complete customer compliance orders and assist in inspections. Content includes construction mathematics and reading.

Credit Hour(s): 150 Clock Hours When Offered: (Fall)

Welding PMT 0101C - Blueprint Reading For Welders

This course provides students with the understanding and fundamentals of industrial blueprint reading including blueprint symbols, dimensions, joints, fabrication and welding symbols.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0102C - Introduction to Welding and Industrial Safety

An introduction to the welding skills including safety, measuring, communication, leadership, use of tools, and equipment.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0106C - Welder Helper

This course provides instruction in shop safety, the use of safety procedures and protective equipment needed in a welding shop. Course incudes basic shop math, shop safety, welding equipment setup/teardown procedures.

Credit Hour(s): 150 Clock Hours When Offered: (Fall, Spring) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0121C - Basic Shielded Metal Arc Welding (SMAW)

This course provides instruction and demonstration using shielded metal arc welding (SMAW). Topics include visually inspect of welds, and basic SMAW technical terminology. Basic structural welding techniques will be demonstrated in accordance with American Welding Society (AWS) D1.1 structural welding code. Tack welding and metal joint fit of carbon steel is covered in this course.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0126C - Intermediate Shielded Metal Arc Welding (SMAW)

This course will enable the student to identify metals using visual, magnetic and spark methods, identify and interpret welding symbols, demonstrate the ability to identify and use the correct filler metals and shielding gases and fabricate parts from a drawing or sketch using intermediate SMAW techniques.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

PMT 0122C [Inactive]

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0127C - Advanced Shielded Metal Arc Welding (SMAW)

This course will provide the student with hands-on skills performing tests, examining metal surfaces, and setting up shielded metal arc (SMAW) equipment to make groove welds, all positions on plain carbon steel. The student will perform lab/shop procedures to safely prepare the area, demonstrating the ability to identify and use filler metals and shielding gases as well as performing visual and destructive analysis in the qualification testing of welds on carbon steels.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

PMT 0126C

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college

credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0134C - Gas Metal Arc Welding (GMAW)

An introduction to metal inert gas welding (MIG). Emphasizes the principles involved in the operating of MIG equipment.
A beginning course in welding principles of MIG.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0137C - Gas Tungsten Arc Welding

An advanced course in welding principles of TIG welding.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as Needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0143C - Flux-Core Arc Welding

Students will be able to make quality welds using the FCAW in the flat, horizontal, vertical and over-head positions. This course also includes instructions in metal transfer and shielding gases associated with the FCAW process. Students will use information contained in the textbook, instructions, and demonstrations by the instruction.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as Needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0153C - Metal Preparation and Thermal Cutting Processes

This course enables the student to set up, inspect, operate, and perform oxy/fuel cutting equipment, air carbon arc and plasma arc cutting activities. Students will learn methods for piercing, slotting, squaring, and beveling plain carbon steel, aluminum, and stainless steel.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0165C - Shielded Metal Arc Weld (SMAW) Pipe Welding

This course emphasizes principles of welding pipe using the shielded metal arc (SMAW) process. Fabrication and welding of pipe in the 1, 2, 5, and 6 g positions are stressed.

Credit Hour(s): 210 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0172C - Gas Tungsten Arc / Shielded Metal Arc (Combo) Pipe Welding

This course emphasizes principles of welding pipe using the gas tungsten arc (GTAW) process combined with the shielded metal arc (SMAW) process. Fabrication and welding of various size and thickness pipe in the 1, 2, 5, and 6 g positions are stressed.

Credit Hour(s): 270 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0173C - Specialty Pipe Welding

This course presents technical information on gas tungsten arc welding preparation for welding pipe and pipe welding defects. The training develops the manual skills necessary to produce high quality groove welds on stainless steel pipe in the 2g, 5g and 6g positions.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0174C - Introduction to Pipefitting and Pipe Fabrication

This course introduces students the fundimentals of fabrication of pipe systems using tees, flanges and other fittings.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0182C - Weld Inspection Fundamentals

Fundamentals of welder inspection and development of welding procedure specifications in accordance with American Welding Society (A.W.S.) and the American Society of Mechanical Engineers (A.S.M.E.) used to prepare students to pass nationally recognized welder certification tests.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Prereq/Corequisites:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0190C - Emerging Technologies In Welding

This course will provide instruction on emerging techniques in welding, including pulse welding, robotics, submerged welding, adaptive welding and hybrid laser-arc welding. The content emphasizes specific careers and workforce needs in the welding industry.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Zoology ZOO 1010C - Zoology

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

General Education

All NWF State College degree programs contain both specialized courses and general education courses. Bachelor of Applied Science, Bachelor of Science and Associate in Arts students complete at least thirty-six (36) general education credits from five subject area categories. Associate in Science students complete at least eighteen (18) general education credits from five (5) subject areas. The general education component of each program is designed to further the mission and goals of the college. Upon successful completion of general education coursework, the student will:

General Education In All Degrees

All NWF State College degree programs contain both general education courses and specialized courses. Students enrolled in Bachelor of Applied Science, Bachelor of Science and Associate in Arts programs complete at least thirty-six (36) general education credits from five subject area categories - Communications, Humanities, Mathematics, Natural Sciences, and Social Sciences. The general education component of each program is designed to further the mission and goals of the college. Upon successful completion of general education coursework, the student will:
Demonstrate proficiency in reading, writing and speaking;
Apply reflection, analysis, synthesis, logical reasoning and evaluation to formulate judgments, reach decisions and solve problems;
Understand and apply mathematical and scientific principles and methods;
Find, evaluate, organize and use information accurately and effectively; and
Participate actively as informed and responsible citizens in social, cultural, global and environmental matters.
The NWF State College General Education Program is designed to conform to all applicable regional accreditation criteria, Florida State Board of Education Rules, and the Florida Statewide Articulation Agreement. Associate in Science students complete at least eighteen (18) general education credits from five (5) subject areas also the general education component of each program is also designed to further the mission and goas of NWF State College. NWF State College's General Education program incorporates Speaking-Across-the-Curriculum and Writing-Across-the-Curriculum requirements.

Speaking-Across-the-Curriculum

Oral communication is an integral part of the NWF State College general education program; thus several general education courses include graded activities designed to build speaking and communication skills. All Bachelor of Applied Science (B.A.S.), Bachelor of Science (B.S.), Associate in Arts (A.A.), Associate of Science (A.S.), and Associate of Applied Science (A.A.S.) degree-seekers must satisfy the Speaking-Across-the-Curriculum requirement and may do so by completing at least one of the general education courses designated as part of the Speaking-Across-the-Curriculum component of the General Education program. See the A.A. General Education section of catalog for specific courses.

Writing-Across-the-Curriculum

All associate degree students must complete at least one three-credit writing class as part of their general education program. Additional writing activities are required in all general education humanities courses. Bachelor of Applied Science, Bachelor of Science and Associate in Arts students must complete twelve (12) to fifteen (15) college credits from designated General Education Gordon Rule Communication, Humanities and Social Science subject areas. All associate degree students must complete 3 college credits from designated General Education Gordon Rule Communication, Humanities, and Social Science subject areas. See the AA Degree General Education section of catalog for specific courses.

Gordon Rule

Florida's Gordon Rule (FAC Rule 6A-10.030) includes a legislative mandate that all baccalaureate and Associate in Arts graduates successfully complete specific writing and math requirements. Bachelor of Applied Science, Bachelor of Science and Associate in Arts graduates must have successfully completed at least 21 college credits from designated General Education Gordon Rule Communication, Humanities, Social Science and Mathematics subject areas. A.S graduates must have successfully completed at least 9 college credits from designated General Education Gordon Rule Communication, Humanities, Social Science and Mathematics subject areas.
All Bachelor of Applied Science (B.A.S.), Bachelor of Science (B.S.), Associate in Arts (A.A.), Associate of Science (A.S.), and Associate of Applied Science (A.A.S.) degree-seekers must also earn a grade of "C" or higher in each Gordon Rule course used to satisfy general education requirements, whether the credits are earned at NWFSC or elsewhere.

Civic Literacy Competency

In accordance with Rule 6A-10.02413, Florida Administrative Code (F.A.C.), Civic Literacy Competency, as required by section 1007.25(4), Florida Statutes (F.S.), students enrolled in an A.A. or baccalaureate program initially entering the Florida College System or State University System under the 2021-2022 Catalog or later must demonstrate civic literacy competency prior to graduation through successful completion (with a grade of "C" or higher) of POS 1041 or AMH 2020 and by achieving a passing score on an assessment outlined in the table below.

Assessment	Standard Score
AP Government and Politics: United States	3
AP United States History	4
CLEP: American Government	50
Florida Civic Literacy Exam	60%

AA Degree General Education Requirements

Associate in Arts students must complete 60 college credits to complete the degree; 36 of these credits must be general education credits distributed across five subject area categories. A student must satisfy the required number of credits in each category. The remaining 24 elective credits should be selected in consultation with an Navigator, who will assist with selecting the college credits most advantageous to the student's educational goals.

To assure that graduates of the state university and state college systems share a common base of General Education requirements, the State of Florida has designated general education core course options in each of five subject area categories—Communication, Humanities, Mathematics, Natural Sciences, and Social Sciences. Beginning with students initially entering a Florida College System institution or state university in 2015-2016 and thereafter, each student must complete at least one identified core course (designated with ♦) in each area of study as part of the general education course requirements. Furthermore, NWF State College has embedded the core competencies of speaking, writing, and technology in both the AA and AS programs of study.

AS Degree General Education Requirements

All A.S. degree programs at NWF State College require a minimum of 18 college credits in general education. Unless otherwise specified in the program requirements, students must complete one course from each of the following categories to meet general education requirements.

To assure that graduates of the state university and state college systems share a common base of General Education requirements, the State of Florida has designated general education core course options (designated with ♦) in each of five areas of study—Communication, Humanities, Mathematics, Natural Sciences, and Social Sciences. The A.S. degree programs provide flexibility for entering the job market or continuing education. Students who take general education courses are guaranteed transfer of those courses when continuing their education within the Florida College and University System.

NWF State College has embedded the core competencies of speaking, writing, and technology in both the AA and AS programs of study; by program design, all AA and AS graduates take courses that allow them to demonstrate their abilities in these important life skills.

AAS Degree General Education Requirements

All A.A.S. degree programs at NWF State College require a minimum of 18 college credits in general education. Unless otherwise specified in the program requirements, students must complete one course from each of the following categories to meet general education requirements.

To assure that graduates of the state university and state college systems share a common base of General Education

Bachelor Degrees

Bachelor of Applied Science (BAS) Degree

BAS in Management and Supervision Degree BAS in Project Management Degree

NWF State College is approved by the State of Florida Board of Education to offer the Bachelor of Applied Science Degree in Project Management (BAS) and the Bachelor of Applied Science Degree in Management and Supervision (BAS).
The BAS degree offers students a unique opportunity to gain the skills and knowledge necessary for career advancement in a variety of areas. Program content has been developed with input from local employers and is reflective of traditional business management degrees, as well as of the technical skills identified by various professional organizations.
There are four pre-planned areas of emphasis in the Management and Supervision program. Areas of specialization include:
Healthcare Management
Human Resources Management
Supervision
There are four pre-planned areas of emphasis in the Project Management program. Areas of specialization include:
Acquisitions
Project Management
Quality Improvement
Technology Management
The BAS program provides a career-ladder for students who have already completed an associate's degree and who wish to continue their education at the bachelor's level, or beginning students may design a program of study for the degree as early as the freshman year if they have not yet obtained an associate's degree.
Coursework for the degree is designed with the working student in mind and is offered with classes available evenings, weekends, in concentrated fast-track terms, through eCampus/Distance Learning, or structured as "blended/hybrid" classes (part traditional classroom and part non-traditional format). Coursework incorporates internships, seminars, and other work-based learning activities designed to ensure students acquire the latest skills and content. Students receive the full range of articulation and transfer rights guaranteed by Florida law through common course numbering and the statewide articulation agreement.

Graduation Requirements for the BAS Degrees

Students seeking a Bachelor of Applied Science degree must meet the following requirements:
Complete applicable admission requirements for the program. See the Admissions section of the catalog.
Complete at least 25% of the course work towards the program at NWF State College.
Earn a minimum grade ("C") in all core course work.
Successfully complete all coursework within the emphasis of study with a cumulative GPA of at least 2.00.
Complete AA Degree General Education Requirements, including all Gordon Rule course requirements with minimum grades ("C").
Completion of two sequential credits in high school foreign language, a minimum of 6 credit hours in one foreign language at the college level or an appropriate score on an approved CLEP examination.
Complete at least 50% of the upper division program course work in residence at NWF State College.
Complete a minimum of one hundred and twenty (120) college credits applicable toward the BAS degree.
Satisfy all outstanding obligations to the college.

Bachelor of Science (BS) Degree in Education

BS in Early Childhood Education, Birth through Four Degree - Offered Online

The Bachelor of Science Degree in Early Childhood Education, Birth through Four is designed to prepare students to work in programs serving children ages 0-4 years. Graduates will be prepared to advance in the Early Childhood career field. The degree offers a career ladder for students earning the Associate of Science in Early Childhood Education at NWF State College, which

includes the state-mandated prerequisite courses. Students earning an A.A. may also enter this program after completing the state-mandated prerequisite courses. Coursework is designed for the working adult, and is offered online.

BS in Elementary Education Degree

NWF State College is approved by the Florida Board of Education to offer the Bachelor of Science in Elementary Education, which leads to state certification in teacher education. This degree is designed to provide a career ladder for those who have already completed an Associate in Arts (A.A.) degree or have 60 hours of acceptable lower division coursework and who wish to continue their education at the bachelor's level. The Bachelor of Science in Elementary Education also includes endorsements in Reading and English for speakers of other languages.

Graduation Requirements for BS in Early Childhood Education, Birth through Four Degree

Students seeking a Bachelor of Science degree in Early Childhood Education, Birth through Four must meet the following requirements:
Complete applicable admission requirements for the program. See the Admissions section of the catalog.
Complete at least 25% of the course work towards the program at NWF State College.
Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued.
Earn a minimum grade ("C") in all core course work.
Complete AA Degree General Education Requirements, including all Gordon Rule course requirements with minimum grades ("C").
Completion of two sequential credits in high school foreign language, a minimum of 6 credit hours in one foreign language at the college level or an appropriate score on an approved CLEP examination.
Complete at least 50% of the upper division program course work in residence at NWF State College.
Complete a minimum of one hundred and twenty (120) college credits applicable toward the B.S. degree.
Satisfy all outstanding obligations to the college.

Graduation Requirements for BS in Elementary Education Degree

Students seeking a Bachelor of Science degree in Elementary Education must meet the following requirements:
Complete applicable admission requirements for the program. See the Admissions section of the catalog.
Complete at least 25% of the course work towards the program at NWF State College.
Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued.
Earn a minimum grade ("C") in all upper division course work.
Complete AA Degree General Education Requirements, including all Gordon Rule course requirements with minimum grades ("C").
Completion of two sequential credits in high school foreign language, a minimum of 6 credit hours in one foreign language at the college level or an appropriate score on an approved CLEP examination.
Complete at least 50% of the upper division program course work in residence at NWF State College.
Pass the three Florida Teacher Certification Examinations: General Knowledge, Professional Education and appropriate Subject Area.
Complete a minimum of one hundred and twenty (120) college credits applicable toward the B.S. degree.
Satisfy all outstanding obligations to the college.

Elementary Education (BS)

Admission Program Objective Code BSED State CIP Code 1101312021
The first sixty credits in the following program of study are designed to prepare students not only for the A.A. degree, but also for the General Knowledge exam and Elementary Subject Area exam of the Florida Teacher Certification Exam (FTCE).
If you plan to be an elementary school teacher and are just beginning your A.A. degree, this program of study will best prepare you for that career choice. If you have already completed your A.A. degree and some of your general education courses differ from those listed below, your A.A. degree will still meet that component of the admission process; however, you may need to complete additional coursework, independent study, or workshops to be well prepared for the FTCE Elementary Subject Area exam. A passing score on the FTCE Elementary Subject Area exam is one of the graduation requirements for this degree. For a detailed summary of graduation requirements for this degree program, see the Bachelor of Science graduation requirement section.

Courses with the "C" designation include extra hours to accommodate field experiences.
Substitutions for any coursework in this program of study must be approved by the Teacher Education Program Director. Please note that some courses below may require lower division prerequisites not specified as program requirements. Requirements for Teacher Education programs may change due to legislative mandate. Candidates should request the most current requirements from the Teacher Education Program Director.

Early Childhood Education, Birth through Four (BS)

Admission Program Objective Code BSEB State CIP Code 1101312102
*This program is available fully online
The Bachelor of Science in Early Childhood Education, Birth through Four is designed to prepare students to work in programs serving children ages 0-4 years. Graduates will be prepared for advancement in the Early Childhood career field. The degree offers a career ladder for students earning the Associate of Science in Early Childhood Education at NWF State College, which includes one state-mandated prerequisite courses. A.S. students will complete an additional 18 hours of General Education classes during their upper division coursework, after admission to the Early Childhood Education program. Students earning an A.A. may also enter this program after completing the state-mandated prerequisite courses. These students will complete technical classes during their upper division coursework after admission to the Early Childhood Education program. For a detailed summary of graduation requirements for this degree program, see the Bachelor of Science graduation requirement section.
Substitutions for any coursework in this program of study must be approved by the Teacher Education Program Director. Please note that some courses below may require lower division prerequisites not specified as program requirements.

EEC 4714 - Facilitating Social Development In The Classroom

The focus of this course is on implementing effective classroom management practices including establishing an appropriate physical environment, setting up appropriate classroom routines and rules and creating a positive classroom community. Emphasis will be on strategies for guiding children's behavior, teaching social problem-solving skills and responding appropriately to challenging behaviors.

Credit Hour(s): 3 Credit Hours When Offered: (Spring, as needed) Prerequisite(s):
Upper Division Standing

EEC 4940 - Internship

Supervised teaching in an assigned Early Childhood Education setting. Student teaching assignments will be made by the Department of Teacher Education Office. This course requires a minimum grade of "C". Current background check (fingerprinting) is required for this course.

Credit Hour(s): 9 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Upper Division standing with permission of Department Chair

Bachelor of Science (BS) Degree in Nursing

BS in Nursing Degree

The baccalaureate program in nursing at NWF State College is accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org). The program is an RN to BSN degree career ladder and is open to applicants who currently hold a valid Registered Nursing license and have completed an ADN or diploma program. The program can be completed in three to four semesters. Program content for the BSN program meets those specified in Florida's A.S. to B.S. Articulation Manual. All theory courses are taught through NWF Online (https://www.nwfsc.edu/online/) and observership experiences target the specific needs found locally, nationally, and internationally.

Graduation Requirements for the BS in Nursing Degree

Students seeking the Bachelor of Science degree in Nursing (BSN) must meet the following requirements:
Complete applicable admission requirements for the program. See the Admissions section of the catalog.
Complete at least 25% of the course work towards the program at NWF State College.
Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued at NWF State College.
Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued, whether at NWF State College or by transfer.
Earn a minimum grade ("C") in all upper division course work.
Complete AA Degree General Education Requirements, including all Gordon Rule course requirements with minimum grades ("C").
Completion of two sequential credits in high school foreign language, a minimum of 6 credit hours in one foreign language at the college level or an appropriate score on an approved CLEP examination.
Complete at least 50% of the upper division program course work (not to include portfolio assessment) in residence at NWF State College.
Complete a minimum of one hundred and twenty (120) college credits applicable toward the BSN degree.
Satisfy all outstanding obligations to the college.

Nursing (BS)

Admission Program Objective Code BSNG State CIP Code 1105138012
*This program is fully available online.
The baccalaureate program in nursing at Northwest Florida State College is accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org).
The program is an RN to BSN degree career ladder and is open to applicants who currently hold a valid Registered Nursing license and have completed an ADN or diploma program. The program can be completed in three to four semesters. Program content for the B.S.N. program meets those specified in Florida's A.S. to B.S. Articulation Manual. All theory courses are taught through NWF Online (https://www.nwfsc.edu/online/) and observership experiences can be completed near the student's residence.

Associate in Arts Degree

The Associate in Arts degree is equivalent to the first two years of a bachelor's degree program and is offered for those students planning to transfer to a four-year institution or to remain at NWF State College to complete the last two years of a bachelor's degree program. The AA degree is awarded upon satisfactory completion of 60 credit hours of general education and college credit electives, attainment of the appropriate minimum grade point averages, and completion of all other applicable college graduation requirements, including the Speaking-Across-the-Curriculum Writing requirements. Although the number of credits and specific courses required for a bachelor's degree may vary across upper-division schools, the Florida State Colleges and universities enjoy an articulation agreement, which guarantees certain transfer rights for students who complete the AA degree.
A.A. degree students should work closely with a Student Success Navigator to select the appropriate courses to meet their degree goals.

Graduation Requirements for the AA Degree

The A.A. degree curriculum requires the following.
Complete a minimum of 60 college credits per the following distribution as outlined in the AA Degree General Education Requirements:
Complete 36 credit hours of general education courses distributed appropriately across the Communications, Humanities, Social Sciences, Mathematics, Natural Sciences, and General Education Elective categories presented in the AA Degree General Education Requirements section of the catalog for specific courses.
Completion of two sequential credits in high school foreign language, a minimum of 6 credit hours in one foreign language at the college level or an appropriate score on an approved CLEP examination.
Complete 24 credit hours of college credit electives. Students should consult with a counselor or advisor to select the electives most appropriate to their intended baccalaureate program.
Meet the General Education minimum grade and writing requirements:
Attain a grade of "C" or higher in each Gordon Rule writing course (any general education course from the Communications or Humanities categories, and those designated as Gordon Rule in the Social Science category) whether credits in such courses are

earned at NWF State College or transferred for credit from other institutions.
Attain a grade of "C" or higher in each Gordon Rule Mathematics course (any course from the Mathematics category that is used to meet AA general education requirements), whether credits in such courses are earned at NWF State College or transferred for credit from other institutions.
Meet the Civic Literacy Competency . In accordance with Rule 6A-10.02413, Florida Administrative Code (F.A.C.), Civic Literacy Competency, as required by section 1007.25(4), Florida Statutes (F.S.), students enrolled in an A.A. or baccalaureate program under the 2021-2022 Catalog must demonstrate civic literacy competency prior to graduation through successful completion (with a grade of "C" or higher) of POS 1041 or AMH 2020 and by achieving a passing score on an assessment outlined in the table below.

Assessment	Standard Score
AP Government and Politics: United States	3
AP United States History	4
CLEP: American Government	50
Florida Civic Literacy Exam	60

Complete applicable admission requirements for the program. See the Admissions section of the catalog.
Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued at NWF State College.
Complete at least 25% of the course work towards the program at NWFSC.
Satisfy all outstanding obligations to the college.

Transferring to another Four-Year College or University within the State of Florida:

NWF State College Student Success will gladly assist students in achieving a smooth transfer to other institutions in Florida. Liaison representatives from the respective public institutions in the state are eager to help. Several of the liaisons make regular visits to campus and will meet directly with students to answer questions. The names of the liaisons and dates of upcoming visits are available in the Raider Central in building 400 on the Niceville Campus. In addition, Common Prerequisite Manuals for the Florida State University System are available on RaiderNet or at www.flvc.org.
It is desirable that students transferring to a senior institution plan their program so that common prerequisites can be completed for the upper-division transfer school for their major. It is best for the student to complete the entire two-year degree program prior to transfer, as A.A. graduates who transfer to one of the institutions in the Florida State University System (SUS) enjoy certain protections under the statewide articulation agreement. These rights are presented in the "Student Bill of Rights".
NWF State College offers the necessary prerequisites for most of the State of Florida University Baccalaureate Programs. Students are encouraged to consult a current catalog from the upper-division school where they plan to transfer in addition to meeting with a college advisor or faculty member to acquire an official program plan of study for their intended major.

Special Foreign Language Requirements for Entry into Upper-Level Florida Universities:

Effective August 1, 1990, according to requirements of the Florida Board of Regents, new applicants to any of the state universities must have completed two sequential credits in high school foreign language, a minimum of 6 credit hours in one foreign language at the college level or an appropriate score on an approved CLEP examination. There are two exceptions to this requirement: 1) students who received an A.A. degree prior to September 1, 1989, or 2) students who enrolled in a program leading to an A.A. degree prior to August 1, 1989 and maintained continuous enrollment. Students who are not exempt but fail to satisfy the requirement, may be admitted to the university as part of the 5% admissions exceptions group but will be required to complete eight-ten credit hours in one foreign language as a graduation requirement, regardless of the requirements in the student's major. Students transferring into the Florida SUS without an A.A. degree or fewer than 60 transferable credits must meet this foreign language requirement before going on to the upper division. NWF State College offers the necessary coursework in French, Spanish, and American Sign Language (ASL) to meet the Florida SUS admission requirements.

Student Bill of Rights

Florida Community College Associate in Arts (AA) Degree graduates are guaranteed rights under the

- Florida Statewide Articulation for AA Degree
- Local NWFSC Agreements with Other Institutions
- Local NWFSC Internal Agreements
- NWFSC Certificate to AS Degree Career Paths
- Statewide Articulation Agreements

What is an Articulation Agreement?

Florida has instituted a variety of methods to assist students with the transfer of their credits, otherwise known as articulation agreements. The Statewide Articulation Manual provides statewide standards for awarding advanced placement credits, high school dual enrollment credit, transfer of credit between institutions, and related topics. The Florida Department of Education, through the Articulation Coordinating Committee (ACC), also facilitates statewide consistency among institutions that award credit for certain professional credentials, such as industry certifications, licenses, and certificates. In addition to statewide articulation agreements, Northwest Florida State College (NWFSC) has local articulation agreements with various other institutions, as well as internal agreements for specific NWFSC programs.

NWFSC is committed to establishing cooperative partnerships that provide clear educational pathways for its students. A comprehensive list of active partnerships can be found on the University Partnerships website. Students who are interested in one of these unique pathways and would like additional information on requirements and eligibility should consult with a Student Success Navigator at studentsuccess@nwfsc.edu or 850-502-2895.

Florida Statewide Articulation Agreement for AA Degree

Per Florida Administrative Code Rule 6A-10.024, Florida Community College Associate in Arts (AA) graduates are guaranteed the following rights under the Statewide Articulation Agreement:

Admission to one of the state universities, except to Selective Admission* programs

Acceptance of at least 60 credit hours by the state university toward the baccalaureate degree

Adherence to university requirements and policies based on the catalog in effect at the time the student first entered a community college, provided the student maintains continuous enrollment

Transfer of equivalent courses under the Statewide Course Numbering System

Acceptance by the state universities of credit earned in accelerated programs (e.g., CLEP, DANTES, AP, PEP, Dual Enrollment/Early Admission, and International Baccalaureate)

No additional General Education Core requirements

Advance knowledge of selection criteria for Selective Admission* programs

Equal opportunity with native university students to enter Selective Admission* programs

Should any guarantee be denied, students have the right to appeal. Each state university and state college shall make available established appeal procedures through the respective articulation officers. At NWFSC, students may contact the Vice President of Academic Affairs or the Executive Director of Student Success Navigation.

* Selective Admission is the designation given to programs that require additional admission requirements which are more selective than general admission requirements. These may include the following: higher GPA and/or test score requirements; additional courses and/or prerequisites; and auditions and/or portfolios.

NWFSC Certificate to AS Degree Career Paths

Many of the technical certificate programs offered by NWFSC provide the initial step in meeting selected course requirements for an A.S. degree in a related area. Courses from those certificates are the same as or equivalent to comparable courses in the companion degree program. Likewise, courses used in the degree program may be applied to a certificate in a related area; in many cases, completion of the technical courses in the degree program can automatically qualify the student to receive the companion certificate.

A list of all AS degrees and corresponding articulated certificates is shown on the Certificate to AS Degree Career Paths website.

Local NWFSC Internal Articulation Agreements

Internal Articulation Agreements (Summary of Eligible Certifications and Credit Awarded)

Business and Computer Technology Eligible Certifications

Industry Certification to the A.S. in Industrial Management Technology

NCCER Welding (Levels 1-3)
AWS or Industry Equivalent
SMAW (all positions)
SMAW (all positions) and FACAW (all positions)
SMAW (all positions)/GTAW (all positions)
Plate Weld Certification

Industry Certification to the A.A.S. in Applied Management

Florida Department of Education - Welding Technologies (or equivalent)
Florida Department of Education - Advanced Welding Technologies (or equivalent)

Culinary Management

Industry Certification to the A.S. in Culinary Management (and embedded certificates)

ServSafe Certified Food Protection Manager (NRAEF003)

Early Childhood Education

Early Childhood Certifications to NWFSC Early Childhood Coursework

Child Development Associate Credential
Florida Child Care Professional Credential (Infants and Toddlers)
Florida Child Care Professional Credential (Preschool)

Engineering Technology

Industry Certifications to NWFSC Engineering Technology Coursework

Autodesk Certified User - Inventor (ADESK011)
Autodesk Certified Professional - Inventor (ADESK024)
Associate Certified Electronics Technician (CETa) (ETAIN008)
Certified SolidWorks Associate - Academic (CSWA-Academic) (SOLID003)
MSSC Certified Production Technician (CPT)
Eligible Exam Content Areas
Safety
Quality Practices and Measurement
Manufacturing Processes and Production
Maintenance Awareness

Health Sciences

Dental Assisting Certificate to the A.S. in Health Services Management

Dental Assisting Certificate

LPN to RN (A.S. in Nursing)

Licensed Practical Nurse Certification
NWFSC Nursing Department Articulation Plan

Hospitality and Tourism Management

Industry Certification to the A.S. in Hospitality and Tourism (and embedded program certificates)

ServSafe Certified Food Protection Manager (NRAEF003)

Public Safety/Emergency Medical Services

Industry Certification to NWFSC Criminal Justice Coursework

Florida Corrections Officer Certification
Florida Law Enforcement Certification

EMT or Paramedic Certification(s) to the A.S. in Emergency Medical Services

Florida State Certified Emergency Medical Technician (EMT-Basic)
Florida State Certified Paramedic (EMT-P)

American Council on Education (ACE) Special Forces Advanced Tactical Practitioner/18 Delta to the CCC in Paramedic Certificate

ACE Special Forces Advanced Tactical Practitioner/18 Delta

Statewide Articulation Agreements

The State Board of Education approved the Statewide Career and Technical Education Articulation Agreements which are based on industry certification. This supports the Department's Next Generation Areas of Focus effort Number 3 —"to expand opportunities for postsecondary degrees and certificates." These agreements are intended to be a minimum guarantee of articulated credit and do not preclude institutions from granting additional credit based on local agreements. Individual agreements are listed below.
Statewide Articulation Agreements

AS to Baccalaureate Degree Articulation Agreements

In Florida, A.S. degree curricula regularly include technical skills and theoretical knowledge, as well as, a required general education component that are designed to prepare an individual either for entry into the workforce or transfer into a related baccalaureate program. It is this combination of theory and practice that distinguishes the A.S. degree from the A.A. degree, with its traditional focus on the liberal arts and sciences. This valuable combination of knowledge and skills need not disqualify A.S. degree courses from transferability. Indeed, the competencies taught in the lower division at two-year colleges often duplicate

competencies taught at universities in the upper-division (for example, in nursing or in certain information technology fields). The learning outcomes embedded in the A.S. degree programs often embody similar technical knowledge and skillsets. A complete list of articulated programs and hours can be viewed in the Florida Department of Education Career Ladder Agreements document.

Industry Certification to AAS or AS Articulation Agreements

There are several acceleration methods associated with Industry Certification. These acceleration opportunities allow students who are progressing to the next level of education to earn a guaranteed number of college credits toward the A.A.S. or A.S. degree. Each acceleration opportunity requires the student to demonstrate mastery of a specified level of competency. One example of this method is the Gold Standard Articulation Agreement, which includes identified industry certifications. As new agreements are developed they are added to the articulation list.
The Gold Standard Career Pathways Articulation Agreements of Industry Certification provides information on the identified industry certifications approved by the Florida State Board of Education. Contact the Coordinator of Career & Technical Education for additional information.

ATD to AAS or AS Articulation Agreements

The Applied Technology Diploma (ATD) consists of a course of study that is part of an A.A.S. or A.S., is less than sixty (60) credit hours, is approximately fifty (50) percent of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either clock hour credit or college credit. The transfer of the applied technology diploma to an associate degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma. For a listing of specific statewide ATD to AAS/AS articulation agreements approved by the ACC, see ATD to AAS/AS Articulation Agreements.

Transfer Agreement with Independent Colleges and Universities in Florida

The Florida College System has a transfer agreement with many of the Independent Colleges and Universities of Florida (ICUF). This allows AA degree graduates to transfer into a private college or university with the guarantee that a student will enter as a junior, receive at least 60 credit hours toward the bachelor's degree, and receive recognition for the general education core that was completed at an institution within the Florida College System. Most of the 31 ICUF institutions have recognized this agreement. To view a copy of the ICUF articulation agreement with the Florida College System, see Independent Colleges and Universities Articulation Agreement.

Other Statewide Agreements

The Florida College System also has established articulation agreements with private colleges and other universities. To view specific agreements, see http://www.fldoe.org/articulation/articulation-agreement.asp.

(State Board of Education Rule 6A-10.024).

AA - Associate in Arts General Degree

Admission Program Objective Code AAGD State CIP Code 1192401010
*This program is available fully online
The AA is primarily intended as a transfer degree for students continuing to a 4 year bachelor's program at a university or state college.
Associate in Arts students must complete 60 college credits to complete the degree; 36 of these credits must be general education credits distributed across five subject area categories. A student must satisfy the required number of credits in each category. The remaining 24 elective credits should be selected in consultation with an advisor, who will assist with selecting the college credits most advantageous to the student's educational goals.

DAA 1934C - Dance--Special Topics

A defined special topics which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a Collegiate High School student to pursue a course of study in applied dance. This course may be taken up to four (4) times for credit.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

SOW 2020 - Introduction to Social Work

This course will familiarize students with roles, functions, and tasks Social Workers perform in a variety of settings. Students are introduced to primary skills and practices of a generalist Social Worker. Students are exposed to issues of diversity, oppression, and social justice influencing economic, social, and political change. Core values of ethics, collaboration, and multi-method approaches will be paramount, shaping the foundations of Social Work for those students who may be interested in this discipline as a career path.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

Associate in Science Degrees (AS), Certificates (CCC/CCP), and Applied Technology Diploma (ATD)

Associate in Science Degree (AS)

The Associate in Science degree provides students with college credit curricula designed to prepare them for employment in various semi-professional, technical, and supervisory fields. The A.S. degree programs include a minimum of 60 college credit hours, of which at least 18 are general education courses. The A.S. degree is not generally intended for transfer; however, many students eventually pursue upper division study after completing the A.S. degree. In recognition of this practice, the general education courses required for the A.S. degree meet all applicable Gordon Rule standards and minimum grade requirements; all are transferable as general education credits to upper division institutions in the Florida State University System. Many of the technical courses in the A.S. degree are also transferable, but students should work closely with an advisor in selecting technical courses if transfer is an eventual goal.

Companion Certificate Programs

Many of the technical certificate programs offered by NWF State College provide the initial step in meeting selected course requirements for an A.S. degree in a related area. Courses from those certificates are the same as or equivalent to comparable courses in the companion degree program. Likewise, courses used in the degree program may be applied to a certificate in a related area; in many cases, completion of the technical courses in the degree program can automatically qualify the student to receive the companion certificate.

Graduation Requirements for A.S. Degree

A.S. degree students must satisfy the following requirements:
Complete the A.S. general education courses as appropriate to the program of study, including Speaking-Across-the-Curriculum , Gordon Rule course and minimum grade requirements.
Complete at least fifteen credits of the technical core courses and technical elective courses specified in the degree program at NWF State College, unless there is an established articulation agreement.
Complete at least 25% of the credits at NWF State College.
Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued at NWF State College.
Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued, whether at NWF State College or by transfer.
Complete AS Degree General Education Requirements (all Gordon Rule courses require a minimum grade of "C").

Customizing an A.S. to Meet a Specific Career Goal

In order to provide a student with the strongest technical background feasible, some technical courses within a given degree program may be adjusted to meet the student's targeted career goal. In these special cases, course substitutions may be approved upon request of the appropriate department chair to the Dean of Career and Technical Education.

Applied Technology Diploma (ATD)

In accordance with Rule 6A-10.024, Florida Administrative Code, A.T.D. programs shall have a guaranteed transfer period of up to three years following the A.T.D. award date. Applied technology diploma students entering an associate degree program shall meet the admissions standards as outlined in section 1007.263, F.S. Additional admissions requirements for limited access programs may be established by the Florida College System institution board of trustees.

College Credit Certificates (CCC)

College credit certificates range from eleven (11) to forty-two (42) credits in length, although most are comprised of thirty (30) credits, and require approximately one academic year to complete. Courses in these certificates include professional and technical skills, with an emphasis on practical application.
Each of the NWF State College credit certificates is paired with a companion A.S. degree program. Upon successful completion of the college credit certificate, the student may receive credit toward approximately 45% to 50% of the course requirements in the companion degree program. Conversely, students who successfully complete the technical credits within a companion degree program may qualify for graduation from the appropriate certificate program. In this manner, students may receive two graduation credentials from the college. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Career and Technical or Vocational Certificates (CCP)

Career and technical or vocational certificates are comprised of clock hour courses and are designed to prepare students for direct entry into employment. The certificates are generally less than one year in length and are designed to prepare students for employment in selected occupational skill areas. The curriculum is heavily oriented toward problem solving and skill application. In certain circumstances, the skills acquired through completion of a career and technical or vocational certificate may be articulated into comparable college credit work and applied to college credit certificate, or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Graduation Requirements for Certificate

To successfully complete a college credit or a career and technical or vocational certificate, the student must meet the following requirements.
Complete the courses and other requirements as specified in the program of study. (With advance approval, college credit courses may be substituted for equivalent vocational courses in any career and technical or vocational certificate.)
Complete at least 25% of the certificate coursework in residence at Northwest Florida State College.
Maintain a cumulative GPA of not less than 2.00 in all coursework pursued for the certificate.
Satisfy all other college graduation requirements.
In addition, students wishing to complete a career and technical or vocational certificate must demonstrate minimum skill levels in reading, communications, and mathematics, as measured by the TABE. The levels vary for each program of study.

Certificate to AS Degree Career Paths

Many of the technical certificate programs offered by NWFSC provide the initial step in meeting selected course requirements for an A.S. degree in a related area. Courses from those certificates are the same as or equivalent to comparable courses in the companion degree program. Likewise, courses used in the degree program may be applied to a certificate in a related area; in many cases, completion of the technical courses in the degree program can automatically qualify the student to receive the companion certificate. Listed below are the NWFSC Associate in Science degrees and their companion certificates.

CJE 1735 - Unmanned Vehicle Legal Requirements and Case Law

This course examines the legal requirements and limits of drone operation by law enforcement. The course will also introduce the student to case studies, guidelines, laws, and protocols for law enforcement operations in contrast to use by private citizens. Additionally, this case will examine and define expectations of privacy, based on case law as set forth by the United States Supreme Court. Case studies and Supreme Court decisions from the last century based on the fourth amendment and due process of law, will be studied for class projects. Each student will be required to submit a research paper on a specific related topic as assigned by the instructor.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

CJE 2736 - Law Enforcement Applications of Unmanned Vehicles for 21st Century

This course will introduce students to current law enforcement uses and abilities of unmanned vehicle systems, along with new and developing applications for exclusive use in law enforcement actions. Students will understand and explain the definitions of privacy expectations as related to law enforcement actions governed by the fourth amendment. Students will be required to participate in a course project, in which students will develop, justify and define futuristic uses on drone technologies in the law enforcement field. In this team project, a presentation is required to defend the positions and uses of drone technologies as related in the project results.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

Accounting Technology

Accounting Technology (AS)

Admission Program of Study Code ACCT State CIP Code 1552030201
*This program is available fully online
Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in Accounting Technology Management (CCC) (State CIP Code 0552030205).

Accounting Technology Management (CCC)

Admission Program of Study Code AASA State CIP Code 0552030205
*This program is available fully online
Students who successfully complete this certificate may be eligible to receive credits towards the Accounting Technology (AS) degree (State CIP Code 1552030201).

ACG 2021 - Financial Accounting

This course is an introduction to financial accounting that specializes in the processes and principles used to prepare financial statements. This course will focus on the purpose and content of the four basic financial statements including the preparation of these statements as well as interpreting information for decision-making.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
MAC 1105 - College Algebra , equivalent, or higher

APA 1000 - Accounting Fundamentals I

Introduction to the principles used in measuring organization performance and reporting the results of organizational activities. Recommended for non-accounting majors.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

Aviation

Unmanned Vehicle Systems Operations (AS)

Admission Program of Study Code DRO3
State CIP Code 1615080102
The program will offer a core of courses that will develop an operational knowledge of UAS design, limitations, operations, and maintenance as well as proper aeronautical decision making.
The sixty-two (62) credit hour curriculum framework focuses instruction on the knowledge and skills required to meet the Airman Certification Standards published by the FAA to obtain a Remote Pilot Certificate. Intellectual knowledge focuses on the theory, practice, information security, regulatory requirements, and execution of commercial UAS operations. Aviation law and regulations, aviation meteorology, aerodynamics, national airspace structure, vehicle design and control, and human factor considerations are all components of the classroom delivery. UAS operational skills are developed and are refined through hands-on instruction for practical application.

Professional Pilot Technology (AS)

Admission Program of Study Code (AS-AIRP)
State CIP Code 1649010200

This program provides students with the skills and knowledge needed to earn the FAA pilot certificates required to begin their flying careers. Students may start taking course leading to the degree, however, they must first obtain a private pilot certificate prior to starting in flight training courses. Students completing the degree will earn a Commercial Pilot certificate with single and multi-engine, and instrument rating. Student may also earn a Flight Instructor certificate as an elective. Students already holding pilot certificates and/or ratings may receive college credit for those certificates as determined by Northwest Florida State College program policies and the Federal Aviation Administration rules which may include an evaluation of the student's certificates, training received, and conducting flight proficiency checks. Additionally, this is a high cost program and it requires the student to first obtain the appropriate medical certificate prior to the start of flight training. Successful completion of the program will allow graduates to start in entry-level jobs as pilots or as flight instructors to enable building the required flight hours for more advanced flying careers.

Aviation Airframe Mechanics (CCP)

Admission Program of Study Code (VC-AIRF)
State CIP Code 0647060703

The Aviation Airframe Mechanics certificate program provides the training leading to eligibility to test for the written, and oral and practical exams required to obtain the Federal Aviation Administration (FAA) Airframe Mechanics license. This program provides instruction consisting of a sequence of courses that involves the theoretical knowledge and practical laboratory training to develop the skills necessary to fulfill the FAA eligibility requirement for testing.
This training is highly intensive in developing the academic, technical, and professional skills, knowledge and attitudes required for success in the aviation maintenance field. It is a clock hour program which is approximately 15 months in length, and is designed to meet the FAA standards which dictates a rigid class attendance and grading policy. Subjects will include inspect, service, repair, and overhaul of various airframe systems and components to include aircraft structures, hydraulics, electrical and electronics, flight

controls, landing gear and brakes, aircraft instruments and cabin environmental systems.
Successful completion of the program, and acquiring the FAA airframe license will provide career opportunities within general aviation, commercial airlines, repair stations, airframe manufacturing, as well as maintenance support of military aircraft.

ASC 1320 - Aviation Laws and Regulations

Upon completion of the course, the student will be able to describe and explain the activities and roles played by federal, state, and local aviation entities. Will be able to outline the manner in which the FAA enforces aviation administrative regulations. Will be able to differentiate between the public and private sectors of aviation liability and describe methods to minimize risk. Will be able to compare and contrast domestic and international aviation law.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 1610C - Aircraft Systems and Components

This course provides students with a basic understanding of the various types of aircraft engines, systems, and structures in use in both general aviation and transport category aircraft (airliners). Students will learn about engine types and their construction, operating procedures, and performance. Aircraft structures and construction methods will also be examined, along with an overview of hydraulic, electric, pressurization, fuel, and anti-ice systems.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 1870 - Aviation Safety

The primary goal of this course is to provide aspiring aviation professionals with a comprehensive understanding and enhanced awareness of aviation safety. Class participation in analyzing the probable cause of selected aviation accidents, field trips, and guest speakers will be featured. Federal agencies which regulate aviation, with emphasis on those concerned with safety, will be studied. Information on how flight affects the human body and actions to minimize adverse effects.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2210 - Aviation Meteorology

This introductory level course acquaints the aviation student with the fundamentals of the Earth's atmosphere, current theories on meteorology, and the effects of weather on aircraft and air traffic control. Particular emphasis will be given to the acquisition and interpretation of weather reports and forecasts from various weather information sources. Aviation weather is specifically designed for the aviation student wishing to improve his knowledge and understanding of aviation weather (both theory and services) beyond that necessary for any of the FAA computer-based pilot knowledge tests.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2473 - Human Factors and Resource Management

This course provides an introduction to the field of human factors, which focuses on the interaction between humans and machines in the complex aviation environment. Human physiology and human performance within the flight environment are examined in depth. Students apply human factors concepts to single pilot resource management (SRM) and crew resource management (CRM) within the framework of threat and error management (tem). Professionalism in aviation is a major focus of the course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2550 - Aerodynamics

An analysis of the physical laws and aerodynamic principles which govern the flight and performance of aircraft stability and control, weight and balance, and aircraft instruments affecting flight operational considerations of controllable pitch propellers, retractable gear, weather, and precision maneuvers.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prereq/Corequisites:
PHY 1020

ASC 2561C - Unmanned Aerial Systems Operations

This course serves as follow-on to the introductory Unmanned Aerial Systems (UAS) course. It builds on the student's understanding of UAS history, technology, and regulations and builds on those to provide a basis for operating small UAS platforms (<55 pounds). Students will gain additional exposure to a variety of UASs operations, including aerial imaging, and search and rescue operations. Additional flight operations will be conducted in a controlled environment to provide exposure to real-world situations, with the intent of preparing the student for the FAA's UAS operator certificate.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ASC 2560C

ASC 2562C - UAS Operations and Cross Country Data Entry

This course will address the use of the various systems and navigation equipment that exists on unmanned aircraft. Students will learn to analyze and identify the different systems that are employed on unmanned aircraft. They will identify the appropriate navigational system packages that are employed on various unmanned aircraft. Unmanned aircraft employ navigation systems that are, in many ways, significantly different than manned aircraft. These systems include navigation by ground observers; navigation using GPS determined position on a ground-based moving map display; and fully-autonomous GPS-based navigation. Students will differentiate the types of navigation systems available; and use the appropriate procedure to enter the navigation data into the unmanned aircraft's navigational system.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ASC 2563C - UAS Applications in Aerial Photography

This course will familiarize the student with guidelines, regulatory standards, and practical operational considerations for aerial photography and videography techniques specific to the use of unmanned aircraft systems (UAS). Current procedures and relevant practical application methods will provide a basis for commercial applications that leverage future UAS technologies.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

ASC 2566C - Remote Pilot Operations

This course provides the basic knowledge and skills to establish a firm foundation for a career as a professional remote pilot through the practical application of regulations and flight planning for fixed wing and rotor unmanned aircraft. This course also provides a foundation and understanding of the essential elements of risk management and decision making as required by the unmanned aviation industry.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

ATF 2201L - Commercial Flight I

This is the first of three courses needed to complete the training required for the FAA Commercial Pilot certificate for single-engine airplanes. This course covers the first phase of commercial pilot training: cross-country navigation and flight review. It includes 33 hours of solo flight, 11 hours of dual flight instruction, and five hours of ground instruction and pre-/post flight briefings with an FAA-approved flight instructor. After completing this course, students take Commercial Flight II and III to meet the requirements for the Commercial Pilot certificate. It should be noted that the hours above are based on FAA-syllabus minimums, and students may exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
Students must hold a Private Pilot, Airplane Single-Engine Land certificate

Prereq/Corequisites:
Must be enrolled in, or have completed ATT 2110

ATF 2202L - Commercial Flight II

This is the second of three courses needed to complete the training required for the FAA Commercial Pilot certificate for single-engine airplanes. This course covers the second and third phases of commercial pilot training: cross-country time-building. It includes 32 hours of solo flight, 14 hours of dual flight instruction, and five hours of ground instruction and pre-/post flight briefings with an FAA-approved flight instructor. After completing this course, students take Commercial Flight III to complete the requirements for the Commercial Pilot certificate. It should be noted that the hours above are based on FAA-syllabus minimums, and students may exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
Students must hold a Private Pilot, Airplane Single-Engine Land certificate

Prereq/Corequisites:
ATF 2201L

ATF 2203L - Commercial Flight III

This is the third of three courses needed to complete the training required for the FAA Commercial Pilot certificate for single-engine airplanes. This course covers the fourth and fifth phases of commercial pilot training: commercial maneuvers and complex airplane training. It includes 30 hours of dual instruction including 10 hours in a complex airplane, and 12 hours of ground instruction and pre-/post flight briefings with an FAA approved flight instructor. The course requirements are met when the student earns his or her Commercial Pilot certificate for single-engine airplanes. It should be noted that the hours above are based on FAA-syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
Students must hold a Private Pilot, Airplane Single-Engine Land certificate

Prereq/Corequisites:
ATF 2202L

ATF 2305L - Instrument Pilot Flight I

This course provides the training required for the FAA Instrument Airplane rating. It includes 38 hours of dual flight instruction and 9 hours of ground instruction and pre-/post flight briefings with an FAA-approved flight instructor. The course requirements are met when the students earns his or her Instrument rating. It should be noted that the hours above are based on FAA syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the

course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
Students must hold a Private Pilot, Airplane Single-Engine Land certificate.

Prereq/Corequisites:
Must be enrolled in, or have completed ATT 1120 .

ATF 2400L - Multi Engine Flight I

This course provides both the ground and flight training needed to earn the FAA Multi-Engine rating. It includes 10 hours of dual flight instruction and 18 hours of ground instruction and pre-/post flight briefings with an FAA approved flight instructor. The course requirements are met when the student earns his or her Multi-Engine Commercial rating. It should be noted that the hours above are based on FAA-syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass.
This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate,
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prereq/Corequisites:
ATF 2203L

ATF 2500L - Certified Flight Instructor I

This course provides the training needed to earn the FAA Certified Flight Instructor certificate for airplanes. It includes 25 hours of dual flight instruction and 6 hours of ground instruction and pre-/post flight briefings with an FAA approved flight instructor. The course requirements are met when the students earns his or her Certified Flight Instructor certificate for airplanes. It should be noted that the hours above are based on FAA-syllabus minimums, and students will often exceed these minimum hours. The cost for these additional flight hours is not covered by the course fee. Pilot students are expected to fly at least three flights per week, not counting Sundays. Students who cannot commit to such a schedule are not likely to pass. This course also has special requirements, which students must meet prior to enrolling:
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prereq/Corequisites:
ATT 2131

ATF 2530L - Certified Flight Instructor Instrument

This course provides a study of the aeronautical skills and abilities required for the Certified Flight Instructor Airplane Certificate. Students apply skills from prior classes to explain, demonstrate, and analyze flight maneuvers and resource management skills involved with Private Pilot, Commercial Pilot, and Flight Instructor Certificates. The course also provides practical flight instruction

experiences. Students must complete the appropriate flight lessons and pass the Federal Aviation Administration's Flight Instructor Airplane Single Engine Practical Exam to satisfactorily complete the course. Flight training fees (in addition to the cost of tuition) are required and must be paid in advance of the course start date. Flight training fees for this course are based on 25 hours of flight training, which is the minimum number of flight hours allowed by the FAA for completion of the Flight Instructor - Airplane Certification. Any additional training required beyond the FAA minimum is the financial responsibility of the student. This course also has special requirements, which students must meet prior to enrolling
1. students must hold a Private Pilot, Airplane Single-Engine Land certificate
2. students must hold a minimum of an FAA third-class medical certificate (current second class for GI Bill students)
3. students must be U.S. citizens or have TSA authorization to start flight training
4. students must meet with the Program Manager to verify documentation and review course requirements and flight training costs.
Northwest Florida State College provides the flight instruction through a College-contracted flight school. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
ATF 2500L and ATF 2305L

ATT 1120 - Instrument Rating Ground School

This course provides the classroom instruction required for instrument flight training and the FAA Instrument-Airplane Knowledge Test. Topics include flight by instrument reference, flight physiology, IFR aircraft operations and procedures, radio navigation, in-route charts, instrument approach procedures, flight planning, weather, and IFR regulations. Students who complete the course satisfactorily may earn the required endorsement to take the FAA Instrument Rating Knowledge Test. Students are required to be enrolled in, or have completed, this course prior to beginning Instrument flight training. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Students must hold a Private Pilot, Airplane Single-Engine Land certificate

ATT 2110 - Commercial Pilot Ground School

This course provides the classroom instruction required for Commercial Pilot flight training and the FAA Commercial Pilot-Airplane Knowledge Test. Topics include advanced aircraft systems, high performance engines, retractable landing gear, and environmental systems, advanced performance charts, maximizing aircraft performance, and regulations relating to commercial operations. Students who complete the course satisfactorily may earn the required endorsement to take the FAA Commercial Pilot-Airplane Knowledge Test. Students are required to be enrolled in, or have completed, this course prior to beginning Commercial Pilot flight training. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Students must hold a Private Pilot, Airplane Single-Engine Land certificate

ATT 2111 - Aircraft Systems Advanced

This course enhances the classroom instruction required for Commercial Pilot flight training. Topics include advanced aircraft systems, high performance engines, retractable landing gear, and environmental systems, advanced performance charts, maximizing aircraft performance, and regulations relating to commercial operations.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ATT 2131 - Certified Flight Instructor Ground

This course provides the classroom instruction required for Certified Flight Instructor training and both the FAA Fundamentals of Instructing and Flight Instructor-Airplane Knowledge Tests. Topics include the learning process, elements of effective teaching, student evaluation and testing, course development, lesson planning, and classroom training techniques. NWFSC does not waive the course fees for this program for active duty military students using Tuition Assistance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ATF 2203L

Building Construction

Building Construction Specialist (CCC)

Admission Program of Study Code BUCO State CIP Code 0615100103

The purpose of this program is to prepare students for employment in the building construction field or to provide additional training for persons previously or currently employed in the construction or other related industries. The coverage includes communication skills, technical competency, safe and efficient work practices, and a combination of theory and laboratory activities to gain the necessary cognitive and manipulative skills to support building construction activities. Candidates interested in this program should be interested in working with their hands and the satisfaction of knowing they played a part in a newly constructed or remodeled facility.

Business Administration

Business Administration (AS)

Admission Program of Study Code BADM State CIP Code 1552020102
*This program is available fully online
Students who successfully complete selected courses from this program of study may be eligible to receive the Business Management (CCC) (State CIP Code 0552070101) and/or Business Specialist (Human Resources) (CCC) (State CIP Code 1552020102) college credit certificates.

Business Management (CCC)

Admission Program of Study Code BMGC State CIP Code 0552070101
*This program is available fully online
Students who successfully complete this certificate may be eligible to receive credits toward the Business Administration (AS) degree (CIP Code 1552020102).

Business Development and Entrepreneurship (CCC)

Admission Program of Study Code BMDE State CIP Code 0552070306
*This program is available fully online
Students who successfully complete this certificate may be eligible to receive credits towards the Business Administration (AS) degree.

Business Specialist (Human Resources) (CCC)

Admission Program of Study Code: BMHR State CIP Code 0552020103 Students who successfully complete this certificate may be eligible to receive credits toward the Business Administration (AS) degree (CIP Code 1552020102).

Computer Information Technology

Information Technology Analysis (CCC)

Information Technology Analysis
Admission Program Objective Code ITAS
State CIP Code 0511010312

Information Technology Support Specialist (CCC)

Information Technology Support Specialist
Admission Program Objective Code ITSS
State CIP Code 0511010311

Mobile Device Technology (CCC)

Mobile Device Technology
Admission Program Objective Code MDTH
State CIP Code 0511010309

Computer Information Data Specialist (CCC)

Computer Information Data Specialist
Admission Program Objective Code CIDS
State CIP Code 0611050101

Help Desk Support Technician (CCC)

Help Desk Support Technician
Admission Program Objective Code HDST
State CIP Code 0511010313

Computer Information Technology (AS)

Admission Program Objective Code CINF State CIP Code 1511010307
*This program is available fully online

Computer Programming and Analysis

Computer Programmer (CCC)

Admission Program of Study Code CMPG State CIP Code 0511020200
Students who successfully complete this certificate may be eligible to receive credits towards the Computer Programming and Analysis (AS) degree (State CIP Code 1511020101).

Computer Programming and Analysis (AS)

Admission Program Objective Code CPRO State CIP Code 1511020101

Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in Computer Programmer (CCC) (State CIP Code 0511020200) and/or Computer Programming Specialist (CCC) (State CIP Code 0511020103).

Computer Programming Specialist (CCC)

Admission Program of Study Code CMPS State CIP Code 0511020103
Students who successfully complete this certificate may be eligible to receive credits towards the Computer Programming and Analysis (AS) degree (State CIP Code 1511020101).

COP 2650 - Introduction to Mobile Programming

A broad survey of the development of mobile applications and the use of mobile devices. This course will help the student understand the development process for mobile devices, security measures that should be taken and will provide an overview of developing for both the Android and iOS mobile environments.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
COP 1000 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Cybersecurity

Cybersecurity (AS)

Admission Program Objective Code CYBE State CIP Code 1511100308

Dental Assisting

Dental Assisting (CCP)

Admission Program of Study Code DENT State CIP Code 0351060112
Basic Skills Requirements: The student must be exempt or attain a 10th grade level on each section of the TABE exam: Math, Language and Reading.
This program is a Selective Admission program subject to additional program policies and requirements stipulated in the "Dental Assisting Student Handbook." The admission criteria and process, as well as some course numbers and credits are subject to change; students should contact the Dental Assisting program office for the most current information.
The program in dental assisting is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of "approval without reporting requirements". The Commission on Dental Accreditation can be contacted at (312) 440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611. The Commission's web address is: http://www.ada.org/en/coda. The next site visit is in 2025.
Students who successfully complete this program and pass the Dental Assisting National Board (DANB) Certificate (CDA) may apply 21 credits towards the Technical Elective requirements for the Health Services Management (AS) degree (State CIP Code 135070100).

DEA 0132 - Dental Nutrition

This is a comprehensive course designed to integrate nutrition into diagnosis, care and treatment of dental patients. It also focuses on the relationships between dental disease, lifestyles, eating habits and oral health.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Corequisite(s):
DES 0400

DES 0206 - Dental Radiology Theory II

Students will learn to identify the normal landmarks of intraoral and extra oral images. They will also be able to demonstrate the ability to interpret x-rays and recognize and identify abnormalities on dental images. Students will learn how to discuss their finding with a dentist, without overstepping the boundaries of diagnosing, from a dental image. Students will be able to explain the differences in cancellous and cortical bone. Students will be able to use an x-ray to identify different restoration types and irregularities in those restorations. Students will be able to point and identify trauma, pulpal lesions and periapical lesions on an x-ray.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DEA 0020 , DEA 0020L , DES 0205 , DES 0205L , and DES 0400

Corequisite(s):
DES 0206L

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Early Childhood Education

Child Care Center Management Specialization (CCC)

Admission Program of Study Code CCCM State CIP Code 0419070906
Students who successfully complete this certificate may be eligible to receive credits towards the Early Childhood Education (AS) degree (State CIP Code 1413121004).

Early Childhood Development Specialization (CCC)

Admission Program of Study Code CDEI State CIP Code 0419070904
Students who successfully complete this certificate may be eligible to receive credits towards the Early Childhood Education (AS) degree (State CIP Code 1413121004).

Early Childhood Education (AS)

Offered Online
Admission Program Objective Code ECED State CIP Code 1413121004
Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in Early Childhood Development Specialization (CCC) (State CIP Code 0419070904), Child Care Center Management Specialization (CCC) (State CIP Code 0419070906), Infant/Toddler Specialization (CCC) (State CIP Code 0419070907), and/or Preschool Specialization (CCC) (State CIP Code 0419070908).

Infant/Toddler Specialization (CCC)

Admission Program of Study Code CITS State CIP Code 0419070907
Students who successfully complete this certificate may be eligible to receive credits towards the Early Childhood Education (AS) degree (State CIP Code 1413121004).

Preschool Specialization (CCC)

Admission Program of Study Code CCPS State CIP Code 0419070908
Students who successfully complete this certificate may be eligible to receive credits towards the Early Childhood Education (AS) degree (State CIP Code 1413121004).

Engineering Technology

CNC Machinist/Fabricator (CCC)

Admission Program of Study Code CNMM State CIP Code 0648051002
Students who successfully complete this certificate may be eligible to receive credits towards the Engineering Technology - Mechanical Design & Fabrication Specialization Option (AS) degree (State CIP Code 1615000001).

Engineering Technology Support Specialist (CCC)

Admission Program of Study Code ETSS State CIP Code 0615000007
Students who successfully complete this certificate may be eligible to receive credits towards one of the Engineering Technology (AS) degree (State CIP Code 1615000001) specializations: Engineering Technology - Digital Manufacturing Specialization (DM) Option (AS) or Engineering Technology - Mechanical Design & Fabrication Specialization Option (AS) , Engineering Technology - Electronics Specialization Option (AS) , Engineering Technology - Maintenance Technician Specialization Option (AS) .

Engineering Technology - Mechanical Design & Fabrication Specialization Option (AS)

Admission Program Objective Code ETMD State CIP Code 1615000001
The purpose of this program is to prepare students for employment or provide additional training for persons previously or currently employed in the manufacturing, electronics, aerospace, or other related industries. This degree is a planned sequence of instruction consisting of the four specializations: Mechanical Design and Fabrication, Digital Design and Modeling, Advanced Technology, and Digital Manufacturing with one common core. It is recommended that students complete the core before advancing to the courses in the next level of specialization. The coverage includes communication skills, technical competency, safe and efficient work practices and a combination of theory and laboratory activities to gain the necessary cognitive and manipulative skills to support engineering design, processes, production, testing, and product quality.
The 18 credit hour core has been aligned with the Manufacturing Skills Standards Council's (MSSC) skills standards. The MSSC skill standards define the knowledge, skills, and performance needed for positions in manufacturing. After completing this core and the General Education requirements, the students will be eligible to take the exam for the MSSC Production Technician Certification.
Students who successfully complete selected courses from this program of study may be eligible to receive the CNC Machinist/Fabricator (CCC) (State CIP Code 0615080502), the Engineering Technology Support Specialist (CCC) (State CIP Code 0615000007).

Rapid Prototyping Specialist (CCC)

Admission Program of Study Code RAPP State CIP Code 0615130211

Engineering Technology - Electronics Specialization Option (AS)

Admission Program Objective Code ETES State CIP Code 1615000001
The purpose of this program is to prepare students for employment or provide additional training for persons previously or currently employed in the manufacturing, electronics, aerospace, or other related industries. This degree is a planned sequence of instruction consisting of the five specializations: Mechanical Design and Fabrication, Digital Design and Modeling, Advanced Technology, Digital Manufacturing and Electronics with one common core. It is recommended that students complete the core before advancing to the courses in the next level of specialization. The coverage includes communication skills, technical competency, safe and efficient work practices and a combination of theory and laboratory activities to gain the necessary cognitive and manipulative skills to support engineering design, processes, production, testing, and product quality.
The 18 credit hours core has been aligned with the Manufacturing Skills Standards Council's (MSSC) skills standards. The MSSC skill standards define the knowledge, skills, and performance needed for positions in manufacturing. After completing this core and the General Education requirements, the students will be eligible to take the exam for the MSSC Production Technician Certification.
Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in Engineering Technology Support Specialist (CCC) (State CIP Code 0615000007).

Engineering Technology - Maintenance Technician Specialization Option (AS)

Admission Program Objective Code ENMT State CIP Code 1615000001
The purpose of this program is to prepare students for employment or provide additional training for persons previously or currently employed in the manufacturing, electronics, aerospace, or other related industries. Instruction in electrical/electronic principles, basic mechanic fundamentals, robotics and machine repair prepare the student to meet the demands and develop the skills required to maintain and troubleshoot high-tech manufacturing equipment. The coverage includes communication skills, technical competency, safe and efficient work practices and a combination of theory and laboratory activities to gain the necessary cognitive and manipulative skills to support engineering design, processes, production, testing, and product quality. Candidates interested in this program should be interested in working with their hands and enjoy the challenges of programming and troubleshooting electrical and mechanical equipment.
The core of this degree has been aligned with the Manufacturing Skills Standards Council's (MSSC) skills standards. The MSSC skill standards define the knowledge, skills, and performance needed for positions in manufacturing. The course sequence is designed to prepare students for successful completion of the four exams that make up the MSSC Production Technician Certification. The exams are embedded within four of the courses with the outcome of the exam influencing the final grade in the selected courses.
Students who successfully complete selected core courses from this program of study may be eligible to receive the Engineering Technology Support Specialist (CCC) (State CIP Code 0615000007) certificate.

Graphics Technology

Graphic Design Production (CCC)

Admission Program of Study Code GRDP State CIP Code 0611080303
Students who successfully complete this certificate may be eligible to receive credits towards the Design and Digital Marketing (AS) Degree (State CIP Code 1611080300).

Design and Digital Marketing (AS)

Admission Program Objective Code GRTD State CIP Code 1611080300 The Design and Digital Marketing A.S. degree is intended

for students interested in careers in Graphic Design and Commercial Art where creativity and visual communication are core competencies. Students are encouraged, but not required, to contact Graphic Arts faculty at 850-729-6019 for detailed advising to plan a program of study before enrolling in courses.
Students who successfully complete selected courses from this program of study may be eligible to receive the Graphic Design Production (CCC) (State CIP Code 0611080303).

GRA 2181C - Graphic Design Portfolio Development

A final semester course where students will develop a professional portfolio that demonstrates their technical and creative skills. Students will evaluate prior work for inclusion, and determine needs for new work that will enhance their portfolio. Students will develop new work exhibiting illustration, photography, and graphic design skills.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
PGY 1801C , GRA 2190C , ART 2602C , GRA 1151C

Health Services Management

Health Services Management (AS)

Admission Program Objective Code HTMG State CIP Code 1351070101

Hospitality and Tourism

Hospitality and Tourism Management (AS)

Hospitality and Tourism
Admission Program of Study Code HSTR
State CIP Code 1252090101
The Hospitality and Tourism program prepares students for employment in management positions in the hospitality industry and/or provides supplemental training for persons previously or currently employed in these occupations. The hospitality industry as addressed in this program includes the hotel, motel, bed and breakfast, resort, club, marina, and other lodging organizations.
Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in :
Event Planning Management (CCC)
Food and Beverage Management (CCC)
Food and Beverage Operations (CCC)
Guest Services Specialist (CCC)
Rooms Division Management (CCC)
Rooms Division Operations (CCC)

Event Planning Management (CCC)

Admission Program of Study Code (EPMG)
State CIP Code 0252090905
Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101).

Culinary Management (AS)

Culinary Management

Admission Program of Study code: CUL
State CIP Code 1612050401
The Emerald Coast is one of the top tourist beach destinations in the U.S. and tourism is one of the leading industries in Northwest Florida. Northwest Florida State College's Culinary A.S. Degree Program is designed to support the tourism industry by preparing students for employment in the culinary and restaurant industry. Students will gain employability skills and knowledge through classroom instruction and culinary lab experience in the following courses Sanitation and Safety; Maintenance and Operation of Equipment; Methods of Preparation an d Cooking; Perform Different Types of Food Services; Nutrition; Baking; and Dining Room and Beverage Management. Students will also receive training in communications, leadership and human relations skills. This program focuses on broad, transferable skills and stresses understanding and demonstration of elements of the culinary industry. Careers include culinary manager, food and beverage manager, pastry cook, executive chef and many more.
Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in : Culinary Arts (CCC)
Culinary Arts Management Operations (CCC)

Culinary Arts (CCC)

Admission Program of Study Code: CULA
State CIP Code 0612050301
Students who successfully complete this certificate may be eligible to receive credits towards the Culinary Management (AS) degree (State CIP Code 1252090101).

Culinary Arts Management Operations (CCC)

Admission Program of Study Code: CULM
State CIP Code 0612050401
Students who successfully complete this certificate may be eligible to receive credits towards the Culinary Management (AS) degree (State CIP Code 1252090101).

Rooms Division Operations (CCC)

Admission Program of Study Code RMOP State CIP Code 0252090406

Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101).

Rooms Division Management (CCC)

Admission Program of Study Code RMMG State CIP Code 0252090402

Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101).

Food and Beverage Management (CCC)

Admission Program of Study Code FBMG State CIP Code 0252090503

Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101).

Food and Beverage Operations (CCC)

Admission Program of Study Code FBOP State CIP Code 0252090508

Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101)

Guest Services Specialist (CCC)

Admission Program of Study Code GUES State CIP Code 0252090403

Students who successfully complete this certificate may be eligible to receive credits towards the Hospitality and Tourism Management (AS) degree (State CIP Code 1252090101).

FSS 2030C - Contemporary Cuisine

Emphasis is placed on learning to use various condiments and seasonings that are indigenous to different parts of the world in food preparation. Topics may include Far East cuisine, Middle Eastern, Mediterranean, North African cuisine, Continental cuisine. Lectures, demonstrations and preparations will also cover American regional cooking, farm to table, trends in the culinary industry and greenhouse procedures. Greenhouse will be used for the lab portion of this class. Alternative diet recipes to be explored. Student must successfully pass written and practical examination covering a variety of cooking techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
FOS 2201

FSS 2941 - Culinary Internship

This course provides a planned work-based experience that will provide students with an opportunity to fine- tune skills learned in coursework and enhance workplace skills through supervised practical experiences related to their career objectives. Internship requires a minimum of 135 clock hours of work. May be repeated for credit, but grade forgiveness cannot be applied.

Credit Hour(s): 2 Credit hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):
FOS 2201 , FSS 1202L , FSS 1221L

HFT 2401 - Hospitality Industry Financial Accounting

Basic understanding of financial accounting and specifically Hospitality Industry accounting concepts and procedures used in hotels, restaurants. Utilize POS system in class activities.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

Industrial Management Technology

Industrial Management Technology (AS)

Admission Program Objective Code INDU State CIP Code 1652020501
*This program is available fully online

Medical Coder/Biller

Medical Coder/Biller (CCC)

Admission Program of Study Code MEDB State CIP Code 0351071404

Medical Laboratory Technology

Medical Laboratory Technology (AS)

Admission Program Objective Code MLTP State CIP Code 1351100405
The AS MLT program at Northwest Florida State College is currently seeking accreditation through the National Accrediting Agency for Clinical Laboratory Science (NAACLS), https://www.naacls.org/about.aspx.
This program is a Selective Admission Program subject to additional program policies. Policies are strictly enforced and students should work with a Student Success Navigator rather than self-advise. The admission criteria and process are subject to change; students should refer to the Selective Programs Admissions/Medical Laboratory Technology (AS) web-page for the most current information. All MLT technical courses are held at the Fort Walton Beach Campus and students are assigned to clinical practicums at various medical laboratories in the region.

MLT 1022C - Introduction to Medical Laboratory Technology

This course outlines the role of the medical laboratory technician and covers the basic principles, techniques, and vocabulary applicable to medical laboratory technology. It also provides overviews of the major regulatory agencies, professional associations, and safety practices. Students will learn basic laboratory mathematics, medical laboratory ethics, specimen collection and handling, and phlebotomy and venipuncture procedures. Admittance to the MLT program is required. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1221C - Urinalysis and Body Fluids

This course covers clinical testing and evaluation of urine and other body fluids. Students will learn to correlate physical, chemical, and microscopic lab findings with disease conditions. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1300C - Hematology I

This course overviews the theories and techniques involved in routine hematology. Topics include the hematopoietic system and blood cell physiology, maturation, and morphology. Students will learn blood cell enumeration, identification, hemoglobin analysis, and clinical correlations. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1302C - Hematology II

This course is a continuation of Hematology I and presents advanced hematology topics as well as the principles and procedures of blood coagulation. Students will examine the role of blood vessels, platelets, and coagulation factors, as well as hematology and hemostasis disease factors. This course requires a grade of C or higher. This requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

MLT 1300C , ADMITTANCE TO MLT PROGRAM

MLT 1401C - Medical Microbiology

This course presents students with principles and methods used in clinical microbiology including taxonomy, isolation, identification, clinical relevance, and antibiotic susceptibility testing of pathogenic bacteria. Students will also receive an introduction to medical parasitology, mycology, and virology. Admittance to the MLT program is required. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 6 Credit Hours When Offered: (Fall) Prerequisite(s):
MCB 2010C , admittance to the MLT program

MLT 1500C - Immunology/Serology

This course covers basic concepts and laboratory practices related to clinical immunology with an emphasis on antibody-antigen interaction in specific diseases. Students will learn about the immune system and its components along with diagnostic principles and procedures involving serological and molecular testing related to immunity and immune disorders. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 1525C - Immunohematology

This course overviews the basic theory and concepts of antigen-antibody reactions associated with blood cell transfusions and relates the concepts of immunology to blood banking procedures using the guidelines of the American Association of Blood Bank. Students will examine genetics, the structure of blood group antigens, the role of antibodies in transfusion, complement interactions, and compatibility testing. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
MLT 1022C , MLT 1300C , MLT 1500C

MLT 1610C - Clinical Chemistry

This course outlines the theory, clinical correlations, and laboratory procedures related to the chemical analysis of clinical specimens. Students will receive in-depth instruction on specimen processing, analysis, test interpretation, and quality control procedures used in manual and automated clinical chemistry testing. Admittance to the MLT program is required. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 6 Credit Hours When Offered: (Spring) Prerequisite(s):
Admittance to the Medical Laboratory Technology program.

MLT 2800L - Clinical Practicum I

Students will be assigned to a clinical affiliate for supervised clinical laboratory experience in either the core laboratory, blood bank, or microbiology department. This learning experience allows students to perform routine analytical procedures, develop their laboratory skills, and apply program knowledge. This course requires a grade of C or higher.

Credit Hour(s): 4 Credit Hours When Offered: (Summer) Prerequisite(s):
MLT 1022C , MLT 1221C , MLT 1300C , MLT 1302C , MLT 1401C , MLT 1500C , MLT 1525C , MLT 1610C , and admittance to the Medical Laboratory Technology program.

MLT 2807L - Clinical Practicum II

Students will be assigned to a clinical affiliate for supervised clinical laboratory experience in the blood bank either the core laboratory, microbiology department, or blood bank. This learning experience allows students to perform routine blood banking procedures, develop their laboratory skills, and apply program knowledge. This course requires a grade of C or higher.

This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
MLT 1022C , MLT 1300C , MLT 1221C , MLT 1401C , MLT 1525C and admittance to the Medical Laboratory Technology program.

MLT 2811L - Clinical Practicum III

Students will be assigned to a clinical affiliate for supervised clinical laboratory experience in either the core laboratory, blood bank, or microbiology department. This learning experience allows students to perform routine analytical procedures, develop their laboratory skills, and apply program knowledge. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
MLT 1401C and admittance to the Medical Laboratory Technology program.

MLT 2930 - Medical Laboratory Technology Capstone

This online course allows students to apply their MLT knowledge to case studies and to review major areas of the MLT curriculum in preparation to become licensed professionals. Students will discuss and review material in hematology, urinalysis, microbiology, clinical chemistry, immunohematology, immunology, molecular methods, laboratory operations, medical ethics, and laboratory safety precautions.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
MLT 1221C , MLT 1401C , MLT 1302C , MLT 1610C , MLT 1525C , MLT 1500C , and admittance to the Medical Laboratory Technology program.

Music Production Technology

Audio Technology (Recording Arts) (CCC)

Admission Program of Study Code ATRA State CIP Code 0610020303
Students who successfully complete this program may apply these credits to the Music and Sound Production Technology (AS) degree (State CIP Code 1650091300).

Music and Sound Production Technology (AS)

Admission Program Objective Code MUSC State CIP Code 1650091300
Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in Audio Technology (Recording Arts) (CCC) (State CIP Code 0610020303).

Nursing

Nursing (AS)

Admission Program Objective Code NURS State CIP Code 1351380100
The Associate in Science (A.S.) Nursing program at Northwest Florida State College located in Niceville, Florida is accredited by the:
Accreditation Commission for Education in Nursing (ACEN)
3390 Peachtree Road NE, Suite 1400
Atlanta, GA 30326
(404) 975-5000

View the public information disclosed by the ACEN regarding this program at
http://www.acenursing.com/accreditedprograms/programsearch.htm
This program is a Selective Admission program subject to additional program policies. Policies are strictly enforced and students should work with a Student Success Navigator rather than self-advise. The admission criteria and process are subject to change; students should refer to the Selective Program Admissions/Nursing (AS) webpage for the most current information. All courses in the AS Nursing program, including general education and core courses, must be completed with a minimum grade of "C" to graduate with the AS Degree in Nursing.

Paralegal Studies

Paralegal Studies (AS)

Admission Program Objective Code PARA State CIP Code 1722030200

Physical Therapist Assistant

Physical Therapist Assistant (AS)

Admission Program Objective Code PTAP State CIP Code 1351080601
The Associate in Science (A.S.) Physical Therapist Assistant (PTA) program at Northwest Florida State College is currently pursuing accreditation through the Commission on Accreditation in Physical Therapy Education (CAPTE).
Graduation from a physical therapist assistant education program accredited by CAPTE is necessary for eligibility to sit for the national licensure examination, which is required in all states. Per USDE regulations, all credits and degrees earned and issued by a program holding candidacy are considered to be from an accredited program.
Effective November 3, 2020, Northwest Florida State College has been granted Candidate for Accreditation status by the Commission on Accreditation in Physical Therapy Education (3030 Potomac Ave., Suite 100, Alexandria, VA, 22305-3085; phone: 703-706-3245; email: accreditation@apta.org). If needing to contact the program/institution directly, please call 850-863-6511 or email pta@nwfsc.edu.
Candidate for Accreditation is an accreditation status of affiliation with the Commission on Accreditation in Physical Therapy Education that indicates the program may matriculate students in technical/professional courses. Achievement of Candidate for Accreditation status does not assure that the program will be granted Initial Accreditation.
This program is a Selective Admission program subject to additional program policies. Policies are strictly enforced and students should work with a Student Success Navigator rather than self-advise. The admission criteria and process are subject to change; students should refer to the Selective Programs Admissions/Physical Therapist Assistant (AS) webpage for the most current information. All PTA technical courses are held at the Fort Walton Beach Campus and students are assigned to clinical practices at various healthcare facilities and outpatient clinics in the region.

PHT 1007 - Topics in Physical Therapy

An introduction of the physical therapy profession, to include the history, ethics, settings, trends and professional issues. Delineation of the roles of the health care team, physical therapy personnel, and communication skills required as a healthcare provider. Various regulatory agencies, practice rules and regulations are also included. The student will also explore the psychological and sociological effects of disabilities, including the impact of culture and economics on the patient and family. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Admission to the PTA Technical Program.

PHT 1128 - Functional Anatomy and Kinesiology

An in-depth study of the structure and function of the musculoskeletal system, with emphasis on the biomechanical principles of

human motion. To include the organization and function of the nervous system and how it interacts with the musculoskeletal system for control and balanced mobility of the human body. Foundations of functional motions will be covered, such as biomechanics of muscle action, levers and torques in relation to human body, and basic physics concepts that applies to physical therapy. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Admission to the PTA Technical Program.

Corequisite(s):
PHT 1128L

PHT 1128L - Functional Anatomy and Kinesiology Lab

An in-depth study of the structure and function of the musculoskeletal system, with emphasis on the biomechanical principles of human motion. To include the organization and function of the nervous system and how it interacts with the musculoskeletal system for control and balanced mobility of the human body. Foundations of functional motions will be covered, such as biomechanics of muscle action, levers and torques in relation to human body, and basic physics concepts that applies to physical therapy. This course requires a grade of C or higher.
This course requires a Lab Fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
ADMISSION TO THE PTA TECHNICAL PROGRAM

Corequisite(s):
PHT 1128

PHT 1200 - Basic Patient Care

Introduces the student to basic patient care skills, patient positioning and draping, treatment area preparation, transfers, wheelchair management, and data collection skills. Wound care principles are introduced including types of wounds/burns and other integumentary issues, stages of healing, treatment/dressings, and care/prevention of pressure ulcers. This course is intended to provide an in-depth exposure to the basic skills necessary in the clinic setting and appropriate professorial behaviors. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 1007 , PHT 1128 , PHT 1128L
Admission to the Physical Therapy Program.

Corequisite(s):
PHT 1200L

PHT 1200L - Basic Patient Care Lab

This lab course allows the practice and refinement of the concepts learned in PHT 1200 lecture on simulated patients. Use of equipment commonly found in physical therapy settings, proper body mechanics in moving, lifting, and transferring patients, wheelchair management, aseptic techniques and principles of wound care. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 1007 , PHT 1128 , PHT 1128L
Admission to the Physical Therapy Program.

Corequisite(s):
PHT 1200

PHT 1211 - Physical Therapy Principles and Procedures

Instructs the student in the theory, physiology and application of biophysical agents used for therapeutic treatment of tissue. Knowledge of the physical principles, physiological effects, medical physics, indications, and contraindications of heat, cold, light, traction, compression, electricity, and hydrotherapy. Selected tests and measures are taught related to the safe application of these

agents. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L and admission to the Physical Therapy Program.

Corequisite(s):
PHT 1211L

PHT 1211L - Physical Therapy Principles and Procedures Lab

This lab course allows the practice and refinement of the concepts learned in PHT 1211 on simulated patients. The application of biophysical agents and data collection skills required for safe application of these modalities. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
Admission to the Physical Therapy Program.
PHT 1800L

Corequisite(s):
PHT 1211

PHT 1224 - Therapeutic Techniques and Disabilities

An overview of principles and techniques of basic physical therapy interventions, with emphasis on physiological changes and effects in commonly seen disorders across the lifespan. Will include therapeutic exercises, gait training with assistive devices, manual therapy, postural analysis, aerobic conditioning and airway clearance techniques. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 1007 , PHT 1128 , PHT 1128L

Corequisite(s):
PHT 1224L

PHT 1224L - Therapeutic Techniques and Disabilities Lab

This lab course allows the practice and refinement of the concepts learned In PHT 1224 on simulated patients. Students will receive hands-on experience with a variety of exercise equipment and practice in performing, assisting, and teaching of therapeutic exercises. Selected tests and measures will be introduced in this course. This course requires a grade of C or higher. This course requires lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 1007 , PHT 1128 , PHT 1128L

Corequisite(s):
PHT 1224

PHT 1800L - Physical Therapy Clinical Practice I

A supervised clinical experience, 2 concurrent weeks of full time clinical education exposure for an introductory experience. Students observe and implement physical therapy services under the close supervision of a clinical instructor. This course requires a passing grade on a Pass/ Fail scale. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 1200 , PHT 1200L , PHT 1224 , PHT 1224L , PHT 1931 , PHT 2301

Prereq/Corequisites:
PHT 1931

PHT 1931 - PTA Seminar

An orientation to the physical therapy clinic environment. The course covers professional clinical expectations, treatment preparation, risk management, the medical record and medical documentation. This course requires a grade of C or higher.

Credit Hour(s): 1 Credit Hour When Offered: (Fall) Prerequisite(s):
PHT 1007 , PHT 1128 , PHT 1128L

PHT 2162 - Neurological Disabilities and Treatment

A comprehensive review of the human nervous system and selected neurological disabilities encountered frequently in physical therapy practice. The course addresses knowledge and application of a variety of therapeutic techniques utilized with patients across the lifespan that have chronic neurological conditions. Stages of motor development and movement strategies are also discussed. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2162L

PHT 2162L - Neurological Disabilities and Treatment Lab

This lab course allows the practice and refinement of the concepts learned in PHT 2162 on simulated patients. Clinical scenarios that require critical thinking skills to develop treatment, progress and follow-up plans for patients with various neurological conditions. Students will also learn about various assessment techniques including sensory, balance and coordination, reflexes, gait analysis, functional and environmental assessment, and perceptual and cognitive deficit assessment. This course requires a lab fee.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2162

PHT 2252 - Orthopedic Disabilities and Treatment

Concepts of orthopedic physical therapy management as well as the therapeutic applications related to bone, cartilage, muscle and soft tissue healing processes. Various musculoskeletal diseases and orthopedic conditions will be introduced including their related pathology and treatment plans. Various surgical precautions, tests and measures, common orthotics, gait deviations, joint mobilizations, soft tissue techniques, and use of modalities for orthopedic conditions. Diagnostic tools such as plain film radiography, computed tomography, diagnostic ultrasound, and magnetic resonance imaging will be introduced. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2252L

PHT 2252L - Orthopedic Disabilities and Treatment Lab

This lab course allows the practice and refinement of the concepts learned in PHT 2252. Clinical scenarios that require data collection and therapeutic applications for common orthopedic conditions. The development of critical thinking, clinical problem solving, and effective treatment plans for various orthopedic conditions. This course requires a grade of C or higher.
This course requires a lab fee.

Credit Hour(s): 1 Credit Hour When Offered: (Spring) Prerequisite(s):
PHT 1800L

Corequisite(s):
PHT 2252

PHT 2301 - Pathological Conditions in PT

This course introduces the pathophysiology of selected disease processes. Disease signs, symptoms, complications, as well as clinical, typical pharmacologic agents and laboratory findings are reviewed by body system. Emphasis will be placed on conditions typically encountered in the physical therapy setting. This course requires a grade of C or higher.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 1007 , PHT 1128 , PHT 1128L

PHT 2704 - Advanced Rehab Concepts in PT

Designed to provide a variety of therapeutic principles and techniques utilized in the clinical setting to address special populations with advanced rehab needs. This includes accessibility to home and community for all patients, women's health, pediatric conditions, bariatrics, geriatrics, and advanced management of amputation and prosthetics. Patient education and the education of others about physical therapy are included. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Summer) Prerequisite(s):
PHT 2810L

Corequisite(s):
PHT 2704L

PHT 2704L - Advanced Rehab Concepts in PT Lab

This lab course allows the practice and refinement of the concepts learned in PHT 2704 on simulated patients. Students will engage in patient education and utilize appropriate teaching methods for their target audience. This course requires a grade of C or higher. This course requires a lab fee.

Credit Hour(s): 1 Credit Hour When Offered: (Summer) Prerequisite(s):
PHT 2810L

Corequisite(s):
PHT 2704

PHT 2810L - Physical Therapy Clinical Practice II

A supervised clinical experience, 4 concurrent weeks of full time clinical education exposure for an integrated clinical education experience. Students implement physical therapy services under the close supervision of a clinical instructor. Students will be expected to perform specific therapeutic procedures covered in prior coursework. This course requires a passing grade on a Pass/ Fail scale. This course requires a lab fee.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
PHT 1800L , PHT 1211 , PHT 1211L , PHT 2252 , PHT 2252L , PHT 2162 , PHT 2162L

PHT 2820L - Physical Therapy Clinical Practice III

The final supervised clinical experience, 8 concurrent weeks of full time clinical education designed to prepare PTA students for entry into the profession of physical therapy. Student will have the opportunity to refine all treatment interventions and data collection skills, plus demonstrate professional behaviors throughout the clinical experience. This course requires a passing grade on a Pass/Fail scale.This course requires a lab fee.

Credit Hour(s): 8 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 2810L , PHT 2704 , PHT 2704L

PHT 2930 - Trends in Physical Therapy

This course broadens the scope of the student's understanding of the health care system. Topics include trends in healthcare and their influence on physical therapy, administrative procedures utilized in physical therapy, and ethical problem solving. Community

service, citizenship and advocacy will be addressed. The course will include mock quizzes and a timed mock examination in preparation for the NPTE. Students will also develop skills necessary for employment including interview techniques and developing a resume and cover letter. This course requires a grade of C or higher.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
PHT 2704 , PHT 2704L

Public Safety

Correctional Officer (Basic) (CCP)

Admission Program of Study Code CORR State CIP Code 0743010200
Entry into Criminal Justice Certificate Programs requires meeting the standards as established by the Criminal Justice Standards and Training Commission and the Florida Department of Law Enforcement for employment. A copy of these requirements will be furnished by the Public Safety Division at NWF State College.

Emergency Medical Services (AS)

Admission Program Objective Code EMSR State CIP Code 1351090402
This curriculum forms the last stage of a career ladder program progression from Emergency Medical Technician (CCC) (State CIP Code 0351090415) to Paramedic (CCC) (State CIP Code 0351090405) to Emergency Medical Services (AS) degree.
Students interested in pursuing this program must be eligible to receive Florida Bureau of Emergency Medical Services EMT/Paramedic licensure. Contact the Emergency Services/Paramedic program at (850) 729-5378 for more information.

Emergency Medical Technician (CCC)

Admission Program of Study Code EMTN State CIP Code 0351090415
Admission will be through a Limited Access application process. Graduates of this program will be eligible to apply for the examination to become a Florida certified Emergency Medical Technician and a National Registry Emergency Medical Technician Basic. Students interested in pursuing this program should contact the Emergency Medical Services Office at (850) 729-5378. Students who successfully complete this certificate may be eligible to receive credits towards the Emergency Medical Services (AS) degree (State CIP Code 1351090402).

Firefighter I/II (CCP)

Admission Program of Study Code FIRN State CIP Code 0743020304
Entry into the Firefighting Certificate Program requires meeting the standards established by the Florida Division of State Fire Marshal, Bureau of Fire Standards and Training. A copy of these requirements is available through the Public Safety Division of NWF State College.

Law Enforcement Officer (Basic) (CCP)

Admission Program of Study Code LEOB State CIP Code 0743010700
Entry into Criminal Justice Certificate Programs requires meeting the standards as established by the Criminal Justice Standards and Training Commission and the Florida Department of Law Enforcement for employment. A copy of these requirements will be furnished by the Public Safety Division at NWF State College.

Paramedic (CCC)

Admission Program Objective Code EMPM State CIP Code 0351090405
Admission will be through a Limited Access application process. Graduates will be eligible to sit for the Paramedic certification exam. The curriculum forms the core of the Emergency Medical Services (AS) degree (State CIP Code 1351090402). Students may "add on" general education credits and some college credit electives to the Paramedic certificate and earn the A.S. degree. Students interested in pursuing this program should contact the Emergency Medical Services Office (850) 729-5378.

Firefighter/Emergency Medical Technician-Combined (CCP)

Admission Program of Study Code FIEM State CIP Code 0743020313
Basic Skills Requirements: The student must be exempt or attain a 10th grade level on each section of the TABE exam: Math, Language and Reading.
Entry into the Firefighter/Emergency Medical Technician-Combined Program requires meeting the standards established by the Florida Division of State Fire Marshal, Bureau of Fire Standards and Training. A copy of these requirements is available through the Public Safety Division of NWF State College.
Firefighters are trained to extinguish and control fires in response to situations where property, life, or the environment is in danger. At the scene of an emergency, firefighters perform tasks assigned by their commanding officer. Depending on the situation, they may need to provide medical attention, break through debris, operate fire hoses, or enter a burning building. Firefighters are often first responders to car accidents, heart attack scenes, and other medical emergencies that do not involve fire.
Graduates of this program will be eligible to apply for the examinations to become both a Florida Certified Emergency Medical Technician/National Registry Emergency Medical Technician Basic and Florida Fire Standards. This will allow graduates to obtain employment as a firefighter EMT after 2 semesters of training.
The Firefighter/EMT Certificate program is two semester program that consists of Firefighter standards and EMT training.
Applicants to this program must have a high school diploma or GED and meet other applicable admission criteria. If the number of qualified applicants to the program exceeds the number of openings, students will be accepted using a combination of application points . Contact the Emergency Services Office at (850) 729-5378 for additional information.

Emergency Medical Technician (ATD)

Admission Program Objective Code: EMTA
State CIP Code 0351090413
This is an instructional program that prepares students for employment as emergency medical technicians and treat various medical/trauma conditions using appropriate equipment and materials. The program prepares students for certification as EMT's in accordance with Chapter 64J of the Florida Administrative Code. This is the initial level for a career in emergency medical services and the primary prerequisite for paramedic training and certification.
Contact the Public Safety Training Center at (850) 729-5378 for more information.

EMS 0002 - 911 Public Safety Telecommunicator

The purpose of this course is to prepare students for employment as a dispatcher: police, fire, ambulance and meets the standards set by the Florida Department of Health for certification.

Credit Hour(s): 232 Clock Hours When Offered: (Fall, Spring, Summer) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Radiography

Radiography (AS)

Admission Program Objective Code RADT State CIP Code 1351091100
The Radiography program is based on selective admission, subject to additional policies and licensure requirements. The admission criteria and process are subject to change; students should refer to the Selective Program Admissions Radiography (AS) webpage for the most current information. All courses in the Radiography program, including required general education and core courses, must be completed with a minimum grade of "C" to graduate with the AS Degree in Radiography. Graduates are eligible to sit for the ARRT certification exam. For additional information, contact the Health Technology Department at (850) 729-6444.
Please note: In order to be a part of the Radiography program applicant pool, students must declare Radiography as their intended major on the online admissions application.

Sports, Fitness and Recreation Management

Sports, Fitness and Recreation Management (AS)

Admission Program Objective Code SPFR State CIP Code 1731050701

Theatre and Entertainment Technology

Stage Technology (Theater & Entertainment) (CCC)

Admission Program of Study Code STGT State CIP Code 0650050201
Students who successfully complete this certificate may be eligible to receive credits towards one of the following Theatre and Entertainment A.S. degree options:
Theater and Entertainment Technology - Acting Specialization Option (AS) (State CIP Code 1650050202)
Theater and Entertainment Technology - Costuming Specialization Option (AS) (State CIP Code 0650050202)
Theater and Entertainment Technology - Technical Theater Specialization Option (AS) (State CIP Code 0650050202)

Theater and Entertainment Technology - Acting Specialization Option (AS)

Admission Program Objective Code THTA State CIP Code 1650050202
Students who successfully complete selected courses from this program of study may be eligible to receive the college credit certificate in Stage Technology (Theater & Entertainment) (CCC) (State CIP Code 0650050201).

Theater and Entertainment Technology - Costuming Specialization Option (AS)

Admission Program Objective Code THTC State CIP Code 1650050202
Students who successfully complete selected courses from this program of study may be eligible to receive the Stage Technology (Theater & Entertainment) (CCC) certificate (State CIP Code 0650050201).

Theater and Entertainment Technology - Dance Specialization Option (AS)

Admission Program Objective Code THTD State CIP Code 1650050202

Theater and Entertainment Technology - Music Theater Specialization Option (AS)

Admission Program Objective Code THTM State CIP Code 1650050202

Theater and Entertainment Technology - Technical Theater Specialization Option (AS)

Admission Program Objective Code THTT State CIP Code 1650050202
Students who successfully complete selected courses from this program of study may be eligible to receive the Stage Technology (Theater & Entertainment) (CCC) certificate (State CIP Code 0650050201).

Welding

Welding Technology (CCP)

Admission Program of Study Code WELT State CIP Code 0648050805
This program offers a broad foundation of knowledge and skills to prepare students for employment in the welding industry.
Basic Skills Requirements: The student must be exempt or attain a 9th grade level on each section of the TABE exam: Math, Language and Reading.

Welding Technology - Advanced (CCP)

Admission Program of Study Code WELA State CIP Code 0648050806
This program offers a broad foundation of knowledge and skills to prepare students for employment in the welding industry.

A student wishing to be admitted into the Welding Technology – Advanced certificate program at Northwest Florida State College must meet one of the following prerequisites:
Pass a 10 panel drug screening (same requirement for admissions into Welding Technology program) AND one of the following:
Have completed a Welding Technology certificate program at an accredited institution. OR
Possess an AWS certification or a company sponsored weld certification, in plate welding using the SMAW process OR
Demonstrate their abilities by passing a SMAW plate weld test to AWS standards

PMT 0101C - Blueprint Reading For Welders

This course provides students with the understanding and fundamentals of industrial blueprint reading including blueprint symbols, dimensions, joints, fabrication and welding symbols.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college

credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0102C - Introduction to Welding and Industrial Safety

An introduction to the welding skills including safety, measuring, communication, leadership, use of tools, and equipment.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0174C - Introduction to Pipefitting and Pipe Fabrication

This course introduces students the fundimentals of fabrication of pipe systems using tees, flanges and other fittings.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0182C - Weld Inspection Fundamentals

Fundamentals of welder inspection and development of welding procedure specifications in accordance with American Welding Society (A.W.S.) and the American Society of Mechanical Engineers (A.S.M.E.) used to prepare students to pass nationally recognized welder certification tests.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Prereq/Corequisites:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0190C - Emerging Technologies In Welding

This course will provide instruction on emerging techniques in welding, including pulse welding, robotics, submerged welding, adaptive welding and hybrid laser-arc welding. The content emphasizes specific careers and workforce needs in the welding industry.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

Associate in Applied Science Degree (AAS)

Associate in Applied Science Degree (AAS Degree)

The Associate of Applied Science degree is a two-year, non-transfer college credit curricula designed to prepare students for

employment in various technical and semi-professional fields. The A.A.S. degree consists of a minimum of 60 college credits, of which at least 18 are general education courses. Because the A.A.S. degree is not intended for transfer, the selection of general education and technical courses is broader and more flexible than that of the A.S. degree.

Graduation Requirements for A.A.S. Degree

A.A.S. degree students must satisfy the following requirements:
Complete the A.A.S. general education courses as appropriate to the program of study, including Speaking-Across-the-Curriculum, and minimum grade requirements.
Complete at least fifteen credits of the technical core courses and technical elective courses specified in the degree program at NWF State College, unless there is an established articulation agreement.
Complete at least 25% of the credits at NWF State College.
Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued at NWF State College.
Maintain a cumulative grade point average of at least 2.00 for all college credit course work pursued, whether at NWF State College or by transfer.
Complete A.A.S. General Education requirements.
Customizing an A.A.S. Degree to Meet a Specific Career Goal
In order to provide a student with the strongest technical background feasible, some technical courses within a given degree program may be adjusted to meet the student's targeted career goal. In these special cases, course substitutions may be approved upon request of the appropriate department chair to the Dean of Career and Technical Education.

Department: Applied Management

Applied Management (AAS)

Admission Program of Study Code APMG
State CIP Code 0552020107
*This program is available fully online
The A.A.S. degree in Applied Management examines the ways in which management skills are used in a variety of businesses. Students interested in a broad range of technical fields will be able to prepare for leadership roles in the Business Management and Administration professions.

Achievement Award

A student who has successfully completed a given set of skill courses within a particular degree or certificate program may be recognized for his/her mastery of these competencies with a NWFSC Achievement Award. Although the award does not indicate completion of an official, approved program of study, it does verify the student’s proficiency with a specified group of skills. Achievement awards are not noted on the student’s transcript or permanent record; however, the student will receive an NWFSC Achievement Certificate from the Office of Career and Technical Education that may be presented to an employer or agency as a record of this educational milestone. Students are encouraged to keep a copy of these awards as the college cannot guarantee that these can be duplicated.

Course Divisions

Upper Division College Credit Courses

ACG 3083 - Accounting: Concepts and Practice

This course explores the preparation and use of accounting information. Topics include mathematical procedures related to

business decisions; terms and processes associated with the accounting cycle; financial statements for the sole-proprietorship, partnership and corporation; and foundations of managerial accounting. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Upper division standing and ACG 2001 and MAC 2233 are recommended. Knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 3320 - Law and Business

An introduction to the legal setting in which modern business operates; emphasis is on public and regulatory law, basic contract law, the processes of administrative, statutory and common law and interstate commerce issues; includes an overview of the UCC and intellectual property. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 4333 - Contract Formation and Administration

Students will be exposed to the differences in the public and private sector contracting environments. Emphasis will be placed on the fundamentals of contract formation including sealed bidding, negotiations, and best value methods. Students will learn the fundamentals of contract administration including inspection and acceptance, quality control, contract changes, and disputes. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing and BUL 3320 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 4931 - Acquisition Law Seminar

This course addresses contract law as applicable to formation and administration of contracts with private and governmental agencies, with emphasis on the federal government. The following topics are also included: concepts of responsiveness and responsibility, bidding procedures, mistakes, negotiation procedures, changes, claims and dispute resolution. Students will explore the typical contracting problems that can lead to litigation. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing and BUL 4333 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

EDE 4223 - Integrating Art, Music, and Physical Education

This integrative course provides students with critical understanding of art, music, and physical education. Emphasis is placed on the effective integrative lesson planning and modeling techniques to art, music, and physical education in elementary schools. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

EDE 4226C - Integrated Language Arts, Social Science and Literature

This course is designed to prepare candidates to teach language arts and social science in elementary classrooms. Teacher candidates will develop units of study that integrate literature, language arts, with social science content. Emphasis is on constructivist principles and methodology. Teacher candidates will plan and deliver standards-based language arts and social science lessons designed to meet the needs of diverse learners including English language learners (ELLs) and students with exceptionalities. This course requires 18 hours of field experience in a K-6 classroom setting. Current background check (fingerprinting) acceptable to the district in which the field experience will take place is required for this course. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

EDE 4930C - Professional Elementary Educator

This course is designed to prepare the pre-service teacher to transition into the workplace. Includes resume writing, professional dress and demeanor, interview techniques, refining professional portfolio, class discussion of issues common to teacher interns, and review strategies for certification exams. This course requires a grade of "C" or better.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

EDF 3214 - Human Development and Learning

This course is designed to cover the principles of learning and student development with applications to learning/teaching situations. Identification and analysis of students' academic, physical, cognitive, emotional, motivational, and social development is to be emphasized. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

EDF 3430 - Measurement, Evaluation, and Assessment in Education

This course studies the basic principles and methods of measurement, evaluation, and methods of test construction. Students will interpret standardized test scores, construct teacher-made tests and other classroom assessments, and evaluate portfolio and performance assessment. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

EDF 3910A - Projects in Teacher Education

Directed study and individual projects designed to meet the needs of Teacher Education students completing an artifact required in the B.S.E. program. This course requires a grade of "C" or better.

Credit Hour(s): 1-4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Upper division standing with permission of department Chair

EDF 3910P - Projects in Teacher Education – Field Placement

Directed study and individual projects designed to meet the needs of Teacher Education students completing field experience in the B.S.E. program. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 1-4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Upper division standing with permission of department Chair

EDG 3343 - Instructional Strategies

This course provides an overview of instructional models and strategies. Emphasis is placed on principles of state standards, instructional methods, and lesson planning and instruction. Students will develop knowledge of instructional models and lesson plan construction for effective implementation including the diverse student populations. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C

EDG 3410 - Classroom Management, School Safety, Law, and Ethics

Practicing teachers are provided strategies for managing a safe, stimulating learning environment for all learners. This course emphasizes school safety, law, and ethics as they apply to schools, districts, and the learning environment. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better. This course is restricted to practicing teachers.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Online Only Prerequisite(s):
upper division standing.

EDG 3410C - Classroom Management, School Safety, Law, and Ethics

Pre-service teachers are provided strategies for managing a safe, stimulating learning environment for all learners. This course emphasizes school safety, law, and ethics as they apply to schools, districts, and the learning environment. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

EDG 4940 - Internship

Supervised teaching in a public or private school. Student teaching assignments will be made by the department of teacher education field placement coordinator. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 9 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing with permission of department chair.
EDE 4223 , EDE 4226C , EDF 3214 , EDF 3430 , EDG 3410C , EDG 3343 , EEX 3070 , LAE 4343C , MAE 3350C , RED 3309C , RED 3511C , RED 4312 , RED 4519C , SCE 3350C , TSL 3081C , TSL 4140C

EEC 3213 - Teaching the Language Arts In Early Childhood Education

The focus of this course will be on the development of language and literacy in children ages birth through age four. Emphasis will be placed on understanding the process of emergent literacy including vocabulary and language, phonological awareness, print knowledge and comprehension; and on designing a developmentally appropriate language arts program in relation to the early learning and developmental standards. This course will require observing and participating in an early childhood classroom.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

EEC 3227 - Art, Music, and Movement

The focus of this course will be on developing an understanding of the creative developmental process in the life of children from birth through four years old. Emphasis will be placed on the teacher's role in developing opportunities and materials for young

children to express themselves creatively through music, drama, dance and two- and three-dimensional art and on providing varied opportunities for young children to gain an appreciation of art, music, drama, and dance in ways that reflect cultural diversity in relation to the early learning and developmental standards. This course will require observing and participating in an early childhood classroom.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEC 3320 - Principles and Methods for Teaching Early Childhood Social Studies

This course is designed to prepare students to teach social studies In the early childhood classroom. Emphasis is on implementing the project approach to investigate components of social studies to include: individual development and identity; people, places, and environments, technology and our world; and civic ideals and practices. The student will increase and apply knowledge and skills in the Florida Early Learning and Developmental Standards relevant to this content area.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEC 3511 - Curriculum for Infants and Toddlers

The focus of this course will be on the design, implementation and evaluation of programming and curriculum that promotes growth and development of young children birth to three years old and aligns with the early learning and developmental standards. Study of typical and atypical development will be included. Emphasis will be on working effectively with families of infants and toddlers.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEC 3524 - Professionalism/Program Development

Focus of this course will be on management and leadership in early childhood education programs. Topics will include mentoring adults, professional development, staff assessment, program evaluation, and child advocacy. Career options in the field of early childhood education will be explored. This course will require observing and participating in a program or agency related to early childhood education.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

EEC 4404 - Families and Diversity

This course will focus on building positive relationships with families through communication and involvement. Focus will include developing an awareness of diversity and multicultural considerations in working with families of young children. The course will explore the role of the family and the influence of the community on the development of young children in a diverse society; and will prepare the student to work effectively with families and communities.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEC 4421 - Teaching Math and Science in Early Childhood Education

The focus of this course will be on developing an understanding of how concepts, skills and attitudes in early childhood mathematics and science are developed in young children ages birth through age four. Math topics will include number sense and operations, patterns, geometry, and measurement. Science topics will include scientific inquiry, physical science, life science and earth science. Emphasis will be on the alignment of the Early Learning and Developmental Standards with a developmentally appropriate approach to teaching math and science in the early childhood classroom. This course will require observing and participating in an early childhood classroom.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

EEC 4613 - Systematic Observation and Assessment

The focus of this course will be on understanding the purpose of child assessment, implementing developmentally appropriate practices in formal and informal child assessment, and using assessment results to support learning, to identify special needs, to evaluate programs, and to respond to program accountability requirements. A field experience is required to practice various methods of assessment in an early childhood setting.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EEX 3070 - Methods of Inclusion and Collaboration

This course examines the basic identification techniques and strategies used to promote academic and social integration and interaction of "mainstreamed" exceptional students. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

EEX 4201 - Young Children with Special Needs

The focus of this course will be on working with young children birth through age four in an inclusive early childhood classroom. Emphasis will be on identifying typical and atypical development, creating an inclusive early childhood learning environment, understanding special education law, developing an awareness of resources for inclusive practice to meet the needs of young children and their families.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

EME 3410 - Integrating Technology in the Classroom

In this course, students will learn specific methods to design a technology-rich classroom for the 21st Century Learner. Students will explore models of technology integration, within math and science curricula, apps for classroom management, and technology tools for assistive/differentiated instruction. Students will learn how to perform administrative tasks more efficiently using cloud/web-based apps. Students will create technology-based products for the classroom utilizing learning management systems and applications. Individualization will allow each student to select and develop materials in their disciplines. The course requires a minimum grade of a "C."."

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3343 and EDG 3410C

ENV 4610 - Sustainable Logistics

This course introduces students to current and future trends in logistics technology, policy and sustainability. Topics include, source sustainability, environmental impacts of existing and emerging technologies, and local environmental conditions and the global climate.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

ETI 4205 - Applied Logistics

Introduction to logistics. Emphasis on practical applications. Includes systems engineering, cost/ systems effectiveness, reliability, maintainability, system functional analysis, logistic support analysis, life cycle cost analysis.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

EVR 3949 - Extended Internship, Environmental Science

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Minimum Grade of "B" in any college-level science course and permission of instructor.

FIN 4402 - Financial and Economic Management

This course addresses the application of contemporary theory and practice in business resource allocation. Topics include: capital budgeting, equity and capital financing, capital management, analysis of financial statements, pricing theory, management of working capital and other topics relevant to the acquisition, financing and management of business assets and business decision making. Both the economic and financial perspectives will be presented. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Upper division standing and ACG 3083 are required. ECO 2013 , STA 2023 , and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3031 - Contemporary Business Practices

This course includes an orientation to and examination of opportunities and challenges facing managers in contemporary business organizations. Introduces the competencies of teamwork, communication, creative thinking, adapting to change, decision making and customer service through application to issues and problems across the general business spectrum. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3213 - Business and Administrative Communication

A comprehensive course in effective and efficient communications in the business world; includes preparation of reports, proposals and presentations, technical writing skills, composition of standard business documents including persuasive messages, sales letters, customer service correspondence, instructional memoranda, and policy and procedure development. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing and ENC 1101 or departmental permission are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3434 - Ethics for Business Leaders

This course uses a case study approach to focus on the significant ethical and legal issues facing today's business leaders. The theoretical and philosophical background will be presented along with real-life examples of ethics in the workplace. Cases and readings will be used to develop both analysis and application skills in the following areas: corporate and personal decision making, organizational culture and reputation, social responsibility and social reporting, customer relations, employee relations, financial reporting, technology, privacy/confidentiality and communications. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3444 - Business Trends and Issues

This course builds on the traditional themes and concepts of the general business area through specialized readings on trends and issues facing today's business and industry leaders. Students will read opinion pieces by noted in-field experts, as well as conduct basic research on contemporary issues such as information and workplace security, diversity in the workplace, outsourcing functions/services and global competition, with an eye to improving business operations. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3930 - Business Project and Acquisitions Terms and Concepts

Students will apply specialized terminology of project and acquisitions management in various communication venues including short written documents and summary analyses. Emphasis will be placed upon the latest terms, abbreviations and jargon applicable to the field. Students will research selected terms and concepts in various contemporary periodicals and publications.

Credit Hour(s): 1 Credit Hour When Offered: (Fall) Prerequisite(s):
upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 3933 - Business Research

This seminar-style course, offered in group or individual format, provides an introduction to various references, databases, periodicals, journals and other publications essential to the research of contemporary business issues; also included are methods of accessing resources via the Internet, designing search strategies, citing Internet resources and evaluating research materials.

Credit Hour(s): 1 Credit Hour When Offered: (Fall) Prerequisite(s):
upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4454 - Business in a High Technology Environment

Presents the special challenges and opportunities of managing a high technology firm or a traditional entity operating in the high technology environment; addresses software/information security, recruiting technical personnel, outsourcing, equipment security, updating equipment, telecommuting and similar issues. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
upper division standing and GEB 3031 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4930 - Special Topics: Project Management

An individual or group course designed to provide students with the opportunity to pursue a special topic(s) in depth; may be repeated as topics change.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4933 - Special Topics: Management

An individual or group course designed to provide students with the opportunity to pursue a special topic(s) in depth; may be repeated as topics change.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4934 - Special Topics: Business Administration

An individual or group course designed to provide students with the opportunity to pursue a special topic(s) from the area of business administration in depth; may be repeated as topics change.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 4941 - Internship: Business

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing and permission of the instructor are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 3110 - Health Care Organization and Management

This course focuses on the structure and management of health care organizations, and the fundamental issues facing the U.S. health care system. Key topics include health status, the organization of health services, manpower, public health, financing, facilities, utilization, quality, regulation, and national health policy. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):
Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 3111 - Introduction to Health Care Management

This course studies the administration, organization and delivery of health care in the United States. Topics to be examined include health care leadership, management, strategy, performance improvement, information technology, insurance, financial and human resources management, as well as ethical and legal concepts. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 3113 - Contemporary Issues in Health Care

This course is designed to introduce students to a range of issues related to health and health care in the United States. Course content will give students the opportunity to explore differing perspectives as they develop a deeper understanding of the issues and enhance their research and communication skills. The course will enable students to analyze and evaluate evidence regarding controversial issues. Students will develop and practice skills in formulating and writing well-informed, well-articulated arguments and reflections.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed) Prerequisite(s):
upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 4191 - Health Information Systems

This course focuses on the theories, concepts and principles of health information systems and development of critical thinking skills for use in practice/working in health care informatics. Current trends and issues in using, designing, and managing heath care

information systems will be examined. Students, applying evidence-based knowledge, will analyze the design and implementation of health care information systems. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and knowledge of basic computer and keyboarding skills are strongly recommended.

HSA 4922 - Capstone: Health Care Management

This course integrates the information, skills, and abilities provided throughout the Health Administration Program in a capstone project. Students complete a project that demonstrates excellence by applying the knowledge gained from the core courses and materials studied throughout the program. Successful completion of the course requires demonstration of the achievement of program objectives and learning outcomes. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

HSA 3110 , HSA 3111 , HSA 4191 , and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

HUS 4950 - Capstone: Human Resources Management

This capstone will build upon and integrate the primary human resource management skills introduced in prior emphasis courses. Students will have the opportunity to work on a hands-on project to demonstrate, apply, and develop their knowledge in the field of human resources.
This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

MAN 3310 , MAN 3320 , MAN 3350 , and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

ISC 4145 - Environmental Systems

Environmental Systems will expose students to a broad overview of the structure and processes occurring on Earth. Students will gain a broad understanding of the interactions between the atmosphere, biosphere, lithosphere, and hydrosphere. Course topics will be related to current environmental issues and our local ecosystems. This course is focused on Earth System Science content with development of methods specific to teaching middle school science as a secondary objective.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

(1) any two-course laboratory sequence in the natural sciences (i.e., Principles of Biology I & II, Principles of Geology I & II, College Chemistry I & II, Physics I & II, College Physics I & II, Anatomy & Physiology I & II); (2) any GLY course; (3) and either CHM1020 (Chemical Science) or PHY1020 (Physical Science).

ISM 3220 - Network Technologies for Information Professionals

This course is designed to give the student an understanding of the various networking technologies and their practical application in the management of a business. The course also covers the technical issues involved in designing and implementing an efficient network for voice, data, and information networks. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and at least two information technology or computer science courses at a college or university level.

ISM 3232 - Software Essentials

This course covers a broad range of software topics as they apply to software management and systems analysis and design. Topics include, but are not limited to programming, the systems development life cycle (SDLC), systems management, interface design and Internet technology. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Upper division standing and at least two information technology or computer science courses at a college or university level. Knowledge of basic computer and keyboarding skills are strongly recommended.

ISM 3323 - Applications in Information Security

This course helps develop the important security concepts relative to software application development and access control that provide the knowledge and skills necessary for the successful management of information security in an organization. Students will understand the environment where software is designed and developed as well as the critical role software plays in providing security to an organization's information systems. The course focuses on software development concepts that relate to security, and how access control methodologies fit into the entire enterprise architecture. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing and at least two information technology or computer science courses at a college or university level. Knowledge of basic computer and keyboarding skills are strongly recommended.

ISM 4011 - Information Systems Management

This course provides a study of the language, concepts, structures, and processes involved in management of information systems, including the fundamentals of computer-based technology and the use of business-based software for support of managerial decisions. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing and at least two information technology or computer science courses at a college or university level.

LAE 4343C - Writing Across the Curriculum

This course prepares pre-service teachers by developing an understanding of the foundations of writing through the use of writers workshops and instructional strategies necessary to provide adequate instruction to emergent, novice, and transitional writers. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAD 3107 - Applied Discrete Mathematics

This course builds on the foundation established in Introduction to Discrete Mathematics with further exploration in logic, mathematical reasoning, and mathematical proof writing. Topics include logic, set theory, boolean algebra, combinatorics, and graph theory with applications.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Completion of MAC 2312 with a grade of “C” or better or concurrent enrollment in MAC 2312 .

MAE 3350C - Principles and Methods for Teaching Mathematics K-6

In this course, students will apply knowledge of teaching strategies, methods and materials for teaching mathematics in grades K-6. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAE 4312C - How Children Learn Math

This course is designed to develop the skills and concepts necessary to deliver the mathematics curriculum effectively in the

classroom. The content strongly reflects the curriculum emphases of the National Council of Teacher of Mathematics, and topics are presented using a process-oriented approach. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAE 4930C - Professional Math Educator

This course is designed to prepare the pre-service teacher to transition into the workplace, and includes resume writing, professional dress and demeanor, interview techniques, refining professional portfolio, class discussion of issues common to teacher interns in mathematics, and review strategies for certification exams. This course requires a grade of "C" or better.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAE 4940C - Teaching Methods in Middle Grades Math Field Experience

In this course, students will apply knowledge of teaching strategies, methods and materials for teaching mathematics in a middle school classroom. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

MAE 4945 - Internship - Middle Grades Math

Supervised teaching of Middle Grades Math in an assigned school. Student teaching assignments will be made by the Department of Teacher Education Field Placement Coordinator. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 9 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Upper division standing with permission of department chair.
EDF 3214 , EDF 3430 , EDG 3410C , EDG 3343 , EEX 3070 , EME 3410 , MAC 2312 , MAD 3107 , MAE 3350C , MAE 4312C , MAE 4940C , MHF 4404 , MTG 2206 , RED 3324C , RED 3335C , STA 2023 , and TSL 3081C

MAN 3052 - Management Philosophy and Practice

A comprehensive study of contrasting philosophies of management, current theories of leadership, management and supervision, as well as current trends and issues for business managers; focuses on applications and cases for development of competencies across all business functions and units; emphasis is placed on the cross-functional aspects of management, as well as the manager's need for a general business perspective. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing is required. Concurrent or prior enrollment in GEB 3031 and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3120 - Leadership and Group Dynamics

An applied leadership course with a focus on case studies, projects and group interaction; includes theoretical background on

group dynamics, small group behavior and motivation, power, types of groups, verbal and non-verbal communication skills and team-building. Emphasis will be placed on sociological and psychological dimensions of inter-group relations, including analysis and problem-solving through simulations, cases and similar activities which reflect a general business perspective, as well as leadership and group dynamics across a variety of business units/functions. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing is required. Concurrent or prior enrollment in GEB 3031 and MAN 3052 , and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3240 - Organizational Behavior

Designed to develop student understanding of individual, group and organizational issues that affect and shape businesses. Topics include motivation, communication, decision making, leadership, power, organizational structure, team performance, organization diversity and change management. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3310 - Issues in Human Resource Management

Introduces the full range of human resource management functional areas, including recruiting and hiring staff, performance evaluations, employment regulations, discipline and termination, downsizing, compensation and benefits, job analysis, the organized labor setting, equity/diversity issues, and policy design. Approach will focus on current issues and applications. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3320 - Employee Staffing and Benefits

An intermediate level course in employment staffing issues focusing on staffing patterns, organizational structures, job analysis and design, staffing efficiencies, employee assistance programs, staff projection models, and employee services. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Upper division standing and MAN 3310 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3350 - Training and Development

Covers various staff training and development models, effective workshop techniques, designing and implementing company-wide training and development programs. Assessment of training needs, training and development as a benefit and setting development goals; students will design and conduct at least one workshop/training session for fellow students. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing and GEB 3213 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3505 - Production Operations and Logistics Management

This course examines the integration of production operations and logistics management and how this enables an organization to compete successfully in business. Special emphasis is placed on the relationships that exist between operations and the supply chain to include operations and supply chain strategies, business processes, project management, product design and development, and inventory management.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3574 - Acquisition Management

Students will be exposed to the fundamentals of government acquisitions. This course provides conceptual material on government acquisitions, to include program planning, execution, and control. Students will be introduced to the elements of program risk and learn risk management techniques. The systems engineering process will be emphasized to include work breakdown structures, cost -- benefit analysis, and scheduling. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing and GEB 3031 or MAN 3052 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3583 - Project Management

In this introductory Project Management course, students will be exposed to the fundamentals of general project management. This course provides conceptual material on project management techniques appropriate in system/subsystems management. Topics include project management functions, project manager roles and responsibilities, the project life cycle, and conflict resolution. Emphasis will be placed on project oversight issues across the various business units and functions. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing and GEB 3031 or MAN 3052 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3593 - Logistics and Supply Chain Management

Logistics and Supply Chain Management provides an introduction to logistics concepts in both the business and government environment. The student will gain an appreciation of the various logistics missions encountered both in the business world and government acquisition and support programs. The key concept is that logistics is a process that adds value to the end product whether it is a commercial item for a customer or a system used by the government which must achieve a desired state of readiness through an established or acquired infrastructure. Emphasis will be placed on the challenges related to providing logistical support for procurement, manufacturing, and life cycle support. The course will focus on supply chain strategies, logistics information systems, order fulfillment, inventory, demand forecasting, and collaborative planning. In addition, the student will be introduced to transportation constraints, third party logistics (3PL), warehousing, materials handling, international logistics and facility planning. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing and MAN 3052 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3610 - Global Logistics Management

Examines selected industrial relations systems of Western Europe, Asia and the Americas, with special emphasis on differences among systems and the reasons such differences exist. The industrial relations significance of the multinational enterprise and management problems associated with operations in diverse systems are analyzed.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Upper division standing and MAN 3593 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3786 - Sustainable Enterprise Planning

This course introduces students to assessment tools, design and construction considerations, and operating planning requirements for sustainable enterprises. Students will learn about the ecological and economic benefits of sustainability/green practices. Additionally, they will learn how product, process, and service decisions affect sustainable enterprise concepts. Today's enterprises focus on social and environmental challenges, marketing, supply chain decisions, recycling, reusing, reconditioning, and other product and service decisions in order to realize a competitive advantage. This course will focus on best practices, case studies,

evolving trends, and experimental efforts regarding sustainable/green systems.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 3903 - Operations Research

Operations Research is a science of modeling and optimization. It allows to model real-world problems by using mathematics, statistics and computers. It provides us the tools and theories to solve real-world problems by finding the optimal solutions to models subject to constraints of time, labor, resource, materials and business rules. With Operations Research, people make intelligent decisions to develop and manage their processes and businesses. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing is required. STA 2023 , MAC 1140 , and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4162 - Customer Relations for Managers

This course focuses on relationship building for all customers of an organization. The impact of culture and diversity on business relationships, successful negotiation strategies, and promotion of the organization through media relations are discussed. Emphasis is placed on the manager's role in improving customer relationships by creating a customer-focused, organizational climate.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4401 - Labor Relations

This course explores the impact of employee organizations on labor relations, current problems, conflicts and trends and includes the development of managerial approaches to achieve labor management cooperation.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4520 - Quality Management

This course examines the strategic role of quality within an organization, as well as strategic issues involved in managing quality. Topics include assessing customer requirements, developing customer focus and measuring quality performance. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (As Needed) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4555 - Quality Certification: ISO 9000

A comprehensive study of internationally uniform quality standards (ISO 9000 and the steps to individual and organizational certification; includes management responsibility, quality system documentation, contract review, design control, process control, inspection and testing, corrective actions and other certification topics. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (As Needed) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4570 - Purchasing and Materials Management

The management of purchasing and the materials for production processes. Cost/price analysis, computer systems, forecasting, materials requirements, negotiations, and contracting are included.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4594 - Reverse Logistics

In this course forward-moving logistics is compared to reverse-moving logistics. Both goods and information are discussed. Topics include federal and state regulations, waste management, recycled materials, technology, financial controls, stakeholders, and performance measurement.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4595 - Logistics Technology

This course provides an overview of the use of technology (bar codes, gps, and radio frequency identification tags) in logistics to control recalls, returns, recycling, and waste management. Management functions, data synchronization, and interrelationships between different technologies to capture data regarding products moving in a logistics system are also discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4720 - Strategic Planning and Management

This course addresses the integration of organizational functions to achieve competitive advantage and organizational harmony through strategy formulation, implementation and evaluation. Activities include case studies and a strategic planning simulation. Topics include change theory, decision-making, planning models, and strategic planning processes as applied in a variety of business settings, units, and functions. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4930 - Capstone: Acquisition Management

In this seminar, students will have the opportunity to participate in hands-on projects applying the techniques in Acquisition Management. Emphasis will be on government acquisition management. Students will create a work-breakdown structure, a project schedule, and perform a cost-benefit analysis of alternatives. Earned value management will be introduced as a method of program control. Students will also identify potential risk areas and suggest mitigation plans. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
BUL 4333 , BUL 4931 , MAN 3574 and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4931 - Capstone: Project Management

This seminar will build on the basic project management skills by introducing the basic tools used by project managers. The student will learn management techniques for project planning, budgeting, scheduling and control techniques, cost estimating and project management software applications. Students will be exposed to the relationship of purchasing and contracting with project management. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Project Management Emphasis: BUL 4333 , GEB 4454 , MAN 3120 , MAN 3583 , and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.
Quality Improvement Emphasis: MAN 3583 , MAN 3593 , MAN 4520 , MAN 4555 , and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 4940 - Capstone: Supervision

This capstone course will build upon and integrate the primary management skills and concepts introduced in prior emphasis courses. Students will have the opportunity to work on a hands-on project to demonstrate, apply, and develop their knowledge. This course will also cover basic entrepreneurial principles, which will be integrated throughout the student-led projects. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
MAN 3593 , MAN 3903 , MAN 4720 , and senior standing are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MAR 4333 - Marketing Strategy

This upper-level marketing course is aimed at the marketing functions of a business, with emphasis on how strategies are developed and how the marketing mix is created to meet the wants and needs of consumers. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing required and knowledge of basic computer and keyboarding skills are strongly recommended.

MHF 4404 - History of Mathematics

This course is for students pursuing an education degree with an emphasis in middle school and secondary mathematics. This course covers the evolution of mathematics from early number systems through modern mathematics. If used to meet NWFSC Teacher Education program requirements, this course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Completion of MAC 2311 with a grade of "C" or better or concurrent enrollment in MAC 2311 .

MSL 3201 - Adaptive Team Leadership

Examines skills that underlie effective problem solving, analyze military missions and plan military operations, execute squad battle drills.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 3202 - Leadership in Changing Environments

Probes leader responsibilities that foster an ethical command climate, develop cadet leadership competencies, and apply principles and techniques of effective written and oral communication.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 3203 - The Joint Environment

Provides an introduction to the joint military environment. The course provides an overview of the development of national and regional policy through the national Security Council and national security system.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 4301 - Developing Adaptive Leaders

Discuss staff organization, functions, and processes, analyze counseling responsibilities and methods, and apply leadership and

problem solving principles to a complex case study/simulation.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

MSL 4302 - Leadership in a Complex World

Capstone course to explore topics relevant to second lieutenants entering the army, describe legal aspects of decision making and leadership, analyze army organization from tactical to strategic level.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

NSP 3640 - Nursing Care of Military and Veteran Populations

This course is designed to identify the unique healthcare needs of military and veteran populations in the United States in order to prepare students and practicing nurses to develop competence in designing nursing interventions within civilian and government agencies in which military members and veterans seek healthcare. In accordance with the ANA's pledge (2012) to raise awareness of the unique conditions and needs of military veterans and their families, this course supports the Joining Forces initiative to further nursing training to include specialized topics such as traumatic brain injury, posttraumatic stress disorder, trauma rehabilitation, and understanding the military and veteran's healthcare delivery system.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
RN LICENSURE

NSP 4275 - Introduction to Critical Care Nursing

This course examines the needs of the critically ill client. As part of the human experience, the integrity of the individual and family may be disrupted by a critical illness. During such time, the critical care nurse assists the individual and family to restore life processes to a state of dynamic equilibrium. This course emphasizes the involvement through use of scientific rationale and application of the nursing process in providing care to the individual client and family. Critical care concepts and skills for promoting client and family well-being are stressed.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
RN LICENSURE

NUR 3067C - Health Assessment

This course is designed to develop the student's knowledge for obtaining and recording a systematic, comprehensive health history, psychosocial assessment, and physical examination of the adult. The course involves the synthesis of nursing, biologic, psychologic, and sociocultural knowledge and theories as they apply to the findings obtained in the comprehensive health assessment of clients of various ages. During the experiential learning component, emphasis will be placed on collection of a database through physical assessment, history taking and interviewing.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Admission to the BSN program, clear background check and drug screen, and documented completion of required immunizations and CPR.

NUR 3071 - Writing for Success in Nursing

This course is designed to develop the student's knowledge for writing at the upper division nursing level. The course includes information regarding use of APA format and scholarly writing resources.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
Student must be a Registered Nurse to take this course.

NUR 3080 - Dimensions of Baccalaureate Nursing Practice

This course will provide Registered Nurses, who are returning to school to earn a Baccalaureate degree, an opportunity to advance

professional practice concepts. As designed, the course engages the student intellectually in an ongoing professional dialogue and journey with peers, colleagues, and instructors that serves to broaden the student's professional development and builds on preexisting knowledge and experiences. The course curriculum is written for adult learners with the characteristics of self-direction, prior experience, applicability to practice, and motivation to meet the challenge to expand their knowledge base and to utilize advanced critical thinking skills.

Credit Hour(s): 3 Credit Hours When Offered: (All) Prerequisite(s):
Admission to the BSN program and meets all enrollment conditions.

NUR 3826 - Nursing Ethics

This course provides an in-depth exploration of ethical principles and moral reasoning as the foundation of nursing practice. The ANA Code of Ethics will be used as a framework for examining current issues in healthcare delivery across the age span from reproductive issues to end-of-life care.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Must be an RN or ASN student.

NUR 3837 - Health Care Issues

This course provides a forum for the exploration and evaluation of concerns germane to contemporary nursing. The focus of this course is on the nursing profession and current major issues and problems that concern it. Social forces influencing changes in the nursing profession are analyzed in terms of historical antecedents and their current manifestations. Recently passed, and pending legislature at both the national and state levels is emphasized.

Credit Hour(s): 2 Credit Hours When Offered: (All) Prerequisite(s):
CURRENT RN LICENSURE. ADMISSION TO THE BSN PROGRAM AND ALL ENROLLMENT CONDITIONS MET.

NUR 3955 - Portfolio I

This course will provide RN to BSN students an opportunity to develop an electronic professional portfolio to express one's professional nursing expertise and proficiency

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Summer) Prerequisite(s):
Admission to the BSN program and meets all enrollment conditions.

NUR 4125 - Clinical Pathophysiology

This course examines in detail the underlying process involved in the development, evolution, manifestations, and complications of common clinical diseases across the life span, and compares normal and abnormal states. The biological bases for therapeutic clinical actions are examined.

Credit Hour(s): 3 Credit Hours When Offered: (All) Prerequisite(s):
NUR 3067C

NUR 4165 - Evidence-Based Practice: Incorporating Nursing Research

This course examines in detail the underlying process involved in the development, evolution, manifestations, and complications of common clinical diseases across the life span, and compares normal and abnormal states. The biological bases for therapeutic clinical actions are examined.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
STA 2023 .

NUR 4615C - Family and Community Health Nursing

The Family and Community Health Nursing course is designed to facilitate the conceptualizing of family, population groups, and community as units of care from diverse cultures, ethnic, and social backgrounds. The student is provided an experiential learning component to assess the health needs of selected families and groups in the community setting with selected health promotion,

risk reduction, and disease prevention. The nursing process is used to examine multiple influences impacting life-course experiences of families and communities to enhance functioning.

Credit Hour(s): 5 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
NUR 3067C , NUR 3080 , admission to the BSN program, completion of all General Education requirements, and continued compliance with drug screening, immunization, and CPR requirements.

NUR 4827C - Nursing Leadership and Management

This course provides students with an evidence-based study of leadership, collaboration, and coordination in healthcare settings. Students develop an evidence based paper to deal with key leadership and management issues related to professional goals. The nursing leadership and management experiential learning component focuses on the roles and functions of the professional nurse in these roles. Issues associated with healthcare delivery are explored. The experiential learning component provides an opportunity to plan, implement and evaluate a change in the practice of nursing.

Credit Hour(s): 5 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):
NUR 3080 ,NUR 4165 , NUR 3067C , NUR 4615C , and continued compliance with drug screening, immunization, and CPR requirements.

NUR 4956 - Portfolio II

This course will provide students an opportunity to complete and evaluate their electronic professional portfolio to express their professional nursing expertise and proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Summer) Prerequisite(s):
NUR 3955 ; NUR 3080

Corequisite(s):
NUR 4827C

PAD 3003 - Public Service Operations

An introduction to public administration and policy in America. This course is designed to provide undergraduate students a basic understanding and appreciation of the administration of the public sector. It is intended to provide an overview of public administration for students interested in public service and for students, who as good citizens, want an appreciation of the complexities of public management.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
upper division standing.

PAD 3882 - Issues in Public Service Administration

This course focuses on current issues and trends in the field of public service administration. The course is structured to introduce management and administrative topics in public service, examine the implications to the field, and reformulate recommendations. This course will begin developing skills in project design and presentation. This course will enhance critical thinking skills.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
upper division standing.

PAD 4878 - Capstone: Public Service

This course provides an opportunity for the student to complete a professional project and apply information and skills studied in core and concentration program courses under the direction of the professor. Successful completion of the course requires demonstration of achievement of the program's learning outcomes. This course should be completed in the last term before graduation.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
upper division standing.

QMB 3250 - Quantitative Methods for Business Decisions

An examination of the quantitative methods, statistical concepts, and procedures used in business and finance including methods of maximization and minimization objective functions, the analysis and use of statistic methods for planning, decision making, and forecasting. This course requires a minimum grade of "C".

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Upper division standing is required and knowledge of basic computer and keyboarding skills are strongly recommended.

RED 3309C - Early and Emergent Literacy K-2

This course is designed to increase the understanding of early literacy development and the conditions which promote total literacy from birth through lower elementary grades. Language theory and current research are used to shape informed practices regarding literacy development. Connections are made among all aspects of literacy learning: reading, writing, listening, speaking and attitude development. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

RED 3324C - Teaching in the Middle Grades Curriculum

This course presents theory and methodology for teaching reading at the middle school level with emphasis on strategies for vocabulary and comprehension, evaluating student progress in reading, and integrating reading and study skills into content area instruction across the middle school curriculum. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

RED 3335C - Teaching Reading in the Content Areas

This course addresses strategies, materials, and skills for teaching reading in content areas. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
RED 3324C and upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

RED 3511 - Intermediate Literacy 3-6: Reading and Thinking

This course combines the theory and practice in the teaching of reading/ literacy in the elementary intermediate grades. Procedures for meeting individual differences, differentiated instruction, selected use of materials, and classroom organizations will be examined. This course requires a minimum grade of "C" or better and is restricted to practicing teachers.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
RED 3309C and upper division standing

Prereq/Corequisites:
EDG 3410C , EDG 3343

RED 3511C - Intermediate Literacy 3-6: Reading and Thinking

This course combines the theory and practice in the teaching of reading/literacy in the elementary intermediate grades. Procedures for meeting individual differences, differentiated instruction, selected use of materials, and classroom organizations will be examined. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
RED 3309C and upperdivision standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

RED 4312 - Integration of Assessment into Classroom Reading

This course introduces formal and informal methods and materials used to identify reading strengths and weaknesses of students. Emphasis is placed on integrating assessments into the curriculum to strengthen instructional strategies and student success. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
RED 3309C , RED 3511C and upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

RED 4519C - Diagnostic and Instructional Interventions in Reading

This course introduces formal and informal methods and materials used to identify reading strengths and weaknesses of students. Emphasis is placed on diagnosis of reading problems, administration of assessments, evaluation of results and planning instructional interventions to remediate reading difficulties. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
RED 3309C , RED 3511C and upperdivision standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

RED 4854C - Reading Field Experience

This course provides application of knowledge of reading development to reading instruction. Emphasis is placed on increased reading proficiency for struggling students, including students with disabilities and students from diverse populations. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
RED 3309C , RED 3511C , RED 4312 , RED 4519C , upper division standing with permission of department chair

SCE 3350C - Principles and Methods for Teaching Science K-6

This course provides techniques, methods and materials of instruction for teaching science in grades K-6. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:

EDG 3410C and EDG 3343

SCE 4930C - Professional Science Educator

This course is designed to prepare the pre-service teacher to transition into the workplace, and includes resume writing, professional dress and demeanor, interview techniques, refining professional portfolio, class discussion of issues common to teacher interns in science, and review strategies for certification exams. This course requires a grade of "C" or better.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

SCE 4940C - Teaching Methods in Middle Grades Science Field Experience

In this course, students will apply knowledge of teaching strategies, methods and materials for teaching science in a middle school classroom. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

SCE 4945 - Internship - Middle Grades Science

Supervised teaching of Middle Grades Science in an assigned school. Student teaching assignments will be made by the Department of Teacher Education Field Placement Coordinator. This course requires a minimum grade of "C". Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 9 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Upper division standing with permission of department chair.
EDF 3214 , EDF 3430 , EDG 3343 , EDG 3410C , EME 3410 , EEX 3070 , ESC 1000 , EVR 3949 , ISC 4145 , MET 1010C , RED 3324C , RED 3335C , SCE 3350C , SCE 4940C , TSL 3081C , and CHM 1020 or PHY 1020

SPN 3036 - Spanish for Health Care Providers

Spanish for Health Care Providers is designed for individuals majoring in nursing or working in health-related areas. The course focuses on vocabulary needed for the healthcare workplace, with grammar taught as a task-based practical skill. Students will learn phrases used to complete health assessments which include conducting interviews, filling out forms, writing reports, and reading and understanding medical articles and brochures. Prevalent disease processes will be discussed as well as cultural practices that affect health care, specifically the health care of Spanish-speaking patients. This course does not fulfill any part of the Florida state language requirements.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

TRA 3132 - Procurement Management

Purchasing is required by all types of goods-producing & service-providing organizations in such sectors as manufacturing, agriculture, health care, & government. This professional business function tries to buy the right good or service at the right quality, in the right quantity, at the right time, at the right price, from the right source, with delivery at the right place.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

TRA 4203 - Principles of Logistics

Overview of logistics function within a firm and in the context of integrated vertical systems. Topics include customer service, information flow, inventory control, materials management, order processing, packaging, physical distribution.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Upper division standing is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

TSL 3081 - TESOL Issues and Practices

This course is designed to integrate the theories and principles of the Teaching of English to Speakers of Other Languages and applying them to classroom instruction. ESOL methodology and curriculum will be emphasized as they relate to current best practice in ESOL instruction. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a minimum grade of "C." Neither field experience or a background check/fingerprinting are required for current teachers enrolled in this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Upper division standing

Prereq/Corequisites:
EDG 3410C , EDG 3343

TSL 3081C - TESOL Issues and Practice

This course is designed to integrate the theories and principles of the Teaching of English to Speakers of Other Languages and applying them to classroom instruction. ESOL methodology and curriculum will be emphasized as they relate to current best practice in ESOL instruction. The student will increase and apply knowledge and skills in the Uniform Core Curriculum relevant to this content area. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

TSL 4140C - ESOL Methods, Curriculum and Assessment

This course is designed to build on the candidate's knowledge of applied linguistics and cross cultural communication. Candidates will extend their understanding of the role of language and culture in the classroom. This course will prepare candidates for effective planning, instruction, and assessment of ELLs in the classroom. This course requires a grade of "C" or better. Current background check (fingerprinting) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
TSL 3081C and upper division standing

Prereq/Corequisites:
EDG 3410C and EDG 3343

Developmental Education Courses

ENC 0017 - Integrated Reading and Writing I

This course is designed to develop reading comprehension and writing language skills for students whose entry level placement scores do not meet requirements for degree credit (not applicable for degree completion). The course includes a thorough review of English grammar and conventions and practice in writing paragraphs and essays while building skills in vocabulary and academic reading comprehension. Students must pass the class with a "C" or better grade.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Appropriate score on PERT or other approved assessment.

Note:
*College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

ENC 0027 - Integrated Reading and Writing II

This course is designed to develop reading comprehension and writing language skills for students whose entry level placement scores do not meet requirements for degree credit (not applicable for degree completion). The course includes a review of English grammar and convention and practice in writing persuasive essays while building skills in vocabulary and academic reading comprehension. Student must pass the class with a "C" or better grade.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Minimum grade of "C" in ENC 0017 or appropriate PERT or other approved assessment score.

Note:
*College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

ENC 0056 - Developmental Writing Module

This course is designed to develop written language skills for students whose entry placement scores do not meet requirements for degree credit courses (not applicable for degree completion). Conducted in a lab setting, this course is self-paced course, designed to allow students to focus on their individual grammar, usage, and writing needs to prepare for successful entry into college credit English courses (not applicable for degree completion). This course may be taken in place of ENC 0027 if a student has a placement score of 98-102 on the PERT. Students may exit Developmental Writing Module by passing the coursework and by obtaining a passing score on the Departmental Exit Exam.

Credit Hour(s): 2 College Prep Credits When Offered: (Offered as Needed) Prerequisite(s):
Students must score 98-102 on the PERT or on an elective basis score 103 or higher on the PERT.

Note:
* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0018 - Developmental Mathematics I

This course is designed for students whose entry level placement test scores do not meet requirements for degree credit (not applicable for degree completion). It is designed to reinforce the knowledge of operations and applications of fractions, decimals, percents, and signed numbers. An introduction to algebra will also be covered. Students must pass this class with a "C" or better to move on to MAT 0028 .

Credit Hour(s): 3 College Prep Credits When Offered: (Offered as needed) Prerequisite(s):
A score of 50-95 on the PERT.

Note:
* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0022 - Developmental Mathematics Combined

A course designed to satisfy the requirements of both MAT0018 and MAT0028 in one semester and prepare students for MAT1033A. Topics to be studied include computations with decimals, percents, integers, operations with rational and polynomial expressions, linear equations and inequalities in one variable, factoring, and basic linear graphing. This course will teach the student to understand and communicate concepts of algebra in the language of mathematics, both orally and written. Due to the nature of this course, calculators are not permitted. A grade of "C" or better is required for successful completion of this course. College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

Credit Hour(s): 6 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
score of 50-95 on the PERT

MAT 0028 - Developmental Mathematics II

This course is designed for students whose entry level placement test scores do not meet requirements for degree credit (not applicable for degree completion). This course emphasizes concepts, techniques, and applications of the following topics: operations with real numbers, linear equations and inequalities in one variable, rational expressions, properties of exponents, polynomials, radical expressions, and graphs of lines.

Credit Hour(s): 4 College Prep Credits When Offered: (Fall, Spring, Summer) Prerequisite(s):
Grade of "C" or better in MAT 0018 or score of 96-113 on the PERT or on an elective basis a score of 114 or higher on the PERT

Note:
* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0056 - Developmental Mathematics Module

This course is designed for students whose entry level placement test scores do not meet requirements for degree credit. This course emphasizes concepts, techniques, and applications of the following topics: operations with real numbers, linear equations and inequalities in one variable, rational expressions; properties of exponents, polynomials, radical expressions, and graphs of lines. Student may exit Developmental Mathematics Module by passing the coursework and by obtaining a passing score on the Exit Exam.

Credit Hour(s): 2 College Prep Credits When Offered: (Fall, Spring, Summer) Prerequisite(s):
score of 105-109 on the PERT or elective basis score 110 or higher on the PERT

Note:
* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

MAT 0157 - Modularized Developmental Mathematics II

This course is designed to help students develop computational & algebra skills needed for success in college level mathematics. This course uses a modular format in a lecture/lab setting. Students will take a diagnostic test in class to identify skills that have not been mastered and to determine placement into the appropriate modules. Each student will have an individualized learning plan such that he or she works only on skills not yet mastered. Possible topics in the learning plan include operations on signed numbers, solving linear equations and inequalities in one variable, graphing linear equations, operations with exponents and polynomial expressions, factoring polynomials and solving quadratic equations, introduction to rational expressions, and operations with square roots. Students will use computerized instruction as well as guided instruction by the instructor. Successful completion of this course requires mastery of the material in each module and a passing score of the department final exam. Course cannot be used toward AA or AS degree.

Credit Hour(s): 4 College Prep Credits When Offered: (Fall, Spring) Prerequisite(s):
MAT 0018 with a grade of "C" or better or a score of 96-113 on the PERT.

Note:
* College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

REA 0056 - Developmental Reading Module

This course is designed to increase the student's ability to comprehend college-level, written material (not applicable for degree completion). Conducted in a lab setting, this course is self-paced, designed to allow students to focus on their individual development of higher level reading skills and vocabulary needed for literal and critical interpretation of passages similar to those used in college texts. This course may be taken in place of REA 0017. Students must pass the class with a "C" or better and obtain a passing score on the end of course exam.

Credit Hour(s): 2 College Prep Credits When Offered: (Fall, Spring, Summer) Prerequisite(s):
Students must score 96-105 on the PERT or elective basis score 106 or higher on the PERT.

Note:
*College preparatory credits may not be counted toward fulfilling the number of credits required for a degree.

Lower Division College Credit Courses

ACG 2001 - Accounting I

This course covers the fundamental principles and procedures of double entry accounting as applied to the financial records of a business entity. The preparation of an income statement, statement of owner's equity and balance sheet are emphasized. Specific transactions and internal control associated with cash, accounts receivable and inventory will be examined in detail. The code of professional ethics will be highlighted throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MTB 1103 and knowledge of basic computer and keyboarding skills are strongly recommended

ACG 2011 - Accounting II

This course covers recording of specific transactions and internal control associated with investments, fixed assets, liabilities, international operations and stockholders' equity. Preparation of the statement of cash flow will be emphasized. The code of professional ethics will be highlighted throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2071 - Managerial Accounting

This course covers the basic principles of accounting techniques for the preparation of internal reports related to management of the firm and the interpretation of financial data useful in the decision-making process within the economic framework of the entity.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Corequisite(s):
ACG 2011 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACG 2450 - Computer Applications for Accounting

An introductory course in computerized integrated accounting procedures found in the microcomputer environment. Includes application of software designed for general ledger, accounts payable and receivable, financial statement analysis, purchasing and sales order processing, fixed assets, payroll, inventory and departmental accounting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ACG 2001 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

ACO 1806 - Payroll Accounting

Introduction to the theory, laws and procedures related to payroll activities of a business. Topics include payroll and personnel records, federal payroll laws, payroll operations, computerized payroll systems, and preparation of payroll registers, earnings records, and payroll tax forms.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ACG 2001 is strongly recommended and knowledge of basic computer and keyboarding skills are strongly recommended.

AMH 2010 - American History I

American History to 1877; describes the social, political, and economic development of the American people against the geographical background of the New World. Particular emphasis on American intellectual and political thought leading to the emergence of basic American character, ideas and attitudes. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AMH 2020 - American History II

American History from 1877, concentrating on industrial growth, the rise of corporate business, big labor, and government organization. Modification of basic American character and ideas as a continual historical process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

Ω Courses listed with this symbol have a Civic Literacy Competency.

AML 2010 - American Literature: 1492 - 1865

A course in American Literature from the pre-Colonial period to the Civil War. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 .

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

AML 2020 - American Literature: 1865 - Present

A course in American Literature from Civil War to present. This course may be used for Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):

ENC 1101 . (Note: AML 2010 is not a prerequisite for this course)

Note:

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ANT 2000 - Introduction to Anthropology

Introduction to the fundamental principles, concepts, methods and theories in Anthropology. Includes a brief introduction to the subdisciplines of anthropology: cultural anthropology, biological anthropology, archaeology, and linguistics. A cross-cultural perspective will be paramount in the study of anthropology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Offered as needed) Prereq/Corequisites:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ANT 2100 - Introduction to Archaeology

Introduction to the fundamental principles, methods, and theories in archaeology. Includes a history of the development of archaeology, and examination of the nature of archaeological data and research, an introduction to archaeological data and analysis, and an examination of approaches to synthesis and interpretation. North and South American archeology is studied, but non-western examples are also studied to enhance an understanding of the development of the discipline in Europe and the Americas.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ARC 1131 - Architectural Presentation

This course introduces basic ideas and presentation techniques directed towards developing design skills, such as drawing, perspective sketching, and graphics using a variety of media to include: pencil, ink, colored pencils, markers, and model building to be used in architectural presentations. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

ARC 1301C - Design 1.1

The primary foci of this course are the development of two and three-dimensional graphic skills and the ability to think spatially and to manipulate elements in space. Analysis and design exercises are located primarily in abstract two/three dimensional space and deal with topics such as figure/ground relationships, line/plane/mass, the idea of systems, networks, repetition, and the relation of part to the whole. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 4 Credit Hours When Offered: (Fall)

ARC 1302C - Design 1.2

This course continues the emphasis and topics studied in Design 1.1, with increased expectation with regard to graphic and spatial manipulation ability. Students study exemplary works of architecture and art, beginning the process of developing an understanding of the role history plays in their creative explorations. By the end of the course, site and the human being are part of the design environment. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
ARC 1301C .

ARC 2201 - Theory of Architecture

An introduction to architectural theory, selected contemporary architectural theories and movements, and their evolution and historical basis. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ETD 1102 .

ARC 2303A - Design 2.1

Application of two and three-dimensional design principles learned in first-year design, in preparation for whole building design in third year. Small building projects adding programmatic responsibilities to the design agenda. Emphasis on programmatic issues internal to the building such as function, circulation structure, resolution of form, space and place making. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 6 Credit Hours When Offered: (Fall) Prerequisite(s):
ARC 2201 .

ARC 2304 - Design 2.2

Application of two and three-dimensional design principles learned in first-year design, in preparation for whole building design in third year. Small building projects adding programmatic responsibilities to the design agenda. Emphasis on programmatic issues internal to the building such as function, circulation structure, resolution of form, space and place making, and human behavior.

Credit Hour(s): 6 Credit Hours When Offered: (Spring) Prerequisite(s):
ARC 2303A .

ARC 2472 - Introduction to the Technology of Architecture

This course is the beginning of the technology sequence in the areas of structures, environment technology, and materials and methods of construction. It introduces themes such as the response of buildings to the natural environment, the strength, stiffness, and durability in building materials, and the quantitative method of analysis and design of building assemblies and support systems. It explores the relationship between building technology and the social, aesthetic, environmental and economic aspects of the settings in which buildings are located, and how these factors relate to the process of architectural design. This course is designed as part of an articulation agreement with Florida A&M University; students interested in transferring to another upper division school should consult with an advisor.

Credit Hour(s): 4 Credit Hours When Offered: (Summer)

ARH 1000 - Art Appreciation

This course offers a study in the basic concepts of art, including function, style and structure with emphasis on the interaction of medium and meaning and problems of art criticism. This class does not fulfill the art history requirements for art majors, but compliments the art major's course of study as an elective. This is a Writing-Across-the-Curriculum course requiring selected written assignments. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course is also a Speaking-Across-the-Curriculum course requiring selected speaking assignments. This course qualifies, as well, as having an international and/or diversity focus for Teacher Education programs common prerequisites.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2050 - Art History: Pre-Renaissance

Survey of significant contributions in art from prehistoric through Renaissance. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2051 - Art History: Renaissance - 18th Century Neo-Classicism

Survey of significant contributions in art from Renaissance through Contemporary. Art will be considered in terms of stylistic qualities as well as iconography and historical context. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2060 - Architecture History

Survey of significant contributions in architecture from prehistoric to modern times. Architecture will be considered in terms of stylistic qualities, structural type, and intended usage. Topics will be addressed according to historical content, societal background, and geographical location. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ARH 2402 - Art History: Modern Art

Surveys and analyzes the major artistic periods and movements from 18th century Neo-Classicism to present. Required for all Art majors. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ART 1201C - Two-Dimensional Design

An introductory course, both theoretical and applied, dealing with the principles of organization and the elements of design in a two-dimensional format. This is a foundation course for all of the graphic arts: painting, printmaking, and the two-dimensional crafts. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 1203C - Three-Dimensional Design

An introductory course, both theoretical and applied, dealing with principles of organization and the elements of design in a 3-dimensional format. Various materials, tools, and surfaces are used to explore 3-D form. This is a foundation course. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 1300C - Drawing I

Basic drawing course covering different drawing media, line, form, shape, value and spatial relationships. Drawing problems involving a variety of subject matter will be explored. Emphasis is on value, drawing techniques, spatial relationships between shapes and composition. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 1301C - Drawing II

Continued study of drawing techniques explored in Drawing I. Provides experience with more complex drawing problems. Emphasis is on self-expression, value, color theory, and composition. A variety of subject matter and drawing media will be explored.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ART 1300C . Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 1750C - Pottery I

The students shall be exposed to the production of pottery utilizing all known hand building techniques. Also includes introduction to potter’s wheel and basic wheel fundamentals. The first half of course is hand building, the second half is devoted to development of skills on the potter’s wheel. Students also learn how to glaze pottery and make glass. Audit enrollment In studio art classes is

permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ART 1751C - Pottery II

Continues hand building of Pottery I, but major emphasis is placed upon development skills utilizing the potter's wheel. Additional glazing experimentation is also emphasized.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ART 1750C . Please refer to catalog section regarding audit enrollment.

ART 1905A - Independent Study – Art

A defined independent study which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule. Departmental approval is required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is also required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

ART 2330C - Figure Drawing I

The development of technical skills and self-expression through drawing the figure; course begins with anatomy studies, progresses to conceptualization of human form. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 2331C - Figure Drawing II

This class is a continuation of Figure Drawing I. Emphasis is on composition and self-expression in relation to the human figure. Exploration of media and content will be encouraged.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ART 2330C . Audit enrollment In studio art classes is permitted on a space-available basis only.

ART 2500C - Painting I

Course will include design elements, composition and spatial relationships. Emphasis is on color theory, color mixing, and execution thereof within a variety of subject matter. Audit enrollment In studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ART 2501C - Painting II

This course is a continuation of Painting I ART 2500C with emphasis on further exploration of student's personal style and original techniques. Further experimentation in abstraction and emotional aspects of form and color are explored and expressed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ART 2500C . Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2602C - Digital Imaging I

A digital illustration production course with a strong emphasis on concept development and image making skills. Students will

create complex imagery based on manipulations of photographs or traditional drawings and paintings with an industry-standard image editing/manipulation software. Access to an appropriate high quality digital camera is required. It Is recommended that students take PGY 1801C at the same time or prior to taking this course.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

ART 2603C - Digital Imaging II

A continuing course which expands upon the technical and conceptual foundation laid in Digital Imaging I. Students will explore advanced software techniques and greater challenges of personal or commercial expression in digital media. Access to an appropriate high quality digital camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ART 2602C , PGY 1801C .

ART 2701C - Sculpture I

An introductory course in the technical and aesthetic consideration of sculptural forms. Includes a wide range of materials and expressions, representing past and present sculptural methods. Audit enrollment in studio art classes is permitted on a space-available basis only.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

ART 2703C - Sculpture II

Allows continued experience in more complex three-dimensional techniques; emphasis on individual projects and conceptual approach.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ART 2701C . Audit enrollment in studio art classes is permitted on a space-available basis only.

ART 2930 - Art - Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ART 2955 - Portfolio Development

Development of a working portfolio through studio project aimed at fulfilling the general requirements the average company, university, art school or advertising agency looks for in a portfolio presentation.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ART 1201C , ART 1203C , ART 1300C , ART 1301C .

ASC 2560C - Unmanned Aerial Vehicles & Systems

This course is a survey of unmanned aerial vehicles (UAV) and systems, emphasizing the military and commercial history, growth and applications of UAVs. Course will include basic acquisition, use and operation of UAVs with an emphasis on operations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
ATT 1100

ASC 2564C - Unmanned Vehicle Security

Participants will develop an understanding of the digital operations of an unmanned vehicle. Methods of securing digital information during the upload and downloading functions will be explored.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ATT 1100

ASL 1140 - American Sign Language I

Introduces the student to the basic vocabulary and finger spelling of American Sign Language. Emphasis will be on learning to express this language in a simple form and have a basic receptive language competency.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

ASL 1150 - American Sign Language II

This course increases the student's American Sign Language vocabulary and uses more complex expression of thoughts, ideas, and emotions and increases the receptive and expressive proficiency of the student in both sign and finger spelling.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ASL 1140 or an equivalent course with a grade of "C" or better

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

ASL 2160 - American Sign Language III

A conversational course in American Sign Language utilizing skills and vocabulary from American Sign Language I and II and building on these to form more complex expressions in American Sign Language. Impromptu and planned stories, dialogues and skits will be performed. Receptive and expressive finger spelling will be advanced. No voice will be used for the majority of classroom time.

Credit Hour(s): 4 Credit Hours When Offered: (Summer) Prerequisite(s):
ASL 1150 or an equivalent course with a grade of "C" or better.

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

AST 1002 - Descriptive Astronomy

This non-lab one-semester course is designed to meet the general education requirements in physical science for non-science majors and for students in related scientific fields needing a scientific elective. The course includes topics in planetary astronomy, the sun and stellar evolution, galaxies, and cosmology. Also covered are basic physical laws, light, and telescopes. Exercises require only basic math with some very limited algebra.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

AST 1005 - Introduction to Astrobiology

This course will explore the scientific evidence for the possibility, probability, and potential nature of life that might exist beyond the Earth. Contemporary discoveries about current and past conditions suitable for the origin of life on Mars and some of the moons orbiting other planets in our own solar system are reviewed in the context of what we understand about life on Earth. The question of life in other solar systems is also covered. Space travel and problems regarding intelligent extra-terrestrial beings visiting the Earth and intelligent life beyond the Earth but still within our own solar system are also discussed. All this is done in a fashion which integrates the various branches of science required to understand life beyond the Earth: Astronomy, Biology, Chemistry, Geology, and Physics. There are no prerequisites for this course and it may be taught in a team fashion by faculty members from various

scientific disciplines.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

ATT 1100 - Private Pilot Ground School

An introductory survey of the subjects pertaining to flight; aircraft operation and performance, weather, pilotage, air traffic control and Federal Aviation Regulations in preparation for the Federal Aviation Administration Private Pilot Written examination.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 1230 - Building Construction Materials and Processes

Course designed to introduce the student to terminology, methods, procedures, materials, and processes used in the construction industry.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

BCN 1272C - Blueprint Reading for Commercial Construction

A course to familiarize non-drafting students with techniques of blueprint reading and the fundamentals of construction methods that make blueprint reading meaningful.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 1520C - Electrical Systems in Construction

A course to familiarize students with electrical terminology, practices, methods, code requirements and safety and health in construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 1567C - Plumbing and Gas Construction Practices

A course to familiarize students with Plumbing and Gas code requirements, terminology, methods, practices, processes and safety and health used in building construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 2231 - Building Construction Materials and Processes II

Course designed to introduce the student to terminology, methods, procedures, materials, and processes used in the construction industry. The focus of the course will cover Divisions 9 through 16 of the construction industry.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

BCN 2560C - Mechanical Systems in Construction

A course to familiarize students with mechanical trades terminology, methods, practices, code requirements processes, and safety and health criteria in mechanical construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCN 2721 - Construction Management/Planning

The course covers project development and organization from pre-construction site investigation to final completion. The course will include the management of project estimates, plans, schedules, operations and safety. The student will become knowledgeable about documents used in the construction industry for bid, contracts, zoning, permits, bonds, loans specifications and drawings. Cost engineering, procurement, value engineering and quality assurance will be covered. Cost management through job cost analysis and purchase order systems will also be covered.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCT 1763 - Construction Safety and Health

A basic course in construction safety and health, covering such topics as: theories of accident causation; workplace hazards; hazard analysis and prevention; accident reporting; OSHA construction standard and safety practices; environmental safety; violence in the workplace; ergonomics; ethics and safety; workers' compensation; and stress on the job.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

BCT 2761C - Structural Systems in Construction

A course to familiarize students with structural terminology, practices, methods, code requirements and safety, and health criteria in construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

BCT 2770 - Construction Estimating

A course in estimating as it relates to the construction industry covering references, estimating methods, take-off organization and presentation; material take-off, cost estimating in heavy construction, mathematical formulas for estimating, quantity take-off from plan review, and computer estimating overview.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
BCN 1230 , BCN 1272C .

BOT 1010C - Botany

This course covers the structure and function of seed plants, basic information on plant metabolism, including photosynthesis and water relations, and a survey of lower plants, algae and fungi. It introduces basic concepts of ecology and plant geography and stresses the importance of plants to humans. Laboratory sessions illustrate concepts from the lecture using specimens, microscope slides and field trips.

Credit Hour(s): 4 Credit Hours When Offered: (Spring)

BSC 1005 - General Biology

The principles of biology are included. Human Biology is emphasized. Human's effect on the environment is considered wherever appropriate. (NO LABORATORY — Not for majors in Biology).

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1005L - Biology Lab

Laboratory for General Biology. Experimental methodology and technique. Not recommended for Biology majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prereq/Corequisites:
BSC 1005 or equivalent.

BSC 1010C - Principles of Biology I

A study of the structure and function of the major biological molecules and the organization of these molecules at the subcellular level; of cellular growth including bioenergetics, metabolism and its control, and the movement and incorporation of macromolecules as related to cell expansion and repair; and the study of the control of cellular growth including both genetic and biochemical control mechanisms. Required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):

high school biology and chemistry or CHM 1020 and eligibility to enroll in MAC 1105 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1011C - Principles of Biology II

This course is a continuation of BSC 1010C . It provides an overview of the history of life on Earth, a summary of the concepts of phylogeny and classification, and a survey of organisms with emphasis on plants and animals. Structure, evolution, taxonomy, and ecology of the major phyla will be included. This course is required for Biology, Pre-Med, and most Pre-Professional Science majors.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
BSC 1010C .

BSC 1080 - Essentials of Anatomy and Physiology

This course surveys basic structure and function of the human body with emphasis on terminology and anatomy.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

BSC 1085C - Anatomy and Physiology I

A study of the human organism to include cells, tissues, skeleton, muscular system and nervous system.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

BSC 1086C - Anatomy and Physiology II

A study of the human organism to include the cardiovascular system, the fluid electrolyte balance, and the respiratory, excretory, endocrine, reproductive, gastrointestinal and immune systems.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BSC 1905 - Independent Study – Biology

A course designed to (1) allow a student to complete part of a course taken elsewhere and thereby complete general education requirements, (2) to go deeper into special areas of interest.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

BSC 2020C - Human Structure and Function

A study of the structures and functions of the human body with emphasis on system integrations (homeostasis) and an introduction to system disorders and pathologies.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

BUL 2241 - Business Law I

Introductory course in business law with objective of presenting the law underlying business transactions. Course includes the study of the Law of Contracts, the Law of Bailments, and the Law of Sales based on the Uniform Commercial Code. Recommended for Business degree students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

BUL 2242 - Business Law II

Course context explores laws relative to negotiable instruments, agency, partnerships, (includes study of Uniform Partnership Act), corporation law, creditors rights, consumer protection and insurance. Based on Uniform Commercial Code.

Credit Hour(s): 3 Credit Hours When Offered: Offered as needed Prerequisite(s):
BUL 2241 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CAP 2134C - Database Security

This course is designed to provide the student with an understanding of database security concepts and practices. The objective of the course is to provide hands-on instruction in various database tasks that relate to securing the confidentiality, integrity and availability of information that is stored in a database. The student will be able to perform administrative tasks in different database management systems, as well as manage database user profiles, privileges, and roles. Different database application security models will be explored, as will the security advantages of utilizing virtual private databases. Finally, the process of database auditing will be explored, including auditing methods using various database management systems.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:
CET 2660

CAP 2762 - Data Mining

This course offers exploration of data mining methodologies. Topics may include decision tables, decision trees, classification rules, association rules, clustering, statistical modeling, and linear models and will focus on data warehousing, data mining and data drilling.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
CGS 2541 or any programming language are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CCJ 1010 - Introduction to Criminology

A study of the nature and causes of crime and delinquency; the development of delinquent and criminal behavior; theory development in criminology, crime rates and trends, victimology and particular crime pattern areas.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

CCJ 1020 - Introduction to Criminal Justice

An introduction to the philosophical and historical background of law enforcement and the administration of criminal justice. Organization and jurisdiction of local, state, and federal law enforcement agencies, court and criminal procedures, career opportunities in the Criminal Justice field are also covered.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

CCJ 1941 - Internship – Criminal Justice

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Permission of the instructor

Note:
This course may be taken up to two times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CCJ 2509 - Introduction to Gangs and Crime

This course provides students with an overview of street gangs, the social factors, and the general classifications necessary for the law enforcement, corrections, and public safety professional. This course explores the history, membership, activity, current trends, and influence of street gangs. Students will be challenged to define community-based solutions and strategies to combat the criminal activity associated with street gangs.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CCJ 2934 - Special Topics in Criminal Justice

This course centers around topics of current interest or of special interest to students or instructors. Topics or focus may vary from semester to semester.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
*This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CET 1600C - Networking Fundamentals

This course introduces the student to the basics of Internetworking technology. This is also the first of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study networks and layers, networking devices, IP addressing, ARP and RARP, media and design, topology, structured cabling, electricity, and electronics and network management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 1610C - Routing Protocols and Concepts

Basic Router terminology and configurations are studied in this course. The student will study router components, router configuration, IOS, TCP/IP, IP addressing, and router protocols. This is one of the four courses designed to prepare a student to take the CISCO Certified Network Associate Exam (CCNA).

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:
CET 1600C is required.

CET 1675C - Introduction to IP Telephony

This course explains how companies are using IP Telephony equipment and software to efficiently upgrade existing telephone systems. In addition, the course will give the student a fundamental understanding of the architecture of voice communication and how signaling, call quality and public switched telephone networks operate in a LAN/WAN networking environment. The use of IP Telephony products will be discussed and how software allows companies to cost-effectively upgrade and eventually replace existing (legacy) telephone systems with more cost-effective and easy-to-use telephone equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
CET 1600C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CET 1854C - Introduction to Wireless Technology

This course teaches key wireless networking topics, including wireless technology and architecture network design, types of wireless networks, and applications. Special focus on technical matters, wireless communication products, wireless networking products, and wireless LANS products. It is recommended that all students have a least a basic knowledge of networking, including protocol, the OSI module, and TCIP/IP.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2179C - PC Operating Systems A+

This course is designed to help prepare the student to take the A+ Certification exams by making the student proficient in personal computer operating systems, including Windows. Major topics include disk and file management, system configurations, menu driven processing, graphical user interfaces, boot files, disk caching, virtual memory, device drivers, remote assistance, and security essentials and security practices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2182C - PC Hardware A+

This course is designed to prepare the student to take the A+ Certification exam, by teaching the student basic technical skills needed to understand the function and operation of the major elements of personal computer systems, and how to localize and correct common hardware and software problems.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2615C - LAN Switching and Wireless

This course introduces the student to fundamentals of LAN configurations. This is also the third of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study LAN Switching, VLANS, OSPF, EIGRP, VTP, classless routing and Access Lists.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2620C - Accessing the WAN

This course introduces the student to advanced router configurations and network design. This is also the last of four courses designed to prepare a student to take the CISCO Certified Network Associate Exam. The student will study WAN technology and design, PPP, ISDN, Frame Relay, and network management.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 2615C isrequired. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2660 - Network Security

This course provides an in-depth study of network security concepts and techniques. Students examine theoretical concepts that make computer network security unique. This course provides a practical, hands-on approach when examining networking security techniques. Students examine different network strategies, explore the advancement of network implementation, and study timeless problem solving strategies. The course is also intended to assist with preparation for the CompTIA Security+ certification.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of networking basic computer, and keyboarding skills are strongly recommended.

CET 2685C - Fundamentals of Network Security

Introduction to network security and overall security processes. This hands-on, skill-based course focuses on the design and implementation of security solutions to reduce the vulnerability of the network, using VPNs, network routers and a firewall. This

course helps prepare the student for the CISCO Security Specialist certification.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2854C - Fundamentals of Wireless LANs

Develop, implement and troubleshoot wireless networks. This hands-on, skill-based course focuses on the design, planning and operation of wireless networks, with an overview of technologies, security, and design best practices. This course helps prepare the student for the CISCO Wireless Certification.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
CET 1610C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2880C - Digital Forensics Fundamentals

This course offers a solid foundation to computer forensics investigations: preparing students to acquire and analyze digital evidence. the course covers tools and techniques and explains topics such as file structure, data recovery, e-mail and network investigations, and expert witness testimony. In addition, the student will gain practical knowledge in conducting digital investigations and preserving digital evidence that maybe used in court or corporate inquiries.

Credit Hour(s): 3 Credit Hours When Offered: (Fall and Spring) Prerequisite(s):
CET 2660 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2881C - Digital Forensics II

Digital Forensics II builds upon the foundational knowledge learned in digital forensics fundamentals. Students will utilize industry standard tools to conduct examinations of various digital media and document their findings. Devices to be studied include computers (server, desktop, laptop), mobile devices (tablets, cell phones, smart phones, mp3 players, gps), and devices such as DVRs and routers. Emphasis will be placed upon real-world digital forensics scenarios and the investigative thought process. At the conclusion of the class, students will be prepared to take the accessdata certified examiner (ace) examination.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 2880C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2891C - Wireless Network Security Certification

This course prepares students to secure wireless networks and protect valuable data from intruders. The following subjects are covered: intrusion tools and techniques, detection systems, WPA/WPA2/802.11i security, enterprise wireless gateways, encryption gateways, secure wireless bridging, and wireless VPN routers. This course prepares students for the compTIA wireless certification exam.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
CET 1854C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2892C - Advanced Network Security

This course examines advanced network security topics including, but not limited to, advanced topics in integration of hardware firewalls, advanced topics in Intrusion Detection Systems (IDS), advanced topics in Internet Protocol-security (IPSec), and advanced topics in Virtual Private Networking (VPN) in network security design. Students will implement designs using equipment in a laboratory setting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 2660 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CET 2940 - Computer Engineering Internship

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her

degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
active enrollment in an appropriate degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:
This course may be taken up to four times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CET 2941 - Computer Engineering Internship

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:
This course may be taken up to four times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CET 2942 - Computer Engineering Internship

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:
This course may be taken up to four times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CGS 1030 - Computer Basics

This is an introductory course for basic computer use, including the Internet. It addresses the use of computers for personal, business, and college purposes. It introduces the Windows operating system and Microsoft Office applications, including Word, Excel, and PowerPoint. Hands-on use of a personal computer is required.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
none

CGS 1100 - Microcomputer Applications

This is a hands-on course using computer software including discussion and practical applications of the Windows operating system, computing concepts, Internet, word processing, spreadsheets, database management, presentation software, and various communications topics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
none

CGS 1550 - Introduction to World Wide Web

This course provides an introduction to the required hardware, software, procedures, uses and building web pages on the World Wide Web and the Internet.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 1570 - Computer Applications for Business

This is a hands-on course using computer software (word processing, spreadsheet and database) to facilitate the activities involved in the business environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 1843 - Introduction to E-Commerce

This course is designed to provide students with an overview of the dynamics of electronic commerce and how it links information technology to business objectives. Course may not transfer to all State University System institutions.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 2541 - Introduction to Database Concepts

This course will provide an introduction to data modeling and the design and implementation of relational databases and extend the students' understanding of the principles and techniques used in the design and implementation of modern database systems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 2544 - Advanced Database Concepts

The aim of this course is to explore advanced database concepts including an advanced exploration of data modeling and the design and implementation of relational databases. This course will extend the students' understanding of advanced principles and techniques used in the design and implementation of modern database systems and explore database problems and potential solutions.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
CGS 2541 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CGS 2820 - Web Design

This course introduces programming in techniques associated with web-based languages. The student will learn to create innovative and useful window programs. Topics to be discussed include variables, string handling, loops and arrays, formatting techniques, labels, buttons, menus, loading and saving, error handling, graphics and linking applications.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

CHI 1120 - Mandarin Chinese I

This course focuses on pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language. Designed for students with no previous knowledge of Chinese.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

CHI 1121 - Mandarin Chinese II

This course is a continuation of Mandarin Chinese I with additional vocabulary and grammar. Pronunciation and grammatical structures of Mandarin Chinese, with emphasis upon balanced development of all four skills: listening, speaking, reading and writing. Covers all basic structures of the language and develops a foundation for further study of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

CHI 1120 or an equivalent course with a minimum grade of "C".

Note:

This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

CHM 1020 - Chemical Science

Fundamental principles and theories of matter and energy. Atomic theory, periodicity, properties, structure, kinetic molecular theory, bonding, solutions, scientific method, carbon compounds. This course serves as an introduction to chemistry for non-science majors, satisfying the General Education requirement for the A.A. degree; and as a preparatory course for students intending to enter college chemistry.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1032C - General Chemistry for Life Sciences

This course is a one-semester introduction to chemistry especially appropriate for those pursuing a degree for a career in an allied health science field, although open to all students. Topics include atomic theory, bonding, nomenclature, gases, acids and bases, stoichiometry, and solutions, with an additional emphasis on reaction rates, equilibria, organic and biochemistry, and organic and biomolecules and their roles and functions in living organisms.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAT 1033A or appropriate placement test scores.

CHM 1045C - College Chemistry I

Quantitative approach to modern theoretical and descriptive chemistry with appropriate development of laboratory technique. Includes symbols, formulas, equations, atomic structure, bonding, states of matter, stoichiometry, thermo-chemistry, solutions, colloids, molecular orbitals, periodicity and properties. A two semester sequence in general chemistry with laboratory exercises and demonstrations. University transfer credit.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):

MAC 1105 required; high school Chemistry or Physics, CHM 1020 or PHY 1020 advised.

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

CHM 1046C - College Chemistry II

Continuation of CHM 1045C . Includes kinetics, chemical equilibrium, acids and bases, thermo-dynamics, non-metals and their compounds, electrochemistry, redox, the atmosphere, hydrocarbons, biochemistry, nuclear chemistry, coordination compounds, and qualitative analysis.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
CHM 1045C .

CHM 2210C - Organic Chemistry I

This course will present the correlation between structure and physical and chemical properties of organic compounds. The principle types of mechanisms involved in organic reactions will be discussed on aliphatic and aromatic hydrocarbons, alkyl halides, alcohols and ethers. Laboratory exercises illustrate these topics.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
CHM 1046C .

CHM 2211C - Organic Chemistry II

In continuation of Organic Chemistry I the relationships between functional groups and properties of organic compounds will be discussed. Infrared, NMR, and mass spectroscopy will be used for identification of organic compounds and for structure analysis. The transition state theory is applied to interpret the nucleophilic addition reactions, the carbanion condensation reactions, the interconversions of carbonyl compounds and the nucleophilic acyl substitution of carboxylic acids and their derivatives. Biochemical topics, i.e. lipids, carbohydrates, amino acids and proteins are included.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
CHM 2210C .

CIS 1000 - Introduction to Computer Science

A broad survey of computing and computer science topics appropriate for computer science, computer engineering, and information systems students. Math placement at the college algebra level strongly advised.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CIS 1531 - Scripting for Cybersecurity Professionals

Scripting for Cybersecurity Professionals introduces the student to a variety of scripting languages. These scripting languages are an integral part of modern penetration testing tools. The course starts with an introduction to flowcharting, windows batch files and Linux shell scripting. With the importance of web attacks, the students will cover html and JavaScript. As a prerequisite course to offensive security (advanced penetrating testing), this curriculum covers ruby and python scripting, concluding with a brief overview of assembly, debugging and disassembly.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CIS 1940 - Internship in Computer Studies

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:
This course may be taken up to two times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

CIS 2352C - Ethical Hacking Fundamentals

This course is designed to provide the student with an understanding of the techniques and methodologies of security penetration testing. This course provides hands-on instruction using the various tools and methods that security professionals use to analyze an information system in order to discover vulnerabilities and protect against information loss, cyber-terrorism, and corporate espionage. The student will be introduced to fundamental security testing concepts, gain practical knowledge of computer programming, learn how to properly document a security test, and explore the legal and ethical ramifications of penetration testing. Students will also learn how to apply the appropriate countermeasures in order to reduce the risk that an organization faces.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
CTS 1134 is required. Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

CJC 2000 - Introduction to Corrections

Theories of punishment and incarceration; the organization of correction programs and institutions, principles of probation and parole, role of parole and probation officers, legal implications; and problems of rehabilitation are covered. This course may be used in transfer to UWF and may be accepted at other upper division schools. Students should consult the department for program planning.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

CJE 1642C - Introduction to Crime Scene Technology

This course explains and discusses the principals and theories in crime scene technology. The course covers specialized collection procedures for biological evidence, weapons, traffic crash evidence, arson evidence, gunshot residue, blood splatter and bodies.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CJE 2300 - Police Administration and Organization

This course presents the principles of organization and administration in law enforcement including functions and activities, planning and research, public relations, personnel and training, inspection and control, records and communications and custody.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CJE 2330 - Ethics in Criminal Justice

This course is a detailed exploration of ethical issues in Criminal justice with special emphasis on morality and the law, human behavior, and ethical decision making in law enforcement, corrections and the courts.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CJE 2400 - Police and Community Relations

A study of the relationship of the Justice Administration agencies to the surrounding community. Examines the effect of social change and the consequences that it produces upon law enforcement, corrections, and the courts.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CJE 2600 - Criminal Investigations

Fundamentals of investigation; duties and responsibilities of the detective; interrogation techniques; search and techniques of protecting the crime scene; collection and preservation of evidence; modus operandi systems; scientific aids and other sources of information; court preparation and case follow-up.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

CJJ 1002 - Juvenile Delinquency

A study of the nature and cause of juvenile delinquency, the development of the delinquent and criminal behavior, specific criminal justice subsystem (law enforcement, judicial, corrections) problems dealing with juvenile delinquents from initial contact through final disposition and treatment. This course may be used in transfer to UWF and may be accepted at other upper division schools. Students should consult the department for program planning.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

CJL 1100 - Criminal Law

Includes the study of the fundamentals of Criminal Law to include historical background and development, jurisdiction, the criminal act and responsibility, as well as, classification and analysis of Florida Statutes.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

CJL 1400 - Criminal Procedure

Includes the study of the fundamentals of constitutional, criminal and civil law; principles, duties and mechanics of criminal procedures in Florida as applied to arrest, search, seizure, and court processing; and a functional analysis of the rules of evidence in court procedures.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

CJL 2130 - Criminal Evidence and Procedure

This course provides students with an overview of criminal procedure particularly applied to search and seizure and evaluation of evidence.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CJL 2500 - Courts and the Judicial Process

This course is designed to teach the student the major structures and basic legal concepts of the American criminal court system. The students shall learn the components, personnel, and inherent social issues in our present criminal court system.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

CLP 1001 - Personal Adjustment

Psychology of adjustment, application of psychological theory for problem solving and better mental health. An examination of psychological defense mechanisms and adaptive behavior.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CLP 2140 - Abnormal Psychology

A study of the different problems in psychopathology, including anxiety, depression, social deviance, psychosis, schizophrenia, mental retardation and general brain dysfunction of both children and adults, with emphasis on descriptive etiology, known causes, and treatments.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
PSY 2012 .

COP 1000 - Introduction to Programming Concepts and Logic

General survey of programming/problem solving techniques. Includes an introduction to structured programming. Algorithm development will employ the use of a modern programming language.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2010 - Visual Basic Programming

This course introduces programming in Visual Basic.Net. The student will learn to create innovative and dynamic data structures using Rapid Application Development techniques. Topics to be discussed include: graphical user interface development and object-oriented programming.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2011 - Advanced Applications Programming in Visual Basic

This course introduces the advanced features of Visual Basic.Net. The student will learn to create advanced versions of innovative and useful Windows programs using Rapid Application Development techniques. Topics to be discussed include: basic and advanced graphical user interface development; sequential file processing; advanced object-oriented programming; ActiveX components; advanced database management development including interfacing to external applications and Visual Basic's internal database manager; multimedia, networking; and advanced data structures.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2030 - Programming In Python

An Introduction to Python programming language using microcomputers. Topics include Python basics, use of Python control and data structures, use of Python function, Python 110, and implementation of basic programming tasks.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2176 - Visual Basic ADO.Net

The aim of this course is to provide an advanced level of knowledge in database programming using Visual Basic's ADO.Net, using normalization, object and relational types, modeling, data validation, and structured query language (SQL) in creating database applications.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 2010 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s):
CGS 2544 , COP 2011 .

COP 2220 - Programming in C

An introduction to C programming language using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2222 - Advanced Programming in C

An advanced exploration of the C programming language using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 2220 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2224 - Programming in C++

An introduction to C++ programming using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2228 - Advanced Programming in C++

An advanced exploration of the C++ programming language using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
COP 2224 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2360 - Programming in C Sharp (C#)

An introduction to the C# programming language using microcomputers.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2362 - Advanced Programming in C Sharp (C#)

This hands-on course examines how to utilize advanced features in the .NET Framework using the C# programming language, in order to build sophisticated applications. Students will work with advanced object-oriented programming topics, including inheritance, partial classes and generics.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 2360 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2654 - Programming for Mobile Devices: iOS (iPhone/iPad)

This class teaches the fundamentals and provides a broad perspective of the iPhone SDK platform. It begins with an overview of the Objective-C language and progresses into the details of the UIKit, as well as several other frameworks essential for development on the iPhone and iPad.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2658 - Advanced Programming for Mobile Devices: iOS (iPhone/iPad)

This class teaches the advanced IOS programming topics and provides a broad perspective of the IPhone SDK platform. It begins with an overview of the Objective-C language and progressed into the advanced details of the UIKit, as well as several other frameworks essential for advanced development of the iPhone and iPad.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 2654 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2660 - Programming for Mobile Devices: Android

This class teaches the fundamentals and provides a broad perspective of the Android development platform. It begins with an

overview of the Java language and progresses into the details of the developing for Android-based mobile devices and tablets. The curriculum also covers several other frameworks essential for development on the Android platform.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2662 - Advanced Programming for Mobile Devices: Android

This class teaches advanced concepts and provides a broad perspective of the Android development platform. It begins with an overview of the Java language and progresses into the details of the developing for Android-based mobile devises and tablets. The curriculum also covers several other frameworks essential for development on the Android platform.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 2660 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2700 - Introduction to SQL

An introduction to SQL and the design and creation of object-oriented databases (using SQL). Topics include storing, retrieving, updating and displaying data using Structured Query Language (SQL).

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
COP 1000 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2702 - Introduction to PL-SQL

An introduction to PL-SQL and the design and creation of object-oriented databases (using PL-SQL). Topics include storing, retrieving, updating and displaying data using PL-SQL and Oracle.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
COP 1000 IS REQUIRED AND KNOWLEDGE OF BASIC COMPUTER AND KEYBOARDING SKILLS ARE STRONGLY RECOMMENDED.

COP 2800 - Introduction to Java Programming

An introduction to programming using the Java language. Students will develop and apply individual programs.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
COP 1000 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2805 - Advanced Java Programming

An advanced level programming course using advanced Java techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
COP 2800 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

COP 2840 - Web-based Programming I

This course is designed to extend the student's understanding of web-based programming techniques, and give them practical experience in the use of a range of technologies for creating e-Commerce applications.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CRW 2001 - Creative Writing I

Instruction and practice in writing fiction and poetry. Students will submit a poetry portfolio and complete at least one short story.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CRW 2002 - Creative Writing II

Advanced work in poetry and prose modes with emphasis on revision. Students will submit a poetry portfolio and write and revise at least one complete short story. Students will prepare creative work for publisher market.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

CRW 2100 - Introduction to Fiction Writing

Practice in writing fiction using various points-of-view. Students will submit completed short stories for workshop. Upon agreement with the instructor, students may elect to develop novel chapters with synopsis. Students will prepare creative work for publisher market.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

CRW 2201 - Introduction to Creative Nonfiction

This writing course examines the narrative possibilities of creative nonfiction. We will explore structure, technique, and authorial presence in representative works of established sub-genres, including literary journalism, travel and/or food writing, memoir, the lyric essay and collage.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

CRW 2300 - Introduction to Poetry Writing

Practice in writing poetic forms employing poetic techniques. Students will workshop completed poems and submit a portfolio of revised poetry. Students will prepare creative work for publisher market.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

CTS 1106 - Fundamentals of UNIX

This course is designed to introduce the UNIX operating system to new users. The student will learn fundamental features of the operating system, including file system navigation, file permissions, editors, command shells, and basic network use. Provides a foundation for more advanced courses in administration and certification.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of networking, basic computer and keyboarding skills are strongly recommended.

CTS 1134 - Network Foundations

This course is designed to introduce students to the terminology and concepts of the network industry, including data communications and network services, OSI Model, topology, network media, connectivity devices and security. This is preparation for the CompTIA Network+ certification and the first course in the MCSE/MCSA certification program.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 1142 - Information Technology Project Management

This introductory course teaches the essentials of information technology project management. This course provides an introduction to the project management body of knowledge, as specified by CompTIA project+. The course discusses the processes, methods, techniques and tools that organizations use to manage information systems projects. The course covers a systematic methodology for initiating, planning, executing, controlling, and closing projects and emphasizes the important special considerations which apply to information technology projects.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

CTS 1156C - Desktop Support

This course introduces the helpdesk skills to troubleshoot hardware or software operation and application problems for end users on the desktop or client-side, based on the Windows operating system. It is designed to help prepare the student to take the two core exams (70-620 and 70-622) required for certification as an MCITP: Enterprise Support Technician students should have user-level competency with Windows and MS Office.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2104 - Introduction to Windows

An introduction to operating systems in general with emphasis on Windows.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2127 - Certified Information Systems Security Professional (CISSP)

This course covers security topics from a management perspective to include, security and risk management, asset security, security architecture and engineering, communication and network security, identity and access management, security assessment and testing, security operations, and software development security. This course will prepare students for management level security responsibilities. This course will prepare the student for the industry certification by ISC2: Certified Information System Security Professional (CISSP) exam.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CET 2660 is required and knowledge of basic computer and keyboarding skills are strongly recommended

CTS 2143C - CompTIA Server+

This course provides advanced concepts in server hardware components and troubleshooting in a non-vendor-specific environment. Introduction to server installation, server storage concepts, administering services, server roles, virtualization, performance monitoring, security, data protection, and maintenance.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2145 - Cloud Essentials

The course covers cloud concepts and models; virtualization; cloud infrastructure; resource management; security; and systems management. It includes implementation, maintenance and delivery of cloud technologies and infrastructures while ensuring proper security measures are maintained to mitigate risks and threats.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

CTS 2163C - Windows Client Operating System

This course addresses the implementation and desktop support needs of the MS client software, including installation, configuration and management of hardware and file systems, user profiles, remote users, and monitoring of resources and performance. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
KNOWLEDGE OF NETWORKING, BASIC COMPUTER, AND KEYBOARDING SKILLS ARE STRONGLY RECOMMENDED.

CTS 2302C - Windows Active Directory

This course focuses on a Windows server directory service environment, including forest and domain structure, DNS, site topology and replication, organizational unit structure and delegation of administration, Group Policy, and user/group/computer account strategies. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CTS 1156C is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2314C - Network Defense and Countermeasures

This course will explore concepts of network defense and countermeasures as well as hardware and software required to design, configure and implement secure networks. Security topics covered in this course include firewalls, Intrusion Detection Systems (IDS), Virtual Private Networks (VPN) and policy creation using the Windows Operating System (OS), Transmission Control Protocol/Internet Protocol (TCP/IP) packet and signature analysis. The student will get hands-on instruction installing the network defense mechanisms and countermeasure applications. Software will be used for collecting, monitoring and auditing various activities; students will analyze threats and intrusions.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
CET 2660 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2321 - UNIX Administration

This course is designed for network administrators in a UNIX operating environment. UNIX operating system concepts, architecture and administration will be explored using Linux. Includes shell programming, database managements, rapid application development, and programming tools such as PERL and C++.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
CTS 1134 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s):
CTS 1106

CTS 2346C - Windows Server Administrator

This course will provide students with the opportunity to develop the skills required to manage accounts and resources, maintain server resources, monitor server performance, and safeguard data. Recommended knowledge level: A+, Network +, Security + and Win client operating system. This course prepares the student for the MCITP exam.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2347C - Windows Network Infrastructure

This course addresses the configuration of Windows Server network infrastructure. Topics covered include: routing and remote access, network access protection, network authentication, IPv4 and IPv6 addressing, DHCP, DNS, WINS, DFS, IPSec, and security. Recommended level of knowledge: A+, Network +, Security +. This course prepares the student for the MCTS exam, a core requirement for Windows MCITP.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed) Prerequisite(s):
Knowledge of networking, basic computer, and keyboarding skills are strongly recommended.

CTS 2390C - Installing and Configuring Windows Server

This course is the first of a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server infrastructure in an existing enterprise environment. The three courses in total collectively cover implementing, managing, maintaining, and provisioning services and infrastructure in a Windows Server environment. While there is some cross-over in skill

set and tasks across the courses, this course primarily covers the initial implementation and configuration of those core services, such as Active Directory Domain Services, networking services, and initial Hyper-V configuration and is also preparation material for.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2391C - Administering Windows Server

This course is the second in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server infrastructure in an existing enterprise environment. The three courses in total will collectively cover implementing, managing, maintaining and provisioning services and infrastructure in a Windows Server environment. While there is some cross-over in skills and tasks across the courses, this course will primarily cover the administration tasks necessary to maintain a Windows Server infrastructure, such as user and group management, network access and data security and is also preparation material for, Exam 70-411: Administering Windows Server.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
CTS 2390C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2392C - Configuring Advanced Windows Server

This course is the third in a series of three courses which provide the skills and knowledge necessary to implement a core Windows Server Infrastructure in an existing enterprise environment. While there is some cross-over in skill sets and tasks across the three courses this course will primarily cover advanced configuration and services tasks necessary to deploy, manage and maintain a Windows Server infrastructure, such as identity management and identity federation, network load balancing, business continuity and disaster recovery, fault tolerance and rights management. This course is also preparation material, and maps directly to, Exam 70-412: Configuring Advanced Windows Server Services.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
CTS 2391C is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2437 - Administering SQL Server Database

This course provides students with the skills required to install, configure, administer and troubleshoot the client-server database management system of Microsoft SQL Server. This is preparation for the MCP exam, an elective requirement for Windows MCSA/MCSE.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
CTS 1134 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

CTS 2438 - Advanced SQL Server Database

This course provides students with advanced topics required to install, configure, administer and troubleshoot the client-server database management system of Microsoft SQL Server. This course is designed to prepare the student for certification, an elective requirement for the Windows MCSA/MCSE.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
CTS 2437 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

DAA 1100 - Fundamentals of Modern Dance

This beginning dance class serves as an introduction to the art of contemporary dance. It includes instruction and practice in basic modern dance techniques, improvisation, dance forms and brief historical overview.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring,, Summer) Note:
This course may be taken up to four times for credit.

DAA 1101 - Modern Dance II for Non-Majors

This course includes a continued analysis of the modern dance at an intermediate level. Instruction and practice in specific contemporary dance techniques and performance qualities will be stressed.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

DAA 1104 - Modern I for Majors

This dance class is designed to affect an understanding of the art of the modern dance. It includes a brief history of the dance; instruction and practice in basic dance techniques, improvisation, and dance forms. Performance, research and individual projects comprise the remaining class time. This course maybe taken 4 times for credit.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

DAA 1200 - Fundamentals of Ballet

This beginning dance course is designed to serve as an introduction to the tradition and discipline of the art of classical ballet. Physical development of the body as an expressive instrument for ballet movement will be stressed as strength, flexibility, balance, alignment, agility, turnout, control, elevation and sensitivity to line are studied.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

DAA 1201 - Ballet II for Non-Majors

Intermediate Ballet is designed to train the student in the tradition of the art of the classical ballet beyond the basics. Continued development of the body as an expressive instrument for ballet movement will be stressed as students reach the proficiency level necessary to perform the more complicated steps of an intermediate class.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

DAA 1204 - Ballet I for Majors

A beginning dance course designed to serve as an introduction to the tradition and discipline of the art of the classical ballet. Physical development of the body as an expressive instrument for ballet movement will be stressed as strength, flexibility, balance, agility, alignment, turn-out, control, elevation and sensitivity to line are studied. Performance, research and individual projects comprise the remaining class time.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

DAA 1500 - Jazz I for Non-Majors

The course includes a brief history of the jazz dance and instruction and practice in jazz dance techniques exploring popular dance idioms.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken four times for credit.

DAA 1500A - Beginning Jazz

This course includes a brief history of the jazz dance and instruction and practice in jazz dance techniques exploring popular dance idioms.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

DAA 1504 - Jazz I for Majors

The course includes a brief history of the jazz dance and instruction and practice in jazz dance techniques exploring popular dance idioms. Performance, research and individual projects comprise the remaining class time.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

DAA 1520 - Tap I

This course includes instruction in tap dance technique and the introduction of time steps commonly used in musical theater auditions.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

DAA 1521 - Tap II

The Tap II dance class includes a more in-depth history of tap dance, instruction and practice utilizing tap and exploring its various styles.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
DAA 1520 .

Note:
This course may be taken up to four times for credit.

DAA 1580 - Musical Theater Dance I

This beginning course covers the study of musical theater dance techniques and styles as related to a specific performance experience, usually Creative Dramatics. Students must participate in designated rehearsals and performances.

Credit Hour(s): 1 Credit Hour When Offered: (Summer) Prerequisite(s):
level of competency determined by audition.

Note:
This course may be taken up to four times for credit.

DAA 1680 - Dance Workshop

This course includes instruction and participation in dance as required by specific productions, i.e., Theater/Show Choir.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

DAA 1681 - Dance Ensemble

The student shall participate in the preparation and performance of original dance compositions to include Dance Line and Show Choir performances.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
level of competency determined by audition.

Note:
This course may be taken up to four times for credit.

DAA 2105 - Modern II for Majors

This dance class is designed to further the student's understanding of the art of the modern dance. It includes continued study in

history of the dance; instruction and practice in intermediate level dance techniques, improvisation, and dance forms. Performance, research and individual projects comprise the remaining class time.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

DAA 2205 - Ballet II for Majors

This dance course is designed to serve as an further training in the tradition and discipline of the art of the classical ballet. Physical development of the body as an expressive instrument for ballet movement will be stressed as strength, flexibility, balance, agility, alignment, turn-out, control, elevation and sensitivity to line are studied. Performance, research and individual projects comprise the remaining class time.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

DAA 2505 - Jazz II for Majors

The course includes a brief history of the jazz dance and instruction and practice in jazz dance techniques exploring popular dance idioms. Performance, research and individual projects comprise the remaining class time. This course may be taken 4 times for credit.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
DAA 1504

DAA 2581 - Musical Theater Dance II

The continued study of Musical Theater dance techniques and styles as related to a specific performance experience, usually Summer Ensemble Workshop. Students must participate in rehearsals and performances.

Credit Hour(s): 1 Credit Hour When Offered: (Summer) Prerequisite(s):
level of competency determined by audition.

Note:
This course may be taken up to four times for credit.

DAA 2610 - Dance Composition

An introduction and practice in the application of compositional tools encourages the student to explore and compose dance. By studying the body's movement in time and space the student will improve technical skills, develop improvisation and choreographic skills and enhance overall dance performance. Previous dance experience is helpful.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

DAA 2682 - Dance Workshop II

This course includes continued instruction and participation in dance as required by specific productions, i.e., Theater/Show Choir.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
A demonstration of competency determined by audition.

Note:
This course may be taken up to four times for credit.

DAA 2683 - Performance Dance, (Repertory and/or Original Choreography)

This course includes the continuation of study and participation in all rehearsals of selected works of dance repertory and/or original choreography culminating in public performance.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:

This course may be taken up to four times for credit.

DAN 1750 - Dance Conditioning

Dance Conditioning is an excellent course in which to begin your dance training. It is designed to improve fundamentals for the beginning/intermediate student through daily practice in floor work, yoga, and Pilates exercises. This movement class will get you ready to meet the challenges of other dance classes by toning, strengthening and preparing the body to move.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

DEP 2004 - Human Growth and Development

A research oriented course in human development, covering the life span of the human being from conception to death. Special emphasis placed upon the interrelationships of the stages of development of the normal person.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

DEP 2100 - Child Growth and Development

This course covers the growth and development of the child from conception through age five, including the physical, social, emotional and mental development of the young child, influence of environment, and principles and theories of development.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

DSC 1002 - Domestic and International Terrorism

This course is designed to assist students in recognizing and understanding the elements and objectives of terrorism and 4th Generation Warfare and how they affect public safety planning and response operations.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1004 - Introduction to NRF and NIMS

Designed to inform emergency responders and planners of the key elements in the National Response Framework (NRF) and the National Incident Management System (NIMS) and their relationship to planning and response operations. The curriculum includes classroom exercises.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1222 - Psychological Management of Disaster Victims

This course introduces students to a general overview of terrorism and the potential psychological effect of terrorist events on victims.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1552 - Critical Infrastructure Protection

This course introduces participants to the Critical Infrastructure Protection (CIP) process to secure the effective protection of the people, physical entities, and cyber systems that are critical. The CIP course will guide leaders in the systematic protection of critical infrastructures. More basically, the course will introduce decision sequence that assists leaders and future leaders in ultimately determining exactly what really needs protection as well as when. The course will introduce a time-efficient and resource-restrained practice that ensures the protection of only those infrastructures upon which survivability, continuity of operations, and mission success depend.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1562 - Homeland Security Threat Strategy

This course addresses problems of terrorism from a criminal justice perspective. It is designed to provide students with an understanding of the major issues associated with responding to terrorism in a democratic society. The course focuses on the threat of terrorism to the United States and will review specific strategies to deter terrorist threats to the U.S. The course will assess the relative effectiveness of anti-terrorist activities.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1631 - Planning Considerations for Terror Prevention

This course introduces participants to various aspects of planning for potential terrorist activity. The student will be introduced to basic principles of emergency management, communications, security threats, and the effects these operations may have on personnel. The student will learn techniques for evaluating their own jurisdiction's vulnerability against terrorist attacks. Students will gain knowledge of the roles and responsibilities of local agencies during terrorism responses. The course introduces participants to various aspects of emergency management of terrorist activity.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 1751 - Homeland Security Policy and Law

This course introduces participants to the major debates about balancing democratic freedoms with security from the Patriot Act to Supreme Court decisions on detention powers. The course provides insight into legal strategies necessary to confront ongoing national security threats. The course examines laws designed to preserve both our security and our democratic way of life.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 2055 - Issues in Disaster Response

This course serves as an introduction to disaster response and mitigation for the first responder. Students will be introduced to legislation that has had a major impact on disaster and incident response, the role of local, tribal, state and federal government response to incident and disaster declarations and a brief introduction to the National Incident Management System, National Response Plan and the Incident Management System.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

DSC 2056 - Disaster Response Operations

This course examines the response protocol, logistics, responsibilities, interagency support, and concepts of front end planning involved in preparation for a catastrophic event. Students will be introduced to the development of an emergency response plan that will include concepts such as lookout, awareness, communications, escape, safety (laces), training, and various agency relationships.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

DSC 2900 - Development of Unmanned Vehicle Applications

Students complete a project that demonstrates excellence by applying the knowledge of unmanned drones gained from the public safety core courses. Successful completion of the course requires demonstration of the achievement of program objectives and learning outcomes.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ECO 2013 - Economics I

This course covers macroeconomics, its basic concepts and principles, national income accounting; fiscal and monetary policy and application, and growth economics. Basic math skills are required.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

ECO 2023 - Economics II

This course covers microeconomics, including economic structures, price theory, factor markets, and general equilibrium. It also includes the economics of information, externalities, and other current national and international issues.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ECO 2013 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

EDF 1005 - Introduction to the Teaching Profession

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. An additional fingerprinting cost may be associated with this course. This course is intended for those students planning to enter a bachelor degree program leading to teacher certification (BS Elementary Education). If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ENC 1101 AND (MAC 1105 or STA 2023)

EDF 1005A - Introduction to the Teaching Profession - A

A study of the history, philosophy and social context of education. The course will help the student think critically about the process of education and his/her role as an educator. During an eighteen hour field experience, the student will observe and participate in the educational settings of local schools. This course is intended for those students that are not planning to enter a degree program leading to teacher certification. An additional fingerprinting cost may be associated with this course. If used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program, this course requires a minimum grade of "C."

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EDF 1006 - Field Experience in Education

This Educational Field Experience course allows students to work in an educational setting for a semester to meet requirements for admission to the BSE program. This course requires a minimum grade of "C". Current background check (fingerprints) acceptable to the District in which the field experience will take place is required for this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
permission of department chair.

EDF 2085 - Introduction to Diversity for Educators

This course will provide the student with the opportunity to explore personal values and attitudes toward cultural diversity. Designed for the prospective educator, the theoretical component will examine the issues of teaching in culturally diverse classrooms. An eighteen-hour field experience and examination of educational materials will enhance the student's understanding of multiculturalism. An additional fingerprinting cost may be associated with this course. This course requires a minimum grade of "C" if used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

EEC 1001 - Introduction to Early Childhood Education

Study of principles and practices of programs for young children; current research in early childhood education, role of the teacher, and selection and use of equipment and materials for groups of young children.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

EEC 1002 - Early Childhood Program Administration

This course provides the student with management and administrative skills related to child care services. Instruction includes: director responsibilities; staff selection, supervision, and evaluation; planning for budget, nutritional services, facility maintenance, health, and safety; and marketing techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EEC 1201 - Infants and Toddlers

This course provides the student with information pertinent to the care of infants and toddlers. Special attention is given to selection of developmentally appropriate curriculum. Course work satisfies the Child Development Associate competency standards for Infant/Toddler.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EEC 1309 - Early Childhood Education Foundations

Study of the techniques of using language arts, science, art, social studies, music, mathematics, and physical activities with young children.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Summer, Spring)

EEC 1401 - The Family In Early Childhood Education

This course is comprehensive in scope, emphasizing skills and concepts of parenting which include: adjustment to parental roles; parent-child communication, care, growth, and development of children; cultivating strong families; special concerns; alternative family structures; educational institutions working effectively with parents; and agencies and legislation affecting children and parents.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EEC 1601 - Assessment in Early Childhood Education

Designed to increase objectivity and proficiency in observing and interpreting children's behavior in addition to increase awareness of normative patterns of children from birth through five years of age. Current background check (fingerprinting) as required by the Early Childhood program in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

EEC 1750 - Guidance for Young Children

A study of principles, methods, guidance and discipline techniques used to promote positive social development in young children; influence of environment and developmental level of child on social behavior.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring Summer)

EEC 1949 - Internship, Early Childhood Education

On-the-job training (OJT) in the Associate in Science degree program in which the student is enrolled. The student is under the supervision, at work, of a qualified supervisor appointed by the respective agency, who works with the NWFSC instructor regarding

student's OJT objectives based on student's goals and prior training. The supervisor will rate the student's performance, knowledge, comprehension, dependability, initiative, cooperativeness based on OJT performance. NWFSC instructor will evaluate student OJT experience in consultation with agency supervisor regarding OJT performance and project paper on approved project submitted two weeks prior to close of semester. This course may be repeated four times for a total of 12 semester hours. Current background check (fingerprinting) as required by the Early Childhood program in which the field experience will take place is required for this course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prereq/Corequisites:
EEC 1309 or EEC 1201 .

EEC 2220 - Language and Literacy Instruction In Early Childhood Education

Study of the principles, methods, and materials used to assist young children acquire basic skills to use language effectively and competently; evaluation and development of appropriate teaching materials to use with young children.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
EEC 1309

EEC 2222 - Math and Science Instruction In Early Childhood Education

Study of the basic concepts, methods, and materials of mathematics and science appropriate to the education of young children. Identification of the role of staff members in the center for the education of young children. Assignment with young children in community agencies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring and as needed) Prerequisite(s):
EEC 1309 .

EEC 2732 - Child Nutrition, Health and Safety

Methods of meeting physical needs of young children through nutrition and good health practices. Recognition of childhood diseases and care of the handicapped child.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

EEL 2603C - Robotics-Mechanics and Controls

This course introduces the student to robotics. Instructional topics will include robot classifications, applications, Input/Output (I/O) and sensor interfacing.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
ETS 1542C

EET 1015C - Electricity/Electronics I, DC Circuits

This course introduces the theories, concepts, and relationships of voltage, current, and power in DC series, parallel, and series/parallel circuits containing common circuit elements with single and multiple sources. Students are introduced to Ohm's Law, Kirchoff's voltage and current Laws, Thieving's, Norton's, super-position, and maximum transfer of power theorems and their uses in DC circuit analysis. Students will learn how to use a digital multimeter to troubleshoot and analyze DC circuits.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

EET 1025C - Electricity/Electronics II, AC Circuits

This course introduces the theories, concepts, and relationships of voltage, current, and power in AC series, parallel, and series/parallel circuits containing common circuit elements with single and 3-phase sources. Students will apply Ohm's Law, Kirchoff's voltage and current Laws, Thieving's, Norton's, super-position, and maximum transfer of power theorems and their uses in AC circuit analysis. Included will be the use of a multimeter and oscilloscope for experimentation with and troubleshooting AC circuits.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prereq/Corequisites:
ETM 1005C and EET 1015C

EET 1084C - Introduction to Electronics

This course introduces the fundamentals, terminology, and applications used in the electronics industry. The topic coverage will include circuit theory principles, electronic components, transistor usage, amplifiers, power supplies, digital logic techniques, and electronic instruments. The course will also include some basic laboratory exercises to strengthen the topic coverage as it pertains to measurement involving both analog and digital circuits.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

EET 1141C - Solid State Electronics

This is the third course required for Electronics Aide certificate. This course introduces the student to the concept, components, and uses of solid state electronics. Topics include semiconductor devices; thyristors and diodes, transistors, amplifiers, power supplies, oscillators, and optoelectronics. The use of capacitors and inductors in solid state electronics will be also covered. The design, set-up, and troubleshooting solid state circuits and devices using various power supplies and function generators will be dispersed throughout the class.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
EET 1025C

EET 1180C - Industrial Electronic Troubleshooting

This course covers troubleshooting procedures for a variety of electronic equipment and circuits common to industrial applications. The student will develop and implement trouble shooting protocols and plans, equipment monitoring plans, a preventive maintenance plan, and select appropriate test and monitoring equipment. Safety in an industrial setting will be stressed and reinforced through a series of lab exercises throughout the course.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
EET 1084C

EET 2155C - Linear Integrated Circuits

This course covers the fundamentals and applications of linear integrated circuits and operational amplifiers. The course covers includes inverting and non-inverting amplifiers, comparators, signal generators, differential and instrumentation amplifiers, operational amplifier specifications, active filters, modulator-demodulator integrated circuits, timers, analog to digital converters (ADC), and digital to analog converters (DAC) and measurement and analysis of linear circuits and devices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
EET 1015C , EET 1025C

EEX 2010 - Introduction to Exceptional Children

Study of incidence, nature, etiology, law and services available in connection with learners with disabilities such as: intellectual and developmental disabilities, learning disabilities, attention deficit hyperactive disorder, emotional or behavioral disorder, autism spectrum disorder, communication disorders, deaf or hard of hearing, blind, physical disabilities, other health impairments, and gifted and talented.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

EGN 1111C - Engineering Graphics

Covers the use of instruments, lettering practice; geometric construction; multiview projection and conventions, auxiliary views,

section views, axonometric and oblique projections, rotation, patterns and development, and methods of reproduction.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ETD 1102 or equivalent: prerequisite only applies to Architectural Drafting and Design students.

EME 2040 - Introduction to Technology for Educators

This course will develop competencies necessary to integrate technology into classroom instruction. Students will survey a variety of instructional technology materials, software, and systems, as well as learn to use these in the classroom environment. This course requires a minimum grade of “C” if used to meet state prerequisite requirements for entry into a Bachelor of Teacher Education program.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring Summer)

EMS 1119C - Emergency Medical Technician

Emergency Medical Technician is designed to prepare the student with the necessary fundamental knowledge to be successful in meeting Emergency Medical Technician certification and licensing requirements. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic. There is emphasis on assessment based learning and complies with National DOT EMS Education Standards.

Credit Hour(s): 6 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
permission of the EMS Director and AHA CPR for the Healthcare Provider

Corequisite(s):
EMS 1401L .

EMS 1337 - Defensive Tactics

Designed to provide EMS personnel with fundamental knowledge of the recognition of aggressive/violent behavior, and use of appropriate verbal and physical skills to control aggressive behavior in the course of providing emergency care.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
admission to the Paramedic program or permission of instructor.

EMS 1401L - EMT Lab

An integrated experience that is designed to allow the student to apply practical experience to material learned in Emergency Medical Technician. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic in the laboratory environment, area hospitals and advanced life support EMS ambulances. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Credit Hour(s): 6 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
permission of the EMS Director and AHA CPR for the Healthcare Provider

Corequisite(s):
EMS 1119C .

EMS 2231 - Paramedic Processes I

First course in the sequence necessary for Paramedic program completion. Designed to integrate concepts and clinical skills learned at the EMT level with advanced life support concepts and skills. Emphasis on patient assessment, pulmonary anatomy and physiology, advanced airway management, pathophysiology and clinical management of shock, medical emergencies and traumatic injuries. Course is consistent with most current Department of Transportation (DOT) curriculum.

Credit Hour(s): 7 Credit Hours When Offered: (Fall and Spring) Prerequisite(s):
BSC 2020C - Human Structure and Function OR BSC 1085C - Anatomy and Physiology I AND BSC 1086C - Anatomy and Physiology II HSC 1531 - Medical Terminology

Corequisite(s):
EMS 2435L

EMS 2232C - Paramedic Processes II

Second course in the sequence necessary for Paramedic program completion. Integrates and reinforces concepts and clinical skills learned in Paramedic Processes I, with emphasis on pharmacology, cardiology and Advanced Cardiac Life Support (ACLS) skills. Other topics include assessment and management of OB/GYN emergencies, psychiatric emergencies, pediatric emergencies, musculoskeletal injuries and mass casualty situations. Consistent with the most current DOT curriculum.

Credit Hour(s): 6 Credit Hours When Offered: (Spring) Corequisite(s):
EMS 2436L .

EMS 2233 - Paramedic Processes III

The final course necessary for Paramedic program completion. Designed to prepare the student for both Florida State Board and National Registry examinations. Emphasizes the integration of paramedic knowledge, attitudes and behaviors. Course consistent with the most current DOT curriculum.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Corequisite(s):
EMS 2425L [Inactive].

EMS 2342 - Advanced Extrication

Focus is on advanced principles of gaining access to and disentanglement of victims of vehicular crashes. Emphasis is placed on victim and rescuer safety. Actual use of available rescue tools is included. Packaging of patients to protect against possible spinal injury is demonstrated and assessed. The course takes place with a mock scene and "junk" cars are used for experience with rescue tools.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

EMS 2435L - Paramedic Lab I

The clinical and skills laboratory companion course to EMS 2231C. Designed to provide instruction in advanced paramedic skills and the opportunity to apply these skills in the clinical setting. By state rule, the instructor-to-students ratio will not exceed six students to one instructor.

Credit Hour(s): 5 Credit Hours When Offered: (Fall) Prerequisite(s):
admission to the Paramedic program

Corequisite(s):
EMS 2231 .

EMS 2436L - Paramedic Lab II

This course is the clinical companion course to EMS 2232C, Paramedic Processes II. It is designed to provide instruction in the advanced paramedic skills and the opportunity to apply them in the clinical setting. By state rule, the instructor-to-student ratio will not exceed six students to one instructor.

Credit Hour(s): 5 Credit Hours When Offered: (Spring) Prerequisite(s):
EMS 2435L

Corequisite(s):
EMS 2232C .

EMS 2438C - Advanced Clinical Internship

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship

experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments. This is the capstone course for the Paramedic Program.
Instructor permission is required.

Credit Hour(s): 6 Credit Hours When Offered: (Summer) Prerequisite(s):
EMS 2232C , EMS 2436L and permission of the instructor

EMS 2552 - Advanced Cardiac Life Support (ACLS)

An intense overview of the guidelines for emergency cardiac care and cardiac arrest management as published by the American Heart Association. Students must successfully pass a written examination and a skills proficiency performance examination to receive the "ACLC Provider" and successfully pass the course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
EMT certificate and CPR for Health Care Providers certification.

EMS 2553 - Pediatric Advanced Life Support (PALS)

Designed for the EMS student. Fundamentals of recognizing infants and children who are at risk for cardiopulmonary arrest, including the strategies that are needed to prevent cardiopulmonary arrest in infants and children and the cognitive and psychomotor skills needed to resuscitate and stabilize infants and children in respiratory failure, shock or cardiopulmonary arrest.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
EMT certificate or permission of the instructor.

EMS 2555 - Prehospital Trauma Life Support

Fundamentals of managing traumatic injuries at the basic and advanced levels in accordance with the NAEMT PHTLS guidelines. The recognition and treatment of specific traumatic injuries such as pneumothorax, closed head injury, hemothorax, compensated and decompensated shock, fractures, uncontrolled bleeding, internal injuries of the abdomen and thorax. Emphasis is on rapid assessment, management and transport with discussion on mechanism of injury and kinematics of trauma.

Credit Hour(s): 1 Credit Hour When Offered: (Summer) Prerequisite(s):
EMT Certification or instructor permission

ENC 1101 - English Composition I

Instruction and intensive practice in expository and argumentative writing including a documented paper. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):
A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 1101L - English Composition I Lab

An instructor directed writing workshop designed to improve student's opportunity for success in ENC1101. Students will strengthen writing and grammar skills necessary to master the topics and concepts covered in ENC1101. Areas of focus include, but are not

limited to, the following: expository and argumentative writing; appropriate diction; conventions of Standard American English grammar, punctuation, sentence structure; conventions of MLA.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
ENC0025 and REA0017 or equivalent with a "C" or better grade, or a score of 100-116 on the PERT, or on an elective basis with a score of 103 or higher on the PERT.

Corequisite(s):
ENC 1101

ENC 1102 - English Composition II

Interpretative and critical reading of fiction, drama, and poetry. The student will write analytic discourse and research papers as part of the essay process. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):
Completion of ENC 1101 or an equivalent course with a grade of "C" or better.

Note:
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENC 2210 - Technical Report Writing

The course covers the fundamentals of technical report writing, mechanics, and style. Various types of reports are prepared and evaluated. The course also includes reading and analysis of technical literature as well as oral reporting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
passing score on placement test.

ENG 1001 - Research Papers

A learn-by-doing course in the methods of conducting library research and writing a documented paper. Students will work on self-selected subjects under the supervision and guidance of the instructor in a tutorial relationship. For successful completion, each student will write a documented paper in accordance with a standard system. This course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be used as a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. Students may use this course to satisfy deficiency in the Gordon Rule writing requirement, but it may not be used in lieu of traditional Gordon Rule courses, such as ENC 1101.

ENL 2012A - English Literature: Old English through the Enlightenment

A study of English literature from the Old English period, Beowulf, through the late Eighteenth century, the Age of Enlightenment, focusing on major works and their authors with an emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):
ENC 1101 .

Note:
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENL 2022 - English Literature: Romantic Period Through the Present

A study of English literature from the Romantic period through the present, focusing on major works and their authors with an

emphasis upon the literature as a significant reflection of and contribution to the political, cultural, social, religious, and economic milieu of each age. This course may be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):
ENC 1101 . (Note: ENL 2012A is not a prerequisite for this course)

Note:
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ENT 2931 - Selected Studies in Entrepreneurship

In this course, topics of current interest are presented in group instruction.

Credit Hour(s): 1 Credit Hour When Offered: (Spring)

ESC 1000 - Earth Science

This course provides an introduction to materials, processes, and interactions of Earth's global environments – the lithosphere (solid earth), hydrosphere (water earth), atmosphere (gaseous earth), and biosphere (living earth). It also includes a survey of sciences pertaining to the Earth, including basic astronomy, meteorology, oceanography, and geology.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

ESC 1000L - Earth Science Lab

Laboratory experiences pertaining to the physical environment: observation, measurement, data analysis, mapping, map interpretation, and properties of earth materials. This is an optional course serving students who transfer to universities which require a laboratory course to satisfy the General Education requirement in Physical Science.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer)

ETD 1102 - Introduction to Technical Drawing

A course in the fundamental principles of the graphic language (the language of industry) and is developed for students without previous mechanical drawing experience. Topics include: use and care of instruments, lettering, geometric construction, multiview projection, sketching techniques, inking, and methods of reproduction.

Credit Hour(s): 3 Credit Hours When Offered: (Spring, Summer, Fall)

ETD 1112 - Mechanical Drafting I

The second of a sequence of courses in drafting which includes basic use of instruments, freehand lettering, geometric construction, orthographic projection, sections and conventional revolutions, dimensioning, inking, mechanical lettering, methods of reproduction, and developing computer-aided drafting skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ETD 1102 and ETD 1320C or equivalent

ETD 1217 - Fundamentals of Dimensioning and Tolerancing

A course designed to help students develop the basic fundamentals of dimensioning and tolerancing. Topics include: dimensioning systems such as; metric, decimal, fractional-inch, foot and inch, tolerancing methods, limits and tolerances, tolerancing accumulation, dimensioning practices, and standards fits.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

ETD 1320C - AutoCAD I

A basic course on the use of AutoCAD Software to include: introduction to AutoCAD, drawing commands, display and inquiry commands, modify commands, dimensioning and annotation, data exchange and output files.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ETD 1340C - AutoCAD II

The second course in a series designed to develop skill and proficiency in the use of AutoCAD software to include: additional drawing commands, editing commands, modify commands, advanced display and inquiry commands, advanced dimensioning and annotation, advanced layering, block, attributes and X-Ref, paper space, UCS, data exchange and output files.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ETD 1320C or equivalent.

ETD 1355C - AutoCAD 3-D Modeling I

A basic course in mechanical design using basic computer geometry techniques. Topics will include: orthographic projections, space relationships of points, lines, planes and revolution of objects. Additional coverage will include principles of surface generation, intersections, wire modeling, and solid modeling techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ETD 1340C or equivalent.

ETD 1801C - Technical Illustration

The purpose of this course is to help students develop the skills, knowledge, and attitudes necessary to be job entry-level qualified as technical illustrators.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
ETD 1112 or EGN 1130C [Inactive], and ETD 1340C .

ETD 2150 - Industrial Print Reading

The beginning level aspects of reading industrial prints such as drawing notes, title blocks, revision blocks, legends, schedules, multiviews, and parts list.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ETD 2218 - Geometric Dimensioning and Tolerancing

An introductory course in geometric dimensioning and tolerancing using the geometric method nationally accepted according to ASMEY 14.5M. Topics covered include: definition and terms, symbols, datum referencing, locational tolerancing, form tolerancing, profile tolerancing, orientation and runout tolerancing, and math for positional tolerancing.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Summer) Prerequisite(s):
ETD 1217 or equivalent.

ETD 2350C - AutoCAD III

An advanced course designed to help students develop proficiency in the area of computer aided drafting and systems drafting. Topics covered include: transfer drawings, digitized drawings, explanatory drawings, multiview projections, exploded assemblies, pictorial drawings, auxiliary views, sections, details, geometric dimensioning and tolerancing, and CADD concepts.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ETD 1340C .

ETD 2357C - Inventor I

A basic course in Parametric Solid Design using AutoDesk Inventor Software. Topics include: basic concepts of parametric part sketching 3D part creation, Revolve, Sweep and Lofted features, shell and coil, surface creation, sheet metal and orthographic drawing production.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

ETD 2358C - Inventor II

The second course in a series designed to develop skill and proficiency in Parametric Solid Design, using Inventor Software. Topics include: sheet metal modeling, assembly concepts, assembly modeling approach and tools, advanced constraints, motion simulation, adaptive technology and drawing presentation.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
ETD 2357C .

ETD 2364C - SolidWorks I

A basic course in Parametric Solid Design using SolidWorks Software. Topics include: basic concepts of parametric part sketching 3D part creation, Revolve, Sweep and Lofted features, shell and coil, surface creation, sheet metal and orthographic drawing production.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

ETD 2368C - SolidWorks II

The second course in a series designed to develop skill and proficiency in Parametric Solid Design, using SolidWorks Software. Topics include: sheet metal modeling, assembly concepts, assembly modeling approach and tools, advanced constraints, motion simulation, adaptive technology and drawing presentation.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
ETD 2364C or higher or equivalent.

ETD 2371C - 3D Printing I

This course will develop elements of creative thinking and problem solving used in the design process, including the techniques and methods used to construct prototypes and models. In the project aspect of this course, the students select a field of specialization to explore methods and materials in a number of options in industrial environment with the use of computer simulation, modeling, and rapid prototyping.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ETD 2364C or ETD 1355C or ETD 2357C or permission of instructor.

ETD 2372C - 3D Printing II

The student will continue to develop elements of creative thinking and problem solving used in the design process, including the techniques and methods used to construct prototypes and models. In the project aspect of this course, the students expand their knowledge in the methods and materials and of computer simulation, modeling, and rapid prototyping.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
ETD 2371C or permission of the instructor.

ETD 2731 - Mechanical Drafting II

A course that continues and completes the student's study of the fundamentals intrinsic to all types of drafting. Topics covered include isometric, diametric, trimetric, oblique, and perspective projection, descriptive geometry, auxiliary views, related

mathematics, precision dimensioning developing computer-aided drafting skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ETD 1112 or equivalent.

ETD 2735 - Mechanical Drafting III

A course that continues and completes the student's study of the fundamentals intrinsic to all types of drafting. Topics covered include: isometric, diametric, trimetric, oblique, and perspective projection, descriptive geometry, auxiliary views, related mathematics, and precision dimensioning developing computer-aided drafting skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ETD 2218 and ETD 2731 or equivalent.

ETD 2905 - Independent Study – Drafting

Practical treatment of special geometry, graphics, and design with emphasis on individual work projects utilizing such graphical techniques as orthographic projection, perspective drawing, auxiliary views, topographic drawing, and graphing.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
EGN 1111C and ETD 1112 or permission of instructor.

Note:
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.
* This course may be taken up to four times for credit.

ETI 1420 - Properties of Materials and Processes

This course is designed to provide the student with an introduction to the basic properties of materials, principles and processes in the metal working, tools and machinery involved in the manufacture of metals. This course covers non-chip producing and chip producing manufacturing processes.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

ETI 1710 - Occupational Safety

A basic course in occupational safety and health covering such topics as: theories of accident causation, workplace hazards, hazard analysis and prevention, accident reporting, OSHA, ergonomics, product safety, workers' compensation, and stress on the job.

Credit Hour(s): 3 Credit Hours When Offered: (Spring, Summer, Fall)

ETI 2110 - Total Quality Tools

This course prepares students to effectively solve business/process/product problems, track process performance, find process and product improvement opportunities, and validate improvements made, using the necessary intellectual tools and procedures including: Five-S, flow charting, Pareto analysis, cause and effect diagrams, histograms, check sheets, scatter diagrams, stratification, statistical process control, failure mode and effects analysis. Pre-requisite ETM 1010C and co-requisite ETD 2150 .

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prereq/Corequisites:
ETM 1010C and ETD 2150

ETI 2408C - Welding Fundamentals

This course teaches basic welding processes and techniques for entry-level maintenance technician positions. Students learn welding safety, fundamental practices of shielded arc welding, arc welding with consumable and non-consumable electrodes, brazing, soldering, and plasma cutting.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

ETI 2419C - Advanced Concepts of CNC Machines and CNC Machining Practices

This course is designed to provide the student with advanced concepts in CNC machines and CNC machining to include: theory, operation, setup, safety, and practices.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
PMT 2261C or PMT 2262C

ETM 1005C - Basic Mechanical Operations

This course takes a hands-on approach to the identification, use, care of tools, equipment, blueprint reading, geometric dimensioning, and tolerances used in all aspects of operations and manufacturing.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prereq/Corequisites:
ETI 1420

ETM 1010C - Mechanical Measurement and Instrumentation

This course provides the foundation for mechanical and electronic measurement techniques used in manufacturing environments. The course will integrate the concepts, principles, and techniques of mechanical measurement with the use of various types of instruments including micrometers, verniers, calipers, height gages, digital multimeters and other types of measuring equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

ETM 1315C - Hydraulics & Pneumatics Fundamentals

This course introduces the student to basic hydraulic and pneumatic fundamentals. Instructional topics will include components, fluid pressure and flow and basic circuit design and application.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

ETS 1542C - Introduction to Programmable Logic Controllers

This is an introductory course in Programmable Logic Controllers (PLCs.) The student will learn basic concepts with a focus on programming and practical applications.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
EET 1084C

EVR 1001C - Environmental Science

A study of the physical and biological environment and man's ecology with emphasis upon contemporary biological problems.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Offered as needed) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

EVR 1940 - Internship, Environmental Science

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

Minimum grade of "B" in any college level science course and permission of instructor.

FFP 1140 - First Responder for Public Safety Personnel

This course introduces the student to the skills and techniques used for first response to medical emergencies. Classroom instruction includes a variety of medical related topics encountered by public safety personnel. Practical exercises and scenarios are included to enhance classroom instruction and skill development.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 1505 - Fire Prevention Practices

This course is a survey of the principles of fire prevention and investigation. It includes a study of fire hazards in various occupancies; a review of fire prevention codes; a study of procedures and techniques of fire prevention inspection, to include surveying and mapping, recognition and elimination of fire hazards, public relations, methods of determining the area of fire origin, fire cause, fire spread and location and preservation of evidence.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 1540 - Private Fire Protection Systems

This course is a survey of the principles of fire prevention and investigation. It includes a study of fire hazards in various occupancies; a review of fire prevention codes; a study of procedures and techniques of fire prevention inspection, to include surveying and mapping, recognition and elimination of fire hazards, public relations, methods of determining the area of fire origin, fire cause, fire spread and location and preservation of evidence.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 1702 - Principles of Emergency Services

This course provides an overview to fire protection; career opportunities in fire protection and related fields; philosophy and history of fire protection/services; fire loss analysis, organization and function of public and private fire protection services; fire departments as part of local government; laws and regulations affecting the fire service; fire service nomenclature; specific fire protection functions; basic fire chemistry and physics; introduction to fire protection systems; introduction to fire strategy and tactics.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 1740 - Fire Service Course Delivery

The curriculum draws from many recognized authorities in exploring the methods and mechanics of imparting information and adult learning principles. The course emphasizes techniques which have wide application in teaching situations, as well as devices for specific areas. Also stressed are measuring teaching effectiveness, the use of media and visual aids.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 1800 - Disaster Education for Individuals and the Community

This course provides a study of the design, development, and delivery of public disaster safety education and programs including: methods of identification of disaster safety programs, the selection of target programs and strategies of affect reduction, methods of designing and implementing information and educational programs, and methods of evaluating a program's impact. Studies include theoretical and practical skills training in individual, group, and mass media communications, instructional skills, planning priorities, and evaluation techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 1801 - Introduction to Emergency Management Administration

This course will discuss emergency management practices and how they relate to natural and man-made disasters. It is designed to help the student develop an understanding of overall emergency management principles, practices, and standards in the local, national, and international environments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 1810 - Firefighting Tactics and Strategy I

This course is a study of the principles utilized on the fire ground for maximum manpower and equipment utilization; fire ground administration starting with a small fire on up through major conflagrations. Emphasis will be on developing thinking skills in relation to crises.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 1890 - Emergency Management Principles for Tourism and Hospitality Industry

This course analyzes emergency management functions and responsibilities within the tourism and hospitality industry. Particular emphasis is placed in the areas of administration, organization, communications, and human relations. Students will learn how historical mistakes can influence human response to disaster situations, and some of the current legal and human challenges posed when dealing with disasters.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 2120 - Fire Service Building Construction

The curriculum draws from many recognized authorities in exploring the methods and mechanics of imparting information and adult learning principles. The course emphasizes techniques which have wide application in teaching situations, as well as devices for specific areas. Also stressed are measuring teaching effectiveness, the use of media and visual aids.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 2610 - Fire Behavior and Combustion

Study of cause and origin of fires with emphasis on fire inspector's or fire officer's role in the investigation process. The course deals with determination of fire cause and origin, collection of evidence, and investigator's preparation for trial.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 2780 - Fire Department Administration

The course is designed to present the principles of management theory, and its application in the fire service. The course is intended for officers whose area of responsibility encompasses long and short range planning, budgeting and administration.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FFP 0010 and FFP 0020

FFP 2820 - Emergency Preparedness

This course teaches all aspects of emergency preparedness and planning related to natural and man-made disasters, and basic principles of emergency management. Planning concepts and the planning process will be discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 2823 - Technical Applications in Emergency Management

This course explores issues and problems associated with the use of technology in emergency management. It examines strategies to overcome these issues and problems. Some of the subjects treated are use of the Internet, spatial analysis applications in vulnerability analysis, decision support systems, and emerging technologies.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 2834 - Societal Issues in Disaster Management

This course examines human response to disaster events, including political and economic factors influencing vulnerability. It examines how individuals and institutions make decisions at all levels of disaster response, it is an introduction to current research pertaining to the sociological aspects of disaster, and it will provide increased awareness of the potential and difficulties in using social science research as a basis for modifying public policy.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FFP 2841 - Contingency Planning for the Private Sector

This course is designed to assist students in developing effective public sector plans by using the National Incident Management System and the Incident Command System templates. The curriculum includes case studies and development procedures for private sector logistics management and employee support planning.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

FOS 2201 - Food Service Sanitation Management

Acquaints students with the National Restaurant Associations' ServSafe® Food Protection Manager Certification information, Food and Drug Administration's Food Code as well as the challenges and opportunities facing the hospitality and culinary industries in the areas of sanitation and safety management. The class presents a systems approach to sanitation management, utilizing the Hazard Analysis Critical Control Point Program (HACCP), and provides a basic understanding of quality sanitation management. The curriculum is based on the National Restaurant Associations' ServSafe® Food Protection Manager Certification information. Students will sit for the ServSafe® Food Protection Manager exam at the end of this course.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

FRE 1120 - French I

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

FRE 1121 - French II

Pronunciation and grammatical structures of French, with emphasis upon balanced development of all four skills – listening, speaking, reading and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
FRE 1120 or an equivalent course with a grade of "C" or better.

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

FSS 1001 - Culinary Techniques

Emphasis in this course will be placed on the basic methods and chemistry of cooking. Students study ingredients, cooking, theories, terminology, equipment, technology, weights and measures, formula conversions and work on cooking skills and procedures.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
FOS 2201

Corequisite(s):
FSS 1202L

FSS 1120 - Food and Beverage Purchasing

Study of purchasing and inventory control functions used for the proper acquisition of all foods, beverages and disposables used in the hospitality industry. This includes the development of purchase specifications, determination of order quantities, executing supplier price comparisons, employing proper receiving procedures, managing product storage functions, and developing proper product issuing procedures. Emphasis on product cost analysis, yields, pricing formulas, controls, and record-keeping at each stage of the purchasing cycle.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

FSS 1202L - Food Production I

Students will acquire knowledge and skill in the preparation of food. Included are basic principles and techniques of food preparation, management of resources, use of recipes, use and care of equipment, and evaluation of food products. The course emphasizes safety and sanitation practices.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
FOS 2201

Corequisite(s):
FSS 1001

FSS 1221L - Food Production II

Students will focus on the knowledge and preparation of meats, poultry, seafood, as well as starches, fruits and vegetables. Students will learn to prepare menus for special dietary needs. This course will utilize all dry and moist methods of cooking. Menu selection and balance will be studied. The course emphasizes safety and sanitation procedures.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
FOS 2201 and FSS 1202L with a grade of "C" or better.

FSS 1246L - Baking and Pastries I

Students apply the fundamentals of baking science and pastry preparation to produce a variety of bread products and pastries. Special emphasis is given to the application of advanced techniques in bakery management and the use and care of equipment found in bake shops. Preparation of breads and rolls, classical cakes and icings. Student must pass written and practical baking examination covering a variety of techniques and procedures.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
FOS 2201

FSS 1250C - Dining Room Management & Service

The class will learn and implement the service appropriate for restaurant a la carte dining. Focus on principles for dining service, sanitation and presentation of the dining room, review of menus and customer expectations and guest service will be covered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall)

FSS 2240L - Classical Cuisine

Students prepare and learn the skills and management theories involved in classical dishes. Concentration is on the basics of classical cuisine, such as stocks, soups, and sauces. Attention is given to the management tasks of portion control, costing and presentation. Special emphasis is given to classics such as emulsion sauces, thickening agents, and sauces derived from the Mother sauces. Student must successfully pass written and practical examination covering a variety of techniques and procedures.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
FSS 1221L

FSS 2241L - International and Regional Cuisine

Students will learn quantity food production by preparing multi-course ethnic meals typical of several cultures during the semester to live guests.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
FOS 2201 (Sanitation and Safety Management), FSS 1202L (Food Production I) with a C or Better, FSS 1221L (Food Production II) with a C or Better

FSS 2251 - Food and Beverage Management

An application of principles in commercial and institutional food and beverage facilities including marketing, menu development, effective cost control in purchasing, pricing, labor and service technique. Procedure, approaches and techniques of management are explored and developed as they relate to commercial and institutional food and beverage facilities and personnel.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

FSS 2284C - Catering, Banquet and Event Management

Students will be taught the logistics of preparation, production, transportation, and implementation of the catered event, including analysis of typical banquet/event contracts. Students learn to determine cost of the project. Emphasis is given to menu planning for various types of banquets, theme buffets, and physical management of floor lay-out and table setup. Training techniques for supervisors in dining room and banquet service is practiced. Development of stewarding and production checklists is practiced.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

FSS 2500 - Food and Beverage Cost Control

This course focuses on the principles and procedures involved in an effective control of food, beverage and labor costs for the hospitality industry. This course provides the fundamentals for gathering information, developing performance goals and procedures, assessing and evaluating the information and applying the results to maintain efficient food, beverage and labor cost control. This course includes the examination and analysis of hospitality Profit and Loss Statements used to evaluate operational performance.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

FSS 2942 - Culinary Internship

The Program Director has the discretion to provide override approval as it relates to the waiver of required program/discipline-related courses. This course provides a planned work-based experience that will provide students with an opportunity to fine- tune skills learned in coursework and enhance workplace skills through supervised practical experiences related to their career objectives. Internship requires a minimum of 135 clock hours of work. May be repeated for credit, but grade forgiveness cannot be applied.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
FOS 2201 ,FSS 1202L with a grade of "C" or better, and FSS 1221L with a grade of "C" or better.

GEA 1000 - World Regional Geography

The course introduces the student to geographic regional studies. It will combine the concepts of physical geography and cultural, economic, and human geography as it applies to the differing regions of the world. It will show the relationships between the regional environment and the people who live there, between settlement patterns, economic patterns and cultural patterns within each region; and, using current events, it will show the impact of other phenomena upon those regions and their people.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

GEB 1011 - Introduction to Business

Designed to give students a broad understanding of the nature of business and a preliminary idea of the various areas of business specialization.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1214 - Business and Supervision Terminology

This course is designed for students to achieve mastery of the special vocabulary, jargon, and concept terminology associated with general business and supervision in the modern workplace. Students will apply the terms in common workplace scenarios and hypothetical situations, as well as in standard written documents and assignments.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 1940 - Internship - Business

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Active enrollment in an appropriate technical degree program and permission of the instructor. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:
This course may be taken up to two times for credit.
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

GEB 1942 - Internship Business

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

GEB 2430 - Business Ethics

This course addresses the legal, moral, and societal issues of ethical conduct in the business environment. Actual case studies are used to illustrate appropriate relationships among employers, employees, customers, stockholders, and other business stakeholders. Topics include: codes of ethics, laws and regulations related to ethics, conflict of interest, and moral philosophies associated with ethical conduct.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2947 - Academic Learning Field Studies I

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as Needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2948 - Academic Learning Field Studies II

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

GEB 2949 - Academic Learning Field Studies III

This course gives students the opportunity to understand the relationship of theory to practice through participation in a service-learning experience.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

GLY 2010C - Principles of Geology I

Survey of the composition and dynamic processes of the solid Earth. Topics include planetary geology, mineralogy and petrology, volcanism, surface environments and processes (ocean floor, coastlines, rivers, karst, glaciers, deserts), seismology, surface deformation, Earth’s interior, plate tectonics, and mountain formation. Laboratory exercises in mineral and rock identification, interpretation of geological landforms using topographic maps, earthquakes, and basic field methods. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2100C - Principles of Geology II

Survey of the physical and biological history of the Earth. Course is divided into two parts. First is a review of common minerals, rocks, and fossils; the use of stratified sedimentary rocks to reconstruct past environments and climates; and the theory of plate tectonics. Second is an overview of the origin and early evolution of the Earth, tectonic formation of continents and oceans, and life through time (first appearance of life, early life in the ocean, Age of Dinosaurs, the Great Ice Age, and the appearance of the first humans). Field and laboratory work in mineral, rock, and fossil identification, description of stratigraphic sections in the field, and geologic map construction and interpretation. Local or regional fieldtrips offered.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

GLY 2601C - Introduction to Paleontology

This course is a survey of prehistoric life. Topics include fossilization, systematics, evolution, ecology, extinction, and the geological history of life. Laboratory work covers the anatomy, classification, and ecology of major phyla of both extinct and extant organisms, including monerans, protists, plant, macroinvertebrates, and vertebrate animals. The course involves local and regional fossil collecting trips.

Credit Hour(s): 4 Credit Hours When Offered: (Fall or Spring)

GRA 1151C - Illustration I

A beginning course to develop basic technical and conceptual skills with a focus on an industry-standard vector-based drawing program. Students will create logos and illustrations typical of graphic design challenges.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

GRA 1152C - Illustration II

An advanced graphic design course building upon the skills covered in Illustration I; the course includes increased challenges relating to conceptual skills and multi-software integration relating to typical print-based design problems. Access to an appropriate high quality digital camera is required.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
GRA 1151C .

GRA 2140C - Multimedia I

An advanced course covering the development of multimedia projects incorporating a variety of digital media elements. Students will learn an industry standard digital video editing application and the aesthetic and technical considerations involved in content acquisition. Access to a miniDV camcorder suggested.

Credit Hour(s): 4 Credit Hours When Offered: (As Needed) Prerequisite(s):
ART 2602C , GRA 1151C and PGY 1801C .

GRA 2141C - Multimedia II

An advanced course covering principles of design and information architecture surrounding interactive multimedia presentations. Students will learn an industry standard interactive DVD media authoring software application. Students will produce a finished interactive DVD.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
GRA 2140C .

GRA 2190C - Graphic Design I

An intermediate graphic design course that focuses on using an industry standard page layout software application. Students will be exposed to the ideas and aesthetics involved in the production of print publications. Access to a high quality camera digital camera is required. It is recommended that students take PGY1801C at the same time or prior to taking this course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

GRA 2191C - Graphic Design II

An advanced Graphic Design course covering the aesthetics and challenges associated with producing complex multi-page printed communications. Access to an appropriate high quality digital camera required.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
GRA 1151C , GRA 2190C , PGY 1801C .

GRA 2900 - Independent Study – Graphic Art

This course covers the practical treatment of Graphics/Printing Technology. Emphasis is on individual work projects.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
GRA 1151C or PGY 1801C

GRA 2905 - Independent Study – Graphic Design

The student will initiate independent computer related work, utilizing various software and hardware. The course may be taken four times for credit.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
GRA 1151C or PGY 1801C

GRA 2950C - Advanced Graphic Projects

An advanced Graphic Design course addressing common Graphic Design problems. Students will explore advanced software application functionality and creative, aesthetic, and portfolio development. Access to a high quality digital camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ART 2602C , ART 2603C , GRA 1151C , GRA 2190C , PGY 1801C .

HFT 1000 - Introduction to Hospitality Management

This course is an overview of the hospitality industry, and the many different segments of the hospitality and tourism segments are discussed. Scope, size and industry trends are examined. Theories, examples and industry case studies are used to provide students with examples of problem solving tools of management. Basic industry terminology and management concepts are studied. The important role of service is stressed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 1250 - Hotel and Resort Operations

This course acquaints students with the operation of a hotel, motel and resort including front office procedures in registering, accounting for and checking out guests, promotional and sales practices, housekeeping, interior decoration, purchase of furniture, carpeting, linens and supplies, maintenance and engineering of a practical nature, facilities specifications, purchasing, and storage.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 1410 - Front Office Management

This course guides students through all the skills including directing the activities and solving the complex problems, needed to properly manage the front office of a hotel/motel/resort. The course also acquaints students with the operation of all the departments as they apply to their primary responsibility of selling rooms and serving guests.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 1500 - Marketing and Sales in the Hospitality Industry

How to sell and promote the many services the food service/lodging industries offer guests. Prepare and present the fundamentals of a marketing plan.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

HFT 2210 - Hospitality Management

Training in the techniques involved in the supervision of employees, developing sound relations with other departments, group discussions, and methods of improvement and development of cost consciousness. Job Analysis and job description techniques are developed. The course explores issues that make managing tourism and hospitality (T&H) businesses different to businesses

in other sectors. These issues are faced by small and large T&H businesses alike: from owner-operator cafés, motels or tourism businesses to multi-national hotel chains, international airlines or tour companies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HFT 2223 - Human Relations and Supervisory Development

Designed to provide specific application of proven training systems and methods for managers in the hospitality industry.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

HFT 2600 - Hospitality Law

Nature and function of our legal system as it applies to the operations of the hospitality industry. Innkeeper-Guest relationship, Contracts, Condominium Association contracts, Torts, Civil Rights, insurable risks are emphasized.

Credit Hour(s): 2 Credit Hours When Offered: (Fall)

HFT 2941 - Hospitality Internship

This course consists of on-the-job experience supplied by the hotel-motel-resort- restaurant industries. Job placement will be dependent upon the availability of participating hospitality institutions. The course consists of 60 hours per semester of on-the-job instruction accompanied by a seminar class.

Credit Hour(s): 2 Credit Hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HFT 2942 - Hospitality Internship

This course, an extension of Hospitality Internship (HFT2941), consists of on-the-job work experience supplied by the hotel, motel, resort and restaurant industries. Students will concentrate on 3 specific areas or functions that are career-goal oriented. Job placement will be dependent upon availability of participating hospitality institutions. The course consists of 150 hours of on-the-job instruction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):
HFT 1000 , FOS 2201 , HFT 1410 , and HFT 1250

HIM 1000 - Health Information and Delivery Systems

Orientation to medical records history and professional associations. Confidentiality, filing, retrieving, indexing, numbering, storage and content of the medical record is also discussed. The course includes job search skills and professional job performance.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1012 - Health Care and Legal Compliance

In-depth study of federal, state, local laws governing preparation, and use of the healthcare record in the healthcare delivery system.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 1432 - Pathopharmacology

Introduction to the nature, cause, and treatment of disease entities and the body's defense mechanisms. Commonly used drugs will also be discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2253 - CPT Coding - Part 1

Instruction and practice in basic CPT coding conventions, principles of classifying physician services using current procedural terminology (CPT-4), APC, and auditing procedures. Ethical standards of practice will be analyzed.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

HSC 1531 and HIM 1432 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:

BSC 2020C OR (BSC 1085C AND BSC 1086C)

Note:

(Previously listed as HIM1253)

HIM 2272 - Healthcare Reimbursement

Emphasis on billing regulations for the State of Florida. Course content includes LMRPS, Workers' Compensation laws, Florida Medicare, and claims for automobile accident injuries.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):

HIM 2253 and HIM 2724 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2291 - CPT Coding Part 2

This is an advanced course in ICD, CPT and HCPCS coding systems. Students will learn guidelines and applications to more complex case studies and health records according to current ethical standards of practice, inpatient and outpatient prospective payment systems, encoding software and RBRVs.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):

HIM 2253 is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:

HIM 2724 - ICD Coding Part 1

This course provides a foundation using ICD-10-CM/PCS coding conventions, rules, methodology and sequencing, data sets, documentation requirements, and coding resources.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

HSC 1531 and HIM 1432 are required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:

BSC 2020C OR (BSC 1085C AND BSC 1086C)

HIM 2729 - ICD Coding Part 2

This course focuses on assigning appropriate ICD, DRG, and Level II (HCPCS) codes to a wide range of original source medical documents. This course increases the quality of code selection by applying the decision process in problem solving using well-defined medical record review methods and guidelines. Ethical practices will be discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

HIM 2724 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

HIM 2815C - Professional Practice Experience

Working in a simulated, online environment, students will endeavor to code and bill using nationally recognized, American Health Information Management Association (AHIMA) simulation software.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

Prereq/Corequisites:
HIM 2291 HIM 2729

HIM 2931C - Special Topics in Health Information Technology

This course is a review of skills and work processes to support classification and coding to become nationally certified in-field. Effective test-taking strategies for certification exams and employability skills will be discussed.

Credit Hour(s): 1 Credit Hour When Offered: (Summer) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

Corequisite(s):
HIM 2291 and HIM 2729

Note:
* This college credit course is not intended for transfer and may not be applied toward the A.A. degree.

HLP 1081 - Wellness: Practice and Theory

A course designed to promote wellness through assessment, instruction and fitness programs which, if applied, will enable the individual to achieve and/or maintain a high quality of health and fitness throughout life. Based on assessment test results a physical examination by a physician may be recommended.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

HSA 1100 - Introduction to Health Care

This course provides an overview of the United States Healthcare System, including the economic, social, political, and technological forces that shape the industry. The role of state and federal government and regulatory agencies in healthcare delivery is examined. The fundamental roles and responsibilities of healthcare team members are surveyed. Healthcare safety, security, and infection control procedures will also be discussed.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1100 - Health Education

A systematic and comprehensive coverage of basic factual material, concepts, terminology, and important trends in major health areas of concern today.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

HSC 1400 - First Aid

Preparation to meet emergencies that occur in the school, home or on the highway. Instruction and practice in dressing and bandaging, care of wounds, shock, bone and joint injuries, cardiopulmonary resuscitation, transportation of the injured oral poisoning and other medical emergencies.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

HSC 1531 - Medical Terminology

An introduction to prefixes, suffixes, root words, combining forms, Latin and Greek forms, spelling, and pronunciation, with

emphasis on building a working medical vocabulary based on body systems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

Knowledge of basic computer and keyboarding skills are strongly recommended.

HUM 1020 - Humanities – Introduction

A chronological survey of techniques and forms related to art, dance, film, literature, music, philosophy, religion and theater. Art works and selected readings are utilized as much as possible. The course includes Writing-Across-the-Curriculum and Speaking-Across-the-Curriculum. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 1905A - Independent Study – Arts and Humanities

A defined independent study which is pursued under supervision of a faculty directing teacher and recorded through departmental procedures. Designed to permit a student to pursue nonscheduled academic and laboratory work which may be of a specialized or advanced nature and not available through classes or courses available on a college schedule. Departmental approval is required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of "C" is also required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):

approval from department chair, a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

HUM 2250 - Humanities – A Contemporary Perspective

This course is an integrated study of the artistic, cultural, philosophic, religious, social, and technological influences that shape modern western cultures in the modern era. The focus will begin with the 20th century and follow, chronologically, the issues of the modern era. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUM 2700 - Humanities – Foreign Study

A variable humanities content course designed to allow students first-hand learning experiences outside the United States. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

HUN 2201 - Nutrition

The role of nutrients in maintenance of physiological well-being. Application of nutrition principles to the individual and family as well as to some selected problems.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

ISC 1003 - Natural Disasters – Causes, Consequences, Human Response

This interdisciplinary course investigates natural catastrophic events, such as earthquakes, volcanic eruptions, tsunamis, hurricanes and floods. This class will use an environmental studies approach to examine how modern society exacerbates the damage caused by these natural phenomena and methods to mitigate human suffering. The student will gain an appreciation of humankind's relationship to the natural environment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

LEI 1544 - Outdoor Recreation Management

This course examines the fundamental influences on outdoor recreation. The course also provides information on hazards, conservation considerations, and safety factors in planning and organizing outdoor recreations. Basic first aid, CPR, and AED training is incorporated as it pertains to outdoor recreation. Field trips may be assigned as warranted.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

LIN 1670 - Writing and Grammar

The course includes practice in writing short essays and encompasses a comprehensive review of grammar and mechanics. This course is strongly recommended for students who have completed Developmental Writing, those who want a preparation for Composition, or those who score 103-116 on the PERT.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
A passing score on the standardized placement test measuring communications/verbal achievement, successful completion of any required developmental English coursework with a minimum grade of "C", or exemption from placement testing.

LIS 1001 - Library Skills

A self-paced course on how individual students can make effective and efficient use of library resources. Students develop the basic information literacy skills necessary for college coursework, general research, and for lifelong learning in an information centered society.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

LIS 2004 - Introduction to Internet Research

Introduction to Internet Research is a one-credit hour course offered only online. The course focuses on methods of accessing information resources available through the internet. Students learn to design search strategies, retrieve, evaluate, and cite internet resources.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
a full service Internet account, including an electronic mail address from an Internet Service Provider (ISP), or access through a corporate or educational institution prior to beginning the course.

LIT 2090 - Contemporary Literature

Studies in contemporary literature, focusing on comments on modern man. May be used as Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered as needed) Prerequisite(s):
ENC 1101 .

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2100 - World Literature: Antiquity through the Renaissance

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from antiquity through the Renaissance, that reflect cultural and intellectual heritage. May be used as a Humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet the Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):
ENC 1101 .

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

LIT 2120 - World Literature: Renaissance through the Present

Designed to encourage students to know and appreciate the great literature that helps to mold their thinking and everyday living. Includes, without regard to national origin, those masterpieces of world literature, from the Renaissance to the present, that reflect cultural and intellectual heritage. May be used as a humanities credit. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered, Fall, Spring, Summer) Prerequisite(s):
ENC 1101 . (Note: LIT 2100 is not a prerequisite for this course)

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MAC 1105 - College Algebra

This is a function-based college algebra course which includes the following topics: functions and functional notation; domains and ranges of functions; graphs of functions and relations; operations on functions; inverse functions; linear, quadratic, and rational functions; absolute value and radical functions; exponential and logarithmic properties, functions, and equations; systems of equations and inequalities; and applications of functions (curve fitting, modeling, optimization, exponential/logarithmic growth and decay). Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):
Completion of MAT 1033A or equivalent with a "C" or better or appropriate placement score.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 1114 - Trigonometry

This is the second course in a Pre-calculus sequence which includes the following topics: definitions, graphs, and properties of the six trigonometric functions and their inverses; trigonometric identities; solving trigonometric equations; solving right and oblique triangles and applications; complex numbers; vectors; and the polar coordinate system. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
completion of MAC 1140 with a grade of “C” or better or equivalent; or appropriate placement score. This course may be taken concurrently with MAC 1140 with special permission of the Mathematics Department.

MAC 1140 - Pre-Calculus Algebra

This is the first course in a two-course Pre-calculus sequence which includes the following: equations and inequalities; linear, quadratic, logarithmic and exponential functions and relations; systems of equations; matrices and determinants, mathematical proof techniques, including mathematical induction; binomial theorem; sequences and series; and applications of algebraic techniques in the real world. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
completion of MAC 1105 with a grade of “C” or better, or equivalent; or appropriate placement score.

MAC 2233 - Business Calculus

This is a calculus course covering limits, continuity, differentiation, and integration with emphasis on business applications. There is some mathematical theory; but, in general, topics are approached from an intuitive and applied point of view. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Completion of MAC 1140 with a grade of "C" or better; or completion of MAC 1105 with a grade of "C" or better, and a "C" or better in another Gordon Rule Mathematics course; or appropriate placement score.

MAC 2311 - Calculus I

This is the first course in a three-course sequence. The course covers the following: limits and continuity, rules of differentiation, chain rule, derivatives of trigonometric, inverse trigonometric, logarithmic, and exponential functions, applications of derivatives to

curve sketching, L'Hopital's Rule, indeterminate forms, and maxima/minima problems, mean value theorem, Rolle's theorem, definite and indefinite integrals, Fundamental Theorem of Integral Calculus, area, and applications of integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):
Completion of MAC 1140 and MAC 1114 with a grade of "C" or better or equivalent; or appropriate placement score.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MAC 2312 - Calculus II

This is the second course in a three-course sequence. The course covers the following: techniques for finding areas, volumes, arc lengths and surface areas, methods of integration, including integration by parts, trigonometric substitution, and partial fractions, improper integrals, conic sections, graphing and area in polar coordinates, infinite sequences and series, tests for absolute and conditional convergence of series, and power series. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
completion of MAC 2311 with a grade of “C” or better or equivalent.

MAC 2313 - Calculus III

This is the third course in a three-course sequence. The course includes the following topics: vectors, lines and planes in space, quadric surfaces, vector-valued functions and motion in space, functions of two or more variables, partial derivatives, gradients, directional derivatives, and their applications, multiple integrals in rectangular, cylindrical, and spherical coordinates, and their applications, line integrals, and surface integrals. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
completion of MAC 2312 with a grade of “C” or better or equivalent.

MAD 2104 - Introduction to Discrete Mathematics

This course is designed for those students who are majoring in computer science, mathematics, engineering, mathematics education, and other highly technical fields. Topics include formal logic, set theory, combinatorics, mathematical induction, relations and functions, recursion, and graph theory. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
a grade of "C" or better in MAC 1140 . A course in programming is recommended.

MAN 2021 - Management

Each function of management is analyzed and described in a systematic manner. Both the distilled experience of practical managers and the findings of scholars are presented. Other aspects of management are presented such as management process and concepts analysis of the technical knowledge and skills of managers, influences upon managerial decision-making process, and the psychological principles inherent in management.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MAN 2300 - Personnel Management

An introduction to personnel practices and procedures. Topics include the personnel management system, maximizing employee potential, organizational behavior, and labor management relations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MAP 2302 - Differential Equations

This course provides an introduction to ordinary differential equations with an emphasis on first and second order linear equations and applications. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
either completion of MAC 2313 with a "C" or better or concurrent enrollment in MAC 2313 . Equivalent courses from other institutions may be used to meet the prerequisite.

MAR 2011 - Introduction to Marketing

An introductory course in the field of marketing including a look at marketing as it exists in our economy today. Consideration of the market, the product, distribution channels. Special emphasis on the study of human behavior in marketing promotion.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MAS 2103 - Linear Algebra

This is an introductory course in Linear Algebra intended to give students enough insight to enable successful pursuit of more abstract mathematics courses. This course includes the study of matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, eigenvalues, and eigenvectors. Exercises using MATLAB will be required. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
completion of MAC 2312 with a grade or “C” or better, or equivalent.

MAT 1033A - Intermediate Algebra

This is an intermediate algebra course designed to prepare students for general education mathematics/statistics courses. This course emphasizes concepts, techniques, and applications of the following major topics; factoring, algebraic functions, radicals and rational exponents, complex numbers, quadratic equations, rational equations, two-variable linear equations/inequalities and their graphs, systems of linear equations and inequalities, and an introduction to functions. This course may be used as an elective, but does not meet Gordon Rule requirements for B.A.S., A.A., or A.S. transfer students.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring mathematics achievement, successful completion of MAT 0028 with a grade of "C" or better, or exemption from placement testing.

MAT 1033L - Intermediate Algebra Laboratory

A hands-on lab designed to improve students' chance for success in the MAT1033A Intermediate Algebra course. Students will work to strengthen skills required to master the topics covered in Intermediate Algebra. The topics include, but are not limited to, factoring, algebraic functions, radicals and rational exponents, complex numbers, quadratic equations, rational equations, two-variable linear equations/inequalities and their graphs, systems of linear equations and inequalities, and an introduction to functions

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
MAT 0028 or equivalent with a grade of "C" or better, or a score of 110-122 on the PERT, or on an elective basis with a score of 123 or higher on the PERT.

Corequisite(s):
MAT 1033A

Note:
*Students scoring 110-113 on the PERT may enroll in MAT 1033A if they also enroll in MAT 1033L. Students should see an

academic advisor.

MAT 2905 - Applied Teaching Techniques for Mathematics

The goals of this course are: refinement or acquisition of mathematics skills and connections between mathematics topics needed for successfully tutoring in an academic setting; acquisition of general methods of tutoring as well as specific tutoring techniques needed for specific courses. Teacher-tutor seminars, teacher-tutor conferences, and formal instruction will supplement the extensive tutoring experiences. Prerequisite: Consent of the department. A minimum grade of "C" is required.

Credit Hour(s): 4 Credit Hours When Offered: (Summer) Prerequisite(s):
Admission to the BS Middle Grades Math degree program

MCB 2010C - Microbiology, Allied Health

This course is designed for students entering programs in the numerous health fields, but primarily for pre-nursing students. The material presented covers the fundamentals of microbiology needed to understand the biology of infectious diseases and the agents that cause them. Not recommended for biology, pre-med, pre-vet, and dentistry.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
CHM 1020 or CHM 1045C or BSC 1005 or BSC 1010C or BSC 1085C .

MET 1010C - Introduction to Meteorology

Structure of the atmosphere; weather processes, systems and phenomena; climate and climatic change, economic impact of weather. May be used to satisfy the AA degree Physical Science requirement for career goals other than sciences, engineering and pre-professional fields.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer)

MGF 1106 - Practical Applications of Mathematics

This course is designed for those students requiring only general education mathematics courses. It includes systematic counting, probability, statistics, history of mathematics, geometry, sets, and logic. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):
Students who are exempt from placement testing may enroll in this course with no prerequisites. Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 114 or higher on the math section of the PERT OR (2) successful completion of MAT 0022 or MAT 0028 with a grade of "C" or better or equivalent or higher mathematics course.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

MGF 1107 - Math in Society

This course is designed for those students requiring only general education mathematics courses. Topics include numeration and mathematical systems, number theory, linear and exponential growth, history of mathematics, voting techniques, graph theory, and consumer mathematics. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):
Students who are NOT exempt from placement testing may meet the prerequisite through any one of the following: (1) 123 or higher on the math section of the PERT OR (2) successful completion of MGF 1106 with a grade of "C" or better or equivalent or higher mathematics course OR
(3) concurrent enrollment in MGF 1106

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as

meeting the state Core General Education requirements.

MKA 2021 - Professional Selling

Selling, correct attitudes and personal attributes for dealing with the public on a business or professional basis.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2041 - Retail Management

This course covers retail store management, location, buying merchandise, control policies, services, pricing, expenses, profits, training and supervision of retail sales forces, and administrative problems. Also includes a variety of current perspectives in retailing management.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MKA 2511 - Introduction to Advertising

Advertising as a marketing tool, its planning, creation, and use. A survey of copy writing, layout, and media (newspapers, magazines, radio, television, films, etc.)

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1161 - Customer Service

Designed to build and maintain the critical skills necessary to be a dynamic and successful professional. Students and front-line individuals who work with customers every day will develop strategies to create positive customer relationships. This course provides a practical approach to the thorny issues of customer dissatisfaction and will enable managers to keep service personnel focused on the organization's goals and objectives.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 1345 - Supervision I

The course presents the functions of a personnel manager, philosophy of general management, organizational structure, employer socioeconomic climate and career information. Included also are job descriptions and specifications, recruiting practices, applications, resumes, interviewing, placement, performance appraisals, wage and salary administration and other related topics.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2100 - Organizational Behavior

Designed to help students develop an understanding of how they may be motivated to work together in greater harmony in all kinds of organizations. The basis of human motivation and how it is influenced by leadership, the organization itself, and the social environment in which the organization exists.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MNA 2141 - Leadership Techniques

This interdisciplinary course addresses leadership in a group setting and focuses on leadership development through discussion, readings, group and individual projects and other applied activities.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

MTB 1103 - Business Mathematics

This course presents basic principles used to solve everyday business problems, including a review of basic skills and business terminology. Topics in the course include the following: base, rate and percentage, trade and cash discounts, wage and salary administration, insurance (fire and automobile), depreciation and business profits, distribution of corporate dividends, simple interest and bank discount, and buying and selling of corporation bonds and stocks.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
completion of MAT 0028 with a "C" or better or satisfactory test scores. Knowledge of basic computer and keyboarding skills are strongly recommended.

MTG 2206 - College Geometry

This course emphasizes Euclidean geometry and its relationship to logic, trigonometry, and coordinate geometry. The problems, proofs, constructions, and graphs involve the following: line segments, angles, triangles, polygons, parallel and perpendicular lines, slopes of lines, circles, and similarity. Trigonometry is presented in terms of right triangle relationships. Logic is the basis for deductive reasoning in proofs of theorems. Lines and other geometric figures are graphed in the rectangular coordinate system. A minimum grade of “C” is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
completion of MAC 1105 or equivalent with a “C” or better.

MUL 1010 - Music Appreciation

Designed to develop a more intelligent understanding of and appreciation of music. By methodically surveying the main periods of Western Art Music from the Medieval Period through present day, this class will bring about an awareness of music as a vital source in human life, and will aid in developing positive attitudes toward culture and the fine arts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the- Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

MUM 1620 - Audio and Acoustic Fundamentals

Audio and Acoustic Fundamentals explores the basics of audio systems and equipment and the acoustical environment in which they are used. Emphasis is placed on equipment terminology, function and acoustical listening. The two basic fundamentals are summed together to begin laying the basic foundation required to operate audio and recording equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MUM 2300 - Introduction to the Music Industry

This course is an introduction to the history, principles, and practices of the music industry. Topics will include music publishing,

copyright, distribution, industry organization, producing, and general business functions.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

MUM 2600 - Recording Techniques I

This course is designed as an introduction to basic audio engineering and studio practices. Listening exercises, phychoacoustics, microphone characteristics, and studio etiquette will be studied. In addition the student will study techniques and practices and procedures of multi-track recording, acoustical balancing, editing, and over dubbing in a variety of situations.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prereq/Corequisites:
MUM 1620

MUM 2601 - Recording Techniques II

This course explores advanced multi-track recording skills and audio production techniques, edits, use of outboard equipment and live multi-track recording.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MUM 1620 , MUM 2600 .

MUM 2604 - Multi-Track Mixdown (Post Production)

This course explores the application of signal processing equipment as it relates to multi-track master mixdowns. In addition, software and hardware application of mixdown is applied to post-production practices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MUM 1620 , MUM 2600 , MUM 2601 .

MUN 1000 - Summer Ensemble Workshop

An ensemble workshop open to any student who desires to improve vocal and physical presentation skills. A variety of musical physical styles will be studied and performed. Students participating in Summer Ensemble Workshop will be expected to participate in several scheduled performances.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
experience in high school or a desire to learn.

MUN 1001 - Summer Ensemble Workshop II

An ensemble workshop and performance to improve vocal and physical presentation skills. A variety of musical physical styles will be studied and performed. Students participating in Summer Ensemble Workshop II will be expected to participate in several scheduled performances.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
MUN 1000 .

MUN 1002 - Summer Ensemble Workshop III

An ensemble workshop open to any student who desires to improve vocal and physical presentation skills. A variety of musical physical styles will be studied. Students participating in Summer Ensemble Workshop will be expected to participate in several scheduled performances.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
MUN 1000 , MUN 1001 .

MUN 1140C - Wind Ensemble I

An instrumental ensemble providing an outlet and learning experience to study and perform standard wind band literature, to

improve individual instrumental skills, and to sharpen ensemble techniques. The Wind Ensemble performs in both on and off campus venues.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
experience in high school or community band programs.

Note:
This course may be taken up to four times for credit.

MUN 1310 - Women's Ensemble

A music organization open through auditions to any student having experience in reading music. A variety of musical styles will be studied and performed. Students electing NWFSC Chorus will be expected to participate in scheduled performances.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
Experience in high school choruses or choirs.

Note:
This course may be taken up to four times for credit.

MUN 1340A - NWFSC Show Choir I

A study of the fundamental techniques and principles of integrating dance, voice, music and acting into a performance show choir. Training in voice, jazz movement, character interpretation and personality presentation is covered. Membership is open to all part-time or full-time students on a credit or audit basis. All music majors and performance majors must participate. The show choir appears in public performances at frequent intervals throughout the year.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
Audition, consent of department, music or performance minor.

Note:
This course may be taken up to four times for credit.

MUN 1360 - Madrigal Singers I

Auditioned a cappella ensemble teaching choral styles that range from the Renaissance madrigal to present day, such as vocal jazz, spirituals and contemporary choral works. This course if for the "first year" student.

Credit Hour(s): 1 Credit Hour When Offered: (Offered Fall, Spring) Prerequisite(s):
Audition based on vocal quality, musicianship and sight reading ability.

Note:
This course may be taken up to four times for credit.

MUN 1390 - Symphony Chorale I

A music organization open through auditions to any student. The Symphonic Chorus will study and perform literature for the large sized chorus.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
audition or permission of instructor.

Note:
This course may be taken up to four times for credit.

MUN 1710A - Rock and Jazz Ensembles I

Music performing organization open to any student who wants to develop his or her performance repertoire. Laboratory studies include techniques of performing music, literature, practices, styles and media applicable to designated organized ensemble.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
Some experience in high school bands, etc.

Note:
This course may be taken up to four times for credit.

MUN 1720A - Rock and Jazz Ensembles II

Music performing organization open to any student who wants to develop his/her performance repertoire. Laboratory studies include techniques of performing music, literature, practices, styles and media applicable to designated organized ensemble.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
experience in high school bands.

Note:
This course may be taken up to four times for credit.

MUN 2311 - Women's Ensemble II

A music organization open through auditions to any student having experience in reading music. A variety of musical styles will be studied and performed. Students electing Women's Ensemble will be expected to participate in scheduled performances.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUN 1310

Note:
This course may be taken up to four times for credit.

MUN 2361 - Madrigal Singers II

Auditioned a cappella ensemble teaching choral styles that range from the Renaissance madrigal to present day, such as vocal jazz, spirituals and contemporary choral works. This course is for the "second year" student.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUN 1360 .

Note:
This course may be taken up to four times for credit.

MUN 2371 - NWFSC Show Choir II

A study of the fundamental techniques and principles of integrating dance, voice, music and acting into a performance show choir. Training in voice, jazz movement, character interpretation and personality presentation is covered. Membership is open to all part-time or full-time students on a credit or audit basis. All music majors and performance majors must participate. The show choir appears in public performances at frequent intervals throughout the year.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUN 1340A .

Note:
This course may be taken up to four times for credit.

MUN 2392 - Symphony Chorale II

A music organization open through auditions to any student. The Symphony Chorus will study and perform literature for the large sized chorus.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUN 1390 .

Note:
This course may be taken up to four times for credit.

MUS 1905A - Independent Study – Music

A defined independent study which is pursued under supervision of a faculty directing teacher and recorded through departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized or advanced nature and not available through classes or courses available on a college schedule. Departmental approval required. Placement test is required. The course includes Writing-Across-The-Curriculum. If used to meet Gordon Rule requirements for general education, a minimum grade of “C” is also required.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
Approval from department chair, a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

MUS 1934 - Music - Special Topics

A defined special topics which is pursued under supervision of a faculty member and recorded through usual departmental procedures. This course may be taken up to four (4) times for credit.

Credit Hour(s): 3 When Offered: (Offered Fall, Spring)

MUS 2930 - Music – Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Note:
*This course may be taken up to four times for credit.

MUT 1001 - Fundamentals of Music

A pre-theory course for the music major, non-music major, or for the elementary education major.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

MUT 1111 - Music Theory I

A study of the fundamentals of basic musicianship, music notation, simple rhythms, key signatures, intervals, major and minor scales, intervals, triads, 7th chords, polyphonic composition and elementary keyboard work. This course also introduces students to tools necessary for analyzing musical compositions of the 17th & 18th centuries.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s):
MUT 1241

MUT 1112 - Music Theory II

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, species counterpoint, chord structures, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
MUT 1111

Corequisite(s):
MUT 1242

MUT 1241 - Ear Training and Sight Singing I

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUT 1001 or Approval of Theory Faculty and successful completion of Theory Fundamentals Exam

Corequisite(s):
MUT 1111

MUT 1242 - Ear Training and Sight Singing II

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, simple & compound rhythms identification and dictation, interval identification and dictation, major and minor scales identification and dictation, triad identification and dictation, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MUT 1241

Corequisite(s):
MUT 1112

MUT 2116 - Music Theory III

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including secondary chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
MUT 1112

Corequisite(s):
MUT 2246

MUT 2117 - Music Theory IV

A continuing study of the fundamentals of basic musicianship, music notation, rhythms, musical structures, basic and advanced harmonic structures including modulation, non-tonicizing fully diminished 7th chords, augmented 6th chords, mode mixture, Neapolitan chords, polyphonic composition and keyboard work. This course is a continuing study of analytical models used for musical compositions of the 17th & 18th centuries while providing an introduction to Romantic period and chromatic musical structures.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
MUT 2116

MUT 2246 - Ear Training and Sight Singing III

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Credit Hour(s): 1 Credit Hour When Offered: (Fall) Prerequisite(s):
MUT 1242

Corequisite(s):
MUT 2116

MUT 2247 - Ear Training and Sight Singing IV

A study of the fundamentals of basic musicianship with specific focus on elements of ear training and sight singing including, music notation, intermediate and advanced rhythmic identification and dictation, identification and dictation of advanced sonorities, and melodic and rhythmic dictation. This student will incorporate both rhythmic and tonal syllable systems.

Credit Hour(s): 1 Credit Hour When Offered: (Spring) Prerequisite(s):
MUT 2246

Corequisite(s):
MUT 2117

MVB 1201 - Applied Music Secondary – Brass I

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For nonmusic majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

MVB 2202 - Applied Music Secondary – Brass II

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For nonmusic majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MVB 1201.

Note:
This course may be taken up to four times for credit.

MVK 1211 - Applied Music – Piano I

Private instruction in piano, as secondary instrument, consisting of one half-hour lesson per week. Minimum of one hour daily practice is required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

MVK 1311 - Applied Music - Piano I for Majors

Private instruction in Piano in the freshman year of study as the student's principal performing medium. This one hour, weekly lesson is for intended piano majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which three-four memorized selections from standard literature will be required.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVK 1211 and Division Chair approval.

Note:
This course may be taken up to four times for credit.

MVK 2221 - Applied Music – Piano II

Private instruction in piano, as a secondary instrument, consisting of one half-hour lesson per week. Minimum of one hour daily practice is required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVK 1211.

Note:

This course may be taken up to four times for credit.

MVK 2321 - Applied Music - Piano II for Majors

Private instruction in Piano in the sophomore year of study as the student's principal performing medium. This one hour, weekly lesson is for intended piano majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which a memorized sonata movement and three-four memorized selections from standard literature will be required.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
MVK 1211 , MVK 1311 and Division Chair approval.

Note:
This course may be taken up to four times for credit.

MVP 1201 - Applied Music Secondary – Percussion I

Private instruction in percussion instruments to develop the student's performance ability in an applied area. One half-hour private lesson per week. Minimum of one hour daily practice is required.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

MVP 2202 - Applied Music Secondary – Percussion II

Private instruction in percussion instruments to develop the student's performance ability in an applied area. One half-hour private lesson per week. Minimum of one hour daily practice.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MVP 1201 .

Note:
This course may be taken up to four times for credit.

MVS 1016 - Applied Strings – Guitar I

Private instruction on guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

MVS 1017 - Applied Strings – Bass Guitar I

Private instruction in guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

MVS 1201 - Applied Music Secondary – Strings I

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

MVS 2026 - Applied Strings – Guitar II

Private instruction in guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVS 1016 .

Note:
This course may be taken up to four times for credit.

MVS 2027 - Applied Strings – Bass Guitar II

Private instruction in guitar. Designed to equip the student for continuing study leading progressively to greater proficiency.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MVS 1017 .

Note:
This course may be taken up to four times for credit.

MVS 2202 - Applied Music Secondary – Strings II

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MVS 1201 .

Note:
This course may be taken up to four times for credit.

MVV 1211 - Applied Music – Voice I

Private instruction in voice, as a secondary instrument, consisting of one half-hour session per week, with a minimum of one hour daily practice.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

MVV 1311 - Applied Music - Voice I for Majors

Private instruction in voice in the freshman year of study as the student's principal performing medium. This one hour weekly lesson is for intended voice majors, and requires Division Chair approval. A major component of this class is a required juried performance at the end of the semester for which four memorized selections from standard literature will be required.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVV 1211 and Division Chair approval.

Note:
This course may be taken up to four times for credit.

MVV 2221 - Applied Music – Voice II

Private instruction in voice, as a secondary instrument, consisting of one half-hour lesson per week, with a minimum of one hour daily practice.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Prerequisite(s):
MVV 1211 .

Note:
This course may be taken up to four times for credit.

MVV 2322 - Applied Music - Voice II for Majors

Private instruction in voice in the sophomore year of study as the student's principal performing medium. This one hour, weekly

lesson is for intended voice majors, and requires Division Chair Approval. A major component of this class is a required juried performance at the end of the semester for which six memorized selections from standard literature will be required.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
MVV 1211 , MVV 1311 and Division Chair approval.

Note:
This course may be taken up to four times for credit.

MVW 1201 - Applied Music Secondary – Woodwinds I

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

MVW 2202 - Applied Music Secondary – Woodwinds II

Private instruction: one half-hour private lesson per week. Minimum one hour daily practice. For non-music majors and music majors.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
MVW 1201 .

Note:
This course may be taken up to four times for credit.

NUR 1021C - Nursing Process I

This course introduces concepts and principles of holistic nursing care. Students will build on knowledge obtained in the biophysical and psycho-social sciences in this first of four required theory courses in the nursing curriculum. Content includes an introduction to healthcare systems, ethical-legal aspects of nursing practice, health and illness, communications, functional health patterns of clients, stress-adaptation, professional behaviors, and all steps of the nursing process with emphasis on assessment of older adult clients. Students begin socialization into the role of the Associate Degree Nurse as a member of an interdisciplinary healthcare team.

Credit Hour(s): 6 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Admission to the AS Nursing Program; BSC 1085C , ENC 1101 , Core College Level Math

Corequisite(s):
NUR 1021L , NUR 1141

Prereq/Corequisites:
BSC 1086C , HUN 2201

Note:
Special Nursing Program policies may apply to this course.

NUR 1021L - Nursing Process I Clinical Experience

This course introduces students to the role of the Associate Degree Nurse in providing direct, holistic nursing care to young, middle-aged and older adults who are hospitalized or in community settings. Students are introduced to all steps of the nursing process with a focus on assessment skills. Students will identify self-learning needs and set their own goals for improvement. Critical thinking and working effectively with peers and other healthcare professionals as a team member is expected. The demonstration of caring behaviors and therapeutic communication as a provider of bedside, technical nursing care is emphasized. Students must demonstrate safe performance of basic nursing skills, including but not limited to medication administration, physical assessment, and comfort care.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
ADMISSION TO THE AS NURSING PROGRAM; BSC 1085C , ENC 1101 , CORE COLLEGE LEVEL MATH

Corequisite(s):
NUR 1021C , NUR 1141

Prereq/Corequisites:
BSC 1086C , HUN 2201

Note:
Special Nursing Program policies may apply to this course.

NUR 1141 - Pharmacologic Principles in Nursing I

This course introduces students to concepts and principles of pharmacology related to safe administration of therapeutic agents within the nursing process framework. Students begin to learn major drug classifications and selected exemplars along with principles of safe, effective administration of drugs. Students will learn dosage calculation, as well as factors that affect the absorption, excretion, distribution, and metabolism of drugs, and drug actions, adverse effects and interactions.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
Admission to the AS Nursing Program

Corequisite(s):
NUR 1021C , NUR 1021L

Note:
Special Nursing Program policies may apply to this course.

NUR 1142 - Pharmacologic Principles in Nursing II

Students will continue to learn about medications and their effects on different body systems. The conceptual and mathematical operations necessary for safe and effective administration of medications are emphasized.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring) Prerequisite(s):
NUR 1141 or LPN licensure and admission to the Nursing Program

Corequisite(s):
NUR 1231C and NUR 1750L

Note:
Special Nursing Program policies may apply to this course.

NUR 1231C - Nursing Process II

Application of the nursing process continues with emphasis on the planning and implementation of nursing care for clients experiencing threats to functional health patterns. Development of professional behaviors, such as developing therapeutic relationships continues with students working clients through life interactions. Students further develop critical thinking skills through case studies and simulation scenarios designed to provide students with problem solving skills in analyzing, planning and prioritizing care for clients whose health problems are more acute or chronic; the client with psycho-emotional dysfunctions, dysfunctional support systems situations, grief, and loss. Students learn basic management skills as a team member caring for a limited number of clients in hospitals with emphasis on coordination of nursing care and discharge planning. Conflict management skills are highlighted as the student increases role as client advocate.

Credit Hour(s): 5 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
NUR 1021L , NUR 1021C , AND NUR 1141 OR LPN LICENSURE, BSC 1086C

Corequisite(s):
NUR 1750L , NUR 1142

Prereq/Corequisites:
DEP 2004

Note:
Special Nursing Program policies may apply to this course.

NUR 1750L - Nursing Process II - Clinical Experience

This course builds on competencies presented in Nursing Process I regarding the role of the Associate Degree Nurse in providing direct, holistic nursing care for adult clients experiencing dysfunctional health patterns. Clinical experiences in hospitals, clinics, and community settings provide students with opportunities to apply the nursing process in care of clients, including the older adult. Students continue to develop management skills through conflict management and other professional behaviors. Students demonstrate safe performance of all basic and more complex nursing skills.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
NUR 1021L , NUR 1021C , NUR 1141 OR LPN LICENSURE, BSC 1086C

Corequisite(s):
NUR 1231C , NUR 1142

Prereq/Corequisites:
DEP 2004

Note:
Special Nursing Program policies may apply to this course.

NUR 1940L - Nursing Clinical Externship

This elective course is designed to offer students the opportunity to gain additional clinical skills practice during the summer semester. Working with a preceptor and the nursing faculty in area hospitals, clinics, or community settings, the student will be able to perform all skills learned in successfully completed nursing courses. Core Course in these Programs

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
admission to the AS Nursing Program; NUR 1750L or NUR 1021L

NUR 2233C - Nursing Process III

Students continue to use the nursing process and critical thinking with emphasis on primary and secondary prevention as nursing interventions in clients experiencing threats to functional health patterns, including during the childbearing process and children whose normal lines of defense have been invaded by stressors to the degree that hospitalization is necessary. Nursing practice issues continue to focus on ethical-legal issues related to acute and/or chronic illness and disability. Management skills include delegation and career development. Core Course in these Programs

Credit Hour(s): 6 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
NUR 1231C , NUR 1750L & NUR 1142 OR APPROVAL FROM PROGRAM DIRECTOR

Corequisite(s):
NUR 2233L

Prereq/Corequisites:
MCB 2010C

NUR 2233L - Nursing Process III – Clinical Experience

Students continue to apply knowledge and skills learned in previous nursing courses in providing nursing care for the hospitalized child, the family during the maternity cycle, and adults whose health problems are more complex and/or chronic. Clinical sites include hospitals, health departments, clinics, physician offices, schools and other community settings. Conflict resolution skills are applied, as needed, to meet client and/or peer learning goals. Delegation skills with peers are also practiced. Students demonstrate continuation of all previously learned nursing skills and must perform safely all advanced nursing skills in this clinical course.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
NUR 1750L , NUR 1231C , NUR 1142

Corequisite(s):
NUR 2233C .

Prereq/Corequisites:

MCB 2010C

Note:

Special Nursing Program policies may apply to this course.

NUR 2241C - Nursing Process IV

Students integrate knowledge and principles of the biophysical and psychosocial sciences to solve life-threatening problems that affect a limited number of critically ill clients in a variety of clinical settings. Students differentiate holistic nursing care therapies in primary, secondary and tertiary care settings. Students become proficient in applying all steps in the nursing process with emphasis on evaluating nursing care outcomes. Students apply critical thinking skills in exploring case-based practice situations and work together in learning seminars to select effective client care improvement processes. Self-evaluation is part of the socialization process to prepare students for the work world as competent, caring staff nurses. Nursing practice issues include licensure standards and continued professional development.

Credit Hour(s): 5 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

NUR 2233L , NUR 2233C , MCB 2010C

Corequisite(s):

NUR 2241L , NUR 2811L

Prereq/Corequisites:

SYG 2000 OR PSY 2012

Note:

Special Nursing program policies may apply to this course.

NUR 2241L - Nursing Process IV – Clinical Experience

Students integrate knowledge and principles of the biophysical and psychosocial sciences to solve life-threatening problems that affect a limited number of critically ill clients in a variety of clinical settings. Students differentiate holistic nursing care therapies in primary, secondary and tertiary care settings. Students become proficient in applying all steps in the nursing process with emphasis on evaluating nursing care outcomes. Students apply critical thinking skills in exploring case-based practice situations and work together in learning seminars to select effective client care improvement processes. Self-evaluation is part of the socialization process to prepare students for the work world as competent, caring staff nurses. Nursing practice issues include licensure standards and continued professional development.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

NUR 2233L, NUR 2233C, MCB 2010C

Corequisite(s):

NUR 2241C , NUR 2811L

Prereq/Corequisites:

SYG 2000 OR PSY 2012

Note:

Special Nursing Program policies may apply to this course.

NUR 2811L - Nursing Capstone

This capstone course provides a time during the last four weeks of the nursing program in which students begin to transition from the student role into the graduate role as an associate degree nurse. Students attend seminar hours and complete standardized testing for evaluation in proficiency in applying all steps in the nursing process with emphasis on evaluating safe nursing care outcomes. Students complete clinical practice hours with an experienced registered nurse preceptor to provide holistic nursing care for a limited number of clients. The focus is on demonstration of all professional behaviors and competencies expected of the associate degree registered nurse graduate at entry level. Clinical experiences provide hands-on learning opportunities, enhancing clinical thinking, safe nursing judgment, and clinical confidence in skills. Clinical experiences take place in a variety of clinical settings and work schedules.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):

NUR 2233L , NUR 2233C

Corequisite(s):
NUR 2241C , NUR 2241L

Prereq/Corequisites:
SYG 2000 or PSY 2012

Note:
Special Nursing Program policies may apply to this course.

OCE 1001C - Oceanography

A survey of the physics, chemistry, geology and biology of the oceans. Interrelationships between the atmosphere and oceans, methods of measurement and research, processes of coastal change and marine conservation. May be used to satisfy A.A. requirements in physical science for career goals other than the sciences, engineering, and pre-professional healthcare.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring)

OST 1107 - Word Processing I

Integration of basic keyboarding and word processing – learning the keyboard, creating, editing, saving, and other word processing functions.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 1355 - Records Management

Methods and systems of filing used in business offices, filing equipment, and time-and-motion skills. Filing practice sets are used.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2117 - Word Processing II

Continuation of Typing and Word Processing I – develop keyboarding and document processing using a microcomputer.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
OST 1107 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2335 - Business Communications

Business Communications is a comprehensive coverage of language structure and particular emphasis on writing superior business letters and reports. Instruction in principle, then illustration, and practice in applying the principles. A fundamental concept of the appearance, language and style, tone and psychology of effective business letters.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

OST 2401 - General Office Management

Study of practices and procedures in the modern office. Emphasis on exercising judgment, handling incoming calls and callers, processing mail, word processing systems, editing and composing techniques, travel arrangements, banking procedures, employment applications and resumes.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
OST 2117 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

PEL 1212A - Advanced Softball

Instruction, practice, and participation in advanced softball. The continuous development of physical skills is of major importance in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

PEL 1213 - Advanced Softball II

This course is a continuation of Advanced Softball, which consists of instruction, practice, and participation in advanced softball. The continuous development of physical skills is of major importance in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
PEL 1212A (Athletes)

PEL 1217A - Advanced Baseball

Instruction, practice, and participation in advanced baseball. The continuous development of physical skills is of major importance in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

PEL 1219 - Advanced Baseball II

This course is a continuation of Advanced Baseball, which consists of instruction, practice, and participation in advanced baseball. The continuous development of physical skills is of major importance in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
PEL 1217A (Athletes)

PEL 1624M - Advanced Basketball (Men)

This course is a high intensity, drill-oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

PEL 1624W - Advanced Basketball (Women)

This course is a high intensity, drill oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including: rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

PEL 1626M - Advanced Basketball II (Men)

This course is a continuation of Advanced Basketball for Men, which consists of a high intensity, drill -oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
PEL 1624M (Athletes)

PEL 1626W - Advanced Basketball II (Women)

This course is a continuation of Advanced Basketball for Women, which consists of a high intensity, drill -oriented program designed to increase the knowledge, skill ability, and endurance levels of individuals interested in basketball. Instruction includes various aspects of the game of basketball including rules and regulations, basic fundamentals, offensive set, defensive sets, and scouting procedures. Instruction will be given through classroom lectures, as well as on-the-court lectures and activities. It is strongly recommended that students participate in an exercise program outside of class hours. It may be recommended and in some cases required that the student obtain medical approval before participating in this course.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
PEL 1624W (Athletes)

PEM 1131A - Strength Training

This course is a high intensity lecture/demonstration and flexible lab hour weight training program designed to increase the size, strength, and endurance of the skeletal muscle system. Instruction includes, but is not limited to, weight training safety, etiquette, history, and nutrition. Instruction will be given in the design of progressive resistance programs to increase total body efficiency and to meet the objectives of the individual student. Students are responsible for determining fitness for training, and those with medical problems which restrict personal activities are encouraged to obtain medical clearance before enrolling in the course.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PEM 2108 - Fitness Lab

Instruction and participation in an exercise program with emphasis on muscle endurance, strength and flexibility.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed) Prerequisite(s):
HLP 1081 or approved wellness assessment by the department chair.

Note:
This course may be taken up to four times for credit.

PEO 2004 - Theory and Practice of Teaching a Specific Sport

This course is designed to provide knowledge of the rules, teaching progressions and strategies for competition. The course includes acceptable behavior and ethics for coaches. This course will be offered for the following specific sports: baseball/softball, basketball, football, golf, soccer, swimming, tennis, track and field/cross country, volleyball and wrestling.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PEO 2005 - Coaching Theory

This course is designed to provide knowledge of the characteristics, principles, ethics, and theories related to coaching sports in educational and recreational settings. Emphasis is placed on preparing coaches to train athletes to achieve optimal levels of performance.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PET 1000 - Introduction to Physical Education

A study of the history of physical education and sport with particular emphasis placed on present practices and trends.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PET 2622 - Care and Prevention of Athletic Injuries

Designed to provide students with a basic knowledge of the care, prevention, and rehabilitation of injuries received during participation in physical education activities to include the effects and dangers of drug use including performance enhancing drugs.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PGY 1220C - Commercial Photography I

A beginning course that introduces students to the procedures and aesthetics of developing photographic illustrations for industrial and advertising use. Students will gain experience using a high quality digital studio camera, electronic lighting, and digital applications of their work. It is recommended that students take PGY 1801C prior to or at the same time as this course.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

PGY 1401C - Basic Photography

A beginning course in black and white photographic and darkroom technique. Students will learn the functions of their camera and darkroom equipment. Students will apply their technical knowledge to various artistic challenges. Access to a 35mm camera with manual mode required.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

PGY 1405C - Advanced Black and White Photography

An advanced course in black and white photography. Students will be presented with more demanding creative challenges and will be exposed to a variety of advanced procedures in the darkroom. Access to a 35mm camera with manual mode required.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
PGY 1401C or equivalent.

PGY 1801C - Digital Photography I

A beginning course in photography with an emphasis on digital darkroom production techniques. Students will be exposed to procedures and aesthetic concerns relating to photography and digital image production. Access to an appropriate high-quality camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

PGY 2221C - Commercial Photography II

As advanced a course that allows the student to expand their skill set in producing photographic illustrations for industrial and advertising use. Students may explore product, portrait, and on-location commercial photographic projects.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
PGY 1220C and PGY 1801C .

PGY 2802C - Digital Photography II

An intermediate-level photography course where creative idea generation and composition in photography are emphasized. Students research more deeply the history of photography and apply new skills to creative digital photographic work. Access to an appropriate high-quality camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
PGY 1801C .

PGY 2804C - Digital Photography III

An advanced-level photography courses where creative idea generation and composition in photography are emphasized. Students research more deeply the history of photography and apply new skills to creative digital photographic work. Access to an appropriate high-quality camera required.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
PGY 2802C .

PHI 2010 - Introduction to Philosophy

Central concepts of philosophy are developed, including a description of the main philosophical problems involved through ancient, medieval, and contemporary thought. This is a Writing-Across-the-Curriculum course and a Speaking-Across-the-Curriculum course requiring selected written and speaking assignments. If used to meet AA Gordon Rule requirements for general education, a minimum grade of "C" is required.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2600 - Introduction to Ethics

Ways to frame and resolve ethical issues are studied. Major historical theories including consequentialism, deontology, and virtue ethics are presented in moral arguments and narratives. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

PHI 2930 - Philosophy – Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PHY 1020 - Physical Science

A one term course of lectures and demonstrations designed 1) to meet the general education requirements in physical science for non-science majors and 2) for students who need a preparatory course prior to taking physics. The course presents the

fundamental classical and modern concepts of physics in the area of mechanics, energy, wave motion, electromagnetism, and atomic structure. Also topics in earth science and astronomy will be discussed.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1053C - General Physics Without Calculus I

This is the first course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers classical mechanics and thermodynamics. Entering students are assumed to have a serviceable knowledge of basic algebra and trigonometry. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall) Prerequisite(s):

MAC 1114 or equivalent

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 1054C - General Physics Without Calculus II

This is the second course in a two-term sequence of non-calculus physics designed for biological science and pre-health profession majors. This course covers the areas of electricity, magnetism, light, quantum theory, atomic and nuclear structure, and elementary particles. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

PHY 1053C or equivalent.

PHY 2048C - General Physics With Calculus I

This is the first course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers classical mechanics (statics and dynamics of point-masses), rigid-body dynamics, oscillations, and waves. Additional topics, such as fluids or the special theory of relativity, may be covered if time permits. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prereq/Corequisites:

MAC 2311 .

Note:

♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

PHY 2049C - General Physics with Calculus II

This is the second course in a two-term sequence of calculus-based physics designed for engineering and physical science majors. This course covers electrostatics, magnetostatics, electromagnetic fields and waves, direct-current circuits, alternating-current circuits, and optics. This course contains both lecture and laboratory components.

Credit Hour(s): 4 Credit Hours When Offered: (Spring, Summer) Prerequisite(s):

PHY 2048C

Prereq/Corequisites:

MAC 2312 or equivalent

Note:

In special circumstances, PHY 2048C and PHY 2049C can be taken out of sequence with instructor approval.

PLA 1003 - Introduction to Paralegal Studies

This course is designed to give students a broad understanding of the nature of the paralegal profession and the elements

contained within the profession, as well as its responsibility.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1005 - Legal Terminology

This course is designed to give an explanation of the common legal vocabulary involved in the broad, general principles of substantive and common law.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1013 - Introduction to the Legal System

A practical introduction to the US legal system, types and sources of law, the courts, and related topics; a beginning course for students seeking careers in legal secretary technology or legal assisting.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1114 - Legal Research and Writing

This course is designed to provide the student with necessary skills and knowledge required in legal research/case analysis and legal writing.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
PLA 1003 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1203 - Civil Procedure

This course provides an insight into the system of dispute resolution for private parties and the government provided by the court systems of the various states and the federal government in a non-criminal setting.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1600 - Wills, Trusts, and Probate

This course is designed to provide the student with an introductory knowledge of estate planning, wills, and probate administration.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 1800 - Introduction to Family Law

An introduction to practices as they relate to family law.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 2273 - Tort Law

This course is designed to provide the student with an introductory knowledge of tort law with objectives centered on personal injury torts.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

PLA 2949 - Internship - Paralegal

This is an individualized internship course that provides the student with supervised professional experience utilizing skills acquired in the program of study. The student will work with a qualified work site supervisor on approved projects related to his or her degree in a professional environment. The work site supervisor will evaluate the student's performance, and the student will submit report(s), examples of projects completed, or other assignments as required by the instructor, as appropriate, during the internship experience for evaluation by the college instructor. If this course is taken for credit more than once, the student must, on the second and subsequent (if applicable) enrollment(s), develop in concert with the work site supervisor and college instructor a unique set of objectives and assessments.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
completion of a minimum of 12 credit hours in the appropriate discipline, including PLA 1003 and permission of the instructor is required. Knowledge of basic computer and keyboarding skills are strongly recommended.

Note:
*This college credit course is not intended for transfer and may not be applied toward the AA degree.

PMT 1203C - Introduction to Machining

This course introduces the student to basic mechanic fundamentals. Instructional topics will include hand tool identification and application, fabrication machine identification and application, drill press identification and application, and shop safety.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PMT 1250C - Introduction to CNC Machining

The history and development of CNC (computer numerical control). Programming methods are reviewed with the emphasis of skills placed on programming, milling, drilling and turning with M and G code preparation. Manual and computer assisted programming are also reviewed. Students will program, set up and operate full size CNC machines found in our manufacturing lab. Projects will be assigned to students with an expectation of performing these tasks on manufacturing equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

PMT 2213C - Machining I

In this course students will continue to develop basic machining skills and better utilize machine tool accessories to assist in different machining operations to include: Set up and utilize machine tool accessories, vertical knee milling operation, manual lathe operations, manual lathe threading and drill operations.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
PMT 1203C and ETD 2218

PMT 2261C - CNC Machining I

This course provides training in cnc machine operation and programming. The student will gain technical knowledge and programming methods employed in cnc machining centers. CNC machine programming, set-up and operations are taught using computer and hands on applications. Metal fabrication processes are taught through lectures, demonstration and student generated projects. Completion of this course offers students technical skills as a cnc operator processes to be applied in various machining and fabrication industries.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
PMT 1250C or equivalent.

PMT 2262C - CNC Machining II

This course will offer students a working knowledge of Solidworks and Solidworks Cam. An in-depth study of Cad/Cam software, CNC processing methods and the set-up of CNC machining centers. The course lectures and lab offer students hands-on applications using Solidworks generated projects processed with Solidworks cam tool path software to generate various projects.

The student will also learn to calculate machining feeds and speeds, edit CNC programs and part production for mill and lathe.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
PMT 2261C or eqivalent experience.

POS 1041 - American Government

Examines government, political ideals, and institutions. Strong emphasis is placed on political thought, the origin of the American federal system, and the distribution of powers between state and national governments. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ ¶ Ω When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.
Ω Courses listed with this symbol have a Civic Literacy Competency.

PSC 2905 - Independent Study – Physical Science

Directed study and individual projects designed to meet the needs of students interested in a specialized area of the physical sciences for which present course availability is limited. Meets specific general education requirements.

Credit Hour(s): 1 Credit Hour When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

PSY 2012 - Psychology

Surveys of the various fields of psychology. Understanding human behavior by studying the adaptation of the individual to the physical and social environment.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

REA 1205 - Reading Across the Genres I

This college-level reading course employs a variety of literary genres as the source material for building student skills in comprehension, context clues, reading speed, critical analysis, vocabulary, and other related reading skills. Students will be exposed to numerous styles and levels of reading material including novels, short stories, critical essays, drama, news reporting. Students will also develop a personal reading preference profile and learn how to identify books, magazines and other reading material commensurate with that profile.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
PERT placement score of 106 or higher.

REL 2300 - Introduction to World Religions

This course will explore the principles and practices of the world's major religious traditions. The religions will be studied in their historical and contemporary forms. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):

a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.

¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

RTE 1000 - Introduction to Radiologic Technology

This course is designed to provide an overview of the history of radiography and the role and scope of practice of the practitioner in the healthcare delivery system. Organizations, accreditation, federal agencies, regulatory agencies (including OSHA) and professional credentialing will be discussed. Content includes a fundamental background in medical law, ethics, human diversity and patient consent. The student will examine a variety of ethical issues and dilemmas found in clinical practice, as well as developing a better understanding of patients, the patient's families, and professional peers through comparison of diverse populations based on value systems, cultural and ethnic influences, communication styles and socioeconomic influences. Radiographic medical terminology and pharmacology will be covered. Site specific clinical education paperwork will be completed. Background check, drug screening, training and clinical site approval mandatory.

Credit Hour(s): 2 Credit Hours When Offered: (Fall, offered as needed) Prerequisite(s):

Admission to the Radiography Program.

RTE 1111 - Introduction to Radiographic Patient Care

This course is designed to prepare radiography students to provide basic patient care. Basic concepts of patient care will be described, as well as infection control procedures and standard precautions. This course includes hospital specific training. Health risks, life stages, HIV/AIDs and domestic violence will be discussed. This course also includes an introduction to medical and radiographic terminology. Topics include vital signs, venipuncture, body mechanics and transport, verbal/nonverbal communication, and some pharmacology.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):

admission to the Radiography Program.

RTE 1418 - Radiographic Techniques I

This course is designed to establish a knowledge base in factors that govern and influence the production and recording of radiographic images. This course introduces the student to a comprehensive study and theory of the production of x-rays and primary exposure factors of radiographic imaging. The image parameters of density, contrast, recorded detail, image distortion and blur will be studied as well as ancillary devices and equipment required to produce a quality radiographic image. Digital imaging with related accessories will be emphasized. Class demonstrations and exercises are used to demonstrate application of theory.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):

MAC 1105 or other Gordon Rule math course and admission to the Radiography Program.

RTE 1457C - Radiographic Techniques II

This course is a continuation of RTE 1418 Radiographic Techniques I. Course content includes the basics of magnetism, electricity, motors, generators, rectifying systems, x-ray tube and filament circuitry. Topics in electromagnetism such as self and mutual induction, high voltage transformation, and AC rectification will be emphasized. An introduction of special radiographic methods will include automatic exposure control, computers, fluoroscopy and image intensification, subtraction radiography, conventional tomography, digital image receptors, and digital image acquisition and manipulation.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):

RTE 1418 .

Corequisite(s):

RTE 1513C

RTE 1503C - Radiographic Procedures I

This course is designed to provide the Radiography student with instruction in radiographic examinations of the chest, abdomen, upper extremity and lower extremity. An introduction to medical and radiographic terminology, radiographic anatomy, and image critique are also included.

Credit Hour(s): 4 Credit Hours When Offered: (Fall) Prerequisite(s):
BSC 1085C and admission to the Radiography program.

RTE 1513C - Radiographic Procedures II

This course is a continuation of RTE 1503C . It is designed to provide the student with instruction in radiographic procedures and anatomy in the distal extremities, hip region, spine, ribs, and sternum and the cranium. Critical thinking, medical and radiographic terminology, as well as image critique are emphasized.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
RTE 1503C , RTE 1804L , and BSC 1086C

Corequisite(s):
RTE 1814L .

RTE 1804L - Radiography Clinical Education I

This course involves the practical application of the theories covered in RTE 1503C and RTE 1000 . Rotations provide experience with various imaging systems, protocols, and patient care. Students observe, assist and perform basic radiographic procedures (chest, abdomen and extremities) under direct supervision. This course emphasizes patient care and critical thinking. This course meets at the affiliate hospitals. Uniforms, name badges and radiographic markers required.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
RTE 1000

Corequisite(s):
RTE 1503C

RTE 1814L - Radiography Clinical Education II

This course is a continuation of Radiography Clinical Education I. This clinical training emphasizes lower and upper extremity. Medical and radiographic terminology, patient care, critical thinking and communication skills are emphasized. This course meets at the affiliate hospitals. Uniforms, name badges and radiographic markers required.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
RTE 1804L

Corequisite(s):
RTE 1513C .

RTE 1824L - Radiography Clinical Education III

This course is a continuation of Radiography Clinical Education II. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I and II. The student will gain experience and develop clinical competence in general radiographic procedures such as the cranium and specialized contrast studies. Advanced patient care skills, critical thinking, imaging and exposure techniques, radiation protection application and image processing will be emphasized. This rotation covers clinical experience in all phases of fundamental radiologic procedures and image critique. Students will rotate through ancillary departments in this course.

Credit Hour(s): 4 Credit Hours When Offered: (Summer) Prerequisite(s):
RTE 1814L

Corequisite(s):
RTE 2523C .

RTE 2061 - Radiographic Preparation for Practice

This course is designed review information in preparation for the student to take the American Registry of Radiologic Technologist (ARRT) registry examination. The course will cover patient care and education, image production, equipment operation and maintenance, radiographic procedures and radiation protection. The student will also be given simulated registry examinations for practice and assessment purposes.

Credit Hour(s): 4 Credit Hours When Offered: (Spring) Prerequisite(s):
RTE 2844L

Corequisite(s):
RTE 2854L .

RTE 2385 - Radiographic Protection and Biology

This course is designed to provide the student with an overview of the principles of interaction of ionizing radiation with living systems. Ionizing effects on molecules, cells, tissues and the body as a whole are presented, along with factors affecting biological response, including; acute, chronic, stochastic and non-stochastic effects. This course is also designed to present an overview of the principles of radiation protection including the responsibilities of the radiographer for patients, personnel and the public. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies and healthcare organizations are incorporated, as are the various methods of monitoring radiation exposure and acceptable dose limit values.

Credit Hour(s): 3 Credit Hours When Offered: (Fall) Prerequisite(s):
RTE 1000 , RTE 1418 , RTE 1457C , RTE 2523C

Corequisite(s):
RTE 2844L .

RTE 2473 - Radiographic Quality Assurance

This course is designed to introduce the radiography student to evaluation methodology of radiographic systems to assure consistency in the production of quality images. Image critique, fluoroscopy, malfunctions, and specifications are some of the topics covered in the course.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
RTE 1418 , RTE 1457C

Corequisite(s):
RTE 2844L .

RTE 2523C - Radiographic Procedures III

This course is a continuation of RTE 1513C covering cranium procedures and positioning. It is designed to provide the student with instruction in more complex radiographic procedures such as fluoroscopy, urinary studies, bone age, trauma, pediatrics, mobile and surgical radiography. Included is instruction in additional modalities and studies such as CT, MRI, arthography, myelography, and vascular studies. Attention will be given to the specialized equipment, contrast media, critical thinking and techniques necessary to perform these procedures. Radiographic anatomy, pathology, and critique of images are included in this course.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
RTE 1513C

Corequisite(s):
RTE 1824L .

RTE 2533C - Radiographic Procedures IV

This is a continuation of RTE 2523C, with emphasis on special procedures and additional modalities. Students are required to complete observations hours within specialty areas.

Credit Hour(s): 2 Credit Hours When Offered: (Fall) Prerequisite(s):
RTE 2523C

Corequisite(s):
RTE 2844L

RTE 2571 - Introduction to Computed Tomography

This course is designed to provide entry-level radiography students with an introduction to and basic understanding of the operation of a computed tomography (CT) device. Content is not intended to result in clinical competency.

Credit Hour(s): 1 Credit Hour When Offered: (Spring) Prerequisite(s):
RTE 1418

RTE 2782 - Radiographic Pathology

This course is designed to introduce theories of disease causation and the pathophysiologic disorder that compromise healthy persons. Etiology, pathophysiologic responses, clinical manifestations, and radiographic appearance of alterations in body systems will be presented. Emphasis will be placed on pathological findings on diagnostic radiographic images.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
RTE 2523C

Corequisite(s):
RTE 2854L .

RTE 2844L - Radiography Clinical Education IV

This course is a continuation of RTE 1824L . The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I, II and III. The student will gain experience and develop clinical competence in specialized imaging procedures, and mobile, surgical and trauma radiography. Advanced imaging skills and exposure techniques will continue to be provided. Rotations through ancillary areas continue.

Credit Hour(s): 5 Credit Hours When Offered: (Fall) Prerequisite(s):
RTE 1824L

Corequisite(s):
RTE 2385 .

RTE 2854L - Radiography Clinical Education V

This course is a continuation of RTE 2844L . The terminal objective for this course is to prepare the student for employment as an entry level technologist. The student is expected to continue to refine those skills related to objectives listed in Clinical Practicum's I-IV and trauma radiography. Advanced imaging skills and exposure techniques will continue to be provided. Rotations through ancillary areas continue.

Credit Hour(s): 5 Credit Hours When Offered: (Spring) Prerequisite(s):
RTE 2844L

Corequisite(s):
RTE 2061 .

SBM 2000 - Small Business Management

This course provides students the opportunity to learn hands-on technical applications regarding entrepreneurship. It is designed for the student who is interested in the ownership and management of a small business enterprise.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
Knowledge of basic computer and keyboarding skills are strongly recommended.

SLS 1101 - College Success

A course designed to focus on developing practical study skills to enhance academic success. Skills taught in this course are time management, concentration/memorization, listening, note taking, test taking, use of college resources, establishing goals, identifying learning styles, developing career choices and learning to cope with personal issues that face many college students.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

SLS 1201 - Service Learning Seminar

A seminar course designed to enhance and reinforce the value of civic responsibility and to provide students with a community service program opportunity by volunteering in community agencies in the public and private sectors.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as needed)

SLS 2505 - Critical Thinking

This course is designed to teach students to become critical thinkers and to show students how to apply their thinking skills to everyday problems and issues in college, career, and personal settings. Based on discussions of timely issues, students will learn to use critical thinking.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

SPC 1006 - Essentials of Speech

This course can be used to satisfy missing transfer requirements and/or oral components required in certain programs. Individuals participate in the preparation and presentation of speeches.

Credit Hour(s): 1 Credit Hour † When Offered: (Offered as needed) Note:
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 1608 - Public Speaking

Emphasis is on assisting the individual to develop his/her potential in oral communication. Individual participation in preparation and presentation of speeches reinforced by continuing group analysis and constructive criticism.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring, Summer) Note:
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPC 2300 - Interpersonal Communication

This course studies the speech communication principles involved in one-to-one interaction, comprehensive listening, conflict resolution, family and group communication and intrapersonal thought. Learning techniques may include small group participation, role play, as well as formal and informal presentations.

Credit Hour(s): 3 Credit Hours † When Offered: (Fall, Spring) Note:
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.

SPN 1120 - Spanish I

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading, and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common

prerequisites.

SPN 1121 - Spanish II

Pronunciation and grammatical structures of Spanish, with emphasis upon balanced development of all four skills – listening, speaking, reading and writing. Covers all basic structures of the language.

Credit Hour(s): 4 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
SPN 1120 or an equivalent course with a grade of "C" or better.

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

SPN 2220 - Spanish III

Intermediate level review of grammar, readings in Spanish Literature, and development of conversational and writing skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
SPN 1121 or an equivalent course with a grade of "C" or better.

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

SPN 2221 - Spanish IV

Completion of intermediate level review of grammar, readings in Spanish literature, and development of conversational and writing skills.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed) Prerequisite(s):

COMPLETION OF SPN2220 OR AN EQUIVALENT COURSE WITH A GRADE OF "C" OR BETTER.

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.

STA 2023 - Statistics

This course provides a general introduction to understanding and applying statistical terms and concepts. Topics include the following: descriptive statistics, probability, random variables, discrete and continuous probability distributions, sampling distributions, confidence interval estimation, hypothesis testing, two sample inferences, correlation, and simple linear regression. Non-symbolic graphing calculators are required. The TI-83/84 Series is recommended. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Prerequisite(s):
completion of MAT 1033A or equivalent with a "C" or better, or appropriate placement score.

Note:
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

SYG 2000 - Sociology

An introduction to the basic theories, concepts, and descriptions of individuals, groups, and societal behaviors. Basic themes include an overview of culture, socialization, deviance, and social institutions, with an emphasis on the dynamics of families, government, and economic influences.

Credit Hour(s): 3 Credit Hours ♦ When Offered: (Fall, Spring, Summer) Note:

Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.

SYG 2010 - Social Problems

Introduction to the sociological study of the nature of social problems to insure understanding of their impact on the individual, the group and social institutions in societal and cultural settings. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

SYG 2430 - The Family and Society

An examination of the problems which arise out of participation in marriage, family and community situations. Designed to provide students with a basic understanding of the dynamics of family interaction, the effects upon the children, and the family's relationship to and participation in the community.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer)

TAR 2121C - Architectural Drafting

Architectural design and development of residential and light commercial buildings to include: development and construction of good architectural freehand lettering, VA and FHA approved residential house plans, “Good Sense” house plans as defined in the Arkansas Plan, and heat loss/heat gain calculations.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
ETD 1102 or ETD 1112 or equivalent.

TAX 2000 - Federal Income Tax: Individual

Federal Income Taxes. Determine income tax for individuals, interpretations of Internal Revenue Code and Regulation, tax planning and advisory service. Brief introduction to partnership, corporation, estate and gift taxes. Extensive practice problems in individual income tax returns and research in tax questions.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
MTB 1103 is required and knowledge of basic computer and keyboarding skills are strongly recommended.

THE 2000 - Theatre Appreciation

An introduction to theater and theatrical production. Topics span a wide range of interest – critical, historical, aesthetic and practical – intended to lay a foundation for further knowledge and skill of the theater. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education. This course contains an oral communication component and may be used to satisfy the Speaking-Across-the-Curriculum requirement.

Credit Hour(s): 3 Credit Hours † ♦ ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
♦ Courses listed with this symbol are Florida State Core Courses and are protected in transfer to other public state institutions as meeting the state Core General Education requirements.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2071 - Humanities – Cinema Appreciation

An introduction to the origin, development, cultural aspects and analysis of cinema topics. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring, Summer) Prerequisite(s):
a passing score on the standardized placement test measuring communication/verbal/reading achievement or successful completion of ENC 0025 [Inactive] and REA 0017 [Inactive].

Note:
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2300 - Dramatic Literature

Survey of dramatic works from the Greeks to the 20th century, with emphasis on the plays of the 19th and 20th centuries; intensive investigation and script analysis with reports, lectures and discussions. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours † ¶ When Offered: (Fall, Spring) Prerequisite(s):
ENC 1101

Note:
† Courses listed with this symbol address NWFSC's Speaking-Across-the Curriculum student learning outcome, namely that all associate degree graduates are competent in basic public speaking skills.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

THE 2304 - Script Analysis

An introduction to the examination and analysis of play scripts as preparation for production. Students will read plays from various periods and genres, and analyze such dramatic elements as plot, theme, character, dialogue, and style.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

THE 2820 - Musical Theater Workshop

An introduction to creative dramatics and children's theater. Topics span a wide range of interests; creative experience, children and theater, workshop procedure, script selection, rehearsal and performance.

Credit Hour(s): 3 Credit Hours When Offered: (Summer)

THE 2821 - Musical Theater Workshop II

Creative dramatics introduces the many elements of theater: dance, voice and musical theater. Topics span a wide range of interests: the creative process, workshop procedures, rehearsal and performance. Creative Dramatics will focus on producing a final performance.

Credit Hour(s): 3 Credit Hours When Offered: (Summer) Prerequisite(s):
THE 2820 .

THE 2930 - Theater – Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Note:
This course may be taken up to four times for credit.

TPA 1210 - Stagecraft

This course is an introduction to the principles of stagecraft: stage terminology, stage safety, instruction in proper use of shop tools, basic theater construction methods, understanding of theatrical rigging, and understanding of general background practices.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

TPA 1290 - Technical Theatre Lab I

This course is designed to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as Needed)

TPA 1291 - Technical Theatre Lab II

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Credit Hour(s): 1 Credit Hour When Offered: (Offered as Needed) Prerequisite(s):
TPA 1290

TPA 1940 - Internship in Theatre Design or Production

The emphasis of this course is on applied learning and vocational experience in the technical theatre field.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPA 2063 - Principles of Scenic Design

This course is a detailed introduction to the principles and techniques used in scene design. The course will include the discussion and practice in analyzing scripts, visualizing a design concept, drafting, paint elevations and rendering and/or modeling techniques.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
TPA 2343

TPA 2212 - Sound Production for the Stage

This course is an introduction to audio production and reinforcement for the stage. Students will learn how to use and maintain equipment, record and edit sound effects, and mixing live sound. Emphasis will be placed on digital audio techniques and equipment.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPA 2220 - Lighting Design

An introduction to stage lighting. Topics include history of stage lighting, fundamentals of light and illumination, lighting control, and lighting practices.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Corequisite(s):
TPA 1210

TPA 2232 - Introduction to Costuming Technology

An introduction to costume techniques and wardrobe practices. Topics span a wide range: costume construction techniques, problems in costumes, costume history, construction styles, sewing machine practices, seam finishes, flat pattern layout and production techniques. This course is intended to develop practical experiences in theater costumes.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring)

TPA 2276C - Entertainment Technology - Crafts

This course presents the practices and principles of advanced woodworking, welding, smithing, casting, ceramics, plaster work, fiberglass and plastic technology for the entertainment industry. State of the art tool technology, shop and field practice, health and safety standards will be emphasized. These crafts are entertainment industry oriented that will use items created in a realized production.

Credit Hour(s): 3 Credit Hours When Offered: (Spring) Prerequisite(s):
TPA 1210 .

TPA 2292 - Technical Theatre Lab III

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
TPA 1291

TPA 2301 - Technical Theatre Lab IV

This course is designed to continue to complement other technical theatre courses by giving the student the opportunity for hands-on interaction in a structured lab setting. Students will be assigned duties appropriate for their skills that will synthesize the classroom experience.

Credit Hour(s): 2 Credit Hours When Offered: (Offered as Needed) Prerequisite(s):
TPA 2292

TPA 2331 - Costume Construction

An introduction to costume construction techniques and wardrobe design. Topics span a wide range: costume construction techniques, problems in costumes, costume history, construction styles, sewing machine practices, seam finishes, flat pattern layout and production techniques. This course is intended to develop practical experiences in costume construction.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed) Prerequisite(s):
TPA 2232

TPA 2343 - CAD for the Theatre

This course is project oriented covering fundamental through advanced material in computer aided drafting and design and its application for the theatre.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPA 2600 - Stage Management

This course is an introduction to the study and application of stage management as it relates to the manager portfolio, the stage manager morgue, rules and regulations relating to I.A.T.S.E., rules related to contracts, competence in stage management, proper communication with directors, technical directors, designers, cast members and crews, competence in technical discussion areas and basic first aid.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

TPP 1190 - Rehearsal and Performance I

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
experience in high school or a desire to learn.

TPP 1191 - Rehearsal and Performance II

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
TPP 1190 .

TPP 1192 - Rehearsal and Performance III

An ensemble theater performance experience open to any student who wishes to develop rehearsal and performance skills. Students must participate in scheduled rehearsals and performances.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
TPP 1191 .

TPP 1940 - Internship in Theatre Performance

The emphasis of this course is on applied learning and vocational experience in the theatre performance field.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPP 2110 - Acting I

Through in-class performance the student will develop an understanding and proficiency of those skills of movement, voice, and expression which are required of a theatrical performer.

Credit Hour(s): 3 Credit Hours When Offered: (As Needed)

TPP 2111 - Acting II

Through in-class performance, the student develops an understanding and proficiency in styles of acting from classic through

modern.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring) Prerequisite(s):
TPP 2110 .

TPP 2120 - Improvisation

This course explores the use of creativity and imagination, engaging the actor in a wide variety of improvisational theatre games.

Credit Hour(s): 3 Credit Hours When Offered: Offered as needed

TPP 2141 - Acting in Shakespeare

This course is an introduction to the concepts, principles, and skills needed to develop characters in Shakespeare's plays. The course focuses on the hidden clues in the text to discover character choices and meaning. Specific analysis and the techniques of scansion are introduced as they relate to character interpretation. Application of these techniques will be presented in scenes and monologues.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

TPP 2150 - Advanced Scene Study

This course is a continuation of the processes and concepts of TPP 2111, Acting II, with the addition of new techniques to create dynamic and engaging characterizations through performance.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

TPP 2220 - Auditioning

This course explores audition techniques for the stage. Students will be better prepared to audition in professional settings.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as Needed)

TPP 2250 - Introduction to Musical Theatre

Introduction to the study of Musical Theater analysis, creation, and performance with an emphasis on singing, dancing, and acting.

Credit Hour(s): 3 Credit Hours When Offered: (Fall)

TPP 2301 - Directing I

A beginning course in the study, development and training in directing for the theater. Although not a prerequisite, students are encouraged to take Acting I and II before Directing I.

Credit Hour(s): 3 Credit Hours When Offered: (Offered as needed)

TPP 2533 - Stage Combat I (Unarmed & Rapier)

Through in-class study and performance the student will develop an understanding of and proficiency in the safe techniques of unarmed and rapier stage combat which are required of a theatrical performer. Application of these techniques will be presented in two scenes, one for unarmed and one for rapier.

Credit Hour(s): 3 Credit Hours When Offered: (Spring)

TPP 2930 - Theater Performance – Special Topics

A defined special topics course which is pursued under supervision of a faculty member and recorded through usual departmental procedures. Designed to permit a student to pursue non-scheduled academic and laboratory work which may be of a specialized nature and not available through the college schedule.

Credit Hour(s): 3 Credit Hours When Offered: (Fall, Spring, Summer) Note:
This course may be taken up to four times for credit.

WOH 1012 - World Civilization: Early Humans through Global Expansion

A study of world history from 4000 BC to 1650 AD as it relates to the development of western civilization. History is analyzed in terms of social, religious, philosophical, political, and economic concepts rather than chronological facts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):
A passing score on the standardized placement test measuring communication/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
Courses listed with this symbol have an international and/or diversity focus and meet Teacher Education Programs' common prerequisites.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

WOH 1022 - World Civilization: The Modern Period and Renaissance to the Present

A study of history from 1650 AD to the present as it relates to the development of the modern world. History is analyzed in terms of social, religious, philosophical, political, and economic concepts rather than chronological facts. This is a Gordon Rule writing course and is part of the college's Writing-Across-the-Curriculum program. A minimum grade of "C" is required if used to meet Gordon Rule requirements for general education.

Credit Hour(s): 3 Credit Hours ¶ When Offered: (Offered Fall, Spring, Summer) Prerequisite(s):
A passing score on the standardized placement test measuring communications/verbal/reading achievement, successful completion of any required developmental English and Reading coursework with a grade of "C" or better, or exemption from placement testing.

Note:
This college credit course qualifies as having an international and/or diversity focus for Teacher Education Programs common prerequisites.
¶ Courses listed with this symbol meet writing requirements outlined in FAC Rule 6A-10.030 and require a minimum grade of "C" when used for General Education credit.

ZOO 1010C - Zoology

An introduction to the major concepts of animal life, to include the structure, taxonomy, evolutionary relationships, and natural history of the major animal groups.

Credit Hour(s): 4 Credit Hours When Offered: (Offered as needed)

Vocational Courses

AMT 0701 - Aviation Maintenance Technology General I

This course introduces basic information necessary for an entering student in aviation maintenance technology. Emphasis is placed on math and physics and Federal Aviation Administration (FAA) and manufacturers' technical and legal publications.

Credit Hour(s): 110 Clock Hours When Offered: (Offered as needed)

AMT 0702 - Aviation Maintenance Technology General II

This course introduces aircraft drawings/charts & graphs, aircraft hardware and materials, precision measuring tools, fluid lines and fittings, safety wire methods. Emphasis is on studying aircraft drawings/charts & graphs, identification and selection of aircraft hardware, fabrication and inspection of flexible and rigid fluid lines, safety wiring on bolts and turnbuckles.

Credit Hour(s): 110 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0701

AMT 0703 - Aviation Maintenance Technology General III

This course provides a study in basic electricity. Emphasis is placed on alternating current (AC) and direct current (DC) circuits and controls, electrical measurements, electrical test equipment, aircraft batteries, fundamental electronics, and semi-conductor devices.

Credit Hour(s): 110 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0702

Prereq/Corequisites:
AMT 0702

AMT 0704 - Aviation Maintenance Technology General IV

This course introduces aircraft ground operations, fuels, cleaning and corrosion control methods, weight & balance, and performance of non-destructive testing. The student must achieve a minimum Final Comprehensive exam grade of 70% or above to pass the course and the Course Average must be a 70% or above to pass the course.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0703

Prereq/Corequisites:
AMT 0703

AMT 0712 - Aviation Maintenance Technology Airframe I

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft structural assembly and rigging, aircraft non-metallic, and aircraft electrical systems.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0701 , AMT 0702 , AMT 0703 , AMT 0704 . Successful completion of all General subject courses.

Prereq/Corequisites:
AMT 0701, AMT 0702, AMT 0703, AMT 0704

AMT 0713 - Aviation Maintenance Technology Airframe II

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft finishes and fabric covering, wood structures, assembly and repair of sheet metal structures, and introduction to aircraft welding techniques.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0712

AMT 0714 - Aviation Maintenance Technology Airframe III

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft hydraulics and pneumatics, landing gear systems, aircraft cabin atmospheric control systems.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0713

Prereq/Corequisites:
AMT 0713

AMT 0717 - Aviation Maintenance Technology Airframe IV

This course is designed to introduce skills and the necessary knowledge and understanding of aircraft airframe fuel, ice and rain control, and fire detection, protection and extinguishing systems; instrument, position and warning, pitot static, and communications and navigation systems.

Credit Hour(s): 225 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
AMT 0714

Prereq/Corequisites:
AMT 0714

CJK 0002 - Introduction to Law Enforcement

This course is a component of the Florida Law Enforcement Academy. It is designed to introduce the student to law enforcement, the process for becoming a certified law enforcement officer, and the requirements of the academy program. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 12 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0016 - Communication

This course is a component of the Florida Law Enforcement Academy. It is designed to enhance student awareness and understanding of communication and to teach students skills to enable them to effectively interact with people of diverse backgrounds. This course includes classroom instruction and scenario-based training exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 24 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0018 - Legal

This course is a component of the Florida Law Enforcement Academy. It is designed to introduce the student to the criminal justice system, Constitutional Law and Florida Statutes. This course includes classroom instruction and scenario-based training exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 64 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0019 - Interviewing and Report Writing

This course is a component of the Florida Law Enforcement Academy. It is designed to help the student learn vital communication skills including interviewing, note taking, statement taking, and report writing. This course includes classroom instruction and scenario-based training exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 56 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0020 - Law Enforcement Vehicle Operations

This course is a component of the Florida Law Enforcement Academy. This course is designed to prepare prospective police officers to apply vehicle operations knowledge, principles and techniques to the police driving environment. This course includes classroom instruction and practical application on the driving range. This course is only open to students admitted to the Florida Law Enforcement. Academy.

Credit Hour(s): 48 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0021 - Serving Your Community

This course is a component of the Florida Law Enforcement Academy. It is designed to train students to respond to the needs of the community and people in distress. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 34 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0031 - First Aid for Criminal Justice Officers

This course is a component of the Law Enforcement and Correctional Officer Academy. This course is designed to prepare prospective police officers to apply first responder knowledge and techniques to medical emergency situations. This course includes classroom instruction and hands-on practical demonstration. This course is open only to students admitted to the Law Enforcement or the Correctional Officer Academy.

Credit Hour(s): 48 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0040 - Criminal Justice Firearms

This course is a component of the Florida Law Enforcement or Correctional Officer Academy. This course is designed to give the student basic skills and knowledge needed to safety operate a firearm, and shoot a handgun, and shotgun and/or rifle with a prescribed degree of accuracy. This course includes classroom instruction and firing range practice/qualification. This course is open only to students admitted to the Florida Law Enforcement or Correctional Officer Academy.

Credit Hour(s): 80 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and

Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0051 - Criminal Justice Defensive Tactics

This course is a component of the Florida Law Enforcement or Correctional Officer Academy. It is designed to prepare prospective officers to control subjects and defend themselves using appropriate defensive tactics in accordance with Florida State Statue, the United States Constitution, and case law. This course includes classroom instruction and practical physical exercises and demonstrations. This course is open only to students admitted to the Florida Law Enforcement or Correctional Officer Academy.

Credit Hour(s): 80 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0063 - Fundamentals of Patrol

This course is a component of the Florida Law Enforcement Academy. It is designed to enable students to understand Community Oriented Policing and how it is implemented as a problem solving model, identify the SECURE problem solving model its application in real life situations; understand officer safety issues, identify and avoid fatal errors, identify and manage stress, maintain mental and physical fitness; respond to a call, approach a suspect, make an arrest, transport a prisoner and process the prisoner at a detention facility. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 40 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0072 - Crimes Against Persons

This course is a component of the Florida Law Enforcement Academy. It is designed to prepare the student to respond appropriately to a crime against a person; conduct a preliminary investigation on crimes against persons; and, give testimony in court proceedings. It includes classroom instruction and practical exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 48 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0073 - Crimes Involving Property and Society

This course is a component of the Florida Law Enforcement Academy. It is designed to prepare the student to respond appropriately to crimes against property; conduct a preliminary investigation on crimes against persons; and, give testimony in court proceedings. It includes classroom instruction and practical exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 12 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and

Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0079 - Crime Scene Follow-Up Investigations

This course is a component of the Florida Law Enforcement Academy. It is designed to prepare the student to respond to a crime scene, protect and survey a crime scene, process a crime scene, dust for latent prints, and document a crime scene by sketching, and conduct follow up investigations. This course includes classroom instruction and scenario-based training exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 34 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0093 - Critical Incidents

This course is a component of the Florida Law Enforcement Academy. It is designed to enable students to identify the crowd control procedures to safely and effectively disperse or control a large group of people; understand local emergency response plans; respond to a bomb threat, assesses the scene, search and evacuate a building or suspected bomb sight, identify Weapons of Mass Destruction and properly respond to a WMD incident. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 44 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0096A - Criminal Justice Physical Fitness I

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to encourage students to improve their overall physical fitness, improve their score on the final fitness evaluation, and adopt a foundation for lifelong fitness. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

Credit Hour(s): 31 Clock Hours When Offered: (Fall, Spring, Summer) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0096B - Criminal Justice Physical Fitness II

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to encourage students to improve their overall physical fitness, improve their score on the final fitness evaluation, and adopt a foundation for lifelong fitness. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy.

Credit Hour(s): 32 Clock Hours When Offered: (Fall, Spring, Summer) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and

Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0300 - Introduction to Corrections

This course introduces students to the legal and ethical responsibilities of a correctional officer. Legal terms and definitions are explained. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

Credit Hour(s): 33 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0305 - CJSTC Communications

This course covers the entire report writing process. Topics include interview and interrogation, interpersonal communication, and practical exercises. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

Credit Hour(s): 42 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0310 - Officer Safety

Correctional officer safety procedures are learned. Students will learn to identify potential hazards and learn how to safely respond. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

Credit Hour(s): 12 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0315 - Facility and Equipment

Students learn the appropriate procedures for inspecting a correctional facility and equipment. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

Credit Hour(s): 12 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0320 - Intake and Release

Students learn the appropriate procedures for admitting and releasing inmates in a correctional facility. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

Credit Hour(s): 18 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0325 - Supervising in a Correctional Facility

Students learn the appropriate procedures for supervising inmates in a correctional facility. They also learn to detect crimes and rule violations in various correctional facility settings. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

Credit Hour(s): 42 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0330 - Supervising Special Populations

Students learn how to identify and supervise special population groups, such as threat groups, juveniles, elderly, and mentally ill inmates. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

Credit Hour(s): 21 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0335 - Responding to Incidents and Emergencies

Students learn how to identify and respond to situations involving escapes, riots, bomb threats, fires, and medical emergencies in a correctional facility. This course is open only to students admitted to the Correctional Officer Basic Recruit Academy.

Credit Hour(s): 18 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0340 - Corrections CCP Physical Fitness

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to encourage students to improve their overall physical fitness, improve their score on the final fitness evaluation, and adopt a foundation for lifelong fitness. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy or Correctional Officer Basic Recruit Academy.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0400 - Traffic Incidents

This course is a component of the Florida Law Enforcement Academy. It introduces the student to traffic incidents, laws pertaining to traffic parking, towing and impoundment of vehicles, and methods of directing traffic. It includes classroom instruction and practical exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 12 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0401 - Traffic Stops

This course is a component of the Florida Law Enforcement Academy. It introduces the student to the basic rules for conducting safe and effective traffic stops, including ethical consideration, safety considerations, citation and warning procedures. It includes classroom instruction and practical proficiency exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 24 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0402 - Traffic Crash Investigations

This course is a component of the Florida Law Enforcement Academy. It introduces the student to traffic crash investigations, laws pertaining to traffic crashes and procedures for responding to a traffic crash. It includes classroom instruction and practical exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0403 - DUI Traffic Stops

This course is a component of the Florida Law Enforcement Academy. It introduces the student to the basic rules for conducting safe and effective DUI stops, including identifying a driver under the influence of alcohol or drugs, conducting field sobriety tests, and completing a DUI investigation. It includes classroom instruction and practical proficiency exercises. This course is open only to students admitted to the Florida Law Enforcement Academy.

Credit Hour(s): 24 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

CJK 0421 - Conducted Electrical Weapon/Dart-Firing Stun Gun

This course is a component of the Law Enforcement Florida CMS and Correctional Officer Basic Recruit Academies. It is designed to prepare students in the proper use of the Dart Firing Stun in accordance with the Florida State Statutes, the United States Constitution, and case law. It includes classroom instruction and practical physical exercises and demonstrations. This course is open only to students admitted to the Law Enforcement Florida CMS Basic Recruit Academy or Correctional Officer Basic Recruit Academy.

Credit Hour(s): 8 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0020 - Pre-Clinical Procedures Theory

This course is designed to provide an introduction to the dental assisting profession to include orientation to four handed dentistry and general dental office procedures including, but not limited to basic principles of disease prevention, patient data collection and assessment, and instrumentation. Emphasis is on adhering to safety guidelines as specified by OSHA.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Corequisite(s):

DEA 0020L .

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0020L - Pre-Clinical Practice Lab

This is a comprehensive chair side competency based course. The course provides the skills practice necessary for dental assisting students entering four handed dentistry practice including but not limited to infection control, taking and recording vital signs, assisting with operative procedures, principles of preventive dentistry, instrument identification, and use and maintenance of equipment. Emphasis is on aseptic technique and clinical competency with procedures performed in a contemporary dental practice.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Corequisite(s):

DEA 0020 , DES 0103L and DES 0103

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0130 - Oral Pathology

This course is a general study of the scientific and clinical concepts that include additional knowledge base necessary to the practice of dental assisting. Students will study the normal and abnormal conditions of the oral cavity such as dental caries prevention, the dental caries process and recognition of various common pathological conditions. Oral pathology, histology and embryology are included. Emphasis is on the interrelationship of the information presented with the clinical practice of dental assisting.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DES 0400

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved

articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0803L - Clinical Practice I

This competency based clinical course provides a real world setting in which to integrate the laboratory and clinical skills learned in the classroom. The student receives closely supervised hands on training in chair side dental assisting through rotations at community dental offices. Progress is evaluated using predetermined competency guidelines. Students must provide their own transportation, current CPR training, and up-to-date immunization records. Specific procedure requirements and 90 clinical rotation hours (minimum) must be fulfilled to successfully complete this course.

Credit Hour(s): 150 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DEA 0020 , DEA 0020L , DES 0103 , DES 0103L , DES 0400 , DES 0844

Corequisite(s):

DES 0205 , DES 0205L , DES 0830

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0852L - Clinical Practice II

This course is a continuation of Clinical Practice I. It provides a real world setting for students to receive additional training in the clinical skills learned in class. Students are assigned to various offices in the community including but not limited to general dentists, oral surgeons, orthodontists, periodontists, and endodontists. Performance evaluations are utilized to measure competency and provide feedback from the local dental offices to the instructor regarding the students' competency level. Skills are strengthened in Seminar Lab. Students must provide their own transportation, current CPR training, and up-to-date immunization records. Specific procedure requirements and 150 clinical rotation hours (minimum) must be fulfilled to successfully complete this course.

Credit Hour(s): 180 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DES 0205 DES 0205L DEA 0020 DEA 0020L DES 0103 DES 0103L DEA 0803L DES 0400 DES 0844 DES 0602

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DEA 0936 - Dental Assisting Seminar

This course is designed to provide a review of materials commonly covered on the Dental Assisting National Board (DANB) Exam. Topics include but are not limited to infection control, general chair side procedures, and radiographic technique. The seminar will provide a mock board examination, and opportunities for review, problem solving, and strengthening skills. The course also serves as an opportunity for feedback from students' Clinical Practice.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

DEA 0852L , DEA 0803L , DES 0205 , DES 0205L

Corequisite(s):

DEA 0803L , DES 0206L .

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0103 - Dental Materials

This course is a comprehensive study of the theory of manipulation, physical and chemical properties of materials used in the diagnosis, prevention and treatment of oral disease. The competency based lab that accompanies this course includes exercises to illustrate application and use of selected materials. Students will study various materials including but not limited to impression materials, waxes, filled and unfilled resins, dental amalgams, gypsum, as well as acrylic plastics. Students will become familiar with various pieces of dental laboratory equipment and their uses.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Corequisite(s):
DES 0103L

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0103L - Dental Materials Lab

This course is a comprehensive study of the manipulation, physical and chemical properties of materials used in the diagnosis, prevention and treatment of oral disease. Emphasis is on practical application as it relates to the role of the dental assistant in the contemporary dental practice. It is a competency based lab that accompanies the theory course and includes exercises to illustrate application and uses of selected materials. Students practice the use of various materials including but not limited to impression materials, waxes, filled and unfilled resins, dental amalgams, gypsum, and acrylic plastics.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Corequisite(s):
DES 0103

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0205 - Dental Radiology I

This course is designed to introduce the theory, application and principles of radiographic exposure and processing techniques used in dentistry. Students will receive instruction including but not limited to historical data, radiation safety, exposure, processing, mounting and error prevention. Image interpretation of radiographic anatomical structures will be included.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DES 0400 , DEA 0020 , DEA 0020L

Corequisite(s):
DES 0205L .

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college

credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0205L - Dental Radiology Laboratory I

This laboratory course assists students in radiographic performance techniques using DXTR manikins to achieve competency prior to exposure of various patients with varied dentitions. Students practice exposing, mounting, radiographic interpretation, safe darkroom procedures, identification of landmarks and distinguishing radiographic pathology from normal landmarks. Clinical radiographic skills necessary to produce diagnostic quality radiographs including bitewings, periapical radiographs, and panoramic x-rays will be covered. Emphasis is on patient and operator safety guidelines and producing diagnostic quality radiographs.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DES 0400 , DEA 0020 , DEA 0020L

Corequisite(s):
DES 0205 .

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0206L - Dental Radiology Laboratory II

This laboratory course assists students in additional radiographic performance techniques to include surveys on patients with varied dentitions. Students practice advanced radiographic exposure techniques, interpretation, additional darkroom procedures, identification of landmarks and distinguishing various radiographic pathology. Clinical radiographic skills necessary to produce diagnostic quality x-rays including bitewing, radiographs, periapical radiographs, and panoramic surveys on actual patients are implemented. Emphasis is placed on patient and operator safety guideline and producing diagnostic quality radiographs. This course will involve live patients, scheduling appointments and presenting prescriptions for x-rays from local dentist.

Credit Hour(s): 30 Clock Hours When Offered: (Summer) Prerequisite(s):
DES 0400 , DES 0205 , DES 0205L

Corequisite(s):
DES 0206

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0400 - Dental Anatomy

This course provides a detailed study of the orofacial and related structures of the head and neck including, but not limited to the eruption, identification and function of the human dentition, study of bony, circulatory, muscular and nervous systems of the head, neck and surrounding structures associated with the oral cavity. A brief introduction to oral histology and embryology will be included.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0501 - Dental Practice Management

This course includes theory and content relating to practical administrative duties performed in the dental office. Lectures and role playing activities are related to the responsibilities of the dental assistant. Topics include but are not limited to appointment scheduling, billing, collections, record keeping, clerical and dental supply inventory. Students are introduced to the use of dental practice software with hands on computer experience. Legal responsibilities, interpersonal relations, and interview skills are included.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DEA 0020 , DEA 0020L

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0602 - Pharmacology and Dental Office Emergencies

This course is designed to familiarize the dental assisting student with the basic concepts and considerations regarding pharmacology and pharmaceutics used in dentistry. Topics presented include nitrous oxide monitoring, emergency procedures and protocol. Lectures will include recognition of emergency conditions in the dental office, not limited to syncope, anaphylaxis, and cardiovascular incidents. Emphasis is placed on the role of the dental assistant in the prevention and management of dental office emergencies.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DEA 0020

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0830 - Expanded Function Theory

This course introduces the dental assisting student to the dental specialty practices and more advanced clinical skills. It also provides the theory of dental specialty practice administration as it relates to the role of the dental assistant including ethical and legal ramifications. Lectures relate topics including but not limited to dental specialty procedures, instruments used in the specialty practices and duties delegated to dental assistants according to the rules and regulations of the Florida Dental Practice Act. Role playing and problem solving activities using case studies relate to duties delegated to dental assistants.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DEA 0020 , DEA 0020L , DES 0400 , DES 0103 , DES 0103L

Corequisite(s):
DES 0830L

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0830L - Expanded Functions Lab

This laboratory course accompanies the clinical practice lecture course DES 0830 and provides opportunity for students to practice application of the duties delegated to dental assistants according to the Florida Dental Practice Act. Students become more proficient in more advanced skills. Competencies containing information and behavioral objectives allow students to master each skill before advancing to the next.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
DEA 0020 DEA 0020L DES 0103 DES 0103L DES 0400

Corequisite(s):
DES 0830

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

DES 0844 - Infection Control for Dental Assistants

This course is a general study in biomedical sciences of preventive dentistry to familiarize the dental assisting student with basic principles of microbiology, basic body structures, and their functions and effects as manifested in the oral cavity. The course also covers the effects of nutrition and the role of microorganisms in dental health and blood borne pathogens.

Credit Hour(s): 30 Clock Hours When Offered: (Offered as needed) Corequisite(s):
DEA 0020 , DEA 0020L

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 0110 - Emergency Medical Technician

This is an instructional program that prepares students for employment as emergency medical technicians and treat various medical/trauma conditions using appropriate equipment and materials. The program prepares students for certification as EMT's in accordance with Chapter 64J of the Florida Administrative Code. This is the initial level for a career in emergency medical services and the primary prerequisite for paramedic training and certification.

Credit Hour(s): 300 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 0119 - Emergency Medical Technician for Firefighters

Emergency Medical Technician is designed to prepare the student with the necessary fundamental knowledge to be successful in meeting Emergency Medical Technician certification and licensing requirements. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Credit Hour(s): 140 Clock Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Permission of the EMS Director

Corequisite(s):
FFP 0010, FFP 0020, EMS 0119L

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

EMS 0119L - Emergency Medical Technician Lab for Firefighters

This course provides an integrated experience that is designed to allow the student to apply practical experience to material learned in Emergency Medical Technician. Students will learn how to assess, treat and transport the sick and injured at the level of the Emergency Medical Technician-Basic in the laboratory environment, area hospitals and advanced life support EMS ambulances. There is emphasis on assessment based learning and complies with National DOT EMT-Basic curriculum.

Credit Hour(s): 160 Clock Hours When Offered: (Fall, Spring, Summer) Prerequisite(s):
Permission of the EMS Director.

Corequisite(s):
FFP 0010, FFP 0020, EMS 0119

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 0010 - Firefighting I

This course is the first part of the Basic Fire Recruit Academy and prepares students for a career as a volunteer firefighter. Classroom instruction includes a variety of fire related topics which are reinforced and enhanced through practical skills activities. Upon completion, the student is eligible to test for certification as a volunteer firefighter through the Florida State Fire College and may elect to continue training in Firefighter II to pursue state certification as a career firefighter. Permission of the Public Safety Division is required.

Credit Hour(s): 201 Clock Hours When Offered: (Offered as needed) Corequisite(s):
FFP 0077 unless previous certification has been obtained for first responder, EMT, or paramedic.

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 0020 - Firefighting II

This course is the second part of the Basic Fire Recruit Academy and prepares students for a career as a firefighter. The delivery of instruction includes a variety of training in practical skills necessary for the mastery of the basic competencies required in the program. Upon successful completion of this course, the student is eligible to take the Bureau of Fire Standards and Training written and practical examination. Permission of the Public Safety Division is required.

Credit Hour(s): 295 Clock Hours When Offered: (Offered as needed) Prerequisite(s):

FFP 0010 or FFP 0077

Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

FFP 0077 - First Responder for Public Safety Personnel

This course trains public safety members who are the first to arrive at an emergency in providing efficient and accurate pre-hospital care. Students assess patients for wounds to determine if trauma, shock, burns or closed airways are a problem and how to address those issues by dressing wounds, stabilizing the person or administering oxygen. They immobilize patients and address common emergency medical issues with basic treatments. This course includes hands-on, practical experience and is necessary to be eligible for first responder certification.

Credit Hour(s): 45 Clock Hours When Offered: (Fall, Spring, Summer) Note:

This course is a co-requisite course for students entering the Firefighting Certificate program who do not have certification for first responder, EMT, or paramedic.

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0106C - Welder Helper

This course provides instruction in shop safety, the use of safety procedures and protective equipment needed in a welding shop. Course incudes basic shop math, shop safety, welding equipment setup/teardown procedures.

Credit Hour(s): 150 Clock Hours When Offered: (Fall, Spring) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0121C - Basic Shielded Metal Arc Welding (SMAW)

This course provides instruction and demonstration using shielded metal arc welding (SMAW). Topics include visually inspect of welds, and basic SMAW technical terminology. Basic structural welding techniques will be demonstrated in accordance with American Welding Society (AWS) D1.1 structural welding code. Tack welding and metal joint fit of carbon steel is covered in this course.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0126C - Intermediate Shielded Metal Arc Welding (SMAW)

This course will enable the student to identify metals using visual, magnetic and spark methods, identify and interpret welding symbols, demonstrate the ability to identify and use the correct filler metals and shielding gases and fabricate parts from a drawing or sketch using intermediate SMAW techniques.

Credit Hour(s): 90 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
PMT 0122C [Inactive]

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0127C - Advanced Shielded Metal Arc Welding (SMAW)

This course will provide the student with hands-on skills performing tests, examining metal surfaces, and setting up shielded metal arc (SMAW) equipment to make groove welds, all positions on plain carbon steel. The student will perform lab/shop procedures to safely prepare the area, demonstrating the ability to identify and use filler metals and shielding gases as well as performing visual and destructive analysis in the qualification testing of welds on carbon steels.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Prerequisite(s):
PMT 0126C

Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0134C - Gas Metal Arc Welding (GMAW)

An introduction to metal inert gas welding (MIG). Emphasizes the principles involved in the operating of MIG equipment.
A beginning course in welding principles of MIG.

Credit Hour(s): 60 Clock Hours When Offered: (Offered as needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0137C - Gas Tungsten Arc Welding

An advanced course in welding principles of TIG welding.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as Needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0143C - Flux-Core Arc Welding

Students will be able to make quality welds using the FCAW in the flat, horizontal, vertical and over-head positions. This course also includes instructions in metal transfer and shielding gases associated with the FCAW process. Students will use information contained in the textbook, instructions, and demonstrations by the instruction.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as Needed) Note:
*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved

articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0153C - Metal Preparation and Thermal Cutting Processes

This course enables the student to set up, inspect, operate, and perform oxy/fuel cutting equipment, air carbon arc and plasma arc cutting activities. Students will learn methods for piercing, slotting, squaring, and beveling plain carbon steel, aluminum, and stainless steel.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0165C - Shielded Metal Arc Weld (SMAW) Pipe Welding

This course emphasizes principles of welding pipe using the shielded metal arc (SMAW) process. Fabrication and welding of pipe in the 1, 2, 5, and 6 g positions are stressed.

Credit Hour(s): 210 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0172C - Gas Tungsten Arc / Shielded Metal Arc (Combo) Pipe Welding

This course emphasizes principles of welding pipe using the gas tungsten arc (GTAW) process combined with the shielded metal arc (SMAW) process. Fabrication and welding of various size and thickness pipe in the 1, 2, 5, and 6 g positions are stressed.

Credit Hour(s): 270 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

PMT 0173C - Specialty Pipe Welding

This course presents technical information on gas tungsten arc welding preparation for welding pipe and pipe welding defects. The training develops the manual skills necessary to produce high quality groove welds on stainless steel pipe in the 2g, 5g and 6g positions.

Credit Hour(s): 120 Clock Hours When Offered: (Offered as needed) Note:

*Vocational courses are not applicable to the A.A. or A.S. degree or to the College Credit Certificate without an approved articulation agreement. Vocational courses, offered in clock hours, are courses that can be used for the awarding of Career and Technical or Vocational Certificates. In addition, vocational courses may be articulated to college credit and applied to college credit certificates or A.S. degree programs. Students should work closely with an advisor to plan their studies in a way to take advantage of this opportunity.

TRA 0080 - Tractor Trailer Truck Driver

This course prepares students for entry into the trucking and logistics industry. Students explore career opportunities and requirements of a professional tractor trailer driver. Students study vehicle safety, accident prevention, operating regulations, cargo handling, documentation procedures, pre-trip preparation, vehicle inspection, maintenance, service, control procedures, backing, coupling, uncoupling, maneuvering, road and hazardous driving skills, and licensing requirements.

Credit Hour(s): 320 Clock Hours When Offered: (Spring)

TRA 0086 - Tractor Operator

This course is designed to build on the skills and knowledge students learned in the Heavy Equipment Maintenance Technician course for entry into the Heavy Equipment Operations industry. Content emphasizes beginning skills and concepts as a recommended requisite. Students study pneumatic and crawler-type tractor operations.

Credit Hour(s): 150 Clock Hours When Offered: (Fall)

TRA 0650 - Natural Gas Distribution I

This course prepares students for work as general technicians in the natural gas distribution industry. Students learn to comply with safety procedures, operate basic tools and equipment and provide customer assistance.

Credit Hour(s): 75 Clock Hours When Offered: (Fall)

TRA 0650B - Natural Gas Distribution IB

This course is prepares students for work as general technicians in the natural gas distribution industry. Students learn to comply with safety procedures, operate basic tools and equipment and provide customer assistance. This course continues the knowledge acquired in the TRA0650.

Credit Hour(s): 75 Clock Hours When Offered: (Fall)

TRA 0651 - Natural Gas Distribution II

This course prepares students for work as general technicians in the natural gas distribution industry. Students complete customer compliance orders and assist in inspections. Content includes construction mathematics and reading.

Credit Hour(s): 150 Clock Hours When Offered: (Fall) Prerequisite(s):
TRA 0650

TRA 0652 - Natural Gas Distribution III

This course prepares students for work as general technicians in the natural gas distribution industry. Students complete customer compliance orders and assist in inspections. Content includes construction mathematics and reading.

Credit Hour(s): 150 Clock Hours When Offered: (Fall)
